M-56; 0 3 C, 0 45 Mn, 4.25 Ni, 1.25 Cr, 0.25 Mo, bal Fe.
For shafts, gears; formerly "Atlas AHNC."

FIRTH BROWN B-20.
M-56; C, 1.4 Mn, bal Fe.
78,400-112,000 TS.
For medium tensile shafts and gears.

FIRTH BROWN B-21.
M-56; high C, 1.0 Ni, bal Fe.
196-255 Zrin.
For die blocks; oil hardened.

FIRTH BROWN B-22.
M-56; C, 3.5 Ni, bal Fe.
89,600-123,000 TS.
For alternator rotors, and marine gear wheel rims, shafts in electrical and turbine equipment; tough.

FIRTH BROWN B-23.
M-56; high C, 1.5 Ni, Cr, bal Fe.
207-285 Brin.
For die blocks; shock resistant.

FIRTH BROWN B-24.
M-56; C, 3.5 Ni, Cr, bal Fe.
112,000-140,000 TS.
For die blocks, shafts; shock resistant.

FIRTH BROWN B-25 (ATLAS S.P. STEEL).
M-56 C, 3.5 Ni, Mo, bal Fe.
123,000-145,000 TS.
For heavy road vehicle axles; tough.

FIRTH BROWN B-26.
M-56; 0.4-0.5 C, Ni, Cr, Mo, bal Fe.
123,000-145,000 TS.
For high pressure steam and air vessels, shafts, axles; tough.

FIRTH BROWN B 27.
M-56, high C, Ni, Cr, Mo, bal Fe.
269-364 Brin.
For die blocks; tough.

FIRTH BROWN B-28 (FIRTH ROLL STEEL) (ATLAS DIE RING STEEL).
M-56; C, Cr, bal Fe.
321-402 Brin.
For rolls, die rings; water hardened.

FIRTH BROWN B-29 (FIRTH SHOE & DIE STEEL).
M-56; 0.55 C, 0.65 Cr, bal Fe.
For shoes and dies for ore reduction stamp batteries; oil hardened.

FIRTH BROWN B-30 (FIRTH S.H.B.) (ATLAS BALL RACE STEEL).
M-56, 1.0 C, 1.2 Cr, bal Fe.
For ball races, balls, rollers; water hardening.

FIRTH BROWN B45CH
M-56; 0.15 C, 0.60 Ni, 0.65 Cr, 0.12 Mo, bal Fe.
For gears, cams, camshafts, fasteners; case hardened, EN361

FIRTH BROWN B55CH.
M-56; 0.20 C, 0.65 Cr, 0.60 Ni, 0.12 Mo, bal Fe.
For gears, cams, camshafts, machinery parts; case hardened, EN362.

FIRTH BROWN B65CH.
M-56; 0.24 C, 0.60 Ni, 0.65 Cr, 0.12 Mo, bal Fe.
For gears, cams, camshafts, case hardened, EN363.

FIRTH-BROWN BEST C. S.
M-56; 0.7-1.4 C, bal Fe.
Hardened: 500-700 Brin.
For hammers, tools, drills, chisels; cheap tool steel "Firth Brown L-222."

FIRTH-BROWN BRB.
M-56; 1.4 C, 0.35 Si, 0.4 Mn, 0.75 Cr, 5 W, bal Fe
For tools, dies, drawing dies; oil hardening.

FIRTH BROWN C-40 (ATLAS A.T.C. 20).
M-56; 0.20 C, bal Fe.
56,000-78,000 TS.
For wire, tubes, parts for automobiles and airplanes; high ductility.

FIRTH BROWN C-42 (ATLAS A.T.C. 40).
M-56; 0.40 C, bal Fe.
78,000-98,000 TS.
For airplane and automobile parts, wire, tubes; tough.

FIRTH BROWN C-44 (FIRTH F.T. 50) (ATLAS A.T.C. 55).
M-56; 0.5-0.6 C, bal Fe.
100,000-123,000 TS.
For aircraft cylinders.

FIRTH BROWN C-45 (ATLAS A.T.C. 75).
M-56; 017-0.8 C, bal Fe.
196-255 Brin.
For clutch plates; wear resistant.

FIRTH-BROWN CAST STEEL.
M-56; 0.7-1.4 C, bal Fe.
Hardened: 500-700 Brin.
For turning, planning and slotting dies, shaping tools, wood saws, axes, scythes, drills; tool steel intermediate quality "Firth Brown L-221."

FIRTH BROWN CAST STEEL WARRANTED.
M-56; 0.70-1.4 C, 0.15 Si, 0.30 Mn, bal Fe.
For drills, reamers, broaches, hobs; Type W1; water hardened.

FIRTH-BROWN CCR 1.
M-56; 0.85 C, 0.3 Mn, 1.8 Cr, bal Fe.
For tools, dies; oil hardening.

FIRTH-BROWN CCR 2
M-56; 1.0 C, 0.45 Mn, 1.4 Cr, bal Fe.
For tools, dies; oil or water hardening.

FIRTH-BROWN CCRF.
M-56; 0.42 C, 0.3 Si, 0.7 Mn, 0.9 Cr, bal Fe.
For gears, shafts, bolts; water hardening.

FIRTH-BROWN CCW.
M-56; 0.52 C, 0.7 Si, 0.55 Mn, 1.2 Cr, 2.3 W, bal Fe.
For tools, dies; hot work steel.

FIRTH-BROWN CDD.
M-56; 1.9 C, 0.15 Si, 0.25 Mn, 0.6 Cr, 6 W, bal Fe.
For tools, dies, drawing dies; oil hardening

FIRTH BROWN CHROMVA-W.
M-56; 0.17 C, 0.30 Si, 0.30 Mn, 2.75 Cr, 0.60 Mo, 0.70 V, 0.50 W, bal Fe.
For elevated temperature applications.

FIRTH-BROWN CMCR.
M-56, 0.85 C, 0.8 Mn, 0.8 Cr, bal Fe.
For tools, dies; oil hardened.

FIRTH-BROWN CMN1.
M-56; 0.25 C, 1.5 Mn, bal Fe.
For gears, shafts; water hardening.

FIRTH-BROWN CMN 2.
M-56; 0.35 C, 1.5 Mn, bal Fe.
For gears, shafts; water hardening.

FIRTH-BROWN CR1T.
M-56; 0.52 C, 0.25 Si, 0.7 Mn, 0.45 Cr, bal Fe
For railway tires, wheels.

FIRTH-BROWN CR2T.
M-56; 0.6 C, 0.25 Si, 0.7 Mn, 0.45 Cr, bal Fe.
For railway tires, wheels.

FIRTH-BROWN CR3T.
M-56; 0.65 C, 0.25 Si, 0.7 Mn, 0.45 Cr, bal Fe.
For railway tires, wheels.

FIRTH-BROWN CR4T.
M-56; 0.72 C, 0.25 Si, 0.7 Mn, 0.45 Cr, bal Fe.
For railway tires, wheels.

FIRTH-BROWN CRM1.
M-56; 0.4 C, 0.65 Mn, 1.2 Cr, 0.25 Mo, bal Fe.
For gears, shafts, bolts; oil hardening.

FIRTH-BROWN CRM2.
M-56; 0.4 C, 0.6 Mn, 1.3 Cr, 0.85 Mo, bal Fe.
For gears, shafts, bolts; tough, oil hardening.

FIRTH-BROWN CRM3.
M-56; 0.27 C, 0.6 Mn, 3.25 Cr, 0.6 Mo, bal Fe.
For gears, shafts, machinery parts; oil hardened, tough.

FIRTH-BROWN CRM4.
M-56; 0.3 C, 0.6 Mn, 2.75 Ni, 0.6 Mo, bal Fe.
For gears, shafts; tough.

FIRTH BROWN CRM5.
M-56; 0.13 C, 0.25 Si, 0.40 Mn, 5.25 Cr, 0.55 Mo, bal Fe.
For oil refinery equipment; creep and corrosion resistant, high temperature use.

FIRTH BROWN CRM6.
M-56; 0.12 C, 2.25 Cr, 1.0 Mo, 0.45 Mn, 0.20 Si, bal Fe.
For oil refinery equipment; creep and corrosion resistant.

FIRTH BROWN CRMO.
M-56; 0.10 C, 0.40 Si, 0.50 Mn, 0.85 Cr, 0.50 Mo, bal Fe.
For oil refinery equipment; creep resistant, high temperature use.

FIRTH-BROWN CRV1.
M-56; 0.47 C, 0.25 Si, 0.65 Mn, 0.85 Cr, 0.2 V, bal Fe.
For laminated springs; oil hardening.

FIRTH-BROWN CRV2.
M-56; 0.45 C, 0.25 Si, 0.65 Mn, 1.25 Cr, 0.2 V, bal Fe.
For laminated springs; oil hardening.

FIRTH-BROWN CRV3.
M-56; 0.35 C, 1.25 Cr, 0.2 V, bal Fe
For forgings; formerly Atlas ATCV.

FIRTH-BROWN CRWC.
M-56; 0.34 C, 0.9 Si, 0.25 Mn, 5.5 Cr, 4.7 W, 0.5 Co, bal Fe.
For tools, dies; hot work steel.

FIRTH-BROWN CVW3.
M-56; 1.35 C, 0.15 Si, 0.30 Mn, 0.5 V, 3.75 W, bal Fe.
For tools, dies, drawing dies; oil hardening.

FIRTH BROWN D-60 (ATLAS A.T.M.N.).
M-56; 0.4 C, 1.4 Mn, bal Fe.
89,000-112,000 TS.
For automobile crankshafts, front axles, swivel axles, spindles; oil hardening.

FIRTH BROWN D-62 (FIRTH F.N. 3.5). (ATLAS A.T.N.X.).
M-56; 0.4 C, 3.5 Ni, bal Fe.
123,000-145,500 TS.
For aircraft and automobile connecting rods and axles; shock resistant.

FIRTH BROWN D-63 (FIRTH F.N. 5).
M-56; 0.4 C, 5 Ni, bal Fe.
90,000-123,000 TS.
For turbine blading and shrouding strip; tough

FIRTH BROWN D-65 (ATLAS A.T.C.V.).
M-56; C, Cr, V, bal Fe.
112,000 TS.
For machine parts, flat valves; oil hardening.

FIRTH BROWN DICROME.
M-56; 0.60 C, 0.60 Cr, 0.60 Mn, 0.25 Si, bal Fe.
For machine tool parts; oil hardened.

FIRTH BROWN E-80 (DURATLAS).
M-56; 0.4 C, 2.5 Ni, Cr, Mo, bal Fe.
134,000-224,000 TS.
For automobile crankshafts, axles, gears; oil hardening.

FIRTH BROWN E-82 (FIRTH BOLT STEEL).
M-56; C, 3.5 Ni, Cr, Mo, bal Fe.
145,000-168,000 TS.
For bolts, flanges; tough.

FIRTH BROWN E-83 (ATLAS N.C. 100).
M-56; 0.4 C, Ni, Cr, bal Fe.
224,000 TS.
For gears; oil hardening.

FIRTH-BROWN EXTRA CS.
M-56; 0.7-1.4 C, bal Fe.
Hardened: 500-700 Brin.
For finishing tools, drills, milling cutters, reamers, razors, punches, surgical instruments, taps, needles; tool steel "Firth Brown L-220."

FIRTH BROWN F10C.
M-56, 0.10 C, 0.25 Si, 0.65 Mn, bal Fe.
Annealed: 64,000 TS; 40,000 YS; 28 El; 65 RA; 130 Brin.
For nails, rivets, fan blades, case hardened parts; case hardened.

FIRTH BROWN F15C.
M-56; 0.15 C, 0.25 Si, 0.65 Mn, bal Fe.
Annealed: 70,000 TS; 45,000 YS; 25 El; 60 RA, 145 Brin.
For screws, bolts, case hardened parts; case hardened.

FIRTH BROWN F20C.
M-56, 0.20 C, 0.25 Si, 0.65 Mn, bal Fe.
Annealed: 73,000 TS; 45,000 YS; 22 El; 58 RA; 150 Brin.
For screws, bolts, gears, case hardened parts, case hardened.

FIRTH BROWN F25C
M 56; 0.25 C, 0.25 Si, 0.65 Mn, bal Fe.
Hot rolled: 70,000 TS; 45,000 YS; 31 El; 58 RA; 145 Brin
For crankshafts, gears, bolts, fasteners; water hardened.

FIRTH-BROWN F30C.
M-56; 0.32 C, 0.25 Si, 0.65 Mn, bal Fe
For axles

FIRTH BROWN F35C.
M-56; 0.35 C, 0.25 Si, 0.65 Mn, bal Fe.
Hot rolled: 85,000 TS; 54,000 YS, 30 El; 53 RA, 183 Brin.
For gears, shafts, axles, bolts; water hardened.

FIRTH BROWN F40C.
M-56, 0.40 C, 0.25 Si, 0.65 Mn, bal Fe.
Hot rolled: 91,000 TS; 58,000 YS; 27 El; 50 RA; 200 Brin
For gears, shafts, axles, bolts, crankshafts; water hardened.

FIRTH BROWN F45C.
M-56, 0.45 C, 0.25 Si, 0.65 Mn, bal Fe.
Hot rolled: 98,000 TS; 59,000 YS; 24 El; 45 RA; 212 Brin.
For gears, shafts, bolts, axles, crankshafts; water hardened.

FIRTH BROWN F45CH.
M-56; 0.15 C, 0.25 Si, 0.70 Mn, 0.80 Ni, 0.60 Cr, bal Fe.
For gears, pinions, shafts, cams, camshafts; case hardened; Brit EN351; shock resistant.

FIRTH BROWN F50C.
M-56; 0.50 C, 0.25 Si, 0.65 Mn, bal Fe.
Annealed: 96,000 TS; 52,000 YS; 16 El; 23 RA; 170 Brin.
For gears, shafts, bolts, axles, crankshafts; water hardened.

FIRTH-BROWN F55C.
M-56; 0.55 C, 0.7 Mo, bal Fe.
For springs; water hardening.

FIRTH BROWN F55CH.
M-56; 0.18 C, 0.25 Si, 0.70 Mn, 1.0 Ni, 0.80 Cr, bal Fe.
For gears, pinions, cams, camshafts, machine tool parts; case hardened; Brit. EN352; shock resistant.

FIRTH BROWN F60C.
M-56; 0.60 C, 0.25 Si, 0.65 Mn, bal Fe.
Heat treated: 160,000 TS; 113,000 YS; 12 El; 40 RA; 320 Brin.
For die blocks, girders, clutch discs; water hardened

FIRTH BROWN F65C.
M-56; 0.65 C, 0.25 Si, 0.65 Mn, bal Fe.
Heat treated. 170,000 TS; 116,000 YS, 10 El; 38 RA, 350 Brin.
For die blocks, girders, clutch discs, water hardened

FIRTH BROWN F65CH.
M-56; 0.18 C, 0.25 Si, 0.70 Mn, 1.3 Ni, 1.0 Cr, 0.10 Mo, bal Fe.
For gears, pinions, camshafts, cams, machinery parts, case hardened; Brit EN353, shock resistant.

FIRTH BROWN F70C.
M-56, 0.70 C, 0.25 Si, 0.65 Mn, bal Fe.
Heat treated: 174,000 TS; 128,000 YS; 12 El, 37 RA; 352 Brin.
For springs, rails, die blocks, girders; water hardened.

FIRTH-BROWN F75C.
M-56; 0.75 C, 0.65 Mn, bal Fe.
For springs; water hardening.

FIRTH BROWN F75CH.
M-56; 0.18 C, 0.25 Si, 0.70 Mn, 1.75 Ni, 1.0 Cr, 0.15 Mo, bal Fe.
For gears, cams, camshafts, machine tool parts, case hardened, Brit EN354, shock resistant.

FIRTH BROWN F85C.
M-56, 0.85 C, 0.25 Si, 0.65 Mn, bal Fe.
Heat treated. 190,000 TS, 145,000 YS, 12 El; 35 RA; 390 Brin.
For drills, punches, springs, reamers, hobs, Type W1; water hardened.

FIRTH BROWN F85CH
M-56, 0.18 C, 0.25 Si, 0.70 Mn, 2 Ni, 1.6 Cr, 0.2 Mo, bal Fe.
For gears, cams, machine tool parts; case hardened; Brit. EN355; shock resistant.

FIRTH-BROWN F95C.
M-56; 0.95 C, 0.6 Mn, bal Fe.
For springs; water hardening.

FIRTH BROWN F-103 (ATLAS N.C.C.H.).
M-56; C, 3 Ni, Cr, bal Fe.
123,000 TS.
For automobile camshafts, overhead valve gear, timing wheels; tough.

FIRTH-BROWN F543.
M-56; 0.09 C, 0.6 Si, 0.6 Mn, 4.8 Ni, 3.9 Cr, 3 Mo, bal Fe.
For tools, dies.

FIRTH-BROWN FCCH.
M-56; 0.14 C, 0.6 Mn, bal Fe.
For shafts, gears; formerly "Atlas CCH;" case hardening.

FIRTH BROWN FCCR.
M-56; 0.45 C, 0.25 Si, 0.90 Mn, 0.95 Cr, bal Fe.
For gears, bolts, crankshafts; water hardened.

FIRTH-BROWN FCMO.
M-56; 0.3 C, 0.75 Mn, 0.6 Mo, bal Fe.
For gears, shafts; water hardening.

FIRTH-BROWN FCVA.
M-56; 1.08 C, 0.1 Si, 0.2 Mn, 0.15 V, bal Fe.
For tools, dies, drills, taps; water hardening.

FIRTH-BROWN FCW5.
M-56; 1.35 C, 0.15 Si, 0.35 Mn, 5 W, bal Fe.
For tools, dies, drawing dies; oil hardening.

FIRTH-BROWN FN15.
M-56; 0.6 C, 0.65 Mn, 1.25 Ni, bal Fe.
For shafts; formerly "Atlas ND."

FIRTH-BROWN FN30.
M-56; 0.3 C, 0.65 Mn, 3 Ni, bal Fe.
For gears, shafts; tough.

FIRTH-BROWN FN35.
M-56, 0.3 C, 0.6 Mn, 3.6 Ni, bal Fe.
For gears shafts; oil hardening, tough.

FIRTH-BROWN FN50.
M-56, 0.2 C, 0.5 Mn, 5 Ni, bal Fe.
For gears, bolts, shafts; case hardening.

FIRTH-BROWN FNCF
M-56; 0.35 C, 0.35 Si, 0.8 Mn, 1.75 Ni, 0.75 Cr, bal Fe.
For gears, punches, shafts; oil hardening.

FIRTH BROWN FNCR.
M-56, 0.35 C, 1.25 Ni, 0.60 Cr, bal Fe.
For gears, pinions, bolts, machinery parts; Brit EN111; oil hardened, tough.

FIRTH BROWN FNMC
M-56; 0.65 C, 0.3 Si, 5.2 Mn, 12 Ni, 3.7 Cr, bal Fe.
For heat and corrosion resistant parts; non-magnetic, austenitic.

FIRTH-BROWN FPRF.
M-56; 1.1 C, 0.4 Si, 1 Mn, 0.9 Ni, 3.25 Cr, 0.35 Mo, bal Fe.
For tools, dies, oil hardening

FIRTH BROWN G-120 (NITRALLOY GRADE 1).
M-56; 0.45-0.55 C, Cr, Al, bal Fe.
156,000-202,000 TS.
For nitrided rolls, die blocks; nitriding steel

FIRTH BROWN G-121.
M-56; 0.35-0.45 C, 1.1 Al, 0.2 Mo, 1.5 Cr, bal Fe.
Rolled: 123,000-145,000 TS.
For nitrided rolls, brick press plates, crankshafts, camshafts.
Nitriding steel. Wear resistant.

FIRTH-BROWN G-122.
M-56; 0.26-0.35 C, Cr, Al, bal Fe.
89,000-123,000 TS.
For pump rods, crankshafts, camshafts; nitriding steel.

FIRTH BROWN G-123 (NITRALLOY GRADE 7).
M-56; 0.20-0.26 C, Cr, Al, bal Fe.
78,000-100,000 TS.
For elevator parts, low stressed nitrided parts; nitriding steel.

FIRTH BROWN GK3.
M-56, 0.35 C, 0.30 Si, 0.50 Mn, 2.0 Cr, 0.25 Mo, 0.15 V, bal Fe
For crankshafts, oil refinery equipment; oil hardened, creep resistant.

FIRTH BROWN GK5.
M-56; 0.25 C, 0.30 Si, 0.50 Mn, 2.0 Cr, 0.25 Mo, 0.15 V, bal Fe.
For crankshafts, oil refinery equipment; oil hardened, creep resistant.

FIRTH BROWN GK7.
M-56; 0.18 C, 0.30 Si, 0.50 Mn, 2.0 Cr, 0.25 Mo, 0.15 V, bal Fe
For oil refinery equipment; creep resistant, high temperature use.

FIRTH BROWN H-140.
M56; C, bal Fe.
For laminated springs.

FIRTH BROWN H-141.
M-56; C, bal Fe.
For helical springs; oil hardening.

FIRTH BROWN H-142.
M-56; C, Cr, bal Fe.
For springs; oil hardening.

FIRTH BROWN H-143.
M-56; C, Cr, bal Fe.
For helical springs; oil hardening.

FIRTH BROWN H-144.
M-56; C, Cr, V, bal Fe.
For springs; oil hardening.

FIRTH BROWN H-145.
M-56; C, Si, Mn, bal Fe.
67,000-83,000 TS.
For springs; hardened by heat treatment.

FIRTH BROWN HACKSAW.
M-56; 1 2 C, 1.25 W, 0.25 Mn, 0.25 Si, bal Fe.
For hacksaws, cutters; water hardened.

FIRTH BROWN HCM3.
M-56; 0.40 C, 3 Cr, 1.0 Mo, 0.25 V, bal Fe.
For oil refinery equipment; Brit. EN40C; creep resistant.

FIRTH BROWN HCM5.
M-56; 0 30 C, 3 Cr, 0.4 Mo, bal Fe
For oil refinery equipment; Brit. EN40B; creep resistant.

FIRTH BROWN HCM7.
M-56; 0.20 C, 3 Cr, 0.4 Mo, bal Fe.
For oil refinery equipment; Brit. EN40A; creep resistant.

FIRTH-BROWN HDBS.
M-56; 0.36 C, 0.35 Si, 0.3 Mn, 3 6 Cr, 0.25 V, 3 W, bal Fe.
For tools, dies; hot work steel.

FIRTH BROWN I-163 (SAITIE).
M-56, M-521; C, 18 Cr, 2 Ni, bal Fe.
112,000-134,000 TS.
For pump spindles, propeller shafts, bolts, nuts, seaplane fittings; magnetic, stainless.

FIRTH BROWN L-223 (FIRTH "T" BRAND).
M-56; 0.5-0.7 C, bal Fe.
For smiths tools, set screws, keys; electric steel.

FIRTH BROWN L-225 (FIRTH TEXTILE SPINDLE).
M-56; C, bal Fe.
For textile spindles; crucible steel.

FIRTH BROWN LCMO.
M-56; 0.17 C, 0.25 Si, 0.45 Mn, 0.50 Mo, bal Fe.
For gears, bolts, camshafts, cams; case hardened, tough.

FIRTH-BROWN M13F.
M-56; 1.1 C, 0.7 Si, 13 Mn, 1 Cr, bal Fe.
For wear resistant parts; wear resistant, austenitic.

FIRTH BROWN M-241 (FIRTH T.M.S.).
M-56; C, alloy, bal Fe.
For taps and dies, punches, jigs; non-shrinking electric steel.

FIRTH BROWN M-242 (FIRTH M.C.T.).
M-56; C, alloy, bal Fe.
For taps and dies, punches, jigs; non-shrinking crucible steel.

FIRTH BROWN M-243 (TRUTAP).
M-56; C, alloy, bal Fe.
For taps and dies, punches, tools; non-shrinking electric steel.

FIRTH BROWN M-244 (ATLAS SELF-HARDENING CHISEL).
M-56; C, Ni, Cr, bal Fe.
For hand and pneumatic chisels; shock resistant.

FIRTH BROWN M-245 (FIRTH EXTRA W.C.S.).
M-56; C, 1.0 W, bal Fe.
For hand and pneumatic tools; crucible steel.

FIRTH BROWN M-246 (FIRTH W.C.S.).
M-56; C, 1.0 W, bal Fe.
For hand and pneumatic tools; crucible steel.

FIRTH BROWN M-247 (FIRTH T.D C.) (BROWN'S SPECIAL X PUNCH).
M-56; C, 1.0 W, bal Fe.
For hand and pneumatic tools; electric steel.

FIRTH BROWN M-248 (FIRTH HACKSAW STEEL)
M-56 C, W, bal Fe.
For hacksaws; water hardening

FIRTH BROWN M-249 (FIRTH EXTRA SUPERIOR).
M-56; C, 3 5 W, bal Fe.
For special roll turning tools, tools for rifling gun barrels, boring cylinders and expanding tubes; crucible steel.

FIRTH BROWN M-250 (WOLFRAM C S.).
M-56, C, 3 5 W, bal Fe.
For special roll turning tools, tools for rifling gun barrels, boring cylinders, expanding tubes, crucible steel.

FIRTH BROWN M-251 (LASCUT)
M-56, C, 3.5 W, bal Fe.
For special roll turning tools, tools for rifling gun barrels, boring cylinders, expanding tubes; electric steel.

FIRTH BROWN M-252 (FIRTH 5 C S).
M-56; C, 5 W, bal Fe.
For cold drawing dies for wire and for roll turning tools; crucible steel.

FIRTH BROWN M-253 (FIRTH C Y.W.).
M-56; C, 3.5 Cr, bal Fe.
For hot working dies and coal cutters; tough.

FIRTH BROWN M-255 (FIRTH EXTRA HARD SHEET)
M-56; C, Cr, W, bal Fe.
For cold metal saws, crucible steel.

FIRTH BROWN M-256 (FIRTH C.C.W.).
M-56, C, low W, Cr, bal Fe
For hand and pneumatic chisels, rivet snaps, punches, coal picks, caulking tools; crucible steel.

FIRTH BROWN M-258 (STANSLOG).
M-56, C, low W, Cr, bal Fe.
For hand and pneumatic chisels, rivet snaps, punches, coal picks, caulking tools; electric steel.

FIRTH BROWN M-259 (FIRTH B.R.B.).
M-56; C, medium W, Cr, bal Fe.
For heavy duty barrel boring tools, rifling tools; crucible steel.

FIRTH BROWN M-260 (C.D.D.).
M-56; C, medium W, Cr, bal Fe.
For dies for working of brass and copper; crucible steel.

FIRTH BROWN M-262 (DYLASTA).
M-56; C, high W, Cr, bal Fe.
For hot and cold stamping dies for brass and copper, hot rivet unit and bolt dies, extruding dies; electric steel.

FIRTH-BROWN MCMT.
M-56; 0.36 C, 0.25 Si, 1.25 Mn, 0.7 Cr, 0.45 Mo, bal Fe.
For railway tires, wheels.

FIRTH-BROWN MCT.
M-56; 0.95 C, 0.25 Si, 1.1 Mn, 0.5 W, 0.5 Cr, bal Fe .
For bearings, punches, dies, crimpers, cutters; oil hardened, non-deforming.

FIRTH-BROWN MMO1.
M-56; 0.32 C, 1.6 Mn, 0.27 Mo, bal Fe.
For gears, shafts; oil hardening.

FIRTH-BROWN MMO2.
M-56; 0.33 C, 1.6 Mn, 0.4 Mo, bal Fe.
For gears, shafts; oil hardening.

FIRTH-BROWN MMOF.
M-56; 0.26 C, 0.35 Si, 1.5 Mn, 0.35 Mo, bal Fe.
For gears, shafts; water hardening.

FIRTH-BROWN MN1F.
M-56; 0.26 C, 0 35 Si, 1.5 Mn, bal Fe.
For gears, shafts

FIRTH-BROWN MN3F
M-56, 0.42 C, 0 35 Si, 1.4 Mn, bal Fe.
For gears, shafts, punches; oil hardening.

FIRTH-BROWN MO1F.
M-56, 0 2 C, 0 35 Si, 0 8 Mn, 0.65 Mo, bal Fe.
For gears, shafts, case hardening.

FIRTH BROWN MOVA(1).
M-56; 0 10 C, 0.25 Si, 0.50 Mn, 0 70 Mo, 0.25 V, bal Fe
For oil refinery equipment; elevated temperature use

FIRTH BROWN MOVA(2).
M-56, 0 20 C, 0 25 Si, 0.50 Mn, 0.70 Mo, 0.25 V, bal Fe.
For high temperature applications.

FIRTH-BROWN NIMCH.
M-56; 0.10 C, 0.5 Ni, 0.2 Mo, 0.3 Mn, bal Fe.
For gears, shafts; formerly "Fibratlas"; case hardening.

FIRTH-BROWN N2MCH.
M-56, 0 17 C, 0 5 Mn, 1.8 Ni, 0 25 Mo, bal Fe.
For gears, shafts; case-hardening.

FIRTH-BROWN N3CCH.
M-56; 0.12 C, 0.4 Mn, 3.3 Ni, 0 8 Cr, bal Fe.
For gears, shafts; case-hardening, tough.

FIRTH-BROWN N3CH.
M-56, 0.14 C, 0.25 Si, 0.4 Mn, 3.1 Ni, bal Fe.
For gears, shafts; case hardening.

FIRTH BROWN N3CMCH
M-56; 0.12 C, 3.3 Ni, 0.80 Cr, 0.20 Mo, bal Fe
For gears, shafts, machinery parts, cams; case hardened, shock resistant.

FIRTH-BROWN N4CCH.
M-56; 0.14 C, 0.4 Mn, 4 25 Ni, 1.25 Cr, bal Fe.
For gears, shafts; case-hardening, tough.

FIRTH BROWN N4CMCH.
M-56; 0.14 C, 4.25 Ni, 1.25 Cr, 0.25 Mo, bal Fe.
For gears, shafts, camshafts, cams, bolts; case hardened, shock resistant.

FIRTH-BROWN N5CH.
M-56; 0.10 C, 0.3 Mn, 5 Ni, bal Fe.
For gears, shafts; case-hardening, tough.

FIRTH-BROWN N5MCH.
M-56; 0.12 C, 0.4 Mn, 5.1 Ni, 0.2 Mo, bal Fe.
For gears, shafts; case-hardening, shock resistant.

FIRTH-BROWN NCM1.
M-56; 0.4 C, 0.6 Mn, 1.6 Ni, 1.0 Cr, 0.5 Mo, bal Fe.
For gears, shafts, bolts; shock resistant, heavy duty.

FIRTH-BROWN NCM2.
M-56; 0.6 C, 0.65 Mn, 1.5 Ni, 0.7 Cr, 0.25 Mo, bal Fe.
For gears, shafts; heavy duty.

FIRTH-BROWN NCM3.
M-56; 0.3 C, 0.6 Mn, 2.4 Ni, 0.6 Cr, 0.45 Mo, bal Fe.
For gears, shafts; shock resistant.

FIRTH-BROWN NCM4.
M-56; 0.4 C, 0.6 Mn, 0.65 Cr, 0.6 Mo, 0.3 Ni, bal Fe.
For gears, shafts, bolts, machinery parts; oil hardened, shock resistant.

FIRTH-BROWN NCM5.
M-56; 0.3 C, 0 6 Mn, 3.25 Ni, 0.6 Cr, 0.6 Mo, bal Fe.
For gears, shafts, bolts; shock resistant.

FIRTH-BROWN NCM6.
M-56; 0.3 C, 0.6 Mn, 3.25 Ni, 0.8 Cr, 0.3 Mo, bal Fe.
For bolts, gears, shafts; tough, shock resistant.

FIRTH-BROWN NCM7.
M-56; 0 3 C, 0.6 Mn, 3.5 Ni, 1.25 Cr, 0.6 Mo, bal Fe.
For bolts, gears, shafts; tough, shock resistant.

FIRTH-BROWN NCMCH.
M-56; 0 14 C, 0 4 Mn, 4.25 Ni, 1.25 Cr, 0.25 Mo, bal Fe
For gears, shafts; case-hardening, tough.

FIRTH-BROWN NCMF.
M-56; 0 35 C, 0.35 Si, 0.8 Mn, 1.75 Ni, 0.75 Cr, 0.35 Mo, bal Fe.
For gears, shafts, dies; oil hardening.

FIRTH BROWN NCMO.
M-56; 0.38 C, 0 25 Si, 0.65 Mn, 1.4 Ni, 1.2 Cr, 0.15 Mo, bal Fe.
For gears, bolts, machine tool parts; Brit EN110; oil hardened, tough.

FIRTH-BROWN NCMV.
M-56, 0.25 C, 0 55 Mn, 3 Ni, 1.2 Cr, 0.45 Mo, 0.2 V, bal Fe.
For bolts, gears, shafts; tough, shock resistant.

FIRTH-BROWN NCR1.
M-56, 0 55 C, 0 65 Mn, 1.5 Ni, 0.65 Cr, bal Fe.
For gears, shafts; formerly "Atlas NCD."

FIRTH-BROWN NCR2.
M-56, 0.3 C, 0 6 Mn, 3.25 Ni, 0.75 Cr, bal Fe.
For gears, shafts, tough.

FIRTH-BROWN NCR3
M-56; 0.65 C, 0.15 Mn, 1.95 Ni, 1.9 Cr, bal Fe.
For gears, shafts; tough,

FIRTH BROWN NMCM.
M-56; 0.40 C, 0.75 Ni, 0.45 Cr, 0.20 Mo, 1.35 Mn, 0.25 Si, bal Fe.
For gears, bolts, machine tool parts, fasteners; Brit. EN100; oil hardened, tough.

FIRTH-BROWN NMCW.
M-56; 0.7 C, 0.3 Si, 9.2 Mn, 7.7 Ni, 3.3 Cr, 0.6 W, bal Fe.
For heat and corrosion resistant parts; non-magnetic, austenitic.

FIRTH-BROWN NMM1.
M-56; 0.18 C, 1.4 Mn, 0.5 Ni, 0.3 Mo, bal Fe.
For axles; tough.

FIRTH-BROWN NMM2.
M-56; 0.28 C, 1.2 Mn, 0.5 Ni, 0.25 Mo, bal Fe.
For axles; tough.

FIRTH-BROWN O5CF.
M-56; 0.07 C, 0.35 Si, 0.07 Mn, bal Fe.
For hubbing dies; case hardening.

FIRTH BROWN O-275 (FIRTH N.M.C.).
M-56; 0.5 C, 12 Ni, 5 Mn, 4 Cr, bal Fe.
Annealed: 67,000-123,000 TS.
For cylinder liners, alternator rotor caps and wedges, piston skirts; non-magnetic, coef of expansion 0.000021 per °C.

FIRTH BROWN P-280 (FOUNDRY AA).
M-56; C, bal Fe.
For crane magnets, cast steel magnet yokes; magnet steel; high permeability.

FIRTH BROWN P-281 (TUNGSTEN MAGNET). (ATLAS TUNGSTEN MAGNET).
M-56; C, 6 W, bal Fe.
For aircraft and automobile magnetos, telephone, telegraph and radio apparatus; magnet steel; high remanence and coercive force.

FIRTH BROWN P-282 (TUNGSTEN CHROME MAGNET).
M-56; C, Cr, 6 W, bal Fe.
For aircraft and automobile magnetos, telephone, telegraph and radio apparatus, magnet steel, high remanence and coercive force.

FIRTH BROWN P-283 (COBALT MAGNET)
M-56; C, Co, bal Fe.
For aircraft and automobile magnetos, telephone, telegraph and radio apparatus; high coercive force.

FIRTH BROWN Q-300.
M-56; 0.45-0.50 C, bal Fe.
94,000-98,000 TS.
For railway tires.

FIRTH BROWN Q-301.
M-56; 0.55-0.60 C, bal Fe.
112,000-123,000 TS.
For railway tires.

FIRTH BROWN Q-302.
M-56; 0.65-0.70 C, bal Fe.
125,000-141,000 TS.
For railway tires.

FIRTH BROWN Q-303.
M-56; C, Mn, Mo, bal Fe.
100,000-138,000 TS.
For railway tires.

FIRTH BROWN Q-304.
M-56; 0.50-0.55 C, Cr, bal Fe.
112,000-123,000 TS.
For railway tires.

FIRTH BROWN Q-305.
M-56; 0.55-0.65 C, Cr, bal Fe.
125,000-159,000 TS.
For railway tires.

FIRTH BROWN Q-306.
M-56; 0.60-0.70 C, Cr, bal Fe.
141,000-155,000 TS.
For railway tires.

FIRTH BROWN Q-307.
M-56; 0.65-0.75 C, Cr, bal Fe.
145,000-180,000 TS.
For railway tires.

FIRTH BROWN Q-308.
M-56; 0.65-0.75 C, 1.25 Ni, Cr, bal Fe.
159,000-TS.
For railway tires; tough.

FIRTH BROWN R-320.
M-56; C, bal Fe.
78,000-90,000 TS.
For railway axles; water hardening.

FIRTH BROWN R-321.
M-56; C, bal Fe.
90,000-101,000 TS.
For railway axles; water hardening.

FIRTH BROWN R-322.
M-56; C, 3.5 Ni, bal Fe.
101,000-112,000 TS.
For railway axles; oil hardening, tough.

FIRTH BROWN R-323.
M-56; C, alloy, bal Fe.
101,000-112,000 TS.
For railway axles; oil hardening.

FIRTH-BROWN RBD.
M-56; 0.4 C, 0.15 Si, 0.25 Mn, 3 Cr, 0.5 V, 10 W, bal Fe.
For tools, dies; hot work steel.

FIRTH-BROWN RBD-E.
M-56; 0.22 C, 0.25 Si, 0.25 Mn, 2.25 Ni, 2.25 Cr, 0.45 Mo, 0.2 V, 10 W, bal Fe.
For tools, dies; hot work steel.

FIRTH BROWN S-340 (FOUNDRY A).
M-56; 0.20 C, bal Fe
58,000-67,000 TS
For locomotive gear centers, railway and marine castings for low strength; water hardening

FIRTH BROWN S-341 (FOUNDRY B MILD)
M-56, 0.28 C, bal Fe.
63,000-72,000 TS
For marine and automobile castings for medium strength; water hardening.

FIRTH BROWN S-342 (FOUNDRY B).
M-56; 0.32 C, bal Fe.
67,000-78,500 TS.
For railway gear centers, marine and general castings for medium strength; water hardening.

FIRTH BROWN S-343 (FOUNDRY C)
M-56, 0.40 C, bal Fe.
78,500-89,500 TS
For high tensile castings for railway, marine and general purposes, water hardening.

FIRTH BROWN S-344 (FOUNDRY D).
M-56; 0.60 C, bal Fe.
89,500-101,000 TS.
For cast steel die blocks; water hardening.

FIRTH BROWN S-345 (FOUNDRY E).
M-56; 0.75 C, bal Fe.
112,000-123,000 TS.
For cast steel die blocks; water hardening.

FIRTH-BROWN SHC1.
M-56; 0.44 C, 1 Si, 0.65 Mn, 3 Ni, 0.65 Cr, bal Fe.
For tools, dies, gears, shafts; tough.

FIRTH-BROWN SIMN.
M-56; 0.55 C, 1.85 Si, 0.8 Mn, bal Fe.
For springs; oil hardening.

FIRTH-BROWN SP.
M-56; 1.1 C, 0.15 Si, 0.25 Mn, 0.6 Cr, 0.35 W, bal Fe.
For tools, dies; water hardening.

FIRTH BROWN STANDARD.
M-56; 1.5 C, 12 Cr, 0.9 Mo, 0.9 V, bal Fe.
For blanking and forming dies, punches; oil hardened, non-deforming.

FIRTH BROWN T-360 (FOUNDRY "A, Mn").
M-56; 0.25 C, Mn, bal Fe.
78,000-89,500 TS.
For transmission gears; resists shock and abrasion.

FIRTH BROWN T-361 (FOUNDRY "C-M").
M-56; 0.45 C, Mn, bal Fe.
89,500-112,000 TS.
For transmission gears; resists shock and abrasion.

FIRTH BROWN T-362 (FOUNDRY N.C.).
M-56; C, Ni, Cr, bal Fe.
101,000-112,000 TS.
For transmission gears; resists shock and abrasion.

FIRTH BROWN T-363 (FOUNDRY N.C. Mo).
M-56; C, Ni, Cr, Mo, bal Fe.
112,000-134,000 TS.
For transmission gears; resists shock and abrasion.

FIRTH BROWN T-364 (FOUNDRY C-Cr).
M-56; C, Cr, bal Fe.
101,000-123,000 TS.
For transmission gears; resists shock and abrasion.

FIRTH BROWN T-365 (FOUNDRY A-Mo).
M-56; 0.20 C, Mo, bal Fe.
72,000-85,000 TS
For cast steel mooring cables; ductile.

FIRTH BROWN T-366 (FOUNDRY B, Mo).
M-56; 0.30 C, Mo, bal Fe.
80,000-98,000 TS
For cast steel turbine casings, high pressure steam chests.

FIRTH BROWN T-367 (FOUNDRY A, Mn, Mo).
M-56; C, Mn, Mo, bal Fe.
90,000-112,000 TS.
For piling work; shock resistant.

FIRTH BROWN T-368 (ADAMANT T.M.).
M-56, 0.50 C, 1 Cr, 0.9 Mn, bal Fe.
For crusher plates, lining plates for pulverizers and grinders; water hardening

FIRTH BROWN T-369 (ADAMANT A).
M-56, 0.70 C, 1.9 Mn, 1 Cr, bal Fe.
For crusher plates, lining plates for pulverizers and grinders; oil or water hardening.

FIRTH BROWN T-370 (ADAMANT G-R).
M-56; 0.75 C, 1.9 Cr, 0.9 Mn, bal Fe.
Cast steel crusher plates, liners for pulverizers and grinders; oil hardening.

FIRTH BROWN T-371 (ADAMANT H.P.).
M-56, 0.90 C, 1.25 Ni, 1.9 Cr, 0.2 Mo, bal Fe
For crusher plates, liners for pulverizers and grinders; oil hardening.

FIRTH BROWN T-372 (ADAMANT EXTRA).
M-56; 0.75 C, 0.9 Ni, 1.9 Cr, 0.9 Mn, 0.35 Mo, bal Fe.
For crusher plates, liners for pulverizers and grinders; oil hardening.

FIRTH BROWN T-373 (FOUNDRY PILGER ROLL).
M-56; 1.0 C, Cr, Mo, bal Fe.
300-320 Brin.
For cast steel pilger rolls; oil hardening.

FIRTH BROWN T-374 (FOUNDRY Mn 12).
M-56; C, 12 Mn, bal Fe.
200-240 Brin.
For tramway crossings, crushing and grinding machinery; tough, wear resistant.

FIRTH-BROWN TDC.
M-56; 1.2 C, 0.25 Si, 0.25 Mn, 1.25 W, bal Fe.
For tools, dies, hacksaws; water hardening.

FIRTH-BROWN TMS.
M-56; 0.92 C, 0.3 Si, 1.75 Mn, bal Fe.
For tools, dies; oil hardening, non-deforming.

FIRTH BROWN TREBLE EXTRA.
M-56; 0.70-1.4 C, 0.15 Si, 0.30 Mn, bal Fe.
For drills, reamers, taps, broaches; Type W1; water hardened.

FIRTH BROWN "U" BRAND.
M-56; 0.7-1.4 C, bal Fe.
For hot working and battering tools, bolt and rivet headers, hot drop forging dies, rivet sets; electric steel.

FIRTH-CHQ.
M-57; C, alloy, bal Fe.
For cold heading dies; cold work steel.

FIRTH "DIEHARD."
M-56; 1.5 C, 13 Cr, bal Fe.
Hardened: 550-660 Brin.
For forging, blanking and drawing dies, cold trimming and punching dies; abrasion resisting "Firth Brown M-254" Air-hardening.

FIRTH DISCALOY.
M-57; 0.04 C, 13 Cr, 25 Ni, 3 Mo, 1.8 Ti, 0.2 Al, bal Fe.
At 70°F. 145,000 TS; 116,000 YS; 19 El; 23 RA.
At 1000°F: 125,000 TS, 98,000 YS; 16 El; 34 RA.
For gas turbine blades, rotors, jet engine parts; age hardenable, high temperature applications.

FIRTH "F-65."
M-56; 0.2-0.3 C, 2.75-3.50 Ni, 1.0-1.4 Cr, 0.25 max V, 0.65 Mo, bal Fe
Oil treated. 146,000-168,000 TS; 127,000-135,000 YS; 17 El, 40 RA.
For crank shafts, propeller shafts, rear axles, gear box shafts, connecting rods; "Firth Brown E-81;" for high duty work.

FIRTH FCN-5 STEEL.
M-56; 0.08-0.15 C, 4.75-5.25 Ni, bal Fe.
Heat treated: 101,000 TS, 65,700 YS; 20 El; 50 RA.
For motor car gears; case-hardening "Firth Brown F-102", "Atlas NCH 5."

FIRTH FCNC STEEL.
M-56, 0.12-0.18 C, 4-4.5 Ni, 1.0-1.4 Cr, bal Fe.
Heat treated: 180,000 TS; 144,000 YS; 12 El; 35 RA.
For gears for aero-engines, racing car gears; case-hardening "Firth Brown F-104", "Browns Atecor."

FIRTH FN-3 STEEL.
M-56; 0.25-0.40 C, 2.75-3.25 Ni, bal Fe.
Oil hardened: 101,000-123,000 TS; 65,700-80,000 YS; 22 El; 50 RA.
For valves, propeller shafts, rear axles, gear box shafts, connecting rods; "Firth Brown D-61", "Atlas ATN."

FIRTH FNC-3.
M-56; 0.08-0.15 C, 2.75-3.5 Ni, bal Fe.
Heat treated: 94,100 TS; 56,500 YS; 18 El; 45 RA; 140 Brin.
For gears, camshafts, steering gear parts; for case hardening "Firth Brown F-101", "Atlas NCH-3."

FIRTH FNC STEEL.
M-56; 0.28-0.34 C, 3.0-3.75 Ni, 0.5-1.0 Cr, bal Fe.
Oil hardened: 123,000-146,000 TS; 92,000-110,000 YS; 20 El; 50 RA.
For crank shafts, propeller shafts, rear axles, connecting rods, motor cars; "Firth Brown D-64", "Atlas NC-45."

FIRTH FS-2.
M-57; 63 TiC, 29.6 Ni, 7.4 Cr.
Sintered: Rockwell A87.
For jet engine components; super refractory, sintered carbides.

FIRTH FS-5.
M-57; 63 TiC, 25.9 Co, 11.1 Cr.
Sintered: Rockwell A90.
For jet engine parts; sintered carbides.

FIRTH FS-8.
M-57; 63 TiC, 22.2 Ni, 7.4 Co, 7.4 Cr.
At 75°F: 26,200 TS; 0 El.
At 800°F: 43,000 TS; 1.3 El.
At 1800°F: 37,800 TS; 2.4 El.
For jet engine components, cutting tools; oxidation, corrosion and heat resistant.

FIRTH FS-9.
M-57; 50 TiC, 30 Ni, 10 Co, 10 Cr.
At 75°F: 30,500 TS; 0 El.
For jet engine components, nozzles, dies; oxidation, corrosion and heat resistant.

FIRTH FS-26.
M-57; 54.3 TiC, 40 Ni, 5.7 Cr_3C_2.
At 80°F: 33,000 TS; 0 El.
At 1200°F: 48,000 TS; 0 El.
At 1800°F: 41,000 TS; 0.8 El.
For jet engine components, nozzles, dies; oxidation, corrosion and heat resistant.

FIRTH FS-27.
M-57; 42.9 TiC, 50 Ni, 7.1 Cr_3C_2.
At 80°F: 75,000 TS; 0 El.
At 800°F: 76,500 TS; 0 El.
At 1800°F: 35,000 TS; 1.7 El.
For jet engine components, cutting tools, oxidation, corrosion and heat resistant.

FIRTH F.S M-10.
M-57; 0.7 C, 8 Mo, 2 V, bal Fe.
For cutting tools, drills, hobs, reamers; high speed steel.

FIRTH F.S.M-10 MOD.
M-57; 0.65 C, 4 Cr, 8.2 Mo, 2 V, bal Fe.
For hot work tools and dies, punches, shears; hot work steel, oil hardened.

FIRTH FT-30 STEEL.
M-56; 0.28-0.40 C, 0.30 Si, 0.45-0.80 Mn, bal Fe.
Normalized: 67,000-90,000 TS; 35,500-45,000 YS; 25 El; 45 RA.
For general engineering use; "Firth Brown C-41"; "Atlas ATC-30."

FIRTH FT-40 STEEL.
M-56; 0.45-0.55 C, 0.30 Si, 0.5-0.7 Mn, bal Fe.
Normalized: 90,000-112,000 TS; 45,000-56,000 YS; 20 El; 40 RA.
For general engineering use; "Firth Brown C-43"; "Atlas ATC-50."

FIRTH GREEK ASCOLOY.
M-57; 0.15 C, 0.3 Si, 0.3 Mn, 13 Cr, 2 Ni, 3 W, 0.12 Al, bal Fe.
Heat treated: 137,000-195,000 TS; 108,000-160,000 YS; 23-14 El; 63-51 RA; 290-400 Brin.
For compressor wheels and blades, bolts, fasteners; heat resistant to 1000°F.

FIRTH HEAVY METAL.
M-57; 95 W, bal Ni + Cu.
Sintered: 120,000 TS; 2 El; 300 Brin.
For counterweights, x-ray tube screens; density 17.5-18.2.

FIRTH H.W.D. MOD.
M-57; 0.55 C, 1 Si, 1.4 W, 5.25 Cr, bal Fe.
For dies; air hardened, non-deforming.

FIRTHITE.
M-57; 97-87 Tungsten carbide, 5-13 Co.
For tipped cutting tools; cemented tungsten carbide.

FIRTHITE GR. TXL.
M-57; 81 WC; 12.5 TiC, 6.5 Co.
Sintered: 790 Brin.
For cutting tools; carbide cermet.

FIRTHITE H.
M-57; 6.0 Co, 94 WC.
78 Rockwell-C.
For cutters on cast iron, nonferrous metals and nonmetallics; cemented WC.

FIRTHITE H-23
M-57; WC, Co
Sintered· 240,000 TrS; A 91.8 Rock.
Density: 14.8
Cutting tools for roughing cuts; for machining superalloys.

FIRTHITE HA.
M-57; 6 Co, 3 TaC, 91 WC.
79 Rockell-C.
For tool bits, cutters; for semi-finishing hard irons.

FIRTHITE HB.
M-57; 8 Co, 92 WC.
77-Rockwell-C.
For tool bits, cutters; for roughing cast iron.

FIRTHITE HE.
M-57; 95.5 WC, 4.5 Co.
Sintered: Rockwell A92.
For cutting tools; sintered carbide.

FIRTHITE HF.
M-57; WC, 3 Co.
81 Rockwell-C.
For tools, cutters, finishing cuts.

FIRTHITE NHA.
M-57; WC.
For cutters for machining cast iron; cemented carbide.

FIRTHITE NTA.
M-57; WC, Co.
Sintered: 250,000 TrS; A 91 0 Rock.
Density: 12.9.
Cutting tools for rough machining steel.

FIRTHITE T-04.
M-57; 85 WC, 10 Co, 1 TaC, 4 TiC.
For tipped tools for rough cuts; cemented.

FIRTHITE T-22.
M-57; WC, Co.
Sintered: 240,000 TrS; A 92.2 Rock.
Density: 12.8.
Cutting tool for general purpose machining steel.

FIRTHITE T-25.
M-57; WC, Co.
Sintered: 190,000 TrS; A 92.8 Rock.
Density: 12.1.
For semi-finish cuts on ferrous and non-ferrous metals; crater-resistant grade.

FIRTHITE T-31.
M-57; 68.5 WC, 6.5 Co, 25 TiC.
For bits for cutting tools; hardest and most wear resistant, sintered.

FIRTHITE T-41.
M-57; WC, 8 Co.
79 Rockwell-C.
For tools, dies, cutters; cemented WC.

FIRTHITE T-66.
M-57; 60 WC, 12 Co, 28 Ta.
For heavy duty cutters and tools; sintered.

FIRTHITE T-89.
M-57; 12 Co, 59 WC, 22 TaC, 7 TiC.
77 Rockwell-C.
For rough and semi-finish cuts, tipped tools; cemented.

FIRTHITE TXH.
M-57; 83 WC, 8 Co, 9 TiC.
Sintered: Rockwell A91.5.
For cutting tools; sintered carbide.

FIRTHITE TXL.
M-57; 81 WC, 6.5 Co, 12.5 TiC.
Sintered: Rockwell A92
For cutting tools; sintered carbide.

FIRTHITE-WF.
M-57, 70 TiC, 18 MoC, 12 Ni
Sintered: A 92 Rock; 125,000 TrS.
Sintered carbide tool inserts for cutting steel; high speed fine finishing.

FIRTHITE WL
M-57; 73 WC, 6 Co, 21 TaC.
Sintered: Rockwell A91
For cutting tools; sintered carbide.

FIRTH "NONVAR" CAST STEEL
M-56, C, bal Fe, high Mn.
Hardened: 444-600 Brin
For taps, boiler stay bolts, punches, dies, jigs, gages; "Firth Brown M-240."

FIRTHOB
M-56; 0.09 C, 0.5 Mn, 1.25 Ni, 0.5 Cr, bal Fe.
For gears, shafts, cams, machinery parts; case hardened, shock resistant

FIRTH PNUSNAP.
M-56; 0.35 C, 0.5 Si, 0.25 Mn, 1.0 Cr, 1.8 W, bal Fe.
Heat treated. 512-555 Brin.
For pneumatic snaps, for hot riveting chisels, punches, tough, shock resistant.

FIRTH "RBD" STEEL
M-56; C, high W, Cr, bal Fe.
Hardened: 286-418 Brin
For hot rivet dies, die blocks, shear blades, hot iron punches; air hardening "Firth Brown M-261"

FIRTH RT.
M-56, 1.2 C, 0.28 Mn, 3 W, bal Fe.
For draw dies, punches, burnishing tools; fast finishing tool steel.

FIRTH VC.
M-57; 1.1 C, 4 Cr, 2.6 Mo, 2.5 W, 4 V, bal Fe.
For twist drills, reamers, broaches; abrasion resistant.

FIRTH-VICKERS 21/4N STEEL.
M-521; 0.48-0.58 C, 0.25 max Si, 8.0-10.0 Mn, 20.0-22.0 Cr, 3.25-4.5 Ni, 0.38-0.5 N, bal Fe.
Non-magnetic, precipitation hardenable stainless steel.
Ht. Tr. tested at 800°C: 53,000 TS; 35,800 YS.
Good oxidation resistance up to 850°C.
For valves in internal combustion engines.

FIRTH-VICKERS 309.
M-521; 0.15 max C, 1.0 max Si, 2.0 max Mn, 22.0-24.0 Cr, 13.0-15.0 Ni, bal Fe.
At room temp: 90,000 TS; 35,000 YS; 50 El.
At 800°C: 26,800 TS; 13,800 YS (0.2% proof).
Good resistance to corrosion and to scaling at elevated temperature; for superheater supports, furnace parts, heat treat boxes and annealing racks. Weldable. AISI 309.

FIRTH-VICKERS 448 STEEL.
M-521; 0.10-0.13 C, 0.50 Si, 1.0 Mn, 11.0 Cr, 0.75 Ni, 0.65 Mo, 0.15-0.30 V, 0.40 Nb, bal Fe.
Air or oil harden; temper 650-700°C.
At Room Temp: 150,000 TS, 127,000 YS; 20 El.
At 700°C: 51,500 TS; 44,000 YS; 28 El.
For aircraft gas turbine discs and similar stressed parts at elevated temperatures.

FIRTH-VICKERS 467.
M-521; 0.2 C, 9.5 Ni, 14 Cr, 2 Mo, 2.5 Cu, 0.7 Ti, bal Fe.
Annealed: 98,000 TS, 43,500 YS; 52 El; 56 RA.
At 500°F: 80,000 TS; 33,600 YS; 31 El; 36 RA.
At 750°F 61,000 TS; 33,000 YS; 24 El, 27 RA.
For jet engine components; heat and creep resistant, austenitic.

FIRTH-VICKERS 507.
M-521, 0.12 C, 0.4 Cb, 10.5 Cr, 0.75 Mo, 0.15 V, bal Fe
Annealed: 75,000 TS; 35,000 YS; 30 El; B 82 Rock.
Cold Drawn 95,000 TS; 80,000 YS; 15 El, B 92 Rock.
For springs, table flatware, knives, oil refinery equipment Corrosion resistant.

FIRTH-VICKERS 535 STEEL.
M-521, 0.07 C, 0.40 Si, 0.85 Mn, 10.5 Cr, 0.30 Ni, 6.0 Co, 0.75 Mo, 0.20 V, 0.45 Nb, bal Fe.
Air or oil harden, temper 600-650°C:
At Room Temp: 160,000 TS, 142,000 YS, 22 El.
At 550°C. 118,000 TS, 103,000 YS, 22 El.
For aircraft turbine and compressor disc forgings and wrought rings

FIRTH-VICKERS 548 STEEL.
M-521; 0.06 C, 0.40 Si, 1.0 Mn, 16.5 Cr, 11.5 Ni, 1.5 Mo, 1.0 Nb, bal Fe
Austenitic stainless steel, weldable
Room Temp. 80,000 TS; 33,000 YS; 55 El
At 700°C: 53,000 TS; 18,000 YS. 41 El
For structural parts and welded assemblies operating at elevated temperatures.

FIRTH-VICKERS 555 STEEL
M-521, 0.05 C, 0.40 Si, 1.5 Mn, 16.5 Cr, 10.5 Ni, 2.4 Mo, bal Fe
Austenitic stainless, weldable.
At 700°C. 45,600 TS; 13,800 YS.
For steam pipe, chemical plant equipment.

FIRTH-VICKERS 566.
M-521, 0.12 C, 0.4 Si, 0.8 Mn, 11.5 Cr, 2.3 Ni, 1.4 Mo, 0.15 V, 0.3 Nb, bal Fe.
Air hardened, tempered 630-650°C.
Room Temp. 147,000 TS; 124,000 YS; 22 El.
At 600°C: 80,000 TS; 66,000 YS; 28 El.
For turbine blading for use up to 450°C.

FIRTH-VICKERS 607 STEEL
M-521; 0.15 C, 0.30 Si, 0.80 Mn, 11.0 Cr, 0.60 Ni, 0.80 Mo, 0.25 V, bal Fe.
Air or oil hardenable, corrosion resistant steel, primarily for sheet production.
For stamped or formed parts stressed at temperatures up to about 600°C.

FIRTH-VICKERS F 17.
M-521; 0.10 C, 14-18 Cr, bal Fe.
Annealed: 80,000 TS; 45,000 YS; 28 El; 145 Brin.
For automotive trim, kitchen sinks, oil burners, fasteners, furnace parts.
Type 430 stainless steel, nonhardenable, ferritic, heat resistant.

FIRTH-VICKERS F.A.L.
M-521; 0.12 max C, 0.8 max Si, 1.0 max Mn, 12.0-14.0 Cr, 3.8-4.8 Al, bal Fe.
Heat treated: 90,000 TS; 67,000 YS; 25 El.
Corrosion resistant steel with high electrical resistivity; for resistances and rheostats.

FIRTH-VICKERS F.A.S.
M-521; 0.43 C, 0.3 Si, 0.5 Mn, 11.5 Cr, bal Fe.
Annealed: 110,000 TS; 79,000 YP; 20 El; 240 Brin.
For stainless ball bearings.
Corrosion resistant.

FIRTH-VICKERS F.C.I.
M-521; 0.12 max C, 0.8 max Si, 1.0-2.0 Mn, 0.15-0.30 S, 11.5-13.5 Cr, 0.3-0.6 Mn, bal Fe.
Martensitic, free-machining, hardenable corrosion resistant steel.
Air or oil hardenable to about 28-38 Rock C.
For shafts, hardware, fasteners, cap screws.
BS: EN.56AM; AISI 416.

FIRTH-VICKERS F.C.S.
M-521; 0.20-0.28 C, 0.8 max Si, 1.0-2.0 Mn, 0.15-0.30 S, 12.0-14.0 Cr, 0.3-0.6 Mo, bal Fe.
Martensitic, free-machining, hardenable corrosion resistant steel.
Air or oil hardenable to about 44-52 Rock C.
For spline shafts, gears, studs, hardware.
BS: EN.56 CM, 2S.124; AISI 420 F.

FIRTH-VICKERS F.G.
M-521; 0.20-0.28 C, 0.8 max Si, 1.0 max Mn, 12.0-14.0 Cr, bal Fe.
Martensitic corrosion resistant steel.
Ht. tr. & temp. 400°C: 218,000 TS; 196,000 YS; 18 El; 480 VDH hardness.
For cutlery, surgical instruments, dental tools, turbine equipment, valves.
B.S.: 3S.62, EN56C; AISI 420.

FIRTH-VICKERS F.G.(L).
M-521; 0.12-0.20 C, 0.8 max Si, 1.0 max Mn, 11.5-13.5 Cr, bal Fe.
Martensitic corrosion resistant steel; hardenable to about 42-48 Rock C.
For intricate cutlery and surgical instruments where hot forging may be difficult.
(AISI 420-low carbon range).

FIRTH-VICKERS F.H.
M-521; 0.28-0.36 C, 0.8 max Si, 1.0 max Mn, 12.0-14.0 Cr, bal Fe.
Martensitic corrosion resistant steel.
Air or oil hardenable to 240,000 psi TS and hardness of 598 VDH.
For knives, cutlery, surgical and dental instruments.

FIRTH-VICKERS F.H.M.
M-521; 0.70-0.90 C, 0.8 max Si, 1.0 max Mn, 15.5-17.5 Cr, 0.3-0.7 Mo, bal Fe.
Martensitic corrosion resistant steel.
Air or oil hardenable to about 50-56 Rock C.
For cutlery, dental and surgical instruments, valves, stainless ball and roller bearings.
AISI 440B.

FIRTH VICKERS F.I.
M-521; 0.08 max C, 11.5-13 Cr, 0.1-0.3 Al, bal Fe.
Normalized: 71,000 TS; 42,600 YS; 22 El; 70 RA; 150 Brin.
Heat treated: 175,000 TS; 145,000 YS; 21 El; 64 RA; 352 Brin.
For oil refinery and chemical plant equipment; Type 405; corrosion resistant.

FIRTH-VICKERS F.I.17.
M-521; 0.07 C, 17 Cr, 0.80 Mn, bal Fe.
Annealed: 78,400 TS; 49,300 YS; 32 El; 50 RA; 160 Brin.
For auto trim, window frames, grills; corrosion resistant; Type 430.

FIRTH-VICKERS F.I. 17 Mo STEEL.
M-521; 0.07 C, 0.40 Si, 0.60 Mn, 16.3 Cr, 0.40 Ni, 1.0 Mo, bal Fe.
Ferritic stainless steel; for motor car hub caps and trim, domestic flatware and holloware.

FIRTH-VICKERS F.I. (Al).
M-521; 0.08 max C, 11.5-14.5 Cr, 0.1-0.3 Al, bal Fe.
Annealed: 65,000 TS; 38,000 YS; 36 El; 145 Brin.
Cold Drawn: 85,000 TS; 70,000 YS; 20 El; 185 Brin.
For heat treating boxes, quenching racks, oil refining and chemical plant equipment. Heat and corrosion resistant. AISI Type 405.

FIRTH-VICKERS F.I. (Ti) STEEL.
M-521; 0.06 max C, 0.8 max Si, 1.5 max Mn, 10.5-12.0 Cr, 1.0 Ni, 0.2-0.8 Ti, bal Fe.
Soft: 63,000 TS; 34,000 YS; 32 El.
Hard: 72,000 TS, 52,000 YS; 25 El.
For lightly loaded parts to resist scaling up to 700-750°C.
Similar to AISI 405.

FIRTH-VICKERS F.L.
M-521; 0.08 max C, 11.5-14.5 Cr, 0.1-0.3 Al, bal Fe.
Annealed: 70,000 TS; 40,000 YS; 30 El; 60 RA; 160 Brin.
For heat treating boxes, quenching racks, high temperature units
Type 405 stainless steel.

FIRTH VICKERS F.M.B.
M-521; 0.08 max C, 16-18 Cr, 10-14 Ni, 2-3 Mo, bal Fe
Annealed: 85,000-95,000 TS; 35,000-45,000 YS; 60-50 El; 75-60 RA; 150-190 Brin.
For chemical plant equipment, mixers, agitators, filters, Type 316; stainless, austenitic.

FIRTH-VICKERS F.S.M.1.
M-521, 0.05 C, 17.2 Cr, 7.15 Mn, 4.5 Ni, 0.12 N, bal Fe.
Annealed: 104,000 TS; 56,000 YS; 51 El; B 90 Rock.
For aeronautical applications, kitchen equipment, fasteners.
Type 204, corrosion and heat resistant. Stainless, austenitic, high strength

FIRTH-VICKERS F.V. 507.
M-521; 0.12 C, 11.0 Cr, 0.8 Mo, 0.15 V, 0.4 Nb, bal Fe.
Martensitic corrosion resistant steel casting.
Air or oil hardenable to about 35-44 Rock C.
In harden conditions has good strength and corrosion resistance at room temperature and is used to about 700°C; for housings, brackets.

FIRTH-VICKERS F.V. 520 (B) STEEL.
M-521; 0.07 max C, 0.7 max Si, 1.0 max Mn, 13.2-14.7 Cr, 5.0-6.0 Ni, 1.2-2.0 Cu, 1.2-2.0 Mo, 0.2-0.7 Nb, bal Fe.
Corrosion resistant maraging type steel.
Aged: 122,000-212,000 TS; 78,000-150,000 YS; 10-20 El; 270-450 VDH. (varying treatment).

Weldable; for blading, bolts, fasteners, valves, pumps, water impellers, assemblies.

FIRTH-VICKERS F.V. 520 (S) STEEL.

M-521; 0.04-0.07 C, 0.6 max Si, 0.8-1.8 Mn, 15.3-16.0 Cr, 5.0-5.8 Ni, 1.4-2.1 Cu, 1.2-2.0 Mo, 0.5-0.15 Ti, bal Fe.

Corrosion resistant maraging type steel.

Aged: 142,000-196,000 TS; 116,000-142,000 YS; 6 min El; 320-400 VDH. (varying treatment).

Weldable; for bolts, fasteners, valves, pump parts, water impellers, assemblies.

FIRTH-VICKERS F.V. 702.

M-521; 0.03 C, 0.5 Si, 0.6 Mn, 15.7 Cr, 2.5 Ni, 1.0 Mo, 0.5 Nb, bal Fe.

Good resistance to corrosion and stress corrosion, equipment for chemical plants.

FIRTH-VICKERS H.R.CROWN 1 STEEL.

M-521; 0.20 C, 0.8 Si, 0.9 Mn, 22.5 Cr, 11.0 Ni, 0.5 W, bal Fe.

Austenitic stainless steel casting.

For room temperature and elevated temperature parts subject to corrosive conditions; good high temperature strength.

AISI 309; BS; 1648-E.

FIRTH-VICKERS H.R.CROWN MAX STEEL.

M-521; 0.20 C, 1 0 Si, 0.8 Mn, 23.0 Cr, 11.5 Ni, 3.0 W, bal Fe.

Austenitic stainless steel casting.

For room temperature and elevated temperature parts subject to corrosive conditions; good high temperature strength.

AISI 309; BS; 1648-E.

FIRTH-VICKERS MOLYBDENUM STAINLESS STEEL.

M-521, 0 10 C, 0.30 Si, 0 30 Mn, 12.5 Cr, 0 75 Mo, bal Fe.

Air or oil hardenable; good resistance to scaling and creep at elevated temperatures, for turbine blades and similar applications.

FIRTH-VICKERS MOLYBDENUM VANADIUM STAINLESS STEEL.

M 521, 0 12 C, 0 30 Si, 0.60 Mn, 12.25 Cr, 0 80 Ni, 0.60 Mo, 0 18 V, bal Fe.

Air or oil hardenable, tempered 675/700°C;

At Room temp· 115,000 TS, 100,000 YS; 29 El.

At 650°C· 48,000 TS; 40,000 YS (0.2% proof).

For stressed parts operating up to 650°C.

FIRTH-VICKERS S.80.

M-521; 0.16 C, 16 5 Cr, 2.5 Ni, bal Fe.

Oil treated 100,000-135,000 TS; 78,000-112,000 YS; 25-15 El; 60-45 RA; 240-280 Brin

For pump spindles, propeller shafts, seaplane and aircraft construction; magnetic, stainless and rust resistant AISI 431.

FIRTH-VICKERS S L.V.

M-521, 0.40-0 50 C, 3.0-3.75 Si, 0.3-0.6 Mn, 7.5-9.5 Cr, bal Fe.

Ht. Tr Temp.: 650°C: 134,000-154,000 TS; 100,000-112,000 YS; 20-10 El.

Good mechanical properties and scale resistance at elevated temperatures.

For valves in internal combustion engines.

BS.EN.52.

FIRTH-VICKERS "VIKRO."

M-50, M-521; 60-65 Ni, 15-25 Cr, 1.0-0.10 C, 0.5-1.0 Si, 1.0 max Mn, bal Fe.

Normalized: 102,000-134,000 TS; 65,000-78,000 YS, 25-15 El; 35-25 RA; 180-240 Brin.

At 1000°C: 17,600 TS.

For case hardening boxes, gas or oil burners, furnace muffles, boiler stay bolts; heat resisting; stainless.

FIRTH VICKERS XB.

M-521; 0.78 C, 2.0 Si, 0.45 Mn, 19.5 Cr, 1.35 Ni, bal Fe.

Hardened: 140,000 TS; 127,000 YS; 16 El; 21 RA.

At 400°C: 110,000 TS; 78,000 YS; 15 El; 28 RA.

For valves. Stainless, heat and corrosion resistant.

FIRTH W.C.R.

M-57; 0.5 C, 7.5 W, 7.5 Cr, bal Fe.

For hot work tools and dies; hot work steel, oil hardened.

FIRTH XDL.

M-57; 0.4 C, 15 W, 3.5 Cr, 0.5 V, bal Fe.

For hot work dies, extrusion rams and liners; hot work steel, oil hardened.

FISCHER VIS-11.

M-1659; 0.25 C, 10.8 Cr, 1.1 Mo, 0.6 Ni, 0.4 V, 0.4 W, bal Fe.

Annealed: 95,000 TS; 45,000 YS; 25 El; B 92 Rock.

Hardened. 245,000 TS; 210,000 YS; 8 El; C 50 Rock.

For valves, gears, cutlery, shafts, bearings, surgical instruments.

Corrosion resistant, hardenable. Cast only.

FISCO NO. 1.

M-627; 0.15 C, 0.5 Mn, 1.8 Ni, 0.25 Mo, bal Fe.

For arbors, gears, pinions; carburizing steel.

FISCO NO. 2.

M-627, 0.3-0 4 C, 0.9-1.2 Mn, bal Fe.

Rolled 90,000 TS; 65,000 YS, 18 El; 45 RA; 212 Brin.

For gears, shafts, bolts, gears, lead screws, spindles; excellent machining qualities.

FISCO NO. 3.

M-627; C, Mo, Cr, bal Fe.

For axles, bolts, gears, keys, pinions; oil hardening

FISCO NO 4.

M-627; 0 45-0.55 C, 0.6-0.9 Mn, 0.8-1.1 Cr, 0 15-0.25 Mo, bal Fe

Oil quenched. 150,000-130,000 TS; 130,000-100,000 YS; 17-18 El, 55-50 RA; 300-230 Brin.

For shafts, gears, axles, high impact and creep strength, pre-heat treated.

FISCO 66.

M-627; 0.8 C, 4 Cr, 5.5 W, 1.5 V, 5 Mo, bal Fe.

For tools, cutters; high speed steel.

FISCO AIRDIE

M-627; 0 6 C, 5 Cr, bal Fe.

For tools, cutters; oil hardening.

FISCO AIRQUENCH.

M-627; 0.95 C, 2.04 Mn, 1.9 Cr, 1 Mo, bal Fe.

For dies, rolls, gauges; air hardening.

FISCO CARBON.

M-627; 1.0 C, bal Fe.

For tools, dies, cutters, water hardening.

FISCO CHROMDIE

M-627; 1.6 C, 12 Cr, 0.75 Mo, 0.25 V, bal Fe.

For dies, gauges, mandrels, shear blades; air hardening, abrasion resistant.

FISCO COBALT.

M-627; 0.74 C, 4 5 Cr, 1.4 V, 18.8 W, 0.6 Mo, 5 Co, bal Fe.

For tools, cutters, dies; high speed steel.

FISCO DUPLEX.

M-627; 0.8 C, bal Fe.

For tools; water hardening..

FISCO EXCELL.
M-627; 0.8 C, 18 W, 4 Cr, 2 V, 0.7 Mo, bal Fe.
For tools, cutters; high speed steel.

FISCO HIGH SPEED.
M-627; 0.7 C, 18 W, 4 Cr, 1 V, bal Fe.
For tools, cutters; high speed steel.

FISCO HOT WORK.
M-627; 0.6 C, 8.5 Mo, 1.7 V, 3.6 Cr, bal Fe.
For hot work tools and dies; hot work steel.

FISCO MOLY.
M-627; 0.7 C, 1.5 W, 9.5 Mo, 4 Cr, 1 V, bal Fe.
For tools, cutters; high speed steel.

FISCO-Mo NO. 1 .
M-627; 0.1-0.2 C, 0.4-0.7 Mn, 1.65-2.0 Ni, 0.2-0.3 Mo, bal Fe.
Oil quenched: 120,000 TS; 90,000 YS; 22 El; 60 RA; 248 Brin.
For carburized parts, arbors, gears, pinions, cams, clutches; minimum distortion.

FISCO-Mo NO. 3.
M-627; 0.45-0.55 C, 0.6-0.9 Mn, 0.9-1.1 Cr, 0.15-0.25 Mo, bal Fe.
Annealed: 100,000 TS, 68,000 YS; 25 El, 55 RA; 183 Brin.
Heat treated: 240,000 TS; 225,000 YS; 12 El; 30 RA; 460 Brin.
For heavy duty shafts, gears, clutches; good machining qualities.

FISCO OILDIE.
M-627; C, bal Fe.
For tools, dies; oil hardening.

FISCO OILHARD.
M-627; 0.9 C, 1.1 Mn, 0.5 Cr, 0.25 V, 0.4 W, bal Fe.
For tools, cutters, dies, gauges, non-deforming

FISCO OMEGA.
M-627; 0.55 C, 0.8 Mn, 0.5 Mo, 0.25 V, 2.3 Si, bal Fe.
For impact tools; shock resistant, water hardened.

FISCO PNEUMATIC.
M-627; C, bal Fe
For tools; oil hardening.

FISCO PRECISION.
M-627; C, bal Fe
For tools; water hardening.

FISCO SEVEN
M-627; C, bal Fe.

FISCO SPECIAL.
M-627; 1.0 C, bal Fe
For tools, dies, cutters, water hardening.

FISCO STAR TUNG.
M-627; C, W, bal Fe.
For tools, cutters; oil hardening.

FISCO SUPERIOR.
M-627; 0.8 C, 12 Co, 20 W, 4 Cr, 1 V, 0.6 Mo, bal Fe.
For tools, cutters; high speed steel.

FISCO TIGER.
M-627, 1.0 C, 18 W, 4 Cr, 2 V, bal Fe.
For tools, cutters; high speed steel.

FISCO VANADIUM.
M-627; 0.9 C, 0.16 V, bal Fe.
For tools, dies, cutters, water hardening.

FIVE POINT DEEP HARD.
M-804; 0.4 C, 1.5 Ni, 0.8 Cr, 0.2 Mo, bal Fe.
For gears, axles, wrist pins, wheels, valves; oil hardening.

FIXAMPER.
M-771; Ni-Fe.
For heating elements, electrical resistances; good to 600°C.

FIXINVAR.
M-104; 36 Ni, bal Fe.
For clocks.

F.J.A.B. EXTRA.
M-365; 0.9-1.4 C, bal Fe.
For general tools and dies; water hardening.

F.J.A.B HOLLOW DRILL.
M-365; 1-1.2 C, bal Fe.
For mining, quarrying and construction tools; water hardening.

F.J.A.B REGULAR.
M-365, 0.9-1.2 C, bal Fe.
For general tools and dies; water hardening.

F.J.A.B ROOLED AUGER.
M-365; 0.7-0.9 C, bal Fe.
For tools for mining soft ores, coal, etc.; water hardening.

F.J.A.B. SOLID DRILL
M-365; 1.1-1.2 C, bal Fe For mining, quarrying, construction work tools; water hardened

F.J.A.B. SPECIAL.
M-365; 0.9-1.2 C, bal Fe
For special die work tools.

FK(D)M-10.
Germ., 0.25 C, 3 Cr, 0.4 W, 0.4 Mo, 0.2 V, bal Fe.
For turbine blades for jet engines; oil hardened

FLAMALOY
M-157; C, alloy, bal Fe
For castings; castings, wear resistant

FLAME HARD
M-1482; 0.55 C, 1.2 Mn, 1.25 Cr, 0.4 Mo, 0.1 V, bal Fe
For trim dies, oil or flame hardened.

FLAME RESISTING ALLOY.
Eng.; 14 Cr, 9.7 Ni, 0.8 Mn, 0.2 Si, 0.2 C, bal Fe.
For heat resisting alloy parts, corrosion and heat resistant

FLANGE METAL, FRENCH
French, 94 Cu, 5.6 Sn, 0.05 Pb
For bushings, fittings, flanges; tough.

FLANGE METAL, GERMAN.
German, 92 Cu, 5 Zn, 2.5 Sn.
For pipes, fittings, flanges, corrosion resistant.

FLASH ALLOY
M-915, 0.17-0.22 C, 1.65-2.0 Ni, 0.2-0.3 Mo, bal Fe.
For sling chains.

FLECTO IRON
M-94, 2.4-2.6 C, 0.45 Mn, 1.1 Si, bal Fe.
Cast: 52,000 TS, 35,000 YS; 14 El; 135 Brin.
For castings to be hot galvanized; specially annealed malleable cast iron.

FLEETWELD 5.
M-578; C, bal Fe
Steel arc welding electrode
AWS Class E6010

FLEETWELD 5P.
M-578; C, bal Fe.
Steel arc welding electrode.
AWS Class E6010.

FLEETWELD 7.
M-578; C, bal Fe.
Steel arc welding electrode.
AWS Class E6012.

FLEETWELD 35.
M-578; C, bal Fe.
Steel arc welding electrodes.
AWS Class E6011.

FLEETWELD 35LS.
M-578; C, bal Fe.
Steel arc welding electrode.
AWS Class E6011.

FLEETWELD 37.
M-578; C, bal Fe.
Steel arc welding electrode.
AWS Class E6013.

FLEETWELD 47.
M-578, C, bal Fe.
Steel arc welding electrode.
AWS Class E7014.

FLEETWELD 57.
M-578; C, bal Fe.
Steel arc welding electrode.
AWS Class E6013.

FLEETWELD 180.
M-578, C, bal Fe
Steel arc welding electrode.
AWS Class E6011.

FLETCHER & EMPERER BEARING.
Eng.; 92 Al, 7.5 Cu, 0.3 Sn
For bearings, non-hardenable.

FLETCHER'S ALLOY.
Eng; 96 Al, 3 Cu, 1 Sn, 0.5 Sb, P.
For aircraft and light weight parts; non-hardenable.

FLETCHERS BEARING METAL.
90 Al, 7 Cu, 1 Zn
For bearings.

FLEX
M-1291, 0.50 C, Mn, bal Fe.
For gears, shafts, machine tool parts, water hardened

FLEXALOY.
M-1128, C, Cr, Mn, Ni, bal Fe.
550 Brin.
For hard surfacing electrodes, wear resistant against earth

FLEXARC ACP-MO.
M-118, C, bal Fe
For welding electrodes for steel.

FLEXARC AP.
M-118; 0.1 C, bal Fe.
Welded 62,000 TS; 52,000 YS, 22 El
For welding electrodes, for low carbon steel, E6012.

FLEXARC AP-Mo.
M-118; C, alloy, bal Fe.
For welding electrodes; E-7010.

FLEXARC DH.
M-118; 0.2 C, bal Fe.
Welded: 62,000 TS; 55,000 YS; 25 El.
For welding electrodes; coated, for medium carbon steel, E6020.

FLEXARC DH-MO.
M-118; C, alloy, bal Fe.
Welded: 70,000 TS, 57,000 YS; 25 El.
For welding electrodes; high tensile, E-7020.

FLEXARC FP.
M-118; 0.3 C, bal Fe.
Welded. 68,000 TS; 55,000 YS; 17 El.
For welding electrodes; coated; for medium carbon steel, E6012.

FLEXARC FP-2.
M-118; C, bal Fe.
Welded: 68,000 TS; 55,000 YS; 17 El.
For arc welding electrodes; AWS-E-6012.

FLEXARC GRADE 18.
M-118; C, bal Fe.
For welding rods; Sulcoat E-4510.

FLEXARC LOH-2.
M-118; C, alloy, bal Fe.
Welded: 70,000 TS; 57,000 YS; 22 El.
H_2 coated electrode for alloy steel; E-7016.

FLEXARC SW-2.
M-118; Fe alloy.
Welded: 68,000 TS; 55,000 YS; 17 El.
For welding electrodes; E-6013.

FLEXIBLE HACK BAND.
M-357; 1.3 C, 0.15 Cr, bal Fe.
For tools, dies; water hardening.

FLEXITE.
M-1684; 0.45 C, 1.1 Mn, 1.1 Cr, 1.75 Ni, 0.2 V, 0.35 Mo, bal Fe.
Oil hardening, low alloy tool steel.

FLEXOGRAIN PHOSPHOR BRONZE.
M-98; Sn, P, bal Cu.
For springs, contacts, clips; high fatigue life.

FLEX-O-LOY.
M-1579, 68.5-71.5 Cu, 0.03 Pb, 0.05 Fe, 30 Zn.
Hard 76,000 TS; 63,000 YS; 8 El; Rock B 82.
Spring: 95,000 TS, 65,000 YS; 3 El; Rock B 91.
For electrical, electronic, and wiring device components Good formability.

FLEXOR.
M-1433, 0.34 C, 0.85 Cr, 0.50 Mo, 0.45 W, bal Fe.
Heat treated: 160,000-250,000 TS; 125,000-200,000 YS; 14-9 El; 44-37 RA; 300-495 Brin.
For chuck jaws, arbors, motor shafts, gears, racks, arbors; pre-treated machinery steel.

FLEXO STEEL
M-32; 0.60 C, 0.75 Mn, 2.0 Si, bal Fe.
Heat treated 325,000-135,000 TS; 300,000-100,000 YS, 4-20 El; 10-50 RA, 600-250 Brin.
For leaf springs, recoil springs, shuttle springs; great toughness for high service stresses.

FLINSO
M-805; Pb, bal Sn
For solder for Al.

FLINT ALLOY.
Eng., 83 Fe, 12.5 Cr, 0.5 Si, 0.3 C.
For cutlery, stainless parts, corrosion resisting parts; corrosion resistant

FLINTCAST.
M-192; 3.3 T. C, 2.4 Si, 1 Cr, bal Fe.
For abrasion resisting iron castings, abrasion resisting.

FLINTMETAL
M-1250; 3.0-3.6 C, 4.0-4.75 Ni, 1.4-3.5 Cr, 0.4-0.7 Si, bal Fe.
Sand cast: 45,000 TS; 600 Brin.
Permanent mold: 50,000 TS; 675 Brin.
For cams, dies, rollers, bearing races; white cast iron, hard, corrosion resistant.

FLINTUFF.
M-95; 3.0 C, Ni, bal Fe.
For rolls; hard alloy.

FLINTYPE.
M-507; 0.90 C, 1.0 Si, 0.3 Mn, 9.5 Cr, 0.6 Mo, 3.2 Ni, bal Fe.
Hardfacing electrode.
As arc welded: 55,000 psi, 560 BHN.
For overlay or buildup on plow points, heavy earth moving machinery; abrasion resistant, not designed for edge impact.

FLOCKTON 4% TUNGSTEN.
M-1409; 1.3 C, 4-5 W, 1.0-1.2 Cr, 0.25 V, bal Fe.
For reamers; oil hardened.

FLOCKTON C.T.
M-1409; 0.3 C, 9 W, 2.5 Cr, 0.4 V, bal Fe.
For heading and piercing dies, punches; hot work steel, oil hardened.

FLOCKTON H.C.C.
M-1409; C, Co, bal Fe.
For shear blades, nibblers; air hardened.

FLOCKTON H.D.M.
M-1409; 0.35 C, 5 Cr, 1.5 Mo, 1 Si, 0.4 Mn, 0.4 V, bal Fe.
For extrusion dies, die casting dies; hot work steel, oil hardened.

FLOCKTON I.E.-P.
M-1409; 1.0 C, bal Fe.
Annealed. 100,000 TS; 53,000 YS; 21 El; 42 RA; 200 Brin.
For tools, dies, drills, taps; water hardened; Type W1.

FLOCKTON N.T.C.
M-1409; C, alloy, bal Fe.
For chisels; non-tempering steel, air hardened.

FLOCTON P.B.7.
M-1409; C, alloy, bal Fe.
For taps, dies, drills, reamers; resists severe compression and abrasion.

FLOCTON P-NI.
M-1409, 0.8 C, 1.8 Ni, 1 Cr, 0.35 Mn, bal Fe.
For machinery parts, cold heading dies; oil hardened, shock resistant.

FLOCKTON R.H.D.
M-1409; 0.38 C, 5 Cr, 1.5 Mo, 1.5 W, 1 Si, 0.3 Mn, bal Fe.
For extrusion and heading dies, rams, mandrels; oil or air hardened, hot work steel.

FLOCKTON T.C.
M-1409; 1.5 C, 3.2 W, 0.15 Cr, bal Fe.

FLO-KOTE.
M-374; 0.2 C, 11-13 Mn, Ni, bal Fe.
For welding electrode; tough, wear resistant.

FLOTECTIC SILVER #2.
M-717.
Silver solder type alloy for torch, furnace or induction brazing, ferrous and non-ferrous alloys.
Melts 1295°F; 58,000 TS.

FLUGINOX 51.
M-1120; 0.05 C, 0.2 Al, 12.5 Cr, 0.5 Mo, bal Fe
Annealed: 70,000 TS; 35,000 YS; 40 El; 80 RA; 145 Brin.
Cold Drawn: 90,000 TS; 80,000 YS; 20 El; 65 RA; 200 Brin.
For oil refinery and chemical plant equipment, table flatware, hardware. Corrosion resistant.

FLUGINOX 60.
M-1120; 0.05 max C, 13 Cr, 0.5 Mo, bal Fe.
Annealed: 70,000 TS; 35,000 YS; 40 El; 80 RA; 145 Brin.
Cold Drawn: 90,000 TS; 80,000 YS; 20 El; 65 RA; 200 Brin.
For oil refinery and chemical plant equipment, table flatware, hardware. Corrosion resistant.

FLUGINOX 62.
M-1120; 0.20 C, 12 Cr, 1 Mo, 0.8 Ni, 0.25 V, 1.0 W, bal Fe.
Annealed: 75,000 TS; 40,000 YS; 30 El; 70 RA; B 82 Rock.
Heat treated: 230,000 TS; 195,000 YS; 8 El, 30 RA; C 50 Rock.
For cutlery, surgical instruments, valves, bearings, shafts. Corrosion resistant, hardenable.

FLUGINOX 65.
M-1120; 0.22 C, 11 Cr, 1 Mo, V, Cb, bal Fe.
Annealed: 75,000 TS, 35,000 YS; 30 El; 70 RA, B 82 Rock
Cold Drawn: 90,000 TS, 80,000 YS; 15 El; 60 RA; B 92 Rock.
For knives, cutlery, valves, bearings, shafts, gears, surgical instruments
Corrosion resistant, hardenable

FLUKS
M-1260, 55 Sn, 10 Sb, 2.5 Cu, 32.5 Pb.
Cast: 11,400 TS; 22 Brin.
For refrigerator and electric motor bearings; M.P 355-620°F; good castability

FLUSH PLATE
Eng.; 65.75 Cu, 32.75 Zn, 1.50 Pb.
For hardware, free-cutting

FLUXCOR ½ Mo
M-663, 0.08 C, 0.8 Mn, 0.5 Si, 0.5 Mo, bal Fe.
Wire for welding and build-up of low alloy steel using Co_2 shielded gas.
Welded, stress ann· 92,000 TS; 81,000 YS, 26 El

FLUXCOR 1.
M-663; 0.11 C, 1.6 Mn, 0.84 Si, bal Fe.
Wire for welding or build-up on mild steel.
As welded· 101,700 TS, 89,200 YS; 24 El
AWS E 70T-2

FLUXCOR 2
M-663
For welding steel having residual oil from machining and forming
AWS E 70T-1.

FLUXCOR Cr-Mo 1.
M-663, 0.07 C, 0.84 Mn, 0.46 Si, 1.23 Cr, 0.51 Mo, bal Fe
Wire to join or repair Cr-Mo steel castings and similar Cr-Mo steels
Welded, stress ann: 103,000 TS, 93,000 YS; 25 El.

FLUXCOR Cr-Mo 2.
M-663, 0.04 C, 0.83 Mn, 0.48 Si, 2.23 Cr, 1.08 Mo, bal Fe.
Wire for welding or build-up of Cr-Mo castings and wrought steel of similar composition
Welded, stress ann 110,000 TS; 100,000 YS; 20 El.
Usually used with Co_2 shielded gas

FLUXRITE.
M-88; Sn, bal Pb.
For solder; soft

FLYLITE NO. 4.
M-1045; 8.3-9.7 Al, 1.7-2.3 Zn, 0.1 max Mn, bal Mg.
Cast: 20,000 TS; 10,000 YS; 1 El; 65 Brin.
T-Temper: 34,000 TS; 18,000 YS; 1 El; 84 Brin.
For sand castings; heat treatable.

FLYLIGHT NO. 5.
M-1045; 7.5-8.5 Al, 0.2-0.6 Zn, 0.3 Mn, 0.2 Si, bal Mg.

Cast: 20,000 TS; 11,000 YS; 3 El; 50 Brin.
Heat treated: 32,000 TS; 11,000 YS; 9 El; 60 Brin.
For gear and blower casing for aero engines; heat treatable.

FLYLITE NO. 8.
M-1045; 5.3-6.7 Al, 2.5-3.5 Zn, 0.15 max Mn, bal Mg.
Cast: 24,000 TS; 10,000 YS; 4 El; 50 Brin.
T-Temper: 34,000 TS; 16,000 YS; 3 El; 73 Brin.
For sand castings; heat treatable.

FLYLITE NO. 9.
M-1045; 9.2-9.8 Al, 0.2-0.6 Zn, 0.2-0.4 Mn, bal Mg.
Cast: 18,000 TS; 11,000 YS; 1 El; 55 Brin.
T-Temper: 34,000 TS; 17,000 YS; 1 El; 75 Brin.
For sand castings; heat treatable.

FM-2.
M-1699, Sintered carbide tool material.
For percussion type mining tools.

FM-3.
M-1699; Sintered carbide tool material.
For percussion and rotary drilling type mining tools

FM-5
M-1699; Sintered carbide tool material.
For coal mining tools, percussion, rotary drilling, auger bits

FM-6.
M-1699, Sintered carbide tool material.
For percussion and rotary drilling type mining tools.

FM-100.
M-1531, 1.25 T.C., 0.92 C.C., 3 Cu, 0.2 Si, 0.5 Mn, 0.9 Mo, bal Fe.
Sintered. 100,000 TS; Rockwell B95.
For piston rings; wear resistant.

F-NICKEL.
M-68, 5-6 Si, 1-2 Fe, 0.2 Cu, 0.025 S, 90-92 Ni.
For alloying cast iron; Ni additions

FO 25-12.
M-1487.
Stainless steel, similar to AISI 309

FO 25-20.
M-1487.
Stainless steel; similar to AISI 310

FO 36-18.
M-1487.
Stainless steel, similar to AISI 330.

FOBES METAL.
Eng.; 54 Zn, 46 Cu.
For ornamental castings, low strength.

FOB METAL.
Eng., 87.50 Cu, 12.0 Zn, 0.50 Sn
For fobs, ornaments; red brass.

FOC 0 POINTS.
M-1546; 1.25 C, bal Fe
Hardened: Rock C 65-66.
For files, cutting tools, drills.
Water hardening, wear resistant.

FOC 3 POINTS.
M-1546; 0.90 C, bal Fe.
Annealed: 100,000 TS; 53,000 YP; 21 El; 197 Brin.
Hardened: 216,000 TS; 152,000 YP; 11 El; 600 Brin.
For chisels, bolts, cutting tools, springs, punches, drills. Water hardening, wear resistant

FOC 4 POINTS.
M-1546; 0.80 C, bal Fe.
Annealed: 120,000 TS; 65,000 YS; 15 El; 223 Brin.
Hardened: 190,000 TS; 142,000 YS; 12 El; 390 Brin.
For chisels, bolts, springs, bearings, liners.
Water hardening, wear resistant.

FONTAINMOREAU BRONZE.
England; 0-8 Cu, 0-1 Fe, 0-1 Pb, bal Zn.
For ornaments, fittings; die castings.

FONTE R.A.
M-700; 0.2 C, bal Fe.
For structural parts; carburizing steel.

FOOL-PROOF.
M-80; 0.7 C, 4 W, 2 Cr, bal Fe.
For hand and pneumatic chisels, oil hardening.

FOREZ 2AS.
M-1487; 0.85 C, 6 W, 2 V, 6 Mo, 4.5 Cr, bal Fe.
For lathe and planer tools, drills, reamers, hobs; high speed steel (Z85WD06-06).

FOREZ 3AS.
M-1487; 0.80 C, 18 W, 5 Cr, 1 Mo, 1.5 V, bal Fe.
For lathe and planer tools, drills, taps, hobs; high speed steel (Z80W18).

FOREZ 3ASR.
M-1487; 0.70 C, 12 W, 2.5 Mo, 2 V, 5 Cr, bal Fe.
For lathe and planer tools, reamers, milling cutters; high speed steel (Z70WD12).

FOREZ 4AS.
M-1487, 0.85 C, 18 W, 5 Cr, 1.5 V, 1 Mn, 5 Co, bal Fe.
For lathe and planer tools, milling cutters, hobs; high speed steel (Z85WK-18-05).

FOREZ 444.
M-1487; 1.25 C, 20 W, 4 Cr, V, Co, bal Fe.
For lathe and planer tools, reams, taps, drills; high speed steel, oil hardened (Z125WK20-15).

FOREZ CH1.
M-1487; 1.0 C, 0.3 Mn, 0.3 Si, bal Fe.
For cutters, water hardened (100C2).

FOREZ CH3
M-1487, 0.90 C, 0.3 Mn, 0.3 Si, bal Fe.
For milling cutters, reamers, drills, punches, files; water hardened (90C2).

FOREZ CH4.
M-1487, 1.2 C, 0.3 Mn, 0.3 Si, bal Fe.
For nail dies, hot snaps, punches, shears, hard and tough (120C2).

FOREZ CH5
M-1487, 0.80 C, 1.2-1.5 Mn, 0.40 Si, bal Fe.
For reamers, taps, gauges, special dies; oil hardened, non-deforming (80M5).

FOREZ CX50.
M-1487; 0.50 C, bal Fe.
Annealed. 96,000 TS, 52,000 YS; 16 El, 23 RA, 170 Brin.
For impact and shear tools, pneumatic chisels; water hardened

FOREZ CX75.
M-1487, 0.75 C, bal Fe.
Heat treated: 180,000 TS, 132,000 YS, 11 El; 36 RA; 360 Brin
For wire drawing dies, reamers, punches; water hardened.

FOREZ CX100.
M-1487; 1.00 C, bal Fe.
Annealed: 100,000 TS; 53,000 YS; 21 El; 42 RA; 200 Brin.
For reamers, taps, drills, punches; water hardened.

FOREZ CX125.
M-1487; 1.25 C, bal Fe.
For drills, reamers, milling cutters; water hardened.

FOREZ DT.
M-1487; 2 C, 12 Cr, bal Fe.
For shear blades, wire drawing and piercing dies; non-deforming, oil hardened (Z200 C12).

FOREZ E3.
M-1487; 1.25 C, 11 W, 3 V, 0.6 Mo, 4.5 Cr, bal Fe.
For lathe and planer tools, reams, taps, drills; high speed steel, oil hardened (Z125WV15-03).

FOREZ MO6.
M-1487; 0.35 C, alloy, bal Fe.
For injection nozzles, molds, die casting dies; hot work steel, tough (35D06-04).

FOREZ MT18.
M-1487; 0.50 C, 4 Cr, 18 W, 1 Mo, 1 V, bal Fe.
For cold work tools, punches, crimpers; cold impact steel (Z50WV18-01).

FOREZ NI5.
M-1487; 0.35 C, 3 Ni, 0.8 Cr, bal Fe.
Annealed: 92,000 TS; 20 El; 50 RA.
Heat treated: 165,000 TS; 10 El, 40 RA.
For arbors, gears, machine tool parts, shafts; oil hardened (35NC11).

FOREZ NID.
M-1487; 0.40 C, 3 Ni, 0.8 Cr, bal Fe.
Annealed: 103,000 TS; 15 El; 50 RA.
Heat treated: 235,000 TS; 3 El; 20 RA.
For gears, machine tool parts, shafts, axles; oil hardened (40NC11).

FOREZ NVM.
M-1487; 0.4 C, Ni, Cr, bal Fe.
Annealed: 128,000 TS; 18 El; 40 RA.
Heat treated: 275,000 TS; 6 El; 20 RA.
For hot work punches and dies; tough and hard (40NW5).

FOREZ SM.
M-1487; C, Si, Mn, bal Fe.
For crankshafts, propeller shafts, axles, gears; oil hardened.

FOREZ SMX.
M-1487; 0.45 C, 1.9 Si, 0.6 Mn, bal Fe.
For springs, washers, looms, machine tool parts; oil or water hardened (45S8).

FOREZ SUPRA EXTRA 4AS.
M-1487; 0.85 C, 18 W, 5 Cr, 1.5 V, 1 Mo, 10 Co, bal Fe.
For lathe and planer tools, broaches, reamers, hobs; high speed steel (Z85WK-18-10).

FOREZ TE.
M-1487; 0.3 C, 3 Cr, 9 W, bal Fe.
For punches, dies, bolt and nail dies; hot work steel (Z30WC09)

FOREZ TES.
M-1487; 0.30 C, W, Cr, V, bal Fe.
For punches, dies, wire drawing dies; cold work steel (Z30WCV10).

FOREZ TFR.
M-1487; 0.85 C, 6 W, 2 V, 1 Mo, 4.5 Cr, bal Fe.
For lathe and planer tools, reamers, hobs; taps; high speed steel (Z85WD06-02).

FOREZ TM.
M-1487; 0.40 C, alloy, bal Fe.
For hot and cold stamping tools, pneumatic chisels; shock resistant (40WNCD).

FORGE-DIE.
M-115; 0.25 C, 13.5-14.5 W, 3.5 Cr, 0.5 V, bal Fe.
For upsetter heads and dies, piercing punches, extrusion dies; resists heat checking, hot work steel.

FORGE-WELL.
M-1684; 0.27 C, 1.0 Mn, 1.2 Cr, 0.25 V, 0.3 Mo, bal Fe.
Oil hardening, low alloy tool steel, for molds.

FORGING BRASS.
Eng.; 60-57 Cu, 40-43 Zn.
For corrosion resisting forgings; high strength.

FORGING BRASS-377.
M-8; 60 Cu, 38 Zn, 2 Pb.
Soft Rod: 54,000 TS; 20,000 YS; 45 El; B 45 Rock.
For hardware, gears, fasteners, bolts.
Free-machining leaded brass.

FORGING BRASS, NO 377.
M-33; 60 0 Cu, 38.0 Zn, 2.0 Pb.
As extruded. 52,000 TS; 20,000 YS; 45 El; 32,000 shear, 78 Rock F.
For forgings, tire valve stems.
ASTM B 124, Alloy 2, B 283

FORGINGS, RUSSIAN.
Russia, 53.5 Cu, 42 Zn, 4.5 Mn.
For corrosion resisting forgings; corrosion resistant.

FORMA-1.
M-111; 0.05 C, 0.05 Si, 0.10 Mn, bal Fe.
For bakelite molding dies; deep hobbing, case hardened.

FORMA 2.
M-111; 0 08 C, 0.1 Si, 0.15 Mn, bal Fe.
For deep drawn parts; deep drawing steel.

FORMALOY.
M-336; C, Mn, Ni, Cr, Mo, bal Fe
For dies, shearing tools; oil hardening.

FORMALOY
M-815; 3 Cu, 0 4 Mg, bal Zn.
Aged· 40,300 TS; 33,100 YS, 2.8 El; 103 Brin.
Cast· 32,300 TS; 4.7 El; 90 Brin
Chilled. 36,000 TS; 2.7 El; 93 Brin
For dies for forming aluminum sheets, drop hammer punches and dies; die casting alloy, high strength

FORMBRITE.
M-8, Zn, bal Cu.
For deep drawn parts; good formability.

FORMDIE.
M-35; 0 51 C, 0 45 Mn, 1 0 Si, 5.2 Cr, 1.5 Ni, 1 05 V, 1.4 Mo, bal Fe.
For shear blades, extrusion dies, inserts, heavy punches
Type A9 air hardening tool steel.

FORMDIE SMOOTHCUT.
M-35; 0.48-0.54 C, 0.9-1 1 Si, 1.25-1.50 Mo, S, 5.0-5 4 Cr, 0.9-1.1 V, 1.35-1.65 Ni, bal Fe.
For shear blades, hot upsetting and gripper dies, drop forging and hot heading dies, punches. air hardening.
Cold work tool steel, Type A9.

FORMITE NO. 1.
M-35; 0 35 C, 13 5 W, 3.7 Cr, 0.4 Si, 0.4 V, 0 3 Mn, bal Fe.
For hot punches, dies, shear blades; heat resistant, oil hardened; "Durite V-40."

FORMITE NO. 2.
M-35; 0.30 C, 3.25 Cr, 9.25 W, 0.5 V, bal Fe.
For forming, extrusion and die casting dies; hot work steel, oil hardened. AISI H21.

FORMITE NO. 3.
M-35; 0.51 C, 15 W, 3 Cr, 0.5 V, bal Fe.
Hardened: C 52-56 Rock.
For hot shear blades and punches, hot forming and extrusion rolls and dies.

Hot work tool steel Type H24;
High temperature hardness.

FORMITE NO. 21.
M-35; 0.33 C, 9.25 W, 3.3 Cr, 0.5 V, bal Fe.
For hot temperature springs, forging dies, forming dies, gripper dies.
Type H21 hot work tool steel.

FORMITE NO. 24.
M-35; 0.51 C, 15.0 W, 3.0 Cr, 0.5 V, bal Fe.
For die casting dies, punches, piercing tools, blanking dies.
Type H24 hot work tool steel

FORMOLD.
M-38; 0.07 max C, 0.55 Ni, 1.35 Cr, 0.2 Mo, bal Fe.
For plastic mold dies, cold hubbed; oil hardened, high core strength.

FORNANC SPECIAL.
M-1724; 0.15-0.25 C, 1.4-1.8 Mn, 0.4-0.7 Ni, 0.15-0.35 Mo, bal Fe.
Hardened: 90,000-107,000 TS; 67,000-80,000 YS; 30-22 El; 70-50 Brin.
For gears, shafts, axles; oil hardened.

FORTAL.
M-807; 94.3 Al, 4.0 Cu, 0.5 Mg, 0.5 Mn, 0.7 Si.
For light alloy parts, age-hardenable.

FORTISSIMUS.
M-615; 0.7 C, 18 W, 4 Cr, 1 V, bal Fe.
For cutters, tools, high speed steel.

FORTIWELD
M-1724; 0.10-0.16 C, 0.4-0.6 Mo, 0.6 max Mn, 0.4 max Si, 0.005 max B, bal Fe
Normalized. 97,500-88,000 TS, 75,000-69,000 YS, 26-17 El, 64 RA.
For bridge cranes, railroad cars, material handling equipment, good formability and weldability

FORT PITT VANADIUM
M-275, 1.0 C, 0.2 V, bal Fe.
For tools, drills, taps, water hardened

FORTUNA 12M
M-1307, 1.2 C, 12 Mn, bal Fe
For crusher jaws, impact tools, liners, grab-teeth, wear resistant, work hardened

FORTUNA A12
M-1332, M-1307, 0.10 max C, 12.5 Cr, 12 Ni, bal Fe
Annealed: 72,000-92,000 TS; 30,000 YS; 60 El, 115-150 Brin.
For clock cases, chemical plant equipment; EN58D Special; stainless, good cold workability

FORTUNA A18.
M-1332, M-1307, 0.15 max C, 18 Cr, 9 Ni, bal Fe.
Annealed 78,000-108,000 TS, 36,000 YS; 55 El; 130-180 Brin
For chemical plant equipment, vessels, tanks, agitators; Type 302; stainless, austenitic.

FORTUNA A18Z
M-1322, M-1307; 0.10 max C, 18 Cr, 10 Ni, Ti, bal Fe.
Annealed: 78,000-108,000 TS; 38,000 YS; 50 El; 140-190 Brin.
For welded chemical plant equipment, tanks, vessels; Type 321; stainless, austenitic.

FORTUNA A18ZN.
M-1332, M-1307; 0.10 max C, 18 Cr, 10 Ni, Cb + Ta, bal Fe.
Annealed: 78,000-108,000 TS; 38,000 YS; 45-50 El, 140-190 Brin.
For acid resistant welded chemical plant equipment; Type 347; stainless, austentic.

FORTUNA A182Z.
M-1332, M-1307; 0.10 max C, 18 Cr, 11 Ni, 2.3 Mo, Ti, bal Fe.
Annealed: 78,000-108,000 TS; 38,000 YS; 50 El; 140-190 Brin.
For acid resistant chemical plant equipment. mixers; Type 316 + Ti; stainless, austenitic.

FORTUNA A182ZN.
M-1332, M-1307, 0.10 max C, 18 Cr, 11 Ni, 2.3 Ti, Cb + Ta, bal Fe.
Annealed 78,000-108,000 TS; 38,000 YS; 45 El; 140-190 Brin.
For acid resistant chemical plant equipment; Type 316 + Cb; stainless, austenitic.

FORTUNA A183Z.
M-1332, M-1307; 0.10 max C, 18 Cr, 12 Ni, 2.8 Mo, Ti, bal Fe.
Annealed: 78,000-108,000 TS; 38,000 YS; 50 El; 140-190 Brin.
For chemical and pharmaceutical equipment, EN58J Special; stainless, austenitic.

FORTUNA A183ZN.
M-1332, M-1307; 0.10 max C, 18 Cr, 12 Ni, 2.8 Mo, Ta + Cb, bal Fe
Annealed 78,000-108,000 TS; 38,000 YS; 45 El; 140-190 Brin
For pharmaceutical and chemical equipment, resists sulfide lye; Type 318; stainless, austenitic.

FORTUNA A2182ZN
M-1332, M-1307, 0.06 max C, 18 Cr, 18 Ni, 2.3 Mo, Cu, Ta, Cb, bal Fe
Annealed 78,000-108,000 TS, 34,000 YS; 45 El; 140-190 Brin.
For equipment for pickling and sulfuric acid plants; acid resistant, austenitic.

FORTUNA AS18
M-1332, M-1307, 0.06 max C, 18 Cr, 10 Ni, bal Fe.
Annealed. 72,000-101,000 TS; 32,000 YS; 55 El, 130-180 Brin
For chemical plant equipment, tanks, breweries; Type 304, stainless, austenitic.

FORTUNA AS175.
M-1332, M-1307, 0.06 max C, 17 Cr, 14 Ni, 4.5 Mo, bal Fe
Annealed 78,000-108,000 TS, 34,000 YS; 50 El, 140-190 Brin.
For equipment for salt works and soda plants, cooling coils, Type 317, stainless, austenitic.

FORTUNA AS182
M-1332, M-1307, 0.06 max C, 18 Cr, 11 Ni, 2.3 Mo, bal Fe
Annealed 78,000-108,000 TS, 32,000 YS; 45 El, 140-180 Brin
For chemical plant equipment, agitators, mixers; tanks, Type 316, stainless, austenitic

FORTUNA AS183
M-1332, M-1307, 0.06 max C, 18 Cr, 12 Ni, 2.8 Mo, bal Fe
Annealed: 78,000-108,000 TS, 32,000 YS, 50 El, 140-180 Brin.
For acid resistant chemical and textile plant equipment; Type 316; stainless, austenitic.

FORTUNA BS 45.
M 1307, 0.4 C, 1.4 Cr, 4 Ni, 0.5 W, bal Fe.
Annealed. 225 Brin.
For plastic mold dies; oil or air hardened.

FORTUNA BS50.
M-1307; 0.50 C, 1.1 Cr, 3.5 Ni, bal Fe.
For cutlery, blanking dies, hobbing dies, punches, air or oil hardened, shock resistant.

FORTUNA C 1215.
M-1307; 1.65 C, 12 Cr, 0.1 V, bal Fe.
For blanking and drawing dies, piercing punches; air hardened, non-deforming.

FORTUNA C 1215 SUPRA.
M-1307; 1.65 C, 12.5 Cr, 1.4 Co, 1.2 Mo, bal Fe.
For blanking and forming dies, die casting dies; air hardened, non-deforming.

FORTUNA C 1220.
M-1307; 2.1 C, 12 Cr, bal Fe.
For drawing and blanking dies, thread rolling dies; oil hardened, non-deforming.

FORTUNA CA 1215.
M-1307; 1.65 C, 12 Cr, 0.8 Mo, 0.5 W, bal Fe.
For blanking and forming dies, die casting dies; air hardened, non-deforming.

FORTUNA CA 1220.
M-1307; 2.1 C, 12 Cr, 0.1 W, bal Fe.
For blanking and forming dies, punches, shears; oil hardened, non-deforming.

FORTUNA CA 1220 SUPRA.
M-1307; 2.1 C, 12 Cr, 0.1 W, Co, Mo, bal Fe.
For blanking and forming dies, shearing knives; oil hardened, non-deforming.

FORTUNA Co300.
M-1307; 0.8 C, 3 Co, 12 W, 4.2 Cr, 0.5 Mo, 1.8 V, bal Fe.
For lathe and planer tools, reamers, broaches; high speed steel.

FORTUNA Co500.
M-1307; 0.8 C, 5 Co, 18 W, 4.2 Cr, 0.7 Mo, 1.5 V, bal Fe.
For lathe and planer tools, drills, taps, reamers; high speed steel.

FORTUNA Co1000.
M-1307; 0.75 C, 10 Co, 18 W, 4.2 Cr, 0.7 Mo, 1.5 V, bal Fe.
For cutting tools, broaches, reamers; high speed steel.

FORTUNA CSV 4.
M-1307; 0.30 C, 1.5 Si, 1.5 Cr, 0.1 V, bal Fe.
For shear blades, dies, stamps, piercers; hot work steel, water hardened.

FORTUNA CSV5.
M-1307; 0.45 C, 1.5 Si, 1.5 Cr, 0.1 V, bal Fe.
Annealed: 225 Brin.
For chisels, shear blades, punches, pneumatic tools; oil hardened, shock resistant.

FORTUNA CSV6.
M-1307; 0.60 C, 1.0 Si, 1.2 Cr, 0.10 V, bal Fe.
Annealed: 235 Brin.
For punches, blanking dies, cold shear blades; oil hardened, shock resistant.

FORTUNA DMo10.
M-1307, M-1332; 0.24 C, 0.25 Si, 0.60 Mn, 1.2 Cr, 0.25 Mo, bal Fe.
Heat treated: 85,000-115,000 TS; 65,000-72,000 YS; 19-21 El.
For bolts and nuts, oil refinery and chemical plant equipment; creep resistant to 500°C.

FORTUNA DMo11
M-1307, M-1332; 0.16 C, 0.25 Si, 0.60 Mn, 0.30 Mo, bal Fe.
Heat treated: 62,000-78,000 TS; 38,000 YS; 24 El.
For flanges, welded collars, oil refinery equipment; creep resistant to 500°C.

FORTUNA DMo14.
M-1307, M-1332; 0.13 C, 0.25 Si, 0.60 Mn, 1.0 Cr, 0.45 Mo, bal Fe.
Heat treated: 62,000-78,000 TS; 41,000 YS; 24 El.
For flanges, welded collars, oil refinery equipment; creep resistant to 500°C.

FORTUNA DMo20.
M-1307, M-1332; 0.24 C, 0.25 Si, 0.45 Mn, 1.4 Cr, 0.55 Mo, 0.2 V, bal Fe.
Heat treated: 100,000-135,000 TS; 78,000-85,000 YS; 15-19 El.
For bolts, nuts, oil refinery and chemical plant equipment; creep resistant to 500°C.

FORTUNA DMo22.
M-1307, M-1332; 0.21 C, 0.47 Si, 0.40 Mn, 1.35 Cr, 1.1 Mo, 0.3 V, bal Fe.
Heat treated: 101,000-121,000 TS; 78,500 YS; 19 El.
For bolts and nuts, oil refinery and chemical plant equipment; creep resistant to 500°C.

FORTUNA EC3.
M-1307, M-1332, 0.15 C, 0.25 Si, 0.50 Mn, 0.60 Cr, bal Fe.
Heat treated. 85,000-120,000 TS; 58,000 YS; 16 El; 45 RA.
For gears, pinions, camshafts; case hardened.

FORTUNA ECMo2H.
M-1307, M-1332; 0.20 C, 0.35 max Si, 0.70 Mn, 0.60 Cr, 0.35 Mo, bal Fe
Heat treated: 128,000-170,000 TS; 92,000 YS, 12 El; 45 RA.
For gears, pinions, camshafts, cams; case hardened.

FORTUNA ECMo4.
M-1307, M-1332, 0.15 C, 0.35 max Si, 0.95 Mn, 1.15 Cr, 0.25 Mo, bal Fe.
Heat treated: 121,000-157,000 TS; 92,000 YS; 12 El; 40 RA.
For gears, pinions, camshafts; case hardened.

FORTUNA ECMo5
M-1307, M-1332, 0.20 C, 0.35 max Si, 1.0 Mn, 1.2 Cr, 0.25 Mo, bal Fe.
Heat treated. 156,000-192,000 TS; 107,000 YS; 9 El; 30 RA.
For gears, cams, camshafts, bolts, fasteners; case hardened, tough.

FORTUNA EMC5.
M-1307, M-1332, 0.16 C, 0.25 Si, 1.2 Mn, 1.0 Cr, bal Fe.
Heat treated: 114,000-157,000 TS; 85,000 YS; 12 El; 40 RA.
For gears, cams, camshafts, crankshafts; case hardened, tough.

FORTUNA EMC5H.
M-1307, M-1332; 0.20 C, 0.25 Si, 1.3 Mn, 1.2 Cr, bal Fe.
Heat treated: 144,000-186,000 TS; 101,000 YS; 10 El; 35 RA.
For gears, bolts, crankshafts; case hardened, tough.

FORTUNA ENC6.
M 1307, M-1332; 0.13 C, 0.35 max Si, 0.50 max Mn, 0.20 max Cr, 1.5 Ni, bal Fe.
Heat treated: 85,000-115,000 TS; 58,000 YS; 12 El; 50 RA.
For gears, pinions, camshafts, cams, bolts; case hardened, shock resistant.

FORTUNA ENC10.
M-1307, M-1332; 0.13 C, 0.35 max Si, 0.50 max Mn, 0.75 Cr, 2.5 Ni, bal Fe.
Heat treated: 114,000-144,000 TS, 78,000 YS; 17 El; 50 RA.
For gears, pinions, camshafts, cams, fasteners; case hardened, shock resistant

FORTUNA ENC14.
M-1307, M-1332; 0.13 C, 0.35 max Si, 0.50 max Mn, 0.75 Cr, 3.5 Ni, bal Fe.
Heat treated: 128,000-170,000 TS; 92,000 YS; 11 El; 45 RA.
For gears, pinions, camshafts, cams; case hardened, tough.

FORTUNA ENC18.
M-1307, M-1332; 0.13 C, 0.35 max Si, 0.50 max Mn, 1.1 Cr, 4.5 Ni, bal Fe.
Heat treated: 177,000-200,000 TS; 128,000 YS, 9 El; 40 RA.
For gears, shafts, camshafts, cams; case hardened, tough.

FORTUNA EW 5H
M-1307, 0.20 C, 1.3 Mn, 1.2 Cr, bal Fe
Annealed 217 Brin
For plastic mold dies, case hardened

FORTUNA EW 15 SPECIAL.
M-1307; 0.19 C, 1.3 Cr, 0.20 Mo, 4 Ni, bal Fe.
Annealed: 245 Brin.
For plastic mold dies, case hardened.

FORTUNA EW 52H
M-1307, 0.20 C, 1 Mn, 1.2 Cr, 0.25 Mo, bal Fe.
Annealed 217 Brin
For plastic mold dies; case hardened

FORTUNA EWX 50
M-1307, 0.07 max C, 5 Cr, 1 Mo, 0.2 V, bal Fe
Annealed. 140 Brin
For plastic mold dies, case hardened

FORTUNA EX8H
M-1307, M-1332, 0.20 C, 0.25 Si, 0.80 Mn, 0.5 Cr, 0.6 Ni, 0.2 Mo, bal Fe
Heat treated 135,000-177,000 TS, 92,000 YS; 11 El; 40 RA
For gears, fasteners, camshafts, cams, case hardened

FORTUNA EX15
M-1307, M-1332, 0.15 C, 0.25 Si, 0.50 Mn, 1.5 Cr, 1.5 Ni, bal Fe
Heat treated 128,000-170,000 TS; 92,000 YS, 11 El, 40 RA.
For gears, fasteners, camshafts, cams, bolts, case hardened

FORTUNA EX17.
M-1307, M-1332; 0.15 C, 0.25 Si, 0.50 Mn, 1.7 Cr, 1.5 Ni, 0.3 Mo, bal Fe.
Heat treated: 156,000-192,000 TS; 107,000 YS, 10 El; 40 RA
For gears, axles, shafts, cams, camshafts; case hardened, tough

FORTUNA EX20.
M-1307, M-1332; 0.18 C, 0.25 Si, 0.50 Mn, 2.0 Cr, 2.0 Ni, bal Fe.
Heat treated: 170,000-206,000 TS; 114,000 YS; 9 El; 35 RA.
For machine tool parts, gears, crankshafts, camshafts; case hardened, tough.

FORTUNA F13.
M-1332, M-1307; 0.10 max C, 13 Cr, bal Fe.
Heat treated: 85,000-107,000 TS; 63,000 YS; 26 RA; 170-210 Brin.
For cutlery, fittings, appliances, pump and valve parts; corrosion resistant; Type 410.

FORTUNA F17.
M-1332, M-1307; 0.08 C, 17 Cr, bal Fe.
Annealed: 62,000-85,000 TS; 43,000 YS; 24 El; 140-180 Brin.
For cutlery, fittings, kitchen appliances and sinks; Type 430; corrosion resistant.

FORTUNA F17A.
M-1332, M-1307; 0.15 max C, 17 Cr, 0.25 Mo, S, bal Fe.
Heat treated: 100,000-123,000 TS; 63,000 YS; 16 El; 190-240 Brin.
For screw machine products, screws, bolts, gears; free-cutting, corrosion resistant.

FORTUNA F17Z.
M-1332, M-1307; 0.08 C, 17 Cr, Ti, bal Fe.
Annealed: 68,000-85,000 TS; 43,000 YS; 24 El; 130-170 Brin.
For welded acid resistance and chemical plant equipment; stabilized, welding grade, corrosion resistant.

FORTUNA FU.
M-1307, 1.3 C, 0.25 Mn, bal Fe.
For files, rasps; water hardened.

FORTUNA FU33.
M-1307, 0.37 C, 0.50 Mn, bal Fe.
Hot rolled. 85,000 TS; 54,000 YS, 30 El; 53 RA; 185 Brin
For files, rasps; case hardened tools.

FORTUNA FU43.
M-1307, 0.47 C, 0.67 Mn, bal Fe.
Hot rolled· 98,000 TS; 60,000 YS; 24 El; 54 RA, 212 Brin
For files, rasps, water hardened

FORTUNA GB0.
M-1307, M-1332, 0.10 C, 0.25 Si, 0.40 Mn, 0.035 max S and P, bal Fe.
Heat treated: 60,000-74,000 TS; 36,000 YS; 22 El; 55 RA.
For machine and construction parts, fasteners, case hardened.

FORTUNA GB1
M-1307, M-1332, 0.15 C, 0.25 Si, 0.40 Mn, 0.035 max S and P, bal Fe.
Heat treated 72,000-94,000 TS; 42,000 YS; 19 El; 50 RA.
For bolts, levers, journals, gears, case hardened.

FORTUNA GB2.
M-1307, M-1332, 0.22 C, 0.25 Si, 0.45 Mn, 0.035 max S and P, bal Fe.
Heat treated. 72,000-92,000 TS; 42,000-52,000 YS; 24-25 El; 45-50 RA.
For machine tool parts, gears, shafts, bolts; water hardened.

FORTUNA GB3.
M-1307, M-1332; 0.35 C, 0.25 Si, 0.55 Mn, 0.035 max S and P, bal Fe.
Heat treated: 78,000-115,000 TS; 47,000-61,000 YS; 19-24 El; 40-50 RA.
For machine tool parts, gears, fasteners; water hardened.

FORTUNA GB4
M-1307, M-1332; 0.45 C, 0.25 Si, 0.65 Mn, 0.035 max S and P, bal Fe.
Heat treated: 85,000-128,000 TS; 52,000-67,000 YS; 17-21 El; 35-45 RA.
For pinions, bolts, transmission gears, shafts; for surface hardening.

FORTUNA GB5H.
M-1307, M-1332; 0.56 C, 0.30 Si, 0.55 Mn, bal Fe.
Heat treated: 92,000-135,000 TS; 58,000-76,000 YS; 16-19 El; 35-40 RA.
For pistons, machine tool parts; for surface hardening.

FORTUNA GB6.
M-1307, M-1332; 0.60 C, 0.25 Si, 0.65 Mn, 0.035 max S and P, bal Fe.
Heat treated: 100,000-150,000 TS; 60,000-80,000 YS; 15-18 El; 30-40 RA.
For clutch levers, gears, axles, shafts; water hardened.

FORTUNA GB6H.
M-1307, M-1332; 0.68 C, 0.32 Si, 0.7 Mn, 0.040 max S and P, bal Fe.
Annealed: 98,000 TS
For shafts, piston rods, valve stems; wear resistant, oil or water hardened.

FORTUNA GB9.
M-1307, M-1332, 0.90 C, 0.32 Si, 1.1 Mn, 0.040 max S and P, bal Fe.
Annealed: 145,000 TS; 85,000 YS; 12 El.
Heat treated: 242,000 TS; 199,000 YS, 7 El.
For molds for briquette presses; wear resistant, oil hardened.

FORTUNA GB10.
M-1307, M-1332; 0.10 C, 0.25 Si, 0.40 Mn, 0.045 max S and P, bal Fe.
Heat treated: 60,000-74,000 TS; 36,000 YS; 22 El, 55 RA.
For bushings, bolts, levers, gears; case hardened.

FORTUNA GB11.
M-1307, M-1332; 0.15 C, 0.25 Si, 0.40 Mn, 0.045 max S and P, bal Fe.
Heat treated: 72,000-94,000 TS; 42,000 YS; 19 El; 50 RA.
For machine and construction parts, gears, bolts; case hardened.

FORTUNA GB12.
M-1307, M-1332; 0.22 C, 0.25 Si, 0.45 Mn, 0.045 max S and P, bal Fe.
Heat treated: 60,000-92,000 TS, 33,000-56,000 YS; 24-30 El; 40-45 RA.
For machine tool parts, gears, bolts, shafts; water hardened.

FORTUNA GB13.
M-1307, M-1332, 0.35 C, 0.25 Si, 0.55 Mn, 0.045 max S and P, bal Fe.
Heat treated: 72,000-114,000 TS; 40,000-62,000 YS; 19-25 El; 35-45 RA.
For shafts, gears, axles, machine tool parts; oil or water hardened.

FORTUNA GB14.
M-1307, M-1332; 0.45 C, 0.25 Si, 0.65 Mn, 0.045 max S and P, bal Fe.
Heat treated: 85,000-128,000 TS; 49,000-70,000 YS; 17-21 El; 30-40 RA
For shafts, axles, gears, bolts; oil or water hardened.

FORTUNA GB16.
M-1307, M-1332; 0.60 C, 0.25 Si, 0.65 Mn, 0.045 max S and P, bal Fe.
Heat treated: 100,000-150,000 TS; 56,000-80,000 YS; 15-18 El; 25-35 RA.
For axles, shafts, spindles, bolts, gears; oil or water hardened.

FORTUNA GFD2.
M-1307, M-1332; 0.38 C, 1.5 Si, 0.65 Mn, bal Fe.
Heat treated: 170,000-200,000 TS; 150,000 YS; 7-10 El; 30 RA; 350-400 Brin.
For railway and auto springs; water hardened.

FORTUNA GFD3.
M-1307, M-1332; 0.48 C, 0.25 Si, 1.75 Mn, 0.050 max S and P, bal Fe.
Heat treated: 186,000-213,000 TS; 157,000 YS; 7-10 El; 30 RA; 380-435 Brin.
For railway and auto springs; oil hardened.

FORTUNA GFD4.
M-1307, M-1332; 0.46 C, 1.65 Si, 0.65 Mn, 0.050 max S and P, bal Fe.
Heat treated. 186,000-213,000 TS; 157,000 YS; 7-10 El; 30 RA; 380-435 Brin.
For railway and auto springs; water hardened.

FORTUNA GFD5.
M-1307, M-1332; 0.66 C, 1.65 Si, 0.70 Mn, 0.050 max S and P, bal Fe
Heat treated 186,000-213,000 TS; 157,000 YS; 7-10 El, 30 RA, 380-435 Brin
For railway and auto springs, oil hardened.

FORTUNA GFD5W.
M-1307, M-1332; 0.56 C, 1.65 Si, 0.70 Mn, 0.050 max S and P, bal Fe.
Heat treated. 186,000-213,000 TS; 157,000 YS; 7-10 El; 30 RA, 380-435 Brin.
For railway and auto springs; oil hardened.

FORTUNA GFD7.
M-1307, M-1332; 0.65 C, 1.10 Si, 1.0 Mn, 0.050 max S and P, bal Fe.
Heat treated 190,000-225,000 TS, 157,000 YS; 7-10 El; 30 RA, 390-450 Brin
For railway and auto springs, oil hardened.

FORTUNA GFD8
M-1307, M-1332, 0.67 C, 1.3 Si, 0.50 Mn, 0.50 Cr, bal Fe.
Annealed 112,000 TS, 65,000 YS, 16 El.
Heat treated 232,000 TS, 190,000 YS, 8 El
For highly stressed springs, wear resistant, heavy duty

FORTUNA GFD8R
M-1307, M-1332, 0.60 C, 1.1 Si, 1.0 Mn, 0.50 Cr, bal Fe
Heat treated· 200,000-238,000 TS, 177,000 YS, 7-10 El, 30 RA, 410-435 Brin.
For highly stressed springs, oil hardened.

FORTUNA GFD530
M-1307, M-1332, 0.30 C, 0.22 Si, 0.30 Mn, 2.35 Cr, 0.6 V, 4.35 W, bal Fe.
Heat treated 202,000-248,000 TS; 177,000 YS, 6-9 El, 30 RA.
For high temperature springs; oil hardened, heat resistant.

FORTUNA GK.
M-1307, M-1332, 1.05 C, 0.25 Si, 0.32 Mn, 0.50 Cr, bal Fe.
Annealed. 215 Brin
For ball bearings, roller and needle bearings; oil or water hardened.

FORTUNA GKL.
M-1307, M-1332, 1.0 C, 0.25 Si, 0.32 Mn, 1.5 Cr, bal Fe.
Annealed· 215 Brin.
For ball bearings, ball races and discs; oil hardened.

FORTUNA GKL0.
M-1307, M-1332, 1.0 C, 0.25 Si, 0.32 Mn, 1.5 Cr, bal Fe.
Annealed: 207 Brin.
Heat treated: 600 Brin.
For ball and roller bearings; wear resistant, heavy duty.

FORTUNA GMKL.
M-1307, M-1332; 1.0 C, 0.60 Si, 1.1 Mn, 1.5 Cr, bal Fe.
Annealed: 226 Brin.
For ball bearing races; oil or water hardened.

FORTUNA GRL.
M-1307, M-1332; 1.05 C, 0.25 Si, 0.32 Mn, 1.0 Cr, bal Fe.
Annealed: 215 Brin.
For ball bearings, balls and rollers, races; oil or water hardened.

FORTUNA GSB7.
M-1307; 0.70 C, 0.30 Mn, bal Fe.
Heat treated: 174,000 TS; 128,000 YS; 12 El; 37 RA; 355 Brin.
For stone working tools; water hardened.

FORTUNA GSB8.
M-1307; 0.85 C, 0.30 Mn, bal Fe.
Heat treated: 185,000 TS; 142,000 YS; 12 El; 32 RA; 390 Brin.
For stone working tools; water hardened.

FORTUNA GSB10.
M-1307, 1.0 C, 0.25 Mn, bal Fe.
Annealed: 100,000 TS, 53,000 YS; 21 El; 42 RA; 200 Brin.
For stone working tools; water hardened.

FORTUNA GSB11.
M-1307; 1.1 C, 0.25 Mn, bal Fe.
Annealed: 110,000 TS; 56,000 YS; 19 El; 40 RA; 210 Brin.
For stone working tools; water hardened.

FORTUNA GSB63
M-1307; 0.62 C, 0.70 Mn, bal Fe.
Heat treated. 160,000 TS, 113,000 YS; 12 El; 40 RA, 325 Brin
For stone working tools; water hardened.

FORTUNA GSP5.
M-1307, 0.53 C, 1 Si, 1 Mn, bal Fe
Rolled 235-290 Brin.
For hammer and press saddles, trimming tools, hot work steel, oil hardened.

FORTUNA GSP6
M-1307, 0.65 C, 1.0 Si, 1.0 Mn, bal Fe
For spring collets, screw drivers, clamping jaws; oil hardened.

FORTUNA GSP8
M-1307, 0.67 C, 1.3 Si, 0.50 Cr, bal Fe.
For spring collets, screw drivers, clamping jaws; oil hardened.

FORTUNA HSB1.
M-1307, 0.85 C, bal Fe.
For mechanical and hard wood saws; water hardened; Type W1.

FORTUNA HSB2.
M-1307; 0.75 C, 0.70 Mn, bal Fe.
Heat treated: 180,000 TS, 140,000 YS; 14 El; 38 RA; 375 Brin.
For agricultural equipment, saws, cement scrapers; oil or water hardened.

FORTUNA HSB4.
M-1307; 0.80 C, 0.50 Cr, 0.4 V, bal Fe.
For wood working tools, circular saws; oil or water hardened.

FORTUNA M13.
M-1332, M-1307; 0.40 C, 13 Cr, bal Fe.
Heat treated: 540-560 Brin.
For cutlery, knives, springs, dies, instruments; corrosion resistant, hardenable.

FORTUNA M-131.
M-1332, M-1307; 0.50 C, 14 Cr, 0.5 Mo, bal Fe.
Heat treated: 550-570 Brin.
For cutlery, knives, surgical instruments; corrosion resistant, hardenable.

FORTUNA M171.
M-1332, M-1307; 0.90 C, 18 Cr, 1.2 Mo, V, bal Fe.
Heat treated: 560-580 Brin.
For gears, bearings, cutters; Type 440B; hardenable, corrosion resistant.

FORTUNA M171H.
M-1332, M-1307; 1.1 C, 17 Cr, 1 Mo, V, bal Fe.
Heat treated: 590-620 Brin.
For bearing rolls and rings, cutters; Type 440C; hardenable, corrosion resistant.

FORTUNA M-2171.
M-1332, M-1307; 0.90 C, 17 Cr, 0.5 Mo, V, Co, bal Fe.
Heat treated: 580-600 Brin.
For bearing rolls and races, cutters; hardenable, corrosion resistant.

FORTUNA Mo 500.
M-1307; 0.85 C, 5 Mo, 1.8 V, 6.5 W, 4 Cr, bal Fe.
For planing and turning tools, milling cutters, saws, high speed steel.

FORTUNA Mo 503.
M-1307; 1.2 C, 5 Mo, 3.3 V, 6.5 W, 4.5 Cr, bal Fe.
For drills, reamers, broaches, saw teeth; high speed steel.

FORTUNA Mo 550.
M-1307; 0.8 C, 5 Co, 5 Mo, 1.8 V, 6.5 W, 4.25 Cr, bal Fe.
For heavy milling and planing cutters; high speed steel.

FORTUNA MoG 110.
M-1307; 0.45 C, 1.5 Cr, 0.7 Mo, 0.3 V, bal Fe.
For die casting dies, forging tools; hot work steel, oil hardened.

FORTUNA MoG 111.
M-1307; 0.45 C, 1.5 Cr, 0.5 Mo, 0.8 V, 0.5 W, bal Fe.
For shear blades, forging tools, gripper dies; hot work steel, oil hardened.

FORTUNA MoG 330.
M-1307; 0.30 C, 3 Cr, 3 Mo, 0.6 V, bal Fe.
For piercing mandrels, die inserts, heading dies; hot work steel, oil hardened.

FORTUNA MoG 510.
M-1307, 0.4 C, 1 Si, 5 Cr, 1.5 Mo, 0.6 V, bal Fe.
For forging dies, die inserts, gripping dies; hot work steel, oil or air hardened.

FORTUNA MoG 511.
M-1307; 0.35 C, 1 Si, 5 Cr, 1.5 Mo, 0.3 V, 1.5 W, bal Fe.
For forging dies, die inserts, shear blades; hot work steel, air or oil hardened.

FORTUNA NC6.
M-1307, M-1332; 0.27 C, 1.5 Cr, 1.0 Al, bal Fe.
Heat treated. 92,000-114,000 TS; 65,000 YS; 19 El; 55 RA.
For gears, shafts, camshafts, cams; nitriding steel.

FORTUNA NC6H.
M-1307; M-1332; 0.34 C, 1.5 Cr, 1.0 Al, bal Fe.
Heat treated: 114,000-144,000 TS; 85,000 YS; 15 El; 50 RA.
For gears, shafts, camshafts, cams; nitriding steel.

FORTUNA NC7 EXTRA.
M-1307, M-1332; 0.33 C, 1.7 Cr, 1.0 Ni, 1.0 Al, bal Fe.
Heat treated: 114,000-144,000 TS; 85,000 YS; 17 El; 50 RA.
For gears, shafts, camshafts, cams, piston rods; nitriding steel.

FORTUNA NCMo4.
M-1307, M-1332; 0.32 C, 1.0 Cr, 0.2 Mo, 1.0 Al, bal Fe.
Heat treated: 114,000-135,000 TS; 85,000 YS; 15 El; 50 RA.
For gears, shafts, camshafts, cams; nitriding steel.

FORTUNA NCS5.
M-1307, M-1332; 0.30 C, 1.2 Cr, 0.9 Al, 0.1 S, bal Fe.
Heat treated: 85,000-115,000 TS; 65,000 YS; 15 El; 50 RA.
For gears, shafts, camshafts; nitriding steel.

FORTUNA NCS5.
M-1307, M-1332; 0.30 C, 1.2 Cr, 0.9 Al, 0.1 S, bal Fe.
Heat treated: 85,000-115,000 TS; 65,000 YS; 15 El; 50 RA.
For gears, shafts, camshafts; nitriding steel.

FORTUNA NCV9 SPEC.
M-1307, M-1332; 0.30 C, 2.5 Cr, 0.12 Mo, 0.15 V, bal Fe.
Heat treated: 128,000-164,000 TS; 100,000-114,000 YS; 13-16 El; 45-50 RA.
For gears, shafts, cams, valve spindles, camshafts; nitriding steel.

FORTUNA NG.
M-1307; 0.55 C, 0.7 Cr, 0.2 Mo, 1.7 Ni, 0.1 V, bal Fe.
For forging dies, crankshafts, camshafts; hot work steel, oil hardened.

FORTUNA NG2 SUPRA
M-1307; 0.55 C, 1 Cr, 0.5 Mo, 1.7 Ni, 0.1 V, bal Fe.
For forging and gripping dies, die inserts, hot work steel, oil or air hardened.

FORTUNA NG3 SUPRA.
M-1307; 0.55 C, 1 Cr, 0.7 Mo, 2.2 Ni, bal Fe.
For drop forging dies, hot mandrels, hot work steel, oil or air hardened.

FORTUNA OB7.
M-1307, M-1332, 0.71 C, 0.20 Si, 0.22 Mn, bal Fe.
Heat treated: 107,000-144,000 TS; 58,000-80,000 YS; 11-15 El; 30-35 RA.
For machine tool parts, springs, hammers, axes, for surface hardening.

FORTUNA PH5B.
M-1307, M-1332; 0.10 C, 2.85 Cr, bal Fe.
Heat treated: 65,000-76,000 TS, 32,000 YS, 25 El
For pipes for oil refineries and high pressure washers; creep and heat resistant

FORTUNA PH5C.
M-1307, M-1332; 0.15 C, 2.35 Cr, 0.40 Mn, 0.25 Si, bal Fe.
Heat treated: 72,000-85,000 TS; 43,000 YS, 22 El.
For parts for core pipes for high pressure windings, creep and heat resistant.

FORTUNA PH8N.
M-1307, M-1332; 0.17 C, 2.65 Cr, 0.25 Mo, 0.15 V, bal Fe.
Heat treated: 92,000-115,000 TS; 65,000 YS; 19 El.
For parts resistant to 400°C; creep and heat resistant.

FORTUNA PH9.
M-1307, M-1332; 0.20 C, 3.15 Cr, 0.55 Mo, 0.5 V, bal Fe.
Heat treated: 114,000-135,000 TS; 78,000 YS; 17 El.
For parts resistant to 480°C; creep and heat resistant.

FORTUNA PH10.
M-1307, M-1332; 0.21 C, 2.35 Cr, 0.40 Mo, 0.8 V, 0.37 W, bal Fe.
Heat treated: 114,000-135,000 TS; 78,000 YS; 17 El.
For parts resistant to 520°C; creep and heat resistant.

FORTUNA PH20.
M-1307, M-1332; 0.15 max C, 5.0 Cr, 0.55 Mo, bal Fe.
Heat treated: 65,000-107,000 TS; 36,000-58,000 YS; 20-23 El.
For pipes for oil refinery plants; creep and heat resistant.

FORTUNA R3
M-1307, 1.42 C, 0.3 Cr, 0.25 V, 3.0 W, bal Fe.
For thread cutters, scrapers, chisels; water hardened.

FORTUNA R5.
M-1307; 1.3 C, 0.2 Cr, 5 W, bal Fe.
For thread cutters, scrapers, chisels, engraving needles; water hardened

FORTUNA SC 150
M-1307; 1.45 C, 1.4 Cr, bal Fe.
For taps, milling cutters, reamers, broaches; oil hardened, wear resistant

FORTUNA SICV
M-1307, 1.15 C, 0.70 Cr, 0.1 V, bal Fe.
For drills, taps, cutters, files, punches; oil or water hardened

FORTUNA SIW
M-1307; 1.2 C, 0.1 V, 1.0 W, bal Fe
For drills, taps, cutters, files, punches; oil or water hardened

FORTUNA SMV 200
M-1307; 0.90 C, 2 Mn, 0.1 V, bal Fe
For blanking tools, punches, tap drills, chasers; oil hardened, cold work steel

FORTUNA SW 55
M-1307; 0.95 C, 1.3 Mn, 0.5 Cr, 0.6 W, bal Fe.
For milling cutters, blanking dies, oil hardened, cold work steel

FORTUNA SW 100.
M-1307; 1.2 C, 1.0 W, bal Fe.
For drills, taps, cutters, files, punches; oil or water hardened

FORTUNA SW 111.
M-1307, 1.05 C, 1 Mn, 1 Cr, 1.2 W, bal Fe
For milling cutters, swages, blanking tools, reamers; oil hardened, cold work steel

FORTUNA T13
M-1332, M-1307; 0.20 C, 13 Cr, bal Fe
Heat treated: 107,000-130,000 TS; 78,000 YS; 18 El; 210-250 Brin.
For pumps, valves, piston rods, cutlery; Type 420; corrosion resistant, hardenable

FORTUNA T17.
M-1332, M-1307, 0.20 C, 17 Cr, 2 Ni, bal Fe.
Heat treated: 114,000-137,000 TS; 85,000 YS; 18 El; 225-280 Brin.
For shafts, axles, valves, pump parts; Type 431; corrosion resistant to sea water.

FORTUNA T131.
M-1332, M-1307; 0.20 C, 13 Cr, 1.2 Mo, bal Fe.
Heat treated: 107,000-130,000 TS; 78,000 YS; 18 El; 220-260 Brin.
For steam turbine blades, molds; corrosion resistant, hardenable.

FORTUNA T171.
M-1332, M-1307; 0.35 C, 17 Cr, 1.2 Mo, bal Fe.
Heat treated: 114,000-137,000 TS; 85,000 YS; 18 El; 225-265 Brin.
For axles, spindles, valve seats and cones; corrosion resistant.

FORTUNA TC4.
M-1307, M-1332; 0.34 C, 0.25 Si, 0.70 Mn, 1.0 Cr, bal Fe.
Heat treated: 114,000-170,000 TS; 78,000-114,000 YS; 13-17 El; 40-50 RA.
For aircraft and auto engine parts; oil hardened, tough.

FORTUNA TC4B
M-1307, M-1332; 0.37 C, 0.25 Si, 0.65 Mn, 1.0 Cr, bal Fe.
Heat treated: 114,000-170,000 TS; 78,000-114,000 YS, 13-17 El; 40-50 RA.
For gears, shafts, machinery parts; for surface hardening.

FORTUNA TC4 SPEC.
M-1307, M-1332; 0.41 C, 0.25 Si, 0.70 Mn, 1.0 Cr, bal Fe.
Heat treated: 219,000-250,000 TS; 185,000 YS; 9 El; 30 RA.
For gears, shafts, crankshafts; oil hardened, shock resistant

FORTUNA TC6.
M-1307, M-1332; 0.36 C, 0.25 Si, 0.50 Mn, 1.5 Cr, bal Fe.
Heat treated: 100,000-135,000 TS, 65,000-78,000 YS; 17-18 El; 55-60 RA.
For levers, axles, steering parts, gears, shafts; oil hardened, tough

FORTUNA TCMo4.
M-1307, M-1332; 0.34 C, 0.25 Si, 0.65 Mn, 1.0 Cr, 0.2 Mo, bal Fe.
Heat treated: 100,000-176,000 TS; 65,000-114,000 YS; 13-18 El; 45-60 RA.
For crankshafts, axles, gears, connecting rods; for surface hardening.

FORTUNA TCMo4H.
M-1307, M-1332; 0.42 C, 0.25 Si, 0.65 Mn, 1.0 Cr, 0.2 Mo, bal Fe.
Heat treated: 107,000-186,000 TS; 78,000 YS; 17 El, 55 RA.
For axle swivels, connecting rods, gears, shafts; oil hardened, shock resistant.

FORTUNA TCMo4W.
M-1307, M-1332; 0.25 C, 0.25 Si, 0.65 Mn, 1.0 Cr, 0.2 Mo, bal Fe.
Heat treated: 92,000-150,000 TS; 60,000-92,000 YS; 15-19 El; 50-65 RA.
For axles, shafts, steering parts; oil hardened, tough.

FORTUNA TCMo5.
M-1307, M-1332; 0.50 C, 1.0 Cr, 0.2 Mo, bal Fe.
Heat treated: 114,000-185,000 TS; 85,000-128,000 YS; 12-16 El; 40-50 RA.
For gears, shafts, crankshafts; for surface hardening.

FORTUNA TCV4.
M-1307, M-1332, 0.50 C, 0.25 Si, 0.90 Mn, 1.0 Cr, 0.1 V, bal Fe.
Heat treated: 212,000-250,000 TS; 185,000 YS; 10 El; 35 RA.
For axles, levers, gears, shafts; oil hardened, shock resistant.

FORTUNA TCV5.
M-1307, M-1332; 0.59 C, 0.25 Si, 1.0 Mn, 1.1 Cr, 0.10 V, bal Fe.
Heat treated: 212,000-242,000 TS; 190,000 YS; 7-10 El; 30 RA; 435-495 Brin.
For highly stressed springs; oil hardened.

FORTUNA TCV6.
M-1307, M-1332; 0.42 C, 0.25 Si, 0.60 Mn, 1.5 Cr, 0.1 V, bal Fe.
Heat treated: 107,000-128,000 TS; 78,000 YS; 17 El; 55 RA.
For gears, shafts, crankshafts, axles; oil hardened, shock resistant.

FORTUNA TCV9 SPEC.
M-1307, M-1332; 0.30 C, 0.25 Si, 0.55 Mn, 2.5 Cr, 0.2 Mo, 0.15 V, bal Fe.
Heat treated: 175,000-208,000 TS; 145,000-157,000 YS; 11 El; 35-40 RA.
For crankshafts, bolts, gears, screws; oil hardened, shock resistant.

FORTUNA TM4.
M-1307, M-1332; 0.40 C, 0.35 Si, 1.0 Mn, bal Fe.
Heat treated: 100,000-150,000 TS; 65,000-92,000 YS; 15-18 El; 40-50 RA.
For bolts, spindles, shafts; oil or water hardened.

FORTUNA TM5.
M-1307, M-1332; 0.30 C, 0.25 Si, 1.4 Mn, bal Fe.
Heat treated 92,000-135,000 TS; 60,000-75,000 YS; 17-19 El; 45-55 RA.
For forgings, axles, shafts, gears; water hardened.

FORTUNA TMCV4
M-1307, M-1332; 0.27 C, 0.25 Si, 1.1 Mn, 0.7 Cr, 0.1 V, bal Fe
Heat treated. 92,000-150,000 TS; 60,000-92,000 YS; 15-19 El, 50-65 RA
For crankshafts, axles, levers, gears; oil hardened, tough.

FORTUNA TMS4.
M-1307, M-1332; 0.53 C, 0.90 Si, 0.90 Mn, bal Fe.
Heat treated: 100,000-170,000 TS; 65,000-114,000 YS, 13-18 El; 35-50 RA.
For gears, pinions, camshafts, connecting rods; for surface hardening.

FORTUNA TMS5
M-1307, M-1332; 0.37 C, 1.25 Si, 1.25 Mn, bal Fe.
Heat treated. 100,000-170,000 TS; 65,000-114,000 YS; 13-18 El, 35-50 RA.
For shafts, gears; tough and abrasion resistant.

FORTUNA TMV7.
M-1307, M-1332; 0.42 C, 0.25 Si, 1.8 Mn, 0.1 V, bal Fe.
Heat treated 127,000-186,000 TS, 100,000-128,000 YS; 12-15 El; 30-40 RA.
For axles, shafts, gears, bolts, connecting rods; oil hardened, tough.

FORTUNA TNC6H.
M-1307, M-1332; 0.35 C, 0.30 Si, 0.50 Mn, 0.50 Cr, 1.5 Ni, bal Fe.
Heat treated: 108,000-121,000 TS; 74,000 YS; 18 El; 50 RA.
For axle swivels, axles, shafts, gears; oil hardened, shock resistant.

FORTUNA TNC6W.
M-1307, M-1332; 0.30 C, 0.30 Si, 0.50 Mn, 0.50 Cr, 1.5 Ni, bal Fe.
Heat treated: 92,000-108,000 TS; 61,000 YS; 21 El; 50 RA.
For construction and machine parts, shafts, gears; oil hardened, shock resistant.

FORTUNA TNC10H.
M-1307, M-1332; 0.35 C, 0.30 Si, 0.50 Mn, 0.75 Cr, 2.5 Ni, bal Fe.
Heat treated: 114,000-135,000 TS; 78,000 YS; 12 El; 50 RA.
For wheels, hubs, axles, swivels, gears; oil hardened, tough.

FORTUNA TNC10W.
M-1307, M-1332; 0.30 C, 0.30 Si, 0.50 Mn, 0.75 Cr, 2.5 Ni, bal Fe.
Heat treated: 101,000-121,000 TS; 72,000 YS; 17 El; 50 RA.
For wheel hubs, axle swivels, gears, shafts; oil hardened, shock resistant.

FORTUNA TNC14H.
M-1307, M-1332; 0.30 C, 0.30 Si, 0.50 Mn, 0.75 Cr, 3.5 Ni, bal Fe.
Heat treated: 128,000-150,000 TS; 101,000 YS; 12 El; 50 RA.
For axles, shafts, levers, gears, connecting rods; oil hardened, shock resistant.

FORTUNA TNC14W.
M-1307, M-1332; 0.25 C, 0.30 Si, 0.50 Mn, 0.75 Cr, 3.5 Ni, bal Fe.
Heat treated: 108,000-128,000 TS; 78,000 YS; 17 El; 50 RA.
For axles, shafts, levers, gears, connecting rods; oil hardened, shock resistant.

FORTUNA TNC18.
M-1307, M-1332; 0.35 C, 0.30 Si, 0.50 Mn, 1.3 Cr, 4.5 Ni, bal Fe.
Heat treated: 144,000-166,000 TS; 114,000 YS; 11 El; 50 RA.
For shafts, axles, axle tubes; oil hardened, shock resistant.

FORTUNA TT13.
M-1332, M-1307; 0.15 C, 13 Cr, bal Fe.
Heat treated: 100,000-123,000 TS; 72,000 YS; 20 El; 190-420 Brin.
For turbine blades, cutlery; Type 420; corrosion resistant, hardenable.

FORTUNA TX10.
M-1307, M-1332; 0.36 C, 0.25 Si, 0.65 Mn, 1.0 Cr, 1.0 Ni, 0.2 Mo, bal Fe.
For airplane and auto parts, axles, shafts, gears, countershafts; oil hardened, tough.

FORTUNA TX15.
M-1307, M-1332; 0.34 C, 0.25 Si, 0.55 Mn, 1.5 Cr, 1.5 Ni, 0.2 Mo, bal Fe.
Heat treated: 152,000-186,000 TS; 123,000-135,000 YS; 12 El; 40-45 RA.
For gears, shafts, aircraft and auto parts, machine tool components, oil hardened, tough

FORTUNA TX20.
M-1307, M-1332; 0.30 C, 0.25 Si, 0.45 Mn, 2.0 Cr, 0.3 Mo, 2.0 Ni, bal Fe.
Heat treated: 175,000-208,000 TS; 145,000-157,000 YS; 11 El; 35-40 RA.
For aircraft and auto parts, machine tool parts, gears, shafts; subjected to high stresses, oil hardened.

FORTUNA V 300.
M-1307; 0.85 C, 12 W, 2.5 V, 4 Cr, 0.8 Mo, bal Fe.
For milling cutters, lathe and planer tools, saws; high speed steel.

FORTUNA V400.
M-1307; 1.25 C, 12 W, 4 V, 4.2 Cr, 0.8 Mo, bal Fe.
For milling cutters, lathe and planer tools, drills; high speed steel.

FORTUNA V450.
M-1307; 1.35 C, 5 Co, 12 W, 4 V, 4.2 Cr, 0.8 Mo, bal Fe.
For cutters for abrasive material; high speed.

FORTUNA VC12.
M-1307, M-1332; 2.1 C, 0.3 Si, 0.3 Mn, 11.5 Cr, bal Fe.
Heat treated: 114,000-135,000 TS; 72,000 YS; 9 El; 10 RA.
For valve seats; heat and corrosion resistant.

FORTUNA VCN 18-8.
M-1307, M-1332; 0.42 C, 2.25 Si, 18 Cr, 9 Ni, 1 W, bal Fe.
Heat treated: 114,000-144,000 TS; 58,000 YS; 27 El; 35 RA.
For exhaust valves; high oxidation and heat resistance.

FORTUNA VCN 235.
M-1307, M-1332; 0.45 C, 1.15 Si, 1.05 Mn, 23 Cr, 2.7 Mo, 5 Ni, bal Fe.
Heat treated: 107,000-135,000 TS; 85,000 YS; 16 El; 25 RA.
For exhaust valves; for service up to 700°C.

FORTUNA VCS2
M-1307, M-1332; 0.45 C, 4.0 Si, 0.45 Mn, 2.65 Cr, bal Fe
Heat treated: 128,000-151,000 TS, 101,000 YS; 16 El; 40 RA
For exhaust and inlet valves, oil hardened.

FORTUNA VCS9
M-1307, M-1332, 0.45 C, 3.05 Si, 0.45 Mn, 9.0 Cr, bal Fe
Heat treated 128,000-151,000 TS; 101,000 YS; 16 El, 40 RA.
For exhaust valves, high stressed, oil hardened.

FORTUNA VCS 20.
M-1307, M-1332; 0.80 C, 2.15 Si, 0.4 Mn, 20 Cr, 1.37 Ni, bal Fe
Heat treated. 127,000-150,000 TS, 101,000 YS; 7 El.
For exhaust valves; good strength, oxidation resistant.

FORTUNA W3
M-1307; 0.45 C, 0.70 Mn, bal Fe
Hot rolled. 98,000 TS; 59,000 YS; 24 El; 45 RA; 212 Brin.
For hammers, axes, pliers, shears, anvils, stamps; water hardened

FORTUNA W7 EXTRA.
M-1307; 0.70 C, bal Fe
Heat treated 174,000 TS, 128,000 YS; 12 El; 37 RA, 352 Brin.
For cold shears, rivet snaps, blanking tools; water hardened.

FORTUNA W7 PRIMA.
M-1307; 0.70 C, bal Fe.
Heat treated: 174,000 TS; 128,000 YS; 12 El; 37 RA; 350 Brin.
For hot and cold work tools, knives, hammers; water hardened.

FORTUNA W8 EXTRA.
M-1307; 0.85 C, bal Fe.
Heat treated: 190,000 TS; 145,000 YS; 10 El; 30 RA; 400 Brin.
For cold punches, leather stampers, gauge tools; water hardened.

FORTUNA W8N.
M-1307; 0.85 C, 0.60 Ni, 0.10 V, bal Fe.
For coining, gripping and heading dies; water hardened.

FORTUNA W8 PRIMA.
M-1307; 0.85 C, bal Fe.
Annealed: 190 Brin.
For shear blades, knives, hammer tools; Type W1; water hardened.

FORTUNA W10 EXTRA.
M-1307; 1.0 C, bal Fe.
Annealed: 95,000 TS; 50,000 YS; 23 El; 45 RA; 200 Brin.
For jaws, shear blades, snaps, cold headers; water hardened.

FORTUNA W10 PRIMA.
M-1307; 1.0 C, bal Fe.
Annealed: 100,000 TS; 53,000 YS; 21 El; 42 RA; 200 Brin.
For cold forging dies, knives, milling cutters, reamers; water hardened.

FORTUNA W10V.
M-1307; 1.0 C, 0.1 V, bal Fe.
For cold forging dies, shear blades, punches; water hardened, Type W2.

FORTUNA W11 EXTRA.
M-1307, 1.1 C, bal Fe.
Annealed: 100,000 TS; 53,000 YS; 21 El; 42 RA; 210 Brin.
For jaws, shear blades, cold heading dies; water hardened, wear resistant.

FORTUNA W11 PRIMA.
M-1307; 1.15 C, bal Fe.
Annealed: 110,000 TS; 56,000 YS; 19 El; 39 RA, 210 Brin.
For wood and leather tools, files, saws, drills; water hardened.

FORTUNA W13 PRIMA.
M-1307, 1.3 C, bal Fe.
Annealed: 210 Brin
For lathe and planer tools, taps, draw punches; water hardened

FORTUNA W18
M-1307, 0.75 C, 18 W, 4 Cr, 1 V, bal Fe
For lathe and planer tools, reamers, hobs, drills; high speed steel.

FORTUNA W23.
M-1307, 0.15 C, 0.40 Mn, bal Fe.
Annealed: 70,000 TS, 40,000 YS; 25 El; 60 RA; 130 Brin
For plastic mold dies, rollers, water hardened

FORTUNA W33.
M-1307; 0.35 C, 0.50 Mn, bal Fe.
Hot rolled: 85,000 TS, 54,000 YS, 30 El, 53 RA; 185 Brin
For pliers, screw drivers, augers, forks; water hardened.

FORTUNA W63.
M-1307, 0.60 C, 0.70 Mn, bal Fe.
Heat treated: 160,000 TS; 113,000 YS; 12 El, 40 RA; 325 Brin
For hammers, hatchets, knives, vise-jaws, tool holders; water hardened.

FORTUNA W63K.
M-1307; 0.65 C, 1.0 Mn, bal Fe.
For shackles, bolts, liners, hammers; oil hardened, wear resistant.

FORTUNA W73.
M-1307; 0.70 C. 0.70 Mn, bal Fe.
Heat treated. 180,000 TS; 140,000 YS; 14 El; 38 RA; 375 Brin.
For axes, wood working tools, knives; water hardened.

FORTUNA W83K.
M-1307; 0.80 C, 1.0 Mn, bal Fe.
For shackles, bolts, liners, hammers; oil hardened, wear resistant.

FORTUNA W93.
M-1307; 0.90 C, 0.5 Mn, bal Fe.
Heat treated: 190,000 TS; 145,000 YS; 10 El; 30 RA; 400 Brin.
For cement crushers, knives, pressure plates; oil or water hardened.

FORTUNA W93K.
M-1307; 0.90 C, 1.0 Mn, bal Fe.
For shackles, bolts, liners, drag rails, hammers; oil hardened, wear resistant.

FORTUNA WA 235.
M-1307; 0.35 C, 1 Si, 1 Cr, 0.2 V, 2 W, bal Fe.
For hand chisels, cold shears, rivet snaps; hot work steel, water hardened.

FORTUNA WA 245.
M-1307; 0.45 C, 1 Si, 0.3 Mn, 1 Cr, 0.2 V, 2 W, bal Fe.
For hot piercing and trimming tools, cutters, hot work steel, oil hardened.

FORTUNA WA255.
M-1307, 0.55 C, 1.0 Si, 1.0 Cr, 0.2 V, 2.0 W, bal Fe.
For blanking dies, shear blades, punches, knives; oil hardened, tough

FORTUNA WA 430.
M-1307, 0.30 C, 1 Si, 1 Cr, 0.2 V, 4 W, bal Fe
For shear blades, gripping dies, mandrels, hot work steel, oil hardened.

FORTUNA WA 530
M-1307; 0.30 C, 2.5 Cr, 0.6 V, 4.5 W, bal Fe.
For extrusion and tube press tools, liners, hot work steel, oil hardened.

FORTUNA WA 930.
M-1307; 0.30 C, 2.5 Cr, 0.4 V, 9 W, bal Fe
For extrusion dies, liners and rams, die casting dies, hot work steel, oil or air hardened

FORTUNA WA 2930
M-1307, 0.30 C, 2 Co, 2.5 Cr, 0.3 V, 9 W, bal Fe.
For extrusion dies, liners, rams; hot work steel, oil hardened

FORTUNA WC 6H.
M-1307, 0.34 C, 1 Al, 1.5 Cr, bal Fe
Annealed: 110 Brin
For plastic mold dies, nitrided.

FORTUNA WF8.
M-1307, 0.67 C, 1.3 Si, 0.5 Cr, bal Fe
For crusher parts, hammer mills, brick molds; wear resistant, tough

FORTUNA WGKL.
M-1307, 1.0 C, 1.5 Cr, bal Fe.
For blanking tools, punches, thread cutting tools; oil hardened, wear resistant.

FORTUNA WM 13.
M-1307; 0.40 C, 13 Cr, bal Fe
Annealed. 225 Brin.
For plastic mold dies; corrosion resistant.

FORTUNA WO 3
M-1307, 0.10 C, 0.40 Mn, bal Fe.
Annealed: 140 Brin
For plastic mold dies; case hardened.

FORTUNA WRL.
M-1307; 0.90 C, 0.80 Cr, bal Fe.
For stamping and coining dies, cold rolls; water hardened.

FORTUNA WSB EXTRA.
M-1307; 1.15 C, 2 W, bal Fe.
For saws; oil hardened.

FORTUNA WT 131.
M-1307; 0.30 C, 13 Cr, 0.4 Mo, bal Fe.
For dies, casting dies, piercing mandrels; hot work steel, corrosion resistant.

FORTUNA ZW.
M-1307; 1.4 C, 0.3 Cr, 0.1 V, bal Fe.
For drawing dies; water hardened, abrasion and wear resistant.

FOURDRINIER BRASS.
M-33; 83 Cu, 17 Zn.
Annealed: 43,000 TS; 14,000 YS; 49 El.
Cold drawn: 95,000 TS; 6 El.
For Fourdrinier cloth; red brass, wire.

FOURDRINIER WIRE.
Eng.; 85-80 Cu, 15-20 Zn, 0-0.4 Sn, 0.01 Pb.
For wire for Fourdinier screens used in paper manufacture.

FOURTEEN PER CENT.
Eng.; 60-58 Cu, 26-28 Zn, 14 Ni.
For ornamental flatware; corrosion resistant.

FOX NO. 031 (531).
M-430; 0.2 C, 0.9 Cr, 1.5 Ni, bal Fe.
Hardened: 130,000-170,000 TS; 110,000-150,000 YS; 20-14 El; 60-50 RA.
For gears, pinions, axles; case hardening steel.

FOX NO. 040 (540).
M-430; 0.12-0.18 C, 3.8-4.5 Ni, 1.0-1.4 Cr, bal Fe.
Hardened: 170,000-200,000 TS; 130,000-160,000 YS; 18-13 El; 60-45 RA.
For gears, pinions, shafts; case hardening steel

FOX NO. 120.
M-430; 0.30-0.40 C, 1.3-1.7 Mn, bal Fe.
Normalized: 80,000-90,000 TS; 48,000-60,000 YS; 30-27 El; 60-50 RA.
For automotive parts, nuts, bolts; oil hardening.

FOX NO. 130.
M-430; 0.25-0.40 C, 1.3-1.8 Mn, 0.20-0.35 Mo, bal Fe.
Normalized: 90,000-110,000 TS, 50,000-90,000 YS; 25-20 El; 60-50 RA.
For crankshafts, axles, bolts, connecting rods; tough.

FOX NO. 131.
M-430; 0.3-0.4 C, 1.3-1.8 Mn, 0.35-0.55 Mo, bal Fe.
Hardened: 90,000-160,000 TS; 80,000-140,000 YS; 22-12 El; 60-40 RA.
For crankshafts, axles, bolts; tough.

FOX NO. 135.
M-430; 0.15-0.25 C, 1.4-1.8 Mn, 0.4-0.7 Ni, 0.15-0.35 Mo, bal Fe.
Hardened: 80,000-100,000 TS; 60,000-80,000 YS; 30-22 El; 70-50 RA.
For gears, shafts, axles; oil hardening.

FOX NO. 525.
M-430; 0.2 C, 5 Ni, bal Fe.
Hardened: 100,000 TS; 70,000 YS; 20 El; 45 RA.
For gears, shafts, axles; case hardening steel.

FOX NO. 540.
M-430; 0.14-0.18 C, 4-4.5 Ni, 1-1.5 Cr, 0.35 max Mo, bal Fe.
Hardened: 170,000-200,000 TS; 130,000 YS; 13 El; 45 RA.
For gears, shafts, axles; case hardening steel.

FOX NO. 671.
M-430; 0.35-0.45 C, 1.25-1.75 Ni, 0.8-1.4 Cr, bal Fe.
Hardened: 150,000 TS; 14 El; 45 RA.
For gears, axles, shafts; oil hardening.

FOX NO. 1038.
M-430; 0.50 C, 3.2 Si, 8 Cr, bal Fe.
Hardened: 134,000 TS; 98,000 YS; 27 El; 59 RA; 262 Brin.
For exhaust valves; heat resistant.

FOX SF6
M-430, M-1724; 0.06 C, 13 Cr, 0.2 Al, bal Fe.
Annealed: 65,000 TS; 38,000 YS; 30 El; 160 Brin.
For annealing boxes, furnace parts, oil refinery equipment.
Type 405 stainless steel, heat and corrosion resistant.

FOX SF10.
M-430, M-1724; 0 12 C, 12-14 Cr, bal Fe.
Annealed· 75,000 TS; 40,000 YS; 35 El; 155 Brin.
For flat springs, knives, table flatware, cutlery, oil refinery equipment.
Type 410 stainless steel, heat and corrosion resistant.

FOX SF11.
M-430, M-1724, 0.20 C, 12-14 Cr, bal Fe.
Annealed: 95,000 TS; 50,000 YS, 25 El; B 92 Rock.
Ht Tr.. 250,000 TS; 215,000 YS, 8 El, C 52 Rock
For cutlery, surgical instruments, gauges, needle valves, cams Type 420 stainless steel, heat treatable.

FOX SF12
M-430, M-1724; 0.20 C, 12-14 Cr, bal Fe.
Annealed· 95,000 TS, 40,000 YS; 25 El; B 92 Rock.
Ht. Tr 240,000 TS, 210,000 YS; 10 El; C 50 Rock.
For cutlery, surgical instruments, valves, bearings, gears, shafts
Type 420 stainless steel, corrosion and heat resistant. Hardenable

FOX SF13.
M-430, M-1724, 0 22 C, 13 Cr, bal Fe.
Ht Tr : 220,000 TS, 195,000 YS; 12 El, C 48 Rock.
For cutlery, valves, ball bearings, surgical instruments, gears.
Type 420 stainless steel, hardenable

FOX SF17.
M-420, M-1724, 0 10 C, 14-18 Cr, bal Fe.
Annealed. 75,000 TS; 45,000 YS, 28 El, 145 Brin
For oil burner and heater parts, oil refinery and chemical plant equipment.
Type 430 stainless steel, ferritic, non-hardenable.

FOX SF20.
M-430, M-1724, 0.12 C, 17-19 Cr, 8-10 Ni, bal Fe.
Annealed. 90,000 TS, 40,000 YS, 50 El, B 80 Rock
For chemical and pharmaceutical plant equipment, evaporators, digesters
Type 302 stainless steel, austenitic, non-hardenable.

FOX SF22.
M-430, M-1724; 0.06 C, 18 Cr, 11 Ni, 0.4 Ti, bal Fe.
Annealed: 85,000 TS; 30,000 YS; 55 El; B 80 Rock.
For welded structures, chemical plant equipment, tanks, digesters, mixers, agitators.
Type 321 stainless steel, austenitic, stabilized; welding grade.

FOX SF23.
M-430, M-1724; 0.05 C, 17-19 Cr, 9-12 Ni, 0.3 Ti, bal Fe.
Annealed: 85,000 TS; 30,000 YS; 55 El; B 80 Rock.
For welded structures, vessels, digesters, evaporators, tanks.
Type 321 stainless steel, stabilized, austenitic, welding grade.

FOX SF25.
M-430, M-1724; 0.06 C, 18 Cr, 10 Ni, Mo, Ti, bal Fe.
Annealed: 86,000 TS; 32,000 YS; 54 El; B 82 Rock.
For acid tanks, welded structures, evaporators, digesters, mixers.
Type 18-10 Mo Ti stainless steel, austenitic, stabilized

FOX SF35.
M-430, M-1724; 0.06 C, 17 Cr, 12 Ni, 2-3 Mo, bal Fe
Annealed: 80,000 TS; 35,000 YS; 60 El; B 82 Rock.
For acid tanks, chemical plant equipment, evaporators, mixers.
Type 316 stainless steel, austenitic, non-hardenable.

FOX SF80T.
M-430, M-1724; 0.06 C, 4 Ni, 16 Cr, 2 Mo, 2 Co, bal Fe.
Annealed 130,000 TS; 100,000 YS; 16 El; C 26 Rock.
For marine hardware, pump shafts, valve parts, aircraft structures High strength, stainless

FOX SF301.
M-430, M-1724; 0.12 C, 16-18 Cr, 6-8 Ni, bal Fe.
Annealed· 110,000 TS; 40,000 YS; 60 El, B 85 Rock
For aircraft structural members, diaphragms, household utensils, trailer bodies, springs.
Type 301 stainless steel, austenitic.

FOX SF304 ELC
M-430, M-1724, 0 06 C, 18-20 Cr, 8-12 Ni, bal Fe.
Annealed. 85,000 TS, 35,000 YS, 60 El, 150 Brin.
For processing and chemical plant equipment, welded structures, evaporators
Type 304 stainless steel, austenitic, non-hardenable.

FOX SF316 Ti
M-430, M-1724; 0.06 C, 18 Cr, 11 Ni, 0.4 Ti, bal Fe
Annealed 85,000 TS; 30,000 YS; 55 El; B 82 Rock.
For welded structures, tanks, evaporators, digesters. Type 321 stainless steel, austenitic, stabilized

FOX SF318.
M-430, M-1724; 0.1 C, 17 Cr, 13 Ni, 3 Mo, 0 6 Cb, bal Fe
Annealed· 85,000 TS, 40,000 YS; 50 El; B 83 Rock.
For chemical plant equipment, welded structures and tanks, mixers, agitators
Type 318 stainless steel, austenitic, welding grade.

FOX SF320.
M-430, M-1724; 0 03 C, 18-20 Cr, 8-12 Ni, bal Fe
Annealed: 77,000 TS; 30,000 YS, 60 El; 140 Brin
For welded structures, evaporators, digesters, mixers, chemical plant equipment.
Type 304L stainless steel, austenitic, non-hardenable

FOX SF321.
M-430, M-1724; 0.06 C, 17-19 Cr, 9-12 Ni, 0.3 Ti, bal Fe.
Annealed· 85,000 TS; 30,000 YS; 55 El; B 80 Rock.
For welded structures, mixers, evaporators, digesters, chemical plant equipment.
Type 321 stainless steel, austenitic, stabilized, welding grade.

FOX SF620.
M-430, M-1724; 0.07 C, 18-20 Cr, 8-12 Ni, bal Fe.
Annealed: 83,000 TS; 32,000 YS; 62 El; 150 Brin.
For chemical plant equipment, welded structures, evaporators, digesters.
Type 304 stainless steel, austenitic, non-hardenable.

FOX SF835.
M-430, M-1724; 0.08 C, 18.5 Cr, 11 Ni, 0.4 Ti, bal Fe.
Annealed: 85,000 TS; 35,000 YS; 55 El; B 82 Rock.
For welded structures, chemical plant equipment, evaporators, tanks, digesters.
Type 321 stainless steel, stabilized, austenitic, welding grade.

FOX SF920.
M-430, M-1724; 0.10 C, 17-19 Cr, 9-10 Ni, bal Fe.
Annealed: 90,000 TS; 40,000 YS; 40 El; B 85 Rock.
For chemical plant and food processing equipment, tanks, mixers.
Type 302 stainless steel, austenitic.

FPC NONTEMPERING.
M-365; 0.3-0 4 C, 0.7-0.9 Cr, 0.7 Mn, 0.3-0.6 Mo, bal Fe.
For chisels, punches, caulking tools; water hardened

"F" QUALITY.
M-179; 58 Cu, 1 5-2 Pb, bal Zn.
Extruded: 56,000 TS, 30-35 El; 25-30 RA; 95-110 Brin
Drawn: 64,000 TS; 25-30 El; 20-25 RA, 110-125 Brin.
For hot stampings, free-cutting.

FRAMDIE.
M-35, 1.1 C, 1 4 Cr, 0.4 Mo, 0.35 Mn, bal Fe.
For drive shafts, spindles, arbors, oil hardenable cold work tool steel, AISI L7.

FRANCO.
M-492; 0 7 C, 18 W, 4 Cr, 1 V, bal Fe.
For high speed tools and cutters; high speed steel.

FRANKITE
M-571; 3.5 C, 2.5 Si, alloy, bal Fe.
For castings, alloyed gray iron

FRANKITE E-212.
M-571; C, bal Fe.
For hydraulic bodies, compressor cylinders.

FRANKITE E-450.
M-571; 1.1 min C, 12-15 Ni, Cr, 5-7 Cu, bal Fe.
25,000-35,000 TS; 145-170 Brin.
For heat and corrosion resistant parts; heat and corrosion resistant

FRANKITE E-604.
M-571; C, 4.5 Ni, 1.5 Cr, bal Fe.
For mixer blades, ash chutes, scrapers; "Ni-Hard"; abrasion resistant.

FRANKITE E-821.
M-571; 0.70-1 10 C, 22-25 Cr, bal Fe.
42,000-50,000 TS; 200-230 Brin.
For heat and corrosion resistant parts; heat and corrosion resistant.

FRANKITE E-822.
M-571; 1.75-2.0 C, 22-25 Cr, bal Fe.
80,000-90,000 TS; 320-350 Brin.
For heat and corrosion resistant parts; heat and corrosion resistant.

FRANKITE E-830N.
M-571; C, 30 Cr, 3 Ni, bal Fe.
For furnace supports, kilns; corrosion and heat resistant.

FRANKITE E-831.
M-571; 0.80-1.10 C, 30-34 Cr, bal Fe.
45,000-55,000 TS; 280-300 Brin.
For heat and corrosion resistant parts; heat and corrosion resistant.

FRANKITE E-832.
M-571; 1.10 min C, 31-39 Cr, bal Fe.
For heat and corrosion resistant parts; heat and corrosion resistant.

FRANXA 9.
M-678; 0.58-0.63 C, 1.5-1.9 Si, 0.5-0.9 Mn, bal Fe.
Annealed: 120,000 TS, 78,000 YS; 12 El.
Hardened: 225,000 TS; 141,000 YS; 6 El.
For tools, dies, springs; shock resistant

FRANZ MAYER NO. 2.
M-27; 0.55 C, 0.10-0.40 Si, 0.5-0.7 Mn, bal Fe.
Heat treated: 160,000 TS; 115,000 YS; 13 El; 42 RA; 320 Brin.
For gears, bolts, machine tool parts; water hardened.

FRAPPANT.
M-1340; 0.9 C, 1.9 Mn, 0.1 V, bal Fe.
For blanking and forming dies, punches; non-deforming, oil hardened.

FRASSE GRADE A.
M-360; 1.1-1.2 C, 0.15-0.25 Mn, bal Fe.
For augers, broaches, cutters, tools; water hardened.

FRASSE GRADE B.
M-360; 1.0-1.1 C, 0.15-0.25 Mn, bal Fe.
For cold chisels, drills, knives, reamers; water hardened.

FRASSE GRADE C.
M-360; 0.90-1.1 C, 0.15-0.25 Mn, bal Fe.
For chisels, drills, hammers, picks, punches; water hardened.

FRASSE GRADE H.
M-360; 1.0-1.1 C, 1.25-1.79 W, bal Fe.
For cutters, tools; oil hardened.

FREECUT 15
M-341, 0.20 C, 1.25 Mn, 0.05 Si, 0.25 S, 0.02 P, bal Fe
Free machining steel plate stock.

FREECUT 45.
M-341; 0.45 C, 1.25 Mn, 0.05 Si, 0.25 S, 0.02 P, bal Fe.
Free machining, flame hardenable plate stock.

FREE CUTTING BRASS-360.
M-8; 61.5 Cu, 35.25 Zn, 3.25 Pb.
Hard: 58,000 TS; 42,000 YS; 20 El; B 70 Rock.
Soft: 47,000 TS; 18,000 YS; 55 El; B 20 Rock.
For hardware, gears, pinions, screw machine products, fasteners.
Free-machining leaded brass.

FREE CUTTING BRASS, Copper Alloy No. 360.
M-33; 62 Cu, 34.75 Zn, 3.25 Pb.
Half hard 1.0 inch; 58,000 TS; 45,000 YS; 25 El; 34,000 shear; 78 Rock B.
Excellent machinability; for automatic machine parts as studs, bolts, nuts, shafts.
ASTM B16; CDA 360.

FREE CUTTING BRASS, SCOVILL 276.
M-102; 60-63 Cu, 2.5-3.7 Pb, bal Zn.
Annealed: 49,000 TS; 53 El; 58 RA.
¼ Hard: 58,000 TS; 25 El; 50 RA; 144 Brin.
For screw machine products; free cutting.

FREE CUTTING BRONZE.
U.S.; 89 Cu, 10 Zn, 1.5 Pb.
For screw stock, bolts, automobile radiators; free-cutting.

FREE CUTTING MUNTZ METAL-293.
M-8; 60 Cu, 39 Zn, 1 Pb.
Soft: 54,000 TS; 20,000 YS; 40 El.
Hard: 80,000 TS, 60,000 YS, 6 El.
For screw machine parts; free cutting.

FREE CUTTING MUNTZ METAL-3711.
M-8; 60.0 Cu, 36.75 Zn, 3.25 Pb
Hard: 60,000 TS; 45,000 YS; 18 El; B 72 Rock.
Soft: 48,000 TS; 20,000 YS; 54 El; B 20 Rock.
For butt hinges, lock bodies, mechanical devices, screw machine products, forging rods; Free-cutting, extrudable.

FREE CUTTING PHOSPHOR BRONZE 610.
M-8; 4 Sn, 4 Zn, 4 Pb, bal Cu.
Hard: 60,000 TS; 50,000 YS, 20 El.
For bearings, bushings, valve and pump parts, gears, pinions; free cutting, wear resistant.

FREE-CUTTING TUBE BRASS-282.
M-8; 66.5 Cu, 31.9 Zn, 1.6 Pb.
Soft 45,000 TS; 17,000 YS
Hard. 73,000 TS, 60,000 YS.
For screw machine products, free-cutting.

FREE CUTTING TUBE BRASS-332
M-8; 66.5 Cu, 31.9 Zn, 1.6 Pb
Hard Tube 73,000 TS; 60,000 YS; 10 El; B 80 Rock
Soft Tube: 45,000 TS, 17,000 YS; 50 El; B 15 Rock.
For screw machine products, ball point pens, plumbing fixtures, musical instruments. Free machining tubes.

FREE-CUTTING YELLOW BRASS 271
M-8, 3.25 Pb, 35.25 Zn, bal Cu
Soft. 47,000 TS; 32,000 YS, 60 El, 60 Brin
Hard: 62,000 TS, 50,000 YS, 20 El; 140 Brin.
For machined parts, hardware; free-cutting.

FREEMACHINEWELD.
M-118, Ni
For welding electrodes for cast iron; machinable welds.

FRENCH
French, 50 Cu, 31 Zn, 18 Ni
For ornamental parts, fittings; corrosion resistant.

FRENCH ALLOY.
France; 58-50 Cu, 25-30 Zn, 17-20 Ni
For electrical resistors, ornamental parts, nickel silver

FRENCH AUTO
Eng., 75 Pb, 10 Sn, 15 Sb
For automobile bearings, Babbitt.

FRENCH NAVY ANTIFRICTION METAL.
French; 7 Cu, 7.5 Sn, 78.5 Zn
For bearings, bushings; Babbitt

FRENCH SILVER SOLDER.
France; 66 Ag, 24 Cu, 10 Zn.
For silver solder.

FRENCH TYPE METAL "A."
France; 55 Pb, 22 Sn, 23 Sb.
For type metal.

FRENCH TYPE METAL "B."
France; 55 Pb, 15 Sn, 30 Sb.
For type metal.

FREUND STEEL.
German; 0.7-1.3 Si, 0.3-0.6 Mn, 0.1-0.15 C, Cr, bal Fe.
For highly stressed structural members; high elastic steel.

FRICKE'S HARDER.
69 Cu, 30 Zn, 10 Ni.
For strong corrosion resistant parts; corrosion resistant.

FRICKE'S SILVERY.
50 Cu, 18.8 Zn, 31.2 Ni.
For ornamental and decorative parts; corrosion resistant.

FRICKS ALLOY.
Eng.; 69-50 Cu, 18-39 Zn, 5.5-31 Ni.
For ornamental, base for plated ware; nickel silver.

FRICKS ALLOY.
Eng.; 55-50 Cu, 31-30 Zn, 19-17 Ni.
For resistances, decorative parts; corrosion resistant.

FRICKS BLUISH YELLOW, HARD.
55.5 Cu, 39 Zn, 5 5 Ni.
For hardware, decorative parts; corrosion resistant.

FRICKS PALE YELLOW, DUCTILE.
62 5 Cu, 31.2 Zn, 6.3 Ni.
For hardware, decorative parts, corrosion resistant.

FRICTION ALLOY (STANDARD).
Eng.; 50 Pb, 40 Sn, 10 Sb.
For antifriction metal; Babbitt.

FRICTIONLESS.
M-815, Pb alloy.
For bearings, linings; Babbitt.

FRIGIDAL.
M-303; 35 Ni, low Cr, bal Fe
86,000 TS, 32 El
For electric resistances; coefficient of expansion (0-40°C.) 0 0000014.

FRILOLIT CrMo.
M-1311, 0 9 C, 18 Cr, 0 1 V, 1.1 Mo, bal Fe.
For bearings, liners, valves, corrosion resistant.

FRILOLIT RF.
M-1311, 0.4 C, 0 4 Si, 13 Cr, bal Fe
Annealed· 95,000 TS, 50,000 YS, 25 El, 55 RA; 195 Brin
Cold drawn 105,000 TS, 85,000 YS, 17 El; 50 RA, 215 Brin.
For valves, cutlery, surgical instruments; Type 420; corrosion resistant.

FRILOLIT RFOO
M-1311; 0 12 max C, 13 Cr, 0 4 Si, bal Fe.
Annealed. 75,000 TS; 40,000 YS, 35 El, 70 RA; 155 Brin.
Cold drawn: 100,000 TS; 85,000 YS, 17 El; 60 RA; 205 Brin.
For turbine blades, surgical instruments; Type 410; corrosion resistant.

FRILOLIT RF SPEZIAL.
M-1311; 0.85 C, Cr, V, bal Fe.
For cutters, tools; oil or water hardened

FRILOLIT RFW.
M-1311; 0.2 C, 0 4 Si, 13 Cr, bal Fe.
Annealed. 95,000 TS; 50,000 YS; 25 El; 55 RA; 195 Brin.
Cold drawn: 105,000 TS; 85,000 YS; 17 El; 50 RA; 215 Brin.
For turbine blades, surgical instruments; Type 420; corrosion resistant.

FRISMUTH ALUMINUM SOLDER.
Eng.; 67 Sn, 27 Pb, 3 Al.
For aluminum solder.

FROGALLOY C.
M-849; 0.4-0.6 C, 4 Mn, 18-21 Cr, 9.0-10.5 Ni, 1.2 Mo, bal Fe.
Welded: 117,000 TS; 91,000 YS; 14.5 El; 550 Brin.
For hard surfacing electrodes; work hardenable; wear resistant.

FROGALLOY M.
M-849; 0.5-0.6 C, 4 min Mn, 18-21 Cr, 9.0-10.5 Ni, bal Fe.
Welded: 117,000 TS; 90,000 YS; 16 El; 550 Brin.
For welding electrodes, hard surfacing; stainless, work hardens, shielded arc.

FRONTIER NO. 3.
M-58; 88.5 Cu, 11 Sn, 0.25 Pb, 0 25 P.
35,000-40,000 TS; 20,000-25,000 YS; 6-10 El; 67-85 Brin.
For worm gears, bearings; Iz-2-10.

FRONTIER NO. 5.
M-58; 10 Al, 89 Cu, 1 Fe, traces Ti.
Untreated: 60,000-80,000 TS; 22,000-28,000 YS; 30-15 El, 120-130 Brin.
Heat treated· 80,000-95,000 TS, 50,000-65,000 YS; 10-4 El, 180-200 Brin
For housing nuts, worm gears, spur gears, bearings, spacer boxes; resists wear and shock; heat resisting.

FRONTIER NO. 6.
M-58, 86 Cu, 9 5 Sn, 2.5 Pb, 2 Zn.
30,000-45,000 TS, 18,000-20,000 YS; 15-20 El; 55-70 Brin.
For general utility bearing bronze, Iz-8-10.

FRONTIER NO 7.
M-58; 79.5 Cu, 11 Al, 6 Fe, 3.5 Mn.
70,000-80,000 TS; 35,000-45,000 YS; 3-5 El, 150-170 Brin.
For paper mill machinery and valve seats; Iz-3-5.

FRONTIER NO. 8
M-58, 83.5 Cu, 10 Sn, 2.5 Pb, 3 5 Ni, 0 5 P.
35,000-45,000 TS, 25,000-28,000 YS; 10-15 El; 80-93 Brin
For heavy duty bearings, worm gears, lead screws; high strength bearing, Iz-3-5

FRONTIER NO 9.
M-58, 90 Cu, 10 Sn.
30,000-35,000 TS; 15,000-20,000 YS; 10-15 El; 63-70 Brin.
For acid resisting work; Iz-3-10.

FRONTIER NO 10.
M-58, 8 Sn, 4 Zn, bal Cu.
Cast: 30,000-45,000 TS; 18,000-23,000 YS; 15-30 El, 65-74 Brin.
For bearings, screw down nuts, worm gears, hydraulic castings; gun metal bronze.

FRONTIER NO. 11.
M-58, 88 Cu, 5 Ni, 5 Sn, 2 Zn.
Cast: 70,000 TS; 50,000 YS; 15 El; 160 Brin.
For bearings, gears, screws, bolts, age-hardenable, tough

FRONTIER NO. 14.
M-58; 10 Sn, 5 Pb, 0.25 P, bal Cu.
Cast: 30,000-40,000 TS; 19,000-22,000 YS; 15-5 El; 50-61 Brin.
For bearings against soft steel; for moderate speeds.

FRONTIER NO. 15Y.
M-58; 79.75 Cu, 10 Sn, 10 Pb, 0.25 P.
28,000-35,000 TS; 19,000-22,000 TS; 5-10 El; 52-70 Brin.
For small machine tool bearings; Iz-3-8.

FRONTIER NO. 18.
M-58; 85 Cu, 5 Sn, 5 Pb, 5 Zn.
27,000-33,000 TS; 15,000-20,000 YS; 15-20 El; 50-70 Brin.
For general utility bronze; not recommended for bearings; Iz-13-18.

FRONTIER NO. 20.
M-58; 77.75 Cu, 7 Sn, 15 Pb, 0.25 P.
27,000-31,000 TS; 17,000-18,000 YS; 12-18 El; 43-63 Brin.
For bearings, acid resisting alloy in mining machinery; for high speeds; Iz-6-8.

FRONTIER NO. 28.
M-58; 99.6-99.9 Cu.
17,000-20,000 TS; 6000-9000 YS; 40-50 El; 40-50 Brin.
For high electrical conductivity bearings.

FRONTIER NO. 29.
M-58; 0.5 Sn, 41 Zn, 1 Fe, 1 Al, 0.5 Mn, bal Cu.
Cast: 65,000-85,000 TS; 25,000-35,000 YS; 35-20 El; 104-119 Brin.
For propeller blades and hubs, valves; manganese bronze.

FRONTIER NO. 30.
M-58; 20 Zn, 2.5 Fe, 6.5 Al, 2.5 Mn, bal Cu.
Cast: 90,000-110,000 TS; 50,000-65,000 YS; 15-10 El, 196-220 Brin
For propeller blades, gears; manganese bronze, high strength.

FRONTIER NO. 38.
M-58; 67 Cu, 8 Sn, 24 Pb, 1 Zn.
Cast: 22,500-27,500 TS; 14,500-19,000 YS; 10-15 El; 45-55 Brin.
For castings, bearings; heavy duty.

FRONTIER 40E.
M-58, 5.5 Zn, 0.55 Mg, 0.5 Cr, 0.2 Ti, bal Al
Aged: 32,000-38,000 TS, 22,000-26,000 YS; 3-10 El, 75-90 Brin.
For aircraft parts, pressure tight castings; age-hardenable at room temperature.

FRONTIER BRONZE.
M-106; 0.5-0.75 Mg, 0.1 Ni, 4.8-5.7 Zn, 0.1 Pb, 0.05 Sn, 0.15-0.25 Ti, 0.4-0.6 Cr, bal Al.
Sand cast: 31,200-35,800 TS; 22,400-24,700 YS; 4-6 El; 60-70 Brin, 3 Izod.
Medium strength, reasonable shock resistant sand or gravity die cast aluminum alloy. Ages 21-30 days at room temperature. Somewhat hot short; for simple castings only.

FS see FINKL FS.

FS M-10
M-57; 0.85 C, 4.25 Cr, 8.25 Mo, 2 V, bal Fe.
For drills, taps, dies, chasers, broaches; high speed steel.

F SPEZIAL.
M-459; C, bal Fe.
For files; water hardening.

FT-2.
M-1699; Sintered carbide tool material.
For heavy roughing and interrupted cuts on carbon and alloy steel.

FT-3.
M-1699; Sintered carbide tool materials.
For heavy roughing or interrupted cuts on carbon and alloy steels.

FT-4.
M-1699; Sintered carbide tool materials.
For general machine shop cutting of carbon and alloy steels.

FT-5.
M-1699; Sintered carbide tool material.
For general purpose machining of carbon and alloy steels including heavy duty, interrupted cuts and elevated temperatures.

FT-6.
M-1699; Sintered carbide tool material.
For finish cutting carbon and alloy steel.

FT-7.
M-1699; Sintered carbide tool material.
For light finishing and precision boring of carbon and alloy steels.

FT-8.
M-1699; Sintered carbide tool material.
For cutting hot flash trim, special purpose wire drawing.

FT-9.
M-1699; Sintered carbide tool material.
For heavy duty machining at elevated temperatures.

FT-21
M-1699; Sintered carbide tool material.
For heavy roughing and interrupted cuts on carbon and alloy steels; for gage blocks.

FT-35.
M-1699, Sintered carbide tool material
For heavy duty milling and interrupted cuts on carbon and alloy steels.

FT-42.
M-1699; Sintered carbide tool material.
For general purpose milling of carbon and alloy steels.

FT-62
M-1699, Sintered carbide tool material
For general purpose cutting of carbon and alloy steels, wide range.

FUCHS ACID RESISTING ALLOY.
Eng ; 73-80 Ag, 13-15 Ni, 13.5-15 Au
For chemical equipment, corrosion resisting parts, acid resistant

FUCHS ACID RESISTING GOLD ALLOY
Eng , 75 Au, 10-15 Ni, 10-15 W.
For chemical equipment, acid resistant.

FUCHSAL
M-1361; 0.6-1.4 Mg, 0.6-1.6 Si, 0.6-1.0 Mn, 0.3 max Cr, bal Al.
Annealed: 21,000 TS, 8000 YS, 24 El
For window frames, gutters, fan blades, boats; good forming and welding properties.

FUCHSDUR
M-1361; 2.5-5.0 Cu, 0.2-1.8 Mg, 0.3-1.5 Mn, bal Al
Annealed: 27,000 TS, 11,000 YS; 22 El, 47 Brin.
Heat treated: 72,000 TS, 57,000 YS; 130 Brin
For aircraft structures and fittings, fasteners; age-hardenable.

FUCHSMAN.
M-1361; 1.0-1.5 Mn, 0.3 max Cr, bal Al.
Soft: 16,000 TS, 6000 YS; 40 El.
Hard: 29,000 TS; 27,000 YS; 10 El.
For cooking utensils, heat exchangers, tanks, furniture; good forming and welding characteristics.

FUEGO.
M-344; 0.5 C, 0.9 Si, 0.5 Mn, Cr, V, bal Fe.
For punches, shears, chisels; water hardened.

F.U.G. 1.
M-1360; 2.5-5.0 Cu, 0.2-1.8 Mg, 0.3-1.5 Mn, bal Al.
Annealed: 27,000 TS; 11,000 YS; 22 El; 47 Brin.
Heat treated: 72,000 TS; 57,000 YS; 130 Brin.

For aircraft structures and fittings, fasteners; age-hardenable.

F.U.G. 4.
M-1360; 0.6-1.4 Mg, 0.6-1.6 Si, 0.6-1.0 Mn, 0.3 Cr, bal Al.
Annealed: 21,000 TS; 8000 YS; 24 El.
For window frames, fan blades, gutters, boats; good forming and welding properties.

F.U.G. 6.
M-1360; 2-4 Mg, 0.4 max Mn, 0.3 max Cr, bal Al.
Soft: 28,000 TS; 13,000 YS; 30 El; 47 Brin.
Hard. 40,000 TS; 35,000 YS; 10 El; 73 Brin.
For aircraft tanks and fittings, fuel lines, marine parts; resists sea water corrosion

F.U.G. 8.
M-1360, 1.0-1.5 Mn, 0.3 max Cr, bal Al.
Soft: 16,000 TS; 6000 YS; 40 El.
Hard· 29,000 TS; 27,000 YS; 10 El.
For cooking utensils, heat exchangers, tanks, furniture; good forming and welding properties.

FUJI-FTW 42.
M-1538, 0 18 C, 1.5 max Mn, 0 55 max Si, bal Fe.
Rolled: 74,000-88,000 TS; 50,000 min YP; 20 min El.
For building structures, derricks, booms, bridges.
Structural low carbon steel.

FUJI-FTW 58.
M-1538; 0.18 C, 1.5 max Mn, 0.55 max Si, bal Fe.
Ht Tr · 82,000-97,000 TS; 65,000 min YP; 16 min El.
For mine cars, bus bodies, booms, derricks, bridges.
Structural low carbon steel.

FUGI-HiZ.
M-1538, 0 10-0.18 C, 0 6-1 0 Mn, 0.15-0.50 Cu, 0 7-1 0 Ni, 0 4-0 8 Cr, 0 4-0.6 Mo, 0.03-0.10 V, 0 002-0 006 B, bal Fe.
Heat Treated 114,000-135,000 TS; 100,000 min YP, 20% min El.
For car and railroad bodies, agricultural equipment
High strength-low alloy constructional steel.

FULLER ALLOY.
M-808, 6 Zn, 1.2 Mg, 2 Fe, bal Al.
Heat treated· 43,000-48,000 TS; 0-2 El; 110-115 Brin.
For light alloy castings; heat treatable

FULTON NO 110-A.
M-1101, 5 Ag, 88.5 Cu, 6 5 P.
For silver solder, self-fluxing, M P. 1185-1300°F.

FULTON NO. 111.
M-1101; 9 Ag, 51 Cu, 40 Zn.
For silver solder; M.P. 1510°F.

FULTON NO. 111A.
M-1101; 15 Ag, 80 Cu, 5 P
For silver solder; M P. 1185°F.

FULTON NO 112
M-1101; 20 Ag, 45 Cu, 30 Zn, 5 Cd.
For silver solder, brazing; M.P. 1140-1410°F.

FULTON NO. 112-A.
M-1101; 25 Ag, 52.5 Cu, 22.5 Zn.
For silver solder, M P. 1500-1575°F.

FULTON NO. 113.
M-1101; 30 Ag, 38 Cu, 32 Zn.
For silver solder; M.P. 1370°F.

FULTON NO. 113-A.
M-1101; 35 Ag, 26 Cu, 21 Zn, 18 Cd.
For silver solder, brazing; M P. 1125-1295°F

FULTON NO. 114.
M-1101; 40 Ag, 30 Cu, 28 Zn, 2 Ni.
For silver solder, brazing; M.P. 1240°F.

FULTON NO. 114-A.
M-1101; 45 Ag, 30 Cu, 25 Zn.
For silver solder; M.P. 1250°F.

FULTON NO. 114-AN.
M-1101; 45 Ag, 15 Cu, 16 Zn, 24 Cd.
For silver solder; M.P. 1120°F.

FULTON NO. 114-B.
M-1101; 40 Ag, 35 Cu, 25 Zn, 5 Ni
For silver solder; M.P. 1240-1560°F.

FULTON NO. 114-N.
M-1101; 40 Ag, 18 Cu, 15 Zn, 27 Cd.
For silver solder; M.P. 1076°F.

FULTON NO. 115.
M-1101; 50 Ag, 15.5 Cu, 16.5 Zn, 18 Cd.
For silver solder; M.P. 1160°F.

FULTON NO. 115-4.
M-1101; 54 Ag, 40 Cu, 5 Zn, 1 Ni.
For silver solder, M P. 1325-1575°F.

FULTON NO. 117-2.
M-1101; 72 Ag, 28 Cu.
For silver solder; M.P. 1435-1435°F.

FULTON NO. 118-A.
M-1101; 85 Ag, 15 Mn.
For silver solder; M.P. 1760-1778°F.

FULTON NO. 216
M-1101; 60 Ag, 25 Cu, 15 Zn.
For silver solder; M.P. 1260°F.

FULTON NO 216-A.
M-1101; 65 Ag, 20 Cu, 15 Zn.
For silver solder; M.P. 1280-1325°F.

FULTON NO 217.
M-1101; 70 Ag, 20 Cu, 10 Zn.
For silver solder; M.P 1335°F.

FULTON NO 218.
M-1101, 80 Ag, 16 Cu, 4 Zn.
For silver solder, M P 1360°F.

FULTON NO A-114.
M-1101; 40 Ag, 36 Cu, 24 Zn.
For silver solder; M.P. 1330°F.

FULTON NO. A-115
M-1101; 50 Ag, 34 Cu, 16 Zn.
For silver solder, M P 1275°F.

FULTON EGR.
M-1101; 56 Ag, 22 Cu, 18 Zn, 4 Sn.
For silver solder, brazing; M P 1145-1205°F.

FULTON NO. G4-115.
M-1101; 50 Ag, 15.5 Cu, 16.5 Zn, 18 Cd.
For silver solder; M.P. 1160-1175°F.

FULTON NO. G5-115.
M-1101; 50 Ag, 15.5 Cu, 15 5 Zn, 16 Cd, 3 Ni.
For silver solder; M P. 1195-1270°F.

FULTON NO. G-112
M-1101; 20 Ag, 45 Cu, 35 Zn.
For silver solder; M.P. 1430-1500°F.

FULTON NO. LA-115.
M-1101, 50 Ag, 28 Cu, 22 Zn.
For silver solder; M.P. 1250-1340°F.

FURBALOI.
Eng ; 0.45 Cu, 0.05 Mn, 0.13 C, 13.35 Cr, 0.08 Ni, bal Fe.
77,000 TS; 38 El; 75 RA.
For corrosion resisting parts; corrosion resistant.

FURIOUS.
M-1411; 1.25 C, 4.5 W, 1.2 Cr, 0.25 V, bal Fe.
For blanking and heading dies, punches, oil hardened, abrasion resistant.

FURODIT 7G.
M-912; M-501; 0.3 C, 2.2 Si, 6 Cr, bal Fe.
For oil refinery equipment; creep and heat resistant.

FURODIT NO. 8.
M-501; 0.2 C, 6 Cr, 2 Al, bal Fe.
49,800-57,000 TS; 35-27 El; 70 RA.
For heat resisting parts; heat resistant to 1470°F.

FURODIT 8G.
M-501, M-912; 0.3 C, 2.3 Si, 13 Cr, bal Fe.
Annealed: 95,000 TS; 50,000 YS; 25 El; 55 RA; 195 Brin.
For oil refinery equipment, valves; creep and heat resistant.

FURODIT 9G.
M-501, M-912; 0.5 C, 1.5 Si, 17 Cr, bal Fe.
For furnace parts, conveyors, heat treating boxes, retorts; corrosion and heat resistant.

FURODIT 10.
M-501, M-912; 0.12 C, 2 Si, 18 Cr, bal Fe.
Annealed: 80,000 TS; 50,000 YS; 25 El; 50 RA; 150 Brin.
For oil refinery and food processing equipment, sinks, bolts, burners; corrosion and heat resistant; Type 430.

FURODIT 10G.
M-501, M-912; 0.6 C, 1.5 Si, 22 Cr, bal Fe.
For oil refinery equipment, furnace parts, burners; heat resistant.

FURODIT 12G.
M-501, M-912; 0.6 C, 1.5 Si, 29 Cr, bal Fe.
For oil refinery and chemical plant equipment, furnace parts; Type CC-60; heat resistant

FURODIT 25.
M-501, M-912; 0.20 C, 6 Ni, 25 Cr, bal Fe.
Cast: 85,000 TS; 48,000 YS; 16 El; 190 Brin.
For salt pots, furnace parts, grate bars, dampers, rabble arms and blades; Type HD; heat resistant.

FURODIT 30.
M-501, M-912; 0.12 max C, 1.5 Si, 1.5 Al, 24 Cr, bal Fe.
Annealed: 85,000 TS; 50,000 YS; 30 El; 55 RA; 180 Brin.
For oil refinery equipment, heat exchangers; heat and creep resistant.

FURODIT N6.
M-501, M-912; 0.15 C, 1.5 Si, 19 Cr, 2 Mo, 5 Ni, bal Fe.
Annealed: 90,000 TS; 40,000 YS; 45 El; 60 RA, 170 Brin.
For acid resistant, chemical plant equipment, stainless.

FURODIT NH11.
M-501, M-912; 0.15 C, 2 Si, 19.5 Cr, 9.5 Ni, bal Fe.
Annealed: 80,000 TS; 35,000 YS; 55 El; 75 RA; 150 Brin.
For chemical plant equipment, tanks, mixers, filters; Type 302; stainless, austenitic.

FURODIT NH12.
M-912, M-501; 0.15 C, 2 Si, 24 Cr, 19 Ni, bal Fe.
Annealed: 100,000 TS; 45,000 YS; 50 El; 65 RA; 185 Brin.
For furnaces, valves, pumps, turbine and jet components; Type 310; stainless, austenitic.

FURODIT "S."
M-501; 0.2 C, 27 Cr, 1 Mo, bal Fe.
52,700-64,000 TS; 30-18 El; 60-50 RA.
For heat and corrosion resisting parts; heat and corrosion resistant.

FURODIT "SS."
M-501; 0.2 C, 29 Cr, 2 Mo, 1-2 Ta, bal Fe.
57,000-71,000 TS; 30-16 El; 60-50 RA.
For heat and corrosion resisting parts; heat and corrosion resistant.

FURODIT "Z."
M-501; 0.2 C, 25 Cr, bal Fe.
52,700-64,000 TS; 30-18 El; 60-50 RA.
For heat resisting parts; heat resistant to 2010°F.

FURODIT Z SPECIAL.
M-501; 0.2 C, 25 Cr, 2 Ta, bal Fe.
Annealed: 57,000-68,500 TS; 25-15 El; 60-50 RA.
For furnace parts, heat treating boxes, pots; heat resistant to 2100°F.

FUSE-WELL NO. 28.
M-810; 3.2 C, 2 Si, bal Fe.
For welding rod for cast iron; flux coated, gas welding.

FUSIBLE.
Eng.; 45 Bi, 17 Sn, 30 Pb, 10 HgS.
For solders, binding plugs; M.P. 85°C.

FUSIBLE ALLOY-1.
U S.; 50 Bi, 34 Sn, 17 Cd.
For fusible alloy, M.P. 65°C.

FUSIBLE ALLOY-2.
U S.; 15 Bi, 42 Sn, 43 Pb.
For fusible alloy; low melting point

FUSIBLE ALLOY-3
U S.; 33.3 Bi, 33.3 Sn, 33.3 Pb.
For fusible alloy; low melting point.

FUSIBLE METAL "D."
33.3 Bi, 66.7 Sn.
For fusible alloy; M.P 166°C.

FUSIBLE METAL "E"
13 Bi, 40 Sn, bal Pb.
For fuses, fire extinguishers; M.P 172°C.

FUSIBLE METAL "F."
12.5 Bi, 39.5 Sn, bal Pb.
For fuses, fire extinguishers; M.P. 178°C.

FUSIBLE METAL "G."
20 Bi, 80 Sn
For fuses, fire extinguishers; M.P. 200°C.

FULTALLOY.
M-809, C, 0.5 Mo, bal Fe.
For castings.

F.V.S. STEEL.
M-521; 0 42 C, 1 5 Si, 0.7 Mn, 14 Cr, 14 Ni, 2 5 W, bal Fe.
Heat treated: 130,000 TS; 74,000 YS; 23 El; 24 RA.
For stainless parts; austenitic, stainless.

G-97.
M-249, 0.5 Si, 0.85 Fe, 1.4 Mn, 0.25 Mg, 12.75 Cu, bal Al.
Cast· 24,000-32,000 TS; 21,000-26,000 YS; 1.0-0.5 El.
For pistons; cast alloy.

G97.
M-1548; 12.0 Cu, 1.4 Mn, 0.25 Mg, 0.8 Fe, bal Al.
Cast: 24,000-32,000 TS; 21,000-26,000 YS; 0.5-1.0 El.
For pistons. Cast alloy.

G-192 ALLOY.
0.60 C, 22 Cr, 8.5 Mn, 0.35 N, bal Fe.
For high temperature valves, gas turbine parts, nozzles, afterburners; super strength, high temperature alloy.

GALAHAD A.
M-62; 13 Cr, 0.1 C, bal Fe.
For corrosion resisting parts; cutlery; rustless and wear resistant.

GALAHAD A.C.
M-62; 0.15 max C, 11.5-13.5 Cr, bal Fe.
Heat treated: 120,000-135,000 TS; 110,000-117,000 YS; 16-15 El; 63-58 RA; 220-240 Brin.
For cutlery, valves, turbine blades; Type 410; corrosion resistant.

GALAHAD A.F.C.
M-62; 0.12 C, 12-14 Cr, 0.75 max S, 1 max Ni, 0.6 max Mo, bal Fe.
Bar: 78,000-112,000 TS; 12-20 El; 280 Brin.
For cutlery, turbine blades, gears, oil refinery equipment.
Type 416 F stainless, free-cutting.

GALAHAD B.
M-62; 0 15 C, 13 Cr, bal Fe.
For corrosion resistant parts; corrosion resistant, hardenable.

GALAHAD B.F.C.
M-62; 0 12-0 18 C, 0 75 max S, 12 0-14 0 Cr, 1.0 max Ni, 0.60 max Mo, bal Fe.
Bar 78,000-112,000 TS; 12-20% El, 150-277 Brin.
For cutlery, tableware, turbine blades, structural parts. Free machining.
Type 416F stainless steel. Hardenable

GALAHAD C.
M-62, 0.20 C, 13 Cr, bal Fe.
For corrosion resistant parts; stainless, hardenable.

GALAHAD C F.C
M-62, 0.18 0 25 C, 0.75 max S, 12 0-14 0 Cr, 1 0 max Ni, 0 60 max Mo, bal Fe.
Bar· 78,000-120,000 TS; 12 20% El; 150-277 Brin
For cutlery, tableware, turbine blades, structural parts
Type 420F stainless steel Hardenable Free machining

GALAHAD D
M-62; 0.25 C, 13 Cr, bal Fe.
Heat treated 250,000 TS; 185,000 YS, 9 El; 15 RA, 500 Brin.
For cutlery, knives, surgical instruments; Type 420, corrosion resistant

GALAHAD D F.C.
M-62; 0 25-0 35 C, 0 75 max S, 12.0-14 0 Cr, 1 0 max Ni, 0 60 max Mo, bal Fe
Bar: 78,000-112,000 TS; 12-20% El; 150-277 Brin.
For cutlery, tableware, valves, knives, turbine blades Free machining.
Type 420 F stainless steel. Hardenable

GALAHAD E.
M-62, 0.3 C, 17 Cr, 2 Ni, bal Fe.
Heat treated· 135,000 TS, 112,000 YS; 15 El, 45 RA; 280 Brin
For propeller shafts, marine hardware; Type 431; corrosion resistant.

GALAHAD F.
M-62; 0.12 max C, 16-18 Cr, 0.5 max Ni, bal Fe.
Annealed: 75,000 TS; 40,000 YS; B 80 Rock.
For nitric acid storage tanks, heat treatment equipment, furnace parts.
Heat resisting Type 442.

GALICAR.
M-405; Pb, Sb, bal Sn.
For antifriction alloy; Babbitt.

GALLIMORE METAL.
M-409; 45 Ni, 28 Cu, 25 Zn, 2 Fe, Si, Mn.
Hard rolled: 156,000 TS; 2.5 El.
Soft rolled: 98,000 TS; 42 El.
For airplane parts, non-corrosive stampings; non-corrosive in sea water.

G-ALLOY.
M-311; 18 Zn, 2.5 Cu, 0.35 Mg, 0.35 Mn, 0.20 Fe, 0.75 Si, bal Al.
Hot rolled: 72,000-78,000 TS; 58,000-69,500 YS; 19-17 El.
For cast parts for trucks, airplanes and boats; light weight.

G-ALLOY.
M-314; Pb alloy.
10,000 TS; 22 Brin.
For bearings.

GALVALLOY.
M-813; Zn-Pb-Sn.
For Al solder; no flux required.

GALVAMATT.
M-814; 0.2 C, bal Fe.
For stoves. metal signs; galvanized sheets

GALVOBRITE.
M-815; Zn alloy.
For galvanizing industry; improves fluidity of Zn

GALV-WELD.
M-1104, Pb, Zn, Sn, Bi.
For solder for regalvanizing, Zn-base alloy.

GAMA
English, 12 Cu, 2 Ni, 0.5 Fe, 0.5 Si, bal Al.
For pistons; low friction.

GAMAN H.
M-38; 0 45 C, 12 Mn, 23 Cr, 0.45 N, bal Fe

GAMAN L.
M-38; 0.40 C, 13 Mn, 12 Cr, 0.2 N, bal Fe.

GAMAN R.
M-38, 0 18 C, 12 Mn, 18 Cr, 0.40 N, bal Fe

GAMMA COLUMBIUM.
M-1, M-114, 0 4 C, 1 Mn, 1 Si, 15 Cr, 25 Ni, 2-4 Mo, 4 Cb, bal Fe.
Annealed: 108,000 TS; 32,000 YS; 37 El.
For superchargers, wheels, aircraft engine components; high heat resistance.

GAMMA NICKEL STEEL.
M-85; 36 Ni, bal Fe
Annealed: 70,000 TS; 24,000 YS; 36 El; 68 RA; 143 Brin.
Cold drawn: 90,000 TS; 70,000 YS; 20 El; 60 RA; 185 Brin
For instruments, chronometers; low thermal expansion.

GANNALOY.
U S.; 0 03 C, 5 Cr, 25 Ni, 2.25 Ti, 0 5 Al, bal Fe.
For corrosion and heat resistant parts, corrosion and heat resistant.

G.A. PERCIT EXTRA.
M-72, 1 2-1.4 C, 2-3 Si, 26-28 Cr, 57-63 Fe.
For hard surfacing electrodes; wear and corrosion resistant

GARANT DOMO.
M-1318; 0.85 C, 4 Cr, W, Mo, V, bal Fe.
For lathe and planer tools, drills, reamers, taps; high speed steel.

GARANT DOMO Co.
M-1318, 0.85 C, 4 Cr, Co, Mo, W, V, bal Fe.
For lathe and planer tools, hobs, reamers, taps, drills; high speed steel.

GARANT DOMO V.
M-1318; 0.85 C, 4 Cr, W, Mo, V, bal Fe.
For lathe and planer tools, reamers, broaches, taps; high speed steel.

GARANT EXTRA.
M-1318; 0.74 C, 4 Cr, 1.1 V, 18.5 W, bal Fe.
For lathe and planer tools, reamers, hobs, drills, taps; high speed steel.

GARANT EXTRA 333.
M-1318; 0.95 C, 4 Cr, W, Mo, bal Fe.
For lathe and planer tools, reamers, hobs, drills; high speed steel.

GARANT PRIMA.
M-1318; 0.82 C, 4 Cr, 0.85 Mo, 1.6 V, 8.7 W, bal Fe.
For lathe and planer tools, reamers, hobs, taps; high speed steel.

GARANT REKORD 3.
M-1318; 0.86 C, 2.8 Co, 4.3 Cr, 0.85 Mo, 2.1 V, 12 W, bal Fe.
For lathe and planer tools, hobs, taps, broaches; high speed steel.

GARANT REKORD 5.
M-1318; 0.79 C, 4.7 Co, 4.2 Cr, 0.8 Mo, 1.6 V, 18 W, bal Fe.
For lathe and planer tools, drills, reamers, taps; high speed steel.

GARANT REKORD 10.
M-1318; 0.76 C, 10 Co, 4 Cr, 0.8 Mo, 1.8 V, 18 W, bal Fe.
For lathe and planer tools, hobs, broaches; high speed steel.

GARANT SONDERKLASSE 500.
M-1318; 1.3 C, 4.3 Cr, 0.85 Mo, 3.8 V, 12 W, bal Fe.
For engravers' tools, form cutters, reamers; high speed steel.

GARANT SONDERKLASSE Co.
M-1318; 1.35 C, Co, 4.2 Cr, Mo, W, V, bal Fe.
For engravers' tools, form cutters, reamers; high speed steel.

GARANT SPEZIAL 275.
M-1318; 0.86 C, 4 Cr, 0.85 Mo, 2.5 V, 12 W, bal Fe.
For lathe and planer tools, broaches, reamers, taps; high speed steel.

GARBA.
M-359; 1.0 C, bal Fe.
For drills, taps; drill rod, water hardening.

GARFIELD.
M-1705; 1.0 C, 0.3 Mn, 0.25 Si, 0.5 Cr, 0.2 V, bal Fe.
Water hardening tool steel, AISI W7.

GASID NO. 12.
M-481; 9 Sn, 3 Zn, bal Cu.
30,000 TS; 22 El; 20 RA; 125 Brin.
For high pressure acid pumps in oil refineries; corrosion resistant to hot HCl.

GASID NO. 15.
M-481; 7 Al, 2.5 Fe, bal Cu.
42,000 TS; 20-30 El; 32 RA; 193 Brin.
For chemical apparatus and equipment; corrosion and acid resistant.

GASITE.
M-1251; 3.0-3.6 C 4.0-4.75 Ni, 1.4-3.5 Cr, 0.4-0.7 Si, bal Fe.
Sand cast: 45,000 TS; 600 Brin.
Permanent mold: 55,000 TS; 675 Brin.
For heavy cams, dies, roller bearing races; white cast iron, corrosion resistant.

GAUSSIT 180.
M-Germany; 50 Co, 14 V, bal Fe.
8000 Br, 1.4 BH max.
For electromechanical devices, hysteresis motors, digital computers.
Precipitation hardening permanent magnet.

G-B NO. 35.
M-1108; 40 Ag, 18 Cu, 15 Zn, 27 Cd.
For silver solder, brazing; M.P. 1120-1205°F.

G-B NO. 40.
M-1108; 40 Ag, 20 Cu, 16 Zn, 24 Cd.
For silver solder, brazing; M.P. 1125-1235°F.

G-B NO 45.
M-1108; 45 Ag, 15 Cu, 16 Zn, 24 Cd.
For silver solder, brazing; M.P. 1125-1145°F.

G-B NO. 50.
M-1108, 50 Ag, 17.5 Cu, 11.5 Zn, 21 Cd.
For silver solder, brazing; M P. 1170-1220°F.

G-B NO 1300.
M-1108; 30 Ag, 29 Cu, 25 Zn, 16 Cd.
For silver solder, brazing; M.P. 1125-1320°F.

G-B NO 1445.
M-1108; 40 Ag, 18 Cu, 15 Zn, 27 Cd.
For silver solder, brazing; M.P 1120-1205°F.

G. BABBITT
M-815, M-314; 12.5 Sb, 3 As, 0.75 Sn, bal Pb.
At 70°F; 9800 TS; 1.5 El; 22 Brin.
At 392°F: 1900 TS, 70 El
For Babbitts, bearings, M.P. 486-549°F; heavy duty

G-B SH 7.
M-926; Ag, bal Cu.
For silver solder.

GBZ 10 BRONZE.
Ger., 90 Cu, 10 Sn.
Cast: 45,500 TS; 20,000 YS; 45 El; 62 Brin
For castings

GBZ 14 BRONZE
Ger.; 86 Cu-14 Sn.
Cast 32,000 TS; 27,000 YS, 7 El, 79 Brin.
For castings.

GBZ 20
Ger , 80 Cu, 20 Sn.
Cast: 27,000 TS, 0 El; 120 Brin.
For castings.

G.C C NO. 112.
M-1111, Ce alloy.
Addition agent to stainless steels.

G.C.C. CERIUM METAL.
M-1111; 0.70 Fe, 0.03 C, 0.02 Si, 0.70 other rare earth metals, bal Ce.
For alloying, flints, pyrophoric

G.C.C DIDYMIUM METAL.
M-1111; 2.3 Ce, 44.7 La, 37.4 Nd, 10.5 Pr, 3.4 Sm, 0.7 Fe.

G.C.C. MISCHMETAL.
M-1111; 50-55 Ce, 24-26 La, 15-16 Nd, 5-6 Pr, 2-3 Sm
For desulfurizer and deoxidizer in alloying; pyrophoric.

G.C.C. PURE CERIUM METAL.
M-1111; 0.7 Fe, 0.70 other rare earths, 0.03 C, 0.02 Si, bal Ce.
For desulfurizer and deoxidizer in alloying; pyrophoric.

GCX.
M-766; 0.08 C, 0.45 Mn, 0.05 Si, 0.04 Cb, bal Fe.
For parts to be carbonitrided, as cams, ratchets, transmission levers.

GDH-3.
M-816; 2.15 C, 0.25 Mn, 0.25 Si, 12.0 Cr, 0.8 V, bal Fe.
Air or oil hardening tool steel for cold working dies, punches; AISI D3.

GDH-3SP.
M-816; 2.10 C, 12.5 Cr, 0.5 Ni, bal Fe.
Air or oil hardening cold work tool steel for dies, punches, gages; AISI D3.

GDH-10.
M-816, 0.40 C, 0.55 Mn, 1.0 Si, 3.25 Cr, 0.35 V, 2.5 Mo, bal Fe.
Air or oil hardening hot work tool and die steel for forging dies, hot forming tools; AISI H10.

GDH-11.
M-816; 0.40 C, 0.4 Mn, 1.0 Si, 5.0 Cr, 0.5 V, 1.35 Mo, bal Fe.
Air or oil hardening hot work tool and die steel for forging dies, hot forming tools, AISI H11.

GDH-12.
M-816, 0.35 C, 0.35 Mn, 1.05 Si, 5.0 Cr, 0.35 V, 1.25 W. 1.35 Mo, bal Fe
Air or oil hardening hot work tool and die steel for forging dies, hot forming tools; AISI H12.

GDH-13
M-816, 0.40 C, 0.4 Mn, 1.1 Si, 5.0 Cr, 1.1 V, 1.35 Mo, bal Fe
Air or oil hardening hot work tool steel, chromium type; AISI H13

G.D.H NO 33
M-816, 0.35 C, 0.8-1.0 Si, 4.5-5.0 Cr, 1.0-1.2 W, 1.3-1.5 Mo, bal Fe
For forging dies, hot piercing and punching dies; hot work steel

G.D.H NO. 212.
M 816, 0.45-0.50 C, 0.85-1.05 Cr, 0.9-1.2 W, 0.15-0.25 Mo, bal Fe
For chisels, shear blades, die blocks, tough.

G.D.H NO. 280
M-816, 0.5 C, 1.3-1.6 Si, 0.3-0.4 Mo, bal Fe
For tools, punches, shear blades, tough.

G.D.H NO 350.
M-816; 1.25-1.35 C, 3.5-3.7 W, bal Fe
For drills, dies, gear cutters, taps, keen cutting edge

GDH-A2.
M-816; 1.0 C, 0.7 Mn, 0.3 Si, 5.25 Cr, 0.3 V, 1.15 Mo, bal Fe.
Air hardening, medium alloy, cold work tool steel, AISI A2.

GDH-A4
M-816, 0.95 C, 2.0 Mn, 2.2 Cr, 1.1 Mo (lead added) bal Fe.
Air hardening, medium alloy, cold work tool steel; AISI A4.

G.D.H. BLUE LABEL.
M-816; 1.55-1.70 C, 11.5-12.5 Cr, 0.15-0.25 V, 0.7-0.9 Mo, bal Fe
For tools, gauges, punches, dies; oil hardened.

GDH BRAKE DIE.
M-816; 0.50 C, 0.9 Mn, 1.0 Cr, 0.20 Mo, bal Fe.
Oil hardening tool steel for shafts, arbors, lathe centers, forming tools.

G.D.H. BRONZE LABEL
M-816; 0.90-0.95 C, 1.0-1.1 Mn, 0.4-0.5 Cr, 0.4-0.5 W, bal Fe.
Heat treated: 640 Brin.
For tools, gauges, broaches, taps; oil hardened.

GDH-CHW.
M-816; 0.23 C, 0.6 Mn, 1.25 Si, 10.0 Cr, 0.75 Ni, 1.0 V, 0.45 W, 1.2 Mo, 0.10 N, bal Fe.
Air or oil hardening hot work tool steel, chromium type.

GDH-D2.
M-816; 1.55 C, 0.35 Mn, 0.45 Si, 11.5 Cr, 0.9 V, 0.8 Mo, bal Fe.
Air or oil hardening cold work tool steel, chromium type; for lamination dies, punches, thread forming tools; AISI D2.

GDH-D2 FM
M-816; 1.55 C, 0.35 Mn, 0.45 Si, 11.5 Cr, 0.9 V, 0.8 Mo, S, bal Fe.
Air or oil hardening cold work tool steel, chromium type; free machining grade. AISI D2

GDH-D4.
M-816, 2.25 C, 0.35 Mn, 0.5 Si, 11.5 Cr, 0.2 V, 0.8 Mo, bal Fe
Oil or air hardening cold work tool steel, chromium type; AISI D4.

GDH-D5
M-816, 1.50 C, 0.4 Mn, 0.4 Si, 12.0 Cr, 0.35 Ni, 0.5 V, 0.9 Mo, 3.25 Co, bal Fe.
Air or oil hardening cold work tool steel, high carbon, high chromium type; AISI D5.

GDH GRAPH-AIR.
M-816; 1.35 C, 1.8 Mn, 1.2 Si, 1.85 Ni, 1.50 Mo, bal Fe
Air or oil hardening, medium alloy, cold work tool steel; AISI A10

GDH GRAPH-TUNG.
M-816, 1.50 C, 1.0 Mn, 0.9 Si, 0.5 Ni, 2.75 W, bal Fe.
Water or oil hardening tool steel; good wear resistance and high hardness.

GDH-H24.
M-816; 0.45 C, 0.3 Mn, 0.3 Si, 3.5 Cr, 0.7 V, 14.0 W, bal Fe.
Air or oil hardening hot work tool steel, tungsten type, AISI H24.

GDH-L2
M-816, 0.50 C, 0.8 Mn, 0.3 Si, 1.0 Cr, 0.2 V, bal Fe.
Oil hardening tool steel for shafts, arbors, lathe centers; AISI L2; similar to AISI 4150.

GDH-L6.
M-816; 0.75 C, 0.75 Mn, 0.9 Cr, 1.75 Ni, 0.35 Mo, bal Fe.
Oil hardening tool steel for shafts, arbors, lathe centers, drill bushings; AISI L6.

GDH LUSTRE DIE
M-816; 0.50 C, 0.9 Mn, 1.0 Cr, bal Fe.
Oil hardening tool steel for shafts, arbors.

GDH-M2.
M-816; 0.85 C, 4.15 Cr, 1.95 V, 6.4 W, 5.0 Mo, bal Fe.
High speed tool steel, molybdenum-tungsten type; for lathe tools, milling cutters, drills, broaches; AISI M2.

GDH-M41.
M-816, 1.1 C, 0.45 Mn, 0.3 Si, 4.25 Cr, 2.0 V, 6.75 W, 3.75 Mo, 5.0 Co, bal Fe.
High speed steel, molybdenum-tungsten-cobalt type; AISI M41.

GDH NON TEMPERING.
M-816; 0.35 C, 0.7 Mn, 0.45 Si, 0.8 Cr, 0.3 Mo, 0.3 Cu, bal Fe.
Oil hardening tool, shock resisting type.

GDH-O1.
M-816; 0.90 C, 1.2 Mn, 0.5 Cr, 0.2 V, 0.5 W, bal Fe
Oil hardening tool steel; AISI O1.

GDH-O2.
M-816; 0.90 C, 1.5 Mn, 0.25 Si, 0.3 Mo, bal Fe.
Oil hardening tool steel; AISI O2.

GDH-O7.
M-816; 1.25 C, 0.3 Mn, 0.35 Si, 0.4 Cr, 0.2 V, 1.4 W, bal Fe.
Oil hardening tool steel,
high hardness and wear resistant; AISI O7.

G.D.H. RED LABEL.
M-816; 0.65-0.75 C, 3-4 Cr, 1.0-1.5 V, 18-20 W, bal Fe.
For tools, cutters; high speed steel.

GDH-S1.
M-816; 0.45-0.50 C, 0.2-0.5 Mn, 0.75-1.0 Si, 1.15-1.25 Cr, 0.15-0.25 V, 2.25-2.6 W, bal Fe.
Oil hardening tool, shock resisting type; AISI S1.

GDH-S5.
M-816; 0.6 C, 0.8 Mn, 2.0 Si, 0.25 Cr, 0.2 V, 0.25 Mo, bal Fe.
Water or oil hardening tool steel,
shock resisting type; AISI S5.

GDH-S7.
M-816; 0.5 C, 0.7 Mn, 3.25 Cr, 1.4 Mo, bal Fe.
Oil hardening tool steel;
shock resisting type; AISI S7.

G.D.H. SILVER LABEL.
M-816; 1.0 C, bal Fe.
Heat treated: 660 Brn.
For tools, punches, shears, dies; water hardened

GDH-T1.
M-816; 0.75 C, 0.3 Mn, 0.3 Si, 4.0 Cr, 1.15 V, 18.25 W, bal Fe.
High speed steel, tungsten type,
general purpose cutting tool; AISI T1.

GDH-W1.
M-816; 1.1 C, 0.3 Mn, 0.25 Si, bal Fe
Water hardening tool steel; AISI W1.

GDH-W2.
M-816; 1.05 C, 0.25 Mn, 0.25 Si, 0.2 V, bal Fe.
Water hardening tool steel; AISI W2.

GEANT 3.
M-1118; 0.7 C, 18 W, 5 Co, 4 Cr, 1.3 V, bal Fe.
For tools, dies, cutters, hobs, drills,
high speed steel.

GEANT 22.
M-1421; 0.8 C, 10 W, 4 Cr, 1.7 V, 0.9 Mo, bal Fe.
For lathe an dplaner tools, hobs, reamers;
high speed steel.

GEANT 50.
M-1421; 0.75 C, 18 W, 4 Cr, 1 V, 0.7 Mo, bal Fe
For lathe and planer tools, reamers, broaches,
taps; high speed steel.

GEANT 55.
M-1421; 0.85 C, 12 W, 4 Cr 2 V, 0.9 Mo, 2.8 Co, bal Fe.
For lathe and planer tools, drills, reamers;
high speed steel.

GEANT 60.
M-1421; 0.80 C, 18 W, 4 Cr, 1.5 V, 0.75 Mo, bal Fe
For lathe and planer tools, drills, reamers,
hobs; high speed steel.

GEANT 66.
M-1421; 1.3 C, 4 Cr, 12 W, 4.5 V, 0.90 Mo, 4.5 Co, bal Fe.
For blanking and forming dies, engravers tools;
high speed steel.

GEANT 77.
M-1421, 0.85 C, 18 W, 4 Cr, 1.5 V, 0.70 Mo, 5 Co, bal Fe.
For lathe and planer tools, milling cutters,
drills; high speed steel.

GEANT 88.
M-1421; 0.85 C, 18 W, 4 Cr, 1.5 V, 0.7 Mo, 10 Co, bal Fe.
For lathe and planer tools, cutters, broaches;
high speed steel.

GEANT M5.
M-1421; 0.85 C, 6 W, 4 Cr, 2.4 V, 5 Mo, bal Fe.
For lathe and planer tools, reamers;
high speed steel.

GEAR BRONZE-1.
U. S.; 78-91 Cu, 10-12 Sn, 0-3 Zn, 0.2 Pb, 0.1-0.3 P.
Cast: 38,000 TS; 20,000 YS; 10 El, 80 Brin.
For gears, worm wheels; tough.

GEAR BRONZE-2
U S; 88 Cu, 10 Sn, 2 Pb.
For gears; free-cutting

GEAR BRONZE-3.
U. S.; 85 Cu, 13 Sn, 2 Zn
For gears; tough.

GEARING BRONZE
Eng.; 91.3 Cu, 8.7 Sn.
For gears, tough.

GEARS BRONZE
Eng.; 85 Cu, 10 Sn, 3 Zn, 2 Pb.
For gears; free-cutting.

GEAR STEEL
Eng., 3.5 Ni, 1.5 Cr, 0.45-0.50 C, bal Fe.
For gears and pinions, oil-hardening

GEAR STEEL HIGH DUTY
Eng.; C, alloy, bal Fe
For gears; oil-hardening

GEAR-WHEEL BRONZE.
M-452, 11-12 Sn, 0-1.5 Zn, 0.1-0.3 P, bal Cu
Cast: 30,000-37,000 TS; 20,000-23,000 YS;
4-1 El, 90-125 Brn
For high duty worm wheels;
working with hardened steel worms

G.E.C HEAVY ALLOY
M-978, 90 W, 7.5 Ni, 2.5 Cu
Sintered: 90,000 TS; 83,000 YS; 4 El; 290 Brin.
For screens in X-ray tubes; sintered.

GECOR.
M-60, Cobalt rare earth compounds (Co_5 Sm)
Anisotropic permanent magnet material.
Highest energy product and coercive force.

GEDGE'S METAL.
Eng; 60 Cu, 38.2 Zn, 1.8 Fe.
For ship sheathing, cylinders for hydraulic presses,
malleable at red heat.

GEMCO.
M-1493; 87.75 Cu, 12 Ge, 0.25 Ni.
M.P. 1508-1769°F
For high temperature brazing.

GEMMA.
M-771; 35 Ni, bal Fe.
For magnets; high permeability.

GEMPCO.
M-1063; Sn-Pb-graphite, bal Cu.
For friction material, clutch discs, motor,
brushes; sintered, self lubricating.

GENALLOY.
M-59; 37-40 Ni, 17-21 Cr, C, Si, bal Fe.
Cast: 67,000 TS; 38,000 YS; 6 El; 207 Brin.
For furnace parts; high resistance
to heat and corrosion.

GENALLOY B.
M-59; 0.36-0.50 C, 31-39 Ni, 12-15 Cr, bal Fe.
For heat and corrosion resistant parts;
heat and corrosion resistant.

GENCALLOY.
U.S.; Pb alloy.
For cable sheathing; corrosion resistant.

GENCALOY.
U.S.; Pb alloy.
For cable sheath.

GENELITE.
M-306 70-73 Cu, 12-14 Sn, 9-10 Pb, 4.5-5.5 graphite.
For bearings for aero engines;
synthetic bronze, self-lubricating.

GENERAL ALLOYS CN-1-H.
M-59; 0.20-0.50 C, 26.0-30.0 Cr, 8.0-11.0 Ni, bal Fe
Cast: 95,000 TS; 45,000 YS; 20 El; 200 Brin
For oil burner parts, rabble arms, tube supports
Heat resistant, stainless.

GENERAL ALLOYS Q-10.
M-59, 0.20 max C, 18-21 Cr, 8-11 Ni, bal Fe.
Annealed· 77,000 TS; 36,000 YS; 50 El; 163 Brin
For pumps, rolls, valve bodies in
chemical plant equipment; stainless, austenitic,
ACI CF 20

GENERAL ALLOYS Q-11.
M-59, 0 08 max C, 18-21 Cr, 8-11 Ni, bal Fe.
Annealed. 77,000 TS; 37,000 YS; 55 El; 140 Brin
For spray nozzles, sanitary fittings and chemical
plant equipment; stainless, austenitic;
ACI CF-8

GENERAL ALLOYS Q-12
M-59; 0 08 max C, 18-21 Cr, 9-12 Ni, 2-3 Mo,
bal Fe.
Annealed: 80,000 TS; 42,000 YS, 50 El; 168 Brin
For mixing propellers;
fittings in chemical plant equipment;
stainless, austenitic; ACI CF-8C.

GENERAL ALLOYS Q-13.
M-59; 0.08 max C, 19 Cr, 11 Ni, 3-4 Mo, bal Fe
Annealed 80,000 TS, 42,000 YS, 50 El, 168 Brin
For acid resistant castings; Type 317,
corrosion resistant. Fittings, mixing propellers

GENERAL ALLOYS Q-14.
M-59; 0 08 max C, 18-21 Cr, 9-12 Ni, Cb, bal Fe
Annealed: 77,000 TS; 38,000 YS, 39 El, 149 Brin
For pump parts, valve bodies
in chemical plant equipment;
stainless, austenitic; ACI CF-8C

GENERAL ALLOYS Q-15.
M-59, 0.16 max C, 18-21 Cr, 9-12 Ni, 0 2-0 35 Se,
bal Fe
Annealed: 77,000 TS; 40,000 YS, 52 El, 150 Brin
For pumps, castings, valves in
chemical plant equipment;
free-machining austenitic stainless,
ACI CF-16F.

GENERAL ALLOYS Q-16.
M-59; 0.20 max C, 19 Cr, 9 Ni, 3 Mo, bal Fe.
Annealed: 70,000 TS; 30,000 YS; 35 El, 40 RA;
160 Brin.
For chemical plant equipment; ACI-CH20.

GENERAL ALLOYS Q-21.
M-59; 0.20 max C, 22-26 Cr, 12-15 Ni, bal Fe.
Annealed: 83,000 TS; 50,000 YS; 38 El; 190 Brin.
For pumps, roasting equipment, furnace parts, heat
treating boxes; heat resistant. ACI CH-20.

GENERAL ALLOYS Q-22.
M-59; 0.10 max C, 22-26 Cr, 12-15 Ni, bal Fe.
Annealed. 86,000 TS; 40,000 YS; 40 El; 170 Brin.
For furnace parts, heat treating boxes, chemical
plant equipment; heat resistant; ACI CH-10.

GENERAL ALLOYS Q-23.
M-59; 0.10 max C, 24 Cr, 12 Ni, 3 Mo, bal Fe.
Annealed: 70,000 TS; 30,000 YS; 45 El; 55 RA;
150 Brin.
For chemical plant equipment;
ACI-CH10M, heat and corrosion resistant.

GENERAL ALLOYS Q-30.
M-59; 0.20 max C, 23-27 Cr, 19-22 Ni, bal Fe.
Annealed: 75,000 TS; 45,000 YS; 20 El; 180 Brin.
For valves, digesters, jet engine parts,
furnace parts, heat treating boxes;
heat resistant; ACI CK-20.

GENERAL ALLOYS Q-35.
M-59; 0 20 C, 23-27 Cr, 19-22 Ni, bal Fe.
Annealed· 65,000 TS; 30,000 YS, 30 El; 165 Brin.
For furnace parts, heat treating boxes,
chemical plant parts. ACI CK-20.

GENERAL ALLOYS Q-41.
M-59; 0.07 max C, 16 Cr, 35 Ni, Mo, Cu, bal Fe.
Annealed: 70,000 TS; 35,000 YS; 45 El; 45 RA;
150 Brin.
For chemical plant equipment, furnace fixtures;
corrosion and heat resistant

GENERAL ALLOYS Q-50.
M-59; 0.08-0 15 C, 12 Cr, 1 max Ni, bal Fe.
Normalized. 100,000-200,000 TS; 75,000-150,000 YS;
30-7 El; 40 RA; 185-390 Brin
For chemical plant equipment, ACI-CA15,
corrosion resistant

GENERAL ALLOYS Q-51.
M-59, 0.2-0 4 C, 12 Cr, 1 max Ni, bal Fe.
Heat treated 110,000-220,000 TS,
67,000-165,000 YS, 16-1 El, 7 RA, 212-470 Brin.
For chemical plant equipment,
ACI-CA40, corrosion resistant

GENERAL ALLOYS Q-56
M-59, 0 60-0.75 C, 17 Cr, 1 max Ni, bal Fe.
Heat treated 400 Brin
AISI-440A, corrosion resistant.

GENERAL ALLOYS Q-57.
M-59, 0 95-1.2 C, 17 Cr, 1 max Ni, bal Fe.
Heat treated· 550 Brin.
AISI 440C, corrosion resistant

GENERAL ALLOYS Q-58
M-59; 0 12 max C, 16 Cr, 1 max Ni, bal Fe
Annealed· 80,000 TS; 45,000 YS, 10 El; 10 RA;
200 Brin
For chemical plant equipment,
AISI 430, corrosion resistant.

GENERAL ALLOYS Q-60.
M-59, 0.30 max C, 20 Cr, 2 max Ni, bal Fe.
Annealed: 95,000 TS; 60,000 YS, 15 El; 10 RA;
200 Brin.
For chemical plant equipment,
ACI-CB20, corrosion resistant

GENERAL ALLOYS Q-65
M-59; 0.30-0.50 C, 28 Cr, 4 max Ni, bal Fe.
Annealed. 97,000 TS; 65,000 YS; 18 El; 212 Brin.
For furnace parts, heat treating boxes;
ACI-CC50, corrosion and heat resistant.

GENERAL ALLOYS Q-66.
M-59; 0.20 max C, 28 Cr, 3 max Ni, bal Fe.
Annealed: 55,000 TS; 45,000 YS.
For furnace parts, heat treating boxes, chemical plant equipment; ACI-CC20, heat and corrosion resistant.

GENERAL ALLOYS Q-67.
M-59; 0.35 max C, 25 Cr, 1 max Ni, bal Fe.
Annealed: 55,000 TS; 40,000 YS.
For chemical plant equipment; AISI 446, corrosion resistant.

GENERAL ALLOYS Q-80.
M-59; 0.10 max C, 26-30 Cr, 3-6 Ni, Mo, bal Fe.
Annealed: 60,000 TS; 40,000 YS.
For chemical plant equipment; resists high temperature and high temperature corrosion; AISI 329.

GENERAL ALLOYS Q81.
M-59; 0.07 max C, 20 Cr, 25 Ni, 3 Mo, 1 Cu, bal Fe.
Cast.
For chemical plant equipment; corrosion resistant.

GENERAL ALLOYS Q-82.
M-59; 0.30 max C, 29 Cr, 9 Ni, bal Fe.
Cast: 80,000 TS; 40,000 YS; 20 El; 20 RA
For furnace parts, chemical plant equipment; ACI-CE30, corrosion and heat resistant.

GENERAL ALLOYS Q-85.
M-59; 0.07 C, 19-22 Cr, 27-31 Ni, 1.75-2 5 Mo, 3 min Cu, bal Fe.
Annealed: 65,000-75,000 TS; 28,000-38,000 YS; 50-35 El; 120-150 Brin.
For towers, pickling hooks in chemical plant equipment; resists sulphuric acid

GENERAL ALLOYS Q-86.
M-59; 0.12 max C, 1 max Cr, 64 Ni, 28 Mo, bal Fe.
Annealed: 80,000 TS; 57,000 YS; 8 El; 179-235 Brin.
For castings, corrosion and heat resistant, Hastelloy B. Chemical plant parts.

GENERAL ALLOYS Q-87.
M-59; 0.12 max C, 1 max Cr, 55 Ni, 21 Mo, bal Fe.
Annealed: 71,000 TS; 47,000 YS; 12 El; 149-187 Brin.
For castings; corrosion and heat resistant; Hastelloy A.

GENERAL ALLOYS Q-88.
M-59; 0.15 max C, 16 Cr, 56 Ni, 4 W, 17 Mo, bal Fe.
Annealed: 78,000 TS, 57,000 YS, 10 El; 187-248 Brin.
For castings, corrosion and heat resistant;
Hastelloy C Resistant to chlorine.

GENERAL ALLOYS Q-89.
M-59; 0 12 max C, 1 max Cr, 84 Ni, 9 Si, 4 Cu, bal Fe.
Annealed· 118,000 TS; 118,000 YS; 0-2 El.
Acid resistant casting; maximum resistance to sulphuric acid
Reference: Hastelloy D.

GENERAL ALLOYS Q-90.
M-59; 0.20 max C, 22 Cr, 45 Ni, Mo, Co, W, bal Fe.
Annealed: 7[illegible],000 TS; 48,000 YS; 11 El; 170 Brin.
For castings; corrosion and heat resistant; Hastelloy X. Oxidation resistant to 2200°F

GENERAL ALLOYS-Q91.
M-59; 0.04 max C, 26 Cr, 5 Ni, 2 Mo, 3 Cu, bal Fe.
Aged: 140,000 TS; 115,000 YS; 18 El, 310 Brin.
Cast: 120,000 TS; 83,000 YS; 27 El; 260 Brin.
For acid resistant and chemical plant equipment, pump, valves, fittings.
ACI-CD4MCu. Corrosion resistant.

GENERAL ALLOYS X-3.
M-59; 0.20-0.60 C, 28.0-32.0 Cr, 18.0-22.0 Ni, bal Fe.
Cast: 82,000 TS; 52,000 YS; 19 El; 192 Brin.
For carrier fingers, enameling fixtures, stack dampers. Heat resistant, stainless.

GENERAL ALLOYS X-4.
M-59; 0.20-0.60 C, 24.0-28.0 Cr, 18.0-22.0 Ni, bal Fe.
Cast: 75,000 TS; 50,000 YS; 19 El; 192 Brin.
For cement kiln segments, pier caps, skid rails.
Heat resistant, stainless.

GENERAL ALLOYS X-5.
M-59; 0.50 max C, 26.0-30.0 Cr, 4.0-7.0 Ni, bal Fe.
Cast: 85,000 TS, 48,000 YS; 16 El; 190 Brin.
For brazing furnace parts, cracking equipment, rabble shoes. Heat resistant.

GENERAL ALLOYS X-6.
M-59; 0.20-0.50 C, 19.0-23.0 Cr, 23.0-27.0 Ni, bal Fe.
Cast: 68,000 TS; 38,000 YS; 17 El; 160 Brin
For chains, furnace beams, tube supports.
Heat resistant. Stainless.

GENERAL ALLOYS X-7
M-59; 0.20-0.50 C, 24.0-28.0 Cr, 11.0-14.0 Ni, bal Fe
Cast: 80,000 TS, 50,000 YS; 25 El, 185 Brin.
For exhaust manifolds, rabble arms, tube hangers.
Heat resistant, stainless.

GENERAL ALLOYS X-8
M-59; 0.20-0 40 C, 19 0-23 0 Cr, 9 0-12 0 Ni, bal Fe.
Cast. 85,000 TS, 45,000 YS, 35 El, 165 Brinell.
For burner tips, fan housings, wear plates.
Heat resistant, stainless.

GENERAL ALLOYS X-9.
M-59, 0.20-0.30 C, 26 0-30 0 Cr, 14 0-18.0 Ni, bal Fe
Cast· 80,000 TS, 45,000 YS, 12 El; 180 Brin.
For furnace rails, lead pots, tube spacers
Heat resistant, stainless

GENERAL ALLOYS X-B
M-59; 33-37 Ni, 13-17 Cr, 0 35-0 75 C, bal Fe
Cast· 70,000 TS, 40,000 YS; 10 El, 180 Brin
For furnace parts, brazing trays, heat treating trays and baskets
Heat and corrosion resistant.

GENERAL ALLOYS X-B Cb
M-59; 0 35-0.75 C, 35 Ni, 15 Cr, Cb, bal Fe
Cast. 70,000 TS, 40,000 YS, 10 El; 180 Brin
For furnace parts, heat treating boxes, salt pots.
Heat and corrosion resistant.

GENERAL PLATE 154.
M-926; 45 Ag, 17 Cu, 16 5 Zn, 20 5 Cd, 0.5 Ni.
For silver brazing; M.P 1135-1150°F

GENERAL PLATE 715.
M-926, 15 Mn, 15 Ni, bal Cu.
Hardened: 100,000-133,000 TS; 40,000-77,000 YS, 12-20 El; 100-320 Brin.
For springs, diaphragms, watch cases; age-hardening, non-magnetic, corrosion resistant.

GENERAL PLATE 720.
M-926; 20 Mn, 20 Ni, bal Cu.
Wrought: 88,000-130,000 TS; 41,000-113,000 YS; 37-0.5 El; 150-300 Brin.
For springs, diaphragms, watch cases, age-hardening, non-magnetic, corrosion resistant.

GENERAL PLATE BH-1.
M-926; 10 Ag, 50 Cu, 40 Zn.
For silver brazing; M.P. 1495-1590°F.

GENERAL PLATE BH-2.
M-926; 10 Ag, 52 Cu, 38 Zn.
For silver brazing

GENERAL PLATE CH-1.
M-926; 40 Ag, 36 Cu, 24 Zn.
For silver brazing; M.P. 1340-1405°F.

GENERAL PLATE CK-4.
M-926; 45 Ag, 30 Cu, 25 Zn.
For silver brazing.

GENERAL PLATE KA-1.
M-916, 52.5 Ag, 20 Cu, 14 Zn, 11.5 Cd, 2 Ni.
For brazing carbide tips; M.P 1115-1195°F

GENERAL PLATE KC-4
M-926, 54 Ag, 40 Cu, 5 Zn, 1 Ni
For silver brazing; M.P 1430-1470°F

GENERAL PLATE KH-2
M-926, 50 Ag, 34 Cu, 16 Zn
For silver brazing

GENERAL PLATE KH-4
M-926, 50 Ag, 15.5 Cu, 15.5 Zn, 16 Cd, 3 Ni
For brazing carbide tips, M.P. 1195-1270°F

GENERAL PLATE KH-7
M-926; 50 Ag, 15.5 Cu, 16.5 Zn, 18 Cd
For brazing; M P 1160-1175°F.

GENERAL PLATE KH-105.
M-926, 50 Ag, 15.5 Cu, 25 Zn, 10 Cd
For silver brazing

GENERAL PLATE KK-5.
M-926, 55 Ag, 31.5 Cu, 11.7 Zn, 1.8 Ni
For furnace brazing of steel parts,
M P 1300-1355°F

GENERAL PLATE LH-1
M-926, 20 Ag, 45 Cu, 30 Zn, 5 Cd
For silver brazing, M P 1430-1500°F.

GENERAL PLATE LH-3
M-926, 19.45 Ag, 47.75 Cu, 32.8 Zn.
For silver brazing, M P. 1440-1500°F

GENERAL PLATE LH-4.
M-926, 20 Ag, 45 Cu, 35 Zn
For silver brazing

GENERAL PLATE LM-1.
M-926, 27 Ag, 40.15 Cu, 38.25 Zn
For silver brazing, M P. 1350-1430°F

GENERAL PLATE MA-1.
M-926; 72.15 Ag, 22.8 Cu, 5.05 Zn
For silver brazing; M P 1345-1400°F

GENERAL PLATE MH-4
M-926, 70 Ag, 20 Cu, 10 Zn
For silver brazing

GENERAL PLATE ML.
M-926; 72 Ag, 28 Cu
For silver brazing, M P. 1435°F; eutectic alloy

GENERAL PLATE SB-2.
M-926; 60.5 Ag, 22.5 Cu, 7 Zn, 10 Cd.
For silver brazing; M.P. 1285-1335°F.

GENERAL PLATE SH-7
M-926; 60 Ag, 20 Cu, 7 Zn, 3 Sn.
For silver brazing; M.P. 1270-1300°F.

GENERAL PLATE SI-1.
M-926; 68 Ag, 27 Cu, 5 Sn.
For silver brazing; M.P 1370-1400°F

GENERAL PLATE SK-4.
M-926; 65 Ag, 20 Cu, 15 Zn.
For silver brazing; M.P. 1285-1325°F.

GENERAL PLATE SM-1.
M-926; 66.7 Ag, 28.25 Cu, 5.05 Zn.
For silver brazing; M.P. 1360-1395°F.

GENESEE 100.
M-500; 0.4 C, Cr, Mo, bal Fe.
Heat treated: 105,000-135,000 TS;
85,000-115,000 YS; 15-11 El; 30-25 RA.
For gears, shafts, oil hardened

GENESEE 180.
M-500, 0.3 C, Mn, bal Fe.
Normalized: 80,000 TS; 45,000 YS; 24 El; 45 RA
For structures; water hardened.

GENESEE 185
M-500, 0.27 C, Mn, Mo, bal Fe.
Normalized. 85,000 TS, 53,000 YS; 22 El; 35 RA
For structures; water hardened.

GENESEE 191
M-500, 0.3 C, Mn, Cr, Mo, bal Fe.
Rolled 90,000 TS; 60,000 YS; 22 El, 45 RA.
For abrasion resisting parts; shock resisting.

GENESEE 194.
M-500, 0.20 C, Mo, bal Fe.
Normalized· 65,000 TS, 35,000 YS, 24 El, 35 RA
For structures; case hardened

GENESEE 194B.
M-500; 0.25 C, Mo, bal Fe.
Normalized 70,000 TS, 45,000 YS, 22 El; 35 RA.
For structures, water hardened

GENESEE 195
M-500, 0.27 C, Mn, Mo, Cr, bal Fe
Normalized 100,000 TS, 65,000 YS, 17 El; 30 RA
For structures; water hardened.

GENESEE 212
M-500, 0.2 max C, 12-16 Cr, bal Fe
For chemical engineering equipment;
corrosion resistant

GENESEE 255
M-500, C, 4-6 Cr, 0.5 Mo, bal Fe.
For chemical engineering equipment,
corrosion resistant.

GENESEE 280
M-500, C, 28 Cr, 10 Ni, bal Fe
For corrosion and heat resisting parts,
heat and corrosion resistant

GENESEE 303
M-500; 0.2 C, 25 Cr, 20 Ni, bal Fe.
75,000 TS, 150 Brin
For corrosion and heat resistant parts,
heat and corrosion rsistant to S fuels.

GENESEE 304.
M-500; 35 C, 17 Cr, 35 Ni, 0.65 Mn, bal Fe
For hearth supports, heat treating baskets,
valves, salt pots, heat and corrosion resistant

GENESEE 305.
M-500, 0.15 C, 17 Cr, 65 Ni, 0.60 Mn, bal Fe.
For hearth supports, heat treating baskets,
valves, salt pots, heat and corrosion resistant.

GENESEE 315.
M-500, 2.8 C, Mo, Si, bal Fe.
Cast: 40,000 TS, 250 Brin
For chemical engineering equipment, stoves, grates;
alloy gray iron.

GENESEE 405.
M-500; 0.45 C, 1 Cr, 0.75 Ni, 1.5 Mn, 0.3 Mo, bal Fe.
For chemical engineering equipment; oil hardening.

GENESEE 412.
M-500; C, 11-14 Mn, Cr, bal Fe.
200 Brin.
For chemical engineering equipment, crusher plates; wear and abrasion resistant.

GENESEE 460.
M-500; 0.6 C, 1 Cr, 3 Ni, 0.3 Mo, bal Fe.
For chemical engineering equipment; oil hardening.

GENESEE 500.
M-500; 3.1 C, 2 Cr, 4.5 Ni, bal Fe.
550 Brin.
For castings, pulverizers; corrosion and abrasion resisting.

GENESEE KA-2.
M-500; 0.2 C, 18 Cr, 8 Ni, bal Fe.
For chemical engineering equipment, pump parts; stainless.

GENESEE KA4.
M-500; 0.2 max C, Cr, Ni, Mo, bal Fe.
Annealed: 75,000 TS; 160 Brin.
For paper mill equipment; resists sulfites; austenitic, corrosion resistant.

GENESEE NICKEL Ni-RESIST.
M-500; C, 2 Cr, 16 Ni, bal Fe.
For castings; corrosion resisting.

GENESEE NI-HARD.
M-500; 3.2 C, 2 Cr, 4.5 Ni, bal Fe.
550 Brin.
For chemical engineering equipment; wear resistant.

GENESEE NI-RESIST
M-500; C, 2 Cr, 13 Ni, 6 Cu, bal Fe.
For chemical engineering equipment; heat resistant.

GEORO.
M-1493; 88 Au, 12 Ge.
M.P.; 673°F. For brazing. Eutectic alloy.

GENSTEEL.
M-1478; C, alloy, bal Fe.
For castings.

GENUINE "A" BABBITT METAL.
M-317; Sn, Sb, Pb.
At 70°F.; 28.6 Brin.; At 212°F.; 12.8 Brin.
For bearings, bushings; M.P 437°F.; Babbitt.

GENUINE SILVERINE.
M-586; Pb, Sb, bal Sn.
For bearings; Babbitt.

GENUINE SOVEREIGN BABBITT.
M-586; 86-90 Sn, bal Cu, Sb.
Cast: 28.4 Brin.
For internal combustion engine bearings; upper freezing point 306°C.

GENUINE WROUGHT IRON.
M-292; 0.05 max. C, 0.05 max. Mn, 0.10-0.15 P, 0.03 max. S, 0.10-0.15 Si, bal Fe.
45,000-50,000 TS; 25,000-30,000 YS; 35 El.
For staybolts, rivets, roofing sheets, water and steam pipes, boiler tubes; ductile, easily welded.

GERMAN ALUMINUM ALLOY.
Germ.; 93 Al, 7 Mg.
For pistons; heat treatable.

GERMANIA B. BRONZE.
England; 80.4 Zn, 9.6 Sn, 4.4 Cu, 4.7 Pb, 0.8 Fe.
For bearings; will not resist heat or live steam.

GERMAN NAVY ANTIFRICTION METAL.
German; 7.5 Cu, 85 Sn, 7.5 Sb.
For bearings, bushings; Babbitt.

GERMAN SILVER, AUSTRIAN.
Aus.: 60-50 Cu, 20-25 Zn, 20-25 Ni.
For ornamental purposes, electrical resistances; corrosion resistant.

GERMAN SILVER, AUSTRIAN.
Aust.; 50 Zn, 44 Cu, 3.3 Sn, 1.2 Pb.
For solder, brazing; nearly white.

GERMAN SILVER, BERLIN.
Germ.: 54 Cu, 28 Zn, 18 Ni.
For ornamental purposes, electrical resistances; corrosion resistant.

GERMAN SILVER, BEST.
Germ.; 46-50 Cu, 20-31 Ni, 29-34 Zn.
For springs and contact points in electrical work; German Silver.

GERMAN SILVER, BIRMINGHAM.
Eng.: 62-50 Cu, 32-20 Zn, 12-30 Ni.
For ornamental purposes, electrical resistances; corrosion resistant

GERMAN SILVER, COMMON FORMULA.
Germ.: 55 Cu, 25 Zn, 20 Ni.
For ornamental purposes, electrical resistances; corrosion resistant

GERMAN SILVER EXTRA WHITE.
M-102; 30 Ni. 50 Cu, 20 Zn.
For corrosion resistant parts, German Silver.

GERMAN SILVER, FIFTHS.
M-102; 7 Ni, 57 Cu, 36 Zn.
Soft: 55,000 TS; 20,000 YS; 50 El.
For ornamental parts, German Silver.

GERMAN SILVER, FIRSTS "A-1" BEST.
M-102, 16 Ni, 56 Cu, 28 Zn.
Soft. 60,000 TS; 50 El.
For cheap flat work, German Silver.

GERMAN SILVER, FIRSTS "A" SPECIAL.
M-102; 17 Ni, 56 Cu, 27 Zn.
For electrical resistances, flat work; German Silver.

GERMAN SILVER FOUNDRY ALLOY.
M-102, 35 Ni, 45 Cu, 20 Zn.
For white metal castings; German Silver.

GERMAN SILVER, FOURTHS.
M-102, 10 Ni, 55 Cu, 35 Zn.
For ornamental parts, German Silver.

GERMAN SILVER, FRENCH (ARCET).
Fren : 50 Cu, 30-31.3 Zn, 20-18.7 Ni.
For ornamental purposes, electrical resistances; corrosion resistant.

GERMAN SILVER, FRENCH (CHAVAL).
Fren.: 58.3 Cu, 25 Zn, 16.7 Ni.
For ornamental purposes, electrical resistances; corrosion resistant.

GERMAN SILVER, RUSSIAN.
Russ.: 45-56 Cu, 18-23.5 Zn, 20-36 Ni.
For ornamental purposes, electrical resistances; corrosion resistant.

GERMAN SILVER, SECONDS.
M-102; 14 Ni, 62 Cu, 24 Zn.
Hard: 120,000 TS; 2 El.
For ornamental and decorative parts; German Silver.

GERMAN SILVER, SHEFFIELD.
Eng.; 59.3 Cu, 25.9 Zn, 14.8 Ni.
For ornamental purposes, electrical resistances; Common Yellow.

GERMAN SILVER, SHEFFIELD.
Eng.; 55.2 Cu, 24.1 Zn, 20.7 Ni.
For ornamental purposes, electrical resistances; Silver White.

GERMAN SILVER, SHEFFIELD.
Eng.; 51.6 Cu, 22.6 Zn, 25.8 Ni.
For ornamental purposes, electrical resistances; Electrum, Bluish.

GERMAN SILVER, SHEFFIELD.
Eng.; 45.7 Cu, 20 Zn, 31.3 Ni.
For ornamental purposes, electrical resistances; Hard Alloy.

GERMAN SILVER SOLDER-1.
Germ., 20 Ag, 30 Cu, 30 Zn, 20 Cd.
For silver solder

GERMAN SILVER SOLDER-2
Germ.; 10 Ag, 40 Cu, 30 Zn, 20 Cd
For silver solder.

GERMAN SILVER SOLDER-3.
Germ.; 10 Ag, 3 Cu, 2 Zn, 75 Sn.
For silver solder, corrosion resistant.

GERMAN SILVER, SPECIAL THIRDS.
M-102; 11 Ni, 56.5 Cu, 32.5 Zn
For white metal trim; German Silver.

GERMAN SILVER, THIRDS
M-102, 12 Ni, 56 Cu, 32 Zn.
For white metal trim, German Silver

GERMAN SILVER WHITE
M-102, 24 Ni, 54 Cu, 22 Zn
For corrosion resistant parts, German Silver.

GERMAN TYPE METAL "A."
Germ., 75 Pb, 2 Sn, 23 Sb.
For type metal

GERMAN TYPE METAL "B"
Germ., 60 Pb, 35 Sn, 5 Sb.
For type metal.

GERMAN TYPE METAL "C"
Germ., 60 Pb, 34.6 Sn, 5.4 Sb.
For type metal

GERMAN TYPE METAL "D."
Germ., 60 Pb, 15 Sn, 25 Sb.
For type metal

GEROWAL I.
M-1374; 5.5-7.0 Si, 2-4 Cu, 0.4-0.6 Mn, 2 max Zn, 1 max Fe, bal Al.
Heat treated: 36,000 TS; 24,000 YS, 2 El, 80 Brin.
For light alloy parts; age hardenable

GEROWAL II
M-1374, 4-7 Cu, 2-4 Si, 2.5 max Zn, 1.1 max Fe, bal Al.
For light alloy parts, age hardenable.

GEROWI SILBERIT.
M-1374; 1.5-3.5 Mg, 1.3 max Si, 0.6 max Mn, 0.2 Cr, 0.2 Ti, bal Al.
Soft: 28,000 TS; 13,000 YS; 30 El; 47 Brin.
For aircraft tanks and fittings, fuel lines, marine parts; resists sea water corrosion.

GEROWI SILBERIT-K.
M-1374; 2-4 Mg, 0.4 max Mn, 0.3 max Cr, bal Al.
Soft: 28,000 TS; 13,000 YS; 30 El; 47 Brin.
Hard: 40,000 TS; 35,000 YS; 10 El; 73 Brin.
For aircraft tanks and fittings, fuel lines, marine parts; resists sea water corrosion.

GEWA 235.
M-1307, 0.35 C, 0.9 Si, 0.3 Mn, 1 Cr, 0.2 V, 1.8 W, bal Fe.
For cold work tools, upsetters, crimpers; tough, shock resistant.

GEWA 250
M-1307; 0.45 C, 0.9 Si, 0.3 Mn, 2 W, 1 Cr, 0.4 V, bal Fe.
For punches, chisels, riveters, crimpers, upsetters, tough, shock resistant.

GEWA 255.
M-1307, 0.55 C, 0.9 Si, 0.3 Mn, 1 Cr, 0.2 V, 1.8 W, bal Fe.
For punches, chisels, riveters, crimpers, upsetters, tough, shock resistant

GEWA 430.
M-1307; 0.3 C, 1 Si, 0.4 Mn, 1.1 Cr, 0.18 V, 3.75 W, bal Fe.
For punches, chisels, riveters, crimpers, upsetters; tough, shock resistant.

GEWA 530
M-1307, 0.3 C, 0.3 Mn, 2.3 Cr, 0.6 V, 4.2 W, bal Fe.
For punches, upsetters, riveters, shears, crimpers; hot work steel, oil hardened.

GEWA 930.
M-1307; 0.30 C, 0.2 Si, 0.3 Mn, 2.6 Cr, 0.35 V, 8.5 W, bal Fe.
For extrusion rams and liners, punches, upsetters; hot work steel, oil hardened.

GEWA 960
M-1307; 0.65 C, 3.7 Cr, 0.85 Mo, 0.7 V, 8.5 W, bal Fe
For drills, reamers, taps, hobs, broaches; high speed steel, oil hardened

GEWA 2930.
M-1307, 0.30 C, 2 Co, 2.4 Cr, 0.25 V, 8.5 W, bal Fe.
For extrusion rams and liners, punches, shears; hot work steel, oil hardened.

G.F.A. NICKEL.
England, 99.0 min Ni + Co
For anode support wires, valve components; corrosion and heat resistant.

GIANT SPECIAL
M-1683; 0.35 C, 0.9 Cr, 0.3 Mo, bal Fe.
Oil or water hardening steel designed for plastic molds.

GIBRALTER
M-345, 1.05 C, bal Fe
For tools, drills, taps; water hardening.

GIBRALTAR
M-345, 0.95-1.05 C, 0.3 Si, 0.25 Mn, bal Fe.
For cutters, reamers, drills, punches, broaches, taps; Type W1, water hardened

GIBSILOY A-1.
M-650, 95 Ag, 5 Ni
For contact rivets, discs, screws; low contact resistance, high ductility.

GIBSILOY A 3
M-650, 50-95 Ag, 5-50 Ni.
For electric contacts, sintered powders, ductile.

GIBSILOY A-4.
M-650, Ag, Ni.
For electrical contacts; circuit breakers.

GIBSILOY A-6.
M-650; Ag, Ni.
For electrical contacts; circuit breakers.

GIBSILOY A8.
M-650; Ag-Ni.
Sintered: 36,000-58,000 TS
For electrical contacts;
disconnecting switch contacts.

GIBSILOY C-1.
M-650; 99 Ag, 1 graphite.
For contact discs; non-sticking.

GIBSILOY C-2.
M-650; Ag, C.
For electrical contacts, disconnecting switches.

GIBSILOY C 4.
M-650; 93-99 Ag, 1-7 graphite.
For electric contacts, sliding;
mechanically processed.

GIBSILOY C5.
M-650; Ag-C.
Sintered.
For electrical contacts, circuit breakers; non-welding.

GIBSILOY C-7
M-650; 93 Ag, 7 graphite.
For contact discs; non-sticking.

GIBSILOY CW-42.
M-650; Ag, W, C.
For electrical contacts, circuit breakers.

GIBSILOY CW-52.
M-650; Ag, W, C.
For electrical contacts, air circuit breakers.

GIBSILOY M 10.
M-650; 30-90 Ag, 10-70 Mo.
For electrical contacts; arcing.

GIBSILOY M-12.
M-650, Ag-Mo.
Sintered: 55,000 TS; 165 Brin.
For electrical contacts for air circuit
breakers; arcing.

GIBSILOY NC 22.
M-650; Ag, Ni, graphite.
For electrical contacts, rheostat contacts.

GIBSILOY NC-43.
M-650; Ag, Ni, C.
For electrical contacts, rheostats, contactors.

GIBSILOY ND.
M-650, 5-25 Ni, 1-10 Cd, bal Ag.
For electrical contacts.

GIBSILOY NM.
M-650; 1-35 Ni, 1-30 Mo, bal Ag
For electrical contacts; for high current densities.

GIBSILOY NW.
M-650; 1-35 Ni, 1-30 W, bal Ag.
For electrical contacts; for high current densities

GIBSILOY NW-54.
M-650, Ag, Ni, W.
For electrical contacts; D.C. service.

GIBSILOY NW-55.
M-650, Ag, Ni, W.
For electrical contacts; circuit breakers.

GIBSILOY UC-5.
M-650, Ag, Cu, C.
For electrical contacts, rheostats, contactors.

GIBSILOY UT-6.
M-650, Cu-WC.
Rockwell B100.
For electrical contacts, switches;
density 12.3; sintered.

GIBSILOY UT8.
M-650; Cu-WC.
Sintered: 230 Brin.
For electrical contacts and facings for resistance
welding electrodes; sintered.

GIBSILOY UT-10.
M-650, Cu-WC.
Rockwell B95.
For electrical contacts, switches; density
11.1; sintered

GIBSILOY UW4
M-650, Cu-W.
For electric contacts and facings for resistance
welding electrodes; sintered.

GIBSILOY UW-5.
M-650, Cu-W
Rockwell B100
For electrical contacts, switches; density
14.3; sintered.

GIBSILOY UW6.
M-650, Cu-W.
B90 Rockwell
For electric contacts, switches; sintered 50%
elec. cond.

GIBSILOY UW-8
M-650, Cu-W.
Rockwell B85.
For electrical contacts, switches,
density 12.6; sintered.

GIBSILOY W 2.
M-650, 30-90 Ag, 10-70 W.
For electrical contacts

GIBSILOY W-4
M-650, Ag-W
For electrical contacts, contactor contacts.

GIBSILOY W 10
M-650, Ag-W.
For electric contacts, sintered powders.

GIBSILOY W12
M-650, Ag, W.
For electrical contacts, air circuit breakers.

GIBSILOY W-13.
M-650, Ag-W.
Sintered 43,000 TS; 150 Brin.
For electrical contacts for air circuit
breakers, arcing

GIBSILOY W-15
M-650; Ag-W.
Sintered: 63,000 TS; 200 Brin.
For electrical contacts for
air circuit breakers; arcing.

GIBSILOY WC-10
M-650; Ag, WC
For electrical contacts for air circuit breakers.

GIBSILOY WID.
M-650; Ag, W
For electrical contacts; air circuit breakers.

GIBSON S-5
M-650; Ag-Zn.
For thermostats, contactors, switches, relays;
electrical contacts.

GIBSON S-10.
M-650, Ag-Cd.
For thermostats, contactors, switches, relays;
electrical contacts.

GIBSON S-15.
M-650; Ag-Pd.
For thermostats, contactors, switches,
relays; electrical contacts.

GIBSON S-16.
M-650; Ag, Pd.
For electrical contacts, thermostats, switches, relays.

GIBSON S-20.
M-650; Ag-Pt
For thermostats, contactors, switches, relays, electrical contacts.

GIBSON S-25.
M-650; Ag-Cu.
For electrical contacts.

GIBSON S-26.
M-650; Ag, Cu, Ni.
For electrical contacts, relays, switches.

GIESCHE Z13.
M-1134; 4 Al, 0.5-1 0 Cu, 0.03 Mg, bal Zn.
Rolled: 44,000-71,000 TS, 75-140 Brin.
For die castings, instrument cases, housings; rolled or cast.

GIESCHE Z14
M-1134; 0.8-1.0 Al, 0.3-0.4 Cu, bal Zn.
Rolled· 31,000-42,500 TS; 40-70 Brin
For die castings, housings, gears; rolled or cast.

GIESCHE ZL 2.
Ger , 4 Al, 1.0-1 5 Cu, bal Zn
For die or sand castings

GIESCHE ZL 3
Ger ; 4 Al, 0.5 Cu, bal Zn.
For pressed or drawn parts.

GIESCHE ZL7.
M-1134, 4 Cu, 0 2 Al, bal Zn.
Rolled· 28,000-59,600 TS, 45 100 Brin
For die castings, housings, gears, rolled or cast.

GIESCHE ZO4
M-1134, 4 Cu, bal Zn.
For die castings; rolled or cast

GIGANT
M-617, 0 7 C, 18 W, 4 Cr, 1 V, bal Fe
For cutters, tools, high speed steel

GIGANT
M-912, 1 05-1 15 C, 4.5 Cr, 11-12 W, 0.6 Mo, 2 5 V, bal Fe
For tools, dies, cutters, high speed steel.

GIGANT 5
M-501; 0 9 C, 4 Cr, 18 W, 5 Co, 1 3 V, bal Fe.
For tools, dies, cutters; high speed steel

GIGANT 10
M-501; C, 18 W, 9 Co, 1 Mo, 4 Cr, 2 V, bal Fe
For tools, dies, cutters; high speed steel

GIGANT 11
M-912, 0 92-0 98 C, 4 Cr, 1 2-1 5 W, 2 2-2.5 Mo, 2 2-2 5 V, bal Fe
For tools, dies, cutters, high speed steel

GIGANT 22
M-912, 0.78-0.85 C, 3 5-4 0 Cr, 7.3-8 0 W, 1.8-2.0 V, bal Fe
For tools, dies, cutters, high speed steel.

GIGANT 33
M-912, 0.85-0 95 C, 4 5 Cr, 13 W, 0.7 Mo, 2 V, 2.4 Co, bal Fe
For tools, dies, cutters; high speed steel.

GIGANT 44.
M-912; 1.3-1 4 C, 4-4.5 Cr, 9-10 W, 3.5-4 V, bal Fe.
For tools, dies, cutters; high speed steel.

GIGANT 50
M-501, M-912, 0.75 C, 4 Cr, 1 V, 18 W, bal Fe.
For lathe and planer tools, drills, taps, hobs, high speed steel.

GIGANT 55.
M-501, M-912; 0.86 C, 2.8 Co, 4.3 Cr, 8.5 Mo, 2.1 V, 12 W, bal Fe.
For lathe and planer tools, reamers, broaches, hobs; high speed steel.

GIGANT 60.
M-501, M-912; 0.7 C, 18 W, 1 Mo, 1.5 V, bal Fe
For lathe and planer tools, drills, taps, reamers; high speed steel.

GIGANT 66
M-912; 1.4-1.5 C, 4-4.5 Cr, 12-13 W, 0.4-0.7 Mo, 4.2-5.0 V, 4.2-5 Co, bal Fe.
For tools, dies, cutters; high speed steel.

GIGANT 70
M-501, M-912; 0.80 C, W, Co, Mo, 4 Cr, 1 V, bal Fe.
For lathe and planer tools, drills, taps, reamers; high speed steel.

GIGANT 77
M-501, M-912, 0.8 C, 4.7 Co, 4 Cr, 0.7 Mo, 1.5 V, 18 W, bal Fe.
For lathe and planer tools, reamers, taps, hobs; high speed steel.

GIGANT 88.
M-501, M-912; 0 76 C, 10 Co, 4 Cr, 0 8 Mo, 1 8 V, 18 W, bal Fe.
For lathe and planer tools, reamers, broaches; high speed steel.

GIGANT BST
M-501, M-912, 0 85 C, 4 Cr, W, Mo.
For lathe and planer tools, reamers, hobs, taps, high speed steel

GIGANT DUPLO.
M-501, M-912, 1 35 C, W, Co, Cr, bal Fe.
For fast finishing tools, engraving cutters; high speed steel, keen edge.

GIGANT M5.
M-501, M-912, 0 85 C, W, Mo, 4 Cr, bal Fe
For lathe and planer tools, drills, taps, hobs, high speed steel.

GIGANT N
M-912, 0 72-0 8 C, 4 5 Cr, 13 W, 0 7 Mo, 1 7 V, 2 4 Co, bal Fe
For tools, dies, cutters, high speed steel.

GIGANT UNO
M-912, 0 72-0 80 C, 13 W, 0 7 Mo, 1 7 V, 5 Co, 4 Cr, bal Fe
For tools, dies, cutters, high speed steel

GILDING 4
M-8, 95 Cu, 5 Zn
Soft· 35,000 TS, 11,000 YS, 38 El.
Hard 55,000 TS, 44,000 YS, 5 El.
For jewelry and bullet jackets; fuse caps, primers, gilding metal.

GILDING, 95%
M-33, 95 Cu, 5 Zn.
Annealed 35,000 TS, 11,000 YS; 45 El.
Hard rolled. 56,000 TS, 50,000 YS; 5 El
For angles, channels, red brass

GILDING 210.
M-8, 95 Cu, 5 Zn.
Hard Sheet: 56,000 TS; 46,000 YS; 5 El; B 64 Rock.
Soft Sheet: 36,000 TS, 11,000 YS, 42 El; F 50 Rock
For coins, costume jewelry, medallions, ornamental trim. 56% elect cond , malleable

GILDING FOIL
U S., 98 Sn, 2 2 Cu, 0 1 Fe.
For cheap jewelry; corrosion resistant.

GILDING METAL.
Eng.; 72-64 Cu, 23-34 Zn, 0.3-2.5 Sn, 0.3 P.
For cheap jewelry, bullet jackets; corrosion resistant.

GILDING METAL.
M-33; 95-97 Cu, 5-3 Zn.
35,000-60,000 TS; 10,000-30,000 YS; 40-5 El.
For cheap jewelry; corrosion resistant.

GILDING METAL 26.
M-141; 95 Cu, 5 Zn.
Hard: 56,000 TS; 50,000 YS; 5 El; 114 Brin.
Soft: 35,000 TS; 11,000 YS; 45 El; 50 Brin.
For jewelry; gilding metal.

GILDING METAL 210.
M-279; 95 Cu, 5 Zn.
Ann: 34,000-38,000 TS; 5000-11,000 YS; 45-48 El.
Cold rolled: 37,000-69,000 TS; 14,000-59,000 YS; 2-45 El.
For coins, medallions, bullet jackets, terminals; red color, easily formed, good corrosion resistance.

GILDING METAL, SCOVILL ALLOY 110.
M-102; 94-96 Cu, bal Zn.
Annealed: 35,000 TS; 45 El.
Hard: 55,000 TS; 5 El; 114 Brin.
For drawn and spun parts; corrosion resistant.

GILGRID 10.
M-897; 45 Ni, 45 Fe, 10 Mo.
Annealed: 90,000 TS; 72,000 YS; 33 El.
For grid wires, electronic tubes; corrosion and heat resistant.

GILGRID 30.
M-897, 67 Ni, 30 Mo, 1 Cr, 1 Si, 1 Mn.
Annealed: 90,000 TS; 63,000 YS; 15 El; 18 RA.
For grid wires, electronic tubes; corrosion and heat resistant

GILMORE NICKEL ALLOY.
M-817; Cu, bal Ni.
For setting diamond tools, holders

GILMORE TOOL.
M-334; 0.85 C, 3.5 Cr, 1 W, bal Fe.
For tools and dies, hot or cold work steel.

GILSON BM12C20.
M-1298; 0 2 max C, 22-24 Cr, 12-15 Ni, 2 max Mn, 3.5 max Si, bal Fe.
Annealed 85,000-95,000 TS; 40,000-50,000 YS; 45-55 El; 150-185 Brin.
For heat treat boxes, furnace parts and equipment; Type 309, austenitic, heat resistant.

GILSON UC-BC14.
M-1298; 0 15 max C, 11 5-13.5 Cr, bal Fe
Heat treated· 120,000-135,000 TS; 110,000-117,000 YS, 16-15 El; 63-58 RA; 220-240 Brin.
For cutlery, valves, turbine blades, Type 410; corrosion resistant.

GILSON UG.
M-1298; 0.2 max C, 22-24 Cr, 12-15 Ni, 2 max Mn, 3.5 max Si, bal Fe
Annealed· 85,000-95,000 TS, 40,000-50,000 YS; 45-55 El; 150-185 Brin.
For heat treat boxes, furnace parts, refinery equipment; Type 309; austenitic, heat resistant.

GILSON-UGAC14.
M-1298; 0.08 C, 11.5-13 Cr, 0.1-0 3 Al, bal Fe.
Normalized: 71,000 TS; 42,600 YS; 22 El; 150 Brin.
Ht. Tr.: 175,000 TS; 145,000 YS; 21 El; 352 Brin.
For injectors, table flatware, valves, pumps, oil refinery equipment .
Type 405, stainless.

GILSON UG-AM.
M-1298; 0.10 max C, 16-18 Cr, 10-14 Ni, 1.7-2.7 Mo, Cb = 10 × C, bal Fe.
Annealed: 85,000-95,000 TS; 35,000-45,000 YS; 60-50 El; 75-60 RA; 150-190 Brin.
For acid resistant chemical plant equipment; Type 316 Cb; stainless, austenitic.

GILSON UG-AM, 8C, 18MO.
M-1298; 0.08 max C, 17-19 Cr, 8-11 Ni, Ti = 5 × C, bal Fe.
Normalized: 93,000 TS; 36,000 YS; 45 El; 60 RA; 165 Brin.
Annealed: 87,000 TS; 33,000 YS, 57 El; 73 RA; 155 Brin.
For chemical plant equipment, muffles, cowls; Type 321; stainless, austenitic.

GILSON UG-CC14.
M-1298; 0 15 min C, 12-14 Cr, bal Fe.
Annealed: 88,000 TS; 40,000 YS; 32 El, 68 RA; 170 Brin
Heat treated. 256,000 TS; 190,000 YS, 6 El; 10 RA; 540 Brin
For cutlery, valve trim, springs, turbine blades; Type 420, stainless, hardenable

G-IRON
M-1001, 4 2 C, 2.4 Si, 0 6 Mn, bal Fe.
For making gray iron castings, graphitized pig iron.

GITTERMETALL
German, 0 2 graphite, 10 Sn, 15 Sb, 1.75 Cu, bal Pb
For bearings, graphitic.

GLACIER PRECISION FINISH LEAD BRONZE
M-818; Sn, Pb, bal Cu
For machinery parts; free cuttings.

GLASS MOLD ALLOY
Eng; 65-55 Cu, 12-18 Ni, 11-17 Zn, 8-12 Fe, 0-5-1 0 Si.
For blass molds, U S. Pat 1360773.

GLASS SEALING "42"
M-32, 0 15 max C, 1 0 Mn, 41 5 Ni, bal Fe.
For sealing into glass, low expansion.

GLASS SEALING "49."
M-32, 0.10 C, 49 Ni, bal Fe
For glass sealing, same coefficient of expansion as glass

GLIDDEN 304L.
M-1728; 0 02 C, 18 Cr, 10 Ni, bal Fe
Pre-alloyed metal powders; stainless.
Typical sintered properties: 50,000-62,000 TS; 3 5-12 4 El, 52-62 Rock B.

GLIDDEN 316L.
M-1728; 0 03 C, 17 Cr, 13 Ni, 2 5 Mo, bal Fe.
Pre-alloyed metal powders; stainless.
Typical sintered properties· 49,000-69,000 TS; 3-14 El, 50-60 Rock B.

GLIDDEN 410L (Annealed).
M-1728, 0 02 C, 12 Cr, bal Fe
Pre-alloyed metal powders; stainless.
Typical sintered properties· 58,000-95,000 TS; 2-3 El; 90-96 Rock B.

GLIDDEN 4600.
M-1728, 0 04 C, 0.6 Mn, 1.9 Ni, 0 25 Mo, bal Fe.
Pre-alloyed metal powders; low alloy steel.
Sintered properties depend on carbon pick-up from graphite and zinc stearate and on heat treatment.

GLIDDEN J-8100.
M-1728; 19 Cr, 10 Si, bal Ni. (Boron-free).
Vacuum melted brazing material; brazing temperature 2125-2175°F.

Oxidation resistance to 1900°F; for general purpose and nuclear brazing applications.

GLIDDEN J-8102.
M-1728; 15.2 Cr, 8 Si, bal Ni.
Vacuum melted brazing material; brazing temperature 2150-2200°F.
Boron free for thin gauge (0.005") honeycomb assemblies; good filleting and low erosion tendencies.

GLIDDEN J-8103.
M-1728; 17.1 Cr, 9.2 Si, 0.1 B, bal Ni.
Vacuum melted brazing material; brazing temperature 2100-2150°F.
Low boron grade, good flow, less fillet and more erosion than J-8102.

GLIDDEN J-8104.
M-1728; 11.4 Cr, 6.8 Si, 0 3 B, bal Ni.
Vacuum melted brazing material; brazing temperature 2125-2150°F.
For bridging gaps up to 0.060 inch, and for two or more brazing operations.

GLIDDEN J-8202.
M-1728; 2.2 Cr, 2 6 Si, 1 5 B, bal Ni
Vacuum melted brazing material, brazing temperature 2000-2110°F.
For bridging wide gaps, service temperature up to 1700°F.

GLIDDEN J-8207
M-1728; 5.6 Cr, 3 2 Si, 2 4 B, bal Ni.
Vacuum melted brazing material; brazing temperature 2050-2120°F.
For general wide gap brazing.

GLIDDEN J-8300.
M-1728; 19 Cr, 10 Si, 10 Mn, bal Ni
Vacuum melted brazing material, brazing temperature 2100-2150°F in hydrogen (not vacuum)
For brazing stainless steel honeycombs

GLIDDEN J-8400
M-1728; 19 Cr, 16 5 Ni, 8 Si, 4 W, 0.8 B, bal Co
Vacuum melted brazing material; brazing temperature 2150-2200°F
For brazing L-605, J-1570 and other cobalt base materials.

GLIDDEN J-8600
M-1728, 33 Cr, 4 Si, 24 Pd, bal Ni.
Vacuum melted brazing material; brazing temperature 2140-2170°F.
For joining René 41 and similar superalloys.

GLIDDEN J-8950.
M-1728, 32 Cr, 18 Pd, 4.8 Si, 2 8 Ti, 1.8 Al, bal Ni.
Vacuum melted brazing material; brazing temperature 2125-2175°F.
Braze joint has exceptional high temperature mechanical properties.

GLIDDEN CN-1.
M-1728; 70 Ni, 30 Cu.
Pre-alloyed metal powders; Ni-Cu alloy.
Typical sintered properties; 39,000-44,000 TS; 12 5-17.1 El; 34-38 Rock B.
For parts requiring corrosion resistance

GLIDDEN NF-1.
M-1728; 50 Ni, 50 Fe.
Pre-alloyed metal powders.
Typical sintered properties; 32,000-38,000 TS; 8.4-12 1 El; 26-29 Rock B.
For soft magnetic and electrical applications.

GLIDDEN SF-9.
M-1728; 9 Si, bal Fe.
Pre-alloyed metal powders.
Master alloy for soft magnetic parts.

GLIEVOR BEARING.
Eng.; 74 Zn, 9 Sb, 6 7 Sn, 5 Pb, 4.4 Cu, 1.4 Cd.
For bearings; anti-friction.

GLIEVOR BEARING.
Eng.; 14 Sb, 8 Sn, 77 Pb, 1.5 Fe.
For bearings; anti-friction.

GLIXEY NO. 1.
M-819; Pb, Sb, bal Sn.
For transmission bearings, pump bearings; anti-friction metal.

GLIXEY NO. 2.
M-819; Pb, Sb, bal Sn.
For bearings; antifriction metal.

GLIXEY NO. 2A.
M-819; Pb, Sb, bal Sn.
For bearings; antifriction metal.

GLIXEY NO. 3.
M-819, Pb, Sb, bal Sn.
For bearings; antifriction metal.

GLOBLE DRILL STEEL.
M-57; 1 25 C, 0 10 Cr, 0.30 Mn, bal Fe.
For drills, reamers, cutters; water hardened.

GLUHFEST alloys see JUNKER.

GLX-45W.
M-766; 0.22 C, 1.20 Mn, 0.10 max Si, 0 01-0 04 Cb, bal Fe.
Rolled (min): 60,000 TS; 45,000 YS; 22 El.
For structural parts; weldable.

GLX-50W.
M-766, 0 22 C, 1 2 Mn, 0.10 max Si, 0 01-0 04 Cb, bal Fe
Rolled (min): 65,000 TS; 50,000 YS; 22 El
For structural parts; weldable.

GLX-55W.
M-766; 0.22 C, 1.20 Mn, 0 10 max Si, 0.01-0 04 Cb, bal Fe
Rolled (min.): 70,000 TS; 55,000 YS; 20 El.
For structural parts, weldable.

GLX-60W.
M-766, 0.22 C, 1.20 Mn, 0 10 max Si, 0.01-0 04 Cb, bal Fe.
Rolled (min): 75,000 TS; 60,000 YS; 18 El.
For structural parts; weldable.

GLX-65W.
M-766, 0 22 C, 1.20 Mn, 0.10 max Si, 0.01-0.04 Cb, bal Fe
Rolled (min.) 80,000 TS; 65,000 YS; 16 El.
For structural parts; weldable.

GLYCO.
M-240; 15 Sb, 4.5 Sn, 0.5 As, bal Pb.
For bearings, bushings; anti-friction, Babbitt.

GLYCO METAL.
85.5 Zn, 5 Sn, 4 7 Pb, 0.4 Cu, 2 Al
For bearings, bushings; Babbitt.

GLYCO TURBO.
Eng., 70 Pb, 22 Sb, 8 Sn
For turbine bearings; Babbitt.

GM-O2 DIE.
M-35; 0.90 C, 1.6 Mn, bal Fe.
For dies, punches, crimpers, upsetters; Type O2; oil hardened.

GMOODIE.
M-165; 4 Al, 3.25 Cu, 0.80 Ni, 0.20 Ti, 0.15 Mg, bal Zn.
For dies for sheet forming.

GMR-235.
M-1286, M-1214; 0.15 C, 8-12 Fe, 14-17 Cr, 4.5-6.0 Mo, 2 Ti, 2.5-3.5 Al, 0.1 B, bal Ni.
At 70°F: 147,000 TS; 43 El.
At 1500°F: 90,000 TS, 5 El.
At 1800°F: 21,800 TS; 38 El.
For jet engine components, gas turbine parts; high heat resistant to 1500°F.

GMR236.
M-1286; 0.15 C, 15.5 Cr, 5 Mo, 2.2 Ti, 3.25 Al, 25 Fe, 0.06 B, bal Ni.
For heat resistant parts; corrosion and heat resistant.

GMS 58
Ger.; Zn, bal Cu.
For castings; brass.

GMS 63.
Ger., Zn, bal Cu.
For castings, brass.

GMS 67
Ger., Zn, bal Cu.
For castings; brass.

GOHI IRON
M-191, 0.02 C, 0.25 Cu, 0.025 Mn, 0.003 Si, bal Fe
45,000-50,000 TS; 40-50 El.
For sheet metal construction work, roofing, culverts, pipe, ventilators, skylights, rust resisting.

GOLD-1.
M-1344, 0.86 C, 2.8 Co, 4.3 Cr, 0.85 Mo, 2.1 V, 12 W, bal Fe.
For lathe and planer tools, reamers, drills, taps; high speed steel.

GOLD-2.
M-1344, 1.3 C, 4.3 Cr, 0.85 Mo, 3.8 V, 12 W, bal Fe.
For engravers' tools, milling cutters, taps, reamers, high speed steel.

GOLD, 8 CARAT.
47 Cu, 33 Au, 20 Ag.
For jewelry, corrosion resistant.

GOLD, 10 CARAT.
38-46 Cu, 42 Au, 12-20 Ag.
For jewelry, corrosion resistant.

GOLD, 14 CARAT
12 Cu, 58 Au, 30 Ag.
For dental fillings and crowns; corrosion resistant.

GOLD, 14 CARAT
14-28 Cu, 58 Au, 4-28 Ag.
For jewelry, corrosion resistant.

GOLD, 15 CARAT.
13 Cu, 62 Au, 11 Ag.
For jewelry; corrosion resistant.

GOLD, 16 CARAT.
8-27 Cu, 67 Au, 6.6-26 Ag. For jewelry.

GOLD, 18 CARAT.
15-5 Cu, 75 Au, 10-20 Ag.
For jewelry.

GOLD, 20 CARAT.
6-8.3 Cu, 84 Au, 8.3-11 Ag.
For jewelry.

GOLD, 22 CARAT.
4.2 Cu, 92 Au, 4.2 Ag.
For jewelry.

GOLD, 22 CARAT.
3.4 Cu, 92 Au, 4.9 Ag.
For dental crowns and fillings; corrosion resistant.

GOLDAL.
Eng.; Au alloy.
For gold solder, dental alloy; corrosion resistant.

GOLD ANCHOR.
M-342, M-115, 0.68-0.73 C, 17.5-18.5 W, 3.75-4.25 Cr, 0.95-1.15 V, bal Fe.
For chasers, dies, punches, special tools; high speed steel.

GOLD ANCHOR DRILL ROD.
M-342; 0.68-0.73 C, 17.5-18.5 W, 3.75-4.25 Cr, 0.95-1.15 V, bal Fe.
For twist drills, reamers, punches, small tools; high speed steel

GOLD BRONZE.
U.S., 6.5 Sn, 3 Zn, bal Cu
For jewelry, ornaments; corrosion resistant.

GOLD BUTTONS
England; 33 Zn, 5 Sn, 3 Pb, bal Cu.
For buttons, jewelry; free-cutting

GOLD IMITATION
Eng., 97.8 Cu, 2.0 Al, 0.2 Au.
For gold solder, corrosion resistant

GOLD LABEL.
M-344, M-343; 0.60-0.7 C, 3-4 Cr, 18-20 W, 2-3 Co, 1.25-1.5 V, bal Fe.
For cutting tools, high speed steel, "Hellers Peerless."

GOLD LABEL (H & R.)
M-363, 1.2 C, 2.5 W, bal Fe
For finishing tools, cutters; water or oil hardened

GOLD LEAF.
Eng., 66-80 Cu, 34-20 Zn
For gold lead substitute, signs

GOLD LEAF, AIX
Eng., 64.8 Cu, 32.8 Zn, 2.0 Sn, 0.4 Pb
For gold lead substitute, signs.

GOLD LEAF, JEMMAPES.
Eng., 64.6 Cu, 33.7 Zn, 1.4 Sn, 0.2 Pb
For gold lead substitute, signs

GOLD LEAF METAL
Eng., 84 Cu, 16 Zn
For gold leaf substitute, signs.

GOLD METAL LEAF
Eng.; 84-66 Cu, 16-34 Zn, 0-0.4 Pb
For gold solder; corrosion resistant.

GOLDPUNKT.
M 1331, 0.86 C, 4.1 Cr, 0.85 Mo, 2.5 V, 12 W, bal Fe.
For lathe and planer tools, drills, taps, hobs, high speed steel.

GOLDSMITH GB-02.
M-1108, 2 Ag, 91 Cu, 7 P.
For Silver solder; M.P. 1180-1270°F; self-fluxing.

GOLDSMITH GB-05.
M-1108; 5 Ag, 58 Cu, 37 Zn.
For Silver solder; M.P. 1575-1600°F.

GOLDSMITH GB-06.
M-1108; 6 Ag, 86.5 Cu, 7.5 P.
For Silver solder; M.P. 1175-1350°F, self-fluxing.

GOLDSMITH GB-07.
M-1108; 7 Ag, 85 Cu, 8 Sn.
For Silver solder; M.P. 1450-1565°F.

GOLDSMITH GB09.
M-1108; 9 Ag, 53 Cu, 38 Zn.
Melting range: 1450-1565°F.
Brazing alloy.

GOLDSMITH GB15.
M-1180; 15 Ag, 80 Cu, 5 P.
For brazing; M.P. 1185-1300°F, silver solder.

GOLDSMITH GB20.
M-1108; 20 Ag, 45 Cu, 30 Zn, 5 Cd.
For brazing; M P. 1140-1500°F, silver solder.

GOLDSMITH GB25.
M-1108; 25 Ag, 32½ Cu, 22½ Zn.
Melting range. 1300-1575°F.
Brazing alloy.

GOLDSMITH GB30.
M-1108, 30 Ag, 38 Cu, 32 Zn.
For Silver solder; M.P. 1370-1410°F.

GOLDSMITH GB31.
M-1108, 31½ Ag, 34 Cu, 15½ Zn, 19 Cd.
Melting range: 1165-1390°F.
Brazing alloy.

GOLDSMITH GB35
M-1108, 35 Ag, 26 Cu, 21 Zn, 18 Cd.
For brazing, M.P 1125-1295°F, silver solder

GOLDSMITH GB41
M-1108; 41 Ag, 17 Cu, 18 Zn, 24 Cd.
For brazing, M P 1125-1160°F, silver solder.

GOLDSMITH GB45
M-1108, 45 Ag, 15 Cu, 16 Zn, 24 Cd
For brazing; M P 1125-1145°F, silver solder.

GOLDSMITH GB50
M-1108, 50 Ag, 15 5 Cu, 16 5 Zn, 18 Cd
For brazing, M P. 1160-1175°F, silver solder.

GOLDSMITH GB54.
M-1108, 54 Ag, 40 Cu, 5 Zn, 1 Ni.
Melting range 1375-1575°F
Brazing alloy, AMS 4772.

GOLDSMITH GB56.
M-1108, 56 Ag, 22 Cu, 17 Zn, 5 Sn
For Silver solder, M.P 1152-1203°F.

GOLDSMITH GB57
M-1108, 57 Ag, 33 Cu, 3 Mn, 7 Sn
Melting range: 1120 1345°F
Brazing alloy.

GOLDSMITH GB60
M-1108, 60 Ag, 25 Cu, 15 Zn.
For brazing, M.P 1260-1325°F, silver solder

GOLDSMITH GB65
M-1108; 65 Ag, 20 Cu, 15 Zn
For Silver solder, M P. 1280-1325°F.

GOLDSMITH GB70
M-1108, 70 Ag, 20 Cu, 10 Zn
For Silver solder; M.P. 1335-1390°F.

GOLDSMITH GB72.
M-1108; 72 Ag, 28 Cu.
For Silver solder; M P. 1335-1435°F.

GOLDSMITH GB75.
M-1108, 75 Ag, 0 22 Cu, 3 Zn
For silver solder; M.P. 1365-1490°F.

GOLDSMITH GB80.
M-1108; 80 Ag, 16 Cu, 4 Zn.
For brazing; M.P 1360-1490°F, silver solder.

GOLDSMITH GB85.
M-1108; 85 Ag, 15 Mn.
For Silver solder; M.P. 1760-1778°F.

GOLDSMITH GB95-5.
M-1108; 5 Ag, 95 Cd.
Melting range: 620-750°F.
Solder type alloy.

GOLDSMITH GB110.
M-1108, 10 Ag, 52 Cu, 38 Zn.
For Silver solder; M P. 1450-1565°F.

GOLDSMITH GB120.
M-1108; 20 Ag, 45 Cu, 35 Zn
For Silver solder, M P. 1430-1500°F.

GOLDSMITH GB131.
M-1108; 31.5 Ag, 34 Cu, 15.5 Zn, 19 Cd.
For Silver solder, M.P. 1165-1390°F.

GOLDSMITH GB140.
M-1108, 40 Ag, 18 Cu, 15 Zn, 27 Cd.
For Silver solder, M.P. 1135-1205°F.

GOLDSMITH GB145.
M-1108; 45 Ag, 30 Cu, 25 Zn.
For Silver solder; M P. 1250-1370°F.

GOLDSMITH GB150
M-1108, 50 Ag, 15 Cu, 25 Zn, 10 Cd
For Silver solder; M.P. 1166-1190°F.

GOLDSMITH GB160
M-1108, 60 Ag, 30 Cu, 10 Sn
Melting range 1095-1325°F.
Brazing alloy, AMS 4773.

GOLDSMITH GB165
M-1108, 65 Ag, 28 Cu, 5 Mn, 2 Ni.
Melting range· 1385-1445°F.
Brazing alloy.

GOLDSMITH GB175
M-1108, 75 Ag, 20 Cu, 5 Zn
For Silver solder, M.P. 1350-1425°F.

GOLDSMITH GB240
M-1108, 40 Ag, 30 Cu, 28 Zn, 2 Ni.
For Silver solder, M P 1240-1435°F.

GOLDSMITH GB245
M-1108, 45 Ag, 18 Cu, 21 Zn, 16 Cd.
For Silver solder, M P 1140-1185°F

GOLDSMITH GB250.
M-1108, 50 Ag, 34 Cu, 16 Zn
For brazing, M P 1260-1410°F, silver solder

GOLDSMITH GB260
M-1108, 60 Ag, 27 Cu, 13 In.
Melting range 1125-1310°F
Brazing alloy.

GOLDSMITH GB275
M-1108. 75 Ag, 25 Zn
For Silver solder, M.P 1300-1325°F.

GOLDSMITH GB340
M-1108, 40 Ag, 36 Cu, 24 Zn.
For Silver solder, M P. 1330-1445°F.

GOLDSMITH GB350.
M-1108, 50 Ag, 15.5 Cu, 15 5 Zn, 16 Cd, 3 Ni.
For brazing; M P. 1195-1275°F, silver solder.

GOLDSMITH GB440.
M-1108, 40 Ag, 30½ Cu, 29½ Zn.
Melting range. 1150-1350°F
Brazing alloy.

GOLDSMITH GB540.
M-1108; 40 Ag, 30 Cu, 25 Zn, 5 Ni.
For brazing, M.P. 1260-1550°F, silver solder.

GOLDSMITH GB650.
M-1108; 50 Ag, 28 Cu, 22 Zn.
For Silver solder; M.P. 1250-1340°F.

GOLDSMITH GB1270.
M-1108; 91 Ag, 7 P.
Melting range: 1185-1450°F.
For brazing copper and copper alloys.

GOLD SOLDER.
Eng.; Ag, Au, Cu, Zn.
For gold solder; corrosion resistant.

GOLD SOLDER, 8 CARAT.
40 Au, 37 Ag, 23 Cu.
For gold solder.

GOLD SOLDER 8 KT. CADMIUM NO. 1.
M-926; Au alloy.
For gold soldering; easy running, yellow.

GOLD SOLDER 8 KT. NO. 10.
M-926; Au alloy.
For gold soldering; hard running, yellow.

GOLD SOLDER 8 KT. WHITE NO. 5.
M-926; Au alloy.
For gold soldering; medium running, white.

GOLD SOLDER 9½ KT. CADMIUM NO. 1.
M-926; Au alloy.
For gold soldering; easy running, yellow.

GOLD SOLDER 9½ KT. NO. 10.
M-926; Au alloy.
For gold soldering; hard running, yellow.

GOLD SOLDER 9½ KT. WHITE NO. 5.
M-926; Au alloy.
For gold soldering; medium running, white.

GOLD SOLDER, 10 CARAT.
41 Au, 37 Ag, 21 Cu, 0.6 brass.
For gold solder.

GOLD SOLDER 10 KT. CADMIUM NO. 1.
M-926; Au alloy.
For gold soldering; easy flowing, yellow.

GOLD SOLDER 10 KT. NO. 10.
M-926; Au alloy.
For gold soldering; hard flowing, yellow.

GOLD SOLDER 10 KT. WHITE NO. 5.
M-926; Au alloy.
For gold soldering; medium flowing, white.

GOLD SOLDER, 12 CARAT.
50 Au, 35 Cu, 15 Ag.
For gold solder; corrosion resistant.

GOLD SOLDER, 14 CARAT.
50 Au, 33 Ag, 17 Cu.
For gold solder.

GOLD SOLDER, 16 CARAT.
75 Au, 17 Ag, 8.3 Cu.
For gold solder.

GOLD SOLDER, 18 CARAT.
75-63 Au, 13-31 Ag, 6.3-12 Cu.
For gold solder.

GOLD SOLDER, BEST.
63 Au, 23 Ag, 15 Cu.
For gold solder.

GOLD SOLDER, EASY MELT.
55 Au, 32 Ag, 14 Cu.
For gold solder.

GOLD SOLDER, VERY EASY MELT.
55 Ag, 29 Cu, 12 Au, 5.5 Zn.
For gold solder.

GOLD SPEZIAL.
M-1344; 1.35 C, 2 Co, 4.3 Cr, V, W, bal Fe.
For engravers' tools, milling and form cutters, taps; high speed steel.

GOLD STAR.
M-32; 0.77 C, 13.7 W, 5.0 Co, 3.75 Cr, 2.0 V, bal Fe.
For high speed cutting tools; high speed steel for heavy duty service.

GOLD SUPER.
M-1344; 0.79 C, 4.3 Cr, 0.75 Mo, 1.5 V, 18 W, bal Fe.
For lathe and planer tools, reamers, broaches, taps; high speed steel.

GOLD SUPER KOBALT 10.
M-1344; 0.76 C, 10 Co, 4 2 Cr, 0.8 Mo, 1.8 V, 18 W, bal Fe.
For lathe and planer tools, drills, taps, hobs; high speed steel.

GOLIATH.
M-459; 1.5 C, 11.5 Cr, 0 7 Mo, bal Fe.
For drawing dies; non-deforming.

GOLIATH G.
M-459; C, alloy, bal Fe.
For dies; oil hardened.

GOLIATH GNV.
M-459; 0.55 C, 0.7 Cr, 0.2 Mo, 1.5 Ni, 0.1 V, bal Fe.
For die blocks, gears, mandrels, oil hardened, tough.

GOLIATH SPECIAL M.
M-459; C, alloy, bal Fe
For dies; oil hardened

GOLIATH SPEZIAL.
M-459; 2 2 C, 13 Cr, bal Fe
For drawing dies, oil or air hardened.

GOLIATH SPEZIAL M.
M-459; C, Cr, Ni, Mo, bal Fe
For swaging dies; oil hardened.

GOLIATH V.
M-459; C, alloy, bal Fe.
For dies; oil hardened.

GOMAK 2
France; 3.5-5.0 Al, 2 5-3 5 Cu, 0.02-0 10 Mg. bal Zn.
Die cast: 46,000-53,000 TS; 5-14 El; 80-100 Brin.
For motor frames, gear housings, hardware; similar to Zamak 2.

GOMAK 3
France; 3 5-4 3 Al, 0 03-0 08 Mg, bal Zn.
Die cast· 35,000-43,000 TS, 4-11 El, 60-85 Brin
For gear housings, motor frames, fuel pumps; similar to Zamak 3.

GOMAK 5
France, 3 5-4.3 Al, 0 75-1.25 Cu, 0 03-0.06 Mg, bal Zn.
Die cast: 42,000-50,000 TS; 13-3 El; 70-95 Brin.
For motor frames, gear housings, hardware; similar to Zamak 5

GONG METAL.
Eng; 78 Cu, 22 Zn. For gongs

GORHAM M-40-U12.
M-820; 0.7 C, 4 Cr, Mo, B, Co, bal Fe.
For tools, dies, cutters; high speed steel, abrasion resistant.

GOST-0Ch18N9.
M-Russia; 0 06 C, 18 Cr, 9 Ni, bal Fe.
Annealed: 80,000 TS; 35,000 YS, B 80 Rock.
For tanks, evaporators, agitators, mixers, chemical plant equipment.
Type 304 stainless steel, austenitic.

GOST-0X18H9.
M-Russia; 0.06 C, 19 Cr, 10 Ni, bal Fe.
Annealed: 85,000 TS; 35,000 YS; 150 Brin.

For chemical plant equipment, evaporators, tanks, mixers.
Type 304 stainless steel, austenitic.

GOST-1Ch18N.
M-Russia; 0.05 C, 18 Cr, 12 Ni, 2 Mo, bal Fe.
Annealed: 85,000 TS; 35,000 YS; B 80 Rock.
For chemical plant equipment, acid tanks, evaporators, digesters
Type 316 stainless steel, austenitic, acid resistant.

GOST-1Ch18N9.
M-Russia; 0.10 C, 18 Cr, 9 Ni, bal Fe.
Annealed. 80,000 TS; 35,000 YS; B 80 Rock.
For chemical and pharmaceutical plant equipment, evaporators, trim, molding, digesters.
Type 302 stainless steel, austenitic.

GOST-1Ch18N9T.
M-Russia; 0.06 C, 18 Cr, 10 Ni, 0.3 Ti, bal Fe.
Annealed: 85,000 TS; 35,000 YS; 185 Brin.
For welded structures, and tanks, mixers, evaporators, agitators.
Type 321 stainless steel, austenitic, stabilized, welding grade.

GOST-1X18H.
M-Russia; 0.06 C, 17 Cr, 12 Ni, 2 Mo, bal Fe.
Annealed: 80,000 TS, 30,000 YS, B 80 Rock.
For chemical plant equipment, valve trim, digesters, evaporators.
Type 316 stainless steel, austenitic, corrosion resistant

GOST-1X18H9
M-Russia, 0.12 C, 18 Cr, 9 Ni, bal Fe.
Annealed 90,000 TS; 40,000 YS, B 85 Rock.
For tanks, chemical and pharmaceutical plant equipment, evaporators.
Type 302 stainless steel, austenitic.

GOST-1X18H9T
M-Russia, 0.06 C, 18 Cr, 11 Ni, 0.3 Cb, bal Fe.
Annealed: 85,000 TS, 35,000 YS; 55 Fl; 150 Brin
For welded structures and tanks, mixers, agitators, digesters.
Type 321 stainless steel, stabilized, austenitic, welding grade.

GOST-2Ch13
M-Russia, 0.2 C, 13 Cr, bal Fe
Annealed 95,000 TS, 50,000 YS, B 92 Rock.
For cutlery, surgical instruments, gears, shafts, ball bearings
Type 420 stainless steel, heat treatable.

GOST-2X13
M-Russia; 0.20 C, 12-14 Cr, bal Fe
Annealed 95,000 TS, 50,000 YS; B 92 Rock.
For gears, shafts, cutlery, surgical instruments.
Type 420 stainless steel, hardenable.

GOST-CH17
M-Russia; 0.10 C, 17 Cr, bal Fe
Annealed: 70,000 TS; 40,000 YS; 140 Brin.
For dairy and chemical plant equipment, oil refinery accessories, automobile trim, oil burners, fasteners
Type 430 stainless steel. Non-hardenable.

GOST-Ch18N11B.
M-Russia; 0.06 C, 18 Cr, 12 Ni, 0.6 Cb, bal Fe.
Annealed: 90,000 TS, 35,000 YS; B 85 Rock.
For welded structures and tanks, chemical plant equipment, agitators, mixers, evaporators.
Type 348 stainless steel, austenitic, heat and corrosion resistant.

GOST-Ch18N12M2T
M-Russia; 0.08 C, 18 Cr, 10 Ni, 2 Mo, bal Fe.
For chemical plant equipment, evaporators, agitators, tanks.
Type 18-10 Mo stainless steel. Acid resistant, austenitic.

GOST-Ch20N14S2.
M-Russia; 0.16 C, 24 Cr, 14 Ni, bal Fe.
Annealed: 90,000 TS; 40,000 YS; B 84 Rock.
For salt pots, furnace parts, heat treating fixtures.
Type 309B stainless steel, austenitic, heat and corrosion resistant.

GOST-Ch23N13.
M-Russia; 0.15 C, 23 Cr, 14 Ni, bal Fe.
Annealed: 90,000 TS; 40,000 YS; B 83 Rock.
For heat treating boxes, combustion chambers, salt pots, kilns.
Type 309S stainless steel, heat and corrosion resistant.

GOST-Ch23N18.
M-Russia, 0.20 C, 25 Cr, 21 Ni, bal Fe.
Annealed: 95,000 TS; 45,000 YS; B 90 Rock.
For salt pots, furnace parts, heat treating equipment.
Type 310S stainless steel, heat and corrosion resistant.

GOST-Ch25.
M-Russia; 0.20 C, 25 Cr, bal Fe.
Annealed. 85,000 TS; 50,000 YS; 180 Brin.
For salt pots, furnace parts, heat treating equipment and fixtures.
Type 446 stainless steel, heat and corrosion resistant.

GOST-Ch25N20S2.
M-Russia, 0.20 C, 25 Cr, 20 Ni, bal Fe
Annealed 100,000 TS; 50,000 YS, B 90 Rock.
For furnace parts, salt pots, heat treating fixtures.
Type 314 stainless steel, austenitic, heat and corrosion resistant.

GOST-X17.
M-Russia; 0.10 C, 14-18 Cr, bal Fe.
Cold Rolled 100,000 TS; 70,000 YS, 190 Brin
For automotive trim, hardware, oil burners, fasteners, soot blowers
Type 430 stainless steel, corrosion resistant

GOST-X18H12M2T.
M-Russia, 0.06 C, 17 Cr, 12 Ni, 2 Mo, bal Fe.
Annealed 85,000 TS; 35,000 YS, B 82 Rock
For chemical plant equipment, fixtures, mixers, agitators
Type 18-10 Mo stainless steel, acid resistant, austenitic.

GOST-X18H11S.
M-Russia; 0.06 C, 18 Cr, 12 Ni, 0.8 Cb, bal Fe.
Annealed: 90,000 TS, 40,000 YS; B 82 Rock
For exhaust manifolds, storage containers, welded structures, chemical plant equipment.
Type 347 stainless steel, heat and corrosion resistant, austenitic

GOST-X20H14C2.
M-Russia; 0.15 C, 18 Cr, 10 Ni, 3 Si, bal Fe.
Annealed: 90,000 TS; 40,000 YS, B 85 Rock.
Heat treating fixtures and equipment, furnace parts, tube supports.
Type 302B stainless steel, heat and corrosion resistant.

GOST X23H13
M-Russia; 0.18 C, 23 Cr, 14 Ni, bal Fe.
Annealed. 90,000 TS; 40,000 YS; B 84 Rock.
For heat treating fixtures, furnace parts, salt pots, oil burners.
Type 309S stainless steel, heat and corrosion resistant.

GOST-X23H18.
M-Russia; 0.20 C, 25 Cr, 21 Ni, bal Fe.
Annealed: 95,000 TS; 45,000 YS; B 89 Rock.
For furnace parts and equipment, heat treating boxes and fixtures.
Type 310S stainless steel, heat and corrosion resistant.

GOST-X25.
M-Russia; 0.25 C, 24-30 Cr, bal Fe.
Annealed: 80,000 TS; 48,000 YS; B 85 Rock.
For heat treating boxes, furnace parts, fittings, hardware, valves.
Type 446 stainless steel, heat and corrosion resistant.

GOST-X25H20C2.
M-Russia; 0.20 C, 24 Cr, 20 Ni, bal Fe.
Annealed: 100,000 TS; 50,000 YS; B 90 Rock.
For furnace parts, radiant tubes, heat treating boxes, fixtures.
Type 314 Stainless steel, heat and corrosion resistant.

GOTTINGEN AGG2.
M-1363; 99.5 Al.
Soft: 13,000 TS; 5000 YS; 45 El; 23 Brin.
Hard: 24,000 TS; 22,000 YS; 15 El; 44 Brin
For roofing, culverts, architectural trim, corrosion resistant.

GOTTINGEN AGG3.
M-1363; 1.0-1.5 Mn, 0.3 max Cr, bal Al.
Soft: 16,000 TS; 6000 YS; 40 El.
Hard. 29,000 TS, 27,000 YS; 10 El.
For cooking utensils, heat exchangers, tanks, furniture; good forming and welding properties.

GOTTINGEN AGG4.
M-1363, 1.5-3.0 Mg, 0.5-1.5 Mn, 0.3 max Cr, bal Al.
Soft: 26,000 TS; 10,000 YS, 20 El; 45 Brin.
Hard: 41,000 TS, 36,000 YS, 5 El; 77 Brin.
For roofing, hydraulic tubing, architectural trim, good forming and welding properties.

GOTTINGEN AGG51
M-1363; 0.6-1.4 Mg, 0.6-1.6 Si, 0.3 max Cr, 0.6-1.0 Mn, bal Al.
Annealed: 21,000 TS; 8000 YS; 24 El
For window frames, fan blades, gutters, boats, good formability and weldability.

GOTTINGEN AGG57.
M-1363; 2-4 Mg, 0.4 max Mn, 0.3 max Cr, bal Al.
Soft. 28,000 TS, 13,000 YS; 30 El; 47 Brin
Hard: 40,000 TS, 35,000 YS, 10 El; 73 Brin.
For aircraft tanks and fittings, fuel lines, marine parts, resists sea water corrosion

GOVERNMENT BRONZE
M-102; 86-89 Cu, 7.5-11 Sn, 1.5-4.5 Zn, 0.75 Ni, 0.3 Pb.
35,000 TS; 17,000 YS; 14-16 El.
For valves, gears, fittings, steam valves; composition "G."

GOVERNMENT BRONZE (SCOVILL NO. 99 ALLOY). 510.
M-102; 95 Cu, 5 Sn.
Soft: 50,000 TS; 22,000 YS; 58 El.
Hard: 95,000 TS; 94,000 YS; 5 El.
For springs, switches; Rockwell "B"-32-93

GOVERNMENT BRONZE-H.
U.S.; 82-84 Cu, 12.5-14.5 Sn, 4.5-2.5 Zn, 0.8-1.0 Pb, 0.1 Fe.
For journals, bushings, bearings; high strength.

GOVERNMENT BRONZE SUBSTITUTE.
90 Cu, 6.5 Sn, 3 Zn, 0.5 Pb.
For structural and marine fittings; corrosion resistant.

GRAC.
M-821; 10 Sn, Sb, As, Cd, Ni, graphite, bal Pb. 27 Brin.
For bearings; M.P. 453-576°F.

GRACITE.
M-1009; 0.9 C, 1.25 Mn, 0.5 Cr, 0.5 W, bal Fe.
For punches, forming and beading dies, upsetters; oil hardened, non-deforming.

GRADE "A" (Grade 1).
M-822; 0.95 C, 0.3 Mn, 0.2 Si, bal Fe.
Water hardening tool steel, AISI W1.

GRADE S.
M-788; C, Ni, bal Fe.
For sucker rods in oil wells, resists H_2S in water.

GRADE X.
M-85; 1.2 C, bal Fe.
For drills, taps, cutters; drill rod, water hardening; obsolete.

GRAINAL NO 79.
M-394; 20 Ti, 13 Al, 4 Zr, 8 Mn, 5 max Si, bal Fe
Used in steel manufacturing; increases hardenability.

GRAINLOY.
M-136; 3 C, 1.3 Si, Mn, bal Fe.
For rolls; cast iron.

GRALUR
M-358, C, bal Fe
For drills

GRAMIX.
M-245, Cu-Sn-graphite.
For light machine bearings, bushings, finely powdered mixture, self-lubricating

GRANADA TOOL
M-38, 1.0 C, bal Fe
For mining sledges, tools, dies; water hardened

GRANADA VANADIUM.
M-38, 1 C, 0.3 Mn, 0.2 V, bal Fe
For blacksmith tools, shears, punches, forming dies, water hardening.

GRANALEC.
M-633, Si, bal Fe
For laminations; high magnetic permeability.

GRANATOR
M-633, Si, bal Fe.
For laminations; high magnetic permeability

GRANATURE.
M-633, Si, bal Fe.
For laminations; high magnetic permeability

GRANDIOS
M-1314, 0.8 C, 4.7 Co, 4.3 Cr, 0.7 Mo, 1.5 V, 18 W, bal Fe
For lathe and planer tools, taps, reamers, drills, high speed steel.

GRANDIOS 3VN
M-1314, 0.86 C, 2.8 C, 4.3 Cr, 0.8 Mo, 2 V, 12 W, bal Fe.
For lathe and planer tools, drills, hobs, reamers; high speed steel.

GRANDIOS 5V.
M-1314; 1.35 C, 2 Co, 4.3 Cr, 2 V, 12 W, bal Fe.
For lathe tools, form cutters, broaches; high speed steel.

GRANDIOS 5VN.
M-1314; 0.80 C, Co, 4.3 Cr, Mo, V, W, bal Fe.
For lathe and planer tools, broaches; high speed steel.

GRANDIOS EXTRA.
M-1314; 0.76 C, 10 Co, 4.2 Cr, 0.8 Mo, 1.8 V, 18 W, bal Fe.
For lathe and planer tools, milling cutters; high speed steel.

GRANE 1.
M-111; 0.55 C, 1 Cr, 3 Ni, 0.3 Mo, bal Fe.
For drop forging dies; tough.

GRANE 2.
M-111, 0.55 C, 1.5 Cr, 3 Ni, bal Fe.
For drop forging dies; tough.

GRANFIN CAST IRON
Eng ; 2.2-2.6 C, 1.7-2.1 graphite; 2.3-2.5 Si, 0.7-1.0 Mn, bal Fe
For frames, housings, general castings; cast iron.

GRANFORMER.
M-633, Si, bal Fe.
For laminations, high magnetic permeability.

GRANFORMER 52
M-633, 4.7 Si, bal Fe
For transformers, high permeability

GRANFORMER 58
M-633; 4.0-4.4 Si, bal Fe
For transformers, high permeability.

GRANFORMER 65
M-633, 4.0-4.5 Si, bal Fe
For rtansformers, low core loss

GRANFORMER 72
M-633, 3.0-3.4 Si, bal Fe.
For transformers for radios, high permeability

GRANIMO
M-633, Si, bal Fe
For laminations, high magnetic permeability.

GRANISIL
M-633, Si, bal Fe
For laminations, high magnetic permeability

GRANIT
M-1318, 2.1 C, 11.5 Cr, bal Fe.
For blanking and forming dies, oil hardening, nondeforming

GRANIT 0
M-1319, 0.55 C, 0.70 Cr, 0.18 Mo,, 1.65 Ni, 0.1 V, bal Fe
For gears, pinions, shafts, crankshafts, oil hardened, shock resistant.

GRANIT 1
M-1319, 0.10 C, 0.37 Mn, bal Fe.
For plastic mold dies, hubbable, case hardening

GRANIT 2
M-1319; 1.65 C, 0.35 Si, 11.5 Cr, 0.10 V, bal Fe.
For blanking and forming dies; air hardening, nondeforming.

GRANIT 3.
M-1319; 0.56 C, Ni, Cr, Mo, bal Fe
For gears, crankshafts; oil hardened, shock resistant.

GRANIT IV.
M-1319; 0.40 C, 13 Cr, bal Fe.
Annealed 90,000 TS, 45,000 YS; 40 El, 50 RA; 190 Brin.
For cutlery, surgical instruments; corrosion resistant; Type 420.

GRANIT V.
M-1319; 0.20 C, 1.25 Mn, 1.15 Cr, bal Fe.
For bearings, liners; case hardening steel, water or oil hardening.

GRANIT 30.
M-1319, 1.05 C, 0.9 Mn, 1 Cr, 1.15 W, bal Fe.
For cold work tools, dies, bearings, water hardened.

GRANIT Co.
M-1318, 0.65 C, Cr, Co, bal Fe.
For tools, dies, oil hardening.

GRANITE CITY HIGH-YIELD NO. 1.
M-633; C, 0.7-0.9 Mn, 0.01 max P, 0.035 S, 0.15-0.20 Si, 0.20 min Cu, 0.15 min Cr, bal Fe.
Annealed. 70,000 TS, 55,000 YS, 25 El.
For transportation equipment, cars, buses, trucks; corrosion resistant.

GRANITE CITY HIGH-YIELD NO 2
M-633; C, 1.2-1.6 Mn, 0.01 max P, 0.035 S, 0.15-0.20 Si, 0.2 min Cu, 0.15 min Cr, bal Fe.
Annealed: 85,000 TS, 70,000 YS, 18 El.
For bridges, transportation equipment, cars, buses, trucks, corrosion resistant.

GRANIT W.
M-1318; 2.1 C, 11.5 Cr, 0.7 W, bal Fe.
For thread rolling dies, blanking and forming dies; oil hardened, non-deforming.

GRANT.
M-1705, 0.45 C, 0.55 Mn, 0.2 Si, 0.95 Cr, 0.20 V, bal Fe
Tool steel for miscellaneous applications as hammers, hatchets. AISI L2.

GRAPH-AIR.
M-376, M-341, 1.35 C, 1.85 Mn, 1.20 Si, 1.85 Ni, 1.50 Mo, bal Fe
Air hardening tool steel, minimal distortion

GRAPHALLOY BABBITT
M-247, graphite impregnated with Pb-base Babbitt.
Sintered: 5000 TS
For self-lubricating bearings, seal rings, contacts, shoes, C.S 19000.

GRAPHALLOY BRONZE
M-247, graphite impregnated with bronze
Sintered 5500 TS
For self-lubricating bearings, seal rings, contact shoes, C S. 24000

GRAPHALLOY CADMIUM.
M-247; graphite impregnated with Cd.
Sintered 5000 TS
For bearings, contacts for controllers, switches, seal rings, maximum temperature 250°F; self lubricating.

GRAPHALLOY COPPER
M-247, graphite impregnated with Cu.
Sintered 6000 TS.
For slip ring brushes, contacts on controllers, relays, bearings; self lubricating, maximum temperature 700°F; C.S. 25000

GRAPHALLOY GRADE A.
M-247; 55 graphite, bal Pb Babbitt.
For bearings of light service; Babbitt soft grade.

GRAPHALLOY GRADE N.
M-247; 55 graphite, bal Pb Babbitt.
For bearings of medium service; Babbitt medium grade.

GRAPHALLOY GRADE O.
M-247; 55 graphite, bal Pb Babbitt.
For bearings; Babbitt hard grade.

GRAPHALLOY GRADE S
M-247; 55 graphite, bal Pb Babbitt.
For bearings; medium hardness.

GRAPHALLOY IRON.
M-247; graphite impregnated with Fe.
Sintered: 6000 TS.
For self-lubricating bearings, submerged bearings; C.S. 25000.

GRAPHALLOY SILVER
M-247; graphite impregnated with Ag.
Sintered: 5500 TS.
For contacts on relays, circuit breakers, bearings, brushes, maximum temperature 700°F; self lubricating; C.S. 24000.

GRAPHEX.
M-824; 87-92 Cu, 9-11 Sn, 4 graphite.
13,000 TS; 11,000 YS; 1 El; 30 Brin.
For bearings, bushings; self lubricating.

GRAPHIDOX NO. 4.
M-394; 10 Ti, 48 Si, 6 Ca, bal Fe
Used in iron manufacturing, for graphitization, reduces chill.

GRAPHITE METAL-1.
Eng ; 80 Pb, 20 Sb
For crucibles, lubricants, lead pencils

GRAPHITE METAL-2
Eng ; 68 Pb, 17 Sb, 15 Sn.
For foundry facings, electric brush carbons.

GRAPHITE NITRALLOY.
M-24, M-386; 1.25-1 5 C, 1.25-1 5 Si, 0.4-0.6 Mn, 1-1.5 Al, 0.2-0.4 Cr, 0 3 Mo, bal Fe
Heat treated: 85,000 TS; 70,000 YS; 19 El, 24 RA
For wear resistant parts; wear resistant after nitriding

GRAPH-Mo.
M-376, M-341; 1.5 C, 0.25 Mo, 0 8 Si, 0.4 Mn, bal Fe.
Annealed· 85,000 TS; 50,000 YS, 25 El; 40 RA, 197 Brin
Heat treated: 218,000 TS, 170,000 YS; 9 El; 14 RA; 388 Brin.
For plug and ring gauge dies, taps, spindles, rolls; wear and abrasion resistant graphitic steel, non-seizing.

GRAPHO BABBITT METAL NO 1.
M-300, graphite and Babbitt.
19 Brin
For Babbitt, graphite bearings, transmission and railroad axle bearings, engine bearings; low bearing temperature, reduced friction losses

GRAPHO BABBITT METAL NO. 2.
M-300; 0.3 graphite, Sn, Pb, Sb
26 Brin.
For bearings for electrica motors, blowers, high speed transmissions; high velocity and high pressures.

GRAPHO BABBITT METAL NO. 3
M-300; 0.3 graphite, Sn, Pb, Sb.
29 Brin.
For bearings for crankshafts in internal combustion engines, mining machinery, machine tools, reciprocating pumps; high pressure and high velocity with alternating load.

GRAPHO BABBITT METAL NO. 4.
M-300; 0.4 graphite, Sn, Pb, Sb.
34 Brin.
For bearings for diesel engines, heavy duty compressors; heavy duty; all kinds of shocks and velocities.

GRAPH-TUNG.
M-376; 1.5 C, 0.5 Mn, 0.65 Si, 0.5 Mo, 2.8 W, bal Fe.
For blanking and drawing dies, coining dies, shear blades; abrasion resistant graphitic steel, non-seizing.

GRAY CUT COBALT.
M-115; 0 8 C, 1.6 V, 20.5 W, 4.25 Cr, 12.25 Co, 0.6 Mo, bal Fe.
For cutting tools, shapers, planers; high speed steel.

GRAYDAC.
M-712; 0.08 C, 0.31 Mn, 0 29 Si, bal Fe.
Welded: 64,000-72,000 TS; 55,000-62,000 YS; 26-19 El; 45-30 RA.
For welding electrodes; low spatter; E-6013.

GRAY DEVIL
M-712, 0 09 C, bal Fe.
Welded 77,000 TS; 65,000 YS, 19 El, 30 RA.
For welding rods for steel, E-6012

GRAY GOLD.
Eng , 86 Au, 5 7-17 0 Fe, 0-8 6 Ag
For jewelry, corrosion resistant

GRAY LABEL
M-341, 0 95 C, bal Fe
For cold heading dies, water hardening

GRAY LABEL STYRIAN
M-651, 0 88 C, 0 19 Mn, bal Fe
For tools, drills, taps; water hardening

GREAT WESTERN GW.
M-1067, 0 85 C, 1 Mn, 0 35 Si, 0 5 Cr, 0 5 W, bal Fe
For milling cutters, drills, dies, punches, mandrels; oil hardened, non deforming

GREEK ASCOLOY
M-57, 0 12 max C, 12 14 Cr, 1 8-2 2 Ni, 2.5-3 5 W, 0 5 max Mo, 0 5 max Cu, bal Fe.
Heat treated 137,000-195,000 TS, 108,000-160,000 YS, 23-14 El; 63-51 RA, 290-400 Brin.
For compressor blades and vanes, fasteners, jet engine components, heat resistant to 1000°F.

GREEN GOLD.
Eng , 75 Au, 11-25 Ag, 13-0 Cd
For jewelry, corrosion resistant.

GREEN LABEL.
M-343, 0 8-1 1 C, bal Fe
For tools depending on temper, "Hellers Extra Tool"

GREEN LABEL.
M-343, 0.8-0 9 C, 1 2-1.4 Mn, 0.4-0.6 W, 0 4-0 6 Cr, bal Fe
For precision tools and files, taps, reamers, chasters, gages, non-deforming; "Stayput" Oil Hardening

GREEN LABEL.
M-261, 0 7-1.2 C, bal Fe.
For tools, dies, shear blades, punches, taps; shock resistant

GREEN LABEL.
M-373, 0.7-1 4 C, bal Fe.
For tools, drills, cutters; water hardening.

GREEN LABEL.
M-341, 0.5 C, 1.0 Cr, 0.75 Mn, 0.18 V, bal Fe.
For gears, crankshafts, springs; oil hardening; shock resisting.

GREEN LABEL.
M-365; 0.7-0.8 C, bal Fe.
For tools.

GREEN LABEL.
M-694; 0.9 C, 1.15 Mn, 0.5 Cr, 0.5 W, 0.2 V, bal Fe.
For tools, dies, punches; nondeforming, oil hardening.

GREEN LABEL DRILL ROD.
M-32; 1.2 C, 0.2 Mn, 0.2 Si, bal Fe.
AISI Type W1 water hardening tool steel.

GREEN LABEL EXTRA.
M-343; 0.8-1.1 C, bal Fe.
For tools, dies; water hardening.

GREENLEAF S-6.
M-1194; WC + Co.
For tipped cutting tools; cemented carbides.

GRIDALOY M.
M-1523; 94 Ni, 5 Mn.
Resistance wire: 105 ohms per cir. mil. ft.
Wire ann: 50,000 psi.; hard drawn: 140,000 psi.
For electrical resistors; max.op.temp.: 500°C.

GRIDALOY P.
M-1523; 98 Ni, plus additives.
Resistance wire: 100 ohms per cir. mil. ft.
Wire ann: 90,000 psi; hard drawn 140,000 psi.
For electrical resistors; max.op.temp.: 500°C.

GRIDNIC E.
M-44; 4.5 Mn, bal Ni.
For radio sets and tube parts, heat resistant.

GRIDNIC T.
M-44; 0.4 max C, 0.2-0.6 Mn, 0.2-0.5 Mg, bal Ni.
For grid wire, heat resistant.

GRIDUR C25.
M-380; 2.6 C, 27.0 Cr, bal Fe.
Weld: Rock C 50-52.
For worm conveyors, guide bars, slides, drawing dies
Hard facing electrode. Wear and corrosion resistant

GRIDUR C35
M-380, 3.5 C, 1.0 Si, 35.0 Cr, bal Fe.
Weld: Rock C 60-62.
For machine parts and tools subject to abrasion by sand, gravel, coal, cement. Corrosion and wear resistant. Hard facing electrode.

GRIDUR G5.
M-380; Granular WC in steel tubes
For tools and machine parts, rotary borers, rock drills, dredger teeth
Hard facing electrode. Wear resistant.

GRIDUR G10.
M-380, Granular WC in steel tubes.
For tools and machine parts, rotary borers, rock drills, dredger teeth.
Hard facing electrode Wear resistant

GRIDUR G15.
M-380; Granular WC in steel tubes
For tool and machine parts, rotary borers, rock drills, dredger teeth, cushing jaws.
Hard facing electrode. Wear resistant.

GRIDUR K40.
M-380; 1.2 C, 1.5 Si, 65.0 Co, 27.0 Cr, 5.5 W, bal Fe.
Weld: Rock C 40-45.
For steam valves, exhaust valves, bearings, trimming dies.
Hard facing electrode. Corrosion, heat and wear resistant.

GRIDUR K50.
M-380; 2.2 C, 55.0 Co, 27.0 Cr, 14.0 W, bal Fe.
Weld: Rock C 50-54.
For steam valves, exhaust valves, bearings, trimming dies.
Corrosion, heat and wear resistant. Hard facing electrode.

GRIDUR K60.
M-380; 2.7 C, 53.0 Co, 25.0 Cr, 19.0 W, bal Fe.
Weld: Rock C 56-60.
For needle valves, impeller parts.
Hard facing electrode. Wear and corrosion resistant.

GRIDUR SA1.
M-380; 1.0 C, 4.2 Cr, 2.8 Mo, 2.5 V, 3.0 W, bal Fe.
Weld: Rock C 48.
For hot working tools, air cooling systems.
Hard facing electrode. High speed steel.

GRIDUR SA2.
M-380; 0.85 C, 4.2 Cr, 1.2 V, 18 W, bal Fe.
Weld: Rock C 58-62.
For tough and impact resistant cutting tools.
Hard facing electrode. High speed steel.

GRIDUR SA3.
M-380; 1.0 C, 4.2 Cr, 9.0 Mo, 1.2 V, 1.8 W, bal Fe.
Weld: Rock C 58-62.
For turning tools, milling cutters, reamers, drills, hot shear blades.
Hard facing electrode. High speed steel.

GRIDUR SA4.
M-380; 1.5 C, 8.0 Co, 4.5 Cr, 6.0 Mo, 3.2 V, 8.0 W, bal Fe.
Weld Rock C 62-65
For cutting tools with highest wear resistance and hardness at elevated temperatures.
Hard facing electrode. High speed steel

GRIDUR-SCS.
M-380; 2.0 C, 0.3 Si, 0.3 Mn, 12.0 Cr, 0.8 W, bal Fe.
Weld: 450 Brin
For welding cutting and blanking dies, punches, shears, broaches, drawing tools.
Hard facing electrode.

GRIDUR SCS-E.
M-380, 2.0 C, 12 Cr, bal Fe.
Weld: Rock C 63-65.
For hard facing cutting and blanking dies, punches, shears, broaches.
Hard facing electrode.

GRIDUR WA1.
M-380, 0.5 C, 2.3 Cr, 0.8 Mo, 1.7 Ni, 0.1 V, bal Fe
Weld: 300-400 Brin.
For welding on tools requiring high toughness and impact resistance, die blocks, upsetters, piercers to 450°C.
Hard facing electrode. Hot work steel.

GRIDUR WA2.
M-380; 0.3 C, 2.3 Cr, 0.5 Mo, 0.6 V, 4.5 W, bal Fe.
Weld: Rock C 45.
For welding on hot working tools, forging dies, mandrels, punches, bushings.
Hard facing electrode. Hot work steel.

GRIDUR WA3.
M-380; 0.3 C, 2.3 Co, 2.7 Cr, 0.4 V, 9.0 W, bal Fe.
Weld: Rock C 48.
For hot working tools, air cooling systems.
Hard facing electrode. Hot work steel.

GRIESHEIM-EA2.
M-380; 0.5 C, 0.4 Si, 5.0 Mn, bal Fe.
Weld: 500 Brin.
For welding skid rails, crusher jaws, baffle plates, dredger parts.
Hard facing electrode.

GRIESHEIM-EA3.
M-380; 0.45 C, 0.45 Si, 0.4 Mn, 5.8 Cr, bal Fe.
Weld: 600 Brin.
For welding crushing jaws, dies, cams, worms, breakers, chain wheels.
Hard facing electrode.

GRIESHEIM-EA600.
M-380; 0.5 C, 2.4 Si, 0.4 Mn, 9.0 Cr, bal Fe.
Welded: 560-600 Brin.
For welding crushing jaws, dies, cams, worms, breakers, chain wheels.
Hard facing electrode.

GRIESHEIM-EA600W.
M-380; 0.5 C, 0.5 Mn, 2.5 Si, 8.0 Cr, bal Fe.
Weld: 560 Brin.
For welding crusher jaws, dies, breakers, cams, worms, chain wheels.
Hard facing electrode.

GRIESHEIM EA-Braun.
M-380, 0.22 C, 1.2 Si, 0.8 Mn, bal Fe.
Weld: 250 Brin.
For welding for rails, switch tongues, wheel tires, worms, axes, cams.
Welding electrode, hard surfacing.

GRIESHEIM-EA-Violet.
M-380; 0.3 C, 1.2 Si, 1.2 Mn, 1.0 Cr, bal Fe.
Weld: 350 Brin.
For welding rails, switch tongues, wheel tires, worms, axes, shafts, cams
Welding electrode, hard facing.

GRIESHEIM Nima.
M-380; 0.7 C, 0.6 Si, 13 Mn, 3.5 Ni, bal Fe.
Weld: 200 Brin.
For welding crusher jaws, mill beaters, dredger teeth, rolling mill parts.
Hard facing electrode. Austenitic Work hardens to 450 Brinell.

GRIESHEIM "RAUCHLOS"
M-380; 0.2 C, bal Fe.
For welding rods.

GRIESHEIM "SINI."
M-380; Alloy, bal Cu.
For welding rods for copper welding.

GRIESHEIM Stama.
M-380; 1.0 C, 0.4 Si, 13 Mn, bal Fe.
Weld: 200 Brin.
For welding mill beaters, crushing jaws, dredger teeth, rolling mill parts.
Austenitic hard facing electrode. Work hardens to 450 Brinell.

GRIFFIN.
M-350, C, Cr, Mn, bal Fe.
For dies, punches, thread rolling tools, non-deforming.

GRILLO 2105.
M-1134, 5 Al, 1 Cu, 0.02 Ga, bal Zn.
For die castings.

GRILLO 31010.
M-1134; 10 Al, 1 Cu, 0.02 Ga, bal Zn.
For castings.

GRIMM 4S4-ZH.
M-1316; 0.85 C, 0.25 max Si, 0.25 max Mn, bal Fe.
Heat treated: 190,000 TS; 150,000 YS; 10 El; 30 RA; 390 Brin.
For springs, taps, drills, hobs, reamers; Type W1; water hardened.

GRIMM BRF.
M-1316; 0.20 C, 13 Cr, 0.3 Mn, bal Fe.
Annealed: 95,000 TS; 50,000 YS; 25 El; 55 RA; 196 Brin.
For turbine blades, valves, cutlery, surgical instruments; Type 420; stainless.

GRIMM CWL.
M-1316; 2.1 C, 11.5 Cr, 0.70 W, 0.30 Mn, bal Fe.
For blanking and forming dies, punches; oil hardened, non deforming.

GRIMM DSA.
M-1316; 0.38 C, Cr, V, Si, bal Fe.
For gears, bolts, machine tool parts; oil hardened, tough.

GRIMM DSW.
M-1316; 0.45 C, W, Cr, V, bal Fe.
For header dies, upsetters, crimpers; oil hardened.

GRIMM G4.
M-1316; 0.75 C, 0.25-0.50 Si, 0.3-0.8 Mn, bal Fe.
Heat treated: 185,000 TS; 140,000 YS; 15 El; 40 RA; 375 Brin.
For rails, springs, tools, axes, hammers; water hardened.

GRIMM GC15.
M-1316; 1.05 C, 1.0 Cr, bal Fe.
For bearings, liners, bushings, water hardened, wear and abrasion resistant.

GRIMM GC120
M-1316, 2.1 C, 11.5 Cr, 0.3 Mn, bal Fe
For blanking and forming dies, oil hardened, non-deforming

GRIMM GCK
M-1316, 1.45 C, 1.4 Cr, 0.6 Mn, bal Fe.
For bearings, bushings, liners; water hardened, wear resistant

GRIMM GCM
M-1316, 0.90 C, 1.9 Mn, 0.1 V, bal Fe.
For punches, dies, shears, crimpers; oil hardened, non-deforming

GRIMM GCS
M-1316; 0.90 C, Cr, Si, bal Fe.
For bearings, bushings, liners, water hardened, wear resistant.

GRIMM GCZ
M-1316, 0.90 C, 0.80 Cr, 0.3 Mn, 0.25 Si, bal Fe.
For bearings, cutters, liners, bushings, water hardened, wear resistant.

GRIMM GEE.
M-1316, 0.15 C, 0.25-0.50 Si, 0.30-0.80 Mn, bal Fe
Annealed: 70,000 TS, 40,000 YS; 25 El, 60 RA, 145 Brin
For gears, bolts, machine tool parts; case hardening steel.

GRIMM GH4.
M-1316; 0.75 C, 0.25-0.50 Si, 0.30-0.80 Mn, bal Fe
Heat treated 180,000 TS, 132,000 YS; 10 El; 34 RA, 375 Brin
For springs, rails, hammers, tools, cutters, Type W1; water hardened.

GRIMM GH5.
M-1316; 0.60 C, 0.25-0.50 Si, 0.30-0.80 Mn, bal Fe.
Heat treated. 160,000 TS, 113,000 YS; 12 El; 40 RA, 325 Brin.
For gears, springs, fasteners; water hardened

GRIMM GHM.
M-1316, 0.56 C, Ni, Cr, Mo, V, bal Fe.
For gears, bolts, crankshafts; oil hardened, shock resistant.

GRIMM GK3.
M-1316 0.86 C, 2.8 Co, 4.3 Cr, 0.85 Mo, 2.1 V, 12 W, bal Fe.
For lathe and planer tools, reamers, broaches; high speed steel.

GRIMM GK5.
M-1316; 0.79 C, 4.75 Co, 4.3 Cr, 0.75 Mo, 1.55 V, 18 W, bal Fe.
For lathe and planer tools, reamers; high speed steel.

GRIMM GK10.
M-1316; 0.76 C, 10 Co, 4.2 Cr, 0.8 Mo, 1.8 V, 18 W, bal Fe.
For lathe and planer tools, reamers, milling cutters; high speed steel.

GRIMM GKS.
M-1316; 1.0 C, 0.1 V, 0.25 Si, 0.25 Mn, bal Fe.
For drills, taps, reamers, broaches; Type W2; water hardened.

GRIMM GLS
M-1316; 0.55 C, W, Cr, V, bal Fe.
For upsetters, shears, punches; oil hardened, tough

GRIMM GM.
M-1316; 0.55 C, 0.70 Cr, 0.18 Mo, 1.65 Ni, 0.1 V, bal Fe.
For gears, bolts, crankshafts; oil hardened, shock resistant

GRIMM GME.
M-1316, 0.40 C, Cr, Mo, Mn, bal Fe.
For gears, bolts, machine tool parts; oil hardened, tough.

GRIMM GR
M-1316, 0.50 C, 1.05 Cr, 0.95 Mn, 0.1 V, bal Fe.
For springs, bolts, gears, studs, oil hardened, shock resistant.

GRIMM GSM
M-1316, 0.53 C, 0.90 Si, 0.90 Mn, bal Fe
For springs, bolts, crankshafts; water or oil hardened

GRIMM GWP
M-1316, 0.50 C, 1.05 Cr, 3.25 Ni, bal Fe
For gears, pinions, countershafts, axles, oil hardened, shock resistant

GRIMM GWV112B
M-1316, 0.74 C, 4.1 Cr, 1.1 V, 18.5 W, bal Fe
For lathe and planer tools, reamers, drills, taps, high speed steel.

GRIMM GWV122 SPEZIAL.
M-1316, 0.82 C, 4 Cr, 0.8 Mo, 1.6 V, 8.7 W, bal Fe
For lathe and planer tools, reamers, broaches, high speed steel

GRIMM GWV132 RAPID
M-1316, 0.86 C, 0.4 Cr, 0.8 Mo, 2.5 V, 12 W, bal Fe
For lathe and planer tools, reamers, broaches, high speed steel.

GRIMM GWV145 RECORD.
M-1316; 1.3 C, 4.3 Cr, 0.8 Mo, 3.8 V, 12 W, bal Fe
For form cutters, broaches, reamers; high speed steel.

GRIMM HPM.
M-1316, 0.30 C, 2 Co, 2.4 Cr, 0.25 V, 8.5 W, bal Fe.
For extrusion press dies, rams and liners; oil hardened, tough.

GRIMM HWP
M-1316; 0.30 C, 2.65 Cr, 0.35 V, 8.5 W, bal Fe.
For extrusion press liners and rams, punches, shears; oil hardened, tough.

GRIMM KSA.
M-1316; 0.45 C, Si, Cr, V, bal Fe.
For dies, bolts, crankshafts, gears, shears; oil hardened, tough.

GRIMM NS12.
M-1316; 0.34 C, 1.1 Al, 1.4 Cr, bal Fe.
For oil refinery equipment; creep resistant.

GRIMM NS13.
M-1316; 0.32 C, 1.1 Al, 1.1 Cr, 0.18 Mo, bal Fe.
For oil refinery equipment; creep resistant.

GRIMM NS15.
M-1316; 0.27 C, 1.1 Al, 1.4 Cr, bal Fe
For oil refinery equipment; creep resistant.

GRIMM NS23.
M-1316; 0.33 C, 1.1 Al, 1.7 Cr, 1.0 Ni, bal Fe.
For oil refinery equipment; creep resistant.

GRIMM NS48.
M-1316; 0.30 C, 1.1 Cr, 0.2 V, bal Fe.
For gears, pinions, bolts, fasteners; oil hardened, shock resistant.

GRIMM NS54
M-1316; 0.31 C, 2.5 Cr, 0.18 Mo, 0.13 V, bal Fe
For gears, pinions, bolts, fasteners, shafts, oil hardened, shock resistant.

GRIMM RSA.
M-1316, 1.42 C, W, V, bal Fe.
For forming and heading dies, oil or water hardened.

GRIMM'S ALUMINUM SOLDER-1.
Eng., 69.1 Sn, 28.8 Pb, 1.44 Zn, 0.72 Ag.
For aluminum solder

GRIMM'S ALUMINUM SOLDER-2.
Eng.; 50 Sn, 25 Pb, 25 Zn
For aluminum solder

GRIMM SB.
M-1316; 1.05 C, 1.0 Cr, 1.15 W, 0.90 Mn, bal Fe.
For forming and blanking dies, punches; oil hardened, tough

GRIMM SE
M-1316, 0.20 C, 1.25 Mn, 1.15 Cr, bal Fe
For gears, bolts, camshafts, cams, case hardened

GRIMM SH4-ZH
M-1316, 0.75 C, 0.4 Si, 0.6 Mn, bal Fe.
Heat treated 180,000 TS; 130,000 YS, 10 El, 35 RA, 360 Brin.
For springs, rails, clutch discs, Type W1, water hardened

GRIMM SH5-ZAH
M-1316, 0.60 C, 0.4 Si, 0.6 Mn, bal Fe
Heat treated 160,000 TS, 114,000 YS, 12 El, 40 RA, 325 Brin
For wheels, die blocks, rails, axles, bolts, water hardened.

GRIMM SH6-ZW.
M-1316; 0.45 C, 0.4 Si, 0.6 Mn, bal Fe
Hot rolled: 98,000 TS; 58,000 YS, 24 El; 45 RA, 212 Brin.
For axles, gears, bolts, bushings, water hardened.

GRIMM SSA.
M-1316; 0.95 C, W, Mo, bal Fe.
For tools, dies, cutters; oil hardened.

GRIMM SSCV
M-1316, 1.35 C, W, Co, bal Fe.
For engravers tools, blanking dies; oil hardened, wear resistant.

GRIMM WAS.
M-1316; 0.55 C, 0.10-0.40 Si, 0.50-0.70 Mn, bal Fe.
Heat treated: 155,000 TS; 110,000 YS, 14 El; 42 RA; 315 Brin.
For axles, tie rods, bushings, bolts, shafts; water hardened.

GRIMM WE2 HARD.
M-1316; 1.3 C, 0.25 max Si, 0.25 max Mn, bal Fe.
For engravers tools, reamers, blanking dies; Type W1; water hardened.

GRIMM WE3-MH.
M-1316; 1.0 C, 0.25 max Si, 0.25 max Mn, bal Fe.
Heat treated: 200,000 TS; 125,000 YS; 8 El; 27 RA; 400 Brin.
For springs, taps, reamers, drills, cutters; Type W1; water hardened.

GRIMM WE4-ZH.
M-1316; 0.85 C, 0.25 max Si, 0.25 max Mn, bal Fe.
Heat treated: 190,000 TS; 140,000 YS; 10 El; 30 RA; 390 Brin.
For springs, taps, drills, hobs, reamers; Type W1; water hardened.

GRIMM WE5-ZAH.
M-1316; 0.70 C, 0.25 max Si, 0.25 max Mn, bal Fe.
Heat treated: 174,000 TS; 128,000 YS; 12 El; 37 RA; 350 Brin.
For springs, clutch disks, rails; Type W1; water hardened.

GRIMM WPN.
M-1316; 0.30 C, 1.0 Si, 1.1 Cr, 0.18 V, 3.75 W, bal Fe.
For extrusion rams and liners, punches, upsetters; hot work steel, oil hardened.

GRIMM WPN EXTRA.
M-1316; 0.30 C, 2.35 Cr, 0.6 V, 4.25 W, bal Fe.
For shears, punches, upsetters, dies; hot work steel, oil hardened.

GRIMM WS2.
M-1316; 1.1 C, 0.25 max Si, 0.25 max Mn, bal Fe.
Annealed: 110,000 TS; 58,000 YS; 19 El; 40 RA; 210 Brin.
For springs, taps, drills, hobs, reamers; Type W1; water hardened.

GRIMM WS3-MH.
M-1316; 1.0 C, 0.25 max Si, 0.25 max Mn, bal Fe
Heat treated: 200,000 TS; 125,000 YS; 10 El; 30 RA; 400 Brin.
For springs, taps, drills, hobs, reamers; Type W1; water hardened.

GRIMM WS5-ZAH.
M-1316; 0.70 C, 0.25 max Si, 0.25 max Mn, bal Fe
Heat treated: 175,000 TS; 128,000 YS; 12 El; 37 RA; 350 Brin.
For wheels, springs, die blocks, girders, rails; Type W1, water hardened

GRIMM ZR SPEZIAL.
M-1316; 1.4 C, 0.30 Cr, 0.10 V, bal Fe.
For bearings, cutters, liners, oil hardened, wear resistant.

GRIPMORE.
M-334; 0.35 C, 4 Cr, 0.25 V, 0.5 Mo, bal Fe
For hot blanking and forming dies, gripper dies; non-deforming, oil hardened.

GRIPMORE NO. 1.
M-334; 0.35 C, 1 Mo, 0.4 V, 1 Si, bal Fe.
For hot blanking and forming dies, gripper dies; oil hardened, hot work steel.

GRIPMORE NO. 1.
M-24; 0.35 C, 5 Cr, 1 Mo, 0.4 V, bal Fe.
For dies, punches, shears, extrusion rams; hot work steel, oil hardened.

GRIPMORE NO. 1-V.
M-334; 0.35 C, 5 Cr, 1 Mo, 1.1 V, 1 Si, bal Fe.
For hot forming and blanking dies, punches; air hardened, hot work steel.

GRIPMORE NO. 2.
M-334; 0.35 C, 1.35 W, 1.75 Mo, 1 Si, 5 Cr, bal Fe.
For punches, gripping dies, hot work tools; air hardened, hot work steel.

GRITALLOY 10011.
M-717;
Tungsten carbide and nickel base alloy powder, for hard build up.

GRM 235D.
M-114, M-167, M-1491; 0.15 C, 15.5 Cr, 5.2 Mo, 3.6 Al, 2.5 Ti, 4.2 Fe, 0.075 B, bal Ni.
For high temperature cast components in jet engines; high heat and stress-rupture properties.

GROMMET BRASS.
U.S.; 70 Cu, 30 Zn.
For grommets; high ductility.

GROSSMAN.
Al alloy.
For light alloy parts.

GS.
M-459; 1.6 C, 12 Cr, bal Fe
For valves for internal combustion engines; heat resistant.

GSC.
M-459; C, Cr, Mo, Co, bal Fe
For valves for internal combustion engines; heat resistant

GSE.
M-459, 0 52 C, 1.5 Si, 13 Ni, 13 5 Cr, 1.2 W, 1.2 V, bal Fe.
For valves, heavy extrusion dies
Resists thermal shock. Good hot hardness

GSM.
M-459; 0 4 C, 2.25 Si, 15 5 Mn, 12.5 Cr, bal Fe.
For valves, corrosion and heat resistant.

G S.N.
M-73; 2 2 C, 13 Cr, bal Fe.
For stamping and forming dies; non-deforming.

G S N SPECIAL.
M-73, 1 5 C, 12 Cr, 0 8 Mo, 1 V, bal Fe.
For stamping and forming dies, non-deforming

GT2A METAL.
France; C, Cr, Ni, bal Fe
For chemical equipment, corrosion resistant.

GT4A METAL
France, C, Cr, Ni, bal Fe.
For chemical equipment; corrosion resistant.

GT-45.
M-100; 0.08 C, 16 7 Cr, 14 Ni, 2.7 Mo, 3 Cu, 0 25 Ti, 0.35 Cb, 0.5 Si, 1.25 Mn, bal Fe.
For high temperature applications, jet engines and turbo superchargers, heat and corrosion resistant.

GUETTIERES BUTTON.
Eng.; 56 Cu, 44 Zn.
For buttons.

GUETTIERES BUTTON.
Eng ; 61.5 Cu, 29-32 Zn, 6.5-9.7 Sn.
For buttons.

GUILLAUME'S METAL.
Eng.; 64.3 Cu, 35.7 Ni.
For tape, chemical equipment; name also applied to "Invar" tape.

GUINEA GOLD.
Eng.; 88 Cu, 12 Zn.
For ornamental parts, cheap jewelry; red brass.

GUISHIBUICHI.
Jap.; 67-51 Cu, 32-49 Ag, Au, Fe.
For jewelry, ornaments; v. Shibu-ichi.

GULF AIR.
M-1431; 1.0 C, 5 Cr, 1.0 Mo, bal Fe.
For tools and dies; Type A2; air hardened, non-deforming.

GULF GH9.
M-1431; C, alloy, bal Fe.
For machine tool parts; oil hardened.

GULF GH14.
M-1431; C, alloy, bal Fe.
For machine tool parts; oil hardened.

GULF GH-VAN.
M-1431; C, alloy, bal Fe
For machine tool parts, oil hardened.

GULF GHW.
M-1431; C, alloy, bal Fe.
For machine tool parts; oil hardened.

GULF H.S.
M-1431, 0.70 C, 4 Cr, 1 V, 18 W, bal Fe.
For lathe and planer tools, drills, hobs, reamers, Type T-1, high speed steel.

GULF H.S 5
M-1431; 0.80 C, 4 Cr, 2 V, 18 W, 8 Co, bal Fe.
For lathe and planer tools, reamers, broaches; Type T-5, high speed steel

GULF M.2.
M-1431, 0.80 C, 4 Cr, 2 V, 6 W, 5 Mo, bal Fe.
For thread rolling dies, broaches, reamers, cutters; Type M2, high speed steel

GULF O.H.
M-1431, 0.90 C, 1 Mn, 0.5 Cr, 0.5 W, bal Fe.
For dies, punches, rollers, mandrels; Type O1, oil hardening, non-deforming

GUN IRON
M-664, 3.0 T.C., 1.5 Si, 0.85 Mn, 1.9 Ni, 0.40 Cr, 0.65 Mo, 0.075 S, 0.180 P, bal Fe.
Cast 35,000-48,000 TS, 200-600 Brin
For cylinder liners, castings, Tr.S. 2700, Tr.D 0.265.

GUNITE A.
M-223, 0.8 C.C., 2.2 G.C., 2 Si, 0.25 Mo, bal Fe.
Cast 40,000 TS; 223 Brin
For cylinder sleeves, camshafts, Tr.S 3200, Tr.D 32, to be hardened.

GUNITE B-1.
M-223, 0.8 C.C., 2.2 G.C., 2 Si, 0.75 Mo, 0.65 Cr, 0.9 Ni, bal Fe.
Cast. 55,000 TS, 269 Brin.
For heavy forming dies, Tr.S. 3400, Tr.D. 30; wear resistant.

GUNITE C.
M-223; 0.8 C.C., 2.2 G.C., 2 Si, bal Fe.
Cast. 35,000 TS; 212 Brin.
For automotive brake drums, cams, rolls, gears, worms, wear resistant under friction Tr.S.-3,000.

GUNITE D
M-223; 0.8 C.C., 2.2 G.C., 2 Si, 0.55 Cr, 1.2 Ni, bal Fe
Cast: 45,000 TS; 235 Brin.
For pump bodies; Tr.S. 3300; Tr.D. 32; abrasion resistant.

GUNITE E.
M-223; 0.8 C.C., 2.2 G.C., 0.4 Mo, 0.4 Cu, bal Fe.
Cast: 45,000 TS; 229 Brin.
For brake drums, crankshafts, gears, Tr.S. 3300; Tr.D. 34.

GUNITE E-1.
M-223; 0.8 C.C., 2.2 G.C., 2 Si, 0.1 Mo, 0.2 Cu,, bal Fe.
Cast: 40,000 TS; 223 Brin.
For brake drums, cylinder sleeves; Tr.S. 3200; Tr.D. 32; heavy duty service.

GUNITE F.
M-223; 0.8 C.C., 2.2 G.C., 2 Si, 0.8 Mo, 0.6 Cu, 0.35 Cr, bal Fe.
Cast: 50,000 TS; 248 Brin.
For crankshafts; Tr.D. 34; Tr.S. 3500; wear resistant.

GUNITE-K.
M-223; 2.3 C, 1 Si, 0.08 S, 0.16 P, bal Fe.
Cast: 105,000 TS; 85,000 YS; 4 El; 210 Brin.
For gears, shafts, housings; cast iron, high strength.

GUNITE R.
M-223; 0.8 C.C., 2.2 G.C., 2 Si, 1.25 Mo, 1.25 Ni, bal Fe.
Cast: 60,000 TS; 269 Brin.
For heavy crankshafts; Tr.S. 3800; Tr.D. 34; tough.

GUN METAL
M-212; 88 Cu, 8 Sn, 4 Zn.
Cast: 40,000-48,000 TS; 18,000 YS; 50-20 El; 70 Brin.
For steam and structural bronze, gears, bolts; resists salt water corrosion.

GUN METAL NO 1.
M-1518; 88 Cu, 10 Sn, 2 Zn.
Cast: 36,000 TS; 12 El; 50-65 Brin.
For bearings, gears, marine parts; Gun Metal.

GUN METAL NO. 2.
M-1518; 85 Cu, 5 Sn, 5 Zn, 5 Pb.
Cast. 27,000 TS; 12 El; 45-55 Brin.
For steam valves, bearings, gears; pressure tight, creep resistant.

GUN METAL NO. 3
M-1518; 86 Cu, 7 Sn, 5 Zn, 2 Pb.
Cast. 31,500 TS; 12 El; 45-60 Brin.
For backing for white metal lined bearings; pressure tight castings, creep resistant.

GUN METAL NO. 4.
M-1518; Sn, Zn, bal Cu
Cast: 38,100 TS; 25 El; 45-60 Brin.
For bearings, pressure tight castings; pressure tight, not good above 450°F.

GUN METAL-A.
Eng.; 90 Cu, 10 Sn.
For electric contacts, valve disks; corrosion resistant.

GUN METAL-B.
Eng.; 90 Cu, 6.5 Sn, 2 Zn, 1.5 Pb
For steam fittings, valves, cocks, free-cutting.

GUN METAL, CHINESE.
China. 71.16 Cu, 27.36 Zn, 1.40 Fe.
For early cannons and guns.

GUN METAL, CHINESE.
China: 93.2 Cu, 5.05 Sn, 1.72 Fe.
For early cannons and guns

GUN METAL COCHIN CHINA.
China: 77.18 Cu, 3.42 Sn, 5.02 Zn, 13.22 Pb, 1.16 Fe.
For early cannons and guns

GUN METAL COCHIN CHINA.
China: 93.19 Cu, 5.43 Sn, 1.38 Fe.
For early cannons and guns.

GUN METAL, ENGLISH.
Eng.: 89-92 Cu, 8-11 Sn.
For early cannons and guns.

GUN METAL, FRENCH.
Fr.: 90.1 Cu, 9.9 Sn.
For early canons and guns; modern.

GUN METAL, FRENCH.
Fr.: 89.44 Cu, 8.91 Sn, 1.31 Zn, 0.16 Pb.
For early cannons and guns; old.

GUN METAL MODIFIED.
M-212; 86 Cu, 9.5 Sn, 2.5 Pb, 2 Zn.
Cast: 32,000-40,000 TS; 25-15 El; 23-12 RA;
63-72 Brin.
For gears, bearings; "Barr Alloy No. 2."

GUN METAL, PRUSSIAN.
Pruss: 90.9 Cu, 9.1 Sn.
For cannons and guns; modern.

GUN METAL, RUSSIAN.
Russ.: 88-91 Cu, 9-12 Sn, 0.07 Fe.
For early cannons and guns.

GUN METAL, SWISS.
Swiss: 88.93 Cu, 10.37 Sn, 0.42 Zn.
For early cannons and guns; "Lucern."

GUN METAL, TURKISH.
Turk.: 91-95 Cu, 4.7-8.8 Sn, 0-0.2 Fe.
For early cannons and guns.

GUN MOUNT BRONZE.
U.S.; 17 Zn, 3 Sn, bal Cu.
For gun mounts; high strength.

GURLEY'S METAL.
Eng.; 86.5 Cu, 5.4 Zn, 5.4 Sn, 2.7 Pb.
For steam fittings, valves, cocks; free-cutting

GURNEYS BRONZE.
U.S.; 76 Cu, 9 Sn, 15 Pb.
For machine parts; also called
"U S Government Bronze"

GURONIT.
M-1329; C, alloy, bal Fe.
For machine tool products; oil hardened.

GURONIT 1.1 H.
M-1329, 1.2 C, 1.3 Si, 29 Cr, bal Fe.
For wear plates, crushers,
heat and abrasion resistant.

GURONIT 2.2 H.
M-1329; 1.2 C, 1.3 Si, 29 Cr, 2 Mo, bal Fe
For wear plates, crushers,
corrosion, heat and wear resistant.

GURONIT 14
M-1329, 0.25 C, 14.5 Cr, 1 max Ni, bal Fe.
Annealed 85,000 TS; 40,000 YS, 50 El; 65 RA;
185 Brin.
For surgical instruments, gages, valves;
Type 420; stainless, austenitic.

GURONIT 18.
M-1329; 0.25 C, 17 Cr, 1.8 max Ni, bal Fe.
For chemical plant equipment; corrosion resistant.

GURONIT 18-8
M-1329; 0.15 C, 18 Cr, 8.5 Ni, bal Fe.
Annealed: 75,000 TS; 35,000 YS; 55 El; 75 RA;
140 Brin.
For chemical plant equipment, tanks, vessels;
Type 302; stainless, austenitic.

GURONIT 18-8E.
M-1329; 0.12 max C, 18 Cr, 9.5 Ni, Ti = 4 × C,
bal Fe.
Annealed: 85,000 TS, 35,000 YS; 55 El; 65 RA;
170 Brin.
Cold drawn: 95,000 TS; 60,000 YS; 40 El; 60 RA;
185 Brin.
For welded structures, chemical plant equipment;
Type 321; stainless, austenitic.

GURONIT 18-8Mo.
M-1329; 0.15 C, 18 Cr, 9.5 Ni, 2 Mo, bal Fe.
Annealed: 85,000 TS; 35,000 YS; 50 El; 75 RA;
150 Brin.
Cold drawn: 150,000 TS; 135,000 YS; 6 El;
300 Brin.
For acid resistant equipment;
Type 316; stainless, austenitic.

GURONIT 18-8MoE.
M-1329; 0.12 max C, 2 Mo, 18 Cr, 10.5 Ni,
Cb = 8 × C, bal Fe.
Annealed: 85,000 TS; 35,000 YS, 50 El; 75 RA;
150 Brin
Cold drawn 150,000 TS, 135,000 YS; 6 El,
300 Brin.
For welded acid resistant equipment;
Type 316Cb; stainless, austenitic.

GURONIT 20-25Mo
M-1329, 0.10 C, 24 Ni, 20 Cr, Mo, Cu, bal Fe.
Annealed: 100,000 TS, 45,000 YS; 50 El; 65 RA;
185 Brin
For acid resistant equipment;
corrosion resistant, austenitic

GURONIT 28 4.
M-1329; 0.4 C, 1.3 Si, 27 Cr, 4 Ni, bal Fe.
Cast: 115,000 TS, 80,000 YS, 15 El; 190 Brin.
For furnace equipment, heat treat boxes;
heat resistant

GURONITE
M-1329, 0.7-2.3 C, 30-35 Cr, 0.7 Si, Mo, bal Fe.
For heat treating furnaces, pump fittings, valves,
grates, heat and corrosion resistant.

GURONIT GS22-10
M-1329, 0.4 C, 22 Cr, 9.5 Ni, bal Fe
Cast 85,000 TS; 45,000 YS, 35 El, 165 Brin
For heat treating boxes, furnace parts,
conveyor belts, Type HF,
corrosion and heat resistant

GURONIT GS25-15
M-1329, 0.4 C, 26 Cr, 14 Ni, bal Fe
Cast 75,000 TS; 47,000 YS, 17 El, 25 RA,
200 Brin
For heat treating boxes, salt pots, retorts, chains;
Type HH, corrosion and heat resistant.

GURONIT GS25-35
M-1329, 0.5 C, 25 Cr, 30 Ni, bal Fe.
For furnace parts, retorts, pots, heat treating boxes;
corrosion and heat resistant.

GURONIT GS28-4
M-1329; 0.4 C, 1.3 Si, 27 Cr, 4 Ni, bal Fe
Cast: 90,000 TS; 65,000 YS, 2 El; 212 Brin.
For cylinder liners, bushings, valve seats and bodies,
Type CC-50; heat resistant.

GURONIT GS28-10
M-1329, 0.4 C, Cr, 10 Ni, bal Fe.
For furnace parts, heat treating boxes;
Type HE; heat resistant.

GURONIT GS28-20
M-1329, 0.4 C, 25 Cr, 19 Ni, bal Fe.
Cast: 75,000 TS, 50,000 YS, 17 El; 170 Brin.
For furnace parts, retorts, stack dampers;
Type HK; heat resistant

GURONIT H7.
M-1329; 0.3 C, 6 Cr, 2.2 Si, bal Fe.
For oil refinery equipment; creep and heat resistant.

GURONIT H8.
M-1329; 0.5 C, 1.5 Si, 17 Cr, bal Fe.
For furnace parts, heat treating boxes; heat resistant.

GURONIT H9.
M-1329; 0.3 C, 2.2 Si, 17 Cr, bal Fe.
For furnace parts, heat treating boxes, oil refinery equipment; heat and creep resistant.

GURONIT H10.
M-1329; 0.6 C, 1.5 Si, 22 Cr, bal Fe.
For oil refinery equipment, rollers, crushers; heat and wear resistant.

GURONIT H11.
M-1329; 1.3 C, 1.5 Si, 29 Cr, bal Fe.
For crushers, rollers, grate bars; heat and abrasion resistant.

GUSSBRONZE 6.
M-1420; Sn, bal Cu.
Cast: 21,000-29,000 TS; 18 El, 60 Brin.
For hardware; bronze

GUSSBRONZE 10.
M-1420, Sn, bal Cu.
Cast 32,000-36,000 TS; 15 El; 70 Brin
For hardware, bronze

GUSSBRONZE 12.
M-1420, Sn, bal Cu
Cast· 32,000-36,000 TS, 12 El, 85 Brin.
For hardware, bronze

GUSSBRONZE 14
M-1420, Sn, bal Fe
Cast 29,000 32,000 TS, 3 El, 110 Brin
For hardware, bronze

GUSSBRONZE 20
M-1420, Sn, bal Cu.
Cast 15,000-21,000 TS, 0 El, 180 Brin
For hardware; bronze.

GUSS-KORROFFESTAL
M 1376, 9 13 Si, 0.25-0.40 Mg, 0.3-0.5 Mn, bal Al
For light alloy parts; high corrosion resistance

GUSSMESSING 63
M-1420, Zn, bal Cu
Cast 22,000 25,000 TS, 10 6 El, 45 Brin
For air conditioners, housings, machinery parts, brass.

GUSSMESSING 67
M-1420, Zn, bal Cu
Cast 25,000-29,000 TS, 15-12 El; 40 Brin
For air conditioners, housings, machinery parts, brass

GUSSMESSING 90
M-1420, Zn, bal Cu
Cast· 23,000-25,000 TS, 20-18 El; 60 Brin
For current carrying equipment, conductors; brass

GUSS PANTAL
Germ, 2-4 Mg, 1.2-1.5 Mn, 0-0.2 Sb or Ti, bal Al
For light alloy castings, resists sea water corrosion

GUSSTAHL 3W
M-1314; 0.90 C, 0.3-0.8 Mn, bal Fe.
Heat treated: 190,000 TS, 145,000 YS, 10 El; 30 RA, 400 Brin
For cutters, drills, taps, springs, Type W1, water hardened.

GUSSTAHL 4H.
M-1314, 0.75 C, 0.3-0.8 Mn, bal Fe.
Heat treated: 175,000 TS; 130,000 YS; 12 El, 35 RA, 350 Brin
For tools, cutters, drills, punches, springs; Type W1; water hardened.

GUSSTAHL 4W.
M-1314; 0.60 C, 0.3-0.8 Mn, bal Fe.
Heat treated: 160,000 TS; 113,000 YS; 12 El, 40 RA; 320 Brin.
For crimpers, punches, dies, springs; water hardened.

GUSSTAHL 5H.
M-1314; 0.45 C, 0.3-0.8 Mn, bal Fe.
Hot rolled: 98,000 TS; 59,000 YS; 24 El; 45 RA; 212 Brin.
For gears, pinions, shafts, axles; water hardened.

GUSSTAHL 5W.
M-1314; 0.35 C, 3-0.8 Mn, bal Fe.
Hot rolled: 85,000 TS; 54,000 YS; 30 El; 53 RA; 185 Brin.
For gears, pinions, shafts; water hardened

GUSSSTAHL-D8514.
M-1293; 0.17 C, 0.2 Cb, 11 Cr, 0.6 Mo, 0.55 Ni, 0.6 V, bal Fe
Annealed: 75,000 TS; 40,000 YS; 30 El; 70 RA; B 82 Rock.
Cold Drawn: 95,000 TS; 80,000 YS; 15 El; 60 RA; B 92 Rock.
For springs, table flatware, knives, oil refinery and chemical plant equipment.
Corrosion resistant, hardenable

GUSSSTAHL D8518.
M-1293; 0.22 C, 0.6 Mn, 11.7 Cr, 1.05 Mo, 0.6 Ni, 0.3 V, bal Fe
Annealed· 95,000 TS; 40,000 YS; 25 El, B 94 Rock.
Hardened· 245,000 TS; 205,000 YS; 9 El; C 50 Rock
For cutlery, surgical instruments, hardware, gears, shafts
Corrosion resistant, hardenable.

GUSSSTAHL-D8518W
M-1293, 0.21 C, 12 Cr, 1 Mo, 0.6 Ni, 0.3 V, 0.5 W, bal Fe
Annealed 90,000 TS, 38,000 YS, 25 El, B 92 Rock.
Hardened· 240,000 TS, 205,000 YS, 9 El; C 50 Rock
For surgical instrument, valves, cutlery, gears, shafts
Corrosion resistant, hardenable.

GUTHRIES ALLOY
Eng, 47 Bi, 20 Sn, 19 Pb, 13 Cd.
For fire extinguisher plugs; fusible alloy

GUYS ALLOY
England; 82.5 Ni, 17.5 Al
At 70°F 83,800 TS, 0.6 El
At 1500°F 52,900 TS, 2.9 El
For turbine blades, jet engine components, high stress-rupture strength

G.W. 6-6-2 HIGH SPEED
M-1067, 0.8 C, 4 Cr, 6 W, 4.5 Mo, 1.5 V, bal Fe.
For tools, cutters, chasers, high speed steel

G.W 32
M-1404, 7.6 Zn, 1.7 Mg, bal Al
Heat treated 43,000-50,000 TS, 6-4 El; 130-140 Brin.
For light alloy castings, housings, age-hardenable

G W. NO 99 HOT WORK
M-1067, 0.35 C, 0.35 Mn, 0.9 Si, 4.7 Cr, 1.1 W, 1.5 Mo, 0.25 V, bal Fe
For hot work tools and dies, aluminum die casting dies, hot work steel

G.W NO 265 (HIGH PRODUCTION).
M-1067, 1.6 C, 0.3 Mn, 12 Cr, 0.8 Mo, 0.2 V, bal Fe.
For tools, dies, blanking, forming and drawing dies; abrasion resistant, air or oil hardening.

GW 280 TUF KUT.
M-1067, 0.60 C, 0.85 Mn, 2.0 Si, 0.25 Cr, 0.25 Mo, 0.2 V, bal Fe.
Annealed: 107,000 TS; 64,000 YS; 27 El; 212 Brin.
Oil Hardened: 145,000-340,000 TS;

127,000-283,000 YP; 5-24 El; 20-44 RA; 293-611 Brin.
For shear blades, pneumatic tools, punches, chisels, caulking tools.
Type S5 shock resisting tool steel.
Oil or water hardening.

G.W. NO. 310.
M-1067; 0.30 C, 0.25 Mn, 3.25 Cr, 10 W, 0.35 V, bal Fe.
For hot work dies, brass forming dies; hot work steel.

G.W. NO. 313.
M-1067; 0.35 C, 0.30 Mn, 3 Cr, 13.5 W, bal Fe.
Hot work tools and dies; hot work steel, high abrasion resistant.

G.W. NO. 350.
M-1067; 1.3 C, 0.3 Mn, 3.5 W, bal Fe.
For cutting tools; fast finishing tool steel.

G.W.422 MIRYCAL.
M-1067; 0.5 C, 0.95 Cr, 1 W, 0.2 Mo, bal Fe.
For dies, punches, shear blades; Type S1; oil hardened.

G.W. NO. 515.
M-1067, 0.35 C, 1.0 Si, 5 Cr, 5 W, 0.2 Mo, bal Fe.
For hot work tools and dies; hot work steel, air hardening, tough.

G.W. COLD HEADER.
M-1067; 0.95 C, 0.30 Mn, 0.30 Si, bal Fe.
For cold heading tools, water hardening.

G.W. "C.V.M."
M-1067; 1.0 C, 5 Cr, 1 Mo, bal Fe.
For tools, dies, punches, Type A2; air hardened, non-deforming.

G.W. "C.W OIL."
M-1067; 0.90 C, 1 Mn, 0.50 Cr, 0.50 W, bal Fe
For dies, punches, rollers, mandrels; Type O1; oil hardened. non-deforming.

G.W EXTRA.
M-1067; 1.0 C, bal Fe.
Annealed: 100,000 TS; 53,000 YS, 21 El, 42 RA, 200 Brin.
For drills, taps, reamers, lathe and planer tools, Type W1; water hardened.

G.W. OIL HARDENING (G.W.O.H.)
M-1067; 0.9 C, 1.1 Mn, 0.5 Cr, 0.5 W, bal Fe.
For tools, dies; oil hardening.

G.W. PAVEMENT BREAKER.
M-1067; 0.65 C, 0.30 Mn, bal Fe.
For tools, hammers, crushers; water hardening.

G.W. REGULAR.
M-1067; 0.7-1.2 C, 0.3 Mn, bal Fe.
For tools, punches; water hardening.

G.W. SOLID DRILL.
M-1067, 0.85 C, 0.30 Mn, bal Fe
For tools, pivots; water hardening

G.W. SPECIAL.
M-1067; 1-1.1 C, 0.30 Mn, bal Fe
For tools, drills, taps; water hardening.

GYROCAST.
M-977; 0.4 C, 1 Cr, bal Fe.
For straightening rolls, bar mill guides; centrifugally cast castings.

GYROMET.
M-265; 90 W, Cu, Mo, Fe, bal Ni.
Sintered: 140,000 TS; 120,000 YS; 2 El; C 32 Rock.
For gyros, counterweights. High density.

GYROMET 1100.
M-265; 90 W, 4 Ni, 2 Fe, 4 Mo.
Sintered: 150,000 TS; 140,000 YS; 2 El; density: 17.25; hardness 36 Rock C.
For gyroscope rotors, governor counter weights, radiation shielding

H-4-X.
M-750, 0.35 C, 0.8 Cr, 0.5 Mo, 0.7 Mn, 0.2 Si, 0.15 max Ni, bal Fe.
Annealed: 100,000 TS; 80,000 YS; 2 El; 300 Brin.
For gears, shafts, pinions; water hardening.

H5DM.
0.15 C, 1.5 Mn, 0.5 Cr, 0.4 Mo, 4.0 Ni, 0.10 V, bal Fe.
Plate: 107,000 min TS, 92,000 min YS; 13 min El
For pressure vessels, bridges, mine cars, power shovels, cranes, trucks, trailers.
Shock and wear resistant

H-9 DOUBLE HEADER
M-32, 0.90 C, 0.35 Mn, 0.35 Si, bal Fe.
For header dies, punches, coining and striking dies, water hardened, wear resistant.

H-11
M-1602; 0.40 C, 0.4 Mn, 1.05 Si, 5.0 Cr, 0.5 V, 1.35 Mo, bal Fe
Air or oil hardening hot work tool steel, chromium type, AISI H11.

H 12
M-1602, 0.35 C, 0.35 Mn, 1.05 Si, 5.0 Cr, 0.35 V, 1.25 W, 1.35 Mo, bal Fe.
Hot work tool and die steel, chromium type, AISI H12.

H 44 see HEPPENSTALL H 44

HA-0
M-Belgium, 0.9 C, 3 Cr, 0.3 Mn, bal Fe
H max 300, B max 13,500, Br 9900
Coercive force 66, (BdHd) max 320,000
For permanent magnets in electrical and magnetic equipment.
Hardened, high permeability.

HA-1.
M-Belgium, 1.0 C, 9 Cr, 3 Co, 1.5 Mo, bal Fe.
For permanent magnets in electrical and magnetic equipment.
Hardened, high permeability

HA-2
M-Belgium, 1.0 C, 9 Cr, 6 Co, 1.5 Mo, bal Fe
For permanent magnets in electrical and magnetic equipment.
Hardened High permeability

HA-3.
M-Belgium; 1.0 C, 15 Co, 9 Cr, 1.5 Mo, bal Fe.
For permanent magnets in electrical and magnetic equipment.
Hardened High permeability

HA-25 Alloy.
M-167, 0.15 max C, 1.5 Mn, 0.5 Si, 20.0 Cr, 10.0 Ni, 15.0 W, bal Co
Heat Treated: 130,000 TS, 60,000 YS; 35 El; C 20 Rock.
At 1500°F: 50,000 TS, 35,000 YS; 17 El.
For jet engine afterburners, liners, nozzles, gas turbine rotors and buckets.
Good oxidation and corrosion resistance.

HACKER CNBVO.
M-1318, 0.36 C, 1.0 Cr, 0.2 Mn, 1.0 Ni, bal Fe.
For gears, bolts, machine tool parts; oil hardened, shock resistant.

HACKER CNBVO/2H.
M-1318; 0.30 C, 2.0 Cr, 0.3 Mo, 2.0 Ni, bal Fe.
For gears, bolts, machine tool parts;
oil hardened, shock resistant.

HACKER CNBVO/H.
M-1318; 0.34 C, 0.55 Mn, 1.55 Cr, 1.55 Ni, 0.2 Mo, bal Fe.
For gears, bolts, machine tool parts;
oil hardened, shock resistant.

HACKER HWG.
M-1318; 0.55 C, 0.70 Cr, 0.18 Mo, 0.1 V, 1.65 Ni, bal Fe.
For heading and forging dies, upsetters,
punches, oil hardened, tough.

HACKER HWG EXTRA.
M-1318; 0.56 C, 0.85 Cr, 0.2 Mo, 1.8 Ni, 0.1 V, bal Fe.
For forging dies, upsetting dies, punches;
oil hardened, tough.

HACKER LD EXTRA EXTRA ZH.
M-1318, 1.0 C, 0.25 max Si, 0.25 max Mn, bal Fe.
Heat treated 200,000-130,000 TS;
150,000-90,000 YS; 10-20 El, 30-50 RA,
420-270 Brin.
For drills, reamers, taps, hobs;
Type W1, water hardened.

HACKER LD EXTRA H.
M-1318; 1.3 C, 0.25 max Si, 0.25 max Mn, bal Fe
For engravers' tools, blanking and forming dies;
Type W1, water hardened.

HACKER LD EXTRA MH.
M-1318, 1.15 C, 0.25 max Si, 0.25 max Mn, bal Fe
For springs, taps, drills, reamers, broaches;
Type W1, water hardened

HACKER LD EXTRA SEHR ZAH
M-1318, 0.70 C, 0.25 max Si, 0.25 max Mn, bal Fe
Heat treated 175,000-122,000 TS,
130,000-82,000 YS, 12-22 El; 37-52 RA,
360-240 Brin
For springs, rails, punches, clutch discs,
Type W1, water hardened

HACKER LD EXTRA ZAH
M-1318, 0.85 C, 0.25 max Si, 0.25 max Mn, bal Fe.
Heat treated 200,000-130,000 TS,
150,000-90,000 YS, 10-20 El, 30-50 RA;
400-260 Brin
For drills, reamers, taps, hobs, cutters,
Type W1; water hardened

HACKER LD PRIMA EXTRA ZH
M-1318; 0.67 C, 0.40 Si, 0.7 Mn, bal Fe
Heat treated: 170,000-120,000 TS,
125,000-80,000 YS, 15-25 El, 40-55 RA,
350-240 Brin.
For springs, clutch discs, girders, rails,
die blocks; water hardened.

HACKER LD PRIMA H.
M-1318; 0.90 C, 0.40 Si, 0.60 Mn, bal Fe.
Heat treated. 200,000-130,000 TS;
150,000-90,000 YS; 10-20 El; 30-50 RA;
400-260 Brin.
For drills, taps, reamers, cutters;
Type W1; water hardened.

HACKER LD PRIMA MH.
M-1318; 0.75 C, 0.40 Si, 0.60 Mn, bal Fe.
Heat treated: 175,000-125,000 TS;
130,000-85,000 YS; 10-20 El; 35-50 RA;
360-250 Brin.
For wheels, die blocks, rails, springs, clutches;
Type W1; water hardened.

HACKER LD PRIMA SEHR ZAH.
M-1318; 0.35 C, 0.60 Si, 0.60 Mn, bal Fe.
Hot rolled: 85,000 TS; 54,000 YS; 30 El; 53 RA;
185 Brin.
For gears, shafts, axles, bolts, fishplates;
water hardened.

HACKER LD PRIMA ZAH.
M-1318; 0.60 C, 0.35 Si, 0.6 Mn, bal Fe.
Heat treated: 160,000-115,000 TS;
113,000-77,000 YS; 12-23 El; 40-54 RA;
320-230 Brin.
For wheels, die blocks, girders, rails; water hardened.

HACKER LD PRIMA ZW.
M-1318; 0.15 C, 0.4 Si, 0.6 Mn, bal Fe.
Annealed: 70,000 TS; 55,000 YS; 25 El; 60 RA;
145 Brin.
For screws, bolts, nuts, camshafts, rivets;
case hardening steel.

HACKER LDS.
M-1318, 0.90 C, 1.9 Mn, 0.1 V, bal Fe.
For punches, crimpers, forming dies;
oil hardened, non-deforming.

HACKER LD SPEZIAL.
M-1318; 0.75 C, 0.25 Si, 0.25 Mn, bal Fe.
Heat treated: 180,000-125,000 TS;
135,000-85,000 YS; 12-22 El; 36-50 RA;
370-250 Brin.
For springs, rails, punches, girders, crimpers;
Type W1, water hardened

HACKER LD SPEZIAL EXTRA ZH
M-1318, 1.0 C, 0.25 Si, 0.25 Mn, bal Fe.
Heat treated. 190,000 TS, 120,000 YS; 10 El;
30 RA; 400 Brin.
For springs, tools, reamers, drills; Type W1,
water hardened.

HACKER LD SPEZIAL MH.
M-1318, 1.1 C, 0.25 Si, 0.25 Mn, bal Fe.
Annealed. 110,000 TS, 58,000 YS; 20 El; 40 RA;
210 Brin
For springs, drills, taps, reamers, broaches;
Type W1, water hardened

HACKER LD SPECIAL ZAH
M-1318, 0.85 C, 0.20 Si, 0.20 Mn, bal Fe.
Heat treated. 180,000-128,000 TS;
135,000-85,000 YS, 12-22 El; 35-50 RA;
400-250 Brin
For springs, tools, cutters, taps, drills, reamers;
Type W1, water hardened.

HACKER LDX.
M-1318; 1.65 C, 11.5 Cr, 0.1 V, bal Fe.
For blanking and forming dies, punches;
air hardened, non-deforming.

HACKER MN180
M-1318; 0.14 C, 1.1 Cr, 4.5 Ni, bal Fe.
For gears, bolts, crankshafts, cams;
case hardened, shock resistant.

HACKER ON130.
M-1318, 0.15 C, 0.25 Si, 0.5 Mn, 0.65 Cr, bal Fe.
For gears, bolts, camshafts, cams;
case hardened, tough.

HACKER ON160.
M-1318; 0.16 C, 0.25 Si, 1.15 Mn, 0.95 Cr, bal Fe.
For gears, bolts, camshafts, cams;
case hardened, tough.

HACKER ON200.
M-1318, 0.20 C, 1.15 Cr, 1.25 Mn, bal Fe
For gears, bolts, camshafts, cams;
case hardened, tough.

HACKER PS.
M-1318; 0.45 C, 0.2 V, 1.85 W, 1.05 Cr, bal Fe.
For punches, rivet sets, upsetters, forging dies;
oil hardened, tough.

HACKER PS505.
M-1318; 0.55 C, 0.9 Si, 0.3 Mn, 1.05 Cr, 0.18 V, 1.85 W, bal Fe.
For forging and header dies, upsetters;
oil hardened, tough.

HACKER PSN.
M-1318; 0.45 C, Si, Cr, V, bal Fe.
For springs, gears, bolts, crankshafts;
oil hardened, shock resistant.

HACKER PS SPEZIAL.
M-1318; 0.45 C, W, Cr, V, bal Fe.
For forging and header dies, upsetters;
oil hardened, tough.

HACKER TE.
M-1318; 1.05 C, 0.9 Mn, 1.0 Cr, 1.15 W, bal Fe.
For bearings, cutters, bushings;
oil or water hardened, tough.

HACKER WGNH.
M-1318; 0.60 C, 0.40 Si, 0.60 Mn, bal Fe.
Heat treated: 160,000 TS; 113,000 YS; 12 El; 40 RA; 320 Brin.
For wheels, die blocks, clutch discs, rails;
water hardened.

HACKER WGNH EXTRA.
M-1318; 0.90 C, 0.40 Si, 0.60 Mn, bal Fe.
Heat treated: 190,000 TS, 145,000 YS; 10 El; 30 RA; 400 Brin.
For springs, taps, drills, hobs, reamers,
Type W1; water hardened.

HACKER WGNH SPEZIAL.
M-1318; 0.50 C, 0.90 Si, 0.90 Mn, bal Fe.
For pneumatic tools, punches, dies, shear blades;
oil hardened, tough.

HACKER WGW.
M-1318; 0.85 C, 0.25 max Si, 0.25 max Mn, bal Fe
Heat treated: 188,000 TS, 145,000 YS, 12 El; 35 RA; 400 Brin.
For springs, drills, reamers, taps, tools, hammers;
Type W1; water hardened.

HACKER WHH.
M-1318; 1.3 C, W, bal Fe.
For cutters, engravers' tools, cold headers;
oil or water hardened.

HACKER WHHI.
M-1318; 1.1 C, 0.40 Cr, 0.30 Mn, 0.20 Si, bal Fe.
For bearings, cutters, liners, drills;
Type W5; water hardened.

HACKER WHHS.
M-1318; 1.2 C, 0.20 Cr, 0.1 V, 1.0 W, bal Fe.
For heading and forming dies, punches;
oil hardened, wear resistant.

HACKETT K-COPPER.
M-825; Cu alloy.
Cast: 70,000 TS; 20 El, 50 RA; 150 Brin.
For welding tips and holders;
75-80% conductivity of Cu.

HACKSAW.
M-350; 0.7 C, 2 W, bal Fe.
For tools, hacksaws; oil hardened.

HACKSAW "A."
M-261; C, bal Fe.
For hack saws; water hardening.

HACKSAW "B."
M-261; C, W, bal Fe.
For hack saws; water hardening.

HACKSAW REG. C.
M-350; 0.7-1.0 C, bal Fe.
For tools, hacksaws; water hardened.

HADFIELD MANGANESE STEEL.
M-604; 1.00-1.35 C, 10.5-15.0 Mn, 0.10 max P, 0.1-0.3 Si, bal Fe.
For perforated screens, dipper teeth,
journal box liners, wear plates,
screens, rails; abrasion resistant.

HADFIELD SILICON STEEL.
M-62; 4 Si, C, bal Fe.
For transformer cores, armatures for dynamos
and electric motors, loading coils;
low magnetic hysteresis with high permeability.

HADFIELDS Cr-Mn STEEL.
M-139; 1.0-1.4 C, 10-14 Mn, 2.8-3.1 Cr, bal Fe.
Heat treated 80,000-140,000 TS; 35,000-55,000 YS, 20-30 El; 15-30 RA, 201-255 Brin.
For wear resisting castings; non-magnetic.

HADFIELDS MANGANESE STEEL.
M-139, 1.0-1.4 C, 10-14 Mn, bal Fe.
Heat treated: 80,000-120,000 TS; 30,000-50,000 YS, 25-35 El; 20-35 RA; 170-201 Brin
For rails, wear plates, castings, non-magnetic,
wear resisting.

HADURA
M-62; C, Cr, bal Fe
For rolls for cold rolling, water hardening

HAECKER 135H
M-1318; 0.40 C, Cr, bal Fe
For gears, machine tool parts, water hardened

HAECKER 135M
M-1318, 0.20 C, Cr, bal Fe
For gears, cams, machine tool parts; case hardening.

HAECHER 135W
M-1318, 0.10 C, Cr, bal Fe
For gears, cams, shafts, case hardening

HAECHER ADS
M-1318, 0.38 C, Cr, Si, V, bal Fe
For gears, bolts, crankshafts, oil hardened,
shock resistant.

HAECHER AE13C.
M-1318, 2.1 C, 11.5 Cr, bal Fe.
For blanking and forming dies;
oil or air hardened, non-deforming.

HAECKER BSL-SPEZIAL.
M-1318; 0.40 C, Ni, Cr, Mo, bal Fe
For gears, bolts, shafts, studs,
oil hardened, shock resistant.

HAECKER F480E.
M-1318, 0.12 max C, 18 Cr, 10.5 Ni, 2 Mo, Ti = 4 × C, bal Fe.
Annealed: 90,000 TS, 45,000 YS; 50 El; 60 RA; 180 Brin
For chemical plant equipment, mixers, tanks, vessels;
Type 316 Ti; stainless, austenitic.

HAECKER KF17.
M-1318; 0.08 C, Cr, bal Fe.
For gears, cams, camshafts, case hardened.

HAECKER KF17Ni.
M-1318; 0.22 C, Cr, Ni, bal Fe.
For gears, cams, camshafts; case hardened.

HAECKER KF17S.
M-1318; 0.12 C, 16.5 Cr, 0.25 Mo, 0.2 S, bal Fe.
Annealed: 80,000 TS; 50,000 YS; 25 El; 50 RA; 150 Brin.
For chemical plant equipment;
corrosion and heat resistant.

HAECKER KF300.
M-1318; 0.15 max C, 18 Cr, 8.5 Ni, bal Fe.
Annealed: 80,000 TS; 35,000 YS; 50 El; 65 RA; 160 Brin.
For chemical plant equipment; Type 302; stainless, austenitic.

HAECKER KF300E.
M-1318; 0.12 max C, 18 Cr, 9.5 Ni, Ti = 4 × C, bal Fe.
Annealed: 90,000 TS; 45,000 YS; 45 El; 60 RA, 180 Brin.
For welded structures, chemical plant equipment; Type 321; stainless, austenitic.

HAECKER KF300S.
M-1318; 0.07 max C, 18 Cr, 9.5 Ni, bal Fe.
Annealed. 80,000 TS; 35,000 YS; 55 El; 70 RA; 150 Brin.
For welded structures, chemical plant equipment; Type 304, stainless, austenitic

HAECKER KF480S.
M-1318; 0.07 max C, 18 Cr, 2 Mo, 10.5 Ni, bal Fe
Annealed 90,000 TS; 45,000 YS, 50 El; 60 RA, 180 Brin.
For acid resistant equipment, tanks, mixers, fitters; Type 316; stainless, austenitic

HAECKER LR
M-1318; 0.30 C, 2.65 Cr, 0.35 V, 8.5 W, bal Fe.
For extrusion press dies, mandrels, liners, punches, oil hardened, hot work steel.

HAECKER MN130
M-1318, 0.14 C, 0.7 Cr, 3.5 Ni, bal Fe.
For gears, bolts, camshafts, cams, case hardened, shock resistant

HAECKER PSBG.
M-1318, 1.0 C, 0.1 V, 0.30 Mn, 0.25 Si, bal Fe
Heat treated 185,000 TS, 120,000 YS, 10 El, 30 RA, 400 Brin
For knives, drills, drawing and stamping dies; oil or water hardened, wear resistant.

HAECKER PSX.
M-1318, 1.4 C, 0.30 Cr, 0.1 V, bal Fe.
For bearings, liners, blanking and forming dies, oil hardened, wear resistant

HAFNIA
M-1260, 24.5 Sn, 13 Sb, 0.5 Cu, 62 Pb
Cast: 12,500 TS; 28 Brin.
For refrigerator and electric motor bearings; M P 355-535°F, good castability.

HAGESTA 0060 M.
M-1309, 0.10 C, 28.0 Mo, 65 Ni, bal Fe
Cast, quenched. 64,000-92,000 TS; 50,000 YS; 10 El, 190 Brin, approx.
Highly corrosion resistant cast alloy.
DIN G-X10NiMo6528.

HAGESTA 1855 MW
M-1309, 0.10 C, 16 Cr, 17 Mo, 60 Ni, bal Fe.
Cast, quenched: 64,000-92,000 TS, 50,000 YS; 10 El; 190 Brin, approx.
Highly corrosion resistant cast alloy.
DIN G-X10NiMoCr601716.

HAIRSPRINGS.
U.S.; 4.5-6.5 Sn, 0.2 P, bal Cu.
For hair springs; phosphor bronze

HALBERLAND ALLOY.
Germ., 87 Cu, 13 Zn.
For hardware fittings; Red Brass.

HALCOMB.
M-259; 0.9 C, 1 Cr, bal Fe.
For tools, dies; water hardened.

HALCOMB 218.
M-38; 0.4 C, 1 Si, 5 Cr, 0.3 V, 1.4 Mo, bal Fe.
Air hardened: 400 Brin.
For brass extrusion mandrels, hot heading and forging dies, Al die casting dies, hot punches; tough, resists heat checking, hot work steel. AISI H11.

HALCOMB 236.
M-38; 0.3 C, 13 Cr, 13 W, 0.9 V, bal Fe.
For permanent molds, dies, extension dies; corrosion and heat resistant, hot work steel.

HALCOMB 425.
M-38, 0.40 C, 0.30 Mn, 4.25 Cr, 2.10 V, 4.25 W, 0.4 Mo, 4.25 Co, bal Fe.
At 1200°F 110,000 TS; 16 El; 36 RA; C 44 Rock.
At 800°F: 180,000 TS; 9 El; 36 RA; C 45 Rock.
For hot work tools, brass extrusion dies and dummy blocks, forging dies and inserts.
Shock and abrasion resistant.
Hot work tool steel Type H19

HALCOMB 440.
M-362; 0.8 C, 4.5 Cr, 1.5 V, 20 W, 12 Co, bal Fe.
For lathe and planer tools, reamers, broaches; Type T6; high speed steel.

HALCOMB 777.
M-38; 0.70 C, 0.70 Mn, 0.70 Mo, bal Fe.
For tools; oil or water hardening.

HALCOMB 999.
M-260, M-38; 0.8 C, 14 W, 4 Cr, 2 V, 5 Co, bal Fe
For heavy work on hard stock, high speed steel.

HALCOMB 999.
M-362; 0.75 C, 4 Cr, 2 V, 14 W, 5 Co, bal Fe
For lathe and planer tools, reamers, broaches; Type T8; high speed steel.

HALCOMB 1370.
M-38, 0.43 C, 2.2 Cr, 0.7 Mo, 1.0 W, 0.65 V, bal Fe.
For hot work dies; hot work steel.

HALCOMB BRAKE DIE
M-38, 0.35 C, 0.9 Cr, 0.2 Mo, bal Fe.
Heat treated. 260-300 Brin.
For brake dies; furnished heat treated

HALCOMB C C S
M-260, M-38; 0.4 C, 1.1 Si, 5 Cr, 4 W, bal Fe.
Air-oil· 400 Brin
For tools, die casting dies, press forging dies; tough, wear resistant

HALCOMB CHROME-MOLY HOG KNIFE
M-38, 0.60 C, 0.90 Cr, bal Fe
For knives, water hardening.

HALCOMB CSM NO. 2
M-38; 0.30 C, 0.8 Cr, 0.3 Mo, bal Fe.
200 Brin
For dies for zinc base die castings.

HALCOMB DOUBLE SPECIAL W.
M-260, M-38, 1.19 C, 0.22 Mn, 0.12 Cr, 2.84 W, bal Fe.
Brine harden.
For tools, finishing tools, drawing dies; finishing steel.

HALCOMB FIRST QUALITY.
M-38; 1.25 C, bal Fe.
For tools, drill rod.

HALCOMB GRADE B STAINLESS.
M-260, M-38; 0.75 C, 17 Cr, bal Fe.
For cutlery and dental instruments; corrosion resistant; discontinued.

HALCOMB HOT WORK.
M-260, M-38; 0.4 C, 8.7 W, 3.5 Cr, 0.25 V, bal Fe.
Oil hardened: 400 Brin.
For hot forging dies, punches, grippers; resists heat checking.

HALCOMB L.C.T.
M-260, M-38; 0.4 C, 3.0 Cr, 0.3 V, 15 W, bal Fe.
For hot work dies and tools, shear blades, nut piercers; tough and heat resistant.

HALCOMB L.C.T. NO. 2.
M-260, M-38; 0.45 C, 2 Cr, 0.3 V, 11 W, bal Fe.
Oil hardened: 400 Brin.
For brass forging dies, extrusion dies, dummies for brass; resists heat checking.

HALCOMB NU-DIE.
M-38; 0.38 C, 1.0 Si, 5 Cr, 0.4 V, 1.4 Mo, bal Fe.
Heat treated: 200,000 TS; 180,000 YS; 13.5 El; 47 RA; 420 Brin.
For die casting dies, sleeves, slides, plungers; resists heat checking.

HALCOMB PYRO.
M-260, M-38; 0.7 C, 0.9 Cr, 0.2 V, bal Fe.
For hot and cold work impact tools, bull-dozing tools; resists shock and wear.

HALCOMB SPECIAL.
M-260; 1.35 C, 0.24 Mn, 0.25 Cr, bal Fe.
For tools, dies, taps, reamers; water hardened

HALCOMB "S.R.B."
M-38; 1.08 C, 0.37 Mn, 1.37 Cr, bal Fe.
For tools, dies; oil-hardened.

HALCOMB SS TOOL STEEL.
M-38; 1.05 C, 1.2 Cr, 0.3 Mo, bal Fe.
Hardened: C 58-65 Rock.
Oil hardening tool steel.
For broaches, dies, drills, gages, thread rolling dies.

HALCUT.
M-260, M-38; 0.5 C, 1.3 Cr, 2.7 W, bal Fe.
Oil hardened: 400 Brin.
For hot work tools, chisels, shear blades, forging dies; tough and abrasion resistant.

HALDI.
M-260, M-38; 2.25 C, 11.5 Cr, bal Fe.
For dies, swages, punches, shears, drawing dies; air hardening; resists wear and abrasion.

HALDI NO. 2.
M-38; 1.5 C, 11.5 Cr, bal Fe.
For dies, swages, punches, shears, drawing dies; high abrasion resistant.

HALGRAPH.
M-38; 1.5 C, 0.25 Mo, 1 Si, 0.75 Mn, bal Fe.
For machine tool parts; oil hardened; Type O6.

H.A.L.H. STEEL .
Eng.; C, alloy, bal Fe.
For tools, cutters; same as "Stellite."

HALLAMITE.
M-1202; 0.7 C, 14 W, 4 Cr, 1 V, bal Fe.
For turning and planing tools, shear blades, saws; high speed steel, oil hardened.

HALLAMITIER.
M-1202; 0.7 C, 18 W, 4 Cr, 1 V, bal Fe.
For saws, saw blades, taps, broaches, reamers; high speed steel, oil hardened.

HALLAMITIEST.
M-1202; 0.7 C, 22 W, 4 Cr, 1 V, bal Fe.
For hacksaw blades, saws, lathe and planer tools; high speed steel, oil hardened.

HALLAMSTEEL NO. 1.
M-1202; 1.0-1.2 C, bal Fe.
For circular saws, turning and shaping tools; Type W1; water hardened.

HALLAMSTEEL NO. 2.
M-1202; 0.9-1.0 C, bal Fe.
For saws, drills, pneumatic chisels, shear blades; Type W1; water hardeneed.

HALLAMSTEEL NO. 3.
M-1202; 0.8-0.9 C, bal Fe.
For band saws, caulking tools, shear blades; Type W1; water hardened.

HALLAMSTEEL NO. 4.
M-1202; 0.7-0.8 C, bal Fe.
For cutlery, drills, wood saws, stamping dies, Type W1; water hardened.

HALLAMSTEEL NO. 5.
M-1202; 0.6-0.7 C, bal Fe
For awl blades, blacksmith and boilermaker tools; water hardened.

HALLAMSTEEL NO. 6.
M-1202; 0.5-0.6 C, bal Fe.
For scissors, hammers, chisels, water hardened.

HALLIMAX I.
M-1202, 65 Ni, 15 Cr, bal Fe.
Annealed: 100,000 TS; 25-35 El; 55 RA; 142-157 Brin.
For resistances, heating elements; high heat resistant.

HALLIMAX II.
M-1202; 80 Ni, 20 Cr.
Annealed: 95,000 TS, 25-35 El; 55 RA, 142-157 Brin
For resistances, heating elements; high heat resistant.

HALMO
M-38; 0.35 C, 5 Cr, 5 Mo, bal Fe.
For tools and dies, oil or air hardening.

HALVAN
M-38, 0.50 C, 1.0 Cr, 0.7 Mn, 0.2 V, bal Fe.
Hardened: 540 Brin.
For chisels, die holders, fixtures, jigs, punches; shock resistant, tough. AISI L2.

HAMILOY.
M-1514; Si, bal Al
Die cast: 37,000 TS, 24,000 YS, 5-7 El
For die castings; corrosion resistant.

HAMILTON ALLOYED IRON.
M-850; Alloy cast iron
As cast: 25,000-60,000 TS; 20,000-48,000 YS; 145-360 Brin. (as specified)
Higher strength castings.

HAMILTON DUCTILE IRON
M-850; Several grades.
Cast and heat treated. 60,000-175,000 TS; 40,000-150,000 YS, 143-338 Brin (as specified)
High strength and ductility.

HAMILTON DUCTILE NI-RESIST.
M-850; 8 grades, 18-25% Ni castings.
Cast: 55,000-60,000 TS; 28,000-32,0000 YS; 130-240 Brin.
Austenitic, ductile, corrosion resistant, with good strength.

HAMILTON GRAY IRON.
M-850; Gray iron castings.
As cast: 20,000-25,000 TS; 16,000-20,000 YS; 130-220 Brin.
For general purpose cast iron.

HAMILTON MEEHANITE.
M-850; Quality cast iron; 24 Types.
Cast: 30,000-70,000 TS; 24,000-56,000 YS; 174-600 Brin. (as specified)
For high quality gray iron castings

HAMILTON METAL-A.
Eng.; 93 Zn, 3.5 Cu, 3.1 Pb, 1.5 Sb, 0.5 P + Sn.
For ornamental castings; similar to "Chrysorin."

HAMILTON METAL-B.
Eng.; 33.3 Zn, 66.7 Cu.
For drawn, spun and stamped articles; high ductility.

HAMILTON NI-HARD.
M-850; Ni-Cr cast iron.
Cast: 40,000-75,000 TS; 525-600 Brin.
White cast iron, very good wear properties, not machinable; for pump parts, metal working rolls, coffee grinding burrs.

HAMILTON NI-RESIST.
M-850; 8 grades.
Cast: 20,000-30,000 TS, 100-250 Brin.
Ni or Ni-Cu cast iron; good resistance to corrosion and erosion.

HAMMOND ALLOY NO. 1.
M-992; 80-82 Cu, 2.75-3.50 Sn, 6.5-7.5 Pb, 8-10 Zn.
Cast: 29,000-39,000 TS, 13,700-17,000 YS; 16-30 El; 12-27 RA; 50-60 Brin.
For valve and plumbing castings.

HAMMOND ALLOY NO 2.
M-992, 83 Cu, 4 Sn, 6 Pb, 7 Zn.
Cast. 30,000 TS; 14,000 YS; 16 El; 55 Brin
For hydraulic pumps, free-cutting

HAMMOND ALLOY NO. 3
M-992, 84-86 Cu, 4-6 Sn, 4-6 Pb, 4-6 Zn
Cast: 33,000-48,000 TS, 17,000-24,000 YS, 18-35 El, 12-32 RA, 55-65 Brin
For steam valves, bearings, free cutting.

HAMMOND ALLOY NO 4
M-992, 78.5-81.5 Cu, 9-11 Sn, 9-11 Pb, 0.75 max Zn
Cast 32,000-38,000 TS, 17,000-22,000 YS, 15-20 El; 6-17 RA; 60-70 Brin
For motor bearings, castings, tough.

HAMMOND ALLOY NO. 5.
M-992, 86-89 Cu, 9-11 Sn, 1.0 Pb, 1.0-2.5 Zn
Cast: 36,000-46,000 TS, 20,000-26,000 YS, 17-25 El; 12-26 RA, 70-80 Brin.
For bearings, bushings, gears, tough

HAMMOND ALLOY NO 6
M-992; 86-89 Cu, 9-11 Sn, 0.2 max Pb, 1-3 Zn.
Cast: 38,000-45,000 TS; 21,000-26,000 YS; 22-28 El; 20-28 RA; 70-80 Brin.
For gears, worms, hydraulic castings; tough

HAMMOND ALLOY NO. 7
M-992; 87.0-88.5 Cu, 7.75-8.50 Sn, 0.3 max Pb, 3-5 Zn, 0.4-0.6 Ni.
Cast: 40,000-50,000 TS; 18,000-23,000 YS; 25-40 El; 32-37 RA, 65-75 Brin.
For gears, bolts, pipe fittings, valves; steam metal.

HAMMOND ALLOY NO. 8.
M-992; 88 Cu, 10 Sn, 2 Pb.
Cast: 36,000 TS, 19,000 YS; 22 El; 65 Brin.
For gears, bearings; free-cutting.

HAMMOND ALLOY NO. 9.
M-992; 75 Cu, 8 Sn, 15 Pb, 2 Zn.
Cast: 26,000 TS; 15,000 YS; 10 El; 50 Brin.
For bearings, bushings; tough.

HAMMOND ALLOY NO. 10.
M-992; 86 Cu, 7 Sn, 7 Pb.
Cast: 31,000 TS; 19,000 YS; 15 El; 55 Brin.
For bearings; acid resisting.

HAMMOND ALLOY NO. 11.
M-992; 84.5-86.5 Cu, 8.5-9.5 Sn, 3.5-4.5 Pb, 1-2 Zn.
Cast: 36,000-38,000 TS; 20,000-26,000 YS; 24-30 El; 65-75 Brin.
For bearings; shock resisting.

HAMMOND ALLOY NO. 12.
M-992; 82 Cu, 17 Sn, 1 max P.
Cast.
For journals, trunions.

HAMMOND ALLOY NO. 13.
M-992; 80-82 Cu, 10.5-11.5 Sn, 5.5-6.5 Pb, 1.5-2.5 Ni, 0.4-0.5 P.
Cast: 38,000-42,000 TS; 20,000-24,000 YS; 15-22 El; 75-85 Brin.
For bearings; shock resisting.

HAMMOND ALLOY NO. 14.
M-992; 80 Cu, 8 Sn, 10 Pb, 0.5 P, 1.5 Ni.
Cast: 32,000 TS; 18,000 YS; 15 El; 70 Brin.
For bearings; high speed.

HAMMOND ALLOY NO. 15.
M-992; Si, bal Cu.
Cast: 45,000 TS; 22,000 YS, 18 El; 90 Brin.
For worms, gears, pinions; acid resisting.

HAMMOND ALLOY NO. A-21.
M-992; 74.5 Cu, 8 Fe, 13 Al, 0.5 Mn, 4 Ni.
Cast: 60,000 TS, 60,000 YS, 0 El; 295 Brin.
For guides, dies, pistons; Al-bronze.

HAMMOND ALLOY NO. A-22.
M-992, 85 Cu, 3 Fe, 12 Al, 0.25 Mn.
Cast: 68,000 TS, 45,000 YS; 1 El; 225 Brin.
For castings, Al-bronze.

HAMMOND ALLOY NO. A-23.
M-992; 87 Cu, 4 Fe, 9 Al, 0.1 Mn, 0.1 Ni.
Cast: 78,000 TS; 27,000 YS; 32 El; 100 Brin
For castings; Al-bronze.

HAMMOND ALLOY NO. A-24.
M-992; 89 Cu, 1 Fe, 10 Al, 0.1 Mn, 0.25 Ni.
Cast. 80,000 TS, 28,000 YS; 25 El, 115 Brin.
For castings; Al-bronze.

HAMMOND ALLOY NO A-25.
M-992, 86 Cu, 4 Fe, 10 Al, 0.1 Mn, 0.25 Ni.
Cast. 87,000 TS, 28,000 YS; 18 El; 125 Brin
For gears, bushings, Al-bronze.

HAMMOND ALLOY NO. A-26.
M-992; 83.5 Cu, 4.5 Fe, 10.75 Al, 1.25 Mn.
Cast: 90,000 TS; 35,000 YS, 10 El; 165 Brin.
For gears, Al-bronze.

HAMMOND ALLOY NO. A-27
M-992; 79 Cu, 5 Fe, 11 Al, 0.1 Mn, 5 Ni
Cast: 105,000 TS, 50,000 YS; 5 El; 175 Brin.
For castings; Al-bronze.

HAMMOND ALLOY NO. M-16.
M-992, 55-60 Cu, 38-42 Zn, 1.5 max Sn, 3.5 max Mn.
Cast: 60,000 TS, 28,000 YS; 30 El; 90 Brin.
For valve stems, hubs, free machining.

HAMMOND ALLOY NO. M-17.
M-992; Zn, Fe, Mn, bal Cu.
Cast. 70,000 TS; 30,000 YS; 20 El; 125 Brin.
For castings, corrosion resistant.

HAMMOND ALLOY NO. M-18.
M-992; Zn, Fe, Mn, bal Cu.
Cast: 80,000 TS; 40,000 YS; 20 El; 150 Brin.
For castings; corrosion resistant.

HAMMOND ALLOY NO. M-19.
M-992; Zn, Fe, Mn, bal Cu.
Cast: 90,000 TS; 45,000 YS; 15 El; 170 Brin.
For castings; corrosion resistant.

HAMMOND ALLOY NO. M-20.
M-992; Zn, Fe, Mn, bal Cu.
Cast: 100,000 TS; 60,000 YS; 10 El; 235 Brin.
For castings; high strength.

HAMMONIA METAL.
Germ.; 65 Sn, 32 Zn, 3.3 Cu.
For ornamental parts.

HAMPDEN see CARPENTER MEL-TROL HAMPDEN.

HANCODUR.
M-827; C, alloy, bal Fe.
For valves.

HANDLER BHS.
M-1328; 0.60 C, 0.25-0.50 Si, 0.3-0.8 Mn, bal Fe
Heat treated: 160,000 TS; 113,000 YS; 12 El, 40 RA; 325 Brin.
For rails, punches, gears, bolts; water hardened

HANDLER BSD.
M-1328; 0.90 C, 1.9 Cr, 0.1 V, bal Fe.
For bearings, cutters, liners, sleeves; water hardened, wear resistant.

HANDLER BSD SPEZIAL.
M-1328; 1.45 C, 1.4 Cr, 0.6 Mn, bal Fe.
For bearings, cutters, liners, sleeves; water hardened, wear resistant.

HANDLER H18.
M-1309; 0.95 C, 4 Cr, W, V, Mo, bal Fe.
For lathe and planer tools, reamers, broaches; high speed steel.

HANDLER H20.
M-1328; 0.82 C, 4.1 Cr, 0.85 Mo, 1.6 V, 8.7 W, bal Fe.
For lathe and planer tools, reamers, broaches; high speed steel.

HANDLER HC EXTRA AH.
M-1328; 0.85 C, 0.25 max Si, 0.25 max Mn, bal Fe
Heat treated: 190,000 TS; 145,000 YS, 10 El; 30 RA; 400 Brin
For springs, cutters, taps, hobs, reamers; Type W1, water hardened.

HANDLER HC EXTRA HART.
M-1328; 1.3 C, 0.25 max Mn, 0.25 max Si, bal Fe.
For engraving tools, cutters, broaches, Type W1; water hardened.

HANDLER HC EXTRA MH
M-1328; 1.1 C, 0.25 max Si, 0.25 max Mn, bal Fe.
Annealed: 110,000 TS, 55,000 YS; 20 El; 40 RA; 210 Brin.
For springs, cutters, taps, broaches; Type W1; water hardened.

HANDLER HC EXTRA ZH.
M-1328; 1.0 C, 0.25 max Si, 0.25 max Mn, bal Fe.
Annealed: 100,000 TS; 53,000 YS; 21 El; 42 RA; 200 Brin.
For springs, taps, hobs, drills, reamers; Type W1; water hardened.

HANDLER HC PRIMA H.
M-1328; 1.3 C, 0.25 max Mn, 0.25 max Si, bal Fe.
For engraving tools, cutters, broaches; Type W1; water hardened.

HANDLER HC PRIMA MH.
M-1328; 1.15 C, 0.25 max Mn, 0.25 max Si, bal Fe.
Annealed: 110,000 TS; 55,000 YS; 18 El; 40 RA; 210 Brin.
For springs, taps, reamers, broaches; Type W1; water hardened.

HANDLER HC PRIMA WEICH.
M-1328; 0.70 C, 0.25 max Si, 0.25 max Mn, bal Fe.
Heat treated: 175,000 TS; 130,000 YS; 12 El; 37 RA; 355 Brin
For rails, axes, punches, crimpers; Type W1; water hardened.

HANDLER HC PRIMA ZAH.
M-1328, 0.85 C, 0.25 max Si, 0.25 max Mn, bal Fe.
Heat treated. 190,000 TS; 145,000 YS; 10 El; 30 RA; 400 Brin.
For springs, tools, cutters, taps, drills, hobs; Type W1; water hardened

HANDLER HC PRIMA ZAHHART.
M-1328; 1.0 C, 0.25 max Mn, 0.25 max Si, bal Fe
Annealed: 100,000 TS, 53,000 YS; 21 El; 42 RA; 200 Brin.
For springs, tools, cutters, taps, drills, hobs; Type W1, water hardened.

HANDLER HA GUSSTAHL
M-1328, 0.35 C, 0.4 Si, 0.6 Mn, bal Fe
Hot rolled: 85,000 TS; 54,000 YS; 30 El, 53 RA, 185 Brin
For gears, bolts, machine tool parts; water hardened, SAE 1035

HANDLER MV2
M-1328; 0.42 C, 0.1 V, 1.75 Mn, 0.25 Si, bal Fe
For punches, gears, upsetters, header dies; oil hardened, tough

HANDLER NI 3
M-1328; 0.27 C, 1.1 Al, 1.4 Cr, 0.6 Mn, bal Fe
For oil refinery equipment, heat and creep resistant

HANDLER NI 4.
M-1328, 0.34 C, 1.1 Al, 1.4 Cr, 0.6 Mn, bal Fe.
For oil refinery equipment, heat and creep resistant.

HANDLER NI 7.
M-1328, 0.32 C, 1.1 Al, 1.1 Cr, 0.18 Mo, bal Fe
For oil refinery equipment; heat and creep resistant

HANDLER NI 10
M-1328, 0.33 C, 1.1 Al, 1.7 Cr, 1.0 Ni, 0.5 Mn, bal Fe
For oil refinery equipment, heat and creep resistant

HANDLER NI 19
M-1328, 0.31 C, 2.35 Cr, 0.18 Mo, 0.13 V, 0.6 Mn, bal Fe
For oil refinery equipment, heat and creep resistant.

HANDLER SF2
M-1328, 0.70 C, 0.25 max Si, 0.25 max Mn, bal Fe
Heat treated: 174,000 TS, 128,000 YS, 12 El, 37 RA, 350 Brin.
For springs, rails, punches; Type W1 water hardening tool steel.

HANDLER SF3.
M-1328; 0.85 C, 0.25 max Si, 0.25 max Mn, bal Fe
Heat treated: 190,000 TS; 145,000 YS; 10 El; 30 RA; 400 Brin.
For springs, taps, reamers, drills, cutters; Type W1 water hardening tool steel.

HANDLER SF4.
M-1328; 1.0 C, 0.25 max Si, 0.25 max Mn, bal Fe.
Annealed: 100,000 TS; 53,000 YS; 21 El; 42 RA; 200 Brin.
For springs, taps, reamers; Type W1 water hardening tool steel.

HANDLER SF5.
M-1328; 1.1 C, 0.25 max Si, 0.25 max Mn, bal Fe.
Annealed: 100,000 TS; 53,000 YS; 21 El; 42 RA; 200 Brin.
For springs, taps, reamers, cutters; Type W1, water hardened.

HANDLER SF10.
M-1328; 1.0 C, 1.1 Cr, 0.07 Mn, 0.25 Si, bal Fe.
For bearings, cutters, liners, sleeves; water hardened, wear resistant.

HANDLER SF11.
M-1328; 0.85 C, 0.20 Si, 0.30 Mn, 0.30 Cr, bal Fe.
Heat treated: 190,000 TS, 145,000 YS, 10 El, 30 RA; 400 Brin.
For cutters, bearings, liners, sleeves; water hardened, wear resistant.

HANDLER SF12.
M-1328, 1.0 C, 0.10 V, 0.25 Mn, 0.2 Si, bal Fe.
For bearings, dies, cutters, taps; water hardened, wear resistant

HANDLER SF15
M-1328, 0.90 C, Cr, Si, bal Fe
For bearings, dies, cutters, drills, taps, water hardened, wear resistant

HANDLER SF16.
M-1328, 1.05 C, 1.0 Cr, 1.15 W, 0.90 Mn, bal Fe.
For drawing and forming dies, cutters; oil hardened, tough.

HANDLER SF18
M-1328, 0.35 C, 1.05 Cr, 0.18 V, 1.85 W, 0.9 Si, bal Fe.
For heading and forming dies, punches, oil hardened, tough

HANDLER SF21
M-1328, 1.42 C, W, V, bal Fe
For bearings, cutters, liners, sleeves; oil or water hardened

HANDLER SF22
M-1328, 0.30 C, 2.65 Cr, 0.35 V, 8.5 W, bal Fe
For extrusion rams, dies, liners, punches; hot work steel, oil hardened

HANDLER SF25.
M-1328, 0.74 C, 4.1 Cr, 1.1 V, 18.5 W, bal Fe.
For lathe and planer tools, drills, taps, reamers; high speed steel.

HANDLER SF27.
M-1328; 0.79 C, 4.75 Co, 4.3 Cr, 0.75 Mo, 1.5 V, 18 W, bal Fe.
For lathe and planer tools, drills, taps, reamers, high speed steel.

HANDLER SF28.
M-1328, 0.76 C, 10 Co, 4.2 Cr, 0.8 Mo, 1.8 V, 18 W, bal Fe.
For lathe and planer tools, drills; high speed steel.

HANDLER SF29.
M-1328; 0.85 C, W, Mo, bal Fe.
For upsetters, punches, dies; hot work steel.

HANDLER SF41.
M-1328; 0.60 C, 0.25-0.50 Si, 0.30-0.80 Mn, bal Fe.
Heat treated: 160,000 TS; 113,000 YS; 12 El; 40 RA; 320 Brin.
For wheels, die blocks, rails, girders, springs; water hardened.

HANDLER SF43.
M-1328; 0.70 C, 1.7 Si, 0.70 Mn, bal Fe.
For springs, punches, pneumatic tools; oil hardened, tough.

HANDLER SF46.
M-1328; 0.50 C, 0.95 Mn, 1.05 Cr, 0.1 V, bal Fe.
For gears, bolts, crankshafts, springs; oil hardened, shock resistant.

HANDLER SF62.
M-1328; 2.1 C, 11.5 Cr, 0.70 W, bal Fe.
For blanking and forming dies, punches; oil hardened, non-deforming.

HANDLER SF85
M-1328; 0.45 C, Ni, Cr, W, bal Fe.
For forging and heading dies; oil hardened, tough.

HANDLER SF502.
M-1328, 0.12 max C, 0.4 Si, 13 Cr, bal Fe.
Annealed: 75,000 TS, 40,000 YS, 35 El; 70 RA; 155 Brin.
For turbine blades, gages, valves, cutlery; Type 410; stainless.

HANDLER SF511.
M-1328; 0.2 C, 0.4 Si, 13 Cr, bal Fe
Annealed: 95,000 TS; 50,000 YS; 25 El; 55 RA; 196 Brin.
For cutlery, valves, surgical instruments; Type 420, stainless

HANDLER SF512.
M-1328; 0.4 C, 0.4 Si, 13 Cr, bal Fe
Annealed: 100,000 TS; 55,000 YS; 22 El; 52 RA; 200 Brin
For cutlery, valves, surgical and dental instruments, Type 420; stainless

HANDLER SF522
M-1328; 0.2 C, 1.2 Si, 25 Cr, 4 Ni, bal Fe.
Aged 115,000 TS; 80,000 YS; 15 El.
Cast· 70,000 TS, 65,000 YS, 12 El; 190 Brin.
For furnace parts, grate bars, salt pots; heat and corrosion resistant.

HANDLER SF527.
M-1328, 0.12 C, 16.5 Cr, 0.25 Mo, 0.2 S, bal Fe.
Annealed· 80,000 TS; 50,000 YS; 25 El; 50 RA; 150 Brin
For screw machine products, soot blowers, Type 430 F; corrosion resistant.

HANDLER SF553
M-1328, 0.07 max C, 18 Cr, 9.5 Ni, bal Fe.
Annealed. 85,000 TS, 35,000 YS; 60 El; 70 RA, 150 Brin
For chemical plant equipment, tanks, agitators; Type 304; stainless, austenitic.

HANDLER SF555.
M-1328, 0.15 max C, 18 Cr, 8.5 Ni, bal Fe.
Annealed 80,000 TS; 35,000 YS; 55 El; 75 RA; 150 Brin
For chemical plant equipment, tanks, mixers, agitators; Type 302, stainless, austenitic.

HANDLER SF559.
M-1328, 0.10 max C, 12.5 Cr, 12.0 Ni, bal Fe.
For valves, furnace parts; corrosion resistant.

HANDLER SF564.
M-1328; 0.07 max C, 18 Cr, 2.0 Mo, 10.5 Ni, bal Fe.
Annealed: 85,000 TS; 35,000 YS; 50 El; 65 RA; 160 Brin.
For acid resistant chemical plant equipment, tanks; Type 316; stainless, austenitic.

HANDLER SF566.
M-1328; 0.12 max C, 18 Cr, 2 Mo, 10.5 Ni, Cb = 8 × C, bal Fe.
For welded acid resistant chemical plant equipment; Type 316 Cb; stainless, austenitic.

HANDLER SF1951.
M-1328; 0.86 C, 2.5 V, 0.85 Mo, 12 W, bal Fe.
For cutters, forming and drawing dies; high speed steel.

HANDLER SS212.
M-1328; 2.1 C, 11.5 Cr, bal Fe.
For blanking and forming dies, punches; oil hardened, non-deforming.

HANDLER SS308.
M-1328; 1.25 C, 1.15 Si, 0.70 Mn, 1.2 Cr, bal Fe.
For blanking and forming dies, headers; oil hardened, tough.

HANDLER SS511
M-1328; 0.56 C, Ni, Cr, Mo, bal Fe.
For forging and heading dies, shears, punches; oil hardened, shock resistant.

HANDLER SS513.
M-1328; 0.45 C, Si, Cr, V, bal Fe.
For springs, gears, bolts, fasteners, crankshafts; oil hardened, shock resistant.

HANDLER SS514
M-1328, 0.30 C, 2.35 Cr, 0.6 V, 4.25 W, bal Fe
For shear blades, pneumatic tools, chisels; oil hardened, shock resistant.

HANDLER ST Mn 2
M-1328; 0.90 C, 1.9 Mn, 0.10 V, bal Fe.
For punches, shears, blanking and forming dies; oil hardened, non-deforming

HANDY 85 Ag-15 Mn see PREMABRAZE 130

HANDY 94 Cu-6 Ag ALLOY.
M-63, 94 Cu, 6 Ag.
Heat treated. 140,000-165,000 TS.
For spring parts, watch and instrument parts, 70% conductivity, high strength.

HANDY AT SPECIAL see BRAZE 202.

HANDY ATT see BRAZE 200.

HANDY BT see BRAZE 720.

HANDY COIN SILVER.
M-63; 90 Ag, 10 Cu.
For coins; corrosion resistant.

HANDY DE see BRAZE 450.

HANDY DT see BRAZE 400

HANDY ED see BRAZE 451.

HANDY E.T.C. superceded by EASY-FLO

HANDY ETX see BRAZE 501.

HANDY HI-TEMP 90
M-63; 67.5 Cu, 9 Ni, 23.5 Mn, 0.1 max B, 0.1 max Fe
M.P. 1670°F; Flow P 1710°F.
For brazing copper, steel, stainless and nickel base alloys; for combined braze and heat treat.
Ductile, fair corrosion resistance.

HANDY HI-TEMP 095.
M-63; 52.5 Cu, 9.5 Ni, 0.1 max B, 0.1 max Fe, bal Mn.
M.P. 1615°F; Flow P. 1700°F.
For brazing copper, steel, stainless and nickel base alloys; for combined braze and heat treat.
Ductile, fair corrosion resistance. AMS 4764.

HANDY HI-TEMP 710.
M-63; 70.5 Ni, 19 Cr, 10.1 Si, 0.1 max C, 0.1 max Co.
M.P. 1975°F; Flow P. 2075°F.
For brazing stainless steel and high temp alloys.
Good oxidation resistance at high temp.-including against NaK in nuclear reactors.
AMS 4782; AWS BNi-5.

HANDY HI-TEMP 720.
M-63; 72.0 Ni (plus Co), 14 Cr, 4 Si, 3.35 B, 4.5 Fe, 0.75 C.
M P. 1790°F; Flow P. 1900°F.
High temp. brazing alloy for brazing high nickel, cobalt and other high temp. alloys and stainless steels.
Good corrosion resistance and high temp strength
AMS 4775A and AWS B Ni-1

HANDY HI-TEMP 721 (Low Carbon).
M-63; 72 Ni (plus Co), 14 Cr, 4 Si, 3.35 B, 4.5 Fe, 0.6 max C.
M.P. 1780°F; Flow P 1950°F
High temp. brazing alloy for brazing high nickel, cobalt and other high temp. alloys and stainless steels.
Good corrosion resistance and high temp strength
AMS 4776.

HANDY HI-TEMP 820.
M-63; 82 Ni (plus Co), 7 Cr, 4.5 Si, 3.1 B, 3 Fe, 0.15 max C
M.P. 1780°F, Flow P 1830°F.
For brazing stainless steel and high temp alloys; flows into narrow joints
Good corrosion resistance and high temp strength
AMS 4777, AWS B Ni2

HANDY HI-TEMP 910
M-63, 91 Ni (plus Co), 4.5 Si, 3.1 B, 1.5 Fe, 0.06 max C
M P 1800°F, Flow P 1900°F
For brazing stainless steels and high temp alloys, flows into narrow joints
Good corrosion resistance and high temp strength
AMS 4778A, AWS BNi-3

HANDY HI-TEMP 930
M-63, 93 Ni (plus Co), 3.5 Si, 1.6 B, 1.5 Fe, 0.06 max C
M P 1800°F, Flow P 1950°F
For brazing stainless steels and high temp alloys, will bridge wide and irregular joints.
Good oxidation and corrosion resistance
AMS 4779; AWS BNi-4.

HANDY IT see BRAZE 800.

HANDY NE see BRAZE 250

HANDY NT see BRAZE 300

HANDY RE-MN see BRAZE 655

HANDY RE-MN6 see BRAZE 655

HANDY RSNI.
M-63; 63 Ag, 28.5 Cu, 6 Sn, 2.5 Ni.
For silver brazing of 400 series stainless steels; M P 1325-1475°F; overcomes crevice corrosion.

HANDY RT see BRAZE 600

HANDY RT-SN see BRAZE 603.

HANDY SILVER SOLDER see BRAZE 650

HANDY SILVER SOLDER MEDIUM see BRAZE 700.

HANDY SILVER SOLDER HARD see BRAZE 750.

HANDY SN NO 7 see BRAZE 071.

HANDY SS see BRAZE 403.

HANDY SS-5 see BRAZE 404.

HANDY TE SPECIAL see BRAZE 051.

HANDY TL see BRAZE 090.

HANFORD 20.
M-1269; 0.07 max C, 29 Ni, 20 Cr, 2-3 Mo, 4 Cu, bal Fe.
Cast: 65,000-75,000 TS; 28,000-38,000 YS; 50-35 El; 50-40 RA; 120-150 Brin.
For chemical plant equipment, mixers; resists mixed acids, austenitic.

HANOVER WHITE METAL.
U. S.; 86.8 Sn, 7.6 Sb, 5.6 Cu.
For bearings; anti-friction.

HANSA ESPECIAL K5.
M-616; 0.7 C, 18 W, 4 Co, 4 Cr, 1.3 V, bal Fe.
For tools, dies, cutters, drills, taps; high speed steel.

HANSA ESPECIAL K10.
M-616; 0.7 C, 18 W, 9 Co, 1 Mo, 4 Cr, 2 V, bal Fe.
For tools, dies, cutters, reamers, hobs; high speed steel

HANSA ESPECIAL T17 EXTRA.
M-616; 0.7 C, 19 W, 4 Cr, 2 V, bal Fe.
For lathe and planer tools, reamers, drills, broaches, hobs; high speed steel, oil hardened.

HANSA SPEZIAL.
M-1308; 0.74 C, 4.1 Cr, 1.1 V, 18.5 W, bal Fe.
For lathe and planer tools, reamers, broaches, drills; high speed steel

HANSA SPEZIAL 325D
M-1308, 0.95 C, 4.1 Cr, W, Mo, bal Fe
For lathe and planer tools, form cutters, drills, taps, hobs; high speed tseel.

HANSA SPEZIAL K3.
M-1308, 0.86 C, 2.8 Co, 4.3 Cr, 0.85 Mo, 2.1 V, 12 W, bal Fe.
For lathe and planer tools, reamers, broaches, high speed steel.

HANSA SPEZIAL K6.
M-1308, 0.79 C, 4.75 Co, 4.3 Cr, 0.75 Mo, 1.55 V, 18 W, bal Fe.
For drills, taps, hobs, reamers, lathe and planer tools; high speed steel.

HANSA SPEZIAL T17.
M-1308, 0.82 C, 4.1 Cr, 0.85 Mo, 1.6 V, 8.7 W, bal Fe.
For lathe and planer tools, reamers, broaches, drills; high speed steel.

HANSA SPEZIAL T50.
M-1308; 1.3 C, 4.3 Cr, 0.85 Mo, 3.8 V, 12 W, bal Fe.
For engravers' tools, forming cutters, blanking dies; high speed steel.

HARBRONZE
M-1156; Sn, bal Cu.
For bearings.

HARD.
M-388; 1.0 C, bal Fe.
For tools, dies, fixtures; water hardened.

HARD.
M-686; 75 Ag, 22 Cu, 3 Zn.
For silversmithing solder for sterling, M.P. 1365-1450°F.

HARDALLOY.
M-849, 0.43 C, 0.45 Mn, 0.53 Mo, 5.4 Cr, 0.2 Si, bal Fe.
Cast: 575-600 Brin.
For hard surfacing electrode; resists impact, abrasive wear and corrosion.

HARDALLOY 48.
M-849, Cr, bal Fe.
Welded: Rockwell C55.
For hard facing electrode.

HARD BABBITT.
Eng.; 83 Sn, 8.4 Cu, 8.3 Sb.
For bearings; anti-friction.

HARD BEARING.
Eng.; 98.7 Pb, 1.3 Mg.
For bearings.

HARD BRONZE-1.
M-165; 88 Cu, 2 Pb, 7 Sn, 3 Zn.
30,000 TS; 12 El.
For gears, bushings; tough.

HARD BRONZE-2.
M-165; 88 Cu, 10 Sn, 2 Zn.
For gears, bushings; G.M. No. 4048 M.

HARD DEVIL.
M-712, 0.85-1.00 C, bal Fe.
250-400 Brin.
For hard facing welding electrodes.

HARDENITE.
M-502; 0.9 C, 1.2 Mn, bal Fe.
For tools, dies; oil hardened.

HARDENTOUGH 1.
M-118; 0.85 C, bal Fe.
300-425 Brin.
For welding electrodes; hard facing wear resistant

HARDENTOUGH 2.
M-118, C, Mn, Ni, bal Fe.
347 Brin.
For welding electrodes; hard facing wear resistant.

HARDENTOUGH 4.
M-118; C, alloy, bal Fe.
500-600 Brin.
For hard facing welding electrodes; wear resistant.

HARDENTOUGH 5.
M-118, C, alloy, bal Fe.
600-675 Brin.
For hard facing welding electrodes; wear resistant.

HARDENTOUGH 6.
M-118, C, alloy, bal Fe.
700-800 Brin.
For hard facing welding electrodes; wear resistant.

HARDENTOUGH 250.
M-118; C, alloy, bal Fe.
Weld: 230-300 Brin.
For arc welding electrode; hard facing.

HARDENTOUGH 350.
M-118; C, alloy, bal Fe.
Weld: 500 Brin.
For arc welding electrode; hard facing.

HARDENTOUGH 450.
M-118, C, alloy, bal Fe.
Welded: 600 Brin.
For welding electrodes; hard surfacing.

HARDENTOUGH 550
M-118; C, alloy, bal Fe.
Welded: 400-600 Brin.
For arc welding electrodes; hard surfacing.

HARDENTOUGH FORMWEAR.
M-118, C, alloy, bal Fe.
Welded: 500-650 Brin.
For arc-welding electrodes; hard surfacing.

HARDENTOUGH HA.
M-118; C, alloy, bal Fe.
Welded: 575-650 Brin.
For arc welding electrodes; hard surfacing.

HARDENTOUGH MOLYMANG.
M-118; C, 13 Mn, bal Fe.
Weld hardened: 475 Brin.
For arc welding electrodes; abrasion resistant, work hardens.

HARDENTOUGH WH.
M-118; C, alloy, bal Fe.
Cast: 270-380 Brin.
For welding electrodes; hard surfacing.

HARD FACING R 459.
M-9; C, Cr, Mn, Mo, bal Fe.
500-600 Brin.
For hard facing welding rods; wear and heat resistant.

HARDFLEX-11.
M-101; 0.50-0.60 C, 0.6-0.9 Mn, bal Fe.
Heat treated: 128,000-190,000 TS; 107,000-142,000 YS; 10-14 El; 350 DPH; C 36 Rock.
For office and business machine components, electric razors, sewing machines, appliances.
AISI-C1055, Prehardened strip steel, austempered.

HARDFLEX-13M.
M-101; 0.70-0.78 C, 0.7-0.8 Mn, bal Fe.
Hardened: 190,000-228,000 TS, 149,000-200,000 YS; 6-9 El
For office and business machine components, electric razors, sewing machines, appliances.
Prehardened strip steel, austempered AISI-C1074

HARD HEAD.
Eng.; 90 Sn, 8 Sb, 2 Cu.
For bearings; anti-friction.

HARDITE "A."
M-166, 55 Ni, 13 Cr, 1.5-2.0 Si, 2.0 Mn, bal Fe.
At 70°F: 103,000 TS
At 1800°F: 43,000 TS
For carburizing boxes, heating elements, lead pots, retorts, heat resisting.

HARDITE "B."
M-166; 33-35 Ni, 12-14 Cr, 1.5-2.0 Si, 2.0 Mn, bal Fe.
For carburizing boxes, heating elements, lead pots, retorts, heat resisting.

HARDITE "C."
M-166; 93 Ni, 5 Si, 2 Mn.
For heating elements, retorts; high heat resistant

HARDITE "S."
M-166; 88 Ni, 4.5 Si, bal Fe.
For carburizing boxes, heating elements, lead pots, retorts; heat resisting.

HARDITE "X."
M-166; 82-86 Ni, 10-13 Cr, 2-4 Si, 2 Mn.
For heating elements, retorts, heat resisting

HARDITE "Z."
M-166, 6-12 Ni, 15-25 Cr, C, 0.4 Si, 1-3 Mn, bal Fe
For heat treating boxes, furnace parts; stainless.

HARD KOTE "H."
M-139; 1.1 min C, 24-30 W, 16-23 Cr, Ni, bal Fe.
For heat and corrosion resistant parts, tools, dies; heat and corrosion resistant.

HARD KOTE "T."
M-139; 1.1 min C, 24-30 Ni, 16-23 Cr, 16-23 W, bal Fe.
For heat and corrosion resistant parts, tools, dies; heat and corrosion resistant.

HARDNAIR.
M-353; 1.0 C, 5 Cr, 1 Mo, 0.4 Mn, 0.4 V, bal Fe.
Annealed: 103,000 TS; 52,000 YS; 26 El; C 18 Rock.
Hardened: 178,000-253,000 TS; 146,000-200,000 YS; 3-12 El; 7-32 RA; C 41-53 Rock.
For blanking and trimming dies, cams, cutters, gauges, lamination dies, shears.
Type A2 air hardening tool steel, nondeforming.

HARD PHOSPHOR BRONZE.
U.S.; 7 Sn, 0.2 P, bal Cu.
For springs, bearings, electrical parts, gears, strong, corrosion resistant.

HARDRITE.
M-114, M-275; 1.1 C, 1.7 W, 0.6 Cr, 0.25 V, bal Fe.
For light and heavy press dies, punches, taps, reamers, thread rolling dies, knives, cams, forming dies; non-shrinkable, AISI 07.
Was Vulcan Hardrite

HARDROCK 33.
M-829; 7 Co, 18 W, 4 Cr, 1 V, C, bal Fe.
For tool bits, high speed steel.

HARD-ROD NO 100.
M-1096; 0.9 C, 0.6 Mn, 0.3 Mo, 1 Cr, bal Fe.
For hard facing rod; for carbon steels.

HARD-ROD NO. 450.
M-1096, 0.50-0.60 C, 6-8 Cr, 0.6 Si, bal Fe.
Welded: 500 Brin.
For hard facing electrode, for high impact and abrasion

HARD-ROD NO 550
M-1096, 0.6 C, 8 Cr, 0.4 Mn, 0.6 Si, bal Fe.
Welded: 550 Brin
For hard facing electrode, for high abrasion and impact

HARD SILVER SOLDER
Eng ; 80 Ag, 13 Cu, 6.8 Zn
For solder

HARD SOLDER
Eng , 57-50 Cu, 43-50 Zn
For solder

HARDSTEEL NO 2
M-861; 47 Co, 26.8 Cr, 0.7 Mo, trace B, 2.7 Ni, 1.6 W, 0.4 V, 2 Fe.
For hard drills, wear resistant

HARD SURFACE WELDING A-6120
M-12, 0.17-0.22 C, 0.3-0.6 Mn, 0.04 max P, 0.05 max S, 0.15-0.30 Si, 0.8-1.1 Cr, 0.15 min V, bal Fe.
Deposited metal 200-350 Brin
For welding wire (arc or acetylene); hard surfacing for resistance to abrasive wear.

HARDTEM.
M-64, 0.60 C, 0.70 Mn, 0.61 Cr, Ni, 0.17 V, 0.28 Mo, bal Fe
Oil treated: 123,500 TS; 101,500 YS, 53 El, 23 RA, 262 Brin.
For die blocks, drop forged and pressed

HARDWARE BRONZE 267.
M-8; 85 Cu, 13.25 Zn, 1.75 Pb
Soft 40,000 TS; 15,000 YS, 45 El; 72 RA; 62 Brin.
Hard 50,000 TS, 43,000 YS, 20 El; 49 RA; 218 Brin
For bolts, screws, nuts, tie rods

HARDWARE BRONZE-320.
M-8; 85 Cu, 13.25 Zn, 1.75 Pb
Hard: 52,000 TS, 43,000 YS, 20 El; B 55 Rock.
Soft: 40,000 TS; 15,000 YS; 45 El; B 5 Rock.
For screw machine products, hardware, architectural applications.
Elect. cond. 36, corrosion resistant.

HARD YELLOW SOLDER.
Eng.; 58 Cu, 43 Zn, 1.3 Sn, 0.3 Pb.
For solder.

HARDYNE.
M-799; oxides bound with thermoplastic resin.
For permanent magnet; pressed compound oxides.

HARDY NICKEL IRON.
M-435; 0.08 C, 0.20 Mn, 2 Ni, bal Fe.
Annealed: 50,000 TS; 35,000 YS; 35 El; 75 RA; 112 Brin.
For tinning rolls; sub-zero applications.

HARD ZINC (HARTZINK).
Germ.; 92 Zn, 5.3 Fe, 2.4 Pb, 0.1 Cu.
For wash boards.

HARGUS.
M-783; 0.9 C, 1.2 Mn, bal Fe.
For punching and blanking dies; non-deforming.

HARGUS.
M-289, 0.9 C, 1.2 Mn, 0.5 Cr, 0.5 W, bal Fe.
For taps, dies, punches, gauges, reamers; non-deforming, oil hardened.

HARLINGTON BRONZE.
Eng; 56 Cu, 43 Zn, 0.9 Sn, 0.6 Fe.
For sheating, condenser tubes, bolts, nuts; high strength

HARMONIA BRONZE.
Eng; 57-55.7 Cu, 40-41.2 Zn, 0.4-0.46 Pb, 1.8-1.29 Fe, 0-0.5 Sn, 0-0.86 Al.
For fittings, hardware

HARTALUMIN.
Al alloy
For light alloy parts.

HARTMETALLE
German; WC For tools, dies; sintered WC

HARVEY 66S
M-1235, 0.70-1.2 Cu, 0.9-1.8 Si, 0.8-1.4 Mg, 0.6-1.1 Mn, bal Al
O-temper: 22,000 TS, 12,000 YS; 18 El, 43 Brin.
T6-temper: 62,000 TS; 55,000 YS, 8 El; 120 Brin
T4-temper. 52,000 TS; 30,000 YS; 18 El; 90 Brin
For structures, bus and truck bodies, boom scaffolds, age hardenable, good weldability

HARVEY HA-1900
M-1235, 0.0125 max H, 0.07 max N, 0.25 max 0, 0.10 max C, 0.30 max Fe, bal Ti.
Bar. 80,000 min TS, 70,000 min YS; 15 El, 30 RA; 10-11 Charpy impact
For non-structural and moderately stressed aircraft parts, corrosion applications
Alpha titanium, corrosion resistant

HARVEY HA-1930.
M-1235, 99.5 Ti
Annealed: 48,000 TS; 25,000 YS, 35 El
At 600°F: 20,000 TS, 10,000 YS, 50 El.
For chemical plant equipment, high temperature applications
Highest formability. Corrosion resistant.

HARVEY HA-1940.
M-1235; 99.2 Ti
Annealed. 65,000 TS; 43,000 YS; 30 El.
At 600°F. 28,000 TS; 13,000 YS; 45 El.
For aerospace equipment, chemical and marine applications.
Pipe and tubing. Corrosion resistant

HARVEY HA-1940 Pd.
M-1235, 0.15-0.20 Pd, bal Ti.
Annealed: 62,000 TS, 46,000 YS; 27 El.
At 600°F: 28,000 TS; 13,000 YS; 30 El.
At 1000°F: 15,400 TS; 90,000 YS; 31 El.
For chemical industry equipment.
Corrosion resistant grade.

HARVEY HA-1950.
M-1235; 99.0 Ti.
Annealed: 75,000 TS; 63,000 YS; 25 El.
At 600°F: 33,000 TS; 19,000 YS; 33 El.
For marine applications, high temperature applications. Corrosion resistant.

HARVEY HA-1970.
M-1235; 99.0 Ti.
Annealed: 95,000 TS; 80,000 YS; 22 El.
At 600°F: 43,000 TS; 27,000 YS; 28 El.
For marine applications, high temperature components.
Commercially pure titanium. Corrosion resistant.

HARVEY HA-4145.
M-1235; 4 Al, 4 Mn, bal Ti.
Annealed: 148,000 TS; 135,000 YS; 15 El.
At 600°F: 110,000 TS; 90,000 YS; 17 El.
Aged: 162,000 TS, 143,000 YS; 10 El.
For heavy section aircraft components, fasteners, jet engine and guided missile parts.
Alpha-beta titanium alloy.

HARVEY HA-5137.
M-1235; 4.0-6.0 Al, 2.0-3.0 Sn, bal Ti.
Bar: 125,000 TS, 120,000 YS; 18 El; 25 RA; C 35 Rock.
At 600°F: 82,000 TS; 65,000 YS, 19 El
For structural aircraft parts, missiles
Weldable, high strength, alpha titanium, corrosion resistant.

HARVEY HA-5137 ELI.
M-1235, 5 Al, 2.5 Sn, low 0, bal Ti
Annealed. 110,000 TS; 95,000 YS; 20 El.
At 600°F 78,000 TS, 60,000 YS; 20 El.
For cryogenic applications, missile and aircraft components
Alpha-titanium, corrosion resistant.

HARVEY HA-5158.
M-1235, 6 Al, 6 V, 2 Sn, 1 (Fe, Cu), bal Ti.
Annealed: 160,000 TS, 155,000 YS; 15 El.
Aged: 190,000 TS; 180,000 YS; 10 El.
For ordnance applications and aircraft components, pressure vessels
Alpha-beta titanium alloy. Hardenable.

HARVEY HA 6148
M-1235, 5.5-6.5 Al, 3.5-4.5 V, bal Ti.
Bar. 130,000 min TS; 120,000 min YS, 10 El; 25 RA, C 38 Rock.
For airframe and jet engine compressor parts, ordnance equipment
Alpha-beta titanium, corrosion resistant.

HARVEY HA-6510
M-1235, 6 Al, 4 V, bal Ti.
Annealed 140,000 TS, 130,000 YS; 18 El
At 600°F: 105,000 TS; 95,000 YS; 11 El.
Aged: 165,000 TS; 155,000 YS; 13 El.
For airframe and jet engine components, ordnance equipment.
Heat treatable to high strength. Alpha-beta type.

HARVEY HA-6510 ELI.
M-1235; 6 Al, 4 V, low 0, bal Ti.
Annealed: 135,000 TS; 125,000 YS; 20 El.
At 600°F: 105,000 TS; 95,000 YS; 12 El.
For cryogenic applications. Aircraft and missile components.
Heat treatable. Alpha-beta alloy.

HARVEY HA-7146
M-1235; 7 Al, 4 Mo, bal Ti.
Annealed: 160,000 TS; 150,000 YS, 16 El.
At 600°F: 127,000 TS; 108,000 YS; 18 El.
Aged: 185,000 TS; 175,000 YS; 15 El.
For engine and airframe applications, jet engine and missile components.
Heat treatable; High creep strength.

HARVEY HA-8116.
M-1235; 8 Al, 1 Mo, 1 V, bal Ti.
Annealed: 140,000 TS; 130,000 YS; 15 El.
At 1000°F: 95,000 TS; 73,000 YS; 14 El; 30 RA.
For aircraft and jet components, discs, spacers and blades.
High strength, long time creep resistant, high temperature stability.

HARVILL NO. 1.
M-830; 0-1.5 Al, 0-0.4 Pb, 0-1.5 Sn, 38-42 Zn, 3.5-4.5 Mn, 55-60 Cu.
Cast: 65,000 TS; 30,000 YS; 10 El; 100-130 Brin.
For casting; corrosion resistant.

HARVILL NO. 2.
M-830; 7-9 Al, 2.5-4.5 Ni, 85-87 Cu.
Cast: 75,000 TS; 25 El; 110 Brin.
For die castings; Al Bronze.

HARVILL NO. 3.
M-830; 18 Ni, 55-64 Cu, bal Zn.
Cast: 55,000 TS; 35,000 YS; 10 El; 115 Brin.
For die castings; white Ni brass.

HARVILL NO. 4.
M-830; 57-59 Cu, 0.5-1.5 Sn, 40-42 Zn.
Cast: 55,000 TS; 40,000 YS; 15 El; 130 Brin.
For die castings; yellow brass.

HARZ REFINED LEAD.
M-382; 99.9 Pb.
For lead tubes and sheets for chemical industry; corrosion resistant.

HAS-ALL.
M-497; 0.7 C, 18 W, 4 Cr, 1 V, bal Fe.
For high speed tools; high speed steel.

HASCROME ALLOY.
M-167; 1.0 C, 14 Cr, 0.5 max Mn, bal Fe.
Welded: 40,000 TS; 250-500 Brin.
For hard facing welding rod; hardens on peening, tough.

HASS.
Eng.; 4.5 Cu, 0.75 Mn, 1.0 Si, bal Al.
For aircraft structures; age-hardening alloy.

HASTELLOY ALLOY 500.
M-167; 16-20 Co, 16-20 Cr, 3-5 Mo, 2 max Fe, 0.10 max C, 2.5-3.5 Al, 2.5-3.2 Ti, 0.01 B, bal Ni.
At 70°F: 195,000 TS; 125,000 YS; 18 El; 23 RA; 400 Brin.
At 1000°F: 185,000 TS; 118,000 YS; 10 El; 15 RA.
At 1400°F: 150,000 TS; 110,000 YS; 20 El; 27 RA.
For high temperature applications, turbine buckets, jet engine components; vacuum melted, age-hardenable, heat resistant to 1700°F.

HASTELLOY ALLOY 700.
M-167; 0.10 C, 0.007 B, 2.9 Cr, 2.9 Ti, 18 Co, 18 Cr, 4 Mo, 2 max Fe, bal Ni.
Aged: 171,000 TS; 104,000 YS; 25 El; 27 RA.
At 1600°F: 84,000 TS; 56,000 YS; 7 El; 8 RA.
For turbine buckets, jet engine components; heat resistant to 1700°F, age-hardenable.

HASTELLOY ALLOY B.
M-167; 26-30 Mo, 4-6 Fe, 0.12 max C, 62 Ni.
Cast: 82,000 TS; 57,000 YS; 9 El; 13 RA; 230 Brin.
Rolled: 140,000 TS; 65,000 YS; 45 El; 45 RA; 235 Brin.
For agitators, heating and cooling coils, pump parts, valves; resists HCl and boiling H_3PO_4.

HASTELLOY ALLOY C.
M-167; 16-18 Mo, 13.0-17.5 Cr, 3.7-5.3 W, 4.5-7 Fe, bal Ni.
Cast: 72,000-80,000 TS; 45,000-48,000 YS; 15-10 El; 16-11 RA; 175-215 Brin.
Rolled: 130,000 TS; 65,000 YS; 25 El; 210 Brin.
For pumps and valves for H_2SO_4 at high temperature; resists SO_3, P_2O_5 and Cl_2.

HASTELLOY ALLOY C-276.
M-167; 14.5-16.5 Cr, 15.0-17.0 Mo, 2.5 max Co, 3.0-4.5 W, 4.0-7.0 Fe, 0.02 max C, 1.0 max Mn, bal Ni.
Hardenable by cold work plus aging from 90 Rock B to max of 49 Rock C.
Excellent corrosion resistance even to such chemicals as wet chlorine gas and hypochlorites.

HASTELLOY ALLOY D.
M-167; 11 max Si, 4 max Cu, bal Ni.
Cast: 36,000-40,000 TS; 35,000-40,000 YS; 0 El; 0 RA; 484-547 Brin.
Pump valves; resists HCl and H_2SO_4, but not HNO_3 or Cl_2.

HASTELLOY ALLOY G.
M-167; 21-23.5 Cr, 5.5-7.5 Mo, 1.0 max W, 1.0-2.0 Mn, 2.5 max Co, 1.0 max Si, 18-21 Fe, 0.05 max C, 1.5-2.5 Cu, 1.75-2.50 Cb + Ta, bal Ni.
Alloy with excellent resistance to hot sulphuric and phosphoric acids. For chemical plant equipment.

HASTELLOY ALLOY N.
M-167; 6-8 Cr, 15-18 Mo, 5 Fe, 0.04-0.08 C, 0.5 Al, 0.01 B, bal Ni.
Annealed: 86,400 TS; 37,300 YS; 17 El.
For containers for molten fluorides; oxidation resistant to 1800°F.

HASTELLOY ALLOY W.
M-167; 0.12 C, 5 Cr, 24.5 Mo, 2.5 Co, 5.5 Fe, 0.6 V, 1 Mn, 1 Si, bal Ni
For high temperature applications, corrosion and heat resistant.

HASTELLOY ALLOY X.
M-167; 0.05-0.20 C, 20.5-23.0 Cr, 17-20 Fe, 8-10 Mo, 0.5-2.5 Co, 0.2-1.0 W, bal Ni.
At 70°F: 113,000 TS; 55,800 YS; 44 El
At 1200°F: 83,000 TS; 40,700 YS; 37 El.
At 1800°F: 21,000 TS; 17,000 YS; 43 El.
For aircraft and jet engine components; good creep and stress rupture properties.

HATHAL-A.
M-1548, 3.0-5.0 Cu, 0.4 Si, 0.4-1.0 Mn, 0.3-1.0 Mg, bal Al.
Heat treated: 23,000-65,500 TS; 10-25 El; 40-120 Brin.
For rivets, hydraulic fittings, hardware.
Age-hardenable. Aluminum 2014.
Good machinability and weldability.

HATHAL-B.
M-1548; 0.2-1.0 Si, 0.2-0.6 Mn, 2.0-8.0 Mg, bal Al.
Heat treated: 31,000-54,000 TS; 5-20 El; 50-85 Brin.
For structural members, marine hardware, fasteners.
Age hardenable. Corrosion resistant.

HATHAL-C.
M-1548; 0.5-1.0 Si, 0.3-1.5 Mn, 0.8-1.5 Mg, bal Al.
Heat teated: 14,000-43,000 TS; 6-22 El; 30-80 Brin.
For structures, marine parts, screw machine products.
Age-hardenable. Corrosion resistant.

HAVAR.
M-1084; 42.5 Co, 13 Ni, 20 Cr, 2 Mo, 0.2 C, 0.04 Be, 1.6 Mn, 2.8 W, bal Fe.
Rolled: 260,000-290,000 TS; 200,000-220,000 YS; 48-50 El.
Aged: 330,000-360,000 TS; 260,000-280,000 YS; 56-60 El.

For watch and power springs, valves, flapper valves, electronic parts, age-hardenable, high strength and fatigue resistance.

HAVOC.
M-373; 0.5 C, 1.0 Si, 0.2 V, 0.5 Mo, bal Fe.
For plug gages, reamers, arbors, punches; water hardening, shock resistant.

HAWK 777.
M-362; 0.7 C, 0.09 Cr, 0.8 Mn, 0.7 Mo, bal Fe.
For drills, cutters, punches, mandrels; oil hardened.

HAWK 977.
M-362, 0.90 C, 0.09 Cr, 0.72 Mo, bal Fe.
For rivet punches; oil hardened; tough.

HAWK 3110.
M-362; 0.10 C, 0.70 Mn, 1.25 Ni, 0.65 Cr, bal Fe.
For plastic mold and die casting dies; case hardened.

HAWK A-2
M-362; 1.0 C, 0.7 Mn, 0.3 Si, 5.25 Cr, 0.3 V, 1.15 Mo, bal Fe.
AISI Type A2 air hardening tool steel.

HAWK A-2-S.
M-362; 1.0 C, 0.7 Mn, 0.3 Si, 5.25 Cr, 0.3 V, 1.15 Mo, 0.15 S, bal Fe.
Free machine grade.
AISI Type A2 air hardening tool steel

HAWK BRAND
M-362, 0.60-1.40 C, 0.15-0.30 Mn, 0.15-0.30 Si, bal Fe
For general tools, dies, shallow hardening, fine grained

HAWKS BRAND WHITE METAL
M-410, 53.2 Sn, 7.87 Sb, 0.48 Cu, 38.48 Pb
For bearings, castings

HAWK COLD HEADER DIE.
M-362, 0.95 C, bal Fe
For heading dies; tough, water hardened.

HAWK D2.
M-362, 1.55 C, 0.35 Mn, 0.45 Si, 11.5 Cr, 0.9 V, 0.8 Mo, bal Fe.
Air or oil hardening cold work tool and die steel, chromium type; AISI D2.

HAWK D2S
M-362; 1.55 C, 0.35 Mn, 0.45 Si, 11.5 Cr, 0.9 V, 0.8 Mo, 0.15 S, bal Fe.
Air or oil hardening cold work tool and die steel, chromium type, free machining grade; AISI D2.

HAWK O1.
M-362, 0.90 C, 1.25 Mn, 0.5 Cr, 0.5 W, bal Fe.
AISI Type O1 oil hardening tool steel.

HAWK SPECIAL.
M-362, 0.90-1.40 C, 0.20-0.30 Cr, 0.15-0.30 Mn, 0.40-0.60 Si, bal Fe.
For general tools, dies, cutters, taps, drills; holds its cutting edge.

HAWK SS EXTRA.
M-362; 1.05 C, 1.2 Cr, 0.3 Mo, bal Fe
For tools, dies; Type L7.

HAWK STANDARD.
M-362; 0.7-1.2 C, bal Fe.
For tools, dies; water hardening.

HAWK VANADIUM.
M-362; 0.70-1.40 C, 0.15-0.25 V, 0.15-0.30 Mn, 0.15-0.30 Si, bal Fe.
For general tools, dies, cutters, punches; tough.

HAWK W1.
M-362; 0.95-1.05 C, Mn, Si, bal Fe.
AISI Type W1 water hardening tool steel.

HAYNES ALLOY NO. 25.
M-167; 19-21 Cr, 14-16 W, 9-11 Ni, 0.15 max C, 2 max Fe, bal Co.
Annealed: 155,000 TS; 70,000 YS; 50 El; 130 Brin.
For turbine blades and discs, combustion chambers, jet stack; corrosion and heat resistant.

HAYNES ALLOY 40.
M-167; 73 Ni, 14 Cr, 0.4 C, 4 Si, 3 B, 5 others.
Welded: 30,000 TS, 0 El; 580-640 Brin.
For hard surfacing electrodes; abrasion and galling resistant.

HAYNES ALLOY 41.
M-167; 76 Ni, 11.5 Cr, 0.4 C, 4 Si, 2.5 B, 5 other elements.
Welded: 60,000 TS, 0 El; 480-540 Brin.
For hard facing electrode, resists galling, abrasion and corrosion

HAYNES ALLOY NO. 44.
M-167, 9 Cr, 3 Si, 0.45 C, 3.75 Fe, 2 B, bal Fe.
Welded: 350-420 Brin.
For hard facing electrode; resists impact, corrosion and impact resistant.

HAYNES ALLOY NO 88.
M-167, 0.07 C, 1.4 Mn, 12 Cr, 15 Ni, 2 Mo, 0.5 W, 0.5 Ti, 0.1 B, bal Fe.
Cold drawn: 104,000 TS; 85,000 YS; 32 El, 63 RA; 233 Brin.
For high temperature bolts, turbine discs and blades; heat resistant, good relaxation properties

HAYNES ALLOY NO 90
M-167, 2.75 C, 27 Cr, 0.65 Mn, bal Fe.
Welded 63,000 TS, 500 Brin.
For hard facing rod, resists heat and abrasion

HAYNES ALLOY NO 92
M-167; 10 Mo, bal Fe
Welded: 25,000 TS
For hard facing electrodes; resists abrasion, bare rod.

HAYNES ALLOY NO 93
M-167, 3 C, 15-19 Cr, 13-17 Mo, 4-7 Co, 0.5-3.0 V, bal Fe.
Heat treated: 90,000 TS, 90,000 YS, 0 El; 0 RA, 650-745 Brin
For hard surfacing electrode, abrasion resistant, high cold hardness.

HAYNES ALLOY NO. 94
M-167; 32 Cr, 3.5 C, 1.6 Mn, 1 Mo, 0.3 max Si, bal Fe
Welded: 580 Brin.
For hard facing electrode; resists corrosion and oxidation.

HAYNES ALLOY NO 151.
M-167; 0.48 C, 0.06 B, 20 Cr, 12.8 W, 3 max Fe + Ni, bal Co.
Cast: 103,000 TS; 74,000 YS; 8 El; 330 Brin.
For turbine vanes, high temperature applications; good creep-rupture properties to 1800°F.

HAYNES ALLOY NO. 188.
M-167, 20-24 Cr, 20-24 Ni, 13-16 W, 3 max Fe, 0.05-0.15 C, 0.20-0.50 Si, 1.25 max Mn, 0.03-0.15 La, bal Co.
Sheet, H.T., Room T.: 139,400 TS; 69,500 YS; 56 El.
Sheet, H.T., 1800°F 36,800 TS; 23,500 YS; 72 El
For high temperature applications in aircraft, space, gas turbine, nuclear industries.
Weldable, oxidation and corrosion resistant.

HAYNES ALLOY NO. 713C.
M-167; 0.08-0.20 C, 11-14 Cr, 3.5-5.5 Mo, 6 Al, 0.6 Ti, 2 Cb, 2.5 max Fe, 0.04 Zr, 0.01 B, bal Ni.
At 70°F: 123,000 TS, 108,000 YS; 7.6 El; 9.9 RA.
At 1800°F: 72,000 TS; 51,300 YS; 14.0 El; 28.0 RA.
For jet engine blades; vacuum melted, vacuum cast, age-hardenable.

HAYNES 4560.
M-167; 0.6 C, 5 Cr, 0.8 Mn, 0.8 Mo, bal Fe.
Welded: 450 Brin.
For hard facing rod; resists cold abrasion.

HAYNES 4561 ALLOY.
M-167; 2.5 Cr, 0.55 C, 1.1 Mn, 0.4 Mo, 0.5 Si, bal Fe.
Welded: 550 Brin.
For hard facing electrode; heavy impact and moderate abrasion resistance.

HAYNES 5260.
M-167, 9 Cr, 1 C, 0.6 Mn, 1.15 Mo, bal Fe
Welded. 520 Brin.
For hard facing rod, low crack sensitivity.

HAYNES 5261 ALLOY.
M-167; 5.5 Cr, 0.70 C, 1.15 Mn, 0.50 Mo, 0.8 Si, bal Fe.
Welded· 570 Brin.
For hard facing electrode; wear resistant.

HAYNES 5461 ALLOY
M-167, 3 C, 12 Cr, 2.5 Mn, 1.5 Si, 1.5 Mo, bal Fe
Welded: 550 Brin
For hard facing electrode; corrosion and erosion resistant.

HAYNES L-605 replaced by **HAYNES ALLOY No. 25**

HAYNES ALLOY NO R-41.
M-167, 0.12 max C, 18-20 Cr, 5 max Fe, 10-12 Co, 3.0-3.3 Ti, 9.0-10.5 Mo, 1.4-1.8 Al, B, bal Ni
Heat treated. 140,000-206,000 TS; 97,000-154,000 YS; 9-18 El; 400 Brin
For high temperature applications, jet engine components; age-hardenable, high oxidation resistance.

HAYNES NICKEL-MANGANESE.
M-167, 0.50 C, 0.70 Cr, 13.5 Mn, 3.5 Ni, 0.8 Si, bal Fe.
Welded. 127,000 TS; 185-450 Brin.
For hard facing electrode; work hardens, abrasion and impact resistant.

HAYNES PATENT.
U S; 8-60 Cr, 1.0 max C, bal Fe
For tools, dies, corrosion and heat resisting parts; stainless and corrosion resistant.

HAYNES STELLITE ALLOY NO. 3.
M-167; 2.5 C, 48-53 Co, 28-32 Cr, 12-16 W, 3 max Ni.
Cast: 68,000 TS; 68,000 YS; 0 El; 0 RA; 600 Brin
For cutting tools, wear resistant castings; heat, wear and corrosion resistant.

HAYNES STELLITE ALLOY NO. 4.
M-167; 0.6 C, 51 Co, 30 Cr, 14 W, 3 max Ni.
Cast: 39,100 TS; 39,100 YS; 1 El, 1 RA, 444 Brin.
For castings for wear resistant cutting tools and dies; heat, wear and corrosion resistant.

HAYNES STELLITE ALLOY NO. 6.
M-167; 1.1 C, 55 min Co, 33 max Cr, 6 max W, 3.5 max Fe, 3 max Ni
Cast: 105,000-120,000 TS; 105,000-120,000 YS; 3 El, 3 RA; 402 Brin.
For hard facing welding rod, tools; heat, wear and corrosion resistant.

HAYNES STELLITE ALLOY NO. 6B.
M-167; 1.1 C, 30 Cr, 4.5 W, 3 max Fe, 3 max Ni, bal Co.
Plate: 148,000 TS; 88,000 YS; 7 El; 9 RA; 380 Brin.
Sheet· 165,000 TS; 110,000 YS; 5 El; 430 Brin.
For high temperature applications, valve parts, liners; heat and corrosion resistant.

HAYNES STELLITE ALLOY NO. 6K.
M-167; 1.6 C, 31 Cr, 4.5 W, 3 max Fe, 3 max Ni, bal Co.
Sheet· 176,500 TS; 3.5 El; 460 Brin
At 1500°F. 70,200 TS, 17.0 El
For high temperature applications, knives, scrapers; heat and corrosion resistant.

HAYNES STELLITE ALLOY NO 12.
M-167; 1.35 C, 47 Co, 34 max Cr, 10 max W, 3 max Fe, 3 max Ni.
Cast· 100,000-115,000 TS, 100,000-115,000 YS; 0 El, 0 RA, 387-477 Brin.
For hard facing welding rod, heat, wear and corrosion resistant.

HAYNES STELLITE ALLOY NO 19
M-167; 53 Co, 31 Cr, 10 W, 1.8 C, 4 other elements
Sand cast 110,000 TS, 1 El, 550 Brin
Permanent mold. 116,000 TS, 1 El, 580 Brin
For nozzle disks, cutting tools, bearings; red hard, abrasion and shock resistant

HAYNES STELLITE ALLOY NO 21
M-167, 0.20-0.35 C, 25-30 Cr, 4.5-6.5 Mo, 1.5-3.5 Ni, 2 max Fe, bal Co
Cast· 100,000 TS, 82,000 YS, 9 El, 9 RA, C-32 Brin
At 1500°F 62,200 TS.
For welding rod, jet engine parts, turbine blades, impeller blades, resists extreme heat

HAYNES STELLITE ALLOY NO 31
M-167, 0.45-0.6 C, 23-28 Cr, 6-9 W, 9-12 Ni, 2 max Fe, bal Co.
Cast· 113,000 TS, 80,000 YS, 8 El; 10 RA, C-30 Brin
For turbine blades, jet engines, high heat resistant

HAYNES STELLITE 98M2 ALLOY.
M-167, 1.8 C, 35 min Co, 35 max Cr, 20 max W, 4.5 Fe, 0.7 Mo, 4.5 V, 3 Ni, 1.2 B
Cast. 65,000-75,000 TS, 65,000-75,000 YS; 0 El, 0 RA, 680-700 Brin
For cutting tools, valves, dies, wear, heat and abrasion resistant

HAYNES STELLITE STAR J METAL
M-167, 2.4 C, 3 Fe, 2.5 Ni, 0.2 B, 35 Cr, 20 max W, 40 min Co.
Cast· 55,000-65,000 TS, 55,000-65,000 YS, 0 El; 0 RA, 640-670 Brin
For tool bits, form tools, milling cutters; wear, heat and abrasion resistant.

HAYWOOD'S HIGH TENSILE BRONZE GRADE 8
M-411; 35 Zn, 7 Al, bal Cu.
Forged. 86,000 TS, 61,000 YS, 36 El, 115 Brin.
For corrosion resisting, high strength cast and forged bronze parts, non-corrosive.

HAZEL BRONZE
M-575; Cu alloy.
For nuts, bolts, studs.

HB see FINKL HB.

HB 5.
10.5 Al, 4 Fe, 4 Mn, 1 Zn, 0.5 Cr, bal Cu
For gears; corrosion resistant Al bronze.

"H" BRAND.
M-40; 0.95 C, 0.35 Cr, 0.2 Si, 1.0 Mn, bal Fe.
For dies, punches; non-deforming.

HC 5.
M-459; 0.1 C, 2.5-2.7 Cr, 0.35 Si, 0.4 Mn, bal Fe
For case hardened parts, dies; carburizing steel.

HC 8.
M-459; 0.25 C, 2.5-2.7 Cr, 0.4 Si, 0.35 Mn, bal Fe
For case hardened parts; carburizing steel.

HC 9.
M-459, 0.2 C, 3-3.2 Cr, 0.25 Mo, 5 V, bal Fe.
For case hardened parts, carburizing steel

HC250
M-1099, C, Cr, bal Fe
Annealed 85,000 TS; 70,000 YS; 3 El, 350 Brin.
Heat treated· 100,000 TS; 80,000 YS, 750 Brin.
For cylinder liners, fan blades, molds, nozzles,
abrasion resistant, hot gas resistant

H.C.A. see **BRAEBURN HCA**

HC-HC.
M-432, 1.85 C, 12.25 Cr, bal Fe
For punches and dies; non-deforming

H C PICK STEEL.
M-38, C, alloy, bal Fe
For mining picks, water hardened

H C POKER BAR STEEL.
M-38, C, bal Fe.
For mining poker bars; water hardened

"HC" QUALITY.
M-179, 60 min Cu, 2 min Pb, bal Zn.
Extruded 55,000 TS; 30-35 El; 25 RA, 100 Brin
Drawn 60,000 TS, 25 El, 22 RA, 110 Brin.
For spun parts, hardware, free-cutting

H.C R
M-108, 50 Ni, 50 Fe, 0.2 Mn, 0.05 Si, 0.005 C,
0.005 S
Rolled. 50,000 TS; 95 Brin
For soft magnets, transformer and choke coils,
high magnetic permeability

H D.A 8151.
M-167, 66.0 Co, 20.0 Cr, 12.5 W, 0.05 B,
0.5 C, 0.6 Mn, 0.6 Si
For jet engine components
High temperature alloys, heat and
corrosion resistant.

HDW 2.
M-57; 0.4 C, 5 Cr, 0.25 V, 1.5 Mo, 0.8 Si, bal Fe
For dies, mandrels, shear blades,
hot work steel, tough

HDW 3.
M-57, 0.4 C, 5 Cr, 1.5 Mo, 1.4 W, 0.8 Si, bal Fe
For dies, mandrels, shear blades,
hot work steel, tough

HE-30
M-833, 3.2-3.3 C, 2.2 Si, 0.8 Mn, bal Fe.
Cast. 30,000-40,000 TS; 180-200 Brin
For motor blocks, machine tool beds, gibs; cast iron.

HE-40
M-833; 3.1-3.25 C, 1.6-1.8 Si, 0.8 Mn, bal Fe.
Cast. 40,000-50,000 TS, 200-240 Brin
For radical drill, arms and bases; cast iron.

HE-50.
M-833, 2.9-3.1 C, 1.3-1.5 Si, 0.8 Mn, bal Fe.
Cast. 50,000-60,000 TS; 230-265 Brin
For machine tool runways, saddles, gears; cast iron.

HE-60
M-833; 2.9-3.1 C, 1.3-1.5 Si, 0.8 Mn, 1.25-1.5 Ni,
0.5 Mo, bal Fe.
Cast: 60,000-70,000 TS; 240-280 Brin.
For crankshafts, hydraulic rams; cast iron, tough.

HE 2048.
U.S.; 0.4 C, 15 Co, 30 Ni, 21 Fe, 26 Cr, 4 Mo, 2 W,
0.15 B.
Cast.
For high temperature applications;
high strength, heat resistant.

HEAT RESISTANT STEEL
Eng ; 70 Fe, 15 Cr, 14 Co, 0.5 Mn, 0.5 C, 0.5 Si.
For corrosion and heat resisting parts;
corrosion and heat resistant; U. S. Pat. 1357549.

HEAT RESISTING ACID METAL.
M-126; 55 Cu, 6 Pb, 9 Zn, 30 Ni.
For chemical apparatus; acid resistant

HEAVY ALLOY.
M-831; 76-90 W, 1-16 Ni, 3-20 Cu.
Sintered. 80,000 TS, 74,000 YS; 1 El, 290 Brin.
For balancing crankshafts of aero motors;
powder metals.

HEAVY AXLE BEARING.
Eng , 47 Zn, 38 Sn, 6 Sb, 4 Pb, 1 Cu
For axle bearings; anti-friction.

HEAVY BEARING.
Eng , 85 Sn, 7.5 Cu, 7.5 Sb.
For bearings, bushings, anti-friction.

HEAVY DUTY SW-16.
M-605, 0.2 C, bal Fe.
For welding electrodes, for light gage steel

HEAVY METAL TM-17
M-1189, Cu, Ni, bal W
Sintered 100,000 TS; 90,000 YS; 4 El, 250-300 Brin
For radioactive shields, pendulums,
counterbalance weights, density 16.7.

HEAVY METAL TM-18.
M-1189, Cu, Ni, bal W
Sintered 117,000 TS; 108,000 YS, 2.5 El;
250-300 Brin
For radioactive shields, pendulums,
counterbalance weights, density 18.0

HEAVY METAL TM-170
M-1189, Cu, Ni, bal W
Sintered 110,000 TS, 95,000 YS, 4 El, 250-300 Brin.
For radioactive shields, pendulums,
counterbalance weights, density 17.0

HEAVY METAL TM-175.
M-1189, Cu, Ni, bal W.
Sintered. 117,000 TS, 102,000 YS, 3.5 El,
250-300 Brin
For radioactive shields, pendulums,
counterbalance weights, density 17.5

HEAVY PRESSURE.
M-88; Sb, Cu, bal Sn
Cast: 30 Brin
For bearings for crushers, heavy duty Babbitt.

HEAVY PRESSURE MILL GLYCO.
M-240, Sn, Sb, bal Pb.
For bearings, Babbitt

HEAVY TUNGSTEN ALLOY CLASS 1.
M-793, 97.5 W, 2.5 Ni.
322 Brin.
For radioactive shielding, balance weights,
sintered, density 18.6.

HEAVY TUNGSTEN ALLOY CLASS 2.
M-793, 95 W, 5 Ni + Cu.
Sintered: 50,000 TS, 270-290 Brin
For radioactive shielding, gyroscope components;
sintered, density 18.0-18.5.

HEAVY TUNGSTEN ALLOY CLASS 3.
M-793; 90 W, 10 Ni + Cu.
Sintered: 80,000 TS; 3 El; 305 Brin.
For radioactive shielding, gyroscope components; density 17.0-17.5.

HEAVY TUNGSTEN-W2.
M-793; 97.5 W, 2.5 Ni.
For shielding, isotope containers, gyro parts, counterweights, electrical contacts.
Heavy metal.

HEAVY TUNGSTEN-W5.
M-793; 95 W, 3.3 Ni, 1.7 Cu.
For rocket nozzles, jet and guide vanes.
Heavy metal, heat resistant.

HEBONITE.
Eng.; C, alloy, bal Fe
For heat resistant parts; heat resistant.

HECLA
M-122; 60 Cu, 1 Pb, 0.7 Sn, bal Zn.
Drawn: 74,000 TS; 43,000 YS; 21 El; 25 RA; 137 Brin.
Normalized: 63,000 TS; 51,000 YS, 43 El; 46 RA; 100 Brin.
For screw machine parts, hot pressings; corrosion resistant, free-cutting.

HECLA.
M-275; 0.5 C, 0.2 V, 0.2 W, 1.0 Cr, bal Fe.
For arbors, spindles, gears, drop hammer clutches, leaf springs, piston rods;
resists vibration and shock. AISI L2.
Was Vulcan Hecla

HECLA NO. 7.
M-122, 60 Cu, 1 Pb, 0.7 Sn, bal Zn.
For screw machine products;
free cutting, corrosion resistant.

HECLA 10
M-62; 0.50-0.60 C, 0.5-0.8 Mn, 0.05-0.35 Si, 0.5-0.8 Ni, bal Fe.
Annealed: 100,000 TS; 55,000 YS; 22 El; 190 Brin
Heat treated: 160,000 TS; 110,000 YS; 12 El; 330 Brin.
For structural parts, shafts, gears, axles, countershafts, punches
Water or oil harden, tough, shock resistant

HECLA NO 13.
M-122, 60 Cu, 1.8 Pb, 0.7 Sn, bal Zn.
Soft: 58,000 TS, 28,000 YS; 35 El; 83 Brin.
½ H-temper: 65,000 TS; 38,000 YS; 25 El; 125 Brin
H-temper: 75,000 TS; 52,000 YS; 20 El; 160 Brin.
For screw machine products, marine hardware; free cutting.

HECLA 18
M-62; 0.65-0.90 C, 0.35 max Si, 0.3-0.6 Mn, bal Fe.
Annealed: 120,000 TS; 66,000 YS; 15 El; 223 Brin.
Oil Hardened: 190,000 TS; 142,000 YP; 12 El; 388 Brin.
For hammers, tools, punches, springs, structural parts, thrust washers, lock washers.
SAE 1064-1078 steel, water hardening.

HECLA 34.
M-62; 0.90-1.25 C, 0.35 max Si, 0.3-0.7 Mn, bal Fe.
Annealed: 100,000 TS; 55,000 YP; 20 El, 200 Brin.
Heat treated: 216,000 TS; 152,000 YP; 11 El; 600 Brin.
For springs, cutting tools, drills, punches, jigs, and fixtures.
SAE 1095 steel. Water harden, wear resistant.

HECLA 35.
M-62; 0.15-0.30 C, 0.40-0.60 Mn, bal Fe.
Forged: 56,000-78,000 TS; 25% El.
Normalized: 62,000-85,000 TS; 25% El; 126-180 Brin.
For structural parts, fasteners, gears, shafts.
SAE 1017-1020 steel, water harden.

HECLA 36.
M-62; 0.70-0.90 C, 0.35 max Si, 0.55-0.80 Mn, bal Fe.
Annealed: 120,000 TS; 66,000 YS; 15 El; 223 Brin.
Water harden: 183,000 TS; 135,000 YS, 13 El; 390 Brin.
For tools, cutters, punches, drills, hammers, springs, bushings, bearings.
SAE-1080 steel, water harden, wear resistant.

HECLA 37
M-62; 0.35-0.45 C, 0.60-1.0 Mn, bal Fe.
Normalized: 78,000-100,000 TS; 20-22% El; 152-255 Brin.
For gears, bolts, fasteners, axles, shafts, structural parts.
SAE 1035-1040 steel, water harden.

HECLA 40
M-62, 0.25-0.35 C, 0.05-0.35 Si, 0.7-0.9 Mn, bal Fe
Normalized: 72,000-100,000 TS; 20-25% El; 143-255 Brin
For structural parts, bolts, gears, shafts, axles.
SAE 1026-1033 steel, water harden.

HECLA 41.
M-62, 0.45-0.60 C, 0.05-0.40 Si, 0.3-1.0 Mn, bal Fe
Normalized: 90,000-112,000 TS; 63,000-69,000 YS; 18% El
For structural parts, gears, shafts, crankshafts, bolts SAE 1046-1050 steels, water harden.

HECLA 42
M-62, 0.60-0.90 C, 0.35 max Si, 0.55-0.80 Mn, bal Fe
Annealed: 120,000 TS, 65,000 YS, 15 El, 223 Brin
Water harden: 183,000 TS; 135,000 YS, 13 El; 390 Brin
For structural parts, gears, shafts, springs, cutlery, punches.
SAE 1064 steel-SAE 1084 steel, water harden.

HECLA 46.
M-62; 0.15 C, 0.05-0.35 Si, 0.40-0.70 Mn, bal Fe
Bar 72,000 TS, 20 El, 64,000 YS; 155 Brin.
Water hardened. 105,000 TS; 80,000 YS, 6 El; 205 Brin.
For case hardened gears, shafts, cams.
SAE 1015 case hardening steel Water harden.

HECLA S55.
M-62; 0.55-0.65 C, 1.5-2.0 Si, 0.7-1.0 Mn, bal Fe.
Annealed 118,000 TS, 68,000 YS, 22 El; 240 Brin
Oil harden: 325,000 TS; 280,000 YS; 9 El; 620 Brin
For springs, pneumatic tools, punches
SAE 9255-9260 spring steel, oil harden, tough.

HECLA 66.
M-62; 0.10-0.15 C, 0.10-0.35 Si, 0.30-0.60 Mn, 0.30 Cr, 2.75-3.5 Ni, bal Fe.
Bar: 101,000 TS, 18 El; 78,000 YP; 200 Brin.
Heat treated: 180,000 TS; 155,000 YS; 14 El; 360 Brin
For gears, bolts, cams, camshafts, clutch parts, piston pins.
Tough, shock resistant case hardening.
Abrasion resistant.

HECLA 67.
M-62; 0.26-0.34 C, 1.1-1.4 Cr, 3.9-4.3 Ni, bal Fe.
Heat treated. 224,000 TS; 180,000 YS; 10% El; 444 Brin.
For structural parts, gears, pinions, shafts, bolts, countershafts.
Shock resisting, oil hardening.

HECLA 67B.
M-62; 0.26-0.34 C, 1.1-1.4 Cr, 3.9-4.3 Ni, 0.2-0.4 Mo, bal Fe.
Heat treated: 224,000 TS; 180,000 YS; 10% El; 444 Brin.
For structural parts, gears, pinions, countershafts, axles, bolts.
Oil hardening, shock resisting.

HECLA NO. 69.
M-122; 60 Cu, 0.7 Pb, 0.75 Sn, bal Zn.
Soft: 58,000 TS; 28,000 YS; 40 El; 83 Brin.
½ H-temper: 65,000 TS; 38,000 YS; 30 El; 125 Brin.
H-temper: 75,000 TS; 52,000 YS; 22 El; 160 Brin.
For screw machine products, marine hardware; free cutting.

HECLA 70.
M-62; 0.35-0.45 C, 0.30 max C, 3.25-3.75 Ni, bal Fe.
Bar: 112,000 TS; 80,000 YS; 20% El; 223-277 Brin.
For gears, shafts, bolts, fasteners, countershafts, pinions.
Oil hardening, shock resisting

HECLA 73
M-62; 0.20-0.35 C, 0.30 max Cr, 2.5-3.5 Ni, bal Fe.
Bar: 101,000-112,000 TS; 72,000-81,000 YS, 20-22% El; 201-277 Brin
For gears, shafts, bolts, fasteners, countershafts
Oil hardening, tough

HECLA 78
M-62; 0.16 C, 0.45 Mn, 0.30 Cr, 4.5-5.2 Ni, bal Fe.
Bar: 90,000 TS, 20 El; 72,000 YP; 180 Brin.
Heat treated: 182,000 TS, 160,000 YP; 15 El; 375 Brin.
For gears, bolts, cams, camshafts, pawls, arbors, pneumatic tools.
Tough, shock resisting, case hardening

HECLA 98.
M-62; 0.30-0.40 C, 0.45-0.75 Cr, 1.0-1.5 Ni, bal Fe.
Bar 100,000-135,000 TS, 72,000-103,000 YS; 17-22% El, 201-321 Brin.
For bolts, gears, countershafts, structural parts, fasteners Oil hardening, tough.

HECLA 100
M-62, 0.35-0.45 C, 1.2-1.5 Mn, 0.3-0.6 Cr, 0.5-1.0 Ni, 0.15-0.25 Mo, bal Fe.
Bar: 101,000 TS, 72,000 YS; 22% El; 201-255 Brin.
For structural parts, gears, shafts, bolts, fasteners.
Oil hardening, shock resisting

HECLA 104.
M-62, 0.50-0.70 C, 0.5-0.8 Cr, 0.5-0.8 Mn, bal Fe.
Bar 123,000-145,000 TS; 12-15% El, 248-341 Brinell.
For structural parts, bolts, crankshafts, punches.
SAE 5160.

HECLA 105.
M-62; 0.25-0.45 C, 0.60-0.95 Mn, 0.85-1.15 Cr, bal Fe.
Bar: 100,000-123,000 TS; 72,000-92,000 YS; 18-22% El, 201-302 Brin
For shafts, bolts, gears, fasteners, countershafts.
SAE 5130-5140 steel, oil hardening.

HECLA 110.
M-62; 0.35-0.45 C, 0.9-1.4 Cr, 1.2-1.6 Ni, 0.1-0.2 Mo, bal Fe.
Bar: 112,000 TS; 81,000 YS; 20% El; 223-277 Brin.
For gears, bolts, countershafts, fasteners, crankshafts. Oil hardening, tough.

HECLA 115.
M-62; 0.30-0.45 C, 0.10-0.35 Si, 0.7-0.9 Mn, 0.6-1.0 Ni, bal Fe.
Normalized: 78,000 TS; 20% El; 152-207 Brin.
For structural parts, gears, axles, shafts, bolts.
Water hardening.

HECLA 116.
M-62; 0.25-0.35 C, 0.50-1.0 Cr, 2.75-3.50 Ni, 0.65 max Mo, bal Fe.
Bar: 112,000-146,000 TS; 80,000-112,000 YS; 16-20% El; 223-341 Brin.
For gears, shafts, axles, bolts, countershafts.
Oil hardening, shock resisting.

HECLA 120.
M-62; 0.6 C, 9 Cr, Si, bal Fe.
For valves; heat resistant.

HECLA 138.
M-62, 0.27-0.35 C, 0.5-0.8 Cr, 2.3-2.8 Ni, 0.4-0.7 Mo, bal Fe.
Bar. 123,000-224,000 TS; 92,000-180,000 YS; 10-18% El, 248-444 Brin.
For gears, shafts, axles, bolts, countershafts.
Shock resisting, oil hardening

HECLA 138H.
M-62; 0.36-0.44 C, 0.5-0.8 Cr, 2.3-2.8 Ni, 0.4-0.7 Mo, bal Fe.
Bar. 134,000-224,000 TS, 103,000-180,000 YS; 10-17% El; 269-444 Brin.
For gears, shafts, axles, bolts, countershafts, fasteners
Shock resisting, oil hardening.

HECLA 142.
M-62; 0.25-0.40 C, 0.75-1.5 Cr, 3.0-4.5 Ni, 0.20-0.65 Mo, bal Fe.
Bar: 134,000-180,000 TS; 103,000-144,000 YS; 14-17% 269-415 Brin
For structural parts, gears, pinions, shafts, bolts, countershafts. Oil hardening, shock resisting.

HECLA 143.
M-62; 0.12-0.18 C, 0.10-0.35 Si, 0.30-0.60 Mn, 0.60-1.1 Cr, 3.0-3.75 Ni, bal Fe.
Bar: 123,000-145,000 TS; 13-15% El.
For gears, bolts, cams, camshafts, fasteners.
Case hardening steel. Tough, shock resistant.

HECLA 143B
M-62, 0.12-0.18 C, 0.60-1.1 Cr, 3.0-3.75 Ni, 0.10-0.25 Mo, bal Fe.
Bar. 145,000 TS; 13 El; 88,000 YS.
Heat treated. 180,000 TS; 145,000 YP; 15 El, 370 Brin.
For gears, bolts, cams, camshafts
Case hardening steel. Tough, shock resistant.

HECLA 146.
M-62, 0.12-0.18 C, 1.0-1.4 Cr, 3.8-4.5 Ni, bal Fe.
Bar: 190,000 TS, 12 El; 145,000 YP; 50 RA; 380 Brin.
For gears, bolts, cams, camshafts, clutch parts, pneumatic tools.
Tough, shock resisting, case hardening; abrasion resistant

HECLA 146B.
M-62; 0.12-0.18 C, 1.0-1.4 Cr, 3.8-4.5 Ni, 0.15-0.35 Mo, bal Fe.
Bar: 190,000 TS; 12 El; 145,000 YP; 50 RA; 375 Brin.
For gears, bolts, cams, camshafts, clutch parts, pneumatic tools.
Tough, shock resisting, case hardening; abrasion resistant.

HECLA 147.
M-62; 0.3 C, 5 Cr, 0.5 Mo, bal Fe.
For oil refinery castings and tubes; creep and corrosion resistant.

HECLA 150.
M-62; 0.35-0.45 C, 0.90-1.5 Cr, 0.20-0.40 Mo, bal Fe.
Bar: 100,000-180,000 T; 72,000-112,000 YS; 16-22% El; 201-341 Brin.
For gears, shafts, bolts, fasteners, countershafts.
SAE 4137-4140 steel, oil hardening.

HECLA 151.
M-62; 0.14-0.20 C, 0.10-0.35 Si, 0.30-0.60 Mn, 1.5-2.0 Ni, 0.2-0.3 Mo, bal Fe.
Bar: 101,000 TS, 18 El; 88,000 YP, 245 Brin.
Heat treated: 150,000 TS; 106,000 YP; 16 El; 300 Brin.
For gears, bolts, cams, camshafts.
SAE 4617 case hardening steel. Tough, wear resistant.

HECLA 151B.
M-62; 0.20-0.28 C, 0.10-0.35 Si, 0.30-0.60 Mn, 1.5-2.0 Ni, 0.2-0.3 Mo, bal Fe.
Bar: 123,000 TS; 15 El; 93,000 YP; 260 Brin.
Heat treated: 186,000 TS, 156,000 YP; 9 El; 360 Brin.
Gears, bolts, cams, camshafts
SAE 4617 & 4620 case hardening steel.
Tough, abrasion resistant.

HECLA 152.
M-62; 0.35-0.45 C, 0.90-1.40 Cr, 1.30-1.80 Ni, 0.20-0.35 Mo, bal Fe.
Bar: 112,000-224,000 TS; 80,000-180,000 YS; 8-20% El; 223-444 Brin.
For gears, shafts, axles, bolts, countershafts, fasteners
Oil hardening, shock resisting

HECLA 153.
M-62, 0.20-0.45 C, 0.5-1.5 Cr, 0.50-0.90 Mo, bal Fe
Bar: 123,000-146,000 TS, 92,000-112,000 YS, 16-18% El, 248-341 Brin.
For bolts, fasteners, gears, shafts, countershafts.
Oil or water hardening.

HECLA 157.
M-62; 0.35-0.45 C, 0.90-1.50 Cr, 0.2-0.4 Mo, bal Fe
Bar: 100,000-180,000 TS; 72,000-112,000 YS; 16-22% El; 201-341 Brin.
For gears, shafts, bolts, fasteners, countershafts
SAE 4137-4140 Steel, oil hardening.

HECLA 159.
M-62; 1.5 C, 12 Cr, Mo, bal Fe.
For tools, dies, cutters; air hardening.

HECLA 163.
M-62; 0.16 max C, 0.30 max Cr, 4.5-5.5 Ni, 0.15-0.30 Mo, bal Fe.
Bar: 146,000 TS; 13 El, 115,000 YP, 275 Brin.
Oil harden: 193,000 TS; 155,000 YP; 14 El; 362 Brin.
For gears, bolts, cams, camshafts, pawls, machinery parts.
Tough, shock resisting, case hardening, oil harden.

HECLA 174.
M-62; 0.4 C, 5 Cr, 1.3 Mo, 0.8 V, bal Fe.
Heat treated: 270,000 TS; 230,000 YS, 6 El.
For hot forging dies for brass and aluminum, extrusion dies; hot work steel, air hardened.

HECLA 181.
M-62; 0.20 max C, 0.4-0.8 Cr, 0.6-1.0 Ni, 0.10 max Mo, bal Fe.
Bar: 101,000 TS; 18 El; 55,000 YP, 200 Brin.
Oil hardened: 146,000 TS; 115,000 YP, 17 El; 302 Brin.
For gears, bolts, cams, camshafts.
Tough, shock resisting, case hardening, wear and abrasion resistant.

HECLA 182.
M-62; 0.20 max C, 0.6-1.0 Cr, 0.85-1.25 Ni, 0.10 max Mo, bal Fe.
Bar: 123,000 TS; 15 El.
Heat treated: 215,000 TS; 170,000 YP; 15 El; 425 Brin.
For gears, bolts, cams, camshafts, chuck jaws.
Tough, shock resisting, case hardening, wear and abrasion resistant.

HECLA 183.
M-62; 0.20 max C, 0.75-1.25 Cr, 1.0-1.5 Ni, 0.08-0.15 Mo, bal Fe.
Bar: 146,000 TS; 12 El.
Heat treated: 218,000 TS; 178,000 YP; 13 El; 430 Brin.
For gears, bolts, cams, camshafts, chuck jaws.
Tough, shock resisting, case hardening, wear and abrasion resistant.

HECLA 184
M-62; 0.20 max C, 0.75-1.25 Cr, 1.5-2.0 Ni, 0.10-0.20 Mo, bal Fe.
Bar: 168,000 TS; 12 El
Heat treated. 200,000 TS; 150,000 YP; 15 El; C 42 Rock.
For gears, bolts, cams, camshafts.
Tough, shock resisting, case hardening, wear resistant.

HECLA 185.
M-62, 0.20 C, 1.4-1.7 Cr, 1.8-2.2 Ni, 0.15-0.25 Mo, bal Fe.
Bar: 120,000 TS; 18 El; 230 Brin
Heat treated: 220,000 TS, 160,000 YP; 13 El; C 40 Rock.
For gears, bolts, cams, camshafts, arbors, bearings, chuck jaws
Tough, shock resisting, case hardening, wear resistant.

HECLA 191.
M-62, 0.13-0.17 C, 0.55-0.80 Cr, 0.40-0.70 Ni, 0.08-0.15 Mo, bal Fe.
Bar 101,000 TS; 18 El, 80,000 YS; 220 Brin
Heat treated. 200,000 TS; 155,000 YS; 15 El; 375 Brin.
For gears, bolts, cams, camshafts
Tough, shock resisting, case hardening, oil harden, wear resistant.

HECLA 192
M-62, 0.18-0.23 C, 0.55-0.80 Cr, 0.40-0.70 Ni, 0.08-0.15 Mo, bal Fe.
Bar 123,000 TS; 15 El, 77,000 YS, 240 Brin
Heat treated: 220,000 TS, 180,000 YS; 12 El; 430 Brin
For gears, bolts, cams, camshafts.
Tough, shock resisting, case hardening, oil harden, wear resistant

HECLA 193
M-62, 0.22-0.26 C, 0.55-0.80 Cr, 0.40-0.70 Ni, 0.08-0.15 Mo, bal Fe
Bar: 146,000 TS; 85,000 YS; 260 Brin.
Heat treated. 220,000 TS; 180,000 YP; 12 El; 440 Brin.
For gears, bolts, cams, camshafts, pawls, chuck jaws, die bodies.
Tough, shock resisting, case hardening, oil hardening

HECLA 196.
M-62; 0.25-0.45 C, 1.4-1.8 Cr, 0.40 max Ni, 0.10-0.25 Mo, 0.90-1.30 Al, bal Fe.
Oil hardened: 100,000-123,000 TS; 72,000-92,000 YS; 17-20% El.
For gears, bolts, cams, camshafts, rolls, crankshafts, anvils.
Nitriding steel, wear and abrasion resistant.

HECLA 197.
M-62; 0.22 max C, 0.40-0.60 Cr, 1.5-2.0 Ni, 0.2-0.3 Mo, bal Fe.
Bar: 123,000 TS; 15 El; 78,000 YS; 248 Brin.
Heat treated: 218,000 TS, 178,000 YP; 13 El; 430 Brin.
For gears, cams, camshafts, bolts.
Tough, shock resisting, case hardening.
SAE 4320, oil hardening.

HECLA 206.
M-62; 0.12-0.17 C, 0.30-0.50 Cr, bal Fe.
Annealed: 75,000 TS; 48,000 YP; 38 El; 145 Brin
Hardened: 145,000 TS; 120,000 YP; 16 El; 310 Brin.
For gears, bolts, cams, camshafts, pawls, machinery parts.
Case hardening, water harden
SAE 5115, wear resistant.

HECLA 207.
M-62; 0.16-0.21 C, 0.60-0.80 Cr, bal Fe
Annealed: 75,000 TS, 50,000 YP, 35 El, 150 Brin.
Water hardened 190,000 TS; 170,000 YP; 13 El, 370 Brin.
For gears, bolts, cams, camshafts, fasteners, pawls, machinery parts Case hardening.
SAE 5120, water or oil hardening.

HECLA 317.
M-62, 0.10-0.30 C, 2.9-3.5 Cr, 0.40 max Ni, 0.40-0.70 Mo, bal Fe
Bar 101,000-135,000 TS; 72,000-103,000 YS; 17-22 El
For gears, bolts, cams, camshafts, rolls, fasteners, crankshafts.
Tough, shock resisting, case hardening and nitriding steel

HECLA A T G.
M-62, 0.2 C, 12 Cr, 60 Ni, 4 W, bal Fe
For glass industry equipment, heat resistant.

HECLA A.T V
M-62, 0.2 C, 11 Cr, 35 Ni, bal Fe.
Treated 110,000 TS; 66,000 YS; 20 El; 35 RA.
For turbine blades and nozzles; heat resistant

HECLA BRONZE
M-832, Sn, Pb, bal Cu
For bearings, heavy duty.

HECLA CH31.
M-62, 0.10-0.18 C, 0.05-0.35 Si, 0.60-1.0 Mn, bal Fe
Bar. 72,000 TS, 20 El, 64,000 YS, 155 Brin.
Water hardened: 105,000 TS, 80,000 YS; 6 El; 205 Brin
For gears, cams, shafts, bolts, fasteners, pawls, machinery parts.
SAE 1016 case hardening steel, water harden

HECLA D17
M-62; 0.60-0.70 C, 0.35 max Si, 0.55-0.80 Mn, bal Fe.
Oil hardened: 180,000 TS; 130,000 YS; 12 El, 360 Brin.
Annealed. 112,000 TS, 60,000 YS, 17 El, 207 Brin.
For structural parts, axles, shafts, springs, cutlery, punches, heavy machine parts, hatchets.
SAE 1064 steel. Water harden, wear resistant.

HECLA-EM20.
M-62; 0.18 C, 1.5 Mn, 20 Ni, 21 Cr, 20 Co, 3 Mo, 2.5 W, 1 Cb, 0.09 N, bal Fe.
Forged: 142,000 TS, 116,000 YS; 16 El; 45 RA.
For jet engine components, turbine rotor blades.
Heat resistant.

HECLA EM35.
M-62; 0.35 C, 1.5 Mn 15 Ni, 17 Cr, 12 Co, 2.9 Mo, 2.5 W, 0.9 N, 1 Cb, bal Fe.
For jet engine components, turbine rotor blades; heat resistant.

HECLA HCT-4.
M-62; 0.17 C, 0.5 Si, 1 Mn, 11.5 Cr, 0.6 Mo, 0.2 Cb, 0.2 V, 0.07 N, 0.3 B, bal Fe.
For jet engine components, turbine rotor blades; heat resistant.

HECLA-H GT4.
M-62; 0.15-0.19 C, 10.5-12.0 Cr, 0.15-0.25 Cb, 0.5-0.7 Mo, 0.15-0.25 V, 0.02 B, 0.08 N, 0.2 Ti, bal Fe.
Annealed: 90,000 TS; 38,000 YS; 26 El; B 90 Rock.
Hardened: 230,000 TS; 195,000 YS; 10 El; C 47 Rock.
For bearings, valves, cutlery, surgical instruments.
Corrosion resistant, hardenable.

HECLA MM20.
M-62; 0.18 C, 1.5 Mn, 20 Ni, 21 Cr, 20 Co, 2.9 Mo, 2.5 W, 1 Cb, 0.12 N, bal Fe.
For jet engine components, turbine rotor blades; heat resistant

HECLA MM35.
M-62; 0.35 C, 1.5 Mn, 20 Ni, 21 Cr, 20 Co, 2.9 Mo, 2.5 W, 1 Cb, 0.12 N, bal Fe.
For jet engine components, turbine rotor blades; heat resistant.

HECLA SNS.
M-62; 0.74-0.84 C, 1.75-2.25 Si, 0.2-0.6 Mn, 19.0-20.5 Cr, 1.15-1.65 Ni, bal Fe
Annealed: 105,000 TS, 65,000 YS, Rock B 95.
For cutlery, valve parts, ball bearings, surgical instruments
Corrosion resistant. Hardenable

HECLA SPECIAL
M-275, 0.5 C, 1.5 Cr, 0.2 V, 0.2 W, bal Fe.
Heat treated. 130,000-165,000 TS, 125,000-160,000 YS, 19.5-18.0 El, 59-51 RA; 241-269 Brin.
For gears, forging dies, clutches, shock resistant, oil hardened.

HECNUM.
M-1554, 55 Cu, 45 Ni.
Annealed: 70,000 TS, 30,000 YS; 50 El; 110 Brin.
For electrical resistances, thermocouples.
Negligible temperature coefficient

HEDDAL
M-297, 0.2 C, 0.3 Mn, 0.25 Si, bal Fe
For machinery parts; water hardened

HEDDAL.
M-1548, 1.5 Mn, bal Al
Soft 14,000 TS; 5690 YS; 30-40 El; 28-32 Brin.
Hard 35,600 TS; 28,500 YS, 3 El; 60 Brin
For heat exchangers, pressure and storage tanks, chemical equipment.
Similar to Aluminum 3003, not heat-treatable.

HEDDENAL 2
M-297; 1.5-3.0 Mg, 0.5-1.5 Mn, 0.3 max Cr, bal Al.
Soft. 26,000 TS, 10,000 YS; 20 El, 45 Brin
Hard: 41,000 TS; 36,000 YS; 5 El; 77 Brin.
For roofing, hydraulic tubing, architectural trim; good forming and welding properties.

HEDDENAL 3.
M-297, 2-4 Mg, 0.4 max Mn, 0.3 max Cr, bal Al.
Soft: 28,000 TS; 13,000 YS; 30 El; 47 Brin.
Hard: 40,000 TS, 35,000 YS; 10 El; 73 Brin.
For aircraft tanks and fittings, fuel lines, marine parts; resists sea water corrosion.

HEDDENAL 5.
M-297, 4.0-5.5 Mg, 0.8 max Mn, 0.3 max Cr, bal Al.
Soft: 42,000 TS; 22,000 YS, 35 El; 65 Brin.
Hard: 60,000 TS; 50,000 YS; 10 El; 105 Brin.
For aircraft and marine parts; good corrosion resistance.

HEDDENAL 7.
M-297; 5.5-7.5 Mg, 0.8 max Mn, 0.3 max Cr, bal Al.
For aircraft and marine parts;
good corrosion resistance.

HEDDRONAL 3.5.
M-1548; 0.5 Mn, 3.5 Mg, bal Al.
Rolled: 35,000 TS; 20-25 El; 70-100 Brin.
For structural towers, unfired pressure vessels,
rocket motor parts, missile containers.
Similar to Aluminum 5086, non-heat treatable.
Corrosion resistant.

HEDDRONAL 5.
M-1548; 0.5 Mn, 5.0 Mg, bal Al.
Rolled: 32,000-38,000 TS; 15-22 El; 70-100 Brin
For deck housing, overhead cranes,
ship unloaders, heavy duty structures
Similar to Aluminum 5456. Not heat treatable;
corrosion resistant.

HEDDRONAL 7.
M-1548; 0.5 Mn, 7.0 Mg, bal Al.
Rolled: 45,000-52,000 TS; 20-25 El; 80-100 Brin.
For heavy duty structures, overhead cranes,
ship unloaders.
Corrosion resistant.

HEDDROXAL.
M-297; 2-4 Mg, 0.4 Mn, 0.3 max Cr, bal Al.
Soft: 28,000 TS; 13,000 YS; 30 El; 47 Brin.
Hard: 40,000 TS; 35,000 YS; 10 El; 73 Brin.
For aircraft tanks and fittings, fuel lines,
marine parts; resists sea water corrosion.

HEDDUR.
M-297; 2.5-5.0 Cu, 0.2-1.8 Mg, 0.3-1.5 Mn, bal Al.
Annealed: 27,000 TS; 11,000 YS; 22 El; 47 Brin.
Heat treated: 72,000 TS, 57,000 YS; 130 Brin.
For aircraft structures and fittings,
fasteners; age-hardenable

HEDDUR.
M-983; 0.2-2.0 Mg, 3.5-5.5 Cu, 0.2-1.0 Si,
0.1-1.2 Mn, bal Al.
20,000-31,000 TS; 10,000-14,000 YS; 2-4 El;
60-80 Brin.
For light alloy parts; Duralumin type.

HEDDUR.
M-1545; 3.5-5.0 Cu, 0.3-0.8 Si, 0.2-1.2 Mn,
0.4-1.0 Mg, bal Al.
Heat treated: 68,000-78,000 TS; 50,000-57,000 YS;
12-16 El; 115-130 Brin.
For structural applications, screw machine
products, fasteners.
Heat treatable. Similar to Aluminum 2017.

HEDERVAN.
M-73; 0.90 C, V, bal Fe.
For cold heading and striking dies, punches,
draw dies; water hardened; Type W2.

HEERDT T7P.
M-1324; 0.7 C, 0.25 max Si, 0.25 max P, bal Fe.
Heat treated: 120,000-174,000 TS;
82,000-128,000 YS; 22-12 El; 52-37 RA;
241-352 Brin.
For crimpers, punches, springs, rails, dies;
Type W1; water hardened.

HEERDT T8E.
M-1324; 0.7 C, 0.2 max Si, 0.2 max P, bal Fe.
Heat treated: 120,000-174,000 TS;
82,000-128,000 YS; 22-12 El; 52-37 RA;
241-352 Brin.
For crimpers, punches, dies, springs, rails;
Type W1; water hardened.

HEERDT T8V.
M-1324; 0.8 C, 0.2 Si, 0.2 Mn, bal Fe.
Heat treated: 129,000-188,000 TS;
87,000-143,000 YS; 21-12 El; 50-35 RA;
255-388 Brin.
For tools, dies, springs, cutters; Type W1;
water hardened.

HEERDT T9E.
M-1324; 0.85 C, 0.25 max Si, 0.25 max Mn, bal Fe.
Heat treated: 130,000-190,000 TS;
88,000-145,000 YS; 20-11 El; 48-32 RA;
260-400 Brin.
For tools, dies, springs, cutters, drills; Type W1;
water hardened

HEERDT T9P.
M-1324; 0.85 C, 0.25 max Si, 0.25 max Mn, bal Fe.
Heat treated: 130,000-190,000 TS;
88,000-145,000 YS; 20-11 El; 48-32 RA;
260-400 Brin.
For tools, dies, springs, cutters, drills,
Type W1; water hardened.

HEERDT T10E
M-1324; 1.0 C, 0.25 max Si, 0.25 max Mn, bal Fe.
Heat treated: 121,000-213,000 TS,
84,000-150,000 YS; 20-11 El; 47-33 RA;
235-535 Brin.
For drills, hobs, cutting tools;
Type W1; water hardened.

HEERDT T10P.
M-1324; 1.0 C, 0.25 max Si, 0.25 max Mn, bal Fe
Heat treated: 121,000-213,000 TS;
84,000-150,000 YS, 20-11 El; 47-33 RA;
235-535 Brin.
For drills, hobs, cutting tools, reamers;
Type W1; water hardened.

HEERDT T11E
M-1324; 1.1 C, 0.25 max Mn, 0.25 max Si, bal Fe.
Heat treated: 122,000-215,000 TS;
85,000-155,000 YS; 18-10 El, 45-30 RA;
240-555 Brin.
For reamers, drills, taps, hobs, lathe tools;
Type W1, water hardened.

HEERDT T11P.
M 1324; 1.15 C, 0.25 max Mn, 0.25 max Si, bal Fe.
Heat treated: 122,000-215,000 TS;
85,000-155,000 YS; 18-10 El; 45-30 RA;
240-555 Brin.
For reamers, drills, taps, hobs, lathe tools;
Type W1, water hardened.

HEERDT T12E.
M-1324; 1.3 C, 0.25 max Mn, 0.25 max Si, bal Fe.
For reamers, drills, taps, hobs, lathe tools;
Type W1; water hardened

HEERDT T12P.
M-1324, 1.3 C, 0.25 max Si, 0.25 max Mn, bal Fe.
For reamers, drills, hobs, lathe tools;
Type W1; water hardened.

HERGERMUHL BRASS.
England; 62-72 Cu, 0.2-1.0 Sn, 0.8 max Pb, bal Zn.
For hardware, fittings, sheathing; good workability.

H-E IRON.
M-833; C, Si, Mn, bal Fe.
Cast: 30,000-60,000 TS; 180-260 Brin.
For machine tool castings, gears, housings;
gray cast iron.

HELBIMPHY.
M-104; C, bal Fe.
For tools; superior quality.

HELBIMPHY 6.
M-772; 0.7-0.8 C, bal Fe.
For tools, springs, punches; water hardened.

HELBIMPHY 7.
M-722; 0.7-0.8 C, bal Fe.
For tools, springs, drills; water hardened.

HELBIMPHY 8.
M-722; 0.9-1.0 C, bal Fe.
For tools, drills, punches, shears; water hardening.

HELBIMPHY 9.
M-772; 1.05-1.15 C, bal Fe.
For tools, reamers, punches; water hardened.

HELBIMPHY 10.
M-772; 1.05-1.15 C, bal Fe.
For tools, taps, drills; water hardened.

HELBIMPHY 12.
M-772; 1.2 C, bal Fe.
For tools, drills, taps; water hardened.

HELBIMPHY 14.
M-772, 1 4 C, bal Fe.
For cutting tools, drills, water hardened.

HELBIMPHY SPECIAL.
M-104; C, bal Fe.
For tools, extra-superior quality.

HELLEFORS 123H.
M-217; 0 4 C, 0.3 Si, 1 25 Mn, bal Fe.
For gears, machinery parts; tough.

HELLEFORS 134 HF
M-217, 0.55 C, 1.7 Si, 0 7 Mn, bal Fe
For leaf and coil springs, shock resistant.

HELLEFORS 206A
M-217, 0 9 C, 0.5 Cr, bal Fe.
For punches, forming dies, headers;
water hardened.

HELLEFORS 209A
M-217, 1 3 C, 0 5 Cr, bal Fe.
For blanking and forming dies, engravers' tools,
water or oil hardened.

HELLEFORS 209H.
M-217, 1 5 C, 2 0 Cr, bal Fe
For bearings, liners, sleeves;
oil or water hardened

HELLEFORS 216 HM.
M-217, 0 95 C, 1 5 Si, 1.0 Cr, bal Fe
For metal and wood working cutting tools,
non-deforming, oil hardening.

HELLEFORS 249A
M-217; 1 35 C, 0 25 Si, 0 25 Mn, 0 30 Cr, bal Fe.
For blanking and forming dies, engravers' tools,
water or oil hardened

HELLEFORS 264HF.
M-217, 0 50 C, 1.05 Cr, 0.85 Mn, 0.15 V, bal Fe
For springs, gears, shafts; shock resistant.

HELLEFORS 267B.
M-217; 1.0 C, 0.3 Mn, 0.5 Cr, 0.1 V, bal Fe.
For bearings, punches, liners, forming dies;
water hardened.

HELLEFORS 288A.
M-217, 1.2 C, 0 2 Si, 0.3 Mn, 0.55 W, 0.1 V, bal Fe.
For cold work tools, punches, heading dies;
oil or water hardened.

HELLEFORS 288 J.
M-217; 1.1 C, 0.3 Cr, 1.1 W, 0.1 V, bal Fe.
For structural parts, cutting tools; drill rod.

HELLEFORS 352H.
M-217; 0.25 C, 0.65 Mn, 1.05 Cr, 0.2 Mo, bal Fe.
For gears, shafts; tough.

HELLEFORS 371H.
M-217; 0.15 C, 0.55 Mn, 0.65 Cr, 1.25 Ni, bal Fe.
For gears, camshafts, crankshafts; case hardened.

HELLEFORS 371 L.
M-217; 0.15 C, 0.6 Cr, 3 Ni, bal Fe.
Hardened: 128,000 TS; 107,000 YS; 16 El; 55 RA;
270 Brin.
For gears, crankshafts, chain balls; case hardened.

HELLEFORS 371L2.
M-217; 0.18 C, 0.55 Mn, 0.75 Cr, 3.0 Ni, bal Fe.
For gears, camshafts, crankshafts; case hardened.

HELLEFORS 371M.
M-217; 0.2 C, 0.55 Mn, 1.8 Cr, 0 25 Mo, bal Fe.
For gears, shafts; case hardened.

HELLEFORS 372H.
M-217; 0.4 C, 0.8 Mn, 0.8 Cr, 1.25 Ni, bal Fe.
For gears, shafts; shock resistant.

HELLEFORS 372J.
M-217; 0.35 C, 1.2 Cr, 2 6 Ni, bal Fe
Oil hardened: 143,000 TS; 130,000 YS; 19-22 El;
55-60 RA; 300 Brin.
For shafts, axles, bolts, gears; tough.

HELLEFORS 372S.
M-217, 0 3 C, 0.55 Mn, 1.25 Cr, 4.25 Ni, bal Fe.
For gears, shafts, machinery parts,
tough, shock resistant.

HELLEFORS 372Y.
M-217, 0 30 C, 0 55 Mn, 1.05 Cr, 3 25 Ni, 0.25 Mo,
bal Fe
For gears, shafts, machinery parts, tough,
shock resistant.

HELLEFORS 374 H.
M-217, 0 5 C, 0 6 Cr, 1.7 Ni, 0 3 Mo, bal Fe.
For hot and cold working tools, oil hardening.

HELLEFORS 374R.
M-217, 0 55 C, 1.5 Cr, 3 0 Ni, 0.4 Mn, bal Fe.
For cold work dies and tools;
oil hardened, shock resistant.

HELLEFORS 374RK.
M-217; 0.55 C, 1 Cr, 3 Ni, 0 3 Mo, 0.4 Mn, bal Fe.
For drop forge dies, cold working tools;
oil hardened, shock resistant.

HELLEFORS 394T.
M-217; 0 55 C, 0.7 Cr, 1.75 Ni, 0.7 Mo, 0.7 Mn,
bal Fe
For forging dies, headers, upsetters;
oil hardened, shock resistant

HELLEFORS 408C.
M-217; 1 2 C, 0 2 Si, 0 3 Mn, 1.0 W, bal Fe.
For cold work tools, punches, heading dies;
oil or water hardened.

HELLEFORS 605 F.
M-217, 0 8 C, 0.1 V, bal Fe.
For chisels, punches, dies, hard and tough.

HELLEFORS 606F
M-217; 0.90 C, 0.20 Si, 0 30 Mn, 0.1 V, bal Fe.
Heat treated 185,000 TS, 118,000 YS, 10 El;
30 RA, 375 Brin.
For springs, taps, reamers, hobs, broaches;
Type W2, water hardened.

HELLEFORS 607C
M-217; 1 0 C, 0.20 Si, 0.30 Mn, 0 1 V, bal Fe.
Annealed: 100,000 TS; 55,000 YS; 20 El; 42 RA;
200 Brin.
For cold work dies and tools, drills, taps;
Type W2; water hardened

HELLEFORS 666.
M-217; 1.2 C, bal Fe.
For structural parts, tools; water hardening.

HELLEFORS 677R.
M-217; 1 C, 0.2 Si, 0.6 Mn, 5.2 Cr, 1.1 Mo, 0.2 V, bal Fe.
For dies, punches, crimpers; air hardened, wear resistant.

HELLEFORS 782R.
M-217; 0.35 C, 1.0 Cr, 2.5 W, bal Fe.
For pneumatic chisels, shears, hot work tools; oil hardened, shock resistant.

HELLEFORS 783 R.
M-217; 0.45 C, 0.9 Si, 1.1 Cr, 2.1 W, bal Fe
For chisels, punches, oil hardening, tough.

HELLEFORS 786 AM.
M-217; 0.9 C, 1.2 Mn, 0.5 Cr, 0.5 W, bal Fe.
For punches, dies, shears; non-deforming.

HELLEFORS 920A.
M-217; 0.08 max C, 11.5-13 Cr, 0.1-0.3 Al, bal Fe
Annealed: 71,000 TS, 42,600 YS; 22 El; 70 RA; 150 Brin.
Heat treated 175,000 TS; 145,000 YS, 21 El; 64 RA; 352 Brin
For oil refinery and chemical plant equipment; Type 405; corrosion resistant.

HELLEFORS 920-Al.
M-217; 0.1 C, 14 Cr, 10 Ni, bal Fe.
For fasteners, chemical plant equipment. Stainless steel.

HELLEFORS 920B
M-217; 0.12 max C, 14-18 Cr, bal Fe
Annealed: 70,000 TS, 40,000 YS, 30 El, 55 RA; 150 Brin.
Cold drawn: 130,000 TS; 120,000 YS, 2 El; 185 Brin.
For oil refinery equipment, bolts, kitchen sinks, Type 430; stainless, ferritic.

HELLEFORS 920-H.
M-217, 0.08 C, 17 Cr, 10 Ni, bal Fe.
Annealed: 80,000 TS; 38,000 YS, B 80 Rock.
For chemical and pharmaceutical plant equipment, mixers, agitators, tanks, vessels, digesters
Type 17-10 stainless steel, austenitic

HELLEFORS 920-M.
M-217, 0.15 max C, 11.5-13.5 Cr, bal Fe
Annealed 75,000 TS; 40,000 YS; 35 El, 155 Brin
Cold drawn. 100,000 TS; 85,000 YS; 17 El; 205 Brin
For flat springs, knives, table flatware
Type 410 stainless steel; hardenable.

HELLEFORS 921A
M-217; 0.15 max C, 11.5-13.5 Cr, 1 max Mn, bal Fe.
Annealed: 80,000 TS; 40,000 YS; 35 El; 70 RA; 155 Brin
Cold drawn: 100,000 TS, 85,000 YS; 17 El, 60 RA, 205 Brin.
For valve parts, turbine blades, cutlery, knives, Type 410; corrosion resistant.

HELLEFORS 921C.
M-217, 0.15 min C, 12-14 Cr, bal Fe.
Annealed: 88,000 TS; 40,000 YS, 32 El; 68 RA; 170 Brin.
For cutlery, valve trim, turbine blades; Type 420; stainless, hardenable.

HELLEFORS 922-A.
M-217; 0.15 min C, 12-14 Cr, bal Fe.
Annealed: 95,000 TS; 50,000 YS; 25 El; B 92 Rock.
Oil hardened: 250,000 TS; 192,000 YS; 10 El; C 49 Rock.
For cutlery, surgical instruments, scissors, ball bearings, valves, gears.
Type 420 stainless steel, hardenable.

HELLEFORS 923A.
M-217; 0.38-0.45 C, 13 Cr, bal Fe.
Annealed: 95,000 TS, 50,000 YS; 25 El; 55 RA; 196 Brin.
For valves, cutlery, surgical and dental instruments; Type 420; corrosion resistant.

HELLEFORS 930A
M-217, 0.08-0.20 C, 2 max Mn, 17-19 Cr, 8-10 Ni, bal Fe.
Annealed: 85,000 TS, 35,000 YS; 60 El; 70 RA, 150 Brin
Cold drawn: 125,000 TS, 95,000 YS; 22 El; 55 RA, 277 Brin
For oil refinery and chemical plant equipment; Type 302, stainless, austenitic.

HELLEFORS 930-B
M-217; 0.15 max C, 17-19 Cr, 8-10 Ni, bal Fe
Cold rolled 140,000 TS; 100,000 YS, 30 El; B 100 Rock
Annealed 90,000 TS; 40,000 YS, 50 El, B 85 Rock.
For chemical and pharmaceutical plant equipment, valve trim, fasteners
Type 302 stainless steel, austenitic
Hardenable only by cold work

HELLEFORS S-7
M-217, 0.15 C, bal Fe
Hardened 100,000 TS, 78,000 YS, 19 El; 40 RA; 200 Brin
For gears, bolts, pins, case hardened

HELLEFORS V60
M-217, 0.60 C, 0.20 Si, 0.30 Mn, bal Fe
Heat treated 115,000-160,000 TS, 77,000-113,000 YS, 23-12 El, 54-40 RA, 229-320 Brin
For wheels, die blocks, rails, girders; water hardened

HELLEFORS V70
M-217, 0.70 C, 0.20 Si, 0.30 Mn, bal Fe.
Heat treated 122,000-174,000 TS, 82,000-128,000 YS, 22-12 El, 52-37 RA; 40-350 Brin
For springs, rails, girders, clutch discs, water hardened

HELLEFORS V80.
M-217; 0.80 C, 0.20 Si, 0.30 Mn, bal Fe
Heat treated 130,000-188,000 TS, 87,000-143,000 YS, 21-12 El, 50-35 RA, 285-355 Brin.
For drills, reamers, hobs, taps, cutters; water hardened, Type W1

HELLEFORS V100.
M-217, 1.0 C, 0.20 Si, 0.30 Mn, bal Fe.
Annealed. 100,000 TS, 53,000 YS; 21 El; 42 RA; 200 Brin.
For drills, reamers, taps, hobs, broaches; water hardened, Type W1.

HELLEFORS V110.
M-217, 1.1 C, 0.20 Si, 0.30 Mn, bal Fe.
Annealed: 105,000 TS; 55,000 YS; 20 El, 40 RA; 210 Brin.
For drills, springs, reamers, taps, broaches; water hardened, Type W1.

HELLEFORS V120.
M-217, 1.2 C, 0.20 Si, 0.30 Mn, bal Fe.
Annealed: 110,000 TS, 55,000 YS; 18 El; 38 RA; 220 Brin.
For cutters, taps, reamers, broaches; Type W1; water hardened.

HELLEFORS V140.
M-217; 1.4 C, 0.30 Si, 0.30 Mn, bal Fe.
For engravers' tools, blanking dies, cutters; Type W1, water hardened.

HELLEFORS W406.
M-217, 1.4 C, 0.4 Cr, 5.5 W, 0.5 V, bal Fe.
For finishing tools, cutters; oil hardened.

HELLER 70-20-M.
M-343, 0 6-0.7 C, 0.15-0 25 Mo, bal Fe
For pneumatic tools; tough

HELLER 70-20 V
M-343, 0 6-0.7 C, 0.15-0.25 V, bal Fe.
For pneumatic tools; tough.

HELLER AIR HARDENING DIE STEEL
M-1221, 0.95-1 05 C, 0 5-0.7 Mn, 0.3-0.5 Si, 5.0-5 5 Cr, 0 9-1.1 Mo, 0.2-0.3 V, bal Fe
Flat ground die steel.
For punches, dies, gauges, wear resisting tools and parts. AISI type A2 tool steel.

HELLER OIL HARDENING DIE STEEL
M-1221, 0 85-0 95 C, 1 0-1.25 Mn, 0.2-0.04 Si, 0 4-0 6 Cr, 0 4-0 6 W, 0 1-0 2 V, bal Fe
Flat ground die steel.
For dies, punches, jigs, gauges, templates stamps, shims, machine parts
AISI Type 01

HELLER'S CHROME DIE
M-343, 0 85-1 0 C, 3-4 Cr, bal Fe
For tools, dies, shears, now "Brown Label."

HELMENT BRONZE
Eng , 70 Cu, 30 Zn
For water pipes, cartridges, shell cases, deep drawn parts; max ductility

HELMET METAL
Eng., 72-70 Cu, 28-30 Zn
For cartridges, shell cases, helmets, deep drawn

HELUMIN
M-834, 1 8 Cu, 1 5 Fe, bal Al.
Heat treated 50,000 TS, 15 El, 50 Brin.
For light alloy parts, non-hardenable

HELVE
M-502; 0 7-1.26 C, bal Fe
For tools, dies, water hardening

HENCKELS AFH
M-1287, 0 60 C, 0 4 Si, 0 6 Mn, bal Fe
Heat treated 160,000 TS, 113,000 YS, 12 El; 40 RA, 325 Brin
For crimpers, axes, rails, water hardened

HENCKELS G5
M-1287; 0 60 C, 0 35 max Si, 0.30-0 80 Mn, bal Fe.
Heat treated 165,000 TS, 118,000 YS, 12 El, 40 RA; 330 Brin.
For gears, springs, shafts, axes, hammers, water hardened

HENCKELS Ni 35.
M-1287; 0 50 C, 1.05 Cr, 3.25 Ni, 0 5 Mn, bal Fe.
For gears, bolts, crankshafts, forging dies; oil hardened, tough.

HENCKELS Ni 44.
M-1287, 0.40 C, Ni, Cr, Mo, bal Fe.
For gears, bolts, crankshafts, oil hardened, shock resistant.

HENCKELS Ni 187.
M-1287; 0.56 C, Ni, Cr, Mo, V, bal Fe.
For forging and heading dies, punches; oil hardened, shock resistant.

HENCKELS SPBA.
M-1287; C, alloy, bal Fe.
For machine tool parts; oil hardened, tough.

HENCKELS SPDM-H.
M-1287; 0.55 C, 0.90 Si, 1.05 Cr, 0 18 V, 1.85 V, 1.85 W, bal Fe.
For pneumatic tools, chisels, punches; oil hardened, shock resistant.

HENCKELS SPDN.
M-1287; 0.45 C, W, Cr, V, bal Fe.
For forging and heading dies, pneumatic tools; oil hardened, tough

HENCKELS SPDN-A.
M-1287, 0 45 C, Si, Cr, V, bal Fe
For gears, springs, crankshafts, bolts; oil hardened, shock resistant.

HENCKELS SPDN-W
M-1287; 0 35 C, 0.90 Si, 1.05 Cr, 0.18 V, 1.85 W, bal Fe
For pneumatic tools, chisels, rivet sets, oil hardened, shock resistant.

HENCKELS SPEZIAL ZH.
M-1287; 1 45 C, 1 4 Cr, 0 6 Mn, bal Fe
For blanking and forming dies, oil or water hardened

HENCKELS SPG/A.
M-1287, 1.05 C, Cr, bal Fe.
For cutters, bearings, liners, oil or water hardened, wear resistant.

HENCKELS SPHF
M-1287, 1.3 C, 4 75 W, 0 20 max Cr, bal Fe.
For blanking and forming dies, cutters; water hardened

HENCKELS SPHF-A
M 1287, 1 0 C, Cr, bal Fe.
For bearings, cutters, liners, sleeves; water hardened, wear resistant.

HENCKELS SPIII VA
M-1287, C, alloy, bal Fe
For machine tool parts, oil hardened, tough.

HENCKELS SPJ
M-1287, 1 4 C, 0 30 Cr, 0 10 V, 0 30 Mn, bal Fe.
For blanking and forming dies, engravers' tools; oil or water hardened, wear resistant

HENCKELS SPM.
M-1287, 0 90 C, 0 10 V, 1.9 Mn, bal Fe
For blanking and forming dies, punches, cutters; oil hardened, non-deforming.

HENCKELS SPS.
M-1287, 2 1 C, 11 5 Cr, 0 30 Mn, bal Fe
For blanking and forming dies, punches, oil hardened, non-deforming

HENCKELS SPSB
M-1287, 1 65 C, Cr, Mo, V, bal Fe.
For blanking and forming dies, punches, oil hardened, non-deforming.

HENCKELS SPSE
M-1287, 1.05 C, 1.15 W, 0 90 Mn, 1.0 Cr, bal Fe.
For blanking and heading dies; oil hardened, tough.

HENCKLES SPSE/A.
M-1287, 1.25 C, 1.15 Si, 0.70 Mn, 1 2 Cr, bal Fe.
For cold work tools, oil hardened, tough.

HENCKELS SPSWO
M-1287; 2 1 C, 11 5 Cr, 0.70 W, bal Fe
For blanking and forming dies, shears, punches; oil hardened, non-deforming

HENCKELS SPWO4
M-1287; 0 30 C, 1.1 Cr, 0.18 V, 3.75 W, bal Fe.
For pneumatic tools, shears, punches, chisels; oil hardened, tough.

HENCKELS SPWO5VA.
M-1287; 0.30 C, 2.35 Cr, 0.6 V, 4.25 W, bal Fe.
For pneumatic tools, punches, chisels, shears; oil hardened, tough.

HENCKELS SPWO9.
M-1287, 0.30 C, 8.5 W, 0.35 V, 2.65 Cr, bal Fe.
For extrusion dies, rams, liners, punches; oil hardened, hot work steel.

HENCKELS SPWON
M-1287; 0.30 C, 2 0 Co, 8.5 W, 2 4 Cr, 0.25 V, bal Fe.
For extrusion dies, rams, liners, punches; oil hardened, hot work steel

HENCKLES SPZII.
M-1287; 1.0 C, 0.10 V, 0.25 Mn, 0.25 Si, bal Fe.
For blanking and heading dies, cutters; water hardened; Type W2.

HENNEQUIN METAL
C, bal Fe.

HENRICOT BMES.
M-1188; 0.05 C, Mn, Si, bal Fe
For plastic mold dies; case hardened.

HENRICOT BO.
M-1188, 0.10 C, Mn, Si, bal Fe
For rivets, nails, carburized parts; case hardened

HENRICOT FAMO.
M-1188; C, Mn, Si, Ni, Cr, Mo, bal Fe.
Cast: 55,000-60,000 TS; 270-310 Brin.
For wear plates; acicular cast iron.

HENRICOT FC
M-1188; 3 C, 0.7 Cr, Mn, Si, bal Fe.
Cast: 220-270 Brin.
For wear resistant castings; refractory cast iron.

HENRICOT FC2.
M-1188; 3 C, 2 Cr, Si, Mn, bal Fe.
Cast: 200-300 Brin.
For abrasion resistant castings; cast iron

HENRICOT FP1.
M-1188; 3 C, Mn, Si, bal Fe.
Cast: 25,000-30,000 TS; 180-250 Brin.
For gears, shafts, housings, brackets, pearlitic cast iron.

HENRICOT FP2.
M-1188; 3 C, Mn, Si, bal Fe.
Cast: 40,000-50,000 TS; 230-250 Brin.
For gears, shafts, housings, brackets; pearlitic cast iron.

HENRICOT FPNC.
M-1188; 3 C, Mn, Si, Ni, Cr, bal Fe.
Cast: 35,000-45,000 TS; 200-250 Brin.
For gears, shafts, housings, brackets; pearlitic cast iron.

HENRICOT H1F.
M-1188; C, Ni, Cr, Mo, bal Fe.
Heat treated: 130,000-140,000 TS; 110,000-130,000 YS; 10-8 El.
For gears, shafts, housings; air hardened, tough.

HENRICOT HA0.
M-1188; 1 C, 6 Cr, bal Fe.
For permanent magnets; hardened.

HENRICOT HA1.
M-1188; 1 C, 6 Cr, 3 Co, bal Fe.
For permanent magnets; heat treated.

HENRICOT HA2.
M-1188; 1 C, 8 Cr, 12 Co, bal Fe.
For permanent magnets; hardened.

HENRICOT HA3.
M-1188; 1 C, 10 Cr, 15 Co, bal Fe.
For permanent magnets; hardened.

HENRICOT HA4.
M-1188; 0.7 C, 6 Cr, 4 W, 35 Co, bal Fe.
For permanent magnets; high coercive force.

HENRICOT HA5
M-1188; C, alloy, bal Fe.
For permanent magnets; heat treated.

HENRICOT HBA.
M-1188; 0.40 C, 4.5 Ni, 1.5 Cr, 0.75 W, bal Fe.
Hardened. 500 Brin.
For bakelite molding dies; air hardening.

HENRICOT HBE.
M-1188; 0.10 C, 0 40 Cr, bal Fe.
For dies and molds for plastics; hubbing die steel, water hardened.

HENRICOT HBNO
M-1188, 0 5 C, 12 Cr, bal Fe.
Hardened 500 Brin
For bakelite molding dies, oil or air hardening

HENRICOT HD2
M-1188, 1 C, 5 Cr, 1 Mo, bal Fe.
For dies; oil or air hardening.

HENRICOT HDK.
M-1188; 2 C, 12 Cr, bal Fe.
Hardened 600 Brin
For dies; oil hardening, non-deforming.

HENRICOT HDKW.
M-1188, 1.5 C, 12 Cr, 0 75 Mo, 0 75 W, bal Fe
Hardened 600 Brin
For dies, air hardening, non-deforming

HENRICOT HDZ
M-1188, 1 C, 1 Mn, 0 5 Cr, 0.15 V, bal Fe.
Hardened 650 Brin
For dies, punches, cold forming dies; non-deforming, oil hardening.

HENRICOT HEB
M-1188; 0.52 C, Cr, Si, bal Fe
For shear blades, cutters, pneumatic chisels; oil hardened

HENRICOT HEM3.
M-1188, 0 50 C, 1 Cr, 0.15 V, bal Fe.
Hardened: 142,000 TS; 128,000 YS; 10 El, 50 RA.
For chisels, springs; tough, shock resistant.

HENRICOT HF
M-1188, 0.50-1.25 C, bal Fe.
For hand chisels, shear blades, hammer dies, water hardening.

HENRICOT HF1.
M-1188, 0.15 min C, 12-14 Cr, bal Fe.
Annealed: 88,000 TS, 40,000 YS, 32 El; 68 RA; 170 Brin.
Heat treated· 256,000 TS; 190,000 YS; 6 El; 10 RA, 540 Brin
For cutlery, valve trim, springs, surgical instruments, Type 420, stainless, hardenable.

HENRICOT HF2.
M-1188, 0.7 C, bal Fe.
Heat treated: 174,000 TS; 128,000 YS; 12 El, 37 RA; 352 Brin.
For short shear blades, clutch discs; water hardened; Type W1.

HENRICOT HF3.
M-1188; 0.85 C, bal Fe.
Heat treated: 188,000 TS; 143,000 YS; 12 El; 35 RA; 388 Brin.
For short shear blades, tools; water hardened; Type W1.

HENRICOT HF4.
M-1188; 1.0 C, bal Fe.
Annealed: 100,000 TS; 53,000 YS; 21 El; 42 RA; 200 Brin.
For cutting tools, drills, hobs, cold punches; Type W1; water hardened.

HENRICOT HIF.
M-1188; 0.30-0.35 C, 1.4 Cr, 3.2 Ni, Mo, bal Fe.
For gears, pinions, shafts, crimpers; oil hardened, shock resistant.

HENRICOT HKZ.
M-1188; 0.70 C, 1 Cr, 0.15 V, bal Fe.
Hardened· 170,000 TS; 156,000 YS; 7 El; 40 RA.
For tools, shear blades; oil hardening.

HENRICOT HL.
M-1188; C, Cr, Ni, Mo, bal Fe.
For gears, shafts; heat treatable.

HENRICOT HL1.
M-1188; C, 1 Ni, Cr, bal Fe.
For construction and automotive parts, oil hardened, shock resistant.

HENRICOT HL1A.
M-1188, C, 1.5 Ni, 0.75 Cr, 0.15 Mo, bal Fe.
Normalized: 100,000-115,000 TS; 70,000-85,000 YS; 10-8 El.
For cast housings, gears, shafts; oil hardened, tough.

HENRICOT HL1B.
M-1188; C, 1.5 Ni, 0.75 Cr, 0.15 Mo, bal Fe.
Normalized: 115,000-130,000 TS; 85,000-100,000 YS; 8-6 El
For gears, shafts, housings; oil hardened, tough.

HENRICOT HL1C.
M-1188; 0.15 max C, 1 5 Ni, 0 6 Cr, 0.2 Mo, bal Fe.
For gears, pinions, shafts; case hardening steel.

HENRICOT HL1X.
M-1188, C, 1.5 Ni, 0.5 Cr, 0.15 Mo, bal Fe.
Heat treated: 90,000-110,000 TS; 70,000-85,000 YS; 14-12 El
For cast housings, flanges, gears, shafts; water or oil hardened, tough.

HENRICOT HL2.
M-1188; C, 2 Ni, Cr, bal Fe
For construction and automotive parts; oil hardened, shock resistant.

HENRICOT HL2X
M-1188; C, 2.5 Ni, 1 Cr, 0.2 Mo, bal Fe.
Heat treated· 115,000-130,000 TS, 90,000-110,000 YS; 12 El
For gears, shafts, housings; oil hardened, shock resistant.

HENRICOT HL3.
M-1188; 0.4 C, 1.5 Cr, 3 Ni, bal Fe.
For construction and automotive parts, gears; tough, oil hardened.

HENRICOT HL3C.
M-1188; 0.15 C, 3 Ni, 1 Cr, 0.2 Mo, bal Fe.
For gears, pinions, shafts; case hardening steel.

HENRICOT HL3X.
M-1188; C, 3 Ni, 1 Cr, 0.2 Mo, bal Fe.
Heat treated: 115,000-130,000 TS; 100,000-115,000 YS; 13-10 El.
For gears, shafts, housings; oil hardened, shock resistant.

HENRICOT HL5C.
M-1188; 0.15 C, 1.5 Cr, 5 Ni, 0.2 Mo, bal Fe.
Heat treated: 130,000-200,000 TS.
For camshafts, gears, pinions, bolts; case hardened, shock resistant.

HENRICOT HL6.
M-1188; 0.4 C, Cr, 4 Ni, bal Fe.
For gears, pinions, shafts, auto parts; oil hardened, shock resistant.

HENRICOT HL27.
M-1188; 0.30 C, 22 Ni, 5 Cr, bal Fe.
Annealed: 85,000-107,000 TS; 50,000-72,000 YS; 20 El; 50 RA.
For electrical industry; nonmagnetic.

HENRICOT HM.
M-1188; C, Cr, Mo, bal Fe.
For gears, shafts; heat treatable.

HENRICOT HM3.
M-1188; C, Cr, Ni, Mn, bal Fe.
For machine tool parts.

HENRICOT HMA.
M-1188; 0.15 C, 0.5 Cr, bal Fe.
Annealed: 75,000-85,000 TS; 30,000-50,000 YS; 20-18 El; 150-160 Brin.
For oil refinery equipment; creep resistant to 450°C; Type 501.

HENRICOT HME.
M-1188, C, 1 Cr, 0.15 Mo, bal Fe.
Heat treated: 100,000-120,000 TS; 85,000-100,000 YS; 10-8 El.
For housings, flanges, supports, castings; water hardened.

HENRICOT HMES.
M-1188; 0.2 C, 0.5 Cr, 0.1 Mo, bal Fe.
Heat treated· 90,000-100,000 TS; 60,000-70,000 YS; 10-8 El.
For cast housings, flanges, supports; water hardened.

HENRICOT HMH.
M-1188; C, Cr, Mo, bal Fe.
For construction and automotive parts; oil hardened, shock resistant.

HENRICOT HMH1
M-1188; C, 1 Cr, 0.25 Mo, bal Fe.
Heat treated: 110,000-120,000 TS; 80,000-90,000 YS; 10-8 El.
For cast housings, flanges, gears, supports; water hardened.

HENRICOT HMH2
M-1188; C, 1 Cr, 0.25 Mo, bal Fe.
Normalized: 115,000 TS, 80,000 YS; 8 El.
Heat treated: 135,000 TS; 110,000 YS; 7 El.
For cast housings, flanges, supports, gears; water hardened.

HENRICOT HMV.
M-1188; 0.15 C, 1 Cr, 0.5 Mo, 0.2 V, bal Fe.
Annealed: 115,000-135,000 TS; 90,000-120,000 YS; 10-8 El; 150-180 Brin.
For oil refinery equipment; creep resistant to 575°C.

HENRICOT HMV.
M-1188; 0.25 C, 1 Cr, 0.6 Mo, 0.2 V, bal Fe
Heat treated: 142,000 TS; 128,000 YS; 10 El, 45 RA; 250 Brin.
For oil refinery equipment; creep resistant.

HENRICOT HMVX.
M-1188; 0.15 C, 1 Cr, 0.5 Mo, V, bal Fe.
Annealed: 85,000-100,000 TS; 60,000-70,000 YS; 12-10 El; 150-170 Brin.
For oil refinery equipment; creep resistant to 575°C.

HENRICOT HMX.
M-1188; 0.25 C, 1 Cr, 0.75 Mo, bal Fe.
Heat treated: 142,000 TS; 128,000 YS; 10 El; 45 RA; 250 Brin.
For oil refinery equipment; creep resistant.

HENRICOT HMX1.
M-1188; 0.15 C, 1 Cr, 0.5 Mo, bal Fe.
Annealed: 75,000-85,000 TS; 60,000-70,000 YS; 15-12 El; 150-180 Brin.
For oil refinery equipment; creep resistant to 500°C; Type 502.

HENRICOT HMX3.
M-1188; 0.15 C, 2.25 Cr, 1 Mo, bal Fe.
Annealed: 80,000-90,000 TS; 50,000-65,000 YS; 16-14 El; 150-160 Brin.
For oil refinery equipment; creep resistant to 575°C.

HENRICOT HN.
M-1188; 0.2 max C, 30-50 Ni, bal Fe.
Annealed.
For controlled expansion properties; water quenched from 1100°C.

HENRICOT HN50
M-1188; 50-51 Ni, bal Fe.
Annealed: 60,000-75,000 TS; 30,000-40,000 YS; 35-30 El.
For electrical equipment; controlled expansion.

HENRICOT HNF.
M-1188; 45 Ni, bal Fe.
Annealed: 90,000-130,000 TS, 40,000-70,000 YS; 30-20 El.
For electrical equipment, motors, high permeability, soft magnet.

HENRICOT HO.
M-1188, 0.05 C, Mn, Si, bal Fe.
For plastic mold dies; case hardened.

HENRICOT HOT.
M-1188; C, Mn, bal Fe.
For surface hardened gears, shafts, wear resistant.

HENRICOT HP2.
M-1188; 0.35 C, 1 Si, 5 Cr, 1.25 Mo, 1.25 W, bal Fe.
Hardened· 450 Brin
For dies; air hardening.

HENRICOT HP93.
M-1188; 0.55 C, Cr, Mo, bal Fe.
For pneumatic hammers, chisels; oil hardened, tough.

HENRICOT HPB
M-1188; C, 14 W, V, Cr, bal Fe.
For drawing and forming dies, spindles, oil hardened, tough.

HENRICOT HPC.
M-1188; C, 5 Cr, Mo, V, bal Fe
For drawing dies and spindles, Al die casting dies; oil hardened, non-deforming

HENRICOT HPL.
M-1188; 0.50 C, 2.5 Ni, 1 5 Cr, 0.2 Mo, bal Fe.
Hardened: 550 Brin.
For chisels, dies; tough, shock resistant.

HENRICOT HPNR.
M-1188; 0 35 C, 2 5 Cr, 9 W, bal Fe.
Hardened: 400 Brin
For extrusion and drawing dies; hot work steel.

HENRICOT HPO.
M-1188; C, 5 W, Ni, Cr, bal Fe.
For bolt bushing, drawing dies for Cu alloy; oil hardened.

HENRICOT HPT.
M-1188, 0.30 C, 2.5 Cr, 4.5 W, 0.5 V, bal Fe.
Hardened: 450 Brin.
For dies for brass tubing; oil hardening.

HENRICOT HPW.
M-1188; 0.5 C, 1.5 Cr, 3 Ni, 0.75 W, bal Fe.
For dies, chisels; oil or air hardening.

HENRICOT HR1.
M-1188; 0.08 max C, 11.5-13 Cr, 0 1-0.3 Al, bal Fe.
Normalized: 71,000 TS; 42,600 YS; 22 El; 70 RA; 150 Brin.
Heat treated: 175,000 TS; 145,000 YS; 21 El; 64 RA; 352 Brin.
For injectors, table flatware, valves, pumps; Type 405; corrosion resistant.

HENRICOT HR2.
M-1188, 0 20 C, 12 Cr, 0.5 Ni, bal Fe.
Heat treated: 256,000 TS; 190,000 YS; 6 El; 10 RA; 540 Brin
For turbine blading, coal screens; corrosion resistant, hardenable.

HENRICOT HR2F.
M-1188; 3 C, 14 Cr, bal Fe.
For abrasion and heat resistant castings, cast iron, wear and heat resistant.

HENRICOT HR2L
M-1188, C, 14 Cr, bal Fe.
Annealed· 90,000-100,000 TS, 40,000-60,000 YS; 14-12 El.
For oil refinery equipment, furnace parts; heat resistant to 800°C

HENRICOT HR2X
M-1188, 0 08 C, 12 Cr, 0 2 Al, 1 max Mn, 1 max Si, bal Fe
Annealed 85,000 TS, 60,000 YS, 20 El, 150 Brin.
Heat treated 170,000 TS, 145,000 YS; 21 El, 64 RA; 350 Brin.
For injectors, flatware, valve seats, heat resistant, hardenable

HENRICOT HR3
M-1188, 0.10 max C, 18 Cr, bal Fe.
Normalized 86,000 TS, 57,000 YS, 20 El, 50 RA.
For nonsealing purposes up to 900°C, corrosion resistant

HENRICOT HR3I.
M-1188; 0 10 C, 18 Cr, 3 Ni, bal Fe
Heat treated 121,000 TS; 100,000 YS; 15 El; 50 RA; 200-220 Brin
For valves, valve seats, turbine blades; stainless, hardenable.

HENRICOT HR4
M-1188, 0 2 max C, 24-26 Cr, 1 max Si, bal Fe
Annealed· 75,000 85,000 TS, 50,000-60,000 YS; 12 El, 180 Brin
For furnace parts, heat treating boxes, Type 442, corrosion and heat resistant

HENRICOT HR4LA
M-1188, C, 24 Cr, 12 Ni, bal Fe.
Annealed: 100,000-115,000 TS; 40,000-60,000 YS, 6-4 El
For furnace parts and accessories, heat treating boxes; heat resistant to 1050°C.

HENRICOT HR4LB
M-1188, 0.20 C, 23 24 Cr, 12-14 Ni, 1 Si, bal Fe.
Annealed: 85,000-100,000 TS; 40,000-60,000 YS; 15-12 El.
For furnace parts, heat treat equipment, burners, heat resistant to 1050°C.

HENRICOT HR4LX
M-1188, 0 15 C, 0 75 Si, 12 Ni, 23 Cr, bal Fe.
Annealed: 93,000 TS; 50,000 YS; 40 El, 50 RA; 180 Brin.
For heat treating equipment, austenitic, stainless.

HENRICOT HR4M
M-1188, 0.20 C, 23-28 Cr, 2 5-5.0 Ni, 1-2 Mo, bal Fe
Normalized: 103,000 TS; 78,000 YS; 18 El; 45 RA; 235 Brin.

Annealed: 95,000 TS; 41,000 YS; 29 El; 60 RA; 225 Brin.
For valves, pumps, furnace parts; Type 327; heat resistant.

HENRICOT HR5.
M-1188; 2 C, 30 Cr, bal Fe.
Cast: 350 Brin.
For furnace parts; operating temperature to 1050°C.

HENRICOT HR5A.
M-1188; C, 25-30 Cr, bal Fe.
550-650 Brin.
For impellers for grit cleaners; martensitic cast iron.

HENRICOT HR5I.
M-1188; 2 C, 30 Cr, bal Fe.
For furnace parts, heat resistant castings; cast iron, wear and heat resistant.

HENRICOT HR5II.
M-1188; 2 C, 30 Cr, Mo, bal Fe.
Cast: 350 Brin.
For heat and wear resistant castings; cast iron, heat resistant to 1050°C.

HENRICOT HR5III.
M-1188; 2 C, 30 Cr, Mo, bal Fe.
Cast: 350 Brin.
For heat and wear resistant castings; cast iron heat resistant to 1050°C

HENRICOT HR5M
M-1188; 2 C, 30 Cr, Mo, bal Fe
For chemical plant equipment; cast iron; corrosion and wear resistant

HENRICOT HR5VI.
M-1188, 2 C, 30 Cr, bal Fe
For chemical plant equipment, cast iron, corrosion and wear resistant.

HENRICOT HR6.
M-1188; 0.35 C, 23-27 Cr, 0.25 max N, bal Fe
Annealed. 90,000 TS; 60,000 YS, 20 El, 45 RA, 180 Brin.
Cold drawn: 175,000 TS; 155,000 YS, 2 El; 25 RA, 250 Brin
For furnace parts, preheaters, annealing boxes; Type 446, corrosion resistant

HENRICOT HR6P
M-1188, 0.10 max C, 27-30 Cr, bal Fe.
Annealed 75,000-85,000 TS, 50,000-60,000 YS; 12 El
For glass and petroleum industry equipment; corrosion and heat resistant to 1200°C.

HENRICOT HR8S
M-1188; 0.2 C, 5 Cr, 0.5 Mo, bal Fe
Annealed: 100,000 TS; 85,000 YS, 12 El; 160 Brin
For oil refinery equipment; creep resistant to 600°C.

HENRICOT HRC.
M-1188; 0.30 C, 12 Cr, bal Fe.
Hardened: 142,000 TS; 121,000 YS, 8 El, 40 RA
For cutlery; corrosion resistant, hardenable.

HENRICOT HRM.
M-1188; 0.3 C, 14 Cr, 1.2 Mo, bal Fe.
Heat treated: 129,000 TS; 107,000 YS; 13 El, 45 RA.
For paper industry beaters and blades; corrosion resistant, hardenable.

HENRICOT-HRM2M1.
M-1188, 0.15 C, 13 Cr, 1.15 Mo, bal Fe.
Annealed: 70,000 TS, 35,000 YS; 40 El; 80 RA; 145 Brin.
Cold Drawn: 90,000 TS; 80,000 YS; 20 El, 65 RA; 205 Brin.
For chemical plant and oil refinery equipment, table flatware, knives, cutlery.
Corrosion resistant.

HENRICOT-HRM2M2.
M-1188; 0.20 C, 13 Cr, 1.15 Mo, bal Fe.
Annealed: 95,000 TS; 40,000 YS; 25 El; 55 RA; B 92 Rock.
Heat treated: 240,000 TS; 210,000 YS; 8 El; 25 RA; C 50 Rock
For cutlery, shafts, surgical instruments, gears, knives.
Corrosion resistant, hardenable.

HENRICOT HS1.
M-1188; C, 12-14 Mn, bal Fe.
160-375 Brin
For railroad frogs and tracks; austenitic, wear resistant.

HENRICOT HS2.
M-1188, C, 12-14 Mn, bal Fe.
180-400 Brin
For railroad frogs and tracks; austenitic, wear resistant.

HENRICOT HS3.
M-1188, C, 12-14 Mn, bal Fe
180-425 Brin.
For railroad frogs and tracks, austenitic, wear resistant

HENRICOT HT1.
M-1188, 0.15 C, 2 Si, 15 Ni, 18 Cr, bal Fe
Annealed. 86,000 TS, 43,000 YS; 35 El, 50 RA
For heat resistant applications; heat resistant to 1000°C.

HENRICOT HT2.
M-1188, 0.15 C, 2 Si, 25 Ni, 25 Cr, bal Fe.
Annealed 93,000 TS, 50,000 YS; 30 El, 50 RA.
For heat resistant applications, heat resistant to 1100°C

HENRICOT HT3.
M-1188, 0.15 C, 2 Si, 35 Ni, 20 Cr, bal Fe.
Annealed 100,000 TS, 57,000 YS, 25 El; 45 RA.
For heat resistant applications; heat resistant to 1200°C.

HENRICOT HT3S
M-1188, 0.30 C, 30 Ni, 12 Cr, bal Fe.
Water quenched 85,000-93,000 TS; 35,000-50,000 YS, 20 El, 40 RA.
For the steam turbine industry, corrosion and heat resistant

HENRICOT HT6
M-1188, 0.15 C, 2 Si, 65 Ni, 18 Cr, bal Fe
Annealed 100,000 TS, 57,000 YS, 20 El, 45 RA.
For heat resistant applications; heat resistant to 1250°C.

HENRICOT-H.T.35
M-1188; 0.05-0.12 C, 0.18 Ti, 0.6 Cb, 26-30 Cr, 47-52 Co, bal Fe
Cast. 135,000 TS; 48,000 YS; 10 El; 10 RA; 250 Brin.
Wrought: 132,000 TS; 61,000 YS; 7 El, 6 RA; 350 Brin.
For furnace baffles, burner tips, sintering grates, quench baskets.
Corrosion, heat, thermal shock resistant.

HENRICOT HTL.
M-1188; 0.20 C, 19 Cr, 9 Ni, 1.5 Mo, 1.5 W, bal Fe.
For blades for gas turbines; austenitic, stainless.

HENRICOT HTY.
M-1188; 0.15 C, 1 Cr, 0.4 Mo, 0.4 V, 0.5 W, bal Fe.
Annealed: 80,000-90,000 TS; 60,000-70,000 YS; 16-14 El; 150-170 Brin.
For oil refinery equipment; creep resistant to 575°C.

HENRICOT HV1S.
M-1188; 0.08 max C, 8 Ni, 18 Cr, bal Fe.
Annealed: 79,000 TS; 36,000 YS; 40 El; 50 RA; 150 Brin.
For chemical plant equipment; Type 304; stainless, austenitic.

HENRICOT HV2S.
M-1188; 0.15 max C, 18 Cr, 9 Ni, bal Fe.
Annealed: 75,000-85,000 TS; 30,000-40,000 YS; 45-40 El; 150-160 Brin.
For chemical and textile plant equipment, tanks, mixers; stainless, austenitic; Type 302.

HENRICOT HV3.
M-1188; 0.08 max C, 11 Ni, 18 Cr, 2.5 Mo, bal Fe.
Annealed: 95,000-85,000 TS; 50,000-36,000 YS; 60-50 El; 75-60 RA; 190-150 Brin.
For chemical and plastic plant equipment; Type 316; stainless, austenitic.

HENRICOT HV3P.
M-1188; 0.2 C, 18 Cr, 8 Ni, 1.5 Mo, bal Fe.
Annealed: 70,000-80,000 TS; 30,000-40,000 YS; 25-20 El; 150-160 Brin.
For marine ornamental trim, hardware; Type 316; stainless, austenitic.

HENRICOT HV4.
M-1188; 0.08 C, 18-20 Cr, 8-11 Ni, 2 max Mn, bal Fe.
Annealed: 90,000 TS; 45,000 YS; 60 El; 135 Brin.
Cold drawn: 180,000 TS; 150,000 YS; 10 El; 330 Brin.
For chemical plant equipment, welded structures; Type 304; stainless, austenitic.

HENRICOT HV5.
M-1188; 0.25 max C, 24-26 Cr, 19-22 Ni, bal Fe.
Annealed: 95,000 TS; 45,000 YS; 50 El; 65 RA; 180 Brin.
At 1200°F: 57,000 TS; 22,000 YS; 32 El; 45 RA.
For engine components, valves, furnace equipment; Type 310; austenitic, heat resistant.

HENRICOT HV6.
M-1188; 0.08 max C, 9 Ni, 18 Cr, 0.6 Ti, bal Fe.
Annealed: 86,000 TS; 43,000 YS; 40 El; 50 RA.
For welded stainless construction; austenitic, stainless, stabilized.

HENRICOT HV6S.
M-1188; 0.08 max C, 17-19 Cr, 9-12 Ni, Cb = 10 × C, bal Fe.
Annealed: 85,000-95,000 TS; 35,000-45,000 YS; 55-50 El; 175 Brin.
For welded structures, chemical plant equipment; Type 347; corrosion and heat resistant.

HENRICOT HV7.
M-1188; 0.08 max C, 20 Ni, 15 Cr, 4.5 Mo, bal Fe.
Annealed: 85,000-95,000 TS; 35,000-50,000 YS; 60-50 El; 60-75 RA; 150-190 Brin.
For chemical plant equipment, furnace parts; stainless, austenitic.

HENRICOT HV8.
M-1188; 0.07 max C, 17 Cr, 13 Ni, 4.5 Mo, bal Fe.
Annealed: 90,000 TS; 40,000 YS; 45 El; 60 RA; 180 Brin.
For acid resistant chemical plant equipment; Type 317; stainless, austenitic.

HENRICOT HV9.
M-1188; 0.08 max C, 25 Ni, 20 Cr, 4.5 Mo, bal Fe.
Annealed: 85,000-100,000 TS; 35,000-57,000 YS; 60-50 El; 70-60 RA; 150-190 Brin.
For chemical plant equipment, furnace parts; stainless, austenitic.

HENRICOT HV30.
M-1188; 0.2 C, 18 Cr, 10 Ni, 2.5 Mo, bal Fe.
Annealed: 75,000-100,000 TS; 30,000-50,000 YS; 25-20 El; 150-170 Brin.
For acid resistant chemical and textile plant equipment; Type 316; stainless, austenitic.

HENRICOT HV6.
M-1188; 0.2 C, 18 Cr, 8 Ni, bal Fe.
Annealed: 75,000-90,000 TS; 30,000-40,000 YS; 25-20 El; 150-160 Brin.
For nitric acid and chemical plant equipment; stainless, austenitic.

HENRICOT HV90.
M-1188; 0.2 C, 20 Cr, 30 Ni, 4.5 Mo, others, bal Fe.
Annealed: 75,000-100,000 TS; 30,000-50,000 YS; 25-20 El; 150-160 Brin.
For H_2SO_4 and HCl, chemical plant equipment; stainless, austenitic.

HENRICOT HVI.
M-1188; 0.08-0.20 C, 2 max Mn, 17-19 Cr, 8-10 Ni, bal Fe.
Annealed: 85,000 TS; 35,000 YS; 60 El; 70 RA; 150 Brin.
Cold drawn: 25,000 TS; 95,000 YS, 25 El; 55 RA; 277 Brin.
For oil refinery and chemical plant equipment; Type 302; stainless, austenitic.

HENRICOT HVIR.
M-1188; 0.3-0.4 C, 18 Cr, 8 Ni, bal Fe.
For beating trough blades in paper refining machines; austenitic, stainless

HENRICOT HVIX.
M-1188; 0.05-0.08 C, 18 Cr, 9.5 Ni, bal Fe.
Annealed: 75,000-85,000 TS; 25,000-35,000 YS; 45-40 El; 150-160 Brin.
For chemical plant equipment, trim, tanks; stainless, austenitic; Type 304.

HENRICOT HW2.
M-1188; 0.5 C, 1 Cr, 2 W, bal Fe.
For punches, chisels; tough, shock resistant.

HENRICOT HW2E.
M-1188; 0.37 C, 1 Cr, 1.75 W, bal Fe.
For punches, chisels; water hardening.

HENRICOT HW2E.
M-1188; 0.38 C, 16-18 Cr, bal Fe. For oil refinery equipment, bolts; corrosion resistant.

HENRICOT HW3.
M-1188; 1.25 C, 3 W, bal Fe
Hardened: 650 Brin.
For punches, chucks, wood working tools; water hardening.

HENRICOT HWC.
M-1188; 0.8 C, 4 Cr, 19 W, 1.6 V, 13 Co, 1 Mo, bal Fe.
For cutters, lathes and planer tools; high speed steel.

HENRICOT HWD.
M-1188; 0.7 C, 21 W, Cr, V, bal Fe.
For lathe and planer tools, cutters; high speed steel.

HENRICOT HWF.
M-1188; 0.7 C, 4 Cr, 18 W, 1.25 V, bal Fe.
For cutters, hobs, drills; high speed steel.

HENRICOT HWF1.
M-1188; 0.7 C, 18 W, 4 Cr, 1 V, bal Fe.
For cutters, drills, taps, hobs, broaches; high speed steel, oil hardened.

HENRICOT HWF2.
M-1188; 0.7 C, 4 Cr, 1 V, 18 W, bal Fe.
For cutters, drills, reamers, taps, broaches; high speed steel.

HENRICOT HWIE.
M-1188; 1.2 C, 1 W, bal Fe.
For punches; water hardening.

HENRICOT HWMO4.
M-1188; 0.85 C, 4 Cr, 2 V, 6 W, 5 Mo, bal Fe.
Hardened: 640 Brin.
For twist drills, reamers, milling cutters; high speed steel.

HENRICOT HWMO7.
M-1188; 0.85 C, 4 Cr, 1.5 V, 1.5 W, 8 Mo, bal Fe.
Hardened: 650 Brin.
For gear cutters, broaches, boring tools; high speed steel.

HENRICOT HWS.
M-1188; 0.7 C, 4 Cr, 14 W, 1.2 V, bal Fe
Hardened: 610 Brin.
For tools, cutters, hobs, drills, reamers; high speed steel.

HENRICOT HWT.
M-1188; 0 8 C, 4 Cr, 19 W, 1.6 V, 6 Co, 1 Mo, bal Fe.
For cutters, broaches, lathe tools, drills, high speed steel.

HENRICOT Ni-Al-0.
M-1188, 22 Ni, 10 Al, bal Fe.
For permanent magnets; high permeability.

HENRICOT Ni-Al-1
M-1188; 30 Ni, 12 Al, bal Fe.
For permanent magnets, high permeability

HENRICOT Ni-Al-Co-2
M-1188, 28 Ni, 10 Al, 6 Co, bal Fe.
For permanent magnets, high permeability.

HENRICOT Ni-Al-Co-2B.
M-1188, 26 Ni, 12 Al, 8 Co, bal Fe
For permanent magnets, high permeability.

HENRICOT Ni-Al-Co 6.
M-1188, 20 Ni, 10 Al, 12 Co, 6 Cu, bal Fe.
For permanent magnets, high permeability.

HEPOSIL.
M-Germany; 21-22 Si, 1.5 Cu, 1.5 Ni, 0 7 Mn, 1 2 Co, 0 5 Mg, bal Al
For pistons in engines, liners
Low expansivity, high corrosion resistance.

HEPPENSTALL 2 C 30
M-64, 0 35 C, 0 7 Mn, 0.8 Cr, 0.45 Mo, 1.75 Ni, bal Fe.
Hardened: 135,000 TS, 115,000 YS; 20 El; 50 RA, 293 Brin.
For piston rods, crankshafts, rams; upsetter.

HEPPENSTALL 2V72.
M-64; 0.75 C, 0.4 Mn, 0.1 V, 0.6 Si, bal Fe.
For coining and crimping dies, striking dies, shear knives, trimmers; water hardening tool steel; AISI W2.

HEPPENSTALL Gr. 2V90.
M-64; 0.90-0 95 C, 0.3-0.5 Mn, 0.5-0.7 Si, 0 08-0.10 V, bal Fe.
Water hardened: 216,000 TS; 152,000 YP; 11 El; 600 Brin.
For coining and crimping dies, embossing dies, and rolls, heading and forming dies, swaging and trimming dies.
Type W2 water hardening tool steel, wear and abrasion resistant.

HEPPENSTALL 3C40.
M-64; 0.43 C, 2.6 Ni, 1.35 Cr, 0.55 Mo, 0.18 V, bal Fe.
Annealed: 250 Brin.
Heat treated: 470 Brin.
For die blocks; oil hardened, shock resistant.

HEPPENSTALL 5H50.
M-64; 0.55 C, 0.90 Cr, 0.43 Mo, 0.06 V, bal Fe.
Annealed: 210 Brin.
Heat treated: 450 Brin.
For die blocks, inserts; oil hardened, tough.

HEPPENSTALL GR. 5M21.
M-64; 0.18-0.23 C, 3.0-3.25 Ni, 3.25-3.50 Mo, 0.15 max C, 0.7 Mn, 0.3 Si, bal Fe.
For press and upsetter dies, piercers, punches, die casting dies; supplied in two grades, hardened and annealed.

HEPPENSTALL Gr. 6E14GV.
M-64; 0.15 C, 3.5 Ni, 1.6 Cr, 0.05 V, bal Fe.
Ht Tr.: 320 Brin; Annealed: 230 Brin.
For piston rods, cams, camshafts.
Case hardening and shock resisting.

HEPPENSTALL 6H55.
M-64, 0.55 C, 1.05 Cr, 0.47 Mo, 0.13 V, bal Fe.
Annealed: 210 Brin.
Heat treated 500 Brin.
For die blocks, inserts; oil hardened, tough.

HEPPENSTALL 9C60.
M-64; 0 60 C, 1 25 Ni, 0 65 Cr, 0.45 Mo, bal Fe.
Annealed: 250 Brin.
Heat treated: 540 Brin.
For miscellaneous forgings, shear knives; oil hardened, shock resistant.

HEPPENSTALL Gr. 9C68
M-64, 0.65-0 70 C, 0 4-0.5 Mo, 1.0-1.5 Ni, 0.5-0.8 Cr, 0 5-0.8 Mn, 0.2-0 35 Si, bal Fe.
Oil harden: 208,000 TS, 180,000 PL; C 45 Rock.
For spindles, punches, brake dies, collets, plastic mold dies, idler rolls, rocker plates, stamping dies, shear blades.
Type L6 tool steel. Deep oil hardening.
Tough and wear resistant.

HEPPENSTALL Gr. 9R40.
M-64, 0.40 C, 0.95 Cr, 0.45 Mo, bal Fe.
Annealed: 220 Brin, Ht. Tr.. 370 Brin.
For piston rods, shafts, counter-shafts, gears.
Oil hardening, shock resistant.

HEPPENSTALL Gr. 14A60.
M-64; 0 55-0 65 C, 0 7-0.9 Mn, 0.15-0 35 Si, 0 2-0 3 Cr, bal Fe.
Heat Treated: 285-461 Brin.
For trimmers, die and sow blocks, axles, crankpins, rollers, shafting. Shallow hardening, wear resistant. Type W4 water hardening tool steel

HEPPENSTALL Gr. A110.
M-64; 1.05-1.15 C, 0 25-0.35 Mn, 0.25-0.35 Si, bal Fe.
Annealed: 100,000 TS; 54,000 YS, 21 El; 197 Brin.
Water Hardened: 216,000 TS; 152,000 YS; 11 El; 600 Brin.
For cold header and striking dies, arbors, coining and broaching tools, mandrels, pipe cutters, tube drawing dies.
Water hardening Type W1 tool steel, wear and abrasion resistant.

HEPPENSTALL B76
M-64; 0.97 C, 1.15 Mn, 0.53 Cr, 0.20 V, 0.50 W, bal Fe.
Annealed: 250 Brin.
Heat treated: 620 Brin.
For stamping, forming and blanking dies; shear knives; oil hardened, tough. AISI W1.

HEPPENSTALL GRADE "C."
M-64; 0.55 C, Ni, Cr, Mo, C, bal Fe.
Oil treated: 305,000-206,000 TS; 288,000-195,000 YS; 6-18 El; 17-52 RA; 555 Brin.
For die blocks, inserts; drop forged.

HEPPENSTALL C50.
M-64; 0.5 C, 0.55 Mn, 1 Cr, 1.5 Ni, bal Fe.
Oil hardened: 115,000-125,000 TS; 85,000-100,000 YS; 20-18 El; 50-45 RA; 248-293 Brin.
For large mill pinions, couplings; high tensile forgings.

HEPPENSTALL C55.
M-64; 0.55 C, 0.90 Cr, 0.30 Mo, 1.5 Ni, bal Fe.
For hot work dies, punches; oil hardened, tough.

HEPPENSTALL Gr. C57.
M-64; 0.52-0.57 C, 2.0-2.2 Ni, 0.53-0.68 Mn, 0.80-0.95 Cr, 0.5-0.7 Si, 0.70-0.75 Mo, bal Fe.
For hammer dies, press and upsetter dies, gripper and header dies, piercing mandrels, shear blades
Hot work steel. High compressive strength.

HEPPENSTALL Gr. C58.
M-64; 0.42-0.47 C, 4.1-4.5 Ni, 1.25-1.65 Cr, 0.7-0.8 Mo, 0.12-0.16 V, bal Fe.
Heat treated: 218,000 TS; 190,000 YS; 12 El; 33 RA; C 45 Rock.
At 1000°F: 144,000 TS; 133,000 YS; 9 El; 39 RA.
For press and hammer dies, insert and upsetter dies, deep drawing dies.
Resists softening at elevated temperatures.
High compressive strength.

HEPPENSTALL C93.
M-64; 0.57 C, 1.2 Ni, 2 65 Cr, 0.45 Mo, bal Fe.
Annealed: 250 Brin.
Heat treated: 580 Brin.
For cold shear knives, oil hardened, shock resistant.

HEPPENSTALL H41
M-64; 0.95 C, 3.75 Cr, 0.23 Mo, 0.16 V, bal Fe.
Annealed: 220 Brin.
Heat treated: 510 Brin.
For hot and cold trimmers; oil hardened.

HEPPENSTALL Gr. H44.
M-64; 0.95-1.05 C, 0.2-0.4 Si, 0.5-0.7 Mn, 0.95-1.05 Mo, 4.9-5.3 Cr, 0.2-0.3 V, bal Fe.
Annealed: 104,000 TS; 51,000 YS; 26 El; C 18 Rock.
Air Hardened: 253,000 TS; 200,000 YS; 3 El; C 53 Rock.
For cold work trimming and blanking dies, forming and drawing dies, gauges, rolls, punches, thread rolling dies.
Cold work Type A2 tool steel. Deep air hardening, tough, wear resistant.

HEPPENSTALL Gr. H230
M-64; 0.32 C, 3.3 Cr, 2.4 Mo, 0.37 V, bal Fe.
Air Hardened. 180,000-296,000 TS; 160,000-247,000 YS; 10-14 El; 16-42 RA; C 40-59 Rock.
For hot extrusion dies, punches, shear blades, gauges.
Hot work tool and die steel, Type H10, air hardening.

HEPPENSTALL H340.
M-64; 0.41 C, 3.3 Cr, 2.25 Mo, 0 38 V, bal Fe
Annealed. 250 Brin.
For extrusion parts; oil hardened, tough.

HEPPENSTALL Gr. H720.
M-64; 0.37-0.42 C, 5.0-5.5 Cr, 0.23-0.38 Mn, 1.0-1.3 Mo, 0.85-1.10 Si, 0.9-1.0 V, bal Fe.
At 80°F: 217,000 TS; 184,000 YS; 13 El; 40 RA.
At 1100°F: 110,000 TS; 88,000 YS; 21 El; 69 RA.
For extrusion rams and liners, mandrels, punches, piercers, upsetting and forging dies, die casting dies. Type H13 hot work steel.

HEPPENSTALL Gr. H722.
M-64; 0.37-0.42 C, 5.0-5.5 Cr, 0.23-0.38 Mn, 1.0-1.2 Mo, 0.85-1.1 Si, 0.45-0.55 V, bal Fe.
At 80°F: 217,000 TS; 184,000 YS; 13 El; 40 RA.
At 1100°F: 110,000 TS; 88,000 YS; 21 El; 69 RA.
For extrusion rams and liners, mandrels, punches, piercers, upsetting dies, die casting dies.
Air hardening and non-deforming. Type H11.
High resistance to wash and erosion and heat checking.

HEPPENSTALL R43.
M-64; 1.55 C, 11.5 Cr, 0.55 Mo, 0.55 W, bal Fe.
Annealed: 250 Brin.
Heat treated. 610 Brin.
For shear knives, cold work dies; air hardened, non-deforming.

HEPPENSTALL R45.
M-64; 0 83 C, 11 5 Cr, 0 43 Mo, bal Fe.
Annealed: 250 Brin.
Heat treated: 560 Brin.
For shear knives, cold work dies; air hardened, non-deforming.

HEPPENSTALL R97.
M-64; 0.55 C, 1 05 Mn, 2 1 Si, 0 3 Cr, 0.38 Mo, bal Fe
Annealed. 250 Brin.
Heat treated: 570 Brin
For shear knives, cold work dies; oil hardened, shock resistant. AISI S5.

HEPPENSTALL R718
M-64; 0 33 C, 4 75 Cr, 1.87 Mo, bal Fe.
Annealed: 250 Brin
Heat treated· 510 Brin.
For extrusion parts, shear knives; oil hardened.

HEPPENSTALL SPECIAL.
M-64, 0 45 C, 4 3 Ni, 1.45 Cr, 0.75 Mo, 0.14 V, bal Fe
For hot work dies, trimmers, punches
Tough, oil hardening.

HEPPENSTALL T51.
M-64, 0 63 C, 1 35 Ni, 0.70 Cr, 2.12 W, bal Fe.
Annealed: 250 Brin.
Heat treated 580 Brin.
For hot and cold trimmers; oil hardened, tough

HEPPENSTALL T71.
M-64; 0 50 C, 1 12 Cr, 2 35 W, bal Fe.
Annealed· 250 Brin
Heat treated: 560 Brin.
For cold shear knives, hot heading dies; oil hardened, tough

HEPPENSTALL Gr T72.
M-64, 0 45-0 50 C, 1 2-1.5 Cr, 1 8-2 05 W, 0 20-0 25 V, bal Fe
For chisels, punches, compression and trimming dies, hot swaging and heading dies, insert dies.
Hot and cold work tool steel.
Oil harden. Fatigue resistance

HEPPENSTALL T73.
M-64, 0 28 C, 3.4 Cr, 0.23 V, 8.75 W, bal Fe.
Annealed: 250 Brin.
Heat treated: 500 Brin.
For shear knives, inserts, hot work dies; oil hardened, tough.

HEPPENSTALL Gr. T74.
M-64; 0.47-0.53 C, 1.3-1.5 Cr, 2.25-2.50 W, 0.18-0.23 V, 0.40 max Mo, bal Fe.
For chisels, punches, compression and trimming dies, hot swaging and heading dies, insert dies.
Hot and cold work tool steel. Oil harden. Fatigue resistant.

HEPPENSTALL T75.
M-64; 0.68 C, 4 Cr, 1 V, 18 W, bal Fe.
Heat treated: 650 Brin.
For shear knives; oil hardened, high speed steel.

HEPPENSTALL Gr. T77.
M-64; 0.30-0.35 C, 0.20-0.25 V, 0.2-0.4 Mn, 3.75-4.15 Cr, 11.0-12.0 W, bal Fe.
Heat treated: Rock C, 40-53; 220,000-240,000 TS; 180,000-215,000 YS; 10-12 El; 37-42 RA.
For die casting dies, forging and press dies, extrusion and gripper dies, piercers, punches, extrusion mandrels.
Hot work steel, Type H21. High resistance to heat. Wear and abrasion resistant.

HEPPENSTALL T78.
M-64; 0.85 C, 4.25 Cr, 5 Mo, 1.85 V, 6.25 W, bal Fe
Annealed: 250 Brin.
Heat treated: 630 Brin.
For shear knives; high speed steel, oil hardened.

HEPPENSTALL T79
M-64; 0.43 C, 5.25 Cr, 0.22 V, 4 W, bal Fe.
Annealed: 250 Brin.
Heat treated: 600 Brin.
For rams, die casting dies, shear knives; oil hardened.

HEPPENSTALL Gr. T716.
M-64, 0.44-0.50 C, 0.70-0.90 Cr, 0.4-0.6 Mn, 0.20-0.35 Si, bal Fe.
Heat treated. 415-601 Brin.
For punches, chisels, pneumatic tools, rivet busters, hubbing dies, hot heading and swaging dies, hot forming dies
Type S3 tool steel for cold and hot working

HEPPENSTALL T717.
M-64, 0.33 C, 4.75 Cr, 1.3 Mo, 1.1 W, bal Fe.
Annealed 250 Brin
Heat treated. 530 Brin.
For shear knives, dies, punches, mandrels, oil hardened.

HEPPENSTALL Gr T719.
M-64, 0.62-0.67 C, 0.90-1.10 Si, 1.4-1.6 Mo, 0.2-0.4 Mn, 4.5-5.0 Cr, 1.0-1.2 W, bal Fe.
For cold work plastic dies and forming dies.
For hot work gripper and compression dies, trimming dies, aluminum extrusion dies Air or oil hardened Tough and wear resistant

HEPPENSTALL Gr T721
M-64, 0.34-0.40 C, 0.25-0.45 Mn, 0.85-1.15 Si, 4.75-5.25 Cr, 1.25-1.65 Mo, 1.05-1.45 W, 0.25-0.45 V, bal Fe
At 80°F 217,000 TS, 184,000 YS, 13 El, 40 RA.
At 1100°F 110,000 TS, 88,000 YS; 21 El; 69 RA.
For extrusion rams and liners, mandrels, punches, piercers, dummy blocks, shear blades, aluminum die casting dies
Type H12 hot work steel Resists heat checking

HEPPENSTALL T745.
M-64, 0.45 C, 8.5 Cr, 1.1 Mo, 1.1 W, bal Fe
Annealed 250 Brin.
Heat treated: 580 Brin.
For chipper knives; oil hardened.

HEPPENSTALL T746.
M-64; 0.68 C, 8.5 Cr, 1.1 Mo, 1.1 W, bal Fe
Annealed: 250 Brin.
Heat treated 620 Brin
For flaking knives, oil hardened.

HERBOHN BELL METAL
Germany; 60-71.43 Cu, 35-26.4 Sn, 5-2.7 Zn
For bells; corrosion resistant.

HERC-ALLOY.
M-835; 0.4 C, 1.5 Ni, 0.2 Mo, bal Fe.
Heat treated: 125,000-150,000 TS; 275-290 Brin.
For chains, fittings, joining links, sling chains; wear and impact resistant.

HERCULES.
M-114; 1.0 C, 0.5 Cr, 0.2 V, bal Fe.
For blanking, forming and drawing dies; fatigue resistant. AISI W7.

HERCULES BRONZE-A.
U.S.; 86 Cu, 10 Sn, 2.5 Al, 2 Zn.
For hardware, worm gears; high strength.

HERCULES BRONZE-B.
U.S.; 54 Cu, 36 Zn, 7.5 Fe, 2.5 Al.
For hardware.

HERCULOY 420.
M-238; 3.0-3.25 Si, 1.0 Mn, bal Cu.
Hard: 92,000 TS; 55,000 YS; 22 El, 890 Brin.
For bolts, hardware; corrosion resistant.

HERCULOY 421.
M-238; 1.5-2.0 Si, 0.25 Mn, bal Cu.
Hard: 70,000 TS, 55,000 YS; 15 El; 880 Brin.
For bolts, hardware; corrosion resistant.

HERKULES BS.
M-1322, 2.1 C, 0.30 Si, 0.35 Mn, 11.5 Cr, bal Fe.
For forming and blanking dies, punches; oil or air hardened, non-deforming.

HERKULES FZ.
M-1322; 2.1 C, 11.5 Cr, 0.3 Mn, 0.3 Si, bal Fe.
For forming and blanking dies, punches; oil or air hardened, non-deforming.

HERKULES ME.
M-1322; 2.1 C, 0.3 Si, 0.35 Mn, 11.5 Cr, bal Fe.
For forming and blanking dies, punches; oil or air hardened, non-deforming

HERMES 35.
M-1308, 0.35 C, 0.25-0.50 Si, 0.30-0.80 Mn, bal Fe.
For gears, shafts, machine tool parts; water hardened.

HERMES 45.
M-1308, 0.45 C, 0.25-0.50 Si, 0.30-0.80 Mn, bal Fe.
For gears, bolts, shafts, machine tool parts; water hardened.

HERMES 60
M-1308, 0.60 C, 0.25-0.50 Si, 0.30-0.80 Mn, bal Fe.
For axes, hammers, crimpers, water hardened

HERMES 90.
M-1308; 0.90 C, 0.25-0.50 Si, 0.30-0.80 Mn, bal Fe.
For drills, taps, hobs, reamers, springs, cutters, Type W1, water hardened.

HETZEL L Sn 25.
M-1181, 25 Sn, bal Pb.
Solder, soft

HETZEL L Sn 40.
M-1181; 40 Sn, bal Pb.
For solder; soft.

HETZLEL L Zn 98
M-1181, 98 Zn, 2 Cu.
For solder; M.P. 790°F.

HEUSLER ALLOY-1
Germ.; 11.1 Al, 66.5 Cu, 22.4 Mn.
For electrical machinery, ferromagnetic.

HEUSLER ALLOY-2.
Germ.; 10 Al, 4 Pb, 68 Cu, 18 Mn
For electrical machinery; ferromagnetic.

HEUSLER ALLOY-3.
Germ.; 4-15 Al, 54-76 Cu, 16-30 Mn
For electrical machinery; ferromagnetic.

HEUSLER ALLOY-4.
Germ.; 61 Cu, 13 Al, 26 Mn.
For electrical machinery; ferromagnetic.

HEVI-DUTY SW-14.
M-605; 0.3 C, bal Fe.
For welding rod; high tensile.

HEVIMET see CARBOLOY HEVIMET.

HEWITT COPPER-HARD.
M-959; 4.5 Cu, 4.5 Sb, bal Sn.
Cast: 11,050 TS; 24 Brin.
For heavy duty bearings, bushings; Babbitt, M.P. 365-590°F.

HEWITT GENUINE.
M-959; 7.5 Sb, 3.5 Cu, bal Sn.
Cast: 15,150 TS; 29 Brin.
For heavy duty bearings, bushings; Babbitt, M.P. 460-682°F.

HEWITT MILL.
M-959; Pb, Sn, Sb.
For steel mill bearings; Babbitt.

HEWMET.
M-959; 5 Sn, 15 Sb, bal Pb.
Cast: 7580 TS; 23.7 Brin.
For bearings, bushings; Babbitt, heavy loads.

HF1.
M-Germany; 73.5 WC, 24 TiC, 2.5 Co.
Sintered: A 92 Rock.
For cutters to machine steel, wear dies.
Sintered carbides; hard and abrasion resistant.

HG-NICKEL.
M-121; 99.0 min Ni, 0.06 min C.
For forming gassy seals, terminal pins, electronic valves.
Heat and corrosion resistant.

HGT3.
M-62; 0.20 C, 3 Cr, 0.5 Mo, 0.5 W, 0.75 V, bal Fe.
For gas turbine discs and rotors; creep and heat resistant.

HH1.
M-Germany; 97.5 WC, 2.5 Co.
Sintered: A 92 Rock.
For cutters to machine cast iron, form tools.
Sintered carbide. Hard and abrasion resistant.

HI-120.
M-118; Cb-Ti.
For superconducting wires.
High magnetic fields at low reduced power use.

HIA.
M-1; 0.4 C, 0.45 Cr, 4 Mo, 1.6 Ni, bal Fe.
For tools, gears, oil hardening.

HI-ALLOY.
M-43; 5.6-6.7 Al, 0.18 Mn, 2.5-3.5 Zn, 0.3 Si, 0.05 Cu, bal Mg.
For anodes; for cathodic protection from corrosion.

HIBBO NO. 100
M-215; Al, bal Cu.
50,000 TS; 100 Brin.
For light bearings and bushings; heavy duty.

HIBBO NO. 125.
M-215; Al, bal Cu.
Cast: 81,000 TS; 29,000 YS; 24 El; 22 RA; 120 Brin.
For gears, worm wheels, bearings; for general service.

HIBBO NO. 150.
M-215; Al, bal Cu.
Cast: 83,000 TS; 35,000 YS; 13 El; 19 RA; 140 Brin.
For bearings, gears, bushings, pinions; heavy duty, shock resistant.

HIBBO NO. 175.
M-215; Al, bal Cu.
Cast: 82,000 TS; 36,000 YS; 9 El; 10 RA; 180 Brin.
For gears, pinions, shafts; heavy compressive loading.

HIBBO GR. 200.
M-215; Al, bal Cu.
Cast: 96,400 TS; 48,000 YS; 6 El; 6.5 RA; 190-220 Brin.
For bushings, bearings, gears, welder dies and jaws; wear and corrosion resistant, Al-bronze.

HIBBO NO. 225.
M-215; Al, bal Cu.
85,000 TS; 190-240 Brin.
For forming dies, bearing slides, cam rollers, non-sparking tools; resists shock, fatigue and corrosion

HIBBO GR. 250.
M-215; Al, bal Cu.
Cast: 81,000 TS; 76,000 YS; 0.5 El; 0 RA; 230-260 Brin
For bearing slides, cam rollers, wear strips; high wear resistance.

HIBBO NO. 275
M-215; Al, bal Cu.
90,000 TS; 250 Brin.
For dies, rolls, pins, cams, bushings; resists shock, fatigue and corrosion.

HIBBO GR 300
M-215; Al, bal Cu
270-300 Brin.
For forming and drawing dies; very hard, tough to machine.

HICKORY NO. 7.
M-1423, 0.50 C, 1.5 Cr, 2.5 W, bal Fe.
For punches, rivet sets, Type S1; shock resistant.

HI-COBALT.
M-1076, 40 Co, bal Fe.
For permanent magnets, Br 9800, Hc 240.

HICORE 75.
M-1724, 0.13 C, 0.9 Cr, 3.1 Ni, bal Fe.
Heat treated· 155,000-180,000 TS, 123,000-156,000 YS, 20-15 El, 60-50 RA.
For gears, pinions, differential axles; case-hardening steel, Iz-50-30.

HICORE 90
M-1724, 0.16 C, 4.2 Ni, 1.2 Cr, Mo, bal Fe
Heat treated· 190,000-213,000 TS, 145,000-180,000 YS; 18-13 El, 60-45 RA
For gears, pinions; case-hardening steel, Iz-25-35

HICRO.
M-822; 1.5 C, 12 Cr, 0.8 Mo, 0.35 V, bal Fe.
For cold forming dies; oil hardened

HICRO-150.
M-822, 1.5 C, 12 Cr, 0.4 V, 1.0 Mo, bal Fe.
Hardened: 278,000 TS, 214,000 YS; 1 El; 567 Brin.
For blanking and drawing dies, wire drawing and stamping dies, punches, gauges, hobs.
Type D2 air hardening, nondeforming, cold work tool steel, tough.

HICRO 200.
M-822, 2.0 C, 0.7 Mn, 0.3 Si, 13.0 Cr, 1.2 W, bal Fe.
Air or oil hardening cold work tool steel, chromium type; AISI D3.

HICRO T.
M-822; 2.10 C, 0.7 Mn, 0.3 Si, 13.0 Cr, 1.3 W, bal Fe.
Air or oil hardenable cold work tool and die steel, chromium type; AISI D6.

HI-C-SUPER HY-TUF.
M-38; 0.47 C, 1.38 Mn, 2.4 Si, 1.1 Cr, 0.4 Mo, 0.25 V, bal Fe.
Heat treated: 325,000 TS.
For aircraft structures, landing gears; tough, shock resistant.

HIDALGO.
M-614; 0.7 C, 14 W, 4 Cr, 2 V, bal Fe.
For cutters, tools; high speed steel.

HIDALGO I.
M-614; 0.55 C, 0.9 Si, 1 Cr, 0.18 V, 1.85 W, bal Fe.
For cold work tools, punches, headers; oil hardened, tough.

HIDALGO II.
M-614; 0.40 C, 0.9 Si, 1 Cr, 0.18 V, 1.85 W, bal Fe.
For cold work tools, punches; oil hardened, tough.

HIDALGO III.
M-614; 0.35 C, 0.9 Si, 1.05 Cr, 0.18 V, 1.85 W, bal Fe.
For cold work tools, headers, punches, upsetters; oil hardened, tough.

HIDALGO NO. 48 ALLOY.
M-344, 0.55 C, 0.20 Cr, 0.75 Mn, 0.20 V, 2.0 Si, bal Fe.
For chisels, shear blades, punches; shock resistant.

HIDALGO RL.
M-344; 1.25 C, 0.4-0.5 Cr, 5.5 W, bal Fe.
For cutting tools; for finishing cuts on hard material.

HI-DI 5.
M-336; 1.0 C, 5.0 Cr, 1.0 Mo, 0.4 Mn, 0.4 V, bal Fe
Annealed. 103,000 TS, 51,000 YS, 26 El; C 18 Rock.
Hardened 178,000-255,000 TS; 145,000-200,000 YS, 3-12 El; 7-32 RA; C 41-53 Rock.
For blanking and trimming dies, shear blades, punches gauges, master tools, rolling dies, broaches
Type A2 air hardening, nondeforming cold work tool steel, tough.

HIDUMINIUM 00
M-426, 0 75-2.5 Cu, 9.0-11.5 Si, 3 max Ni, bal Al
Sand cast. 16,000 TS.
Die cast: 29,000 TS; 13,500 YS; 2 El, 85 Brin.
For general purpose castings of thin wall sections; high fluidity.

HIDUMINIUM 01.
M-137, M-426; 4 Cu, 0 6 Mg, 0 5 Mn, bal Al.
Forged: 54,000 TS; 30,500 YS, 15 El.
Extruded: 54,000 TS; 31,500 YS; 12 El.
Tube· 62,000 TS, 47,000 YS; 12 El.
For general engineering components; age-hardenable.

HIDUMINIUM 1A.
M-426; 99.8 Al.
O-temper: 11,200 TS; 35 El.
½ H-temper: 13,500 TS; 8 El.
H-temper: 18,000 TS; 5 El.
For light alloy parts.

HIDUMINIUM 1B.
M-426; 99.5 Al.
O-temper: 13,500 TS; 30 El.
½ H-temper: 14,500 TS; 8 El.
H-temper: 19,000 TS; 5 El.
For light alloy parts.

HIDUMINIUM 1C.
M-426; 99.0 Al.
O-temper: 14,500 TS; 5600 YS; 30 El.
½ H-temper: 15,700 TS; 14,500 YS; 7 El.
H-temper: 20,000 TS; 19,000 YS; 3 El.
For light alloy parts.

HIDUMINIUM 02.
M-426; 4 Cu, 1.5 Mg, 2 Ni, bal Al.
Heat treated: 49,000-58,000 TS; 32,000-31,500 YS; 20-8 El; 115 Brin.
For pistons, cylinder heads; age hardenable, high temperature uses.

HIDUMINIUM 03.
M-239, M-426; 1 Cu, 1 Mg, 1 Si, bal Al.
T4-temper: 38,000 TS; 22,400 YS; 15 El.
T6-temper: 56,000 TS; 45,000 YS; 10 El.
For aircraft forgings and extrusions; age hardened.

HIDUMINIUM 05.
M-239, M-426; 5 Mg, bal Al.
Annealed: 38,000 TS; 18,000 YS; 18 El.
½ Hard· 40,500 TS; 31,500 YS; 5 El.
For marine structures; corrosion resistant.

HIDUMINIUM 07.
M-239, M-426; 7 Mg, 0.6 Mn, 0.6 max Fe, bal Al.
Annealed: 45,000 TS; 18,000 YS; 18 El; 20 RA.
½ Hard: 56,000 TS, 36,000 YS; 5 El.
For hardware, sporting goods, machine tool parts; high corrosion resistance.

HIDUMINIUM 08.
M-426, 1 Cu, 1 Mg, 11 Si, 1 Ni, bal Al.
Heat treated: 47,000 TS; 33,500 YS; 5 El; 115 Brin.
For pistons, cylinder heads; age hardenable.

HIDUMINIUM 10.
M-426, 10-13 Si, 0.2 max Ti, 0.1 max Cu, 0 6 max Fe, bal Al.
Sand cast· 26,000 TS; 8000 YS; 8 El; 55 Brin.
Die cast: 30,500 TS; 10,000 YS, 10 El; 65 Brin.
For general purpose castings of intricate shape; good fluidity.

HIDUMINIUM 11.
M-426, 0.15 max Cu, 0.6 max Si, 0.75 max Fe, 1-1.5 Mn, bal Al.
Soft temper. 15,000 TS; 12,000 YS, 25 El; 27 Brin.
¾ H temper 22,000 TS; 19,000 YS; 5 El, 55 Brin.
For structures, not heat treatable, corrosion resistant.

HIDUMINIUM-12.
M-426, 1.3 Mg, bal Al
Hard drawn· 36,000 TS; 35,000 YS; 4 El; H 105 Rock.
For deep drawn parts.
For trim molding, washing machine tubs, vacuum cleaner hoods, fan blades.
Corrosion resistant, low strength.
Similar to Aluminum 5050.

HIDUMINIUM-14.
M-426, 1 0 Mg, 0.5 Mn, bal Al.
Hard Drawn: 40,000 TS; 36,000 YS; 6 El; 77 Brin.
Annealed: 26,000 TS; 10,000 YS, 25 El; 45 Brin.
For general purpose applications, commercial roofing, vessels, tanks.
Corrosion resistant Similar to Aluminum 3004.

HIDUMINIUM 20.
M-426; 2-4 Cu, 3-6 Si, 0.3-0.7 Mn, 0.5 max Zn, 0.8 max Fe, bal Al.
Sand cast: 18,000 TS; 8000 YS; 2 El; 55 Brin.
Die cast: 20,000 TS; 9000 YS; 2 El; 80 Brin.
For marine castings; age-hardenable.

HIDUMINIUM-21.
M-426, 3.0 Cu, 5.0 Si, 0.5 Mn, 0.25 Mg, bal Al.
Heat treated: 36,000 TS; 24,000 YS; 2 El; 80 Brin.
Cast. 27,000 TS, 18,000 YS; 2 El; 70 Brin.
For sand and permanent mold castings, crankcases, housings, cylinder heads, oil pans.
Heat treatable, pressure-tight.

HIDUMINIUM 22.
M-426; 0.15 max Cu, 1.5-2.5 Mg, 0.6 max Si, 0.75 max Fe, bal Al.
Soft temper: 24,000 TS; 12,000 YS; 18 El; 45 Brin.
½ H temper: 35,000 TS; 27,000 YS; 5 El; 85 Brin.
For fuel pipes; high corrosion resistance.

HIDUMINIUM 24.
M-426; 2 Mg, bal Al.
O-temper: 24,500-27,000 TS; 10,500 YS, 18 El.
For deep drawn and formed parts; high ductility.

HIDUMINIUM 29.
M-426; 6.5 Sn, 1.0 Cu, 0.8 Ni, bal Al.
Sand cast: 18,000 TS; 7800 YS; 8 El.
Permanent mold: 20,000 TS; 18,000 YS; 15 El.
For bearings; shock resistant.

HIDUMINIUM 33.
M-426; 3-4 Mg, 1.0 max Mn, 0.15 max Cu, 0.7 max Fe, 0.5 max Cr, bal Al.
Soft temper: 28,000 TS; 14,000 YS, 18 El; 55 Brin.
½ H temper: 36,000 TS; 30,000 YS; 5 El; 100 Brin.
For marine parts; highest corrosion resistance.

HIDUMINIUM 35.
M-426; 4.25 Mg, bal Al.
O-temper: 32,000 TS; 15,700 YS; 18 El.
M-temper: 38,000 TS; 18,000 YS; 12 El.
For light alloy parts; high corrosion resistance and ductility.

HIDUMINIUM 40.
M-426; 0.2-0.8 Mg, 4.5-6 Si, 0.2 max Ti, bal Al.
Cast: 17,000 TS; 10,000 YS; 2.5 El; 50 Brin.
W-temper. 22,000 TS; 14,000 YS; 2.5 El; 60 Brin.
WP-temper: 30,000 TS; 26,000 YS; 100 Brin.
For marine castings; high fluidity, pressure tight

HIDUMINIUM 42.
M-426; 0.75 Mg, 1 Si, bal Al.
W-temper: 26,700 TS; 15,700 YS, 18 El.
WP-temper: 43,600 TS, 40,300 YS; 10 El.
For light alloy parts; good corrosion resistance and formability, age-hardenable.

HIDUMINIUM 44.
M-426; 0.5-1.2 Mg, 0.75-1.3 Si, 1 max Mn, 0.6 max Fe, bal Al
Annealed and tempered: 18,000 TS, 10,000 YS; 27 El, 30 Brin
WP-temper: 46,000 TS; 36,000 YS, 8 El, 110 Brin.
For marine applications; heat treatable, resists sea-water corrosion.

HIDUMINIUM 46.
M-426; 0.7 Mg, 0.5 Si, 0.05 Ti, bal Al.
W-temper: 27,100 TS; 16,200 YS, 25 El.
WP-temper: 35,800 TS, 27,000 YS; 18 El.
For structural extrusions; heat treatable, corrosion resistant.

HIDUMINIUM 51.
M-426; 0.8-2.0 Cu, 0.05-0.2 Mg, 0.75-2.8 Si, 0.25-1.4 Fe, 0.8-1.75 Ni, bal Al.
Sand cast: 23,000 TS; 11,000 YS; 2 El, 55 Brin.
Die cast: 25,000 TS; 13,000 YS; 2 El; 80 Brin
For general purpose castings; fair corrosion resistance.

HIDUMINIUM 55.
M-426; 1.75-2.7 Cu, 0.5-1.3 Mg, 0.4-1.5 Si, 1.4 max Fe, 1.4 max Ni, 0.2 max Ti, bal Al.
Forged: 50,000 TS; 38,000 YS; 8 El; 148 Brin.
WP-temper: 44,000 TS; 36,000 YS; 8 El.
For high strength parts, aircraft structures; heat treatable.

HIDUMINIUM 66.
M-426; 3.5-4.8 Cu, 0.3-0.6 Mg, 0.5-1.5 Si, 1.2 max Mn, bal Al.
WP-temper: 64,000 TS; 52,000 YS; 8 El; 160 Brin.
For high strength parts, aircraft structures; heat treatable.

HIDUMINIUM 72.
M-426; 4.6 Cu, 1.3 Mg, 0.25 Si, 0.25 Fe, 0.7 Mn, bal Al.
Heat treated: 67,000 TS; 51,000 YS; 8 El.
For aircraft and general engineering parts; age-hardenable.

HIDUMINIUM 80.
M-426; 4-5 Cu, 0.1-0.25 Ti, 0.25 max Si, bal Al.
W-temper: 33,000 TS, 18,000 YS; 10 El; 60 Brin.
WP-temper: 48,000 TS; 27,000 YS; 10 El; 95 Brin.
For brackets, levers, housings, aircraft castings; age-hardenable, hot-short.

HIDUMINIUM 90.
M-426, 9.5-11.0 Mg, 0.15 max Cu, 0.25 max Si, bal Al.
Sand cast: 45,000 TS; 22,000 YS; 15 El; 90 Brin.
Die cast: 47,000 TS; 25,000 YS; 17 El, 95 Brin.
For gasoline flow meters; age-hardenable, corrosion resistant.

HIDUMINIUM 100
M-239, M-426, M-86, Al_2O_3 + Al.
Sintered.
For components operating above 250°C; high temperature resistance.

HIDUMINIUM DU BRAND
M-426, 3.5-4.8 Cu, 0.6 Mg, 0.5 Mn, 0.3 Ti, bal Al
Rolled: 54,000 TS; 35,000 YS, 18 El; 120 Brin.
For light alloy parts, seamless tubes, airscrews; age-hardened.

HIDUMINIUM R.R. 50
M-239, M-86, M-426, M-137, 0.8-2 Cu, 0.05-2 Mg, 0.2 Ti, 1.5-2.8 Si, 0.8-1.4 Fe, 0.8-1.7 Ni, bal Al.
Sand cast. 20,000-25,000 TS, 18,000-20,000 YS; 4 El, 8 RA; 65 Brin
Heat treated: 25,000-30,000 TS, 3 El, 5 RA, 72 Brin
For cylinder blocks, cylinder heads, pistons, crank-cases; heat treatable

HIDUMINIUM R R 53.
M-137, 1.5-2.5 Cu, 0.5-2.0 Ni, 1.4-1.8 Mg, 1.2-1.5 Fe, 0.02-0.12 Ti, 2 max Si, bal Al.
Heat treated 50,000 TS, 44,000 YS, 2 El; 140 Brin.
For pistons, cylinder heads; die casting

HIDUMINIUM R R 53
M-239, M-426, 2.2 Cu, 1.3 Ni, 1.6 Mg, 1.4 Fe, 0.08 Ti, 1.2 Si, bal Al.
Die cast 31,300 TS, 28,000 YS; 3 El; 4 RA, 80 Brin
Heat treated: 56,000 TS; 50,400 YS; 1 El; 1.5 RA, 130 Brin.
For pistons for automobile and aircraft engines, cylinder heads, die cast; Rolls-Royce automobile.

HIDUMINIUM RR 53 B
M-137, 1.5 Cu, 1-2 Ni, 0.6-1.0 Mg, 0.8-1.5 Fe, 0.7-0.9 Si, bal Al.
Cast: 21,000 TS; 14,000 YS; 3 El; 78 Brin
Heat treated. 42,000 TS, 37,000 YS; 2 El; 138 Brin.
For levers, brackets, textile and food machinery, pistons, high temperature strength.

HIDUMINIUM RR 53 C.
M-426, 0.8-2.0 Cu, 0.5-1.5 Ni, 0.3-0.8 Mg, 0.8-1.4 Fe, 2-3 Si, 0.3 Ti, bal Al.
Cast: 30,000 TS; 20,000 YS, 2 El; 75 Brin.
Heat treated: 44,000 TS; 40,000 YS; 2 El; 115 Brin.
For stand and die castings; light alloy.

HIDUMINIUM R.R. 56.
M-239, M-426; 2 Cu, 1.25 Ni, 1.2 Fe, 0.8 Mg, 0.08 Ti, 0.6 Si, bal Al.

Heat treated: 60,000-72,000 TS; 54,000-58,000 YS; 10-20 El; 14-25 RA; 120-160 Brin.
For automobile forgings, connecting rods, supercharger rotors; forgings; Rolls-Royce automobile.

HIDUMINIUM R.R. 57.
M-426; 5.75-6.25 Cu, 0.2 max Si, 0.2-0.3 Mn, 0.1-0.15 Ti, bal Al.
At 70°F: 54,000 TS; 33,000 YS; 8 El; 121 Brin.
At 650°F: 14,000 TS; 9000 YS; 27 El.
For high temperature applications, aircraft structures; heat treatable.

HIDUMINIUM R.R. 58.
M-426; 1.5-3.0 Cu, 1.2-1.8 Mg, 1-1.5 Fe, 0.5-1.5 Ni, 0.2 max Ti, bal Al.
At 70°F: 60,000 TS; 44,000 YS; 10 El; 148 Brin
At 650°F 12,500 TS; 10,000 YS; 27.5 El.
For high temperature applications, aircraft structures; heat treatable.

HIDUMINIUM R.R. 59.
M-239, M-426; 2.2 Cu, 1.35 Ni, 1.25 Mg, 1.35 Fe, 0.08 Ti, 0.8 Si, bal Al.
Forged: 52,000-65,000 TS; 50,000-56,000 YS; 6-10 El; 10-20 RA; 120-150 Brin
Heat treated. 55,000 TS; 47,000 YS; 8 El; 17 RA; 127 Brin
For pistons, cylinder heads, forgings; Rolls-Royce automobile; aero-engines

HIDUMINIUM R.R. 60
M-426, 1.5-3.0 Cu, 0.3-1.5 Si, 0.5-1.5 Mg, 5-1.5 Fe, 2 max Ni, 0.3 Ce, bal Al
For light alloy parts; antifriction properties

HIDUMINIUM RR-66
M-426, 0.5 Cu, 0.33 Ni, 4.8 Mg, 0.33 Fe, bal Al
Annealed. 45,000 TS; 22,000 YS; 24 El, 80 Brin.
Cold worked 60,500 TS, 49,000 YS, 10 El, 121 Brin.
For automobile parts, airplanes, boats; corrosion resistant.

HIDUMINIUM RR72
M-426, 94 Al, 4 Cu, 1.2 Mg, 0.8 Mn.
Extruded 60,000 TS, 15 El, 148 Brin
For extruded sections, solid drawn tubes; heat treatable

HIDUMINIUM RR 75
M-426, 97.6 Al, 2 Cu, 0.4 Mg
For wire, rivets

HIDUMINIUM RR 77
M-426, 1.5 Cu, 4-6 Zn, 2-4 Mg, 0.6 Fe, 0.6 Si, 1.0 max Ni, 0.3 Ti, bal Al
Annealed 32,000 TS, 19,000 YS, 20 El; 65 Brin
Heat treated· 85,000 TS; 74,000 YS, 16 El; 180 Brin.
For extruded and drawn tubing, rolled sheet; light alloy, high strength.

HIDUMINIUM RR 82.
M-426, Cu, Si, bal Al.
For fuel pipes.

HIDUMINIUM RR88.
M-426; 3 max Cu, 4 max Mg, 4.0-8.5 Zn, 1 max Cr, bal Al.
Aged: 89,000 TS; 78,000 YS; 7 El; 180 Brin.
For aircraft construction, high strength applications; age-hardenable.

HIDUMINIUM RR250.
M-239, M-426; 5 Cu, 0.2 Ti, 0.25 Mn, 0.25 Co, 1 Ni, 0.25 Sb, bal Al.
Heat treated: 36,000 TS; 22,500 YS, 2 El.
For engine components; age hardenable, sand castings.

HIDUMINIUM RR257.
M-426; 6 Cu, 0.25 Co, 1 Ni, 0.25 Sb, 0.25 Mn, 0.2 Ti, bal Al.
WP-temper: 54,000 TS; 33,500 YS; 8 El.
For engine castings; age-hardenable.

HIDUMINIUM RR350.
M-426; 5 Cu, 0.25 Co, 0.25 Zr, 1.5 Ni, 0.25 Sb, 0.2 Ti, 0.25 Mn, bal Al.
WP-temper: 36,000 TS; 24,000 YS; 1 El.
For engine castings; age-hardenable.

HIDUMINIUM RRAC9A.
M-239, M-426; Al alloy.
For light alloy parts.

HIDUMINIUM S 12.
M-426; 12 Si, 1.0 Cu, 1.0 Ni, 1.2 Mg, bal Al.
Forged: 38,000 TS; 7 El; 105 Brin.
For aircraft pistons; forging alloy.

HIDUMINIUM SR.
M-426, 2.5 Cu, 0.1 Mg, 1.0 Fe, 0.75 Ni, 0.1 Ti, bal Al
60-85 Brin.
For gasket sealing rings; corrosion resistant

HIDUMINIUM Y.
M-426; 4 Cu, 1.5 Mg, 2 Ni, 0.6 Fe, 0.5 Mn, bal Al.
Forged: 55,000 TS; 35,000 YS, 2 El, 120 Brin.
Cast· 40,000 TS; 34,000 YS, 1 El; 105 Brin.
For pistons, cylinder heads; age-hardenable, high heat applications.

HIDURAX ½A
M-1169; 10.5-11.0 Al, 4-6 Fe, 4-6 Ni, 0.5 Mn, bal Cu
Heat treated 125,000-150,000 TS, 70,000-100,000 YS, 20-10 El.
For axial flow compressor blades, high temperature strength and fatigue resistance.

HIDURAX 1A
M-1169, 10 Al, 5 Ni, 5 Fe, 1.5 Mn, bal Cu.
Rolled: 85,000-94,000 TS; 36,000-54,000 YS, 35-25 El; 150-200 Brin
For valves, pumps, chemical plant equipment, BS-2032, corrosion resistant, aluminum bronze

HIDURAX 2-CAST.
M-1169, 8.5-10.5 Al, 1.5-3.5 Fe, 0.5 Mn, bal Cu
Cast· 72,000-85,000 TS, 25,000-30,000 YS; 30-20 El; 110-140 Brin.
For pumps, valves, gears, bushings, resists wear, corrosion and erosion

HIDURAX 2-WROUGHT
M-1169, 8.5-10.5 Al, 0.5-2.5 Fe, 1-3 Ni, bal Cu
Rolled 85,000-108,000 TS; 45,000-56,000 YS; 25-18 El; 149-212 Brin
For shafts, spindles, gears, liners, bushings; resists wear, corrosion and erosion.

HIDURAX 3.
M-1169, 8.5-9.5 Al, 4-6 Fe, 4-6 Mn, bal Cu
Sand cast 70,000-85,000 TS; 25,000-30,000 YS; 30-20 El; 110-140 Brin.
For pumps, valves, liners, sheaves, gears; resists corrosion in H_2SO_4.

HIDURAX 4
M-1169; 11 Al, 4-5 Fe, 4 Ni, bal Cu.
Heat treated. 110,000-135,000 TS; 67,000-90,000 YS; 12-5 El; 218-270 Brin
For valve inserts, plastic molding dies, nozzles; tough, hardenable, corrosion resistant.

HIDURAX 4/16A.
M-1169; Al, bal Cu.
Rolled: 107,000-121,000 TS, 67,000-79,000 YS; 10-4 El; 250-280 Brin.
For valves, pumps; aluminum bronze, corrosion resistant.

HIDURAX 4/17A.
M-1169; Al, bal Cu.
Rolled: 112,000-135,000 TS; 67,000-90,000 YS; 12-5 El; 218-270 Brin.
For valves, pumps; aluminum bronze, corrosion resistant.

HIDURAX 5.
M-1169; 9.0-9.8 Al, bal Cu.
Forged: 72,000-85,000 TS; 34,000-45,000 YS; 30-15 El; 126-179 Brin.
For valve seat inserts, rotors, shafts; Al-bronze, corrosion resistant.

HIDURAX 5/2A.
M-1169; Al, bal Cu.
Rolled: 72,000-85,000 TS; 33,000-45,000 YS; 30-15 El; 126-179 Brin.
For valves, pumps; DTD 160; aluminum bronze, corrosion resistant.

HIDURAX 5/27A.
M-1169; Al, bal Cu.
Rolled: 76,000 TS; 38,000 YS; 35 El; 130-180 Brin.
For valves, pumps; aluminum bronze, corrosion resistant.

HIDURAX 21A.
M-1169; 4-7 Ni, 8-11 Al, 0.5-2.0 Mn, 1.5-3.5 Fe, bal Cu.
Rolled: 90,000 TS; 23,000 YS; 10 El.
For valves, pumps; ASTM-B171 Alloy E; aluminum bronze, corrosion resistant.

HIDURAX 26A.
M-1169; 1.5-3.5 Fe, 6.0-8.0 Al, bal Cu.
Rolled: 72,000 TS; 36,000 YS; 35 El.
For valves, pumps; ASTM-B171 Alloy D; aluminum bronze, corrosion resistant.

HIDURAX I-CAST.
M-1169; 8.5-10.5 Al, 3.0-5.5 Fe, 3.0-5.5 Ni, bal Cu.
Cast: 90,000-100,000 TS; 40,000-45,000 YS; 20-12 El; 170-180 Brin.
For pumps, valves, gears, bearings, bushings, valve seats; resists corrosion and cavitation erosion.

HIDURAX I-WROUGHT.
M-1169; 8.5-10.5 Al, 4-6 Fe, 4-6 Ni, 0.5 Mn, bal Cu.
Forged: 100,000-116,000 TS; 56,000-76,000 YS; 25-15 El; 180-240 Brin.
For shafts, gears, spindles, valve seats; resists corrosion and cavitation.

HIDURAX SPECIAL.
M-1169; 2-4 Al, 1-3 Fe, 12-16 Ni, bal Cu.
Forged: 123,000-134,000 TS; 90,000-112,000 YS; 20-12 El; 240-270 Brin.
For pump shafts, valve cones, valve seats; high strength, corrosion resistant.

HIDUREL 5.
M-1169; Sn, Pb, bal Cu.
Cast: 68,000 TS; 49,000 YS; 12 El; 160 Brin.
Cold drawn: 108,000 TS; 95,000 YS; 20 El; 190 Brin.
For bearings, bushings; high strength and ductility, corrosion resistant.

HIDUREL-5.
M-1169; 2.0-3.5 Ni, 0.4-0.8 Si, bal Cu.
Bar: 85,000-117,000 TS; 61,000-105,000 YS; 15-25 El; 160-210 Brin.
Strip: 85,000-108,000 TS; 61,000-94,000 YS; 15-25 El; 160-210 Brin.
For switch gears, contacts, gears, current carrying parts; high conductivity and high strength.

HIDUREL 5-CAST.
M-1169; 1.8-2.6 Ni, 0.3-5 Si, bal Cu.
Heat treated: 63,000-72,000 TS; 40,000-54,000 YS; 15-8 El; 140-170 Brin.
For switchgear, bushings, electrical conductors; high strength and conductivity.

HIDUREL 5-WROUGHT.
M-1169; 2.0-3.5 Ni, 0.4-0.8 Si, bal Cu.
Heat treated: 85,000-116,000 TS; 60,000-105,000 YS; 25-15 El; 160-210 Brin.
For worm wheels, switchgears, electrical conductors; high strength and conductivity.

HIDUREL 6.
M-1169; 0.4-1.2 Cr, 0.2 others, bal Cu.
Heat treated: 40,000-85,000 TS; 27,000-78,000 YS; 30-15 El; 90-150 Brin.
For switchgear, resistance welding electrodes; high strength at high temperature.

HIDUREL 7.
M-1169, Zn, bal Cu.
Cast· 78,000-90,000 TS; 36,000-49,000 YS; 20-10 El; 130-160 Brin.
For general castings; high conductivity bronze.

HIDURIT 10.
M-1169; Zn, bal Cu.
Cast: 100,000-112,000 TS, 56,000-67,000 YS, 12-18 El, 180-220 Brin.
For general castings; high strength brass.

HIDURIT 11.
M-1169; Zn, bal Cu
Cast 85,000-95,000 TS; 38,000-54,000 YS; 30-20 El, 130-160 Brin
For general castings, BS-1400; high strength brass.

HIDURIT 12.
M-1169; Zn, bal Cu.
Cast· 67,000-75,000 TS, 27,000-41,000 YS; 35-20 El; 110-130 Brin.
For general castings; B-1400, high strength brass.

HIDURIT 15.
M-1169; Zn, bal Cu.
Rolled 67,000-85,000 TS; 34,000-45,000 YS; 30-15 El; 120-180 Brin.
For general castings, BS-250; high strength brass.

HIFLEX
M-1431; C, alloy, bal Fe.
For tools, dies, machinery parts, fatigue resistant.

HIGH BRASS
M-8, M-33; 65 Cu, 35 Zn.
Rolled: 47,000-75,000 TS, 20,000-60,000 YS; 5-60 El; 5-75 RA; 45-180 Brin.
For spun parts, tanks, vessels; high strength, good ductility.

HIGH BRASS 262.
M-279; 68.5 Cu, 31.5 Zn.
Ann: 44,000-61,000 TS; 13,000-34,000 YS; 35-65 El.
Cold rolled: 49,000-110,000 TS; 20,000-100,000 YS; 1-52 El.
A general purpose yellow brass.
For formed parts, hardware, electrical assemblies.

HIGH CARBON ALLOY.
M-389; 0.9 C, 0.2 V, bal Fe.
For tools, drills, taps; water hardening.

HIGH CHROME-NICKEL.
M-200; 0.33-0.45 C, 0.40-0.75 Cr, 1.0-1.35 Mn, 0.90-1.20 Ni, 0.40-0.75 Si, bal Fe.
Annealed: 85,000-100,000 TS; 60,000 YS; 18 El; 23 RA.
For gears, shafts; tough.

HIGH CONDUCTIVITY BRONZE 405.
M-279; 95 Cu, 4 Zn, 1 Sn.
Ann: 38,000-45,000 TS; 9000-17,000 YS; 40-50 El.
Cold rolled: 41,000-82,000 TS; 15,000-74,000 YS; 2-45 El.
A moderate strength high conductivity bronze for fuse clips, meter clips, electrical assemblies.

HIGH DUTY.
M-1409; 2.2 C, 0.6 W, 12.8 Cr, 0.4 Mn, bal Fe.
For blanking and thread rolling dies, molds; oil or air hardened, abrasion resistant.

HIGH LEADED BRASS 62.
M-141; 62.25 Cu, 35.75 Zn, 2 Pb.
Hard: 74,000 TS; 60,000 YS; 7 El; 150 Brin.
Soft: 49,000 TS; 17,000 YS; 52 El; 61 Brin.
For clock gears, key stock; high leaded brass.

HIGH LEADED BRASS-342.
M-8; 64.0 Cu, 34.0 Zn, 2.0 Pb.
Annealed: 49,000 TS, 17,000 YS; 52 El; F 68 Rock
Half Hard: 61,000 TS; 50,000 YS; 20 El; B 70 Rock.
For plaques, hinges, gears, pinions, wheels, valve stems, rivets.
Corrosion resistant. Electrical conductivity 26. Free cutting

HIGH LEADED BRASS-353.
M-8; 61.5 Cu, 36.7 Zn, 1.8 Pb.
Annealed: 49,000 TS; 17,000 YS; 52 El; F 68 Rock.
Half Hard: 61,000 TS; 50,000 YS, 20 El, B 70 Rock.
For plaques, hinges, gears, pinions, wheels, valve stems, rivets.
Corrosion resistant
Electrical conductivity 26, free-cutting.

HIGH LEADED BRASS 353
M-279, 61 Cu, 37 Zn, 2 Pb.
Ann: 45,000-54,000 TS; 12,000-24,000 YS; 45-60 El
Cold rolled: 49,000-99,000 TS; 20,000-80,000 YS; 1-50 El
High strength yellow brass, good machinability.
For clock and watch plates, and gears, brass keys

HIGH LEADED BRASS, Copper Alloy No. 342.
M-33; 63.5 Cu, 34.6 Zn, 1.9 Pb.
Half hard strip: 61,000 TS, 50,000 YS; 20 El; 40,000 shear; 70 Rock B
For clock and watch gears, plates and cases, keys, nuts.
ASTM B121 Alloy 4 & 5.

HIGH LEADED BRASS 3531.
M-8; 37 Zn, 2 Pb, bal Cu.
Hard: 58,000 TS, 42,000 YS; 22 El; 125 Brin.
Soft: 47,000 TS; 18,000 YS; 58 El, 62 Brin.
For hardware, clock parts, screw machine parts; free-cutting.

HIGH LEADED BRASS 3532.
M-8; 38 Zn, 1.5 Pb, bal Cu.
Hard: 73,000 TS; 60,000 YS; 7 El; 150 Brin.
Soft: 45,000 TS; 17,000 YS; 50 El; 60 Brin.
For hardware, clock parts; free-cutting.

HIGH LEADED TUBE BRASS.
M-33; 66 Cu, 32.25 Zn, 1.75 Pb.
Annealed: 52,000 TS; 20,000 YS; 50 El.
Drawn: 75,000 TS; 60,000 YS; 7 El.
For screw machine products; free cutting.

HIGH MANGANESE NICKEL.
Eng.; 98-94 Ni, 2-6 Mn.
For spark plug wire; heat resistant.

HIGH PERMEABILITY "49."
M-32; 0.1 max C, 49 Ni, bal Fe.
Rolled: 25 El; 62 RA; 200 Brin.
For transformer cores; high permeability.

HIGH PHOSPHORUS COPPER.
M-33; 99.9 + Cu, 0.02 P.
For condenser and distiller tubes, radiators, water tubes; deoxidized copper, low conductivity.

HIGH PRODUCTION.
M-365; 1.55 C, 11.5 Cr, 0.75 Mo, bal Fe.
For blanking and forming dies, mandrels, coining dies; non-deforming.

HIGH SPEED.
M-370; 0.7 C, 18 W, 4 Cr, 1 V, bal Fe.
For high speed cutters, drills; high speed steel.

HIGH SPEED BABBITT.
M-665; Sn, Pb, bal Cu.
For bearings; Babbitt.

HIGH SPEED BRASS.
M-256; 88 Cu, 7 Sn, 5 Zn.
For high speed bearings; heavy duty.

HIGH SPEED TOOL-A.
Eng.; 5-12 W, 6-12 Ti, 3-6 Si, 3-5 Al, up to 1.0 B, bal Ni.
For cutting tools, dies; cast nonferrous.

HIGH STRENGTH.
18.5-21.5 Zn, 2-3 Fe, 6-7 Al, 1.5-2.25 Ni, bal Cu.
For high strength corrosion resistant parts; corrosion resistant

HIGH STRENGTH COMMERCIAL BRONZE.
M-8; 89.5 Cu, 7.65 Zn, 1.75 Pb, 0.1 P, 1.0 Ni.
Hard: 68,000 TS; 58,000 YS, 10 El; B 75 Rock.
For cable clamps, pole-line hardware, screw machine products.
High strength, corrosion resistance. Elect. cond. 32.

HIGH TEMPERATURE BRONZE.
U.S.; 6.3 Zn, 2.7 Sn, bal Cu.
For fittings, hardware, high strength.

HIGH TENSILE ALLOY
M-836; 0.4-0.5 C, bal Fe.
For gears, shafts; water hardening.

HIGH TENSILE BRASS NO. 1.
M-1518, Zn, Sn, bal Cu.
Cast 67,200 TS, 20 El; 120-165 Brin.
For high strength castings, corrosion resistant.

HIGH TENSILE BRASS NO. 2.
M-1518; Zn, Sn, bal Cu
Cast 85,200 TS; 15 El; 170-220 Brin.
For heavy castings, high strength.

HIGH TENSILE BRASS NO. 3.
M-1518, Zn, Sn, bal Cu
Cast: 107,500 TS; 12 El, 180-229 Brin
For machine tool parts, high strength.

HIGH TENSILE BRONZE
U.S.; 68.5 Cu, 6.5 Al, 2.2 Mn, 2.5 Fe.
Forged: 101,000-110,000 TS; 50,000-57,000 YS, 10-5 El; 200-220 Brin.
For propellers, nuts, bolts; corrosion resistant.

HIGHTENSILE BRONZE NO. 1.
M-508, 60-70 Cu, 21-25 Zn, 3-7 Al, 3-7 Mn, 2-5 Fe.
Cast: 120,000 TS; 55,000 YS; 15 El; 220 Brin.
For pump liners, sleeves, bushings, gears, pinions; pressure tight castings.

HIGHTENSILE BRONZE NO. 2.
M-508, 60-70 Cu, 21-25 Zn, 3-7 Al, 3-7 Mn, 2-5 Fe.
Cast: 100,000 TS, 50,000 YS, 20 El; 200 Brin.
For pump liners, sleeves, bushings; pressure tight castings.

HIGHTENSILE BRONZE NO. 3.
M-508, 60-70 Cu, 21-25 Zn, 3-7 Mn, 2-5 Fe.
Cast: 90,000 TS; 45,000 YS; 25 El; 180 Brin.
For pump liners, sleeves, bushings; centrifugal castings.

HIGH TEST.
M-68; 2.75-3.15 T.C., 1.0-1.25 Ni, 0.6-1.0 Mn, 0.9-1.1 Si, bal Fe.
For brake drums, valve bodies; cast iron.

HIGH TIN COMMERCIAL BRONZE.
M-33; 88 Cu, 2 Sn, bal Zn.
Annealed: 46,000 TS; 20,000 YS; 55 El.
For condenser and heat exchanger tubes; corrosion resistant.

HIGHWAY.
M-131; C, Cu, bal Fe.
For building construction.

HIGH YIELD.
M-633; C, bal Fe.
For transportation equipment, buses, bridges.

HIGH YIELD 70/30
M-141; 31.0 Ni, 0.5 Fe, 0.75 Mn, bal Cu.
Cold drawn: 72,000 TS; 50,000 YS; 15 El; 125 Brin.
For condenser and heat exchanger tubes, feed-water heaters; high strength, corrosion resistant.

HILANIC.
M-897; 79 Ni, 18 Co, 1 Si, 2 Fe.
Annealed: 85,000 TS; 60,000 YS; 35 El.
For cathodes and filaments in electronic tubes, heat resistant.

HILLS-McCANNA NO. 1.
M-168, 89 Cu, 11 Sn.
35,000-40,000 TS; 22,000-25,000 YS; 6-10 El, 7-9 RA; 75-85 Brin.
For gears, worm wheels; known as "Stones English Worm Gear Bronze."

HILLS-McCANNA NO. 2
M-168; 88 Cu, 10 Sn, 2 Zn.
32,000-45,000 TS, 19,000-23,000 YS; 15-30 El, 12-25 RA; 65-75 Brin.
For gears, superheated steam and hydraulic castings, bearings; known as "Gun Metal" or "G-Bronze."

HILLS-McCANNA NO. 10.
M-168; 80 Cu, 10 Sn, 10 Pb.
28,000-33,000 TS, 19,000-22,000 YS; 5-10 El, 6-11 RA; 52-60 Brin.
For bearings for heavy duty; resists shock and vibration.

HILLS-McCANNA NO. 11.
M-168; 88 Cu, 10 Sn, 2 Pb
30,000-40,000 TS; 19,000-23,000 YS; 15-25 El; 12-20 RA; 65-70 Brin.
For centrifugal pump parts, mine pump bodies, rods, gears; C.E.L. 15000.

HILLS-McCANNA NO. 20.
M-168, 85 Cu, 5 Sn, 5 Pb, 5 Zn.
27,000-33,000 TS; 15,000-19,000 YS; 16-20 El; 15-20 RA; 50-60 Brin.
For pump bodies, valves, bearings; known as "Ounce Metal" or "Red Composition."

HILLS-McCANNA NO. 20 P.
M-168; 2 Si, 0.5 Fe, bal Cu.
Cast: 40,000 TS; 19,000 YS, 35 El; 30 RA; 70 Brin
For bronze castings; corrosion resistant.

HILLS-McCANNA NO. 21.
M-168; 82 Cu, 4 Sn, 6 Pb, 8 Zn.
28,000-33,000 TS; 14,000-16,000 YS; 15-20 El; 20-26 RA; 55-60 Brin.
For general use, bearings; C.E.L. 10000.

HILLS-McCANNA NO. 22.
M-168; 65 Cu, 2 Pb, 30 Zn, 1 special element.
Cast: 30,000-35,000 TS; 25-35 El; 20-30 RA; 40-50 Brin.
For plumbing fixtures; SAE-41.

HILLS-McCANNA NO. 25.
M-168; 99.6-99.9 Cu.
17,000-20,000 TS; 6000-9000 YS; 50-40 El; 70-60 RA; 30-40 Brin.
For electrical installations, parts of electric welding machines; C.E.L. 4000.

HILLS-McCANNA NO 30.
M-168; 56 Cu, 41 Zn, 1 Fe, 1 Al, 0.5 Mn, 0.5 Sn
65,000-85,000 TS; 26,000-33,000 YS, 20-35 El; 18-30 RA, 104-119 Brin.
For propeller blades, hubs, valve stems, engine frames, bearings, gears; C.E.L. 28000.

HILLS-McCANNA NO. 30 A.
M-168; 39 Zn, 0.5 Mn, 1.5 Al, bal Cu.
Cast: 57,000-62,000 TS, 32,000-35,000 YS; 24-35 El, 27-30 RA, 96-99 Brin.
For bronze castings, Mn bronze

HILLS-McCANNA NO. 30 B
M-168, 40 Zn, 1 Al, 1.5 Fe, bal Cu.
Cast: 71,000-80,000 TS, 30,000 35,000 YS; 25-30 El; 25-30 RA, 130-135 Brin.
For bronze castings, SAE-43.

HILLS-McCANNA NO. 30 C.
M-168; 38 Zn, 1 Al, 0.5 Mn, bal Cu
Cast: 115,000-119,000 TS, 99,000-102,000 YS; 9-9.5 El; 8.4-8.6 RA, 220-235 Brin.
For Mn bronze castings, corrosion resistant.

HILLS-McCANNA NO. 35.
M-168; 92 Al, 8 Cu.
16,000 22,000 TS, 11,000-13,000 YS, 1-2 El, 1-2 RA, 50-55 Brin
For crankcases, housings, automobile castings, C.E.L. 10000

HILLS-McCANNA NO 39
M-168, special hardener, 3 Si, 1 Fe, bal Cu
Cast: 57,000 TS; 26,000 YS, 27 El, 27 RA; 100 Brin
For castings, same as "Everdur D."

HILLS-McCANNA NO 40
M-168, 90 Cu, 10 Al
65,000-80,000 TS, 23,000-28,000 YS, 20-30 El, 21-29 RA
For structural parts, non-magnetic; wear resistant.

HILLS-McCANNA NO 41
M-168, 77 Cu, 11 Al, 5 Fe, 7 Mn.
80,000 97,800 TS, 28,000-26,200 YS; 30-10 El; 29-12 RA; 190 Brin
For structural parts, wear resistant; C.E.L. 28300

HILLS-McCANNA NO 42.
M-168, 88 Cu, 8 Al, 4 Fe
65,000-80,000 TS, 23,000-28,000 YS, 20-30 El, 21-29 RA, 92-100 Brin.
For gears, bushings, bolts, wear resistant, C.E.L. 19000.

HILLS-McCANNA NO. 43
M-168, special hardener, 10 Al, 1 Fe, bal Cu
Cast: 84,000 TS; 33,000 YS, 22 El, 25 RA; 134 Brin.
For bearings, bushings, Al bronze.

HILLS-McCANNA NO. 45.
M-168; 89 Cu, 10 Al, 1 Fe
65,000-80,000 TS; 23,000-28,000 YS; 20-30 El; 21-29 RA, 92-100 Brin.
For equipment in oil refineries; wear and corrosion resistant; C.E.L. 19000.

HILLS-McCANNA NO 46.
M-168; 81 Cu, 11 Al, 5 Fe, 3 Mn.
80,000-94,300 TS; 28,000-26,400 YS; 30-10 El; 29-11 RA; 176 Brin.
For packing tools in the explosive industry; wear resistant; C.E.L. 26100.

HILLS-McCANNA NO. 47.
M-168; 80 Cu, 12 Al, 8 Fe.
65,000-80,000 TS; 23,000-28,000 YS; 20-30 El; 21-29 RA.
For bearings, gears to resist heavy loads and shocks; wear resistant; C.E.L. 22100.

HILLS-McCANNA NO. 48.
M-168, special hardener, 9 Al, bal Cu
Cast: 72,000 TS; 55,000 YS; 3 El; 3 RA; 229 Brin.
For construction parts; Al bronze.

HILLS-McCANNA NO. 49.
M-168, special hardener, 10 Al, 4 Fe, bal Cu.
Cast: 55,000 TS; 55,000 YS; 0 El; 0 RA; 300 Brin.
For dies for forming tools, Al bronze.

HILLS-McCANNA NO 50
M-168, 52 Cu, 31 Ni, 12 Fe, 5 Cr.
92,300-75,000 TS; 26,400-42,000 YS; 8.5-4.5 El, 8.5-7.8 RA; 206-190 Brin
For hydraulic valve seats, corrosion resistant, C E.L. 33040.

HILLS-McCANNA NO 50A.
M-168, 60.5 Cu, 23.5 Ni, 2 Sn, 3 Pb, 11 Zn.
38,000-45,000 TS, 19,000-22,000 YS, 13-21 El, 15-20 RA, 85-90 Brin
For vessels to resist H_2SO_4, corrosion resistant.

HILLS-McCANNA NO 52.
M-168, 74.5 Cu, 16.5 Ni, 9 Al.
85,000 TS, 36,000 YS; 4 El, 3.5 RA, 213 Brin.
For vessels to resist hot oils; corrosion resistant, C E.L. 29610

HILLS-McCANNA NO. 53.
M-168, 80 Cu, 10 Al, 5 Ni, 5 Fe
Untreated 95,000 TS, 44,000 YS; 9 El, 18 RA, 170 Brin
Heat treated 110,000 TS, 77,000 YS; 3 El, 9 RA, 235 Brin
For spark proof tools, corrosion resistant

HILLS-McCANNA NO 54
M-168, 60-65 Ni, 23-28 Cu, 3.5 Fe, 2 Mn, 0.75 Si, 0.25 C.
65,000-70,000 TS; 35,000-40,000 YS, 30-25 El; 100 Brin.
For chemical apparatus, corrosion resistant, C E.L. 29610.

HILLS-McCANNA NO 55
M-168, 65-67 Ni, 30-32 Cu, 2.5-3.5 Si, 2.5-3.5 Fe
75,000-80,000 TS, 44,000-48,000 YS, 10.5-10 El, 16-13 RA; 170 Brin
For still plugs in oil industries; corrosion resistant.

HILLS-McCANNA NO 102.
M-168, 88 Cu, 10 Sn, 2 Zn
Cast 48,000 TS, 24,000 YS, 42 El, 35 RA; 85 Brin.
For castings; SAE-62.

HILLS-McCANNA NO 102 P.
M-168, special hardener, 2 Si, 1 Fe, bal Cu.
Cast: 52,000 TS, 26,000 YS, 17 El; 19 RA; 119 Brin
For castings; Si bronze

HILLS-McCANNA NO 105
M-168; 85.75 Cu, 10 Sn, 2.5 Pb, 1.75 Ni.
Cast: 44,500 TS, 33,500 YS, 12 El, 15 RA; 96 Brin.
For gears

HILLS-McCANNA NO 110.
M-168; 80 Cu, 10 Sn, 10 Pb.
Cast: 45,000 TS, 25,000 YS; 32 El, 24 RA, 64 Brin.
For bearings, SAE-64.

HILLS-McCANNA NO 111.
M-168; 88 Cu, 10 Sn, 2 Pb.
Cast: 49,000 TS; 24,000 YS; 49 El, 36 RA; 81 Brin.
For bearings; SAE-63.

HILO.
M-61; 75 Ni, 18 Co, 2 Ti, bal Fe.
Annealed: 106,000-90,000 TS; 30-20 El.
For radio tube filaments; magnetic.

HILO.
M-897; 75 Ni, 18 Co, 2 Ti, 5 Fe.
Annealed: 105,000 TS; 75,000 YS; 30 El.
For cathodes and filaments in electronic tubes; heat resistant.

HILO, MODIFIED.
M-61; 79 Ni, 18 Co, 2 Fe.
Annealed: 82,000 TS.
For vacuum tube filaments, heat and corrosion resistant.

Hi Mag Perm.
M-1425, 0.03-0.05 C, 0.005-0.009 P, 0.01-0.02 Si, 0.03-0.07 Cr, 0.006-0.01 Al, 0.04-0.07 Mo, bal Fe
Annealed 40,000 TS; 20,000 YS; 40 El; 78 RA; 69 Brin.
For electrical applications, magnetic control devices, magnetic clutches and chucks, pole pieces, armatures.
High magnetic permeability Vacuum degassed

HI-MAN.
M-67, 0.25 C, 1.35 Mn, 0.30 Si, 0.20 Cu, bal Fe.
Rolled 75,000 TS, 50,000 YS; 20 El.
For railroad and agriculutre equipment, mine cars, auto bodies, high strength, low alloy construction steel.

HI-MAN 440.
M-67, 0.28 C, 1.35 Mn, 0.30 Si, 0.20 Cu, bal Fe
Rolled. 70,000 TS, 50,000 YS
For railroad and agriculture equipment, mine cars; high strength, low alloy construction steel.

HI-Mo
M-57; 0.83 C, 1.5 W, 8.75 Mo, 4 Cr, 1.25 V, bal Fe
For cutting tools, reamers, high speed steel.

HINGE
M-338, 62.0-63.5 Cu, 1-2 Pb, bal Zn.
Soft 50,000 TS, 50 El, 65 Brin
Hard 85,000 TS, 0 El, 180 Brin
Engraving brass

HI-NICKEL ALLOY.
M-373; C, Ni, bal Fe
For corrosion and heat resistant parts; corrosion and heat resistant.

HIOLOY-0-2
M-95, 0.20-0.35 C, 0.30-0.55 Si, 0.60-0.90 Mn, 0.4-0.6 Mo, bal Fe.
85,000 TS, 55,000 YS, 20 El, 30 RA.
For oil refinery equipment, water hardened

HIOLOY-0-4
M-95, 0.15-0.35 C, 0.30-0.55 Si, 0.4-0.7 Mn, 4-6 Cr, 0.4-0.65 Mo, bal Fe.
110,000 TS; 75,000 YS, 16 El; 30 RA.
For oil refinery equipment, corrosion resistant.

HIOLOY 0-6.
M-95, 0.55-0.75 C, 0.30-0.55 Si, 0.8-1.2 Cr, 0.5-0.8 Mn, bal Fe.
For liner plates, screen plates, cement mills; wear resistant, formerly "Hioloy W."

HIOLOY-0-7
M-95; 0.20-0.35 C, 0.5-0.8 Mn, 1.75-2.25 Ni, 0.6-0.9 Cr, 0.2-0.3 Mo, bal Fe.
100,000 TS; 65,000 YS; 18 El; 30 RA.
For oil refinery equipment; oil hardened.

HIPERCO.
M-118; 35 Co, 1 Cr, bal Fe.
Annealed: 25,000 TS; 20,000 YS; 1-2 El.
Unannealed: 80,000 TS; 60,000 YS; 20 El.
For core material, magnets for electric motors and generators; magnetic alloy of high permeability.

HIPERCO 27.
M-118; 27 Co, 0.5 max Cr, 0.3 max Ni, 0.3 max Mn, 0.03 max C, bal Fe.
Annealed: 80,000 TS; 45,000 YS; 20 El; 48.8 RA; 150 Brin.
For aircraft generators, current transformers, rectifiers; high magnetic saturation.

HIPERCO 35.
M-118; 35 Co, 0.3 max Mn, 0.5 max Cr, 0.3 max Ni, 0.03 max C, bal Fe.
Annealed: 36,000 TS; 36,000 YS; 0 El; 0 RA; 190 Brin.
For servo mechanism, torque motors, magnetic clutches; high magnetic saturation.

HIPERCO-50.
M-118; 2.V, 49 Co, 49 Fe.
Cold Rolled: 195,000 TS; 185,000 YS, 1 El; C 35 Rock.
Annealed: 80,000 TS; 48,000 YS; 0.5 El; B 97 Rock.
For applications requiring high magnetic inductions at low fields of 10-50 oersteds, diaphragms, motors, generators, relays. High permeability at high induction.

HIPERNIK
M-118; 50 Ni, 50 Fe, traces Mn.
Annealed: 55,000 TS; 20,000 YS, 50 El; 50 RA.
For core material for radio and current transformers, motors, relays, soft and ductile magnetic alloy.

HIPERNIK V.
M-118, 50 Ni, 50 Fe, trace Mn.
Annealed: 55,000 TS; 20,000 YS; 33 El.
For magnetic core materials for transductor applications; magnetic amplifiers, saturated reactors.

HIPERNOM V.
M-118; 79 Ni, 4 Mo, bal Fe.
40,000 to 50,000 permeability in the 40 gauss range
250,000 to 500,000 permeability at 3500 gauss
For sensitive saturable core devices where extreme sensitivity is required. Audio transformers, relays, amplifiers.
Processed to exhibit square loop properties. High permeability.

HIPERSIL.
M-118; 3-4 Si, bal Fe
Cast: 50,000 TS; 45,000 YS; 6 El.
For transformer cores; high permeability.

HI-PHY KIRKSITE.
M-88, M-794; Cu, Al, Mg, bal Zn.
For forming dies; refined grain.

HI-PRO.
M-275; 2.2 C, 12 Cr, 0.25 V, bal Fe.
For blanking and deep drawing dies, punches, trimming dies, shear blades, ring gages, liners, lamination dies; high resistance, to wear and abrasion; AISI D3.
Was Vulcan Hi-Pro.

HI-PROOF 304.
M-1724; 0.06 max C, 2.0 max Mn, 18.0-20.0 Cr, 8.0-11.0 Ni, 0.2 N, bal Fe.
Room temp: 85,000-114,000 TS; 42,500 YS; 35 El;
At 400°C: 20,000 min YS.
For stainless parts in food industry.

HI-PROOF 304L.
M-1724; 0.03 max C, 2.0 max Mn, 18.0-20.0 Cr, 8.0-11.0 Ni, 0.2 N, bal Fe.
Room temp: 85,000-114,000 TS; 42,500 YS; 35 El.
At 400°C: 20,000 min YS.
Weldable: for stainless parts and assemblies.

HI-PROOF 316
M-1724; 0.07 max C, 2.0 max Mn, 16.0-18.0 Cr, 10.0-14.0 Ni, 2.0-3.0 Mo, 0.2 N, bal Fe.
Room temp: 92,000-114,000 TS; 46,000 YS; 35 El;
At 400°C: 22,400 min YS.
For stainless steel parts.

HI-PROOF 316L
M-1724; 0.03 max C, 2.0 max Mn, 16.0-18.0 Cr, 10.0-14.0 Ni, 2.0-3.0 Mo, 0.2 N, bal Fe.
Room temp: 92,000-114,000 TS; 46,000 YS; 35 El;
At 400°C: 22,400 min YS.
Weldable, for stainless steel parts and assemblies

HI-PROOF 347
M-1724, 0.08 max C, 2.0 max Mn, 17.0-19.0 Cr, 9.0-11.0 Ni, 0.2 N, Nb = 10 × %C min, bal Fe.
Room temp: 92,000-114,000 TS, 49,000 YS; 35 El.
At 400°C: 31,000 min YS.
Weldable; for stainless parts and assemblies.

HI-QUA-LED.
M-1378, leaded alloy steels.
For screw machine products, free-cutting

HI-QUA-LED 10L45
M-1378, 0.43-0.50 C, 0.6-0.9 Mn, Pb, bal Fe.
Heat treated: 110,000 TS; 68,500 YS; 22 El; 44 RA; 230 Brin.
For gears, bolts, machine tool parts; free-cutting, leaded steel.

HI-QUA-LED 10L50.
M-1378, 0.48-0.50 C, 0.6-0.9 Mn, Pb, bal Fe
Heat treated 117,000 TS, 72,500 YS; 22 El; 43 RA; 235 Brin
For crankshafts, gears, tie rods, bushings; free-cutting, leaded steel

HI-QUA-LED 10L60
M-1378; 0.55-0.65 C, 0.7-1.0 Mn, Pb, bal Fe.
Heat treated 142,000 TS; 81,000 YS, 16 El, 32 RA; 270 Brin.
For crankshafts, die blocks, girders; free-cutting, leaded steel

HI-QUA-LED 10L70
M-1378, 0.65-0.75 C, 0.9 Mn, Pb, bal Fe
Heat treated 145,000-157,000 TS; 87,000-104,000 YS, 14.0-15.5 El, 26.5-37.0 RA, 321-285 Brin.
For punches, hammers, tools, free-cutting leaded steel.

HI-QUA-LED 41L30.
M-1378, 0.28-0.35 C, 0.4-0.6 Mn, 0.8-1.1 Cr, 0.15-0.25 Mo, Pb, bal Fe.
Heat treated: 126,000 TS; 105,000 YS; 18 El; 52 RA; 262 Brin.
For gears, bolts, crankshafts; free-cutting, leaded steel.

HI-QUA-LED 41L37.
M-1378; 0.35-0.40 C, 0.8-1.1 Cr, 0.15-0.25 Mo, Pb, bal Fe.
Heat treated: 122,000 TS; 100,000 YS; 23 El; 62 RA; 248 Brin
For gears, bolts, crankshafts; free-cutting, leaded steel.

HI-QUA-LED 41L40.
M-1378; 0.38-0.43 C, 0.75-1.0 Mn, 0.8-1.1 Cr, 0.20 Mo, Pb, bal Fe.
Heat treated: 118,000-132,000 TS; 92,000-106,000 YS; 20-17 El; 57-46 RA; 235-277 Brin.

For gears, bolts, machine tools parts; free-cutting, leaded steel.

HI-QUA-LED 43L40.
M-1378; 0.38-0.43 C, 1.6-2.0 Ni, 0.7-0.9 Cr, 0.3 Mo, Pb, bal Fe.
Heat treated: 145,000 TS; 125,000 YS; 16 El; 48 RA; 310 Brin.
For machine tool parts; free-cutting, leaded steel.

HIROX.
M-118; 6-10 Al, 3-9 Cr, 0-4 Mn, B, Zr, bal Fe.
At 70°F: 118,850 TS; 111,650 YS; 15 El; 42 RA.
At 1300°F: 15,000 TS; 14,950 YS; 94 El; 98 RA.
For resistances, heating elements; high electrical resistivity and high oxidation resistance to 2300°F.

HI-RUN.
M-335; 1.55 C, 11.5 Cr, 0.8 Mo, 0.9 V, bal Fe.
Air hardening.
For tools, dies.
AISI D2 Hi Chrome-Hi Carbon tool steel.

HI-SHOCK 60.
M-32; 0.68 C, 0.5 Mn, 0.3 Si, 1.0 Cr, 0.5 Ni, 1.0 Mo, 2.5 Cu, 0.15 V, bal Fe.
Air hardened: 363,000-226,000 TS; 316,000-206,000 YS; 1.6-10.2 El; 3.1-30.9 RA; 580-500 Brin.
For hobs, punches, mandrels, tools and dies; air hardened, shock resistant.

HI-TEM IRON NO. 7.
M-23; 3 C, 1.5 Si, Ni, Cr, bal Fe.
For retorts, dye and paint equipment; corrosion and heat resisting, cast iron.

HI-TEMP 72 see HANDY HI-TEMP 720.

HI-TEMP 82 see HANDY HI-TEMP 820.

HI-TEMP 91 see HANDY HI-TEMP 910.

HI-TEMP 93 see HANDY HI-TEMP 930.

HI-TEMP AF-183.
M-1; 0.25-0.40 C, 11.5-13.5 Cr, 2.75-3.25 Mo, 0.60-0.95 V, 17.0-19.0 Mn, 0.15-0.25 N, bal Fe.
Bar: 137,000 TS; 82,000 YS; 33 El; 23 RA.
At 1500°F: 34,000 TS, 29,400 YS; 34 El; 58 RA.
For gas turbines, jet engines, nozzles, afterburner.
Good heat and corrosion resistance, austenitic, non-heat treatable.

HI-TENSILE.
M-801, 7-8 Zn, 0.2-0.5 Mg, 0.4-1.0 Cu, 0.2 Ti, bal Al.
T5-temper: 35,000 TS; 26,000 YS; 6 El; 75 Brin.
For aircraft and machine tool castings; room temperature aging properties.

HITENSILOY NO. 11.
M-122, 57 Cu, 1 Pb, 1.75 Ni, bal Zn.
Rolled. 80,000 TS; 45,000 YS; 165 Brin.
For pump rods, valve stems, bolts, nuts, die castings; nickel brass.

HITENSO 162.
M-8; 99.0 Cu, 1.0 Cd.
(Formerly Hitenso 961)
Soft (rod) 37,000 TS; 12,000 YS; 50 El; 47 Rock F.
Hard (rod) 58,000 TS; 50,000 YS; 15 El; 65 Rock B.
For electrical equipment, trolley wire, contact shoes.
High electrical conductivity, wear resistant.
Copper Alloy No. 162.

HITENSO 165.
M-8; 0.8 Cd, 0.02 Si, 0.60 Sn, bal Cu.
Hard: 65,000 TS; 55,000 YS; 15 El; B 75 Rock.
Soft: 40,000 TS; 14,000 YS; 55 El; B 6 Rock.
Wire: 95,000 TS; 1.5 El.
For electrical equipment, trolley wire, contact shoes, electrical welding tips and wheels. 58% electrical conductivity, high strength. Copper Alloy No. 165.

HI-TENSO 961 see HITENSO 162.

HI-TENSO 965 see HI-TENSO 165.

HI-TENSO 1622.
M-8; 1 Cd, bal Cu.
Hard wire: 90,000 TS; 1.5 El.
For low load transmission lines, trolley wire, spring contacts.
Corrosion and wear resistant.
Copper Alloy No. 1622.

HITEN-SPEED 45.
M-478; 0.33-0.41 C, 1.3-1.6 Mn, bal Fe.
For gears, bolts, crankshafts, axles; oil hardened, tough.

HITEN-SPEED 55.
M-478; 0.30-0.41 C, 1.3-1.9 Mn, 0.25-0.34 Mo, bal Fe.
For gears, bolts, crankshafts, axles; oil hardened, tough.

HITEST.
M-1441; 3 C, Si, Mn, bal Fe.
For gears, shafts, housings, machinery parts; cast iron.

HI-THORIA.
M-60; W, ThO_2.
For welding electrodes; stable arc.

HI TM 900.
M-1439, 0.37-0.43 C, 5 Cr, 1.2 Mo, 0.5 V, 0.9 Si, 0.3 Mn, bal Fe
Heat treated: 220,000 TS; 185,000 YS; 10 El; 35 RA; 460 Brin
For fasteners, bolts; high strength at elevated temperature.

HI-VAN.
M-341; 0.40 C, 1.1 Si, 5.25 Cr, 1.2 Mo, 0.9 V, bal Fe.
For punches, upsetters, forming dies; hot work steel, oil hardened.

HI-VAN NO. 28.
M-341; 0.85 C, 4 Cr, 19 W, 2 V, 0.75 Mo, bal Fe.
For tools, cutters, reamers, taps, gauges; high speed steel.

HI-WEAR 64. see CARPENTER HI-WEAR 64.

HI-YAW-TEN.
M-1540, 0.12 max C, 0.25-0.75 Si, 0.2-0.5 Mn, 0.06-0.12 P, 0.25-0.5 Cu, 0.65 max Ni, 0.4-1.0 Cr, 0.15 max Ti, bal Fe.
Annealed: 67,000 min TS; 50,000 min YP;
Rolled: 71,000 min TS; 57,000 min YP.
For buildings, rolling stock, buses, mine cars, bridges. Resists atmosphere corrosion.

HI-YIELD 42.
M-633; 0.21 C, 0.9 Mn, 0.01 min Cb, bal Fe.
Plate: 63,000 TS; 42,000 YS, 24 El.
For trucks, mine cars, derricks, bridges, plow frames, pressure vessels.
Good fabricability and weldability.

HI-YIELD 45.
M-633; 0.22 C, 1.25 Mn, 0.01 min Cb, bal Fe.
Plate: 60,000 TS; 45,000 YS; 22 El.
For trucks, mine cars, derricks, bridges, plow frames, pressure vessels.
Good fabricability and weldability.

HI-YIELD 50.
M-633; 0.22 C, 1.25 Mn, 0.01 min Cb, bal Fe.
Plate: 65,000 TS; 50,000 YS; 20 El.
For trucks, mine cars, derricks, bridges, plow frames, pressure vessels.
Good fabricability and weldability.

HI-YIELD 55.
M-633; 0.25 C, 1.35 Mn, 0.01 min Cb, bal Fe.
Plate: 70,000 TS; 55,000 YS; 18 El.
For trucks, mine cars, derricks, bridges, plow frames, pressure vessels.
Good fabricability and weldability.

HI-Z.
M-1538; 0.10-0.18 C, 0.60-1.0 Mn, 0.15-0.35 Si, 0.002-0.006 B, 0.4-0.8 Cr, 0.15-0.50 Cu, 0.4-0.6 Mo, 0.7-1.0 Ni, 0.03-0.10 V, bal Fe.
Plate: 114,000-135,000 TS; 100,000 min YS; 20 min El.
For pressure vessels, bridges, mine cars, power shovels, cranes, trucks, trailers.
Shock and wear resistant. Heat treated by mill.

HK31A.
M-43; 3.0 Th, 0.7 Zr, bal Mg.
O-temper: 30,000-33,000 TS; 18,000-20,000 YS; 12-23 El.
H 24-temper: 34,000-39,000 TS; 24,000-31,000 YS; 4-14 El.
Sheet and plate have good formability and weldability; used at 400°F to 600°F in aircraft and missiles.
ASTM B90-69; AMS 4384, 4385

HK31A.
Various foundries; 0 7 Zr, 3.0 Th, bal Mg.
T6-temper: 27,000-32,000 TS; 13,000-15,000 YS; 4-8 El.
At 700°F· 13,000 TS; 8000 YS; 26 El.
Magnesium sand castings with good pressure tightness, weldability and corrosion resistance
For parts operating at 400-700°F.
ASTM B80-69; AMS 4445; SAE 507, QQ-M-56

HM.
M-459; C, Mn, bal Fe.
For hand chisels; water hardened

HM21A.
M-43; 0 6 Mn, 2 0 Th, bal Mg.
T8-temper: 33,000-35,000 TS; 18,000-23,000 YS; 6-11 El; 56 Brin.
Sheet and plate have good properties 400-750°F; good formability and weldability
Used primarily for aircraft and missiles.
ASTM B90-69; AMS 4383, 4390.

HM31A (Extrusions).
M-43; 1.2 Mn, 3.0 Th, bal Mg.
T5-Temper: 37,000-44,000 TS; 26,000-38,000 YS, 4-13 El; 63 Brin
Extrusions: good elevated temperature properties, 400-800°; used in aircraft and missiles.
AMS 4388, 4389.

HMS STEELS.
M-459; C, bal Fe.
For general machine parts; water hardened.

HOB-A-DIE.
M-289; 0.06 C, 0.3 Mn, 0.2 Si, 0.25 Mo, 1 0 Cr, bal Fe.
For Zn casting dies; resists heat checking.

HOB-A-FORM.
M-341; 0.06 max C, 0.15 Mn, 0.10 Si, bal Fe.
For plastic mold dies; water hardening, hobbed cavity.

HOBALITE.
M-40; C, alloy, bal Fe.
Air hardened.
For mold dies, hobs; air hardening.

HOBALITE
M-289; 0.05 C, 0.15 Mn, bal Fe.
For plastic mold dies; case hardening steel.

HOBALITE.
M-783; 0.05 C, 0.16 Mn, bal Fe.
For mold dies; water hardened.

HOBALITE 500A.
M-217; 0.05 C, 0.05 Si, 0.10 Mn, bal Fe.
For deep hobbing steel for bakelite dies; case hardened.

HOBALLOY.
M-38; 0.1 max C, 1.3 Ni, 0.6 Cr, bal Fe.
For Bakelite molds; shock resistant.

HOBART NO. 12.
M-1000; 2 C, bal Fe.
For welding electrode.

HOBART NO. 13.
M-1000, 0.1 C, bal Fe.
For welding electrodes; for light gage steel.

HOBART NO. 90-PL.
M-1000; C, bal Fe.
For welding electrode; for high tensile, low alloy steels.

HOBART NO. 111.
M-1000; 0.1 C, 0 4 Mn, 0.1 Si, bal Fe.
Welded 61,000-69,000 TS, 52,000-60,000 YS; 25-31 El
For welding electrodes for steel; arc

HOBART NO 335
M-1000; 0 08 C, 0.3 Mn, 0.14 Si, bal Fe.
Welded 62,000-71,000 TS, 52,000-61,000 YS; 22-26 El.
For welding electrodes for steel, arc

HOBART NO 477.
M-1000, C, bal Fe
Welded 68,000-78,000 TS, 58,000-56,000 YS; 19-26 El.
For welding electrodes for mild steel, arc

HOBART NO. 885
M-1000; 0.1 C, 0 5 Mn, 0 2 Si, 0.5 Mo, bal Fe.
Welded· 80,000 TS; 64,000 YS; 22 El
For welding electrodes for high tensile steel; arc, coated.

HOBART NO 912.
M-1000, Mn, Zn, bal Cu.
For welding rod for cast iron and steel, low fuming for gas welding, M P. 1600°F

HOBART NO 932
M-1000; Si, bal Cu.
For welding electrode; M P. 1010°C.

HOBART ALUMINUM
M-1000, 5 Si, bal Al.
For welding electrodes for aluminum; coated

HOBART HI-CARBON NO. 40-HC.
M-1000, high C, bal Fe.
For welding electrodes for high C steels, coated.

HOBART HOBRONZE.
M-1000; Cu alloy.
For welding electrodes for Cu alloys; carbon or metallic arc.

HOBART NICKEL-CAST.
M-1000, Ni.
For welding electrode for cast iron; coated.

HOBART SOFTCAST A.
M-1000; C, bal Fe.
Welded: 200 Brin
For welding electrodes of cast iron; coated, arc, machinable.

HOBART SOFTCAST C.
M-1000; C, bal Fe.
For welding electrodes for cast iron; coated cast electrode, machinable.

HOBART STAINLESS NO. 308.
M-1000; 0.08 max C, 10-12 Ni, 19-21 Cr, bal Fe.
For welding electrodes for Cr-Ni alloys; arc, stainless.

HOBART STAINLESS NO. 309.
M-1000; 0.20 max C, 12 min Ni, 25 min Cr, bal Fe.
For welding electrodes for Cr-Ni alloys; arc, coated, stainless.

HOBART STAINLESS NO. 310.
M-1000; 0.25 max C, 20 min Ni, 25 min Cr, bal Fe.
For welding electrodes for Cr-Ni alloys; coated, stainless.

HOBART STAINLESS NO. 316.
M-1000; 0.10 max C, 10-14 Ni, 1.7-2.5 Mo, 16-18 Cr, bal Fe.
For welding electrodes for Type 316 steel; coated, stainless.

HOBART STAINLESS NO. 330.
M-1000; 0.06 C, 33 Ni, 1.4 Mn, 15 Cr, bal Fe.
For welding electrodes for Type 330 steel; coated, corrosion and heat resistant.

HOBART STAINLESS NO. 347
M-1000; 17-19 Cr, Cb = 10 × C, bal Fe.
For welding electrodes for Cr-Ni alloys; coated, sterilized, stainless.

HOBART STRONGCAST.
M-1000, C, bal Fe.
For welding electrodes for cast iron; coated, arc

HOBART SULKOTE
M-1000; 0.13-0.18 C, bal Fe.
Welded: 48,000 TS, 8 El.
For welding electrodes for mild steel, arc, iron oxide coating.

HOBB DIE STEEL.
M-627, 0.07 max C, 0.15 Mn, bal Fe.
For plastic molds, hobs, carburizing steel

HOBRITE.
M-333, 0.05 max C, 0.11 Mn, bal Fe
For hobbing molds; plastic mold dies, water hardening.

HOBSON NON-SHRINK.
M-340; 0.9 C, 1.2 Mn, 0.2 V, bal Fe.
For dies and tools; non-deforming.

HOBSON'S CHOICE.
U. S.; 1.48 C, 0.34 Mn, bal Fe.
For tools, cutters; water hardened

HOBSON'S CHOICE DRILL RODS
M-340; 1.1 C, bal Fe.
For tools, drills, taps, water hardened

HOBSON'S CHOICE XX
M-340; 0.7-1.2 C, 0.3 Mn, 0.3 Si, bal Fe.
For drills, punches, taps, reamers, hobs, broaches; water hardened, Type W1.

HOBSON'S FAST FINISHING.
M-340; 1.2 C, 0.2 V, bal Fe
For fast finishing tools, cutters; water or oil hardened.

HOBSON'S OIL HARDENING.
M-340; 0.9 C, 1.2 Mn, bal Fe.
For tools, dies, punches; non-deforming.

HOBSON'S SPECIAL TAP RODS.
M-340; 1 C, bal Fe.
For tools, taps; water hardened.

HOBSON'S WARRANTED BEST.
M-340; 0.7-1.2 C, bal Fe.
For general tools; water hardening.

HOCKLEISTEUNGSTAHL.
Germ.; 10 Cr, 2 W, 0.5 V, 1.5 C, 1.2 Si, 0.4 Mn, bal Fe.
For shear blades, dies.

HOCO EXTRA EXTRA MH.
M-1338; 1.1 C, 0.25 max Si, 0.25 max Mn, bal Fe.
Annealed: 110,000 TS; 58,000 YS; 18 El; 40 RA; 210 Brin.
For springs, taps, cutters, drills, hobs; Type W1; water hardened.

HOCO EXTRA EXTRA SEHR ZAH.
M-1338; 0.70 C, 0.25 max Si, 0.25 max Mn, bal Fe.
Heat treated: 175,000 TS; 128,000 YS; 12 El; 37 RA; 355 Brin.
For springs, axes, punches, crimpers; Type W1; water hardened.

HOCO EXTRA EXTRA ZAH.
M-1388; 0.85 C, 0.25 max Si, 0.25 max Mn, bal Fe.
Heat treated: 190,000 TS; 145,000 YS; 10 El; 30 RA; 400 Brin.
For springs, taps, drills, hobs, reamers; Type W1; water hardened.

HOCO EXTRA EXTRA ZH.
M-1338; 1.0 C, 0.25 max Si, 0.25 max Mn, bal Fe.
Annealed: 100,000 TS; 53,000 YS; 21 El; 42 RA; 200 Brin
For springs, drills, reamers, broaches; Type W1; water hardened

HOCO EXTRA HART.
M-1338, 1.3 C, 0.25 max Si, 0.25 max Mn, bal Fe.
For engravers tools, forming dies, reamers; Type W1, water hardened.

HOCO EXTRA MH.
M-1338; 1.15 C, 0.25 max Si, 0.25 max Mn, bal Fe.
Annealed 110,000 TS; 58,000 YS; 20 El; 40 RA; 210 Brin.
For springs, tools, reamers, hobs, drills, taps, Type W1; water hardened

HOCO EXTRA SEHR HART
M-1338; 0.70 C, 0.25 max Si, 0.25 max Mn, bal Fe.
Heat treated. 175,000 TS, 128,000 YS; 12 El; 37 RA; 355 Brin.
For springs, rails, punches, axes, hammers, Type W1, water hardened

HOCO EXTRA WEICH SCHWEISSBAR.
M-1338, 0.55 C, 0.10-0.40 Si, 0.50-0.70 Mn, bal Fe.
Heat treated 160,000 TS, 115,000 YS, 12 El; 40 RA; 325 Brin
For gears, bolts, shafts, machine tool parts; water hardened

HOCO EXTRA ZAH
M-1338; 0.85 C, 0.25 max Si, 0.25 max Mn, bal Fe.
Heat treated: 190,000 TS; 145,000 YS; 10 El, 30 RA; 400 Brin.
For springs, taps, reamers, drills, broaches, Type W1, water hardened.

HOCO EXTRA ZH.
M-1338; 1.0 C, 0.25 max Si, 0.25 max Mn, bal Fe.
Annealed: 100,000 TS; 53,000 YS; 21 El; 42 RA; 200 Brin.
For springs, tools, cutters, drills; Type W1; water hardened.

HOCO HSSP
M-1338; 0.70 C, 1.7 Si, 0.70 Mn, bal Fe.
For springs; oil hardened, tough.

HOCO HWA.
M-1338; 0.30 C, 0.25 Si, 0.25 Mn, 2.5 Cr, 0.15 Mo, 0.1 V, bal Fe.
For gears, bolts, crankshafts; oil hardened, tough.

HOCO HWA50.
M-1338; 0.30 C, 2.35 Cr, 0.6 V, 4.25 W, bal Fe.
For extrusion dies, rams and liners; oil hardened, tough.

HOCO HWA90.
M-1338; 0.30 C, 2.65 Cr, 0.35 V, 8.5 W, bal Fe.
For extrusion dies, rams and liners; hot work steel, oil hardened.

HOCO HWA95K.
M-1338; 0.30 C, 2.4 Cr, 2.0 Co, 0.25 V, 8.5 W, bal Fe.
For extrusion dies and liners; hot work steel, oil hardened.

HOCO HWA100M.
M-1338; 0.65 C, 3.75 Cr, 0.85 Mo, 0.7 V, 8.5 W, bal Fe.
For lathe and planer tools, taps, reamers; high speed steel.

HOCO HWAA40.
M-1338; 0.30 C, 1.0 Si, 1.1 Cr, 0.18 V, 3.75 W, bal Fe.
For punches, upsetters, riveters; oil hardened, tough.

HOCO HWAMV.
M-1338; 0.45 C, 1.4 Cr, 0.7 Mo, 0.3 V, bal Fe.
For header and forging dies; oil hardened, tough.

HOCO HWR4.
M-1338; 1.42 C, W, V, bal Fe.
For bearings, bushings, cutters; water or oil hardened, wear resistant.

HOCO HZR.
M-1338; 1.4 C, 0.30 Cr, 0.1 V, bal Fe.
For bearings, bushings, cutters; water or oil hardened, wear resistant.

HOCO KG.
M-1338; 1.0 C, 1.55 Cr, 0.35 Mn, bal Fe.
For bearings, cutters, liners; water or oil hardened, shock resistant.

HOCO PRIMA-MH.
M-1338; 0.90 C, 0.25-0.50 Si, 0.30-0.80 Mn, bal Fe.
Heat treated: 185,000 TS; 118,000 YS; 10 El; 30 RA; 375 Brin.
For springs, taps, drills, reamers; Type W1; water hardened.

HOCO PRIMA SEHR WEICH.
M-1338; 0.35 C, 0.25-0.50 Si, 0.30-0.80 Mn, bal Fe.
Hot rolled: 84,000 TS; 54,000 YS, 30 El; 53 RA; 185 Brin.
For gears, shafts, axles, bolts, screws; water hardened.

HOCO PRIMA WEICH.
M-1338; 0.45 C, 0.25-0.50 Si, 0.30-0.80 Mn, bal Fe.
Hot rolled: 98,000 TS; 60,000 YS; 24 El; 54 RA; 212 Brin.
For axles, gears, bolts, shafts; water hardened.

HOCO PRIMA ZAH.
M-1338; 0.60 C, 0.25-0.50 Si, 0.30-0.80 Mn, bal Fe.
Heat treated: 160,000-115,000 TS; 113,000-77,000 YS; 12-23 El; 40-54 RA; 320-230 Brin.
For wheels, die blocks, girders, rails; water hardened.

HODI.
M-435; 0.28 C, 9 W, 4 Cr, 0.4 V, bal Fe.
For hot gripping and swaging dies.

HODUR.
M-1364; 2.5-5.0 Cu, 0.2-1.8 Mg, 0.3-1.5 Mn, bal Al.
Annealed: 27,000 TS; 11,000 YS; 22 El; 47 Brin.
Heat treated: 72,000 TS; 57,000 YS; 130 Brin.
For aircraft structures, fittings, fasteners; age-hardenable.

HOFORS-1.
M-224; 1.0 C, 1.1 Mn, 0.6 Si, 1.0 Cr, bal Fe.
For large bell and roller bearing rings; oil hardened; non-deforming.

HOFORS-3.
M-224; 1.0 C, 1.5 Cr, bal Fe.
For ball bearings, master gauges, taps.

HOFORS-7.
M-224; 1.1 C, 0.6 Cr, bal Fe.
For taps, twist drills, dies, punches, reamers.

HOFORS-9.
M-224; 1.1 C, 0.5 Cr, bal Fe
For bearings, rollers, reamers, taps.

HOFORS-13.
M-224; 1.05 C, 1.0 Cr, bal Fe
For ball bearing rings, rollers, punches, taps.

HOFORS-22.
M-224; 1.0 C, 1.1 Cr, 0.35 Mo, bal Fe.
For cutting tools, chisels, drills, rollers, taps; wear resistant.

HOFORS-46.
M-224; 0.90 C, 1.15 Mn, 0.5 Cr, 0.5 W, 0.1 V, bal Fe.
For blanking dies, broaches, form tools, punches, taps; oil hardened; tough.

HOFORS-100.
M-224, 1.0 C, bal Fe.
For twist drills, punches, shear blades; water hardened.

HOFORS-711.
M-224; 0.50 C, 0.70 Si, 1.15 Cr, 2.5 W, 0.15 V, bal Fe.
For broaches, milling cutters, blanking and heading dies; oil hardened.

HOFORS KN-13.
M-224; 0.18 C, 0.3 Si, 0.55 Mn, 0.75 Cr, 3 Ni, bal Fe.
For gears, camshafts, crankshafts; case hardened.

HOFORS KN-14.
M-224, 0.4 C, 0.3 Si, 0.8 Mn, 0.8 Cr, 1.25 Ni, bal Fe.
For gears, shafts; shock resistant.

HOFORS KN-16.
M-224; 0.15 C, 0.3 Si, 0.55 Mn, 0.65 Cr, 1.25 Ni, bal Fe.
For gears, camshafts, crankshafts; case hardened.

HOFORS KN-17.
M-224, 0.12 C, 0.75 Cr, 3.0 Ni, bal Fe.
For gears, camshafts, crankshafts; case hardened.

HOFORS KN-18.
M-224; 0.35 C, 0.3 Si, 0.55 Mn, 1.15 Cr, 2.6 Ni, bal Fe.
For gears, machinery parts; shock resistant.

HOFORS KN-19.
M-224; 0.3 C, 0.3 Si, 0.55 Mn, 1.25 Cr, 4.25 Ni, bal Fe.
For gears, shafts; tough, oil hardened.

HOFORS KNY-1.
M-224; 0.3 C, 0.55 Mn, 1.05 Cr, 3.25 Ni, 0.25 Mo, bal Fe.
For gears, machinery parts, shafts; tough.

HOFORS KY-2.
M-224; 0.25 C, 0.65 Mn, 1.05 Cr, 0.2 Mo, bal Fe.
For gears, machinery parts; tough.

HOFORS M-11.
M-224; 0.40 C, 0.30 Si, 1.25 Mn, bal Fe.
For machinery parts; tough.

HOFORS NY-1.
M-224; 0.2 C, 0.55 Mn, 1.8 Ni, 0.25 Mo, bal Fe.
For gears, shafts; case hardened.

HOFORS SM-5.
M-224; 0.55 C, 1.75 Si, 0.75 Mn, bal Fe.
For springs; oil hardened.

HOHENZOLLERN BRASS.
Germ.; 30-40 Zn, bal Cu.
For gears, worm wheels; a high tensile brass.

HOLDERTEM.
M-64, 0.40 C, 0.85 Mn, 0.95 Cr, 0.2 Mo, bal Fe.
Prehardened low alloy steel for shafts, arbors, structural parts, and special purpose tools.

HOLFOS 10% LEAD BRONZE.
M-169; 80 Cu, 10 Sn, 10 Pb.
Cast: 29,000-36,000 TS; 22,500-27,000 YS; 6-2 El; 70-85 Brin.
For bushings, bearings; free cutting, SAE 64.

HOLFOS 20% LEAD BRONZE.
M-169; 75 Cu, 5 Sn, 20 Pb
Cast 22,500-29,500 TS; 13,500-18,000 YS, 10-7 El, 50-60 Brin
For bushings, bearings; operates best with soft shafts.

HOLFOS AB1 As Cast.
M-169; 88 Cu, 9.5 Al, 2.5 Fe
Cast: 72,000-78,000 TS, 25,000-31,000 YS, 20 El; 120-140 Brin
For high strength components in food handling, acid resistant fittings, flanges
BS 1400 AB1-C; BS 1032; SAE 68A.

HOLFOS AB1 Heat Treated
M-169, 88 Cu, 9.5 Al, 2.5 Fe.
Cast and heat treated 85,000-94,000 TS; 43,000-50,000 YS, 12 El, 130-180 Brin
Gears, shafts, splined couplings for hydraulic systems, food processing.

HOLFOS AB2 As Cast
M-169, 80 Cu, 10 Al, 4.5 Fe, 5.5 Ni
Cast 90,000-95,000 TS, 36,000 YS, 15 El, 165 Brin.
For gears, shafts, components in marine equipment, food and oil industry.
BS 1400 AB2-C, BS 1073; ASTM B148-65T-9D.

HOLFOS AB2 Heat Treated
M-169, 80 Cu, 10 Al, 4.5 Fe, 5.5 Ni.
Cast and heat treated. 87,000-100,000 TS; 38,000-54,000 YS, 8-12 El; 155-190 Brin.
For highly stressed equipment in marine, food, petroleum industries.
Near ASTM B148-65T-9D-HT.

HOLFOS B O
M-169, 87.8 Cu, 11.5 Sn, 0.7 P.
Cast: 38,000-54,000 TS; 27,000-47,000 YS; 5-7 El; 90-130 Brin. (Properties vary with method of casting).
Good wear and abrasion characteristics.
For gears, shafts, wear parts.
BS 1400 PB1-C and PB2-C; BS 1059.

HOLFOS B O.H.T.
M-169; 87.8 Cu, 11.5 Sn, 0.7 P
Centrifugally-spun and continuously cast.
As cast: 45,000-54,000 TS; 22,400-23,500 YS; 20-40 El; 85-90 Brin
Good wear and abrasion resistance, resistant to sea water.
For elevating nuts, bearings, small worm gears.
DTD 900/4454/A.

HOLFOS G1.
M-169; 88 Cu, 10 Sn, 2 Zn.
Cast: 38,000-50,000 TS; 18,000-27,000 YS; 3-15 El; 85-100 Brin (Properties vary with method of casting).
(known as Admiralty Gunmetal).
For pumps, shaft liners, hydraulic parts.
BS 1400 G1-C; BS 383; SAE 62; AMS 4845D.

HOLFOS G2.
M-169; 88 Cu, 8 Sn, 4 Zn.
Cast. 31,000-45,000 TS; 17,000-22,400 YS; 3-15 El, 85-100 Brin. (Properties vary with method of casting: continuous cast is strongest, shell or sand is most ductile)
For pump fittings, valve nuts, bolts.
BS 1400 G2-C; BS 1022; SAE 620.

HOLFOS G3
M-169, 84.75 Cu, 7 Sn, 2.25 Zn, 0.5 max Pb, 5.5 Ni.
Cast 40,000-50,000 TS; 20,000-30,000 YS, 12-20 El, 85-100 Brin. (Properties vary with method of casting).
Age hardenable alloy.
For roller bearing cages, gear wheels, actuating nuts, insulator hanger supports.
BS 1400 G3-C.

HOLFOS G3-WP.
M-169; 84.75 Cu, 7 Sn, 2.25 Zn, 0.5 max P, 5.5 Ni
Cast, then age hardened 63,000 TS; 40,000 YS; 3 El; 160-200 Brin.
High strength bronze for critical applications.
BS 1400 G3-W

HOLFOS HTB 1.
M-169, 60 Cu, 36 Zn, 1 Al, 2 Mn, 1 Fe.
Cast: 67,000-70,000 TS, 25,000-31,000 YS, 20 El; 110-120 Brin
For screw down nuts in rolling mills and screw presses, neck bushings and stuffing boxes
BS 1400 HTB1-C; SAE 43, AMS 4860A.

HOLFOS HTB 2
M-169; 60 Cu, 33 Zn, 3.5 Al, 2 Mn, 1.5 Fe.
Cast. 85,000-87,000 TS; 40,000-42,000 YS, 15 El, 130-140 Brin
For valve and control parts, seatings, cones, marine hardware
BS 1400 HTB2-C.

HOLFOS HTB 3
M-169; 60 Cu, 30 Zn, 5 Al, 3 Mn, 2 Fe.
Cast: 107,000 TS, 60,000 YS, 12-15 El; 180-185 Brin
For highly stressed hardware and components.
BS 1400 HTB3-C.

HOLFOS J H 17
M-169; 84.7 Cu, 14.0 Sn, 1.3 P.
Centrifugally spun and continuously cast
As cast. 49,000-63,000 TS; 43,000-58,000 YS, 1-1.5 El, 130-160 Brin
Good wear resistance and resistant to sea water.
For aircraft auxiliary driving gears, timing gears
(Ger) DIN 1705 G-SnBz14.

HOLFOS JHR42.
M-169; 92.5 Cu, 2 Zn, 0.5 Mn, 1.5 Fe, 3.5 Si.
Cast: 49,000 TS; 29,000 YS, 18 El; 110 Brin.
For bushings and bearings, esp. for top end bushings for diesel engines.
BS 1400 SB1-C (1948); BS 1030.

HOLFOS LB1.
M-169; 76 Cu, 9 Sn, 15 Pb.
Cast: 25,000-34,000 TS; 11,200-22,400 YS; 3-8 El; 65-90 Brin. (Properties vary with method of casting).
For bearings and bushings, acid resistant fittings.
BS 1400 LB1-C; ASTM B144-52-3D.

HOLFOS LB2.
M-169; 80 Cu, 10 Sn, 10 Pb.
Cast: 27,000-40,000 TS; 11,200-25,000 YS; 3-10 El; 70-95 Brin. (Properties vary with method of casting).
Good sliding properties, corrosion resistant.
For bearings for heavy duty.
BS 1400 LB2-C; BS 963; SAE 64.

HOLFOS LB3.
M-169, 85 Cu, 10 Sn, 5 Pb.
Cast: 27,000-45,000 TS, 11,200-34,000 YS, 3-15 El; 80-100 Brin. (Properties vary with method of casting).
For bearings, acid resistant fittings.
BS 1400 LB3-C; BS 961.

HOLFOS LB4.
M-169; 85 Cu, 5 Sn, 10 Pb.
Cast: 22,400-38,000 TS; 9,000-22,400 YS; 5-25 El, 65-75 Brin. (Properties vary with method of casting).
For shafts, bushes and bearings.
BS 1400 LB4-C, SAE 66.

HOLFOS LB5.
M-169; 75 Cu, 5 Sn, 20 Pb
Cast: 22,400-27,000 TS; 9,000-22,400 YS, 6-8 El; 60-70 Brin. (Properties vary with method of casting)
For bearings for agricultural and railroad equipment, flour mill equipment
BS 1400 LB5-C; ASTM B144-52-3E

HOLFOS LG1.
M-169; 83 Cu, 3 Sn, 9 Zn, 5 Pb.
Cast: 25,000-38,000 TS; 13,500-18,000 YS; 12-40 El; 55-70 Brin. (Properties vary with method of casting).
For lightly loaded marine hardware.
BS 1400 LGI-C; BS 1159; ASTM B145-63-5A.

HOLFOS LG2
M-169; 85 Cu, 5 Sn, 5 Zn, 5 Pb.
Cast: 25,000-38,000 TS; 13,500-22,400 YS; 7-25 El; 65-80 Brin. (Properties may vary with method of casting).
For pump casings, water pump impellers, hose couplings
BS 1400 LG2-C; SAE 40, AMS 4855 B.

HOLFOS LG3.
M-169; 86 Cu, 7 Sn, 5 Zn, 2 Pb.
Cast 31,000-45,000 TS; 13,500-25,000 YS; 5-15 El, 70-85 Brin. (Properties vary with method of casting).
For valves, hydraulic systems, super heated steam components.
BS 1400 LG3-C; BS 1024.

HOLFOS LG4.
M-169; 87 Cu, 7 Sn, 3 Zn, 3 Pb.
Cast: 36,000-43,000 TS; 18,000-22,400 YS, 5-20 El; 65-75 Brin. (Properties vary with method of casting).
For hydraulic pressure control equipment, petrol pump meters, valve bodies, compressor parts.
BS 1400 LG4-C.

HOLFOS LG773.
M-169; 83 Cu, 7 Sn, 3 Zn, 7 Pb.
Cast: 31,000-54,000 TS; 14,500-22,400 YS; 12-18 El; 75-90 Brin. (Properties vary with method of casting).
For shafts, bearings, bushings, sliding surfaces, marine equipment.
SAE 660; ASTM B144-52-3B.

HOLFOS LPB1.
M-169; 88.2 Cu, 7.5 Sn, 4 Pb, 0.03 min P.
Cast: 27,000-46,000 TS; 11,200-27,000 YS; 2-30% El; 65-90 Brin. (Properties vary with method of casting).
Free machining bronze for bushings, valves, steam pressure fittings.
BS 1400 LPB1-C; BS 1061.

HOLFOS PB1.
M-169; 89.5 Cu, 10 Sn, 0.5 min P.
Cast: 34,000-66,000 TS; 18,000-45,000 YS; 2-20 El; 70-120 Brin. (Properties vary with method of casting).
Good bearing properties.
For shafts, guide wheels, blade wheels for pumps and water turbines.
BS 1400 PB1-C; BS 1059; BS 2B8.

HOLFOS PB2
M-169, 88.35 Cu, 11.5 Sn, 0.15 min P
Cast 36,000-54,000 TS; 20,000-47,000 YS; 6-10 El; 85-130 Brin (Properties vary with method of casting).
Good wear and abrasion resistance.
For bearings, feed nuts operating under load, coupling blocks, worm wheels.
BS 1400 PB2-C; BS 421; SAE 65.

HOLFOS PB3.
M-169, 90.2 Cu, 9.5 Sn, 0.3 P.
Cast: 34,000-50,000 TS; 20,000-36,000 YS, 5-20 El, 80-110 Brin (Properties vary with method of casting)
For pressure vessels, pump bodies, casings, impellers, piston shafts.
BS 1400 PB3 C; ASTM B139-66 Alloy 524 (Chem)

HOLFOS W W
M-169; 88.3 Cu, 11.5 Sn, 0.2 P
Sand cast: 36,000 TS, 20,000 YS; 10 El; 85 Brin.
Good wear properties
For gears, shafts, splined couplings.
BS 1400 PB2-C, BS 421; SAE 65

HOLLO
M-344, C, bal Fe
For rock drills, water hardening.

HOLLOBAR
M-341, 1.0 C, 1.2 Cr, 0.3 Mo, bal Fe.
For tools; water hardened

HOLLOBAR
M-822, 1.05 C, 0.38 Mn, 1.46 Cr, 0.28 Si, bal Fe
For cold work dies, oil hardened.

HOLLOW BAR
M-80, C, Cr, bal Fe
For dies, punches; oil hardening.

HOLLOW BLUE BAND.
M-844, 0.10 max C, 25 Cr, 12 Ni, bal Fe
For welding electrodes for stainless steels, stainless; coated.

HOLLOW DRILL.
M-289; 1.2 C, bal Fe.
For hollow drills, water hardened.

HOLLOW DRILL.
M-783; 1 0 1 1 Cr, 0.35 Mn, C, 0.30 Si, bal Fe.
For rock drills, water hardened.

HOLLUP GRADE 1.
M-844; 0.06 max C, bal Fe.
Cast 45,000 TS, 13 El
For welding electrodes for low carbon steel, coated.

HOLLUP GRADE 3.
M-844; 0.10-0.15 C, bal Fe.
Cast: 60,000 TS; 12 El.
For welding electrodes for boiler flues and fire boxes, coated.

HOLLUP GRADE 3R.
M-844; 0.10-0.15 C, bal Fe.
Cast: 60,000 TS; 12 El.
For welding electrodes for boiler tubes; special coating.

HOLLUP GRADE 5.
M-844; 0.18-0.25 C, bal Fe.
Cast: 70,000 TS.
For welding electrodes for building up bearing surfaces; coated, wear resistant.

HOLLUP GRADE 6.
M-844; C, Ni, bal Fe.
For welding electrodes; coated, shock resistant.

HOLLUP GRADE 7.
M-844, 0.85-1.10 C, bal Fe.
For welding electrodes for high carbon steel parts; coated

HOLLUP GRADE 9.
M-844; 0.75-0.95 C, 12-14 Mn, 3-4 Ni, bal Fe
190-500 Brin.
For welding electrodes for high manganese steels; coated.

HOLLUP GRADE 10.
M-844, 0.06 max C, bal Fe
Cast: 45,000 TS; 13 El.
For welding electrodes; coated

HOLLUP GRADE 10X
M-844, 0.06 max C, bal Fe
For welding electrodes, coated, ductile.

HOLLUP GRADE 11
M-844; 0.06 max C, bal Fe.
For welding rod for wrought iron and steel, Cu coated

HOLLUP GRADE 15
M-844, 0.08-0.10 C, bal Fe
Cast: 45,000 TS, 13 El
For welding electrodes, coated

HOLLUP GRADE 20
M-844; Cu alloy
Cast: 40,000 TS
For coated bronze welding rod for copper alloys

HOLLUP GRADE 20B
M-844, Cu alloy
Cast: 40,000 TS
For coated bronze welding rod, for light gauge sheets

HOLLUP GRADE NO 22
M-833; C, bal Fe
For welding electrodes.

HOLLUP GRADE NO 30.
M-844; 0.10-0.15 C, bal Fe
Cast: 60,000 TS, 12 El
For welding electrodes for flues, boilers and fire boxes, coated

HOLLUP GRADE NO 30A
M-844; 0.10-0.15 C, bal Fe
For coated welding electrodes; for automatic welding at high speeds

HOLLUP GR 30-S
M-275, 0.10-0.15 C, bal Fe
Welded: 50,000 TS, 8 El.
For welding electrodes, coated

HOLLUP GR NO 30SB.
M-844, 0.10-0.15 C, bal Fe
Welded: 55,000 TS, 10 RA
For welding electrodes, coated

HOLLUP GR NO. 30-X
M-844; 0.10-0.15 C, bal Fe.
For welding electrode; coated.

HOLLUP GR. NO. 30XB.
M-844; 0.10-0.15 C, bal Fe.
For welding electrodes; coated.

HOLLUP GR. 30XL.
M-884; C, bal Fe.
Welded: 60,000 TS; 12 El.
For welding rods; coated.

HOLLUP GR. NO. 33
M-844, 0.08-0.10 C, bal Fe.
For welding electrodes; copper coated.

HOLLUP GR NO. 50.
M-844; 0.18-0.25 C, bal Fe.
Welded: 70,000 TS.
For welding electrodes; coated.

HOLLUP GR NO. 50A.
M-844; 0.18-0.25 C, bal Fe.
For welding electrodes, coated

HOLLUP GR. NO 55
M-844; 0.2 C, bal Fe.
For welding rod, for pipe and pressure weld

HOLLUP GRADE NO 70
M-844, 0.85-1.10 C, bal Fe.
For welding electrodes; coated.

HOLLUP GR NO 70A
M-844, 0.85-1.1 C, bal Fe.
For welding electrodes, coated.

HOLLUP GRADE NO 90
M-844, 0.75-0.95 C, 12-14 Mn, 3-4 Ni, bal Fe.
For welding electrodes, for high Mn steel.

HOLLUP GR NO 120S
M-844, 0.1 C, 18 Cr, 8 Ni, bal Fe
For welding rod, stainless

HOLLUP GR NO 150.
M-844, 0.08-0.10 C, bal Fe.
Welded: 45,000 TS, 13 El
For welding electrodes, coated.

HOLLUP GRADE NO 170E.
M-844, C, Cr, V, bal Fe.
For coated welding electrodes; shock resistant

HOLLUP GRADE NO 250
M-844, C, 25 Cr, 12 Ni, bal Fe
For welding electrodes, for stainless clad steel

HOLLUP NO 1217
M-844, Al alloy
For coated Al welding rod

HOLLUP NO 2320
M-844, 0.10 C, 3.5 Ni, bal Fe
90,000 TS: 27 El
For coated welding electrodes for Ni steels; shock resistant.

HOLLUP NO 2512
M-844, 0.2 C, 5 Ni, bal Fe
Cast: 100,000 TS, 25 El.
For coated welding electrodes for Ni steels, tough

HOLLUP NO 6723
M-844, 23 min Cu, 3.5 max Fe, bal Ni.
50,000 TS
For Monel metal welding rod; corrosion resistant.

HOLLUP GRADE CI-3
M-844, C, bal Fe.
For welding electrodes for cast iron; coated.

HOLLUP GRADE CI-8.
M-844; C, bal Fe.
For welding electrodes for cast iron; coated.

HOLLUP GRADE CI-9.
M-844, C, Ni, Cu, bal Fe.
For welding electrodes for cast iron; coated.

HOLLUP GRADE CI-10.
M-844; C, bal Fe.
435 Brin.
For welding electrodes for hard surfacing cast iron; coated.

HOLLUP GR. YOLOY.
M-844; 0.15 C, 0.5 Cu, bal Fe.
For welding electrodes; coated.

HOLLUP H.S.V.
M-844; 0.2 C, 1 Ni, 0.6 Cr, 0.15 V, bal Fe.
For coated welding electrodes.

HOLLUP I.H.S.
M-844; C, alloy, bal Fe.
For coated welding electrodes.

HOLLUP MCM.
M-844; 0.2 C, 1.2 Cr, 0.2 Mo, bal Fe.
Cast: 85,000 TS; 27 El.
For coated welding electrodes; for aircraft tubing.

HOLLUP N.C.
M-844; C, bal Fe.
For coated welding electrodes.

HOLLUP PHOS-COPPER.
M-844; 7-9 P, bal Cu.
For P-Cu brazing rod for copper alloys; self-fluxing.

HOLLUP R.D.S.
M-844; 0.2 C, bal Fe.
For coated welding electrodes.

HOLLUP RED BAND.
M-844; 0.1 C, 18 Cr, 8 Ni, bal Fe.
Cast: 90,000 TS; 30 El.
For stainless steel welding electrodes; stainless.

HOLLUP YELLOW BAND.
M-844, 0.10 C, 4-6 Cr, 0.5 Mo, bal Fe.
Cast: 75,000 TS; 35 El.
For welding electrodes for 5 Cr steel.

HOLTO 1948
M-1546; 0.28 C, 1.5 Cr, 0.6 Mo, 5.0 W, 0.15 V, 5.0 Co, bal Fe.
Heat treated: 128,000-270,000 TS.
For die casting dies, brass forging dies.
Hot work tool steel, deep hardening.

HOLTO A.C.M.
M-1546; 0.60 C, 1.6 Ni, 0.8 Cr, 0.30 Mo, 0.10 V, bal Fe.
Heat treated: 150,000-220,000 TS; 130,000-200,000 YS; 12-20 El; 40-58 RA; 150-400 Brin.
For hot work tools, punches, hot shears, upsetters, caulking tools.
Hot work steel, oil hardening, shock resistant.

HOLTO A.F.L.M.
M-1546; 0.60 C, 2.5 Ni, 0.9 Cr, 0.35 Mo, 0.15 V, bal Fe.
For hot work tools, punches, hot shears, upsetters.
Hot work steel, oil hardening, tough.

HOLTO C.R.V.
M-1546; 1.5 C, 1.8 Cr, 0.25 V, bal Fe.
For gauges, taps, threading dies, cold cutting and stamping tools, plastic molds.
Cold working tool steel, oil hardening.

HOLTO D.R.B.
M-1546; 1.0 C, 1.25 Cr, bal Fe.
Oil hardened: 288,000 TS; 278,000 YS; 540 Brin.
For rollers, bearings, taps, punches, cutters, pivot pins, stamping dies, plug gages.
Cold working steel, oil hardening, deep hardening, medium toughness.

HOLTO N.B.2.
M-1546; 0.90 C, 1.3 Mn, 0.5 Cr, bal Fe.
Annealed: 85,000 TS; 60,000 YS; 26 El; 185 Brin.
Oil Hardened: 280,000 TS; 272,000 El; 535 Brin.
For dies, punches, gauges, cutters, cold headers, stamping dies, broaches.
Non-deforming tool steel, oil hardening, shock resistant, tough.

HOLTO R.B.L.
M-1546; 1.4 C, 0.70 Cr, bal Fe.
For cutters, bearings, cold heading dies, hand taps, bearings, reamers, boring tools.
Cold working steel. Oil hardening.

HOLTO R.B.O.
M-1546; 0.95 C, 0.75 Cr, bal Fe.
Annealed: 85,000 TS; 46,000 YS; 175 Brin.
Hardened: 260,000 TS; 240,000 YS; 525 Brin.
For bearings, rollers, bushings, gauges, mandrels, punches, cold heading tools.
Cold work tool steel, oil or water harden, wear resistant.

HOLTO SPECIAL B.M.
M-1546; 0.70 C, 1.40 Cr, 0.70 Mo, 0.15 V, bal Fe.
For punches, shears, die casting dies.
Hot and cold work tool steel, oil hardening, shock resisting

HOLTO SPECIAL D.
M-1546; 0.28 C, 9.5 W, 3.1 Cr, 0.3 V, bal Fe.
Heat treated: 142,000-350,000 TS; 120,000-180,000 YS; 6-12 El
For drawing dies, extrusion rams and dies, valve heads, stamping dies
Hot work tool steel High hot hardness above 650°C.

HOLTO SPECIAL D.A
M-1546; 0.40 C, 3.25 Cr, 2.5 W, 0.4 V, bal Fe.
Hardened: 250,000 TS; 200,000 YS; 8 El; 12 RA.
For press dies, upsetters, rivet sets, forging and punching dies, dummy blocks
Hot work steel up to 600°C applications.

HOLTO SPECIAL D.C.
M-1546, 0.21 C, 8.0 W, 2.6 Cr, 2.0 Co, 1.0 Mo, 0.4 V, bal Fe
Heat treated: 135,000-340,000 TS, 110,000-214,000 YS; 10-14 El
For wire drawing dies, hot upsetters, stamping dies, forging dies
Hot work tool steel. High hot hardness.

HOLTO SPECIAL E.X
M-1546; 0.45 C, 4.60 Ni, 1.75 W, 0.40 Cr, 0.30 Mo, bal Fe.
For forging and riveting dies, shears, punches.
Hot and cold work steel Shock resistant. Oil hardening.

HOLTO SPECIAL F.A.41.
M-1546; 0.45 C, 4.75 Cr, 3.75 W, 0.45 V, bal Fe.
Air Hardened: 270,000 TS; 208,000 YS; 5 El; 9 RA.
For forging dies and inserts, extrusion dies and rams, dummy blocks.
Hot work steel, oil or air hardening, non-deforming, deep hardening.

HOLTO SPECIAL F.A.48.
M-1546; 0.42 C, 4.75 W, 2.0 Co, 4.75 Cr, 0.45 V, bal Fe.
Heat treated: 170,000-300,000 TS; 156,000-256,000 YS; 4-8 El.
For thread rolling dies, spinning tools, dies.
Hot work steel, oil hardening. Resists cyclic heating.

HOLTO SPECIAL F.A.82.
M-1546; 0.38 C, 5.0 Cr, 1.3 Mo, 1.0 Si, 0.5 V, bal Fe.
Annealed: 90,000 TS; 46,000 YS; 18 El.
Air Hardened: 217,000 TS; 184,000 YS; 13 El; 40 RA; C 53-55 Rock.
For die casting dies, forging dies and inserts, stamping dies, extrusion dies, hot punches.
Hot work steel, oil hardening, non-deforming, shock resistant.

HOLTO SPECIAL M.
M-1546; 0.42 C, 1.6 Si, 0.8 Cr, 0.8 Mo, bal Fe.
Water Hardened: 190,000-300,000 TS; 6-16 El; 15-50 RA; C 40-55 Rock.
For cold headers, punches, chisels, rivet sets, upsetters, pneumatic tools.
Cold working steel. Shock resistant. Oil hardening

HOLTO SPECIAL M.D.
M-1546; 0.55 C, 1.90 W, 1.10 Cr, 0.9 Si, bal Fe.
For chisels, rivet sets, upsetters, pneumatic tools.
Cold work steel, shock resistant.

HOLTO SPECIAL M.O.V.
M-1546, 0.45 C, 1.9 Cr, 0.6 Mo, 0.35 V, bal Fe.
Annealed: 100,000 TS; 48,000 YP; 22 El, 197 Brin
Hardened: 290,000 TS, 245,000 YP, 10 El; 580 Brin.
For hot work tools, hot upsetters, rivet sets, punches, forging dies, inserts, molds for plastics.
Hot work steel, oil hardening, shock resistant.

HOLTO SPECIAL M.O.V.2.
M-1546, 0.37 C, 3.0 W, 2.5 Cr, 0.70 Mo, 0.25 V, bal Fe.
For wire cutters, forging die inserts, die casting dies, hot heading bolts
Hot work steel, oil hardening, wear resistant

HOLTO SPECIAL P.
M-1546; 0.42 C, 4.60 Ni, 1.15 Mo, 0.30 Cr, bal Fe.
For hot work tools, punches, upsetters.
Hot work steel, oil hardening.

HOLTO SPECIAL R.
M-1546, 1.0 C, 1.65 Cr, 0.15 V, bal Fe.
Hardened: 280,000 TS; 255,000 YS; 555 Brin.
Annealed 90,000 TS; 50,000 YS; 28 El; 185 Brin.
For rolling mill cylinders, cold headers, gauges, bearings, bushings, drawing dies, punches, drills.
Cold work tools, oil hardening, deep hardening.

HOLTO SPECIAL R.K.
M-1546; 1.4 C, 1.45 Cr, 0.30 Mo, 0.15 V, bal Fe.
For gauges, headers, drawing dies, punches.
Cold work tool steel, oil hardening

HOLTO SPECIAL R.U.
M-1546; 0.95 C, 0.90 Cr, 0.45 Mo, bal Fe.
For bearings, bushings, gauges, rollers, cold header dies.
Cold work steel, oil hardening.

HOLTO SPECIAL S.C.1.
M-1546; 1.2 C, 1.25 W, bal Fe.
Heat treated. 280,000 TS; 270,000 YS; 540 Brin.
Annealed: 85,000 TS, 22 El; 45 RA; 185 Brin.
For fast finishing cutters, drills, taps, cold cutting tools, augers, paper knives.
Cold work steel, oil or water hardening, wear resistant.

HOLTO S.P.2.
M-1546; 0.28 C, 5.0 Mo, 0.25 V, 6.0 Cr, 5.0 W, 0.6 Co, bal Fe.
Hot rolled: 114,000 TS.
Heat treated: Rockwell C 47-56.
For die casting dies, extrusion rams and liners, brass forging dies.
Hot work steel. High hot hardness and resistance to thermal shock.

HOLTO SPECIAL-U.
M-1546; 0.9 C, 2.0 Mn, bal Fe.
Hardened: C 64-65 Rock.
For stamping dies, gauges, punches, taps, cold headers, broaches, trimming dies.
Non-deforming, oil hardening, shock resistant, Type 02 cold work tool steel.

HOLTO V.D.L.D.M.
M-1546; 0.35 C, 4.0 Ni, 1.7 Cr, 0.5 Mo, bal Fe.
For hot work tools, punches, hot shears, upsetters.
Hot work steel, oil hardening, tough, shock resistant.

HOMBERGS ALLOY.
33.3 Pb, 33.3 Sn, 33.3 Bi.
For sprinkler plugs, fusible metal; M.P. 251°F.

HONDA NEW.
Japan, 6.7 Ti, 3.7 Al, 18 Ni, 27 Co, 45 Fe.
For permanent magnets.

HONSEL HO 3
M-1364; 1.0-1.5 Mn, 0.3 max Cr, bal Al.
Soft 16,000 TS, 6000 YS; 40 El.
Hard: 29,000 TS; 27,000 YS; 10 El.
For cooking utensils, heat exchangers, tanks, furniture; good forming and welding properties.

HONSEL HO S.
M-1364; 1.5-3.0 Mg, 0.5-1.5 Mn, 0.3 Cr, bal Al.
Soft: 26,000 TS; 10,000 YS; 20 El; 45 Brin.
Hard: 41,000 TS; 36,000 YS; 5 El; 77 Brin.
For roofing, hydraulic tubing, architectural trim; good forming and welding properties.

HOOKER BRASS
Eng; 61 Cu, 37 Zn, 2 Pb
For hot forgings, brass parts; free-cutting.

HOPKINSON ALLOY
75 Fe, 24.5 Ni, traces Si
160,000 TS, 88,000 YS; 45 El, 68 RA.
For corrosion and heat resistant parts; Sc.-21.

HORBACH HH80
M-1377, 0.12 C, 13 Cr, 2.2 Si, bal Fe.
Annealed. 75,000 TS; 40,000 YS; 35 El; 70 RA; 155 Brin
For valves, cutlery, pump bodies, bolts, Type 410; corrosion resistant

HORBACH HH100.
M-1377, 0.12 max C, 1 Al, 18 Cr, bal Fe.
For oil refinery equipment; heat and creep resistant.

HORBACH HH110A.
M-1377; 0.15 C, 19.5 Cr, 9.5 Ni, bal Fe.
Annealed: 80,000 TS; 35,000 YS; 55 El; 75 RA; 160 Brin.
For chemical plant equipment, tanks, mixers; Type 302; stainless, austenitic.

HORBACH HH120.
M-1377; 0.12 max C, 1.5 Al, 24 Cr, bal Fe.
For oil refinery equipment; heat and creep resistant.

HORBACH HH120A.
M-1377; 0.15 C, 24 Cr, 19 Ni, bal Fe.
Annealed: 100,000 TS, 45,000 YS; 50 El; 65 RA; 185 Brin.
For valves, pumps, furnace parts, turbine and jet parts; Type 310; stainless, austenitic.

HORBACH HN1.
M-1377; 0.15 max C, 18 Cr, 8 Ni, bal Fe.
Annealed: 80,000 TS; 35,000 YS; 55 El; 75 RA; 150 Brin.
For chemical plant equipment, tanks, mixers, agitators; Type 302; stainless, austenitic.

HORBACH HN1 EXTRA.
M-1377; 0.12 max C, 18 Cr, 9.5 Ni, Ti = 4 × C, bal Fe.
Annealed: 85,000 TS; 35,000 YS; 55 El; 65 RA; 150 Brin.
For welded chemical plant equipment, tanks, mixers; Type 321; stainless, austenitic.

HORBACH HN1 SUPRA.
M-1377; 0.07 max C, 18 Cr, 9.5 Ni, bal Fe.
Annealed: 85,000 TS; 35,000 YS; 60 El; 70 RA; 150 Brin.
For chemical plant equipment, tanks, vessels; Type 304; stainless, austenitic.

HORBACH HN2 EXTRA.
M-1377; 0.12 max C, 18 Cr, 2 Mo, 10.5 Ni, Ti = 4 × C, bal Fe.
Annealed: 85,000 TS; 35,000 YS; 50 El; 65 RA; 160 Brin.
For chemical plant equipment, welded structures; Type 316 Ti; stainless, austenitic.

HORBACH HN2 SUPRA.
M-1377; 0.07 max C, 18 Cr, 10.5 Ni, 2 Mo, bal Fe.
Annealed: 85,000 TS; 35,000 YS; 50 El; 65 RA; 160 Brin.
For acid resistant chemical plant equipment; Type 316; stainless, austenitic.

HORBACH HNH.
M-1377; 0.4 C, 13 Cr, 0.4 Si, bal Fe.
Annealed: 95,000 TS; 50,000 YS; 25 El; 55 RA; 196 Brin.
For valves, cutlery, surgical and dental instruments; Type 420; stainless.

HORBACH HNM.
M-1377; 0.2 C, 0.4 Si, 13 Cr, bal Fe.
Annealed: 95,000 TS; 50,000 YS; 25 El; 55 RA; 196 Brin.
For valves, cutlery, surgical instruments; Type 420; stainless.

HORBACH HNW.
M-1377; 0.12 max C, 0.4 Si, 13 Cr, bal Fe.
Annealed: 75,000 TS; 40,000 YS; 35 El; 70 RA; 155 Brin.
For turbine blades, cutlery, valves; Type 410; stainless.

HOSKINS 717 see CHROMEL 1A.

HOSKINS ALLOY 750.
M-65; 15.0 Cr, 4.0 Al, 0.5 Si, 0.1 C, bal Fe.
Elec resistance: 750 ohms/circular mil ft.
Resistance wire for furnaces, kilns, other heating devices; requires adequate support at high temperatures. Useful to 2050°F.

HOSKINS 815.
M-65; 0.1 C, 0.5 Si, 4.6 Al, 22.5 Cr, bal Fe.
Hot rolled: 143,000 TS; 12 El; 234 Brin.
Annealed: 108,000 TS; 27 El; 190 Brin.
For resistances, heating elements, rheostats; heat resistant to 2150°F.

HOSKINS 827.
M-65; 20 Cr, 8 Fe, 2 Si, bal Ni.
For thermoelements.
Heat and oxidation resistant.

HOSKINS 831.
M-65; 15 Cr, 7.5 Fe, bal Ni.
Drawn: 100,000 TS.
For spark plugs.
Electrode alloy, oxidation resistant.

HOSKINS 875.
M-65; 22.5 Cr, 5.5 Al, 0.5 Si, 0.1 C, bal Fe.
Hot rolled: 143,000 TS; 12 El; 185 Brin.
Annealed: 108,000 TS; 27 El; 190 Brin.
For electrical resistances, heating elements; high heat resistant to 2350°F.

HOSKINS CUNIFE.
M-65; 60 Cu, 20 Ni, 20 Fe.
Ductile permanent magnet alloy.
Speedometers, instruments, electronic equipment, and control systems.

HOT DIE.
M-350; C, W, bal Fe.
For tools; oil hardened.

HOT DIE.
M-435; 0.3 C, 11 W, 3 Cr, 0.5 V, bal Fe.
For hot die tools, punches; hot die steel.

HOT DIE 593.
M-1; 0.38 C, 0.25 Mo, 5 W, 5 Cr, 0.2 V, 0.25 Mn, 0.45 Co, 0.9 Si, bal Fe.
Heat treated: 270,000 TS; 208,000 YS; 5 El; 9 RA.
At 900°F: 217,000 TS; 172,000 YS; 10 El; 31 RA.
Uses extrusion dies, hot upset punches, insert forging dies, dummy blocks.
Type H14 Hot work steel.

HOT DIE "C".
M-140; 0.30 C, 2.5 Cr, 12 W, 3.6 Co, 4 Cr, bal Fe.
For hot punches, forming and extrusion dies; hot work steel, oil hardened.

HOT-DIE (Chrome).
M-39, M-73; 3.5-4.0 Cr, 0.8-0.9 C, bal Fe.
For dies for hot metal, tools; shock and wear resistant.

HOT-DIE (Tungsten).
M-39, M-73; 2-3 Cr, 0.3-0.45 C, 1.0 V, 10-14 W, bal Fe.
For dies for hot metal, tools; shock and wear resistant.

HOTFORM NO. 1.
M-115, M-342; 0.32 C, 1.5 Mo, 0.9 Si, 1.0 W, 4.75 Cr, 0.25 Mn, bal Fe.
For tools and dies for Al die castings; hot work steel

HOTFORM NO 2.
M-115, 0.33 C, 0.9 Si, 4.7 Cr, 1.3 Mo, 0.5 V, bal Fe
For punches, upsetters, hot work tools and dies, extrusion press; Type H11; hot work steel.

HOTFORM NO 3.
M-115; 0.52 C, 0.9 Si, 1.4 Mo, 4.75 Cr, bal Fe
For punches, upsetters, hot dies and tools; Type H12; air hardened.

HOT FORM DRILL ROD
M-115; 0.35 C, 1 Si, 1.25 W, 5 Cr, 0.5 V, 1.45 Mo, bal Fe
For die casting die tools, high temperature fasteners; hot work steel, oil hardened.

HOTFORM DRILL ROD.
M-342; 0.35 C, 0.9 Si, 5 Cr, 1.4 Mo, 1.4 W, 0.5 V, bal Fe.
For hot punches, piercers; hot work steel.

HOTFORM V.
M-115; 0.37-0.43 C, 1.0 Si, 5.0-5.5 Cr, 1.2 Mo, 1.1 V, bal Fe
For Al die casting dies, shear blades, forging dies; hot work steel, oil hardened.

HOTPRESS.
M-115; 0.35 C, 2 Cr, 9.5 W, 0.5 V, bal Fe.
For hot work dies, upsetter dies; tough and heat resistant; hot work steel.

HOTSPUR.
M-472; 0.20 C, 12-14 Cr, 7-25 Ni, bal Fe.
Cast: 89,600 TS.
For furnace parts and equipment; heat and oxidation resistant.

HOTSPUR-F.
M-472; 0.20 max C, 22-24 Cr, 12-15 Ni, bal Fe.
Annealed: 100,000 TS; 50,000 YS; 55 El; 160 Brin.
For furnace parts, oil burners and heaters, chemical plant equipment, skid rails.
Type 309 stainless steel, austenitic, non-hardenable.

HOTSPURO.
M-472; 0.25 max C, 24-26 Cr, 19-22 Ni, bal Fe.
Annealed: 95,000 TS; 45,000 YS; 50 El; 65 RA; 180 Brin.
At 1200°F: 57,000 TS; 22,000 YS; 32 El; 45 RA.
For furnace part and equipment, valves, pumps; Type 310; austenitic, heat resistant.

HOT STAMPING ALLOY DIE.
M-261; C, alloy, bal Fe.
For hot stamping dies, tools; oil hardened.

HOT STAMPING ALLOY DIE.
M-389; 0.5 C, 3 Cr, bal Fe.
For hot stamping dies; hot work steel.

HOT WORK 8.
M-24; 0.6 C, 8.5 Mo, 1.5 V, 3.2 Cr, bal Fe.
For hot work tools and dies, punches, blanking dies; hot work steel, wear resistant.

HOT WORK NO. 22.
M-341; 0.4 C, 3 Cr, 9 W, 0.2 V, bal Fe.
For tools, dies; hot work steel.

HOT WORK NO. 23.
M-341, 0.45 C, 3 Cr, 14 W, 0.3 V, bal Fe.
For tools, cutters, taps, gauges, reamers; high speed steel.

HOUGHTON'S SHAVING PACKING.
Eng., 5.97 Sn, trace Cu, 94.02 Pb.
For piston rod packing for steam engines.

HOVER 91C.
M-1306, 0.55 C, 1 Cr, 0.18 V, 1.85 W, bal Fe.
For cold work tools, hammers, upsetters; oil or water hardened

HOVER 91KA.
M-1306; 0.45 C, 1 Cr, 0.2 V, bal Fe.
For gears, pinions, shafts, bolts, crankshafts, oil hardened, shock resistant

HOVER 123
M-1306; 1.45 C, 1.4 Cr, bal Fe.
For bearings, liners, races, sleeves; water hardened

HOVER 151.
M-1306, 0.61 C, 1.18 Cr, 0.1 V, bal Fe
For springs, shafts, crankshafts, punches, crimpers; oil or water hardened, tough.

HOVER 210
M-1306; 1.25 C, 1.15 Si, 0.7 Mn, 1.2 Cr, bal Fe.
For dies, punches, shock resistant cutters; oil hardened, tough.

HOVER 350.
M-1306; 1.0 C, 0.1 V, 0.25 Mn, bal Fe.
For cutters, tools, dies, taps, drills; Type W2; water hardened.

HOVER 401.
M-1306; 1.05 C, 0.9 Mn, 1.0 Cr, 1.15 W, bal Fe.
For fast finishing cutters, reamers; water hardened.

HOVER 550.
M-1306; 0.7 C, 1.7 Si, 0.7 Mn, bal Fe.
For punches, upsetters, riveters, springs; oil hardened, tough.

HOVER 702.
M-1306; 0.28 C, Ni, Cr, Mo, V, bal Fe.
For gears, bolts, machine tool parts; oil hardened, shock resistant.

HOVER A18A.
M-1306; 0.12 C, 18 Cr, 8 Ni, bal Fe.
Annealed: 75,000 TS; 35,000 YS; 50 El; 65 RA; 150 Brin.
For chemical plant equipment; Type 302; stainless, austenitic.

HOVER A18N.
M-1306; 0.12 max C, 18 Cr, 9.5 Ni, Cb = 8 × C, bal Fe.
Annealed: 90,000 TS; 35,000 YS; 50 El; 65 RA; 160 Brin.
Cold drawn: 100,000 TS; 65,000 YS; 40 El; 60 RA; 212 Brin.
For welded structures, chemical plant equipment; Type 347; stainless, austenitic.

HOVER A18T.
M-1306; 0.12 max C, 18 Cr, 9.5 Ni, Ti = 4 × C, bal Fe.
Annealed: 85,000 TS; 35,000 YS, 55 El; 65 RA; 150 Brin.
Cold drawn: 95,000 TS; 60,000 YS; 40 El; 60 RA; 185 Brin
For welded structures, chemical plant equipment; Type 321; stainless, austenitic.

HOVER A18Z.
M-1306; 0.07 max C, 18 Cr, 9.5 Ni, bal Fe.
Annealed. 85,000 TS, 35,000 YS; 60 El; 70 RA· 150 Brin.
Cold drawn. 180,000 TS; 125,000 YS; 10 El: 330 Brin For welded structures, chemical plant equipment; Type 304; stainless, austenitic.

HOVER A18ZS
M-1306, 0.1 max C, 18 Cr, 8.5 Ni, bal Fe
Annealed: 75,000 TS; 35,000 YS, 55 El; 75 RA; 155 Brin.
For chemical plant equipment, welded tanks and vessels; Type 304; stainless, austenitic.

HOVER A20T
M-1306, 0.12 max C, 18 Cr, 10.5 Ni, 2 Mo, Ti = 4 × C, bal Fe.
Annealed 85,000 TS, 35,000 YS, 50 El; 75 RA; 150 Brin
Cold drawn 150,000 TS, 130,000 YS; 6 El; 300 Brin
For acid resistant equipment, welded structures; Type 316 Ti, stainless, austenitic

HOVER A20Z.
M-1306; 0.07 C, 18 Cr, 10.5 Ni, 2 Mo, bal Fe.
Annealed. 85,000 TS, 35,000 YS, 50 El; 75 RA; 150 Brin.
Cold drawn: 150,000 TS; 130,000 YS, 6 El, 300 Brin.
For acid resistant equipment; Type 316; stainless; austenitic.

HOVER A20ZS.
M-1306, 0.1 max C, 18 Cr, 9.5 Ni, 2 Mo, 2.2 Si, bal Fe.
Annealed: 85,000 TS; 35,000 YS; 50 El; 75 RA; 150 Brin.
Cold drawn· 150,000 TS; 135,000 YS; 6 El; 300 Brin
For acid resistant equipment, chemical plant apparatus; Type 316; stainless, austenitic.

HOVER A21Z13.
M-1306; 0.07 max C, 17 Cr, 4.75 Mo, 13 Ni, bal Fe.
Annealed: 90,000 TS; 40,000 YS; 45 El; 70 RA; 160 Brin.
For acid resistant equipment, chemical plant apparatus; Type 317; stainless, austenitic.

HOVER A21Z18.
M-1306; 0.12 max C, 18 Cr, 10.5 Ni, 2 Mo, Cb = 8 × C, bal Fe.
Annealed: 85,000 TS; 35,000 YS; 50 El; 75 RA; 150 Brin.
For welded acid resistant equipment; Type 316 Cb; stainless, austenitic.

HOVER C10.
M-1306; 0.58 C, 1.0 Cr, 0.09 V, bal Fe.
For springs, gears, crankshafts, bolts, studs; oil hardened, shock resistant.

HOVER D3.
M-1306; 1.42 C, W, V, bal Fe.
For bearings, bushings, cutters; oil hardened, wear resistant.

HOVER ES26.
M-1306; 0.15 C, 0.65 Cr, 0.50 Mn, 0.25 Si, bal Fe.
For gears, bolts, machine tool parts; case hardened.

HOVER EXTRA FS.
M-1306; 0.80 C, 0.10-0.40 Si, 0.50-0.70 Mn, bal Fe.
Heat treated: 188,000 TS; 143,000 YS; 12 El; 35 RA; 390 Brin.
For springs, tools, taps, drills, reamers; Type W1; water hardened.

HOVER EXTRA HART.
M-1306; 1.3 C, 0.25 max Si, 0.25 max Mn, bal Fe.
For blanking and forming dies, punches; Type W1; water hardened.

HOVER EXTRA MH.
M-1306; 1.1 C, 0.25 max Si, 0.25 max Mn, bal Fe.
Annealed: 110,000 TS; 57,000 YS; 19 El; 40 RA; 210 Brin.
For springs, cutters, drills, taps, broaches; Type W1; water hardened.

HOVER EXTRA SEHR ZAH.
M-1306; 0.70 C, 0.25 max Si, 0.25 max Mn, bal Fe.
Heat treated: 175,000 TS; 128,000 YS; 12 El; 37 RA; 355 Brin.
For springs, rails, hammers, punches, axes; Type W1; water hardened.

HOVER EXTRA ZAH.
M-1306; 0.85 C, 0.25 max Si, 0.25 max Mn, bal Fe.
Heat treated: 190,000 TS; 145,000 YS; 10 El; 30 RA; 400 Brin.
For springs, cutters, drills, taps, reamers; Type W1; water hardened.

HOVER EXTRA ZH.
M-1306; 1.0 C, 0.25 max Si, 0.25 max Mn, bal Fe.
Annealed: 100,000 TS; 53,000 YS; 21 El; 42 RA; 200 Brin.
For springs, cutters, drills, hobs, broaches; Type W1; water hardened.

HOVER F131.
M-1306; 0.42 C, 0.1 V, 1.75 Mn, 0.25 Si, bal Fe.
For punches, gears, machine tool parts; oil hardened, tough.

HOVER G3.
M-1306; 0.50 C, 1.0 Cr, 0.09 V, bal Fe.
For gears, springs, crankshafts; oil hardened, shock resistant.

HOVER G5.
M-1306; 0.40 C, Cr, Mn, Mo, bal Fe.
For gears, shafts, crankshafts; oil hardened, tough.

HOVER GHK6.
M-1306; 0.30 C, 0.35 V, 8.5 W, 2.65 Cr, bal Fe.
For extrusion rams and liners, punches, upsetters; oil hardened, hot work steel.

HOVER GHK243.
M-1306; 0.40 C, Cr, Mn, Mo, bal Fe.
For gears, bolts, machine tool parts; oil hardened, tough.

HOVER H10.
M-1306; 1.1 C, 0.25 max Si, 0.25 max Mn, bal Fe.
Annealed: 110,000 TS; 56,000 YS; 20 El; 40 RA; 210 Brin.
For springs, cutters, drills, taps, reamers; Type W1; water hardened.

HOVER H15.
M-1306; 0.15 C, 1.55 Cr, 1.55 Ni, bal Fe.
For gears, cams, camshafts; case hardening.

HOVER H20.
M-1306; 0.18 C, 2.0 Ni, 2.0 Cr, 0.50 Mn, bal Fe.
For gears, bolts, camshafts, cams; case hardened, tough.

HOVER H20.
M-1306, 1.0 C, 0.25 max Si, 0.25 max Mn, bal Fe.
For springs, tools, drills, taps, reamers; Type W1; water hardened.

HOVER H127.
M-1306; 1 C, 0.25 max Mn, 0.25 max Si, bal Fe.
Annealed: 100,000 TS; 53,000 YS; 21 El; 42 RA; 200 Brin.
For drills, taps, reamers, hobs, Type W1; water hardened.

HOVER H391
M-1306, 0.90 C, 0.80 Cr, 0.30 Mn, bal Fe.
For drills, punches, springs, taps, reamers; water hardened.

HOVER H680.
M-1306, 0.50 C, 0 85 Mn, 1 Cr, 0.1 V, bal Fe.
For gears, shafts, crankshafts; oil hardened, shock resistant.

HOVER H1000.
M-1306; 0.15 C, 2 Si, 19 5 Cr, 9.5 Ni, bal Fe.
Annealed. 85,000 TS; 40,000 YS; 50 El; 65 RA; 160 Brin.
For chemical and oil refinery equipment; Type 302; stainless, austenitic.

HOVER H1050-ON
M-1306, 0 12 max C, 18 Cr, 0.95 V, bal Fe
Annealed: 80,000 TS; 35,000 YS; 50 El, 65 RA; 160 Brin.
For chemical plant and oil refinery equipment; corrosion and heat resistant.

HOVER H1200.
M-1306; 0 15 C, 24 Cr, 19 Ni, bal Fe.
Annealed: 90,000 TS; 40,000 YS; 55 El; 70 RA, 165 Brin.
For heat treating boxes, furnace parts and equipment; heat resistant, austenitic.

HOVER HED16.
M-1306; 0.15 C, 0.25 Si, 0.37 Mn, bal Fe.
Annealed: 70,000 TS; 40,000 YS; 25 El; 60 RA; 145 Brin
For gears, bolts, machine tool parts; case hardened.

HOVER HK904.
M-1306; 0.30 C, 2.35 Cr, 0.6 V, 4.25 W, bal Fe.
For extrusion press dies, rams, liners; hot work steel, oil hardened.

HOVER HNRO 7.
M-1306; 0.15 max C, 8.5 Ni, 18 Cr, bal Fe.
Annealed: 80,000 TS; 35,000 YS; 55 El; 75 RA; 150 Brin.
For chemical plant equipment, tanks; Type 302; stainless, austenitic.

HOVER HNRO 8.
M-1306; 0.07 max C, 18 Cr, 9.5 Ni, bal Fe.
Annealed: 85,000 TS; 35,000 YS; 60 El; 70 RA; 150 Brin.
For chemical plant equipment, tanks, vessels; Type 304; stainless, austenitic.

HOVER HNRO 9.
M-1306; 0.07 max C, 18 Cr, 2 Mo, 10.5 Ni, bal Fe.
Annealed: 85,000 TS; 35,000 YS; 50 El; 65 RA; 160 Brin.
For acid resistant chemical plant equipment, tanks; Type 316; stainless, austenitic.

HOVER HNRO 11.
M-1306; 0.20 C, Cr, Mo, bal Fe.
For chemical plant equipment; stainless.

HOVER HNRO 12.
M-1306; 0.1 max C, 18 Cr, 9.5 Ni, 2 Mo, bal Fe
Annealed: 85,000 TS; 35,000 YS; 50 El; 65 RA; 160 Brin.
For acid resistant chemical plant equipment, tanks; Type 316; stainless, austenitic.

HOVER HNRO 14.
M-1306; 0.12 max C, 18 Cr, 9.5 Ni, Ti = 4 × C, bal Fe
Annealed: 85,000 TS; 35,000 YS; 55 El; 65 RA; 150 Brin.
For welded chemical plant equipment, tanks; Type 321; stainless, austenitic

HOVER HNRO 16
M-1306, 0.22 C, 17 Cr, 1.5 Ni, bal Fe.
Annealed: 125,000 TS, 90,000 YS; 20 El, 55 RA, 260 Brin.
For pumps, marine hardware, valves; Type 321, stainless.

HOVER HNRO 17
M-1306, 0.12 max C, 18 Cr, 2 Mo, 10.5 Ni, Ti = 4 × C, bal Fe
Annealed 85,000 TS, 35,000 YS; 50 El; 65 RA; 160 Brin.
For welded acid resistant chemical plant equipment, Type 316 Ti; stainless, austenitic.

HOVER HNRO 19.
M-1306, 0.35 C, 1.15 Mo, 16.5 Cr, bal Fe.
For oil refinery equipment; heat resistant.

HOVER HNRO 20
M-1306, 0.8 C, 17 Cr, bal Fe.
Heat treated: 280,000 TS; 270,000 YS; 3 El; 15 RA; 555 Brin
For bearings, surgical instruments, cutlery; corrosion resistant, wear resistant; Type 440B.

HOVER HNRO 24.
M-1306; 0.1 max C, 17 Cr, 1.8 Mo, Ti = 7 × C, bal Fe
Annealed 125,000 TS; 95,000 YS; 20 El; 55 RA; 260 Brin.
For welded structures, pump parts; corrosion resistant; Type 431 Ti.

HOVER HNRO 27.
M-1306; 0.12 max C, 18 Cr, 2 Mo, 10.5 Ni, Cb = 8 × C, bal Fe.
Annealed: 90,000 TS; 45,000 YS; 55 El; 65 RA; 160 Brin.
For welded chemical plant equipment, tanks, mixers; Type 347; stainless, austenitic.

HOVER HSE.
M-1306; 0.20 C, 1.25 Mn, 1.15 Cr, bal Fe.
For camshafts, cams, gears, bolts; case hardened.

HOVER HVU 2½.
M-1306; 0.22 C, 0.25 Si, 0.45 Mn, bal Fe.
Annealed. 75,000 TS; 42,000 YS; 20 El; 55 RA; 150 Brin.
For gears, bolts, machine tool parts; case hardened.

HOVER HVU 3½.
M-1306; 0.35 C, 0.25 Si, 0.55 Mn, bal Fe.
Hot rolled: 85,000 TS; 54,000 YS; 30 El; 53 RA; 185 Brin.
For gears, bolts, machine tool parts; water hardened.

HOVER HVU 4½.
M-1306; 0.45 C, 0.25 Si, 0.65 Mn, bal Fe.
Hot rolled: 98,000 TS; 60,000 YS; 24 El; 45 RA; 212 Brin.
For gears, bolts, machine tool parts; water hardened.

HOVER HVU 6
M-1306; 0.45 C, 0.25 Si, 0.65 Mn, bal Fe.
Hot rolled: 98,000 TS; 60,000 YS; 24 El; 45 RA; 212 Brin.
For gears, bolts, machine tool parts; water hardened.

HOVER HW.
M-1306; 0.53 C, 0.90 Si, 0.90 Mn, bal Fe.
For machine tool parts, punches; oil hardened

HOVER I-EBN.
M-1306; 0.15 C, 0.65 Cr, 0.5 Mn, bal Fe.
For gears, cams, camshafts, fasteners; case hardening steel.

HOVER I-EC.
M-1306; 0.15 C, 1.15 Cr, 0.25 Mo, bal Fe.
For gears, cams, camshafts, fasteners, case hardening steel.

HOVER I-ECN.
M-1306; 0.16 C, 1.15 Mn, 0.95 Cr, bal Fe.
For gears, cams, camshafts, fasteners; case hardening steel.

HOVER I-ED
M-1306, 0.20 C, 1.15 Cr, 0.25 Mo, bal Fe.
For gears, cams, camshafts, fasteners; case hardening steel

HOVER I-EDN
M-1306, 0.20 C, 1.25 Mn, 1.15 Cr, bal Fe.
For gears, cams, camshafts; case hardening steel.

HOVER II-VA.
M-1306; 0.25 C, 0.65 Mn, 1 Cr, bal Fe.
For gears, pinions, bolts, fasteners, water hardened.

HOVER II-VB
M-1306; 0.33 C, 0.65 Mn, 1 Cr, bal Fe
For gears, shafts, crankshafts, water hardened.

HOVER II-VC.
M-1306, 0.33 C, 0.65 Mn, 1 Cr, bal Fe.
For gears, shafts, crankshafts; water hardened.

HOVER II-VD.
M-1306; 0.42 C, 1 Cr, 0.2 Mo, bal Fe.
For gears, shafts, crankshafts; oil hardened, shock resistant.

HOVER II-VE.
M-1306; 0.50 C, 1.0 Cr, bal Fe.
For gears, shafts, crankshafts, bolts; oil or water hardened.

HOVER ILO-35H.
M-1306; 0.86 C, 2.8 Co, 4.3 Cr, 0.85 Mo, 2.1 V, 12 W, bal Fe.
For lathe and planer tools, reamers, drills, taps; high speed steel.

HOVER ILO-45H.
M-1306; 0.80 C, 4 Cr, Co, V, W, Mo, bal Fe.
For lathe and planer tools, reamers, broaches, taps; high speed steel.

HOVER ILO-55H.
M-1306; 1.35 C, W, Cr, V, Co, bal Fe.
For blanking and forming dies, engravers tools; high speed steel.

HOVER ILO-105H.
M-1306; 0.76 C, 10 Co, 4.2 Cr, 0.8 Mo, 1.8 V, 18 W, bal Fe.
For lathe and planer tools, drills, taps, hobs, reamers; high speed steel.

HOVER ILO-ABC II.
M-1306; 0.82 C, 4.1 Cr, 0.85 Mo, 1.6 V, 8.7 W, bal Fe.
For lathe and planer tools, reamers, hobs, taps, drills; high speed steel.

HOVER ILO-BCO.
M-1306; 0.79 C, 4.7 Co, 4.3 Cr, 0.75 Mo, 1.5 V, 18 W, bal Fe.
For drills, taps, hobs, reamers, lathe tools; high speed steel.

HOVER ILO-EXTRA.
M-1306; 0.86 C, 4.1 Cr, 0.85 Mo, 2.5 V, 18 W, bal Fe.
For lathe and planer tools, drills, taps, reamers; high speed steel.

HOVER ILO-PRIMA.
M-1306; 0.95 C, 4.1 Cr, 0.85 Mo, V, W, bal Fe.
For lathe and planer tools, drills, reamers; high speed steel.

HOVER ILO-SUPER B.
M-1306; 1.3 C, 4.3 Cr, 0.85 Mo, 3.8 V, 12 W, bal Fe.
For blanking and forming dies, form cutters; high speed steel.

HOVER ILO-ULTRA W.
M-1306; 0.74 C, 4.1 Cr, 1.1 V, 18.5 W, bal Fe.
For lathe and planer tools, drills, taps, hobs; high speed steel.

HOVER IV-SF EXTRA QUALITY.
M-1306; 0.55 C, 0.3 Si, 0.6 Mn, bal Fe
Heat treated: 110,000-160,000 TS, 75,000-112,000 YS; 25-13 El, 55-42 RA; 230-325 Brin.
For gears, axles, crankshafts; water hardened.

HOVER M48.
M-1306; 0.38 C, Si, Cr, V, bal Fe.
For gears, bolts, machine tool parts; oil hardened, tough.

HOVER P12.
M-1306; 0.56 C, Ni, Cr, Mo, V, bal Fe.
For forging and heading dies; oil hardened, tough.

HOVER P14.
M-1306; 0.55 C, 0.70 Cr, 0.18 Mo, 1.65 Ni, 0.1 V, bal Fe.
For forging and heading dies; oil hardened, tough.

HOVER P15.
M-1306; 0.45 C, Cr, Ni, bal Fe.
For gears, bolts, crankshafts; oil hardened, tough.

HOVER P16.
M-1306; 1.1 C, 0.2 Si, 0.4 Cr, 0.3 Mn, bal Fe.
For bearings, cutters, liners, sleeves; water hardened, wear resistant.

HOVER P35.
M-1306; 0.50 C, 1.05 Cr, 3.25 Ni, bal Fe.
For gears, bolts, crankshafts; oil hardened, shock resistant

HOVER PRIMA SEHR ZAH.
M-1306, 0.60 C, 0.25-0.50 Si, 0.30-0.80 Mn, bal Fe.
Heat treated: 160,000-115,000 TS; 113,000-77,000 YS; 12-23 El; 40-54 RA; 320-230 Brin.
For wheels, die blocks, rails, girders; water hardened.

HOVER PRIMA WEICH
M-1306, 0.75 C, 0.25-0.50 Si, 0.30-0.80 Mn, bal Fe
Heat treated: 180,000-125,000 TS; 140,000-85,000 YS; 12-20 El; 38-52 RA; 360-240 Brin.
For springs, clutch discs, rails, hammers; Type W1; water hardened.

HOVER PRIMA ZH.
M-1306, 0.90 C, 0.25-0.50 Si, 0.30-0.80 Mn, bal Fe
Heat treated: 180,000 TS, 118,000 YS, 10 El, 30 RA; 375 Brin
For springs, cutters, hobs, drills, taps; Type W1; water hardened.

HOVER R5.
M-1306, 0.30 C, 0.25 Si, 0.55 Mn, 2.5 Cr, 0.2 Mo, 0.15 V, bal Fe
For die casting dies, upsetters, rivet sets; oil hardened, tough

HOVER R10
M-1306; 0.45 C, 1.4 Cr, 0.70 Mo, 0.30 V, 0.7 Mn, bal Fe.
For die casting dies, forging and heading dies, oil hardened, tough.

HOVER R11.
M-1306, 1.4 C, 0.1 V, 0.3 Cr, 0.3 Mn, bal Fe
For engravers' tools, textile needles, cutters; oil or water hardened

HOVER SBL1
M-1306, 0.12 max C, 0.4 Si, 13 Cr, bal Fe
Annealed 75,000 TS, 40,000 YS, 35 El, 70 RA; 155 Brin
For turbine blades, valves, cutlery; Type 410, stainless

HOVER SBL2
M-1306; 0.2 C, 0.4 Si, 13 Cr, bal Fe
Annealed 95,000 TS, 50,000 YS; 25 El; 55 RA, 195 Brin.
For turbine blades, valves, cutlery, knives, Type 420, stainless.

HOVER SBL4.
M-1306; 0.4 C, 0.4 Si, 13 Cr, bal Fe.
Annealed: 100,000 TS; 55,000 YS, 20 El; 50 RA; 210 Brin.
For valves, cutlery, surgical and dental instruments; Type 420; stainless.

HOVER SBL9
M-1306; 0.90 C, 0.4 Si, 18 Cr, 1.15 Mo, 1.0 V, bal Fe.
Annealed: 110,000 TS; 65,000 YS; 16 El; 30 RA; 230 Brin.
For cutlery, ball bearings; Type 440BMo; stainless.

HOVER SP50.
M-1306; 1.15 C, 0.65 Cr, 0.10 V, 0.30 Mn, bal Fe.
For heading and forming dies, cutters; oil hardened, wear resistant.

HOVER SPEZIAL MH.
M-1306; 1.1 C, 0.25 max Si, 0.25 max Mn, bal Fe.
Annealed: 100,000 TS; 53,000 YS; 21 El; 42 RA; 200 Brin.
For springs, cutters, reamers, drills, broaches; Type W1, water hardened.

HOVER SPEZIAL SEHR HART.
M-1306; 0.70 C, 0.25 max Si, 0.25 max Mn, bal Fe
Heat treated 174,000 TS, 128,000 YS; 12 El; 37 RA; 352 Brin.
For springs, rails, girders, dies, Type W1; water hardened.

HOVER SPEZIAL ZAH.
M-1306, 0.85 C, 0.25 max Si, 0.25 max Mn, bal Fe
Heat treated. 188,000 TS, 145,000 YS, 10 El, 30 RA; 400 Brin
For drills, taps, reamers, broaches, hobs; Type W1; water hardened.

HOVER SPEZIAL ZH.
M-1306, 1.0 C, 0.25 max Si, 0.25 max Mn, bal Fe
Annealed 100,000 TS; 53,000 YS, 21 El; 42 RA, 200 Brin
For drills, springs, taps, reamers, broaches; Type W1; water hardened.

HOVER WA18.
M-1306; 0.55 C, 0.90 Si, 0.30 Mn, 1.05 Cr, 0.18 V, 1.85 W, bal Fe
For heading and forming dies, punches, cold work steel, tough.

HOWAI
M-1364, 0.6-1.4 Mg, 0.6-1.6 Si, 0.6-1.0 Mn, 0.3 Cr, bal Al
Annealed 21,000 TS, 8000 YS; 24 El
For window frames, gutters, fan blades, boats, good formability and weldability.

HOWARD ALLOY NO 1
M-1045, 2.5-3.25 Th, 2.0-2.5 Zn, 0.5 min Zr, bal Mg
T-5 Temper 32,000 TS, 14,000 YS; 10 El, 60 Brin
For engine parts, structural components
Good creep properties to 650°F Requires no solution treatment

HOWARD ALLOY NO. 3
M-1045, 4.5 Zn, 0.7 Zr, bal Mg
T5-Temper 40,000 TS; 24,000 YS, 8 El, 60 Brin.
For structural parts or engine sections
High strength ASTM B80, ZK51 Alloy.
Requires no solution treatment

HOWARD ALLOY NO. 4
M-1045, 9 Al, 2 Zn, 0.1 Mn, bal Mg.
As Cast 25,000 TS, 14,000 YS; 2 El; 65 Brin.
T6-Temper 39,000 TS, 21,000 YS; 2 El, 85 Brin.
F-Temper 24,000 TS, 14,000 YS, 2 El; 65 Brin.
For aircraft engine parts, crankcases, housings, pressure-tight castings.
Age hardenable, ASTM B80, Alloy AZ92.

HOWARD ALLOY NO 5.
M-1045; 8.6 Al, 0.7 Zn, 0.15 Mn, bal Mg.
As Cast: 24,000 TS, 14,000 YS, 3 El; 55 Brin.
T6-Temper: 38,000 TS; 18,000 YS; 5 El; 80 Brin.
For casings, housings, portable tools, leakproof die and sand castings, aircraft and automotive parts. Pressure tight.
Heat treatable. ASTM B80, Alloy AZ91.

HOWARD ALLOY NO. 6.
M-1045; 5.5 Zn, 1.7 Th, 0.7 Zr, bal Mg.
T5-Temper: 40,000 TS, 26,000 YS; 9 El; 60 Brin.
For airframe castings, engine casings, gear casings.
Good castability and weldability.
Requires no solution treatment.

HOWARD ALLOY NO. 7.
M-1045, 3.0 rare earths, 2.5 Zn, 0.6 Zr, bal Mg.
T5-Temper: 23,000 TS; 16,000 YS; 3 El; 58 Brin
For engine castings operating between 300 and 500°F
Good creep properties to 500°F.
Requires no solution treatment

HOWARD ALLOY NO 8.
M-1045, 6 Al, 3 Zn, 0.2 Mn, bal Mg.
As cast 26,000 TS, 12,000 YS, 5 El; 55 Brin.
T6-Temper 38,000 TS; 18,000 YS; 4 El, 80 Brin.
For airplane wheels and brakes, gear housings, crankcases, oil pumps.
Age hardenable. ASTM B80, Alloy AZ63.
Good properties to 300°F.

HOWARD A
M-373; 0.35 C, 5.0 Cr, 0.4 V, 1.5 Mo, bal Fe.
Air or oil hardening hot work tool and die steel for forging dies, hot forming tools.
AISI H11

HOWARD B
M-373, 0.35 C, 5.0 Cr, 0.4 V, 1.5 W, 1.5 Mo, bal Fe.
Air or oil hardening hot work tool and die steel for forging dies, hot work forming tools.
AISI H12.

HOWARD C.
M-373, 0.35 C, 5.0 Cr, 1.0 V, 1.5 Mo, bal Fe
Air or oil hardening hot work tool and die steel, AISI H13

HOWE BROWN EXTRA
M-38, C, alloy, bal Fe.
For tools, dies, water hardened.

HOWE BROWN SPECIAL
M-38, C, alloy, bal Pb
For tools, dies, water hardened

HOWEGE EXTRA
M-1348, 0.55 C, 0.7 Cr, 0.18 Mo, 1.85 W, 0.1 V, bal Fe
For cold work tools, headers, upsetters, oil hardened, tough

HOWEGE EXTRA I.
M-1348, 0.56 C, 0.7 Cr, 0.18 Mo, 1.85 W, 0.1 V, bal Fe
For cold work tools, headers, upsetters; oil hardened, tough

HOWEGE SPEZIAL
M-1348, 0.40 C, Cr, Mo, bal Fe
For gears, shafts, bolts, studs, crankshafts; oil hardened, tough

HOWES SHEAR BLADE.
M-38, 0.90 C, 0.30 Mo, bal Fe
For shear blades, water hardening.

HOWMET NO 3
M-1512, 2.45 C, 31.0 Cr, 12.5 W, 3 max Fe, 3 max Ni, bal Co.
Cast 64,000 TS, 0 El, 0 RA, C 53 Rock.
For cutting tools, ball bearing rolls, sleeves, bushings, wear strips, valve seat inserts, scraper blades, valves.
High heat and abrasion resistance, non-galling; Corrosion and oxidation resistant.

HOWMET-25
M-1512; 0.12 C, 1.5 Mn, 1.0 Si, 20 Cr, 10 Ni, 51 Co, 15 W, 1 Fe.
Cast: 106,800 TS; 24.1 El; C 18-25 Rock.
Heat Treated 145,000-165,000 TS; 65,000-80,000 YS; 55-70 El; B 95-C 25 Rock.
For gas turbine rotors and buckets, nozzles, afterburners, valves.
Similar to L605 Alloy. Investment cast.

HOWMET-50
M-1512; 0.05-0.12 C, 0.18 Ti, 0.6 Cb, 26-30 Cr, 47-52 Co, bal Fe.
Cast: 135,000 TS; 48,000 YS; 10 El, 10 RA; 250 Brin.
For furnace baffles, burner tips, sintering grates, quench baskets.
Corrosion, heat and thermal shock resistant.

HOWMET FA see FA.

HOWMET STANDARD.
M-1512; 2.45 C, 31 Cr, 12.5 W, 3 max Fe, 3 max Ni, bal Co.
Cast: 64,000 TS; 0 El; 0 RA; 530 Brin.
For cutting tools, high temperature parts.
Oxidation and wear resistant.

HOWMET STANDARD NO. 6.
M-1512; 0.9-1.4 C, 3 max Fe, 3 max Ni, 1.5 max Mo, 27-31 Cr, 3.5-5.5 W, bal Co
Cast: 115,000 TS; 96,000 YS; 3 El; 410 Brin.
At 1500°F: 70,000 TS; 5 El; 8 RA.
For turbine blades, valve parts, hot work punches
Heat and thermal shock resistant.

HOWMET SUPER-3.
M-1512; 2.45 C, 31 Cr, 12.5 W, 6 max Fe, 6 max Ni, bal Co.
Cast: 62,000 TS; 0 El. 0 RA; 560 Brin
For cutting tools, high temperature parts.
Oxidation and wear resistant

HOWMET SUPER-6.
M-1512; 0.9-1.4 C, 6 max Fe, 6 max Ni, 1.5 max Mo, 27-31 Cr, 3.5-5.5 W, bal Co.
Cast: 114,000 TS; 101,000 YS; 1.5 El, 430 Brin.
At 1500°F: 72,000 TS, 7 El; 7 RA; 230 Brin.
For turbine blades, valve parts, hot work punches
Heat and thermal shock resistant.

HOYLES METAL.
U.S.; 46 Sn, 12 Sb, 42 Pb.
For bearings; Babbitt.

HOYT.
M-88; Sn, Sb, bal Fe.
For bearings; Babbitt.

HOYT NO. 1.
M-317; Sn, Sb, bal Pb.
For bearings for heavy loads and medium speeds; antifriction metal, tough.

HOYT NO 1 PHOSPHOR BRONZE.
M-317; P, Sn, bal Cu.
For chill castings; tough, wear resistant

HOYT NO 3M.
M-317, Sn, Sb, bal Pb.
For bearings, antifriction metal.

HOYT NO 4A.
M-317; Sn, Sb, bal Pb.
For bearings for light pressure and medium speed, antifriction metal.

HOYT 11.
M-88, Pb, Cu, Sb, bal Sn.
For bearings; Babbitt.

HOYT NO. 11 D.
M-317; 0.55 Ni, 0.18 Pb, 3.5 Sb, 4.3 Cu, bal Sn.
Cast: 11,000 TS; 7500 YS; 13.5 El; 27 Brin.
For connecting rod bearings; for severe duty.

HOYT NO. 14.
M-317; Sn, Sb, bal Pb.
For stern tubes; zinc-free Babbitt.

HOYT NO. 40.
M-317; Sn, Sb, bal Pb.
For stern tubes and outer bearings; Babbitt.

HOYT NO. 71.
M-317; Sn, Sb, bal Pb.
For engine bearings; Babbitt.

HOYT NO 133C.
M-317; Sn, Sb, bal Pb.
For bearings; Babbitt.

HOYT NO. 156B.
M-317; Sn, Sb, bal Pb.
For bearings, Babbitt.

HOYT NO. 175.
M-317; Pb, Sb, bal Sn.
Cast: 12,000 TS; 10,500 YS, 1.6 El, 35 Brin.
For bearings for locomotives, crushers and tube mills; Babbitt.

HOYT NO 400
M-317; Sn, Sb, bal Pb
For bearings operating in sea water, Babbitt

HOYT ARROW
M-317, Cu, Pb, bal Sn
For bearings for heavy loads and high speeds; antifriction metal, tough

HOYT NO ELEVEN R
M-317, 4 Sb, 4 Cu, 0.5 Ni, 0.2 Pb, bal Sn.
Cast. 12,200 TS; 9000 YS; 11.7 El, 32 Brin.
For bearings for compressors and engines, Babbitt

HOYT NO ELEVEN Z3.
M-317, 4 Sb, 4 Cu, 0.5 Ni, 0.2 Pb, bal Sn
Cast: 13,500 TS, 9300 YS, 13.9 El; 30 Brin
For bearings for compressors and gasoline engines, Babbitt

HOYT I.C.E
M-317; Pb, Sb, bal Sn.
For bearings for internal combustion engines, antifriction metal

HOYT MARINE A
M-317; Pb, Sb, bal Sn
For bearings for marine steam engines; antifriction metal.

HOYT MARINE B
M-317, Pb, Sb, bal Sn.
For bearings for marine steam engines, antifriction metal

HOYT METAL
M-88, M-317, 10 Cu, 78 Sn, 12 Pb
26 Brin
For bearings for internal combustion engines and pumps, bronze Babbitt; M.P. 360°C.

HOYT METAL
M-317, 94-90 Pb, 6-10 Sb.
For bearings; hard.

HOYT STAR BRAND.
M-317, Sn, Sb, bal Pb.
For bearings for fans, stone crushers, mining machinery; antifriction metal.

HOYT STAR M
M-317, Sb, Cu, Pb, bal Sn.
Cast: 11,500 TS; 11,200 YS; 1.5 El; 30 Brin.
For machine tool bearings; Babbitt.

H.P.A NICKEL.
M-121; 0.10 max C, 0.04 max Cu, 0.05 max Fe, 0.02 max Mn, 99.5 min Ni + Co.
For electronic valves, cathodes; high temperature applications.

H.P.B. NICKEL.
M-121; 0.10 max C, 0.04 max Cu, 0.05-1.00 Fe, 0.15-0.25 Si, bal Fe.
For electronic valves, cathodes; high temperature applications.

H.P.D.
M-289; 0.35 C, 1.05 Si, 5.15 Cr, 0.3 V, 1.25 W, 1.55 Mo, bal Fe.
Air or oil hardening hot work tool and die steel; AISI H12.

HPM-NICKEL.
M-121; 99.9 Ni.
For components of special valves,
hydrogen thyratrons,
electric resistance thermometers and controls.
Oxidation and corrosion resistant.

HPW-NICKEL.
M-121; 96.5 Ni, 3.5 W.
For oxide-coated cathodes of special valves, submarine repeaters. Heat resistant.

H RAPID 199.
M-1328; 0.86 C, 2.8 Co, 4.3 Cr, 0.85 Mo, 2.1 V, 12 W, bal Fe.
For lathe and planer tools, reamers, broaches, high speed steel.

H RAPID 200.
M-1328; 1 35 C, 4 Cr, W, Co, bal Fe.
For blanking and forming dies, engravers tools; high speed steel

H RAPID 201
M-1328; 0.79 C, 4.3 Cr, 4.75 Co, 0.75 Mo, 1.5 V, 18 W, bal Fe.
For lathe and planer tools, cutters, reamers, taps; high speed steel

H & R NO. 1.
M-363; 0.55-0 75 C, 3.8-4.3 Cr, 0.90-1.25 V, 17 75-18.85 W, bal Fe
For lathe and planer tools, cutters; high speed steel.

H & R NO 2.
M-363, 0 80-0 85 C, 4.0-4.5 Cr, 2 0-2.25 V, 18-19 W, 0 6-0.8 Mo, bal Fe
For lathe tools, drills, taps, reamers, high speed steel

H & R NO 3.
M-363; 1 0 C, 0.25 Mn, 4 Cr, 18 W, 0 8 Mo, 3.4 V, bal Fe
For cutters, tools; high speed steel.

H & R NO 4
M-363; 0.8 C, 18 5 W, 4.5 Cr, 1.75 V, 7.5 Co, 0 8 Mo, bal Fe
For cutters, reamers; high speed steel.

H & R NO. 7.
M-363; 1.3 C, 5.5 W, 4 5 Cr, 4.5 Mo, 4 V, bal Fe.
For broaches, reamers, chasers, high speed steel.

H & R NO. 8
M-363; 0.55 C, 0 85 Mn, 0.25 Cr, 0 25 V, 2.1 Si, bal Fe.
For carbide tool shanks; water or oil hardened.

H & R NO. 8M.
M-363; 0.55 C, 0.75 Mn, 0.2 Mo, 2.0 Si, bal Fe.
For carbide tool shanks, water or oil hardened.

H & R NO 14.
M-363; 0.75 C, 4 Cr, 2 V, 14 W, 5 Co, bal Fe.
For lathe and planer tools, reamers, broaches; Type T8; high speed steel.

H & R NO. 15.
M-363; 0.37 C, 3 Mo, 15.5 W, 4 Cr, 2 Ni, bal Fe.
For extrusion dies, hot piercing punches; hot work steel.

H & R NO. 19.
M-363; 0.9 C, 1.5 Mn, 0.3 Mo, bal Fe.
For precision tools, dies; oil hardening.

H & R NO. 44.
M-363; 0.80 C, 4 Cr, 4.2 Mo, 1.1 V, 6 W, bal Fe.
For cutting tools, drills, hobs, reamers; high speed steel.

H & R NO. 45.
M-363; 0.65 C, 4 Cr, 2 V, 6 W, 5 Mo, bal Fe.
For drills, reamers, lathe and planer tools; Type M2; high speed steel.

H & R NO. 50.
M-363; 0.57 C, 18 W, 4 Cr, 1.15 V, bal Fe.
For drills, reamers, taps, milling cutters; high speed steel.

H & R NO. 55.
M-363; 0.35 C, 5.2 Cr, 5.2 W, 0.2 Mo, 0.2 V, 0.5 Co, 0.9 Si, bal Fe.
For die casting dies; oil hardening.

H & R NO. 57.
M-363, 0.8 C, 3 75 Cr, 5.75 W, 4.5 Mo, 1.5 V, bal Fe.
For taps, chasers, broaches, reamers; high speed steel.

H & R NO. 59.
M-363; 0.88 C, 4.1 Cr, 1.8 V, 4.25 Mo, 6 W, bal Fe.
For thread chasers, drills, pipe taps, tools; high speed steel.

H & R NO. 60.
M-363, 1 2 C, 0 7 Cr, 0.25 Mo, 1.6-0.2 V, bal Fe.
For taps, broaches, punches, gauges; non distorting

H & R NO. 61
M-363, 1.3 C, 12 Cr, 0.6 Mo, 3 Co, 0 5 Si, bal Fe.
For blanking and forming dies, cold heading dies; air hardened

H & R NO 80
M-363; 1.0 C, 0.5 Cr, 0 7 Mn, 0.25 V, 1.25 Mo, bal Fe.
For lamination dies, gages, reamers; oil hardened.

H & R NO 85.
M-363; 0 50 C, 0.95 Cr, 0.20 V, bal Fe.
For die casting dies, shear blades; shock resistant.

H & R NO 150
M-363; 0.7 C, 0.85 Cr, 0.42 Mo, 1.4 Ni, bal Fe.
For carbide tool shanks, oil hardened.

H & R NO. 225.
M-363, 0 5 C, 1.5 Cr, 2 5 W, 0.25 V, bal Fe.
For dies, shear blades, cutters, oil hardening.

H & R NO. 434
M-363; 1 18 C, 4.25 Mo, 3.1 V, 4.1 Cr, bal Fe.
For cutting tools; for cutting abrasive materials.

H & R NO. 444.
M-363, 1 4 C, 4.1 Cr, 4 25 Mo, 4.15 V, bal Fe.
For cutting tools; abrasion resistant.

H & R NO. 445.
M 363; 1.5 C, 13.5 W, 4.5 Cr, 4.75 V, 5 Co, 0.5 Mo, bal Fe.
For cutting tools; high speed steel.

H & R A4
M-363; 0.95 C, 2.0 Mn, 0.35 Si, 2.2 Cr, 1.1 Mo, (lead added) bal Fe.
Free machining grade of air hardening cold work tool steel; AISI A4.

HRA 376.
M-England; 0.03-0.15 C, 4-8 Cr, 3.5-10.5 W, 5-7 Al, 3-9.5 Ta, 0.005-0.04 B, 10-14 Co, 4 max Mo, 3.5 max Cb, 0.15 max Zr, bal Ni.
For cast turbine blades.
Vacuum cast. High creep fatigue resistance.

H & R BRAKE DIE.
M-363; 0.50 C, 1 Mn, 0.95 Cr, 0.20 Mo, bal Fe.
For brake dies; pre-heat treated.

H & R CARBON.
M-363; 0.9-1.05 C, bal Fe.
For punches, dies, tools; water hardening.

H.R.C. MAX.
M-521; 0.25 max C, 18-20 Cr, 24-26 Ni, bal Fe.
Annealed: 85,000-95,000 TS; 35,000-45,000 YS; 60-50 El; 75-60 RA; 150-190 Brin.
For furnace parts, heat treating boxes, valves, pumps; Type 311; austenitic, heat resistant.

H & R COBALT HIGH SPEED STEEL.
M-363; 0.75-0.80 C, 4 Cr, 18 W, 5 Co, 1 V, bal Fe.
For cutting tools; high speed steel.

H & R COBALT MOLY.
M-363; 0.88 C, 4.1 Cr, 6 W, 6 Mo, 1.9 V, 9 Co, bal Fe.
For cutters, tools, high speed steel.

H.R. CROWN MAX.
M-56, M-52; 0.2 C, 11.5 Ni, 23 Cr, 3 W, bal Fe.
Annealed: 101,000-123,000 TS; 56,000 YS; 35-25 El; 50-40 RA; 205-230 Brin.
For furnace parts, mechanical stokers, exhaust valves, annealing boxes; corrosion and heat resistant; Firth Brown J-184.

H REKORD EMINENT.
M-1328; 0.76 C, 10 Co, 4.3 Cr, 0.8 Mo, 1.8 V, 18 W, bal Fe.
For lathe and planer tools, reamers, broaches, taps; high speed steel

H REKORD SUPERIOR.
M-1328; 0.74 C, 4.1 Cr, 1.1 18.5 W, bal Fe.
For lathe and planer tools, reamers; high speed steel.

H & R GOLD LABEL.
M-363; 1.33 C, 0.35 Mo, 4.25 W, bal Fe.
For drawing dies, finishing tools; keen cutting edge.

H & R GRAY LABEL.
M-363; 0.90-1.05 C, bal Fe
For punches, dies, stamp, headers.

H & R HEADING DIE STEEL.
M-363, 0.9-1.0 C, bal Fe.
For embossing dies, cold heading dies; water hardening.

H & R HOT WORK.
M-363; 0.30-0.35 C, 3.0-3.5 Cr, 0.3-0.5 V, 10.0-11.5 W, bal Fe.
For extrusion and swedging dies, shear blades; hot work steel.

H & R HOT WORK NO. 2.
M-363; 0.33 C, 3.5 Cr, 9.25 W, 0.5 V, bal Fe.
For die casting dies, extrusion dies; hot work steel.

H & R HOT WORK NO. 4.
M-363; 0.97 C, 3.9 Cr, bal Fe.
For upsetting dies, gripper dies; oil or air hardening.

H & R HOT WORK NO. 5.
M-363; 0.35 C, 1.0 Si, 5 Cr, 0.4 V, 1.0 Mo, bal Fe.
For die casting dies, tools, hot punches; hot work steel.

H & R WORK 5V.
M-363; 0.35 C, 5 Cr, 1 V, 1.5 Mo, bal Fe.
For hot work steel, extrusion rams and liners; Type H13; hot work steel .

H & R HOT WORK NO. 6.
M-363; 0.35 C, 1.0 Si, 5 Cr, 1.35 W, 1.75 Mo, bal Fe.
For extrusion dies, piercing mandrels; hot work steel.

H & R HOT WORK 7.
M-363; 0.55 C, 1.2 W, 1.2 Mo, 0.95 Si, 0.3 Mn, bal Fe.
For dies, hot work tools, punches; air or oil hardened, shock resistant.

H & R HOT WORK NO. 10
M-363; 0.23 C, 0.6 Mn, 1.25 Si, 10.0 Cr, 0.75 Ni, 1.0 V, 0.45 W, 1.2 Mo, 0.10 N, bal Fe.
Air or oil hardening hot work tool and die steel, chromium type.

H & R HOT WORK NO. 12.
M-363; 0.30 C, 0.35 Mn, 0.5 Si, 12.0 Cr, 0.9 V, 12.0 W, bal Fe.
Air or oil hardening hot work tool and die steel; tungsten type; AISI H23.

H & R HOT WORK NO 15A.
M-363, 0.25 C, 14-16 W, 3.75-4.25 Cr, 0.4-0.6 V, bal Fe.
For hot heading dies, gripper dies, high temperature springs; hot work steel, oil hardened

H & R-K.
M-363; 2.25-2.40 C, 0.25-0.40 Mn, 12.75-13.25 Cr, 0.15-0.25 V, bal Fe.
For plug gauges, punches, forming dies; non-deforming

H & RK2
M-363; 1.5 C, 11.5 Cr, 0.75 Mo, 0.25 V, bal Fe.
For blanking and forming dies, lamination dies; non-deforming

H & R K2L
M-363, 0.85 C, 1 Ni, 0.45 Mo, 11.5 Cr, 0.3 V, bal Fe.
For shear blades, punches, dies, shock and abrasion resistant, non-deforming.

H & R K3.
M-363, 2.4 C, 12.75 Cr, 4 V, 1.1 Mo, bal Fe.
For mold liners, lamination dies; oil hardened, non-deforming

H & R K4
M-363; 1.4 C, 4.1 Cr, 4.1 V, 4.25 Mo, bal Fe.
For cutting tools, machining scaly material.

H & R M4.
M-363; 1.28 C, 4.5 Cr, 4.0 V, 5.5 W, 4.5 Mo, bal Fe.
Molybdenum-tungsten-vanadium grade of high speed steel for cutting tools; AISI M4.

H & R M7.
M-363; 1.0 C, 3.75 Cr, 2.05 V, 1.75 W, 8.75 Mo, bal Fe.
High speed tool steel, molybdenum type; AISI M7.

H & R M42.
M-363; 1.07 C, 3.75 Cr, 1.15 V, 1.5 W, 9.5 Mo, 8.0 Co, bal Fe.
High speed tool steel, molybdenum-cobalt type, AISI M42

H & R M43.
M-363; 1.20 C, 3.75 Cr, 1.6 V, 2.7 W, 8.0 Mo, 8.2 Co, bal Fe.
High speed tool steel, molybdenum-cobalt type; AISI M-43.

H & R MOLYHI.
M-363; 0.8 C, 4 Cr, 1.5 W, 8.5 Mo, 1.15 V, bal Fe.
For cutters, tools; high speed steel.

H & R MOLY VAN.
M-363; 0.8 C, 4 Cr, 9 Mo, 2.2 V, bal Fe.
For cutters, tools; high speed steel.

"HR" MONEL.
M-68; 0.35 max C, 0.5-1.5 Mn, 2.5 max Fe, 2 Si, 62-68 Ni, bal Cu.
Cast. 100,000 TS, 70,000 YS; 15 El; 200 Brin.
For corrosion resistant parts; free-cutting

H & R MULTIMOLD.
M-363; 0.35 C, 0.80 Cr, 0.30 Mo, 0.70 Mn, bal Fe.
For plastic mold dies; for high mold pressures.

H & R-MY.
M-363, M-27; 0.42 C, 1.4 Cr, 1.5 Si, 0.25 V, bal Fe.
For pneumatic tools, chisels, snaps, hot dies, hot shears; shock resistant.

H & R MY-A.
M-363, 0.40 C, 1.5 Cr, 1.5 Si, 0.25 V, bal Fe
For rivet sets, hand chisels, punches, shears; tough, shock resistant.

H & R-MY EXTRA.
M-363; 0.4 C, 0.9 Si, 1 Cr, 2 W, bal Fe
For pneumatic tools, chisels, snaps, hot dies, hot shears, water hardening.

H & R N175
M-363, 0.75 C, 0.75 Mn, 0.3 Si, 0.9 Cr, 1.75 Ni, 0.42 Mo, bal Fe
Oil hardening low alloy tool steel for shafts, arbors, lathe centers; AISI I 6.

H & R NON-TEMPERING.
M-363, 0.35 C, 0.7 Mn, 0.45 Si, 0.8 Cr, 0.3 Mo, 0.3 Cu, bal Fe.
Oil hardening tool steel, shock resisting type.

H & R 06 GRAPHITIC.
M-363; 1.45 C, 1.0 Mn, 1.25 Si, 0.25 Mo, bal Fe
AISI Type 06 oil hardening tool steel.

H & R OIL HARDENING.
M-363; 0.90-1.00 C, 0.90-1.00 Mn, 0.5-0.6 Cr, 0.2 V, bal Fe.
For cold forming tools and dies, punches, broaches, gauges

H & R PISTON.
M-363, 1.14 C, 0.58 Cr, 0.19 V, 0.2 Si, 0.3 Mn, bal Fe
For pistons, water hardening

H & R PLASTIC MOLD-A
M-363, 0.07 C, 4.5 Cr, 0.45 Mo, 0.4 Mn, 0.25 Si, bal Fe.
For plastic mold dies; hobbing die steel, air hardened

H & R PLASTIC MOLD-B
M-363; 0.06 C, 1 Cr, 0.25 Mo, B, bal Fe
For plastic mold dies, for cold hobbing, oil hardened

H & R PLASTIC MOLD-C
M-363, 0.1 C, bal Fe
For plastic mold dies; case hardened

H & R PLASTIC MOLD L.
M-363; 0.50 C, 1.0 Mn, 0.3 Si, 1.1 Cr, 0.25 Mo, bal Fe.
Oil hardening tool and die steel designed for plastic molds.

H & R SILICO 1.
M-363, 0.5 C, 0.5 Mo, 0.2 V, 1.1 Si, bal Fe.
For impact tools, punches, chisels, shock resistant, oil or water hardened.

H & R SILICO 2.
M-363, 0.55 C, 0.7 Mn, 0.45 Mo, 0.2 V, 2.15 Si, bal Fe.
For impact tools, punches, chisels; shock resistant, oil or water hardened.

H & R SPECIAL CARBON.
M-363; 1.0-1.2 C, 0.3 Mn, 0.2 Si, bal Fe.
For drills, taps, hobs, reamers; Type W1; water hardened.

H & R SPECIAL HARDENING DIE.
M-363; 0.9-1.0 C, 0.2 Mn, 0.3 Si, bal Fe.
For hardening dies; water hardened.

H & R SPECIAL HEADING DIE.
M-363; 0.9-1.0 C, 0.2 Mn, 0.3 Si, bal Fe.
AISI Type W1 water hardening tool steel.

H & R SUPER COBALT.
M-363; 0.8 C, 20-21 W, 4-4.5 Cr, 1.3 V, 12 Co, 0.6 Mo, bal Fe.
For cutters, hobs, millers; high speed steel.

H & R SUPER MOLYHI.
M-363, 0.8 C, 4 Cr, 1.5 W, 8.5 Mo, 1.2 V, 5 Co, bal Fe.
For cutters, tools; high speed steel.

H & R TUNGSTEN OIL HARDENING
M-363; 0.9 C, 1.1 Mn, 0.5 W, 0.2 V, 0.5 Cr, bal Fe.
For hobs, reamers, broaches, gauges; fast finishing tool steel.

H & R VANADIUM.
M-363; 1.05-1.15 C, 0.18 V, bal Fe
For striking and heading dies, swedging tools; water hardened.

H & R VH
M-363, 1.4 C, 0.4 Mn, 0.35 Si, 0.15 max Cr, 3.5 V, 0.1 max Mo, bal Fe.
Water hardening tool steel.

H R.W. DIE STEEL
M-357, 0.9 C, 3.7 Cr, 0.15 V, bal Fe
For dies, tools, forging mandrels; hot work steel

HS-1.
M-1542; 0.18 max C, 0.14 max Mn, 0.55 max Si, bal Fe
Rolled 71,000-85,000 TS, 47,000 min YP; 23 min El
For bridges, booms, buildings, bus and truck bodies Constructional steel

HS-12 (LESCO).
M-73; 0.99 C, 0.72 W, 3.9 Cr, 1.96 V, 8.11 Mo, bal Fe
Hardened C 63-66 Rock
For lathe tools and other cutting tools and dies requiring extra hardness and wear resistance.
AISI Type M-7 (Mod) High speed tool steel

HS 25
M-73, Composition similar to HSS Type M-1 except higher carbon content
Hardened. C 63-67 Rock.
For lathe tools and other cutting tools and dies requiring extra high hardness and wear resistance.
AISI Type M-1 (Mod) High speed tool steel

HS 29 XL.
M-73, 0.98 C, 4.15 Cr, 6.3 W, 1.85 V, 5.05 Mo, bal Fe, plus alloy sulphides.
Hardened C 64-67 Rock; free machining.
For lathe tools and other cutting tools requiring extra high hardness and wear resistance.
AISI Type M2 (Mod) High speed tool steel.

HS-220
M-376, 0.30 C, 2 Ni, 1.2 Cr, 0.45 Mo, bal Fe.
Heat treated: 237,000-258,000 TS; 201,000-212,000 YS; 11-13 El; 36-51 RA; 500-540 Brin.
For aircraft structures, landing gears; tough, shock resistant, oil hardened.

HS-260.
M-376; 0.40 C, 1.25 Cr, 2.2 Ni, 0.50 Mo, bal Fe.
Heat treated: 271,000-280,000 TS; 221,000-235,000 YS; 7-10.5 El; 24.5-38.5 RA; 510-530 Brin.
For aircraft structures, landing gears; tough, shock resistant, oil hardened.

H.S.C. 6-6-2.
M-908; 0.8 C, 4 Cr, 5.75 W, 5 Mo, 1.5 V, bal Fe.
For tools, drills, cutters, chasers, broaches; high speed steel.

H.S.C. 18-4-1.
M-908; 0.70 C, 4 Cr, 18 W, 1 V, bal Fe.
For tools, taps, cutters, chasers, punches; high speed steel.

HSC NO. 33.
M-908; 0.30-0.35 C, 0.9 Si, 5 Cr, 1.2 W, 1.5 Mo, bal Fe.
For hot work tools, Al-die casting dies; hot work steel.

HSC NO. 265.
M-908; 1.55-1.70 C, 11.5-12.5 Cr, 0.7-0.9 Mo, 0.15-0.25 V, bal Fe.
For dies, tools, blanking and forming dies; non-deforming.

HSC NO. 280.
M-908; 0.55 C, 1.5 Si, 0.35 Mo, bal Fe.
For tools, punches, chisels; shock resistant.

H.S.C. NO. 310.
M-908; 0.30 C, 3.25 Cr, 10 W, 0.35 V, bal Fe.
For hot work dies, brass forging dies; oil and air hardening.

H.S.C. NO. 313.
M-908; 0.35 C, 3 Cr, 13.5 W, bal Fe.
For hot work dies, hot punching and extruding dies; hot work steel.

H.S.C. 350.
M-908; 1.3 C, 3.5 W, 0.3 Mn, 0.45 Si, bal Fe.
For cutters, tools, cold extrusion dies; fast finishing steel.

HSC NO. 422.
M-908; 0.45-0.50 C, 0.85-1.05 Cr, 0.9-1.2 W, 0.15-0.25 Mo, bal Fe.
For tools, punches, shear blades; shock resistant.

H.S.C. NO. 515.
M-908; 0.35 C, 1.0 Si, 5 Cr, 5 W, 0.2 Mo, bal Fe.
For hot work dies; hot work steel, air hardening.

H.S.C. ALLOY SHOE DIE.
M-908; 0.5 C, 0.6 Cr, 0.6 Mn, 0.4 Mo, bal Fe.
For shoe dies; wear resistant; oil hardening.

H.S.C. COBALT 5.
M-908; 0.7 C, 4 Cr, 18 W, 0.5 Mo, 5 Co, 1 V, bal Fe.
For tools, cutters, broaches, chasers, reamers; high speed steel.

H.S.C. COLD HEADER.
M-908; 0.95 C, 0.30 Mn, bal Fe.
For cold headed dies, tools.

H.S.C. CUTLERY.
M-908; 1.1 C, 0.2 Mn, bal Fe.
For tools, cutlery, pocket knives; water hardening.

HSC-CVM.
M-908; 1.0 C, 0.7 Mn, 5.25 Cr, 1.1 Mo, 0.25 V, bal Fe.
For cold work dies, shears, punches; air hardening.

H.S.C. OVERCOAT AXE.
M-908; 1.0 C, 0.25 Mn, 0.15 Si, bal Fe.
For axe, tools; water hardening.

H.S.C. PAVEMENT BREAKER.
M-908; 0.65 C, 0.3 Mn, 0.1 Si, bal Fe.
For tools, sledges, pavement breakers; tough.

H.S.C. REGULAR.
M-908; 0.7-1.1 C, 0.3 Mn, bal Fe.
For tools, cold work tools; water hardened.

H.S.C. SHOE DIE.
M-908; 0.9 C, 0.35 Mn, 0.15 Si, bal Fe.
For shoe dies; water hardening.

H.S.C. SOLID DRILL.
M-908; 0.85 C, bal Fe.
For drills; tough.

H.S.C. SPECIAL.
M-908; 1.1 C, 0.3 Mn, 0.3 Si, bal Fe.
For tools, cold work tools, taps, blanking dies; water hardened.

HSC-SS EXTRA.
M-908; 1.0-1.1 C, 0.3 Mn, 0.3 Si, bal Fe.
For drills, taps, hobs, reamers, broaches; Type 1; water hardened.

H.S.M. COPPER 194.
M-279; 97.5 Cu, 2.35 Fe, 0.12 Zn, 0.03 P.
Ann: 40,000-60,000 TS; 24,000-45,000 YS; 20-35 El.
Cold rolled: 53,000-85,000 TS; 48,000-78,000 YS; 1-13 El.
For electrical connectors and terminals, springs, tubular products; high conductivity, strength, corrosion resistance.

HS PRIMA.
M-459; 1-1.2 C, bal Fe.
For tools; water hardening.

"HS" QUALITY.
M-179; 58 Cu, 40 Zn, 2-2.5 Pb.
Extruded: 60,000 TS, 28-32 El; 25-30 RA; 120 Brin.
Drawn: 68,000 TS; 25-30 El; 20-25 RA; 130 Brin.
For screw machine products, hardware; free-cutting.

HST.100.
M-430; 0.40 C, 3.0 Cr × Mo + V, bal Fe.
For high temperature service.

HST.120.
M-430; 0.30 C, 3 Cr + Mo + V, bal Fe.
For high temperature service.

HST.140.
M-430, 0.40 C, 5 Cr + Mo + V, bal Fe.
For high temperature service.

H SUPER REKORD.
M-1328; 1.3 C, 4.3 Cr, 0.85 Mo, 3.8 V, 12 W, bal Fe.
For engravers tools, blanking and forming tools; high speed steel.

H SUPER REKORD CO.
M-1328; 1.35 C, Cr, Co, V, W, bal Fe.
For engravers tools, blanking and forming dies; high speed steel.

HTB-1.
M-1; 1.02 C, 0.35 Mn, 0.40 Si, 1.45 Cr, 1.0 Al, bal Fe.
For jet engine bearings; for high temperature applications.

HTB-2.
M-1; 0.58 C, 0.30 Mn, 1.15 Si, 4.75 Cr, 5.25 Mo, 0.55 V, bal Fe.
For gears operating up to 900°F; high temperature applications.

HTB-3.
M-1; 0.57 C, 0.30 Mn, 1.15 Si, 4.75 Cr, 5.25 Mo, 0.55 V, bal Fe.
For jet engine bearings; for high temperature operation.

H.T.C. NICKEL.
M-121; Ni.
Cold drawn: 67,000 TS; 40-50 El; 60-75 RA; 110 Brin.
For resistance thermometers; high temperature coefficient.

HT IRON-40.
M-637; 3.1 T.C., 0.2 Si, 0.7 Mn, 1.5 Ni, bal Fe.
Cast: 40,000 TS; 220 Brin.
For roller bearing cages; cast iron; Tr.S. 3800.

HTM
M-89; 3 C, Mn, Si, bal Fe.
For tractor parts; high strength malleable iron.

HT Molybdenum.
M-1246; 100 Mo.
For electronic, nuclear, chemical, aerospace, metallurgical and electrical industries, vacuum equipment.
Ductile after exposure to 2700-3600°F.

H.T.S 33
M-845; Al alloy.
For castings, not hardenable.

H.T. SILVER FUSE
M-1243
For solder, M.P. 600-700°F.

HUBARD SPECIAL.
M-225, M-451, C, Ni, Cr, bal Fe.
For rolls, guides, castings, high wear resistance.

HUCKINGERHUTTE HH428U.
M-1381, 0.15 C, 0.60 Mn, 0.30 Mo, bal Fe
For gears, bolts, shafts, cams, fasteners, case hardened

HUCKINGERHUTTE HH432.
M-1381; 0.19 C, 0.50 Si, 1.15 Mn, bal Fe.
For gears, pinions, camshafts, cams, bolts, case hardened, tough

HUCKINGER KI.
M-1381; 0.17 max C, 0.35 max Si, 0.35 Mn, bal Fe
Annealed: 70,000 TS, 55,000 YS, 25 El, 60 RA, 143 Brin
Cold drawn: 72,000 TS; 60,000 YS, 22 El, 58 RA, 146 Brin.
For screws, bolts, gears, shafts, nails, bushings; case hardened

HUCKINGER KIW.
M-1381; 0.16 max C, 0.35 max Si, 0.40 max Mn, bal Fe.
Annealed: 70,000 TS; 55,000 YS, 25 El; 60 RA; 143 Brin
Cold drawn. 72,000 TS; 60,000 YS; 22 El; 58 RA; 146 Brin.
For screws, bolts, gears, shafts, nails, bushings; case hardened.

HUCKINGER KII.
M-1381; 0.23 max C, 0.25 max Si, 0.35 max Mn, bal Fe.
Hot rolled: 70,000 TS; 45,000 YS; 31 El; 58 RA; 143 Brin.
Cold drawn: 80,000 TS; 69,000 YS; 18 El; 48 RA; 162 Brin.
For crankshafts, gears, bolts, armature shafts; water hardened.

HUCKINGER KIIW.
M-1381; 0.20 max C, 0.35 max Si, 0.50 max Mn, bal Fe.
Cold drawn: 78,000 TS; 68,000 YS; 20 El; 55 RA; 149 Brin.
For fan blades, bushings, gears, bolts; water hardened.

HUCKINGER KIIIW.
M-1381; 0.22 max C, 0.35 max Si, 0.55 max Mn, bal Fe.
Cold drawn: 78,000 TS; 68,000 YS; 20 El; 55 RA; 159 Brin.
Annealed: 73,000 TS; 61,000 YS; 22 El; 58 RA; 149 Brin.
For gears, bolts, crankshafts, fan blades; water hardened.

HUCKINGER KIVW.
M-1381; 0.26 max C, 0.35 max Si, 0.60 max Mn, bal Fe.
Hot rolled: 70,000 TS; 45,000 YS, 31 El; 58 RA; 143 Brin
Cold drawn: 80,000 TS; 69,000 YS; 18 El; 48 RA; 162 Brin.
For crankshafts, gears, bolts, armature shafts; water hardened.

HUGHES ALLOY
M-161, 17 Sn, 70 Pb, 13 Sb.
30 Brin
For metallic packing.

HUNDRED METAL.
England, Ni, Cr.
For high temperature applications, heat and corrosion resistant.

HUNTER-DOUGLAS ZG73.
M-1389, Al alloy.
For extrusions; heat treatable, resists fuming nitric acid

HUNT-SPILLER NO 101.
M-664; 0.3 C, bal Fe.
Cast: 70,000-75,000 TS; 40,000-45,000 YS; 30-25 El, 50-45 RA
For castings, gears, shafts, water hardening

HUNT-SPILLER NO. 101A.
M-664, 0.4 C, bal Fe.
Cast: 70,000-75,000 TS; 40,000-45,000 YS; 30-25 El; 50-45 RA.
For castings, gears, shafts; water hardening

HUNT-SPILLER NO. 104.
M-664, 0.25 max C, 0.4-0.6 Mo, 0.3 max Cu, 1 max Ni, 0.2 max Cr, bal Fe
Cast: 65,000 TS, 35,000 YS; 20 El; 30 RA
For valves, fittings, water hardening

HUNT-SPILLER HIGH CARBON GUN IRON.
M-664; 3.6 T.C., 1.5 Si, bal Fe
Cast: 35,000 TS.
For brake drums, clutch pressure plates; resists heat or thermal checking.

HURBENIUM "B."
M-892; 91 Pb, 8 Sn, 1 Bi.
For hot dip plating; corrosion resistant.

HURON.
M-1; 2.1 C, 12.5 Cr, 1.0 V, 0.32 Mn, 0.45 Si, bal Fe
Heat treated: 744-418 Brin.
For dies, tools, blanking and cold forming dies and rolls, gages; abrasion and wear resistant.

HURON ALUMINUM ALLOY.
Eng.; 3-7 Cu, 0-0.6 Mn, 0.5 Mg, 0-1.25 Ni, Cr, Co, Cd, bal Al.
For light alloy parts; heat treatable.

HURON ALUMINUM ALLOY "A," ROLLED.
3.5 Cu, 0.6 Mn, 0.5 Mg, 0.1 Cr, bal Al.
For light alloy parts; heat treatable.

HURON ALUMINUM ALLOY "B," ROLLED.
4 Cu, 0.6 Mn, 0.5 Mg, 0.1 Cr, bal Al.
For light alloy parts, heat treatable.

HURON ALUMINUM ALLOY "D," ROLLED
4 Cu, 0.5 Mg, 0.6 Cr, bal Al.
For light alloy parts; heat treatable.

HURON ALUMINUM CASTINGS "A-5" ALLOY
6.6 Cu, 0.5 Mg, 1.25 Ni, 0.25 Co, 0.5 Mn + Sn + Cd, bal Al.
For light alloy parts; heat treatable.

HURON-EZ.
M-1; 2.1 C, 12.5 Cr, 1 V, 0.3 Mn, 0.4 Si, bal Fe
For blanking and forming dies, rolls, gages; Type D3, oil hardened, abrasion resistant

HURON METAL, CAST.
6.6 Cu, 1.3 Ni, 0.5 Mg, 0.3 Co, bal Al
For light alloy parts; heat treatable.

HURON METAL ROLLED
3.5-4.0 Cu, 0.5 Mg, 0-0.6 Mn, 0.1-0.6 Cr, bal Al
For light alloy parts; heat treatable.

HURON V
M-1, 2.45 C, 12 Cr, 4 V, 1.8 Mo, bal Fe
Annealed 269 Brin.
Heat treated: 640 Brin
For brick mold liners, blanking and lamination dies; oil hardened, nondeforming

HUSMANN METAL
Eng., 74 Sn, 11 Sb, 11 Pb, 4 Cu, 0.2 Fe, 0.2 Zn
For bearings, bushings; anti-friction.

HUSQUARNA HVA
M-1271; 0.05 max C, 0.02 max Si, 0.06 max Mn, 0.01 max S, bal Fe.
Sintered.
For sintered parts; electrolytic powdered iron

H V. BLUE CHIP.
M-57, 0.82 C, 4 Cr, 2 V, 18 W, bal Fe.
For finishing tools and cutters, high speed steel

HW8 see BETHLEHEM HW8

H-W-A
M-40; 0.6 C, 5 Cr, 1 Mo, 1 V, bal Fe
Heat treated 440-550 Brin
For die casting dies, hot working tools and dies, hot work steel, air or oil hardening

H W D. NO 1
M-57, 0.4 C, 0.5 Cr, 0.15 V, 1.1 W, 1.5 Mo, 0.8 Si, bal Fe.
At 950°F 141,000 TS; 130,000 YS, 19 El, 61 RA, 275 Brin
At 1150°F: 80,000 TS; 68,000 YS; 29 El; 80 RA; 165 Brin.
For hot punches, mandrels, shear blades, Type H12; hot work steel.

H.W.D 2
M-57, 0.38 C, 5.25 Cr, 0.5 V, 1.35 Mo, 0.4 Mn, bal Fe.
For hot punches and dies; hot work steel, oil hardened

H W.D.3.
M-57; 0.4 C, 1.05 V, 5.25 Cr, 1.25 Mo, bal Fe.
At 950°F: 153,000 TS, 138,000 YS; 17 El; 63 RA, 260 Brin.
At 1150°F: 86,000 TS; 78,000 YS; 27 El; 78 RA; 155 Brin.
For hot punches, shear blades, die casting dies; Type H13; hot work steel, oil hardened.

HWD MOD.
M-57; 0.55 C, 1.4 W, 5 Cr, 1.5 Mo, 0.3 V, bal Fe.
For shear blades, forging dies, punches; air hardened, non-deforming.

HWS see DARWIN HWS.

HY 43.
M-116; 4.5 Zn, 3.5 Mg, 0.3 Mn, 0.1 max Cr, 0.4 Cu, 0.2-0.6 V, bal Al.
Aged: 71,000-77,000 TS; 64,000-68,000 YS; 8 El.
For light alloy parts; high strength, age-hardenable.

HY-65.
U.S., 0.12 C, 0.48 Mn, 2.16 Ni, 0.39 Mo, 0.70 Cu, bal Fe.
For pressure vessels; tough, corrosion resistant

HY-80.
England; 0.22 max C, 1.9-3.3 Ni, 0.8-1.9 Cr, 0.13-0.63 Mo, bal Fe
Heat treated: 105,000 TS; 80,000 YS; 20 El, 72 RA.
For structural and pressure vessels; good weldability.

HY-80
M-604; 0.18 C, 0.1-0.4 Mn, 2.0-3.25 Ni, 1.0-1.8 Cr, 0.2-0.6 Mo, 0.02 Ti, 0.02 V, 0.25 Cu, bal Fe
Plate 80,000 YS; 84,800 CYS; 20 El; 55 RA, 50 Charpy at −120°F
For pressure vessels, submarine hulls.
Tough, good weldability

HY-100
M-604, 0.2 C, 0.1-0.4 Mn, 2.25-3.5 Ni, 1.0-1.8 Cr, 0.2-0.6 Mo, 0.02 Ti, 0.02 V, 0.25 Cu, bal Fe.
Plate: 100,000 120,000 YS. 18 min El; 50 min RA, 105,700 CYS
For warship hulls, structures, deck railings, heat exchangers, submarine hulls, pressure vessels
Supplied in quenched and tempered condition

HY-130 (T)
M-604, 0.12 C, 0.6-0.9 Mn, 4.75-5.25 Ni, 0.4-0.7 Cr, 0.3-0.65 Mo, 0.02 Ti, 0.05-0.10 V, 0.15 Cu, bal Fe
Plate 130,000 TYS, 141,000 CYS, 15 El, 50 RA
For submarine hulls, pressure vessels
Tough, high impact resistance

HY-140
M-604, 0.12 max C, 0.6-0.9 Mn, 0.2-0.35 Si, 4.75-5.25 Ni, 0.4-0.7 Cr, 0.3-0.65 Mo, 0.05-0.1 V, 0.02 Ti, 0.15 max Cu, bal Fe
Plate 140,000-155,000 YS, 50 min Charpy
For pressure vessels, submarine hulls
Tough, shock resistant

HY-150 STEEL
M-604, 0.16 0.20 C, 3.5-4.0 Ni, 1.2 1.7 Cr, 0.3-0.5 Mo, 0.07-0.12 V, 0.4-0.6 Mn, 0.01 P & S, bal Fe
Heat treated 125,000-180,000 YS
For ship hulls, structures, deck railings, heat exchangers
Supplied in quenched and tempered condition

HY 180
M-604, 0.1 C, 10 Ni 8 Co, 2 Cr, 1 Mo, bal Fe.
Plate 180,000 YS; 95 Charpy V-notch

HY-511.
Germany, 5 Mg, 1 Si, Mn, Fe, 0.2 Ti, bal Al
Cast
For cylinder heads, heat resistant.

HY-BB
M-1635; C, Cr, Ni, Mo, V, bal Fe
For bleach rings and breech blocks.
MIL-S-10185A.
High yield and impact strength.

HYB-LUM.
M-305; 2.0 Ni + Cr, bal Al.
For light alloy parts; non-corrosive.

HYB-LUM GRADE A.
M-305; Ni, Cu, Mn, Si, bal Al.
For light alloy parts; corrosion resistant.

HYB-LUM GRADE B.
M-305; Ni-Cu-Mn-Si, bal Al.
For light alloy parts; corrosion resistant.

HYBNICKEL A
M-194; 12-25 Ni, 20-24 Cr, bal Fe.
Cast: 50,000 TS; 40,000 YS, 0-10 El
Forged: 100,000 TS; 70,000 YS; 20 El.
For carburizing boxes, hearth plates, furnace conveyor parts; heat resisting; maximum operating temperature 2100°F.

HYBNICKEL A-1
M-194, 31-39 Ni, 16-23 Cr, 0.51-0.65 C, bal Fe
For furnace parts; heat resistant.

HYBNICKEL B
M-194; 5-7 Ni, 18-22 Cr, bal Fe.
Cast: 50,000 TS; 40,000 YS, 0-15 El
Forged 100,000 TS; 70,000 YS, 25 El.
For carburizing boxes, hearth plates, furnace conveyor parts; heat resisting; maximum operating temperature 1800°F

HYBNICKEL C.
M-194; 15-35 Ni, 25-35 Cr, bal Fe
Cast: 50,000 TS; 40,000 YS, 0.15 El
Forged 100,000 TS, 70,000 YS, 25 El
For carburizing boxes, hearth plates, furnace conveyor parts; acid resisting, maximum operating temperature 2200°F

HYBNICKEL D
M 194, 0.25-0.50 C, 20-30 Cr, 5-10 Ni, bal Fe
For heat and corrosion resistant parts, heat and corrosion resistant

HYBNICKEL R
M 194; 0.2 C, 31 39 Ni, 7-11 Cr, bal Fe
For heat and corrosion resistant parts; heat resistant

HYBNICKEL S
M 194, 25 Ni, 20 Cr, bal Fe
Cast 50,000 TS, 40,000 YS, 0-15 El
Forged 100,000 TS 20,000 YS, 25 El.
For furnace parts, acid and alkali resistant

HYCC
M-38, 2.2 C, 12 Cr, 0.25 V, 0.8 Mo, bal Fe
For forming and crimping rolls, perforating dies, plug gages, wear resistant, air or oil hardened

HYCHROME 5616
M-73, 0.18 C, 0.35 Mn, 0.35 Si, 13 Cr, 2 Ni, 3 W, bal Fe
Heat treated 125,000 218,000 TS; 98,000 180,000 YS, 16-22 El, 53-62 RA.
For steam turbine buckets and blades, compressor parts; hardenable, martensitic, heat resistant to 1200°F

HYCO
M-365, 0.7 C, 18 W, 4 Cr, 1-2 V, 3.0-5.5 Co, bal Fe.
For tools, cutters, high speed steel

HYCO
M-688, 2 C, 12.5 Cr, 1.0 V, 0.75 Mo, bal Fe
For dies, punches, rivet sets, rolls; wear and abrasion resistant.

HYCO 1
M-688; 1.50 C, 0.35 Mn, 0.3 Si, 12.0 Cr, 0.9 V, 0.8 Mo, bal Fe
Air or oil hardening cold work tool steel, chromium type, AISI D2

HYCO 2.
M-688, 2.25 C, 0.3 Si, 11.5 Cr, 0.2 V, 0.8 Mo, bal Fe.
Air or oil hardening cold work tool and die steel, chromium type, AISI D3

HYCOMAX-I.
M-650; 21 Ni, 20 Co, 9.5 Al, 2 Cu, bal Fe.
Annealed: 850 Hc, 9000 Br.
For electrical and magnetic equipment
Permanent magnet. High permeability.

HYCOMAX-II
M-210; 21 Ni, 20 Co, 9.5 Al, 2 Cu, bal Fe
For permanent magnets in electrical and magnetic equipment.
High permeability. Permanent magnet

HYCOMAX-II
M-650; 14 Ni, 29 Co, 3 Cu, 7 Al, 4 Ti, 2 Cb, bal Fe.
8500 Br, 1200 Hc, 4,000,000 (BH) max.
For electrical and magnetic equipment.
Permanent magnet

HYCOMAX-III.
M-650, 14 Ni, 34 Co, 4 Cu, 7 Al, 5 Ti, bal Fe.
8800 Br, 1500 Hc, 5,300,000 (BH) max.
For electrical and magnetic equipment
Permanent magnet. Similar to Alnico VIII
High permeability

HYCOMAX-IV
M-650, 14 Ni, 40 Co, 3 Cu, 7.5 Al, 8 Ti, bal Fe
7400 Br, 2100 Hc, 6,000,000 (BH) max
For electrical and magnetic equipment.
Permanent magnet

HYCO-SPAN
M-12; 0.12 max C, 17-19 Cr, 10-13 Ni, bal Fe
For aircraft control cables; stainless

HYCRO V80
England; 0.2 C, 3 Cr, 0.6 Mo, 0.5 W, 0.8 V, bal Fe
For gas turbine components, creep resistant.

HYCV
M-38, 2.45 C, 3.75 V, 1 Mo, 12.25 Cr, bal Fe
Heat treated 660 Brin
For brick mold liners, porcelain molds, punches; air or oil hardened, non-deforming

HY-DI 5
M-336, M-387, 1 C, 0.3 Si, 0.7 Mn, 5.2 Cr, 1-1 Mo, 0.2 V, bal Fe
For dies, cutters, cold working tools, air hardened, nondeforming

HYDRA
M-1411, 0.65 C, 15 W, 4 Cr, 0.5 V, bal Fe
For lathe and planer tools, drills, hobs, taps; high speed steel

HYDRA F
M-1411, 0.30 C, 8.5 W, 3.5 Cr, 0.35 V, bal Fe.
For hot extrusion dies for brasses; hot work steel, oil hardened.

HYDRA-H.D
M-1411; 0.4 C, 14 W, 4 Cr, 0.7 V, bal Fe.
For die casting dies, hot work steel, oil hardened.

HYDRA HUSKY
M-1411, 0.80 C, 22 W, 4.5 Cr, 1.5 V, bal Fe.
For broaches, hobs, reamers, drills, high speed steel

HYDRA-M
M-1411; 0.35 C, 4 W, 1.5 Cr, 0.5 Mo, 4 Ni, bal Fe
For mandrels, pilger bars, hot punches; hot work steel, oil hardened

HYDRA MULTICO.
M-1411, 0.85 C, 22 W, 4.5 Cr, 1.5 V, 11 Co, 0.75 Mo, bal Fe.
For broaches, drills, reamers, hobs, lathe tools; high speed steel.

HYDRAULIC 56.
M-32; 0.85 C, 0.3 Mn, 0.3 Si, 1.75 Cr, 0.2 V, bal Fe.
Oil hardening tool steel for shafts, arbors, drill bushings, lathe centers; AISI L3.

HYDRAULIC BRONZE.
U.S.; 72.5 Cu, 19.5 Zn, 1.75 Sn, 6.5 Pb.
For pumps, cocks, valves, pressure tight.

HYDRAULIC BRONZE.
U.S; 83 Cu, 11 Sn, 6 Zn, 0.1 Pb.
For pumps, cocks, valves; pressure tight.

HYDRA VANTAGE.
M-1411; 1.25 C, 13.5 W, 4.5 Cr, 4 V, bal Fe.
For drills, taps, hobs, milling cutters; high speed steel.

HYDRA-V.K.
M-1411, 0.4 C, 5 Cr, 0.6 V, 1.4 Mo, 1 Si, bal Fe.
For Al die casting dies; hot work steel, oil hardened.

HYDRA-Z.
M-1411, 0.26 C, 8.5 W, 3 Cr, 0.25 V, 0.5 Mo, 2.5 Ni, bal Fe.
For hot forging dies, punches; hot work steel, oil hardened

HYDREX 188.
M-1411; 0.12 max C, 17.5-18.5 Cr, 7.5-9.5 Ni, bal Fe
Annealed: 80,000 TS; 35,000 YS; 55 El; 75 RA, 150 Brin.
For fittings, chemical plant equipment; Type 302, stainless, austenitic.

HYDREX 367.
M-1411; 0.07 C, 17.2-19.0 Cr, 7.2-9.0 Ni, bal Fe
Annealed: 85,000 TS; 35,000 YS; 60 El; 70 RA; 150 Brin.
For fittings, chemical plant equipment, Type 304; stainless, austenitic.

HYDREX 368.
M-1411; 0.07 max C, 17-19 Cr, 7-9 Ni, 0.25-0.40 Ti, bal Fe.
Annealed: 85,000 TS; 35,000 YS; 55 El, 65 RA; 150 Brin.
For acid resistant chemical plant equipment, Type 321; stainless, austenitic.

HYDREX 369.
M-1411; 0.12 max C, 18-19 Cr, 12-13 Ni, bal Fe.
Annealed: 90,000 TS; 40,000 YS, 55 El, 65 RA; 160 Brin
For chemical plant equipment, tanks, mixers, stainless, austenitic.

HYDREX 372.
M-1411; 0.10 max C, 18-20 Cr, 8-9.5 Ni, 0.8 Cb, bal Fe.
Annealed: 90,000 TS; 45,000 YS; 56 El, 65 RA; 160 Brin.
For welded chemical plant equipment, Type 347; stainless, austenitic

HYDREX 375.
M-1411; 0.12 max C, 19-21 Cr, 10.5-12 Ni, bal Fe.
Annealed: 85,000 TS; 35,000 YS; 60 El; 70 RA; 150 Brin.
For core wire for welding electrodes; stainless, austenitic.

HYDREX 399
M-1411; 0.10 max C, 18.5-20 Cr, 8.5-10 Ni, 1.0-1.5 Mo, bal Fe
Annealed: 85,000 TS; 35,000 YS; 60 El; 70 RA; 150 Brin.
For core wire for welding electrodes, stainless, austenitic.

HYDREX 1212.
M-1411; 0.12 max C, 12-13 Cr, 11.5-12.5 Ni, bal Fe.
For auto trim, kitchenware, architectural uses; austenitic, stainless, malleable.

HYDREX CTY.
M-1411; 0.25-0.35 C, 12-14 Cr, 1 max Ni, bal Fe.
Annealed: 100,000 TS; 55,000 YS; 20 El; 50 RA; 210 Brin.
For cutlery, scissors, surgical instruments; Type 420; stainless, hardenable.

HYDREX ENGG.
M-1411; 0.19-0.25 C, 12-14 Cr, 1 max Ni, bal Fe.
Annealed: 95,000 TS; 50,000 YS, 25 El, 55 RA; 195 Brin.
For pump and piston rods, surgical instruments, cutlery; Type 420, stainless, hardenable.

HYDREX ENGG-FM.
M-1411; 0.20-0.27 C, 12-14 Cr, 1 max Ni, 0.4 Mo, 0.2 S, bal Fe
Annealed 100,000 TS; 55,000 YS, 20 El; 50 RA; 200 Brin.
For fittings, piston and pump rods, valves and valve seats; Type 420F, stainless, free-cutting

HYDREX HCI.
M-1411; 0.12 max C, 19.5-22.5 Cr, 0.25 max Ni, bal Fe.
For valve seats, stokers, fire grids; heat and scale resistant to 1000°C.

HYDREX HR356
M-1411, 0.15 max C, 20-22 Cr, 7-8 Ni, bal Fe
For welding electrodes, resists heat and scaling to 900°C

HYDREX HR393
M-1411; 0.25 C, 22-24 Cr, 10-12 Ni, 3 W, bal Fe.
For exhaust inlet valves, furnace impellers, stainless, austenitic, resists scaling to 1050°C.

HYDREX HR2520
M-1411, 0.12 max C, 24-26 Cr, 19-21 Ni, bal Fe.
For heat treating boxes, furnace muffles, oxidation and heat resistant to 1150°C

HYDREX HR6015
M-1411, 0.20 max C, 15 min Cr, 60 Ni, bal Fe
For furnace parts, recuperators, heat treating boxes, resists heat and scaling to 1100°C

HYDREX HRV
M-1411, 0.39-0.45 C, 13-14 Cr, 13.2-14.2 Ni, 2.5-3.0 W, bal Fe.
For exhaust and inlet valves, furnace impellers; high heat and corrosion resistance.

HYDREX MC1
M-1411; 0.12 max C, 12-14 Cr, 0.25 max Ni, bal Fe
Annealed. 75,000 TS; 40,000 YS; 35 El; 70 RA, 155 Brin
For turbine blades, cutlery, valves, fittings; Type 410; stainless

HYDREX MC1-FM
M-1411; 0.12 max C, 12-14 Cr, 1 max Ni, 0.4 Mo, 0.2 S, bal Fe.
Annealed. 75,000 TS; 40,000 YS; 35 El; 70 RA; 155 Brin.
For screw machine products, turbine blades; Type 410 F, free-cutting, stainless.

HYDREX MODIFIED WIM.
M-1411, 0.12 max C, 19-20 Cr, 9-10 Ni, 1.5-2.0 Mo, bal Fe.
Annealed: 85,000 TS; 35,000 YS; 50 El, 65 RA; 160 Brin.

For paper and pulp equipment, dye and bleaching equipment; Type 316; stainless, austenitic.

HYDREX S80.
M-1411; 0.13-0.18 C, 16.5-17.5 Cr, 1.6-2.0 Ni, bal Fe.
Annealed: 80,000 TS; 50,000 YS; 25 El; 50 RA; 150 Brin.
For valve spindles, impeller shafts, Type 430, stainless, martensitic.

HYDREX SPECIAL HR2520.
M-1411; 0.12 max C, 25-28 Cr, 19-21 Ni, bal Fe.
For welding electrodes; high creep and oxidation resistance.

HYDREX W.
M-1411; 0.12 max C, 18-20 Cr, 8-10 Ni, 0.5 Ti, bal Fe.
Annealed: 85,000 TS; 35,000 YS; 55 El; 65 RA, 150 Brin
For welded chemical plant equipment; Type 321; stainless, austenitic.

HYDREX W-FM.
M-1411; 0.15 C, 17-20 Cr, 7-10 Ni, 0.2-0.4 Mo, 0.5 Ti, bal Fe
Annealed: 85,000 TS, 35,000 YS; 50 El; 65 RA; 160 Brin
For acid resistant chemical plant equipment, Type 316Ti; stainless, austenitic

HYDREX WIM
M-1411, 0.12 max C, 19-20 Cr, 9-10 Ni, 2.7-3.2 Mo, bal Fe.
Annealed: 90,000 TS; 40,000 YS; 45 El; 60 RA; 170 Brin
For paper and pulp industry equipment; Type 317, stainless, austenitic

HYDREX XB (HR329)
M-1411; 0.74-0.89 C, 19.0-20.5 Cr, 1.15-1.65 Ni, bal Fe
For exhaust and inlet valves; resists exhaust gases containing lead

HYDRIL BEARING METAL.
M-42, 70 Cu, 30 Pb
10,000 TS
For bearings, heavy duty.

HYDRONALIUM.
M-1372, M-1375; 6-10 Mg, 0.2-0.7 Mn, 1.5 max Fe, bal Al
Heat treated: 48,000 TS; 26,000 YS, 16 El, 75 Brin
For light alloy parts, age hardenable

HYDRONALIUM.
M-1420, 1.5-3.5 Mg, bal Al
Sand cast: 19,900-27,000 TS, 11,400-14,000 YS, 8-3 El; 50-60 Brin.
For marine castings; corrosion resistant.

HYDRONALIUM 2
M-1375, 1.3 Mg, 0.4 max Mn, 0.3 max Cr, bal Al
Soft: 28,000 TS; 13,000 YS; 30 El; 47 Brin.
Hard: 42,000 TS; 37,000 YS; 8 El; 77 Brin
For marine products, aircraft structures; resists sea water corrosion.

HYDRONALIUM 3.
M-1375, 2-4 Mg, 0.4 max Mn, 0.3 max Cr, bal Al.
Soft: 30,000 TS; 15,000 YS; 28 El; 50 Brin.
For marine and aircraft parts; resists sea water corrosion

HYDRONALIUM 5.
M-78; 95 Al, 5 Mg.
Extruded: 33,000-36,000 TS; 13,000-14,000 YS; 16-22 El; 60-70 Brin.
For seaplane pistons, propellers; resists sea water.

HYDRONALIUM 5.
M-1375; 4.0-5.5 Mg, 0.8 max Mn, 0.3 max Cr, bal Al
Soft: 42,000 TS; 22,000 YS; 35 El; 65 Brin.
Hard: 60,000 TS; 50,000 YS; 15 El; 100 Brin.
For marine hardware, aircraft parts; corrosion resistant.

HYDRONALIUM 7
M-78; 7 Mg, 0.45 Mn, bal Al.
Rolled: 52,000 TS; 32,000 YS; 12 El; 115 Brin.
For light alloy parts, seaplane pontoons and propellers; resists sea water corrosion

HYDRONALIUM 7.
M-1375; 5.5-7.5 Mg, 0.8 max Mn, 0.3 max Cr, bal Al.
For light alloy parts; corrosion resistant.

HYDRONALIUM 9.
M-78, 9 Mg, bal Al.
Rolled: 60,000 TS; 40,000 YS; 10 El.
Extruded: 54,000 TS; 25,000 YS, 20 El, 45 RA; 82 Brin.
For seaplane pontoons and propellers; resists sea water corrosion.

HYDRONALIUM 10.
M-78; 1.0 Mg, 0.5 Mn, 0.2-1.5 Si, bal Al.
Forged: 54,000 TS; 32,000 YS; 15 El; 93 Brin
For seaplane pontoons and propellers; resists sea water corrosion.

HYDRONALIUM 21.
M-1375, 0.6-1.4 Mg, 0.6-1.6 Si, 0.6-1.0 Mn, 0.3 max Cr, bal Al
Soft: 28,000 TS, 13,000 YS; 30 El, 47 Brin.
For marine products, aircraft structures, corrosion resistant.

HYDRONALIUM 43.
M-78; 4.5 Zn, 3.5 Mg, bal Al.
Wire: 70,000 TS, 45,000 YS; 16 El.
Sheet: 63,000 TS; 40,500 YS; 18.5 El.
For light alloy parts, heat treatable.

HYDRONALIUM 43
M-1375, Mg, Zn, bal Al.
For aircraft and light alloy parts.

HYDRONALIUM 51
M-78, 0.2-1.5 Si, 5-12 Mg, 0.2-0.5 Mn, bal Al.
Cast: 23,000-27,000 TS, 13,000-18,000 YS; 2-5 El; 60-70 Brin
For light alloy parts, aircraft components; corrosion resistant.

HYDRONALIUM 51.
M-1375, 5-12 Mg, 0.2-1.5 Si, 0.2-0.5 Mn, Cr, Ti, bal Al
Sand cast: 23,000-27,000 TS; 13,000-18,000 YS; 2-5 El; 60-70 Brin.
For gasoline flow meters, engine components; corrosion resistant.

HYDRONALIUM 71.
M-78; 7 Mg, bal Al.
Cast: 32,000-36,000 TS; 17,000-20,000 YS; 5-8 El; 70-80 Brin.
For gasoline flow meters and aircraft parts; corrosion resistant.

HYDRONALIUM 71.
M-1375; 7 Mg, Si, Mn, Cr, Ti, bal Al.
Permanent mold: 32,000-36,000 TS; 17,000-20,000 YS, 5-8 El; 70-80 Brin.
For marine and aircraft parts; corrosion resistant.

HYDRONALIUM 91.
M-1375; Mg, Si, Mn, Cr, Ti, bal Al.
For light alloy parts.

HYDRONALIUM 511.
M-78; 0.3 Fe, 0.2 Mn, 5 Mg, 1 Si, 0.1 Ti, bal Al.
For castings; sand.

HYDRONALIUM 5112.
M-78; 1 Cu, 0.3 Fe, 0.1 Mn, 5 Mg, 1 Si, 0.1 Ti, 0.18 Be, bal Al.
For sand castings; heat treatable.

HYDRONALIUM D.B.A.
M-78; Al alloy.
For light alloy parts, aircraft parts; corrosion resistant.

HYDRONALIUM HY25.
M-1548, 0.2-1.0 Si, 0.2-0.5 Mn, 3.0-12.0 Mg, bal Al.
Soft: 27,000 TS, 12,800 YS, 24 El; 50 Brin.
Half Hard: 36,000 TS; 26,000 YS; 10 El, 60 Brin
For hardware, aircraft parts.
Not heat treatable.

HYDRONALIUM HY51.
M-1420; 5-12 Mg, 0.2-1.5 Si, 0.2-0.5 Mn, bal Fe.
Sand Cast: 23,000-28,000 TS; 11,400-14,400 YS; 5.0-2.5 El; 55-70 Brin.
For aircraft and marine equipment; corrosion resistant to sea water.

HYDRONALIUM HY71.
M-1420, 7 Mg, Si, Mn, bal Al.
Permanent mold 32,000-36,000 TS; 17,000-20,000 YS; 8-5 El; 70-80 Brin.
For aircraft and marine equipment, corrosion resistant to sea water.

HYDRONE.
Eng.; 67 Pb, 33 Sb
For bearings; light shocks only

HYDRONE.
M-308, 31 Na, bal Pb.
Used as a deoxidizer; for non-ferrous metals

HYDRO-T-METAL.
M-1505; 0.4-0.7 Cu, 0.08-0.16 Ti, 0.002-0.010 Mn, 0.003-0.02 Cr, bal Zn.
Rolled: 26,500 TS; 20,000 YS, 36 El
For auto trim, furniture, rain gutters, hardware, electrical fixtures; stable, corrosion resistant.

HYDRO-T-METAL 200
M-1505, M-226; 0.3-1.25 Cu, 0.1-0.4 Ti, bal Zn.
Sheet 24,000 TS, 10 El; 55 Brin
For roofing, gutters, trim, fuses, housings, curtain walls. High creep resistance.

HYFLUX ALNICO V
M-1076; 8 Al, 14 Ni, 24 Co, bal Fe
For permanent magnets, high energy product

HYFLUX ALNICO V-7.
M-1076; 8 Al, 14 Ni, 24 Co, bal Fe.
5000 TS.
For permanent magnets, oscillographs, galvanometers; 7 million energy product.

HYFLUX ALNICO-IX.
M-1076; 7 Al, 15 Ni, 35 Co, 34 Fe, 4 Cu, 5 Ti.
Energy product 9,500,000 gauss-oersteds.
Coercive force 1400 oersteds.
Residual induction 10,500 gausses.
For straight field focusing devices, repulsion and torque transmitters, motors, space age applications.
Permanent magnet. Resists demagnetization.

HY-GLO HYGLO 440A.
M-73; 17-18 Cr, 0.5 max Mn, 0.6-0.7 C, bal Fe.
Annealed: 100,000 TS; 70,000 YS; 20 El; 50 RA; 187 Brin.
Heat treated: 282,000-215,000 TS; 248,000-190,000 YS; 0-3 El; 0-7 RA; 580-420 Brin.
For cutlery, tools, machine parts; stainless, corrosion resistant.

HYKRO.
M-50, M-1414; 0.25 C, 0.55 Mn, 3.2 Cr, 0.50 Mo, bal Fe.
Oil Harden: 104,000-145,000 TS; 83,000-121,000 YS, 20-28 El; 65-72 RA; 75-110 Izod.
For crankshafts, cylinder liners, gears, machine parts.
Nitriding steel Wear resistant

HYKRO-V.
M-50, M-1414, 0.40 C, 0.60 Mn, 3.0 Cr, 0.90 Mo, 0.20 V, bal Fe.
Oil Hardened: 184,000-260,000 TS; 157,000-197,000 YS; 15-20 El, 54 RA, 23-40 Izod.
For gears, cams, camshafts, rollers
Oil or nitride hardening

HYKRO V-80.
England; 0.2 C, 3 Cr, 0.6 Mo, 0.5 W, 0.8 V, bal Fe.
For oil refinery equipment, corrosion and heat resistant

HYLASTIC.
M-473; 0.30 C, 1.6 Mn, 0.10 V, 0.4 Si, bal Fe
Normalized 100,000-90,000 TS; 76,000-60,000 YS; 28-25 El; 58-50 RA, 180 Brin
For railroad and structural work where high physicals are required, Iz-40

HYLITE-1
M-261; 100 Ti
Rolled: 78,000 TS; 38,000 YS, 30 El
For the chemical industries
Commercially pure Ti

HYLITE 10
M-261, Ti
Bar: 60,500 TS, 36,000 YS, 30 El, 150 Brin
Sheet. 61,600 TS, 44,800 YS, 20 El; 160 Brin
For aircraft parts, good form- and weldability

HYLITE 15
M-261, Ti
Bar 71,700 TS; 44,800 YS, 25 El
Sheet 76,200 TS; 56,000 YS; 18 El
For aircraft parts, alpha type

HYLITE-15H
M-261, 100 Ti
Rolled. 98,000 TS, 78,000 YS, 27 El
For the chemical industry
Commercially pure Ti with addition of oxygen to raise strength

HYLITE 20
M-261; 5 Al, 2.5 Sn, bal Ti
Bar 125,500 TS; 103,000 YS; 18 El
For aircraft and missile components, alpha type.

HYLITE-25
M-261, 2.5 Cu, bal Ti
Rolled 85,000 TS; 64,000 YS; 27 El
For the chemical industry
Alpha-eutectoid alloy. Good weldability, and ductility.

HYLITE 30
M-261; 2 Mn, 2 Al, bal Ti
Bar: 98,600 TS; 80,600 YS; 20 El.
For compressor discs and blades, fasteners, fuel systems; heat treatable.

HYLITE 40.
M-261; 4 Mn, 4 Al, bal Ti.
Bar: 138,900 TS; 130,000 YS; 18 El.
For compressor discs and blades, fasteners, fuel systems; heat treatable.

HYLITE 45.
M-261; 6 Al, 4 V, bal Ti.
Bar 141,200 TS; 130,000 YS; 22 El.
For compressor discs and blades, fasteners, fuel systems; heat treatable.

HYLITE-50.
M-261, 4 Al, 4 Mo, 2 Sn, 0.5 Si, bal Ti.
Bar 161,300 TS; 143,400 YS; 15 El.
For compressor discs and blades, fuel systems, fasteners.
Heat treatable.

HYLITE-51
M-261; 4 Al, 4 Mo, 4 Sn, 0.5 Si, bal Ti
Heat treated. 200,000 TS, 179,000 YS, 15 El.
For heavy duty service aircraft structural members
Alpha-beta alloy. Good creep properties.

HYLITE-55.
M-261; 6 Sn, 5 Zr, 3 Al, 0.5 Si, bal Ti
Heat treated: 130,000 TS, 116,000 YS, 16 El
For turbine compressor blades and discs.
Alpha titanium alloy. Good properties, to over 500°C High temperature strength.

HYLITE-60
M-261; 3 Al, 6 Sn, 5 Zr, 2 Mo, 0.4 Si, bal Ti
At 70°F: 157,000 TS, 135,000 YS, 14 El.
At 1000°F. 90,000 TS, 81,000 YS
For turbine compressor blades and discs up to 500°C
Good creep and tensile properties Alpha-beta titanium alloy

HYLITE-65
M 261; 6 Sn, 5 Zr, 3 Al, 0.5 Mo, 0.5 Si, bal Ti
Heat treated 155,000 TS, 136,000 YS, 13 El, 27 RA
At 600°C 91,400 TS, 69,500 YS, 16.5 El, 49 RA
For jet engine compressor components, discs, spacers, blades
High creep resistance, weldable
Near alpha alloy, heat treatable

HY-I O
M-336, 0.85 C, 2.24 Mn, 0.1 V, bal Fe
For dies, non-shrinking

HY-I O
M-712, 0.12 C, 0.77 Mn, 0.72 Si, 0.8 Mo, bal Fe
Welded 79,000-85,000 TS, 67,000-72,000 YS, 26-20 El, 50-35 RA
For welding, A.W.S.-E7015, low H_2 content

HYMALAYA
M-1308, 1.2 C, 0.40 Si, 12.5 Mn, bal Fe
For earth moving equipment, dipper teeth; wear and abrasion resistant

HYMAN
Eng., 58.3 Ag, 16.7 Cu, 16.7 Zn, 8.3 Ni.
For jewelry, ornaments, Nickel silver

HYMAN ALLOY
0.8 Si, 3 Cu, 0.5 Mg, 0.5 Ni, bal Al
Heat treated 36,000-43,000 TS, 6-9 El
For light alloy parts; age-hardenable.

HYMAX 3% COBALT MAGNET
M-210; 3 Co, 1.15 C, 10 Cr, 1.5 Mo, bal Fe
Cast
For magnet steel; Br-7000-6750; Hc-140-130; B.H. max 410,000.

HYMAX 6% COBALT MAGNET
M-210; 1.15 C, 6 Co, 10 Cr, 1.5 Mo, bal Fe
Cast.
For magnet steel; Br-7250-7000; Hc-160-145; B.H. max 460,000

HYMAX 9% COBALT MAGNET.
M-210, 9 Co, 1.15 C, 10 Cr, 1.5 Mo, bal Fe.
Cast.
For magnet steel; Br-7550-7250; Hc-175-165; B.H. max 527,000

HYMAX 15% COBALT MAGNET.
M-210; 15 Co, 1.15 C, 10 Cr, 1.5 Mo, bal Fe.
Cast
For magnet steel; Br-7850-7600; Hc-200-220; B.H. max 648,000

HYMAX 35% COBALT MAGNET.
M-210; 35 Co, 0.85 C, 4.5 W, 6 Cr, bal Fe.
Cast
For magnet steel; Br-8800-8350, Hc-265-240.

HYMU 80
M-32, 0.1 max C, 80 Ni, 4 Mo, bal Fe.
Cold Drawn: 97,000 TS; 69,000 YS; 37 El; 71 RA; 220 Brin
For transformer cores, magnetic shields, hydrogen annealed.

HYMU-400
M-32; 4 Mo, 79 Ni, bal Fe.
For laminations for motor cores, toroids
High permeability, soft magnet.

HYMU-800
M-32, 4 Mo, 79 Ni, bal Fe
For laminations for motor cores, toroids
High magnetic permeability, soft magnet.

HYNICAL
M-England, 31 Ni, 12.5 Al, 0.4 Ti, bal Fe
For permanent magnets, electrical and magnetic equipment High permeability.

HYNICO-I
M 200, 19 Ni, 12 Co, 10 Al, 6 Cu, bal Fe
For permanent magnets, electrical and magnet equipment High permeability

HYNICO-II
M-200; 20 Ni, 20 Co, 8 Al, 4 Cu, 4 Ti, 0.8 Cb, bal Fe
For permanent magnets, magnetic and electrical equipment High magnetic permeability

HYPERM 4
M-72, C, 2.5-4.5 Si, bal Fe
For precision transformers; magnetic alloy.

HYPERM 6
M-72 C, Si, bal Fe For magnets, electrical apparatus, magnetic alloy, high induction

HYPERM 36
M-72, C, alloy, bal Fe
For magnets, electrical apparatus, magnetic alloy, high permeability.

HYPERM 50 Y
M 72, C, high Ni, bal Fe
For magnets, electrical apparatus; magnetic alloy, high permeability

HYPERM-702
M-1309, 0.10 C, 0.10 Si, 1.4 Mn, 3.25 Mo, 9.0 Cu, 74 Ni, bal Fe
For electrical and magnetic equipment magnets.
High permeability

HYPERM 766
M-1309, 0.10 C, 0.10 Si, 0.65 Mn, 2.0 Cr, 3.25 Mo, 5.0 C, 76.0 Ni, bal Fe.
For electrical and magnetic equipment magnets.
High permeability

HYPERM-Co 27
M-72; 0.006 C, 27.5 Co, 0.002 Oxy., bal Fe.
Annealed: 80,000 TS; 45,000 YS; 15 El; R 85 Rock

Cold Rolled: 100,000 TS; 90,000 YS; 1 El; C 30 Rock.
For torque motors, generators, pole pieces, relays, alternators, transformer rectifiers.
Soft magnetic alloy, high magnetic saturation.
Operates at high flux levels.

HYPERM-Co 50.
M-72; 49 Co, 2 V, bal Fe.
Annealed: 80,000 TS; 48,000 YS; 0.5 El; B 97 Rock.
Cold Rolled: 195,000 TS; 185,000 YS; 1 El; C 35 Rock.
For electric motors, computors, transformers, magnetic amplifiers, magnetostriction reducers.
Magnetically soft for high flux levels.
High permeability at high inductions.

HYPERM-O.
M-72; Ni, bal Fe.
For electrical equipment.

HYPERNOM.
M-118; 79 Ni, 4 Mo, bal Fe.
Hot rolled: 125,000 TS; 112,000 YS; 17.5 El; 165 Brin; 85 Rock B
For telephone loading coils, instrument transformers, electronic shields, magnetometers; high permeability, low fields

HYPERSILICIE.
English; 3 Cu, 0.5 Fe, 18 Si, bal Al.
For pistons; low density, cast

HYPERSILID.
M-846; C, 14-16 Si, bal Fe.
For castings; cast iron, acid resistant.

HYPOCRODE.
M-494; C, 12.5-14.5 Ni, 6.5-7.5 Cu, 4.75-5.75 Cr, bal Fe.
25,000-30,000 TS; 150 Brin.
For hydraulic parts, pump bodies, impellers, plungers, liners, furnace parts, burners, fire bars; austenitic cast iron; corrosion, heat and erosion resistant.

HY-PRESS 20.
M-1724; 0.06 C, 0.58 Mn, 0.16 Cu, 0.02 Nb, bal Fe.
As rolled: 63,000-72,000 TS; 47,000-54,000 YS; 30-34 El.
Sheet and strip for stamped and formed parts; weldable.

HY-PRESS 23.
M-1724; 0.08 C, 0.56 Mn, 0.16 Cu, 0.025 Nb, bal Fe.
As rolled: 67,000-76,000 TS; 51,000-58,000 YS; 28-34 El.
Sheet and strip for stamped and formed parts; weldable.

HY-PRESS 26.
M-1724; 0.10 C, 0.90 Mn, 0.17 Cu, 0.024 Nb, bal Fe.
As rolled: 74,000-85,000 TS; 56,000-65,000 YS; 25-31 El.
Sheet and strip for stamped and formed parts; weldable.

HY-PRESS 29.
M-1724; 0.12 C, 1.2 Mn, 0.17 Cu, 0.03 Nb, bal Fe.
As rolled: 78,000-87,000 TS; 65,000-72,000 YS; 24-29 El.
Sheet and strip for stamped and formed parts; weldable.

HYPRO 61 AIR HARDENING.
M-336; 1.5 C, 11.5 Cr, 0.8 Mo, 2 V, bal Fe.
For gages, drawing dies, trimmers; air hardening.

HYPRO NO. 62.
M-336; 2.0 C, 12 Cr, 0.6 Mn, bal Fe.
122,000 TS; 54,000 YS; 7.6 El; 257 Brin.
For general tools, high production tools, stamping and blanking dies; non-deforming.

HYPRO-62-O.H.
M-336; 2.2 C, 12 Cr, 1 V, bal Fe
Hardened: C 64-67 Rock.
For blanking and forming dies, burnishing tools and rolls, plug gauges, slitting cutters, drawing dies.
Type D3 oil hardening cold work steel, deep hardening, abrasion resistant.

HYPRO 63.
M-336; 1.7 C, 18 Cr, bal Fe.
For dies, punches, rotary shears, gauges; non-shrink, deep hardening.

HYPRO A.
M-334; 0.35 C, 7.5 Cr, 7.5 W, 1.5 Si, bal Fe.
For dies; oil or air hardened

HYPRO B
M-334; 0.35 C, 5.2 Cr, 5.2 W, 0.2 V, 0.2 Mo, 0.3 Co, 0.9 Si, bal Fe
For dies, punches; air hardened

HY-RA 49.
M-32; 49 Ni, bal Fe.
For electronic devices, magnetic amplifiers; high permeability.

HY-RA 80.
M-32, 79 Ni, 0.05 C, 4 Mo, 0.5 Mn, 0.15 Si, bal Fe
For electronic devices, magnetic amplifiers, high permeability

HY-SPEED
M-256; 88 Cu, 10 Sn, 2 Pb
For bushings, bearings; heavy duty

HYTEMPCO
M-44; 70 Ni, bal Fe.
Wrought 150,000-70,000 TS
For immersion heaters, heater pads, electrical resistances; max operating temperature 500°C

HY-TEN "A" NO 1-S.
M-119, 0.15 C, Mn, Mo, bal Fe
Hot rolled: 80,000 TS, 50,000 YS, 37 El; 68 RA; 163 Brin
Cold rolled: 98,000 TS, 90,000 YS, 15 El, 56 RA; 200 Brin
For gears, cams, worms, bolts, clutches, case hardening

HY-TEN A NO. 1 X.
M-119; 0.20 C, Mo, Mn, bal Fe.
Rolled: 85,000 TS; 55,000 YS; 35 El, 65 RA, 163 Brin
Heat treated: 140,000 TS; 120,000 YS; 10 El; 35 RA; 311 Brin.
For carburized pins, cams, gears, gauges, bolts, shafts, case-hardening steel.

HY-TEN A2
M-119; 1.0 C, 5 Cr, 1 Mo, 0.4 Mn, 0.4 V, bal Fe.
Annealed: 103,000 TS; 52,000 YS; 26 El; C 18 Rock.
Hardened: 178,000-253,000 TS, 146,000-200,000 YS; 3-12 El; 7-32 RA; C 41-53 Rock.
For blanking and trimming dies, cams, cutters, gauges, lamination dies, shears.
Type A2 air hardening tool steel, nondeforming.

HY-TEN "A" NO. 15.
M-119; 0.15 C, Ni, Mo, bal Fe.
Heat treated: 118,000 TS; 85,000 YS; 25 El; 65 RA; 235 Brin.

For carburized arbors, camshafts, piston pins, ratchets, worms, valve tappets, pinions; similar to SAE 4615.

HY-TEN "A" Temper NO. 20.
M-119; 0.20 C, 0.60 Ni, 0.55 Cr, 0.20 Mo, bal Fe.
Heat treated: 167,000 TS; 138,000 YS; 11 El; 52 RA; 352 Brin.
For gears, worms, clutches, arbors, spindles, rolls, toggle pins
Carburizing alloy steel, shock resistant.

HY-TEN "B" NO. 2
M-119, 0.40 C, Mn, Cr, bal Fe.
Hot rolled: 100,000 TS; 62,000 YS; 25 El; 47 RA; 201 Brin.
Heat treated 160,000 TS, 122,000 YS, 11 El; 33 RA, 321 Brin.
For shafts, spindles, tap shanks, sleeves, worms, arbors, gears; free machining; tough

HY-TEN "B" NO. 3 X
M-119, 0.5 C, Cr, Mn, Mo, bal Fe
Rolled: 135,000 TS, 70,000 YS; 18 El; 45 RA; 293 Brin.
Heat treated: 240,000 TS, 220,000 YS, 10 El; 40 RA; 477 Brin.
For clutches, gears, drive shafts, pinions, connecting rods, mandrels, readily machined at high hardness

HY-TEN "B" TEMPER NO. 3-X-40.
M-119, 0.40 C, 1.1 Mn, 0.75 Cr, 0.20 Mo, 0.08 S, bal Fe
Heat treated 230,000 TS; 215,000 YS; 11 El, 43 RA; 460 Brin
Annealed 95,000 TS; 64,000 YS, 25 El, 57 RA; 183 Brin
For gears, clutches, arbors, cams, mandrels; oil hardened, impact resistant

HY-TEN "B" NO 4
M-219, 0.50 C, Mn, Cr, bal Fe
Annealed: 95,000 TS; 60,000 YS, 28 El, 60 RA, 179 Brin
Heat treated. 240,000 TS, 222,000 YS, 10 El; 43 RA, 477 Brin
For gears, clutches, shafts, pins, springs, oil hardened, tough

HYTEN B-43
M-119, 0.40-0.45 C, 0.65-0.85 Cr, 1.5-2.0 Ni, 0.3 Mo, bal Fe
Heat treated: 326,000-132,000 TS; 294,000-117,000 YS, 10-61 El, 32-69 RA, 627-285 Brin.
For heavy duty gears, shafts, pinions, bolts, oil hardened.

HY-TEN B NO 340
M-119; 0.43 C, 0.95 Mn, 0.75 Cr, 0.25 Mo, bal Fe.
Heat treated 265,000-167,000 TS, 235,000-153,000 YS, 10-17 El, 32-54 RA; 555-341 Brin
For zinc die casting dies, gears, shafts, cutters, impact resistant, deep hardening

HY-TEN B NO 350
M-119; 0.45 C, 1.05 Mn, 0.85 Cr, 0.25 Mo, bal Fe.
Heat treated. 290,000-185,000 TS, 255,000-170,000 YS; 10-16 El; 32-52 RA; 555-321 Brin
For plastic molds, stripper and bolter plates; impact resistant, deep hardening.

HYTENAL BRONZE.
Eng.; 60 Cu, 10 Al, 6 Fe, 19 Zn, 5 Mn
105,000 TS; 65,000 YS; 20 El.
For staybolts, pump rods, valves, valve spindles; corrosion resistant.

HY-TEN D-2.
M-119; 1.5 C, 11.5 Cr, 0.9 V, 0.4 Mn, 0.8 Mo, bal Fe.
For forming and drawing dies, punches; air hardened, non-deforming.

HY-TEN M.
M-119; 0.7 C, 0.6 Mn, 1.35 Ni, 0.65 Cr, 0.25 Mo, bal Fe.
Annealed: 95,000 TS; 55,000 YS; 25 El; 55 RA, 180 Brin.
Heat treated: 230,000 TS; 200,000 YS; 10 El; 35 RA, 444 Brin.
For cams, arbors, gauges, springs, clutches, dies; Type L6, shock and wear resistant.

HY-TEN "MC" TEMPER.
M-119, 0.70 C, 0.80 Cr, 0.50 Ni, 0.25 Mo, 0.08 V, bal Fe.
Annealed: 96,000 TS; 71,000 YS; 24 El; 53 RA; 200 Brin.
Heat treated: 302,000 TS, 279,000 YS; 653 Brin
For gears, arbors, punches, clutches, oil hardened, shock resistant

HY-TEN MOLD
M-119, 0.35 C, Mn, Cr, Mo, bal Fe
Heat treated 160,000-240,000 TS; 132,000-205,000 YS, 19-10 El; 58-37 RA; 311-475 Brin.
For plastic molds, Zn die cast molds, tie rods, shock and impact resistant.

HY-TEN PNEUMATIC CHISEL
M-119, 0.60 C, 0.85 Mn, 2 Si, 0.30 Cr, bal Fe
For chisels, punches, cold cutters, pick points; oil hardened, shock resistant.

HYTENSIL ALUMINUM NO 375
M-847, 98 Al.
Heat treated 48,000 TS, 3 El, 100 Brin.
For light alloy parts, corrosion resistant

HYTENSILITE
M-847, 98 Al, bal other elements
Cast 32,000 TS; 28,000 YS, 15 El; 40 Brin
Heat treated: 45,000 TS, 41,000 YS; 5 El, 100 Brin
For light alloy parts; corrosion resistant

HY-TEN-SL GR 1 A
M-129, 60-68 Cu, 20-24 Zn, 3-7 Al, 2-5 Mn, 2-4 Fe.
Sand cast. 115,000 TS, 70,000 YS, 12 El, 12 RA; 210 Brin
Forged 120,000 TS, 73,000 YS, 8 El, 8 RA; 240 Brin
For gears, worm wheels, bearings, wear and corrosion resistant.

HY-TEN SL BRONZE GRADE 1
M-129, 60-68 Cu, 20-24 Zn, 3-7 Al, 2.5-5.0 Mn, 2-4 Fe
Cast 108,000 TS, 65,000 YS, 14 El, 14 RA; 220 Brin
For pump and fan impellers, gears, valves; wear and corrosion resistant

HY-TEN-SL BRONZE GR. 2.
M-129, 60-68 Cu, 20-24 Zn, 3-7 Al, 2.5-5.0 Mn, 2-4 Fe.
Cast 100,000 TS; 55,000 YS, 16 El; 16 RA, 200 Brin
For pump and fan impellers, gears, valves, wear and corrosion resistant.

HY-TEN-SL BRONZE GR. 3
M 129, 60-68 Cu, 20-24 Zn, 3-7 Al, 2.5-5.0 Mn, 2-4 Fe.
Cast: 90,000 TS; 45,000 YS, 20 El; 20 RA; 175 Brin
For impellers, gears, valves; wear and corrosion resistant.

HY-TEN-SL BRONZE GR. 4.
M-129; 60-68 Cu, 20-24 Zn, 3-7 Al, 2.5-5.0 Mn, 2-4 Fe
Rolled: 85,000 TS; 40,000 YS; 25 El; 25 RA; 150 Brin.
For impellers, gears, valves; wear and corrosion resistant.

HY-TENSO M20.
M-775; 2.4 C, 1.2 Si, alloy, bal Fe.
Cast: 75,000 TS, 50,000 YS; 5 El, 200 Brin.
For stoker parts, stove and grate parts, dampers, cast iron, pearlitic

HY-TENSO M-51.
M-775; 2.3 C, 1.2 Si, bal Fe.
Cast: 65,000 TS; 40,000 YS; 4-8 El, 185 Brin.
For chain links, connecting rods, gears; refined pearlitic malleable iron.

HY-TEST-ROD NO 85.
M-1096; 0.10-0.15 C, 0.95-1.05 Mn, 0.25-0.35 Si, 0.4-0.6 Mo, bal Fe
Welded: 85,000-95,000 TS, 65,000-75,000 YS; 18-22 El; 25-35 RA.
For welding rod; AWS-E8011.

HY-TEST-ROD NO 110.
M-1096; 0.12 C, 0.6 Mn, 0.3 Mo, 0.6-1.0 Cr, bal Fe.
Welded. 110,000 TS, 100,000 YS, 15 El, 20 RA; 200 Brin.
For hard facing electrode; for moderate shock resistance.

HY-TUF
M-38; 0.25 C, 1.3 Mn, 1.5 Si, 1.8 Ni, 0.4 Mo, bal Fe.
Heat treated. 234,000 TS; 193,000 YS; 13 El; 50 RA; 470 Brin
For engineering parts, gears, shafts, tough

HZ32A.
Various foundries; 2.1 Zn, 0.7 Zr, 3.0 Th, bal Mg.
T5-temper: 27,000-30,000 TS, 13,000-14,000 YS; 4-7 El, 57 Brin; 68 Rock E.
At 700°F. 10,000 TS, 7000 YS, 29 El
Magnesium sand castings with good pressure tightness and weldability, some permanent mold
For parts operating at 350-700°F
ASTM B80-69, AMS 4447; QQ-M-56

IA-IA
M-345, M-303, 58-60 Cu, 42-40 Ni, 1.0 Fe + Mn
70,000 TS; 46 El
For resistances, thermocouples, negligible temperature coefficient

I A S INVINCIBLE
M-1406, 1.2 C, 1.6 W, 0.75 Cr, 0.25 Mo, 0.25 V, bal Fe.
For finishing tools, paper and wood working knives; tough, cold work steel.

"IAT" QUALITY.
M-179, Cu, Mn, 0.3 max Pb, bal Zn.
Extruded 75,000 TS, 37,000 YS; 28 El; 20 RA; 130 Brin.
Drawn. 85,000 TS; 42,000 YS, 25 El; 18 RA; 135 Brin.
For hardware; manganese bronze.

ICI 13518.
M-282; 0.25 C, 27.5 Cr, 5.5 Mo, 2.75 Ni, 3 max Fe, bal Co.
Cast: 52,000 TS; 10 El; 340 Brin.
For high temperature applications; heat resistant

ICI 13530.
M-282; 0.5 C, 25.5 Cr, 2 max Fe, 10.5 Ni, 7.5 W, bal Co.
Cast: 50,000 TS; 10 El; 340 Brin.
For high temperature applications; heat resistant.

I.C.I. TITANIUM 115
M-282, 0.010 max H_2, 0.20 max Fe, bal Ti.
Bar: 58,300 max TS; 30 min El.
For high temperature applications, corrosion resistant parts.
Commercially pure titanium.

I.C.I. TITANIUM 120
M-282; 0.010 max H_2, 0.20 max Fe, bal Ti.
Sheet 67,000 max TS; 25 min El.
For high temperature components, corrosion resistant parts
Commercially pure titanium

I.C.I. TITANIUM 125
M-282, 0.010 max H_2, 0.20 max Fe, bal Ti.
Sheet 56,000-78,500 TS, 22 min El.
For high temperature components, corrosion resistant parts
Commercially pure titanium

I.C.I. TITANIUM 130
M-282; 0.010 max H_2, 0.20 max Fe, bal Ti.
Sheet: 56,000-79,000 TS, 22 min El
For high temperature components, corrosion resistant parts.
Commercially pure titanium

I.C.I. TITANIUM 150
M-282, 0.010 max H_2, 0.20 max Fe, bal Ti
Bar 79,000-100,000 TS, 18 El
For high temperature components, corrosion resistant parts
Commercially pure titanium.

I.C.I. TITANIUM 160
M-282; 0.010 max H_2, 0.20 max Fe, bal Ti
Bar 89,000-112,000 TS, 18 El, 40 RA
For high temperature applications, corrosion resistant parts, non-structural aircraft parts
Commercially pure titanium DTD 5063 spec

I.C.I. TITANIUM 230
M-282, 1.8-2.8 Cu, bal Ti
Bar 71,000-100,000 TS, 20 min El
For high temperature applications, corrosion resistant parts.
Good strength retained up to 300°C

I.C.I. TITANIUM 314A
M-282, 3.0-5.0 Al, 3.0-5.0 Mn, bal Ti.
Bar 139,000 min TS, 15 min El.
For jet engine and guided missile components
High strength and good creep resistance, to 300°C

I.C.I. TITANIUM 314C
M-282, 2 Al, 2 Mn, bal Ti
Bar 94,000-117,000 TS, 20 min El.
For high temperature applications, missile and jet engine components
Heat and corrosion resistant

I.C.I. TITANIUM 317
M-282; 4.5-5.5 Al, 2.0-3.0 Sn, bal Ti.
Bar. 116,000 min TS; 10 min El
For aircraft and guided missile components.
Good retention of strength and creep resistance up to 400°C Good weldability.

I.C.I. TITANIUM 318A.
M-282; 5.5-6.5 Al, 3.5-4.5 V, bal Ti
Bar: 139,000 min TS; 10 min El.
For jet engine components, airframe forgings and fasteners.
Good retention of strength and creep resistance to 300°C.

I.C.I. TITANIUM 679
M-282; 2.0-2.5 Al, 0.8-1.2 Mo, 0.1-0.5 Si, 10.5-11.5 Sn, 4.0-6.0 Zr, bal Ti
Bar: 150,000 min TS, 12 min El.
For compressor blades
High creep resistance.

ICN 001.
M-1302; 0.08-0.20 C, 2 max Mn, 17-19 Cr, 8-10 Ni, bal Fe.
Annealed 85,000 TS; 35,000 YS, 60 El, 70 RA; 150 Brin
Cold drawn· 125,000 TS; 95,000 YS, 25 El, 55 RA, 277 Brin
For oil refinery and chemical plant equipment, Type 302, stainless, austenitic.

ICN 164
M-1302, 0.10 max C, 16-18 Cr, 10-14 Ni, 2-3 Mo, bal Fe
Annealed 85,000-95,000 TS; 35,000-45,000 YS, 60-50 El; 75-60 RA, 150-190 Brin
For acid-resistant chemical plant equipment, Type 316, stainless, austenitic

ICN 164 T (Ti)
M-1302, 0.10 C, 16-18 Cr, 10-14 Ni, 1.7-2.7 Mo, Ti, bal Fe
Annealed 85,000-95,000 TS, 35,000-45,000 YS, 60-50 El, 75-60 RA, 150-190 Brin
For acid resistant chemical plant equipment, Type 316 Ti, stainless, austenitic

ICN 472
M-1302, 0.08 max C, 18-20 Cr, 8-11 Ni, 2 max Mn, bal Fe
Annealed 90,000 TS, 45,000 YS, 60 El, 135 Brin
Cold drawn 180,000 TS, 150,000 YS, 10 El; 330 Brin
For chemical plant equipment welded structures; Type 304, stainless, austenitic

ICN 472T
M-1302, 0.08 max C, 17-19 Cr, 8-11 Ni, Ti = 5 × C, bal Fe
Normalized 93,000 TS; 36,000 YS, 45 El, 60 RA, 165 Brin
Annealed· 87,000 TS, 33,000 YS, 57 El, 73 RA; 155 Brin
For chemical plant equipment, Type 321, stainless, austenitic

IDEAL
40-45 Ni, 1.0-0.66 Fe, 0.45-1.0 Mn, 53.4-58 Cu, 0-0.66 Al.
For resistances, heat resistant

IDEAL (ELALCO)
M-44, 58-53 Cu, 40-45 Ni, 0.6-1.0 Fe, 0.5-1.0 Mn
For electrical resistors, heating elements, heat resistant

IDEAL BC12V.
M-1346, 2.1 C, 11.5 Cr, bal Fe.
For blanking and forming dies, punches; oil or air hardened, nondeforming

IDEAL BC13V.
M-1346; 1.65 C, 11.5 Cr, 0.1 V, 0.35 Si, 0.3 Mn, bal Fe.
For blanking and forming dies, punches, nondeforming, air hardened.

IDEAL BCK1.
M-1346; 1.45 C, 1.4 Cr, bal Fe
For fast finishing cutters, bearings, liners; water hardened, wear resistant

IDEAL BCK2.
M-1346; 1.0 C, 1.55 Cr, bal Fe.
For bearings, bushings, liners, water hardened, wear resistant.

IDEAL BCK3.
M-1346, 1.05 C, 1.0 Cr, bal Fe

IDEAL BCK4.
M-1346; 1.0 C, 1.1 Cr, bal Fe
For bearings, liners, bushings, sleeves, cutters; water hardened.

IDEAL BCR.
M-1346, 1.05 C, 1.0 Cr, 0.3 Mn, bal Fe
For bearings, liners, pivots, sleeves, water hardened, wear resistant.

IDEAL BCS
M-1346, 0.90 C, Cr, Si, bal Fe.
For bearings, liners, sleeves, water hardened, wear resistant

IDEAL BCZ1
M-1346; 1.4 C, 0.3 Cr, 0.1 V, bal Fe
For bearings, liners, bushings, sleeves, cutters, water hardened

IDEAL BCZ2.
M-1346, 0.90 C, 0.80 Cr, bal Fe
For bearings, liners, bushings, sleeves, cutters, water hardened

IDEAL BDS
M-1346; 0.5 C, 0.9 Mn, 1.05 Cr, 0.1 V, bal Fe
For gears, shafts, springs, crankshafts, oil hardened, shock resistant.

IDEAL BEE
M-1346, 0.15 C, 0.2 Si, 0.4 Mn, bal Fe
Annealed 70,000 TS, 40,000 YS; 25 El, 60 RA, 145 Brin
For gears, pinions, cams, camshafts, case hardening steel

IDEAL BFM
M-1346, 0.70 C, 1.7 Si, 0.70 Mn, bal Fe
For springs, punches, oil hardened, tough.

IDEAL BG1.
M-1346, 1.05 C, 1 Cr, 1.15 W, bal Fe
For bearings, cold work tools, drawing dies, water hardened

IDEAL BG2
M-1346, 0.45 C, Ni, Cr, W, bal Fe.
For cold work tools, upsetters, oil hardened, tough

IDEAL BGW
M-1346, 0.5 C, 1.05 Cr, 3.25 Ni, bal Fe.
For gears, shafts, crankshafts, bolts, fasteners; oil hardened, shock resistant

IDEAL BHM
M-1346, 0.56 C, Ni, Cr, Mo, V, bal Fe
For gears, shafts, crankshafts, bolts, studs; oil hardened, shock resistant

IDEAL BKS.
M-1346; 0.45 C, Si, Cr, V, bal Fe
For gears, springs, crankshafts, axles, oil hardened, shock resistant

IDEAL BKV
M-1346, 1.0 C, 0.1 V, 0.25 Mn, bal Fe.
For drills, taps, reamers, broaches; Type W2, water hardened

IDEAL BME
M-1346; 0.40 C, Cr, Mn, Mo, bal Fe.
For gears, pinions, crankshafts; oil hardened, shock resistant.

IDEAL BMK.
M-1346; 0.85 C, Cr, bal Fe.
For tools, dies, cutters, taps, bearings; water hardened.

IDEAL BMS.
M-1346; 0.53 C, 0.8 Si, 1.05 Mn, bal Fe.
For gears, axles, crankshafts, water hardened.

IDEAL BMV.
M-1346; 0.90 C, 1.9 Mn, 0.1 V, bal Fe.
For dies, punches, upsetters, cutters;
oil hardened, nondeforming.

IDEAL BPK2
M-1346; 0.2 C, 1.15 Cr, 1.25 Mn, bal Fe.
For cams, fasteners, camshafts, case hardened

IDEAL BRF1.
M-1346; 0.2 C, 13 Cr, bal Fe.
Annealed: 95,000 TS; 50,000 YS; 25 El; 55 RA;
195 Brin
Cold drawn: 105,000 TS; 85,000 YS, 17 El,
50 RA, 215 Brin.
For turbine blades, valves, cutlery,
surgical instruments; Type 420; stainless

IDEAL BRF2
M-1346, 0.4 C, 13 Cr, 0.4 Si, 0.3 Mn, bal Fe
Annealed. 95,000 TS; 50,000 YS; 25 El, 55 RA,
195 Brin.
For valves, cutlery, surgical and dental instruments,
Type 420, stainless.

IDEAL BSA.
M-1346, 0.38 C, Si, Cr, V, bal Fe
For gears, punches, bolts,
machine tool parts; oil hardened, tough.

IDEAL BSE.
M-1346, 0.15 C, 0.65 Cr, 0.25 Si, 0.5 Mn, bal Fe
For gears, cams, camshafts, fasteners,
case hardening steel, tough

IDEAL BW6.
M-1346; 1.2 C, 0.2 Cr, 0.1 V, 1 W, bal Fe.
For bearings, cutters, sleeves,
water hardened, wear resistant.

IDEAL BWP EXTRA.
M-1346, 0.30 C, 2.35 Cr, 0.6 V, 4.25 W, bal Fe
For extrusion dies, upsetters, header dies;
oil hardened, tough

IDEAL BWPKO
M-1346; 0.30 C, 2.4 Cr, 2 Co, 0.25 V, 8.5 W,
bal Fe.
For shears, punches, upsetters, header dies;
hot work steel, oil hardened

IDEAL BWP-PRIMA.
M-1346; 0.30 C, 1 Si, 1.1 Cr, 0.18 V, 3.75 W,
bal Fe.
For header dies, crimpers, punches;
oil hardened, tough.

IDEAL BWP SPEZIAL
M-1346, 0.30 C, 2.65 Cr, 0.35 V, 8.5 W, bal Fe.
For header dies, extrusion dies and rams, shears;
hot work steel, oil hardened

IDEAL BWPU.
M-1346; 0.45 C, 1.4 Cr, 0.7 Mo, 0.3 V, 0.7 Mn,
bal Fe.
For gears, bolts, crankshafts, fasteners,
oil hardened, tough.

IDEAL EXTRA HART 1.
M-1346; 1.3 C, 0.25 max Si, 0.25 max Mn, bal Fe.
For engravers' tools, forming and blanking dies;
Type W1; water hardened.

IDEAL EXTRA HART 2.
M-1346, 1.15 C, 0.25 max Si, 0.25 max Mn, bal Fe.
Annealed: 110,000 TS; 58,000 YS; 18 El; 38 RA;
220 Brin.
For springs, drills, reamers, taps, tools;
Type W1; water hardened.

IDEAL EXTRA HART 3.
M-1346; 1.0 C, 0.25 max Si, 0.25 max Mn, bal Fe.
Annealed: 100,000 TS, 53,000 YS; 21 El;
42 RA; 200 Brin.
For springs, tools, drills, taps, cutters;
Type W1, water hardened.

IDEAL EXTRA HART 4.
M-1346; 0.85 C, 0.25 max Si, 0.25 max Mn, bal Fe.
Heat treated: 190,000 TS, 145,000 YS; 10 El,
30 RA; 400 Brin
For springs, drills, cutters, tools, punches;
Type W1, water hardened

IDEAL EXTRA HART 5
M-1346, 0.70 C, 0.25 max Si, 0.25 max Mn, bal Fe.
Heat treated: 175,000 TS, 128,000 YS, 12 El,
37 RA, 355 Brin
For springs, rails, punches, tools, axes,
Type W1, water hardened

IDEAL NIT 1
M-1346, 0.26 C, 1.4 Cr, 1.1 Al, 0.6 Mn, bal Fe
For oil refinery equipment,
creep and heat resistant

IDEAL NIT 3
M-1346, 0.34 C, 1.4 Cr, 1.1 Al, 0.6 Mn, bal Fe
For oil refinery equipment, creep and heat resistant

IDEAL NIT 7
M-1346, 0.32 C, 1.1 Cr, 1.1 Al, 0.18 V, 0.6 Mn,
bal Fe
For oil refinery equipment,
creep and heat resistant.

IDEAL NIT 9
M-1346, 0.33 C, 1.7 Cr, 1.0 Ni 0.5 Mn, bal Fe
For dies, upsetters, punches, shafts,
oil hardened, shock resistant

IDEAL NIT 11
M-1346; 0.31 C, 0.6 Mn, 2.35 Cr, 0.18 Mo, bal Fe
For gears, dies, crankshafts, oil hardened, tough

IDEOR
M-40, M-487, 0.4 C, 2 W, 1 Cr, 1 Si, 0.3 Mn,
bal Fe
For chisels, punches, rivet sets, shears, picks,
Type S1, tough

IDEOR SPECIAL
M-487, 0.5 C, 1 Cr, 2 W, 0.15 V, bal Fe
For blanking and piercing dies,
shock resistant, oil hardened

IDIART
3 C, 2 Si, bal Fe.
For compressor pistons; cast iron

IDRONAL
Italian, 7 Mg, bal Al
For marine parts, resists sea water corrosion

IDRONAL
Italian, 5 Mg, 1 Si, bal Al.
For marine parts; resists sea water corrosion

IGEDUR
M-78, 0.2-2.0 Mg, 3.5-5.5 Cu, 0.2-1.0 Si, 0.1-1.2 Mn,
bal Al
For light alloy parts, Duralumin type.

IGETALLOY
M-1515, WC.
For cutting tools; sintered carbide.

IGNIDUR PC8.
M-1325, 0.3 C, 2.2 Si, 6 Cr, bal Fe.
For oil refinery equipment; creep and heat resistant.

IGNIDUR PC9.
M-1325; 0.5 C, 1.5 Si, 17 Cr, bal Fe.
Annealed: 100,000 TS; 60,000 YS; 20 El;

38 RA; 210 Brin.
For valve parts, cylinder liners, furnace parts; Type 440; stainless, hardenable.

IGNIDUR PC10.
M-1325; 0.6 C, 1.5 Si, 22 Cr, bal Fe.
For cylinder liners, rollers, bushings, furnace parts; heat resistant.

IGNIDUR PC11.
M-1325; 1.3 C, 1.5 Si, 29 Cr, bal Fe.
For bushings, valve parts, rollers; heat and wear resistant.

IGNIDUR PC12
M-1325; 0.6 C, 1.5 Si, 29 Cr, bal Fe.
Cast: 90,000 TS, 65,000 YS; 2 El; 212 Brin.
For cylinder liners, bushings, valve seats, furnace parts; heat resistant.

IGNIDUR PK4
M-1325; 0.4 C, 1 3 Si, 27 Cr, 4 Ni, bal Fe.
Cast 70,000 TS; 65,000 YS; 2 El; 190 Brin.
Heat treated: 115,000 TS; 80,000 YS; 15 El.
For furnace parts, grate bars, salt pots, baffles; heat resistant.

IGNIDUR PK9
M-1325; 0.4 C, 2 Si, 22 Cr, 9.5 Ni, bal Fe
Cast: 85,000 TS; 45,000 YS; 35 El; 165 Brin.
For heat treating boxes, baskets, chains, conveyors, belts, corrosion and heat resistant; Type HF

IGNIDUR PK14
M-1325; 0 4 C, 2 Si, 26 Cr, 14 Ni, bal Fe.
Cast· 75,000 TS; 47,000 YS; 17 El, 25 RA; 200 Brin
For furnace parts, heat treating boxes, salt pots, belts, Type HH, corrosion and heat resistant

IGNIDUR PK19.
M 1325, 0 4 C, 2 Si, 25 Cr, 19 Ni, bal Fe
Cast 75,000 TS, 50,000 YS, 17 El, 170 Brin
Aged 85,000 TS, 50,000 YS; 10 El; 190 Brin.
For furnace parts, retorts, skids, rabble arms; Type HK, corrosion and heat resistant.

IGNIDUR PK30.
M-1325; 0 5 C, 1.8 Si, 25 Cr, 30 Ni, bal Fe.
For furnace parts, heat treating boxes; heat and corrosion resistant

IGNITION PIN ALLOY-1.
Eng ; 61 Ce, 39 Fe
For ignition pins, pyrophoric

IGNITION PIN ALLOY-2
Eng ; 73-70 Ce, 1.6-6 0 Fe, 17-24 Zn, 0-2.4 Al.
For ignition pins; pyrophoric

IH-50
M-1613; 0 22 max C, 1.5 max Mn, 0.7 max Si, 0 20 min Cu, bal Fe.
Plate· 75,000 min TS; 50,000 min YP, 20 El.
For earth moving and agricultural equipment, tractors, trucks, trailers, bridges, bus bodies.
Good fabricability and weldability.
Good fatigue strength and ductility.

IH-65.
M-1613; 0.22 max C, 1 5 max Mn, 0.7 max Si, 0.20 min Cu, 0 01 min Cb, bal Fe.
Plate: 90,000 min TS; 65,000 min YP, 18 El.
For earth moving and agricultural equipment, tractors, trucks, trailers.
Good fabricability and weldability.
Good fatigue strength and ductility.

IHX-42.
M-1613; 0.21 C, 1.35 Mn, 0.01 min Cb or V, bal Fe.
60,000 min TS; 42,000 min YS, 24 min El.
For structural parts.

IHX-45.
M-1613; 0.20 max C, 1.0 max Mn, 0.10 max Si, 0.01 min Cb or V, bal Fe.
Plate· 60,000 min TS; 45,000 min YS; 22 El.
For earth moving and agricultural equipment, trucks, trailers, tractors, mine cars.
High strength, low alloy steel.

IHX-50.
M-1613; 0.22 max C, 1.1 max Mn, 0.1 max Si, 0.01 min Cb or V, bal Fe.
Plate; 65,000 min TS; 50,000 min YP; 20 El.
For earth moving and agricultural equipment, mine cars, trucks, trailers, derricks, booms.
Shock resistant.

IHX-55.
M-1613; 0.24 max C, 1.4 max Mn, 0.3 max Si, 0 01 min Cb or V, bal Fe.
Plate. 70,000 min TS; 55,000 min YP; 18 El.
For earth moving and agricultural equipment, trucks, trailers, tractors, booms, mine cars.
Shock resistant.

IHX-60
M-1613; 0.26 max C, 1.55 max Mn, 0.3 max Si, 0.01 min Cb or V, bal Fe
Plate: 75,000 TS; 60,000 YP; 18 El
For earth moving and agrictural equipment, trucks, trailers, tractors, booms, mine cars.
Shock ersistant.

IHX-65
M-1613; 0.26 max C, 1.6 max Mn, 0.3 max Si, 0 01 min Cb or V, bal Fe.
Plate. 80,000 min TS; 65,000 min YP; 17 El.
For earth moving and agricultural equipment, tractors, trailers, booms, mine cars.
Shock resistant.

IHX-70.
M-1613, 0 26 max C, 1.65 max Mn, 0.30 max Si, 0 01 min Cb or V, bal Fe
Plate· 85,000 min TS; 70,000 min YP; 16 El.
For earth moving and agricultural equipment, tractors, trailers, mine cars, buildings
Shock resistant.

IH-WX STEEL
M-1613, 0 09 max C, 0.75-1 05 Mn, 0.05-1.0 P, 0 24-0.33 S, bal Fe
For screw machine products, fasteners, hardware, cams.
Free-machining, case-hardening.

IK
French, 4.5 Cu, bal Al.
64,000 TS; 5 El, 110 Brin.
For light alloy parts.

IK1.
M-459; 0 1 C, Ti, bal Fe.
For chromizing surface treat.

IK STEELS.
German, C, Cr, bal Fe.
For heat and corrosion resistant parts; chromized steel, surface layer.

ILLINOIS NICKEL STEEL.
M-240; 0.3-0.4 C, 3.5 Ni, bal Fe.
Hot rolled: 85,000-100,000 TS; 50,000-60,000 YS; 18 El; 25 RA.
For dredging cranes, motor truck frames, elevators, power shovels; oil hardening, tough.

ILLIUM 98
M-1262; 55 Ni, 28 Cr, 8 0 Mo, 5.0 Cu, 0.05 C.
Cast: 54,000 TS; 41,000 YS; 18 El; 22 RA; 143 Brin.
For acid pumps, hardware, impellers, valves, nozzles; resists sulphuric acid.

ILLIUM 98LSi.
M-1262; 50.25-62.50 Ni, 26.0-30.0 Cr, 7.5-9.0 Mo,
4.0-6.5 Cu, 1.5 max Mn, 0.50 max Si,
1.5 max Fe, 0.07 max C.
Cast: 54,000 TS; 41,000 YS; 18 El; 22 RA, 160 Brin.
Solution Heat treated: 78,000 TS, 43,000 YS;
43 El; 39 RA; 150 Brin.
For fluorine service. Corrosion resistant casting alloy.

ILLIUM-B.
M-1262; 28 Cr, 0.05 C, 8 Mo, 5 Cu, 5 Fe, bal Ni.
Cast: 60,000 min TS, 41,000 min YS; 0.5 El;
221-420 Brin.
Hardenable, max wear and galling resistance;
resists sulphuric acid; For pumps, valves,
chemical plant equipment.

ILLIUM-G
M-29, M-1262; 0.2 C, 22 Cr, 5 Fe, 6 Mo, 5 Cu,
bal Ni.
Cast: 60,000 min TS; 35,000 min YS; 5 El;
159 Brin
Excellent resistance to corrosion from hot H_2SO_4,
H_3PO_4, acid-salt mixtures, sea water.
For pumps, valves, chemical and marine equipment

ILLIUM-H.
M-1262, 0.1 C, 0.18 Ti, 0.6 Cb, 26-30 Cr, 47-52 Co,
bal Fe
Cast: 135,000 TS; 48,000 YS, 10 El, 10 RA;
257 Brin.
Wrought 132,000 TS; 61,000 YS, 7 El, 6 RA,
350 Brin.
For furnace baffles, burner tips,
sintering grates, quench baskets.
Corrosion, heat and thermal shock resistant.

ILLIUM-M.
M-1262; 0.08 C, 28 Mo, bal Ni.
Cast: 72,000 min TS; 46,000 min YS; 6 El, 190 Brin.
Resists halogen chemicals and HCl
For chemical plant equipment.

ILLIUM-P.
M-1262, 28 Cr, 8 Ni, 3 Cu, 2 Mo, bal Fe.
Cast: 99,000-110,000 TS, 65,000-81,000 YS,
10-18 El, 217-255 Brin
Resists erosion and corrosion by mixed acids;
resists phosphoric acid
For chemical plant equipment.

ILLIUM-PD
M 1262, 0.08 C, 26 Cr, 5 Ni, 2 Mo, bal Fe
Cast: 95,000 min TS, 65,000 min YS, 30 El,
212 Brin.
High erosion-corrosion resistance; for equipment in
pulping liquors, dairy and chemical plants.

ILLIUM-R.
M-29 & M-1262; 68 Ni, 3 Cu, 1 Fe, 21 Cr, 5 Mo,
0.05 C, 1.25 Mn, 0.7 Si
Annealed 105,000 TS, 55,000 YS; 45 El, 240 Brin
Cold Drawn. 150,000 TS, 100,000 YS; 12 El,
365 Brin.
For chemical plant equipment, kettles,
pumps, spray nozzles.
Resists strong acids and thermal shock

ILLIUM-W.
M-1262; 0.15 C, 6 Fe, 4 W, 17 Mo, 16 Cr, bal Ni.
Cast: 72,000 TS; 46,000 YS; 4 El.
For chemical equipment; resists Cl_2, H_2SO_4,
and HNO_3.

ILLIUM-X.
M-1262; 0.75 C, 29 Cr, 14 W, 55 Co
Cast: 100,000 min TS, 90,000 min YS; 2 El;
293 Brin.
Corrosion and abrasion resistant, particularly for
equipment for dry battery manufacture.

ILSSA AT-15.
M-1452, 0.25 max C, 25 Cr, 20 Ni, 1.5 max Si,
bal Fe.
Annealed: 100,000 TS; 45,000 YS, 50 El; 65 RA;
185 Brin.
For furnace parts, valves, pumps, jet engine parts;
Type 310; corrosion and heat resistant

ILSSA IC
M-1452, 0.09-0.12 C, 13 Cr, 0.5 max Si, bal Fe.
Annealed: 75,000 TS, 40,000 YS; 35 El; 70 RA;
155 Brin
For turbine blades, valves, cutlery,
surgical instruments; Type 403 and 410;
corrosion resistant

ILSSA ICC.
M-1452, 0.13-0.25 C, 17 Cr, bal Fe.
Annealed 90,000 TS, 55,000 YS, 20 El; 45 RA;
170 Brin.
For oil refinery equipment, oil burners and heaters;
Type 430, corrosion resistant.

ILSSA ICMS
M-1452, 0.10 max C, 17 Cr, 1.5 Mo, bal Fe
Annealed: 90,000 TS, 55,000 YS, 20 El; 45 RA;
170 Brin
For oil refinery equipment, oil burners and heaters,
corrosion resistant.

ILSSA ICS
M-1452, 0.07-0.12 C, 17 Cr, bal Fe
Annealed 80,000 TS, 50,000 YS, 25 El, 50 RA,
150 Brin
For oil refinery equipment, oil burners and heaters,
Type 430, corrosion resistant

ILSSA IN
M-1452, 0.11-0.16 C, 18 Cr, 8 Ni, bal Fe.
Annealed 80,000 TS, 35,000 YS, 55 El, 75 RA,
150 Brin
For chemical plant equipment, tanks, mixers,
agitators; Type 302; stainless, austenitic

ILSSA INF 20
M 1452, 0.35 max C, 25 Cr, bal Fe
Annealed 85,000 TS, 50,000 YS; 30 El, 55 RA,
180 Brin
For furnace parts and equipment,
heat treating boxes, Type 446, heat resistant

ILSSA INF 25/5
M-1452, 0.12 max C, 26 Cr, 4 Ni, bal Fe
Cast 90,000 TS; 65,000 YS, 2 El, 212 Brin.
For cylinder liners, bushings, valve seats and bodies,
Type CC50, corrosion and heat resistant

ILSSA INI.
M-1452, 0.08 max C, 18 Cr, 8 Ni, bal Fe
Annealed 85,000 TS, 35,000 YS, 60 El, 70 RA;
150 Brin
For chemical plant equipment, tanks, mixers, filters;
Type 304, stainless, austenitic

ILSSA INI/BC
M 1452, 0.05 max C, 18 Cr, 8 Ni, bal Fe.
Annealed 85,000 TS, 35,000 YS, 60 El, 70 RA,
150 Brin.
For chemical plant equipment, tanks, mixers,
Type 304; stainless, austenitic.

ILSSA INI.
M-1452, 0.08-0.20 C, 18 Cr, 9 Ni, 2.5 Si, bal Fe.
Annealed: 85,000 TS, 40,000 YS; 50 El; 70 RA,
160 Brin
For chemical plant and oil refinery equipment, Type
302B, stainless, austenitic.

ILSSA INMI.
M 1452; 0.12 max C, 18 Cr, 10 Ni, 2.5 Mo, bal Fe.
Annealed: 85,000 TS; 35,000 YS; 50 El; 65 RA;
160 Brin.

For acid resistant chemical plant equipment; Type 316; stainless.

ILSSA INS.
M-1452; 0.08-0.15 C, 18 Cr, 9 Ni, P, S, Se, Zr, bal Fe.
Annealed: 80,000 TS; 35,000 YS; 40 El; 60 RA; 160 Brin.
For screw machine products, shafts; Type 303; stainless, free-cutting.

ILSSA MIC
M-1452; 0.26-0.37 C, 13 Cr, bal Fe
Annealed: 95,000 TS; 50,000 YS; 25 El; 55 RA; 195 Brin.
For valves, cutlery, surgical and dental instruments; Type 420; corrosion resistant

ILZRO-12.
M-130, 11.0-13.0 Al, 0.5-1.25 Cu, 0.01-0.03 Mg, bal Zn
Sand cast 43,000 TS; 30,000 YS; 2.0-3.5 El; 95-113 Brin
Chill cast 51,000 TS, 30,000 YS; 5.0-7.0 El, 95-113 Brin
Good properties cast in sand, plaster or permanent mold.

ILZRO-12
M-1661; 11-13 Al, 0.5-1.25 Cu, 0.01-0.03 Mg, bal Zn
Chill cast 50,000-53,000 TS, 30,000-31,000 YS; 5-7 El
Sand cast. 41,000-45,000 TS; 30,000-31,000 YS; 2-3.5 El
For general purpose castings, housings, instrument cases, fuel pumps, automotive parts.
Insensitive to cooling rate Low casting temperature.

ILZRO-14
M-130, 0.01-0.03 Al, 1.0-1.5 Cu, 0.25-0.30 Ti, bal Zn
Die cast 33,000 TS, 20,000 YS, 5.0-6.0 El, 71-77 Brin
Good creep strength at ambient and elevated temperatures.

ILZRO-14
M-1661, 1.0-1.5 Cu, 0.25-0.30 Ti, 0.01-0.03 Al, bal Zn
Die cast 33,000 TS, 5-6 El; 20,000 YS, 79-86 Vickers
For die castings, carburetors, fuel pumps, valve bodies Creep resistant

ILZRO-16
M-1661, 1.0-1.5 Cu, 0.15-0.25 Ti, 0.10-0.20 Cr, 0.1-0.04 Al, bal Zn
Die cast 33,000 TS; 5 El, 84 Vickers
For automobile die castings
Good creep resistance at high temperatures.

IMACTO
M 1636, 0.20 C, 0.8 Mn, 0.55 Ni, 0.50 Cr, 0.20 Mo, bal Fe.
Heat treated: 121,000 TS, 84,500 YS; 19 El; 248 Brin.
For carburized splined shafts, piston pins, cam shafts, guide pins, ratchets.
Tough, case hardening steel

IMI 100
M-1578; 99.95 Cu (including Silver), oxygen free.
Bar, sheet, strip, wire.
For thermionic valves, transistors, welding and brazing wire, glass-metal seals, high conductivity and ductility; not subject to hydrogen embrittlement during annealing and brazing.
ASTM B170; BS 1861 2873.C103 (wire).

IMI 103.
M-1578; 99.9 min Cu (including silver).
Electrolytic tough pitch copper wire, sheet, strip.
Standard copper for electrical purposes and stampings, spinning etc Ductile, high conductivity.
BS 125,128,1432-3: 2873.C101 (Wire).

IMI 111.
M-1578; 99.9 min Cu, (including silver).
Fire refined tough pitch copper.
For electrical applications and cold heading wire, and rods for bus bars.
BS1037/2870 C102 etc.; ASTM B5, B124 etc.

IMI 125.
M-1578; Sulphur addition to copper.
Sulphur copper bar and rod
Improved machinability; good conductivity.

IMI 131.
M-1578, Cu, phosphorus deoxidized, non-arsenical.
Ductile and corrosion resistant; for severe heading and forming.
Drawn shapes, rod, bar, sheet and strip.
ASTM B152 (DHP), BS 2870 C106.

IMI 145
M-1578; 99.8 Cu, 0.2 Cd
High conductivity copper for radiator fin manufacture

IMI 146
M-1578; 99.85 min Cu, 0.3-0.5 As, 0.013-0.05P.
Phosphorized deoxidized arsenical copper.
Used in some chemical plants where resistance to scaling is desirable; rods, strip and sheet
BS 2870-C 107

IMI 151.
M-1578, 99.85 Cu, 0.05 Ag
Higher softening temperature to resist softening during tinning and soldering, for electrical commutators, for printers engraving plates.
ASTM B152-STP.

IMI 153 (Kufil)
M-1578, 99 Cu, 1 Ag
Rods, spooled wire or slittings; for oxyacetylene welding of copper.
BS 1453 C1

IMI 156 (Nitrofil)
M-1578, 99.4 Cu, 0.3 Al, 0.3 Ti
For nitrogen arc welding of copper
BS 2901 C8

IMI 161 (Borofil)
M-1578, 99.92 Cu, 0.08 B
For argon arc welding of copper, retaining high conductivity.
BS 2901 C21

IMI 166
M-1578; Cd addition to copper.
Increased strength and hardness while still retaining high conductivity
For line wire, trolley wires, overhead conductors, welding tips
BS 23,175,672,2755,2870 C108,2873.C108.

IMI 171 (Kumium).
M-1578; Chromium addition to copper
Heat treatable alloy retaining strength up to 350°C with high electrical conductivity
For electrode tips for resistance welding; for certain electronic applications.
ASTM F268 (Chromium copper).

IMI 176 (ARGOFIL).
M-1578; 99.5 Cu, 0.25 Si, 0.25 Mn.
For argon arc welding of copper.
BS 2901.C7; ASTM B225,B259.

IMI 195.
M-1578; Copper containing small amounts Pb.
Improved machinability while still
retaining good electrical and thermal conductivity.
Called leaded copper.

IMI 203.
M-1578; 97 Cu, 3 Zn.
Considered to be copper deoxidized with zinc;
called "cap copper" because of wide use
for ammunition priming cap cups and other small
pressings. Weldable by TIG.
BS 2870 CZ.125.

IMI 210.
M-1578; 90 Cu, 10 Zn.
Known as 90/10 Gilding metal and as
"commercial bronze.".
For ornaments, imitation jewelry.
BS 2870 CZ.101; ASTM B36-220.

IMI 215.
M-1578; 85 Cu, 15 Zn.
Known as 85/15 Gilding metal or as "red brass".
For ornamental work, vanity cases,
piping for carrying liquids,
diaphragms and bellows.
BS 2870 CZ.102; ASTM B36-230.

IMI 220.
M-1578; 80 Cu, 20 Zn.
Known as 80/20 Gilding metal and as "low brass".
For architectural work, costume jewelry,
strip for slide fasteners, diaphragms, bellows,
wire for Fourdrinier wire cloth.
BS 2870 CZ.103; ASTM B36-240.

IMI 230 (Cartridge Brass).
M-1578; 70 Cu, 30 Zn.
High ductility for deep drawing into cartridge cases,
rivets, screws, lamp fixtures, pen and pencil parts
and many similar drawn or formed parts.
BS 2870 CZ.106; ASTM B36-260.

IMI 235.
M-1578; 65 Cu, 35 Zn.
As sheet and strip for general commercial presswork
and general coppersmith work.
BS 2870 CZ.107; ASTM B36-268.

IMI 236.
M-1578; 64 Cu, 36 Zn.
As sheet and strip for general commercial presswork
and general coppersmith work.

IMI 237.
M-1578; 63 Cu, 37 Zn.
Wire and drawn shapes for cold forming of screws,
rivets and cold headed products.
BS 265; 2870.CZ108; 2873.CZ108; ASTM B19.

IMI 239.
M-1578; 61 Cu, 39 Zn.
Often called "pin wire"
because of use in making brass pins.

IMI 240.
M-1578; 60 Cu, 40 Zn.
Wire and rod for brazing ferrous and
non-ferrous materials; yellow brass.
BS 1845.C23.

IMI 306 ('Alumbro').
M-1578; 76 Cu, 22 Zn, 2 Al, 0.04 As.
Arsenic inhibited aluminum brass
to meet stringent operating conditions
common in marine condensers; also evaporators,
boat sheathing and instrument bellows.
BS 2870. CZ.110; ASTM B111.

IMI 345.
M-1578; Zn, Sn, bal Cu.
Wire for safety pins, decorative pins,
spectacle frames.

IMI 360 (Naval Brass).
M-1578; 62 Cu, 1.25 Sn, bal Zn.
Sheet, strip, bar for underwater fittings for ships
and other marine hardware.
BS 250, 409 2872.CZ112, 2874.CZ112.
ASTM B171.

IMI 365.
M-1578; 60 Cu, 0.75 Sn, bal Zn.
Sheet and strip for underwater fittings
for ships and general marine hardware.
BS 2870.CZ.113; ASTM B21A.

IMI 388.
M-1578; 59.4 Cu, 0.3 Si, 40.3 Zn.
Wire and rod for brazing ferrous and
non-ferrous materials; called "silicon brass".
BS 1845.C26.

IMI 410.
M-1578; 64 Cu, 1 Pb, bal Zn.
Leaded brass strip, particularly for stamped
and machined watch, clock and instrument parts;
called "clock and matrix brass".
BS 2870.CZ.116.

IMI 421
M-1578; 63 Cu, 1 Pb, bal Zn.
Called "matrix and key brass". For key blanks,
watch, clock and instrument parts;
free machining.

IMI 432.
M-1578; Leaded brass wire.
Called "nipple wire". For cold heading,
riveting and cold forming
BS 2873.CZ119; ASTM B146.

IMI 433.
M-1578; 62 Cu, 2 Pb, bal Zn.
Strip is called "clock brass",
wire is heading and drilling wire.
For mild cold work; free machining; clock and
instrument work.
BS 2800 CZ119, ASTM B121-353.

IMI 441.
M-1578; 61 5 Cu, 3 25 Pb, bal Zn.
Leaded brass rod and extruded or drawn sections
for easy machining to bolts, nuts, screws, fittings.
ASTM B16.

IMI 442.
M-1578; 61.25 Cu, 2.5 Pb, bal Zn.
Leaded brass rod and extruded or drawn sections
for easy machining to bolts, nuts, screws,
fittings; limited deformation.

IMI 443
M-1578; 61 Cu, 0.25 Pb, bal Zn.
Low leaded wire called "shoe rivet wire",
main use is upsetting to shoe rivets,
and heading operations where some machining
is required.

IMI 444.
M-1578; 61 Cu, 1 Pb, bal Zn.
Free machining brass sheet called "engraving brass";
For ornamental work, plaques.

IMI 445.
M-1578; 61 Cu, 1.5 Pb, bal Zn.
Sheet and strip, called "rule brass". For engraving,
key blanks, watch and clock parts.

IMI 452 (Muntz Metal).
M-1578; 60 Cu, 0.5 max Pb, bal Zn.
Rod and extruded or drawn sections for cold work, bending, riveting, machining.
BS 1949 2872 CZ123; 2874.CZ123.

IMI 453.
M-1578; 60 Cu, 0 7 max Pb, bal Zn.
Rod and extruded or drawn sections, called "special bending brass", for cold forming and machining
BS 1949 2872.CZ123; 2874.CZ123

IMI 456.
M-1578, 59 Cu, 0.75 Pb, bal Zn.
Rod and extruded or drawn sections called "riveting quality brass". For upsetting, stamping and limited turning.
BS CZ9B/12872.CZ119; 2874 CZ119.

IMI 458
M-1578; 59 Cu, 2 Pb, bal Zn
Strip, called "clock brass". For stamped parts requiring machining to make clock and instrument parts
BS 2870 CZ120

IMI 467
M-1578; 57 75 Cu, 2 25 Pb, bal Zn.
Rod and extruded or drawn sections for hot stamping and forging, free machining.
BS 218 2872 CZ122; 2874 CZ122

IMI 469
M-1578, 57.5 Cu, 3 25 Pb, bal Zn
Rod and extruded or drawn sections for easy machining to bolts, nuts, screws and fittings
BS 249 2872 CZ121; 2874 CZ121

IMI 506 (Nickel Silver).
M-1578, 65 Cu, 18 Ni, 17 Zn
Wire and drawn shapes for decorative purposes, springs, fishing tackle, ductile, malleable, machinable, corrosion resistant
BS 790, 1824, 2870, 2873; ASTM B122, B206

IMI 511 (Nickel Silver)
M-1578, 62 Cu, 10 Ni, 28 Zn
Wire, drawn shapes, sheet for decorative purposes, jewelry, tableware, fishing tackle, ductile, malleable, machinable, corrosion resistant
BS 2870 NS 103, ASTM B122, B206,
BS 790, 1824, 2873

IMI 512 (Nickel Silver).
M-1578; 62 Cu, 12 Ni, 26 Zn
Wire, drawn shapes, sheet for decorative purposes, jewelry, slide fasteners, nameplaces; ductile, malleable, machinable, corrosion resistant
BS 790, 1824, 2870, 2873, ASTM B122, B206

IMI 513 (Nickel Silver)
M-1578; 62 Cu, 15 Ni, 23 Zn.
Wire and drawn shapes for decorative purposes, tableware, jewelry; ductile, malleable, machinable, corrosion resistant.
BS 790, 1824, 2870, 2873; ASTM B122, B206.

IMI 514 (Nickel Silver).
M-1578, 62 Cu, 18 Ni, 20 Zn
Wire, drawn shapes and sheet for decorative purposes, tableware, name plates, engraving plates, springs; ductile, malleable, machinable, corrosion, resistant
BS 790, 1824, 2870, 2873; ASTM B122, B206.

IMI 515 (Nickel Silver)
M-1578; 62 Cu, 20 Ni, 18 Zn.
Wire and drawn shapes for decorative purposes, tableware, springs for electronics and telecommunications; ductile, malleable, machinable, corrosion resistant.
BS 790 1824 2870 2873: ASTM B122. B206.

IMI 525.
M-1578; Brass plus 10% Ni.
Nickel brass rod, stamping grade; good white color for sanitary fittings.
ASTM B124-55 alloy 14.

IMI 551.
M-1578; Free machining brass plus 10% Ni.
Nickel brass rod, free turning grade, good white color for sanitary fittings.
BS (near) 2872.NS101, 2874.NS101

IMI 575 ("Kutherm" 3).
M-1578, Resistance alloy wire, maximum continuous operating temperature 150°C; for electric blankets, under-road, under-ramp heating.

IMI 576 ("Kutherm" 10)
M-1578, Resistance alloy wire, maximum continuous operating temperature 250°C; for "Cold tails" electric blankets, under-road, under-ramp heating

IMI 579 ("Kutherm" 26).
M-1578; Resistance alloy wire, maximum continuous operating temperature 250°C, for electric blanket heating cables, fixed resistance, space heating systems

IMI 581 ("Kutherm" 41)
M-1578, Resistance alloy, intermediate electrical resistivity, outstanding stability up to 350°C, for heating cables, thermocouples, space heating systems

IMI 651
M-1578, 99 Cu, 1 Sn
Conductivity bronze wire, for high strength conductors, rivets and chains

IMI 656
M-1578, 95 Cu, 5 Sn, P
Phosphor bronze sheet, various tempers, for springs and stampings in textile, paper and chemical plant operations
BS 2870 PB.102, ASTM B 103-Al

IMI 657
M-1578, 95 Cu, 5 Sn, P
Phosphor bronze wire, various tempers.
For springs, electrical contacts, switch parts, chains, welding wire
BS 369, 384, 407 etc, ASTM B103, B159, B225.

IMI 658
M-1578, 93 Cu, 7 Sn, P
Phosphor bronze sheet, various tempers; for springs and stampings.
BS 2870 PB 103

IMI 659
M-1578, 93 Cu, 7 Sn, P
Phosphor bronze wire, various tempers, for flat and coiled springs, welding wire, Fourdrinier cloth warp
BS 2873 PB103 etc; ASTM B103, B159, B225

IMI 660 (Carobronze)
M-1578, 92 Cu, 8 Sn.
Tin bronze wire and drawn shapes for bushes and piston rings.

IMI 661.
M-1578, 62 Cu, 8 Sn, P.
Phosphor bronze wire. for Fourdrinier cloth warp

IMI 705 ("Everdur" A).
M-1578; 96 Cu, 3 Si, 1 Mn.
Good strength bars and rods, weldable, and corrosion resistant to weak acids; for screws, bolts, nuts, particularly marine.
Sheet for chemical plant tanks; welding wire.
BS 1948 2872.CS101; 2874.CS101; ASTM B98.

IMI 757.
M-1578; 93 Cu, 7 Al.
Aluminum bronze welding wire;
for welding aluminum bronzes. BS 2901.C12.

IMI 758 ("Silvabronze").
M-1578; 92.6 Cu, 7 Al, 0.3 Sn, 0.1 Ag.
Bronze strip, good resistance to flue gas condensates
and to stress corrosion,
particularly in chloride-contaminated waters.

IMI 837 (Cupro-Nickel).
M-1578; 94 Cu, 6 Ni.
Wire and drawn shapes; good strength,
ductility and resistance to corrosion.

IMI 838 (Cupro-Nickel).
M-1578; 90 Cu, 10 Ni.
Wire and drawn shapes; good strength,
ductility and resistance to corrosion.
BS 374.

IMI 842 (Cupro-Nickel).
M-1578; 80 Cu, 20 Ni.
Wire and drawn shapes; good strength,
ductility and resistance to corrosion.
BS 374; ASTM B122.

IMI 848 (Cupro-Nickel).
M-1578, 75 Cu, 25 Ni
Coinage alloy.
BS 2870 CN 105.

IMI 849 (Cupro-Nickel).
M-1578; 70 Cu, 30 Ni
Wire and drawn shapes, good strength,
ductility and resistance to corrosion.
BS 374; ASTM B122.

IMI 885 ('Kunifer' 10).
M-1578; 87 Cu, 10 Ni, 2 Fe, 1 Mn
Sheet and strip for marine parts;
good strength and corrosion resistance,
especially against sea water; also for
heat exchangers.
BS 2870 CN.102.

IMI 891 ('Kunifer 5T').
M-1578; 5 Ni, 1.3 Fe, 0.2-0.5 Ti, bal Cu.
Welding wire, for Argon arc welding of 'Kunifer' 5
and 95/5 cupro-nickel.
BS 2901 C19.

IMI 892 ('Kunifer 10T').
M-1578; 10 Ni, 1.5 Fe, 0.8 Mn, 0.2-0.5 Ti, bal Cu.
Welding wire, for Argon arc welding
of 'Kunifer' 10 and 90/10 cupro-nickel.

IMI 893 ('Kunifer 30 T').
M-1578; 30 Ni, 0.5 Fe, 0.8 Mn, 0.2-0.5 Ti, bal Cu.
Welding wire for Argon arc welding of
'Kunifer' 30 and 70/30 cupro-nickel.
BS 2901.C18.

IMI 895 ('Kunifer' 30).
M-1578; 68.25 Cu, 30 Ni, 0.75 Fe, 1.0 Mn.
Sheet and strip for marine parts;
good strength and corrosion resistance,
especially against sea water.
Also for heat exchangers.
BS 2870 CN.107.

IMI 981.
M-1578; Tin coated tough pitch or
oxygen free HC copper.
For electrical windings and conductors
that have to be soldered.
BS 128; ASTM B33.

IMI TITANIUM 115.
M-1578; Commercially pure titanium.
Sheet, strip, bar, wire, extrusions.
42,500-60,000 TS; 29,000 YS; 25 El.
Ductile, formable, corrosion resistant.
BS TA 1; DTD 501 3B.

IMI TITANIUM 125
M-1578, Commercially pure titanium.
Sheet, bar, tubes.
54,000-78,000 TS; 42,500 YS; 22 El.
Ductile, formable, corrosion resistant.
BS TA 2,3,4,5; AMS 4902 etc.

IMI TITANIUM 130.
M-1578, Commercially pure titanium
Sheet, strip, bar, wire, extrusions, tubes (welded).
67,000-90,000 TS; 49,000 YS, 20 El
Corrosion resistant, formable
DTD 5003B, 5023B; AMS 4900B.

IMI TITANIUM 155
M-1578, Commercially pure titanium.
Sheet: 83,000-105,000 TS; 67,000 YS; 15 El
Corrosion resistant; slight forming only
BS TA6; AMS 4901, 4921.

IMI TITANIUM 160
M-1578, Commercially pure titanium
Bar, wire, extrusions
78,000-108,000 TS, 63,000 YS; 15 El.
Corrosion resistant
BS TA 7,8,9, AMS 4921.

IMI TITANIUM 230.
M-1578, 2.5 Cu, bal Ti
Sheet, bar, wire, extrusions.
Annealed 78,000-112,000 TS; 67,000 YS; 15 El
Sol tr & age: 110,000-134,000 TS; 80,000 YS,
10 El
Fatigue limit. 60-65% of TS
Formable, corrosion resistant
DTD 5233, 5243, 5253, 5263,
BS TA21,22,23,24

IMI TITANIUM 260
M-1578; Pd (slight), bal Ti
Sheet: 42,500-60,000 TS, 29,000 YS, 25 El
Improved resistance to non-oxidizing acids.

IMI TITANIUM 315.
M-1578, 2 Al, 2 Mn, bal Ti
Bar: 94,000-116,000 TS, 67,000 YS, 20 El
Fatigue limit: 60-65% of TS.
DTD 5043B

IMI TITANIUM 317
M-1578, 5 Al, 2.5 Sn, bal Ti.
Sheet, bar, extrusions.
118,000-157,000 TS, 112,000 YS; 10 El
Weldable, high strength.
BS TA14,15,16,17, AMS 4910, 4926 etc

IMI TITANIUM 318
M-1578; 6 Al, 4 V, bal Ti
Sheet, bar, wire, extrusions, rod.
Rod: 130,000-168,000 TS; 120,000 YS; 8 El.
(variable properties with varying heat treatment).
Fatigue limit: 50-60% of TS
Most popular titanium alloy;
weldable, machinable, corrosion resistant.
BS TA10,11,12,13,28; AMS 4911, 4928 etc.

IMI TITANIUM 550.
M-1578; 4 Al, 4 Mo, 2 Sn, 0.5 Si, bal Ti.
Bar: 164,000 min TS, 145,000 YS; 9 El.
High strength alloy, creep resistant up to 400°C.
DTD 5103, 5153 (Hylite 50).

IMI TITANIUM 551.
M-1578; 4 Al, 4 Mo, 4 Sn, 0.5 Si, bal Ti.
Bar: 179,000 min TS; 159,000 YS; 8 El.
Very high strength titanium alloy.
DTD 5203, 5223 (Hylite 51).

IMI TITANIUM 679.
M-1578; 11 Sn, 5 Zr, 2.25 Al, 1.0 Mo, 0.2 Si, bal Ti.
Bar, quenched and aged: 160,000-195,000 TS; 141,000 YS; 8 El.
High strength alloy; creep resistant up to 450°C.
BS TA18,19,20,25,26,27; AMS 4974.

IMI TITANIUM 680.
M-1578; 11 Sn, 4 Mo, 2.25 Al, 0.2 Si, bal Ti.
Bar, quenched and aged: 178,000 min TS; 156,000 YS; 10 El.
High strength alloy.
DTD 5213, M160.

IMI TITANIUM 684.
M-1578; 6 Al, 5 Zr, 1 W, 0.3 Si, bal Ti.
Bar: 143,000 min TS; 127,000 YS; 6 El.
Good strength alloy, weldable; creep resistant up to 520°C.
DTD M200

IMI TITANIUM 685.
M-1578; Al, Zr, Mo, Si, bal Ti.
Bar: 143,000 min TS; 127,000 YS; 6 El.
Good strength alloy, weldable; creep resistant up to 550°C.
France: T-A6Z-5D.

IMI TITANIUM 700
M-1578, 6 Al, 5 Zn, 4 Mo, 1 Cu, 0.2 Sn, bal Ti.
Air-cooled and aged, bar: 183,000 min TS; 166,000 YS, 8 El.
Quenched and aged, bar: 195,000 min TS; 179,000 YS; 6 El
Fatigue limit. 45-55% of TS.
Ultra high strength alloy, creep resistant up to 400°C.
DTD M201

IMITA GOLD.
Eng., 89 Cu, 10.3 Al, 0.33 Fe, 0.25 Ni, 0.23 Sn, 0.2 Mn.
For cheap jewelry, ornaments, corrosion resistant

IMMACULATE 2W
M-521; 0.30 C, 1.3 Si, 0.8 Mn, 20 Cr, 7.5 Ni, 2 W, bal Fe
Annealed 119,000 TS, 54,500 YS; 49 El; 56 RA; 220 Brin.
For valves, furnace equipment; austenitic, stainless.

IMMACULATE 4 W.
M-521, M-50, 0.3 C, 20 Cr, 8 Ni, 4 W, bal Fe.
Annealed 130,000-141,000 TS; 83,000-94,000 YS, 35-25 El, 45-35 RA, 250-280 Brin.
For exhaust valves, turbine blades, furnace parts, heat and scale resistant.

IMMACULATE 5T
M-521; 0.15 max C, 1.0 max Si, 2.0 max Mn, 21.5-23.5 Cr, 16.0-17.5 Ni, 1.0 Ti, bal Fe.
Ann, Room Temp 90,000 TS; 40,000 YS; 45 El.
At 800°C 42,000 TS, 52 El.
Good strength and resistance to scaling at elevated temperatures. For radiant tube supports, furnace brackets.

IMMADIUM I
M-179, Zn, Al, Mn, bal Cu.
Cast: 72,400 TS, 19.5 El; 12 RA; 152 Brin.
Rolled 70,000 TS, 35,000 YS; 33 El; 125 Brin
For pump rods, valve spindles, stay bolts, propeller shafts; high strength and corrosion resistance.

IMMADIUM II
M-179; Zn, Al, Mn, bal Cu.
Cast: 68,400 TS, 10 El; 9 RA; 149 Brin.
Rolled: 81,000 TS; 40,000 YS; 28 El; 135 Brin.
For pump rods, valve spindles, staybolts, shafts, impellers; high strength and corrosion resist.

IMMUNIT 2E.
M-1331; 0.12 max C, 18 Cr, 9.5 Ni, Ti = 4 × C, bal Fe.
Annealed: 85,000 TS; 35,000 YS; 55 El; 65 RA; 150 Brin.
For welded chemical plant equipment, Type 321; stainless, austenitic.

IMMUNIT 2G.
M-1331; 0.15 C, 18 Cr, 8.5 Ni, bal Fe.
Annealed: 80,000 TS, 35,000 YS; 55 El; 75 RA; 150 Brin.
Cold drawn: 180,000 TS; 150,000 YS; 10 El; 250 Brin.
For chemical plant equipment, mixers, filters, tanks; Type 302, stainless, austenitic.

IMMUNIT 2N
M-1331; 0.15 max C, 18 Cr, 8.5 Ni, bal Fe
Annealed: 80,000 TS; 35,000 YS; 55 El; 75 RA; 150 Brin.
Cold drawn: 180,000 TS, 150,000 YS; 10 El; 250 Brin.
For chemical plant equipment, mixers, filters, tanks; Type 302; stainless, austenitic.

IMMUNIT 2NA.
M-1331; 0.15 max C, 18 Cr, 8.5 Ni, 0.2 S, bal Fe
Annealed: 80,000 TS, 35,000 YS; 45 El; 65 RA; 150 Brin.
For screw machine products, bolts, fasteners, shafts, Type 303; stainless, free-cutting

IMMUNIT 2S
M-1331, 0.07 max C, 18 Cr, 9.5 Ni, bal Fe.
Annealed. 85,000 TS, 35,000 YS, 60 El, 70 RA, 150 Brin
Cold drawn. 180,000 TS, 135,000 YS; 10 El; 330 Brin
For welded chemical plant equipment, tanks, dryers, Type 304, stainless, austenitic.

IMMUNIT 2X(G)
M-1331, 0.12 max C, 18 Cr, 9.5 Ni, Cb = 8 × C, bal Fe
Annealed 90,000 TS; 45,000 YS, 56 El, 65 RA, 160 Brin.
Cold drawn: 100,000 TS, 65,000 YS, 40 El; 60 RA; 205 Brin
For welded structures, chemical plant equipment, tanks; Type 347; stainless, austenitic

IMMUNIT 4E
M-1331, 0.12 max C, 18 Cr, 2 Mo, 10.5 Ni, Ti = 4 × C, bal Fe
Annealed 85,000 TS, 35,000 YS; 50 El; 65 RA; 160 Brin.
For welded chemical plant equipment, Type 316 Ti, stainless, austenitic

IMMUNIT 4G
M-1331; 0.15 C, 18 Cr, 2 Mo, 9.5 Ni, bal Fe.
Annealed 85,000 TS, 35,000 YS, 50 El, 65 RA; 160 Brin
For chemical plant equipment, mixers, agitators, filters, Type 316; stainless, austenitic

IMMUNIT 4N
M-1331, 0.1 C, Si, 18 Cr, 8 Ni, bal Fe.
Annealed. 85,000 TS, 35,000 YS, 50 El; 70 RA; 150 Brin.
For chemical plant equipment, corrosion resistant, austenitic

IMMUNIT 4S
M-1331; 0.07 max C, 18 Cr, 10.5 Ni, 2 Mo, bal Fe.
Annealed. 85,000 TS, 35,000 YS; 50 El; 65 RA; 160 Brin.
Cold drawn: 150,000 TS, 135,000 YS; 6 El; 300 Brin.
For acid resistant chemical plant equipment; Type 316; stainless, austenitic

IMMUNIT 4SL.
M-1331; 0.1 C, 18 Cr, 9.5 Ni, 2 Mo, bal Fe.
Annealed; 85,000 TS; 35,000 YS; 50 El; 65 RA; 160 Brin.
Cold drawn: 150,000 TS; 135,000 YS; 6 El; 300 Brin.
For acid resistant chemical plant equipment, tanks; Type 316; stainless, austenitic.

IMMUNIT 4X(G).
M-1331; 0.12 max C, 18 Cr, 10.5 Ni, 2 Mo, Cb = 8 × C, bal Fe.
Annealed: 85,000 TS; 35,000 YS; 45 El; 60 RA; 170 Brin.
For welded chemical plant equipment, mixers, tanks; Type 316 Cb; stainless, austenitic.

IMMUNIT 8E.
M-1331; 0.12 max C, 18 Cr, 2 Mo, 10.5 Ni, Ti = 4 × C, bal Fe.
Annealed: 85,000 TS; 35,000 YS, 45 El; 60 RA; 170 Brin.
For welded chemical plant equipment, tanks, mixers; Type 316 Ti; stainless, austenitic.

IMMUNIT 14S.
M-1331; 0.07 max C, 17 Cr, 4.75 Mo, 13 Ni, bal Fe.
Annealed: 90,000 TS; 40,000 YS; 40 El; 55 RA; 180 Brin.
For acid resistant chemical plant equipment, tanks; Type 317; stainless, austenitic.

IMMUNIT 16S.
M-1331; 0.07 max C, 17.5 Cr, 17.5 Ni, 2 Cu, 2 Mo, Cb = 8 × C, bal Fe
Annealed: 100,000 TS; 50,000 YS; 40 El; 50 RA; 190 Brin.
For acid resistant chemical plant equipment, valves; stainless, austenitic

IMMUNIT 68G.
M-1331; 0.25 C, 1.18 Cr, 0.1 V, 0.7 Mn, 0.8 Si, bal Fe.
For gears, shafts, cams, bolts, camshafts; case hardening steel, tough.

IMMUNIT C58G.
M-1331; 0.25 C, 14.5 Cr, 1 max Ni, bal Fe.
Annealed. 95,000 TS; 50,000 YS; 25 El; 55 RA, 200 Brin
For turbine blades, cutlery, surgical and dental instruments; Type 420, corrosion resistant

IMMUNIT-R1013 MoNi.
M-1331; 0.10 C, 12.5 Cr, 0.4 Mo, 0.45 Ni, bal Fe
Annealed: 70,000 TS; 35,000 YS; 40 El; 80 RA; 145 Brin.
Cold Drawn: 90,000 TS; 80,000 YS; 20 El, 65 RA; 205 Brin.
For oil refinery and chemical plant equipment, table hardware, flatware, knives.
Corrosion resistant

IMMUNIT-R1213 MoA.
M-1331; 0.15 max C, 13 Cr, 0.3 Mo, bal Fe
Annealed: 80,000 TS; 40,000 YS, 25 El, B 93 Rock.
For springs, shafts, table flatware, oil refinery equipment.
Corrosion resistant, hardenable.

IMMUNIT-R1513 Mo.
M-1331, 0.15 C, 13 Cr, 1 Mo, bal Fe
Annealed: 80,000 TS; 40,000 YS; 25 El; B 93 Rock.
Cold Drawn: 100,000 TS; 80,000 YS; 15 El; B 96 Rock .
For springs, table flatware, oil and chemical plant equipment.
Corrosion resistant, hardenable.

IMMUNIT-R2013 Mo.
M-1331; 0.20 C, 13 Cr, 1 Mo, bal Fe.
Annealed: 95,000 TS; 40,000 YS; 25 El; B 92 Rock.
Heat treated: 240,000 TS; 200,000 YS; 10 El; C 50 Rock.
For cutlery, bearings, knives, shafts, surgical instruments, scissors.
Corrosion resistant, hardenable.

IMMUNIT-R2213.
M-1331, 0.20 C, 12 Cr, 1 Mo, 0.3 V, 0.5 W, bal Fe.
Annealed: 90,000 TS; 40,000 YS; 25 El; B 92 Rock.
Hardened 240,000 TS, 210,000 YS; 9 El; C 50 Rock
For valves, bearings, cutlery, surgical instruments.
Corrosion resistant.

IMPACTO.
M-38; 1 C, 0.4 Si, bal Fe.
For tools, dies, water hardening.

IMPACTO
M-435, 0.15 C, 0.5 Mn, 0.25 Mo, 1.75 Ni, bal Fe.
Normalized. 80,000 TS; 45,000 YS; 30 El; 65 RA; 163 Brin
For case hardened parts, gears, pinions, cams; carburizing steel

IMPALCO 740
M-1547, 0.3-0.7 Cu, 2.2-3.2 Mg, 0.5 max Si, 0.5 max Fe, 0.3-0.7 Mn, 5.2-6.2 Zn, bal Al.
Heat treated 72,000 min TS; 7 min El
For machining applications of high strength parts, structural members
Poor weldability Heat treatable

IMPALCO 750
M-1547, 0.3-0.7 Cu, 2.2-3.2 Mg, 5.2-6.2 Zn, 0.08-0.25 Cr, bal Al.
Heat treated 72,000 min TS, 7 min El
For machining applications of high strength parts, structural members. Poor weldability. Heat treatable

IMPALCO 760
M-1547, 0.8-1.4 Cu, 2.2-3.2 Mg, 0.3-0.7 Mn, 5.0-6.0 Zn, bal Al.
Heat treated 78,000 min TS, 5 min El.
For machining applications of high strength parts, structural members Heat treatable. Poor weldability

IMPALCO C66
M-1547, 3.5-4.8 Cu, 0.85 max Mg, 0.9 max Si, 1.0 max Fe, 1.2 max Mn, bal Al.
Heat Treated: 69,000 min TS; 8 min El.
At 200°C 55,000 TS, 7.5 El
For highly stressed structural members
Heat treatable Not corrosion resistant. Fair ductility and weldability

IMPALCO C66A
M-1547, 3.5-4.8 Cu, 0.85 max Mg, 0.90 max Si, 1.0 max Fe, 1.2 max Mn, bal Al
T-4 Temper: 54,000 min TS; 15 min El.
T-6 Temper: 58,000 min TS; 8 min El.
For stressed skin structures where corrosion resistance is important
Clad with pure aluminum. High strength Heat treatable.

IMPALCO C69.
M-1547; 1.0-2.0 Cu, 0.5-1.2 Mg, 0.8-1.3 Si, 0.7 max Fe, 1.0 max Mn, bal Al.
Heat treated: 58,000 min TS; 8 min El.
For medium and high strength applications.
Heat treatable. Poor resistance to atmospheric attack.

IMPALCO C80.
M-1547; 5.0-6.0 Cu, 0.4 max Si, 0.7 max Fe, 0.2-0.6 Pb, 0.2-0.6 Bi, 0.3 max Zn, bal Al.
Heat Treated: 42,000 min TS; 12 min El.
For screw machine products, fasteners, shafts, screws.
Free-machining. Poor resistance to atmospheric attack. Age-hardenable.

IMPALCO M31.
M-1547; 0.15 max Cu, 0.4-0.8 Mg, 0.15 max Si, 0.2 max Fe, 0.25 Mn, bal Al.
O-Temper: 18,000 max TS.
H-Temper: 24,600 min TS.
For bright trim, automobile panels, architectural applications.
Good formability and weldability. Non-heat treatable.

IMPALCO M32.
M-1547; 0.15 max Cu, 0.8-1.2 Mg, 0.15 max Si, 0.2 max Fe, 0.25 Mn, bal Al.
O-Temper. 22,400 max TS.
H-Temper: 29,200 min TS.
For bright trim, architectural applications, automobile panels Good ductility, formability and weldability. Non-heat treatable.

IMPALCO M32X.
M-1547, 0.15 max Cu, 0.8-1.2 Mg, 0.15 max Si, 0.2 max Fe, 0.25 Mn, bal Al.
O-Temper: 22,400 max TS.
H-Temper· 29,200 min TS.
For automobile trim, architectural applications, panelling
Good ductility, formability and weldability
Non-heat treatable.

IMPALCO M34.
M-1547, 0.1 max Cu, 0.8-1.2 Mg, 0.35 max Si, 0.5 max Fe, 0.15-0.30 Mn, bal Al
O-Temper 18,000 min TS; 20 min El
H-Temper 33,600 min TS; 29,200 min YS; 4 min El
For tubular furniture, television antennae
Non-heat treatable Good formability and weldability

IMPALCO M35/1.
M-1547, 0.10 max Cu, 1.8-2.7 Mg, 0.6 max Si, 0.7 max Fe, 0.5 max Mn, 0.5 max Cr, bal Al
At 25°C· 25,700 TS; 10,000 YS, 29 El.
At 200°C 20,700 TS; 10,700 YS, 50 El
For architectural and marine applications, panelling, containers, welded structures.
Non-heat treatable Good formability and weldability

IMPALCO M35/2
M-1547; 0.10 max Cu, 3.0-4.0 Mg, 0.6 max Si, 0.7 max Fe, 1.0 max Mn, 0.5 max Cr, bal Al.
At 25°C· 32,000 TS; 10,000 YS; 29 El.
At 200°C: 23,500 TS; 11,200 YS; 53 El.
For welded structures, casings.
Good formability and weldability. Work hardens rapidly Non-heat treatable.

IMPALCO M35/3.
M-1547; 0.10 max Cu, 3.5-5.5 Mg, 0.7 max Si, 0.7 max Fe, 1.0 max Mn, 0.5 max Cr, bal Al.
M-Temper: 38,100 min TS; 12 min El.
O-Temper: 38,100 min TS; 18 min El.
For riveted and welded vessels or containers subjected to relatively high stresses
Non-heat treatable. Good formability and weldability. Work hardens rapidly.

IMPALCO M36.
M-1547; 0.10 max Cu, 4.5-5.5 Mg, 0.6 max Si, 0.7 max Fe, 1.0 max Mn, 0.5 max Cr, bal Al.
M-Temper: 38,100 min TS; 18 min El.
¼ H-Temper: 42,000 min TS; 8 min El.
For marine, chemical and food industries, aircraft, welded structures.
Non-heat treatable. Good formability and weldability. Work hardens rapidly.

IMPALCO M38.
M-1547; 0.04 max Cu, 0.4-0.9 Mg, 0.3-0.7 Si, 0.5 max Fe, bal Al.
At 25°C: 33,000 TS; 17 El.
At 150°C: 21,300 TS; 20 El.
For busbars.
Heat treatable. Good ductility and weldability.
High electrical conductivity of 55% min.

IMPALCO M39/1.
M-1547; 0.10 max Cu, 0.4-0.9 Mg, 0.3-0.7 Si, 0.6 max Fe, 0.3 max Mn, bal Al.
O-Temper: 15,700 min TS; 15 El.
Heat Treated: 27,000 min TS; 12 min El.
For glazing bars, window frames, curtain walls.
Heat treatable: Good formability and weldability.

IMPALCO M39/2.
M-1547, 0.10 max Cu, 0.4-1.5 Mg, 0.6-1.3 Si, 0.6 max Fe, 0.4-1.0 Mn, 0.3 max Cr, bal Al.
Heat Treated· 42,600 min TS; 10 min El.
O-Temper: 15,700 min TS; 15 min El.
For automobile and bus bodies, coke skips, crossbearers.
Heat treatable: Good weldability and ductility. Resists stress and shock.

IMPALCO M40
M-1547; 0.15-0.40 Cu, 0.8-1.2 Mg, 0.4-0.8 Si, 0.7 max Fe, 0.2-0.8 Mn, 0.15-0.35 Cr, bal Al.
Heat Treated: 40,400 min TS; 10 min El.
O-Temper. 15,700 min TS; 15 min El.
For tubular furniture.
Good formability and weldability. Heat treatable.

IMPALCO M42.
M-1547; 0.10 max Cu, 0.4-1.5 Mg, 0.6-1.3 Si, 0.6 max Fe, 0.2 max Mn, 0.1 max Cr, bal Al.
Heat treated: 40,400 min TS; 10 min El.
O-Temper. 15,700 min TS; 15 min El.
For general purpose applications requiring good surface finish and medium strength.
Heat treatable. Good ductility and weldability. Not shock resistant.

IMPALCO P3.
M-1547; 0.02 max Cu, 0.15 max Si, 0.15 max Fe, 99.8 min Al.
O-Temper: 11,200 max TS; 35 min El.
½H-Temper. 13,500-16,800 TS; 8 min El.
For chemically brightened and anodized components, costume jewelry.
High ductility, poor machinability, low strength, high corrosion resistance.

IMPALCO P5
M-1547; 0.05 max Cu, 0.3 max Si, 0.4 max Fe, 0.05 max Mn, 99.5 min Al.
M-Temper: 9000 min TS; 25 min El.
O-Temper: 13,500 max TS; 30 min El.
For food, pharmaceutical and chemical processing equipment, containers.
High corrosion resistance, high ductility, and workability.

IMPALCO P5E.
M-1547; 0.05 max Cu, 0.5 max Cu + Si + Fe, 99.5 min Al
O-Temper: 10,000-14,500 TS; 25 min El.
For electrical applications, busbars.
Low strength, high conductivity.

IMPALCO P10.
M-1547; 0.1 max Cu, 0.5 max Si, 0.7 max Fe, 0.1 max Mn, 99.0 min Al.
At 25°C: 12,800 TS; 5200 YS; 45 El.
At 200°C: 6000 TS; 2500 YS; 70 El.
H-Temper: 20,200 min TS; 3 El.
For processing equipment for chemical, pharmaceutical, petroleum and food industries.
High corrosion resistance, good ductility, low strength.

IMPALCO PA15.
M-1547; 10.0-13.0 Si, 0.10 max Cu, 0.6 max Fe, 0.5 max Mn, bal Al.
For brazing applications. Filler alloy.
Non-heat treatable. Good fluidity. Good corrosion resistance.

IMPALCO PA16.
M-1547; 0.10 max Cu, 4.5-6.0 Si, 0.6 max Fe, 0.5 max Mn, bal Al.
For brazing applications. Filler alloy.
Non-heat treatable. Good fluidity and corrosion resistance.

IMPALCO PA17.
M-1547; 0.10 max Cu, 7.0-8.0 Si, 0.6 max Fe, 0.5 max Mn, bal Al
For brazing applications Filler alloy.
Non-heat treatable. Good fluidity and corrosion resistance.

IMPALCO PA19
M-1547, 0.15 max Cu, 0.6 max Si, 0.7 max Fe, 1.0-1.5 Mn, bal Al.
At 25°C 15,200 TS; 5000 YS; 40 El
At 200°C: 11,200 TS; 4480 YS, 43 El
For panelling of buildings, or vehicles, containers, holloware, roofing
Not hardenable by heat treatment. Good ductility, fair machinability.

IMPAX
M-111, M-111a; 0.36 C, 1.4 Cr, 1.4 Ni, 0.2 Mo, bal Fe.
Heat treated: 300-330 Brin.
For molds, dies, tools, die casting tools for zinc, plastic molds
Prehardened Type P20 tool steel.

IMPERATOR 15.
M-1345; 0.3 C, 1 Si, 0.4 Mn, 1.1 Cr, 0.18 V, 3.7 W, bal Fe.
For upsetters, cold headers, crimpers, oil hardened, tough.

IMPERATOR 200
M-1345, 0.30 C, 2.35 Cr, 0.6 V, 4.25 W, bal Fe
For upsetters, header dies, crimpers; oil hardened, tough.

IMPERIAL
M-24; 0.50 C, 0.3 Mn, 1.0 Si, 0.45 Mo, bal Fe.
For cold work applications as beading tools, pipe cutter wheels, caulking tools, concrete breakers, staking tools.
AISI Type S2 shock resisting steel

IMPERIAL.
M-49; 80 Cu, 20 Ni.
For condenser tubes; corrosion resistant.

IMPERIAL
M-210, 1.4 C, 0.75 Cr, 4.5 W, bal Fe.
For cutting tools, drills, reamers, textile needles.
Water hardening. Wear resistant.

IMPERIAL ALL-METAL SOLDER.
M-786; Pb, Sn.
For Al solder; high strength.

IMPERIAL C.R. 17.
M-210, 0.12 C, 17 Cr, 0.3 Mn, bal Fe.
Annealed. 78,000 TS; 49,000 YS; 32 El; 50 RA; 160 Brin.
For chemical plant equipment, oil burner parts; corrosion resistant, ferritic.

IMPERIAL C.T.
M-210; 0.32 C, 13 Cr, 0.3 Mn, bal Fe.
Heat treated: 202,000 TS, 190,000 YS; 15 El; 35 RA; 450 Brin.
For surgical instruments, valve bodies, pump parts; impellers, corrosion and heat resistant, hardenable.

IMPERIAL E.Q.
M-210, 0.20 C, 12-14 Cr, bal Fe.
Heat treated: 100,000 TS; 80,000 YS; 30 El; 65 RA; 200 Brin.
For steam valves, pump bodies, stainless, hardenable.

IMPERIAL MAJOR.
M-365, 21-22 W, 4-5 Cr, 13 Co, 1.5 V, 0.5 Mo, bal Fe
For tools, cutters; high speed steel.

IMPERIAL MANGANESE
M-210, 12 Mn, 1.2 C, bal Fe.
123,000 TS, 200 Brin
For tracks, dredger buckets, dipper teeth, gears, sheave wheels, sprockets, tube mill liners; wear resistant; difficult to machine

IMPERIAL R 1
M-210, 0.12 C, 13 Cr, 0.3 Mn, bal Fe
Heat treated 85,000 TS; 56,000 YS; 35 El; 75 RA; 175 Brin
Annealed 67,000 TS, 38,000 YS, 38 El; 77 RA; 140 Brin
For shafts, housings, valve bodies, pump casings, corrosion resistant.

IMPERIAL R I O
M-210, C, Ni, Cr, bal Fe
For plastic mold dies, stainless, hobbed dies

IMPERIAL S 61
M 210, 0.3 C, 13 Cr, bal Fe.
For turbine blades, valves, cutlery; stainless, hardenable

IMPERIAL S 80
M-210, 0.20 C, 18 Cr, 1.25 Ni, bal Fe
Heat treated 130,000 TS, 107,000 YS; 20 El; 45 RA, 270 Brin
Annealed 112,000 TS, 80,000 YS; 14 El; 245 Brin.
For steam valves, pump bodies; stainless, hardenable

IMPERIAL STAINLESS IRON
M-210; 0.10 C, 13 Cr, bal Fe
Oil treated 161,000-116,500 TS, 12-20 El, 37-67 RA, 360-220 Brin
For dental mirrors, nitric acid equipment, dye vats, heat exchangers, stove fittings, acid and heat resistant, malleable.

IMPERIAL STEEL
Eng., 6.4 W, 2.1 Mn, 1.6 C, bal Fe.
For tools, cutters; oil hardening.

IMPERIAL TOOL.
M-210, 1.4 C, 0.75 Cr, 4.5 W, bal Fe.
For fast finishing cutters; water hardened.

IMPHY 4.
M-771; 0.12 max C, 1.25 max Mn, 14-18 Cr, bal Fe.
Annealed: 80,000 TS, 45,000 YP; 25 El; 165 Brin.
Cold Rolled: 130,000 TS; 125,000 YP; 2 El; 270 Brin

For chemical and textile plant equipment, oil burner and heater parts.
Type 430 stainless steel; ferritic.

IMPHY 6.
M-771; 0.20 C, 28 Cr, 4 Ni, bal Fe.
Cast: 100,000 TS; 61,000 YS; 13 El; 207 Brin.
At 1000°F: 64,000 TS; 38,000 YS; 25 El; 27 Brin.
For furnace blowers, gas burners, recuperators, ore roasting furnaces.
Type 327 stainless steel. Resists high sulphur atmospheres

IMPHY 30CD12SP.
M-771; 0.30 C, 3.0 Cr, 0.4 Mo, bal Fe.
Annealed 114,000 TS.
Heat treated: 157,000 TS.
For casings, liners, cylinder liners; Afnor 30CD12; nitriding steel.

IMPHY 31 BIS SP.
M-771, 0 16 C, Ni, Cr, Mo, bal Fe.
Annealed. 92,000 TS, 65,000 YS; 20 El.
Heat treated: 186,000 TS, 143,000 YS, 10 El.
For gears, cams, camshafts; case hardened; Afnor 16NCD13

IMPHY 32SP.
M-771, 0 30 C, 1.2 Ni, 0.6 Cr, 0 2 Mo, bal Fe.
Normalized 120,000 TS, 85,000 YS; 16 El.
Heat treated: 135,000 TS; 114,000 YS, 14 El.
For crankshafts, gears, bits, Afnor 30NCD11; oil hardened.

IMPHY 34R
M-771, 0 32 C, Ni, Cr, Mo, bal Fe.
Normalized 121,000 TS; 85,000 YS; 16 El
Heat treated 242,000 TS, 200,000 YS; 6 El.
For crankshafts, gears, bolts; Afnor 32NCD11, oil hardened

IMPHY 34/SP
M-104, C, 2 Ni, 2 Cr, Mo, bal Fe
For gears, shafts, oil hardening

IMPHY 34SP
M-771, 0 32 C, 2 2 Ni, 2.2 Cr, 0 7 Mo, bal Fe
Normalized· 121,000 TS, 92,000 YS, 16 El.
Heat treated 250,000 TS; 220,000 YS, 8 El.
For crankshafts, gears, bolts; Afnor 32NCD8; oil hardened.

IMPHY 38MS5SP
M-771, 0 9 C, alloy, bal Fe
Annealed 114,000 TS, 58,000 YS; 15 El
Heat treated· 200,000 TS, 177,000 YS; 8 El
For springs; Afnor 38MS5, water hardened

IMPHY 41SP
M-771, 0 42-0 50 C, 1.25-1.75 Si, 0 7-0.9 Cr, 0 2-0 3 Mo, bal Fe
Normalized. 108,000 TS; 58,000 YS; 16 El
Heat treated: 242,000 TS, 221,000 YS, 6 El.
For springs, Afnor 45SCD6; oil hardened.

IMPHY 301.
M-771; 0.20 max C, 1 max Si, 2 max Mn, 7 Ni, 17 Cr, bal Fe.
Annealed: 110,000 TS; 40,000 YS; 60 El, B 85 Rock.
Half Hard· 150,000 TS; 110,000 YS; 15 El; C 32 Rock.
For aircraft structural members, trailer bodies, household utensils, architectural trim; work hardens rapidly
AISI Type 301, stainless.

IMPHY 302
M-771; 0.12 max C, 1 max Si, 2 max Mn, 9 Ni, 18 Cr, bal Fe.
Annealed: 90,000 TS; 40,000 YS; 50 El; B 85 Rock.
Cold Drawn: 140,000 TS; 100,000 YS; 30 El; B 100 Rock.
For chemical plant and food processing equipment, valve trim, fasteners.
AISI Type 302. Stainless.

IMPHY 304.
M-771; 0.08 max C, 1 max Si, 2 max Mn, 10.5 Ni, 19 Cr, bal Fe
Annealed. 85,000 TS; 30,000 YS; 60 El; B 80 Rock.
Cold Drawn: 150,000 TS; 100,000 YS; 30 El; C 23 Rock.
For architectural molding and trim, welded structures, processing equipment.
Type 304 stainless.

IMPHY 304L
M-771, 0 03 max C, 1 max Si, 2 max Mn, 11.5 Ni, 19 Cr, bal Fe.
Annealed. 80,000 TS; 30,000 YS, 60 El; B 80 Rock.
Cold Drawn· 150,000 TS; 100,000 YS; 30 El; C 22 Rock
For architectural molding and trim, welded structures, processing equipment.
AISI Type 304L Stainless

IMPHY 305
M-771, 0 12 max C, 1 max Si, 2 max Mn, 11.5 Ni, 18 Cr, bal Fe
Annealed. 85,000 TS, 38,000 YS; 55 El; B 80 Rock
For electrical instruments, cold headed fasteners, chemical and textile processing equipment
AISI Type 305

IMPHY 308.
M-771, 0 08 max C, 1 max Si, 2 max Mn, 11 Ni, 20 Cr, bal Fe.
Annealed· 85,000 TS; 30,000 YS; 55 El, B 80 Rock
For welded structures, valve trim, oil refinery and chemical plant equipment, industrial furnaces, welding rod Heat and corrosion resistant. AISI Type 308

IMPHY 309
M-771; 0 15 max C, 14 Ni, 23 Cr, bal Fe
Annealed 90,000 TS; 45,000 YS, 45 El; B 85 Rock
For oil burners, furnace parts, oil refinery and chemical plant equipment.
High creep and oxidation resistance
AISI Type 309 Stainless

IMPHY 310
M-771, 0 15 max C, 20 Ni, 25 Cr, bal Fe
Annealed 90,000 TS; 40,000 YS; 55 El, B 80 Rock.
At 1200°F. 57,000 TS, 22,000 YS, 32 El, 45 RA.
For carburizing boxes, oil burner parts, baffle plates, oil refinery equipment, recuperators.
Heat and corrosion resistant.
AISI Type 310 austenitic.

IMPHY 316
M-771; 0.08 max C, 1 max Si, 2 max Mn, 13 Ni, 17 Cr, 2 5 Mo, bal Fe.
Annealed· 80,000 TS; 30,000 YS; 60 El; B 80 Rock
Cold Rolled· 150,000 TS; 135,000 YS; 6 El; C 32 Rock.
For chemical plant equipment, tanks, agitators, evaporators, valve trim. Acid resistant, stainless.
AISI Type 316, Austenitic.

IMPHY 316L.
M-771; 0.03 max C, 13 Ni, 18 Cr, 2.5 Mo, bal Fe.
Annealed: 80,000 TS; 30,000 YS; 60 El; B 80 Rock.
Cold Rolled: 125,000 TS; 90,000 YS; 30 El; C 24 Rock.
For chemical plant equipment, tanks, agitators, evaporators. Acid resistant, stainless.
AISI Type 316L, austenitic.

IMPHY 317.
M-771; 0.08 max C, 14 Ni, 19 Cr, 3.5 Mo, bal Fe.
Annealed: 90,000 TS; 55,000 YS; 50 El; B 90 Rock.
Cold Rolled: 150,000 TS; 125,000 YS; 15 El; C 30 Rock.
For textile and dye plant equipment, paper and pulp mill equipment, chemical plant equipment. Stainless, acid resistant.
AISI Type 317, Austenitic.

IMPHY 317L.
M-771; 0.03 max C, 14 Ni, 19 Cr, 3.5 Mo, bal Fe.
Annealed: 80,000 TS; 35,000 YS; 70 El; B 70 Rock.
Cold Rolled: 125,000 TS; 90,000 YS; 35 El; C 22 Rock.
For textile, die and chemical plant equipment, paper and pulp mills. Agitators, digesters, Stainless, acid resistant.
AISI Type 317L. Austenitic.

IMPHY 321.
M-771; 0.08 max C, 0.75 max Si, 2 max Mn, 12 Ni, 18 Cr, Ti = 5 × C, bal Fe.
Annealed: 85,000 TS; 30,000 YS; 55 El; B 80 Rock.
Cold Drawn: 95,000 TS; 60,000 YS; 40 El; 185 Brin.
For welded structures, tanks, exhaust systems, engine manifolds, oil refinery and chemical plant equipment.
AISI Type 321. Austenitic, stainless.

IMPHY 347.
M-771; 0.08 max C, 1 max Si, 2 max Mn, 11 Ni, 18 Cr, Cb = 10 × C, bal Fe.
Annealed: 90,000 TS; 40,000 YS; 50 El; B 83 Rock.
Cold Drawn: 100,000 TS; 65,000 YS; 40 El; B 95 Rock.
For welded structures, exhaust manifolds, radiant superheaters, low temperature processing.
Welding grade, stainless.
AISI Type 347, austenitic.

IMPHY 410.
M-771; 0.15 C, 1 max Si, 1 max Mn, 12.5 Cr, bal Fe.
Annealed: 70,000 TS; 35,000 YS; 30 El; B 80 Rock.
Oil Hardened: 190,000 TS; 145,000 YS; 15 El; 390 Brin.
For flat springs, knives, cutlery, table flatware.
Corrosion and heat resistant.
AISI Type 410. Hardenable.

IMPHY 430.
M-771; 0.12 max C, 1 max Si, 1 max Mn, 16 Cr, bal Fe.
Annealed: 75,000 TS; 45,000 YS; 28 El; 142 Brin.
Cold Rolled: 110,000 TS; 95,000 YS; 12 El; 190 Brin.
For automotive and architectural trim, hardware, fasteners, kitchen sinks, septic tanks, storage vessels.
AISI Type 430. Nonhardenable, corrosion resistant.

IMPHY 431.
M-771; 0.20 max C, 1 max Si, 1 max Mn, 2 Ni, 16 Cr, bal Fe.
Annealed: 125,000 TS; 95,000 YS; 20 El; C 24 Rock.
Heat Treated: 180,000 TS; 125,000 YS; 17 El; C 38 Rock.
For pump shafts, marine hardware, surgical trusses, valve trim, aircraft structural members.
Corrosion and heat resistant.
AISI Type 431. Hardenable.

IMPHY 505.
M-104; C, 5 Cr, 0.5 Mo, bal Fe.
For petroleum industry equipment; corrosion resistant.

IMPHY 766
M-104, 0.4 C, 1.5 Cr, Si, Mo, V, bal Fe.
For gears, shafts; oil hardening

IMPHY 1640
M-104; C, Cr, bal Fe.
Annealed: 101,000 TS, 58,000 YS, 18 El.
Heat treated: 135,000 TS; 114,000 YS; 14 El.
For crankshafts; tough.

IMPHY 1691.
M-104, C, Ni, Cr, Mo, bal Fe.
Annealed. 121,000 TS, 92,000 YS, 18 El.
Oil treated: 144,000 TS; 128,000 YS, 14 El.
For gears, crankshafts, still parts, bolts, resists high temperatures.

IMPHY 3693.
M-104; C, 1.5 Cr, Mo, V, bal Fe.
For gears, shafts; oil hardening.

IMPHY A8
M-771, 0.06 C, 12-14 Cr, 0.2 Al, bal Fe.
Annealed. 70,000 TS; 40,000 YS, 30 El; 160 Brin.
Cold Drawn: 85,000 TS; 70,000 YS; 20 El; 185 Brin.
For heat treating boxes, oil refinery equipment, quenching racks
Type 405 stainless steel, ferritic.

IMPHY ADR
M-104; 38-40 Ni, 1 Mn, bal Fe
For use in construction of rotary converters, thermostats, geodesic measures; low coefficient of expansion.

IMPHY AFK
M-771; Si, bal Fe
For magnetic equipment; soft magnet for strong or moderate field.

IMPHY AMF
M-104, 55-60 Ni, 0.3 Mn, 0.2-0.4 C, bal Fe.
Annealed: 100,000 TS, 62,000 YS; 40 El; 50 RA.
Liquid air T 102,000 TS; 50,000 YS; 40 El; 55 RA.
For valves of expansion engines used in liquid air plants, refrigeration machines; great ductility at low temperature.

IMPHY ARC
M-104; 0.2 C, 18 Cr, 8 Ni, bal Fe.
For chemical apparatus, nitrogen fixation and synthetic ammonia apparatus, valves, pumps; resists chemical attack; stainless.

IMPHY ARC 098.
M-104, M-771; 0.1 C, 14 Ni, 25 Cr, 1.2 Mo, bal Fe.
For chemical plant equipment; resists nitric acids.

IMPHY ARC 164.
M-104, M-771; 0.12 C, 60 Ni, 18 Mo, bal Fe.
For chemical plant equipment; resists HCl.

IMPHY A.R.C. 1047.
M-104; C, 18 Cr, 8 Ni, W, bal Fe.
For chemical equipment; corrosion resistant.

IMPHY ARC-2266.
M-104, M-771; 0.2 max C, 18 Cr, 8 Ni, 3 Mo, bal Fe.
Annealed: 90,000 TS; 38,000 YS; 55 El; 65 RA; 160 Brin.
For chemical plant equipment, Type 317; stainless, austenitic.

IMPHY ARC 2266S.
M-104, M-771; 0.08 max C, 20 Cr, 10 Ni, 3 Mo, bal Fe.
Annealed: 85,000 TS; 35,000 YS; 50 El; 65 RA; 160 Brin.
For chemical plant equipment, tanks, agitators; acid resistant, austenitic; Type 317.

IMPHY ARC 2266SP.
M-104, M-771; 0.06 max C, 18 Cr, 11 Ni, 3 Mo, 0.4 Ti, bal Fe.
Annealed. 85,000 TS; 35,000 YS; 40 El; 55 RA; 160 Brin.
For oil refinery and chemical plant equipment; acid resistant, austenitic.

IMPHY ARC 2266T
M-104, M-771, 0.06 max C, 17 Cr, 12 Ni, 3 Mo, bal Fe.
Annealed· 85,000 TS, 35,000 YS; 50 El, 65 RA; 160 Brin.
For oil refinery and chemical plant equipment; acid resistant, austenitic; Type 316L

IMPHY ARC 2702A.
M-104, M-771, 0.04 C, 18 Cr, 8 Ni, bal Fe.
Annealed 85,000 TS, 35,000 YS; 60 El, 70 RA; 150 Brin
Rolled· 125,000 TS, 95,000 YS, 25 El, 55 RA; 277 Brin
For chemical plant equipment, Type 304, stainless, austenitic.

IMPHY ARC-2702B
M-104, M-771, 0.09-0.15 C, 18 Cr, 8 Ni, Ti, bal Fe
Annealed 85,000 TS, 35,000 YS; 60 El; 70 RA; 150 Brin
For welded parts, chemical plant equipment; Type 321, stainless, austenitic

IMPHY A R C. 2702S
M-104, 0.2 C, 18 Cr, 8 Ni, bal Fe
For corrosion resistant parts, stainless, corrosion resistant

IMPHY A.T E.
M-104; 95 Ni, 2 Mn, 2 Al, 1 Si.
For thermocouple element to be used with Imphy B T.E., max operating temperature 1100°C.

IMPHY A T.G.
M-104; 60 Ni, 26 Fe, 10 Cr, 4 W.
Forged: 121,000 TS; 91,000 YS; 20 El.
Annealed. 100,000 TS, 52,000 YS, 30 El.
For gas turbines, internal combustion engines; heat resisting, corrosion resisting

IMPHY ATG-B.
M-771, C, alloy, bal Fe.
For heat resistant parts, oil refinery equipment; heat resistant.

IMPHY ATG-M.
M-771; C, alloy, bal Fe.
For heat resistant parts, oil refinery equipment; heat resistant.

IMPHY ATG-R.
M-771; C, alloy, bal Fe.
For heat resistant parts, oil refinery equipment; heat resistant.

IMPHY ATG-S
M-771; C, alloy, bal Fe.
For oil refinery equipment; heat resistant.

IMPHY ATG-S4.
M-771; C, alloy, bal Fe.
For oil refinery equipment; heat resistant.

IMPHY ATG-S7.
M-771; C, alloy, bal Fe.
For oil refinery equipment; heat resistant.

IMPHY ATG-T
M-771, C, alloy, bal Fe.
For oil refinery equipment, heat resistant.

IMPHY ATG-Z
M-771, C, alloy, bal Fe
For oil refinery equipment; heat resistant

IMPHY A T.V.-1
M-104; 0.30 C, 35 Ni, 11 Cr, bal Fe.
Forged: 107,000 TS; 78,000 YS; 20 El.
Annealed· 88,000 TS, 46,000 YS, 25 El
For turbines, exhaust valves for internal combustion engines; corrosion and heat resistant.

IMPHY ATV-1
M-771, C, alloy, bal Fe
For oil refinery equipment; oxidation resistant

IMPHY ATV-3
M-771, C, alloy, bal Fe
For oil refinery equipment, oxidation resistant.

IMPHY ATV-R
M-771, C, alloy, bal Fe
For oil refinery equipment; oxidation resistant.

IMPHY ATV-S
M-771, C, alloy, bal Fe
For oil refinery equipment, oxidation resistant

IMPHY BCM.
M-771; 0.10 C, bal Fe
Heat treated. 50,000-72,000 TS; 36,000-50,000 YS; 30-25 El.
For valves, punches, drivers, gears; case hardened; Afnor XC10

IMPHY B T E
M-104, 91 Ni, 9 Cr
For thermocouple element to be used with Imphy A T E , C.T F or nickel; max operating temperature 1100°C.

IMPHY BTE-ATE.
M-771; iron alloy
For pyrometers, good to 1000°C

IMPHY BTE CTE
M-771, iron alloy.
For pyrometers, good to 700°C.

IMPHY BTE-NTE
M-771, iron alloy.
For pyrometers, good to 900°C.

IMPHY B Y -1.
M-104; 0.25 C, 4 Ni, 1 Cr, bal Fe
Heat treated 107,000-228,000 TS, 85,000-213,000 YS, 15-8 El.
For shafts; air hardening.

IMPHY B.Y.2.
M-104; 0.35 C, 4.25 Ni, 1.20 Cr, bal Fe.
121,000 TS; 100,000 YS; 12 El.
For machinery parts, gears; shock resistant.

IMPHY CCA 1007.
M-771; 0.08 C, 13 Cr, 0.20 Al, 1.0 max Mn; bal Fe.
Annealed: 65,000 TS; 38,000 YS; 30 El; 160 Brin.
Cold Drawn: 85,000 TS; 70,000 YS, 20 El; 185 Brin.
For annealing boxes, quenching racks, heat treating equipment, oil refinery and chemical plant equipment.
Type 405 stainless steel, heat and corrosion resistant.

IMPHY CCR.
M-104; 2 C, 13 Cr, bal Fe.
Annealed: 100,000-121,000 TS; 58,000-78,000 YS; 20-15 El.
Heat treated: 192,000 TS; 163,000 YS, 5 El.
For gages, mirrors, abrasion resistant.

IMPHY C C.R.-Co
M-104; 1.5 C, 13 Cr, 0.7 Mo, 3 Co, bal Fe.
For bearings, knives, cutlery, heat resistant, hardenable.

IMPHY CMO
M-771, C, alloy, bal Fe.
For oil refinery equipment; oxidation resistant

IMPHY CRB.
M-771; 1.0 C, 1.5 Cr, 0.3 Si, 0.4 Mn, bal Fe.
For rolls, ball bearings; Afnor 100C6, water hardened.

IMPHY C T.E
M-104, 45 Ni, 55 Cu.
For thermocouple element to be used with Imphy B T E., useful range (−220 to +700°C).

IMPHY CVC
M-104, C, 1.5 Cr, 0.25 V, bal Fe
Annealed: 64,000-73,000 TS, 50,000 58,000 YS; 28-22 El
Water quenched: 163,000-186,000 TS; 156,000-177,000 YS; 10-17 El
For piston pins; case-hardening steel.

IMPHY "D."
M-104; 0.25 C, Si, Mn, bal Fe
Annealed 70,000-78,000 TS, 43,000-52,000 YS; 28-25 El
For machine parts, locomotive axles, water hardening

IMPHY "D D"
M-104, 0.20 C, Si, Mn, bal Fe
Annealed. 64,000-71,000 TS, 38,000-46,000 YS; 31-28 El.
For wagon axles, marine forgings; water hardening

IMPHY "D D D"
M-104, 0.15 C, Si, Mn, bal Fe
Annealed: 58,000-64,000 TS, 39,000-45,000 YS; 33-28 El.
For rivets, stamped pieces; easily worked.

IMPHY "D T"
M-104; 0.40 C, Si, Mn, bal Fe.
Annealed 85,000-92,000 TS, 50,000-56,000 YS, 24-20 El.
For fire arms, cutlery, edge tools, water hardening

IMPHY ERA HR1.
M-104, M-771; 0.30 C, 18 Cr, 8 Ni, 3 W, 1.5 Si, bal Fe.
Rolled: 114,000 TS, 71,000 YS; 22 El.
For chemical plant equipment; stainless, austenitic

IMPHY ERA HR2.
M-104, M-771; 0.13 C, 18 Cr, 8 Ni, bal Fe.
Rolled. 100,000 TS; 55,000 YS; 25 El.
For chemical plant equipment; Type 302; stainless, austenitic

IMPHY "F.F."
M-104; 0.10 C, Si, Mn, bal Fe.
Annealed: 52,000-58,000 TS; 32,500-38,000 YS; 39-42 El.
For welding; replaces Swedish Iron.

IMPHY HPM.
M-771, Si, bal Fe.
For armatures, transformers, relays; soft magnet for strong or moderate field.

IMPHY ICR.
M-771, C, bal Fe
For welded structures.

IMPHY IR
M-771, 0.7 C, 14 W, 4 Cr, 1 V, bal Fe.
Hardened. C 64-66 Rock.
For cutting tools, drills, reamers, broaches, lathe and planer tools
High speed steel, high red-hardness

IMPHY I R R -S.
M-104, 0.7 C, 20 W, 1 Mo, 1.5 V, 10 Co, bal Fe.
For tools, cutters, high speed steel.

IMPHY I.R U.
M-104, 0.7 C, 18 W, 1 Mo, 1 V, bal Fe
For tools, cutters, high speed steel.

IMPHY IRU
M-771, 0.7 C, 18 W, 4 Cr, 1 V, bal Fe
Hardened C 64-66 Rock
For cutting tools, taps, drills, lathe and planer tools, reamers, hobs, milling cutters, thread chasers High speed steel, Type T1.
High red hardness

IMPHY ISO
M-771, C, bal Fe
For welded structures

IMPHY I T R.
M-104, 0.7 C, 18 W, 1 Mo, 1 V, 5 Co, bal Fe
For tools, cutters, high speed steel

IMPHY ITR
M-771, 0.7 C, 18 W, 4 Cr, 1 V, 5 Co, bal Fe
Hardened C 64-66 Rock
For cutting tools, reamers, drills, lathe and planer tools, broaches
High speed steel, high red-hardness

IMPHY IVO
M-771, C, bal Fe
For welded structures

IMPHY IW1
M 771, C, bal Fe
For welded structures

IMPHY I W 3
M 104, C, 9 W, 2.5 Cr, 0.5 V, bal Fe
For hot work dies, hot work steel

IMPHY M 550
M-104, C, 2.5 Cr, Mo, V, bal Fe
For gears, shafts, oil hardening

IMPHY M-1628
M-104, M-771, C, 65 Ni, 25 Mo, bal Fe
For chemical plant equipment; resists HCl.

IMPHY MA-42.
M-104; C, 20 Ni, 25 Cr, Si, bal Fe
For stainless and wear resistant parts, corrosion resistant, austenitic.

IMPHY M C T 1
M-104, 0.1-0.2 C, Cr, Mo, bal Fe
72,000 TS, 43,000 YS; 26 El.
For gun tubes, general parts; water hardening.

IMPHY M C.T. 2.
M-104; 0.2-0.3 C, Cr, Mo, bal Fe.
93,000 TS; 58,000 YS; 22 El.
For shafts, axles, aircraft fuselage; high workability

IMPHY MCT2S.
M-771; 0.25 C, 1.0 Cr, 0.25 Mo, bal Fe.
Annealed: 94,000 TS, 58,000 YS, 20 El.
Heat treated. 157,000 TS, 128,000 YS, 12 El
For axles, gears, spindles, Afnor 25CD4, case hardened

IMPHY M C.T. 3.
M-104; 0.3-0.4 C, Cr, Mo, bal Fe.
101,000 TS; 65,000 YS, 20 El
For crankshafts, gears, levers, axles, tough

IMPHY MCT4
M-771, 0.42 C, 1.0 Cr, 0.25 Mo, bal Fe.
Annealed 114,000 TS; 72,000 YS; 16 El
Heat treated. 280,000 TS. 230,000 YS, 4 El
For gears, shafts, crankshafts, Afnor 42CD4, oil hardened

IMPHY MCT-19
M-771, C, alloy, bal Fe
For oil refinery equipment, oxidation resistant.

IMPHY MCTO
M-771, 0.12 C, 1.0 Cr, 0.20 Mo, bal Fe
Annealed 72,000 TS, 43,000 YS, 24 El
Heat treated 150,000 TS, 123,000 YS, 10 El.
For case hardened gears, shafts, cams; Afnor 12CD4, case hardened

IMPHY "M D"
M 104, 0.30 C, Si, Mn, bal Fe
Annealed 78,000-85,000 TS, 46,000-52,000 YS, 26-23 El.
For fire arms, edge tools; water hardening

IMPHY MIPI
M-771, C, bal Fe
For welded structures

IMPHY MOS
M-104, 1.5 Si, Mn, C, bal Fe
Annealed 105,000 TS, 65,000 YS, 20 El
Heat treated 186,000 TS, 163,000 YS, 7 El
For gears, springs, silico-manganese steel

IMPHY "M T"
M-104, 0.45 C, Si, Mn, bal Fe
Annealed 91,000-100,000 TS, 52,000-60,000 YS, 22-17 El
For paper cutters, sledges, wedges, mining bars; water hardening

IMPHY MWS.
M-104, C, Si, Mn, bal Fe
Annealed 107,000 TS, 69,000 YS, 22 El
Heat treated: 193,000 TS; 171,000 YS, 7 El
For gears, crankshafts, wearing parts, tough

IMPHY N5CM
M-104, C, Si, Mn, 5 Ni, bal Fe
69,000-83,000 TS, 50,000-60,000 YS; 30-24 El
For case hardened parts, gun tubes, locomotive parts, shock resistant.

IMPHY N.7C.M.
M-104, C, 7 Ni, bal Fe.
Heat treated: 140,000-164,000 TS; 100,000-114,000 YS; 10-7 El.
Case-hardened parts; special Ni steel carburized.

IMPHY N42.
M-771, 42 Ni, bal Fe.
for glass sealing.
For electrical equipment; controlled expansion,

IMPHY N48
M-771; 48 Ni, bal Fe.
For glass sealing electronic rectifiers.
Stepped expansion.

IMPHY N54
M-771, 54 Ni, bal Fe.
For glass to metal seals.
Stepped expansion

IMPHY N58
M-771; 58 Ni, bal Fe.
For electrical equipment and glass sealing, controlled expansion.

IMPHY N A
M-104, C, 2 Ni, bal Fe.
Annealed. 78,000 TS, 50,000 YS; 26 El.
Heat treated 143,000 TS, 116,000 YS, 11 El.
For crankshafts, transmission shafts, forged parts, tough.

IMPHY NB
M-104, C, Si, Mn, 3 Ni, bal Fe.
81,000-96,000 TS, 54,000-67,000 YS, 25-20 El.
For crankshafts, transmission shafts, forgings; shock resistant.

IMPHY NC3HO
M-771; 0.14 C, 2.7 Ni, 0.8 Cr, bal Fe.
Annealed 82,000 TS, 52,000 YS, 22 El.
Heat treated 170,000 TS, 143,000 YS; 10 El
For case hardened gears, shafts; case hardened, Afnor 14NC11.

IMPHY N C 3 H-1.
M-104, C, 3 Ni, 1 Cr, bal Fe.
Annealed 81,000 TS, 55,000 YS, 25 El
Heat treated 164,000 TS, 150,000 YS, 10 El.
For crankshafts, machine parts, dies; shock resistant

IMPHY NC3H1.
M 771, 0.20 C, 3 Ni, 0.7 Cr, bal Fe
Annealed 92,000 TS, 58,000 YS, 20 El
Heat treated 157,000 TS; 143,000 YS; 10 El.
For arbors, axles, shafts, gears, spindles, Afnor 20NC11, oil hardened, case hardening.

IMPHY NC3H1R
M 771, 0.25 C, 1.4 Ni, 1.0 Cr, bal Fe
Annealed 92,000 TS, 58,000 YS, 18 El
Heat treated. 120,000 TS, 107,000 YS, 12 El
For arbors, shafts, axles, spindles; Afnor 25NC6; oil or water hardened

IMPHY NC-3H2
M-104, C, 3 Ni, 1 Cr, bal Fe
96,000-108,000 TS, 63,000-77,000 YS; 24-18 El.
For pinions, crankshafts, forging dies, auto construction, shock resistant

IMPHY NC3H2R
M-771, 0.35 C, 1.4 Ni, 1.0 Cr, bal Fe.
Annealed 100,000 TS, 65,000 YS; 17 El.
Heat treated 242,000 TS; 213,000 YS, 5 El
For arbors, axles, shafts, spindles; Afnor 35NC6, oil hardened.

IMPHY NC3H8R
M-771; 0.08 C, 1.4 Ni, 1.0 Cr, bal Fe.
Heat treated 78,000-128,000 TS; 43,000-85,000 YS; 25-12 El
For case hardened parts, gears, shafts; case hardened, Afnor 8NC6.

IMPHY NC3H10R
M-771; 0.10 C, 1.4 Ni, 1.0 Cr, bal Fe.
Annealed: 83,000 TS, 50,000 YS; 22 El.
Heat treated. 164,000 TS, 127,000 YS; 9 El.
For case hardened gears, shafts; case hardened; Afnor 10NC6.

IMPHY NC3H16R.
M-771; 0.16 C, 1.4 Ni, 1.0 Cr, bal Fe.
Annealed: 85,000 TS; 58,000 YS; 20 El.
Heat treated: 193,000 TS; 157,000 YS; 9 El.
For case hardened gears, shafts; case hardened; Afnor 16NC6.

IMPHY NC3H20R.
M-771; 0.18 C, 3.5 Ni, 1.5 Cr, 0.4 Mo, bal Fe.
Annealed: 107,000 TS; 72,000 YS, 15 El
Heat treated: 200,000 TS; 150,000 YS; 8 El.
For gears, shafts, cams; case hardened; Afnor 18NCD6.

IMPHY N.C.-4.
M-104; C, 25 Cr, bal Fe.
Forged: 121,000 TS, 85,000 YS; 25 El.
Annealed· 92,000 TS; 39,000 YS; 40 El.
For rotor housings, naval compass construction, non-magnetic.

IMPHY N C M.
M-104; 0.2 C, 2 Ni, bal Fe.
Heat treated 78,000-100,000 TS, 50,000-71,000 YS; 25-15 El.
For case-hardened parts; carburized.

IMPHY NCM.
M-771; 0.08 C, 1.3-2.3 Ni, bal Fe.
Heat treated: 60,000-86,000 TS; 46,000-58,000 YS; 32-20 El.
For case hardened parts, gears, shafts; case hardened; Afnor 8N8.

IMPHY N.D.
M-104, C, 5 Ni, bal Fe.
Annealed 81,000 TS; 55,000 YS; 25 El.
Heat treated. 177,000 TS, 143,000 YS, 10 El
For turbine buckets; resists fatigue stresses

IMPHY N.F.
M-104; 0 2 C, 3 Ni, bal Fe.
Heat treated: 100,000-114,000 TS, 78,000-100,000 YS; 16-8 El
For case-hardened parts; carburized.

IMPHY N.F.C. NO. 1.
M-104; C, 3.5 Ni, 1 Cr, bal Fe.
Annealed· 81,000-91,000 TS; 61,000-71,000 YS; 25-18 El.
Oil quenched: 171,000-200,000 TS; 156,000-192,000 YS; 10-7 El.
For case hardened parts, axles, shafts, steering parts, carburized

IMPHY N.F.C.-2.
M-104, C, 3 Ni, 1 Cr, bal Fe.
83,000-200,000 TS, 61,000-192,000 YS, 25-7 El.
For axles, shafts, steering parts; oil hardening, tough.

IMPHY N.F.C.-3.
M-104; C, 4 Ni, 1 Cr, bal Fe.
86,000-214,000 TS; 72,000-199,000 YS; 20-6 El
For axles, shafts, steering parts; shock resistant

IMPHY NFCO.
M-771; 0 08 C, Ni, Cr, bal Fe
Annealed 78,000 TS; 50,000 YS, 25 El.
Heat treated: 143,000 TS; 100,000 YS; 11 El.
For case hardened gears, shafts; case hardened; Afnor 8NC13.

IMPHY N.M.F.
M-104; C, 8 Ni, 8 Mn, 4 Cr, bal Fe.
For corrosion and heat resistant parts; corrosion and heat resistant.

IMPHY NMHG.
M-771; 70 Fe, 30 Ni.
For compensating shunts, electrical devices; controlled expansion.

IMPHY NY.
M-104; C, Si, Mn, 6 Ni, bal Fe
78,000-107,000 TS; 58,000-85,000 YS; 25-18 El.
For axles, gears, shafts; tough.

IMPHY R23.
M-771; 0 7 C, 6 5 W, 5.0 Mo, 4 Cr, 1 V, bal Fe.
Hardened: C 64-66 Rock.
For cutting tools, lathe and planer tools, drills, milling tools, broaches.
High speed steel High red-hardness

IMPHY R24.
M-771; 0.7 C, 10.0 W, 1.0 Mo, 4 Cr, 1 V, bal Fe.
Hardened· C 64-66 Rock.
For cutting tools, lathe and planer tools, drills, reamers
High speed steel, high red-hardness

IMPHY RAPIDE ULTRA
M-772, 0 7 C, 19 W, 4 Cr, 2 2 V, bal Fe.
For tools, dies, cutters; high speed steel.

IMPHY RCA 33
M-104, 20 Cr, 5 Al, bal Fe
For electrical resistances, heat resistant

IMPHY RCA 33
M-771, C, Cr, Al, bal Fe
For resistances, radiators, good to 1200°C application

IMPHY RCA 44
M-104, 32 Cr, 5 Al, bal Fe
For electrical resistances, heat resistant.

IMPHY RCA 44.
M-771, C, Cr, Al, bal Fe
For heating elements, radiators, good to 1200°C

IMPHY RES
M-104, C, 1.5 Si, Mn, bal Fe.
Annealed. 107,000 TS, 65,000 YS, 20 El.
Heat treated 186,000 TS, 164,000 YS; 7 El.
For springs, tough

IMPHY RNCO.
M-104, 12 Ni, 12 Cr, bal Fe.
For electrical resistances, rheostats, heat and corrosion resistant

IMPHY RNCI
M-104, C, 36 Ni, 10 Cr, bal Fe
For rheostats, electrical heating units, metallic heat screens, heat resistant to 600°C

IMPHY RNC 2
M-104, low C, 60 Ni, 11 Cr, bal Fe
For rheostats, electrically heated apparatus; heat resistant

IMPHY RNC 3.
M-104, low C, 80 Ni, 20 Cr
For rheostats, electrically heated apparatus; heat resistant to 1100°C.

IMPHY RNC 30
M-104, 40 Ni, 22 Cr, bal Fe.
For electrical resistances for industrial equipment; heat and corrosion resistant.

IMPHY RNC 44.
M-104, 5 Al, 30 Cr, bal Fe
For electrical heating resistances; heat resistant.

IMPHY RWS
M-104; C, Si, Mn, bal Fe.
Annealed· 107,000 TS; 69,000 YS; 22 El.
Heat treated: 193,000 TS; 171,000 YS; 7 El.
For motor car springs; tough.

IMPHYSIL.
M-771; Si, bal Fe.
For motors, transformers; soft magnet for strong or moderate field.

IMPHYSTA.
M-104; C, bal Fe.
For airplane construction; class of Imphy alloys.

IMPHY "T."
M-104; 0.5 C, Si, Mn, bal Fe.
Annealed: 100,000-107,000 TS; 55,000-64,000 YS; 19-14 El.
For hammers, punches, dies, cutlery; oil hardening.

IMPHY TRIPLE RAPIDE.
M-772; 0.7 C, 18 W, 5 Co, 4 Cr, 1.3 V, bal Fe.
For tools, dies, cutters; high speed steel.

IMPHY "T.T."
M-104, 0.65 C, Si, Mn, bal Fe.
Annealed: 107,000-120,000 TS; 56,000-71,000 YS; 15-10 El.
For files, saws, dies, ball mills; water harden.

IMPHY "T.T.T."
M-104; 0.70 C, Si, Mn, bal Fe.
Annealed: 120,000-143,000 TS; 64,000-78,000 YS; 12-7 El.
For files, saws, tools; water hardening.

IMPHY TUNGSTENE.
M-772; 1.3 C, 4 5 W, bal Fe.
For tools, dies; oil hardened

IMPHY UM Co50.
M-771; 0 05-0 12 C, 0.18 Ti, 0.6 Cb, 26-30 Cr, 47-52 Co, bal Fe.
Cast: 135,000 TS, 48,000 YS; 10 El; 10 RA; 250 Brin
Wrought 132,000 TS; 61,000 YS, 7 El; 6 RA; 350 Brin
For furnace baffles, burner tips, sintering grates, quench baskets.
Corrosion, heat and thermal shock resistant.

IMPHY VY2-SP.
M-771, 0 40 C, 4 6 Ni, 1.6 Cr, 0 5 Mo, bal Fe.
Heat treated 300,000 TS; 230,000 YS; 5 El.
For crankshafts, gears; Afnor 40NCD18; oil hardened

IMPHY VYP
M-771, 0 30 C, 4 0 Ni, 1.4 Cr, 0 5 Mo, bal Fe.
Annealed. 128,000 TS.
Heat treated 250,000 TS; 212,000 YS; 6 El.
For crankshafts, gears, bolts; Afnor 30NCD16, oil hardened.

IMPHY ZCR 716C
M-771, 10-12 Ni, 8-11 Cr, 2 0-2.5 Mo, 2.0-3.5 Al, 0 05 C, 0.13 Si, 0.47 Mn, bal Fe.
Maraged· 230,000 TS; 219,000 YS, 11 3 El; 56 RA.
For aircraft landing gears, special springs, used in marine atmospheres
Maraging steel High yield strength and corrosion resistant

IMPRESS.
M-336, 0 45 C, 1.0 Si, 1 4 Cr, 2.2 W, 0.2 V, 0 3 Mo, bal Fe.
For impression dies; non-deforming.

IMPROVED ELECTRIC.
M-806, 0 04 C, 0.1 Si, bal Fe.
Annealed: 50,000 TS; 30,000 YS; 20 El.
For small motors; good magnetic properties.

IMPROVED KS.
Japan; 20 Ni, 15 Ti, 20 Co, bal Fe.
For magnetic and electrical equipment; permanent magnet.

IMPROVITE.
M-346; 66-68 Ni, 3-4 Si, 28-31 Cu.
For introducing Ni and Cu into cast iron.

IN-40.
M-1570, M-1540; 0.10 C, 0.25 Si, 1.0 Mn, 0.04-0.075 N, bal Fe.
Rolled: 69,100 TS; 48,600 YS; 32 El.
Heat treated: 60,700 TS; 45,800 YS; 44 El; 79 RA.
For bridges, structures, booms, bus bodies.
Tough and readily welded.

IN-50.
M-1540, M-1570; 0.14 C, 0.30 Si, 1.4 Mn, 0.04-0.075 N, bal Fe.
Rolled: 77,500 TS; 54,400 YS; 29 El.
Heat Treated: 72,100 TS; 56,000 YS; 38 El; 75.6 RA.
For bridges, structures, booms, mine and railroad cars.
Good fabricability and weldability.

IN-60.
M-1540, M-1570; 0.17 C, 0.35 Si, 1.3 Mn, 0.3 Cr, 0.04-0.075 N, bal Fe.
Rolled: 87,300 TS; 59,700 YS; 35 El; 69 RA.
Heat treated: 90,700 TS; 72,800 YS; 32 El; 68.5 RA.
For bridges, structures, bus and truck bodies, booms, mine cars.
High strength-low alloy steel. Good weldability.

IN-80.
M-1540, M-1570; 0.16 C, 0.25 Si, 0.85 Mn, 1.0 Cr, 0.4 Mo, 0.25 Cu, 0.04-0.075 N, bal Fe.
Heat treated: 107,000 TS; 102,000 YS; 23 El.
For structures, buildings, bridges, mine cars, truck and bus bodies. High strength-low alloy steel, good weldability.

IN-80N.
M-1540, M-1570; 0.15 C, 0.25 Si, 0.40 Mn, 2.25 Ni, 1.2 Cr, 0.35 Mo, 0.04-0.075 N, bal Fe.
Heat Treated: 120,600 TS; 105,200 YS; 27 El; 73 RA.
For mine cars, crushers, bridges, truck and bus bodies, booms. High strength-low alloy steel, good weldability.

IN-80V.
M-1540, M-1570; 0.14 C, 0.25 Si, 0.85 Mn, 0.85 Ni, 0 50 Cr, 0.45 Mo, 0.07 V, 0.3 Cu, 0.06 N, bal Fe.
Heat Treated: 113,000 TS; 103,000 YS; 24 El; 67 RA.
For bridges, booms, structures, truck and bus bodies, mine cars.
High strength-low alloy steel, tough and shock resistant.

IN-100
M-68; 8-11 Cr, 13-17 Co, 2-4 Mo, 0 7-1.2 V, 5-6 Al, 4.5-5.5 Ti, 0.18 C, 0.01 B, 0 06 Zr, bal Ni.
Cast: 142,000 TS; 122,000 YS; 8 El.
At 1800°F· 75,000 TS; 60,000 YS; 5 El.
For jet engine parts, turbine blades; for operating temperatures up to 1900°F.

IN-100.
M-1540, M-1570; 0.16 C, 0 25 Si, 0.85 Mn, 1.2 Ni, 0.6 Cr, 0.55 Mo, 0.07 V, 0.25 Cu, 0.06 N, bal Fe.
Heat treated: 144,200 TS; 138,000 YS; 20 El.
For mine cars, bus and truck bodies, booms, derricks.
High strength—low alloy steel, tough and shock resistant.

IN-102.
M-68; 7 Fe, 15 Cr, 3 Cb, 3 Mo, 3 W, 0.5 Al, 0.5 Ti, 0.06 C, B, Zr, bal Ni.
Annealed: 130,000 TS; 60,000 YS; 45 El.
At 1200°F: 103,000 TS; 50,000 YS; 52 El; 42 RA.
For high-temperature, high-pressure steam turbines; for long service up to 1200°F, high strength and ductility.

IN-732.
M-68; 30 Ni, 2.8 Cr, bal Cu.
Air Cooled: 55,000 YS; 150 Charpy Impact; 90,000 TS; 30 El; 60 RA.
For marine hardware.
High strength, tough, corrosion resistant, good weldability.

IN-738.
M-68; 0.17 C, 8.5 Co, 16 Cr, 1.75 Mo, 2.6 W, 1.75 Ta, 0.9 Cb, 3.4 Al, 3.4 Ti, 0.01 B, 0.1 Zr, bal Ni.
Heat treated: 160,000 TS; 140,000 YS; 4 El; 4 RA.
At 1200°F: 155,000 TS; 130,000 YS; 3 El; 5 RA.
For jet engine and gas turbine components, blades, vanes, integral-wheel configuration.
Precipitation hardenable. Sulfidation resistant. High rupture strength at elevated temperatures.

INAFOND C5.
M-1445, 4.2-5.0 Cu, 0.3 Mg, 0.2 Ti, bal Al.
Heat treated: 47,000-54,000 TS; 28,000-37,000 YS; 14-7 El; 100-115 Brin
For light alloy parts, age-hardenable

INAFOND C8.
M-1445; 7.0-8.5 Cu, 0.6 max Fe, 0.5 max Si, 0.2 Ti, bal Al.
Cast: 20,000-26,000 TS; 11,000-13,500 YS; 5-2 El; 55-70 Brin.
For light alloy parts.

INAFOND C41.
M-1445; 4.5 Cu, 0.8 max Fe, 1 max Si, 0.2 max Ti, bal Al.
Heat treated: 36,000-43,000 TS; 28,000-33,000 YS; 4-2 El; 75-95 Brin.
For light alloy parts; age-hardenable.

INAFOND C4S.
M-1445, 4.5 Cu, 2-3 Si, 0.45 max Fe, 0.1 max Ti, bal Al.
Heat treated: 36,000-40,000 TS; 18,000-23,000 YS; 6-3 El; 75-85 Brin
For light alloy parts; age-hardenable.

INAFOND S7.
M-1445; 7 Si, 0.3 Mg, 0.5 Mn, 0.15 Ti, bal Al.
Cast: 37,000-43,000 TS, 25,000-30,000 YS; 10-6 El, 90-110 Brin
For light alloy parts; corrosion resistant

INAFOND S9.
M-1445, 9 Si, 0.35 Mg, 0.5 Mn, bal Al
Cast. 35,000-43,000 TS, 28,000-37,000 YS; 5.5-3.5 El, 80-95 Brin
For light alloy parts; corrosion resistant

INAFOND S12.
M-1445, 11.5-13.0 Si, 0.3 Mg, 0.5 Mn, bal Al
Cast: 34,000-46,000 TS; 28,000-40,000 YS, 4-1 El; 80-110 Brin
For light alloy parts; corrosion resistant.

INAFOND S13.
M-1445; 12.75-13.25 Si, bal Al
Cast: 31,000-34,000 TS; 14,000-17,000 YS; 3.0-1.5 El; 60-80 Brin
For light alloy parts, corrosion resistant.

INAFOND S52.
M-1445; 1.3 Cu, 5 Si, 0.5 Mg, bal Al.
Heat treated: 50,000-57,000 TS; 40,000-46,000 YS; 5-2 El; 110-140 Brin
For light alloy parts; age-hardenable.

INAFOND S71.
M-1445; 7 Si, 0.3 Mg, bal Al
Cast: 37,000-43,000 TS; 25,000-30,000 YS, 10-6 El, 90-110 Brin.
For light alloy parts; corrosion resistant.

INAFOND S131.
M-1445; 0.8 Cu, 12.0-13.3 Si, 0.3 Mn, bal Al.
Cast: 31,000-37,000 TS; 17,000-20,000 YS; 3.0-1.5 El; 60-80 Brin.
For light alloy parts, corrosion resistant.

INAFOND S132.
M-1445; 1.75-2.25 Cu, 12.0-13.3 Si, 0.3 Mn, bal Al.
Cast. 33,000-23,000 TS, 18,000-23,000 YS; 2.5-1.0 El, 65-85 Brin.
For light alloy parts; corrosion resistant.

INAFOND Z5F.
M-1445, 1 Fe, 0.6 Mg, 5 Zn, 0.2 Ti, bal Al.
Heat treated: 42,000-50,000 TS; 24,000-30,000 YS; 14-9 El; 90-105 Brin
For light alloy parts; heat treatable.

INALIUM.
M-623, 0.5 Si, 1.2 Mg, 1.7 Cd, bal Al.
26,000-29,000 TS, 10,000-18,500 YS, 22-18 El; 50-60 Brin
For light alloy parts.

INALIUM
M-1394, 0.8 Mg, 0.25 Fe, 0.45 Si, 0.18 Zn, 0.08 W, bal Al
For light alloy parts

INCO 13.
M-68, 5 Al, bal Ni
For jet engine components, corrosion and heat resistant

INCO 220 NICKEL replaced by NICKEL 220

INCO 546 replaced by INCONEL ALLOY 721.

INCO 550 replaced by INCONEL ALLOY 751

INCO A-2
M-68, 3.4 T.C., 2.3 Si, 0.5 Mn, 1.0 Ni, 1.0 Cr, bal Fe
For bottom plates in chain drag conveyors, heat resistant

INCO A-15
M-68, 3.3 C, 1.5 Ni, 2.0 Si, bal Fe
Cast: 40,000 TS
For machine tool castings; cast iron.

INCO "B" MONEL replaced by MONEL ALLOY 400

INCOLOY renamed INCOLOY ALLOY 800

INCOLOY ALLOY 800
M-1499, 32.5 Ni, 0.05 C, 0.75 Mn, 46.0 Fe, 0.008 S, 0.50 Si, 0.38 Cu, 21.0 Cr, 0.38 Al, 0.38 Ti
Cold drawn: 100,000-150,000 TS, 75,000-125,000 YS, 30-10 El, 180-300 Brin
For heat exchangers and process piping, carburizing fixtures and retorts, electric range heating element sheathing, resistant to elevated temperature oxidation and carburization

INCOLOY ALLOY 801
M-1499, 32.0 Ni, 0.05 C, 0.75 Mn, 44.5 Fe, 0.008 S, 0.50 Si, 0.25 Cu, 20.5 Cr, 1.13 Ti
For jet engine combustion liners and transition pieces. High temperature tensile and rupture strength. Formerly INCOLOY T

INCOLOY 802
M-1499, 32.5 Ni, 0.35 C, 0.75 Mn, 46.0 Fe, 0.008 S, 0.38 Si, 21.0 Cr, 0.58 Al, 0.75 Ti.
Hot finished and annealed: 80,000-105,000 TS; 35,000-50,000 YS, 47-18 El; 140-188 Brin.
For hot sizing dies for aerospace industry, connecting pins for cast link heat treating furnace belts; good high temperature strength and corrosion resistance.

INCOLOY ALLOY 804.
M-1499; 41.0 Ni, 0.25 C, 0.75 Mn, 25.4 Fe, 0.008 S, 0.38 Si, 0.25 Cu, 29 5 Cr, 0.30 Al, 0.60 Ti.
Annealed: 95,000 TS; 45,000 YS; 40 El.
High-temperature strength; resistant to carburization and sulfidation.

INCOLOY ALLOY 805.
M-1499; 36.0 Ni, 0.12 C, 0.6 Mn, 54.5 Fe, 0.008 S, 0.50 Si, 0.10 Cu, 7.5 Cr, 0.5 Mo.

INCOLOY ALLOY 825.
M-1499; 42.0 Ni, 0.03 C, 0.50 Mn, 30.0 Fe, 0.015 S, 0 25 Si, 2.25 Cu, 21.5 Cr, 0.10 Al, 0.90 Ti, 3.0 Mo.
Annealed: 85,000-105,000 TS, 35,000-65,000 YS; 50-30 El; 120-180 Brin.
For phosphoric acid evaporators, pickling tank heaters, pickling hooks and equipment, propeller shafts, tank trucks; corrosion resistant.
Formerly Ni-O-NEL alloy 825.

INCOLOY ALLOY 901.
M-1499; 0.05 C, 12.8 Cr, 43 Ni, 5.7 Mo, 2 4 Ti, 35 Fe.
Heat treated: 168,000 TS; 110,000 YS; 23 El.
At 1200°F: 125,000 TS; 95,000 YS; 5 El.
For aircraft gas turbine blades, turbine discs, age hardenable, up to 1400°F service

INCOLOY DS.
M-121; 0.15 max C, 2 0-2.5 Si, 36-39 Ni, 17-19 Cr, bal Fe.
At 68°F· 105,300 TS; 38 El; 50 RA.
At 1112°F. 66,100 TS, 45 El, 38 RA.
At 1832°F· 12,300 TS, 124 El; 83 RA.
For furnace parts, high temperature equipment; useful to 950°C in oxidizing atmosphere

INCOLOY FILLER METAL 65
M-1499, 42 0 Ni, 0.03 C, 0 70 Mn, 30 0 Fe, 0.007 S, 0 30 Si, 1 7 Cu, 21.0 Cr, 1 0 Ti, 3.0 Mo
For gas-shielded arc welding of INCOLOY alloy 825.
MIL-E-21562

INCOLOY T replaced by INCOLOY ALLOY 801

INCOLOY WELDING ELECTRODE 135.
M-1499, 36.0 Ni, 0.05 C, 2 0 Mn, 26.0 Fe, 0 008 S, 0 40 Si, 1 8 Cu, 29.0 Cr, 3 75 Mo.
Electrode for shielded metal-arc welding of Incoloy alloy 825 to itself and to steels

INCOMPARABLE.
M-1409; 0 8 C, 22 W, 4 5 Cr, 1 5 V, bal Fe
For form tools, cutters, lathe and planer tools; high speed steel

INCONEL renamed INCONEL ALLOY 600

INCONEL 62
M-1499; 0.10 max C, 6-10 Fe, 14-17 Cr, Cb = 4 × Si max, 70 min Ni.
For welding rods; corrosion resistant.

INCONEL 132.
M-897; 0.2 max C, 6-10 Fe, 14-17 Cr, bal Fe.
For heat resistant parts; high heat resistance.

INCONEL ALLOY 600
M-1499; 76.0 Ni, 0.08 C, 0 5 Mn, 8.0 Fe, 0.008 S, 0.25 Si, 0.25 Cu, 15.5 Cr.
Annealed. 80,000-100,000 TS; 30,000-50,000 YS; 50-35 El; 120-170 Brin.
Cold drawn: 105,000-150,000 TS; 80,000-125,000 YS; 30-10 El; 180-300 Brin.
For furnace muffles, electronic components, heat exchanger tubing, nuclear reactors, springs, jet engine parts; good high temperature properties.

INCONEL ALLOY 601.
M-1499; 60.5 Ni, 0.05 C, 0.5 Mn, 14.1 Fe, 0.007 Si, 0.25 Si, 0.50 Cu, 23.0 Cr, 1.35 Al.
HR, Annealed. 86,000-107,000 TS; 29,000-48,000 YS; 46-60 El.
For heat treating baskets and fixtures, radiant furnace tubes, thermocouple protection tubes, furnace muffles and retorts; good high temperature strength and corrosion resistance.

INCONEL ALLOY 625.
M-1499, 61.0 Ni, 0 05 C, 0.25 Mn, 2.5 Fe, 0.008 S, 0.25 Si, 21 5 Cr, 0.2 Al, 0 2 Ti, 9 0 Mo, 3.65 Cb + Ta
Sol Ann. 105,000-130,000 TS; 42,000-60,000 YS; 65-40 El; 116-194 Brin
As rolled 120,000-160,000 TS; 60,000-110,000 YS; 60-30 El; 175-240 Brin.
For ducting systems, combustion systems, fuel nozzles, after burners; high strength and corrosion resistance

INCONEL ALLOY 702.
M-1499; 79 5 Ni, 0.05 C, 0 50 Mn, 1 0 Fe, 0.005 S, 0.35 Si, 0.25 Cu, 15.5 Cr, 3.25 Al, 0.63 Ti.
For afterburner liners, furnace components and fixtures; oxidation resistant to 2400°F

INCONEL ALLOY 706
M-1499; 41 5 Ni, 0 3 C, 0 18 Mn, 40 0 Fe, 0.008 S, 0 18 Si, 0 15 Cu, 16 0 Cr, 0.20 Al, 1 75 Ti, 2 9 Cb + Ta
Sol treated and aged 185,000-193,000 TS, 143,000-161,000 YS, 20-19 El.
For gas turbine components· high strength, machinable and weldable

INCONEL ALLOY 717C
M-1499; 10-14 Cr, 3 5-5 0 Mo, 1-3 Cb, 7-9 Co, 0 75-1 25 Ti, 7 2 8 0 Al, bal Ni.
For turbine blades, 1800°F rupture strength.

INCONEL ALLOY 718
M-1499, 52 5 Ni, 0 04 C, 0 18 Mn, 18 5 Fe, 0 008 S, 0 18 Si, 0 15 Cu, 19 0 Cr, 0 50 Al, 0.90 Ti, 3 05 Mo, 5 13 Cb + Ta
HR & Aged 203,500 TS, 181,000 YS; 16 El, 393 Brin
For jet engines, pump bodies and parts, rocket motors and thrust reversers, space craft High strength, weldable in aged condition

INCONEL ALLOY 721.
M-1499, 71 0 Ni, 0 04 C, 2 25 Mn, 4.0 Fe, 0 005 S, 0 08 Si, 0 10 Cu, 16 0 Cr, 3 05 Ti
For internal combustion engine valves, age-hardenable; high creep strength.
Formerly INCONEL M

INCONEL ALLOY 722.
M-1499, 75 0 Ni, 0 04 C, 0 50 Mn, 7 0 Fe, 0.005 S, 0 35 Si, 0.25 Cu, 15.5 Cr, 0.7 Al, 2.38 Ti.
For jet engine components; age-hardenable; high temperature strength and oxidation and corrosion resistant.
Formerly INCONEL W.

INCONEL ALLOY 751.
M-1499, 72.5 Ni, 0 05 Cr, 0.5 Mn, 7.0 Fe, 0.005 S, 0 25 Si, 0 25 Cu, 15 5 Cr, 1.2 Al, 2 3 Ti, 0 95 + Ta
For diesel exhaust valves; high rupture strength at 1600°F.

INCONEL ALLOY 806.
M-68; 0.06 C, 6-8 Cr, 15-18 Mo, 5 max Fe, 0.01 max B, bal Ni.
Ht. Tr.. 87,000 TS; 38,000 YS; 17 El.

At 1000°F: 63,000 TS; 22,000 YS; 29 El.
For equipment handling hot fluoride salts, high temperature applications.
Heat and corrosion resistant.

INCONEL ALLOY X-750.
M-1499; 73.0 Ni, 0.04 C, 0.50 Mn, 7.0 Fe, 0.005 S, 0.25 Si, 0.25 Cu, 15.5 Cr, 0.7 Al, 2.5 Ti, 0.95 Cb + Ta.
Hot finished and aged: 170,000-206,000 TS; 100,000-163,000 YS; 30-15 El; 302-400 Brin.
For aviation and industrial gas turbine parts, springs for steam service and nuclear reactors, bolts, heat treating fixtures;
corrosion and oxidation resistant; age hardenable; high creep-rupture strength.

INCONEL FILLER METAL 62.
M-1499; 74.0 Ni, 0.02 C, 0.10 Mn, 7.5 Fe, 0.005 S, 0.10 Si, 0.03 Cu, 16.0 Cr, 2.25 Cb.
For gas-shielded arc welding of Inconel alloy 600 and Incoloy alloy 800; overlaying on steel.
AWS A 5.14 Class ERNiCrFe-5; AMS 5679.

INCONEL FILLER METAL 69.
M-1499; 73.0 Ni, 0.04 C, 0.55 Mn, 6.5 Fe, 0.007 S, 0.30 Si, 0.05 Cu, 15.2 Cr, 0.7 Al, 2.5 Ti, 0.85 Cb.
For gas tungsten-arc welding of Inconel alloys 722 and X750.
AWS A 5.14 Class ERNiCrFe-7; AMS-5778.

INCONEL FILLER METAL 82.
M-1499; 72.0 Ni, 0.02 C, 3.0 Mn, 1.0 Fe, 0.007 S, 0.20 Si, 0.04 Cu, 20.0 Cr, 0.55 Ti, 2.5 Cb.
For gas-shielded arc welding of Inconel alloy 600, Incoloy alloy 800 Inconel alloy 600 to steel, other dissimilar combinations of nickel-base and iron-base alloys; overlaying on steel.
AWS A 5.14 class ERNiCr-3; ASME SFB 5 14

INCONEL FILLER METAL 92.
M-1499; 71.0 Ni, 0.03 C, 2.3 Mn, 6.6 Fe, 0.007 S, 0.10 Si, 0.04 Cu, 16.4 Cr, 3.2 Ti.
For gas shielded arc welding of dissimilar alloys such as austenitic and ferritic steels, to each other and to high-nickel alloys; overlaying on steel.
AWS A 5.14 class ERNiCrFe-6; ASME SFB 5.14.

INCONEL FILLER METAL 601.
M-1499; 60.5 Ni, 0.05 C, 0.50 Mn, 14.1 Fe, 0.007 S, 0.25 Si, 0.50 Cu, 23.0 Cr, 1.35 Al.
For gas tungsten-arc welding of Inconel alloy 601.

INCONEL FILLER METAL 625.
M-1499; 61.0 Ni, 0.05 C, 0.25 Mn, 2.5 Fe, 0 008 S, 0.25 Si, 21.5 Cr, 0.2 Al, 0.2 Ti, 9.0 Mo, 3.65 Cb + Ta.
For gas-shielded arc welding of Inconel alloy 625.
AMS 5837.

INCONEL FILLER METAL 718.
M-1499; 52.5 Ni, 0.04 C, 0.20 Mn, 18.5 Fe, 0.007 S, 0.30 Si, 0.07 Cu, 18.6 Cr, 0 40 Al, 0 90 Ti, 5.0 Cb, 3.1 Mo.
For gas tungsten-arc welding of Inconel alloys 718 and X-750.
AMS 5832.

INCONEL M replaced by INCONEL ALLOY 721.

INCONEL X renamed INCONEL X750.

INCONEL X550 replaced by INCONEL 751.

INCONEL W replaced by INCONEL ALLOY 722.

INCONEL WELDING ELECTRODE 112.
M-1499; 61.0 Ni, 0.05 C, 0.3 Mn, 4.0 Fe, 0.010 S, 0.40 Si, 21.5 Cr, 9.0 Mo, 3.65 Cb + Ta.
Electrode for shielded metal-arc welding of Inconel alloy 625 and dissimilar nickel-base and iron-base alloys.
MIL-E-22200/3.

INCONEL WELDING ELECTRODE 132.
M-1499; 73.0 Ni, 0.04 C, 0.75 Mn, 8.5 Fe, 0.006 S, 0.20 Si, 0.04 Cu, 15.0 Cr, 2.1 Cb, 0.05 Co, 0.05 Ta.
Electrode for shielded metal-arc welding of Inconel alloy 600.
AWS A 5.11 Class ENiCrFe-1; AMS 5684.

INCONEL WELDING ELECTRODE 182.
M-1499; 67.0 Ni, 0.05 C, 7.75 Mn, 7.50 Fe, 0.008 S, 0.50 Si, 0.10 Cu, 14.0 Cr, 0.40 Ti, 1.75 Cb, 0.08 Co, 0.03 Ta.
Electrode for shielded metal-arc welding of Inconel alloy 600; welding dissimilar combinations of nickel-base and iron-base alloys; overlaying on steel
AWS A 5.11 Class ENiCrFe-3; ASME SFB 5.11.

INCORO 20.
M-1493; In, Cu, Au.
For brazing alloy; M.P. 970-1015°C.

INCORO-60.
M-1493; 60 Au, 32 Cu, 3 In.
For brazing Kovar.
M P 860-900°C Low vapor pressure.

INCO-WELD A ELECTRODE.
M-1499, 70.0 Ni, 0.03 C, 2 0 Mn, 9.0 Fe, 0.008 S, 0 30 Si, 0.06 Cu, 15.0 Cr, 2.0 Cb, 1.5 Mo, 0 05 Co, 0.03 Ta.
Electrode for shielded metal-arc welding of dissimilar alloys such as austenitic and ferritic steels to each other and to high-nickel alloys; welding Incoloy alloy 800 to itself.
AWS A5.11 Class ENiCrFe-2; ASME SFB 5.11

INCRA 4040-6.
M-1037; 13 5-16.5 Ni, 9.5-10 5 Al, 0.4-1.0 Fe, 1.0-2.0 Co, bal Cu
At R.T : 91,000 TS; 60,000 YS; 5 El; 195 Brin.
For molds and accessory components in the glass industry
Thermal shock and fatigue resistant.
Good oxidation and growth resistance.

INCRAMET-800.
Mfg.· Licensees of International Copper Res Assoc
13.5-16.5 Ni, 10 75-11.50 Al, 0.4-1 0 Fe, 1.0-2 0 Co, bal Cu.
Cast 91,000 TS; 60,000 YS, 5 El; 195 Brin.
At 1100°F: 25,000 TS; A 30 Rock.
For glass molds, sheet glass rolls.
Heat and corrosion resistant.

INCUS.
M-111; 0.55 C, 0.7 Mn, 0 7 Cr, 1.75 Ni, 0 7 Mo, bal Fe
For drop forging dies; tough.

INCUSIL 10.
M-1493; 63 Ag, 27 Cu, 10 In.
For brazing glass headers.
M.P. 685-730°C.

INCUSIL 15.
M-1493; 61 5 Ag, 24 Cu, 14 In.
For brazing glass headers.
M.P 630-705°C.

INCUT 4140.
M-67; 0.38-0.43 C, 0.75-1 0 Mn, 0.15-0.30 Si, 0 15-0.35 Pb, 0.035 min Te, 0.8-1.1 Cr, 0.15-0.25 Mo, bal Fe
Rolled: 137,600 TS; 96,800 YS; 19 El; 47 RA.
Heat Treated· 139,000-203,000 TS; 116,000-186,000 YS; 9-19 El; 27-55 RA.
For gears, shafts, axles, fittings, collets, forge hammer rams, studs, wrenches;
Free-machining, oil hardening.

INCUT 4142.
M-67; 0.40-0.45 C, 0.75-1.00 Mn, 0.15-0.30 Si, 0.15-0.35 Pb, 0.035 min Te, 0.80-1.1 Cr, 0.15-0.25 Mo, bal Fe.
Rolled: 137,600 TS; 96,800 YS; 19 El; 47 RA.
Heat treated: 139,000-203,000 TS; 116,000-186,000 YS; 9-19 El; 27-55 RA.
For gears, shafts, axles, fittings, collets, forge hammer rams, studs, wrenches.
Free-machining, oil hardening.

INDALLOY.
M-1076; 12 Co, 17 Mo, bal Fe.
For permanent magnets; sintered; Br 9000, Hc 240.

INDALLOY-1.
M-1041; 50 In, 50 Sn.
Cast: 1720 TS; 83 El.
For solder; M.P. 117°C.

INDALLOY-2.
M-1041; 80 In, Ag, Pb.
Cast: 2550 TS; 58 El
For solder, M.P. 156.7°C.

INDALLOY-3.
M-1041; 90 In, 10 Ag.
Cast: 1650 TS; 61 El
For solder; M.P. 230°C.

INDALLOY-4.
M-1041; 100 In
Cast: 515 TS; 41 El
For solder, M.P. 156.7°C

INDALLOY-5.
M-1041, 25 In, Pb, Sn
Cast: 5260 TS, 101 El
For solder; M.P. 138°C.

INDALLOY-6.
M-1041, 5 In, Ag, Pb.
Cast: 4560 TS; 36 El.
For solder, M.P. 285°C

INDALLOY-7.
M-1041; 50 In, 50 Pb
Cast: 4670 TS; 55 El
For solder, M.P. 215°C.

INDALLOY-8
M-1041; 18.3 In + Lipowitz.
For solder; M.P. 110°C.

INDALLOY-9
M-1041, 12 In, Pb, Sn
Cast: 5320 TS; 135 El
For solder; M.P. 174°C

INDALLOY-10.
M-1041; 25 In, 75 Pb.
Cast: 5450 TS; 47.5 El.
For solder, M.P. 230°C.

INDALLOY-11
M-1041; 5 In, Pb
Cast: 4330 TS; 52 El
For solder; M.P. 230°C.

INDALLOY-12.
M-1041; 5 In, Ag, Pb.
Cast: 5730 TS; 23 El.
For solder; M.P. 290°C

INDALLOY NO. 160
M-1041; Indium plate.
For Indium plate, surface protection, decorative finish; alloyed with base metal by diffusion.

INDAR 5003.
M-265; 64 Cu, 16.5 Zn, 18 Ni, 1.5 Pb.
Sintered: 27,600 TS; 8 El; H 76 Rock.
Repressed: 35,000 TS; 15 El; H 80 Rock.
For corrosion resistant and decorative parts, marine components.
Nickel Silver, stainless.

INDAR 6003.
M-265; 99.75 Fe, 0.25 C.
Sintered: 18,500-34,000 TS, 2 El; F 47-81 Rock.
For structural parts and bearings.
Carbon steel, water hardening.

INDAR 6005.
M-265; 100 Fe.
Sintered: 19,500 TS; 1.5 El; F 54 Rock.
For low strength structural parts and bearings.
SAE 850. Powder metallurgy.

INDAR 6012.
M-265; 1.0 C, 99.0 Fe.
Sintered: 34,000-52,000 TS, 1 El; B 48-64 Rock
For structural parts and bearings
Water hardening, wear resistant.

INDAR 6015
M-265; 99.50 Fe, 0.50 C.
Sintered: 27,000-42,000 TS; 1-2 El, B 28-55 Rock.
For structural parts and bearings.
Water hardening

INDAR 6016
M-265; 100 Fe.
Sintered: 30,000 TS, 10 El; F 78 Rock
Repressed: 41,000 TS, 25 El
For magnetic pole pieces, relay armatures.
Soft magnetic properties, high permeability

INDAR 6022
M-265, 2 Cu, 98 Fe
Sintered: 21,000-39,000 TS; 0-1 El; B 60-68 Rock
For structural parts and bearings
May be oil impregnated. Good corrosion resistance

INDAR 6027
M-265, 100 Fe
Sintered: 26,000-36,000 TS; 1-3 El; F 64-72 Rock.
For soft magnetic applications, yokes, pole pieces
High permeability.

INDAR 6028
M-265, 0.5 C, 0.75 Mo, 0.35 Ni, 0.40 Mn, 0.25 Si, bal Fe
Sintered: 32,000-51,000 TS; 0 El, B 46-68 Rock
Heat Treated: 37,000-65,000 TS, 0 El C 28-48 Rock
For structural parts, gears, fasteners.
Oil hardening

INDAR 6030
M-265; 7 Cu, 93 Fe.
Sintered: 29,000-50,000 TS, 0.5-1.0 El; F 72-86 Rock.
For structural parts and bearings
May be oil impregnated

INDAR 6031
M-265; 5 Cu 95 Fe
Sintered: 27,000-48,000 TS; 0.5-1.0 El, F 72-86 Rock.
For structural parts and bearings
May be oil impregnated

INDAR 6051
M-265, 25 Cu, 75 Fe
Sintered: 20,000-40,000 TS, 1-2 El, F 37-75 Rock.
For structural parts and bearings.
May be oil impregnated.

INDAR 6053.
M-265; 4 Ni, 1 Cu, 0.7 C, bal Fe.
Heat treated: 90,000-135,000 TS; 0.5 El; Rock C 25-45.
For high strength structural parts.
Supplied heat treated; wear resistant.

INDAR 7004.
M-265; 78.5 Cu, 20 Zn, 1.5 Pb.
Sintered: 28,400 TS; 15 El; H 74 Rock.
Repressed. 40,900 TS; 3 El; H 97 Rock.
For bolts, fasteners, screw machine products.
Leaded brass, corrosion resistant.

INDAR 8001.
M-265; 100 Cu.
Sintered: 35,000 TS, 18 El; F 70 Rock.
For power switchgear, heat sinks, current carrying structural parts.
High conductivity of 90% min. Powder metallurgy

INDEFATIGABLE.
French; 0.26 C, 4 Ni, 0.6 Cr, 0.9 Mo, bal Fe
Heat treated. 230,000 TS; 190,000 YS; 6 El.
Annealed: 120,000 TS, 100,000 YS, 16 El.
For rail and switch parts, street car tracks; oil hardening.

INDEPENDENCE
M-618, 0.8 C, bal Fe
For tools, springs; water hardened

INDEX
M-1322, 1.0 C, 0.2 Si, 0.25 Mn, 0 1 V, bal Fe
For springs, tools, cutters, reamers; Type W2; water hardened.

INDIE ZP
M-64, 0 35 C, 0.8 Mn, 0.45 Si, 1 65 Cr, 0 43 Mo, bal Fe
Oil hardening tool and die steel designed for molds; AISI P20

INDOX I.
M-1076; BaO + Fe_2O_3
For magnets; hard and brittle

INDOX V
M-1076, BaO + FeO.
For permanent magnet for D C motors; ferrite, high peak energy product, cermet.

INDOX-VI.
M-1076, $BaFe_{12}O_{19}$.
For permanent magnets, focusing magnets for traveling wave tubes; ferrite, ceramic

INDOX VI-A
M-1076, Barium ferrite
Coercive force-3000 oersteds
Peak energy product -2.6 × 10^6 gauss-oersteds
Residual induction -3300 gausses
For applications requiring good resistance to demagnetization Highly oriented Permanent magnet.

INDUSTRIAL NO 12.
M-440; 0.15 max C, 11 5-13 5 Cr, bal Fe.
Annealed 85,000 TS; 60,000 YS; 35 El, 75 RA; 135 Brin
For valves, cutlery, turbine blades; Type 410; corrosion resistant

INDUSTRIAL NO 12T
M-440; 0 15 max C, 11.5-13.0 Cr, 1 max Mn, bal Fe.
Annealed· 85,000-100,000 TS; 60,000-75,000 YS; 35-25 El; 75-60 RA; 135-165 Brin
Heat treated: 100,000-200,000 TS; 60,000-175,000 YS; 30-10 El; 75-50 RA; 200-390 Brin.
For chemical plant equipment; Type 403, corrosion resistant.

INDUSTRIAL NO. 17.
M-440; 0.12 max C, 14-18 Cr, 1 max Mn, 1 max Si, bal Fe.
Cold drawn: 130,000 TS; 120,000 YS; 3 El; 10 RA; 270 Brin.
Annealed: 75,000 TS; 35,000 YS; 40 El; 60 RA; 145 Brin.
For auto trim, kitchen sinks, oil refinery equipment; Type 430; corrosion resistant.

INDUSTRIAL NO. 17-7.
M-440; 0.09-0.20 C, 16-18 Cr, 7-9 Ni, 1.2 max Mn, bal Fe.
Annealed· 100,000 TS; 40,000 YS; 60 El; 160 Brin.
½ H-temper: 150,000 TS; 110,000 YS; 15 El; 320 Brin.
For chemical plant equipment, structural members, austenitic, stainless.

INDUSTRIAL NO. 18.
M-440; 0.12 max C, 18 Cr, bal Fe.
For corrosion resistant parts, corrosion resistant.

INDUSTRIAL NO. 18-8S.
M-440; 0 08 max C, 18-20 Cr, 8-12 Ni, 2 max Mn, bal Fe.
Annealed. 80,000 TS, 35,000 YS, 60 El; 70 RA; 135 Brin.
Cold drawn· 180,000 TS, 150,000 YS; 10 El; 330 Brin
For kitchen equipment, welded structures, process equipment; stainless, austenitic; Type 304.

INDUSTRIAL NO. 18-10CB
M-440, 0 08 max C, 17-19 Cr, 9-13 Ni, Cb = 10 × C, bal Fe
Annealed· 80,000-90,000 TS, 35,000-45,000 YS; 60-55 El, 70-60 RA; 135-185 Brin.
Cold drawn. 100,000-180,000 TS; 50,000-120,000 YS; 50-10 El; 180-300 Brin.
For chemical plant equipment, welded structures; Type 347, austenitic, stainless

INDUSTRIAL NO. 18-10 Ti
M-440, 0.08 max C, 17-19 Cr, 9-12 Ni, Ti = 5 × C, bal Fe.
Annealed 80,000 TS, 35,000 YS; 60 El, 70 RA; 135 Brin
Cold rolled 180,000 TS, 120,000 YS; 10 El; 300 Brin
For welded chemical plant equipment, Type 321, austenitic, stabilized

INDUSTRIAL NO 18-12MO.
M-440, 0 08 max C, 16-18 Cr, 10-14 Ni, 2-3 Mo, bal Fe
Cold drawn· 100,000-150,000 TS; 50,000-125,000 YS, 55-15 El, 180-200 Brin
Annealed: 80,000-90,000 TS, 35,000-50,000 YS; 70-60 El, 70-60 RA, 135-185 Brin
For chemical plant equipment, mixers, agitators; Type 316, austenitic, acid resistant.

INDUSTRIAL NO 19-12-3MO
M-440, 0.10 max C, 18-20 Cr, 11-15 Ni, 3-4 Mo, bal Fe.
Cold drawn: 100,000 150,000 TS; 50,000-125,000 YS; 50-15 El, 180-300 Brin.
Annealed. 80,000-90,000 TS, 35,000-50,000 YS; 70-60 El; 70-60 RA; 135-185 Brin
For chemical plant equipment, mixers, agitators; Type 317; austenitic, acid resistant.

INDUSTRIAL NO. 20-10S.
M-440, 0.08 max C, 19-22 Cr, 10-12 Ni, 2 max Mn, bal Fe.
Annealed: 90,000 TS; 40,000 YS; 50 El; 65 RA; 150 Brin.
For chemical plant equipment; stainless, austenitic; Type 308.

INDUSTRIAL NO. 20-25.
M-440, 0.25 max C, 19-21 Cr, 24-26 Ni, bal Fe.
Annealed: 100,000 TS; 50,000 YS; 45 El; 60 RA; 180 Brin.
For furnace parts, heat treat equipment; Type 311; austenitic, heat resistant.

INDUSTRIAL NO. 21.
M-440; 0.35 max C, 18-23 Cr, bal Fe.
Cold drawn: 70,000-80,000 TS; 45,000-55,000 YS; 40-55 El; 60-55 RA; 150-180 Brin.
For furnace parts, chemical plant equipment; Type 442; corrosion resistant.

INDUSTRIAL NO. 25-12.
M-440; 0.20 max C, 22-24 Cr, 12-15 Ni, bal Fe
Cold drawn: 100,000-250,000 TS; 50,000-200,000 YS; 45-5 El; 60-50 RA; 160-400 Brin.
Annealed: 90,000-110,000 TS; 35,000-45,000 YS; 55-40 El; 65-50 RA; 170-200 Brin.
For chemical plant equipment, furnace parts; Type 309; stainless, austenitic.

INDUSTRIAL NO. 25-12S.
M-440; 0.08 max C, 22-26 Cr, 12-14 Ni, bal Fe.
Cold drawn: 100,000-250,000 TS, 50,000-200,000 YS; 45-5 El; 60-50 RA; 160-400 Brin
For heat treat boxes, furnace parts, kiln linings; Type 309S; austenitic, heat resistant.

INDUSTRIAL NO. 25-20.
M-440, 0 25 max C, 24-26 Cr, 19-22 Ni, 2 max Mn, bal Fe.
Annealed: 95,000 TS; 45,000 YS, 50 El; 65 RA; 170 Brin.
For furnace parts, heat treat equipment, Type 310; austenitic, heat resistant.

INDUSTRIAL NO. 27.
M-440; 0 35 max C, 23-30 Cr, bal Fe.
Cold drawn: 75,000-85,000 TS, 50,000-60,000 YS, 35-50 El, 55-50 RA; 150-200 Brin.
For furnace parts, chemical plant equipment; Type 443; corrosion resistant.

INDUSTRIAL NO. 35
M-440, 0.30-0 45 C, 12-14 Cr, 0.5 max Ni, 0.5 max Mo, bal Fe
Annealed. 95,000 TS, 60,000 YS; 30 El; 50 RA, 190 Brin
Heat treated: 300,000 TS, 250,000 YS, 1 El, 3 RA, 620 Brin.
For surgical instruments, valves, cutlery; Type 420, corrosion resistant

INDUSTRIAL NO 65
M-440, 0.60-0 70 C, 16-17 Cr, bal Fe
Heat treated 250,000-143,000 TS, 223,000-115,000 YS, 4-13 El, 8-42 RA, 512-302 Brin
For corrosion resistant parts, cutlery; corrosion resistant.

INDUSTRIAL NO 100
M-440, 0 95-1 2 C, 16-18 Cr, 0.75 max Mo, bal Fe
Annealed 95,000 TS, 60,000 YS; 30 El; 50 RA; 190 Brin
Heat treated· 300,000 TS; 250,000 YS, 1 El, 3 RA, 620 Brin.
For bearings, valves, cutlery; corrosion and wear resistant; Type 440C.

INDUSTRIAL NO. 100FM.
M-440; 0.95-1.2 C, 16-18 Cr, 0.75 max Ni, 0.6 max Mo, bal Fe.
Annealed: 95,000 TS; 60,000 YS; 30 El; 50 RA; 190 Brin.
Heat treated: 300,000 TS; 250,000 YS; 1 El; 3 RA; 620 Brin.
For bearings, cutlery, valves; Type 440F; wear resistant.

INDUSTRIAL NO. 188.
M-440; 0.15 max C, 17-19 Cr, 8-10 Ni, bal Fe.
Annealed: 80,000 TS; 35,000 YS; 60 El; 70 RA; 135 Brin.
Cold rolled. 180,000 TS, 150,000 YS; 10 El; 330 Brin.
For chemical plant equipment, tanks, mixers; Type 302; austenitic, stainless.

INDUSTRIAL NO 188-M.
M-440, 0.2 C, 18 Cr, 8 Ni, 2-4 Mo, bal Fe.
For stainless and corrosion resistant parts and equipment, stainless and corrosion resistant.

INDUSTRIAL NO. 188-U.
M-440; 0 07 max C, 17.5-18 5 Cr, 8 5-9.5 Ni, bal Fe.
113,000-90,000 TS; 84,000-35,000 YS, 40-61 El; 60-68 RA; 223-135 Brin.
For stainless parts, chemical plant equipment; stainless, austenitic.

INDUSTRIAL NO 512
M-440, 0.15 max C, 12-14 Cr, 0 15 min S, 0 06 max P, 1.2 Mn, bal Fe
Heat treated 100,000-200,000 TS; 60,000-125,000 YS, 30-10 El; 75-50 RA; 200-390 Brin
Annealed: 85,000-100,000 TS; 60,000-75,000 YS; 35-25 El; 75-60 RA; 135-165 Brin
For screw machine products, valve trim, pump shafts, Type 416, corrosion resistant.

INDUSTRIAL NO 512 FREE MACHINING
M-440, 0 12 max C, 11 5-13 0 Cr, 0 3-0.4 S, bal Fe.
175,000-40,000 TS; 160,000-25,000 YS, 15-35 El; 60-75 RA; 375-150 Brin.
For corrosion resistant parts, new machine products; corrosion resistant, free-cutting

INDUSTRIAL NO 517
M-440, 0 12 max C, 14-18 Cr, 0.07 min S or Se, 0 6 max Mo, bal Fe.
Cold drawn 75,000-100,000 TS; 45,000-90,000 YS; 34-8 El, 62-58 RA, 140-250 Brin
For screw machine products, shafts, pumps; Type 430F, corrosion resistant

INDUSTRIAL NO. 530.
M-440, 0 21-0 35 C, 12-15 Cr, S, bal Fe.
For stainless and corrosion resistant parts; corrosion resistant.

INDUSTRIAL NO 5188
M-440, 0 15 max C, 17-19 Cr, 8-10 Ni, 0 15 min S, bal Fe
Cold drawn· 150,000 TS, 120,000 YS, 10 El; 330 Brin
Annealed 80,000 TS, 35,000 YS, 60 El, 75 RA; 130 Brin.
For screw machine products, free-cutting, stainless, Type 303.

INDUSTRIAL CRO-TUNG
M-440; 0 30 max C, 4 5-6 5 Cr, 0.75-1 0 W, bal Fe
193,000-100,000 TS, 167,000-85,000 YS; 5-24 El; 6-62 RA, 490-210 Brin
For corrosion resistant parts; corrosion resistant.

INFILOY
M-1708; 90-93 Cu, 3 5-6 0 Fe, 1.0-1 5 Mn, 0 4-0 6 Ni, 0.5-2 0 others.
Metal Powder Used in copper infiltration of powder metallurgy parts

INGACLAD
M-328; 20% layer 18-8 stainless welded to carbon steel
62,000-68,000 TS; 48,000-50,000 YS; 48 El; 50 RA.
For tanks, vessels, kettles, bins, table tops, vats; corrosion resistant.

INGACLAD TYPE 304.
M-328; 0.8 C, 18-20 Cr, 8-10 Ni, bal Fe.
For stainless parts, stainless clad steel.

INGACLAD TYPE 309.
M-328; 0.20 C, 22-26 Cr, 12-14 Ni, 2 max Mn, bal Fe.
Annealed: 60,000-70,000 TS; 40,000-50,000 YS; 30-50 El; 150-200 Brin.
For heat and corrosion resistant parts; heat and corrosion resistant clad steel.

INGACLAD TYPE 316.
M-328; 0.10 C, 16-18 Cr, 14 max Ni, 2-3 Mo, bal Fe.
For heat and corrosion resistant parts; stainless clad steel.

INGACLAD TYPE 317.
M-328; 0.10 C, 18-20 Cr, 14 max Ni, 3-4 Mo, bal Fe.
For heat and corrosion resistant parts; stainless clad steel.

INGACLAD TYPE 347.
M-328; 0.10 C, 17-20 Cr, 8-12 Ni, Cb = 10 × C, bal Fe.
For corrosion resistant parts; stainless clad steel.

INGERSALL.
M-328; 0.1 C, 18 Cr, 8 Ni, bal Fe.
Annealed: 85,000 TS; 165 El.
For stainless steel parts; stainless.

INGERSOLL.
M-328; 0.7-0.9 C, 0.2 V, bal Fe.
For tools, drills, punches; water hardening.

INGERSOLL 18-4-1.
M-328; 0.8 C, 18 W, 4 Cr, 1 V, bal Fe.
For hack saw blades; high speed steel.

INGERSOLL DBL.
M-328, 0.75-0.80 C, 4 Cr, 5 W, 1.5 V, 4 Mo, bal Fe
For tools, cutters; high speed steel.

INGERSOLL D-B-L 2.
M-328; 0.8 C, 6 W, 5 Mo, 2 V, 4 Cr, bal Fe.
For hack saw blades; high speed steel.

INGERSOLL I-50.
M-328, 0.50 C, 0.75 Mn, bal Fe.
For knives, saws, water hardened.

INGERSOLL I-60
M-328; 0.60 C, 0.75 Mn, bal Fe.
For knives, saws; water hardened

INGERSOLL I-75.
M-328; 0.75 C, 0.75 Mn, bal Fe.
For knives, saws; water hardened

INGERSOLL I-85
M-328; 0.85 C, 0.85 Mn, bal Fe
For knives, saws; water hardened.

INGERSOLL IC-3C.
M-328; 0.80 C, 0.65 Mn, 0.35 Cr, bal Fe.
For knives, saws, water hardened.

INGERSOLL IC-4C.
M-328; 0.85 C, 0.60 Mn, 0.25 Cr, bal Fe.
For knives, saws; water hardened.

INGERSOLL IC-66.
M-328, 0.70 C, 0.65 Mn, 0.45 Cr, bal Fe.
For knives, saws; water hardened

INGERSOLL IC-77.
M-328, 0.75 C, 0.75 Mn, 0.45 Cr, bal Fe.
For knives, saws; water hardened.

INGERSOLL IC-88.
M-328; 0.85 C, 0.45 Mn, 0.45 Cr, bal Fe.
For knives, saws; water hardened.

INGERSOLL IC-125.
M-328; 1.25 C, 0.20 Mn, 0.20 Cr, bal Fe.
For saws, knives, circular and hack saws; water hardened.

INGERSOLL IC-M.
M-328; 0.90 C, 0.90 Mn, 0.80 Cr, bal Fe.
For knives and saws; water hardened.

INGERSOLL ICN-70.
M-328; 0.70 C, 0.25 Mn, 0.35 Cr, 1.35 Ni, bal Fe.
For knives, saws; oil hardened.

INGERSOLL ICN-75.
M-328; 0.75 C, 0.35 Mn, 0.35 Cr, 1.25 Ni, bal Fe.
For knives, saws, valve discs; oil hardened.

INGERSOLL ICN-80.
M-328; 0.80 C, 0.40 Mn, 0.25 Cr, 0.60 Ni, bal Fe.
For circular saws, hog knives, cordwood saws; water or oil hardened.

INGERSOLL ICN-100.
M-328, 1.0 C, 0.40 Mn, 0.75 Cr, 1.35 Ni, bal Fe.
For circular and hack saws, hog and meat knives; oil hardened.

INGERSOLL ICN-K.
M-328, 0.80 C, 0.25 Mn, 0.25 Cr, 2.5 Ni, bal Fe.
For saws, knives, valve discs; oil hardened.

INGERSOLL ICNM-9M.
M-328; 0.75 C, 0.35 Mn, 0.20 Cr, 2.65 Ni, 0.20 Mo, bal Fe.
For circular and hack saws, knives; oil hardened.

INGERSOLL ICNM-55.
M-328; 0.70 C, 0.50 Mn, 0.60 Cr, 0.80 Ni, 0.20 Mo, bal Fe.
For circular and hack saws, knives, valve discs, oil hardened.

INGERSOLL ICNM-CS
M-328, 0.75 C, 0.30 Mn, 0.20 Cr, 0.70 Ni, 0.15 Mo, bal Fe.
For circular and hack saws, knives; oil hardened

INGERSOLL ICNV-1 A
M-328, 1.25 C, 0.30 Mn, 1.0 Cr, 0.55 Ni, 0.25 V, bal Fe
For hack and circular saws, knives, oil hardened

INGERSOLL ICV-35.
M-328; 0.35 C, 0.45 Mn, 1.0 Cr, 0.20 V, bal Fe
For knives, saws, valve discs, water hardened

INGERSOLL ICV-60.
M 328, 0.60 C, 0.45 Mn, 1.0 Cr, 0.20 V, bal Fe.
For circular and hack saws, knives, water or oil hardened.

INGERSOLL ICV 90.
M-328, 0.90 C, 0.35 Mn, 0.40 Cr, 0.20 V, bal Fe
For circular and hack saws, knives; oil or water hardened

INGERSOLL ICV-100
M-328; 1.0 C, 0.40 Mn, 1.4 Cr, 0.20 V, bal Fe.
For circular and hack saws, knives; oil or water hardened

INGERSOLL ICW-90
M-328, 0.90 C, 1.1 Mn, 0.50 Cr, 0.50 W, bal Fe
For hack and circular saws, hog knives; oil hardened, tough

INGERSOLL IN-8
M-328; 0.75 C, 0.40 Mn, 2.05 Ni, bal Fe.
For knives, saws; oil hardened.

INGERSOLL IN-8B.
M-328, 0.75 C, 0.85 Mn, 2.05 Ni, bal Fe.
For knives, saws; oil hardened.

INGERSOLL IN-9
M-328; 0.75 C, 0.40 Mn, 2.75 Ni, bal Fe.
For knives, saws; oil hardened.

INGERSOLL IN-9B.
M-328; 0.75 C, 0.85 Mn, 2.75 Ni, bal Fe.
For knives, saws; oil hardened.

INGERSOLL IN-40.
M-328; 0.40 C, 0.80 Mn, 3.5 Ni, bal Fe.
For knives, saws; oil hardened.

INGERSOLL INM-45.
M-328; 0.45 C, 0.50 Mn, 1 4 Ni, 0.35 Mo, bal Fe.
For saws, knives, friction saws; oil hardened.

INGERSOLL INV-75.
M-328; 0.75 C, 0.35 Mn, 2.0 Ni, 0.10 V, bal Fe.
For circular saws, meat knives, drag saws; oil hardened.

INGERSOLL IV-85.
M-328; 0.85 C, 0.25 Mn, 0.25 V, bal Fe.
For friction and hack saws, knives; water hardened.

INGERSOLL IW-120.
M-328, 1.2 C, 0 30 Mn, 1.15 W, bal Fe.
For saws, knives, friction saws; water hardened

INGERSOLL IWM-65.
M-328, 0.65 C, 0 70 Mn, 0 45 W, 0.45 Mo, bal Fe
For valve discs, saws, knives; water hardened.

INHIBITED ADMIRALTY, TYPE B
M-33; 71.5 Cu, 27 5 Zn, 1 0 Sn, 0.035 As.
Hard: 85,000 TS, 65,000 YS; 15 El; 88 Rock B.
For condenser tubes, distiller tubes, heat exchanger tubes.
ASTM B111 and B171; CDA 443.

INHIBITED ADMIRALTY, TYPE C.
M-33; 71 5 Cu, 27 5 Zn, 1.0 Sn, 0.035 Sb.
Annealed: 58,000 TS, 22,000 YS; 65 El, 70 Rock F
For heat exchanger tubes, distiller tubes, condenser tubes
ASTM B111 and B171; CDA 444.

INHIBITED ADMIRALTY, TYPE D
M-33; 71 5 Cu, 27 5 Zn, 1.0 Sn, 0 04 P
Prop & uses same as Types B and C.
CDA 445

INHIBITED ALUMINUM BRASS, No 687.
M-33, 77 5 Cu, 20.5 Zn, 2.0 Al, 0 035 As.
Ann 58,000 TS, 25,000 YS, 65 El; 80 Rock F.
Hard: 85,000 TS, 65,000 YS; 15 El; 88 Rock B.
For condenser tubes, distiller tubes, heat exchanger tubes, ferrules
ASTM B111; CDA 687.

INJECTOR BRONZE
U.S , 8.5 Sn, 2.5 Pb, bal Cu.
For injectors, fittings, hardware; free-cutting

INKOMO
M-618, 0.32 C, 2 75-3.15 Ni, 0.8 Cr, 0.5 Mo, bal Fe
Heat treated: 145,000-225,000 TS; 123,000-235,000 YS; 12-22 El, 33-60 RA; 269-504 Brin.
For tappet rods, gears, shafts, crankshafts; tough, shock resistant.

INKROMSTAHL IK1.
M-1234; 0 1 C, 0.3 Si, 0.5 Mn, 0.45 Ti, bal Fe.
For molten salt bath fixtures; suitable for chromizing.

INKROMSTAHL IK3.
M-38, 0.1 C, 3 min Mn, bal Fe.
For molten salt bath fixtures; suitable for chromizing

INKROMSTAHL IK25.
M-1234; 0.09 C, 0.35 Mn, 1.0 Si, 2.5 Cr, 0.17 V, 0.2 Cu, bal Fe.
For molten salt bath fixtures; suitable for chromizing.

INKROMSTAHL IK85.
M-1234; 0.15 C, 0.8 Si, 7.5 Cr, 0.5 V, 1.2 Mo, bal Fe.
For molten salt bath fixtures; suitable for chromizing.

INKUS.
M-111; 0.56 C, 0.85 Cr, 0.2 Mo, 1.8 Ni, 0.10 V, bal Fe.
For forging dies, punches; oil hardened, tough.

INLAND AA.
M-67; 0.10 C, 0.65 Mn, 0.010 P, 0.20 S, 0.10 Si, 0.005 Al, 0 010 N_2, bal Fe.
Cold Rolled: 45,000 YS; 64,000 TS; 26.1 El.
Aged: 70,000 YS; 15 El.
For formed sheet products, sills, containers, vessels, trunk hinges. Age-hardens, readily fabricated.

INLAND COPPER ALLOY STEEL.
M-67; 0 05-0.15 C, 0.2-0.3 Cu, bal Fe.
For corrosion resistance applications, roofing; corrosion resistant.

INLAND HI-STEEL.
M-67, 0 1 C, 0 6 Mn, 0 2 Si, 1 1 Cu, 0.55 Ni, bal Fe.
70,000 TS; 55,000 YS.
For structural applications, mining and transportation; weldable and workable.

INLAND LEDLOY.
M-67; C, 0 15-0.35 Pb, bal Fe.
For machinery parts, free cutting.

INLAND ZINC-ALLOY STEEL.
M-67; Zn coated S.A E. 1010 Steel.
For sheets for fabricated parts; Zn alloyed to steel surface.

INMET.
Poland, Cu, Mn, Ni, Fe, bal Al.
For light alloy parts; age hardened.

INNERBERG HG
M-27, 0.55 C, 0.10-0 40 Si, 0.50-0.70 Mn, bal Fe.
Normalized. 105,000 TS; 65,000 YS; 17 El; 24 RA; 220 Brin
For gears, bolts, machine tool parts, shafts; water hardened

INNERSHIELD NR-1.
M-578, C, bal Fe
Self-shielded flux-cored arc welding electrode.

INNERSHIELD NR-5
M-578, C, bal Fe
Self-shielded flux-cored arc welding electrode.

INNERSHIELD NR-201
M-578; C, bal Fe.
Self-shielded flux-cored arc welding electrode.
AWS Class E70T-G

INNERSHIELD NR-202.
M-578, C, bal Fe.
Self-shielded, flux-cored arc welding electrode.
AWS Class E60T-7.

INNERSHIELD NR-203
M-578, C, bal Fe.
Self-shielded flux-cored arc welding electrode.
AWS Class E60T-7.

INNERSHIELD NR-311.
M-578; C, bal Fe.
Self-shielded flux-cored arc welding electrode.
AWS Class E70T-G.

INNERSHIELD NS-3M.
M-578; C, bal Fe.
Self-shielded flux-cored arc welding electrode.
AWS Class E70T-4.

INNOSEIN.
French; 5-6 Cu, bal Al.
For light alloy parts; age-hardenable.

INOCULOY 63.
M-394; 60-65 Si, 9-12 Mn, 1.5-3.0 Ca, 4-6 Ba, 1.0-1.5 Al, bal Fe.
For reducing chill in gray cast iron.
Cast iron inoculant.

INOFO 1.
M-1487;
Stainless steel; similar to AISI 410.

INOFO 1S.
M-1487;
Stainless steel; similar to AISI 416.

INOFO 2.
M-1487;
Stainless steel, similar to AISI 420.

INOFO 4.
M-1487;
Stainless steel; similar to AISI 430.

INOFO 4S.
M-1487;
Stainless steel; similar to AISI 430F.

INOFO 5.
M-1487;
Stainless steel; similar to 431.

INOFO 10.
M-1487;
Stainless steel; similar to AISI 302.

INOFO 10B.
M-1487;
Stainless steel, similar to AISI 304.

INOFO 10Ti.
M-1487;
Stainless steel; similar to AISI 321.

INOFO 11.
M-1487;
Stainless steel; similar to AISI 304L.

INOFO 12.
M-1487;
Stainless steel; similar to AISI 316.

INOFO 12B.
M-1487;
Stainless steel; similar to AISI 316 L.

INOFO 12Ti
M-1487;
Stainless steel, similar to AISI 316 Ti.

INOFO 13S.
M-1487;
Stainless steel; similar to AISI 303.

INOR-8.
M-118; 0.06 C, 7 Cr, 17 Mo, 5 max Fe, 0.8 max Mn, 0.5 max Al + Ti, bal Ni.
Heat treated: 115,100 TS; 45,500 YS, 50.7 El.
At 1600°F: 35,000 TS; 25,000 YS; 30 El.
For high temperature applications, resists hot fluoride salts; high oxidation resistance, resists aging and embrittlement.

INOR-8.
M-1490; 0.06 C, 7 Cr, 0.2 Co, 16 Mo, 0.5 Ti, 0.005 B, 4 Fe, 1 Si, bal Ni.
At R.T.: 100,000 TS; 45,000 YS; 50 El.
At 1200°F: 70,000 TS; 30,000 YS; 45 El.
For high temperature applications, jet engine and gas turbine components.
High heat and corrosion resistant.
Resists hot fluoride salts.

INOSSIDALFA.
M-658; Al alloy.
For light alloy parts.

INOX 1.
M-884; 0.15 max C, 13 Cr, 0.5 max Ni, bal Fe.
Annealed: 75,000 TS; 40,000 YS; 35 El; 70 RA; 155 Brin.
For turbine blades, cutlery, valves; Type 410; stainless.

INOX 2.
M-884; 0.20 C, 13.5 Cr, 0.5 max Ni, bal Fe.
Annealed: 95,000 TS, 50,000 YS; 25 El; 55 RA; 195 Brin.
For turbine blades, cutlery, valves, surgical instruments, Type 420; stainless, hardenable.

INOX 3.
M-884; 0.30 C, 13.5 Cr, 0.5 max Ni, bal Fe.
Annealed: 100,000 TS; 55,000 YS; 22 El; 52 RA; 210 Brin.
For turbine blades, valves, cutlery, surgical instruments, Type 420; stainless, martensitic

INOX 16.
M-884, 0.08 C, 16 Cr, 0.5 max Ni, bal Fe.
Annealed 80,000 TS; 50,000 YS; 25 El; 50 RA; 150 Brin.
For bolts, shafts, oil refinery equipment, heaters, Type 430, stainless, ferritic.

INOX 431.
M-884; 0.15 C, 16 Cr, 2 Ni, bal Fe.
Annealed: 125,000 TS; 95,000 YS; 20 El; 55 RA; 260 Brin.
For pumps, marine hardware, valves; Type 431; stainless

INOXALIUM
M-787; 0.2 C, bal Fe
For machinery parts; water hardenable.

INOXARGENT.
M-1120, 0.12 max C, 12-14 Cr, 12-14 Ni, Cu, bal Fe
Annealed. 70,000-78,000 TS; 28,000-44,000 YS; 45-50 El.
For clocks, decorative trim, furniture, corrosion resistant.

INOXESCO 1
M-1495; 0.08 max C, 2.0 max Mn, 18-20 Cr, 8-12 Ni, bal Fe.
Annealed: 75,000 TS; 30,000 YS; 35 El; 190 Brin.
For oil refinery tubes and equipment; stainless, austenitic

INOXESCO 2
M-1495; 0.08 max C, 17-20 Cr, 9-13 Ni, Ti = 5 × C, bal Fe.
Annealed: 75,000 TS, 30,000 YS, 35 El; 190 Brin.
For welded oil refinery equipment and tubes; stainless, austenitic.

INOXESCO 13.
M-1495, 0.17 C, 0.6 Mn, 13 Cr, 0.6 Mo, 0.5 Ni, 0.2 V, bal Fe.
Annealed: 85,000 TS; 40,000 YS; 24 El; B 95 Rock.
Hardened: 200,000 TS; 165,000 YS; 12 El; C 48 Rock.
For cutlery, valves, bearings, surgical instruments, gears. Corrosion resistant, hardenable.

INOXESCO 16.
M-1495, 0.12 max C, 1.0 max Mn, 14-18 Cr, 0.5 max Ni, bal Fe.
Annealed: 60,000 TS; 35,000 YS; 20 El; 190 Brin.
For oil refinery tubes and equipment; stainless, ferritic.

INOXYDA BRONZE.
1-9 Al, 82-89 Cu, 0-1 Zn.
For steam fittings; corrosion resistant.

IN-STEEL.
M-1570; 0.18 max C, 1.5 max Ni, 0.4-0.8 Cr, 0.6 max Mo, 0.10 max V, 0.15-0.35 Si, 0.6-1.2 Mn, bal Fe.
Plate: 138,000-163,500 TS; 128,000 YS; 15 El.
For heavy duty welded structures and equipment, mine cars, bus bodies. Ultra-high strength, excellent weldability.

INSTRUMENT BRONZE.
U.S.; 13 Sn, 5 Zn, bal Cu.
For instruments, utensils; corrosion resistant.

INTENSIV.
M-1339; 1.65 C, 11.5 Cr, 0.1 V, bal Fe.
For blanking and forming dies, punches; air hardened, non-deforming.

INTENSIV SPEZIAL.
M-1339; 1.6 C, Cr, Mo, W, V, bal Fe.
For blanking and forming dies, punches; air hardened, non-deforming.

INTENSIV WO.
M-1339, 2.1 C, 11.5 Cr, 0.7 W, bal Fe.
For blanking and forming dies, punches; oil hardened.

INTENSIV Z
M-1339; 1 65 C, 11.5 Cr, 0.1 V, bal Fe.
For blanking and forming dies, punches; air hardened, non-deforming.

INTERMEDIATE MANGANESE ABRASION. STEEL.
M-377, M-604; 0 35-0 50 C, 1.5-2.0 Mn, 0.5 max P, 0 055 max S, 0 15-0 30 Si, bal Fe.
Hot rolled· 100,000-125,000 TS; 200-250 Brin
For dredge pipe, screens; abrasion resistant. Billets, sheets, plates

INTERMEDIATE MANGANESE MEDIUM CARBON
M-377; 0.28-0 38 C, 1.1-1 4 Mn, 0.04 max P, 0 15-0 30 Si, bal Fe
Hot rolled: 90,000 TS; 55,000 YS; 18 El; 50 RA.
For sucker rods, bars and rods; Iz-45 min

INTERMEDIATE MANGANESE RAIL STEEL
M-377, 0.50-0.65 C, 1.2-1.5 Mn, 0 04 max P, 0 10-0.23 Si, bal Fe.
For railways, rails; wear resistant.

INTRA
M-345; 1 2 C, 1.3 W, bal Fe.
For dies, reamers, blanking dies; water hardening.

INUSO.
French; 0.1 C, bal Fe.
For welding rods.

INVAR.
M-44, M-121, M-104; 0.18 C, 35.5 Ni, 0.42 Mn, bal Fe.
Annealed: 72,500 TS; 24,000 YS; 39 El; 67 RA.
For measuring tapes and instruments, automobile and aircraft engine parts, thermostats; low coefficient of expansion.

INVAR.
M-73; 0.15 C, 38 Ni, 0.8 Mn, bal Fe.
Annealed: 70,000 TS; 24,000 YS; 36 El; 68 RA; 143 Brin.
Cold drawn: 90,000 TS; 70,000 YS; 20 El; 60 RA; 185 Brin.
For bimetal thermostats, geodetic instruments; low coefficient of expansion.

INVAR 36 FREE-CUT.
M-32, M-38, M-73, M-114; 0.12 C, 0.90 Mn, 0.35 Si, 0.20 Se or S, 36 Ni, bal Fe.
Annealed: 65,000 TS; 40,000 YS; 35 El; B 70 Rock.
For geodetic instruments, thermostats, temperature control and indicating devices, component parts requiring minimum expansivity.
Free-cutting, low coefficient expansion.

INVAR FREE-MACHINING.
M-73; 0.12 C, 38 Ni, 0.8 Mn, 0.25 Se, bal Fe.
Annealed: 70,000 TS; 24,000 YS; 36 El; 68 RA; 143 Brin.
Cold drawn: 90,000 TS; 70,000 YS; 20 El; 60 RA; 185 Brin.
For bimetal thermostats, geodetic instruments; low coefficient of expansion, free-cutting.

INVARIANT.
Eng ; 47 Ni, 53 Fe.
For surveyors tape, piston struts; corrosion resistant.

INVARO-B.
M-57; 0.94 C, 1.2 Mn, 0.53 W, 0.22 V, 0.5 Cr, bal Fe.
For punches, forming dies, shears, tough, nondeforming, oil hardened.

INVARO NO. 1.
M-57; 0.88 C, 1 0-1 25 Mn, 0.5 Cr, 0.2 V, 0.5 W, bal Fe.
For tools, hobs, milling cutters, taps; Type Ol; oil hardened

INVAROD.
M-32, 36 Ni, 2.5 Mn, 0.75 Ti, bal Fe.
Hot Rolled· 77,500 TS; 42,000 YS; 40 El, 71 RA,
For welding Invar parts.
Weld wire permits crack-free welding Aids cryogenic joining

INVARSTAHL
M-303; 36 Ni, bal Fe
86,000 TS; 32 El.
For clocks, balances, measuring devices; same as "Invar.' '

INVENTOR.
M-472, 0 13-0.20 C, 12-14 Cr, bal Fe.
Heat treated: 90,000-123,000 TS; 25 El; 179-228 Brin.
For turbine blades, surgical instruments; Type 420; corrosion resistant

INVINCIBLE.
M-1406; 0 70 C, 18 W, 4 Cr, 1 V, bal Fe.
For turning tools, reamers, drills, chasers, taps; high speed steel.

INVINCIBLE 22%.
M-1406; 0.75 C, 22 W, 4 Cr, 1.2 V, bal Fe.
For lathe tools, reamers, drills, hobs; high speed steel.

INVINCIBLE DRILL ROD.
M-339, 1-1.2 C, bal Fe.
For drills, general tools; water hardening.

INVINCIBLE DRILL ROD.
M-1703; 1 15-1 25 C, 0.15-0 40 Mn, bal Fe.
Water hardening drill rod; AISI W1.

INX-42.
M-67; 0 2 C, 0.9-1.35 Mn, 0.01 Cb, bal Fe.
Rolled (min.): 63,000 TS; 42,000 YS; 20 El.
For trucks, plow frames, pressure vessels, building components, automobiles, trailers, railroad accessories.
Good weldability, tough.

INX-45.
M-67; 0.2 C, 1.2 Mn, 0.02 Cb, bal Fe.
Rolled: 45,000 min YS; 65,000 min TS; 19 min El.
For trucks, plow frames, pressure vessels, automobiles, trailers, buildings. Good weldability, tough.

INX-50.
M-67; 0.2 C, 1.3 Mn, 0.01 Cb, bal Fe.
Rolled (min): 70,000 TS; 50,000 YP; 18 El.
For trucks, plow frames, pressure vessels, building components, water heaters, railroad accessories. Good weldability, tough.

INX-55.
M-67; 0.22 C, 1.35 Mn, 0.01 Cb, bal Fe.
Rolled (min): 75,000 TS; 55,000 YP; 17 El.
For trucks, plow frames, pressure vessels, construction equipment, water heaters, railroad accessories. Good weldability, tough.

INX-60.
M-67; 0.25 C, 1.35 Mn, 0.01 Cb, bal Fe.
Rolled (min): 80,000 TS; 60,000 YS; 16 El.
For trucks, plow frames, pressure vessels, building components, pipe, railroad accessories, automobiles. Good weldability, tough.

INX-65.
M-67; 0.25 C, 1.3 Mn, 2 Si, 0.03 Cb, bal Fe.
Rolled: 85,000 min TS; 65,000 min YS; 15 min El.
For trucks, plow frames, pressure vessels, automobiles, railroad accessories.
Good weldability.

INX-70.
M-67; 0.26 C, 1.3 Mn, 0.2 Si, 0.03 Cb, 0.01 V, bal Fe.
Plate: 90,000 min TS; 70,000 min YP; 14 min El.
For structures, plow shares, pressure vessels, railroad accessories, building components, water heaters.
Good weldability and forming properties.

IOCHROME.
M-1492; 99.997 Cr.
Rolled: 44 El; 78 RA.
Alloying ingredient for high Cr alloys; for high temperature service.

IRALITE.
M-229; 3.1 C, 1.2 Cr, 0.3 Mo, bal Fe.
Cast: 36,000-52,000 TS; 150-180 Brin.
For sheaves, sprockets, plungers, glass rolls, brake drums, conveyor parts.
Pearlitic cast iron, wear resistant.

IRCAMET.
M-1224; 0.07 C, 20 Cr, 29 Ni, 2.75 Mo, 1 Si, 4 Cu, 0.8 Mn, bal Fe.
Cast: 65,000 TS; 30,000 YS; 30-45 El; 40-50 RA; 140 Brin.
Rolled: 85,000 TS; 35,000 YS; 35-50 El; 50-70 RA; 170 Brin.
For furnace parts, chemical plant equipment; stainless, austenitic, nonmagnetic.

IRIDAL.
M-1397; 0.3 B, 5 Si, 0.7 Mg, bal Al.
For architectural uses; heat treatable.

IRIDIUM.
Eng.; 77-83 Zn, 1.21-1.25 Cu, 21.6-15.7 Sn, trace Sb.
For bearings; Babbitt.

IRIDIUM II.
England; 77.25 Zn, 21.63 Sn, 1.12 Cu.
For bearings; will not resist heat or live steam.

IRIDIUM B.M.
England; 83 Zn, 15.75 Sn, 1.25 Cu, trace Sb.
For bearings; will not resist heat or live steam.

IRIDIUM EXTRA SPECIAL.
M-613; 0.7 C, 18 W, 4 Cr, 2 V, 5 Co, bal Fe.
For cutters, tools; high speed steel.

IRIDOSMINE.
Eng.; 57 Os, 34 Rh + Ir, 8 Ru.
For pen points; "Osmiridium."

I.R. METAL
M-788; 2.5-3.25 C, 0.7-1.1 B, 0.5-1.5 Si, 0.5-1.25 Mn, 3.5-4.5 Ni, bal Fe.
For oil field accessories; abrasion resistant cast iron.

IRON "8-J"
M-664; 2.9-3.3 C, 1.6-2.0 Si, 0.6 Mn, 1.0-1.25 Ni, 0.3 Mo, 0.3 Cr, bal Fe.
Cast 42,000 TS; 235 Brin.
For cams, gears, alloy cast iron.

IRONAC.
England; 13.2 Si, 0.77 Mn, 1.1 C, 0.8 P, bal Fe.
For pumps, valves, ejectors, nozzles, fans; acid resistant cast iron.

IRON BRONZE.
M-2, M-2a, 8.6 Sn, 4.4 Zn, 4 Fe, bal Cu.
Cast: 20-35 El; 70-85 Brin.
Pressed: 20-35 El; 80-90 Brin.
For shafts, piston rods, screws, marine parts; resists sea water corrosion.

IRONIERS BRONZE.
England, Sn, 1 Hg, bal Cu.
For special applications, corrosion resistant.

IRON OILITE.
M-211; 97.25 min Fe, 0.25 max C.
Sintered. 10,000-15,000 TS, 5.7-6.1 density.
Oilite bearing material.
ASTM B439-67 Gr 1; SAE 850; PMPMA F-0000-N

IRON OILITE-1.
M-211; 97 min Fe, 0.6-1.0 C.
Sintered: 24,000 TS, 5.7-6.1 Density.
ASTM B310-67 Type I Cl.C; SAE 852.

IRON OILITE-1 IM.
M-211; 15-25 Cu, 69.0-84.4 Fe, 0.6-1.0 C.
Sintered· 85,000 TS; 7.1 min density. 40,000 shear, 17,000 fatigue.
ASTM B303-67 Cl C; SAE 872. PMPMA FX-2010-T.

IRONWELD
M-607, 3.2 C, 2.2 Si, bal Fe.
For welding rod for cast iron, flux-coated.

IROQUOIS.
M-435; 1.25 C, 1.4 W, bal Fe.
For taps, cartridge dies, punches; water hardening.

IRRUBIGO see also MAERKER IRRUBIGO.

IRRUBIGO 16W.
M-1305, 0.08 C, 17 Cr, bal Fe.
Annealed· 80,000 TS, 50,000 YS; 25 El; 50 RA; 150 Brin.
For oil refining equipment, sinks, soot blowers; Type 430; corrosion resistant.

IRRUBIGO 17A.
M-1305; 0.12 C, 16.5 Cr, 0.25 Mo, 0.2 S, bal Fe.
Annealed: 80,000 TS; 50,000 YS; 25 El; 50 RA; 150 Brin.
For screw machine products, fasteners; Type 430F; corrosion resistant, free-cutting.

IRRUBIGO 17W.
M-1305; 0.1 max C, 17.5 Cr, Ti = 4 × C, bal Fe.
Annealed: 80,000 TS; 50,000 YS; 30 El; 55 RA; 160 Brin.

For welded oil refinery equipment; corrosion resistant.

IRRUBIGO EXTRA W.
M-1305; 0.1 max C, 17 Cr, 1.8 Mo, Ti = 7 × C, bal Fe.
Annealed: 85,000 TS; 55,000 YS; 20 El; 45 RA; 160 Brin.
For welded oil refinery equipment; heat and corrosion resistant.

IRRUBIGO GS18.
M-1305; 0.25 C, 17 Cr, 1.8 max Ni, bal Fe.
For welded oil refinery equipment; corrosion and heat resistant.

IRRUBIGO GS30.
M-1305; 1.2 C, 1.3 Si, 29 Cr, bal Fe.
For rollers, crushers, grates, rabble arms; corrosion, heat and abrasion resistant.

IRRUBIGO MC18.
M-1305, 0 90 C, 18 Cr, 2 Mo, bal Fe.
Annealed: 105,000 TS; 62,000 YS; 18 El; 35 RA; 220 Brin.
Heat treated· 280,000 TS; 270,000 YS; 3 El; 15 RA; 555 Brin
For cutlery, valves, bearings, surgical instruments; Type 440B-Mo, stainless, hardenable.

IRRUBIGO S14.
M-1305; 0 25 C, 14 5 Cr, 1 max Ni, bal Fe.
Annealed: 80,000 TS; 45,000 YS; 30 El; 65 RA, 170 Brin.
For oil refinery equipment; corrosion resistant.

IRRUBIGO S18
M-1305, 0.25 C, 17 Cr, 1.8 max Ni, bal Fe.
Annealed 125,000 TS, 95,000 YS; 20 El; 55 RA; 260 Brin
For pumps, valves, marine hardware; Type 431; corrosion and heat resistant.

IRRUBIGO S30
M-1305, 1 2 C, 1 3 Si, 29 Cr, bal Fe.
For crushers, rollers, grates, baffles; corrosion, heat and abrasion resistant

IRRUBIGO S30M.
M-1305, 1.2 C, 1 3 Si, 29 Cr, 2 Mo, bal Fe
For crushers, rollers, grates, baffles, corrosion, heat and abrasion resistant.

IRRUBIGO SN5
M-1305, 0.4 C, 27 Cr, 1.3 Si, 4 Ni, bal Fe.
Cast: 70,000 TS, 65,000 YS, 2 El; 190 Brin
Aged 115,000 TS; 80,000 YS, 15 El.
For furnace parts, grate bars, salt pots; Type HC, heat resistant

IRRUBIGO SN8.
M-1305, 0.15 C, 1.5 Si, 18 Cr, 8 Ni, bal Fe.
Annealed 80,000 TS; 35,000 YS, 55 El; 75 RA; 150 Brin
Cold drawn· 180,000 TS; 150,000 YS; 10 El; 250 Brin.
For chemical plant equipment, tanks, mixers, filters; Type 302, stainless, austenitic.

IRRUBIGO SN8S.
M-1305, 0 12 max C, 18 Cr, 9.5 Ni, Ti = 4 × C, bal Fe.
Annealed· 85,000 TS; 35,000 YS; 55 El; 65 RA; 150 Brin.
For welded chemical plant equipment, tanks, mixers; Type 321; stainless, austenitic.

IRRUBIGO SN9.
M-1305; 0.15 C, 2 Si, 18 Cr, 2 Mo, 9.5 Ni, bal Fe.
Annealed: 85,000 TS; 35,000 YS; 50 El; 65 RA; 160 Brin.
For acid resistant chemical plant equipment, tanks; Type 316; stainless, austenitic.

IRRUBIGO SN9S.
M-1305; 0.12 max C, 18 Cr, 2 Mo, 10.5 Ni, Ti = 4 × C, bal Fe.
Annealed: 85,000 TS; 40,000 YS; 50 El; 65 RA; 170 Brin.
For welded acid resistant chemical plant equipment; Type 316 Ti; stainless, austenitic.

IRRUBIGO SN12.
M-1305; 0.05 C, 17 Cr, 13 Ni, 2 Mo, Ta, Cb, bal Fe.
Annealed: 90,000 TS; 40,000 YS; 45 El; 60 RA; 170 Brin.
For welded acid resistant chemical plant equipment; Type 316 Cb; stainless, austenitic.

IRRUBIGO SN18.
M-1305, 0.05 C, 17 Cr, 17 Ni, 2 Mo, 0.2 Cu, Ta, Cb, bal Fe.
For valves, pumps, chemical plant equipment; corrosion and heat resistant, austenitic.

ISA-13.
M-789; 96 Cu, 2 Mn.
Hard: 100,000-114,000 TS.
Annealed. 42,000-50,000 TS.
Temp. coef. resistance per °C: + 0.0004.
For electrical equipment and instruments.
Resistance alloy. Max working temperature 300°C.

ISA-50.
M-789; 81 Cu, 5 Ni, 12 Mn, 1.5 Al.
Hard: 115,000-128,000 TS
Soft: 58,000-65,000 TS
Temp. coef. resist per °C: ± 0.00002.
For electrical equipment and instruments.
Resistance alloy Max. working temperature 500°C

ISABELLIN
M-789, Cu, Mn, Al.
For electrical resistance parts.

ISABELLIN-A.
M-789; 84 Cu, 13 Mn, 3 Al
Hard 128,000-144,000 TS
Soft. 72,000-78,000 TS.
For electrical equipment and instruments.
Resistance alloy Max. operating temperature to 400°C.

ISA-NICKEL.
M-789; 32 Cu, 67 Ni.
Hard. 120,000-135,000 TS.
Soft 64,000-78,000 TS.
Thermal coef. resist. per °C: + 0.0005.
For electrical equipment and instruments.
Resistance alloy. Max. operating temperatures to 600°C

ISA-OHM
M-789, 3 Cu, 71 Ni, 21 Cr.
Annealed 157,000-170,000 TS.
Temp coef. resistance per °C· ± 0.00001.
For electrical equipment and instruments.
Resistance alloy. Max. working temperature 250°C.

ISA-SPRAY.
M-789, 88 Cu, 10 Mn, 2 Al.
Hard· 128,000-144,000 TS.
Soft. 64,000-72,000 TS.
For electrical equipment and instruments.
Resistance alloy Max working temperature to 400°C.

ISA-ZIN.
M-789; 77 Cu, 21 Ni, 1 5 Mn.
Hard: 78,000-85,000 TS.
Soft: 50,000-60,000 TS.
Temp. coef. resist. per °C: + 0.00025.
For electrical equipment and instruments.
Resistance alloy. Max. operating temperature to 400°C.

ISERLOHN.
Eng.; 70.1 Cu, 29.9 Zn.
For cartridges, shell cases, condenser tubes; maximum ductility.

ISERLOHN.
64 Cu, 34 Zn, 2.4 Sn, 0.3 Pb.
For fittings, hardware; corrosion resistant.

ISERLOHN BRASS.
England; 70 Cu, 30 Zn.
¼ H-temper: 54,000 TS; 40,000 YS; 43 El; 100 Brin.
½ H-temper: 62,000 TS; 52,000 YS; 23 El; 116 Brin.
For cartridge cases, condenser tubes; high ductility and workability.

ISO-CAST 1.
M-162; 0.2-0.3 C, 0.6-0.8 Mn, 0.35-0.50 Si, bal Fe.
Annealed: 70,000 TS; 40,000 YS; 25 El; 40 RA; 130 Brin.
For castings; general purpose.

ISO-CAST 1A.
M-162; 0.3-0.4 C, 0.5-0.7 Mn, 0.35-0.50 Si, bal Fe.
Annealed: 75,000 TS; 45,000 YS; 25 El; 40 RA; 165 Brin.
For castings; general purpose.

ISO-CAST 1B.
M-162; 0.4-0.5 C, 0.6-0.8 Mn, 0.35-0.50 Si, bal Fe.
Annealed: 85,000 TS; 55,000 YS; 20 El; 30 RA; 174 Brin.
For castings; general purpose.

ISOCAST 1EL.
M-162; 0.10 max C, 0.5-0.7 Mn, 0.6 max Si, bal Fe.
For electric motors and generators; good magnetic permeability.

ISOCAST 1L.
M-162; 0.20 max C, 0.5-0.7 Mn, 0.6 max Si, bal Fe.
For electric motors and generators.

ISO-CAST 2.
M-162, 0.5-0.6 C, 0.6-0.8 Mn, 0.35-0.50 Si, bal Fe.
Annealed: 95,000 TS, 60,000 YS; 15 El; 20 RA; 202 Brin.
For castings; high strength.

ISO-CAST 2A.
M-162; 0.6-0.7 C, 0.6-0.8 Mn, bal Fe.
Annealed: 105,000 TS; 65,000 YS; 12 El; 15 RA; 222 Brin.
For castings; high strength.

ISO-CAST 2B.
M-162; 0.70-0.80 C, 0.6-0.8 Mn, 0.35-0.50 Si, bal Fe.
Annealed 112,000 TS; 75,000 YS; 10 El; 12 RA; 235 Brin.
For castings; abrasion resistant.

ISOCAST 3.
M-162; 0.25-0.35 C, 1.25-1.5 Mn, bal Fe.
Heat treated: 90,000 TS; 55,000 YS; 25 El; 40 RA; 200 Brin.
For machine and railroad parts; castings.

ISOCAST 4.
M-162; 0.15-0.25 C, 0.5-0.7 Mn, 0.4-0.6 Mo, bal Fe.
Annealed: 75,000 TS; 45,000 YS; 25 El; 40 RA.
For turbines, locomotives, valves, pumps; castings.

ISOCAST 5.
M-162; 0.25-0.35 C, 1.0-1.2 Mn, 0.35-0.45 Mo, bal Fe.
Heat treated: 80,000 TS; 55,000 YS; 25 El; 40 RA.
For cars, excavating machinery sheaves; castings.

ISOCAST 6.
M-162; 0.25-0.35 C, 0.5-0.7 Mn, 1.75-2.25 Ni, bal Fe.
Heat treated: 95,000 TS; 60,000 YS; 22 El; 40 RA; 179 Brin.
For mining, excavating and ship castings; castings.

ISO-CAST 6A.
M-162; 0.15-0.25 C, 0.6-0.8 Mn, 2.75-3.50 Ni, bal Fe.
Tempered: 85,000 TS; 55,000 YS; 20 El; 40 RA; 159 Brin.
For castings, machinery parts.

ISOCAST 7.
M-162; 0.85 C, 0.5 Mn, 0.5 Si, 2.5 Cr, 0.2 V, bal Fe.
Heat treated: 95,000-165,000 TS; 60,000-135,000 YS, 15 El; 30 RA, 179-302 Brin
For machine tools, sheaves, brick making equipment, wear resistant castings.

ISOCAST 8.
M-162, 0.25-0.35 C, 0.6-0.9 Mn, 1.0-1.25 Cr, 0.2-0.3 Mo, bal Fe.
Heat treated: 90,000-105,000 TS; 55,000-65,000 YS; 15-25 El; 30-45 RA; 210 Brin
For railroads, connecting rods, valves, castings.

ISO-CAST 8A
M-162, 0.35-0.45 C, 1 Cr, 0.3 Mo, 0.7 Mn, 0.5 Si, bal Fe.
Normalized: 90,000-105,000 TS, 60,000-80,000 YS, 18-24 El; 35-50 RA; 207-220 Brin.
For gears, shafts, machine tool housings; SAE 4142, tough and wear resistant.

ISO-CAST 8B
M-162, 0.2 max C, 1.0-1.5 Cr, 0.45-0.65 Mo, bal Fe.
Normalized: 75,000-90,000 TS; 45,000-65,000 YS; 30-25 El, 50-40 RA; 159-170 Brin.
For steam service castings, for strength at elevated temp

ISOCAST 9
M-162, 0.2-0.3 C, 0.5-0.7 Ni, 0.5-0.7 Cr, 0.1-0.2 Mo, bal Fe
Heat treated: 110,000-120,000 TS; 70,000-100,000 YS; 18-12 El: 35-30 RA, 230-270 Brin.
For valve bodies, turbines, gears, shafts, housings; SAE 8630, castings

ISOCAST 9A.
M-162, 0.25-0.35 C, 1.0-1.2 Ni, 1.0-1.5 Cr, 0.1-0.2 V, bal Fe.
Heat treated. 115,000 TS; 65,000 YS; 20 El; 40 RA, 235 Brin
For impellers, pump casings, structural castings; ASTM 4C4; abrasion resistant.

ISOCAST 20
M-162, 0.07 max C, 19-22 Cr, 27.5-30.0 Ni, 2 min Mo, 3 min Cu, bal Fe.
Cast: 65,000 TS; 30,000 YS; 35 El, 140 Brin.
For pumps, valves, chemical plant equipment; austenitic, stainless, resists H_2SO_4.

ISOCAST 31.
M-162, 0.12 max C, 1 max Cr, 63 Ni, 28 Mo, 6 Fe.
Cast: 80,000 TS; 57,000 YS; 8 El; 11 RA; 200 Brin
For agitators, valves, pump parts; resists HCl and H_3PO_4.

ISOCAST 32.
M-162; 0.15 max C, 17 Cr, 55 Ni, 17 Mo, 6 Fe, 4 25 W.
Cast: 78,000 TS; 57,000 YS; 7 El; 10 RA; 210 Brin.
For pump and valves, for strongly oxidizing acids; highly acid resistant.

ISOCAST 35.
M-162; 0.15 max C, 24 Cr, 56 Ni, 8 Cu, 4 Mo, bal Fe.
Cast: 60,000 TS; 50,000 YS; 5 El; 5 RA; 180 Brin.
For chemical plant equipment, valves, pumps; resists H_2SO_4 and thermal shock.

ISOCAST 40.
M-162, 0 04 max C, 25-57 Cr, 4 7-6 0 Ni, 1.7-2.2 Mo, 2.7-3.2 Cu, bal Fe.
Annealed: 100,000 TS; 80,000 YS; 30 El; 250 Brin.
Heat treated: 145,000 TS; 120,000 YS; 10 El; 350 Brin
For high temperature applications, age-hardenable, corrosion resistant.

ISO-CAST 85.
M-162, 0.2 max C, 4.0-6 5 Cr, 0 45-0.65 Mo, bal Fe.
Normalized. 90,000-105,000 TS; 60,000-70,000 YS; 24-18 El, 50-35 RA; 192-200 Brin.
For pump valves, for strength at elevated temp.

ISO-CAST B
M-162, 0 12 max C, 1 0 max Cr, 63 Ni, 28 Mo, 6 Fe
Cast· 80,000 TS; 57,000 YS; 8 El, 11 RA; 200 Brin
For equipment handling HCl in all concentrations Corrosion resistant to H_2SO_4 and H_3PO_4.

ISO-CAST C
M-162, 0 12 max C, 17 Cr, 55 Ni, 17 Mo, 6 Fe, 4 25 W, 0.8 Co, 0 3 V.
Cast. 78,000 TS, 57,000 YS, 7 El, 10 RA; 200 Brin.
For equipment handling nitric acid, solutions containing Cl_2. Corrosion resistant

ISO-CAST CA-15
M-162, 0 15 C, 1 Ni, 11-14 Cr, bal Fe
Quenched and treated 95,000 TS, 65,000 YS; 20 El, 45 RA; 200 Brin
For valves, pumps, castings, corrosion resistant, hardenable.

ISO-CAST CA-40
M-162, 0 2-0 4 C, 1 Ni, 11.5-14 0 Cr, bal Fe.
Quenched and treated: 110,000 TS, 75,000 YS, 18 El, 35 RA, 220 Brin
For valves, pumps, castings; corrosion resistant, hardenable.

ISO-CAST CB-30.
M-162, 0 3 C, 2 Ni, 18-22 Cr, bal Fe.
Cast· 90,000 TS, 40,000 YS; 200 Brin.
For valves and heat resisting castings; corrosion and heat resistant.

ISOCAST CC-50
M-162; 0 5 max C, 26-30 Cr, 4 max Ni, bal Fe.
Cast: 60,000 TS; 190 Brin.
For ore roasting equipment, stainless.

ISO-CAST CE-30.
M-162; 0.3 C, 8-11 Ni, 26-30 Cr, bal Fe.
Cast· 90,000 TS; 55,000 YS; 25 El; 25 RA; 200 Brin.
For corrosion and heat resisting castings; corrosion and heat resistant.

ISOCAST CF3.
M-162; 0.03 max C, 18-21 Cr, 9-12 Ni, bal Fe.
Annealed: 75,000 TS; 36,000 YS; 45 El; 140 Brin.
For chemical plant equipment, food processing equipment; Type 304L; stainless, austenitic.

ISOCAST CF3M.
M-162; 0.03 max C, 18-21 Cr, 10-13 Ni, 2-3 Mo, bal Fe.
Annealed· 78,000 TS, 40,000 YS; 44 El, 150 Brin.
For acid resistant chemical plant castings; Type 316L; stainless, austenitic.

ISO-CAST CF-8.
M-162; 0.08 C, 8-11 Ni, 18-21 Cr, bal Fe.
Annealed: 75,000 TS; 40,000 YS, 45 RA; 140 Brin.
For stainless castings, pumps, valves, processing equipment, stainless, austenitic.

ISOCAST CF-8C.
M-162, 0 08 max C, 18-21 Cr, 9-12 Ni, 1 0 max Cb, bal Fe.
Cast 80,000 TS, 44,000 YS; 40 El, 160 Brin.
For dairy and chemical plant equipment, valves, tanks, Type 347; stainless, austenitic

ISO-CAST CF-8M.
M-162; 0.08 C, 9-12 Ni, 18-21 Cr, 2-3 Mo, bal Fe,
Annealed 80,000 TS, 40,000 YS; 50 El, 156 Brin
For stainless castings, valves, pumps, stainless, austenitic

ISOCAST CF-16F.
M-162; 0 08 max C, 18-21 Cr, 9-12 Ni, $Cb = 8 \times C$, bal Fe
Cast. 80,000 TS, 44,000 YS, 40 El, 156 Brin.
For stainless and heat resistant parts, stainless and heat resistant; welding grade

ISOCAST CF16FA.
M-162, 0 16 max C, 18-21 Cr, 9 12 Ni, 0.20-0 35 Se or 0 2-0.4 S, bal Fe
Annealed 75,000 TS, 35,000 YS; 40 El, 160 Brin.
For chemical plant equipment; free-cutting, stainless, austenitic

ISOCAST CF-20.
M-162, 0 20 max C, 20 Cr, 8-11 Ni, bal Fe
Cast· 80,000 TS, 40,000 YS, 45 El, 160 Brin.
For valves, pumps; austenitic, corrosion resistant.

ISOCAST CF30
M-162, 0 30 max C, 17-20 Cr, 8-11 Ni, bal Fe.
Annealed 80,000 TS, 40,000 YS; 40 El; 160 Brin.
For chemical plant equipment; stainless, austenitic

ISO-CAST CG-8M.
M-162, 0 08 max C, 10-14 Ni, 18-21 Cr, 3-4 Mo, bal Fe
Cast 80,000 TS, 44,000 YS; 33 El; 165 Brin.
For paper and textile equipment, bleaching equipment; Type 317; stainless, austenitic.

ISOCAST CG-12
M-162, 0 12 max C, 20-23 Cr, 10-13 Ni, bal Fe
Cast 80,000 TS, 40,000 YS, 40 El, 156 Brin
For paper and textile processing equipment; stainless

ISOCAST CH-20.
M-162; 0 20 max C, 24-26 Cr, 12-15 Ni, bal Fe.
Cast· 85,000 TS; 50,000 YS; 30 El; 170 Brin.
For paper and pulp and chemical plant equipment; Type 309; stainless, austenitic

ISOCAST CK-20
M-162; 0.20 max C, 23-27 Cr, 19-22 Ni, bal Fe.
Cast 75,000 TS; 45,000 YS; 30 El; 190 Brin.
For paper and pulp and chemical plant equipment; Type 310; stainless, austenitic.

ISOCAST HC.
M-162; 0.5 max C, 26-30 Cr, 4 max Ni, bal Fe.
Cast: 60,000 TS; 200 Brin
For ore roasting equipment; austenitic, heat resistant.

ISOCAST HE.
M-162; 0.20-0.50 C, 26-30 Cr, 8-11 Ni, bal Fe.
Cast. 90,000 TS; 55,000 YS; 20 El; 200 Brin
For oil still parts; austenitic, corrosion and heat resistant.

ISOCAST HF.
M-162; 0.2-0.4 C, 18-23 Cr, 8-12 Ni, bal Fe
Cast: 85,000 TS; 40,000 YS; 45 El, 160 Brin.
At 1400°F. 37,200 TS; 19,750 YS; 20 El
For valves, pumps, chemical plant equipment; corrosion resistant, austenitic.

ISO-CAST HH
M-162; 0.25-0.50 C, 24-28 Cr, 11-14 Ni, bal Fe.
Cast: 85,000 TS, 50,000 YS; 35 El; 170 Brin.
For corrosion and heat resisting castings, furnace parts; corrosion and heat resistant.

ISO-CAST HK.
M-162, 0.20-0.60 C, 18-22 Ni, 24-28 Cr, bal Fe.
Cast: 80,000 TS, 45,000 YS; 25 El; 190 Brin
For corrosion and heat resisting castings, furnace parts, corrosion and heat resistant, austenitic.

ISO-CAST HT.
M-162; 0.35-0.75 C, 33-37 Ni, 13-17 Cr, bal Fe.
Cast: 75,000 TS; 7 El; 180 Brin.
For corrosion and heat resisting castings, furnace parts; corrosion and heat resistant.

ISO-CAST HW.
M-162, 0.35-0.75 C, 58-62 Ni, 10-14 Cr, bal Fe.
Cast: 65,000 TS; 180 Brin
At 1800°F: 10,000 TS, 8000 YS; 40 El.
For furnace equipment, retorts, pots; heat and corrosion resistant

ISO-CAST M
M-162; 0.1-0.2 C, 0.6-0.8 Mn, bal Fe.
Annealed: 55,000 TS; 30,000 YS; 35 El; 55 RA; 120 Brin.
For castings, instrument parts.

ISOCAST N.
M-162; 97 Ni, bal Fe, Mn, Si.
Cast: 50,000 TS, 25,000 YS; 20 El; 100 Brin.
For caustic soda equipment; corrosion resistant.

ISOCAST WC1.
M-162, 0.20-0.30 C, 0.5-0.75 Mn, bal Fe
Heat treated 95,000 TS, 60,000 YS, 22 El; 35 RA, 210 Brin.
For valve bodies; castings.

ISOCAST WC9.
M-162; C, Ni, Cr, Mo, bal Fe
For general engineering castings; oil hardened, tough.

ISODISC-1.
M-27, M-1618; 0.35 C, 5 Cr, 1 V, 1 Mo, bal Fe.
Ht. Tr.: 276,000 TS; 224,000 YS; 8 El; C 54 Rock.
For extrusion and forging dies.
Modified Type H13 tool steel. Hot work steel, shock resistant.

ISODISC-2.
M-27, M-1618; 0.35 C, 1.0 Si, 0.4 Mn, 5.0 Cr, 1.3 W, 1.4 Mo, 0.35 V, bal Fe.
Forged: 224,000 TS; 207,800 YP; 8.4 El; 30 RA.
For aluminum and brass extrusion dies and press components, forging dies, mandrels, punches, rivet sets. Type H12 hot work steel.

ISODISC-4.
M-27, M-1618; 0.33 C, 0.5 V, 3 Cr, 3 Mo, bal Fe.
For extrusion and forging dies, rams, upsetters.
Similar to Bohler WMD alloy.
Hot work tool steel, shock resistant.

ISO-ELASTIC.
M-520, 36 Ni, 8 Cr, 4 Mn-Si-V, 0.5 Mo, bal Fe.
Heat treated: 160,000 TS; 140,000 YS; 4 El; 40 RA.
For springs, precision springs; similar to "Elinvar."

ISOLOY 302
M-98, 0.15 max C, 18 Cr, 8 Ni, bal Fe.
Cold drawn: 250,000-350,000 TS.
For springs, wire rope; stainless, austenitic, non-magnetic

ISOLOY 304
M-98, 0.08 max C, 18 Cr, 10 Ni, bal Fe.
Cold drawn: 250,000-350,000 TS.
For springs, wire rope; stainless, austenitic, non-magnetic

ISOLOY 316
M-98, 0.08 max C, 17 Cr, 12 Ni, 2 Mo, bal Fe.
Cold drawn 200,000-250,000 TS
For springs, wire rope; stainless, austenitic, non-magnetic.

ISOPERM-1.
M-621; 40-55 Ni, bal Fe
For magnets; high permeability.

ISOPERM 2.
M-621, 35-50 Ni, 9-15 Cu, bal Fe.
For magnets, high permeability.

ISOPERM 3.
M-621, 40-60 Ni, 3-4 Al, bal Fe.
For magnets; high permeability.

ISOROD.
M-507; 0.2 C, 0.5 Si, 0.2 Mn, 15.0 Cr, 8.0 Mo, 1.0 Ti, bal Fe
Coated, hardfacing electrode.
As arc welded. 185,000 psi, 520-580 BHN.
For overlay or build up on tractor sprockets, shovel teeth, dredge pump impellers, heavy hammers, strong and tough

ISOTAN.
M-789; 55 Cu, 44 Ni.
Annealed. 65,000-72,000 TS.
Hard: 107,000-121,000 TS
Temp coef. resistance per °C (−0.00008 to + 0.00004).
For electrical equipment and instruments.
Resistance alloy. Max working temperature 600°C.

ISTEG STEEL
M-471, C, bal Fe.
For reinforcing steel; mild steel, pre-stressed

ITALSIL.
Italy; 5 Si, bal Al.
For light alloy parts; die and sand castings.

I.W. 1
M-772; 0.5 C, 1.5 Cr, 2.2 W, 0.2 V, bal Fe.
For tools, dies; hot work steel.

I.W. 2.
M-772; 0.6 C, 9.5 W, 2.5 Cr, 0.1 V, bal Fe.
For hot work tools and dies; hot work steel.

IWI see DARWIN IWI.

"IX" QUALITY.
M-179; Cu, Mn, Pb, bal Zn.
Extruded: 72,000 TS, 35,000 YS; 26 El; 20 RA; 130 Brin.
Drawn: 80,000 TS; 38,000 YS; 25 El; 18 RA; 135 Brin.
For hardware; manganese bronze.

IZETT STEEL NO. 1.
M-72; 0.125 C, 0.56 Mn, 0.018 P, 0.15 S, 0.10 Si, bal Fe.
At 20°C: 62,600 TS; 39,000 YS; 43 El; 68 RA.
At 400°C: 50,300 TS; 22,000 YS; 39 El; 70 RA.
For boilers; tough, Al deoxidized; non-aging.

IZETT STEEL NO. 2.
M-72; 0 15 C, 0.54 Mn, 0.025 P, 0.039 S, 0.06 Si, 10.06 Al, bal Fe.
At 20°C: 91,800 TS; 44,500 YS.
At 400°C: 68,000 TS; 23,000 YS.
For boilers; tough, Al deoxidized; non-aging.

IZETT STEEL NO. 3.
M-72; 0.355 C, 0.49 Mn, 0.024 P, 0.024 S, 0.10 Si, bal Fe.
At 20°C: 98,500 TS; 51,000 YS.
At 400°C: 77,000 TS; 29,000 YS.
For boilers; tough, Al deoxidized; non-aging.

IZETT STEEL NO. 4.
M-72; 0 34 C, 0.48 Mn, 0.025 P, 0.025 S, 0.11 Si, bal Fe.
At 20°C· 105,000 TS; 54,000 YS.
At 400°C. 81,000 TS, 30,000 YS.
For boilers, tough, Al deoxidizing; non-aging.

J-4 CHISEL.
M-261, M-486; 0.44 C, 1.3 Cr, 2.3 W, 0.15 V, bal Fe.
For chisels, shear blades, punches; shock resistant.

J-4 CHISEL.
M-694; 0.44 C, 0.25 Mn, 0.7 Si, 1.3 Cr, 2.3 W, 0 15 V, bal Fe
For dies, hot work steel

J.A C -ACM.
M-1179; C, 28 Cr, Mo, bal Fe.
Normalized. 100,000 TS.
For glass, chemical and dying industries; acid resistant.

J.A C.-ACN 1
M-1179; C, 18 Cr, 8 Ni, bal Fe.
Normalized· 100,000-120,000 TS; 50,000-60,000 YS, 25 El.
For food, chemical, petroleum industries; stainless

J.A.C -ACN 2
M-1179, C, 26 Cr, 10 Ni, bal Fe.
Heat treated: 110,000-120,000 TS; 50,000-60,000 YS; 18 El.
For furnace parts, grates; heat resistant.

J.A.C.-ACN 3.
M-1179; C, Cr, Ni, Mo, bal Fe
Heat treated: 110,000-130,000 TS; 50,000-70,000 YS; 18 El.
For furnace parts, grates; heat resistant, scale resistant.

J.A C -ACR.
M-1179; C, 30 Cr, bal Fe.
Heat treated: 84,000-100,000 TS
For furnace parts; scale and heat resistant.

J.A C.-AMH.
M-1179; C, 12-14 Mn, bal Fe.
Heat treated: 180,000 TS; 80,000 YS; 35 El; 40 RA.
For crusher plates, hammers, harrowers, mixers; wear resistant.

J.A.C.-AMH 2.
M-1179; C, 12-14 Mn, Cr, bal Fe.
Heat treated: 180,000-200,000 TS.
For crusher plates, hammers, harrowers, mixers; wear and abrasion resistant.

J.A.C.-ARF.
M-1179; C, Ni, Cr, Mo, bal Fe.
Heat treated: 160,000-180,000 TS; 120,000-140,000 YS; 12 El; 25 RA.
For crusher plates, hammers, harrowers, mixers; easily machined and welded.

J.A.C.-B 1.
M-1179; C, bal Fe.
Annealed: 80,000 TS; 50,000 YS; 18 El; 35 RA.
For general usage; Bessemer steel.

J.A.C.-B 1 S.
M-1179; C, bal Fe.
Annealed: 80,000 TS; 50,000 YS; 22 El; 40 RA.
For general usage; Bessemer steel.

J.A.C.-B 2.
M-1179; C, bal Fe.
Annealed: 90,000 TS; 60,000 YS; 16 El; 30 RA.
For general usage; Bessemer steel.

J.A.C.-B 2 S.
M-1179; C, bal Fe.
Annealed: 90,000 TS; 60,000 YS; 20 El; 35 RA.
For general usage; Bessemer steel.

J.A.C.-B 3.
M-1179; C, bal Fe.
Annealed. 110,000 TS; 66,000 YS; 12 El; 25 RA.
For general usage; Bessemer steel.

J.A.C.-E 1.
M-1179, C, 0 03 P, 0.3 S, bal Fe.
Normalized: 76,000 TS; 48,000 YS; 25 El; 50 RA.
For motor frames, rotors, dynamo parts; high magnetic permeability.

J.A.C.-E 2.
M-1179; C, bal Fe.
Normalized: 80,000 TS; 52,000 YS; 22 El; 45 RA.
For wheels, gears, axles; high yield strength.

J.A C -E 3.
M-1179; C, bal Fe.
Normalized: 90,000 TS; 60,000 YS; 20 El; 35 RA.
For bridge bearings, rudder frames, gears, naval construction.

J A C.-E 4.
M-1179, C, bal Fe.
Normalized: 100,000 TS; 64,000 YS, 20 El; 35 RA.
For machine tool parts, bridge gear boxes.

J.A C -E 5.
M-1179; C, bal Fe.
Normalized: 110,000 TS; 72,000 YS; 17 El; 32 RA.
For gears, axles, couplings, water hardening.

J.A C.-E 6.
M-1179; C, bal Fe.
Normalized: 120,000 TS; 80,000 YS; 15 El; 25 RA.
For pinions, block dies, gears; wear resistant.

J.A.C.-EA 1.
M-1179, C, Cr, Mn, bal Fe.
Normalized: 120,000-160,000 TS; 80,000-110,000 YS; 15-7 El.
For gears, excavator parts, tractors, cranes, dies; tough, wear resistant.

J.A C.-EA 2.
M-1179; C, Ni, bal Fe.
Normalized: 120,000 TS; 96,000 YS; 14 El.
For drills, pinions, roller mill cylinders, brake drums; wear and shock resistant.

J.A.C -EA 3.
M-1179; C, Cr, Ni, bal Fe.
Normalized: 150,000 TS; 120,000 YS; 12 El.
For drills, pinions, roller mill cylinders; wear and shock resistant.

J.A.C.-EA 4.
M-1179; C, Cr, Ni, Mo, bal Fe.
Normalized: 160,000-180,000 TS; 110,000-150,000 YS; 10 El.
For rollers, gears, valves; heat resistant to 500°F.

J.A.C.-EA 5.
M-1179; C, Cr, Mo, bal Fe.
Normalized: 130,000-150,000 TS; 90,000-100,000 YS; 10 El.
For rollers, gears, valves; shock and wear resistant.

J.A.C.-EA 6.
M-1179; C, Cr, Mo, bal Fe.
Normalized: 100,000-120,000 TS; 80,000-90,000 YS; 15 El.
For valves, collectors, piping; maximum operating temp. 550°F.

JACKMANIZED STEEL.
M-477; 0.5 C, bal Fe.
For dredger bucket pins, bushes, tin rolls.

JACKSBERG.
M-477; 0.7 C, 18 W, 4 Cr, 1 V, bal Fe.
For high speed tools and cutters; high speed steel.

JACKSONS BUTTON ALLOY.
England; 30-35 Zn, 2-5 Sb, bal Cu.
For ornamental and architectural parts; high strength.

JACOBY METAL.
Eng., 85 Sn, 10 Sb, 5 Cu.
For bearings; liners; Babbitt.

JACOL 1886.
M-1546; 0.08 C, 1.4 Cr, 1 1 Mo, 0 6 V, bal Fe.
Heat treated: 107,000 TS; 93,000 YS; 15% El.
For gas turbine and steam turbine rotors and discs.
Holds properties up to 600°C.
Resists oxidation up to 550°C.

JACOL-CVM6.
M-1546, 0 17 C, 5.5 Cr, 0.55 Mo, 0 25 V, bal Fe.
Annealed· 64,000 TS; 40,000 YS; 32% El.
Heat treated: 107,000 TS; 88,000 YS; 17% El.
For piping equipment in oil refineries.
Resistant to oxidation to 750°C.

JACONA METAL.
Eng.; 70 Pb, 20 Sb, 10 Sn
For bearings, liners, Babbitt.

JADE.
M-1120; 1.0 C, bal Fe.
For reamers, taps, punches, cold work tools; Type W1, water hardened.

JADOT J1.
M-1297; 0.08 max C, 13 Cr, bal Fe
Annealed: 75,000 TS; 40,000 YS, 35 El; 70 RA; 155 Brin
For valves, cutlery, surgical instruments; Type 403; corrosion resistant.

JADOT J1.
M-1297; 0.15 max C, 11.5-13.5 Cr, bal Fe.
Heat treated: 120,000-135,000 TS; 110,000-117,000 YS; 16-15 El; 63-58 RA; 220-240 Brin.
For cutlery, valves, turbine blades, fasteners; Type 410; corrosion resistant.

JADOT J2.
M-1297; 0.26-0.43 C, 13 Cr, bal Fe.
Annealed: 95,000 TS; 50,000 YS; 25 El; 55 RA; 196 Brin.
For valves, cutlery, surgical and dental instruments; Type 420; corrosion resistant.

JADOT JA.
M-1297; 0.08-0.20 C, 17-19 Cr, 8-10 Ni, 2 max Mn, bal Fe.
Annealed: 85,000 TS; 35,000 YS; 60 El; 70 RA; 150 Brin.
Cold drawn: 125,000 TS; 95,000 YS; 25 El; 55 RA; 277 Brin.
For oil refinery and chemical plant equipment; Type 302; stainless, austenitic.

JADOT JA1.
M-1296; 0.10 max C, 16-18 Cr, 10-14 Ni, 2-3 Mo, bal Fe.
Annealed: 85,000-95,000 TS; 35,000-45,000 YS; 60-50 El, 75-60 RA; 150-190 Brin.
For chemical plant equipment, mixers, agitators, filters; Type 316; austenitic, stainless.

JADOT JA2.
M-1297; 0 10 C, 18 Cr, 10 Ni, 2.5 Mo, bal Fe.
Annealed: 85,000 TS; 35,000 YS; 50 El; 65 RA; 160 Brin.
For acid resistant chemical plant equipment, mixers; Type 316; stainless, austenitic.

JADOT JA2E
M-1297; 0 10 C, 19 Cr, 12 Ni, 3 5 Mo, bal Fe.
Annealed· 90,000 TS, 40,000 YS, 45 El; 60 RA; 180 Brin
For acid resistant chemical plant equipment; mixers; Type 317; stainless, austenitic.

JADOT JAA.
M-1297; 0 07 C, 17 Cr, 13 Ni, 4.5 Mo, bal Fe.
Annealed· 90,000 TS; 40,000 YS; 45 El; 60 RA; 180 Brin
For acid resistant chemical plant equipment, mixers; Type 317; stainless, austenitic.

JADOT JAS.
M-1297, 0 12 C, 18 Cr, 8 Ni, bal Fe.
Annealed· 85,000 TS; 35,000 YS; 60 El; 70 RA, 150 Brin
For chemical plant equipment, tanks, mixers, filters; Type 304, stainless, austenitic.

JADOT JD.
M-1297; 0.25 max C, 15 Cr, 35 Ni, bal Fe.
For furnace parts and equipment, salt pots; Type 330, heat resistant.

JADOT JH.
M-1297, 0 12 max C, 14-18 Cr, bal Fe.
Annealed· 70,000 TS, 40,000 YS; 30 El; 55 RA; 150 Brin
Cold drawn: 130,000 TS; 120,000 YS; 2 El; 185 Brin
For oil refinery equipment, bolts, kitchen sinks; Type 430, stainless, ferritic.

JADOT JH1.
M-1297, 0 2 max C, 24-26 Cr, 1 max Si, bal Fe.
Annealed: 75,000-85,000 TS; 50,000-60,000 YS; 12 El; 180 Brin.
For furnace parts, heat treating boxes; Type 442; corrosion and heat resistant.

JADOT JH1A.
M-1297; 0.35 C, 23-27 Cr, 0.25 max N, bal Fe.
Annealed 90,000 TS, 60,000 YS; 20 El; 45 RA; 180 Brin.
Cold drawn: 175,000 TS; 155,000 YS; 2 El; 25 RA; 250 Brin
For furnace parts, preheaters, annealing boxes; Type 446; corrosion resistant.

JADOT JH2.
M-1297; 0.2 max C, 22-24 Cr, 12-15 Ni, 2 max Mn, 3.5 max Si, bal Fe.
Annealed· 85,000-95,000 TS; 40,000-50,000 YS; 45-55 El; 150-185 Brin.

For heat treat boxes, furnace parts and equipment; Type 309; austenitic, heat resistant.

JADOT JH3.
M-1297; 0.25 max C, 24-26 Cr, 19-22 Ni, bal Fe.
Annealed: 95,000 TS; 45,000 YS; 50 El; 65 RA; 180 Brin.
At 1200°F: 57,000 TS; 22,000 YS; 32 El; 45 RA.
For furnace parts, valves, pumps, engine parts, Type 310; heat resistant, austenitic.

JADOT JH3AS.
M-1297; 0.12 C, 20 Cr, 20 Ni, bal Fe.
For furnace parts, salt pots; corrosion and heat resistant.

JADOT JH4.
M-1297; 0.25 max C, 24-26 Cr, 19-22 Ni, bal Fe.
Annealed: 95,000 TS; 45,000 YS; 50 El; 65 RA; 180 Brin.
At 1200°F. 57,000 TS; 22,000 YS; 32 El; 45 RA.
For furnace parts, valves, pumps, engine components; Type 310; austenitic, heat resistant.

JADOT JH6.
M-1297; 0.10 max C, 18-20 Cr, 11-14 Ni, 3-4 Mo, bal Fe.
Annealed· 85,000-95,000 TS; 35,000-45,000 YS; 60-50 El, 75-60 RA; 150-190 Brin.
For acid resistant chemical plant equipment; Type 317, stainless, austenitic.

JAE METAL.
M-121, 70 Ni, 30 Cu.
Annealed: 63,000 TS; 22,000 YS; 52 El, 81 RA; 110 Brin
For compensating shunts on magnetic instruments, high reg temp coef. of magnetic permeability.

JALCASE 1.
M-173; 0.10-0.16 C, 1.0-1.3 Mn, bal Fe, 0.24-0.33 S
Water hardened 138,000 TS, 100,000 YS; 10 El; 30 RA, 315 Brin.
Cold rolled 65,000 TS; 55,000 YS, 17 El; 45 RA, 137 Brin
For case-hardened parts, screw stock; free cutting C-1113.

JALCASE 2
M-173, 0.10-0.16 C, 1.0-1.3 Mn, bal Fe. 0.08-0.13 S
Water hardened: 150,000 TS, 135,000 YS; 12 El, 50 RA, 325 Brin
Cold rolled 65,000 TS; 55,000 YS, 17 El; 45 RA, 137 Brin.
For general use, shafts, gears, free cutting C-1114

JALCASE 3
M 173; 0.14-0.20 C, 1.10-1.4 Mn, bal Fe, 0.16-0.23 S
Water hardened 190,000 TS, 167,000 YS, 10 El; 38 RA, 375 Brin.
Cold rolled· 70,000 TS; 60,000 YS; 15 El, 35 RA; 143 Brin
For general use, shafts, gears, free cutting C-1116.

JALCASE 4
M-173, 0.14-0.20 C, 1.0-1.3 Mn, bal Fe, 0.08-0.13 S.
Oil hardened: 150,000 TS; 128,000 YS; 12 El; 36 RA; 310 Brin
Cold rolled: 70,000 TS, 60,000 YS; 15 El, 35 RA; 143 Brin.
For general use, shafts, gears; free cutting C-1117.

JALCASE 5.
M-173; 0.14-0.20 C, 1.30-1.60 Mn, bal Fe, 0.08-0.13 S.
Oil hardened: 166,000 TS; 138,000 YS; 10 El; 39 RA; 380 Brin.
Cold rolled: 70,000 TS; 60,000 YS; 15 El; 35 RA; 149 Brin.
For general use, shafts, gears; free cutting C-1118.

JALCASE 6.
M-173; 0.14-0.20 C, 1.0-1.3 Mn, 0.20-0.33 S, bal Fe,
Cold rolled: 70,000 TS; 60,000 YS; 15 El; 35 RA; 143-192 Brin.
For gears, shafts, cams, camshafts; C-1119; free-cutting.

JALCASE 7.
M-173; 0.32-0.39 C, 1.35-1.65 Mn, 0.08-0.13 S, bal Fe
Cold rolled: 90,000 TS; 75,000 YS; 10 El; 35 RA, 192-241 Brin.
For gears, shafts; C-1137, free-cutting.

JALCASE 8
M-173; 0.37-0.45 C, 1.35-1.65 Mn, 0.08-0.13 S, bal Fe.
Cold rolled. 95,000 TS; 80,000 YS; 10 El; 28 RA; 197-248 Brin.
For gears, shafts; C-1141; free-cutting.

JALCASE 9.
M-173; 0.40-0.48 C, 1.35-1.65 Mn, 0.24-0.33 S, bal Fe
Cold rolled· 100,000 TS; 85,000 YS; 8 El; 25 RA, 207-255 Brin.
For gears, shafts; C-1144, free-cutting.

JALCASE 10
M-173, 0.40-0.48 C, 1.35-1.65 Mn, 0.24-0.33 S, bal Fe
Cold rolled 115,000 TS; 100,000 YS; 7 El; 20 RA, 235-285 Brin
For gears, shafts; C-1144, free-cutting.

JALCASE 100
M-173, 0.40-0.48 C, 1.35-1.65 Mn, 0.24-0.33 S, bal Fe.
Cold drawn 115,000 TS, 100,000 YS, 10-20 El, 30-50 RA, 241 Brin
For screw machine products, gears, bolts; free-cutting, stress stabilized.

JALCOLD
M-173, 0.2 C, bal Fe
For welding rods

J-ALLOY
0.76 C, 23 Cr, 6 Ni, 6 Mo, 2 Ta, bal Co
For jet engine and gas turbine parts; high heat resistant

JALLOY-1.
M-173; 0.13-0.18 C, 1.0-1.3 Mn, 0.1-0.2 Mo, bal Fe.
Hot rolled 85,000 TS; 57,000 YS; 30 El, 63 RA, 179 Brin.
Cold drawn 98,500 TS; 98,000 YS, 17.5 El, 65 RA.
For tank armor, mine equipment; shock resistant

JALLOY 3
M-173, 0.25-0.31 C, 1.35-1.65 Mn, 0.10-0.20 Mo, bal Fe
Rolled 102,000 TS; 80,000 YS, 21 El; 51 RA, 241 Brin
Hardened· 150,000 TS, 140,000 YS, 14 El; 55 RA; 364 Brin
For mining equipment, buckets; tough.

JALLOY 7.
M-173, 0.5-0.6 C, 1.35-1.65 Mn, 0.10-0.20 Mo, bal Fe
Rolled· 134,000 TS; 100,000 YS; 15 El; 31 RA; 269 Brin.
For mining equipment, buckets; tough.

JALLOY 280.
M-173; 0.25-0.31 C, 1.35-1.65 Mn, 0.1-0.2 Mo, 0.2 min Cu, Al, B, Ti, bal Fe.
Heat treated: 115,000 TS; 100,000 YS; 15 El; 260-300 Brin.
For liners, power shovels, mining equipment, fan blades; resists impact and abrasion.

JALLOY 320.
M-173; 0.25-0.31 C, 1.35-1.65 Mn, 0.1-0.2 Mo, 0.2 min Cu, Al, B, Ti, bal Fe.
Heat treated: 300-340 Brin.
For liners, power shovels, mining equipment, fan blades, stone crushers;
resists impact and abrasion.

JALLOY AR-360.
M-173; 0.25-0.31 C, 1.35-1.65 Mn, 0.10-0.20 Mo, 0.20 min Cu, bal Fe.
Heat treated: 164,000 TS; 157,000 YS; 14 El; 50 RA; 360 Brin.
For mining, transportation and construction equipment; pre heat treated to 340-380 Brinell.

JALLOY AR-400.
M-173; 0.25-0.31 C, 1.35-1.65 Mn, 0.10-0.20 Mo, 0.20 min Cu, bal Fe.
Heat treated: 190,000 TS; 184,000 YS; 13 El; 45 RA; 420 Brin.
For mining, transportation and construction equipment; pre heat treated to
400 Brinell minimum.

JALLOY-S-90.
M-173; 0.10-0.20 C, 1.1-1.5 Mn, 0.15-0.30 Si, 0.20-0.30 Mo, bal Fe.
Plate: 101,000 TS; 92,700 YS; 20 El; 61.5 RA; 241 Brin.
For missiles, hoists, construction and ordnance machinery, cranes, trucks;
preheat treated to 9000 psi yield strength.

JALLOY-S-100.
M-173; 0.10-0.20 C, 1.1-1.5 Mn, 0.15-0.30 Si, 0.20-0.30 Mo, bal Fe.
Plate: 115,000 TS; 107,000 YS; 18.5 El; 60 RA; 255 Brin.
For missiles, hoists, construction and ordnance machinery, cranes, trucks;
preheat treated to 100,000 psi yield strength.

JALLOY-S-110.
M-173; 0.10-0.20 C, 1.1-1.5 Mn, 0.20-0.30 Mo, bal Fe.
Plate: 122,000 TS; 114,000 YS; 17 El; 60 RA; 269 Brin.
For missiles, hoists, construction and ordnance machinery, cranes, trucks;
preheat treated to 110,000 psi yield strength.

JALLOY S-340.
M-173; 0.10-0.20 C, 1.1-1.5 Mn, 0.2-0.3 Mo, 0.0005 min B, bal Fe.
Plate: 156,000 TS; 149,000 YS; 16 El; 53 RA; 320-360 Brin.
For mine cars, railroad equipment, agricultural and earth moving equipment.
Abrasion resistant, good weldability.

JALTEN NO. 1.
M-173; 0.15 max C, 1.3 max Mn, 0.30 min Cu, 0.035-0.065 V, bal Fe.
Rolled: 65,000 TS; 50,000 YS; 22 El.
For structural parts, truck bodies, mine cars; good formability and weldability.

JALTEN NO. 2.
M-173; 0.15 max C, 1.4 max Mn, 0.14 max P, 0.30 min Cu, bal Fe.
Hot rolled: 70,000 TS; 50,000 YS; 22 El.
For structural parts, truck bodies, railroad cars; good formability and weldability.

JALTEN NO. 3.
M-173; 0.25 max C, 1.6 max Mn, 0.20 min Cu, bal Fe.
Hot rolled: 70,000 TS; 50,000 YS; 22 El.
For construction equipment, truck bodies; moderate formability.

JALWELD.
M-173; 0.15 C, bal Fe.
For welding rods.

JAMAG.
M-1640; 2.2 C, 1.6 Si, 0.3 Mn, 0.1 Mg, bal Fe.
Heat treated: 50,000-110,000 YS.
For electrical parts, where
high rotation speeds are involved.
High magnetic permeability, malleable iron.

JAMALEX.
M-1640; 2.2 C, 1.6 Si, 0.3 Mn, 0.05 Mg, bal Fe.
Heat treated: 65,000-140,000 TS; 50,000-110,000 YS; 2-9 El.
For gears, sprockets, hubs, cams, bearings, wear resistant parts.
Malleable iron, high magnetic permeability.

JAMAPPES BRASS.
England; 0.2 Sn, 1.4 Pb, 33.4 Zn, bal Cu.
For hardware, fittings, forgings; good workability, free-cutting.

JAMISON HOBBING IRON.
M-1423; 0.05 C, bal Fe.
For plastic molding hobs.

JAMISON K46.
M-1423; 0.85 C, 1.2 Mn, 1.5 Cr, 0.5 W, 0.1 V, bal Fe.
For blanking and forming dies, reamers, punches; oil hardened, non-deforming.

JAMISON K-46 O H.
M-1423; 0.90 C, 1 Mn, 0.5 Cr, 0.5 W, bal Fe.
For reamers, broaches, punches, cutters, Type 01; oil hardened, non-deforming.

JAMISON SPECIAL.
M-1423; 0.7-1.4 C, 0.3 Mn, 0.3 Si, bal Fe.
For drills, reamers, hobs, planer tools, springs; Type W1; water hardened.

JANO.
M-344; C, 4 Cr, 2 V, 19 W, 0 6 Mo, bal Fe.
For tools, cutters; high speed steel.

JANUS.
M-344; C, bal Fe.
For cold dies; very tough.

JANUS EXTRA ZH.
M-614; 1.0-1.1 C, 0.25 max Mn, 0.25 max Si, bal Fe
For drills, taps, reamers, broaches, hobs; Type W1; water hardened.

JANUS GHC17M.
M-614; 0.35 C, 17 Cr, 2 Mo, bal Fe.
For acid-resistant chemical plant equipment; corrosion resistant.

JANUS GR15.
M-614; 0.15 max C, 0.75 Si, 13 Cr, 1.8 max Ni, bal Fe.
Annealed: 75,000 TS; 40,000 YS; 35 El; 70 RA; 150 Brin.
Cold drawn: 100,000 TS; 85,000 YS; 17 El; 60 RA; 205 Brin.
For tableware, hardware, turbine blades; Type 410; corrosion resistant.

JANUS GR18.
M-614; 0.25 max C, 0.7 Si, 17 Cr, 1.8 max Ni, bal Fe.
For furnace parts, chemical plant equipment; corrosion resistant.

JANUS GR25.
M-614; 0.25 C. 0.7 Si, 14.5 Cr, 1.8 max Ni, bal Fe.
Annealed: 95,000 TS; 50,000 YS; 25 El; 55 RA; 195 Brin.
Cold drawn: 105,000 TS; 85,000 YS; 17 El; 50 RA; 215 Brin.
For cutlery, turbine blades, surgical instruments; Type 420; corrosion resistant

JANUS GSA.
M-614; 0.15 C, 1.5 Si, 18 Cr, 8.5 Ni, bal Fe.
Annealed: 85,000 TS; 40,000 YS; 55 El; 65 RA; 160 Brin.
For chemical plant equipment, tanks, mixers, vessels; Type 302; stainless, austenitic.

JANUS GSAT.
M-614; 0.12 max C, 18 Cr, 9.5 Ni, Co = 8 × C, bal Fe.
Annealed· 90,000 TS, 45,000 YS; 45 El, 60 RA; 170 Brin.
For chemical plant equipment, welded structures; Type 346; stainless, austenitic.

JANUS GSAW
M-614; 0 07 max C, 18 Cr, 9.5 Ni, bal Fe
Annealed: 85,000 TS; 40,000 YS; 55 El; 65 RA, 160 Brin.
For chemical plant equipment, welded structures; Type 304, stainless, austenitic.

JANUS GSB.
M-614, 0.15 C, 2 Si, 18 Cr, 9 5 Ni, 2 Mo, bal Fe.
Annealed· 90,000 TS; 45,000 YS; 50 El; 60 RA; 180 Brin
For acid-resistant chemical plant equipment; Type 316, stainless, austenitic.

JANUS GSBT.
M-614; 0 12 max C, 18 Cr, 10.5 Ni, 2 Mo, Cb = 10 × C, bal Fe.
Annealed· 85,000 TS; 40,000 YS, 50 El; 60 RA; 180 Brin
For acid resistant, welded structures, mixers, filters; Type 316 Cb; stainless, austenitic.

JANUS GSBW
M-614, 0.07 max C, 18 Cr, 10.5 Ni, 2 Mo, bal Fe.
Annealed. 80,000 TS; 35,000 YS; 55 El, 65 RA; 160 Brin
For chemical plant equipment, mixers, agitators, filters; Type 316L; stainless, austenitic

JANUS HC17M.
M-614; 0 35 C, 17 Cr, 2 Mo, bal Fe.
For acid-resistant chemical plant equipment; corrosion resistant

JANUSIT-A.
M-614; 0.4 C, 1.3 Si, 27 Cr, 4 Ni, bal Fe
For furnace parts and equipment, heat treating boxes; heat resistant.

JANUSIT-B.
M-614; 0 4 C, 2 Si, 22 Cr, 9 5 Ni, bal Fe.
For furnace parts, heat treating boxes; corrosion and heat resistant.

JANUSIT-C.
M-614; 0.4 C, 2 Si, 26 Cr, 14 Ni, bal Fe.
For furnace parts and equipment, heat treating boxes; corrosion and heat resistant, austenitic.

JANUSIT-D.
M-614; 0.4 C, 2 Si, 25 Cr, 19 Ni, bal Fe.
For furnace parts and equipment, heat treating boxes; corrosion and heat resistant, austenitic.

JANUSIT-E.
M-614; 0.5 C, 1.8 Si, 25 Cr, 30 Ni, bal Fe.
For furnace parts and equipment, heat treating boxes; corrosion and heat resistant, austenitic.

JANUS MH.
M-614; 1.0 C, 0.25 max Si, 0.25 max Mn, bal Fe.
For drills, hobs, reamers, taps, punches; Type W1; water hardened.

JANUS R3V.
M-614; 0.30 C, 14 Cr, Ni, V, bal Fe.
Annealed: 100,000 TS; 60,000 YS; 40 El; 50 RA; 200 Brin.
For oil refinery equipment; corrosion and creep resistant.

JANUS R15.
M-614; 0.15 max C, 0.4 Si, 13 Cr, bal Fe.
Annealed: 75,000 TS, 40,000 YS; 35 El; 70 RA; 155 Brin.
Cold drawn: 100,000 TS; 85,000 YS; 17 El; 60 RA; 205 Brin.
For valves, turbine blades, tableware, hardware; Type 410; corrosion resistant

JANUS R15W
M-614; 0.12 max C, 0.4 Si, 13 Cr, bal Fe.
Annealed· 75,000 TS, 40,000 YS, 35 El; 70 RA; 155 Brin.
Cold drawn· 100,000 TS; 85,000 YS; 17 El; 60 RA; 205 Brin.
For valves, turbine blades, tableware, hardware; Type 410; corrosion resistant.

JANUS R17.
M-614; 1 0 C, 18 Cr, W, Mo, V, bal Fe
Annealed 110,000 TS; 65,000 YS; 17 El; 32 RA; 220 Brin.
Heat treated. 280,000 TS; 270,000 YS; 3 El; 15 RA; 550 Brin.
For bearings, sleeves, liners, corrosion resistant, wear resistant.

JANUS R18
M-614, 0 22 C 0 4 Si, 17 Cr, 1 5 Ni, bal Fe.
Annealed: 120,000 TS; 90,000 YS; 15 El; 20 RA; 260 Brin
Heat treated· 180,000 TS, 130,000 YS; 10 El, 15 RA; 420 Brin
For pump shafts, surgical trusses, valve trim, Type 431; corrosion resistant.

JANUS R25.
M-614; 0 2 C, 0 4 Si, 13 Cr, bal Fe
Annealed: 95,000 TS; 50,000 YS, 25 El; 55 RA; 195 Brin.
Cold drawn. 105,000 TS; 85,000 YS, 17 El, 50 RA; 215 Brin.
For cutlery, valves, surgical instruments; Type 420, stainless, hardenable.

JANUS R45.
M-614; 0 40 C, 14 Cr, 0 4 Si, bal Fe.
Annealed: 90,000 TS; 45,000 YS; 50 El, 65 RA; 180 Brin.
For oil refinery equipment, cutlery, valves; Type 420; corrosion resistant.

JANUS R50
M-614; 0.50 C, 16 Cr, 0.4 Si, bal Fe.
For oil refinery equipment, corrosion resistant.

JANUS SA.
M-614, 0.15 max C, 0.4 Si, 18 Cr, 8.5 Ni, bal Fe.
Annealed· 85,000 TS; 40,000 YS; 50 El; 65 RA; 160 Brin.
For chemical plant and oil refinery equipment; Type 302; austenitic, stainless.

JANUS SAT.
M-614; 0.12 max C, 18 Cr, 9.5 Ni, Cb = 8 × C, bal Fe.
Annealed: 90,000 TS; 45,000 YS; 45 El; 60 RA; 170 Brin.
For chemical plant equipment, welded structures; Type 346; stainless, austenitic.

JANUS SAW.
M-614; 0.07 max C, 18 Cr, 9.5 Ni, bal Fe.
Annealed· 85,000 TS; 40,000 YS; 55 El; 65 RA; 160 Brin.
For chemical plant equipment, welded structures; Type 304; stainless, austenitic.

JANUS SB.
M-614; 0.15 max C, 18 Cr, 8.5 Ni, bal Fe.
Annealed: 80,000 TS; 35,000 YS; 55 El, 65 RA; 160 Brin.
For chemical plant equipment, tanks; Type 302; stainless, austenitic.

JANUS SBT.
M-614; 0.12 max C, 18 Cr, 10.5 Ni, 2 Mo, Cb = 8 × C, bal Fe.
Annealed: 85,000 TS; 40,000 YS; 50 El, 60 RA; 180 Brin.
For acid resistant welded structures; Type 316 Cb; stainless, austenitic.

JANUS SBW.
M-614; 0.07 max C, 18 Cr, 10.5 Ni, 2 Mo, bal Fe.
Annealed: 80,000 TS; 35,000 YS; 55 El, 65 RA; 160 Brin
For chemical plant equipment, mixers, agitators, tanks; Type 316L; stainless, austenitic.

JANUS SPEZIAL.
M-614; 1 4 C, 13 W, V, 0.30 Mn, bal Fe.
For cutters, tools, fast finishing.

JANUS SPEZIAL EXTRA.
M-614, 1.3 C, 0.2 max Cr, 4.7 W, bal Fe.
For cutters, tools, fast finishing.

JANUS V.
M-614; 0.9 C, 1 9 Mn, 0.1 V, bal Fe.
For dies, punches, cutters, crimpers; oil hardened, nondeforming.

JANUS ZAH.
M-614; 0.70 C, 0.25 max Mn, 0.25 max Si, bal Fe.
For drills, punches, crimpers, springers; Type W1; water hardened.

JANUS ZH.
M-614, 0 85 C, 0.25 max Si, 0.25 max Mn, bal Fe.
For drills, taps, reamers, hobs, Type W1; water hardened.

JAPAN 2H-SUPER.
M-1539, 0 08-0 16 C, 0 6-1.2 Mn, 1.0 max Ni, 0.5 max Cu, 0.4 max Mo, bal Fe.
Heat treated: 110,000-114,000 TS; 90,000 min YP; 22% min El.
For mine cars, agricultural equipment, railroad car and automobile bodies.
High-strength low-alloy constructional steel.

JAPAN 2H-ULTRA.
M-1539; 0.08-0.16 C, 0.6-1.2 Mn, 0.15-0.50 Cu, 1.5 max Ni, 0.8 max Cr, 0.7 max Mo, 0.1 max V, 0.006 max B, bal Fe.
Heat treated: 114,000-135,000 TS; 100,000 min YP; 20% min El.
For mine and railroad cars, booms, agricultural equipment, structures. High-strength low-alloy constructional steel.

JAPAN BRASS.
Japan; 66.6 Cu, 33.4 Zn.
For hardware, fixtures, radiators; high strength.

JBR ALLOY.
M-790; C, 6 Co, W, Cr, V, bal Fe.
For tools, cutters; tipped tools.

J.C./C.
M-359, M-584.
For general tools; water hardening.

JEFFALOY 55M.
M-170; 2.85-3.05 T.C., 0.5-0.7 Mn, Si, 0.7-0.9 Mo, bal Fe.
Cast: 50,000-60,000 TS; 248-269 Brin.
For castings; wear resisting.

JEFFALOY A.
M-170; 2.85-3 5 T.C., 0 3-0.7 Mn, Si, bal Fe.
Cast: 35,000-50,000 TS; 192-248 Brin.
For castings, pump parts, sprockets, housings; wear resistant cast iron, processed.

JELENKO, NO 7.
M-791; Tu.
For dental work; cast

JELLIFF ALLOY 30.
M-231; 2 Ni, bal Cu.
Annealed: 30,000 TS, 30 El.
Hard 60,000 TS, 3 El.
For relays, low resistance resistors, rheostats; non-magnetic, easily soldered

JELLIFF ALLOY 45.
M-231, 45 Ni, bal Cu.
Annealed: 60,000 TS; 30 El.
Hard 135,000 TS, 3 El.
For thermocouples, resistance coils, low temperature heaters, zero temperature coefficient of res ; resists oxidation and corrosion at lower temperature, max operating temperature 930°F.

JELLIFF ALLOY 60.
M-231; 6 Ni, mal Cu
Annealed 35,000 TS, 30 El.
Hard· 70,000 TS, 3 El.
For relays, low resistance resistors, rheostats; non-magnetic, easily soldered.

JELLIFF ALLOY 90
M-231; 12 Ni, bal Cu.
Hard· 75,000 TS, 3 El
Annealed 35,000 TS, 30 El
For resistance wire, rheostats, potentiometers; maximum operating temperature 850°F.

JELLIFF ALLOY 180.
M-231; 22 Ni, bal Cu
Hard· 100,000 TS, 3 El.
Annealed 50,000 TS, 30 El.
For resistance wire, rheostats, potentiometers, max operating temperature 750°F, low temp coef. of resistance.

JELLIFF ALLOY 800
M-231; 20 Cr, 17 5 Mn, 1.5 Mo, bal Ni.
Annealed· 150,000 TS, 30 El
Hard 250,000 TS, 3 El.
For precision resistors, potentiometers; electrical resistance, 800 ohms/c.m.f.

JELLIFF ALLOY A
M-231; 80 Ni, 20 Cr.
Annealed: 95,000 TS; 30 El
Hard: 105,000 TS; 3 El
For industrial furnace elements, voltmeter windings, electrical instruments; max operating temperature 2100°F; high resistance to oxidation and corrosion.

JELLIFF ALLOY C.
M-231; 60 Ni, 16 Cr, bal Fe.
Annealed: 95,000 TS; 30 El.

Hard: 200,000 TS; 3 El.
For heating elements, rheostats, resistors, potentiometers; max operating temperature 1700°F; heat and corrosion resistant.

JELLIF ALLOY C.O.J.
M-231; Ni, Cr, Mn, Mo.
Fine wire with very high elec. resistivity.
Elec. Resistivity: 1040 ohms/cmf.
Temp coeff. of Resistance, −65 to + 150°C, ± 5 ppm/°C.
Thermal EMF vs Copper, max.: 0.010 mV/°C.
Magnetic attraction: none.

JELLIFF ALLOY K.
M-231; 15.5 Cr, 5.5 Al, bal Fe
Annealed. 100,000 TS; 20 El.
Hard: 200,000 TS; 3 El.
For high temperature heating elements, resistors; maximum operating temperature 2200°F, magnetic.

JELLIFF ALLOY K20.
M-231, 15.5 Cr, 5.5 Al, bal Fe
Annealed. 100,000 TS, 20 El.
Hard: 200,000 TS, 3 El
For precision resistors, power resistors, zero temperature co-efficient of resistance.

JESSAIR
M-69, 0.70 C, 2.0 Mn, 0.3 Si, 1.0 Cr, 1.35 Mo, bal Fe.
Heat Treated: 293,000 TS, 265,000 YS; 1 El; 2 RA; C 55 Rock
For blanking and forming dies, trimming and notching dies, master hubs, shear blades, bending tools, mandrels, heavy duty punches.
Type A6 air hardening tool steel

JESSOP 2B (HC)
M-69, 0.48 C, 2.75 Cr, 0.3 V, 11.25 W, bal Fe.
For piecing punches, mandrels, grippers, heading dies, hot work steel.

JESSOP 2B (LC)
M-69, 0.30 C, 3.15 Cr, 0.3 V, 10 W, bal Fe
For forming dies, hot work steel

JESSOP 2 B (MC)
M-69, 0.35 C, 3 Cr, 0.25 Mn, 0.3 V, 13.5 W, bal Fe.
For tools, bolts and rivet dies, mandrels; tough, hot work steel

JESSOP 3 C DIES
M-69, 2.25 C, 12 Cr, 0.2 V, 0.8 Mo, bal Fe.
For coining, crimping and cutting dies, hobs, punches, wear resistant, oil hardening

JESSOP 3-C SPECIAL
M-69, 1.45 C, 12.5 Cr, 0.8 Mo, 3.2 Co, 0.4 Si, bal Fe
For die casting dies, air hardening

JESSOP NO. 5
M-69, 0.56-0.65 C, 0.1-0.2 Si, 0.25-0.6 Mn, bal Fe.
For tools

JESSOP 6 STAR VANADIUM.
M-261, M-486; 1 C, 0.3 Mn, 0.2 V, bal Fe.
For coining and cutlery dies, cold-heading dies; tough.

JESSOP NO. 9.
M-69; 0.35 C, 12.4 Mn, 3.25 Ni, 4.15 Cr, 0.5 Mo, bal Fe
Rolled: 115,000-160,000 TS; 55,000-100,000 YS; 45-35 El; 50-40 RA
For armor plate, coal chutes, mine cars; austenitic, tough and wear resistant.

JESSOP NO. 27.
M-69; 1.15 C, 0.55 Mn, 0.55 Cr, 0.95 W, 0.2 V, bal Fe.
For cold metal saws; oil or water hardened.

JESSOP NO. 27-V.
M-69; 1.25 C, 0.60 Cr, 1.0 W, 0.20 V, bal Fe.
Annealed: 200 Brin.
For milling saw plates; oil hardening.

JESSOP NO. 29-V.
M-69; 0.90 C, 1.2 Cr, 0.25 V, bal Fe.
Annealed: 200 Brin.
For milling saw plates, metal band saw; oil hardening.

JESSOP NO. 51.
M-69, 1.15 C, 0.3 Mn, 0.2 Si, 1.1 W, bal Fe.
For hacksaws; water or oil hardened.

JESSOP NO. 67.
M-69; 0.8 C, 0.25 Mn, 1.35 Ni, 0.35 Cr, bal Fe.
For cross-cut saws, circular wood saws; oil hardened

JESSOP NO. 91.
M-69, 0.7 C, 0.5 Mn, 0.7 Ni, 0.5 Cr, 0.15 Mo, bal Fe
For circular wood saws, segment plates; oil hardened

JESSOP NO. 96.
M-69, 0.75 C, 0.25 Mn, 1.4 Ni, 0.2 Cr, bal Fe.
For woodworking tools, oil hardened, tough.

JESSOP NO. 96C
M-69, 0.9 C, 0.35 Mn, 1.4 Ni, 0.3 Cr, bal Fe.
Heat treated: 380-620 Brin.
For crosscut saws, ripsaws; oil hardened, tough.

JESSOP NO. 96K
M-69, 1 C, 0.4 Mn, 1.4 Ni, 0.65 Cr, bal Fe
Heat treated: 380-630 Brin
For saw bits; oil hardened, tough.

JESSOP NO. 96-KC
M-69, C, 1.5 Ni, 0.30 Cr, bal Fe
Heat treated: 190,000-200,000 TS; 160,000-170,000 YS; 12 El.
For wood saws, circular and band saws, Rockwell "C"-42.

JESSOP NO. 139B.
M-69, 0.82 C, 0.35 Mn, 2.6 Ni, 0.25 Cr, bal Fe
Heated treated: 320-620 Brin
For woodworking knives, saws, oil hardened, tough.

JESSOP 145.
M-69, 2.3 C, 0.7 Mn, 5.25 Cr, 4.75 V, 1.1 Mo, 1.4 W, bal Fe
Hardened: C, 65-67 Rock
For drawing and forming dies, grinding wheel molds, brick mold liners.
Cold work tool steel, Type A7, abrasion resistant. Oil or air hardening

JESSOP NO. 200
M-69, 0.35 C, 11.5 Mn, 7.5 Ni, 0.5 max Cr, bal Fe.
Annealed: 80,000-95,000 TS, 30,000-60,000 YS; 50-30 El, 60-30 RA
For circuit breakers, transformers, motor shafts, nonmagnetic, austenitic.

JESSOP NO. 202
M-69, 0.25 C, 17.5 Mn, 1.5 Ni, bal Fe
Rolled. 85,000-95,000 TS, 30,000-60,000 YS, 50-25 El, 60-30 RA.
For induction furnace parts, switch covers, austenitic, non-magnetic

JESSOP NO. 259.
M-69, 0.54 C, 0.75 Mn, 2.0 Si, 0.15 Cr, 0.2 V, 0.5 Mo, bal Fe.
Shock resisting tool steel, AISI S5.

JESSOP NO. 271.
M-69; 0.9 C, 0.7 Mn, 0.25 Cr, bal Fe.
Annealed: 100,000 TS; 53,100 YS; 21 El; 42 RA; 200 Brin.
For cross-cut saws, circular and hand saws; oil or water hardened.

JESSOP NO. 276.
M-69; 0.9 C, 0.35 Mn, 0.25 Si, 0.5 Cr, bal Fe.
Heat treated: 185,000 TS; 120,000 YS; 10 El; 30 RA; 375-400 Brin.
For cross-cut saws; oil or water hardened.

JESSOP 302.
M-69; 0.08-0.20 C, 17-19 Cr, 8-10 Ni, bal Fe.
Annealed: 85,000 TS; 40,000 YS; 50 El; 65 RA; 150 Brin.
For springs, screens, chemical plant equipment; Type 302; stainless, austenitic.

JESSOP 303.
M-69; 0.15 max C, 17-19 Cr, 8-10 Ni, 0.07 min P, S or Se, bal Fe.
Annealed: 85,000 TS; 40,000 YS; 40 El; 55 RA; 150 Brin.
For screw machine products, bolts, fasteners; Type 303; stainless, free-cutting.

JESSOP 304.
M-69; 0.08 max C, 18-20 Cr, 8-11 Ni, bal Fe.
Annealed: 85,000 TS; 35,000 YS; 60 El; 70 RA; 150 Brin.
Cold drawn. 180,000 TS; 125,000 YS; 10 El; 330 Brin.
For architectural molding and trim, kitchen equipment; Type 304; stainless, austenitic.

JESSOP 309.
M-69; 0.2 max C, 22-24 Cr, 12-15 Ni, bal Fe
Annealed: 90,000 TS; 40,000 YS; 50 El; 65 RA; 180 Brin
For furnace parts, tube supports, heat treat boxes; Type 309; stainless, austenitic.

JESSOP 310.
M-69; 0.25 max C, 24-26 Cr, 19-22 Ni, bal Fe.
Annealed: 100,000 TS; 45,000 YS; 50 El; 65 RA; 180 Brin.
For furnace parts and equipment, valves, pumps, baffles; Type 310; austenitic, heat resistant.

JESSOP 316.
M-69; 0.1 max C, 16-18 Cr, 10-14 Ni, 2-3 Mo, bal Fe.
Annealed: 80,000 TS, 30,000 YS, 60 El; 80 RA; 135 Brin.
Cold drawn: 150,000 TS; 135,000 YS; 6 El; 300 Brin.
For chemical plant equipment, agitators, digesters, valve trim; Type 316; austenitic, stainless.

JESSOP 317.
M-69; 0.1 max C, 18-20 Cr, 11-14 Ni, 3-4 Mo, bal Fe.
Annealed: 85,000 TS; 40,000 YS; 50 El; 70 RA; 150 Brin.
For chemical plant equipment, agitators, digesters, valve trim; Type 317; stainless, austenitic.

JESSOP 317Cb.
M-69; 0.1 max C, 18-20 Cr, 11-14 Ni, 3-4 Mo, Cb = 8 × C, bal Fe.
Annealed: 85,000 TS; 40,000 YS; 50 El; 70 RA; 150 Brin.
For welded equipment, chemical plant equipment; Type 317 Cb; stabilized, stainless.

JESSOP 318.
M-69; 0.1 max C, 2 max Mn, 16-18 Cr, 10-14 Ni, 2-3 Mo, Cb = 10 × C, bal Fe.
For welded structures and equipment; stainless, austenitic.

JESSOP 321.
M-69; 0.08 max C, 17-19 Cr, 8-11 Ni, Ti = 5 × C, bal Fe.
Annealed: 85,000 TS; 33,000 YS; 58 El; 75 RA; 165 Brin.
For jet aircraft, chemical plant equipment, refinery tubes; Type 321; stabilized, stainless.

JESSOP 347.
M-69; 0.08 max C, 17-19 Cr, 9-12 Ni, Cb = 10 × C, bal Fe.
Annealed: 91,000 TS; 39,500 YS; 50 El; 71 RA; 200 Brin.
For welded structures, chemical plant equipment, vessels, tanks; Type 347; stabilized, stainless.

JESSOP 410.
M-69; 0.15 max C, 11.5-13.5 Cr, bal Fe.
Annealed: 75,000 TS; 40,000 YS; 35 El; 70 RA; 155 Brin.
Cold drawn: 100,000 TS; 85,000 YS; 17 El; 60 RA; 205 Brin.
For tableware, hardware, flat springs; Type 410; corrosion resistant

JESSOP 416.
M-69; 0.15 max C, 12-14 Cr, 0.07 min P, S or Se, bal Fe.
Annealed: 75,000 TS, 40,000 YS; 30 El, 60 RA, 155 Brin.
Heat treated: 110,000 TS; 85,000 YS, 18 El; 55 RA, 230 Brin.
For screw machine products, shafts, fasteners, gears Type 416; stainless, free-cutting

JESSOP 420
M-69; 0.15 min C, 12-14 Cr, bal Fe.
Annealed: 95,000 TS; 50,000 YS; 25 El, 55 RA; 195 Brin.
Heat treated: 250,000 TS; 215,000 YS; 8 El; 25 RA; 512 Brin.
For cutlery, surgical instruments, tableware, gauges, Type 420, stainless, hardenable.

JESSOP 430.
M-69, 0.12 max C, 14-18 Cr, bal Fe.
Annealed: 70,000 TS; 40,000 YS; 30 El; 55 RA; 140 Brin
Cold drawn 130,000 TS; 120,000 YS; 2 El; 185 Brin
For kitchen sinks, fasteners, soot blowers, bolts; Type 430; corrosion resistant.

JESSOP 440A.
M-69; 0.60-0.75 C, 16-18 Cr, 0.75 max Mo, bal Fe.
Annealed. 95,000 TS; 55,000 YS; 20 El; 220 Brin.
Heat treated: 225,000 TS; 240,000 YS; 2 El; 550 Brin.
For needle valves, ball bearings, pivots, shafts, surgical instruments; Type 440A; stainless, hardenable.

JESSOP 440B.
M-69; 0.75-0.95 C, 16-18 Cr, 0.75 max Mo, bal Fe.
Annealed: 107,000 TS; 62,000 YS; 18 El; 35 RA; 220 Brin.
Heat treated: 280,000 TS; 270,000 YS; 3 El; 15 RA; 555 Brin.
For dental and surgical instruments, pivots, ball bearings, valves; Type 440B; stainless, hardenable.

JESSOP 440C.
M-69; 0.95-1.2 C, 16-18 Cr, 0.75 max Mo, bal Fe.
Annealed: 110,000 TS; 70,000 YS; 15 El; 30 RA; 225 Brin.
For ball bearings, valve parts, pivots, Type 440C; stainless, hardenable.

JESSOP 446.
M-69; 0.35 max C, 23-27 Cr, 0.25 max N, bal Fe.
Annealed: 75,000 TS; 45,000 YS; 35 El; 65 RA; 160 Brin.
Cold drawn: 175,000 TS; 155,000 YS; 2 El; 25 RA; 250 Brin.
For annealing boxes, oil burner and furnace parts; Type 446; stainless and heat resistant.

JESSOP 494E.
M-261, M-486; 1.1 C, 0.3 Mn, 0.5 W, bal Fe.
For taps, drills, reamers; tough core.

JESSOP NO. 773.
M-69, 0.68 C, 0.68 Mn, 0.3 Mo, bal Fe.
For cutting tools, dies, punches, stamps, shears; tough, oil hardening.

JESSOP NO. 4824.
M-261; 0.40 C, 1.5 Cr, 0.65 Ni, 0.5 Mo, 0.27 V, 1 Mn, 1.6 Si, bal Fe.
Heat treated: 275,000 TS; 220,000 YS; 12 El; 37 RA.
For aircraft parts, gears, shafts; oil hardened, high tensile.

JESSOP NO 4828.
M-261, 0.26 C, 0.6 Mn, 1.8 Si, 2.9 Ni, 0.47 Mo, 1.2 Cr, bal Fe
Heat treated: 246,000 TS, 189,000 YS; 12.5 El; 40 RA
For aircraft parts, gears, shafts; oil hardened, high tensile.

JESSOP A-1.
M-261, M-486, 0.15 C, 0.6 Mn, 0.25 S, bal Fe.
60,000 TS, 15 El
For bolts, screws, shafts, bushes; free-cutting, case-hardening.

JESSOP A-2 A.
M-261, M-486; 0.15 C, 0.6 Mn, bal Fe.
Rolled: 65,000 TS, 20 El
For camshafts, tappets, rollers, spindles; case-hardening.

JESSOP A-3.
M-261, M-486, 0.22 C, 0.7 Mn, bal Fe.
For turbine casings, engine frames; good moldability.

JESSOP A-3C
M-69, 0.90 C, 0.70 Mn, 0.27 Cr, bal Fe.
For saws, water hardened.

JESSOP A-4.
M-486; 0.3 C, 0.5 Mn, bal Fe.
Rolled: 76,200-81,000 TS, 45,000-51,000 YS; 35-30 El; 60-55 RA; 150-160 Brin.
For bolts, studs, brake drums; water hardening.

JESSOP A-5.
M-486; 0.4 C, 0.8 Mn, bal Fe.
Rolled: 85,200-89,600 TS; 49,000-65,000 YS; 26 El; 55 RA; 170 Brin.
For axles, axle tubes, bolts; low stress applications.

JESSOP ALLOY C.
M-261; 2.3 C, 0.35 Mn, 13 Cr, bal Fe.
For shear blades, liners, thread rolling dies; cold work steel, nondeforming.

JESSOP A-M-2.
M-261, M-486; 0.15 C, 1.5 Mn, bal Fe.
Rolled: 80,000 TS; 20 El;
For rifle parts, general engineering parts; case-hardening.

JESSOP A-M-2 S.
M-261, M-486; 0.15 C, 1.5 Mn, 0.10 S, bal Fe.
Rolled: 80,000 TS; 18 El.
For general engineering parts; case-hardening, free-cutting.

JESSOP AM-3.
M-261, M-486; 0.25 C, 1.6 Mn, bal Fe.
For welded structures; tough.

JESSOP AM-4.
M-261, M-486; 0.35 C, 1.4 Mn, bal Fe.
For axles, shafts, gas cylinders; water hardened.

JESSOP AM-4 NICKEL.
M-261, M-486; 0.35 C, 1.3 Mn, 0.5 Ni, bal Fe.
For axles, shafts, gas cylinders; tough.

JESSOP AOO.
M-261, M-486; 0.08 C, bal Fe.
For plastic molding dies; hobbing steel.

JESSOP B-1.
M-261, M-486; 0.55 C, bal Fe.
For die blocks; oil or air hardening.

JESSOP B-1 NICKEL.
M-261, M-486; 0.55 C, 0.6 Mn, 0.5 Ni, bal Fe.
For rifle barrels, gear wheels, housings; water hardening

JESSOP BLACK LABEL.
M-261; 0.7-1.4 C, 0.3 Mn, 0.3 Si, bal Fe.
For tools, punches, shear blades, taps, drills; water hardened, Type W1.

JESSOP BLUE LABEL.
M-261; 0.7-1.2 C, 0.3 Mn, bal Fe.
For taps, mandrels, punches, drills; water hardening

JESSOP BX-3.
M-69, 2.45 C, 5 Cr, 4.5 V, 1.1 Mo, bal Fe.
For blanking and forming dies, headers; cold work steel. Wear resistant, AISI A7.

JESSOP C.
M-486; 1.65 C, 0.45 Mn, 13 Cr, 0.7 Mo, 0.3 V, bal Fe.
For burnishing rolls, shear blades, gauges; tough, nondeforming.

JESSOP CNS NO. 1.
M-69; 1.55 C, 12.5 Cr, 0.8 V, 0.8 Mo, bal Fe
For blanking and forming dies, punches, air-hardened, non-deforming. AISI D2.

JESSOPS CNS-2.
M-69; 1.5 C, 13 Cr, Mo, bal Fe.
For blanking and forming dies; air hardened, non-deforming.

JESSOP CNS NO. 2.
M-69; 2.15 C, 12 Cr, 0.25 V, bal Fe.
For blanking and forming dies, punches; oil hardened, non-deforming.

JESSOP CNS-3
M-69; 2.25 C, 12.0 Cr, 0.2 V, 0.8 Mo, bal Fe.
Hardened: C 65-67 Rock.
For coining and crimping dies, forming and extruding dies, punches, hobs, taps, gauges, lamination dies. Air hardening, nondeforming, high wear resistance. Type D4 tool steel.

JESSOP COMPOSITE "R."
M-69; tool steel welded to machinery steel.
For tools, cutters, dies; composite steel.

JESSOP CORROSION RESISTANT "R-1."
M-261; 0.15 max C, 12 Cr, 1 max Ni, bal Fe.
For corrosion resistant parts; corrosion resistant.

JESSOP CORROSION RESISTANT "R-2."
M-261; 0.30 C, 14 Cr, 1 max Ni, bal Fe.
For corrosion resistant parts; corrosion resistant.

JESSOP CORROSION RESISTANT "R-3."
M-261; 0 12 C, 18 Cr, 11 max Ni, bal Fe.
For stainless parts; stainless.

JESSOP CORROSION RESISTANT "R-4."
M-261; 0.25 C, 18 Cr, 1 Ni, bal Fe.
For corrosion resistant parts; corrosion resistant.

JESSOP DB NO. 1.
M-69; 0.50 C, 0.55 Mn, 1.6 Ni, 0.7 Cr, bal Fe.
For castings.

JESSOPS E-0.
M-261, M-486; 0 12 C, 0.4 Mn, 3 Ni, bal Fe.
Rolled. 90,000 TS; 18 El.
For gears, pinions, shafts, collets; tough, case-hardening.

JESSOP E-1 A.
M-261, M-486; 0.3 C, 3 25 Ni, bal Fe.
At 70°F: 102,000 TS; 25 El.
At 1100°F: 32,000 TS; 50 El.
At 1300°F· 12,000 TS; 70 El.
For inlet valves, exhaust valves; low to medium temperature applications.

JESSOP E-4.
M-261, M-486; 0.12 C, 0 5 Mn, 5 Ni, bal Fe.
Rolled: 80,000 TS; 20 El.
For gears, pinions, shafts, collets; shock resistant, case-hardening

JESSOP E-4 MOLYBDENUM.
M-261, M-486, 0 12 C, 0.35 Mn, 5 Ni, 0.25 Mo, bal Fe.
Rolled: 130,000 TS; 13 El
For rocker arms, camshafts, gears, pinions; shock resistant, case-hardening.

JESSOP E-5.
M-261, M-486; 0.6 C, 1.25 Ni, bal Fe
For dies; high core toughness.

JESSOP E-6.
M-261, M-486; 0.15 C, 0.5 Mn, 2 Ni, 0.25 Mo, bal Fe.
Rolled: 90,000 TS; 18 El.
For pinions, shafts, rifle parts; shock resistant, case-hardening.

JESSOP E-8.
M-261, M-486, 0.55 C, 0.9 Ni, 0.25 Cr, 0.95 Mn, bal Fe
For mandrel bars, resists heat checking.

JESSOP E-9.
M-69; C, bal Fe
For engineering parts; super high tensile.

JESSOP E-9.
M-261, M-486; 0.25 C, 0.5 Mn, 2 Ni, 0.25 Mo, bal Fe.
Rolled: 110,000 TS; 15 El.
For rocker arms, camshafts, gears, pinions; shock resistant.

JESSOP ET NO. 4.
M-69; 0.70 C, 0.65 Mn, 1.3 Ni, 0.55 Cr, 0.25 Mo, bal Fe.
For castings.

JESSOP ET NO. 6.
M-69; 0.50 C, 0.8 Mn, 0.3 Si, 0.95 Cr, 0.2 V, bal Fe.
Temper to desired hardness from 300°F to 1000°F.
For keys, gears, shafts, bushings, springs, etc.
AISI Type L2 tool steel.

JESSOP F 2.
M-261; 0.57 C, 0.7 Cr, 0.2 V, bal Fe.
For die casting dies; hot die steel.

JESSOP F-5.
M-261, M-486; 0 44 C, 1.3 Cr, 2.3 W, 0.15 V, bal Fe.
For mandrel bars; resists heat checking.

JESSOP F 7.
M-261, M-486; 0 48 C, 0.7 Ni, 1.5 Cr, 0.2 Mo, 0.12 V, 1.2 W, bal Fe.
For punches, chisels, shear blades, dies; shock resistant, durable cutting edge.

JESSOP G-2.
M-261; 0 4 C, 13 Ni, 13 Cr, 2 5 W, bal Fe.
At 70°F· 106,000 TS; 31 El
At 1100°F: 66,000 TS, 35 El.
For valves, dies for extruding steel tubes, exhaust valves; high heat resistant, shock resistant.

JESSOP G-3.
M-261, M-486; 0 55 C, 1 5 Ni, 0 65 Cr, bal Fe.
For dies; tough.

JESSOP G-5 SPECIAL.
M-261, M-486; 0 32 C, 1 55 Ni, 1 1 Cr, 0.2 Mo, bal Fe.
For mandrel bars, gears, connecting rods; resists heat checking

JESSOP G-7.
M-261, M-486; 0 55 C, 1 75 Ni, 0 6 Cr, 0 12 Mo, bal Fe
For stamping dies; deep hardening, tough

JESSOP G-8
M-261, M-486, 0.25 C, 3 Ni, 1.2 Cr, 0 4 Mo, bal Fe
For mandrel bars, crankshafts; resists heat checking.

JESSOP G-11.
M-261, M-486, 0 3 C, 0 6 Mn, 2.5 Ni, 0 8 Cr, 0 6 Mo, bal Fe
Hardened 110,000-200,000 TS, 88,000-170,000 YS; 18-10 El; 248-444 Brin
For crankshafts, connecting rods, engine parts; shock resistant

JESSOP G-12
M 261, M-486, 0 4 C, 0 6 Mn, 2 5 Ni, 0 6 Cr, 0 6 Mo, bal Fe
For connecting rods, gears, turbine parts; shock resistant.

JESSOP G 14.
M-261, M-486, 0.39 C, 0 5 Mn, 4.1 Ni, 1.3 Cr, 0.3 Mo, bal Fe
For cold punches, shear blades, chisels; air hardening, shock resistant

JESSOP G-15
M-261, M-486, 0.12 C, 0.45 Mn, 3 Ni, 1 Cr, bal Fe.
Heat treated: 110,000-160,000 TS; 15-13 El.
For gears, cams, pinions, camshafts, case-hardening, shock resistant.

JESSOP G-16.
M-261, M-486; 0.15 C, 0.5 Mn, 4.25 Ni, 1.3 Cr, 0.3 Mo, bal Fe.
Heat treated: 170,000 TS; 12 El.
For gears, pinions, tappets, valve rockers; shock resistant, case-hardening.

JESSOP G-18B.
M-486; 0.4 C, 0.8 Mn, 1 Si, 13 Ni, 13 Cr, 10 Co, 2.5 W, 2 Mo, 3 Cb, bal Fe.
At 70°F: 92,000 TS; 40 El.
At 1500°F: 44,000 TS; 9 El.
For turbine discs, rotor blades, engine exhaust valves; high heat resistant

JESSOP G19.
M-261; 0.4 C, 0.8 Mn, 1 Si, 13 Ni, 19 Cr, 2 Mo, 2.5 W, 3 Cb, 10 Co, bal Fe.
Heat treated: 102,500 TS; 30,000 YS; 42 El; 50 RA.
For nozzle guide vanes in gas turbines; high heat and oxidation resistant.

JESSOP G-20.
M-261, M-486; 0.40 C, 1.35 Mn, 0.65 Ni, 0.45 Cr, 0.2 Mo, bal Fe.
For gears, shafts, drop forgings, shock resistant.

JESSOP G-21
M-261, M-486; 0.42 C, 1.3 Si, 13 Cr, 13 Ni, 2.5 W, 1.0 Nb, bal Fe.
106,000 TS; 50,000 YS; 31 El.
For furnace parts, bolts, stays, mandrels; high hot strength.

JESSOP G-24.
M-261, M-486, 3 C, 1.5 Si, 13 Ni, 5 Cr, 5 Cu, 1.2 Mn, bal Fe
Annealed
For impellers, pump parts; austenitic, castings, stainless.

JESSOP G-25
M-261, M-486, 0.17 C, 0.5 Mn, 2 Ni, 2 Cr, 0.2 Mo, bal Fe
Heat treated: 170,000 TS; 12 El
For camshafts, gears, bearings; shock resistant, case-hardening

JESSOP G-26
M-261, M-486, 0.4 C, 0.55 Mn, 1.55 Ni, 1.15 Cr, 0.15 Mo, bal Fe
Heat treated: 92,000-150,000 TS, 70,000-120,000 YS, 22-15 El, 240-360 Brin.
For forging bars, stampings, shock resistant

JESSOP G-27.
M-261, M-486, 0.30 C, 0.55 Mn, 3.5 Ni, 0.95 Cr, 0.4 Mo, bal Fe
Heat treated 120,000-160,000 TS; 100,000-140,000 YS, 17-14 El; 300-400 Brin
For crankshafts, connecting rods, gears; shock resistant

JESSOP G29
M 261, 0.35-0.45 C, 11-13.5 Ni, 19-20.5 Cr, 7-10 Co, bal Fe
Normalized. 110,000 TS; 43,000 YS; 40 El; 210 Brin.
For gas turbine components, furnace parts, high creep resistance, good to 1740°F.

JESSOP G30
M-261, C, alloy, bal Fe
For machine tool parts; oil hardened.

JESSOP G32
M-261; 0.3 C, 12 Ni, 19 Cr, 16 Fe, 2.8 V, 2 Mo, 1.2 Cb, bal Co.
144,000 TS; 85,000 YS; 10 El
For gas turbine rotors; high creep and fatigue strength

JESSOP G-32.
M-261; 0.4 C, 1.0 Si, 13 Cr, 13 Ni, 15 Co, Cb, Mo, W, bal Fe.
For jet engine parts; high heat resistant.

JESSOP G-32.
M-486; 0.27 C, 19 Cr, 10.5 Ni, 2.2 Mo, 1.4 Cb, 0.8 Mn, 3 V, 16 Fe, bal Co.
Rolled: 126,000 TS; 78,000 YS; 10 El.
For gas turbine disc shafts, rotor blades; heat and oxidation resistant.

JESSOP G-33.
M-261, M-486; 0.4 C, 1.4 Ni, 0.6 Cr, 0.25 Mo, bal Fe.
For mandrel bars; resists heat checking.

JESSOP G34.
M-261; 1 max C, 0.8 Mn, 0.3 Si, 13 Ni, 19 Cr, 2 Mo, 46 Co, 1.2 Cb, 2.8 V, bal Fe
Cast: 89,600 TS; 58,200 YS; 2.5 El; 2.5 RA; 300 Brin.
For turbine blades, nozzle guide vanes; high creep and heat resistance, shock resistant.

JESSOP G39.
M-261, 0.5 C, 20 Cr, 3 W, 3 Mo, 1.5 Cb, 1.5 Ta, bal Ni
Cast 73,200 TS, 5 El, 5 RA, 190 Brin.
For nozzle guide vanes in gas turbines; high heat and oxidiation resistant.

JESSOP G 42.
M-261, C, 19 Cr, 15 Ni, 25 Co, bal Fe.
For high temperature applications; corrosion and heat resistant.

JESSOP G42B.
M-261, 0.26 C, 25 Co, 20 Cr, 15 Ni, plus carbide formers
Heat treated 120,000 TS, 91,000 YS, 10 El; 12 RA, 260 Brin
For turbine blades; high heat and creep resistance, used to 1650°F.

JESSOP G56
M-261, 0.2 C, 13 Cr, 23 Ni, bal Fe
Heat treated 151,000 TS, 94,700 YS; 26 El; 27 RA
For turbine discs; good creep and heat resistance, stainless

JESSOP GB 18.
M-261, 0.4 C, 1.0 Si, 13 Cr, 13 Ni, 10 Co, 3 Cb, 2 Mo, 2.5 W, bal Fe
Age-hardened 107,500 TS, 62,700 YS; 12 El; 15 RA
For high temperature parts, gas turbine discs; heat resistant

JESSOP G I SPECIAL
M-261, 0.32 C, 4.1 Ni, 1.3 Cr, 0.2 Mo, bal Fe.
Hardened: 215,000 TS; 190,000 YS, 12 El, 477 Brin
For plastic molding dies, mandrels; shock resistant, air hardening.

JESSOP GO
M-261, M-486; 0.33 C, 0.6 Mn, 3.5 Ni, 0.75 Cr, bal Fe
For collets, cold punches, dies; oil hardening.

JESSOP H-3.
M-486; 0.6 C, 1.55 Si, 5.8 Cr, bal Fe.
At 70°F 110,000 TS; 24 El
At 1100°F 40,000 TS; 50 El.
At 1500°F: 8000 TS, 140 El
For inlet and exhaust valves, heat resistant; Silchrom type steel.

JESSOP H3A.
M-261; 0.6 C, 1.2 Si, 6 Cr, 0.5 Mo, bal Fe.
Heat treated: 135,000 TS; 100,000 YS; 20 El; 40 RA.
For turbine disks, heat resistant.

JESSOP H 4.
M-261, M-486; 0.85 C, 1.9 Mn, bal Fe.
For press tools, gauges taps, dies; non-distorting.

JESSOP-H4 SPECIAL.
M-261; 0.90 C, 1.6 Mn, bal Fe.
For dies, punches, upsetters, crimpers; Type O2; oil hardened, non-deforming.

JESSOP H-18.
M-261, M-486; 0.45 C, 3.3 Si, 8.5 Cr, bal Fe.
At 70°F: 114,000 TS; 24 El.
At 1100°F: 36,000 TS; 60 El.
For auto inlet and exhaust valves; resists scaling.

JESSOP H-22.
M-261, M-486; 0.2 C, 1.55 Cr, 0.5 Mo, bal Fe.
For small stamping dies, heading dies; shock resistant.

JESSOP H-23.
M-261, M-486; 0.47 C, 0.6 Mn, 1.0 Si, 1.4 Cr, bal Fe.
For shear blades, punches, chipping chisels; oil hardening.

JESSOP H-24.
M-261, M-486; 0.4 C, 0.65 Mn, 1.2 Cr, 0.3 Mo, bal Fe
Heat treated: 90,000-140,000 TS; 70,000-120,000 YS; 22-15 El; 220-360 Brin.
For gun barrels, superheater tubes; creep and shock resistant.

JESSOP H27.
M-261; 0.4 C, 0.6 Mn, 0.3 Si, 3 Cr, 0.8 Mo, bal Fe.
Oil hardened: 135,000 TS; 112,000 YS; 18 El, 40 RA.
For turbine disks; heat resistant.

JESSOP H-28.
M-261, M-486; 0.4 C, 0.8 Mn, 1 Cr, bal Fe.
Heat treated: 90,000-110,000 TS; 64,000-88,000 YS; 22-18 El; 240-302 Brin.
For general engineering components; water hardening.

JESSOP H-29.
M-261, M-486; 0.8 C, 2 Si, 1.5 Ni, 19.5 Cr, bal Fe
At 70°F: 120,000 TS; 15 El.
At 1100°F: 40,000 TS; 40 El.
At 1500°F: 10,000 TS; 90 El.
For inlet and exhaust valves; resists leaded fuels and scaling.

JESSOP H 30.
M-261, M-486; 0.6 C, 0.65 Mn, 0.6 Cr, bal Fe.
For chisels, rivet snaps, expander mandrels, wear and shock resistant.

JESSOP H31.
M-261; 0.4 C, 0.4 Mn, 0.3 Si, 1.1 Cr, 0.7 Mo, bal Fe.
Oil hardened: 130,000 TS; 96,000 YS; 20 El; 40 RA.
For turbine disks; heat resistant.

JESSOP H-32.
M-261; M-486; 0.3 C, 0.6 Mn, 0.55 Mo, 3.22 Cr, bal Fe.
Heat treated: 90,000-200,000 TS; 34,000-170,000 YS; 22-10 El; 248-444 Brin.
For crankshafts, cylinder liners; shock resistant, nitriding steel.

JESSOP H 33.
M-261, M-486; 1 C, 0.35 Mn, 6.25 Cr, 1 Mo, bal Fe.
For shear blades, press tools, taps, dies; abrasion resistant.

JESSOP H-34.
M-261, M-486; 0.35 C, 0.6 Mn, 1 Cr, 0.7 Mo, bal Fe
Heat treated: 90,000-140,000 TS; 70,000-120,000 YS; 22-15 El; 230-360 Brin.
For superheater tubes, gears; creep and shock resistant.

JESSOP H-35.
M-261, M-486; 0.3 C, 0.5 Mn, 1 Cr, 1.2 Mo, bal Fe.
Heat treated: 110,000 TS; 90,000 YS; 18 El; 293 Brin.
For crankshafts; shock resistant, nitriding steel.

JESSOP H-36
M-261, M-486; 0.35 C, 0.5 Mn, 1.5 Cr, 0.2 Mo, 1 Al, bal Fe.
Heat treated: 70,000-90,000 TS; 48,000-84,000 YS; 24-17 El; 207-302 Brin
For crankshafts, cylinder liners; shock resistant, nitriding steel

JESSOP H-38.
M-261, M-486; 0.5 C, 3 Si, 7.5 Cr, 0.5 Mo, bal Fe
At 70°F. 135,000 TS, 25 El
At 1100°F 44,000 TS, 55 El
At 1500°F 7000 TS; 110 El
For auto inlet and exhaust valves; resists scaling.

JESSOP-H39
M-261; 1 C, 1.4 Cr, 0.4 Mo, bal Fe.
For bearings, heading dies; Type L7.

JESSOP H40
M-261, 0.25 C, 0.4 Mn, 0.4 Si, 3 Cr, 0.5 Mo, 0.5 W, 0.75 V, bal Fe
Oil hardened 135,000 TS; 112,000 YS, 18 El, 45 RA.
For turbine disks, heat resistant.

JESSOP H 42.
M-261, M-486; 1.65 C, 0.45 Mn, 13 Cr, 0.7 Mo, 0.3 V, bal Fe
For drawing and extrusion dies, gauges, shear blades; shock resistant.

JESSOP H 44
M-261, M-486, 1 C, 0.7 Mn, 1.45 Cr, bal Fe
For shear blades, punches, press tools; deep hardening, abrasion resistant

JESSOP H-46.
M-261, M-486; 0.2 C, 0.6 Mn, 12 Cr, 0.6 Mo, 0.15 Cb, 0.75 V, bal Fe.
Annealed: 120,000 TS; 90,000 YS; 20 El; 241 Brin
For aircraft gas turbine discs and blades, furnace parts; corrosion and heat resistant, hardenable.

JESSOP H49.
M-261; 0.07 max C, 5 Cr, Mo, V, bal Fe.
For hobbed molds, soft, deep hardening, hobbing steel

JESSOP H50.
M-261; 0.37 C, 1 Si, 5 Cr, 1.1 V, 1.35 Mo, bal Fe.
For extrusion and die casting dies, hot work steel; Type H13 Hot punches, shear blades

JESSOP HIGH SPEED STEEL.
M-69; 13-19 W, 0.6-0.77 C, 3-4 Cr, 0.25-2.25 V, bal Fe.
For high speed cutting tools, drills, reamers; high speed steel.

JESSOP HP.
M-261, M-486; 0.9 C, 0.9 Mn, 1.15 C, 1.5 W, bal Fe.
For press tools, cold punches, gauges, taps; abrasion resistant.

JESSOPS "J-4" STEEL.
M-261; 0.5 C, 1.5 Cr, 2.2 W, 0.25 V, bal Fe.
For hand and pneumatic chisels, boiler cups, punches, shear blades, tools; oil hardened.

JESSOP J 13.
M-261, M-486; 1.2 C, 4.35 Cr, 0.25 Mo, 4.5 V, 14 W, bal Fe.
For broaches, reamers, drills, taps; high speed steel.

JESSOP J 18
M-261, M-486; 0.84 C, 4.5 Cr, 5.5 Mo, 1.4 V, 6 W, bal Fe.
For milling cutters, drills, taps, reamers, broaches; high speed steel.

JESSOP J 23.
M-261, 0.36 C, 0.4 Si, 2.6 Cr, 1 V, 1.8 W, 4.3 Mo, bal Fe
For die casting dies, extrusion dies; hot die steel.

JESSOP J 27.
M-261, M-486; 0.42 C, 3.25 Cr, 0.25 V, 14 W, bal Fe
For die casting dies; resists heat checking hot die steel.

JESSOP J 32
M-261, M-486, 0.35 C, 4 Ni, 1.5 Cr, 5.8 W, 0.35 V, bal Fe.
For mandrels, punches, hot stamping dies; hot work steel

JESSOP J34
M-261; 0.80 C, 4 Cr, 2 V, 6 W, 5 Mo, bal Fe
For drills, taps, reamers, broaches, cutters; high speed steel, Type M2.

JESSOP J35.
M-261; 0.80 C, 4 Cr, 1 V, 1.5 W, 8 Mo, bal Fe.
For drills, taps, reamers, hobs, lathe cutters; high speed steel, Type M1

JESSOP "J" HOT WORK.
M-69, 0.62 C, 3.8 Cr, 0.55 Mo, 0.55 V, bal Fe
For hot work dies, bloom shears, shears, trimmer dies, hot die steel

JESSOP J J
M-69, 0.92 C, 3.8 Cr, 0.5 Mo, 0.5 V, bal Fe
For hot work tools, piercing punches, hot pressed nut dies; hot work steel, wear resistant

JESSOP JS700
M-69; 0.03 C, 25.0 Ni, 21.0 Cr, 4.5 Mo, 1.7 Mn, 0.50 Si, 0.30 Cb, bal Fe
Bar 85,000 TS; 39,000 YS, 45 El; 50 RA; 170 Brin
For agitators, centrifuges, mixers, filters, separators, seals, valves, tanks, Austenitic stainless Resists phosphoric acid in presence of halogens

JESSOP K4 SPECIAL
M-261; 0.90 C, 1 Mn, 0.5 Cr, 0.5 W, bal Fe.
For dies, cutters, punches, hobs, broaches; Type 01; oil hardened, non-deforming

JESSOP K 15.
M-261, M-486; 1.25 C, 1.1 Cr, 0.2 V, 4.5 W, bal Fe
For broaches, reamers, taps, punches; abrasion resistant.

JESSOP K 18.
M-261; 0.32 C, 0.95 Si, 5 Cr, 1.4 W, 1.7 Mo, bal Fe.
For die casting dies, swaging dies; hot die steel.

JESSOP M-1.
M-261, M-486; 0.37 C, 1.5 Mn, 0.25 Mo, bal Fe.
Heat treated: 90,000-130,000 TS; 70,000-105,000 YS; 22-16 El; 241-341 Brin.
For general engineering parts; shock resistant.

JESSOP M-2.
M-261, M-486, 0.35 C, 1.5 Mn, 0.5 Mo, bal Fe.
Heat treated: 90,000-130,000 TS; 70,000-105,000 YS; 22-16 El; 241-341 Brin.
For general engineering components; shock resistant.

JESSOP M-3 Type 1.
M-69; 1.15 C, 4.15 Cr, 3.25 V, 6.00 W, 6.00 Mo, bal Fe.
Hardened. C 64-66 Rock
For broaches, chasers, drills, hobs, lathe and milling tools, reamers, taps and dies.
Good red-hardness.
High speed steel High abrasion resistance.

JESSOP M-3 Type 2
M-69, 1.15 C, 4.15 Cr, 3.25 V, 6 W, 6 Mo, bal Fe.
Hardened. C 64-66 Rock.
For broaches, chasers, drills, hobs, lathe and planer tools, reamers, taps and dies.
Good red-hardness
High speed steel High abrasion resistance

JESSOP NEW PROCESS
M-69, 0.91-0.98 C, 0.2-0.3 Mn, 0.20 Si, bal Fe.
For cold header dies and punches; water hardening

JESSOP NON-MAGNETIC STEEL.
M-69, 0.25-0.40 C, 10.5-12 Mn, 7-8 Ni, bal Fe
80,000-110,000 TS, 35,000-60,000 YS; 25-50 El; 30-60 RA.
For transformer covers, switch covers, electric equipment; austenitic, non-magnetic.

JESSOP OK.
M-261, 0.44 C, 0.35 Mn, 1.3 Cr, 0.15 V, 2.3 W, bal Fe
For punches, chipping chisels, pneumatic tools, tough, shock resistant

JESSOP R-1
M-261, M-486, 0.10 C, 13 Cr, bal Fe
70,000-160,000 TS, 25-15 El, 153-360 Brin.
For fittings, golf club heads, hardware; hardenable, corrosion resistant.

JESSOP R 1A.
M-261, M-486, 0.08 C, 13 Cr, bal Fe.
Hardened. 125,000 TS; 110,000 YS, 16 El, 277 Brin.
For plastic molding dies, corrosion resistant

JESSOP R-2
M-261, M-486, 0.20 C, 13 Cr, bal Fe
90,000-200,000 TS; 20-10 El; 207-444 Brin.
For steam valves, knives, piston rods, bolts, hardenable, corrosion resistant

JESSOP R-3.
M-261, M-486, 0.12 C, 10.5 Ni, 17 Cr, bal Fe.
Annealed 70,000 TS; 30 El.
For fittings, chemical plant equipment, austenitic, stainless

JESSOP R-4.
M261 M-486; 0.16 C, 1.5 Ni, 16.5 Cr, bal Fe.
110,000-180,000 TS; 15-10 El, 241-400 Brin
For seaplane parts, propeller shafts, steam valves; corrosion resistant, hardenable.

JESSOP R-9
M-261, M-486; 0.12 C, 1.2 Si, 10 Ni, 18 Cr, 2 Mo, 0.5 Ti, bal Fe.
Annealed: 70,000 TS; 30 El.
For chemical plant equipment, textile equipment; austenitic, stainless.

JESSOP R-10.
M-261, M-486; 0.12 C, 12 Ni, 12 Cr, bal.Fe.
Annealed: 66,000 TS; 35 El.
For cooking utensils, hollowware; austenitic, stainless.

JESSOP R-11.
M-261, M-486; 0.15 C, 1.2 Si, 14 Ni, 23 Cr, 0.8 Mo, bal Fe.
For furnace parts, annealing boxes, dampers; heat resistant, austenitic.

JESSOP R-12.
M-261, M-486; 0.12 C, 1.25 Si, 1.25 Ni, 27 Cr, 0.7 Mo, 0.4 Ti, bal Fe.
For furnace linings, flame tubes, tubes, cowling; high scale resistant.

JESSOP R-13.
M-261, M-486; 0.30 C, 0.5 Mn, 6.5 Ni, 18 Cr, 2 W, 1.6 Si, bal Fe.
For salt pots, lead baths, recuperators; heat and corrosion resistant.

JESSOP R-15.
M-261, M-486; 0.17 C, 14 Cr, S and Zr, bal Fe.
90,000 TS; 20 El; 192-269 Brin.
For food processing equipment, nuts, bolts, rivets; corrosion resistant.

JESSOP R-16.
M-261, M-486; 0.10 C, 1.2 Si, 9.5 Ni, 18.5 Cr, 0.7 Ti, bal Fe.
Annealed: 70,000 TS; 30 El.
For exhaust manifolds and cowling; austenitic, stainless.

JESSOP R-17.
M-261, M-486; 0.35 C, 0.6 Mn, 1.4 Si, 25 Ni, 18 Cr, 2 W, bal Fe.
For salt pots, carburizing boxes; austenitic, heat resistant.

JESSOP R-18.
M-261, M-486; 0.35 C, 1.8 Si, 18 Cr, 8 Ni, 3.5 W, bal Fe.
For furnace parts, impellers; scale resistant, austenitic.

JESSOP R-19.
M-261, M-486; 0.30 C, 14 Cr, S and Zr, bal Fe.
100,000 TS; 20 El; 227-277 Brin.
For shafts, steam valves, chemical industries; corrosion resistant.

JESSOP R-20
M-261, M-486; 0.10 C, 14 Ni, 19 Cr, 1.7 Nb, bal Fe
For exhaust manifolds, furnace parts, cowlings; austenitic, heat resistant.

JESSOP R-22.
M-261; 0.3 C, 25 Cr, 14.5 Ni, 3.2 W, 1.3 Si, bal Fe
For in-let nozzle blades; high heat resistant.

JESSOP R-22.
M-486; 0.30 C, 0.6 Mn, 25 Cr, 14 Ni, 1.35 Si, 3 W, bal Fe.
For furnace parts, valves, impellers; austenitic, heat resistant.

JESSOP R-23.
M-261, M-486; 0.12 C, 22 Ni, 25 Cr, 1.7 Si, bal Fe.
For gas burners, pyrometer tubes; resists heat, austenitic.

JESSOP R-24.
M-261, M-486; 0.10 C, 10.5 Ni, 17.5 Cr, Zr, S or Se, bal Fe.
Annealed: 70,000 TS; 30 El.
For valve and pump parts, chemical plant; austenitic, stainless, free-cutting.

JESSOP R-25.
M-261, M-486; 0.12 C, 9.5 Ni, 18.5 Cr, 2.75 Mo, bal Fe.
Annealed: 70,000 TS; 30 El.
For chemical plant and textile equipment; austenitic, stainless.

JESSOP R-28.
M-261, M-486; 0.16 C, 1.9 Ni, 17 Cr, S and Zr, bal Fe.
110,000 TS; 13 El; 241-302 Brin.
For steam valves, seaplane parts, bolts; corrosion resistant.

JESSOP R-29.
M-261, M-486; 0.12 C, 0.9 Si, 21 Cr, 0.45 Mo, 0.35 Ti, bal Fe.
For nitriding boxes, cowlings for gas turbines; scale resistant.

JESSOP RAPID FINISHING STEEL.
M-69; 1.35 C, 3.75 W, 0.75 Cr, bal Fe
For boring tools, drawing dies, lathe tools, shaving dies; wear resistant.

JESSOP RTS.
M-69; 0.55 C, 0.8 Si, 0.5 Mn, 0.45 Mo, bal Fe.
Heat treated: 290,000 TS; 270,000 YS; 5 El; 15 RA; 60 Rockwell C.
For chisels, punches, dies, sledges; water hardening. Tough, shock resistant.

JESSOP-SAVILLE 6 Star Vanadium.
M-261, 1.0 C, 0 3 Mn, 0 25 Si, 0 12 V, bal Fe
For coining and medal dies, striking dies, parts for cold heading operations
Water hardening, wear resistant.

JESSOP-SAVILLE G.30.
M-261; 0.05-0.12 C, 27-29 Cr, 48-52 Co, 0.5-1.0 Si, 0.3-1.0 Mn, bal Fe.
Forged: 134,000 TS; 88,000 YS, 10 El; 350 DPH.
At 1290°F: 47,000 TS, 33,000 YS; 21 El, 18 RA
For furnace parts, burner tips, quenching baskets, sintering machines
Good oxidation resistance at 2200°F.

JESSOP-SAVILLE G.31.
M-261; 0 25-0.30 C, 2 0-2 2 Cb, 27-29 Cr, 48-52 Co, 0 5-1 0 Si, 0 5-1 0 Mn, bal Fe
Cast. 89,500 TS; 64,000 YS, 4 El, 280 DPH.
For furnace baffles, grates, clinker coolers, rolls. High stress rupture properties. High resistance to thermal shock and oxidation

JESSOP-SAVILLE G 35.
M-261, 0 15 C, 0 50 Si, 12.0 Ni, 19 5 Cr, bal Fe
Annealed: 90,000 TS, 40,000 YS; 60 El; B 82 Rock.
At 1200°F. 45,000 TS; 30,000 YS, 32 El.
For gas turbine rotor blades and nozzle guide vanes.
Austenitic, heat and corrosion resisting, non-hardening.

JESSOP-SAVILLE G.38.
M-261; 0.15 C, 0.50 Si, 12.0 Ni, 16 0 Cr, bal Fe.
Annealed: 85,000 TS, 35,000 YS; 60 El, B 80 Rock.
Cold Drawn: 100,000 TS, 65,000 YS; 40 El; B 95 Rock.
For gas turbine and steam turbine rotors and blades, superchargers.
Austenitic, high creep and heat resistance.

JESSOP-SAVILLE G.40.
M-261; 0.20 C, 0.30 Si, 25.0 Ni, 20.0 Cr, bal Fe.
Annealed: 95,000 TS; 45,000 YS; 50 El; B 89 Rock.

Normalized: 108,000 max TS; 30 El.
For gas turbine rotor blades, jet engine components, heat exchangers. Austenitic. Heat and corrosion resisting

JESSOP-SAVILLE G.41.
M-261; 0.17 C, 12.0 Ni, 16.0 Cr, bal Fe.
Normalized: 98,500 max TS; 36 El.
For gas turbine blades, high temperature bolts, jet engine components.
Austenitic, heat and corrosion resistant.

JESSOP-SAVILLE G.46.
M-261; 0.16 C, 0.30 Si, 11.5 Cr, Mo, V, Cb, bal Fe
Heat treated: 146,000 max TS; 20 El.
For aircraft and gas turbine discs.
High creep strength. Good scale resistance up to 1380°F.

JESSOP-SAVILLE G.47.
M-261; 0.17 C, 0.80 Mn, 1.0 Ni, 0.80 Cr, bal Fe.
Heat treated. 124,000 max TS, 15 El.
For gudgeon pins, pinions, shafts, rifle components
Case hardening steel. Shock resisting

JESSOP-SAVILLE G.48.
M 261; 0.18 C, 0.80 Mn, 1.25 Ni, 0.90 Cr, 0.11 Mo, bal Fe
Heat treated 145,000 max TS, 12 El
For rocker arms and shafts, camshafts, gears, clutch plates, levers, bushings.
Case hardening steel, shock resisting

JESSOP-SAVILLE G.49
M 261, 0.18 C, 0.80 Mn, 1.75 Ni, 0.90 Cr, 0.15 Mo, bal Fe
Heat treated 168,000 max TS; 12 El
For gears, pinions, cams, camshafts, fasteners
Case hardening steel, shock resisting

JESSOP-SAVILLE G.50
M-261, 0.18 C, 0.60 Mn, 2.0 Ni, 1.6 Cr, 0.2 Mo, bal Fe
Heat treated 190,000 max TS, 12 El
For gears, pinions, shafts, camshafts, levers, clutch plates, magneto drive wheels
Case hardening steel. Shock resisting

JESSOP-SAVILLE G.51
M-261, 0.15 C, 0.80 Mn, 0.60 Ni, 0.65 Cr, 0.11 Mo, bal Fe
Heat treated: 101,000 max TS; 18 El.
For rocker arms and shafts, gears, camshafts, rifle components, levers, bushings, pinions.
Case hardening steel Shock resisting.

JESSOP-SAVILLE G.52.
M-261; 0.20 C, 0.80 Mn, 0.60 Ni, 0.65 Cr, 0.11 Mo, bal Fe.
Heat treated: 124,000 max TS; 15 El.
For high duty gears and pinions, bearings, camshafts, clutch plates, tappets.
Case hardening steel Shock resisting.

JESSOP-SAVILLE G.53.
M-261; 0.25 C, 0.80 Mn, 0.60 Ni, 0.65 Cr, 0.11 Mo, bal Fe.
Heat treated: 145,000 max TS.
For rocker arms and shafts, gears, camshafts, bushings, levers.
Case hardening. Shock resisting.

JESSOP-SAVILLE G.64.
M-261; 0.1 C, 11 Cr, 3 Mo, 3.5 W, 2 Cb, 6 Al, B, bal Fe.
For high temperature castings, turbine blades, gas turbine rotors, turbo-blower impellers.
Heat and corrosion resistant.

JESSOP-SAVILLE G.68.
M-261; 0.05 C, 1.5 Mn, 0.5 Si, 25.4 Ni, 14.0 Cr, 1.4 Mo, 2.35 Ti, 0.3 V, 0.35 Al, 0.005 B, bal Fe.
Heat treated: 160,000 TS; 115,000 YS; 20 El; 30 RA; 250-325 Brinell.
For jet engines and superchargers, turbine wheels and blades, afterburners. Precipitation hardening.
Austenitic. Similar to A286

JESSOP-SAVILLE G.84.
M-261, 0.14 C, 10 Cr, 15 Co, 2.5 Mo, 1.25 W, 5 Al, 5.2 Ti, B, bal Ni.
For high temperature castings, turbine blades, gas turbine rotors, turbo-blower impellers
Heat and corrosion resistant.

JESSOP-SAVILLE G.94.
M-261; 0.06 C, 6 Al, 9 Cr, 4 Cb, 10 Co, 4 W, 4 Mo, B, Zr, bal Ni
For high temperature castings, turbine blades, gas turbine rotors, turbo-blower impellers.
Heat and corrosion resistant.

JESSOP-SAVILLE G.110
M-261; 0.02 max C, 0.25 max Cr, 17-19 Ni, 7.0-8.5 Co, 4.6-5.2 Mo, 0.3-0.6 Ti, 0.05-0.15 Al, 0.02 Zr, 0.003 B, 0.05 Ca, bal Fe
Heat treated: 258,000 TS; 247,000 YS; 10 El; 40 RA, 520 Vickers
For rocket motor cases and accessories, bolts, fasteners, pressure vessels.
Maraging steel Tough and ductile at 250,000 YS.

JESSOP-SAVILLE G 125 D V.
M-261, 0.01 C, 18.5 Ni, 9 Co, 4.85 Mo, 0.75 Ti, 0.10 Al, 0.05 Si, 0.05 Mn, bal Fe.
Aged. 318,000 TS, 294,000 YS, 8 El; 50 RA.
For rotor motor cases and accessories, fasteners, aircraft structures, pressure vessels
Maraging steel, weldable, hardened by aging. Good notch toughness.

JESSOP-SAVILLE H 48.
M-261, 0.45 C, 0.6 Si, 4.7 Ni, 24.0 Cr, 2.9 Mo, bal Fe
At 70°F: 150,000 max TS; 11 El
At 1470°F: 34,000 max TS, 50 El.
For exhaust valves for aircraft and automobile engines.
Corrosion and heat resisting. Air hardening

JESSOP-SAVILLE H 51.
M-261; 0.19 C, 0.25 Si, 0.55 Mo, 0.25 V, bal Fe.
Heat treated 130,000 max TS; 24 El
For gas turbine rotors and discs, high temperature stressed components.
High creep strength up to 1020°F., shock resistant.

JESSOP-SAVILLE H.52.
M-261, 0.12 C, 0.35 Si, 16.0 Cr, bal Fe
Bar: 90,000 max TS; 15 El.
For steam turbine and gas turbine components.
Non-hardenable. Good creep resistance. Suitable for welding.

JESSOP-SAVILLE H. 53.
M-261; 0.06 C, 11 Cr, 0.8 Mo, 0.45 Cb, 0.5 V, 6.5 Co, 0.8 W, B, bal Fe.
At 75°F: 148,000 TS, 130,000 YS, 18 El; 62 RA.
At 1200°F: 56,000 TS; 50,200 YS; 28 El; 76 RA.
For gas turbine discs, compressor discs.
High heat resistance. Martensitic stainless steel.

JESSOP-SAVILLE H.55.
M-261; 0.55 C, 0.8 Mn, 1.0 Cr, 0.42 Mo, 0.5 Ni, 0.2 V, bal Fe.
Ht. Tr.: 265,000 TS; 250,000 YS; 10 El; 514 Brin.
For die blocks, forging dies, punches, turbine rotors, rollers.
High strength, tough, shock resistant.

JESSOP-SAVILLE H.59.
M-261; 0.07 C, 0.15 Cb, 11 Cr, 1.5 Mo, 3.0 Ni, 0.3 V, bal Fe.
Annealed: 80,000 TS; 38,000 YS; 24 El; B 95 Rock.
For table flatware, oil refinery and chemical plant equipment.
Corrosion resistant, nonhardenable.

JESSOP-SAVILLE-H.D.S.
M-261; 0.28 C, 3.2 Cr, 9.5 W, 0.3 V, bal Fe.
Hardened: 243,000 TS; 215,000 YP, 12 El; 37 RA; Rock C 50.
For extrusion dies and liners, forging dies, trimming dies, punches, rotary shear blades.
Hot work steel, AISI Type H21.

JESSOP-SAVILLE J.12.
M-261; 0.26 C, 3.0 Ni, 2.75 Cr, 10.0 W, 0.50 Mo, 0.30 V, bal Fe.
For forging dies for brass, die inserts.
Tough, oil hardening, hot work steel.

JESSOP-SAVILLE J.36.
M-261; 1.5 C, 4.75 Cr, 5 V, 12.5 W, 5 Co, bal Fe.
Hardened: C 64-68 Rock.
For form and planing tools, roll turning tools, broaches, milling cutters, end mills, gear cutters.
High speed steel. Highest wear resistant. High red-hardness.

JESSOP-SAVILLE J.O. SPECIAL.
M-261; 0.28 C, 3.2 Cr, 9.5 W, 0.3 V, bal Fe.
Heat treated: 224,000 TS; 191,000 YS, 12 El; C 51 Rock.
At 600°C: 134,000 TS; 103,000 YS; 10 El; 28 RA.
For extrusion dies and liners, forging and trimming dies, hot punches, rotary shear blades.
Hot work steel, Type H21.

JESSOP-SAVILLE K.S.A.
M-261; 0.90 C, 1.85 Mn, 0.25 Si, 0.45 Cr, 0.45 W, bal Fe.
Hardened: C 60-65 Rock.
For gages, taps, dies, chasers, cams, blanking and forming dies.
Oil hardening, tough, shock resisting, non-deforming.

JESSOP-SAVILLE R.27.
M-261; 0.42 C, 3.25 Cr, 14 W, 0.25 V, bal Fe.
For forging dies, extrusion dies, punches, shear blades.
Hot work steel. Oil hardening, good red-hardness.

JESSOP-SAVILLE R.34.
M-261; 0.30 C, 13.0 Cr, bal Fe.
Heat treated: 246,000 max TS; 10 El; C 52 Rock.
Annealed: 95,000 TS; 50,000 YS; 25 El; 196 Brin.
For knife blades, cutlery, surgical instruments, needle valves, gauges.
Hardenable, corrosion resisting steel.

JESSOP-SAVILLE R.40.
M-261; 0.21 C, 1.0 Si, 11.5 Ni, 22.5 Cr, 1.0 W, bal Fe.
For unstressed furnace parts, valves, impellers, dampers, roller hearths, burner nozzles.
Heat and corrosion resistant. Not hardenable, austenitic.

JESSOP-SAVILLE R.41.
M-261; 0.10 max C, 12.0 Ni, 17.0 Cr, 2.35 Mo, bal Fe.
Annealed: 78,000 TS; 30 El; B 78 Rock.
Cold Rolled: 125,000 TS; 100,000 YS; 25 El; 250 Brin.
Chemical plant equipment, paper making and textile plant equipment.
Stainless, acid resisting, austenitic, non-hardenable.

JESSOP-SAVILLE R.42.
M-261; 0.08 max C, 8.5 Ni, 18.0 Cr, bal Fe.
Annealed: 78,000 max TS; 30 El; B 80 Rock.
Cold Rolled: 150,000 TS; 100,000 YS; 25 El; B-100 Rock.
For chemical plant equipment, airscrews, fish knives, fittings, cooking utensils.
Austenitic, stainless steel, Type 304, non-heat treatable.

JESSOP-SAVILLE SPECIAL-BB
M-261; 0.28 C, 3.20 Cr, 9.5 W, 0.3 V, bal Fe.
Heat treated: 224,000 TS; 191,000 YS; 12 El; C 51 Rock.
At 600°C: 134,000 TS; 103,000 YS; 10 El; 28 RA.
For extrusion dies and liners, forging dies, hot trimming dies, and punches, rotary shear blades.
Hot work steel, Type H21.

JESSOP-SAVILLE S.V.L.
M-261; 0.32 C, 1.3 Cr, 0.3 Mo, 0.5 Mn, 0.25 Si, bal Fe
For cold punches, trimming dies, shear blades, chisels
Oil or air hardening. Shock resistant.

JESSOP-SAVILLE W P S
M-261; 2.3 C, 0.35 Mn, 0.30 Si, 13 Cr, bal Fe
Hardened: C 65-67 Rock
For blanking and forming dies, gauges, shear blades, thread rollers, mandrels
Oil or air hardening. Nondeforming, wear and abrasion resistant.

JESSOP-SAVILLE ZIRCONIUM.
M-261; 1.5 Sn, 0.12 Fe, 0.10 Cr, 0.05 Ni, bal Zr.
At 70°F. 74,000 TS, 42,700 YS, 28 El, 38 RA.
At 930°F: 24,200 TS; 12,000 YS; 40 El, 60 RA
For canning and structural material for use in pressurized water reactors
Corrosion resistant and low neutron absorption.

JESSOP SHEET SPRING
M-261; 0.95 C, 0.30 Mn, bal Fe.
For tools, springs, water hardened.

JESSOP SPECIAL ALLOY B.
M-261, M-486; 1.6 C, 0.6 Cr, 5.5 W, bal Fe.
For drawing dies, working tools, stone cutting tools; wear resistant.

JESSOP SPECIAL H 4.
M-261, 0.9 C, 1.85 Mn, 0.45 Cr, 0.45 W, bal Fe.
For gauges, taps, dies, chasers, cams, pawls; non-deforming, oil hardening.

JESSOP SPECIAL K 4.
M-261, M-486; 0.92 C, 1.25 Mn, 0.45 Cr, 0.45 W, bal Fe.
For gauges, taps, dies, chasers, cams; non-deforming, oil hardening

JESSOP STEEL NO. 5.
M-69; 0.2 C, 20 Cr, 12 Ni, bal Fe.
Hot rolled: 130,500 TS; 107,300 YS; 31 El; 60 RA; 260 Brin.
At 1000°C: 18,000 TS; 26 El, 42 RA.
For furnace parts, recuperators, pumps, boiler baffles, annealing boxes, oil stills; heat and corrosion resistant; resists scaling to 2100°F.

JESSOP STEEL "A-2."
M-261; 0.10-0.18 C, 0.6-0.09 Mn, bal Fe.
Case hardened core: 85,000 TS; 56,000 YS; 25 El; 60 RA; 180 Brin.
For case hardened parts; case-hardening steel.

JESSOP STEEL "A-4." (S.M.-30).
M-261; 0.25-0.35 C, 0.6-0.8 Mn, bal Fe.
76,200-80,100 TS; 45,000-51,500 YS; 30-35 El; 55-60 RA; 150-160 Brin. For shafts, axles, machinery parts; water hardened.

JESSOP STEEL "A-5" (S.M.-40).
M-261; 0.35-0.45 C, 0.6-0.8 Mn, bal Fe.
85,200-89,600 TS; 49,000-65,000 YS; 26 El; 55 RA; 170 Brin. For gears, pinions, shafts, machinery parts; water hardening.

JESSOP STEEL "B" (S.M.-50).
M-261; 0.5-0.6 C, 0.5-0.7 Mn, bal Fe.
89,600-112,000 TS; 51,500-56,000 YS; 20-25 El; 45-50 RA; 187-217 Brin.
For axles, shafts, wheels, shock resistant tools; water hardening.

JESSOP STEEL "C-1" (S.M.-60).
M-261; 0.6-0.7 C, 0.4-0.6 Mn, bal Fe.
98,600 TS, 51,500 YS; 21 El; 40 RA; 200 Brin.
For blanking, drawing and trimming dies, punches, hobs, gages; abrasive resistance, non-deforming.

JESSOP STEEL "C-2" (S.M.-80).
M-261; 0.75-0.85 C, 0.4-0.6 Mn, bal Fe.
Heat treated: 134,000-156,800 TS; 100,800-123,200 YS; 12-18 El, 40 RA; 320 Brin.
For blanking, drawing and trimming dies, punches, hobs, gages; resists scaling, corrosion and abrasion

JESSOP STEEL "E."
M-261, 0.10-0.15 C, 0.2-0.6 Mn, 3-3.5 Ni, bal Fe.
Case hardened core: 100,800-136,700 TS; 71,700-85,200 YS; 15-20 El; 40 RA; 280-300 Brin
For case-hardened parts, gears; case-hardening steel

JESSOP STEEL "E-1."
M-261, 0.4-0.45 C, 0.4-0.85 Mn, 3-3.5 Ni, bal Fe.
Heat treated 112,000-125,000 TS; 71,700-85,200 YS, 22-27 El; 47 RA; 225 Brin
For gears, pinions, crankshafts, structural parts; high impact strength.

JESSOP STEEL "F."
M-261; 0.5-0.6 C, 0.7-0.8 Mn, 0.6-0.8 Cr, 0.25 V, bal Fe
Heat treated: 132,000 TS; 91,800 YS; 25-30 El; 62 RA; 240 Brin.
For tools, wheels, jaws, clutches, springs; oil hardening

JESSOP STEEL "G."
M-261; 0.28-0.35 C, 0.45-0.60 Mn, 2.5-3.5 Ni, 0.75-1.0 Cr, bal Fe.
Heat treated: 112,000 TS; 78,400 YS; 20-25 El; 50 RA; 240 Brin.
For gears, pinions, shafts; oil hardening.

JESSOP STEEL "G-1."
M-261; 0.28-0.35 C, 4-5 Ni, 1-1.5 Cr, 0.2 Mo, bal Fe.
Heat treated: 123,000 TS; 100,800 YS; 20 El; 45 RA; 260-270 Brin.
For gears, shafts, pinions, clutches, jaws; air hardening.

JESSOP STEEL "H-2."
M-261; 0.95-1.05 C, 0.3 max Si, 0.25-0.40 Mn, 1.3-1.5 Cr, bal Fe.
For balls, shear blades; abrasion resistant.

JESSOP STEEL "H-3."
M-261; 0.55-0.65 C, 1.4-1.6 Si, 0.3-0.6 Mn, 6-7 Cr, bal Fe.
Heat treated: 118,700-130,000 TS; 69,000-80,500 YS; 24-28 El; 50-60 RA; 230 Brin.
For valves, inlet and exhaust; air hardening.

JESSOPS SUPERIOR OIL HARDENING.
M-261; 0.95 C, 1.2 Mn, 0.5 Cr, 0.5 W, bal Fe.
For tools and dies, punches; non-deforming steel.

JESSOP TOOL.
M-261; 0.7-1.2 C, bal Fe.
For tools, drills, taps; water hardened.

JESSOP TTQ.
M-261; 0.8 C, 5 Cr, 20 W, 1.6 V, 11 Co, bal Fe.
For broaches, reamers, planer and lathe cutters; high speed steel, oil hardened.

JESSOP TYPE R.
M-69; High speed steel with low C steel backing.
For clipper knives, blades, planer knives; composite tool steel.

JESSOP WEX 491.
M-261; 1.0 C, 2 Cr, 2 Mn, 1 Mo, bal Fe.
For tool shanks, punches; air hardened, nondeforming.

JETALLOY 209.
M-1530; 0.02 C, 20 Cr, 10 Ni, 15 W, 2 Ti, 1 Fe, bal Co.
For high temperature applications; high creep resistance, oxidation and wear resistant.

JETALLOY 249.
M-1530; cobalt alloy.
For corrosion resistant applications; resists corrosion and abrasion.

JET FORGE.
M-115; 0.45-0.50 C, 1.3 Mo, 1.4 V, 0.9 Si, 0.3 Mn, 0.25-0.80 Cr, bal Fe.
For forging dies; air hardened, hot work steel.

JETHETE-M.140.
M-430, M-1724; 0.08 C, 13 Cr, 1 Mo, bal Fe.
Annealed: 75,000 TS; 35,000 YS; 30 El; B 92 Rock.
Cold Drawn: 85,000 TS; 70,000 YS; 20 El; 185 Brin.
For springs, table flatware, oil refinery equipment, annealing boxes.
Corrosion resistant, ferritic, non-hardenable.

JETHETE M-151.
M-1724; 0.10 C, 1.5 Mn, 1.25 Ni, 12.0 Cr, 0.6 Mg, 0.3 V, bal Fe.
Heat treated: 134,400 TS; 112,000 YS; 15 El.
For gas turbine discs and blades; creep resistant.

JETHETE M-152.
M-1724; 0.12 C, 0.7 Mn, 2.5 Ni, 12.0 Cr, 1.7 Mo, 0.3 V, bal Fe.
Heat treated: 134,400 TS; 112,000 YS; 20 El.
For gas turbine discs and blades; creep resistant.

JETHETE M 153.
M-430; 0.10 C, 1.5 Mn, 1.5 Ni, 12.0 Cr, 1.25 Mo, bal Fe.
Heat treated. 134,000-190,000 TS; 103,000-146,000 YS; 25-12 El; 64-25 RA.
For high temperature applications; heat resistant.

JETHETE M 154.
M-430, M-1724; 0.08-0.15 C, 0.5-1.0 Mn, 2-3 Ni, 11-13 Cr, 1.5-2.0 Mo, 0.25-0.40 V, 0.05 N, bal Fe.
Hardened: 147,000 TS; 129,000 YS; 10 El.
For turbine blading, bolting, gas turbine components.
Good oxidation resistance and high strength at elevated temperatures.

JETHETE M.160.
M-1724; 0.20 max C, 11-13 Cr, 1.0 max Mo, 1.0 max V, 0.7 max Cb, 1.25 max Ni, bal Fe.
At 70°F: 143,000 TS; 121,000 YS; 22 El; 56 RA.
At 570°F: 124,000 TS; 106,000 YS; 18 El; 51 RA.
At 750°F: 116,000 TS; 97,000 YS; 22 El; 65 RA.
For gas turbine compressor blades, corrosion and heat resistant.

JETHETE M.210.
M-430, M-1724; 0.10 C, 12 Cr, 2.8 Mo, 0.3 V, 0.25 Cb, 7 Co, 0.015 B, bal Fe.
For aircraft and steam turbine blades, jet engine blades and discs.
Heat resistant to 1000°F.

JET-LH 8018-C1.
M-578; 0.12 C, 1.20 Mn, 0.03 P, 0.04 S, 0.60 Si, 2.50 Ni, bal Fe.
Steel arc welding electrode. AWS Class E8018-C1.

JET-LH 8018-C3.
M-578; 0.12 C, 0.4 Mn, 0.03 P, 0.03 S, 0.80 Si, 1.0 Ni, 0.15 Cr, 0.35 Mo, 0.05 V, bal Fe.
Steel arc welding electrode AWS Class E8018-C3.

JET-LH BU-90.
M-578; 0.14 C, 1.15 Mn, 0.60 Si, 1.40 Cr, bal Fe.
Hard surfacing arc welding electrode, for resistance to metal to metal wear.

JETWELD 1.
M-578; C, bal Fe.
Steel arc welding electrode.
AWS Class E7024.

JETWELD 2.
M-578; C, bal Fe.
Steel arc welding electrode.
AWS Class E6027.

JETWELD 2HT.
M-578; C, bal Fe.
Steel arc welding electrode.
AWS Class E7027-A1.

JETWELD 3.
M-578; C, bal Fe
Steel arc welding electrode.
AWS Class E7024.

JETWELD LH70.
M-578; C, bal Fe.
Steel arc welding electrode.
AWS Class E7018.

JETWELD LH-90.
M-578; 0.12 C, 0.90 Mn, 0.03 P, 0.04 S, 0.06 Si, 1.25 Cr, 0.5 Mo, bal Fe.
Steel arc welding electrode.
AWS Class E8018-B2.

JETWELD LH-110.
M-578; 0.10 C, 1.3 Mn, 0.03 P, 0.03 S, 0.60 Si, 2.0 Ni, 0.40 Cr, 0.35 Mo, 0.05 V, bal Fe.
Steel arc welding electrode
AWS Class E 11018-M.

JETWELD LH3800.
M-578; C, bal Fe.
Steel arc welding electrode
AWS Class E7028.

JEWEL CAST IRON.
Eng.; 0.88 combined C, 1.24 graphite, 0.14 Mn, 0.81 Si, bal Fe. Cast.
For castings, gears, housings; cast iron.

JEWELER'S METAL.
Eng.; 91.5-83 Cu, 6.5-17 Zn, 0-2 Sn.
For jewelry; corrosion resistant.

JEWELRY BRONZE.
M-33; 87.5 Cu, 12.5 Zn.
Annealed: 40,000 TS; 13,000 YS; 46 El.
Hard rolled: 66,000 TS; 56,000 YS; 5 El.
For costume jewelry, slide fasteners; containers; red brass.

JEWELRY BRONZE 226.
M-279; 87 Cu, 13 Zn.
Ann: 37,000-45,000 TS; 10,000-21,000 YS; 35-46 El.
Cold rolled: 42,000-86,000 TS; 16,000-75,000 YS; 2-40 El.
For jewelry, buckles, slide fasteners.
Gold color, easily buffed and finished.

"J" HOT WORKING DIE
M-69; 0.4 C, Cr, bal Fe.
For hot working tools and dies; hot work steel ; oil hardened.

JISCON
M-1032; 2.3-2.5 C, 6.0-6.25 Si, 1.25 Cu, 0.5 Cr, bal Fe.
For high temperature castings; resists growth and scaling to 1700°F.

JISCO SILVERY
M-1032; 5-17 Si, 1-2 Mn, 0.8-3.0 C, bal Fe.
For foundry steel and iron castings; pig iron.

JJ HOT WORK see JESSOP JJ.

J.L
M-620, 4.5 Cu, bal Al.
64,000 TS, 5 El, 120 Brin.
For light alloy parts; age-hardenable.

J & L Type 303SM.
M-173, 0.08 C, 1.5 Mn, 0.8 Si, 0.15 min S, 18 Cr, 9 Ni, bal Fe
Annealed: 90,000 TS; 35,000 YS, 50 El, 55 RA; 160 Brin
Cold drawn: 125,000 TS, 90,000 YS; 20 El; 50 RA; 277 Brin
For stainless screw machine products, fasteners, instrument gears, trim
Free-machining, stainless, austenitic, nonmagnetic

J & L Type 304SM.
M-173, 0.08 max C, 2.0 max Mn, 0.045 max P, 0.030 max S, 1.0 max Si, 18-20 Cr, 8-12 Ni, bal Fe.
Annealed 82,000 TS; 35,000 YS; 60 El; 70 RA; B 80 Rock
For beer barrels, chemical equipment, evaporators, milking machines, sanitary fittings, vacuum pump parts
Stainless, austenitic

J & L Type 316SM
M-173; 0.08 max C, 2.0 max Mn, 0.045 max P, 0.030 max S, 1.0 max Si, 16-18 Cr, 10-14 Ni, 2-3 Mo, bal Fe.
Annealed: 80,000 TS; 30,000 YS; 60 El; 70 RA; B 78 Rock.
For chemical and food industries, screens, storage and transportation tanks, digesters.
Stainless, austenitic.

J & L Type 416SM.
M-173; 0.15 max C, 1.25 max Mn, 0.060 max P, 0.15 min S, 1.0 max Si, 12-14 Cr, 0.6 max Mo, bal Fe.
Annealed: 80,000 TS; 45,000 YS; 30 El; B 85 Rock
For stainless screw machine products; bolts, fasteners, pump parts, shafts.
Free machining, corrosion resistant, hardenable.

J & L 1113 Bessemer-Selenium Leaded.
M-173; 0.09 max C, 0.70-1.00 Mn, 0.07-0.12 P, 0.25-0.35 S, 0.15-0.35 Pb, bal Fe.
For screw machine products, fasteners, cams, camshafts
Free machining, case hardening.

J & L-B11L13.
M-173; 0.09 max C, 0.70-1.00 Mn, 0.07-0.12 P, 0.25-0.35 S, 0.15-0.35 Pb, bal Fe.
Cold Drawn: 82,000 TS; 75,000 YS; 16 El; 37 RA; 174 Brin
For automatic screw machine products, bolts, shafts, fasteners.
Free-machining.

J & L—1211.
M-173; 0.08-0.13 C, 0.07-0.12 P, 0.08-0.15 S, 0.6-0.9 Mn, bal Fe.
Cold drawn: 82,000 TS; 80,000 YS; 14 El; 47 RA; 174 Brin.
For screw machine products, bolts, shafts; AISI-C1211, free-cutting.

J & L—1212.
M-173; 0.13 max C, 0.16-0.23 S, 0.07-0.12 P, 0.7-1.0 Mn, bal Fe.
Cold drawn: 82,000 TS; 80,000 YS, 14 El; 47 RA; 174 Brin.
For screw machine products, bolts, shafts, screws; AISI-C1212, free cutting.

J & L—1213.
M-173, 0.09 max C, 0.24-0.33 S, 0.07-0.12 P, 0.7-1.0 Mn, bal Fe.
Cold drawn: 82,000 TS; 80,000 YS; 14 El; 47 RA; 174 Brin.
For screw machine products, bolts, screws, shafts; AISI-C1213, free-cutting

J & L—12L13
M-173; 0.09 max C, 0.70-1.00 Mn, 0.07-0.12 P, 0.25-0.35 S, 0.15-0.35 Pb, bal Fe.
For screw machine products, fasteners, hardware cams, camshafts.
Free machining, case hardening.

J & L 1215
M-173, 0.09 max C, 0.75-1.05 Mn, 0.04-0.09 P, 0.25-0.35 S, bal Fe.
For screw machining products, fasteners, cams, gears, camshafts.
Free-machining, case hardening.

J & L Type A.
M-173, 0.15 max C, 0.80-1.20 Mn, 0.04-0.09 P, 0.25-0.35 S, 0.15-0.35 Pb, bal Fe.
Cold drawn. 83,000 TS; 75,000 YS, 16 El; 37 RA; 174 Brin
For automatic screw machine products, shafts, bolts, fasteners, cams.
Free-machining. AISI C12L14.

J & L Type A-Selenium.
M-173, 0.15 max C, 0.80-1.20 Mn, 0.04-0.09 P, 0.25-0.35 0.15-0.35 Pb, Se, bal Fe
Cold Drawn. 83,000 TS, 75,000 YS; 16 El; 37 RA; 175 Brin.
For automatic screw machine products, bolts, fasteners, cams, shafts. Free machining.

J & L Type B.
M-173; 0.15 max C, 0.85-1.35 Mn, 0.04-0.09 P, 0.40 min S, 0.15-0.35 Pb, bal Fe.
Cold Drawn: 87,000 TS; 79,000 YS; 12.5 El; 36.5 RA; 174 Brin.
For automatic screw machine products, screws, bolts, fasteners, shafts. Free machining.

J. & L. CORRECT BALANCE.
M-173; C, bal Fe.
For forgings.

JLX-36.
M-173; 0.15 max C, 0.90 max Mn, bal Fe.
Sheet: 50,000 TS; 36,000 YS; 28 El (minimum) B 63-75 Rock.
For construction applications, bridges, tanks.
Good formability, weldability and notch toughness.

JLX-42.
M-173; 0.20 max C, 1.2 max Mn, bal Fe.
Plate: 57,000 TS; 42,000 YS; 25 El; 120-150 Brin.
For construction applications, booms, derricks, tanks.
Good formability, weldability and notch toughness.

JLX-45.
M-173; 0.22 max C, 1.2 max Mn, bal Fe.
Plate: 60,000 min TS; 45,000 min YP; 24 min El; 130-150 Brin.
For construction applications, mine cars, derricks, tanks.
Good formability, weldability and notch toughness.

JLX-50.
M-173; 0.24 max C, 1.2 max Mn, S, P, bal Fe.
Rolled. 50,000 min YS; 65,000 min TS; 22 min El; 140-160 Brin.
For construction applications, cars, booms, derricks, bridges.
Small grain size. Good formability and weldability with improved toughness

JLX-50CC.
M-173, 0.12 C, 0.90 max Mn, 0.01 min Cb, bal Fe.
Plate. 50,000 min YP; 26-30 El; 65,000 min TS.
For automotive, truck, railroad, trailer, construction and mining components.
Good formability, weldability and toughness.
High strength, low alloy constructional steel, good weldability

JLX-55
M-173, 0.25 max C, 1.35 max Mn, bal Fe
Rolled: 70,000 min TS, 55,000 min YP; 20 min El; 155-180 Brin
For construction applications, gears, derricks, bridges
Good formability and weldability and notch toughness

JLX-60
M-173; 0.26 max C, 1.5 max Mn, bal Fe.
Rolled· 75,000 min TS, 60,000 min YP; 18 min El; 170-200 Brinell.
For construction applications, bridges.
Good formability and weldability and notch toughness

JLX-65
M-173; 0.26 max C, 1.65 max Mn, bal Fe.
Rolled· 80,000 min TS; 65,000 min YP, 16 min El; 190-225 Brin.
For construction applications, bridges.
Good formability, weldability and notch toughness.

JLX-70.
M-173, 0.26 max C, 1.65 max Mn, bal Fe.
Rolled: 85,000 min TS; 70,000 min YP; 14 min El; 210-240 Brin.
For construction applications, mine cars, bus bodies, derricks.
Good formability, weldability and notch toughness.

JLX-W.
M-173; 0.20 max C, 0.50-1.0 Mn, 0.10 max Si, 0.01 min Cb, bal Fe.
Gr. 45: 60,000 TS; 45,000 YP; 24 El; B 79 Rock.
Gr. 50: 65,000 TS; 50,000 YP; 22 El; B 82 Rock.
Gr. 55: 70,000 TS; 55,000 YP; 20 El; B 83 Rock.
Gr. 60: 75,000 TS; 60,000 YP; 18 El; 8 85 Rock.
For water wheel generators, freight cars, trucks, storage tanks.
Produced to minimum yield points indicated.

JOBBINS 3-6-6 SUPREME.
M-1103; 2.5-3.5 Cu, 5-6 Si, 5-6 Zn, bal Al.
Cast: 26,000 TS; 14,500 YS; 2 El; 65 Brin.
T 6 Temper: 45,000 TS; 38,000 YS; 1 El; 100 Brin.
For sand and permanent mold castings; hardenable.

JOBBINS 3-6 SUPREME.
M-1103; 2.75-3.75 Cu, 5.5-6.5 Si, bal Al.
Cast: 29,000 TS; 17,000 YS; 2.5 El; 75 Brin.
T 6 Temper: 40,000 TS; 28,000 YS; 2 El; 90 Brin.
For sand and permanent mold castings; heat treatable.

JOBBINS 4-8 SUPREME.
M-1103; 3.5-4.5 Cu, 7.5-9.5 Si, bal Al.
Cast: 32,000 TS; 17,000 YS; 2.5 El; 85 Brin.
T 6 Temper: 45,000 TS; 28,000 YS; 3.0 El; 100 Brin.
For permanent mold castings; hardenable.

JOBBINS ALMAG 35.
M-1103; 6-8.5 Mg, 0.1 Ti, 0.05 Be, 0.1 Mn, bal Al.
Cast: 40,000 TS; 20,000 YS; 12 El; 70 Brin.
For castings; sand or die cast.

JOBBINS ALMAG 56.
M-1103; 9.5-10.5 Mg, bal Al.
Cast T 4 Temper: 58,000 TS; 30,000 YS; 18 El; 95 Brin.
For sand castings; heat treatable.

JOHNSON.
9-36 Ni, 10-30 Cr, 1-10 Si, bal Fe.
For heat and corrosion resisting parts; heat and corrosion resistant.

JOHNSON NO. 9 BABBITT ALLOY.
M-172; Pb, Sb, bal Sn.
For automobile bearings; Babbitt metal.

JOHNSON BRONZE NO. 12
M-172; 90 Sn, 7.5 Sb, 2.5 Cu.
For bearings; high speed and high temperature service.

JOHNSON BRONZE NO. 19.
M-172; 70 Cu, 11 Sn, 19 Pb.
17,500 TS; 20,700 YS; 4-12 El; 62 Brin.
For mill bearings, engine bearings, general machinery bearings; heavy duty.

JOHNSON BRONZE NO. 25.
M-172; 75 Cu, 5 Sn, 19 Pb, 1 0 Ni.
22,500 TS; 16,750 YS; 7-15 El; 44 Brin.
For bearings for pumps, cylinder sleeves, electric motors; v. Plastic Bronze.

JOHNSON BRONZE NO. 27.
M-172; 80 Cu, 10 Sn, 10 Pb.
30,000 TS; 19,000 YS; 5-15 El; 58 Brin.
For bearings for locomotive crossbeds, lathes, grinders, motors; v. S.A.E. No. 64.

JOHNSON BRONZE NO. 29.
M-172; 78 Cu, 7 Sn, 15 Pb.
24,000 TS; 16,400 YS; 5-13 El; 52 Brin.
For bearings for acid pumps, mining machinery, rolling mills; v. S.A.E. No. 67.

JOHNSON BRONZE NO. 40.
M-172; 90 Cu, 0.5 Sn, 9.5 Zn.
For bearings; sheet metal.

JOHNSON BRONZE NO. 44.
M-172; 86-90 Cu, 3-4.5 Sn, 3.5-4 Pb, 3-5-4.5 Zn.
For bearings; sheet metal.

JOHNSON BRONZE NO. 51.
M-172; 87 Cu, 10 Sn, 1 Pb, 2 Zn.
36,500 TS; 18,500 YS; 10-20 El; 67 Brin.
For bearings for power shovels, concrete mixers, worm gears; heavy duty.

JOHNSON BRONZE NO. 53.
M-172; 88 Cu, 10 Sn, 2 Zn.
36,000 TS; 19,000 YS; 14-22 El; 69 Brin.
For bridge bearings, gears, gear bushings; v. S.A.E. No. 63.

JOHNSON BRONZE NO. 55.
M-172; 86 Cu, 12 Sn, 2 Zn.
39,200 TS; 21,000 YS; 10-15 El; 74 Brin.
For bearings for heavy machinery, mine pumps, bushings; heavy duty.

JOHNSON BRONZE NO. 66.
M-172; 85 Cu, 5 Sn, 1 Zn, bal Pb.
26,000 TS, 14,500 YS; 7-17 El; 48 Brin.
For bearings for wood turning machinery, bench lathes; heavy duty.

JOHNSON BRONZE NO. 71.
M-172; 85 Cu, 5 Sn, 5 Pb, 5 Zn.
29,000 TS; 16,500 YS; 13-27 El; 49 Brin.
For sliding valve seats, stuffing box glands, cylinder sleeves, bronze backed Babbitt.

JOHNSON BRONZE NO. 72.
M-172; 83 Cu, 7 Sn, 7 Pb, 3 Zn.
29,000 TS; 14,600 YS; 12-22 El; 56 Brin.
For camshaft bearings, gears, bushings; heavy duty.

JOHNSON BRONZE BABBITT NO. 10.
M-172; 90 Sn, 5 Cu, 5 Sb.
For bearings, bronze Babbitt.

JOHNSON BRONZE BABBITT NO. 11.
M-172; 87 Sn, 6 Cu, 7 Sb.
For bearings; bronze Babbitt.

JOHNSON BRONZE BABBITT NO. 97.
M-172; 90 Sn, 2.5 Cu, 7.5 Sb.
For bearings, bronze Babbitt.

JOHNSON BRONZE GRAPHITED BEARINGS.
M-172; graphite, Sn, bal Cu.
For bearings; self lubricating.

JOHNSON BRONZE NO. LX.
M-172; 74.75 Pb, 15 Sb, 10 Sn, 0.25 Cu.
For camshaft bearings, Babbitt.

JOHNSON LM15.
M-200; Ag, Cd, Zn.
Cast: 25,700 TS; 5 El.
For solder; M.P. 280-320°C; high strength.

JOHNSON LOCOMOTIVE BRONZE.
England; 7.8 Sn, 5 Zn, bal Cu.
For railroad hardware, fittings, injectors; high strength.

JOHNSONS (A) STAINLESS STEEL SOLDER.
M-393.
For solder for stainless steel; M.P. 450°F.

JONAS & COLVER.
Eng.; 1.36 C, 0.41 Mn, bal Fe.
For tools, cutters; water hardened.

JOSLYN STAINLESS Type 202.
M-560; 0.15 max C, 7.5-10.0 Mn, 1.0 max Si, 17-19 Cr, 4.0-6.0 Ni, 0.25 max N, bal Fe.
Ann: 90,000 TS; 50,000 YS; 55 El; 170 Brin.
Austenitic; hardenable only by work hardening, corrosion resistant; non-magnetic.
For antennas, bolts and fasteners, dairy equipment, spring wire, transportation equipment.
AISI 202; ASTM A314; SAE 30202.

JOSLYN STAINLESS Type 302B.
M-560; 0 15 max C, 2.0 max Mn, 2.0-3.0 Si, 17-19 Cr, 8.0-10.0 Ni, bal Fe.
Ann: 90,000 TS; 40,000 YS; 50 El; 160 Brin.
Austenitic: hardenable only by cold work; heat resistant; non-magnetic.
For heat treating fixtures, annealing boxes, furnace parts, fittings.
AISI 302; ASTM A580; SAE 30302.

JOSLYN STAINLESS Type 302 Cu.
M-560; 0.10 max C, 2.0 max Mn, 17-19 Cr, 8-10 Ni, 0.5 max Mo, 3 0-4 0 Cu, bal Fe.
Ann: 80,000 T, 40,000 YS; 35 El; 163 Brin.
For fasteners, automotive parts, aircraft and missile components, chemical equipment.
Corrosion resistance, austenitic.

JOSLYN STAINLESS Type 303.
M-560; 0.15 max C, 2 0 max Mn, 1.0 max Si, 0.15 min S, 17-19 Cr, 8.0-10.0 Ni, 0.60 max Mo, bal Fe.
Ann: 90,000 TS; 35,000 YS; 50 El, 160 Brin.
Austenitic, free machining, non-magnetic, hardenable only by cold work, corrosion resistant
For studs, bolts, nuts, gears, hardware fittings, screw machine parts
AISI 303; AMS 5640 Type 1, SAE 30303

JOSLYN STAINLESS Type 303, FORGING QUALITY
M-560; 0.15 max C, 2.0 max Mn, 0.15 min S, 1.0 max Si, 17-19 Cr, 8 0-10 0 Ni, 0 60 max Mo, bal Fe.
Ann: 90,000 TS; 35,000 YS; 50 El; 160 Brin.
Forging grade, austenitic, free machining, hardenable only by cold work, non-magnetic.
For hot headed bolts, aircraft fittings, forged and machined fittings and fasteners
AISI 303, AMS 5640 Type 1, SAE 30303.

JOSLYN STAINLESS Type 303 Pb
M-560; 0 15 max C, 2 0 max Mn, 0 12-0 30 S, 1.0 max Si, 17-19 Cr, 8.0-10 0 Ni, 0.60 max Mo, 0.12-0 30 Pb, bal Fe.
Ann· 90,000 TS; 35,000 YS; 50 El; 160 Brin.
Austenitic, free machining, non-magnetic, hardenable only by cold work, corrosion resistant.
For gears, shafts, studs, bolts, nuts, screw machine parts, Swiss automatic parts
QQ-S-764; AMS 5635, ASTM A581.

JOSLYN STAINLESS Type 303 Se.
M-560; 0.15 max C, 2 0 max Mn, 0.06 max S, 1.0 max Si, 17-19 Cr, 8.0-10.0 Ni, 0 50 max Mo, 0.15 min Se, bal Fe.
Ann: 90,000 TS; 35,000 YS; 50 El; 160 Brin.
Austenitic, free machining, non-magnetic, hardenable only by cold work, corrosion resistant.
For gears, shafts, rivets, screw machine parts, bolts, nuts, studs, ordnance parts.
AISI 303 Se; AMS 5640 Type 2; SAE 30303 Se.

JOSLYN STAINLESS AISI Type 304.
M-560; 0.08 max C, 2.0 max Mn, 1.0 max Si, 18-20 Cr, 8-11 Ni, bal Fe.
Ann: 85,000 TS; 35,000 YS; 60 El; 149 Brin.
Austenitic, non-magnetic, corrosion resistant, hardenable by cold work only.
For shafts, dairy fittings, meat hangers and hooks, food processing equipment.
AISI 304; AMS 5639; ASTM A193.

JOSLYN STAINLESS Type 304L.
M-560; 0.030 max C, 2.0 max Mn, 1.0 max Si, 18-20 Cr, 8-11 Ni, bal Fe.
Ann: 80,000 TS; 30,000 YS; 60 El; 140 Brin.
Austenitic, weldable, non-magnetic, hardenable only by cold work, corrosion resistant.
For weld rod, welded assemblies, food processing equipment.
AISI 304L; AMS 5647; SAE 30304L.

JOSLYN STAINLESS Type 304 MAX. MACHINABILITY.
M-560; 0.08 max C, 2.0 max Mn, 0.03 max S, 1.0 max Si, 18-20 Cr, 8-12 Ni, bal Fe
Ann: 85,000 TS; 35,000 YS; 60 El; 149 Brin.
Austenitic, non-magnetic, corrosion resistant, hardenable by cold work only.
For shafts, dairy fittings, valve parts, food and laundry equipment.
AISI 304; AMS 5639; SAE 30304.

JOSLYN STAINLESS Type 305.
M-560; 0.12 max C, 2.0 max Mn, 1.0 max Si, 17-19 Cr, 11-13 Ni, bal Fe.
Ann: 85,000 TS; 35,000 YS; 55 El; 149 Brin.
Austenitic, non-magnetic, corrosion resistant.
Less tendency to harden by cold work.
For rivets, cold headed parts, extruded parts, cold formed parts
AISI 305, AMS 5685; SAE 30305.

JOSLYN STAINLESS Type 305H.
M-560; 0 12 max C, 2.0 max Mn, 15-17 Cr, 17-19 Ni, bal Fe.
Ann: 75,000 TS; 40,000 YS; 55 El; 156 Brin.
For fasteners, cold headed bolts, screws, nuts.
Low work hardening
Austenitic, corrosion resistant.

JOSLYN STAINLESS Type 305 MH.
M-560, 0.12 max C, 2 max Mn, 11.5-13.0 Cr, 14-16 Ni, bal Fe.
Ann: 78,000 TS; 40,000 YS; 55 El; 163 Brin.
For Phillips head screws, nut forming, spinning, coining, extruded or swaged parts.
Austenitic, corrosion resistant.

JOSLYN STAINLESS Type 308.
M-560; 0 08 max C, 2.0 max Mn, 1.0 max Si, 19-21 Cr, 10-12 Ni, bal Fe.
Ann: 85,000 TS; 30,000 YS; 55 El; 149 Brin
Austenitic, non-magnetic, corrosion resistant.
Less subject to work hardening, weldable.
For weld rod, welded assemblies, heat treat equipment, furnace parts.
AISI 308, ASTM A276; SAE 30308.

JOSLYN STAINLESS Type 308 FM.
M-560; 0.15-0.25 C, 1.0-2.0 Mn, 0.12-0.25 S, 0.75-1 25 Si, 20-22 Cr, 10.5-12 Ni, bal Fe.
Ann: 100,000 TS; 35,000 YS; 40 El; 212 Brin.
Austenitic, free machining grade, good corrosion and oxidation resistance.
For exhaust manifold valve parts, exhaust system shafts and bushings

JOSLYN STAINLESS Type 308L.
M-560; 0.030 max C, 2.0 max Mn, 1.0 max Si, 19-21 Cr, 9-12 Ni, bal Fe.
Ann: 85,000 TS; 35,000 YS; 55 El; 149 Brin.
Austenitic, weldable, corrosion resistant.
Main use is welding rod and parts to be welded.

JOSLYN STAINLESS Type 309.
M-560; 0.20 max C, 2.0 max Mn, 1.0 max Si, 0.030 max S, 22-24 Cr, 12-15 Ni, bal Fe.
Ann: 95,000 TS; 40,000 YS; 45 El; 160 Brin.
Austenitic, corrosion resistant, good resistance to attack at high temperatures to 2000°F.
For furnace parts, heat treating baskets and equipment, weld rod, pump parts.
AISI 309; ASTM A276; SAE 30309.

JOSLYN STAINLESS Type 309S.
M-560; 0.08 max C, 2.0 max Mn, 1.0 max Si, 0.030 max S, 22-24 Cr, 12-15 Ni, bal Fe.
Ann: 95,000 TS; 40,000 YS; 45 El; 160 Brin.
Austenitic, weldable, good high temperature resistance to corrosion and oxidation.
For furnace parts, heat treating equipment, cement kiln chain, weld rod.

JOSLYN STAINLESS Type 310.
M-560; 0.25 max S, 2.0 max Mn, 1.50 max Si, 0.030 max S, 24-26 Cr, 19-22 Ni, bal Fe.
Ann: 95,000 TS; 45,000 YS; 50 El; 185 Brin.
Austenitic, corrosion resistant, weldable, non-magnetic, good heat resistance.
For furnace parts, gas turbine parts, pump parts, welded assemblies, weld rod.
AISI 310; AMS 5694; SAE 30310.

JOSLYN STAINLESS Type 310S
M-560, 0.08 max C, 2.0 max Mn, 1.5 max Si, 0.030 max S, 24-26 Cr, 19-22 Ni, bal Fe.
Ann: 95,000 TS; 45,000 YS; 50 El; 185 Brin
Austenitic, corrosion resistant, weldable, non-magnetic, good heat resistance.
For furnace parts, oil refinery equipment, weld rod, jet engine rings.
AISI 310 S; AMS 5651; SAE 30310 S.

JOSLYN STAINLESS AISI Type 316.
M-560; 0.08 max C, 2.0 max Mn, 1.0 max Si, 0.03 max S, 16-18 Cr, 10-14 Ni, 2.0-3.0 Mo, bal Fe
Ann: 80,000 TS; 30,000 YS, 60 El; 149 Brin.
Austenitic, non-magnetic, weldable, excellent corrosion resistance, hardenable only by cold work
For food equipment, chemical equipment, paper, textile and photographic equipment, weld rod.
AISI 316; AMS 5648; SAE 30316.

JOSLYN STAINLESS Type 316F
M-560; 0.08 max C, 1.0-2.0 Mn, 0.11-0.17 P, 0.10-0.20 S, 1.0 max Si, 17-19 Cr, 12-14 Ni, 1.75-2.50 Mo, bal Fe
Ann: 80,000 TS, 30,000 YS, 55 El; 149 Brin.
Austenitic, non-magnetic, free machining, excellent corrosion resistance.
For automatic screw machine parts requiring good corrosion resistance.

JOSLYN STAINLESS Type 316L
M-560; 0.030 max C, 2.0 max Mn, 1.0 max Si, 0.030 max S, 16-18 Cr, 10-14 Ni, 2.0-3.0 Mo, bal Fe.
Ann: 80,000 TS; 30,000 YS; 60 El; 140 Brin.
Austenitic, non-magnetic, excellent corrosion resistance, weldable.
Parts for special application in food, paper, photographic and chemical processing equipment.
AISI 316 L; AMS 5653; SAE 30316 L.

JOSLYN STAINLESS Type 316 MAX MACHINABILITY.
M-560; 0.080 max C, 2.0 max Mn, 1.0 max Si, 0.030 max S, 16-18 Cr, 10-14 Ni, 2.0-3.0 Mo, bal Fe.
Ann: 80,000 TS; 30,000 YS; 60 El; 149 Brin.
Austenitic, non-magnetic, improved machinability, excellent corrosion resistance, weldable.
For automatic screw machine parts for food, chemical, paper and textile equipment.
AMS 5648; ASTM A276; SAE 30316.

JOSLYN STAINLESS Type 317.
M-560; 0.08 max C, 2.0 max Mn, 1.0 max Si, 0.030 max S, 18-20 Cr, 11-15 Ni, 3-4 Mo, bal Fe.
Ann: 85,000 TS; 40,000 YS; 50 El; 160 Brin.
Austenitic, excellent corrosion resistance, useful to 1700°F, weldable.
For parts for paper, food, chemical, refining, photographic and textile industries.
AISI 317; ASTM A479; SAE 30317.

JOSLYN STAINLESS Type 317L
M-560; 0.030 max C, 2.0 max Mn, 1.0 max Si, 0.030 max S, 18-21 Cr, 11-15 Ni, 3-4 Mo, bal Fe.
Ann: 85,000 TS; 40,000 YS, 50 El; 160 Brin.
Austenitic, excellent corrosion resistance, useful to 1700°F, weldable
For parts for food, paper, chemical, refining, photographic and textile industries.

JOSLYN STAINLESS Type 321.
M-560; 0.08 max C, 2.0 max Mn, 1.0 max Si, 0.030 max S, 17-19 Cr, 9-12 Ni, Ti = 5 × C min, bal Fe
Ann: 85,000 TS, 35,000 YS; 55 El; 149 Brin
Austenitic, non-magnetic, weldable.
For welded assemblies, for parts operated at temperatures up to 1600°F
AISI 321, AMS 5645; SAE 30321.

JOSLYN STAINLESS Type 330
M-560; 0.08 max C, 2.0 max Mn, 0.75-1.50 Si, 17-20 Cr, 34-37 Ni, bal Fe.
Ann: 85,000 TS, 45,000 YS, 35 El, 179 Brin.
Austenitic, non-magnetic, weldable, good at elevated temperatures
For furnace parts, heat treating boxes and baskets, jet engine parts, petroleum plants.
AMS 5716; SAE 30330

JOSLYN STAINLESS Type 347.
M-560, 0.08 max C, 2.0 max Mn, 1.0 max Si, 17-19 Cr, 9-13 Ni, Ta + Cb = 10 × C min, bal Fe
Ann 90,000 TS, 35,000 YS; 50 El, 160 Brin
Austenitic, non-magnetic, weldable
For parts subject to temperatures to 1600°F, welded assemblies, weld rods.
AISI 347; AMS 5646, 5680, SAE 30347

JOSLYN STAINLESS Type 347 FM (Se)
M-560, 0.08 max C, 2.0 max Mn, 0.11-0.17 P, 0.030 max S, 1.5 max Si, 17-19 Cr, 9-12 Ni, Cb + Ta = 10 × C min, 0.15-0.35 Se, 0.50 max Mo, 0.50 max Cu, bal Fe.
Ann 90,000 TS; 35,000 YS; 50 El, 160 Brin.
Austenitic, non-magnetic; welding not recommended
For machined parts for assemblies operating at 800-1500°F.
AMS 5642 Type 2.

JOSLYN STAINLESS Type 348.
M-560; 0.08 max C, 2.0 max Mn, 1.0 max Si, 17-19 Cr, 9-13 Ni, Cb + Ta = 10 × C min, 0.10 max Ta, 0.20 max Co, bal Fe.
Ann: 90,000 TS; 35,000 YS, 50 El, 160 Brin.
Austenitic, non-magnetic, heat resistant, weldable
For welded construction for radio active systems, and operating temperatures 800-1500°F.
AISI 348; SAE 30348, MIL-S-23195

JOSLYN STAINLESS Type 403.
M-560; 0.15 max C, 1.0 max Mn, 0.5 max Si, 11.5-13.0 Cr, bal Fe.

Ann: 75,000 TS; 40,000 YS; 35 El; 155 Brin.
Q&T, 1200°F; 100,000 TS; 85,000 YS; 23 El; 225 Brin.
Magnetic, heat treatable, weldable, corrosion resistant.
For jet engine parts, corrosion resistant hardware, steam and gas turbine blading.
AISI 403; AMS 5614; SAE 51403.

JOSLYN STAINLESS Type 405.
M-560; 0.08 max C, 1.0 max Mn, 1.0 max Si, 11.50-14.50 Cr, 0.10-0.30 Al, bal Fe.
Ann: 70,000 TS; 40,000 YS, 30 El; 149 Brin.
Magnetic, not normally hardenable, oxidation resistant up to 1500°F
For annealing boxes, forged fittings, quench racks.
AISI 405; SAE 51405.

JOSLYN STAINLESS Type 410.
M-560; 0 15 max C, 1 0 max Mn, 1 0 max Si, 11.50-13 50 Cr, bal Fe.
Ann: 75,000 TS; 40,000 YS; 35 El; 155 Brin.
Q&T, 1200°F: 100,000 TS, 85,000 YS; 35 El; 225 Brin
Magnetic, heat treatable, weldable, corrosion resistant.
For cutlery, corrosion resistant hardware, steam and gas turbine parts, pump parts.
AISI 410; AMS 5613, SAE 51410

JOSLYN STAINLESS Type 410 Cb.
M-560; 0 15 max C, 0 60 max Mn, 0 50 max Si, 11 5-13.5 Cr, 0.20 max Cb, bal Fe.
Ann: 75,000 TS; 40,000 YS; 35 El; 155 Brin.
Q&T, 1200°F 124,000 TS; 100,000 YS; 20 El.
Magnetic, hardenable, weldable, corrosion resistant
For steam turbine blades, valve parts, aircraft and missile components
AMS 5609

JOSLYN STAINLESS Type 410 LOW CARBON
M-560, 0 08 max C, 1 0 max Mn, 1 0 max Si, 12 5-14 0 Cr, bal Fe.
Ann 75,000 TS, 40,000 YS, 35 El, 155 Brin
Magnetic, weldable, corrosion resistant, only partially hardenable
For welded assemblies

JOSLYN STAINLESS Type 416 FORGING QUALITY
M-560, 0 15 max C, 1.25 max Mn, 0 06 max P, 0 15 min S, 1 0 max Si, 12-14 Cr, 0.5 max Ni, 0 6 max Mo, bal Fe
Processed to produce good quality forgings.
Hardenable to Rc 35 min
Magnetic, corrosion resistant, free machining
For hot headed bolts, forged and machined parts
AISI 416, AMS 5610, SAE 51416

JOSLYN STAINLESS Type 416 HIGH HARDENABILITY.
M-560, 0.15 max C, 1 25 max Mn, 0 15 min S, 1.0 max Si, 12-14 Cr, 0 50 max Ni, 0 60 max Mo, bal Fe.
Ann, CF 90,000 TS, 80,000 YS; 15 El, 197 Brin.
Guaranteed hardenable to 35 Rc min. (ave 41 Rc).
Magnetic, corrosion resistant, free machining
For fasteners, shafts, impellers, gears
AISI 416; AMS 5610; SAE 51416.

JOSLYN STAINLESS Type 416 Machine Special.
M-560, 0 15 max C, 1 25 max Mn, 0.15 min S, 1 0 max Si, 12-14 Cr, 0.50 max Ni, 0.60 max Mo, bal Fe.
Ann, CF. 90,000 TS; 80,000 YS, 15 El; 197 Brin.
Q & T, 1200°F: 110,000 TS; 85,000 YS; 18 El ; 225 Brin.
Magnetic, hardenable, corrosion resistant, free machining.
For pump shafts, motor shafts, valve trim, valve stems, fasteners, fittings.
AISI 416; AMS 5610; SAE 51416.

JOSLYN STAINLESS Type 416 Se.
M-560; 0.15 max C, 1.25 max Mn, 0.06 max P, 0.06 max S, 1.0 max Si, 12-14 Cr, 0.15 min Se, bal Fe.
Ann, CF. 90,000 TS; 80,000 YS; 15 El, 197 Brin.
Hardenable to Rc 35 min
Magnetic, corrosion resistant, free machining.
For fittings, gears, threaded fasteners, shafts.
AISI 416 Se, AMS 5610; SAE 51416 Se

JOSLYN STAINLESS Type 416 XS
M-560, 0.10 max C, 1.0 max Mn, 0.06 max P, 0 35 min S, 1.0 max Si, 13-15 Cr, 0.50 max Ni, 0.30-0 60 Mo, bal Fe.
Ann, CF; 90,000 TS, 80,000 YS; 15 El, 197 Brin.
Magnetic, corrosion resistant, free machining, not recommended for welding or quench hardening.
For oil burner nozzles, motor shafts, screw machine parts

JOSLYN STAINLESS Type 420.
M-560, over 0 15 C, 1.0 max Mn, 1.0 max Si, 12-14 Cr, bal Fe.
Ann. 95,000 TS, 50,000 YS, 25 El, 195 Brin.
Q&T, 600°F 230,000 TS, 195,000 YS; 8 El, 500 Brin
Magnetic, corrosion resistant
For cutlery, surgical and dental instruments, valves, shafts, gears, knife blades, springs
AISI 420, AMS 5621, SAE 51420.

JOSLYN STAINLESS Type 420 F
M-560, over 0 15 C, 1 25 max Mn, 0 06 max P, 0 15 min S, 1 0 max Si, 12 14 Cr, 0 60 max Mo, bal Fe
Ann 95,000 TS, 50,000 YS; 25 El, 195 Brin
Q&T, 600°F 230,000 TS, 195,000 YS; 8 El; 500 Brin
Magnetic, corrosion resistant, free machining
For gears, shafts, surgical and dental instruments, knife blades
AISI 420, AMS 5620, SAE 51420

JOSLYN STAINLESS Type 430
M-560, 0 12 max C, 1.0 max Mn, 1 0 max Si, 14-18 Cr, bal Fe
Ann 75,000 TS, 45,000 YS, 30 El; 156 Brin
Ferritic type, magnetic, corrosion resistant, not hardenable
For automotive fasteners, kitchen utensils, cold headed parts, food handling equipment
AISI 430, AMS 5627, SAE 51430

JOSLYN STAINLESS Type 430 F
M 560, 0.12 max C, 1 25 max Mn. 0 06 max P, 0 15 min S, 1 0 max Si, 14-18 Cr, 0 6 max Mo, bal Fe
Ann 80,000 TS, 45,000 YS, 25 El, 163 Brin.
Ferritic, magnetic, free machining, corrosion resistant, not hardenable, weldability-poor
For machined parts, bolts and nuts, fasteners, shafts, burner parts.
AISI 430 F; SAE 51430 F

JOSLYN STAINLESS Type 430 F Se.
M 560; 0 12 max C, 1 25 max Mn, 0 06 max P, 0 06 max S, 1 0 max Si, 14-18 Cr, 0.60 max Mo, 0 15 min Se, bal Fe
Ann 80,000 TS, 45,000 YS, 25 El; 163 Brin
Ferritic, magnetic, free machining, corrosion resistant, not hardenable, weldability-poor
For machined parts, bolts and nuts, shafts, fasteners, burner parts
AISI 430F Se; SAE 51430 F Se.

JOSLYN STAINLESS Type 430 F Solenoid Quality.
M-560; 0.06 max C, 0.50 max Mn, 0.25-0.35 S, 0.50 max Si, 17.25-18.25 Cr, 0.30 max Ni, 0.50 max Mo, 0.25 max Cu, bal Fe.
Ann: 80,000 TS; 45,000 YS; 25 El; 163 Brin.
Magnetic, ferritic, free machining.
For solenoid valve plungers.

JOSLYN STAINLESS Type 434.
M-560; 0.12 max C, 1.0 max Mn, 1.0 max Si, 16-18 Cr, 0.75-1.25 Mo, bal Fe.
Ann: 75,000 TS; 45,000 YS; 30 El; 156 Brin.
Ferritic, magnetic, corrosion resistant.
For automotive fasteners, miscellaneous cold headed parts.

JOSLYN STAINLESS Type 434 FM.
M-560; 0.12 max C, 1.0 max Mn, 0.15 min S, 1.0 max Si, 16-18 Cr, 0.75-1.25 Mo, bal Fe.
Ann: 80,000 TS; 45,000 YS; 30 El; 156 Brin.
Ferritic, magnetic, free machining, corrosion resistant, not hardenable.
For automotive fasteners, thermostat parts, machined parts.

JOSLYN STAINLESS Type 615 (Greek Ascoloy).
M-560; 0.15-0.20 C, 0.50 max Mn, 0.50 max Si, 12-14 Cr, 1.8-2.2 Ni, 0.50 max Mo, 2.5-3.5 W, bal Fe.
Ann: 140,000 TS; 130,000 YS; 15 El; 277 Brin
Q&T, 1200°F; 135,000 TS; 108,000 YS; 20 El; 277 Brin.
Martensitic, magnetic, hardenable to Rc 45 min.
For steam turbine parts, gas turbine parts, jet engine parts, compressor blades and wheels.

J.P.S. STEEL.
M-261; 0.90-1.0 C, 1.1-1.3 W, 0.45-0.60 Cr, bal Fe.
For shock tools, threading, taps, reamers, broaches; oil hardening

JS700.
M-69; 0.03 C, 1.7 Mn, 0.5 Si, 21.0 Cr, 25.0 Ni, 4.5 Mo, Cb = 8 × C, bal Fe.
Ann. prop. 85,000 TS, 39,000 YS; 45 El; 50 RA; 170 Brin
Special engineering alloy for superior corrosion resistance; for agitators, piping, mixers, vessels, vaporizers, tanks and stills.

J.S.B.
M-172; bronze on steel.
For bushings, bearings, washers; bronze on steel in finished bearing

J.S. PUNCH.
M-57; 0.55 C, 1.25 Cr, 2.75 W, 0.2 V, bal Fe.
Heat treated: 231,000-315,000 TS; 209,000-275,000 YS; 9-11 El; 27-42 RA; C 48-56 Rock.
For header and swaging dies, chipping chisels, rivet busters, track tools.
Type S1 shock resisting tool steel, good fatigue resistance.

"J" TEMPER RCS.
M-115; 0.50 C, 4 Cr, 1 V, 18 W, bal Fe.
For hot work tools and dies; hot work steel, oil hardened.

JUNKER 951.
M-1347; 0.4 C, 2 Si, 13 Cr, bal Fe.
Heat resistant casting.

JUNKER A 8 M Nb.
M-1347; 0.07 C, 18.0 Cr, 11.0 Ni, 2.2 Mo, Cb, bal Fe.
Corrosion resistant casting.
65,000 min TS; 30,000 min YS; 20 min El.

JUNKER A 8 M S.
M-1347; 0.06 C, 18.0 Cr, 11.0 Ni, 2.2 Mo, bal Fe.
Corrosion resistant casting.
65,000 min TS; 30,000 min YS; 20 min El.
Type CF-8M.

JUNKER A 8 M SS.
M-1347; 0.02, 18.0 Cr, 11.0 Ni, 2.2 Mo, bal Fe.
Corrosion resistant casting.
57,000 min TS; 27,000 min YS; 30 min El.
Type CF-3M.

JUNKER A 8 Nb.
M-1347; 0.07 C, 18.0 Cr, 10.0 Ni, Cb, bal Fe.
Corrosion resistant casting.
65,000 min TS; 28,500 min YS; 20 min El.
Type CF-8C.

JUNKER A 8 Nb TT.
M-1347; 0.07 max C, 18.0 Cr, 10.0 Ni, Cb, bal Fe.
65,000 min TS; 28,500 min YS; 20 min El.
For castings for low temperature, applications to −195°C.

JUNKER A 8 S.
M-1347; 0.06 C, 18.0 Cr, 10.0 Ni, bal Fe.
Corrosion resistant casting.
65,000 min TS; 28,500 min YS; 20 min El
Type CF-8.

JUNKER A 8 SS.
M-1347, 0.02 C, 18.0 Cr, 10.5 Ni, bal Fe
Corrosion resistant casting
57,000 min TS; 25,500 min YS; 30 min El.
Type CF-3.

JUNKER A 8 S TT.
M-1347; 0.6 C, 18.0 Cr, 10.0 Ni, bal Fe.
65,000 min TS, 28,500 min YS; 20 min El
For castings for low temperature applications, to −195°C.

JUNKER A 12 MS.
M-1347; 0.06 C, 17.0 Cr, 13.5 Ni, 4.5 Mo, bal Fe.
Corrosion resistant casting.
57,000 min TS, 28,500 min YS; 15 min El.

JUNKER A 13 MS.
M-1347; 0.06 C, 17.5 Cr, 12.5 Ni, 2.8 Mo, bal Fe.
Corrosion resistant casting
65,000 min TS, 30,000 min YS; 20 min El.

JUNKER A 17 MK Nb.
M-1347; 0.07 C, 17.5 Cr, 20.0 Ni, 2.2 Mo, 2 Cu, Cb, bal Fe.
Corrosion resistant casting.
65,000 min TS, 28,500 min YS, 15 min El.

JUNKER A 25 MK Nb.
M-1347; 0.07 C, 20.0 Cr, 25.0 Ni, 3.0 Mo, 2 Cu, Cb, bal Fe
Corrosion resistant casting.
65,000 min TS, 31,500 min YS; 15 min El.

JUNKER A 25 M Nb.
M-1347; 0.07 C, 25.0 Cr, 25.0 Ni, 2.2 Mo, Cb, bal Fe.
Corrosion resistant casting.
65,000 min TS; 31,500 min YS; 15 min El.

JUNKER A 56 M.
M-1347; 0.10 max C, 16.5 Cr, 60.0 Ni, 17.0 Mo, bal Fe.
Corrosion resistant casting.
78,000 min TS; 50,000 min YS; 5 min El.
Type CW-12 M.

JUNKER A 65 M.
M-1347; 0.10 max C, 65 Ni, 28.0 Mo, bal Fe.
Corrosion resistant casting.
78,000 min TS; 50,000 min YS; 6 min El.
Type N-12 M.

JUNKER A 1101.
M-1347; 0.4 C, 2.0 Si, 28 Cr, 10 Ni, bal Fe.
Heat resistant casting; Type HF.

JUNKER A 1151.
M-1347; 0.4 C, 1.7 Si, 26 Cr, 14 Ni, bal Fe.
Heat resistant casting; Type HI.

JUNKER A 1152.
M-1347; 0.4 C, 1.7 Si, 18 Cr, 38 Ni, bal Fe.
Heat resistant casting; Type HU.

JUNKER A 1201.
M-1347; 0.4 C, 1.7 Si, 25 Cr, 20 Ni, bal Fe.
Heat resistant castings; Type HK.

JUNKER AF 25 N.
M-1347; 0.07 max C, 25.0 Cr, 8.0 Ni, bal Fe.
Corrosion resistant casting.
85,000 min TS; 57,000 min YS; 20 min El.

JUNKER AF 27 NC.
M-1347; 0.40 C, 27.0 Cr, 4.5 Ni, bal Fe.
Corrosion resistant casting.
71,000 min TS.
Type CC-50.

JUNKER AF 1101.
M-1347; 0.4 C, 1.2 Si, 27 Cr, 4.5 Ni, bal Fe.
Heat resistant casting; Type HD.

JUNKER AF 1152
M-1347, 0.3 C, 1.2 Si, 28 Cr, 11 Ni, bal Fe.
Heat resistant casting, Type HE.

JUNKER AUN 9.
M-1347; 0.04 C, 16.5 Cr, 9.0 Ni, N_2, bal Fe.
For non-magnetizable castings.
65,000 min TS, 28,500 min YS; 20 min El.

JUNKER AUN 13 Nb.
M-1347; 0.10 C, 16.5 Cr, 13.0 Ni, Cb, bal Fe.
For non-magnetizable castings
65,000 min TS, 28,500 min YS, 20 min El

JUNKER F 901 S
M-1347; 0.2 C, 7 Cr, bal Fe.
Heat resistant casting

JUNKER F 1001.
M-1347, 0.4 C, 2 Si, 17 Cr, bal Fe
Heat resistant casting

JUNKER F 1002 S
M-1347; 1.6 C, 1.5 Si, 18 Cr, bal Fe.
Heat resistant casting.

JUNKER F 1051.
M-1347; 0.4 C, 2 Si, 23 Cr, bal Fe.
Heat resistant casting.

JUNKER F 1101.
M-1347; 0.4 C, 1.2 Si, 29 Cr, bal Fe.
Heat resistant casting; Type HC.

JUNKER F 1102.
M-1347; 1.3 C, 1.7 Si, 29 Cr, bal Fe
Heat resistant casting.

JUNKER M 13 N.
M-1347; 0.05 C, 12.5 Cr, 4.5 Ni, bal Fe.
Corrosion resistant casting.
113,000 min TS; 92,000 min YS; 15 min El.

JUNKER M 14.
M-1347; 0.20 C, 13.5 Cr, bal Fe.
Corrosion resistant casting
85,000 min TS; 64,000 min YS; 12 min El.
Type CA-40.

JUNKER M 14S.
M-1347; 0.12 C, 13.0 Cr, 0.7 Ni, bal Fe.
Corrosion resistant casting.
85,000 min TS; 57,000 min YS; 15 min El.
Type CA-15.

JUNKER M 18.
M-1347; 0.22 C, 17.0 Cr, 1.5 Ni, bal Fe.
Corrosion resistant casting.
113,000 min TS; 85,000 min YS; 4 min El.

JUNKER NICRO 50.
M-1347; 0.07 C, 50 Cr, 47 Ni.
Casting for heat resisting and elevated temperature corrosion applications.

JUNKER NIMO 59.
M-1347; 0.02 max C, 20.0 Cr, 60.0 Ni, 17.0 Mo.
Corrosion resistant casting.
71,000 min TS; 40,000 min YS; 30 min El.

JUNKER NIMO 69.
M-1347; 0.02 max C, 70.0 Ni, 28.0 Mo.
Corrosion resistant casting.
71,000 min TS, 38,000 min YS; 30 min El.

JUNKER THERMCO 50
M-1347; 0.05 C, 50 Co, 30 Cr, bal Fe.
Casting for heat and thermal shock resistance, and for some elevated temperature corrosion applications.

JUNKER THERMCO 51.
M-1347; 0.25 C, 50 Co, 30 Cr, 2.2 Cb, bal Fe.
Casting for heat and thermal shock resistance, and for some elevated temperature corrosion applications.

JUNKER X.
English, 6 Fe, 0.5 Mg, bal Al.
For bearings; for camshaft.

JUNKER Z
English; 6.5 Ni, 0.5 Ti, bal Al
For bearings; for camshaft.

K-4
Germany: Zn, Mg, bal Al
For bearings

K-9 SPECIAL OIL HARDENING
M-365, 0.90 C, 0.5 W, 0.7 Cr, 1.0 Mn, 0.2 Si, bal Fe.
For tools, cutters; oil hardening.

K 9 STEEL.
M-210; 1.0 C, 0.85 Mn, 0.75 Cr, 0.40 W, bal Fe.
Annealed: 100,000 TS; 54,000 YP, 21 El; 197 Brin.
Ht Tr · 220,000 TS, 155,000 YP, 10 El; 600 Brin.
For dies, milling cutters, plugs, gauges, circular cutters, master tools.
Non-deforming, oil hardening, wear resistant.

K4ONKhM.
M-Russia 0.05-0.12 C, 40 Co, 20 Cr, 15 Ni, 6 Mo + W, 2 Mn, bal Fe.
Heat treated: 368,000 TS; 248,000 YS; C 58 Rock.
For spiral springs in corrosive media and operating up to 400°C.
High elastic properties imparted by cold work and subsequent tempering at 500°C.

K-42-B.
M-118; 42 Ni, 22 Co, 14 Fe, 18 Cr, 2 Ti, 0.6 Al.
At 70°F: 165,000 TS; 19 El; 37 Brin
At 1110°F. 127,100 TS; 21 El; 22 Brin.
Hardened· 185,000 TS; 90,000 YS; 30 El.
For dies, valves, steam fitting and turbine blades, springs, bolts; retains strength at high temperature.

K-390
M-114; 0.25 C, 2.75 Cr, 10 W, 2 Ni, bal Fe.
For brass forging and die casting dies, hot punches; hot work steel.

KABEL OWS.
M-1310; 0.38 C, Si, Cr, V, bal Fe.
For bolts, springs, crankshafts; oil hardened, shock resistant.

KABEL SBN.
M-1310; 1.1 C, 0.20 Si, 0.30 Mn, 0.4 Cr, bal Fe.
For springs, bearings, drills, cutters; water or oil hardened, wear resistant.

KA HO LOY.
M-517, M-131; 0.07-0.10 C, 0.2-0.3 Cu, 0.35-0.50 Mn, bal Fe.
32,000-37,000 TS; 18,000-23,000 YS.
For roofs; resists atmosphere corrosion.

KAISALOY NO. 1 STANDARD.
M-1148; 0.25 max C, 1.5 max Mn, 0.35 max Cu, 0.25 max Cr, 0.15 max Mo, 0.5 max Ni, bal Fe.
Rolled: 70,000 TS; 50,000 YS.
For bus and tractor bodies, railroad and mine cars; good weldability.

KAISALOY NO. 2.
M-1148; 0.12 max C, 0.8 max Mn, 0.35 max Cu, 0.30 max Ni, 0.25 max Cr, 0.15 max Mo, 0.02 min V, bal Fe.
Rolled: 70,000 TS; 50,000 YS; 23 El; 90 Brin.
For auto bumpers, trucks, tractors, cars; high strength, low alloy steel, good weldability.

KAISALOY NO. 3.
M-1148; 0.3 max C, 1.5 max Mn, 0.35 max Cu, 0.3 max Ni, 0.25 max Cr, 0.1 max Mo, V, bal Fe.
Rolled: 70,000 TS; 50,000 YS; 23 El; 90 Brin.
For auto bumpers, trucks, tractors, cars; high strength, low alloy steel, good weldability.

KAISALOY 42-CV.
M-1148; 0.20 C, 0.90 Mn, 0.30 Si, 0.01 min Cb or V, bal Fe.
Plate: 65,000 TS; 42,000 YS; 24 El; 140 Brin.
For bridges, booms, mine and railroad cars, derricks.
High strength-low alloy steels.

KAISALOY 45-CV.
M-1148; 0.20 C, 1.0 Mn, 0.1 Si, 0.01 Min Cb, bal Fe.
Plate: 60,000 TS, 45,000 YS; 22 El; B 80 Rock.
For bridges, booms, truck and bus bodies, derricks, structures.
High strength-low alloy steel.

KAISALOY 50-CV.
M-1148; 0.22 C, 1.1 Mn, 0.1 Si, 0.01 min Cb, bal Fe.
Plate: 65,000 TS; 50,000 YS; 22 El; B 80 Rock.
For booms, bridges, bus and truck bodies, derricks.
High strength-low alloy steel.

KAISALOY 55-CV.
M-1148; 0.24 C, 1.4 Mn, 0.1 Si, 0.01 min Cb, bal Fe.
Plate: 70,000 TS; 55,000 YS; 20 El; 160 Brin.
For bridges, structures, mine cars, booms, bus and truck bodies.
High-strength, low-alloy steel.

KAISALOY 60-CV.
M-1148; 0.26 C, 1.6 Mn, 0.1 Si, 0.01 min Cb, bal Fe.
Plate: 75,000 TS; 60,000 YS; 18 El; B 85 Rock.
For mine cars, bridges, booms, truck and bus bodies, derricks.
High strength, low alloy steel.

KAISER RP-1.
M-1147; 0.12-0.15 Si, 0.5-0.7 Fe, bal Al.
For rotors in large electric motors.
56% min. electrical conductivity. Centrifugally cast.

KAISER RP-S.
M-1147; 0.08-0.10 Si, 0.2 max Fe, bal Al.
For rotors in small electric motors.
59% IACS min elect. cond. Centrifugally cast.

KAISALOY SPECIAL FORMING.
M-1148; 0.12 max C, 0.35 max Cu, 0.30 max Ni, 0.25 max Cr, 0.15 max Mo, 0.02 min V, bal Fe.
For formed parts, welded structures; good formability and weldability.

KAISALOY STRUCTURAL.
M-1148; 0.30 max C, 1.5 Mn, 0.35 max Cu, 0.30 max Ni, 0.25 max Cr, 0.10 max Mo, bal Fe.
For structures; high strength low alloy steel.

KAISER 2 S.
M-1147; 99 min Al.
S 0-temper: 13,000 TS; 5000 YS; 35 El.
H 14-temper: 18,000 TS; 17,000 YS; 9 El.
H 18-temper: 23,000 TS; 21,000 YS; 5 El.
For gaskets, spun products.

KAISER 3 S.
M-1147; 1-2 Mn, bal Al.
S 0-temper: 17,000 TS; 7000 YS; 34 El.
S 14-temper: 23,000 TS; 22,000 YS; 8 El.
S 18-temper: 29,000 TS; 27,000 YS; 4 El.
For cooking utensils, building products; strain hardenable.

KAISER 24 S.
M-1147; 4.5 Cu, 0.6 Mn, 1.5 Mg, bal Al.
O-temper: 26,000 TS, 11,000 YS; 19 El.
T 4-temper: 64,000 TS; 44,000 YS; 18 El.
T 6-temper: 69,000 TS; 54,000 YS; 11 El.
For aircraft structures; heat treatable, high strength.

KAISER 52 S
M-1147; 2.5 Mg, 0.25 Cr, bal Al.
S 0-temper: 28,000 TS; 12,000 YS; 25 El.
S 14-temper 37,000 TS; 31,000 YS; 10 El
S 18-temper: 41,000 TS, 36,000 YS, 7 El
For fan blades, pressure vessels; strain hardenable.

KAISER 61 S
M-1147; 1 Mg, 0.25 Cu, 1 Si, 0.25 Cr, bal Al.
O-temper: 18,000 TS; 8000 YS, 22 El.
T 4-temper: 35,000 TS; 22,000 YS; 20 El
T 6-temper: 47,000 TS; 41,000 YS; 12 El.
For boats, containers, structures; heat treatable, good formability.

KAISER 75 S
M-1147; 5.6 Zn, 2.5 Mg, 1.6 Cu, 0.3 Cr, bal Al
O temper: 33,000 TS; 15,000 YS; 17 El.
T-6 temper: 82,000 TS; 72,000 YS; 11 El
For aircraft structures; heat treatable, high strength

KAISER Mo-B STEEL.
M-1148; 0.15 max C, 0.001 min B, 0.4-0.6 Mo, 0.6 max Mn, bal Fe.
Hot rolled: 75,000 TS; 65,000 YS; 15 El; 50 RA.
For conveyor and crane buckets, jet engine components; low alloy, high strength

KALCHOIDS.
Cu-Sn-Zn.
For bearings

KALIF METAL.
M-42, M-262; 70 Cu, 30 Pb, steel backed Pb-Cu mixture.
10,000 TS; 6 El; 25 Brin.
For bearings, wrist pin bushings; steel backed bearings.

KALKOS.
M-73; 0.3 C, 0.35 Mn, 12 Cr, 12 W, 0.9 V, 0.5 Si, bal Fe
For hot forming and working tools; hot work steel.

"K" ALLOY.
Eng.; 11.3 Cu, 1.1 Mn, 0.5 Mg, 0.79 Si, bal Al.
For light alloy parts; leak-proof castings.

KALOR.
M-111; 0.3 C, 1.25 Cr, 4.25 Ni, 5.5 W, 0.15 V, bal Fe.
For extrusions, dies, rams and liners; hot work steel, oil hardened.

KALOR 2.
M-111; 0.30 C, 1.0 Si, 1.1 Cr, 0.18 V, 3.75 W, bal Fe.
For extrusion press dies, liners and rams, punches; oil hardened, tough.

KAMARSCH BEARING.
85 Sn, 5 Sb, 3.6 Cu, 1.6 Bi, 1.4 Zn.
For bearings; anti-friction.

KAMARSCH BEARING
71 Sn, 7.2 Sb, 21 Cu.
For bearings; anti-friction.

KAMARSCH BEARING.
71 Sn, 20 Sb, 9.5 Cu.
For bearings; anti-friction.

KANTHAL "A."
M-70; 23 4 Cr, 6.2 Al, 1.9 Co, 0 06 C, bal Fe.
Annealed: 106,000-114,000 TS; 80,000 YS; 20 El; 65 RA; 230 Brin.
For heating elements, furnaces; resists oxidation to 1300°C.

KANTHAL "A-1."
M-70; 0.06 C, 23 Cr, 2 Co, 5.7 Al, 69 Fe.
Annealed: 114,000 TS, 80,000 YS; 20 El; 65 RA; 230 Brin
For heating elements, furnaces, heat resistant, non-scaling

KANTHAL "D"
M-70; 0 09 C, 22.6 Cr, 2 Co, 4.5 Al, bal Fe
Annealed. 104,000 TS, 80,000 YS; 20 El, 65 RA; 200 Brin.
For heating elements; heat resistant, tough; 1350°C max.

KANTHAL DL
M-1150, 4 5 Al, 22 Cr, 0 5 Co, bal Fe.
For toaster heating elements.
Corrosion and heat resistant.
Max operating temperature 2200°F.

KANTHAL DR
M-70, 20 Cr, 4 5 Al, 0 5 Co, bal Fe
Annealed. 100,000-140,000 TS; 3-12 El.
For resistors, potentiometers, high electrical resistance.

KANTHAL DR
M-1150, 29 Ni, 17 Co, bal Fe.
For heating elements, high heat resistance.

KANTHAL-DS.
M-1150, M-70, 4 5 Al, 22 Cr, 5 Co + Ta, bal Fe
For resistance and heating elements in appliances and furnaces, toasters.
Max. operating temperature 2100°F.

KANTHAL SUPER.
M-1150; Mo Si_2, + SiO_2.
Cermet, 1200 Vickers, for heating and resistance elements.
At 1500°C. TS = 145.

KAPO.
M-335; 2.2 C, 12 Cr, 1 V, bal Fe
Hardened: C 60-66 Rock.
For blanking and forming dies, burnishing tools and rolls, plug gauges, slitting cutters, drawing dies.
Type D3 oil hardening cold work steel, deep hardening, abrasion resistant.

KARABUK.
M-Turkey; 0.12-0.65 C, 0.35-0.85 Mn, 0.15-1.0 Si, bal Fe.
For structures, rails, gears, shafts, machinery parts. Constructional steel.

KARMA.
M-44; 20 Cr, 3 Al, 3 Fe, bal Ni.
Heat treated: 150,000 TS; 35 El.
For resistances, shunts, potentiometers; high specific resistance; vacuum melted.

KARONI 8-18.
M-1310; 0.15 max C, 18 Cr, 8.5 Ni, 0.4 Si, bal Fe.
Annealed: 80,000 TS; 35,000 YS; 55 El; 75 RA; 150 Brin.
Cold drawn: 180,000 TS; 150,000 YS; 10 El; 250 Brin.
For chemical plant equipment, tanks, mixers, filters; stainless, austenitic, Type 302.

KARONI 8-18 EXTRA.
M-1310; 0 12 max C, 18 Cr, 19.5 Ni, Ti = 4 × C, bal Fe.
For welded chemical plant equipment; corrosion and heat resistant.

KARONI 8-18 SU.
M-1310; 0 07 max C, 0.4 Si, 18 Cr, 9.5 Ni, bal Fe.
Annealed. 85,000 TS; 35,000 YS, 60 El; 70 RA; 150 Brin
Cold drawn: 180,000 TS, 125,000 YS, 10 El; 330 Brin
For welded chemical plant equipment; Type 304; stainless, austenitic.

KARONI 10-18 Mo.
M-1310, 0 10 max C, 18 Cr, 9.5 Ni, 2 Mo, 2 2 Si, bal Fe.
Annealed: 85,000 TS; 35,000 YS; 50 El; 65 RA; 160 Brin
Cold drawn 150,000 TS, 135,000 YS; 6 El, 300 Brin.
For acid resistant chemical plant equipment; Type 316, stainless, austenitic.

KARONI 10-18 MoCu EXTRA
M-1310; 0 07 max C, 0.4 Si, 17 5 Ni, 17.5 Cr, 2 Cu, Ti = 7 × C, 2 Mo, bal Fe.
For valves, pumps, chemical plant equipment; corrosion and heat resistant.

KARONI 10-18 Mo EXTRA.
M 1310, 0 12 max C, 18 Cr, 2 Mo, 10.5 Ni, Ti = 4 × C, bal Fe.
Annealed 90,000 TS; 40,000 YS; 45 El, 60 RA; 180 Brin.
For welded chemical plant equipment, Type 316 Ti; corrosion resistant

KARONI 10-18 Mo SU.
M-1310; 0 07 max C, 18 Cr, 10 5 Ni, 2 Mo, bal Fe.
Annealed: 85,000 TS; 35,000 YS; 50 El; 65 RA; 160 Brin.
For acid resistant chemical plant equipment; Type 316; stainless, austenitic.

KARONI 12-12 SU.
M-1310; 0 10 max C, 12 5 Cr, 12 Ni, bal Fe.
For valves, pumps, turbine parts; corrosion and heat resistant.

KARONI 13-17 Mo SU.
M-1310; 0.07 max C, 17 Cr, 13 Ni, 4.75 Mo, bal Fe.
Annealed: 85,000 TS; 35,000 YS; 50 El; 65 RA; 160 Brin.
For acid resistant chemical plant equipment; Type 317; stainless, austenitic.

KARONI 17-17 MoCu EXTRA.
M-1310; 0.07 max C, 17.5 Cr, 17.5 Ni, 2 Mo, 2 Cu, Ti = 7 × C, bal Fe.
For valves, pumps, turbine parts; corrosion resistant.

KARONI 20-13.
M-1310; 0.12 max C, 13 Cr, bal Fe.
Annealed: 75,000 TS; 40,000 YS; 35 El; 70 RA; 155 Brin.
Cold drawn: 100,000 TS; 85,000 YS; 17 El; 60 RA; 205 Brin.
For pumps, valves, turbine and jet parts; Type 310; corrosion resistant.

KARONI 20-13S.
M-1310; 0.12 max C, 13 Cr, 0.2 S, bal Fe.
Annealed: 75,000 TS; 40,000 YS; 35 El; 70 RA; 155 Brin.
For screw machine products, shafts, cutlery; Type 410F; corrosion resistant.

KARONI 20-16.
M-1310; 0.08 C, 17 Cr, bal Fe.
Annealed: 95,000 TS; 50,000 YS; 25 El; 55 RA; 196 Brin.
Cold drawn: 105,000 TS; 85,000 YS; 17 El; 50 RA; 215 Brin.
For furnace parts, heat treating boxes, baffles; Type 430; corrosion resistant.

KARONI 20-16 MoS.
M-1310; 0.12 C, 16.5 Cr, 0.25 Mo, 0.2 S, bal Fe.
Annealed: 95,000 TS; 50,000 YS; 25 El; 55 RA; 195 Brin.
For screw machine products, shafts; Type 430F; corrosion resistant.

KARONI 40-13.
M-1310; 0.2 C, 0.4 Si, 13 Cr, bal Fe.
Annealed: 95,000 TS; 50,000 YS; 25 El; 55 RA; 195 Brin.
Cold drawn: 105,000 TS; 85,000 YS; 17 El; 50 RA; 215 Brin.
For turbine blades, cutlery, valves, knives;
Type 420; corrosion resistant.

KARONI 40.13 Mo.
M-1310; 0.20 C, 13 Cr, 1.2 Mo, bal Fe.
Annealed: 95,000 TS; 40,000 YS; 25 El; 55 RA; B 92 Rock.
Heat treated: 240,000 TS; 200,000 YS; 9 El; 26 RA; C 50 Rock.
For cutlery, knives, surgical instruments, oil refinery and chemical plant equipment.
Corrosion resistant, hardenable.

KARONI 40-17.
M-1310; 0.22 C, 17 Cr, 1.5 Ni, bal Fe.
Annealed: 125,000 TS; 95,000 YS; 20 El; 55 RA; 260 Brin.
Cold drawn: 130,000 TS; 110,000 YS; 15 El; 35 RA; 270 Brin.
For marine hardware, valves, pumps; Type 431; corrosion resistant.

KARONI 70-16 Mo.
M-1310; 0.35 C, 0.4 Si, 16.5 Cr, 1.15 Mo, bal Fe.
For chemical plant equipment, valves, pumps; corrosion resistant.

KARONI 80-13.
M-1310; 0.4 C, 0.4 Si, 13 Cr, bal Fe.
Annealed: 95,000 TS; 50,000 YS; 25 El; 55 RA; 195 Brin.
For turbine blades, cutlery, valves; Type 420; stainless.

KARONI 80-13 EXTRA.
M-1310; 0.85 C, Cr, V, bal Fe.
For bearings, liners; water hardened.

KARONI 210-15 Mo.
M-1310; 1.1 C, Cr, Mo, S, bal Fe.
For bearings, liners, sleeves; water hardened.

KASLE KA-2.
M-1701; 1.0 C, 0.7 Mn, 0.3 Si, 5.25 Cr, 0.3 V, 1.1 Mo, bal Fe.
(Also available in free-machining grade).
Type A2 air hardening tool steel.

KASLE KA-6.
M-1701; 0.7 C, 2.1 Mn, 0.3 Si, 1.0 Cr, 1.3 Mo, bal Fe.
Type A6 air hardening tool steel.

KASLE KA8-2H.
M-1701; 0.50 C, 0.3 Mn, 1.0 Si, 5.0 Cr, 1.4 V, W (optional), 1.35 Mo, bal Fe.
Type A8 air hardening tool steel.

KASLE KA-9.
M-1701; 0.5 C, 0.35 Mn, 0.3 Si, 5.0 Cr, 1.5 Ni, 1.0 V, 1.4 Mo, bal Fe.
Type A9 air hardening tool steel.

KASLE KD-2.
M-1701; 1.55 C, 0.3 Mn, 0.3 Si, 12.0 Cr, 0.9 V, 0.8 Mo, bal Fe.
Air or oil hardening high carbon, high chromium cold work tool steel. AISI D2.

KASLE KD-3.
M-1701; 2.0 C, 0.3 Mn, 0.4 Si, 12.0 Cr, bal Fe.
Air or oil hardening high carbon, high chromium cold work tool steel. AISI D3.

KASLE KD-5.
M-1701; 1.5 C, 0.4 Mn, 0.4 Si, 12.5 Cr, 0.5 Ni, 0.5 V, 0.85 Mo, 3.3 Co, bal Fe.
Air or oil hardening high carbon, high chromium cold work tool steel. AISI D5.

KASLE KD-6.
M-1701; 2.1 C, 12.5 Cr, 0.15 V, 1.3 W, bal Fe.
Air or oil hardening high carbon, high chromium cold work tool steel; AISI D6.

KASLE KD-7.
M-1701; 2.4 C, 0.4 Mn, 0.4 Si, 12.5 Cr, 4.0 V, 1.1 Mo, bal Fe.
Air or oil hardening high carbon, high chromium cold work tool steel. AISI D7.

KASLE KF-2
M-1701; 1.3 C, 0.28 Mn, 3.5 W, bal Fe.
Special purpose tool steel. AISI F2.

KASLE KH-11
M-1701; 0.35 C, 0.4 Mn, 1.0 Si, 5.0 Cr, 0.4 V, 1.5 Mo, bal Fe.
Air or oil hardening hot work tool steel, chromium type AISI H11.

KASLE KH-12.
M-1701; 0.36 C, 0.4 Mn, 1.1 Si, 5.0 Cr, 0.35 V, 1.3 W, 1.5 Mo, bal Fe.
Air or oil hardening hot work tool steel, chromium type AISI H12.

KASLE KH-13.
M-1701; 0.40 C, 0.4 Mn, 1.1 Si, 5.0 Cr, 1.1 V, 1.3 Mo, bal Fe.
Air or oil hardening hot work tool steel, chromium type. AISI H13.

KASLE KH-19.
M-1701; 0.40 C, 0.3 Mn, 0.3 Si, 4.25 Cr, 2.2 V, 4.25 W, 0.4 Mo, 4.25 Co, bal Fe.
Air or oil hardening hot work tool steel, chromium type (Cr-V-W-Co). AISI H19.

KASLE KH-21.
M-1701; 0.30 C, 0.3 Mn, 0.4 Si, 3.5 Cr, 0.35 V, 9.0 W, bal Fe.
Air or oil hardening hot work tool steel, tungsten type. AISI H21.

KASLE KH-26.
M-1701; 0.55 C, 0.3 Mn, 0.25 Si, 4.0 Cr, 1.1 V, 18.0 W, bal Fe.
Air or oil hardening hot work tool steel, tungsten type. AISI H26.

KASLE KHD.
M-1701; C as desired, 0.25 Mn, 0.25 Si, 0.015 max P, 0.015 max S, bal Fe.
Type W1 water hardening tool steel.

KASLE KM-1.
M-1701; 0.85 C, 4.0 Cr, 1.35 V, 1.9 W, 9.0 Mo, bal Fe.
High speed tool steel, molybdenum type. AISI M1.

KASLE KM-2.
M-1701; 0.85 C, 4.0 Cr, 2.0 V, 6.5 W, 5.0 Mo, bal Fe.
High speed tool steel, Mo-W type. AISI M2.

KASLE KM-2C.
M-1701; 1.0 C, 4.0 Cr, 2.0 V, 6.5 W, 5.0 Mo, bal Fe.
High speed tool steel, Mo-W type. AISI M2.

KASLE KM-3.
M-1701, 1.05 C, 4.0 Cr, 2.6 V, 6.0 W, 5.75 Mo, bal Fe.
High speed tool steel, Mo-W type.
AISI M3 (Class 1).

KASLE KM-3H.
M-1701; 1.2 C, 4.0 Cr, 3.25 V, 6.25 W, 6.25 Mo, bal Fe.
High speed tool steel, Mo-W type.
AISI M3 (Class 2).

KASLE KM-4
M-1701; 1.3 C, 4.0 Cr, 4.0 V, 5.5 W, 4.5 Mo, bal Fe
High speed tool steel, molybdenum type (Mo-Cr-V-W). AISI M4

KASLE KM-7.
M-1701; 1.0 C, 4.0 Cr, 2.0 V, 1.75 W, 8.75 Mo, bal Fe.
High speed tool steel, molybdenum type.
AISI M7.

KASLE KM-10.
M-1701, 0.87 C, 4.0 Cr, 2.0 V, 8.0 Mo, bal Fe.
High speed tool steel, molybdenum type.
AISI M10.

KASLE KM-35.
M-1701; 0.83 C, 4.25 Cr, 1.9 V, 6.4 W, 5.0 Mo, 5.0 Co, bal Fe.
High speed tool steel, molybdenum type, (Mo-Cr-W-Co). AISI M35.

KASLE KM-42.
M-1701; 1.08 C, 4.0 Cr, 1.15 V, 1.55 W, 9.7 Mo, 8.0 Co, bal Fe.
High speed tool steel, Mo-Co type.
AISI M42.

KASLE KM-50.
M-1701; 0.80 C, 4.0 Cr, 1.0 V, 4.5 Mo, bal Fe.
High speed tool steel, molybdenum type.
AISI M50.

KASLE KNL.
M-1701; 1.7 C, 12.0 Cr, 1.0 V, 0.5 W, 0.6 Mo, bal Fe.
Air or oil hardening high carbon, high chromium tool steel.

KASLE KO-1.
M-1701; 0.95 C, 1.20 Mn, 0.3 Si, 0.5 Cr, 0.2 V, 0.5 W, bal Fe.
Type O1 oil hardening tool steel.

KASLE KO-2.
M-1701; 0.90 C, 1.7 Mn, 0.25 Si, 0.4 Cr, 0.15 V, bal Fe.
Type O2 oil hardening tool steel.

KASLE KO-6.
M-1701; 1.45 C, 0.75 Mn, 1.15 Si, 0.25 max Cr, 0.25 Mo, bal Fe.
Type O6 oil hardening tool steel.

KASLE KS-1.
M-1701; 0.50-0.60 C, 0.35 Mn, 0.8 Si, 1.35 Cr, 0.25 V, 2.50 W, bal Fe.
Type S1 shock resisting tool steel.

KASLE KT-1.
M-1701; 0.72 C, 4.3 Cr, 1.1 V, 18.0 W, bal Fe.
High speed tool steel, tungsten type. AISI T1.

KASLE KT-5.
M-1701; 0.76 C, 4.3 Cr, 1.6 V, 18.0 W, 0.9 Mo, 9.5 Co, bal Fe.
High speed tool steel, tungsten-cobalt type. AISI T5.

KASLE KT-15.
M-1701, 1.5 C, 4.0 Cr, 5.0 V, 12.5 W, 5.0 Co, bal Fe
High speed tool steel, tungsten type, (W-Cr-V-Co).
AISI T5.

KASLE KW-1.
M-1701, C as desired, 0.2 Mn, 0.2 Si, 0.020 max P, 0.020 max S, bal Fe.
Type W1 water hardening tool steel.

KASLE KW-2.
M-1701; 1.03 C, 0.25 Mn, 0.23 Si, 0.22 V, bal Fe
Type W2 water hardening tool steel.

KASLE KW-5.
M-1701; 1.1 C, 0.3 Mn, 0.25 Si, 0.5 Cr, bal Fe.
Type W5 water hardening tool steel.

KATADYN SILVER.
German, Ag, Cu.
For jewelry, corrosion resistant.

KAWASAKI-HTP52W.
M-1541; 0.18 max C, 0.8-1.4 Mn, 0.3-0.5 Si, 0.30 max Cu, bal Fe.
Rolled: 74,000 min TS; 47,000 min YP; 16 min El.
For railroad and mine cars, derricks, agricultural equipment, structures.
Constructional steel, tough

KAWASAKI-KO.
M-1541; 0.1-0.2 C, 0.6-1.0 Mn, 0.15-0.50 Cu, 0.7-1.0 Ni, 0.4-0.8 Cr, 0.4-0.6 Mo, 0.03-0.10 V, 0.002-0.006 B, bal Fe
Heat treated. 114,000-135,000 TS; 100,000 min YP; 18 min El.
For railroad and mine cars, derricks, agricultural equipment.
High-strength, low alloy construction steel, good fabricability and weldability.

KAWASAKI NTK-M7.
M-1577; 0.06 max C, 9-11 Cr, 16-18 Ni, 6-8 Mo, bal Fe.
Hot rolled: 105,000 TS; 86,000 YS; 34 El; 44 RA.
Annealed: 78,000 TS; 35,000 YS; 59 El; 61 RA.
For valve and pump parts, impellers.
Corrosion and heat resistant.

KAWASAKI-QT60A.
M-1541; 0.12 max C, 0.6-1.0 Mn, 0.4 max Cu, 0.4-0.7 Ni, 0.4-0.7 Cr, 0.2 max Mo, 0.3-0.6 V, bal Fe.
Heat treated: 85,000 min TS; 68,000 min YP; 16% min El.
For railroad and mine cars, derricks, agricultural equipment.
High-strength low-alloy constructional steel.

KAWASAKI-QT60B.
M-1541; 0.12 max C, 1.1-1.5 Mn, 0.35-0.55 Si, 0.3 max Cu, bal Fe.
Heat treated: 85,000 min TS; 65,000 min YP; 16 min El.
For railroad and mine cars, derricks, agricultural equipment, structures, buildings.
Constructional steel, tough.

KAY-BRUNNER NIRESIST.
M-572; 2.3 T.C., 12-15 Ni, 5-7 Cu, Cr, Mn, Si, bal Fe.
For heat and corrosion resistant parts; heat and corrosion resistant.

KAYEM-1.
French; Al, Cu, bal Zn.
For die castings.

KAYEM-2.
French; Al, Cu, bal Zn.
For die castings

K.C.M. NICKEL BRONZE.
M-1518; Ni, Sn, bal Cu.
Cast: 33,600 TS; 10-15 El, 100-120 Brin.
For slip rings for electrical motors; high conductivity.

"K.D" NO. 6.
M-344; C, Co, W, bal Fe.
For high speed lathe tools, twist drills, reamers; high speed steel.

"K.D." NO. 10.
M-344; C, W, Co, bal Fe.
For high speed lathe tools, twist drills, reamers; high speed steel.

K.D. NO 16
M-344; 0 7 C, 4 5 Cr, 10 Co, 2.2 V, 16 W, 1.5 Mo, bal Fe
For reamers, drills, broaches, taps, hobs; high speed steel, oil hardened.

K.E.4L.
M-510; high C, high Cr, bal Fe.
For springs; oil hardened.

K.E.15.
M-510; 0.07-0.10 C, 13 Cr, bal Fe.
Annealed: 78,400 TS; 54,000 YS; 35 El; 70 RA; 152 Brin.
Heat treated: 123,000 TS, 105,000 YS, 25 El; 65 RA; 255 Brin.
For cutlery, stainless parts; stainless, martensitic.

K.E.25.
M-510; 0.25 C, 13 Cr, bal Fe.
Heat treated: 101,000-123,000 TS; 20 El; 201-255 Brin.
For cutlery, stainless parts; stainless, martensitic.

K.E.35.
M-510; 0.35 C, 13 Cr, bal Fe.
Heat treated: 99,000-274,000 TS; 68,000-242,000 YS; 30-9 El; 61-30 RA; 197-532 Brin.
For cutlery, valves, surgical instruments; stainless, martensitic.

K.E.37D.
M-510; C, Ni, Cr, Mo, bal Fe.
Heat treated: 157,000-168,000 TS; 141,000-153,100 YS; 20-18 El; 55-50 RA; 321-351 Brin.
For shafts, gears, bolts; oil or air hardened, tough.

K.E. 40.A.
M-510; 0.10 C, 12.5 Cr, Se, bal Fe.
Free cutting martensitic corrosion resistant steel, hardenable; for pump shafts, hardware, fasteners, gears, axles.

K.E.40AM
M-510; 0 10 C, 12-14 Cr, S, bal Fe.
Annealed: 75,000 TS; 40,000 YS; 35 El; 70 RA; 155 Brin
For screw machine products, pinions, shafts; stainless, free-cutting.

K.E 41.
M-510; 0.12 C, 4 5 Ni, 1.35 Cr, 0.2 Mo, bal Fe.
Ht. Tr.: 179,000-202,000 TS, 13-17 El; 40-50 RA; 375-390 Brin
For gears, pinions, shafts, counter-shafts.
Case hardening, shock resistant

K.E 43.
M-510; 0 15 C, 13 Cr, bal Fe.
Heat treated: 123,000-145,000 TS; 15 El, 248-321 Brin
For valves, cutlery, surgical instruments; stainless, hardenable

K E 127.
M-510; 0 12 C, 0.95 Cr, 3 25 Ni, 0 2 Mo, bal Fe.
For molds.
Type P6 case hardening tool steel.

K E 144
M-510; C, alloy, bal Fe
For pneumatic chipping chisels; water hardened.

K E.156.
M-510, C, alloy, bal Fe
For cold drawing and swaging dies; water hardened

K E 160
M-510; 1.05 C, 0 45 Mn, 0 45 Cr, bal Fe
High carbon water hardening steel for collets.
For taps, drills, reamers

K E 169
M 510; 0 14 C, 0.85 Cr, 3.4 Ni, 0 15 Mo, bal Fe.
Nickel-chrome-moly case hardening steel.
Core hardenable to 135,000-157,000 TS
For gears, spline shafts, axles, plastic mold dies

K E. 200
M-510, 1 4 C, 13 0 Cr, 0.60 Mo, 3.5 Co, bal Fe.
Cobalt chrome alloy tool steel; air hardening
For knurling and heading dies, press tools.

K E 226
M-510, 1 05 C, 0 50 Cr, 2.1 W, bal Fe.
Tungsten water hardening tool steel.
For taps, drills, reamers, punches.

K.E.232.
M-510; C, Cr, bal Fe
For valves; stainless, oxidation resistant.

KE-241.
M-510; 0 55 C, 3 Si, 8.5 Cr, 2 W, bal Fe.
For valves for water cooled engines; resists scaling to 1000°C.

K.E. 275.
M-510; 0.4 C, 0.7 Si, 3.0 Cr, 9.5 W, 0.4 Mo, 0.5 V, bal Fe.
For die casting dies, hot work tools.
Oil hardening shock resistant, hot work steel. AISI H21.

K.E.287.
M-510; 0.12 C, 3 Ni, bal Fe.
Heat treated. 100,000-150,000 TS; 25-17 El; 55-45 RA; 235-286 Brin.
For gears, pinions, worms, shafts; case hardened, shock resistant.

K.E.332.
M-510; C, Cr, bal Fe.
Annealed: 98,500 TS; 56,000 YS; 20 El; 35 RA; 196 Brin.
For valves; oxidation resistant.

K.E. 339.
M-510; 0.25 C, 3.0 Cr, 2.2 Ni, 9.5 W, 0.4 Mo, 0.5 V, bal Fe
For die casting dies, hot working tools.
Oil hardened, shock resistant; hot work steel.

K.E.354
M-510; C, Cr, bal Fe.
Normalized: 112,000-135,000 TS, 67,000 YS, 30-20 El; 45-35 RA; 207-272 Brin.
For valves, corrosion resistant parts; heat resistant.

K.E. 355
M-510, 0.32 C, 1.2 Cr, 4.1 Ni, 0.2 Mo, bal Fe.
For plastic mold dies
Oil or air hardening, tough and strong

K.E 396
M-510, 0.63 C, 1.0 Cr, 1.45 Ni, 0.20 Mo, bal Fe
Nickel-chrome-moly oil hardening tool steel. AISI L6
For blanking and forming dies, shear blades

K.E 484
M-510; 0.4 C, Ni, Cr, Mo, bal Fe.
For piercing and stamping dies, shears die bolsters, hot work steel, oil hardened

K.E 581
M-510; C, bal Fe.
Rolled 67,000 TS.
For screw machine products; free-cutting.

K.E. 595
M-510, 1.25 C, 0.85 Mn, 1.2 Cr, 1.3 W, bal Fe.
Oil hardening alloy tool steel, for cold drawing and swaging dies, oil or water hardening.

K.E 621
M-510; 1.0 C, bal Fe.
For press tools, drills, reamers, general tools; water hardened.

K.E. 637.
M-510, 1.05 C, 1.7 Mn, 0.25 W, bal Fe
Ht Tr 250,000 TS, 225,000 YS, 8 El; C 50 Rock
For gages, tools, taps, punches, reamers, forming dies, crimpers, broaches, blanking dies.
Type O1 oil hardening, non-deforming tool steel, shock resistant.

K.E. 660.
M-510; 0.12 C, 5.0 Ni, 0.3 Cr, 0.2 Mo, bal Fe.
Ht Tr. 139,000-162,000 TS; 14-18 El; 40-50 RA; 310-340 Brin.
For gears, fasteners, cam shafts, cams, bolts.
Case hardening, shock resistant.

K.E. 672.
M-510; 0.95 C, 1.2 Mn, 0.55 Cr, 0.65 W, 0.15 V, bal Fe.
Oil hardening alloy tool steel. AISI O1.
For press and blanking tools.

K.E.708.
M-510; C, alloy, bal Fe.
For cold drawing and swaging dies; water hardened.

K.E 753.
M-510; 1 C, 1.25 W, bal Fe
For taps, drills, reamers, threading dies; water hardened.

K.E.795.
M-510; 0.9 C, W, bal Fe.
For high temperature springs; oil or air hardened.

KE798.
M-510; 1.0 C, 0.6 Mn, 1.5 Cr, 0.5 W, bal Fe.
For tools, dies, cutters; oil hardened.

K.E. 805.
M-510; 0.38 C, 1 Cr, 1.5 Ni, 0.2 Mo, bal Fe.
Ht Tr.: 121,000-280,000 TS; 90,000-246,000 YS; 10-26 El; 35-68 RA; 250-515 Brin.
For gears, machinery parts, shafts, machinery tools, fasteners.
Oil hardening, wear resistant.

K.E. 839
M-510; 1.05 C, 0.50 Mn, 1.4 Cr, bal Fe.
Oil hardening alloy tool steel; for ball bearings, cutters, gages, taps, swaging dies, shear blades.
AISI L1.

KE881
M-510; 0.7 C, 18 W, 4 Cr, 1 V, bal Fe.
For lathe and planer tools, drills, taps, hobs, reamers, high speed steel; Type T1.

K.E 896.
M-510, 0.5 C, 0.65 Mn, 1.1 Cr, 0.2 V, bal Fe.
For arbors, axles, boring bars, connecting rods.
Type L2 tool steel, oil hardening, shock resistant.

K.E 897
M-510; 0.3 C, 1.25 Cr, 4.25 Ni, 0.2 Mo, bal Fe.
Ht. Tr. 224,000-270,000 TS; 10-14 El, 30-45 RA; 444-512 Brin
For gears, shafts, bolts, fasteners.
Oil hardening, shock resisting.

K.E 933
M-510; 1.25 C, 1 W, 0.5 Cr, bal Fe
For taps, drills, reamers, punches; water hardened.

K.E.-954
M-510; C, Co, Cr, bal Fe
Air hardened: 600-627 Brin.
For valves for air-cooled engines; air-hardened.

K.E 960
M-510; 0.50 C, 0.65 Si, 1.5 Cr, 2.25 W, 0.20 V, bal Fe
Extra tough alloy oil hardening tool steel.
For shear blades, pneumatic tools, stamping and riveting tools. AISI S1.

K.E.961
M-510; 1.5 C, 12 Cr, bal Fe.
For plastic mold dies, hot and cold shears; oil or air hardened, resists abrasion.

K.E. 965.
M-510; 0.4 C, 13 Cr, 13 Ni, 3 W, 1.5 Si.
Heat treated. 152,000 TS; 27 El; 49 RA; 269 Brin.
For valves, supercharger buckets; non-distorting.

K.E. 970.
M-510, 2.1 C, 13.5 Cr, 0.5 W, bal Fe.
Chrome high duty tool steel; for plug and ring gages, punches, lamination and blanking dies.
AISI D3.

K.E. 1006.
M-510; 1.05 C, 0.20 Si, 0.20 Mn, 0.15 V, bal Fe.
Water hardening tool steel, soft center steel for cold heading dies. AISI W2.

K.E. 1029.
M-510; C, Si, Cr, bal Fe.
For valves; air hardened, heat resistant.

K.E. 1036.
M-510; 0.90 C, 13 Cr, bal Fe.
For sleeves, burners, atomizers, gas turbine parts.
Type 440 B stainless, hardenable, martensitic, wear resistant.

KE-2258.
M-510; 0.7 C, 0.5 Si, 0.4 Mn, 8 Cr, bal Fe.
For valves for internal combustion engines; heat resistant.

K.E.2301.
M-510; 0.12 C, bal Fe.
Heat treated: 72,000-90,000 TS; 35-40 El; 65-55 RA; 156-170 Brin.
For gears, pinions, shafts, worms; case hardened.

K.E.A. 23.
M-510; 0.07 C, 18.0 Cr, 9.0 Ni, Ti, bal Fe.
Weldable austenitic stainless; for welded structures and for operation at elevated temperatures.

K.E.A. 28.
M-510, 0.45 C, 13.25 Cr, 1.0 Ni, bal Fe.
Martensitic corrosion resistant steel, hardenable.
For plastic molds.

K.E.A. 108.
M-510; 1.0 C, 0 55 Mn, bal Fe, plus free cutting agent.
Free cutting water hardening carbon tool steel.

K.E A. 138.
M-510; 0.35 C, 12.0 Cr, 12.0 W, 1.0 V, bal Fe.
Chrome-Tungsten hot work tool steel.
For pressure die casting dies, extrusion dies, punches. AISI H23.

K.E.A. 145.
M-510; 0.38 C, 1.05 Si, 5 25 Cr, 1.35 Mo, 1.0 V, bal Fe
5% Chrome-Vanadium-Moly die casting steel.
For die casting dies, extrusion dies, hot piercing and gripping dies. AISI H13.

K.E.A. 147.
M-510; 1.5 C, 12 Cr, 1 V, bal Fe.
Ht. Tr.. 445,000 CS; C64-66 Rock.
For blanking and forming dies, plug gauges, broaches, hobs
Oil or air hardening, non-deforming. Type D2 tool steel.

K.E.A. 162.
M-510; 1.0 C, 0.65 Mn, 5.25 Cr, 1.0 Mo, 0.20 V, bal Fe.
Air hardening tool steel. AISI A2.

K.E.A. 172.
M-510; 0.70 C, 0 30 Si, 2.0 Mn, 1.0 Cr, 0.45 Mo, bal Fe.
Air hardening tool steel. AISI A6.

K.E.A. 180.
M-510; 1.55 C, 12.0 Cr, 0.85 Mo, 0.30 V, bal Fe.
High duty tool steel, air hardening. AISI D2.

K.E.A. 203.
M-510; 0.85 C, 17.5 Cr, 0.55 Mo, bal Fe.
Heat treated: 280,000 TS; 270,000 YS; 3 El, 555 Brin.
Annealed: 107,000 TS; 62,000 YS; 18 El; 220 Brin.
For dental and surgical instruments, bearings, pivots, cutlery, valve parts.
Type 440 B, hardenable, corrosion and wear resistant.

K.E.A. 205.
M-510; 1.4 C, 0.3 Si, 0.4 Mn, 3.45 V, bal Fe.
Cold heading punch and die steel.
For dies, punches, headers.

K.E.A. 207.
M-510; 1.05 C, 17 Cr, 0.6 Mo, bal Fe.
Annealed: 110,000 TS, 70,000 YS; 15 El; B97 Rock.
Heat treated: 285,000 TS; 275,000 YS; 2 El; 580 Brin.
For bearings, surgical instruments, valve parts, nozzles, pivot pins.
Type 440 C, hardenable, corrosion and wear resistant

K.E.A. 221.
M-510; 0.09 C, 18.5 Cr, 10 5 Ni, 2 7 Mo, bal Fe.
Annealed: 85,000 TS; 35,000 YS, 50 El; 165 Brin.
Cold Rolled: 150,000 TS; 135,000 YS, 6 El; C32 Rock.
For chemical and pharmaceutical equipment, digesters, valve trim, tanks.
AISI 316, stainless, austenitic, acid resistant

K.E.A 227
M-510; 0 50 C, 1.2 Mn, 0.65 Cr, 0.20 Mo, bal Fe.
Easy machining bolster steel
For molds, press components.

K E A. 231
M-510, 0 7 C, 18.25 Cr, 8.5 Ni, bal Fe.
Annealed. 85,000 TS; 35,000 YS, 60 El; 150 Brin.
Cold Drawn· 180,000 TS; 125,000 YS; 10 El; C35 Rock
For architectural trim, welded structures, kitchen equipment, chemical and textile plant equipment
Type 304, austenitic, stainless.

K E A 505
M-510, 0 17 C, 17 Cr, 1.75 Ni, Se, bal Fe
Annealed 125,000 TS, 95,000 YS, 20 El, 260 Brin.
Cold Drawn: 130,000 TS, 110,000 YS, 15 El; 270 Brin.
For marine hardware, pump shafts, valve trim, aircraft structural components.
AISI 431 Se, corrosion resistant, free cutting.

K.E.A 507
M-510; 0.09 C, 18 0 Cr, 8.5 Ni, Se, bal Fe
Free cutting austenitic stainless steel.
For stainless parts requiring appreciable machining AISI 303 Se

K.E.A. 508.
M-510, 0.20 C, 13 Cr, Se, bal Fe.
Annealed 95,000 TS; 50,000 YS; 25 El; 196 Brin.
Cold Drawn. 105,000 TS, 85,000 YS, 17 El; 215 Brin.
For cutlery, marine hardware, valve trim, gears, ball bearings, gauges.
AISI 420 Se, corrosion resistant. Heat treatable. Free-cutting.

K.E.A. 521.
M-510; 0.07 C, 18.0 Cr, 11.5 Ni, 2.65 Mo, Se, bal Fe.
Free machining austenitic stainless steel with very good corrosion resistance.
For machined parts in food, beverage, laundry plants. AISI 316 Se.

K.E. CARLISLE
M-510; 1.0 C, bal Fe.
For taps, drills, reamers, general tools; water hardened.

K.E. DIAMOND.
M-510; 1.1 C, bal Fe.
For taps, drills, reamers, general tools; water hardened.

K.E. DIAMOND NO. 10.
M-510; 1.5 C, 0.40 Mn, 0.60 Cr, 5.75 W, bal Fe.
High carbon tungsten alloy tool steel.
For reamer blades, roll turning tools, form cutters; water hardenable.

KEENE'S ALLOY.
75 Cu, 16 Ni, 2.8 Sn, 2 3 Zn, 2 Co, 1.5 Fe, 0.5 Al.
For corrosion resistant and ornamental parts; corrosion resistant.

KEEN-KUT.
M-15; C, alloy, bal Fe
For hollow drills; non-tempering.

KEEWATIN.
M-435; 0.90 C, 1 Mn, 0.5 Cr, 0.5 W, bal Fe.
For dies, cutters, punches, reamers, broaches; Type 01; oil hardened, non-deforming

K.E EXTRA QUALITY.
M-510; 1.1 C, bal Fe.
For taps, drills, reamers, general tools; water hardened.

K.E. H22.
M-510, 0 1 C, 18 Cr, 8 Ni, bal Fe
Rolled· 123,000 TS; 56,000 YS; 52 El; 57 RA; 228 Brin.
Annealed. 101,000 TS; 42,000 YS; 58 El; 65 RA; 163 Brin.
For chemical plant equipment, stainless, austenitic. AISI Type 302

KEINMAYER'S AMALGAM.
50 Hg, 25 Sn, 25 Zn
For amalgam

K.E KHRS
M-510, 0 4 C, bal Fe.
Rolled 90,000 TS.
For screw machine products, free-cutting

KELCALOY.
M-792, C, alloy, bal Fe
For oil refinery equipment; corrosion resistant.

KEL-CAST MM
M-1163, M-900, 3.25 C, 2.5 Si, 0.7 Mn, 0.3 Cr, 0 4 Mo, bal Fe
Cast· 45,000 TS; 200-220 Brin.
For bushings, cams, gears, valves; cast iron.

KEL-CAST XXX.
M-1163, M-900; 3.6 C, 1.25-1.5 Si, 0 7 Mn, 0.3 Cr, bal Fe.
Cast· 45,000 TS, 200-220 Brin
For bearings, gears, valve seats; cast iron.

KELLY-IRON.
M-900; 3.2 C, 2.0 Si, alloy, bal Fe
For bearings, cams, gears, rolls, valves; cast iron.

KELMET.
70.5-68.0 Cu, 22.5-25.5 Pb, 6.4-6.6 Sn, 0.03 S, 0.03 Zn, 0.04 Ni.
For bearings; heavy duty

KELOCK 237.
M-510; 0.7 C, 18 W, 4 Cr, 1 V, bal Fe.
Hardened: C64-67 Rock.
For die cores, lathe and planer tools, drills, chasers, reamers, broaches.
Type T1 high-speed steel, high red-hardness.

KELOCK 788.
M-510; 0.7 C, 4 Cr, 13 W, 1 V, 2 Mo, bal Fe.
For tools, dies, cutters, reamers, drills; high speed steel, oil hardened.

KELOCK 795.
M-510; 0.7 C, 14 W, 4 Cr, 0.6 V, bal Fe.
Hardened: C64-67 Rock.
For lathe and planer tools, cutters, hot and cold shear blades, drills, reamers, punches.
High-speed steel, high red-hardness.

KELOCK 873.
M-510; 0.7 C, 4.25 Cr, 18.25 W, 0.75 Mo, 1 V, 5 Co, bal Fe.
Hardened: C64-66 Rock.
For lathe and planer tools, cutters, reamers, broaches, drills, form tools.
Type T4 high-speed steel, high red-hardness.

KELOCK 1014.
M-510; 0.7 C, 6 Cr, 14 W, 0.75 Mo, 1.4 V, bal Fe.
Hardened: C64-67 Rock.
For lathe and planer tools, reamers, chasers, broaches, drills, milling cutters.
High-speed steel, high red-hardness.

KELOCK 1021.
M-510, 0 7 C, 18.2 W, 4 Cr, 0.75 Mo, 1.45 V, 10 Co, bal Fe.
Hardened· C64-67 Rock.
For lathe and planer tools, cutters, reamers, broaches, form cutters.
High-speed steel, Type T5, high red-hardness

KELOCK A72
M-510, 0 87 C, 4.25 Cr, 18.75 W, 0.50 Mo, 1 0 V, 5 5 Co, bal Fe
Hardened· C64-66 Rock.
For engraving tools, high duty turning tools, broaches, milling cutters, hobs
High speed steel, good red-hardness, wear and abrasion resistant.

KELOCK A157
M-510, 0.8 C, 6 W, 4 Cr, 2 V, 5 Mo, bal Fe.
Hardened: C64-67 Rock.
For lathe and planer tools, drills, hobs, reamers, taps, milling cutters.
High-speed steel, high red-hardness. AISI M2

KELOCK A229
M-510, 1 05 C, 3 75 Cr, 1.5 W, 9.5 Mo, 1.15 V, 8 25 Co, bal Fe
High speed steel for cutting tools that require extra red hardness AISI M42.

KEMLER
Eng , 76 Zn, 9 Cu, 15 Al.
For ornamental parts

KEMLET
67 Zn, 15 Al, 9 Cu.
For bearings

KEN A-7
M-1700; 2 5 C, 0.7 Mn, 5.0 Cr, 4.5 V, 1 1 Mo, bal Fe.
AISI A7 air hardening tool steel

KEN AIR A-4.
M-1700, 0.95 C, 2.0 Mn, 2.2 Cr, 1.1 Mo (lead added) bal Fe.
AISI A6 air hardening tool steel.

KEN AIR A-6.
M-1700, 0 70 C, 2.0 Mn, 1.0 Cr, 1.3 Mo, bal Fe.
AISI A6 air hardening tool steel.

KEN CHROME D-2
M-1700; 1.5 C, 12.0 Cr, 0.8 V, 0.75 Mo, bal Fe.
Air or oil hardening cold work tool and die steel; AISI D2. High carbon, high chromium type.

KEN CHROME D-3.
M-1700; 2.0 C, 12.0 Cr, bal Fe.
Air or oil hardening cold work tool and die steel; AISI D3. High carbon, high chromium type.

KEN CHROME D-4.
M-1700; 2.25 C, 12.0 Cr, 0.2 V, 1.0 Mo, bal Fe.
Air or oil hardening cold work tool and die steel; AISI D4. High carbon, high chromium type.

KEN-CHROME D-7.
M-1700; 2.4 C, 12.25 Cr, 3.75 V, 1.1 Mo, bal Fe.
Oil or air hardening cold work tool and die steel; AISI D7. High carbon, high chromium type.

KEN DIE A-2.
M-1700; 1.0 C, 0.5 Mn, 0.25 Si, 5.0 Cr, 0.3 V, 1.25 Mo, bal Fe.
Air hardening and cold work tool steel; AISI A2.

KEN F-2.
M-1700; 1.3 C, 0.28 Mn, 3.5 W, bal Fe.
Carbon-tungsten special purpose tool steel; AISI F2.

KEN GRAPH OIL 06.
M-1700; 1.45 C, 0 8 Mn, 1.15 Si, 0.25 Mo, bal Fe
Graphitic type oil hardening cold work tool steel; AISI 06.

KEN H-11.
M-1700; 0 36 C, 0.35 Mn, 4.85 Cr, 0.2 V, 1 5 Mo, bal Fe.
Air or oil hardening hot work tool and die steel, chromium type; AISI H11.

KEN H 12.
M-1700; 0 35 C, 0.35 Mn, 1.0 Si, 5.0 Cr, 0.2 V, 1.15 W, 1.5 Mo, bal Fe.
Air or oil hardening hot work tool and die steel, chromium type; AISI H12.

KEN H 13.
M-1700; 0.40 C, 0 4 Mn, 1.0 Si, 5.0 Cr, 1.0 V, 1.5 Mo, bal Fe.
Air or oil hardening hot work tool and die steel, chromium type; AISI H13.

KEN H 21.
M-1700; 0.30 C, 0.3 Mn, 0 3 Si, 3.0 Cr, 0.3 V, 10.0 W, bal Fe.
Air or oil hardening hot work tool and die steel, tungsten type; AISI H21.

KEN H 24.
M-1700; 0.45 C, 0.3 Mn, 0.3 Si, 3 0 Cr, 0.35 V, 15.0 W, bal Fe.
Air or oil hardening tool and die steel, tungsten type; AISI H24.

KEN H 26.
M-1700; 0.55 C, 4.0 Cr, 1.1 V, 18 0 W, bal Fe.
Air or oil hardening tool and die steel, tungsten type; AISI H26.

KEN H 43.
M-1700; 0.60 C, 3.6 Cr, 1.75 V, 8.5 Mo, bal Fe.
Air or oil hardening tool and die steel, molybdenum type; AISI H43.

KEN L-2.
M-1700; 0.45 C, 0.55 Mn, 0.2 Si, 0.95 Cr, 0.2 V, bal Fe.
Oil hardening special purpose tool steel, low alloy type; AISI L2.

KEN L-6.
M-1700; 0.75 C, 0.75 Mn, 0.90 Cr, 1.75 Ni, 0.35 Mo, bal Fe.
Oil hardening special purpose tool steel, low alloy type; AISI L6.

KEN LUSTRE MOLD.
M-1700; 0.55 C, 1.0 Mn, 0.3 Si, 1.1 Cr, 0.25 Mo, bal Fe.
Oil hardenable tool steel, mainly for molds.

KEN M-1.
M-1700; 0.78 C, 3.8 Cr, 1.15 V, 1.5 W, 8.7 Mo, bal Fe.
High speed tool steel, molybdenum type; AISI M1.

KEN M-2.
M-1700; 0.84 C, 4.2 Cr, 1.95 V, 6.35 W, 5.0 Mo, bal Fe.
High speed tool steel, Mo-W type; AISI M2.

KEN M-3 (Class 1).
M-1700, 1.03 C, 4.0 Cr, 2 5 V, 6.0 W, 5.5 Mo, bal Fe.
High speed tool steel, Mo-W type; AISI M3 Class 1.

KEN M-4.
M-1700; 1.28 C, 4.5 Cr, 4.0 V, 5.5 W, 4.5 Mo, bal Fe.
High speed tool steel, molybdenum type; (Mo-Cr-V-W); AISI M 4

KEN M-41
M-1700; 1 1 C, 4 0 Cr, 6.75 W, 3.75 Mo, 2 0 V, 5 0 Co, bal Fe
High speed tool steel, W-Mo-Co type, AISI M 41.

KENNAMETAL.
M-793, W-Ti-C + Co.
For cutting tools, cemented carbides.

KENNAMETAL 3047.
M-793, WC + Co.
Sintered Rockwell A89.
For large rock bits, drag bits; Tr. Rupture 410,000, sintered carbide.

KENNAMETAL 3109.
M-793, WC, Co, Sintered.
Sintered· 425,000 TrS, A 88 0 Rock
Density· 14 2
For structural wear, impact.

KENNAMETAL 3406.
M-793; WC, Co, sintered
Sintered: 350,000 TrS, A 90.0 Rock.
Density 14.7.
For structural wear, impact.

KENNAMETAL 3411
M-793; WC + Co
Sintered Rockwell A89.
For small rock bits; Tr Rupture 410,000, sintered carbide.

KENNAMETAL K1.
M-793; Sintered carbide tool material.
325,000 TrS, 560,000 C.S
Density 14.1, 90.0 Rock A.
For cutting tools for cast iron, non-ferrous, and non-metallics; edgewear resistant

KENNAMETAL K2S.
M-793; Sintered carbide tool material
275,000 TrS; 680,000 C. S.
Density 12 9; 91 5 Rock A.
For metal cutting, crater and edgeware resistant.

KENNAMETAL K3H.
M-793; 76 WC, 8 Co, 4 TaC, 12 TiC.
Sintered Rockwell A92.
For cutting tools, rock bits, liners; sintered carbides; Tr S.250,000.

KENNAMETAL K4H.
M-793; Sintered carbide tool material.
250,000 TrS; 92.0 Rock A.
640,000 Compressive strength; 12.5 density.
Metal cutting grade, crater and edgewear resistant.

KENNAMETAL K5H.
M-793; Sintered carbide tool material.
Transverse strength: 200,000 psi.

Density: 11.5; Hardness 93 Rock A.
Compressive strength 640,000 psi.
Metal cutting grade, crater resistant.

KENNAMETAL K6.
M-793; Sintered carbide tool material.
250,000 TrS, 670,000 C.S.
Density 14.9; 92.0 Rock A.
For cutting tools for cast iron, wear parts.

KENNAMETAL K7H.
M-793; WC; $W\ Ti\ C_2$, Co.
Sintered: A 93 Rock; 150,000 Tr.S; 560,000 CS.
For cutting tools, dies, lathe and planer tools.
For machining high-speed steels.

KENNAMETAL K8.
M-793; Sintered carbide tool material.
200,000 TrS, 580,000 C.S.
Density 15 1; 92.5 Rock A.
For cutting tools on cast iron and non-metallics; finishing operations, hard and abrasion resistant.

KENNAMETAL K9.
M-793; WC + Co.
Sintered: Rockwell A90.
For coal rotary bits, wood working tools; Tr. Rupture 300,000, sintered carbide

KENNAMETAL K11.
M-793, Sintered carbide tool material
175,000 TrS; 600,000 C.S
Density 15 2, 93 0 Rock A.
For wear parts and metal cutting.

KENNAMETAL K21
M-793, $W\ Ti\ C_2$, TaC, WC, Co
Sintered A91 Rock; 250,000 Tr.S , 670,000 CS
For roughing and finishing cutting tools.
Sintered carbide, shock and wear resistant

KENNAMETAL K45
M-793; WC, Co
Sintered· 250,000 TrS, A 92 5 Rock.
Density· 12 2
For finish cutting operations on steel.

KENNAMETAL K68.
M-793, WC, Co.
Sintered 250,000 TrS; A 92 6 Rock
Density 14 9.
For machining high nickel superalloys

KENNAMETAL K82
M-793; $W\ Ti\ C_2$, WC, Co
Sintered A 90 Rock; 275,000 Tr S, 570,000 CS
For cold drawing dies, burnishing tools.
Sintered carbide. Resists wear and galling.

KENNAMETAL K84.
M-793, $W\ Ti\ C_2$ + WC + Co, sintered material.
300,000 TrS, 650,000 CS, 91.0 Rock A.
For cold drawing dies, wear parts

KENNAMETAL K86.
M-793; $W\ Ti\ C_2$, WC, bal Co.
Sintered· A 91.5 Rock, 250,000 TrS, 610,000 CS.
For cold drawing dies.
Sintered carbides, abrasion resistant.

KENNAMETAL K-90.
M-793; WC + Co.
Rockwell C67.4
For blanking punches, cold heading dies; sintered, shock resistant.

KENNAMETAL K-91.
M-793; WC + Co.
Rockwell C70.
For blanking punches, rivet sets; sintered, shock resistant.

KENNAMETAL K92.
M-793; Sintered carbide tool material.
400,000 TrS; 540,000 C.S.
Density 13.8; 88.5 Rock A.
For lamination dies, forming and blanking dies; wear resistant, moderate shock resistant.

KENNAMETAL K94.
M-793; 12 Co, 60 $W\ Ti\ C_2$, 28 WC.
Sintered· A 91 Rock; 305,000 TrS; 650,000 CS.
For dies, slitting knives, curling rolls.
Sintered carbides, abrasion resistant.

KENNAMETAL K95
M-793; WC + Co, sintered material.
300,000 TrS; 520,000 CS.
Density 14.6; 90.5 Rock A.
For dies, wear parts.

KENNAMETAL K96
M-793, 94 WC, 6 Co.
Sintered. A 92 Rock; 250,000 TrS; 690,000 CS.
For dies, machinery elements, cutters.
Sintered carbide. Wear and abrasion resistant.

KENNAMETAL K151A.
M-793, 20 Ni, bal TiC, TaC, CbC.
Sintered Rockwell A89.
For brass extrusion dies, sintered; C.S. 150,000.

KENNAMETAL K602.
M-793, Sintered carbide tool material.
130,000 TrS, 900,000 C.S.
Density 14 6, 94 3 Rock A.
High hardness, high compression strength and very good wear resistance

KENNAMETAL K701.
M-793, Sintered carbide tool material
150,000 TrS, 680,000 C S.
Density 14 0, 92.0 Rock A.
Cr-Co binder, wear resistant grade

KENNAMETAL K801.
M-793, WC, Ni.
Sintered. 300,000 TrS, A 89.5 Rock.
Density 14 8.
Corrosion and wear resistant

KENNAMETAL KE7
M-793; WC, Co.
For extrusion dies; sintered carbide, wear resistant.

KENNAMETAL KM
M-793; 82 WC; 10 Co, 8 TiC.
Sintered. 300,000 TrS, 640,000 CS,
Density 12 9, 91 0 Rock A.
For cutting tools, crater resistant.

KENNAMETAL KWH.
M-793; $WTiC_2$ + Co
For cutting tools, lathe centers; cemented carbides.

KENNERTIUM W-2.
M-793; Tungsten base heavy metal 97 4 W, 2.6 Ni, Cu, Fe.
110,000 TS; 80,000 YS, 4-8 El, C 27-32 Rock.
Density· 18.5 gm/cc.
For counterweights for aerospace applications; weights for self-winding watches, radar antenna control, radiation shielding, machinable.
Exceeds requirements of MIL-T-21014 Type II Class 4.

KENNERTIUM W-10.
M-793; 7 5 Ni, 2.5 Cu, bal W.
Sintered· 100,000-135,000 TS; 75,000-90,000 YS; 10-25 El; 270-297 Brin.
For radioactive shields, gyroscope rotors, governors, centrifugal clutches; high density, machinable.

KEN OIL O-1.
M-1700; 0.90 C, 1.2 Mn, 0.3 Si, 0.5 Cr, 0.2 V, 0.5 W, bal Fe.
Oil hardening tool steel; AISI O1.

KEN P-2.
M-1700; 0.06 C, 0.3 Mn, 0.15 Si, 0.95 Cr, 0.25 Mo, B, bal Fe.
Low carbon mold steel; to be carburized before hardening; AISI P2.

KEN P-4.
M-1700; 0.07 C, 0.35 Mn, 0.2 Si, 4.5 Cr, 0.5 Mo, bal Fe.
Low carbon mold steel; to be carburized before hardening; AISI P4.

KEN P-6.
M-1700; 0.10 C, 0.5 Mn, 0.25 Si, 1.5 Cr, 3.5 Ni, bal Fe.
Low carbon mold steel; to be carburized before hardening; AISI P6.

KEN P-20.
M-1700; 0.30 C, 0.8 Mn, 0.5 Si, 1.7 Cr, 0.4 Mo, bal Fe.
Oil hardenable mold steel; AISI P20.

KEN PREHARD No. 2.
M-1700; 0.55 C, 1.0 Mn, 0.3 Si, 1.1 Cr, 0.25 Mo, bal Fe.
Oil hardened steel mainly for molds.

KEN S-1.
M-1700; 0.50 C, 0.3 Mn, 1.15 Cr, 0.2 V, 2.4 W, bal Fe.
Oil hardening, shock resisting type tool steel; AISI S1.

KEN S-2.
M-1700; 0.50 C, 0.5 Mn, 0.7 Si, 0.2 V, 0.45 Mo, bal Fe.
Oil or water hardening, shock resisting type tool steel; AISI S2.

KEN S-4.
M-1700; 0.50 C, 0.9 Mn, 0.2 Si, bal Fe.
Water or oil hardening, shock resisting type tool steel; AISI S4.

KEN S-5.
M-1700; 0.52 C, 0.95 Mn, 2.0 Si, 0.15 Cr, 0.2 V, 0.5 Mo, bal Fe.
Water or oil hardening, shock resisting type tool steel; AISI S5.

KENT.
M-1705; 2.15 C, 0.25 Mn, 0.25 Si, 12.0 Cr, 0.8 V, bal Fe.
High carbon, high chromium tool and die steel; air or oil hardening. AISI D3.

KEN T-1.
M-1700; 0.72 C, 4.3 Cr, 1.1 V, 18.0 W, bal Fe.
High speed tool steel, tungsten type;
AISI T1.

KEN T-2.
M-1700; 0.85 C, 4.0 Cr, 2.1 V, 18.5 W, 0.75 Mo, bal Fe.
High speed tool steel, tungsten type.
AISI T2.

KEN T-4.
M-1700; 0.74 C, 4.2 Cr, 1.1 V, 18.5 W, 0.5 max Mo, 5.0 Co, bal Fe.
High speed tool steel, W-Co type; AISI T4.

KEN T-5.
M-1700; 0.78 C, 4.2 Cr, 1.95 V, 18.5 W, 0.70 Mo, 7.9 Co, bal Fe.
High speed tool steel, W-Co type; AISI T5.

KEN T-6.
M-1700; 0.78 C, 4.2 Cr, 1.75 V, 19.5 W, 0.75 Mo, 11.5 Co, bal Fe.
High speed tool steel, tungsten-cobalt type;
AISI T6.

KEN T-8.
M-1700; 0.79 C, 4.0 Cr, 2.0 V, 14.0 W, 0.75 Mo, 5.0 Co, bal Fe.
High speed tool steel, W-Co type; AISI T8.

KEN T-15.
M-1700; 1.55 C, 4.75 Cr, 5.0 V, 12.5 W, 5.0 Co, bal Fe.
High speed tool steel, tungsten type,
(W-Cr-V-Co); AISI T15.

KENTANIUM.
M-793; TiC.
For valve seats, furnace parts, hot extrusion dies, heating elements; resists heat and thermal shock; C.S 550,000.

KENTANIUM K151A.
M-793, 58 Ti, 19 Ni, 7.5 Co, 0.5 Ta, C.
At 1600°F, compressive yield strength: 155,000 psi.
Density 5.8; 89.0 Rock A.
For cutting tools; high temperature operation.

KENTANIUM K162B.
M-793, 52 Ti, 25 Ni, 5 Mo, 4 5 Co, 0 3 Ta, C.
At 1600°F, compressive yield strength: 175,000 psi.
Density 6 0, 89 0 Rock A.
For cutting tools, parts for high temperature applications.

KENTANIUM 165.
M-793, TiC.
For cutters; for high speed precision machining

KEN TOUGH S-7
M-1700; 0.50 C, 0 7 Mn, 3.25 Cr, 1.4 Mo, bal Fe.
Air or oil hardening, shock resisting tool steel,
AISI S7.

KEN TOUGH S-7 MOLD QUALITY.
M-1700, 0 50 C, 0.7 Mn, 3.25 Cr, 1.4 Mo, bal Fe.
Air or oil hardening tool and die steel, mainly for molds

KENTUCKY
M-191; C, Cu, bal Fe.
For construction steel.

KEN W-1
M-1700; 1.0-1.1 C, 0.3 Mn, 0.25 Si, bal Fe
Water hardening tool steel, AISI W1.

KEN W-2.
M-1700; 1 0-1.1 C, 0 15-0.25 V, Mn, Si, bal Fe.
Water hardening tool steel; AISI W2.

KEOKUK ELECTRO-SILVERY.
M-1039, 15 Si, 6 C, bal Fe.
For iron and steel making, addition agent.

KERAU
M-618, 0.7 C, 22 W, 4 Cr, 1 V, bal Fe.
For drills, milling cutters, saws, knives; high speed steel, oil hardened.

KERAU WUNDA.
M-618; C, 18 W, 5 Co, 4 Cr, 1.3 V, bal Fe.
For tools, dies, cutters, high speed steel.

KERCHSTEEL.
0.12-0.18 As, C, bal Fe.
For construction steel.

KERN'S HYDRAULIC BRONZE.
78 Cu, 12 Sn, 10 Zn.
For vessels, pressure castings, valves, fittings; high strength.

KERROFESTAL.
German; 1.0 Si, 0.3 Fe, 0.7 Mn, 0.65 Mg, bal Al.
For architecture, window frames, chemical industry; light alloy.

KERUS.
M-618; 0.7 C, 14 W, bal Fe.
For punches, drills, taps, lathe and boring tools, nail dies; high speed steel.

KETOS.
M-38; 0.90 C, 0.25 Si, 1.3 Mn, 0.5 Cr, 0.5 W, bal Fe.
For tools, dies, taps, reamers, broaches, gauges, hobs; non-deforming; oil hardened

KETOS.
M-362; 0.90 C, 0.50 Cr, 1.25 Mn, 0.50 W, bal Fe
For blanking, trimming, and forming dies; non-deforming.

K.E.X.369.
M-510; 0.5 C, 5.5 Cr, W, Mo, bal Fe
For die casting dies; hot work steel, air hardened.

KEY ALLOY-B
65.2 Cu, 20.15 Zn, 12.70 Ni, 0.40 Fe, 1.10 Pb, 0.15 Sn.
For hardware keys; free-cutting.

KEY STOCK-A.
60-65 Cu, 26-22 Zn, 12 Ni, 2-1 Pb
For hardware, keys; free-cutting

KEYSTONE
M-339, 0.90 C, 1 Mn, 0.5 Cr, 0.5 W, bal Fe.
For blanking and forming dies, punches, gauges, Type 01; oil hardened, non-deforming.

KEYSTONE-A
M-357, 0.5 C, 2 W, 1 Cr, 0.2 V, bal Fe
For chisels, die blocks; tough, hot work

KEYSTONE ALLOY CHISEL
M-357, 0.5 C, 1.1 Cr, 2 W, 0.2 V, bal Fe
For chisels, punches, shears; tough

KEYSTONE B.
M-140, 1.2 C, 0.2 Mn, 0.5 Cr, 0.2 V, 1.6 W, bal Fe
For tools, cutters; fast finishing steel, obsolete.

KEYSTONE COPPER STEEL.
M-604; 0.10 max C, 0.5 max Mn, 0.01-0.10 P, 0.05 max S, 0.2 min Cu, bal Fe.
35,000-55,000 TS; 15,000-30,00 YS; 40-25 El
For roofing, siding, railroad car construction; atmosphere corrosion resistance

KEYSTONE DRILL ROD.
M-1703; 0.88-0.93 C, 1.1-1.3 Mn, 0.2-0.35 Si, 0.15-0.20 Cr, 0.15-0.20 V, 0.4-0.6 W, 0.02 max P, 0.02 max S, bal Fe.
Oil hardening drill rod; AISI 01.

KF15
M-459; 0.4 C, 13 Cr, bal Fe.
For bakelite molds; corrosion resistant.

KH 15N25.
Russia; 0.2 C, 15 Cr, 25 Ni, bal Fe.
For furnace parts, heat treating boxes; heat and corrosion resistant.

KH28.
Russia; 1.7-2.5 C, 1.3-1.7 Si, 28-32 Cr, bal Fe.
For chemical plant equipment; corrosion and heat resistant, cast.

KH34.
Russia; 1.5-2.2 C, 1.3-1.7 Si, 32-36 Cr, bal Fe.
For cast rabbles for furnaces, ore roasters; corrosion and heat resistant, cast.

KHG.
Russian; 1.44 C, 0.62 Mn, 1.29 Mn, 0.22 Si, bal Fe.
For cutters, tools, punches; oil hardened.

KHN80.
Russia; 0.25 max C, 1.5 max Mn, 1.2 max Si, 18-22 Cr, bal Ni.
For electrical resistance and heating elements; applications to 1000°C

KICK PLATE BRASS.
Eng.; 84 Cu, 15 Zn, 1 Pb.
For hardware, water pipe, fittings; free-cutting.

KIND EXTRA HART.
M-1352; 1.3 C, 0.25 max Si, 0.25 max Mn, bal Fe.
For forming and blanking dies, engravers tools; Type W1, water hardened

KIND EXTRA MH.
M-1352, 1.15 C, 0.25 max Si, 0.25 max Mn, bal Fe.
Annealed· 110,000 TS, 58,000 YS; 20 El, 40 RA; 210 Brin
For springs, tools, drills, taps, reamers; Type W1; water hardened

KIND EXTRA SCHWEISSBAR.
M-1352, 0.55 C, 0.10-0.40 Si, 0.50-0.70 Mn, bal Fe.
Heat treated 150,000 TS, 110,000 YS, 15 El; 45 RA; 320 Brin.
For gears, bolts, machine tool parts; water hardened.

KIND EXTRA SEHR ZAH.
M-1352, 0.70 C, 0.25 max Si, 0.25 max Mn, bal Fe
Heat treated· 175,000 TS; 128,000 YS, 12 El, 37 RA, 355 Brin.
For springs, rails, punches, crimpers; Type W1, water hardened

KIND EXTRA ZAH.
M-1352; 0.85 C, 0.25 max Si, 0.25 max Mn, bal Fe
Heat treated· 190,000 TS; 145,000 YS, 10 El, 30 RA, 400 Brin.
For springs, tools, cutters, taps, drills, hobs; Type W1; water hardened.

KIND EXTRA ZH
M-1352, 1.0 C, 0.25 max Si, 0.25 max Mn, bal Fe
Annealed 100,000 TS, 53,000 YS, 21 El, 42 RA; 210 Brin
For springs, tools, drills, taps; Type W1, water hardened

KIND KW.
M-1352, 0.85 C, 1.75 Cr, 0.35 Mn, 0.30 Si, bal Fe.
For bearings, cutters, dies, tools; oil or water hardened, wear resistant

KIND KWS
M-1352; 0.85 C, 1.75 Cr, 0.35 Mn, bal Fe
For bearings, piercing dies, cutters; oil or water hardened, wear resistant

KIND PRIMA MH
M-1352, 0.90 C, 0.25-0.50 Si, 0.30-0.80 Mn, bal Fe.
Heat treated· 180,000 TS, 115,000 YS; 10 El; 30 RA; 370 Brin
For springs, taps, reamers, broaches, drills; Type W1; water hardened

KIND PRIMA SEHR ZAH
M-1352; 0.45 C, 0.25-0.50 Si, 0.30-0.80 Mn, bal Fe.
Hot rolled. 98,000 TS; 60,000 YS; 24 El; 54 RA; 212 Brin.
For axles, gears, bolts, shafts, crankpins; water hardened.

KIND PRIMA WEICH.
M-1352, 0.35 C, 0.25-0.50 Si, 0.30-0.80 Mn, bal Fe.
Hot rolled: 85,000 TS; 54,000 YS; 30 El; 53 RA; 183 Brin.
For gears, plates, shafts, bolts, axles; water hardened.

KIND PRIMA ZAH.
M-1352; 0.60 C, 0.25-0.50 Si, 0.30-0.80 Mn, bal Fe.
Heat treated: 160,000-115,000 TS; 113,000-77,000 YS; 12-23 El; 40-54 RA; 320-230 Brin.
For wheels, die blocks, girders, rails; water hardened.

KIND PRIMA ZH.
M-1352, 0.75 C, 0.25-0.50 Si, 0.30-0.80 Mn, bal Fe.
Heat treated: 180,000 TS; 140,000 YS; 12 El; 35 RA; 375 Brin.
For springs, punches, clutch discs; Type W1; water hardened.

KIND SPEZIAL MH
M-1352; 1.1 C, 0.25 max Si, 0.25 max Mn, bal Fe.
Annealed: 100,000 TS; 53,000 YS; 21 El; 42 RA; 200 Brin.
For springs, taps, reamers, hobs; Type W1; water hardened.

KIND SPEZIAL SEHR ZAH.
M-1352; 0.70 C, 0.25 max Si, 0.25 max Mn, bal Fe.
Heat treated: 175,000 TS; 130,000 YS; 12 El, 37 RA; 355 Brin.
For wheels, die blocks, rails, girders, springs; Type W1; water hardened.

KIND SPEZIAL ZAH.
M-1352; 0.85 C, 0.25 max Si, 0.25 max Mn, bal Fe.
Heat treated: 188,000 TS; 143,000 YS, 12 El; 35 RA; 390 Brin.
For springs, taps, drills, hobs, cutters; Type W1; water hardened.

KIND SPEZIAL ZH.
M-1352; 1.0 C, 0.25 max Si, 0.25 max Mn, bal Fe.
Annealed: 100,000 TS; 53,000 YS; 21 El, 42 RA; 200 Brin.
For springs, taps, reamers, drills, hobs; Type W1; water hardened.

KINGHORN METAL.
Eng.; 58.5 Cu, 39.3 Zn, 0.96 Sn, 1.14 Fe.
For screws, nuts, hardware; high strength.

KINGSTON BRONZE.
M-282; 83 Cu, 4 Sn, 0.5 Fe, bal Zn.
Drawn: 94,500 TS; 35,000 YS; 10.5 El; 183 Brin.
For condenser tubes; high strength.

KINITE.
M-174, M-345; 0.55 Si, 1.5 C, 12.5-14.5 Cr, 1.1 Mo, 0.7 Co, 0.5 Mn, 0.4 Ni, bal Fe, trace to 0.5 B.
Cast: 100,000 TS.
Rolled: 200,000 TS.
For dies, anvils, cutters, mandrels, press tools, blanking, forming and drawing dies, shear blades; abrasion and compression resistant.

KINNALLOY.
M-546; 3.3 C, 2.5 Si, 1.5 Ni, 0.8 Cr, bal Fe.
40,000 TS; 500 Brin.
For castings; cast iron.

KINNITE.
M-546; 2.5 C, 1.5 Cr, bal Fe.
Cast: 40,000 TS; 500 Brin.
For abrasion resisting castings; wear resistant.

KINSALLOY.
M-68; 21-24 Mo, 7-8 Al, 0.1 max C, bal Ni.
Cast: 100,000-130,000 TS.
For high temperature applications; precision cast, heat resistant.

KINSALOY B.
M-68; 70 Ni, 22 Mo, 8 Al.
For jet engine components, turbine rotor blades; heat resistant

KIN-SHIBU-ICHI.
Jap.; One part "Shaku-do" two parts "Shibu-ichi."
For jewelry, ornaments; corrosion resistant.

KIRKALLOY.
M-794; 3 Al, 8 Cu, 0.04 Be, bal Zn.
(max .007 Pb, .003 Sn, .003 Cd, .10 Fe)
Sand cast: 42,500 TS, 2.0 El, 7.6 impact; 124 Brin.

KIRKSITE A.
M-794, M-88, 3.5 Cu, 4 Al, 0.04 Mg, bal Zn.
Cast: 38,000 TS; 5 El; 107 Brin
Rolled: 62,000 TS; 3 El.
For stamping dies, forming dies; M.P. 717°F.

KISKI
M-140, 0.9-1.0 C, 1.0-1.2 Mn, 0.43-0.57 Cr, 0.15-0.25 V, 0.45-0.75 W, bal Fe
For tools, dies, blanking and forming dies, thread gauges; non-deforming

KISSOCK STEEL
M-139, 0.65-0.75 C, 1.9-2.0 Ni, 1.3-1.6 Cr, 0.35-0.45 Mo, bal Fe
Cast: 301-550 Brin.
For castings, wear plates, wear resisting.

KLOSTER D-C-66.
M-335; 0.35 C, 8.7-9.7 W, 3.0-3.5 Cr, 0.4 V, bal Fe.
Hardened: 243,000 TS; 215,000 YS, 12 El, 37 RA
At 1000°F: 210,000 TS; 163,000 YS; 9 El; 32 RA.
For brass extrusion dies, die casting dies, bolt threading dies, punches, shear blades, hot headers.
Type H21 hot work steel, high toughness.

KLOSTER KLS-44.
M-335; C, Cr, Ni, Mo, bal Fe.
For shear blades, hammer dies, die blocks; cold work steel, oil hardened

KM
M-351; Al, Cu, bal Zn.
For die castings.

KM 80
German, 0.2 C, 14 Cr, 2 Mo, 1 V, bal Fe.
For turbine rotors, heat resistant.

K-Mo.
M-69; C, alloy, bal Fe.
For tools, dies; oil hardening.

KNEISS METAL.
50-40 Zn, 25-42 Pb, 25-15 Sn, 0-3 Cu.
For bearings; aniti-friction.

KNIFE BOLSTERS.
Eng.; 68 Cu, 16.5 Zn, 15 Ni, 0.5 P.
For knife bolsters; corrosion resistant.

KNIFE BOLSTERS
Eng.; 56 Cu, 28 Zn, 16 Ni.
For ornamental parts; nickel silver.

K-O.
M-1541; 0.10-0.20 C, 0.60-1.0 Mn, 0.15-0.30 Si, 0.002-0.006 B, 0.4-0.8 Cr, 0.15-0.50 Cu, 0.4-0.6 Mo, 0.7-1.0 Ni, 0.03-0.10 V, bal Fe.

Plate: 114,000-135,000 TS; 100,000 min YS; 18 min El.
For pressure vessels, bridges, mine cars, power shovels, cranes, trucks, trailers.
Shock and wear resistant.

K-O-1.
M-1642, M-279; 4.8 Cu, 0.23 Mg, 0.27 Ti, 0.64 Ag, bal Al.
Sand Cast: 62,000-72,000 TS; 52,000-65,000 YS; 3-9 El.
Permanent Mold: 64,000-70,000 TS; 50,000-60,000 YS; 6-14 El.
For landing gear struts, gear box housings, aircraft and auto/truck components, aerospace equipment.
High strength casting alloy.

KO-1 ALLOY.
M-1719; 4.8 Cu, 0.5 Ag, 0.25 Mg, bal Al.
Heat treatable cast alloy.
T6. 58,000-68,000 TS, 47,000-58,000 YS; 4-10 El.
For high strength castings, aerospace housings, transmission line fittings, cylinder heads and pistons, turbine impellers.
AA X201 0, AMS 4228 (T6) Tentative.

KOBALT.
M-1315; 0 79 C, 4.7 Co, 4.3 C, 0.75 Mo, 1.55 V, 18 W, bal Fe.
For lathe and planer tools, reamers, hobs, taps; high speed steel.

KOBALT see also WITTEN KOBALT.

KOBALT-I
M-1496, 0 85 C, 18 W, 4 Cr, 2 V, 12 Co, 0.8 Mo, bal Fe
Hardened· C 64-66 Rock
For lathe and planer tools, hobs, broaches, reamers, milling cutters.
Type T-6 tool steel, high red-hardness, abrasion resistant

KOBALT-II.
M-1496, 0.70-0 74 C, 18-19 W, 4 0-4.25 Cr, 1.0-1.2 V, 4.5-5 5 Co, 0 5-0 8 Mo, bal Fe.
Hardened· C 64-66 Rock
For boring and forming tools, gear cutters, lathe and planer cutters, taps, drills, reamers
Type T4 high speed steel, high red-hardness.

KOBALT III N.
M-1326, M-1331, 0.80 C, 4.3 Cr, Co, W, V, Mo, bal Fe
For lathe and planer tools, reamers, broaches, taps; high speed steel

KOBALT 30
M-1331, 0 86 C, 2.8 Co, 4 3 Cr, 0.85 Mo, 2.1 V, 12 W, bal Fe
For lathe and planer tools, hobs, reamers; high speed steel.

KOBALT 32V.
M-1326; 0.86 C, 2.8 Co, 4.3 Cr, 0 8 Mo, 2 1 V, 12 W, bal Fe.
For lathe and planer tools, reamers, broaches, hobs; high speed steel.

KOBALT 50.
M-1331; 0.80 C, Co, 4.3 Cr, V, W, bal Fe.
For lathe and planer tools, reamers, drills, taps, hobs; high speed steel.

KOBALT 98M.
M-1326, 0.90 C, 4.0 Cr, 8.75 Mo, 8.25 Co, 2.0 V, 1.70 W, bal Fe.
For drills and lathe tools operating at high speed; high speed steel with good red hardness, for roughing or finishing. Also used for milling cutters.

KOBALT 100.
M-459, M-1315; 0.76 C, 10 Co, 4.2 Cr, 0.8 Mo, 1.8 V, 18 W, bal Fe.
For lathe and planer tools, reamers, hobs, taps; high speed steel.

KOBALT-125.
M-459; 1.0 C, 9 Cr, 6 Co, 1.5 Mo, bal Fe.
Hardened: C 62-65 Rock.
For electrical and magnetic equipment.
Permanent magnet. High permeability.

KOBALT 150.
M-1315; 0.80 C, W, Co, Cr, V, Mo, bal Fe.
For lathe and planer tools, reamers, broaches, taps; high speed steel.

KOBALT-160.
M-459; 1.0 C, 9 Co, 9 Cr, 1.5 Mo, bal Fe.
Hardened: C 62-65 Rock.
For electrical and magnetic equipment.
Permanent magnet. High permeability.

KOBALT-200.
M-459; 1.0 C, 15 Co, 9 Cr, 1.5 Mo, bal Fe.
Hardened: C 62-65 Rock.
For electrical and magnetic equipment.
Permanent magnet. High permeability.

KOBALT-300.
M-459, 0 9 C, 35 Co, 6 Cr, 5 W, bal Fe.
Hardened C 62-65 Rock.
For electrical and magnetic equipment.
Permanent magnet. High permeability.

KOBALT V33
M-1315; 0 86 C, 2.8 Co, 4.3 Cr, 0.85 Mo, 2.1 V, 12 W, bal Fe.
For lathe and planer tools, reamers, taps, drills, hobs; high speed steel.

KOBALT V65.
M-1315; 1.35 C, W, Cr, Co, V, bal Fe.
For engravers' tools, forming and blanking dies; high speed steel

KOBITALIUM.
Eng , 1-5 Cu, 0 2-2 0 Ni, 0 25-2.0 Mn, 1-2 Fe, 0 5-2.0 Si, 0.4-2 0 Mg, 0.08-0.12 Ti, bal Al.
For light alloy castings, also rolled or forged

KOCHLINS BEARING.
90 Cu, 10 Sn
For bearings, Bronze.

KOCH WHITE GOLD.
Eng ; 75 min Au, 3.3-24 75 Ni, 0.25-5.0 Mn.
For jewelry, ornaments, corrosion resistant.

KOERFLEX-20.
M-72; 30 Co, 15 Cr, bal Fe
For electromechanical devices, motors, generators.
Permanent magnet, high permeability.

KOERFLEX-30
M-72, 30 Co, 15 Cr, bal Fe
For electrical and magnetic equipment, generators, motors.
Permanent magnet, high permeability

KOERFLEX-200.
M-72, 52 Co, 10 V, bal Fe.
For hysteresis motors, automation devices, electromechanical equipment.
Permanent magnet, similar to Vicalloy I. High permeability.

KOERFLEX-300.
M-72; 52 Co, 8 Cr, 4 V, bal Fe.
1000 Br, 2 8 (BH) max.
For electromechanical devices, speedometers, recorders, hysteresis motors, computors.
Precipitation hardening, permanent magnet, similar to Vicalloy II.

KOERVER-UMCO50.
M-1583; 0.05-0.12 C, 0.18 Ti, 0.6 Cb, 26-30 Cr, 47-52 Co, bal Fe.
Cast: 135,000 TS; 48,000 YS; 10 El; 10 RA; 250 Brin.
Wrought: 132,000 TS; 61,000 YS; 7 El; 6 RA; 350 Brin.
For furnace baffles, burner tips, sintering grates, quench baskets.
Corrosion, heat, thermal shock resistant.

KOERZIT 250S.
M-72; 8 Al, 19 Ni, 24 Co, 5 Ti, bal Fe.
For electrical and magnetic equipment.
Permanent magnet. High permeability.

KOERZIT 350.
M-72; 15 Ni, 30 Co, 4 Cu, 7 Al, 5 Ti, bal Fe.
8500 Br, 1150 H_c, 3,600,000 (BH) max.
For permanent magnets in electrical and magnetic equipment.
High permeability.

KOERZIT 400K.
M-72; 25 Co, 2.5 Cb, bal Fe.
For permanent magnets in electrical and magnetic equipment.
Alnico type, high permeability.

KOERZIT 450.
M-72; 34 Co, 5 Ti, bal Fe.
For permanent magnets in electrical and magnetic equipment.
Alnico type magnet High permeability.

KOERZIT-HI.
M-72; 52 Co, 7 Cr, 3 V, bal Fe.
For electric and magnetic equipment, hysteresis motors.
Magnetically soft; high permeability.

KOERZIT-H2.
M-72; 52 Co, 38 Fe, 10 V.
For hysteresis motors, automation devices, electro and magnetic devices. Requires cold rolling and tempering to develop the magnetic properties.
Permanent magnet. Similar to Vicalloy I.

KOERZIT-T.
M-72; 52 Co, 8 Cr, 4 V, bal Fe
10,000 Br, 2.8 (BH) max.
For electromechanical devices, speedometers, recorders, hysteresis motors, digital computers.
Precipitation hardening Permanent magnet.
Similar to Vicalloy II.

KOERZIT-VS55.
M-72; 38 Co, 7 Ti, bal Fe, Al, Ni, Cu.
For permanent magnets in electrical and magnetic equipment.
Alnico type magnet, high permeability.

K.O.H.
M-174; C, alloy, bal Fe.
For tools; oil hardening.

KOLASSAL.
M-1338; 2.1 C, 11.5 Cr, 0.3 Mn, bal Fe.
For forming and blanking dies, punches; oil hardened, non-deforming.

KOLASSAL EXTRA.
M-1338; 2.1 C, 11.5 Cr, 0.7 W, bal Fe.
For forming and blanking dies, punches; oil hardened, non-deforming.

KOLASSAL SUPRA.
M-1338; 1.65 C, 11.5 Cr, 0.1 V, bal Fe.
For blanking and forming dies, punches; air hardened, non-deforming.

KOLSTER V-76.
M-335; 0.9 C, 1.2 Mn, 2.0 Si, bal Fe.
For punches, dies, blanking and forming tools; oil hardened, shock resistant.

KOLTCHOUGALUMIN.
Eng.; 91.7-93.9 Al, 6-4 Cu, 0.6 Mn, 0.4 Mg, 0.8 Fe, 0.2 Si, 0.11 Cr.
For light alloy parts, aircraft structures; similar to "Dural"

KOLTSCHUG.
Russian; 4 Cu, 0.3 Ni, bal Al.
For light alloy parts; age-hardenable.

KOMALP 3 HERZ.
M-1314; 0.74 C, 4.1 Cr, 1.1 V, 18.5 W, bal Fe.
For drills, taps, reamers, hobs, cutters; high speed steel.

KOMALP 3 HERZ EXTRA M.
M-1314; 0.82 C, 4.1 Cr, 0.85 Mo, 1.6 V, 8.7 W, bal Fe.
For lathe and planer tools, reamers, hobs, taps; high speed steel

KOMALP 3 HERZ M.
M-1314, 0.95 C, Cr, W, Mo, V, bal Fe.
For form cutters, broaches, taps; high speed steel.

KOMALP 300
M-1314; 0.95 C, Cr, W, Mo, bal Fe.
For form cutters, broaches, reamers, taps; high speed steel

KOMALP 400
M-1314, 1.3 C, 4.3 Cr, 0.85 Mo, 3.8 V, 12 W, bal Fe
For engravers' tools, blanking and forming dies; high speed steel

KOMALP EXTRA SPEZIAL
M-1314; 0.86 C, 4.1 Cr, 0.85 Mo, 2.5 V, 12 W, bal Fe
For lathe and planer tools, reamers, broaches; high speed steel.

KOMALP WM
M-1314, 0.85 C, 4.1 Cr, Mo, W, V, bal Fe
For lathe and planer tools, reamers, broaches, hobs; high speed steel

KOMET FRS27.
M-1312; 0.86 C, 4.1 Cr, 0.85 Mo, 2.5 V, 12 W, bal Fe.
For lathe and planer tools, reamers, hobs, taps, drills; high speed steel.

KOMO 205
M-1496, 0.80 C, 4 Cr, 5 Mo, 6 W, 2 V, 5 Co, bal Fe.
Hardened: 63-66 Rock C.
For reamers, hobs, lathe and planer tools, drills, broaches.
Type M35, high speed steel, good red-hardness. Wear resistant

KOMO 310.
M-1496, M-459, 1.25 C, 9.5 W, 4.2 Cr, 3.2 V, 3.15 Mo, 10 Co, bal Fe.
Hardened: 64-68 Rock C.
For reamers, broaches, chasers, hobs, lathe and planer tools, milling cutters.
High-speed steel, high red-hardness.

KONCOR.
M-73; 1.1 C, 1.0 Si, 5.25 Cr, 4.0 V, 1.1 Mo, bal Fe.
Hardened: 64-67 Rock C.
For upsetter and forging dies, extrusion and pointing dies, chipping chisels, punches, die casting inserts.
Air hardening, non-deforming, abrasion resistant, tough, heat resistant.

KONEL.
M-118; 73.07 Ni, 17.16 Co, 8.8 Ti, 0.55 Si, 0.26 Al, 0.16 Mn.
100,000 TS; 40,000 YS; 35 El; 55 RA; 140 Brin.
For lamp filaments, valves, valve stems; substitute for platinum; heat and corrosion resisting; hot short above 1250°C.

KONIK.
M-631; 0.15-0.25 C, 0.2 Cu, 0.4 Ni, 0 3 Cr, bal Fe.
Cold drawn: 81,000 TS; 79,000 YS; 3 El; 5 RA.
For cross chains, culvert sheets; case hardening steel.

KONSTANT.
M-1331, 0.90 C, 1.9 Mn, 0.1 V, 0.25 Si, bal Fe.
For dies, punches, upsetters, crimpers; oil hardened, non-deforming.

KONSTANTAN.
M-297; 54 Cu, 45 Ni, 1 Mn.
Annealed: 83,000 TS; 30 El.
Hard. 120,000 TS; 1 El.
For precision resistances, reducing rheostats, shunts, electrical instruments; maximum operating temperature 600°C, M P. 1276°C.

KOPPER B-18.
M-399, 78-82 Cu, 18-19 5 Sn, 0 5 max Pb, 0.5 max Fe, 0.5 max Zn
Cast: 45,000-55,000 TS; 165-195 Brin.
For oil sealing rings, piston and pump rings; corrosion and acid resisting.

KOPPER B-19.
M-399; 78-82 Cu, 12-14 Sn, 4-6 Pb, 0.75-1.25 Ni.
Cast. 30,000 TS, 100 Brin.
For locomotive main cylinder packing and segmental rings; pressure tight.

KOPPER B-23.
M-399, 78-82 Cu, 15-17 Sn, 4-6 Pb, 0.5 max Fe, 0.5 max Zn
Cast 30,000 TS, 130-156 Brin
For hydraulic sealing rings, piston rings, pressure tight

KOPPERS B48.
M-399; 64 Cu, 6 Al, 4 Mn, 3 Fe, bal Zn
Cast: 110,000 TS, 60,000 YS, 12 El; 225 Brin
For propellers, strong and corrosion resistant.

KOPPER F-17.
M-399, 3 5 T.C., 2 5 Si, 2.25 Ni, 1 Mo, bal Fe.
Cast. 46,000 TS, 200 Brin
For piston rings, diesel rings; castings.

KOPPERS F-37
M-399, 3.5 T.C., 2 8 Si, 0.6 Mn, 0.9 Ni, 1.1 Mo, 0 2 Cr, bal Fe.
Heat treated: 65,000-75,000 TS; 250-270 Brin.
For piston rings; alloy cast iron, wear resistant.

KOPPERS F-88.
M-399; 3.2 C, 0.5 Mo, 1.4 Si, 0.5 Mo, 0.5 Cu, bal Fe.
Heat treated: 88,000 TS; 265 Brin.
For piston rings; high strength cast iron.

KOPPERS F-95.
M-399; 3.2 T C., 1.6 Si, 0.7 Mn, 1 Ni, 0.5 Mo, 0.25 Cr, bal Fe.
Heat treated: 108,000 TS; 330 Brin.
For piston rings, alloy cast iron, wear resistant.

KOPPER K-6.
M-399; 3.7 C, 2.9 Si, 1.0 Mn, 0 5 Cr, 1.2 Ni, bal Fe.
Cast: 30,000 TS; 220-180 Brin.
For piston rings, parts to resist corrosive gases and liquids, packing; alloy cast iron.

KOPPERS K-6B.
M-399; 2.8 C, 2 Si, 1.3 Mn, 15 Ni, 6.5 Cu, 1.9 Cr, bal Fe.
Annealed: 25,000 TS; 145 Brin.
For cylindrical shapes; austenitic, centrifugally cast iron

KOPPERS K-6E.
M-399; 3.8 C, 2.9 Si, 0.6 Mn, 0.3 Cr, 0.45 Mg, bal Fe.
Cast. 30,000 TS; 193 Brin.
For piston rings; centrifugally cast gray iron.

KOPPERS K-8.
M-399; 3.3 C, 2.3 Si, 0.65 Mn, 1.5 max Ni, 0.4 max Cr, bal Fe.
Cast: 27,000 TS; 180 Brin.
For piston ring inserts; centrifugally cast gray iron.

KOPPERS K-10.
M-399; 2.6 C, 2 Si, 1 2 Mn, 15 Ni, 6.5 Cu, 2.1 Cr, bal Fe.
Cast· 32,000 TS; 137 Brin.
For corrosion resistant castings; Type 1, Ni-Resist, AMS 5392

KOPPERS K-13.
M-399, 1.75 C, 1.75 Si, 0 9 Ni, 14 Cr, 0.4 Mo, bal Fe.
Annealed. 90,000 TS; 270 Brin.
For heat resistant castings, heat and abrasion resistant.

KOPPERS K-14.
M-399, 3.6 C, 2.3 Si, 0.6 Mn, 1.1 Ni, 1 1 Mo, 0 3 Cr, bal Fe
Heat treated. 45,000 TS, 270 Brin.
For heavy duty piston ring, cast iron.

KOPPERS K-15
M-399; 3 4 C, 2 75 Si, 0 5 Mn, bal Fe.
Annealed: 60,000 TS; 45,000 YS; 10 El; 140 Brin.
For general castings, gears, housings; ductile iron, ferritic.

KOPPERS K-16.
M-399; 3 4 C, 2.2 Si, 0 5 Mn, bal Fe.
Heat treated 90,000 TS; 65,000 YS; 2 El; 240 Brin.
For gears, shafts, housings; pearlitic ductile iron.

KOPPERS K-25.
M-399; 3.25 C, 2.25 Si, 0.5 Mn, 0 75 Ni, bal Fe.
Annealed: 60,000 TS; 40,000 YS; 15 El; 185 Brin.
For gears, shafts, housings, ferritic ductile iron.

KOPPERS K-26
M-399, 3.1 C, 1.3 Si, 0.75 Mn, 0 5 Mo, 0.5 Cu, bal Fe.
Heat treated· 95,000 TS; 400 Brin.
For aircraft piston rings; cast iron.

KOPPERS K-27.
M-399; 3.3 C, 2.2 Si, 0.5 Mn, 0 5 Mo, 0.5 Cu, bal Fe.
Heat treated: 110,000 TS; 80,000 YS; 1 El; 265 Brin.
For cylindrical shapes; alloy ductile iron.

KOPPERS K-28.
M-399; 3.3 C, 2.2 Si, 0.5 Mn, 0.5 Mo, 0.5 Cu, bal Fe.
Heat treated: 120,000 TS; 100,000 YS; 1 El; 400 Brin
For cylindrical shapes; alloy ductile iron.

KOPPERS K-35.
M-399; 2.3 C, 1.2 Si, 0.5 Mn, 30 Ni, 3 Cr, bal Fe.
Cast: 55,000 TS; 33,000 YS; 7 El; 140 Brin.
For corrosion and abrasion resistant castings; Ni-Resist Type 3.

KOPPERS K-53.
M-399; 3 C, 2.1 Si, 0.7 Mn, 0.6 Ni, 0.5 Mo, 0.5 Cr, 0.75 Cu, bal Fe.
Cast: 40,000 TS; 229 Brin.
For cylinder liners; centrifugally cast gray iron.

KOPPERS K-60.
M-399; 0.07 max C, 16.5 Cr, 4 Ni, 0.45 Cb, 4 Cu, 0.05 N, bal Fe.
Heat treated: 150,000 TS; 140,000 YS; 6 El; 350 Brin.
For corrosion resistant hard castings; Armco 17-4PH, stainless, age hardened.

KOPPERS K-61.
M-399; 0.15 max C, 12.5 Cr, 0 75 Ni, 0.5 Mo, 0.5 Cu, bal Fe.
Cast: 125,000 TS; 110,000 YS; 10 El; 310 Brin.
For corrosion resistant castings; Type 410; stainless.

KOPPERS K-66.
M-399; 0.5 C, 25 5 Cr, 10.5 Ni, 2 max Fe, 54.5 Co.
Cast: 110,000 TS; 95,000 YS; 2 El; 370 Brin.
For chemical plant equipment, high temperature castings; Haynes Stellite No. 31, heat and corrosion resistant

KOPPERS K-IRON.
M-399; 3.7 C, 2.85 Si, 0 6 Mn, bal Fe.
Cast: 25,000 TS; 180 Brin
For piston rings; cast iron.

KOPPERS XLS.
M-399; 3 5 C, 1.75 Si, 0 7 Mn, 0.35 Cr, bal Fe
Cast 20,000 TS; 150 Brin
For large engine piston rings; gray cast iron

KORA.
M-618; 0 15-0 18 C, 0.10-0 15 Si, 0.7-0 9 Mn, bal Fe.
Hot rolled 83,000 TS; 67,000 YS, 37 El, 55 RA; 163 Brin
Heat treated· 95,000 TS; 67,000 YS; 28 El; 60 RA; 180 Brin.
For gears, camshafts, machinery parts, case hardening steel

KORROFESTAL.
M-1376, 0 6-1 4 Mg, 0.6-1.6 Si, 0.6-1.0 Mn, 0.3 max Cr, bal Al.
Annealed· 21,000 TS, 8000 YS; 24 El
For window frames, gutters, fan blades, boats; good forming and welding properties.

KORRONIT 17.
M-1340, 0.08 C, 17 Cr, bal Fe
Annealed: 80,000 TS, 50,000 YS, 25 El; 50 RA; 150 Brin
For oil refinery and food processing equipment, sinks, Type 430, corrosion resistant, ferritic.

KORRONIT 17E.
M-1340, 0 1 max C, 17 5 Cr, Ti = 7 × C, bal Fe.
Annealed: 85,000 TS; 55,000 YS, 20 El; 45 RA; 180 Brin.
For oil refinery and food processing equipment, weldments; Type 430 Ti; corrosion resistant.

KORRONIT 17S.
M-1340; 0.12 C, 16 5 Cr, 0.25 Mo, 0 2 S, bal Fe
Annealed: 80,000 TS; 50,000 YS; 25 El; 50 RA; 160 Brin.
For screw machine products, fasteners; Type 430F; stainless, free-cutting.

KORRONIT 18M.
M-1340; 0.15 C, 18 Cr, 0.4 Si, bal Fe.
Annealed: 80,000 TS; 50,000 YS; 25 El; 50 RA; 160 Brin.
For oil refinery equipment, food processing equipment; Type 430; stainless, ferritic.

KORRONIT 188.
M-1340; 0.15 max C, 18 Cr, 8.5 Ni, bal Fe.
Annealed: 80,000 TS; 35,000 YS; 55 El; 75 RA; 150 Brin.
Cold drawn: 180,000 TS; 150,000 YS; 10 El; 250 Brin.
For chemical plant equipment, tanks; Type 302; stainless, austenitic.

KORRONIT 188E.
M-1340; 0.12 max C, 18 Cr, 8 5 Ni, Ti = 4 × C, bal Fe.
Annealed· 85,000 TS; 35,000 YS; 55 El; 65 RA; 150 Brin.
Cold drawn: 95,000 TS; 60,000 YS; 40 El; 60 RA, 185 Brin
For welded chemical plant equipment, tanks, mixers; Type 321; stainless, austenitic.

KORRONIT 188P.
M-1340; 0 07 max C, 18 Cr, 9.5 Ni, bal Fe.
Annealed: 85,000 TS; 35,000 YS; 60 El; 70 RA, 150 Brin
Cold drawn· 180,000 TS; 125,000 YS; 10 El, 330 Brin.
For chemical plant equipment, tanks, mixers; Type 304, stainless, austenitic

KORRONIT 189
M-1340, 0 1 max C, 2.2 Si, 18 Cr, 2 Mo, 9.5 Ni, bal Fe
Annealed. 85,000 TS; 35,000 YS; 50 El; 65 RA, 160 Brin
Cold drawn. 150,000 TS, 135,000 YS; 6 El; 300 Brin
For acid resistant chemical plant equipment; Type 316, stainless, austenitic.

KORRONIT 189E
M-1340, 0.12 max C, 18 Cr, 2 Mo, 10 5 Ni, Ti = 4 × C, bal Fe.
Annealed. 85,000 TS, 40,000 YS, 50 El, 65 RA; 160 Brin
For welded chemical plant equipment, tanks, Type 316 Ti, stainless, austenitic

KORRONIT 189P.
M-1340, 0.07 max C, 18 Cr, 2 Mo, 10 5 Ni, bal Fe.
Annealed 85,000 TS, 35,000 YS; 50 El; 65 RA; 160 Brin
For acid resistant chemical plant equipment, tanks; Type 316, stainless, austenitic

KORRONIT 1212 T
M-1340, 0 10 max C, 12 5 Cr, 12 Ni, bal Fe.
For valves, pumps, oil refinery equipment, corrosion and heat resistant

KORRONIT 1717
M-1340· 0 07 max C, 17 5 Cr, 2 Mo, 17.5 Ni, 2 Cu, Ti = 7 × C, bal Fe
For valves, pumps, chemical plant equipment; corrosion resistant.

KORRONIT-C
M-1340; 0 90 C, 18 Cr, 1.15 Mo, 1.0 V, bal Fe
Annealed: 105,000 TS, 60,000 YS; 18 El, 35 RA; 220 Brin
Heat treated 280,000 TS, 270,000 YS; 3 El; 15 RA; 555 Brin
For cutlery, valves, ball bearings, surgical instruments; Type 440 B; corrosion resistant

KORRONIT-H.
M-1340; 0 4 C, 0.4 Si, 13 Cr, bal Fe.
Annealed: 95,000 TS; 50,000 YS; 25 El; 55 RA; 195 Brin.
For cutlery, valves, surgical instruments; Type 420; stainless, hardenable.

KORRONIT-M.
M-1340; 0.2 C, 0.4 Si, 13 Cr, bal Fe.
Annealed: 95,000 TS; 50,000 YS; 25 El; 55 RA; 195 Brin.
For valves, cutlery, oil refinery equipment; Type 420; corrosion resistant.

KORRONIT-S.
M-1340; 0.22 C, 0.4 Si, 17 Cr, 1.5 Ni, bal Fe.
Annealed: 125,000 TS; 95,000 YS; 20 El; 55 RA; 260 Brin.
For marine hardware, pumps, valves; Type 431; corrosion and heat resistant.

KORRONIT-W.
M-1340; 0.12 max C, 0.4 Si, 13 Cr, bal Fe.
For turbine blades, valves, cutlery, surgical instruments; Type 410; stainless

KORROSIL 1.
M-1323; 0.12 max C, 0.4 Si, 13 Cr, bal Fe.
Annealed: 75,000 TS; 40,000 YS; 35 El; 70 RA; 155 Brin.
Cold drawn: 100,000 TS; 85,000 YS, 17 El, 60 RA; 205 Brin.
For turbine blades, surgical instruments; Type 410; stainless.

KORROSIL 2.
M-1323, 0.2 C, 0.4 Si, 13 Cr, bal Fe.
Annealed 95,000 TS; 50,000 YS, 25 El; 55 RA; 195 Brin.
Cold drawn. 100,000 TS; 85,000 YS; 17 El, 50 RA; 215 Brin.
For cutlery, valves, turbine blades, knives; Type 420, stainless.

KORROSIL 2M
M-1650, 0.20 C, 13 Cr, 1.2 Mo, bal Fe.
Annealed· 95,000 TS, 40,000 YS, 25 El, 55 RA, B 92 Rock
Heat Treated 240,000 TS; 210,000 YS, 8 El; 25 RA; C 50 Rock
For cutlery, knives, surgical instruments, shafts, gears.
Corrosion resistant, hardenable.

KORROSIL 4
M-1323, 0.4 C, 0.4 Si, 13 Cr, bal Fe
Annealed. 100,000 TS, 50,000 YS; 23 El; 52 RA; 200 Brin.
For cutlery, valves, surgical and dental instruments, Type 420; stainless

KORROSIL 6A
M-1323, 0.12 C, 16.5 Cr, 0.25 Mo, 0.2 S, bal Fe
Annealed: 80,000 TS, 50,000 YS, 25 El; 50 RA; 150 Brin.
For screw machine products, shafts, fasteners; Type 430F, stainless, free cutting

KORROSIL 6U
M-1323, 0.1 max C, 17.5 Cr, Ti = 7 × C, bal Fe.
Annealed· 80,000 TS, 50,000 YS, 25 El; 50 RA; 150 Brin.
For welded furnace parts and heat treating boxes; Type 430 Ti; corrosion resistant.

KORROSIL 60.
M-1323; 0.22 C, 17 Cr, 1.5 Ni, bal Fe.
Annealed: 125,000 TS, 95,000 YS; 20 El; 55 RA; 260 Brin.
For marine hardware, pumps, valves; Type 431.

KOSMOS.
M-912; 0.82-0.90 C, 4.5 Cr, 12 W, 0.7 Mo, 2.5 V, bal Fe.
For tools, dies, cutters; high speed steel.

KOSSIL.
M-618; 0.9 C, 1.3-1.6 Si, 0.6-0.9 Cr, bal Fe.
Heat treated: 224,000 TS.
For springs; tough, resilient.

KOULTCHOOG-ALUMINUM (KAULTCHAAG).
4-6 Cu, Mn, Mg, Si, bal Al.
For light alloy parts; similar to Duralumin, age-hardenable

KOVAL.
M-928, 72 Ni, 17 Co, 2.2 Ti, 6.25 Fe.
For internal combustion valves, molds and machine parts; high temperature resistance.

KOVAR.
M-928; 29 Ni, 17 Co, 0.2 Mn, bal Fe.
Annealed: 77,500 TS; 59,500 YS; 25 El.
For electronic tubes, radio and X-ray tubes; same coefficient of expansion as glass; M P. 100°C.

KOVAR A.
M-118; 29 Ni, 17 Co, 0.3 Mn, bal Fe
Annealed 77,000 TS, 59,000 YS; 25 El; 882 Brin.
For low expansion alloy for hard glass to metal seals, mean expansivity (25-400°C) 0.0000045.

KP-1.
M-Russia, 0.13 C, 0.7 Mn, 0.2 Si, 12.2 Cr, 0.7 Mo, bal Fe.
Annealed: 75,000 TS; 35,000 YS; 25 El; B 92 Rock.
For springs, table flatware, oil refinery equipment.
Corrosion resistant

"K P." STYRIAN
Eng; 1.15 C, 0.24 Mn, 0.04 Cr, 4.67 W, bal Fe.
For tools, dies; oil hardened.

KRAFFTS ALLOY
Swedish; 8 Sn, 26 Pb, 66 Bi, M P 100°C

KRAMER 12% NICKEL SILVER.
M-346; 12 Ni, 22 Zn, 10 Pb, 3 Sn, 53 Cu
Cast 38,000 TS; 20,000 YS, 18 El, 65 Brin
Corrosion resistant, for hardware, plumbing, fixtures, valves, ornamental castings.

KRAMER 15% NICKEL DIE CAST ALLOY.
M-346; 15 Ni, Zn, bal Cu.
Sand Cast: 80,000 TS, 45,000 YS, 8 El, 175 Brin
For ornamental castings, railroad car fittings.

KRAMER ALLOY NO 66.
M-346; Mg, Mn, Ca, P, bal Cu.
For use as a deoxidizer and degassifier for Cu-Ni alloys

KRAMER 68-1-3-28 ALLOY.
M-346; 68 Cu, 1 Sn, 3 Pb, 28 Zn
Cast· 34,000 TS, 12,500 YS; 40 El, 55 Brin.
General purpose yellow brass, good machinability; for furniture, hardware, ornamental castings.

KRAMER 76-2½-6½-15 ALLOY.
M-346, 76 Cu, 2.5 Sn, 6.5 Pb, 15 Zn.
Cast: 36,000 TS; 14,500 YS, 36 El; 58 Brin
For plumbing fixtures, faucets, good machinability.

KRAMER ALLOY NO 77
M-346; Mg, Mn, Ca, Si, Ti, Al, bal Cu.
For use as an aluminum bronze degasifier and to improve humidity.

KRAMER 78-7-15 ALLOY.
M-346, 78 Cu, 7 Sn, 15 Pb.
Cast: 34,000 TS, 17,500 YS, 30 El; 61 Brin.
Anti-acid metal, corrosion resistant, for chemical pumps, mining equipment, bearings and bushings.

KRAMER 80-10-10 ALLOY.
M-346; 80 Cu, 10 Sn, 10 Pb.
Cast: 41,000 TS; 18,500 YS; 38 El; 65 Brin.
For bushings, bearings, pump bodies, and impellers, heavy duty; corrosion resistant.

KRAMER 81-2-2-15.
M-346; 81 Cu, 2 Sn, 2 Pb, 15 Zn.
Cast: 37,000 TS; 15,500 YS; 37 El; 50 Brin.
For ornamental castings; good machinability.

KRAMER 81-3-7-9 ALLOY.
M-346; 81 Cu, 3 Sn, 7 Pb, 9 Zn.
Cast: 34,000 TS; 17,000 YS; 27 El; 55 Brin.
For low pressure valves and fittings; good machinability.

KRAMER 83-3-3-11 ALLOY.
M-346; 83 Cu, 3 Sn, 3 Pb, 11 Zn.
Cast: 37,000 TS; 15,500 YS; 38 El; 53 Brin.
Expendable fire hose couplings and fittings; good machinability.

KRAMER 83-7-7-3 ALLOY.
M-346; 83 Cu, 7 Sn, 7 Pb, 3 Zn
Cast: 40,000 TS; 18,000 YS; 39 El; 67 Brin.
General purpose bearing alloy, corrosion resistant, for bushings, bearings, heavy duty auto fittings.

KRAMER 85-5-5-5 ALLOY.
M-346; 85 Cu, 5 Sn, 5 Pb, 5 Zn.
Cast. 37,000 TS; 16,500 YS, 34 El; 65 Brin.
Red brass, good machinability; for low pressure valves and fittings.

KRAMER 87-8-1-4 ALLOY.
M-346; 8 Sn, 1 Pb, 4 Zn, bal Cu.
Cast: 45,000 TS; 19,000 YS; 40 El; 70 Brin.
Corrosion resistant; for valves, steam pressure castings; resists high pressure.

KRAMER 88-3-2-7 ALLOY.
M-346; 88 Cu, 3 Sn, 2 Pb, 7 Zn.
Cast: 38,000 TS; 16,000 YS; 37 El; 60 Brin.
For ornamental and statuary castings.

KRAMER 88-6-1½-4½ ALLOY.
M-346; 88 Cu, 6 Sn, 1.5 Pb, 4.5 Zn.
Cast: 42,000 TS; 18,000 YS; 43 El; 70 Brin.
Corrosion resistant; for valves, fittings, flanges, gears, for high temperatures and pressures.

KRAMER 88-8-0-4 ALLOY.
M-346, 88 Cu, 8 Sn, 4 Zn.
Cast: 47,000 TS; 20,000 YS; 39 El; 70 Brin.
Corrosion resistant, for valves, pumps.

KRAMER "8812" ALUMINUM BRONZE.
M-346; Al, bal Cu.
Cast: 55,000 TS; 40,000 YS; 1 El; 230 Brin.
For welding fixtures, 20% IACS

KRAMER "A" MANGANESE BRONZE.
M-346; 58 Cu, 1 Fe, 0.5 Mn, 1 Al, bal Zn.
Cast: 70,000-75,000 TS; 28,000-35,000 YS; 22-35 El; 120-140 Brin.
For piston rods, valve stems, worm gears, propellers, structural castings, marine fittings.
Corrosion resistant; substitute for steel and malleable iron where corrosion resistance is required.

KRAMER "AX" MANGANESE BRONZE.
M-346; 58 Cu, 1 Mn, 1.5 Fe, 1.5 Al, bal Zn.
Cast: 80,000-88,000 TS; 38,000-40,000 YS; 18-24 El; 160-165 Br.
Corrosion resistant, for structural castings, valve stems, propellers, marine castings.

KRAMER "C" ALUMINUM BRONZE.
M-346; 10 Al, 4 Fe, 2 Ni, bal Cu.
Cast: 88,000-96,000 TS; 33,000-36,000 YS; 25-10 El; 30-7 RA; 150-175 Brin.
Heat treated: 105,000-125,000 TS; 45,000-75,000 YS; 22-2 El; 20-3 RA; 180-300 Brin
For gears, worm wheels, bushings; corrosion resistant.

KRAMER CONTACT METAL.
M-346; Sn, Pb, Zn, bal Cu.
Cast: 32,000 TS; 9500 YS, 30 El; 50 Brin.
For electrical fittings; 32% IACS.

KRAMER DIE CAST YELLOW BRASS.
M-346; 1 Sn, 1 Pb, 35 Zn, Al, bal Cu.
Cast: 55,000 TS; 30,000 YS; 15-20 El; 120-130 Brin.
For plumbing fixtures, ornamental castings; permanent mold castings.

KRAMER DIE MOLD BRONZE.
M-346; Ni, Al, Zn, bal Cu
Sand cast: 90,000 TS; 60,000 YS, 2.5 El; 200 Brin.
For glass molds and high temperature applications; sand cast.

KRAMER "G" ALUMINUM BRONZE.
M-346; Al, Fe, bal Cu.
Cast. 69,000 TS, 49,000 YS; 1 El, 265 Brin
For wear plates and guides.

KRAMER "I" ALUMINUM BRONZE
M-346; 1 0 Fe, 10 0 Al, bal Cu.
As cast: 67,000-77,000 TS, 26,000-34,000 YS, 12-26 El, 10-24 RA; 130-150 Brin.
Heat treated 90,000-95,000 TS, 40,000-55,000 YS; 10-25 El, 160-220 Brin
Heat treatable aluminum bronze, corrosion resistant, for structual castings, gears, machine parts, steel mill nuts.

KRAMER "L" ALUMINUM BRONZE.
M-346, 4 max Fe, 10 min Al, 0 5 max Mn, bal Cu.
As cast 82,000-93,000 TS, 29,000-38,000 YS; 12-32 El; 140-165 Brin
Heat treated: 100,000-110,000 TS, 35,000-55,000 YS; 10-30 El, 160-210 Brin.
Heat treatable aluminum bronze, corrosion resistant; for structural castings, gears, worm wheels

KRAMER "M" ALUMINUM BRONZE.
M-346; 3-4 Fe, 9 0-9 5 Al, bal Cu
Cast. 75,000-85,000 TS; 23,000-33,000 YS, 25-45 El; 26-47 RA, 125-140 Brin
General utility aluminum bronze, corrosion resistant, for structural castings, valves, gears, nuts, pumps

KRAMER "N" ALUMINUM BRONZE.
M-346; 4-5 Fe, 10-11 Al, 4-5 Ni, 1 max Mn, bal Cu.
As cast: 100,000-108,000 TS; 40,000-50,000 YS; 5-18 El; 6-20 RA, 180-210 Brin
Heat treated: 110,000-125,000 TS; 60,000-80,000 YS; 5-12 El; 220-260 Brin.
Heat treatable aluminum bronze, corrosion resistant; for structural castings, pump and valve parts, gears, aircraft parts, marine castings.

KRAMER NICKEL ALUMINUM BRONZE.
M-346; Fe, Al, Ni, Mn, bal Cu.
Cast: 90,000 TS; 40,000 YS; 20 El; 160 Brin.
Corrosion resistant; for marine propellers.

KRAMER "R" ALUMINUM BRONZE.
M-346; 4 Fe, 10 Al, bal Cu.
As cast: 85,000 TS; 35,000 YS; 15 El; 160 Brin.

Heat treated: 105,000 TS; 50,000 YS; 10 El; 200 Brin.
Heat treatable aluminum bronze; corrosion resistant; for structural castings, valves, gears, bushings.

KRAMER SILICON-ALUMINUM BRONZE.
M-346; Al, Si, bal Cu.
Sand cast: 70,000 TS; 30,000 YS; 25 El; 130 Brin.
For valve stems, structural castings; corrosion resistant.

KRAMER SILICON BRONZE.
M-346; Si, Zn or Mn, bal Cu.
Cast: 60,000 TS; 25,000 YS; 40 El; 88 Brin.
Corrosion resistant; for valves, pumps

KRAMER "S" MANGANESE BRONZE.
M-346; 60 Cu, 1 Fe, 0.5 Mn, 0.75 Al, 1 Sn, 1 Pb, bal Zn.
Cast: 60,000-65,000 TS; 25,000-30,000 YS; 15-20 El; 100-120 Brin.
Corrosion resistant, free machining.
For piston rods, valve stems, worm gears, propellers, valve bodies, fittings, structural castings, marine fittings

KRAMER SPECIAL 20% NICKEL SILVER.
M-346; 20 Ni, Zn, bal Cu.
Sand cast. 50,000 TS, 25,000 YS, 20 El; 80 Brin.
For valves, dairy and laundry castings, ornamental parts; corrosion resistant.

KRAMER SPECIAL 25% NICKEL SILVER.
M-346, 25 Ni, Zn, bal Cu.
Sand Cast 60,000 TS, 36,000 YS; 14 El, 135 Brin.
For valve seats, corrosion resistant

KRAMER "SX" MANGANESE BRONZE
M 346, Zn, Mn, Al, Fe, bal Cu
Cast 95,000-104,000 TS, 45,000-55,000 YS, 22-18 El, 22-18 RA; 180-195 Brin.
For marine and aircraft castings; corrosion resistant

KRAMER "X" MANGANESE BRONZE
M-346, 60 Cu, 1.5 Fe, 1.5 Mn, 3 Al, bal Zn.
Cast 85,000-95,000 TS, 45,000 YS, 18-20 El; 175 Brin
Corrosion resistant, for hubcaps, piston rods, valve stems, propellers, marine fittings, structural castings.

KRAMER "XX" MANGANESE BRONZE.
M-346, 63 Cu, 2 Fe, 2.5 Mn, 5 Al, bal Zn.
Cast. 110,000-115,000 TS, 60,000-72,000 YS; 13-18 El, 225 Brin
Heavy duty high strength alloy
For gears, cams, bridge bearings, screw down nuts, structural castings.

KREIDLERS BRASS "MS 58."
M-324, 58 Cu, 2.5 Pb, bal Zn
Annealed 54,000 TS, 25 El.
Hard. 89,000 TS, 13 El.
For screws, instruments, structural parts, armatures, knives, locks; free-cutting.

KREIDLERS BRASS "MS 63."
M-324; 63 Cu, 37 Zn.
Annealed 41,000 TS, 45 El.
Hard: 59,000 TS; 18 El.
For tubes, apparatus, high strength.

KROKOLOY.
M-157, C-Cr-Co, bal Fe.
For dies for forming, blanking, drawing and coining, shear blades; cast to shape, air hardening.

KROMAIR see REPUBLIC A2.

KROMAL NO. 1.
M-750; 0.9 C, 1.2 Mn, 0.5 Cr, bal Fe.
For punches, taps, dies, crimpers; non-deforming, oil hardened.

KROMAL NO. 2.
M-750; 0.9 C, 1.5 Mn, 0.4 Cr, 0.3 V, bal Fe.
For tools, punches; non-deforming

KROMAL NO. 3.
M-750; 0.5 C, 0.9 Mn, 0.9 Cr, 0.2 Mo, bal Fe.
For maintenance and repair; oil hardening.

KROMAL NO. 4.
M-750; 0.48 C, 1.85 Cr, 0.4 Mo, 1.25 Ni, bal Fe.
For maintenance and repair; oil hardening.

KROM-ALOY.
M-147; Cr, Sn, Pb, Al, Mn, Ni, Zn, bal Cu.
77,210 TS; 54,600 YS, 10 El; 9 RA; 153 Brin.
For marine hardware, propellers, pump valves and seats, trimmings, corrosion resistant.

KROMARC 55
M-118, 0.04 C, 16 Cr, 20 Ni, 9.5 Mn, 2 Mo, bal Fe.
For cast nozzle chambers, welding electrodes; austenitic, stainless, good weldability, resists hot tearing.

KROMARC-58.
M-118, 15.5 Cr, 21.0 Ni, 10.0 Mn, 2.25 Mo, 0.12 Si, 0.17 N, 0.25 V, 0.008 B, 0.015 Zr, 0.03 C, bal Fe.
At 400°F. 100,000 TS, 65,000 YS; 36 El; 65 RA.
At 1200°F 80,000 TS, 45,000 YS, 25 El; 50 RA
At 2000°F 15,000 TS; 15,000 YS; 25 El; 25 RA.
For welded components in steam turbines
High temperature tensile, creep and rupture strength; austenitic, stainless, and heat resistant

KROMAR D70.
M-1724, 0.03 max C, 0.1 Si, 0.1 Mn, 4.0-5.0 Ni, 11.5-12.5 Cr, 4.0-5.0 Mo, 12.0-14.0 Co, 0.2-0.5 Ti, 0.05-0.15 Al, bal Fe
Precipitation hardening stainless, hardened 180,000 TS, 170,000 YS; 16.5 El, 37-39 Izod
For aircraft components, pressure vessels, turbine blading.

KROMAX
80 Ni, 20 Cr.
For resistance alloy; heat resistant.

KROMITE NO 2
M-15, C, alloy, bal Fe
For chain links, mandrels, springs, tongs, shock resistant.

KROMITE NO. 3
M-15; C, alloy, bal Fe
Heat treated: 156,000 TS, 130,000 YS; 17 El, 56 RA; 270 Brin.
For shafts, gears, bolts, tie rods; preheat treated.

KROMITE NO. 4.
M-15; C, alloy, bal Fe.
Heat treated. 211,000-304,000 TS; 450-560 Brin.
For punches, picks, swages, vice jaws, bolts; tough, shock resistant.

KROMITE BRAKE DIE.
M-15; C, alloy, bal Fe
For brake dies, bead-forming dies; preheat treated, tough and wear resistant.

KROMORE.
M-44; 85 Ni, 15 Cr.
For heating elements, electrical resistances; heat resistant.

KRONA.
M-1705; 0.90 C, 1.2 Mn, 0.5 Cr, 0.2 V, 0.5 W, bal Fe.
Oil hardening tool steel.
AISI O1.

KROPP 23.
M-1135; 0.30 C, 0.70 Mn, 0.35 Si, 0.96 Cr, 0.2 Mo, bal Fe.
For plastic mold dies; water hardened.

KROPP 23C.
M-1135; 0.32 C, 0.75 Mn, 0.35 Si, 0.9 Cr, 0.2 Mo, bal Fe.
For zinc die casting dies; water hardened

KROPP 56.
M-1135; 0.60 C, 0.65 Mn, 1.8 Ni, 1.6 Cr, 0.35 Mo, bal Fe.
For forging dies, shear blades, high pressure cylinders; oil hardening

KROPP 61.
M-1135; 0.10 C, 0.5 Mn, 3.5 Ni, 1.5 Cr, bal Fe.
For gears, pinions, spindels, cams, bearing rolls; tough.

KROPP 93.
M-1135; 0.35 C, 1.0 Si, 5 Cr, 1 Mo, 0.15 V, 1 W, bal Fe.
For shear blades, extrusion and upsetting dies, mandrels; hot work steel

KROPUNCH.
M-750; 0.4 C, 2.5 W, Cr, 0.3 V, 2.0 Mo, 1.1 Si, bal Fe.
For shear blades, punches, trim dies, mandrels; hot and cold work steel, air hardening.

KROSIL.
M-38; 0.5 C, 0.9 Mn, 1.5 Si, 0.35 Mo, bal Fe
For rivet shearing tools, cold tie plate punches; shock and fatigue resistant.

KROSIL CHISEL.
M-362; 0.5 C, 0.9 Mn, 0.35 Mo, 1.5 Si, bal Fe
For cold chisels, upsetters, dies, crimpers; oil hardened, shock resistant

KROTUNG.
M-750; 0.3 C, 5 Cr, 1.5 Mo, 1.3 W, 0.3 V, bal Fe
For hot forging dies and tools, nut crowners, high red hardness, tough

KROVAN.
M-38, M-260; 0.95 C, 1 Cr, 0.2 V, bal Fe.
Water hardened
For jewelers' dies, heavy blanking dies, rolls; deep hardening, resists wear and impact, tough.

KRUPP 150
M-72; 0.2 C, 0.35 Si, 1.0 Mn, 0.2 Ti, bal Fe.
For hard facing electrodes; tough.

KRUPP 204.
M-72; 1.05 C, 1.0 Cr, 0.30 Mn, bal Fe.
For bearings, liners, sleeves, bushings; water hardened, wear resistant

KRUPP 206.
M-72; 1.05 C, 0.35 Mn, 1.2 Cr, bal Fe.
For bearings, liners, sleeves, bushings; water hardened, wear resistant

KRUPP 250.
M-72; 0.25 C, 0.35 Si, 1.6 Mn, 0.2 Ti, bal Fe.
For hard facing electrodes; tough.

KRUPP 303.
M-72; 1.4 C, 0.1 V, 0.3 Cr, bal Fe
For engravers' tools, cutters, bearings, form dies; water hardened, wear resistant.

KRUPP A3P.
M-72; 0.15 C, 0.40 Mn, 0.25 Si, bal Fe.
Annealed: 70,000 TS; 40,000 YS; 25 El; 60 RA; 145 Brin
For gears, cams, camshafts, bolts, fasteners; case hardening steel.

KRUPP A3PO.
M-72; 0.15 C, 0.25 Si, 0.35 Mn, bal Fe.
Annealed: 70,000 TS; 40,000 YS; 25 El, 60 RA; 145 Brin
For gears, cams, camshafts, machine tool parts; case hardening steel.

KRUPP A11K.
M-72, 0.52-0.58 C, 0.5 Mn, bal Fe
For forging die blocks, water hardened.

KRUPP A12 0
M-72, 0.6 C, 0.4 Si, 0.6 Mn, bal Fe.
Heat treated. 160,000 TS; 113,000 YS; 12 El; 40 RA; 321 Brin
For punches, rails, crimpers, water hardened.

KRUPP A12-14P.
M-72, 0.7 C, 0.25 Si, 0.25 Mn, bal Fe.
Heat treated 174,000 TS, 128,000 YS; 12 El; 37 RA, 355 Brin
For rails, crimpers, punches, springs, water hardened.

KRUPP A14K
M-72; 0.60 C, 0.40 Si, 0.60 Mn, bal Fe
Heat treated 160,000-115,000 TS, 113,000 77,000 YS, 12-13 El, 40-54 RA, 321-230 Brin
For punches, rails, crimpers, water hardened

KRUPP A15-17P.
M-72, 0.85 C, 0.25 Si, 0.25 Mn, bal Fe
Heat treated. 190,000 TS, 145,000 YS; 10 El, 30 RA; 400 Brin
For lathe and planer tools, drills, taps, hobs, Type W1, water hardened.

KRUPP A16K
M-72, 0.75-0.83 C, 0.5 Mn, bal Fe
For forging die blocks, water hardened

KRUPP A17 G.
M-72; 0.8-0.9 C, 0.25-0.4 Si, 0.45-0.6 Mn, bal Fe
For tools, drills, springs, water hardening

KRUPP A18-20P
M-72, 1.0 C, 0.25 Mn, 0.25 Si, bal Fe
Annealed 100,000 TS; 53,000 YS, 21 El, 42 RA; 200 Brin
For drills, taps, reamers, tools, dies; Type W1, water hardened

KRUPP A22P/A23P
M-72; 1.15 C, 0.25 max Si, 0.25 max Mn, bal Fe
Annealed 110,000 TS, 60,000 YS, 18 El, 38 RA, 210 Brin
For reamers, drills, taps, broaches, hobs, tools; Type W1, water hardened

KRUPP A24P.
M-72, 1.3 C, 0.25 max Si, 0.25 max Mn, bal Fe
For engravers tools, form cutters, milling cutters; Type W1; water hardened.

KRUPP A26P.
M-72, 1.3 C, 0.25 max Si, 0.25 max Mn, bal Fe.
For engravers tools, form and milling cutters, Type W1; water hardened.

KRUPP A30
M-72, 0.15 C, 0.25 Si, 0.40 Mn, bal Fe
Cold drawn: 72,000 TS; 60,000 YS; 22 El; 58 RA; 145 Brin
For gears, cams, camshafts, fasteners; carburizing steel.

KRUPP A50.
M-72; 0.22 C, 0.25 Si, 0.45 Mn, bal Fe.
Annealed· 73,000 TS, 41,000 YS; 22 El; 58 RA; 150 Brin.
For gears, cams, bolts, fasteners, camshafts; case hardening steel.

KRUPP A70.
M-72; 0.35 C, 0.25 Si, 0.45 Mn, bal Fe.
Hot rolled; 85,000 TS; 54,000 YS; 30 El; 53 RA; 185 Brin
For gears, pinions, shafts, bolts, fasteners; water hardened.

KRUPP A90.,
M-72; 0.45 C, 0.25 Si, 0.45 Mn, bal Fe.
Hot rolled 98,000 TS; 59,000 YS, 24 El; 45 RA; 212 Brin.
For gears, pinions, shafts, bolts, fasteners; water hardened.

KRUPP ANALYSIS
M-72, M-68; 0.08-0.16 C, 1.2-1.7 Cr, 3.8-4.3 Ni, bal Fe
For armor plate, gears, tough case-hardening alloy steel

KRUPP B126 P.
M-72, 0.62-0.68 C, 1.7 Si, 0.6 Mn, bal Fe
For tools, springs, punches; shock resistant.

KRUPP B136M
M-72, 0.7 C, 1.7 Si, 0.7 Mn, bal Fe
For punches, crimpers, upsetters, springs; oil hardened, shock resistant

KRUPP BC40
M-72, 0.37 C, 1.25 Si, 1.25 Mn, bal Fe
For punches, crimpers, upsetters, oil hardened.

KRUPP BC1044
M-72, 0.53 C, 0.8 Si, 1.05 Mn, bal Fe
For springs, punches, upsetters, oil hardened.

KRUPP BC1244
M-72, 0.57-0.63 C, 0.9-1.1 Si, 0.9-1.1 Mn, bal Fe.
For tools, springs, punches; shock resistant

KRUPP BDF30
M-72, 0.30-0.36 C, 0.8-1.0 Si, 0.3 Mn, 0.9-1.1 Cr, 0.20 V, 1.7-2.0 W, bal Fe
For tools, dies, hot work tools; hot work steel.

KRUPP BDF50
M-72, 0.40-0.46 C, 0.8-1.0 Si, 0.9-1.1 Cr, 1.7-2.0 W, bal Fe.
For tools, hot work dies; hot work steel.

KRUPP BDFD.
M-72; 0.5 C, 1.5 Cr, 2.25 W, 0.2 V, bal Fe
For tools, dies, punches, oil hardened.

KRUPP BDF SPEZIAL.
M-72, 0.54-0.60 C, 0.8-1.1 Si, 1.7-2.0 W, bal Fe.
For tools, hot work dies; hot work steel.

KRUPP BEARING.
M-72, 87 Al, 8 Cu, 5 Sn.
For bearings

KRUPP BF1552.
M-72; 0.67 C, 1.3 Si, 0.5 Cr, 0.5 Mn, bal Fe
For springs; oil hardened, tough.

KRUPP BF2555.
M-72; 1.2-1.3 C, 1.05-1.2 Si, 0.7 Mn, 1.1-1.3 Cr, bal Fe.
For tools, dies, bearings, oil hardening.

KRUPP BFD-50G.
M-72; C, alloy, bal Fe.
For tools.

KRUPP BFG
M-72; 0.95 C, 1.2 Mn, 0.5 Cr, 0.5 W, bal Fe.
For tools, dies; non-deforming.

KRUPP BFM755.
M-72; 0.30-0.38 C, 1.4-1.6 Si, 1.2-1.5 Cr, 0.1-0.2 V, bal Fe.
For tools, punches, dies, shock resistant.

KRUPP BFM SPEZIAL.
M-72, 0.45 C, 1.4 Si, 1.2 Cr, 0.1 V, bal Fe.
For tools, punches, chisels; shock resistant

KRUPP BFV.
M-72; 0.65-0.70 C, 0.15-0.25 Si, 0.5-0.6 Mn, bal Fe.
For tools, springs, punches; water hardening

KRUPP BMH
M-72; 0.42-0.48 C, 1.5-1.7 Si, 0.6 Mn, bal Fe.
For tools, springs, punches; shock resistant.

KRUPP BS1
M-72, 0.95 C, bal Fe.
For tools, drills, taps; water hardened.

KRUPP BS2.
M-72, 0.95 C, bal Fe
For tools, drills, taps, water hardened.

KRUPP BS3
M-72, 1.1 C, 0.25 Si, 0.25 Mn, bal Fe.
For drills, taps, reamers, cutters; Type W1; water hardened

KRUPP BS4
M-72, 1.0 C, 0.25 Si, 0.25 Mn, bal Fe
For springs, drills, taps, punches, reamers; Type W1, water hardened.

KRUPP BS5.
M-72, 0.85 C, 0.25 max Si, 0.25 max Mn, bal Fe.
Heat treated. 190,000 TS; 145,000 YS, 10 El; 30 RA; 400 Brin.
For drills, taps, reamers, punches, cutters; Type W1; water hardened.

KRUPP BS6.
M-72; 0.70 C, 0.25 max Si, 0.25 max Mn, bal Fe.
Heat treated 175,000 TS, 128,000 YS, 12 El, 37 RA, 355 Brin
For rails, punches, hammers, axes; Type W1; water hardened.

KRUPP C7E
M-72, 0.15 C, 0.65 Cr, 0.5 Mn, 0.25 Si, bal Fe.
For gears, pinions, machine tool parts; case hardening steel.

KRUPP C66.
M-72, 0.30 C, 1.35 Mn, 0.25 Si, bal Fe.
For gears, shafts, machine tool parts, water hardened, tough.

KRUPP CARBON.
M-371, 0.7-1.0 C, bal Fe.
For tools, drills, taps, water hardened.

KRUPP CMV SPECIAL.
M-72; C, 18 Mn, 12.5 Cr, 1 V, 0.2 Ni, bal Fe.
For blading for gas turbine on jet engine; corrosion and heat resistant

KRUPP DF35
M-72; 0.9 C, 0.45 Cr, bal Fe.
For tools, drills, taps, water hardening.

KRUPP DF51.
M-72; 1.05 C, 0.9 Mn, 1.0 Cr, 1.15 W, bal Fe.
For cutters, bearings, dies, tools; water hardened.

KRUPP DF-108C.
M-72; 1.5 C, 11.5 Cr, 0.75 Mo, bal Fe.
For tools, dies; non-deforming.

KRUPP DF-109-CN.
M-72; 0.8 C, 9.5 W, 2.5 Cr, 0.1 V, bal Fe.
For hot work tools and dies; hot work steel.

KRUPP DF109CW.
M-72; 0.3 C, 2.65 Cr, 0.35 V, 8.5 W, 0.3 Mn, bal Fe.
For extrusion rams and liners, punches; hot work steel, oil hardened.

KRUPP DF168.
M-72; 2.1 C, 11.5 Cr, 0.7 W, bal Fe.
For blanking and forming dies, oil hardened, non-deforming.

KRUPP DFM.
M-72; 0.7 C, 18 W, 5 Co, 4 Cr, 1.3 V, bal Fe.
For tools, dies, cutters, high speed steel.

KRUPP DFMC.
M-72; 0.7 C, 18 W, 4 Cr, 1 V, bal Fe.
For tools, dies, cutters; high speed steel.

KRUPP DFM EXTRA SPECIAL.
M-72; 0.7 C, 18 W, 9 Co, 1 Mo, 4 Cr, 2 V, bal Fe.
For tools, dies, cutters; high speed steel.

KRUPP DFMN E-SPEZIAL.
M-72; 0.86 C, 4.1 Cr, 0.85 Mo, 2.5 V, 12 W, bal Fe.
For lathe and planer tools, reamers, broaches, taps; high speed steel.

KRUPP DFMN SUPRA
M-72; 0.86 C, 2.8 Co, 4.3 Cr, 0.85 Mo, 2.1 V, 12 W, bal Fe.
For lathe and planer tools, reamers, broaches; high speed steel

KRUPP DFMN ZWEIKARRO.
M-72, 0.82 C, 4.1 Cr, 0.85 Mo, 1.6 V, 8.7 W, bal Fe.
For lathe and planer tools, broaches; high speed steel.

KRUPP DFM SUPRA.
M-72; 0.79 C, 4.75 Co, 4.3 Cr, 0.75 Mo, 1.5 V, 18 W, bal Fe.
For lathe and planer tools, reamers, hobs, taps, drills; high speed steel, heavy duty.

KRUPP DFM SUPRA SPEZIAL.
M-72; 0.76 C, 10 Co, 4.2 Cr, 0.8 Mo, 1.8 V, 18 W, bal Fe.
For lathe and planer tools, reamers, broaches; high speed steel.

KRUPP DFMV3.
M-72; 0.86 C, 4.1 Cr, Mo, W, V, bal Fe.
For lathe and planer tools, reamers, drills, hobs; high speed steel

KRUPP DFMV 5.
M-72; 1.35 Co, 0.3 Si, 0.3 Mn, 4.25 Cr, 10.5 W, 4.35 V, bal Fe.
For hard facing electrodes; wear resistant.

KRUPP DFM ZWEIKARRO.
M-72; 0.74 C, 4.1 Cr, 1.1 V, 18.5 W, bal Fe
For lathe and planer tools, drills, taps, hobs; high speed steel.

KRUPP E33E.
M-72; 0.2 C, 1.5 Ni, bal Fe.
For gears, pinions, machine tool parts; case hardening steel.

KRUPP E67.
M-72; 0.18 C, 1 Cr, 2 Ni, bal Fe.
For gears, cams, camshafts; case hardened.

KRUPP EB7.
M-72; 0.55 C, 0.50-0.70 Mn, 0.10-0.40 Si, bal Fe.
Heat treated: 160,000 TS; 113,000 YS; 12 El; 40 RA; 320 Brin.
For gears, bolts, machine tool parts; water hardened.

KRUPP EF23V.
M-72; 0.28 C, 1.5 Ni, 0.5 Cr, bal Fe.
For bolts, gears, machine tool parts; oil hardened, shock resistant.

KRUPP EF24V.
M-72; 0.35 C, 0.5 Cr, 1.5 Ni, bal Fe.
For bolts, gears, machine tool parts; oil hardened, shock resistant.

KRUPP EF29V.
M-72, 0.28 C, 0.7 Cr, 2.5 Ni, bal Fe.
For bolts, gears, machine tool parts; oil hardened, shock resistant.

KRUPP EF30V
M-72; 0.35 C, 0.7 Cr, 2.5 Ni, bal Fe.
For gears, bolts, crankshafts, oil hardened, shock resistant

KRUPP EF35E.
M-72, 0.13 C, 0.7 Cr, 2.5 Ni, bal Fe.
For gears, cams, camshafts, fasteners; case hardening steel, shock resistant.

KRUPP EF48V
M-72; 0.22 C, 0.7 Cr, 3.5 Ni, 0.6 Mn, bal Fe
For gears, cams, camshafts, fasteners; case hardening steel, shock resistant

KRUPP EF49V.
M-72; 0.30 C, 0.7 Cr, 3.5 Ni, bal Fe
For gears, bolts, crankshafts, fasteners, oil hardened, shock resistant.

KRUPP EF58E
M-72, 0.13 C, 0.7 Cr, 3.5 Ni, bal Fe
For gears, cams, camshafts, machine tool parts, case hardening steel, shock resistant

KRUPP EF59F
M-72, 0.13 C, 1.1 Cr, 4.5 Ni, bal Fe
For gears, pinions, camshafts, fasteners, case hardened, shock resistant.

KRUPP EF62V
M-72; 0.35 C, 1.3 Cr, 4.5 Ni, bal Fe.
For gears, bolts, crankshafts, machine tool parts, oil hardened, shock resistant.

KRUPP EF1514
M-72; 0.8 C, 0.7 Mn, 1-1.2 Cr, 0.5 Ni, bal Fe.
For tools, dies, tough

KRUPP EFS
M-72, 0.45 C, 0.7 Cr, 2.5 Ni, bal Fe.
For gears, bolts, crankshafts, fasteners, oil hardened, shock resistant

KRUPP EFS SPECIAL S.
M-72, 0.45-0.50 C, 0.5-0.8 Mn, 1.2-1.5 Cr, 1.1-1.4 Ni, bal Fe.
For tools, gears, shafts, oil hardening.

KRUPP EFWP.
M-72, 0.50-0.55 C, 0.9-1.2 Cr, 3-3.5 Ni, bal Fe.
For tools, gears, shafts; oil hardening.

KRUPP EV420.
M-72; 0.08 C, 1-1.25 Mn, bal Fe.
Welded: 55,000 TS; 45,000 YS; 33-40 El; 60-80 RA.
For welding rod.

KRUPP EXTRA.
M-72; 0.35 C, 2.5 Cr, 0.65 V, 4.5 W, bal Fe.
For tools, hot work dies; hot work steel.

KRUPP EXTRA SPEZIAL P.
M-72; 0.5 C, 0.85 Mn, 1.5 Cr, 0.65 Mo, 0.3 V, bal Fe.
For tools, gears, shafts; oil hardening.

KRUPP F13.
M-72; 0.12 max C, 2.2 Si, 13 Cr, bal Fe.
Annealed: 75,000 TS; 40,000 YS; 35 El; 70 RA; 155 Brin.
For valves, cutlery, surgical instruments, knives; Type 410; stainless.

KRUPP F20S.
M-72; 1.6 C, 0.9 Si, 0.2 Mn, 20 Cr, bal Fe.
For hard facing electrodes; corrosion resistant.

KRUPP F20SH.
M-72; 2.5 C, 0.9 Si, 0.2 Mn, 20 Cr, bal Fe.
For hard facing electrodes; corrosion resistant.

KRUPP F22.
M-72; 0.13 C, 0.5 Cr, 0.3 Mn, 0.2 Si, bal Fe.
For gears, bolts, machine tool parts; case hardened.

KRUPP F28S.
M-72, 1.6 C, 0.9 Si, 0.55 Mn, 28 Cr, bal Fe.
For hard facing electrodes; corrosion resistant.

KRUPP F28SH.
M-72; 2.1 C, 0.9 Si, 0.55 Mn, 28 Cr, bal Fe
For hard facing electrodes; corrosion resistant.

KRUPP F33
M-72, 0.15 C, 0.65 Cr, 0.25 Si, 0.5 Mn, bal Fe.
For gears, bolts, machine tool parts; case hardened.

KRUPP F74
M-72, 0.41 C, 0.25 Si, 0.65 Mn, 1.0 Cr, bal Fe.
For gears, bolts, machine tool parts; water hardened.

KRUPP F153.
M-72; 1.4 C, 0.30 Cr, 0.30 Mn, 0.25 Si, 0.1 V, bal Fe
For bearings, cutters, tools, dies; water hardened, wear resistant.

KRUPP F168.
M-72, 0.82-0.87 C, 1.7-1.9 Cr, bal Fe.
For tools, bearings, water hardening

KRUPP F182
M-72, 0.9 C, 0.45 Cr, bal Fe
For tools, drills, taps, water hardening

KRUPP F193.
M-72, 0.9-1.0 C, 0.7-0.9 Cr, bal Fe.
For tools, drills, taps, water hardening.

KRUPP F202
M-72, 1.1 C, 0.30 Mn, 0.4 Cr, 0.20 Si, bal Fe.
For cutters, tools, bearings, drills; water hardened, wear resistant.

KRUPP F206 G
M-72, 0.95-1.05 C, 1.25-1.5 Cr, bal Fe.
For tools, bearings; wear resistant

KRUPP F261
M-72; 1.26-1.32 C, 0.2-0.3 Cr, 0.03 S, bal Fe.
For tools, cutters, drills; water hardening.

KRUPP F261 P.
M-72, 1.26-1.32 C, 0.025 S, 0.025 P, 0.2-0.3 Cr, bal Fe.
For tools, cutters, drills; water hardening.

KRUPP F283
M-72; 1.35-1.45 C, 0.6-0.8 Cr, bal Fe.
For tools, cutters, hobs; water hardening.

KRUPP F306.
M-72; 1.4-1.5 C, 1.3-1.5 Cr, bal Fe.
For tools, bearings; wear resistant.

KRUPP F306 G
M-72; 1.4-1.5 C, 1.3-1.5 Cr, bal Fe.
For tools, bearings; wear resistant.

KRUPP F1248C.
M-72; 1.65 C, 11.5 Cr, 0.1 V, bal Fe.
For blanking and forming dies, punches; air hardened, non-deforming.

KRUPP F1448C.
M-72; 1.65 C, 11.5 Cr, 0.1 V, bal Fe.
For blanking and forming dies, punches; air hardened, non-deforming.

KRUPP F-2048.
M-72; 2.25 C, 13 Cr, bal Fe.
For tools, dies; non-deforming

KRUPP F3014-LCS.
M-72; 1.4-1.5 C, 1.4-1.6 Si, 3.5 Cr, bal Fe.
For tools, dies; tough.

KRUPP F4048.
M-72; 2.0-2.2 C, 11-12 Cr, bal Fe.
For tools, dies; non-deforming.

KRUPP FC29.
M-72; 0.20 C, 1.15 Cr, 1.25 Mn, bal Fe.
For gears, cams, camshafts; case hardening steel.

KRUPP FF6.
M-72; 0.12 max C, 2.3 Si, 6 Cr, bal Fe.
For oil refinery equipment; creep and heat resistant.

KRUPP FF6N.
M-72; 0.3 C, 2.2 Si, 6 Cr, bal Fe.
For oil refinery equipment; creep and heat resistant.

KRUPP FF13.
M-72; 0.12 max C, 2.2 Si, 13 Cr, bal Fe.
For turbine blades, cutlery, valves, surgical instruments, corrosion and heat resistant.

KRUPP FF18.
M-72; 0.12 max C, 18 Cr, 2 Si, bal Fe.
Annealed: 80,000 TS; 50,000 YS; 25 El; 50 RA; 150 Brin.
For oil refinery parts, soot blowers, bolts; Type 430, corrosion resistant

KRUPP FF25.
M-72; 0.35 C, 23-27 Cr, bal Fe.
Annealed: 90,000 TS; 60,000 YS; 20 El; 45 RA; 180 Brin.
For furnace parts, preheaters, heat treating boxes; Type 446, corrosion resistant.

KRUPP FF30.
M-72; 0.35 C, 23-27 Cr, bal Fe.
Annealed. 90,000 TS; 60,000 YS; 20 El; 45 RA; 180 Brin.
For furnace parts, preheaters, heat treating boxes; Type 446; corrosion resistant.

KRUPP FF112.
M-72; 0.3 C, 2.2 Si, 6 Cr, bal Fe.
For oil refinery equipment; heat and creep resistant.

KRUPP FF120.
M-72; 0.6 C, 1.5 Si, 22 Cr, bal Fe.
For furnace grates, wear plates, rabble arms; heat and creep resistant.

KRUPP FF128.
M-72; 0.6 C, 1.5 Si, 29 Cr, bal Fe.
For furnace grates, wear plates, rabble arms; heat resistant.

KRUPP FF228.
M-72; 1.3 C, 1.5 Si, 29 Cr, bal Fe.
For wear blades, scrapers, crushers, rollers; heat and abrasion resistant.

KRUPP FFE25.
M-72; 0.2 C, 1.2 Si, 25 Cr, 4 Ni, bal Fe.
Cast: 90,000 TS; 65,000 YS; 2 El; 212 Brin.
For cylinder liners, bushings, valves, corrosion and heat resistant.

KRUPP FFE28.
M-72; 0.2 C, 1.2 Si, 25 Cr, 4 Ni, bal Fe.
Cast: 90,000 TS; 65,000 YS; 2 El; 212 Brin.
For cylinder liners, bushings, valve seats and bodies; corrosion and heat resistant.

KRUPP FFP6.
M-72; 0.12 C, 0.8 Si, 0.5 Cr, 0.8 Al, bal Fe.
For oil refinery equipment, heat and creep resistant.

KRUPP FFP13
M-72; 0.12 max C, 1.2 Si, 1 Al, 13 Cr, bal Fe.
For oil refinery equipment; heat and creep resistant

KRUPP FFP18.
M-72; 0.12 max C, 1 Al, 18 Cr, bal Fe.
Annealed: 120,000 TS; 90,000 YS; 20 El; 55 RA; 250 Brin.
For oil refinery equipment, heat and creep resistant.

KRUPP FFP24.
M-72; 0.12 max C, 1.5 Si, 1.5 Al, 24 Cr, bal Fe.
For oil refinery equipment; heat and creep resistant.

KRUPP FK15.
M-72; 0.15 C, Cr, Mo, bal Fe.
For gears, shafts, machine tool parts, case hardening steel, tough.

KRUPP FK24.
M-72; 0.20 C, Cr, Mo, bal Fe.
For machine tool parts, gears, shafts; case hardening steel, tough.

KRUPP FK30
M-72, 0.25 C, 0.65 Mn, 1 Cr, 0.2 Mo, bal Fe
For machine tool parts, gears, oil hardened, tough.

KRUPP FK34.
M-72; 0.33 C, 1 Cr, 0.65 Mn, 0.2 Mo, bal Fe.
For machine tool parts, gears, fasteners, oil hardened, tough.

KRUPP FK44.
M-72, 0.42 C, 1 Cr, 0.2 Mo, 0.65 Mn, bal Fe.
For gears, bolts, fasteners, shafts, studs, oil hardened, tough

KRUPP FKM45
M-72; 0.42 C, Cr, Mo, bal Fe
For gears, bolts, fasteners, shafts; oil hardened, tough

KRUPP FKM54.
M-72, 0.30 C, Cr, Mo, V, bal Fe
For gears, bolts, machine tool parts; oil hardened, tough

KRUPP FM21.
M-72; 0.50 C, 1.0 Cr, 0.09 V, bal Fe.
For springs, gears, bolts, shafts; oil hardened, shock resistant.

KRUPP FM881.
M-72; 0.34-0.39 C, 1.6-1.9 Cr, 0.15 V, bal Fe
For gears, springs, tough.

KRUPP FM1041.
M-72; 0.50 C, 1.0 Cr, 0.09 V, bal Fe
For gears, bolts, springs, shafts; oil hardened, shock resistant.

KRUPP FM1251.
M-72; 0.6-0.68 C, 0.7-1.0 Si, 0.7-1.0 Mn, 1.1-1.3 Cr, 0.1-0.18 V, bal Fe.
For tools, gears, springs; tough.

KRUPP FM2432.
M-72; 1.15-1.25 C, 0.6-0.8 Cr, 0.15 V, bal Fe.
For tools, bearings; water hardening.

KRUPP FMC 24.
M-72; 0.27 C, Cr, V, Mn, bal Fe.
For gears, bolts, machine tool parts; oil hardened, tough.

KRUPP FP12.
M-72; 0.34 C, 1.1 Al, 1.4 Cr, bal Fe.
For oil refinery equipment; creep and heat resistant.

KRUPP FP15.
M-72, 0.27 C, 1.1 Al, 1.4 Cr, bal Fe.
For oil refinery equipment; creep and heat resistant

KRUPP FPE23
M-72, 0.33 C, 1.1 Al, 1.7 Cr, 1.0 Ni, bal Fe.
For oil refinery equipment; creep and heat resistant

KRUPP FPK13.
M-72, 0.32 C, 1.1 Al, 1.1 Cr, 0.18 Mo, bal Fe.
For oil refinery equipment, heat and creep resistant

KRUPP GA 350.
M-72, 0.45 C, 0.35 Si, 2.1 Mn, 1.15 Cr, 0.2 Ti, bal Fe
For hard facing electrodes, wear resistant.

KRUPP GA 500
M-72, 0.9 C, 0.35 Si, 2.1 Mn, 1.3 Cr, 0.2 Ti, bal Fe
For hard facing electrodes, wear resistant.

KRUPP HCT1
M-72, 0.2 max C, 22-24 Cr, 12-15 Ni, 2 max Mn, 3.5 max Si, bal Fe
Annealed 85,000-95,000 TS, 40,000-50,000 YS, 45-55 El, 150-185 Brin
For heat treating boxes, oil refinery and chemical plant equipment; Type 309; austenitic, heat resistant

KRUPP HCT3
M-72, 0.25 max C, 24-26 Cr, 19-22 Ni, bal Fe
Annealed. 95,000 TS; 45,000 YS, 50 El, 65 RA, 180 Brin
At 1200°F 57,000 TS, 22,000 YS; 32 El, 45 RA
For furnace parts and equipment, heat treating boxes, Type 310, austenitic, heat resistant

KRUPP HGS.
M-72, 0.55-0.60 C, 0.6-0.8 Cr, 1.5-1.8 Ni, 0.15-0.20 Mo, bal Fe
For forging die blocks, oil hardened, tough

KRUPP HGSE
M-72, 0.55 C, 0.7 Mn, 0.8 Cr, 1.8 Ni, 0.5 Mo, bal Fe
For forging die blocks; oil hardening

KRUPP HGS SPEZIAL
M-72, 0.34 C, 0.68 Cr, 0.15 Mo, bal Fe
For tools, gears, shafts; oil hardening.

KRUPP HIGH SPEED.
M-371; C, W, alloy, bal Fe.
For high speed tools and cutters, high speed steel

KRUPP HM1
M-72; C, bal Fe.
For tools.

KRUPP HM2.
M-72; C, bal Fe.
For tools.

KRUPP HM3.
M-72; 1.1 C, bal Fe.
For tools, drills, taps; water hardened.

KRUPP HM 4.
M-72; 1.1 C, bal Fe.
For tools, drills, taps; water hardened.

KRUPP HM4 G.
M-72; 0.9-1.0 C, 0.5 Cr, bal Fe.
For tools, bearings, drills; water hardening.

KRUPP HSK.
M-72; 0.90 C, 0.25-0.50 Si, 0.3-0.8 Mn, bal Fe.
Heat treated: 190,000 TS; 145,000 YS; 10 El; 30 RA; 400 Brin.
For drills, taps, springs, tools, reamers; Type W1; water hardened.

KRUPPIN.
M-72; 28 Ni, C, bal Fe.
For resistance alloy; heat resistant.

KRUPP K.A.-2.
M-72; 7-10 Ni, 16-20 Cr, 0.75 Si, 0.15 C, bal Fe.
For heat and corrosion resisting parts, for high temperature use; heat and corrosion resistant.

KRUPP KFM.
M-72; 0.95 C, 0.3 Si, 0.3 Mn, 3.75 Cr, 1.3 W, 0.12 Ti, 2.8 V, 2.35 Mo, bal Fe.
For hard facing electrodes; wear resistant.

KRUPP KFM EXTRA.
M-72; 0.85 C, W, Mo, bal Fe.
For cutters, dies; oil or water hardened

KRUPP KFM ZWEISTERN.
M-72; 0.95 C, W, Mo, bal Fe
For cutters, dies, oil or water hardened.

KRUPP M202
M-72; 0.9-1.0 C, 0.3 V, bal Fe
For tools, drills, taps, water hardening

KRUPP N48.
M-72; 0.30 C, Cr, V, bal Fe.
For gears, bolts, machine tool parts, oil hardened, tough

KRUPP N54
M-72, 0.31 C, 2.35 Cr, 0.18 Mo, 0.13 V, bal Fe.
For gears, bolts, machine tool parts, oil hardened, tough.

KRUPP NCT1A.
M-72; 0.15 C, 2 Si, 19.5 Cr, 9.5 Ni, bal Fe.
Annealed: 80,000 TS; 35,000 YS; 55 El; 75 RA; 150 Brin.
For chemical plant equipment, tanks, mixers; Type 302, stainless, austenitic.

KRUPP NCT1A GUSS.
M-72, 0.4 C, 22 Cr, 9.5 Ni, bal Fe.
Cast: 85,000 TS; 45,000 YS; 35 El; 165 Brin.
For heat treat boxes, furnace parts, conveyors; Type HF, corrosion and heat resistant.

KRUPP NCT2 GUSS.
M-72; 0.4 C, Cr, Ni, Si, bal Fe.
For furnace parts, heat treat boxes; corrosion and heat resistant

KRUPP NCT3.
M-72; 0.15 C, 24 Cr, 19 Ni, bal Fe.
Annealed: 100,000 TS; 45,000 YS; 50 El; 65 RA; 185 Brin.
For valves, pumps, turbine and jet parts; Type 310; stainless, austenitic.

KRUPP NCT3/133.
M-72; 20 Cr, 25 Ni, bal Fe.
For welding electrodes; stainless, austenitic.

KRUPP NCT3 GUSS.
M-72; 0.4 C, 25 Cr, 19 Ni, bal Fe.
Cast: 75,000 TS; 50,000 YS; 17 El; 170 Brin.
Aged: 85,000 TS; 50,000 YS; 10 El; 190 Brin.
For heat treat boxes, burner tips, hearth plates; Type HK; austenitic, stainless.

KRUPP NCT3A GUSS.
M-72; 0.4 C, 26 Cr, 14 Ni, bal Fe.
Cast: 75,000 TS; 50,000 YS; 15 El; 170 Brin.
For heat treat boxes, furnace parts, hearth plates; Type HI; austenitic, heat resistant.

KRUPP NCT6.
M-72; 0.15 C, Ni, Cr, bal Fe.
For chemical plant equipment; stainless.

KRUPP NCT8.
M-72; 0.15 C, Ni, Cr, bal Fe
For chemical plant equipment; stainless.

KRUPP NCT30
M-72; 0.15 C, Ni, Cr, bal Fe.
For chemical plant equipment; stainless.

KRUPP NFKC.
M-72; 1.4 C, 0.2 Si, 0.3 Mn, 0.45 Cr, 3.25 W, 0.2 V, bal Fe
For hard facing electrodes, wear resistant.

KRUPP NIROSTAGUSS 1.
M-72; 1-2 C, 24 min Cr, bal Fe.
Cast. 58,000 TS; 250 Brin.
For chemical equipment, HNO_3 and pulp industries; corrosion resistant.

KRUPP NIROSTAGUSS 2.
M-72, 1-2 C, 24 min Cr, bal Fe
Cast: 65,000 TS; 300 Brin
For chemical equipment, HNO_3 and pulp industries; corrosion resistant

KRUPP NIROSTAGUSS 3.
M-72; 1-2 C, 24 min Cr, bal Fe.
Cast: 72,000-114,000 TS, 400-500 Brin
For paper drying cylinders, chemical equipment; corrosion resistant

KRUPP NITROPLAT.
M-72; composite sheet Krupp V2A on C steel.
For corrosion resistant parts; corrosion resistant.

KRUPP NON-DEFORMING.
M-371, C, alloy, bal Fe
For tools, dies, non-deforming.

KRUPP P77.
M-72, 0.90 C, 1.9 Mn, 0.1 V, bal Fe.
For punches, dies, shears, upsetters; oil hardened, non-deforming.

KRUPP P141.
M-72; 0.85 C, W, Mo, Cr, V, bal Fe.
For tools, dies, cutters; oil hardened.

KRUPP P193
M-72; C, Ni, Cr, bal Fe.
For jet engine components, turbine rotor blades; austenitic, heat resistant.

KRUPP P427
M-72; 1.65 C, Cr, Co, bal Fe.
For blanking and forming dies; oil hardened, wear resistant.

KRUPP PFM.
M-72; 0.95-1.05 C, 0.3 Cr, 0.15 V, bal Fe.
For tools, drills, taps; water hardening.

KRUPP REZ EXTRA.
M-72; 0.35 C, 0.8 Cr, 0.55 Mo, bal Fe.
For tools, gears, shafts; oil hardening.

KRUPP SC2448.
M-72; 1.3 C, 12 Mn, bal Fe.
For tools, wear resistant parts; non-deforming, austenitic.

KRUPP SPECIAL.
M-371; C, alloy, bal Fe.
For tools; oil hardened.

KRUPP SPEZIAL S.
M-72; 0.45 C, Cr, Ni, bal Fe.
For machine tool parts; oil hardened.

KRUPP TYPE METAL.
Germ.; 60 Pb, 18 Sb, 12 Sn, 4.7 Cu, 4.7 Ni, 1 Bi.
For type metal.

KRUPP UK17F EXTRA.
M-72; 0.1 max C, 17 Cr, 1.8 Mo, Ti = 7 × C, bal Fe.
For welded oil refinery and chemical plant equipment; corrosion resistant.

KRUPP V-1M.
M-72; 0.15 C, 2 Ni, 15 Cr, 0.4 Mn, 0.5 Si, bal Fe.
Annealed: 85,000 TS; 55,000 YS; 30 El; 150 Brin.
Heat treated: 213,000 TS; 160,000 YS; 450 Brin.
For furnace equipment, cutlery, turbine parts; Type 431; corrosion resistant.

KRUPP-V-2 A.
M-72; 23 Cr, 9.5 Ni, 0.4 C, bal Fe.
85,000-105,000 TS; 35,000 YS; 50 El; 150-200 Brin.
For heat and corrosion resisting parts, chemical equipment; heat and corrosion resistant; austenitic.

KRUPP V2AB SUPRA.
M-72; 0.1 max C, 18 Cr, 8.5 Ni, bal Fe.
Annealed: 80,000 TS; 35,000 YS; 55 El; 75 RA; 150 Brin.
For chemical plant equipment, tanks, mixers, filters; Type 302; stainless, austenitic.

KRUPP V2AE.
M-72; 0.08 max C, 17-19 Cr, 8-11 Ni, Ti = 5 × C, bal Fe.
Normalized: 93,000 TS; 36,000 YS; 45 El; 60 RA; 165 Brin.
Annealed: 87,000 TS; 33,000 YS; 57 El; 73 RA; 155 Brin.
For chemical plant equipment, muffles, welded parts; Type 321; stainless, austenitic.

KRUPP V2A EXTRA.
M-72; 0.1 C, 18 Cr, 8-9.5 Ni, Ti = 4 × C, bal Fe.
Annealed: 83,000 TS; 29,000 YS; 45 El; 55 RA.
For crucibles, autoclaves, chemical plant equipment; Type 321; stainless, austenitic.

KRUPP-V2AFH.
M-72; 0.10 C, 16-18 Cr, 6-8 Ni, bal Fe.
Annealed: 110,000 TS; 40,000 YS; 60 El; B 85 Rock.
For aircraft structural members, railroad cars, household utensils, diaphragms, springs.
Type 301 stainless steel, austenitic, non-hardenable.

KRUPP V-2A NIROSTA.
M-72; 0.2 C, 20 Cr, 7 Ni, bal Fe.
Annealed: 85,000 TS; 35,000 YS; 60 El; 70 RA; 150 Brin.
Rolled: 125,000 TS; 95,000 YS; 25 El; 55 RA; 277 Brin.
For oil refinery and chemical plant equipment; Type 302; stainless, austenitic.

KRUPP V2A NORMAL.
M-72; 0.11-0.16 C, 18 Cr, 8 Ni, bal Fe.
For chemical plant equipment, mixers, Type 302; stainless, austenitic.

KRUPP V2AS.
M-72; 0.08 max C, 18-20 Cr, 8-11 Ni, 2 max Mn, bal Fe.
Annealed: 80,000 TS; 45,000 YS; 60 El; 135 Brin.
Cold drawn: 180,000 TS; 150,000 YS; 10 El; 330 Brin.
For chemical plant equipment, welded structures; Type 304; stainless, austenitic.

KRUPP V2A SPECIAL.
M-72; 0.08 C, 18 Cr, 8 Ni, bal Fe.
Annealed: 90,000 TS; 40,000 YS; 40 El; 60 RA; 160 Brin.
For chemical plant equipment, architectural trim; Type 304; stainless, austenitic.

KRUPP V2A SUPRA.
M-72; 0.07 max C, 18 Cr, 9.5 Ni, bal Fe.
Annealed: 78,000 TS; 31,000 YS; 45 El; 60 RA; 145 Brin.
For chemical and nitric acid plant equipment; Type 304; stainless, austenitic.

KRUPP V2AX EXTRA.
M-72; 0.12 max C, 18 Cr, 9.5 Ni, Cb = 8 × C, bal Fe.
Annealed: 90,000 TS; 45,000 YS; 56 El; 65 RA; 160 Brin.
For welded chemical plant equipment; Type 347; stainless, austenitic.

KRUPP V-3M.
M-72; 0.4 C, 14 Cr, 0.5 Ni, bal Fe.
Heat treated: 256,000 TS; 190,000 YS; 6 El; 10 RA; 540 Brin.
For cutlery, razors, knives; Type 420; corrosion resistant.

KRUPP V3ME.
M-72; 0.75-0.95 C, 16-18 Cr, 0.75 max Mo, bal Fe.
Annealed: 107,000 TS; 62,000 YS, 18 El; 35 RA; 220 Brin.
Heat treated: 280,000 TS; 270,000 YS; 3 El; 15 RA; 555 Brin.
For cutlery, valves, bearings, instruments; Type 440B; corrosion resistant.

KRUPP V-3M EXTRA
M-72; 1.0 C, 12-18 Cr, bal Fe.
Annealed: 210 Brin.
Heat treated: 620 Brin.
For ball and roller bearings, disks for meat grinders; corrosion resistant.

KRUPP V3MS.
M-72; 0.15 max C, 12-14 Cr, 1.25-2.5 Ni, 0.07 min P, S, or Se, bal Fe.
Annealed: 75,000 TS; 40,000 YS; 30 El; 60 RA; 155 Brin.
Cold drawn: 100,000 TS; 85,000 YS; 13 El; 50 RA; 205 Brin.
For screw machine products, valve trim. pump shafts; Type 416; free-cutting, stainless.

KRUPP V-4A.
M-72; 0.07 max C, 10.5 Ni, 18 Cr, 2.5 Mo, bal Fe.
Rolled: 85,000-108,000 TS; 36,000-70,000 YS; 50-45 El; 150-185 Brin.
For chemical and textile plant equipment; Type 316; stainless, austenitic.

KRUPP V4AB SUPRA.
M-72; 0.1 C, 18 Cr, 9.5 Ni, 2 Mo, bal Fe.
Annealed: 85,000 TS; 35,000 YS; 50 El; 65 RA; 160 Brin.
For acid resistant chemical plant equipment; Type 316; stainless, austenitic.

KRUPP V4 AE-TI.
M-72; 0.10 max C, 16-18 Cr, 10-14 Ni, 1.7-2.7 Mo, Cb = 10 × C, bal Fe.
Annealed: 85,000-95,000 TS; 35,000-45,000 YS; 60-50 El; 75-60 RA; 150-190 Brin.
For acid resistant chemical plant equipment; Type 316 Cb; stainless, austenitic.

KRUPP V4A EXTRA.
M-72; 0.12 max C, 18 Cr, 10 Ni, 2 Mo, Ti = 4 × C, bal Fe.
Annealed: 85,000 TS; 39,000 YS; 50 El; 60 RA; 160 Brin.
For sulphide, paper and pulp and textile industries; stainless, austenitic; Type 316 Ti.

KRUPP V4AS.
M-72; 0.10 max C, 16-18 Cr, 10-14 Ni, 2-3 Mo, bal Fe.
Annealed: 85,000-95,000 TS, 35,000-45,000 YS; 60-50 El; 75-60 RA; 150-190 Brin.
For chemical plant equipment, mixers, agitators, filters, Type 316; austenitic, stainless.

KRUPP V4A SUPRA
M-72; 0.12 max C, 18 Cr, 8 Ni, 2.5 Mo, bal Fe.
Annealed: 78,000 TS, 32,000 YS; 50 El, 60 RA; 140 Brin.
For sulphide, paper and pulp industries, textile equipment, Type 316, stainless, austenitic.

KRUPP V4AX EXTRA.
M-72, 0.12 max C, 18 Cr, 2 Mo, 10.5 Ni, Cb = 8 × C, bal Fe
Annealed: 85,000 TS, 35,000 YS, 45 El, 60 RA, 165 Brin.
For welded acid resistant chemical plant equipment, Type 318, stainless, austenitic.

KRUPP V5M
M-72, 0.2 C, 13 Cr, bal Fe
Annealed: 95,000 TS; 50,000 YS, 25 El, 55 RA; 195 Brin
For turbine blades, valves, cutlery, surgical instruments, Type 420; corrosion resistant

KRUPP V-6 A STEEL
M-72, 20 Cr, 7 Ni, 0.2 C, 2.5 Cu, bal Fe
For chemical equipment, corrosion resistant, resists NH_4Cl.

KRUPP V8A EXTRA.
M-72, 0.12 max C, 18 Cr, 10.5 Ni, 2 Mo, Ti = 4 × C, bal Fe
Annealed: 85,000 TS, 35,000 YS; 45 El, 60 RA; 165 Brin
For welded acid resistant chemical plant equipment, Type 316 Ti, stainless, austenitic

KRUPP V-10-A
M-72; 0.12 C, 8 Mn, 0.8 Si, 19.5 Cr, 9 Ni, bal Fe
Welded: 85,000 TS; 45,000 YS, 45 El; 45 RA.
For welding rod; stainless, austenitic

KRUPP V12A NORMAL.
M-72; 0.10 max C, 12.5 Cr, 12 Ni, bal Fe
For valves, cutlery; corrosion resistant.

KRUPP V12A SUPRA.
M-72; 0.08 C, 18 Cr, 8 Ni, bal Fe.
Annealed: 78,000 TS; 31,000 YS; 50 El; 60 RA; 140 Brin.
For architectural trim, tanks, vessels, stainless, austenitic.

KRUPP V13F.
M-72; 0.12 C, 13 Cr, 0.2 Ni, bal Fe.
Heat treated: 150,000 TS; 20 El; 250 Brin.
For tableware, instruments; Type 403; corrosion resistant.

KRUPP-V13FA1.
M-72; 0.05 C, 11.5-14.5 Cr, 0.1-0.3 Al, bal Fe.
Annealed: 70,000 TS; 40,000 YS; 30 El; 160 Brin.
For annealing boxes, quenching racks, furnace parts, oil refinery equipment.
Type 405 stainless steel, heat and corrosion resistant.

KRUPP V14AS.
M-72; 0.10 max C, 18-20 Cr, 11-14 Ni, 3-4 Mo, bal Fe.
Annealed: 85,000-95,000 TS; 35,000-45,000 YS; 60-50 El; 75-60 RA; 150-190 Brin
For acid resistant chemical plant equipment; Type 317; stainless, austenitic.

KRUPP V14A SUPRA.
M-72, 0.10 max C, 18-20 Cr, 10-14 Ni, 2-3 Mo, bal Fe
Annealed: 85,000 TS; 31,000 YS, 50 El; 60 RA; 140 Brin
For hypochlorite plant equipment, stainless, austenitic; Type 316.

KRUPP V15F.
M-72, 0.08 C, Cr, bal Fe.
For corrosion resistant parts; corrosion resistant.

KRUPP V16A EXTRA
M-72, 0.07 max C, 17.5 Cr, 17.5 Ni, 2 Mo, Ti = 7 × C, bal Fe
For valves, acid resistant equipment, pumps; stainless, austenitic.

KRUPP V16A SUPRA
M-72, 0.10 max C, 18-20 Cr, 10-14 Ni, 3-4 Mo, bal Fe
Annealed: 90,000 TS; 35,000 YS; 50 El, 60 RA; 160 Brin
For chemical plant equipment, Type 317, stainless, austenitic

KRUPP V-16 SUPRA
M-72, 0.15 C, 18 Cr, 8 Ni, bal Fe.
Rolled: 78,000-101,000 TS, 55-65 El; 140-175 Brin
For stainless parts, chemical plant equipment; austenitic, stainless

KRUPP V17F
M-72, 0.1 C, 17 Cr, 0.2 Ni, 0.2 Ti, bal Fe.
Annealed: 78,000-93,000 TS, 50,000-55,000 YS; 20-18 El; 137-150 Brin
For chemical plant equipment, Type 430; corrosion resistant.

KRUPP V17F EXTRA.
M-72, 0.1 C, 17.5 Cr, Ti = 7 × C, bal Fe
Annealed: 95,000 TS; 50,000 YS; 25 El, 55 RA; 200 Brin
For welded corrosion resistant parts, Type 430 Ti; corrosion resistant.

KRUPP V17FS
M-72; 0.12 max C, 14-18 Cr, 0.07 min S or Se, bal Fe.
Annealed: 75,000-85,000 TS; 40,000-55,000 YS; 30-25 El, 137-150 Brin.
For chemical plant equipment, screw machine products; Type 430F; stainless, free-cutting.

KRUPP-V17FX EXTRA.
M-72; 0.08 C, 17 Cr, 8 Ni, 0.6 Cb, bal Fe.
Annealed: 85,000 TS; 40,000 YS; 50 El; B 82 Brin.
For welded structures, agitators, evaporators, tanks, digesters, chemical plant equipment.
Type 17-8 Cb stainless steel, austenitic, stabilized.

KRUPP-V44A SUPRA.
M-72; 0.06 C, 17 Cr, 12 Ni, 2-3 Mo, bal Fe.
Annealed: 85,000 TS; 35,000 YP; 50 El; B 80 Rock.
For chemical plant equipment, tanks, evaporators, digesters.
Type 316 stainless steel, austenitic.

KRUPP VK3M EXTRA.
M-72; 0.90 C, Mo, Cr, V, W, bal Fe.
For lathe and planer tools, reamers; high speed steel.

KRUPP VK5M.
M-72; 0.20 C, 13 Cr, 1.15 Mo, bal Fe.
For valves, cutlery, surgical and dental instruments; Type 420 Mo; stainless.

KRUPP V. M. STEEL.
M-72; 11-15 Cr, low Ni, bal Fe.
For chemical equipment; corrosion resistant.

KRUPP WA.
M-72; 0.4 C, 1.2 Cr, 0.4 Mo, 0.75 V, 0.4 W, bal Fe.
For tools, gears, shafts; water hardening.

KRUPP WA5 M.
M-72; 0.17-0.22 C, 12.5-13.5 Cr, bal Fe.
For corrosion resistant parts; corrosion resistant.

KRUPP WA100.
M-72; 0.43 C, 2.3 Si, 1.0 Mn, 17.5 Cr, 8.5 Ni, 0.9 Ti, bal Fe.
For stainless parts; corrosion resistant, austenitic.

KRUPP WA 342.
M-72; 0.45 C, 1.0 Mn, 1.7-2.0 Cr, 0.2 Mo, bal Fe.
For forging die blocks; oil hardened.

KRUPP WA402.
M-72; 0.45-0.50 C, 0.9-1.1 Mn, 1.1-1.3 Cr, 0.2 Mo, bal Fe.
For forging die blocks; oil hardened.

KRUPP WA594.
M-72; 0.36-0.32 C, 0.8-1.0 Si, 2.2-2.5 Cr, 0.4 V, bal Fe.
For dies, punches; shock resistant.

KRUPP WA650.
M-72; 0.30-0.38 C, 1.4-1.6 Si, 1.2-1.5 Cr, 0.1-0.2 V, bal Fe.
For tools, punches, dies; shock resistant.

KRUPP WA904.
M-72; 0.25-0.30 C, 1.0-1.2 Cr, 0.2 V, 3.5-4.0 W, bal Fe.
For tools, hot work dies; hot work steel.

KRUPP WA904 EXTRA.
M-72; 0.30 C, 2.35 Cr, 0.6 V, 4.25 W, bal Fe.
For pneumatic tools, upsetters, shear blades; oil hardened, tough.

KRUPP WAGS.
M-72; 0.36 C, 0.95 Si, 0.45 Mn, 0.025 P, 0.019 S, 5 Cr, 1.37 Mo, 0.33 V, bal Fe.
For extrusion press dies; tough, heat resistant.

KRUPP WAMo3.
M-72; 0.29 C, 0.33 Si, 0.36 Mn, 2.91 Cr, 3.05 Mo, 0.53 V, bal Fe.
For extrusion press dies; tough, heat resistant.

KRUPP WB97 M.
M-72; 0.42-0.48 C, 1.0-1.3 Si, 0.5-0.7 Mn, bal Fe.
For tools, springs, punches; shock resistant.

KRUPP WB136 M.
M-72; 0.62-0.68 C, 1.6 Si, 0.6 Mn, bal Fe.
For tools, springs, punches; shock resistant.

KRUPP WBC1255.
M-72; 0.6-0.7 C, 1.0-1.3 Si, 0.9-1.2 Mn, bal Fe.
For tools, springs, punches; shock resistant.

KRUPP WBF1552.
M-72; 0.67-0.73 C, 1.2-1.4 Si, 0.4-0.55 Cr, bal Fe.
For tools, punches, dies; oil hardening.

KRUPP WC 128.
M-72, 0.7 C, 1.9 Si, 0.07 S, bal Fe.
For tools, chisels, dies; tough.

KRUPP WF33.
M-72; 0.12-0.18 C, 0.4-0.6 Mn, 0.6-0.8 Cr, bal Fe.
For gears, shafts; case hardening.

KRUPP WF50
M-72; 0.55 C, Ni, Cr, W, bal Fe.
For forging and heading dies, shear blades; oil hardened, tough.

KRUPP WF100.
M-72, 0.45 C, Cr, Ni, W, bal Fe.
For forging and heading dies, punches; oil hardened, tough.

KRUPP WF-100D
M-72, 0.38 C, 0.52 Mn, 1.84 Si, 14.8 Cr, 12.9 Ni, 0.23 Mo, 2.5 W, bal Fe
For valves; high heat and corrosion resistance

KRUPP WF202.
M-72, 1.05-1.15 C, 0.3-0.5 Cr, bal Fe.
For tools, drills, taps, water hardening.

KRUPP WF204
M-72, 1.0-1.1 C, 0.8-1.0 Cr, bal Fe.
For tools, drills, taps, water hardening

KRUPP WF206
M-72, 0.95-1.05 C, 1.25-1.5 Cr, bal Fe
For tools, bearings; wear resistant.

KRUPP WFC27
M-72; 0.14-0.19 C, 1-1.3 Mn, 0.8-1.1 Cr, bal Fe.
For tools, gears, shafts, case hardening

KRUPP WFC29.
M-72, 0.17-0.22 C, 1.1-1.4 Mn, 1-1.3 Cr, bal Fe.
For tools, dies, bearings; case hardening.

KRUPP WFC31
M-72, 0.20-0.25 C, 1.3-1.6 Mn, 1.2-1.5 Cr, bal Fe.
For tools, bearings; case hardening.

KRUPP WFF24
M-72, 0.15 C, 1.0-1.3 Si, 23-25 Cr, 2 Al, bal Fe.
For corrosion resistant parts, corrosion resistant.

KRUPP WFM48.
M-72; 0.28-0.32 C, 2.2-2.5 Cr, 0.2 V, bal Fe.
For tools, dies.

KRUPP WFM961.
M-72, 0.43-0.48 C, 1.3-1.5 Cr, 0.2 V, bal Fe.
For tools, gears, springs; tough.

KRUPP WFM1041.
M-72, 0.47-0.55 C, 0.8-1.0 Mn, 1.2 Cr, 0.18 V, bal Fe.
For tools, springs, gears; shock resistant.

KRUPP WFM1141.
M-72, 0.55-0.62 C, 0.9-1.1 Mn, 1.2 Cr, 0.18 V, bal Fe.
For tools, gears, springs, shock resistant.

KRUPP WFP12.
M-72; 0.30-0.35 C, 1.3-1.5 Cr, 1-1.2 Al, bal Fe.
For tools, gears, shafts; oil hardening.

KRUPP WN48.
M-72; 0.28-0.33 C, 2.2-2.5 Cr, 0.2 V, bal Fe.
For tools, dies.

KRUPP WT10.
M-72; C, Si, Mn, bal Fe.

KRUPP WW.
M-72; 0.4 C, 0.01 Si, 0.14 Mn, 0.05 Cr, 0.15 Ni, bal Fe.
For tools, hubbing dies; case hardened.

KRUPP ZF.
M-72; 0.85 C, 0.25 max Si, 0.25 max Mn, bal Fe.
Heat treated: 190,000 TS; 145,000 YS; 10 El; 30 RA; 400 Brin.
For springs, taps, hobs, reamers, broaches; Type W1; water hardened.

KS 13.
English, 6-8 Sb, bal Al.
For bearings.

KS NO 83A.
M-196; Al alloy.
For light alloy parts.

K.S. NO. 245.
M-196; 14 Si, 4.5 Cu, 1.5 Ni, 0.7 Mg, 1.0 Mn, bal Al.
29,000 TS; 25,000 YS; 0.2 El, 130 Brin.
For pistons for small diesel motors and motorcycles, high wear resistance; coefficient of expansion 0.00002.

K.S NO 280.
M-196, 21 Si, 1.5 Cu, 0.7 Mn, 1.5 Ni, 0.5 Mg, 1.2 Co, bal Al
27,000 TS; 26,000 YS; 0.25 El; 120 Brin.
For pistons for air-cooled motors; coefficient of expansions 0.000018.

KS NO 280B.
M-196; Si, bal Al.
For light alloy parts; corrosion resistant

KS NO 282
M-196; 23-25 Si, 0.8-1.3 Cu, 0.8-1.3 Ni, 0.2 Ti, 0.2 Mn, 0.3-0.5 Co, 0.7 Fe, 0.2 Zn, 0.8-1.3 Mg, bal Al
For pistons in internal combustion engines
Medium thermal stressing, corrosion resistant

KS NO 283
M-196, 17-19 Si, 4.7-5.3 Cu, 3.8-4.2 Ni, 0.1 Ti, 0.6-0.8 Mn, 0.5-0.7 Co, 0.7 Fe, 0.2 Zn, 0.4-0.6 Mg, bal Al
For pistons in internal combustion engines.
High thermal stressing, corrosion resistant.

KS NO. 411B
M-196, Si, bal Al
For light alloy parts, corrosion resistant

KS NO 837
M-196, Si, bal Al
For light alloy parts, corrosion resistant.

KS NO 1275.
M-196; Si, Cu, Ni, bal Al.
For light alloy parts; corrosion resistant

K.S. 1275 KOLBENLEG.
English; 1 Mg, bal Al.
For light alloy parts; corrosion resistant.

K.S. ALUSIL.
M-196; 20 Si, 1.5-2.0 Cu, 0.5 Ni, bal Al.
23,000 TS; 21,000 YS; 0.25 El; 100 Brin.
For pistons for general use; low temperature coefficient; coefficient of expansion 0.000018.

K.S MAGNET STEEL.
Japan; 30-40 Co, 1.5-3.0 Cr, 5-9 W, 0.35 Mn, 0.12 Si, 0.4-0.8 C, bal Fe.
Hardened: 444-652 Brin.
For tools, magnets; corrosion and heat resistant; Br 10000-10500: Hc-200-240.

K.S. MAGNET STEEL.
Japan; 0.7-1.0 C, 6-8 W, 1-2 Co, bal Fe.
For magnets, magnetos; high permeability.

K-SPUN.
M-399; 2.85-3.50 T.C., 0.95-1.45 Si, 0.4-0.8 Mn, bal Fe.
Heat treated: 70,000 TS; 285 Brin.
For piston rings, cylinder liners; wear resistant cast iron.

K.S. RED.
English; 16.5 Cu, 0.8 Ni, 0.5 Fe, 0.5 Si, bal Al.
For pistons; cast.

K.S. SEEWASSER.
M-196, M-116; 1.3 Mn, 2.2 Mg, 0.2 Sb, 0.7 Si, bal Al.
Sand cast: 26,000 TS; 12,800 YS; 2.5 El; 5 RA; 60 Brin.
Die cast: 32,720 TS; 12,800 YS; 1.6 El; 81 Brin.
Rolled: 45,500 TS; 36,000 YS; 2 El; 35 RA; 83 Brin.
For furniture, interior light fixtures, wire castings, ship parts, chemical industry; light alloy; resists sea water corrosion

K.S. SEEWASSER JUB.
Japan; Al alloy.
For light alloy parts.

K.S. SPECIAL PISTON ALLOY.
M-196; 15 Cu, 0.6 Si, 0.6 Fe, 0.6 Ni, 0.3 Mg, bal Al.
26,000 TS; 0.2 El; 120 Brin.
For pistons for Zeppelin motors and diesel engines; coefficient of expansion 0.000024.

KSS SUPRA
M-459; 0.95-1.05 C, 0.20-0.35 Si, 0.10-0.30 Mn, bal Fe
Water hardened: 215,000 TS; 187,000 YS; 9 El; 24 RA; 400 Brin
Annealed: 88,000 TS; 53,000 YS; 19 El; 187 Brin.
For cold heading and forming dies, pneumatic hammers, drills, reamers.
Type W3, water hardening

KSS SUPRA.
M-459, 0.95 C, 0.4 V, bal Fe.
For punches, taps, cutting tools, drills; Type W2, water hardened.

K.S "Y" ALLOY.
M-196, 4 Cu, 0.4 Si, 2 Ni, 0.4 Fe, 1.5 Mg, bal Al
35,000 TS; 28,500 YS, 1.0 El; 90 Brin
For pistons for steam engines; coefficient of expansion 0.0000245.

K-TEN 60.
M-1604, 0.14 C, 0.38 Si, 1.26 Mn, 0.015 P, 0.010 S, 0.20 Ni, 0.05 Mo, 0.04 V, bal Fe
32 mm thick plate: 94,000 TS; 78,000 YS; 45 El.
High strength low alloy steel for structural purposes

K-TEN 70
M-1604, 0.12 C, 0.31 Si, 1.03 Mn, 0.013 P, 0.010 S, 0.21 Cu, 0.62 Ni, 0.31 Cr, 0.33 Mo, 0.24 V, bal Fe
50 mm thick plate: 110,000 TS; 99,000 YS; 27 El.
High strength low alloy steel for structural purposes.

K-TEN 80.
M-1604; 0.13 C, 0.32 Si, 0.86 Mn, 0.009 P, 0.010 S, 0.24 Cu, 0.92 Ni, 0.45 Cr, 0.40 Mo, 0.03 V, 0.002 B, bal Fe.
50 mm thick plate: 118,000 TS; 110,000 YS; 44 El.
High strength low alloy steel for structural purposes

KU-112.
M-1517; 90 W, bal Ni-Cu.
Density 17; 110,000 TS; 70,000 YS; 5 El; C 25 Rock.
High density alloy for counterweights, balancing and shielding applications.

KU-112-18.
M-1517; 95 W, bal Ni-Cu.
Density 18; 105,000 TS; 90,000 YS; 3 El; C 28 Rock.
High density alloy for counterweights, balancing and shielding applications.

KU A-5.
M-1517; 95 W, bal Ni-Fe.
Density 18; 120,000 TS; 92,000 YS; 12 El; C 30 Rock.
High density alloy for counterweights, balancing and shielding applications.

KU A-10.
M-1517; 90 W, bal Ni-Fe.
Density 17; 125,000 TS; 90,000 YS; 15 El; C 27 Rock.
High density alloy for counterweights, balancing and shielding applications.

KUBAX.
M-912; 1.2-1.3 C, 0.1-0.2 Cr, 0.15-0.25 V, bal Fe.
For tools, dies, drills; oil hardening.

KUFIL.
M-282; 99 Cu, 1 Ag.
Welded: 29,000 TS
For welding rod for Cu; free flowing

KUHBIER A12.
M-1327; 0.10 max C, 12.5 Cr, 12 Ni, bal Fe
For chemical plant equipment, valves; heat and corrosion resistant.

KUHBIER A18.
M-1327; 0.15 max C, 18 Cr, 9 Ni, bal Fe.
Annealed: 80,000 TS; 35,000 YS; 55 El, 75 RA, 150 Brin.
For chemical plant equipment, tanks; Type 302, stainless, austenitic

KUHBIER F13.
M-1327; 0.12 max C, 0.4 Si, 13 Cr, bal Fe.
Annealed: 75,000 TS, 40,000 YS, 35 El; 70 RA; 155 Brin.
For valves, cutlery, surgical instruments; Type 410; stainless.

KUHBIER F17.
M-1327; 0.8 C, 17 Cr, bal Fe.
Annealed: 107,000 TS; 62,000 YS, 18 El, 35 RA; 220 Brin.
For bearings, instrument pivots, liners; corrosion resistant, hardenable.

KUHBIER F17A.
M-1327; 0.12 C, 16.5 Cr, 0.25 Mo, 0.2 S, bal Fe.
Annealed: 80,000 TS; 50,000 YS; 20 El, 40 RA; 150 Brin.
For screw machine products, shafts; free-cutting; Type 430 Mo; corrosion resistant.

KUHBIER F17T.
M-1327; 0.1 max C, 17.5 Cr, Ti = 7 × C, bal Fe.
Annealed: 80,000 TS; 50,000 YS; 25 El; 50 RA; 150 Brin.
For oil refinery equipment, welded structures; corrosion and creep resistant.

KUHBIER F19T.
M-1327; 0.1 max C, 17 Cr, 1.8 Mo, Ti = 7 × C, bal Fe.
Annealed: 125,000 TS; 95,000 YS; 20 El; 55 RA; 260 Brin.
For oil refinery equipment, welded structures; corrosion and creep resistant

KUHBIER I
M-1327; 0.15 C, 24 Cr, 19 Ni, bal Fe.
Annealed: 100,000 TS; 45,000 YS, 50 El; 65 RA; 185 Brin.
For furnace parts, heat treat boxes; heat resistant, austenitic.

KUHBIER IA.
M-1327; 0.15 C, 19.5 Cr, 9.5 Ni, bal Fe.
Annealed: 80,000 TS; 35,000 YS; 55 El; 75 RA; 150 Brin
For chemical plant equipment, tanks, vessels; Type 302; stainless, austenitic.

KUHBIER M13
M-1327; 0.2 C, 0.4 Si, 13 Cr, bal Fe
Annealed: 95,000 TS, 50,000 YS; 25 El; 55 RA; 195 Brin.
For turbine blades, valves, cutlery, surgical instruments, Type 420, stainless.

KUHBIER M13.4
M-1327; 0.4 C, 0.4 Si, 13 Cr, bal Fe.
Annealed: 100,000 TS, 55,000 YS; 20 El; 50 RA; 210 Brin.
For surgical instruments, valves, cutlery, knives, Type 420; stainless

KUHBIER M15
M-1327, 0.20 C, 0.4 Si, 13 Cr, 1.15 Mo, bal Fe
Annealed: 100,000 TS, 55,000 YS; 20 El; 50 RA, 210 Brin
For turbine blades, valves, cutlery, knives, Type 420 Mo, stainless

KUHBIER M18.
M-1327, 0.22 C, 0.4 Si, 17 Cr, 1.5 Ni, bal Fe.
Annealed: 125,000 TS, 95,000 YS, 20 El, 55 RA; 260 Brin
For pumps, marine hardware, valves, gauges; Type 431, corrosion and heat resistant

KUHBIER M18.9
M-1327, 0.90 C, 18 Cr, 1.15 Mo, 1.0 V, bal Fe
Annealed: 110,000 TS, 65,000 YS; 17 El, 32 RA, 230 Brin.
For cutlery, valves, bearings, surgical instruments; corrosion and wear resistant

KUHBIER M19
M-1327, 0.35 C, 16.5 Cr, 1.15 Mo, bal Fe.
For chemical plant and oil refinery equipment, corrosion and heat resistant.

KUHNE PHOSPHOR BRONZE
Eng., 78 Cu, 11 Sn, 10 Pb, 0.3 Ni, 0.6 P.
For hard bearings, heavy duty

KUKI EXTRA MH
M-1320, 1.1 C, 0.25 max Si, 0.25 max Mn, bal Fe
Annealed: 100,000 TS, 53,000 YS; 21 El, 42 RA; 200 Brin
For drills, hobs, taps, springs; Type W1, water hardened.

KUKI EXTRA ZAH.
M-1320; 0.85 C, 0.25 max Mn, 0.25 max Si, bal Fe.
Heat treated: 190,000 TS; 145,000 YS, 12 El; 35 RA, 320 Brin
For drills, punches, cutters, springs; Type W1; water hardened.

KUKI EXTRA ZH.
M-1320; 1.0 C, 0.25 max Si, 0.25 max Mn, bal Fe.
Annealed: 100,000 TS; 53,000 YS; 21 El; 42 RA; 200 Brin.
For drills, taps, reamers, cutting tools; Type W1; water hardened.

KUKI PRIMA H.
M-1320; 1.3 C, 0.25 max Si, 0.25 max Mn, bal Fe.
For cutters, reamers, broaches; Type W1; water hardened.

KUKI PRIMA MH.
M-1320; 1.15 C, 0.25 max Mn, 0.25 max Si, bal Fe.
Annealed: 110,000 TS; 55,000 YS; 20 El; 40 RA; 210 Brin.
For cutters, hobs, reamers, broaches; Type W1; water hardened.

KUKI PRIMA ZAH.
M-1320; 1.0 C, 0.25 max Si, 0.25 max Mn, bal Fe.
Annealed: 100,000 TS; 53,000 YS; 21 El; 42 RA; 200 Brin.
For cutters, hobs, reamers, broaches; Type W1; water hardened.

KUKI PRIMA ZH.
M-1320, 0.85 C, 0.25 max Si, 0.25 max Mn, bal Fe.
Heat treated: 190,000 TS; 145,000 YS; 12 El; 45 RA; 330 Brin.
For cutters, tools, springs, punches, drills; Type W1; water hardened.

KUKI PRIMA ZW.
M-1320; 0.70 C, 0.25 max Si, 0.25 max Mn, bal Fe.
Heat treated: 175,000 TS; 128,000 YS; 12 El; 37 RA; 355 Brin
For punches, crimpers, springs; Type W1; water hardened.

KUKI SPEZIAL H.
M-1320; 0.90 C, 0.25-0.50 Si, 0.3-0.8 Mn, bal Fe.
Heat treated 190,000 TS; 145,000 YS; 10 El; 30 RA, 400 Brin.
For punches, crimpers, drills, springs; Type W1; water hardened

KUKI SPEZIAL MH.
M-1320; 0.75 C, 0.4 Si, 0.6 Mn, bal Fe.
Heat treated: 175,000 TS, 130,000 YS; 12 El; 36 RA; 355 Brin.
For punches, drills, springs, crimpers; Type W1; water hardened.

KUKI SPEZIAL ZAH.
M-1320, 0.67 C, 0.4 Si, 0.6 Mn, bal Fe.
Heat treated 170,000 TS, 125,000 YS; 15 El; 38 RA; 350 Brin.
For punches, springs, crimpers; Type W1; water hardened

KUKI SPEZIAL ZH.
M-1320; 0.6 C, 0.3-0.5 Si, 0.5-0.8 Mn, bal Fe.
Heat treated: 160,000 TS, 113,000 YS; 12 El; 40 RA; 325 Brin.
For punches, crimpers; water hardened.

KUKI SPEZIAL ZW.
M-1320; 0.45 C, 0.4 Si, 0.6 Mn, bal Fe.
Hot rolled: 98,000 TS; 59,000 YS; 24 El; 45 RA; 212 Brin.
For gears, shafts, crankshafts; water hardened.

KULGRID 28.
M-963.
For high temperature wire; heat resistant to 1100°F.

KULGRID "C."
M-856, M-796; Ni clad Cu.
For lead-in wires for vacuum tubes; resists high temperatures.

KULITE KLT-115.
M-1517; Pb, W.
Sintered: 18,000-20,000 TS; 200-280 Brin.
For shielding for nuclear materials; high density.

KUMANAL.
M-282; 88 Cu, 10 Mn, 2 Al.
Annealed: 50,000 TS; 30 El; 73 Brin.
For resistance wire, instrument shunts; low temperature coefficient.

KUMANIC.
M-282; 60 Cu, 20 Mn, 20 Ni.
Annealed: 70,000 TS; 21,000 YS; 35 El; 97 Brin.
Heat treated: 155,000 TS; 130,000 YS; 2 El; 320 Brin.
For springs, contacts; corrosion resistant.

KUMIUM.
M-282; 99.5 Cu, 0.5 Cr.
Annealed: 33,600 TS; 6700 YS; 60 El; 59 Brin.
Heat treated. 70,000 TS; 60,000 YS; 14 El; 127 Brin.
For welding tips, electrical contacts; hardenable, high conductivity.

KUNHEIM METAL.
Germ.; hydrides of Misch metal, 36 Ce, 49 La, 10 Di, 1 Mg
For cigarette lighters; pyrophoric.

KUNHEIM METAL.
Germ.; 86 rare earths, 12 Mg, 2 Al.
For cigarette lighters.

KUNIAL ALLOYS.
M-282, Cu-Zn alloys.
For engineering applications; can be heat treated.

KUNIAL BRASS.
M-282a; 72.5 Cu, 6 Ni, 1.5 Al, bal Zn.
Heat treated: 108,000 TS, 81,000 YS; 11 El; 240 Brin.
For nuts, bolts, valves, primers, fuse bodies, keys, springs; hardened and strengthened by heat treatment.

KUNIAL BRONZE.
M-282; Sn, bal Cu.
For hardware, plumbing, pipes; tough.

KUNIAL COPPER.
M-282, 90 Cu, Ni, Al.
For general use, tubes, wire, plate, sheets; temper hardening.

KUNIAL NICKEL SILVER.
M-282; Ni, Zn, bal Cu.
For hardware, utensils; corrosion resistant.

KUNIFER 5.
M-282; 5 Ni, 1 Fe, bal Cu.
Annealed 40,000-45,000 TS; 20,000-25,000 YS; 50-40 El; 68-80 Brin.
For marine equipment, hardware, fasteners; corrosion resistant.

KUNIFER 10.
M-282; 10 Ni, 90 Cu.
Annealed: 45,000 TS; 22,400 YS; 55 El; 90 Brin.
½ Hard: 62,000 TS; 45,000 YS; 25 El; 110 Brin.
Hard: 83,000 TS; 81,000 YS; 15 El; 190 Brin.
For condenser tubes; corrosion resistant, no season cracking.

KUNIFER 30.
M-282; 30 Ni, 1 Mn, 1 Fe, bal Cu.
Annealed: 63,000 TS; 25,000 YS; 55 El; 100 Brin.
½ Hard: 75,000 TS; 42,000 YS; 25 El; 150 Brin.
Hard: 100,000 TS; 94,000 YS; 10 El; 210 Brin.
For condenser tubes; corrosion resistant, no season cracking.

KUNIFER 30A.
M-282; 66 Cu, 30 Ni, 2 Mn, 2 Fe.
For condenser tubes; corrosion resistant.

KUPFER-NICKEL 54/45.
M-297; 54 Cu, 45 Ni.
For electrical resistances; constantan.

KUPFER-NICKEL 67/30/3.
M-297; 67 Cu, 30 Ni, 3 Mn.
For electrical resistances.

KUPFERNICKEL 75/25.
M-297; 25 Ni, 75 Cu.
Annealed: 45,000 TS, 18,500 YS; 42 El; 62 Brin.
For coinage; corrosion resistant.

KUPFERNICKEL 80/20.
M-297, 80 Cu, 20 Ni.
Rolled: 62,500 TS; 59,700 YS; 12 El; 120 Brin.
Annealed: 45,500 TS, 17,100 YS; 41 El; 64 Brin.
For condenser tubes; corrosion resistant.

KUPFER-SILUMIN.
M-299; 12 Si, 0.8 Cu, 0.3 Mn, bal Al.
Sand cast. 25,000 TS; 14,000 YS; 2-4 El; 60 Brin.
For wheels, rolls, engine blocks, motor housing; high fluidity.

KUPRODUR
Germ.; 0.5 Si, 0.7 Ni, bal Cu.
For staybolts, propeller parts; age-hardenable, corrosion resistant.

KUROMI.
Jap., Cu + Sn + Co. Japanese alloy.

KUTERN.
M-282; 99.5 Cu, 0.5 Te
Annealed: 33,600 TS, 5500 YS, 50 El; 48 Brin.
For machined parts; free-cutting.

KUTHERM see IMI 575 KUTHERM.

KUT KAST.
M-797; 0.7 C, 1.5 B, 18 W, 4 Cr, 1 V, bal Fe.
For tools, dies, tipped tools, high speed steel.

KUT KOST.
M-797; C, W, Cr, V, bal Fe.
For tipped tools and cutters; high speed steel

KUT KOST GRADE V.
M-797; C, W-Co-1.5 B, bal Fe.
For tools, cutters; for heavy cuts.

KUT KOST GRADE X
M-797; C, W-Co-1.5 B, bal Fe
For tools, cutters, centrifugally cast

KUT KOST GRADE XV.
M-797; C, W, Co, 1.5 B, bal Fe
For tools, cutters; centrifugally cast.

KUT KOST GRADE XX.
M-797; W, Co, 1.5 B, bal Fe.
For tools, cutters; light cuts.

KUTKWIK.
M-357; 0.8 C, 18 W, 4 Cr, 1 V, bal Fe.
For cutting tools, broaches; high speed steel.

K-V7.
M-Russia; 0.10-0.15 C, 10.5-12.5 Cr, 0.6-0.8 Mo, 0.8 max Ni, 0.2-0.3 V, 3.7-4.3 W, bal Fe.
Annealed: 85,000 TS; 45,000 YS; 20 El. B 95 Rock.
For cutlery, surgical instruments, chemical plant equipment. Corrosion resistant.

KWIK-KUT.
M-207; 1.1 C, 0.5 Cr, bal Fe.
For hollow drills; fatigue resistant.

KXA STEEL.
M-1525; C, Cr, Mo, bal Fe.
For die casting machine parts, plungers; oil hardened.

KYNAL C65.
M-282, 4 Cu, 0.6 Mn, 0.7 Fe, 0.5 Si, bal Al.
Heat treated: 56,000-60,500 TS; 40,500-49,000 YS; 10-6 El; 100 Brin.
For aircraft construction; age-hardened, high strength

KYNAL C66.
M-282, 4 Cu, 0.85 Si, 0.85 Mg, 1.2 Mn, bal Al.
Heat treated: 56,000-62,700 TS; 33,600-51,500 YS; 15-8 El; 120-150 Brin
For aircraft construction, age-hardened, high strength

KYNAL C 67
M-282, 4 Cu, Mn, Si, Mg, bal Al.
H T Temper 63,840 TS, 39,200 YS, 15 El; 138 Brin
For high strength applications, hardenable.

KYNAL C69
M-282, 1-2 Cu, 0.5-1.25 Mg, 1 Si, 1 Mn, bal Al.
Heat treated 38,100-52,000 TS, 29,100-41,000 YS; 15-6 El, 105 Brin
For aircraft construction, age-hardened, high strength

KYNAL C70
M-282, 2.5-4.0 Cu, 0.25-0.75 Mg, 0.3-1.0 Sb, bal Al
Rolled 36,000 TS, 15,700 YS, 10 El
For fuel caps, structures, free-cutting

KYNAL C71
M-282, 1.3-3.0 Cu, 0.2-0.5 Mg, 0.1-0.5 Sn, bal Al
Heat treated 38,000 TS
For rivets, structural members, heat treatable

KYNALCORE C65A.
M-282, 3.5-5.0 Cu, 0.4-1.2 Mg, 0.4-1.2 Mn, 0.3 Ti, 0.7 Fe, bal Al
Heat treated 54,000 TS, 31,500 YS, 15 El
For structural members, heat treatable, Al-clad.

KYNALCORE C66A
M-282; 3.5-4.8 Cu, 0.8 Mg, 0.9 Si, 1 Fe, 1.2 Mn, 0.3 Ti, bal Al
W-temper 53,800 TS, 31,400 YS, 15 El.
WP-temper: 58,200 TS, 44,800 YS, 8 El
For structural members, age-hardened, Al-clad.

KYNALCORE C68A.
M-282, 4.4 Cu, 0.6 Mg, 0.7 Si, 0.6 Mn, bal Al.
T4-temper: 56,000 TS, 33,000 YS; 15 El.
T6-temper 60,100 TS, 47,000 YS; 8 El.
For aircraft structures; Al-coated.

KYNALCORE Z93A
M-282, 1.5 max Cu, 2.0-3.5 Mg, 4.5-6.5 Zn, 0.8 Mn, bal Al.
Heat treated. 74,000 TS; 62,700 YS; 9 El; 170 Brin
For structural members; heat treatable, Al-clad.

KYNALCORE Z93C.
M-282; 1.5 Cu, 2.0-3.5 Mg, 0.5 Si, 0.5 Fe, 4.5-6.5 Zn, 0.2 Ti, bal Al.
WP-temper: 72,000 TS; 60,000 YS; 8 El.
For structural members; age-hardened, high strength.

KYNAL M33.
M-282; 0.9-1.1 Mg, 0.05 max Cu, 0.05 max Mn, bal Al.
Soft: 17,000 TS; 7500 YS; 22 El.
½ H-temper: 25,000 TS; 20,000 YS; 4 El.
H-temper: 29,200 TS; 29,200 YS; 2 El.
For medium strength structures; good ductility and drawability.

KYNAL M 35/1.
M-282; 2 Mg, 0.5 Mn, bal Al.
Annealed: 24,650 TS; 13,400 YS; 18 El; 45 Brin.
Hard: 33,600 TS; 26,880 YS, 5 El; 67 Brin.
For medium strength applications; good ductility and corrosion resistance.

KYNAL M 35/2.
M-282; 3 Mg, 1 Mn, bal Al
Annealed. 31,360 TS, 15,680 YS; 18 El; 50 Brin.
Hard: 40,320 TS; 33,600 YS; 5 El, 75 Brin.
For medium strength applications; good ductility and corrosion resistance.

KYNAL M35/3.
M-282; 3.75-4.25 Mg, 0.6 max Si, 0.7 max Fe, 0.2 max Ti, bal Al.
Soft. 38,000 TS, 15,700 YS.
For marine applications; corrosion resistant.

KYNAL M 36.
M-282; 5 Mg, 1 Mn, bal Al.
Annealed 38,000 TS; 17,920 YS, 18 El; 55 Brin.
Hard. 44,800 TS; 38,080 YS; 5 El; 80 Brin
For marine parts, good corrosion resistance.

KYNAL M 37
M-282, 7 Mg, 1 Mn, bal Al
Annealed 49,300 TS, 20,200 YS, 20 El, 60 Brin.
For marine parts, corrosion resistant.

KYNAL M39.
M-282, 0.7-1.0 Si, 0.5-1.0 Mg, bal Al
Soft 16,000 TS, 25 El
Heat treated. 38,000 TS, 31,000 YS, 10 El.
For brazing alloy, heat treatable

KYNAL M39/1
M-282, 0.4-1.5 Mg, 0.3-0.7 Si, bal Al.
Heat treated 33,600-38,100 TS; 20,400-31,600 YS, 22-14 El, 65-80 Brin.
For aircraft construction, corrosion resistant, age-hardened.

KYNAL M39/2
M-282, 0.5-1.0 Mg, 0.7-1.3 Si, 1.0 Mn, 0.6 Fe, 0.2 Ti, bal Al
Heat treated 33,600-44,800 TS; 20,200-41,500 YS, 22-10 El; 64-95 Brin.
For aircraft construction; corrosion resistant, age-hardened

KYNAL M40.
M-282, 0.15-0.40 Cu, 0.2-0.8 Mn, 0.8-1.2 Mg, 0.4-0.8 Si, 0.7 max Fe, bal Al.
Heat treated. 36,000-41,000 TS; 30,000-34,000 YS, 14-7 El.
For structural members, heat treatable, corrosion resistant.

KYNAL M41.
M-282; 0.4-1.5 Mg, 0.6-1.3 Si, 0.2 max Ti, 0.5 max Cr, bal Al.
Heat treated: 36,000-41,000 TS; 30,000-34,000 YS; 14-7 El.
For light alloy parts; heat treatable, corrosion resistant.

KYNAL P1.
M-282; 99.99 Al.
Soft: 8950 TS; 45 El.
½ H-temper: 13,000 TS; 12 El.
H-temper: 14,500 TS; 6 El.
For heat and light reflectors; corrosion resistant and ductile.

KYNAL P3.
M-282; 99.8 Al, 0.02 max Cu, 0.15 max Si, 0.15 max Fe.
Soft: 10,000 TS.
½ H-temper: 16,000 TS.
H-temper: 18,000 TS.
For heat and light reflectors; corrosion resistant and ductile.

KYNAL P 5.
M-282; 99.6 min Al.
Annealed: 11,200 TS; 40 El, 21 Brin.
Hard: 19,000 TS, 7 El, 38 Brin.
For chemical plant equipment; high resistance to corrosion.

KYNAL P10.
M-282, 0.1 Cu, 0.5 Si, 0.7 Fe, 0.1 Mn, bal Al.
Soft. 12,300 TS; 7500 YS; 35 El; 21 Brin.
Hard: 20,100 TS, 16,000 YS, 5 El; 38 Brin.
For trim, architectural applications; good ductility.

KYNAL-PA15.
M-282; 9-14 Si, 0.1 Cu, 0.6 Fe, 0.5 Mn, bal Al.
O-Temper: 18,000 TS, 30 El.
H-Temper 27,000 TS; 7 El.
For low and medium strength parts Good formability and weldability.

KYNAL PA16.
M-282, 4.0-5.5 Si, 0.1 Cu, 0.6 Fe, 0.5 Mn, bal Al.
Sand cast 18,000 TS; 9000 YS, 6 El; 40 Brin.
Permanent mold: 24,000 TS, 9000 YS, 9 El; 45 Brin.
For instrument housings, intricate castings; corrosion resistant, weldable.

KYNAL PA17.
M-282; 7-8 Si, 0.6 max Fe, bal Al.
For welding rod; corrosion resistant.

KYNAL PA 19
M-282; 1.25 Mn, bal Al.
Annealed: 15,680 TS; 25 El; 28 Brin.
Hard: 24,700 TS, 5 El; 47 Brin.
For cold formed and welded parts; corrosion resistant parts.

KYNAL PA20
M-282, 0.9-1.1 Zn, bal Al
For cladding sheet for Z93A alloy.

KYNAL S57
M-282, 0.7-1.3 Cu, 0.8-1.5 Mg, 10.5-13.5 Si, 0.7-1.3 Ni, bal Al.
Heat treated. 40,000 TS; 3 El.
For medium strength applications; heat treatable, corrosion resistant.

KYNAL Y88.
M-282, 1.5-4.0 Cu, 0.3-1.5 Mg, 0.5-1.3 Si, 0.6-1.5 Fe, 2 Ni, 0.3 Ce, 0.3 Ti, bal Al.
Heat treated: 60,500 TS; 47,100 YS; 10 El; 130 Brin.
For aircraft construction, pistons, cylinder heads; age-hardenable.

KYNAL Y89.
M-282; 1.5-3.0 Cu, 1.2-1.8 Mg, 0.55-1.25 Si, 0.5-1.5 Ni, 0.2 Ti, bal Al.
WP-temper: 58,000-60,500 TS; 44,800-47,500 YS; 10-8 El.
Forgings for high temp. applications; age-hardened, high strength.

KYNAL Y90.
M-282; 1.8-2.8 Cu, 0.6-1.2 Mg, 0.5-1.3 Si, 0.6-1.2 Fe, 0.6-1.4 Ni, bal Al.
Heat treated: 61,000 TS; 47,000 YS; 10 El.
For rivets, forgings; age hardenable.

KYNAL Y92.
M-282; 3.5-4.5 Cu, 1.2 Mg, 0.6 Si, 0.6 Fe, 2.1 Ni, 0.3 Ti, bal Al.
Heat treated: 51,500 TS; 31,400 YS; 8-15 El; 115 Brin.
For pistons, cylinder heads; age-hardenable.

KYNAL Z93.
M-282; 1.5 max Cu, 3 Mg, 0.6 Si, 0.6 Fe, 0.8 Mn, 4.5-6.5 Zn, bal Al.
Heat treated: 74,000 TS; 62,700 YS; 9 El; 170 Brin.
For aircraft construction; age-hardenable.

KYNAL Z93/1.
M-282; 3 max Cu, 4 max Mg, 4.0-8.5 Zn, bal Al.
Heat treated: 78,500 TS; 67,200 YS; 5 El.
For structural members; heat treatable.

L2 ALLOY.
M-Russia; 89.2 WC, 8 Co, 2 TaC, 0.8 Cr_2O_3.
Sintered: Tr.S. 165,000; Rock A 90.
For cutting tools to machine cast iron, high alloy steels, hard plastics.
Sintered carbide, wear resistant.

L 5.
M-137; 12.5-14.5 Zn, 2.5-3.0 Cu, 0.8 max Fe, 0.7 max Si, 0.2 max Ti, bal Al.
Cast: 20,000 TS; 11,000 YS; 4 El; 65 Brin.
For crankcases, gear boxes, fans, brackets; sand or permanent mold casting.

L 8.
M-137; 11-13 Cu, 0.8 max Fe, 0.7 max Si, 0.2 max Ti, bal Al.
Cast: 22,000 TS; 16,000 YS; 1.5 El; 80 Brin.
For carburetors, automobile pistons; high pressure castings.

L 11.
M-137; 6-8 Cu, 1.0 max Sn, 0.8 max Fe, 0.2 max Ti, bal Al.
Cast: 22,000 TS; 16,000 YS; 4 El; 60 Brin.
For gear boxes, cylinder heads; sand or permanent mold castings.

L-35.
M-40; 0.9 C, 0.4 Mn, 0.35 V, bal Fe.
For cold heading dies; water hardened.

LA 21.
Swiss; 6 Cu + Ni, Mn, Mg, Si, bal Al.
Cast: 60,000-89,000 TS; 56,000-80,000 YS; 3-1 El; 100-120 Brin.
Wrought: 63,000-76,000 TS; 44,000-60,000 YS; 4-2 El; 80-100 Brin.
For bearings.

LA 31.
Swiss; 8 Sn, Cu, Ni, Mg, bal Al.
Cast: 44,000-60,000 TS; 22,000-31,000 YS; 8-3 El; 40-55 Brin.
Wrought: 50,000-63,000 TS; 28,000-41,000 YS; 12-6 El; 45-60 Brin.
For bearings.

LA-685.
M-1520; Ni, bal Fe.
Rolled: 70,000 TS; 24,000 YS; 36 El; 68 RA.
For wave meter cavities, gauges, instruments, optical structures; low temperature coefficient.

LA BELLE 2-70.
M-38; 0.6 C, 2 Si, 0.8 Mn, bal Fe.
For punches, chisels, stamps; tough.

LA BELLE NO. 89 DIE.
M-38; 0.5 C, 4 Cr, 1 V, 0.5 Mo, bal Fe.
For forging mandrels, bolt and rivet dies; hot work steel.

LA BELLE NO. 211 DIE.
M-38; 0.5 C, 2.2 Ni, 0.7 Cr, 0.5 Mo, bal Fe.
For tools, hot work dies; oil hardened.

LA BELLE 1089.
M-38; 0.30 C, 2.25 Ni, 3 Cr, 10 W, bal Fe.
For hot work tools, gripper dies; hot work steel.

LA BELLE CCV.
M-38; 1.0 C, 0.2 V, 0.2 Cr, bal Fe.
For dies for plow bolts, square shoulder bolts; cold heading dies.

LA BELLE "C" & "H."
M-38; 0.5-0.8 C, 0.4 Ni, 0.2 Cr, 0.1 V, bal Fe.
For chipper knives; water hardening.

LA BELLE CHROMONIC.
M-38; 0.5 C, 1.25 Mn, 7 Cr, 1.5 Ni, Ni, 0.75 Mo, bal Fe.
For flying shears, billet shears; oil hardening.

LA BELLE COLD HEADER DIE.
M-38; 0.95 C, bal Fe.
For cold header dies; water hardening.

LA BELLE COLD STRIKING DIE.
M-38, 0.95 C, bal Fe.
For cold forging dies; water hardening.

LA BELLE CSD.
M-38; 0.95 C, bal Fe.
For dies for wheel bolts and single extrusion applications; cold heading dies.

LA BELLE EAGLE.
M-38; C, bal Fe.
For tools, cutters, drills, dies, hammers; water hardening.

LA BELLE EXTRA.
M-38, 0.95 C, bal Fe.
For cold work dies, cold forming dies; water hardened.

LA BELLE EXTRA 2½.
M-38; 0.95 C, bal Fe.
For dies for small rivets and non-ferrous specialties; cold heading dies.

LA BELLE EXTRA 3A.
M-38; 0.95 C, bal Fe
For small screw and bolt dies; cold heading dies.

LA BELLE EXTRA 3½.
M-38; 0.95 C, bal Fe
For dies for bolts; cold heading dies.

LABELLE HT.
M-38; 0.43 C, 1.3 Mn, 2.25 Si, 1.3 Cr, 0.3 V, 0.4 Mo, bal Fe.
Heat treated: 314,000 TS; 255,000 YS; 9 El; 29 RA; 560 Brin.
For shear blades, chisels, punches; oil hardened, shock resistant.

LA BELLE NICKEL MOLY.
M-38; 1.1 C, 0.5 Ni, 1.25 Mo, bal Fe.
For tools, dies; oil hardening.

LA BELLE SELFTEM.
M-38; 0.35 C, 0.8 Mn, 0.9 Cr, 0.5 Mo, bal Fe.
For chisels, shock tools; oil hardening.

LA BELLE SILICON 2.
M-38; 0.6 C, 0.8 Mn, 1.9 Si, 0.3 Mo, 0.25 Cr, bal Fe.
For punches, chisels, rivet sets; tough.

LA BELLE SPECIAL HOT DIE.
M-38; 0.4 C, 2.25 Cr, 2.5 Ni, bal Fe.
For hot heading dies; hot work steel.

LA BELLE STAMP.
M-38; 0.75 C, 0.95 Mn, 0.35 Mo, bal Fe.
For steel stamps; water hardening.

LA BELLE STRIKING DIE.
M-38; 0.95 C, bal Fe.
For cold forging dies; water hardening.

LA BELLE TNU.
M-38; 1.15 C, 0.65 Ni, 2 W, bal Fe.
For tools; oil hardening.

LA BOUR R-55.
M-263; 4 Si, 23 Cr, 6 Cu, 4 Mo, 2 W, 0.2-0.3 C, 52 Ni, 8 Fe.
For pump parts; modification of "R-50."

LAC 10.
M-137; 9.0-10.5 Cu, 0.15-0.35 Mg, 0.3-1.0 Fe, 0.6 max. Si, bal Al.
30,000-44,000 TS; 28,000-40,000 YS; 110-130 Brin.
For light alloy parts for high temperature service; hardenable.

LAC 10.
British; 0.15-0.35 Mg, 0.6 Si, 9-10.5 Cu, 0.6 Mn, 0.3-1.0 Fe, bal Al
For pistons, non-hardenable

LAC 112.
British; 0.3 Mg, 7-13 Si, 2-3 Cu, 0.5 Mn, 1.5 Ni, 1.2 Zn, bal Al
For die castings; high fluidity.

LAC 112A.
M-137; 0.75-2.5 Cu, 9-11.5 Si, bal Al.
For die castings

LAC 113A
British, 1.3 Si, 2.5-4.5 Cu, 1.0 Fe, 9-13 Zn, bal Al.
For sand castings; non-hardenable

LACOLITE.
M-1480, 3 C, Si, Mn, alloy, bal Fe.
For gears, shafts, machine tool parts; cast iron

LACTOVAC.
M-679, 0.2-0.5 C, bal Fe
For machinery parts, water hardening

LANDERIG'S SPECULUM
70 Cu, 30 Sn
For mirrors, reflectors; bronze.

LADISH D-6.
M-38; 0.42-0.48 C, 0.9-1.2 Cr, 0.4-0.7 Ni, 0.9-1.1 Mo, 0.05-0.10 V, bal Fe.
For solid fuel rocket motor cases; tough, shock resistant.

LADISH-D6AC
M-1527; 0.42-0.50 C, 0.6-0.9 Mn, 0.15-0.30 Si, 0.4-0.7 Ni, 0.9-1.2 Cr, 0.9-1.1 Mo, 0.05-0.15 V, bal Fe.
Vacuum melted.
High strength, good hardenability, tough.
For aircraft structural components, stone crusher bearings, shafts, gears, power shovel parts.

LADISH D-11.
M-1527; 0.42-0.50 C, 0.6-0.9 Mn, 0.25-0.45 Si, 0.4-0.7 Ni, 0.9-1.2 Cr, 1.9-2.15 Mo, 0.45-0.6 V, bal Fe.
Air or oil hardening; good high temp. strength.
For hot work tool and die applications.

LAFOND'S AXLE BEARING.
80 Cu, 18 Sn, 2 Zn.
For axle bearings; heavy duty

LAFOND'S HEAVY BEARING.
83 Cu, 15 Sn, 1.5 Zn, 0.5 Pb.
For heavy duty bearings; high strength.

LAFONDS MALLEABLE BRONZE.
France; 2 Sn, bal Cu.
For electrical equipment; corrosion resistant.

LAFONDS PUMP BRONZE.
France; 10 Sn, 2 Zn, bal Cu.
For pump parts, gears, worm wheels, shafts; tough, corrosion resistant.

LAGAL.
Germany, Al alloy.
For bearings; Zn-free.

LAGERBRONZE.
M-557; 4-5 Sn, 3.5-5.0 Zn, 3.5-4.5 Pb, bal Cu.
Cast: 50,000-58,000 TS; 50 El; 70-85 Brin.
For machine and engine parts; corrosion resistant bronze.

LAITON YELLOW BRASS.
Eng.; 70-60 Cu, 27-40 Zn, 5.3 Pb, 0-1 Sn.
For plumbing, hardware, bolts, nuts; free-cutting.

LAKE'S METAL.
87 Pb, 6 Sn, 7 Sb
For bearings for heavy loads; anti-friction.

LA-LED.
M-669; 0.08-0.13 C, 0.8-1.1 Mn, 0.2-0.3 Si, 0.15-0.35 Pb, bal Fe.
Drawn: 70,000 TS; 60,000 YS; 15 El; 45 RA; 140 Brin
For screw machine products; free-cutting, carburizing steel

LA-LED"X"
M-669; 0.15 C, 0.8-1.2 Mn, 0.04-0.09 P, 0.25 S, 0.15-0.35 Pb, Te, bal Fe.
Bar: 70,000 TS; 60,000 YS; 15 El; 45 RA; 140 Brin.
For screw machine products, fasteners, hardware
Free machining

LALL.
Swiss, Mg, Zn, bal Al.
Cast: 44,000-56,000 TS; 19,000-34,000 YS; 12-4 El; 35-45 Brin.
Wrought 44,000-60,000 TS; 19,000-28,000 YS; 22-14 El; 35 RA; 50 Brin
For bearings.

LANARK
M-73; 0.55 C, 0.2 Cr, 0.90 Mn, 0.3 V, 1.2 Mo, 1.9 Si, bal Fe
For chisels, punches, shear blades, stamps; shock resistant.

LANCASTER SILEXITE 55.
M-1165, C, Cr, Ni, bal Fe.
For pump shafts, valve parts; heat and corrosion resistant.

LAN-CER-AMP.
M-1213; 45-50 Ce, 30 min La, 20-24 Nd + Pr.
For alloying ferrous and nonferrous alloys.

LANGALLOY 1R.
M-1169; 0.5 max C, 14 Cr, 75 Ni, 8 Fe, 2.5 max Si, 0.7 max Mn.
For furnace equipment, salt pots, heat treating boxes; high heat resistance, good strength.

LANGALLOY 1 V.
M-1169; 0.2 C, 17.5-19.5 Cr, 10-12 Ni, Cb = 10 × C, bal Fe.
Sand cast: 70,000 TS; 30,000 YS; 20 El; 200 Brin.
For valves, pump parts, welded structures; stainless, austenitic, stabilized

LANGALLOY 2V.
M-1169; 0.12 max C, 10-12 Ni, 17.5-19 Cr, 2.75-4 Mo, 0.15-0.35 S, bal Fe.
For chemical equipment, welded acid resistant units; stainless, free-cutting.

LANGALLOY 3 V.
M-1169; 17.5-19.0 Cr, 10-12 Ni, 2.5-3.0 Mo, 0.2 C, bal Fe.
Sand cast: 70,000 TS; 30,000 YS; 15 El; 200 Brin.
For valves, pump parts, chemical plant equipment; Type 317, stainless, austenitic.

LANGALLOY 4R.
M-1169; 0.12 max C, 5 Fe, 0.75 Mn, 0.75 Si, 25-35 Mo, bal Ni.
Cast: 72,000-80,000 TS, 45,000-56,000 YS; 10-5 El; 200-250 Brin.
For chemical plant equipment, pumps, valves; corrosion resistant.

LANGALLOY 4V.
M-1169, 0.2-0.3 C, 10.5-12.5 Ni, 21.0-24.0 Cr, 2.0-3.0 W, bal Fe.
Cast: 78,500 TS; 33,000 YS; 20 El; 165-185 Brin.
For oil refinery cracking plant, gas turbine parts; stainless steel casting, heat and creep resistant.

LANGALLOY 5R.
M-1169; 5 Fe, 0.75 Mn, 0.75 Si, 15-18 Cr, 17 Mo, 5 W, bal Ni.
Cast: 72,000-80,000 TS; 45,000-56,000 YS; 12-8 El; 180-220 Brin.
For chemical plant equipment, pumps, valves; corrosion resistant.

LANGALLOY 5V.
M-1169; 0.12 C, 18 Cr, 14 Ni, 3 Mo, bal Fe.
Cast.
For specialized instrumentation applications; stainless, non-magnetic.

LANGALLOY 6R.
M-1169; 10 Si, 3 Cu, bal Ni.
Sand cast: 56,000-78,000 TS; 56,000-78,000 YS; 3-0 El; 350-400 Brin.
For valve cones and seats, pump parts; resists corrosion and erosion.

LANGALLOY-6V.
M-1169; 0.2 C, 13 Cr, bal Fe.
Cast: 80,000 TS; 54,000 YS; 20 El; 152-400 Brin.
For pump parts, valve bodies, trim, surgical instruments, bearings, bushings
Hardenable. Resistant to mild corrosives.

LANGALLOY 7R.
M-1169; 23 Cr, 6 Mo, 6 Cu, 5 Fe, 2 W, bal Ni.
Sand cast: 56,000 TS; 40,000 YS; 6 El; 180 Brin.
For valves, valve seats, pump parts; resists H_2SO_4 acids.

LANGALLOY 7V.
M-1169; 0.15 max C, 8 Ni, 18 Cr, 3 Mo, bal Fe.
For chemical plant equipment; acid resistant.

LANGALLOY 8R.
M-1169; 0.75 max C, 60 Ni, 15 Cr, 2 max Si,
For heat treating equipment, salt pots; high thermal fatigue and hot gas resistance.

LANGALLOY 8V.
M-1169; 0.15 max C, 8 Ni, 18 Cr, 3 Mo, S, bal Fe. 2 max Mn, bal Fe.
For chemical plant equipment; acid resistant, free-cutting.

LANGALLOY 9R.
M-1169; 0.5 max C, 37 Ni, 18 Cr, 3 max Si, 2 max Mn, bal Fe.
For heat treating equipment, furnace parts; good for cyclic heating up to 1100°C.

LANGALLOY 10V.
M-1169; 0.12 max C, 10 Ni, 18 Cr, bal Fe.
For chemical plant equipment at low temperature operation; stainless.

LANGALLOY 12V.
M-1169; 0.08 max C, 11 Ni, 18 Cr, 3.5 Mo, S, bal Fe.
For chemical plant equipment; acid resistant, free-cutting.

LANGALLOY 13V.
M-1169; 0.08 max C, 11 Ni, 18 Cr, 3.5 Mo, bal Fe.
For chemical plant equipment; acid resistant.

LANGALLOY 16V.
M-1169, 0.08 max C, 8 Ni, 18 Cr, 3 Mo, bal Fe.
For chemical plant equipment; acid resistant.

LANGALLOY 18V
M-1169; 0.08 max C, 8 Ni, 18 Cr, 3 Mo, S, bal Fe
For chemical plant equipment; acid resistant, free-cutting.

LANGALLOY 20V.
M-1169; 0.07 max C, 20 Cr, 29 Ni, 3 Mo, 1 Cb, bal Fe
For sulphuric acid equipment; stainless casting for H_2SO_4.

LANGALLOY 25V.
M-1169, 0.5 max C, 12 Ni, 25 Cr, 2 max Si, 2 max Mn, bal Fe
For superheaters in oil refineries, furnace parts, heat treating equipment; oxidation resistant to 1100°C, good hot strength

LANGALLOY 26V
M-1169, 0.35 max C, 12 Ni, 25 Cr, 1.75 max Si, 2 max Mn, bal Fe
For superheaters in oil refineries, furnace parts, heat treating equipment, oxidation resistant to 1100°C, good hot strength

LANZ CAST IRON
M-527, 3.4 C, 2.8 Si, 0.7 Mn, bal Fe.
56,500 TS, 26 El.
For housings, frames, gears, castings, high strength castings

LAPALLOY
M-114, 0.30 C, 1 Mn, 0.5 Si, 11.5 Cr, 2.75 Mo, 0.25 V, bal Fe.
At 70°F 155,000 TS, 140,000 YS; 17 El; 35 RA
At 1200°F 60,000 TS, 50,000 YS, 35 El, 85 RA.
For high temp. bolts, steam turbine buckets and blades, scale and oxidation resistant to 1400°F.

LAPCO
M-1481; Al alloy
For light alloy parts.

LAPELLOY
M-32, 0.25-0.35 C, 11-12 Cr, 2.5-3.0 Mo, 0.3 V, 0.5 max Ni, bal Fe.
At 20°F: 155,000 TS; 140,000 YS; 17 El; 35 RA.
At 1000°F 60,000 TS, 50,000 YS; 35 El; 85 RA.
For high temperature bolts, valve stems, turbine buckets and blades; scale and oxidation resistant to 1400°F.

LAPELLOY "C."
M-32; 0.20-0.25 C, 11-12 Cr, 2.5-3.0 Mo, 1.75-2.25 Cu, 0.1 N, bal Fe.
Heat treated: 135,000-203,000 TS; 105,000-170,000 YS; 18-17 El; 55-47 RA.
For turbine shafts, compression wheels and buckets; heat and oxidation resistant to 1400°F.

LARPORT.
M-1411; 0.3 C, 1.25 Cr, 0.3 Mo, 4.25 Ni, bal Fe.
For plastic mold dies; oil or air hardened, tough.

LA SALLE E.T.D. 150.
M-669; 0.4 C, Si, Mn, 1 Cr, 0.2 Mo, bal Fe.
Heat treated. 150,000 TS; 130,000 YS; 10-20 El; 35-45 RA; 302 Brin.
For gears, pinions, shafts, fasteners; preheat treated alloy steel.

LATROBE AGT.
M-73; 0.08-0.13 C, 3.0-3.5 Ni, 1.0-1.4 Cr, 0.08-0.15 Mo, bal Fe.
Rolled: 131,000 TS; 88,000 YS; 19 El; 61 RA; 269 Brin.
Normalized: 131,000 TS; 83,000 YS; 19 El; 58 RA; 269 Brin.
For gears, pinions, camshafts, crankshafts; case hardening, tough, shock resistant.

LATROBE BR-3.
M-73, 2.8 C, 5.2 Cr, 4.5 V, bal Fe.
For cold working dies; for cold working applications

LATROBE BR-4
M-73, 2.4 C, 12.75 Cr, 0.4 Mn, 4 V, 1.1 Mo, bal Fe
For shaving, stamping and deep draw dies; abrasion resistant.

LATROBE BR-4FM
M-73; 2.4 C, 12.75 Cr, 1.1 Mo, 4 V, 0.4 Mn, 0.15 S, bal Fe.
For stamping and deep drawing dies; oil hardened, non-deforming

LATROBE CI W NO 1.
M-73, 0.3 C, 9 W, 3.3 Cr, 0.5 V, bal Fe.
For hot headers, punches, extrusion rams and dies, oil hardened, hot work steel

LATROBE "EXTRA."
M-73, C, 0.2-0.35 Mn, bal Fe.
For taps, reamers, twist drills, shear blades, springs, tools; water hardening.

LATROBE GSN-FM
M-73; 2.2 C, 13 Cr, S, bal Fe.
For stamping and forming dies; oil hardened, non-deforming.

LATROBE MCH
M-73, 0.50 C, 1.0 W, 6.25 Mo, 3.75 Cr, 0.75 V, bal Fe
For hot shears and punches, extrusion dies and rams, hot work steel, oil hardened.

LATROBE MCL
M-73, 0.30 C, 1.0 W, 6.25 Mo, 3.75 Cr, 0.75 V, bal Fe
For extrusion dies and mandrels, hot punches, shears; hot work steel, oil hardened.

LATROBE SPECIAL
M-73; 0.7-1.2 C, bal Fe.
For general tools, drills, taps; water hardened, Type W1.

LATROBE VDC.
M-73, 0.4 C, 5 Cr, 1 Mo, 1 Si, 1 V, bal Fe.
For die casting dies and cores for Al and Zn; resists wash and heat checking.

LATROBE VDC-MF.
M-73; 0.4 C, 5 Cr, 1 Mo, 1 Si, 1 V, S, bal Fe.
For hot work tools, die casting dies; Type H13; resists heat checking.

LATTEN (Laiton)-1.
Eng; 70-60 Cu, 27-40 Zn, 5.3-0 Pb, 0-1 Sn.
For hardware, fixtures; yellow brass.

LATTEN (Laiton)-2.
Eng; 71 Cu, 28.53 Zn, 0.25 Pb, 0.02 Sn, 0.20 Fe.
Annealed: 56,000 TS; 45,000 YS; 35 El; 65 RA.
For hardware, fixtures; yellow brass.

LAUTAL-1.
M-116; 4.5-5.5 Cu, 0.2-0.5 Si, bal Al.
Wrought: 35,000-63,000 TS; 18,000-40,000 YS; 25-20 El; 65-110 Brin.
For aircraft construction; age-hardening.

LAUTAL-2.
M-116; 4.5 Cu, 0.75 Si, 0.75 Mn, bal Al.
Annealed: 23,000-35,000 TS; 7,000-12,000 YS; 20-12 El; 45-55 Brin.
For electric cables, light alloy.

LAVELSSIERE BRONZE.
61 Cu, 38 Zn, 1 Sn.
For condenser tubing, marine parts; corrosion resistant.

LAVIN 7A MANGANESE BRONZE.
M-801; 59 Cu, 0.75 Sn, 0.75 Pb, 1 Fe, 0.3 Mn, 1 Al, bal Zn.
Cast: 60,000 TS; 20,000 YS; 15 El; 80-95 Brin.
For valve stems, propellers, worm gears; corrosion resistant.

LAVIN 8A MANGANESE BRONZE.
M-801; 57 Cu, 1 Fe, 1 Al, 0.25 Mn, bal Zn.
Cast. 65,000 TS, 25,000 YS; 20 El; 90-120 Brin.
For valves, propellers, worm gears, valve stems; corrosion resistant

LAVIN 8C MANGANESE BRONZE.
M-801; 64 Cu, 3 Fe, 5 Al, 4 Mn, bal Zn.
Cast. 110,000 TS; 60,000 YS; 12 El; 190-235 Brin.
For screwdown nuts, gears, bridge parts; corrosion resistant.

LAVIN 9A ALUMINUM BRONZE.
M-801; 87.5 Cu, 3.5 Fe, 9 Al.
Cast: 65,000 TS, 25,000 YS; 20 El; 110-140 Brin.
For worm wheels, bearings, bushings; corrosion resistant

LAVIN 9B ALUMINUM BRONZE.
M-801; 89 Cu, 1 Fe, 10 Al.
Cast: 65,000 TS; 25,000 YS, 20 El, 110 Brin.
Heat treated. 80,000 TS; 40,000 YS; 12 El; 160 Brin
For valve seats, stripper nuts, gears; corrosion resistant, heat treatable.

LAVIN 9C ALUMINUM BRONZE.
M-801, 85 Cu, 4 Fe, 11 Al.
Cast: 75,000 TS; 30,000 YS, 12 El; 150 Brin.
Heat treated: 90,000 TS, 45,000 YS, 6 El; 190 Brin.
For worm wheels, pump parts, bushings; corrosion resistant, heat treatable

LAVIN 9D ALUMINUM BRONZE.
M-801; 81 Cu, 4 Ni, 4 Fe, 11 Al.
Cast 90,000 TS; 40,000 YS; 6 El; 190 Brin.
Heat treated: 110,000 TS; 60,000 YS; 5 El; 200 Brin
For worm wheels, pump parts, bushings; corrosion resistant, heat treatable.

LAVIN 10A NICKEL SILVER
M-801, 12 Ni, 20 Zn, 9 Pb, 2 Sn, 57 Cu.
Cast: 30,000 TS, 15,000 YS, 8 El, 50-60 Brin.
For hardware fittings, valves, plumbing; corrosion resistant.

LAVIN 10B NICKEL SILVER.
M-801; 16 Ni, 16 Zn, 5 Pb, 3 Sn, 60 Cu.
Cast: 35,000 TS; 17,000 YS; 15 El; 65-80 Brin.
For plumbers fittings, statuary, bolts; corrosion resistant.

LAVIN 11A NICKEL SILVER.
M-801; 20 Ni, 8 Zn, 4 Pb, 4 Sn, 64 Cu.
Cast: 30,000 TS; 17,000 YS; 8 El; 76-120 Brin.
For hardware, fittings, plumbing, valves; corrosion resistant.

LAVIN 11B NICKEL SILVER.
M-801; 25 Ni, 2 Zn, 1.5 Pb, 5 Sn, 66.5 Cu.
Cast: 45,000 TS; 22,000 YS; 15 El; 120-150 Brin.
For hardware and plumbing fixtures; corrosion resistant.

LAVIN CF NO. 4.
M-801; Cu alloy.
Deoxidizer for copper alloys; densifier.

LAVIN-NDZ BRONZE.
M-801; 5 max Zn, 5.5 max Ni, 5.5 max Fe, 2 max Al, 2 max Si, 0.25 max Pb, bal Cu.
Cast: 65,000-69,000 TS; 30,000-35,000 YS; 20-34 El; 17-31 RA, 123-134 Brin.
Heat treated: 78,900 TS; 63,400 YS; 5 El, 179 Brin.
For valve stems and bodies, valve bonnets, propeller wheels, marine outboard gears.
High corrosion resistance with good strength.

LAVIN NDZ-S BRONZE.
M-801; 5 max Zn, 5.5 max Ni, 5.5 max Fe, 2 max Al, 2 max Si, 0.25 max Pb, bal Cu.
Cast: 69,000-75,000 TS; 40,000-45,000 YS; 13-23 El; 10-20 RA; 143-149 Brin
Heat treated. 86,400 TS; 62,400 YS, 8 El; 196 Brin.
For valve stems and bodies, valve bonnets, propeller wheels, marine outboard gears.
High corrosion and dezincification resistance.
High yield strength.

LAVIN NSF NO. 5.
M-801; Cu alloy.
Degasifier for nickel-silver castings; densifier.

LAVIN SPECIAL.
M-801; Cu, Ni, Al, bal Zn.
Cast: 70,000-102,000 TS; 40,000-68,000 YS, 6-1 El; 165-227 Brin.
For neck rings and plungers for glass molding machines; high thermal conductivity.

LAWN MOWER.
M-357, 1.0 C, 1.15 Cr, bal Fe.
For lawn mower blades, oil hardening

LAWS PHOSPHOR BRONZE.
England; 9.5-11 Sn, 0.7-1.0 P, bal Cu.
For bearings, gears, bushings; heavy duty.

L. C. ELECTRITE DOUBLE SIX M-2.
M-73; 0.68 C, 4.1 Cr, 6.4 W, 5 Mo, 1.9 V, bal Fe.
For cold forming and working tools; oil hardening, high speed steel.

L.C.H.S. CHISEL.
M-261; C, alloy, bal Fe.
For tools, chisels, punches; tough.

"L.C." IRON.
M-664; 3.5 T.C., alloy, bal Fe.
Cast: 40,000 TS, 255 Brin.
For castings for high temperature service; Tr.S. 2800; Tr.D 210.

L.C.N.-155.
M-114; 0.08-0.16 C, 1-2 Mn, 20.0-22.5 Cr, 19-21 Ni, 18.5-21.0 Co, 2.5-3.5 Mo, 2-3 W, 0.75-1.25 Cb + Ta, 0.10-0.20 N_2, bal Fe.
Heat treated: 80,000-150,000 TS; 40,000-110,000 YS; 50-15 El; 55-20 RA.
For rotors, blades, bolts, buckets for gas engine and jet engines; high oxidation and heat resistance.

LCT.
M-38; 0.45 C, 3.0 Cr, 0.4 V, 15 W, bal Fe.
For hot swaging dies, extrusion dies, shear blades; hot work steel.

LCT NO 2.
M-38; 0.45 C, 3 Cr, 0.4 V, 11.5 W, bal Fe.
For brass forging dies, punches, forming rolls; hot work steel; Peerless LCT 2.

LEAD NO. 1 HARD.
M-88; 90 Pb, 10 Sb.
8,220 TS; 17 El; 17 Brin.
For type metal; M.P. 486°F.

LEAD NO. 1 HARD.
M-558; 99.25 Pb, 0.25 Cd, 0.5 Sb.
For valves, cocks, cable sheathing.

LEAD NO 2 HARD.
M-88, 85 Pb, 15 Sb.
9,000 TS, 11.7 El, 17 Brin.
For type metal; M.P. 476°F.

LEAD NO. 2 HARD
M-558, 98.25 Pb, 0.25 Cd, 1.5 Sn.
For valves, cocks, tank lining.

LEAD ALLOY
75 Sn, 20 Sb, 5 Pb.
For bearings, anti-friction

LEADBEATER BR.
M-1408; high C, med Cr, bal Fe.
For dies, oil hardened.

LEADBEATER L S.11
M-1408, 2.0 C, 12 Cr, bal Fe.
For blanking and wire drawing dies, press tools; oil hardened, non-deforming.

LEADBEATER L S 25
M-1408, C, W, bal Fe.
For hot heading, swaging and piercing dies; hot die steel, shock and abrasion resistant.

LEADBEATER L S 54.
M-1408, high C, Cr, Mn, bal Fe
For taps, reamers, chasers, dies; oil hardened.

LEADBEATER L S 3000.
M-1408, C, 7 W, bal Fe.
For drawing dies; oil hardened

LEADBEATER N.S O.H
M-1408, high C, Mn, bal Fe.
For punches, dies, oil hardened, non-deforming.

LEADBEATER P B.
M-1408, 0.6 C, Cr, bal Fe.
For taps, reamers, threading dies, punches, chasers; oil hardened

LEADBEATER S.P C.
M-1408, high C, alloy, bal Fe.
For chisels, punches, marking dies; shock resistant, oil hardened.

LEAD BRONZE NO 1.
M-1518; 9 Sn, 15 Pb, bal Cu
Cast: 22,400 TS; 4 El; 50-70 Brin.
For soft shaft bearings; for poor lubrication.

LEAD BRONZE NO. 2.
M-1518; 10 Sn, 10 Pb, bal Cu.
Cast. 24,600 TS, 4 El, 60-75 Brin.
For bearings for medium hard shafts and heavy loads; good anti-friction properties.

LEAD BRONZE NO. 3.
M-1518; 10 Sn, 5 Pb, bal Cu.
Cast: 26,900 TS, 5 El; 65-75 Brin.
For bearings; good corrosion resistance, high strength.

LEAD-CALCIUM.
97 Pb, 0.79 Ca, 0.66 Ba.
For bearings; anti-friction.

LEADED BEARING BRONZE 544.
M-279; 89 Cu, 4 Sn, 4 Pb, 3 Zn.
Ann: 42,000-52,000 TS; 14,000-27,000 YS; 40-50 El.
Cold rolled: 47,000-103,000 TS; 20,000-92,000 YS; 2-40 El.
For bearings, bushing, thrust washers.
Excellent bearing properties.

LEADED BRASS 244.
M-8; 37 Zn, 1 Pb, bal Cu.
Hard: 73,000 TS; 60,000 YS; 8 El; 150 Brin.
Soft: 45,000 TS; 17,000 YS; 50 El; 60 Brin.
For hardware, screw machine parts; free-cutting.

LEADED BRONZE.
U.S.; 10-35 Zn, 1.5-2.5 Pb, bal Cu.
For hardware, screws, fittings, bolts; free-cutting.

LEADED COMMERCIAL BRONZE.
M-33; 89 Cu, 9 Zn, 2 Pb.
Drawn: 52,000 TS; 45,000 YS; 18 El; 60 Brin.
For hardware, screw machine parts; free cutting.

LEADED COMMERCIAL BRONZE-201.
M-8; 9.5 Zn, 0.5 Pb, bal Cu.
Soft: 37,000 TS; 12,000 YS; 40 El.
Hard: 62,000 TS; 47,000 YS; 6 El
For percussion caps, gilding; good workability.

LEADED COMMERCIAL BRONZE 202.
M-8; 88 5 Cu, 9.25 Zn, 2.25 Pb.
Hard: 54,000 TS; 45,000 YS; 15 El; B58 Rock.
Soft: 37,000 TS; 12,000 YS; 40 El; B1 Rock.
For screw machine parts, hardware; free cutting.

LEADED COPPER-187.
M-8; 99 00 Cu, 1.0 Pb.
Hard: 48,000 TS; 40,000 YS; 12 El; B 50 Rock
Soft· 32,000 TS; 10,000 YS, 45 El; F 45 Rock.
For current carrying studs, nuts, bolts, fasteners.
Free-cutting, 98% electrical conductivity.

EADED FLANGING BRASS.
M-33; 62 5 Cu, 35.6 Zn, 1.9 Pb.
For screw machine products; flange grade.

EADED GUN METAL.
Eng., gun metal + 1 0 Pb.
For corrosion resistant parts; improved machinability

EADED HIGH BRASS.
M-8, M-33; 65-78 Cu, 0.3-0.8 Pb, bal Zn.
For tanks, vessels, containers; good ductility and strength.

EADED MONEL METAL.
Eng., 60 Ni, 32 Cu, 2 2 Pb, 2.2 Fe, 2.0 Mn, 0 9 Si, 0.2 C.
For corrosion resistant parts; improved machinability.

ADED MUNTZ METAL-365.
M-8; 60 Cu, 39.35 Zn, 0.65 Pb.
Soft: 54,000 TS; 20,000 YS; 45 El; B 45 Rock.
For industrial condensers.
Strong, stiff and elastic, free-cutting.

ADED NAVAL BRASS.
M-33; 60 Cu, 37.25 Zn, 0.75 Sn, 2 Pb.
Annealed: 60,000 TS; 30,000 YS; 35 El.
Drawn: 72,000 TS; 53,000 YS; 22 El.
or nuts, valve stems, hardware; corrosion resisting.

ADED NAVAL BRASS 29.
M-141; 60 Cu, 1.75 Pb, 0.75 Sn, bal Zn.
lard: 75,000 TS; 53,000 YS; 15 El.
oft: 57,000 TS; 25,000 YS; 40 El.
or hardware; free-cutting, corrosion resistant.

LEADED NAVAL BRASS 482.
M-8; 38.55 Zn, 0.75 Sn, 0.70 Pb, bal Cu.
Hard: 63,000 TS; 35,000 YS; 28 El; 116 Brin.
Soft: 56,000 TS; 25,000 YS; 38 El; 83 Brin.
For marine hardware, screw machine products; free-cutting, forgeable.

LEADED NAVAL BRASS-485.
M-8; 60 Cu, 37.5 Zn, 1.75 Pb, 0.75 Sn.
Hard: 63,000 TS; 35,000 YS; 25 El; B 65 Rock.
Soft: 56,000 TS; 25,000 YS; 35 El; B 50 Rock.
For marine hardware, valve stems, screw machine products.
Free-machining, high strength.

LEADED NICKEL COMMERCIAL BRONZE
Copper Alloy No. 316.
M-33; 90.25 Cu, 6.9 Zn, 1.0 Ni, 0.10 P, 1.75 Pb.
Hard: 70,000 TS; 60,000 YS; 10 El; 78 Rock B.
For bolts, fasteners, nuts, pole line hardware.
ASTM B140 Alloy B.

LEADED NICKEL COPPER-831.
M-8; 1 Pb, 1 Ni, 0.2 P, bal Cu.
Heat treated: 80,000 TS; 70,000 YS; 7 El.
For screw machine products, fasteners; free-cutting, corrosion resistant.

LEADED NICKEL COPPER 7021.
M-8; 97.8 Cu, 1.0 Pb, 1.0 Ni, 0.20 P.
Rod: 85,000 TS; 75,000 YS; 5 El; 55% elec. cond.; 80% machinability.
For electrical contacts, connectors, control elements for power tubes.

LEADED NICKEL SILVER 10%-796.
M-8; 42 Zn, 1 Pb, 10 Ni, 2 Mn, bal Cu.
Hard: 70,000 TS; 40,000 YS; 15 El; 137 Brin.
Soft: 60,000 TS; 20 El.
For screw machine products, architectural parts; free-cutting, corrosion resistant.

LEADED NICKEL SILVER 10%-823.
M-8; 2.75 Pb, 10 Ni, 40.6 Zn, 0.15 Mn, bal Cu.
For architectural trim, forgings; extruded.

LEADED PHOSPHOR BRONZE.
M-58; 80 Cu, 10 Sn, 10 Pb.
Cast: 30,000-37,000 TS; 16,000-23,000 YS; 18-5 El; 16-6 RA; 55-60 Brin.
Chilled: 30,000-33,000 TS; 19,000-21,000 YS; 7-4 El; 10-7 RA.
For bearings for high speeds and heavy pressures; resists shock and vibrations.

LEADED PHOSPHOR BRONZE GR. B.
M-33; 94 Cu, 4.75 Sn, 1 Pb, 0.25 P.
Drawn (20%): 70,000 TS; 58,000 YS; 25 El.
For screw machine products; free-cutting.

LEADED PHOSPHOR BRONZE (B) 379.
M-8; 5 Sn, 1 Pb, 0 10 P, bal Cu.
Hard: 65,000 TS; 55,000 YS; 25 El.
For tubes, bushings, perforated sheets, clutch plate; resists fatigue and corrosion.

LEADED RED BRASS.
M-33; 85 Cu, 1.75 Pb, bal Zn.
½ Hard temper: 60,000 TS; 50,000 YS; 15 El.
For hardware, bolts, screws; free-cutting.

LEADED TS4140 MODIFIED.
M-669; 0.40 C, 1 Cr, 0.2 Mo, 0.2 Pb, bal Fe.
For screw machine products; free-cutting.

LEADED TUBE BRASS 331.
M-8; 33 Zn, 1 Pb, bal Cu.
Hard: 73,000 TS; 60,000 YS; 10 El; 150 Brin.
Soft: 45,000 TS; 17,000 YS; 55 El; 60 Brin.
For screw machine parts; free-cutting tubes.

LEADED TUBE BRASS 3301.
M-8; 33.25 Zn, 0.25 Pb, bal Cu.
Hard: 73,000 TS; 60,000 YS; 10 El; 150 Brin.
Soft. 45,000 TS; 17,000 YS; 45 El; 60 Brin.
For plumbing goods, tubes; yellow brass.

LEAD FOIL.
86 Pb, 6.9 Fe, 5.5 Al, 1.9 Sn.
For lead foil.

LEAD FOIL (CALIN).
86 Pb, 13 Sn, 1 Cu.
For leade foil; corrosion resistant.

LEAD SHOT.
99.8 Pb, 0.2 As.
For lead shot.

LEAD TAPE.
95 Pb, 4.5 Sb, 0.5 Sn
For lead tape; hard.

LEAKPRUF.
M-1073; 40-60 Pb, bal Sn.
For soft solder for Ni, Monel and stainless steels; acid flux filled.

LEBANON 15.5.
M-74; 0.06 max C, 14-15.5 Cr, 4.1-5.1 Ni, 0.15-0.25 Cb, 2.5-3.5 Cu, bal Fe.
Precipitation hardenable stainless steel casting.
As heat treated. 180,000 TS, 150,000 YS; 6 El.
For pumps, impellers, fuel controls.
(Armco 15-5 PH).

LEBANON 17-4.
M-74; 0.06 max C, 15.5-16.7 Cr, 3.6-4.6 Ni, 0.10-0.35 Cb, 2.5-3.2 Cu, bal Fe
Precipitation hardenable stainless steel casting.
As heat treated 180,000 TS; 150,000 YS; 6 El.
For pumps, impellers, fuel controls
ACI CB-7 Cu (Armco 17-4 PH)

LEBANON 17-22
M-74; 0.25-0.35 C, 0.3-0.6 Si, 0.45-0.70 Mn, 1.0-1.5 Cr, 0.4-0.6 Ni, bal Fe
Low carbon, low alloy steel casting.
Nor + T 125,000 TS, 100,000 YS; 12 El; 262-306 Brin
For aircraft brake components
Reference. Timken 17-22 A

LEBANON GRADE 22
M-74, C, 19.5 Cr, 9 Ni, bal Fe
For pressure storage equipment for liquid O_2, austenitic

LEBANON 33
M-74, 0.07 C, 18-21 Cr, 22-25 Ni, 2.5-3.0 Mo, 1.5-2.0 Cu, bal Fe
Non-magnetic stainless steel casting.
Not hardenable by heat treatment
For paper pulp machinery, food machinery
ACI CN-7M.

LEBANON 431.
M-74, 0.16-0.22 C, 15.0-16.5 Cr, 1.5-2.5 Ni, bal Fe.
Corrosion resistant steel casting; oil or air hardenable.
For special purpose hardenable components as impellors, pumps, fuel controls
AISI 431, SAE 51431.

LEBANON 440 C
M-74; 0.95-1.20 C; 16-18 Cr, 0.75 max Mo, bal Fe
Corrosion resistant steel casting.
Oil or air hardenable to above 55 Rock C.
For stainless ball bearings, races.
AISI 440 C; SAE 51440 C.

LEBANON 442.
M-74; 0.20-0.30 C, 18-22 Cr, 2.0 max Ni, bal Fe.
Corrosion resistant steel casting.
For pumps, chemical equipment, valves; good resistance to nitric acid, alkalies, organics.
AISI 442; ACI CB-30.

LEBANON 1005.
M-74, 0.05 max C, 0.7 max Si, 0.10 max Mn, bal Fe
Very low carbon steel casting.
Nor. + T.: 48,000 TS, 25,000 YS; 35 El.
For electro magnet components.

LEBANON 1040
M-74; 0.35-0.45 C, 0.6 max Si, 0.6-0.8 Mn, bal Fe.
Medium carbon steel casting.
Nor + T 80,000 TS, 40,000 YS, 18 El
ASTM 148-60 Gr 80-40.

LEBANON 4140
M-74, 0.35-0.45 C, 0.60 max Si, 0.6-0.8 Mn, 0.8-1.2 Cr, 0.2-0.3 Mo, bal Fe.
Medium carbon low alloy steel casting.
Nor + T 100,000 TS, 80,000 YS, 15 El
Can be oil hardened to about 200,000 psi TS.
Structural parts, AISI 4140

LEBANON 4330
M-74, 0.25-0.35 C 0.60 max Si, 0.6-0.8 Mn, 0.6-1.25 Cr, 1.25-2.50 Ni, 0.25-0.50 Mo, bal Fe
Medium carbon low alloy steel casting
Oil hardenable to 140,000-180,000 TS
For structural parts, gears, dies, wheels, housings.
AISI 4330

LEBANON 4335
M-74, 0.30-0.35 C, 0.60 max Si, 0.6-0.8 Mn, 0.60-1.25 Cr, 1.25-2.50 Ni, 0.25-0.50 Mo, bal Fe
Medium carbon low alloy steel casting
Oil hardenable to 180,000-240,000 psi TS.
For structural parts requiring good strength and toughness AISI 4335

LEBANON 4340
M-74, 0.35-0.45 C, 0.60 max Si, 0.6-0.8 Mn, 0.60-1.25 Cr, 1.25-2.50 Ni, 0.25-0.50 Mo, bal Fe
Medium carbon low alloy steel casting.
Oil hardenable in fairly heavy sections to 200,000-260,000 psi TS
For heavily loaded structural parts AISI 4340.

LEBANON 8615
M-74, 0.10-0.20 C, 0.60 max Si, 0.6-0.9 Mn, 0.4-0.9 Cr, 0.4-1.1 Ni, 0.15-0.25 Mo, bal Fe
Low carbon low alloy steel casting
For structural and carburized parts AISI 8615

LEBANON 8630
M-74, 0.25-0.35 C, 0.60 max Si, 0.60-0.95 Mn, 0.4-0.9 Cr, 0.4-1.1 Ni, 0.15-0.25 Mo, bal Fe.
Medium carbon low alloy steel casting
Nor. + Tem: 90,000 TS; 60,000 YS, 20 El
Weldable, water or oil quench. Structural parts
ASTM A148-60 Gr 90-60

LEBANON 8630/1
M-74, 0.25-0.35 C, 0.60 max Si, 0.60-0.95 Mn, 0.4-0.9 Cr, 0.4-1.1 Ni, 0.15-0.25 Mo, bal Fe
Medium carbon low alloy steel casting
Quench and Temper condition. 105,000 TS, 85,000 YS; 17 El; 220-227 Brin
Structural parts; can be re-heat treated; water or oil quench. ASTM A148-60 Gr 105-85.

LEBANON 8630/2
M-74; 0.25-0.35 C, 0.60 max Si, 0.60-0.95 Mn, 0.4-0.9 Cr, 0.4-1.1 Ni, 0.15-0.25 Mo, bal Fe
Medium carbon low alloy steel castings

Quench and Temper Condition: 120,000 TS; 95,000 YS; 14 El; 250-311 Brin.
Structural parts; can be re-heat treated; water or oil quench. ASTM A148-60 Gr 120-95.

LEBANON 8630/3.
M-74; 0.25-0.35 C, 0.60 max Si, 0.60-0.95 Mn, 0.4-0.9 Cr, 0.4-1 1 Ni, 0.15-0.25 Mo, bal Fe.
Medium carbon low alloy steel castings.
Quench and Temper Condition: 150,000 TS; 125,000 YS; 9 El; 310-375 Brin.
For structural parts, gears, rollers, sprockets, rollers, housings. ASTM A148-60 Gr 150-125.

LEBANON C5.
M-74, 0.20 max C, 0.75 max Si, 0.4-0.7 Mn, 4.0-6.5 Cr, 0.45-0.65 Mo, bal Fe.
Low carbon alloy steel casting.
Nor. + T.; 90,000 TS; 60,000 YS; 18 El. Air hardenable.
For valves, bonnets, fittings, yokes, flanges, to 1200°F. ASTM A217-64 Gr C5.

LEBANON C12.
M-74; 0.20 max C, 1.0 max Si, 0.35-0.65 Mn, 8.0-10.0 Cr, 0.9-1 2 Mo, bal Fe.
Low carbon, chromium steel castings
Nor. + T; 90,000 TS, 60,000 YS; 18 El. Air hardenable.
For valves, fittings for moderate corrosion
ASTM A217-64 Gr C12.

LEBANON CA15.
M-74, 0 15 max C, 11 5-14.0 Cr, 1.0 max Ni, bal Fe
Corrosion resistant steel casting.
Oil or air hardenable, weldable
For valves, pump parts, oil refinery equipment.
ACI CA-15, AISI 410

LEBANON CA15M
M-74; 0 15 max C, 11 5-14 0 Cr, 1.0 max Ni, 0 40-0 80 Mo, 0 20-0 35 Se, bal Fe
Free machining, corrosion resistant steel casting
Oil or air hardenable
For valve and pump parts requiring considerable machining Similar to AISI 416 Se.

LEBANON CA40
M-74; 0 20-0 30 C, 11.5-14.0 Cr, 1.0 max Ni, bal Fe
Corrosion resistant steel castings.
Oil or air hardenable to 180,000-240,000 psi.
For cylinder liners, valves, cutter blades.
ACI CA-40, AISI 420

LEBANON CA40A.
M-74, 0 30-0 40 C, 12.0-14.5 Cr, bal Fe
Corrosion resistant steel casting.
Oil or air hardenable to above 48 Rock C.
For glass molds and plungers of mirror quality finish.

LEBANON CC50.
M-74, 0 50 max C, 26-30 Cr, 4 0 max Ni, bal Fe
Corrosion resistant steel casting.
Excellent resistance to dilute sulphuric acid, in mine waters, and other dilute acids.
For mine pumps, chemical plants.
AISI CC-50, AISI 446.

LEBANON CD.
M-74; 0 04 max C, 26.0 Cr, 5.5 Ni, 2.0 Mo, 3.0 Cu, bal Fe.
Corrosion resistant steel casting
Precipitation hardening alloy; very good corrosion resistance. ACI CD-4MCu.

LEBANON CE30.
M-74; 0.30 max C, 26-30 Cr, 8-11 Ni, bal Fe.
Stainless steel casting; resistant to sulphurous acid.
For pulp and paper mill equipment, mine equipment, pumps and valves. ACI CE-30.

LEBANON CF3.
M-74; 0.03 max C, 18-21 Cr, 8-11 Ni, bal Fe.
Non-magnetic stainless steel casting.
Weldable, not hardenable by heat treatment.
For valves, pumps, headers for chemical plants.
ACI CF3; AISI 304L.

LEBANON CF3A.
M-74; 0.03 max C, 17-21 Cr, 8-12 Ni, bal Fe.
Non-magnetic stainless steel casting; solution treated. Weldable, not hardenable by heat treatment. Good resistance to stress corrosion cracking.
For valves, pumps, in chemical plants.
ASTM A351-64 Gr CF-3A.

LEBANON CF3M.
M-74; 0.03 max C, 18-21 Cr, 9-12 Ni, 2.0-3.0 Mo, bal Fe.
Non-magnetic stainless steel casting
Weldable, not hardenable by heat treating.
Exceptional corrosion resistance, pumps, valves, impellers, fittings. ACI CF-3M; AISI 316L.

LEBANON CF8.
M-74, 0.08 max C, 18-21 Cr, 8.0-11.0 Ni, bal Fe
Non-magnetic stainless steel casting; quenched. Not hardenable by heat treatment
General purpose stainless casting. ACI CF-8; AISI 304.

LEBANON CF8A.
M-74; 0 08 C, 18-21 Cr, 8-11 Ni, bal Fe
Non-magnetic stainless steel casting, Solution treated
Not hardenable by heat treatment
Sol. treat increases ferrite content to improve resistance to stress corrosion cracking.
ASTM A351-64 Gr CF-8A

LEBANON CF8C.
M-74; 0.08 max C, 18-21 Cr, 9-12 Ni, Cb/Ta = 8 × %C min, bal Fe
Non-magnetic stainless steel casting, stabilized, Weldable without reheat treatment
For welded stainless assemblies AISI 347; ACI CF-8C

LEBANON CF8F.
M-74, 0.08 max C, 18-21 Cr, 9-12 Ni, 1.5 max Mo, 0 20-0.35 Se, 0.15 max P, bal Fe.
Non-magnetic stainless steel casting, free machining type, not hardenable by heat treatment; not recommended for welding.
For castings requiring much machining AISI 303 Se.

LEBANON CF8M.
M-74; 0.08 max C, 18-21 Cr, 9-12 Ni, 2.0-3.0 Mo, bal Fe.
Non-magnetic stainless steel casting. Not hardenable by heat treatment Exceptional resistance to corrosion.
For chemical plant equipment. ACI CF-8M; AISI 316.

LEBANON CF 20.
M-74; 0.20 max C, 18-21 Cr, 8-11 Ni, bal Fe.
Non-magnetic stainless steel casting. Not hardenable by heat treatment.
General purpose stainless cast components.
ACI CF-20; AISI 302.

LEBANON CG8M.
M-74; 0.08 max C, 18-21 Cr, 9-12 Ni, 3.0-3.5 Mo, bal Fe.
Non-magnetic stainless steel casting. Not hardenable by heat treatment. Excellent corrosion resistance, especially in reducing environment. AISI 317.

LEBANON CH20.
M-74; 0.20 max C, 22-26 Cr, 12-15 Ni, bal Fe.
Non-magnetic stainless steel casting. Not hardenable by heat treatment. Improved corrosion resistance in hot dilute sulphuric acid.
For digester parts, pumps, strainers.
ACI CH-20; AISI 309.

LEBANON CHW.
M-74; 0.15-0.30 C, 22-25 Cr, 11-14 Ni, 2.5-3.5 W, bal Fe.
Non-magnetic stainless steel casting. Not hardenable by heat treatment.
For flanged rings and tail cone rings requiring both corrosion and heat resistance.

LEBANON CK20.
M-74; 0.25 max C, 23-27 Cr, 19-22 Ni, bal Fe.
Non-magnetic stainless steel casting. Not hardenable by heat treatment. Improved resistance to corrosion and high temperatures; weldable.
For jet engine parts, pumps, valves.
ACI CK-20; AISI 310.

LEBANON CK45.
M-74; 0.35-0.45 C, 23-27 Cr, 19-22 Ni, bal Fe.
Non-magnetic stainless steel casting. Not hardenable by heat treatment.
Heat resistant alloy for use in valves and fittings for chemical and refinery parts.

LEBANON CN3M.
M-74; 0.03 max C, 19-22 Cr, 27.5-30.5 Ni, 2.0-3.0 Mo, 3.0-4.0 Cu, bal Fe.
Non-magnetic stainless steel casting. Weldable; not hardenable by heat treatment. Good resistance to hot sulphuric acid.
For paper pulp machinery, food machinery.

LEBANON CN7M.
M-74; 0.07 max C, 19-22 Cr, 27.5-30.5 Ni, 2.0-3.0 Mo, 3.0-4.0 Cu, bal Fe
Non-magnetic stainless steel casting. Not hardenable by heat treatment Good resistance to hot sulphuric acid.
For paper pulp machinery, food machinery.
ACI CN-7M; ASTM A296-64T Gr CN-7M.

LEBANON CU-NI.
M-74; 0.15 max C, 28-32 Ni, 0.25-1.0 Fe, 1.5 max Cb, bal Cu.
Corrosion resistant alloy casting for marine pumps, valves, fittings. ASTM B369-61T.

LEBANON H810 (Incoloy).
M-74; 20.0 Cr, 32.0 Ni, bal Fe.
Heat resistant steel casting Maximum operating temperature 2000°F.

LEBANON HAB.
M-74; 0.12 max C, 26-30 Mo, 4-7 Fe, 0.6 max V, 2.5 max Co, 1.0 max Cr, bal Ni.
Corrosion resistant alloy casting; for valves, pump parts, fittings in hydrocloric acid environment.
Similar to Hastelloy B; ASTM A494-62.

LEBANON HAC.
M-74; 0.12 max C, 15.5-17.5 Cr, 16-18 Mo, 4.5-7.0 Fe, 3.75-5.25 W, 0.2-0.4 V, 2.5 max Co, bal Ni.
Corrosion resistant alloy casting, for use with wet chlorine gas, hypochloric acid and other acids as valves and fittings.
ASTM A494-62; Hastelloy C.

LEBANON HE.
M-74; 20.0 Cr, 9.0 Ni, bal Fe.
Heat resistant steel casting. Maximum operating temperature 2000°F
ACI HE; SAE 70312; ASTM A297-63 Gr HE.

LEBANON HH.
M-74; 25.0 Cr, 12.5 Ni, bal Fe.
Heat resistant steel casting. Maximum operating temperature 2000°F.
ACI HH; SAE 70309; ASTM A297-63 Gr HH.

LEBANON HK.
M-74; 26.0 Cr, 20.0 Ni, bal Fe.
Heat resistant steel casting. Maximum operating temperature 2100°F.
ACI HK; SAE 70310; ASTM A297-63 Gr HK.

LEBANON HR.
M-74; 23.0 Cr, 11.5 Ni, bal Fe.
Heat resistant steel casting.

LEBANON HR-A.
M-74; 21.0 Cr, 14.0 Ni, bal Fe.
Heat resistant steel casting.

LEBANON HT.
M-74, 15.0 Cr, 35.0 Ni, bal Fe.
Heat resistant steel casting. Maximum operating temperature 2000°F.
ACI HT; SAE 70330, ASTM A297-63 Gr HT.

LEBANON HY-80.
M-74, 0.20 max C, 0.5 max Si, 0.55-0.75 Mn, 1.35-1.65 Cr, 2.50-3.25 Ni, 0.3-0.6 Mo, bal Fe.
Low carbon alloy steel casting. Oil hardenable to 100,000-160,000 TS.
For valves, fittings, good strength with high impact energy MIL-S-23008 B HY-80.

LEBANON HY-100.
M-74, 0.22 max C, 0.5 max Si, 0.55-0.75 Mn, 1.35-1.85 Cr, 2.75-3.50 Ni, 0.3-0.6 Mo, bal Fe.
Low carbon alloy steel casting; 100,000-120,000 yield. Oil hardenable.
For valves, fittings; good strength with good impact values; low notch sensitivity.
MIL-S-23008 B HY-100.

LEBANON INC.
M-74; 0.10 max C, 14-17 Cr, 6-10 Fe, 1.0-2.0 Cb/Ta, bal Ni
Corrosion resistant alloy casting, resistant to alkalies, oxidizing and organic acids
For food processing and textile processing equipment, high temperature service. ACI CY-40; (Inconel).

LEBANON LC2.
M-74; 0.25 max C, 0.6 max Si, 0.5-0.8 Mn, 2.0-3.0 Ni, bal Fe
Low carbon, nickel alloy steel casting.
Nor., Q & T.: 65,000 TS; 40,000 YS; 24 El.
For valves for cyrogenic service to −100°F.
ASTM A352-64 Gr LC2.

LEBANON LC3
M-74, 0.15 max C, 0.6 max Si, 0.5-0.8 Mn, 3.0-4.0 Ni, bal Fe.
Low carbon, nickel alloy steel casting.
Nor., Q & T.: 65,000 TS; 40,000 YS; 24 El.
Valves for cyrogenic service to −150°F.
ASTM A352-64 Gr LC3.

LEBANON LCB.
M-74; 0.30 max C, 0.6 max Si, 1.0 max Mn, bal Fe
Low carbon steel casting.
Nor. & T.: 65,000 TS; 35,000 YS; 24 El.
General purpose cast housings.
ASTM A352-64 Gr LCB; AISI 1025.

LEBANON ME.
M-74; 0.30 max C, 60 min Ni, 26-33 Cu, 1.5-3.5 Fe, 1.0-3.0 Cb/Ta.
Corrosion resistant alloy casting, resistant to mineral and organic acids, sea water, caustic solutions.
For valves and fittings for marine service.
Fed: QQ-N-288-Comp E; (Monel).

LEBANON NI.
M-74; 1.0 max C, 1.25 max Cu, 1.25 max Fe, bal Ni.
Nickel casting As cast: 45,000 TS; 20,000 YS, 15 El.
Resistant to many industrial chemicals.
For equipment for food processing, pharmaceuticals.
ACI CZ-100.

LEBANON WC1.
M-74; 0.25 max C, 0.6 max Si, 0.5-0.8 Mn, 0.45-0.65 Mo, bal Fe.
Low carbon, low alloy steel casting.
For valves, fittings, turbines and other pressure castings to 1100°F.
ASTM A217-64 Gr WC1; A352-64 Gr LC1.

LEBANON WC6.
M-74; 0.20 max C, 0.6 max Si, 0.5-0.8 Mn, 1.0-1.5 Cr, 0.45-0.65 Mo, bal Fe.
Low carbon, low alloy steel casting
Nor & T: 70,000 TS; 40,000 YS; 20 El.
For valves, fittings, turbines and other pressure castings for service to 1200°F.
ASTM A217-64 Gr WC6

LEBANON WC6A
M-74, 0.25 max C, 0.6 max Si, 0.7 max Mn, 0.4-0.7 Cr, 0.4-0.6 Mo, bal Fe.
Low carbon, low alloy steel casting
Nor. & T.: 70,000 TS; 40,000 YS; 22 El
For valves, fittings, turbines and other pressure castings for service below 1200°F.
ASTM A356-60T Gr 5.

LEBANON WC6B
M-74; 0.30 max C, 0.75 max Si, 1.0 max Mn, 1.5-2.25 Cr, 0.45-0.65 Mo, bal Fe.
Medium carbon low alloy steel casting.
Nor., Q & T: 105,000 TS; 85,000 YS; 15 El.
For valves, fittings, turbines and other pressure castings for service below 1200°F.

LEBANON WC9
M-74; 0.18 max C, 0.6 max Si, 0.4-0.7 Mn, 2.0-2.75 Cr, 0.9-1.2 Mo, bal Fe
Low carbon alloy steel casting. Nor. & T.: 70,000 TS, 40,000 YS; 20 El
For valves, fittings, turbines, and other pressure castings for service below 1200°F.
ASTM A217-64 Gr WC9.

LEBANON WCA.
M-74, 0.25 max C, 0.6 max Si, 0.7 max Mn, bal Fe.
Low carbon steel casting. Nor & T.: 60,000 TS; 30,000 YS, 24 El.
ASTM A216-63T Gr WCA; AISI 1020.

LEBANON WCB/1
M-74; 0.30 max C, 0.8 max Si, 0.7 max Mn, bal Fe.
Low carbon steel casting
Nor. & T.: 65,000 TS; 35,000 YS; 24 El.
ASTM A27-62 Gr 65-35.

LEBANON WCB/2.
M-74; 0.30 max C, 0.6 max Si, 1.0 max Mn, bal Fe.
Low carbon steel casting.
Nor. & T.: 70,000 TS; 36,000 YS; 22 El.
ASTM A216-63T Gr WCB; AISI 1025.

LECHESNE.
90-60 Cu, 10-40 Ni, 0.2-0.05 Al.
For chemical engineering equipment; corrosion resistant.

LECO.
M-688; 0.33 C, 0.75 Cr, 0.30 Ni, 0.75 Mo, 0.75 Cu, 0.15 Ti, bal Fe.
For chisels, dies, punches, pneumatic tools; oil hardened, shock resistant.

LECO EXTRA.
M-688; 0.44 C, 0.75 Cr, 0.35 Ni, 0.4 Mn, 0.75 Mo, 0.65 Si, 0.75 Cu, 0.15 Ti, bal Fe.
For dies, rivet sets, chisels, punches, cutters; fatigue and abrasion resistant.

LECO NON-TEMPERING.
M-57; C, alloy, bal Fe.
For dies, tools; water hardened, non-tempering.

LECTRI-LED 4140.
M-176, 0.41 C, 0.9 Mn, 0.28 Si, 0.93 Cr, 0.19 Mo, 0.15 Pb, bal Fe.
Heat treated: 176,000 TS; 158,000 YP, 16 El; 45 RA, C 38 Rock
For rubber molds, plastic molds, steam platens, gears, machine tool parts, high pressure valve bodies
Free machining, tough.

LEDA.
M-56; 0.7 C, Cr, W, V, bal Fe
For lathe and planer tools, reamers, taps, hobs; high speed steel.

LEDALOYL.
M-172, 10 Sn, 5 Pb, 1 graphite, bal Cu
For self-lubricating bearings; sintered type, oil impregnated.

LEDDEL ALLOY.
90 Zn, 5 Cu, 5 Al
For die castings

LEDDEL BEARING.
87.5 Zn, 6.26 Cu, 6.25 Al.
For bearings; anti-friction

LEDEBUR'S BEARING-1
85 Zn, 10 Sb, 5 Cu.
For bearings; anti-friction.

LEDEBUR'S BEARING-2.
77 Zn, 5.5 Cu, 18 Sn
For bearings; anti-friction.

LEDLOY.
M-240; 0.2 C, 0.2 Pb, 1.0 Mn, 0.25 S, bal Fe.
For screw machine products, fasteners, shafts, gears, cams, camshafts.
Free-machining

LEDLOY 170
M-240, C, 0.15-0.35 Pb, bal Fe.
For machine tool parts, gears; free-cutting.

LEDLOY-300.
M-67, 0.15 max C, 0.85-1.15 Mn, 0.04-0.09 P, 0.26-0.35 S, 0.15-0.35 Pb, bal Fe.
Cold Rolled: 79,000 TS; 71,000 YP, 16 El; 52 RA; 163 Brinell
For shafts, fasteners, hydraulic manifold blocks, screw machine products.
Free-machining AISI C12L14.

LEDLOY 375.
M-240; C, Pb, bal Fe.
For machine tool parts, gears; free-cutting.

LEDLOY 4140.
M-67; 0.39 C, 0.80 Mn, 0.03 S, 0.24 Si, 0.84 Cr, 0.09 Ni, 0.18 Mo, 0.15-0.35 Pb, bal Fe.
Heat treated: 158,000 TS; 144,000 YS; 16 El; 56 RA; 321 Brin.
For fasteners, gears, camshafts, housings, machine tools, crankshafts.
Free-cutting. Oil hardening.

LEDLOY 5120.
M-682; 0.17-0.23 C, 0.60-1.00 Mn, 0.60-1.00 Cr, 0.15-0.25 Pb, bal Fe.
For fuel valve burner tubes; free-cutting.

LEDLOY 8620.
M-67; 0.18-0.23 C, 0.70-0.90 Mn, 0.15-0.25 Pb, 0.25-0.35 Si, 0.40-0.70 Ni, 0.40-0.60 Cr, 0.15-0.25 Mo, bal Fe.
Cold Drawn: 110,000 TS; 101,000 YS; 15 El; 55 RA; 223 Brin.
Heat treated: 192,000 TS; 150,000 YS; 12 El; 49 RA; 388 Brin.
For gears, cams, camshafts, fasteners, chuck jaws, pneumatic chucks.
Free-cutting. Case hardening.

LEDLOY-A.
M-682; 0.08 C, 1.08 Mn, 0.075 P, 0.21 Pb, 0.34 S, bal Fe.
Cold Drawn: 65,000 TS; 58,000 YS; 20 El; 155 Brin.
For valve spools, gears, pinions, cams, camshafts, fasteners.
Free-cutting. Case hardening.

LEDLOY-AX.
M-516, M-67; 0.08 C, 1.07 Mn, 0.075 P, 0.32 S, 0.02 Si, 0.003 Ni, 0.21 Pb, 0.048 Te, bal Fe.
Bar: 75,600 TS; 71,900 YS, 13 El; 37 RA; B 91 Rock.
For screw machine products, fasteners, screws, bolts, spark wheels. Free machining

LEDLOY C-1045.
M-67; 0.40-0.50 C, 0.15-0.35 Pb, bal Fe
Rolled: 98,000 TS; 65,000 YS, 28 El; 52 RA
For machinery parts; water hardening; free-cutting

LEDLOY C-1120.
M-67; 0.15-0.25 C, 0.15-0.35 Pb, 0.30 S, bal Fe
Rolled: 63,000 TS; 44,000 YS; 36 El, 63 RA, 130 Brin.
For bolts, shafts, fasteners, screw machine products. Free-cutting

LEDO.
M-38; 0.4 C, 0.2 Mo, bal Fe.
Heat treated: 118,000-134,000 TS; 83,000-94,000 YS; 20-15 El; 53-43 RA; 248-320 Brin.
For crankshafts, gears, bolts, spindles, shafts; oil or water hardened.

LED-O-LOY.
M-1579; 87 Cu, 2 Sn, 2 Pb, bal Zn.
Half Hard: 58,000 TS; 49,000 YS; 14 El; Rock B 70.
Hard: 76,000 TS; 70,000 YS; 10 El; Rock B 80.
Extra Hard: 86,000 TS; 75,000 YS; 3 El, Rock B 86.
For meter and gauge components, bearings, thrust washers, valve parts.
Free-cutting, corrosion resistant.

LEDRITE 2.
M-141; 61 Cu, 1.8 Pb, bal Zn.
Hard: 55,000 TS; 42,000 YS; 30 El.
For screw machine parts, hardware; free-cutting.

LEDRITE 6.
M-141; 61 Cu, 3.4 Pb, bal Zn.
Hard: 58,000 TS; 45,000 YS; 25 El.
For screw machine parts, hardware; free-cutting.

LEDRITE BRASS.
M-141; 61 Cu, 3.25 Pb, bal Zn.
Soft: 45,000 TS; 35 El.
Hard: 80,000 TS; 10 El.
For screw machine parts; free cutting.

LEDURIT Z IV.
M-459; 2.5 C, 0.8 Mn, 4.3 Cr, bal Fe.
For hard facing electrode; wear resistant.

LEGAL.
M-199; 0.5-2.0 Mg, 0.3-1.5 Si, 0-1.5 Mn, bal Al.
For light alloy parts; corrosion resistant, hardenable

LEGA-Y.
M-1176; 3.8-4.2 Cu, 1.3-1.7 Mg, 1.8-2.3 Ni, bal Al.
Heat treated. 36,000-47,000 TS, 32,000-43,000 YS, 0.5-0.3 El, 95-115 Brin.
For light alloy parts, age-hardened.

LEGIERUNG 503
M-324, 2-4 Mg, 0.4 max Cr, 0.4 max Mn, bal Al.
Soft: 30,000 TS, 15,000 YS; 28 El, 50 Brin
For marine and aircraft parts, resists sea water corrosion

LEGIERUNG 505
M-324, 4.0-5.5 Mg, 0.8 max Mn, 0.3 max Cr, bal Al.
Soft: 42,000 TS; 22,000 YS, 35 El, 65 Brin
Hard 60,000 TS; 50,000 YS, 15 El, 100 Brin.
For marine hardware, aircraft parts, corrosion resistant.

LEGIERUNG 507
M-324; 5.5-7.5 Mg, 0.8 max Mn, 0.3 max Cr, bal Al
For light alloy parts, corrosion resistant

LEGIERUNG 600
M-324, 1.5-3.0 Mg, 0.5-1.5 Mn, 0.3 max Cr, bal Al.
Soft. 28,000 TS, 13,000 YS, 30 El, 47 Brin.
Hard. 42,000 TS, 37,000 YS, 8 El; 77 Brin
For marine products, aircraft structures, resists sea water corrosion

LEGIERUNG 800
M-324, 1.0-1.5 Mn, 0.3 max Cr, bal Al
Soft 16,000 TS, 6000 YS, 40 El, 28 Brin
Hard 29,000 TS, 27,000 YS; 10 El, 55 Brin.
For aircraft and engineering structures, good formability and weldability

LEHIGH DD1
M-688; C, alloy, bal Fe
For machine parts, gears, shafts, mandrels, oil hardened.

LEHIGH H.
M-24, 1.6 C, 11.5 Cr, 0.8 Mo, 0.4 V, bal Fe
For gages, punches, master hobs; Type D2; oil hardened.

LEHIGH I
M-24, 0.85 C, 11.5 Cr, 1.05 Ni, 0.3 V, 0.45 Mo, bal Fe
For dies, shear blades, punches; abrasion resistant, non-deforming

LEHIGH N C.
M 688; 0.70 C, 1 Cr, 1.6 Ni, 0.35 Cu, 0.4 Mn, 0.2 Si, bal Fe.
For shear blades, rivet sets, punches, dies; oil hardened, shock resistant

LEHIGH S
M-24; 2 C, 11.7 Cr, 0.6 V, bal Fe.
For dies and shear blades, gauges; abrasion resistant, non-deforming.

LEHIGH SPECIAL NO. 3.
M-688; 0.7-1.2 C, bal Fe.
For tools and dies; general use.

LEHIGH SPECIAL NO. 5.
M-688; 0.7-1.4 C, bal Fe.
For tools and dies; abrasion resistant.

LEHIGH SS.
M-688; 0.75 C, 4.5 Cr, 12 Co, 2 V, 20 W, bal Fe.
For lathe and planer tools, reamers, taps, broaches, hobs; high speed steel, oil hardened.

LEHIGH XXX.
M-688; 0.7 C, 4 Cr, 1 V, 18 W, bal Fe.
For lathe and planer tools, drills, taps, reamers; high speed steel; Type T2

LEICHTMETALL MN 20.
M-457, 1-2 Mn, bal Al
Soft: 13,000 TS, 6000 YS; 35 El; 35 Brin.
Hard. 43,000 TS, 36,000 YS, 4 El, 70 Brin
For light alloy parts, corrosion resistant

LEICHMETALLWERKE M115.
M-116, 1.0-1.5 Mn, 0.3 Cr, bal Al.
Soft 16,000 TS, 6000 YS; 40 El
Hard: 29,000 TS, 27,000 YS, 10 El.
For cooking utensils, tanks, furniture; good forming and welding properties.

LEICHTMETALLWERKE MZB.
M-116, 2.5-5.0 Cu, 0.2-1.8 Mg, 0.3-1.5 Mn, 0.5-2.5 Pb, Sn, Cd, Bi, bal Al.
For screw machine products; free-cutting.

LEKTROCAST
M-157; 3.0-3.4 C, 2 Si, 1.5-2.5 Ni, bal Fe
Cast 50,000 TS, 225-280 Brin
For castings, draw dies for metal stamping; wear resistant

LEMARQUAND'S ALLOY
39 Cu 7 Ni, 37 Zn, 9 Sn, 8 Co
For cheap jewelry, corrosion resistant

LE MAT'S METAL
80 Cu, 5 Zn, 16 Ni, 5 Fe, 2 Sn, 1 Co
For cheap jewelry, v "Lutecin"

LE MOYNE ALCOCAN
M-1196, 0.7 C, Ni, Cr, bal Fe
For hand tools, chisels, oil or air hardened

LE MOYNE BEST
M-1196, 1.2 C, 0.3 Cr, 1.2 W, bal Fe.
For broaches, reamers, dies, cutters, water hardened.

LE MOYNE EXTRA
M-1196, 0.7-1.0 C, bal Fe
For tools, drills, punches, water hardened

LE MOYNE FINISHING.
M-1196; 1.3 C, 4 W, 4 Mo, bal Fe
For finishing tools and cutters, water or oil hardened

LE MOYNE HAK
M-1196; 0.90-1.05 C, 3.7-4.1 Cr, bal Fe.
Annealed: 90,000 TS; 78,000 YS. 28 El; 57 RA, 195 Brin
Heat treated 205,000 TS; 168,000 YS; 2 El; 12 RA, 412 Brin.
For riveters, gripper dies, compression dies; wear and heat resistant

LE MOYNE HS.
M-1196; 0.56-0.75 C, 18 W, 4 Cr, 1 V, bal Fe.
Annealed: 105,000 TS; 75,000 YS, 14 El; 17 RA; 255 Brin.
For chasers, taps, reamers, drills, broaches; high speed steel, oil hardened.

LE MOYNE K760.
M-1196; 0.72 C, 17.5 W, 4 Cr, 4.5 Co, 1 V, 0.5 Mo, bal Fe.
For reamers, taps, hobs, drills, lathe tools; high speed steel, oil hardened.

LE MOYNE NON-SHRINK.
M-1196; 0.9 C, 1.2 Mn, 0.5 Cr, 0.5 W, bal Fe.
For punches, tools, crimpers, cutters; oil hardened, nondeforming.

LE MOYNE PYRO.
M-1196; 0.33 C, 10.2 W, 3.5 Cr, 0.45 V, bal Fe.
For punches, shears, hot dies; hot work steel, oil hardened.

LE MOYNE SPECIAL.
M-1196; 0.8-1.1 C, bal Fe.
For tools, drills, punches, cutters; water hardened.

LE MOYNE SUPREME.
M-1196; 0.7 C, W, Co, Mo, bal Fe.
For tools, dies, cutters; high speed steel.

LEMS 1.
M-459; 1.1 C, 1.2 Cr, 0.2 V, 1.3 W, bal Fe.
For cold wark punching tools; oil or water hardened

LENIN-T58.
M-651; 0.16-0.20 C, 11.5-12.5 Cr, 0.5 Mo, 0.5-1.0 Ni, 0.15-0.25 V, 2.0-2.5 W, bal Fe.
Annealed. 80,000 TS, 40,000 YS, 24 El; B 95 Rock.
Hardened 230,000 TS; 195,000 YS; 12 El; C 48 Rock.
For valves, bearings, cutlery, surgical instruments, gears, corrosion resistant, hardenable

LENNALSIL.
M-1375, 0.6-1.4 Mg, 0.6-1.6 Si, 0.6-1.0 Mn, 0.3 max Cr, bal Al.
Annealed 21,000 TS, 8000 YS, 24 El
For window frames, fan blades, gutters, boats; good forming and welding properties

LENNEDUR
M-1375; 2.5-5.0 Cu, 0.2-1.8 Mg, 0.3-1.5 Mn, bal Al
Annealed 27,000 TS, 11,000 YS; 22 El; 47 Brin.
Heat treated 72,000 TS, 57,000 YS, 130 Brin.
For aircraft structures and fittings, fasteners; age hardenable

LENOX.
M-39, 0.9 C, 1.5 Mn, 0.3 Mo, 0.3 Si, bal Fe.
Annealed. 200 Brin
For tools, dies, punches, knives, ground flat stock

LEONARD.
M-261, 0.9-1.0 C, bal Fe.
For tools, drills, punches; water hardened.

LEPPESTAHL
M-1306, 2.1 C, 11.5 Cr, bal Fe
For blanking and forming dies, punches; oil hardened, non-deforming.

LEPPESTAHL EXTRA 6.
M-1306, 2.1 C, 11.5 Cr, 0.7 W, bal Fe.
For blanking and forming dies, punches; non-deforming, oil hardened.

LEPPESTAHL X
M-1306, 1.65 C, 11.5 Cr, 0.1 V, bal Fe.
For blanking and forming dies, punches; air hardened, non-deforming

LE PROVINOX.
French; C, alloy, bal Fe.
50,000-57,000 TS, 35,000-45,000 YS; 36 El.
For general engineering applications; semi-non-oxidizing steel.

LESCALLOY 300 M.
M-73; 0.42 S, 0.75 Mn, 1.65 Si, 1.8 Ni, 0.8 Cr, 0.4 Mo, 0.07 V, bal Fe.
Heat treated: 285,000-290,000 TS; 238,000-243,000 YS; 10-13 El; 32-47 RA.
For landing gears, air frames, missile cases, pressure vessels.
High strength structural steel, tough, shock resistant.

LESCALLOY 422 STAINLESS.
M-73; 0.22 C, 0.75 Mn, 0.3 Si, 12.0 Cr, 1.0 W, 1.0 Mo, 0.75 Ni, 0.25 V, bal Fe.
Oil quenched: C 50-55 Rock.
Tempered at 1150°F: 150,000 TS; 130,000 YS; 14-17 El.
Magnetic, good strength, corrosion resistant.
For steam turbine blades, and components, valves, gas turbine and jet engine parts.

LESCALLOY 600.
M-73; 0.07 C, 0.30 Mn, 0.20 Si, 15 Cr, 7 Fe, bal Ni.
Heat treated: 112,000 TS; 49,000 YS; 41 El, 180 Vickers.
For nuclear reactor parts, turbine components.
High creep and stress-rupture strength
Resists corrosion at elevated temperatures and stress corrosion cracking

LESCALLOY 718.
M-73; 0.03-0.10 C, 17-21 Cr, 50-55 Ni, 1.0 max Co, 5.0-5.5 Cb + Ta, 2.8-3.3 Ti, 0.8 max Al, 3 Mo, 0.006 max B, 0.10 max Cu, bal Fe
Aged: 215,000 TS; 180,000 YS; 18 El.
For aircraft structural parts, space ship components, missiles, gas turbine and jet engine parts.
Age hardenable. High tensile, creep and rupture strength.

LESCALLOY 901.
M-73; 0.05 C, 12.8 Cr, 5.7 Mo, 2.4 Ti, 35.0 Fe, 1 Co, 0.5 max Cu, 0.35 max Al, 0.01-0.02 B, bal Ni.
At 70°F: 180,000 TS, 125,000 YS, 15 El, 20 RA
At 1200°F: 148,000 TS; 106,000 YS; 17 El, 24 RA.
For aircraft and industrial gas turbines, rotors, and compressor discs, structural parts
High creep and rupture strength to 1400°F.
Precipitation hardening, high strength alloy

LESCALLOY 4330 + V.
M-73; 0.30 C, 0.85 Mn, 0.3 Si, 0.35 Cr, 1.8 Ni, 0.4 Mo, 0.07 V, bal Fe.
Vacuum arc structural steel.
Hardened: Up to 235,000 TS; 195,000 YS; 11 El; 47-50 Rock C.
For highly stressed structural parts.

LESCALLOY 4335 + V.
M-73; 0.35 C, 0.75 Mn, 0.5 Si, 0.8 Cr, 1.85 Ni, 0.35 Mo, 0.2 V, bal Fe.
Vacuum arc melted structural steel.
Hardened: Up to 275,000 TS; 240,000 YS; 10 El.
Deep hardening; for highly stressed structural parts.

LESCALLOY 4340 + V.
M-73; 0.40 C, 0.75 Mn, 0.3 Si, 0.8 Cr, 1.8 Ni, 0.2 V, 0.25 Mo, bal Fe.
Vacuum arc melted structural steel.
Hardened: Up to 276,000 TS; 222,000 YS; 11 El in 3½ inch round sections.
Very deep hardening; for highly stressed structural parts.

LESCALLOY 5616.
M-73; 0.18 C, 0.35 Mn, 0.35 Si, 13.0 Cr, 3.0 W, 2.0 Ni, bal Fe.
Heat treated: 145,000 TS; 114,000 YS; 17 El; 53 RA; 302 Brinell.
For jet engine and gas turbine compressor wheels, blades and auxiliary parts.
Heat resistant, creep strength.

LESCALLOY 8620.
M-73; 0.18-0.23 C, 0.40-0.70 Ni, 0.40-0.60 Cr, 0.15-0.25 Mo, bal Fe.
Low alloy steel for case hardening for gears, cam shafts. AISI 8620

LESCALLOY 9310 (AGT).
M-73, 0.10 C, 0.5 Mn, 0.25 Si, 3.25 Ni, 1.2 Cr, 0.12 Mo, bal Fe.
Vacuum arc melted, wrought.
Ht. Tr: 331-363 Brin.
To be carburized for aircraft engine gears and pinions, oil quench.
ASM 6265 A.

LESCALLOY 52100 VAC ARC.
M-73, 1.0 C, 0.35 Mn, 0.3 Si, 1.5 Cr, bal Fe.
Vacuum arc melted, wrought
Hardenable to 60-66 Rc, oil or water quench.
For aircraft engine bearings and instrument bearings for use below 400-450°F.
AMS 6444.

LESCALLOY A-286.
M-73, 0.05 C, 1.5 Mn, 0.75 Si, 15 Cr, 0.3 V, 26 Ni, 1.25 Mo, 2.2 Ti, 0.2 Al, bal Fe.
Heat treated: 160,000 TS, 110,000 YS; 24 El; 43 RA, 302 Brin
For jet engine and supercharger component parts, turbine wheels and blades, nozzles.
High strength and good corrosion at elevated temperatures. Age-hardenable.

LESCALLOY BG66
M-73, 0.85 C, 4.15 Cr, 6.3 W, 1.85 V, 5.0 Mo, bal Fe
This is Type M-2 high speed tool steel, specially melted and processed for very critical high temperature bearings

LESCALLOY D6AC
M 73, 0.46 C, 0.75 Mn, 0.25 Si, 1.10 Cr, 0.60 Ni, 1.0 Mo, 0.12 V, bal Fe.
Heat treated: 228,000-280,000 TS; 195,000-250,000 YS, 7 El, 23-25 RA, C 46-53 Rock.
For solid fuel rocket motor cases, gears, crankshafts
High strength structural steel, tough, shock resistant

LESCALLOY D-979
M-73, 0.04 C, 15 Cr, 45 Ni, 4 Mo, 4 W, 3 Ti, 1 Al, 0.01 B, bal Fe
Bar Heat Treated. 204,000 TS; 146,000 YS, 14 El; 23 RA
For jet engine components, turbine discs
Precipitation hardening. Good strength, oxidation and creep resistant

LESCALLOY EXPANDAL.
M-73, 0.60 C, 5.75 Mn, 0.2 Si, 10.0 Ni, bal Fe.
High thermal expansion alloy; co-efficient of thermal expansion 72° –600°F: 11.5-12.5 × 10^{6} in/in/°F
Austenitic, cold drawn: 140,000 TS.

LESCALLOY JETHETE M-152.
M-73; 0.12 C, 0.7 Mn, 0.12 Si, 11.25 Cr, 2.9 Ni, 1.6 Mo, 0.3 V, 0.035 N, bal Fe.
Nitrogen bearing, vacuum melted, hardenable stainless.

Oil Q & Temp. 900°F: C 45 Rock.
For gas turbine compressor wheels and structural members.

LESCALLOY LINCO.
M-73; 0.30 C, 1.1 Mn, 0.35 Si, 11.5 Cr, 2.75 Mo, 0.25 V, 0.35 Ni, bal Fe.
Oil quenched: C 50-56 Rock.
Tempered at 1150°F: 160,000 TS; 130,000 YS; 15 El.
Magnetic, good strength, corrosion resistant.
For jet engine and gas turbine compressor wheels and auxiliary parts.

LESCALLOY MARVAC 250.
M-73; 0.01 C, 18.25 Ni, 8.0 Co, 5.0 Mo, 0.40 Ti, 0.10 Al, bal Fe.
Vacuum induction melt plus vacuum consumable electrode, maraging steel.
Ann: 290 Brin, Sol. tr. & age: 250,000-265,000 TS; 240,000-255,000 YS; 9-13 El.
For high strength missile and aircraft components; high fatigue properties; weldable.

LESCALLOY MARVAC 300
M-73, 0.01 C, 18.25 Ni, 9.0 Co, 5.0 Mo, 0.65 Ti, 0.10 Al, bal Fe
Double vacuum melted maraging steel.
Ann: 300 Brin, Sol. tr & age: 290,000-300,000 TS, 280,000-290,000 YS; 6-9 El.
For high strength missile and aircraft components; high fatigue properties, weldable.

LESCALLOY MP35N.
M-73, 35 Ni, 35 Co, 20 Cr, 10 Mo
Annealed. 132,000 TS.
Work strengthened and aged: 200,000-300,000 TS; 160,000-290,000 YS, 9-18 El, 17-95 Ft.lbs Charpy.
Good high temp strength and corrosion resistance

LESCALLOY NITRALLOY 135 M.
M-73; 0.40 C, 0.6 Mn, 0.3 Si, 1.6 Cr, 1.2 Al, 0.2 Mo, bal Fe
Vacuum arc melted nitriding steel
Oil Q & Temp. 1200°F: 135,000 TS; 100,000 YS, 16 El; 280-340 Brin.
High case hardness develops when nitrided.
For aircraft gears and shafts

LESCALLOY NITRALLOY N.
M-73, 0.24 C, 0.3 Si, 0.6 Mn, 1.15 Cr, 1.25 Al, 3.5 Ni, 0.25 Mo, bal Fe.
Vacuum arc melted, age hardenable, nitriding steel.
Oil Q & Temp 1200°F C 29 Rc
Nitride (and age) 975°F. Case: C 60 Rock min.
Core. C 38-43 Rock.
For aircraft gears and shafts.

LESCALLOY RENE 95
M-73; 0.15 C, 14.0 Cr, 3.5 W, 3.5 Mo, 8.0 Co, 3.5 Cb, 3.5 Al, 2.5 Ti, 0.05 Zr, 0.010 B, bal Ni.
Properties after sol. tr. and age
Room temp. 230,000 TS; 190,000 YS; 10 El.
1200°F: 210,000 TS; 175,000 YS, 10 El.
Good high temperature creep properties.
For jet engine, gas turbine components.

LESCALLOY SUPER NITRALLOY.
M-73; 0.23 C, 0.25 Si, 0.35 Mn, 0.50 Cr, 2.0 Al, 5.0 Ni, 0.25 Mo, 0.1 V, bal Fe.
Vacuum arc melted, age hardenable, nitriding steel.
Oil Q & Temp. 1275°F: C 30-35 Rock.
Nitride (and age) 1050°F. Case: above C 60 Rock.
Core: 200,000-212,000 TS; 180,000-190,000 YS.
For aircraft gears and shafts.

LESCALLOY-UT18.
M-73; 0.40 C, 0.60 Mn, 0.25 Si, 0.95 Mo, 0.2 Ni, 0.20 V, 3.25 Cr, bal Fe.
Ht. Tr.: 209,000 TS, 173,000 YS; 16 El; 60 RA; 388-429 Brin.
For turbine and compressor rotor shafts.
High strength and good impact resistance up to 1000°F. Heat resistant.

LESCALLOY-UT19.
M-73; 0.16 C, 0.45 Mn, 0.23 Si, 1.25 Cr, 4.25 Ni, 0.25 Mo, bal Fe.
Ht Tr.: 212,000 TS, 145,000 YS; 18 El; 67 RA; 388-444 Brin. (core).
For gears, pinions, shafts, cams, aircraft components.
Carburizing steel, tough and shock resistance.

LESCALLOY V-57.
M-73; 0.08 max C, 0.75 max Si, 0.35 max Mn, 13.5-16.0 Cr, 25.5-28.5 Ni, 1.0-1.5 Mo, 2.7-3.2 Ti, 0.5 max V, 0.1-0.35 Al, 0.005-0.025 B, bal Fe.
At R.T.: 178,000 TS; 128,000 YS, 21 El; 35 RA.
At 1200°F: 140,000 TS; 110,000 YS; 20 El; 30 RA.
For jet engine and missile components, gas turbines, fuel nozzles.
High temperature alloy steel, precipitation hardening, austenitic

LESCALLOY WASPALLOY.
M-73; 0.06 C, 19.5 Cr, 4.0 Mo, 13.5 Co, 1.3 Al, 3.0 Ti, 2.0 max Fe, bal Ni.
Vacuum arc melted high temp. alloy.
Sol tr and age Room temp. prop: 190,000-200,000 TS; 140,000-145,000 YS; 18-20 El
Test at 1000°F 180,000-185,000 TS; 125,000-130,000 YS, 17 El.
Weldable, for structural parts to be used up to 1000°F.

LESCALLOY X-750.
M-73, 0.04 C, 15.5 Cr, 73 Ni, 0.9 Cb + Ta, 2.5 Ti, 0.8 Al, 7.0 Fe
Age Hardened: 170,000 TS; 115,000 YS; 18 El; 25 RA
For turbine wheels, springs, bolts, vanes.
Precipitation hardening, creep resistant to 1500°F.

LESCO BG41.
M-73; 1.05 C, 14.5 Cr, 4.0 Mo, 0.12 V, 0.3 S, bal Fe
For highly stressed bearings for high temperature operation, stainless, retains hot hardness

LESCO BG42.
M-73; 1.15 C, 14.5 Cr, 4.0 Mo, 1.0 V, bal Fe.
For bearings operating in corrosive environment and at high tempearture; stainless, retains hot hardness.

LESCO E.H.W.
M-73; 0.25 C, 15 W, 4 Cr, 0.5 V, bal Fe.
For header, gripper and extrusion dies; hot work steel, oil hardened.

LESCO E.S.A.
M-73; C, W, Cr, bal Fe.
For cutting tools, taps, threading dies, reamers; fast machining, will not resist shock.

LESCO EXTRA.
M-73, C, 0.20-0.35 Mn, bal Fe.
For taps, reamers, twist drills, shear blades; springs, tools; water hardening steel.

LESCO NINETEEN.
M-73; 0.40 C, 0.3 Si, 0.3 Mn, 4.25 Cr, 4.25 W, 2.0 V, 4.25 Co, bal Fe
Hot work die steel; retains 50 Rock C, hardness to 1100°F.
For forging dies, brass extrusion tooling, hot punches, brass die casting dies.
AISI Type H19 Hot work steel.

LESCO SPECIAL.
M-73; C, 0.20-0.35 Mn, bal Fe.
For lathe and planer tools, threading dies, taps, reamers, punches; water hardening.

LESCO STANDARD.
M-73; C, 0.20-0.35 Mn, bal Fe.
For blacksmith tools, cold chisels; cheap grade water hardening tool steel.

LESJOFORS GLA.
M-1459; 0.45 C, 1 Si, 1 Mn, bal Fe
For springs; oil hardened.

LESJOFORS LB8Mn.
M-1459; 0.40 C, 1.5 Mn, bal Fe.
For springs; water hardened, tough.

LESJOFORS LB11.
M-1459; 0.55 C, 0.5 Mn, bal Fe.
For wire ropes; water or oil hardened.

LESJOFORS LB12.
M-1459; 0.60 C, 0.5 Mn, bal Fe.
For wire ropes; water or oil hardened.

LESJOFORS LB13 "LEWI."
M-1459; 0.65 C, 0.6 Mn, bal Fe.
Heat treated: 160,000 TS; 114,000 YS; 12 El, 40 RA; 325 Brin.
For springs; water or oil hardened.

LESJOFORS LB13Mn.
M-1459; 0.65 C, 1.5 Mn, bal Fe.
For springs; oil hardened, tough.

LESJOFORS LB14.
M-1459, 0.70 C, 0.6 Mn, bal Fe.
Heat treated: 175,000 TS; 128,000 YS; 12 El; 37 RA, 355 Brin.
For springs, oil hardened.

LESJOFORS LB15.
M-1459; 0.75 C, 0.5 Mn, bal Fe.
Heat treated: 180,000 TS; 130,000 YS; 10 El; 35 RA; 375 Brin
For springs; oil hardened.

LESJOFORS LB16.
M-1459; 0.80 C, 0.4 Mn, bal Fe.
Heat treated: 188,000 TS; 145,000 YS; 12 El; 35 RA; 390 Brin.
For tools, drills, taps, hobs, reamers; Type W1; water hardened.

LESJOFORS LB50.
M-1459; 0.50 C, 0.8 Mn, 0.1 V, Cr, bal Fe
For springs; oil hardened, tough.

LESJOFORS LB85.
M-1459; 0.40 C, 0.8 Mn, 0.8 Cr, 1.25 Ni, bal Fe.
For gears, shafts, machine tool parts, oil hardened.

LESJOFORS LB145.
M-1459; 0.65 C, 1.3 Si, 0.5 Mn, 0.5 Cr, bal Fe.
For springs, punches; oil hardened, tough.

LESJOFORS LERO.
M-1459; 0.1 C, 18 Cr, 8 Ni, bal Fe.
For springs; Type 302; stainless.

LESJOFORS LSMn.
M-1459; 0.55 C, 1.75 Si, 1.5 Ni, 0.85 Mn, bal Fe.
For springs; oil hardened, tough.

LESJOFORS LSMO.
M-1459; 0.55 C, 1.75 Si, 0.8 Mn, 0.2 Cr, bal Fe.
For springs; oil hardened, tough.

LESTEM.
M-688; C, alloy, bal Fe.
For dies, tools; water hardened, non-tempering.

L.F.M. 4-6 Cr-Mo.
M-573; 0.13-0.20 C, 4-7 Cr, Mo, bal Fe.
For corrosion resistant parts; corrosion resistant.

LFM GR.A.
M-573; 0.15-0.22 C, 0.65-0.85 Mn, 0.35-0.50 Si, bal Fe.
Annealed: 73,000 TS; 41,000 YS; 22 El; 58 RA; 140 Brin.
For nails, rivets, gears, fasteners, fan blades; Type 1020; case hardened.

LFM GR.B.
M-573; 0.20-0.26 C, 0.65-0.85 Mn, 0.35-0.50 Si, bal Fe.
Annealed: 75,000 TS; 45,000 YS; 20 El; 55 RA; 160 Brin.
For rivets, gears, fan blades, fasteners; Type 1022; water hardened.

LFM GR.C.
M-573; 0.25-0.35 C, 0.65-0.80 Mn, 0.35-0.50 Si, bal Fe
Hot rolled: 80,000 TS; 50,000 YS; 30 El; 56 RA; 165 Brin.
For gears, bolts, crankshafts, brackets; Type 1030; water hardened.

LFM GR D
M-573, 0.30-0.40 C, 0.65-0.80 Mn, 0.35-0.50 Si, bal Fe.
Hot rolled: 85,000 TS, 72,000 YS; 26 El, 51 RA; 180 Brin.
For armature shafts, gears, axles, bolts; screws; Type 1035, water hardened

LFM GR E.
M-573; 0.40-0.50 C, 0.65-0.80 Mn, 0.35-0.50 Si, bal Fe.
Hot rolled. 98,000 TS, 59,000 YS; 24 El, 45 RA, 212 Brin.
For axles, gears, bolts, tie rods, rails; Type 1045; water hardened.

LFM GR G
M-573, 0.26-0.32 C, 1.1-1.3 Mn, 0.35-0.50 Si, 0.2-0.3 Mo, bal Fe
For gears, bolts, crankshafts; oil hardened, tough.

LFM GR H.
M-573, 0.4-0.5 C, 0.9-1.2 Mn, 0.3-0.4 Mo, bal Fe
For gears, bolts, crankshafts; oil hardened, tough.

LFM GR.I
M-573, 0.2-0.3 C, 0.65-0.80 Mn, 2.0-2.25 Ni, bal Fe.
For gears, bolts, shafts, machine tool parts; oil hardened, tough.

LFM GR.J
M-573, 0.22-0.33 C, 0.15-0.20 Mo, 0.65-0.80 Mn, bal Fe.
For gears, bolts, machine tool parts; Type 4027; water hardened.

LFM GR K.
M-573, 0.13-0.20 C, 0.4-0.7 Mn, 4.0-6.5 Cr, 0.45-0.65 Mo, bal Fe
For oil refinery equipment; Type 502; creep resistant

LFM GR.L.
M-573; 0.28-0.33 C, 1.0-1.5 Cr, 0.15-0.25 Mo, bal Fe.
For gears, bolts, machine tool parts; Type 4130; oil hardened.

LFM GR.M.
M-573; 0.35-0.45 C, 1.0-1.5 Cr, 0.15-0.25 Mo, bal Fe.
For gears, bolts, crankshafts, machinery parts; Type 4140; oil hardened.

LFM GR.N.
M-573; 0.13-0.20 C, 1.0-1.5 Cr, 0.45-0.65 Mo, bal Fe.
For gears, bolts, camshafts, cams; Type 4115; case hardened.

LFM GR.O.
M-573; 0.15-0.20 C, 1.25-1.75 Cr, 2.25-2.75 Ni, 0.2-0.4 Mo, bal Fe.
For gears, bolts, camshafts, cams; case hardened, tough.

LFM GR P.
M-573; 0.25-0.35 C, 1.2-1.7 Cr, 2.2-2.7 Ni, 0.2-0.4 Mo, bal Fe.
For gears, bolts, crankshafts; oil hardened, tough.

LFM GR.R.
M-573; 0.55-0.65 C, 2.0-2.5 Cr, 0.35-0.40 Mo, bal Fe
For dies, crimpers, upsetters; oil hardened, tough.

LFM GR.S.
M-573; 0.28-0.35 C, 2.75-3.25 Cr, 0.20-0.30 Mo, bal Fe.
For oil refinery equipment, creep resistant.

LFM GR.T.
M-573; 0.16-0.25 C, 0.45-0.65 Mo, 0.65-0.80 Mn, bal Fe
For housings, machine tool parts; Type WC1; water hardened

LIBERTY.
M-260, M-38, 1.2 C, 0.3 Cr, 1.2 W, bal Fe.
For broaches, reamers, dies, water hardening; tough.

LIBERTY PISTONS
77 Al, 21 Zn, 1.1 Cu, 0.5 Fe
For pistons, non-heat treatable

LICHTENBERG FUSIBLE ALLOY.
Germany; 50 Bi, 20 Sn, 30 Pb.
For boiler saftey plugs, fire extinguishers, M.P 75°C.

LICO
M-802, 0.3 C, bal Fe
For castings, water hardening

LIDDEL'S ALLOY
90-88 Zn, 6.5-5.0 Cu, 6.5 Al
For die castings.

LIDEOX
M-1521, Hg, Be, S, Li, bal Cu
For condensers, anti-biofouling.

LIEBKNECHT WHITE GOLD.
80 Au, 13.9 Ni, 5 Zn, 1 Cu, 0.1 Pd.
For jewelry; corrosion resistant

LIGHT DUTY BEARINGS-1.
90-80 Pb, 10-17 Sb, 10-0 Sn, 0-1 Cu
For bearings; light duty.

LIGHT DUTY BEARINGS-2.
83.3 Pb, 9.8 Sb, 6.9 Sn.
For light duty bearings; anti-friction.

LIGMALLOY.
M-1159
For molded bearings

LILY BRAND NO. 1
M-405; 10 Sn, 2 Zn, 0.5 max Pb, 1.0 max Ni, bal Cu.
Cast: 44,800 TS; 20,200 YS; 40 El; 75 Brin.
For bearings, hardware, machine tool parts; Gun Metal BS1400G1C.

LILY BRAND NO. 2.
M-405; 10 min Sn, 0.05 min Zn, 0.5 min P, bal Cu.
Cast: 40,400 TS; 22,400 YS; 14 El; 95 Brin.
For bearings, hardware; Bronze BS1400PB1C.

LILY BRAND NO. 3.
M-405; 8 Sn, 4 Zn, 0.5 max Pb, 1.0 max Ni, bal Cu.
Cast: 44,800 TS; 20,200 YS, 38 El; 70 Brin.
For bearings, hardware, machine tool parts; Gun Metal BS1400G2C.

LILY BRAND NO. 4.
M-405; 5 Sn, 5 Zn, 5 Pb, 1 max Ni, bal Cu.
Cast. 36,000 TS; 15,700 YS; 25 El; 60 Brin.
For hardware, machine tool parts; Gun Metal BS1400LG2C.

LILY BRAND NO 5.
M-405; 7 Sn, 5 Zn, 2 Pb, 1.0 max Ni, bal Cu.
Cast: 40,400 TS, 18,000 YS; 35 El, 60 Brin.
For hardware, plumbing; Gun Metal BS1400LG3C.

LILY BRAND NO. 7.
M-405; 10 min Sn, 0.05 min Zn, 0.5 min P, bal Cu.
Cast 49,300 TS; 26,900 YS, 3 El, 110 Brin.
For bearings, hardware; Bronze BS1400PB1C

LILY BRAND NO 8
M-405, 12 Sn, 0.3 max Zn, 0.5 max Pb, 0.5 max Ni, 0.15 min P, bal Cu.
Cast. 40,400 TS; 20,200 YS, 10 El, 100 Brin.
For bearings, hardware; Bronze BS1400PB2C.

LILY BRAND NO 9.
M-405, 12 Sn, 0.3 max Zn, 0.5 max Pb, 0.15 min P, bal Cu
Cast 44,800 TS; 22,400 YS; 4 El, 120 Brin
For bearings, hardware, Bronze BS1400PB2C.

LILY BRAND NO 10
M-405; Sn, P, Ni, bal Cu.
Cast 42,600 TS, 25,700 YS; 8 El, 115 Brin
For bearings, hardware; P-Bronze.

LILY BRAND NO. 12.
M-405, 10 Sn, 10 Pb, 1.5 max Ni, 0.3 max P, bal Cu
Cast 35,900 TS; 13,500 YS, 8 El, 85 Brin.
For bearings, hardware; free-cutting, Leaded Bronze BS1400LB2C

LILY BRAND NO. 13.
M-405, 10 Sn, 10 Pb, 1.5 max Ni, 0.3 max P, bal Cu.
Cast. 40,400 TS, 4 El; 100 Brin.
For bearings, hardware; Leaded Bronze BS1400LB1C

LILY BRAND NO 15
M-405, 10 Al, 5 Ni, 4 Fe, 1.5 max Mn, bal Cu.
Cast 94,100 TS, 38,100 YS, 15 El, 170 Brin.
For bearings, propellers, hardware, machine tool parts; Al-Bronze BS1400AB2C.

LILY BRAND NO. 16
M-405; Al, bal Cu
Cast: 92,000 TS; 74,000 YS, 6 El; 300 Brin
For non-sparking tools; Al-Bronze, corrosion resistant.

LILY BRAND NO 17.
M-405; 1.5 max Sn, 0.5 max Pb, 2.5 max Al, 1.2 Fe, 3 max Mn, 55 min Cu, bal Zn
Cast: 76,200 TS; 36,000 YS; 24 El, 130 Brin.
For propellers, hardware, marine parts; Mn-Bronze BS1400HTB1C.

LILY BRAND NO 18.
M-405; 1 max Sn, 1-5 Pb, 66-73 Cu, bal Zn.
Cast: 33,600 TS; 35 El.
For hardware, Commercial Brass BS1400B2.

LILY BRAND NO. 19.
M-405; Zn, bal Cu.
Cast: 33,600 TS; 35 El.
For hardware; Commercial Brass BS1400B3.

LILY PHOSPHOR BRONZE.
M-576; 5 Sn, 0.05 P, bal Cu.
For bushings, bearings; chill cast.

LINCO see **LESCALLOY LINCO**

LINCOLNWELD L-50.
M-578; C, bal Fe.
Submerged arc welding electrode. AWS Class EM13K.

LINCOLNWELD L-60.

Submerged arc welding electrode.

LINDENBERG 55SWC.
M-1319; 0.55 C, 0.9 Si, 1.05 Cr, 0.18 V, 1.85 W, bal Fe.
For cold work tools and dies; oil hardened

LINDENBERG A3V.
M-1319; 1.4 C, W, V, bal Fe.
For fast finishing cutters, tools; water hardened.

LINDENBERG A18V80.
M-1319; 0.74 C, 4 Cr, 1.1 V, 18.5 W, bal Fe.
For lathe and planer tools, reamers, hobs, taps, high speed steel.

LINDENBERG A18V150Co
M-1319; 0.79 C, 4.7 Co, 4.3 Cr, 0.75 Mo, 1.5 V, 18 W, bal Fe.
For lathe and planer tools, reamers, hobs, taps; high speed steel.

LINDENBERG A300.
M-1319, 1.65 C, Cr, Co, bal Fe.
For blanking and forming dies, air hardened, non-deforming.

LINDENBERG A600
M-1319; 1.45 C, 1.4 Cr, 0.6 Mn, bal Fe
For bearings, liners, sleeves; water hardened

LINDENBERG BFH
M-1319; 0.55 C, 1.05 Cr, 0.18 V, 1.85 W, bal Fe.
For cold work tools, header dies, punches; oil hardened, tough.

LINDENBERG BLA702.
M-1319, 0.5 C, 1.05 Cr, 3.25 Ni, bal Fe
For gears, pinions, crankshafts, bolts, fasteners; oil hardened, shock resistant.

LINDENBERG C615.
M-1319; 1.0 C, 1.1 Cr, 0.07 Mn, bal Fe.
For bearings, liners, sleeves, cutters; water hardened, wear resistant.

LINDENBERG CCN.
M-1319; 2.1 C, 11.5 Cr, 0.3 Mn, bal Fe.
For forming and blanking dies, punches; oil hardened, nondeforming.

LINDENBERG CCNW.
M-1319; 2.1 C, 11.5 Cr, 0.7 W, bal Fe.
For forming and blanking dies, punches; oil hardened, nondeforming.

LINDENBERG EXTRA 2.
M-1319; 1.3 C, 0.25 max Si, 0.25 max Mn, bal Fe.
For engravers tools, form cutters, reamers; Type W1; water hardened.

LINDENBERG EXTRA 3.
M-1319; 1.15 C, 0.25 max Si, 0.25 max Mn, bal Fe.
Annealed: 110,000 TS; 55,000 YS; 20 El; 40 RA; 210 Brin
For drills, taps, reamers, milling cutters; Type W1; water hardened.

LINDENBERG EXTRA 4.
M 1319; 1.0 C, 0.25 max Si, 0.25 max Mn, bal Fe.
Annealed 100,000 TS; 53,000 YS; 21 El; 42 RA; 200 Brin.
For drills, taps, reamers, springs, hobs; Type W1; water hardened.

LINDENBERG EXTRA 5
M-1319, 0.85 C, 0.25 max Si, 0.25 max Mn, bal Fe
Heat treated 190,000 TS; 145,000 YS, 10 El; 30 RA, 400 Brin.
For drills, springs, tools, cutters, taps, hobs; Type W1, water hardened

LINDENBERG EXTRA 6.
M-1319, 0.70 C, 0.25 max Si, 0.25 max Mn, bal Fe
Heat treated: 175,000 TS, 130,000 YS, 12 El; 37 RA; 355 Brin
For springs, rails, hammers, tools, Type W1; water hardened

LINDENBERG HSO
M-1319, 1.0 C, 1.1 Cr, 0.07 Mn, bal Fe.
For bearings, bushings, liners, water hardened, wear resistant.

LINDENBERG HW3MH
M-1319, 1.1 C, 0.25 max Si, 0.25 max Mn, bal Fe
Annealed 110,000 TS, 58,000 YS, 18 El, 40 RA; 210 Brin
For springs taps, cutters, drills, reamers; Type W1; water hardened.

LINDENBERG HW4ZH
M-1319; 1.0 C, 0.25 max Si, 0.25 max Mn, bal Fe
Heat treated: 185,000-130,000 TS, 120,000-80,000 YS, 10-20 El, 30-45 RA; 380-270 Brin
For springs, taps, drills, reamers, hobs; Type W1; water hardened

LINDENBERG HW5Z
M 1319, 0.85 C, 0.25 max Si, 0.25 max Mn, bal Fe
Heat treated 190,000-130,000 TS; 145,000-88,000 YS, 12-20 El; 35-50 RA, 390-255 Brin
For drills, taps, reamers, springs; Type W1, water hardened.

LINDENBERG IL15
M-1319, 0.80 C, 4.1 Cr, 0.85 Mo, 1.5 V, 8.7 W, bal Fe
For lathe and planer tools, reamers, broaches, taps, high speed steel.

LINDENBERG IL25
M-1319; 0.86 C, 4.1 Cr, 0.85 Mo, 2.5 V, 12 W, bal Fe.
For lathe and planer tools, drills, taps, hobs; high speed steel.

LINDENBERG IL35.
M-1319, 0.86 C, 2.8 Co, 4.3 Cr, 0.85 Mo, 2.1 V, 12 W, bal Fe.
For lathe and planer tools, reamers, broaches, hobs; high speed steel.

LINDENBERG IL45.
M-1319; 1.3 C, 4.3 Cr, 0.85 Mo, 3.8 V, 12 W, bal Fe.
For engravers tools, blanking and forming dies; high speed steel.

LINDENBERG IL45Co.
M-1319; 1.35 C, Co, 4 Cr, V, Mo, W, bal Fe.
For forming and blanking dies, engravers tools; high speed steel.

LINDENBERG IL232.
M-1319; 0.95 C, W, Mo, Cr, V, bal Fe.
For reamers, hobs, broaches, taps; high speed steel.

LINDENBERG K.
M-1319; 0.55 C, 0.90 Si, 0.30 Mn, 1.05 Cr, 0.18 V, 1.85 W, bal Fe.
For heading dies, punches, upsetters; oil hardened, tough.

LINDENBERG NWNH2.
M-1319; 1.65 C, Cr, Co, bal Fe.
For blanking and punching dies; oil hardened, tough.

LINDENBERG RS
M-1319; 1.65 C, 11.5 Cr, 0.10 V, bal Fe
For blanking and forming dies, punches; air hardened, non-deforming.

LINDENBERG T18V.
M-1319, 1.05 C, 1.15 W, 1.0 Cr, 0.90 Mn, bal Fe.
For cold work tools, heading dies; oil hardened, tough

LINDENBERG WLH
M-1319, 0.56 C, Ni, Cr, Mo, V, bal Fe
For upsetting and forging dies; oil hardened, tough

LINEAR METAL.
M-494, 3.3 C, 1 Si, 0.2 P, bal Fe
Cast 180-220 Brin
For castings, cylinder liners; cast iron

LINOTYPE
85 Pb, 11 Sb, 3.5 Sn
11,700 TS, 9 El, 21 Brin
For type metal, cheap alloy, M P 476°F

LION
M-69; 0.6-1.4 C, bal Fe
For tools general tools, broaches, chisels, dies, knives, files; water hardened

LION
M-389; 0.7-0.9 C, bal Fe
For tools, drills, taps; water hardening.

LION
M-1415; 0.70 C, 14 W, 3.5 Cr, 0.6 V, bal Fe.
For tools, reamers, hobs, drills, broaches, high speed steel

LION 22%.
M-1415, 0.75 C, 22 W, 4.5 Cr, 1.2 V, bal Fe.
For lathe and planer tools, hobs, reamers, drills; high speed steel.

LION BRAND ANTIFRICTION METAL.
M-413; 5-15 Sn, 10-15 Sb, bal Pb
For bearings for rolling mills and stone crushers; for heavy pressures and high speeds.

LION BRAND PLASTIC WHITE METAL.
M-413, 3-10 Sb, 1-3 Cu, 10-17 Pb, bal Sn.
For main bearings for marine engines; Babbitt.

LION EXTRA.
M-69; 0.6-1.3 C, 0.25 Si, 0.3 Mn, bal Fe.
For drills, hobs, reamers, taps, broaches; Type W1, water hardened.

LION G.19.F.
M-1415; 0.90 C, 2 Mn, bal Fe.
For taps, dies, reamers, forming dies; oil hardened, non-deforming.

LION G.19.H.
M-1415; 0.90 C, 0.45 Si, 1.25 Mn, 0.5 W, 0.5 Cr, bal Fe.
For taps, dies, reamers, forming dies; oil hardened, non-deforming.

LION H 18.V.
M-1415, 1.0 C, 1.5 Cr, 0.2 V, bal Fe.
For taps, dies, forming rolls, broaches, reamers; oil hardened, wear resistant.

LION K.15.
M-1415, 0.30 C, 13 Cr, S, bal Fe.
Annealed 95,000 TS; 50,000 YS; 25 El; 55 RA; 196 Brin
For stainless screw machine products, free-cutting, corrosion resistant.

LION P 16.
M-1415; 1.0 C, 1.0 Mn, 0.75 W, 0.75 Cr, bal Fe.
For blanking and forming dies, reamers, broaches; oil hardened, non-deforming.

LION PEG STEEL 5.5.0
M-1415, 0.5 C, 14 W, 3 Cr, 0.5 V, bal Fe.
For hot punches, core and die inserts; hot work steel, oil hardened

LION R 19.
M-1415, 0.25 C, 13 Cr, bal Fe.
Annealed. 95,000 TS, 50,000 YS, 25 El; 55 RA, 196 Brin
For dies, cutlery, valves, Type 420; corrosion resistant.

LION REGENT.
M-1415, 0.8 C, 20 W, 5 Cr, 1.25 V, 18 Co, 0.75 Mo, bal Fe
For cutting tools, broaches, milling cutters; high speed steel.

LION SPECIAL
M-1415, 0.75 C, 19 W, 4.25 Cr, 1.25 V, 8 Co, 0.75 Mo, bal Fe
For lathe and planer tools, hobs, drills, high speed steel

LISCO
M-802, 0.35 C, bal Fe.
For castings; water hardening

LITHALOYS
M-1050; Li-Cu.
For master alloy for Cu castings, for sound castings.

LITHIUM-CALCIUM
M 315, 50 Li, 50 Ca
For deoxidizer, metallurgical applications.

LITHIUM-CONDUCTIVITY BRONZE.
M-315, 98 min Cu, 2 max Cd, Sn, Si.
For high strength conductors, bronze treated with Li with increased conductivity.

LITHIUM-COPPER.
M-315, Li, bal Cu.
Annealed. 31,500-36,500 TS, 72-60 El
For electrical conductors; high conductivity, oxygen free.

LITHOBRAZE 720 (BT).
M-63; 71.3-72.3 Ag, 0.15-0.30 Li, bal Cu.
For brazing alloy for stainless steels; M.P. 1435°F; eutectic alloy. AWS BAg-8a.

LITHOBRAZE 925.
M-63; 92.5 Ag, 7.3 Cu, 0.2 Li.
For high temperature brazing; M.P. 1435-1635°F; for short time operation to 900°F, continuous to 500°F. AWS BAg-19.

LITINUM BRONZE.
Eng.; 90 Cu, 4.7 Sn, 3.86 Zn, 1.6 Pb.
For nuts, bushings, bearings, screw machine parts; free-cutting.

LITTITE.
M-1479; 3 C, Si, Mn, alloy, bal Fe.
For gears, shafts, machine tool housings; cast iron.

LITTLES SPECULUM.
65 Al, 31 Sn, 2.3 Zn, 1.9 As.
For mirrors, reflectors; high polish.

L-IV.
M-116; 4 Cu, 2 Si, bal Al.
Heat treated: 43,000 TS; 36,000 YS; 4 El.
For light alloy parts; same as "Lautal."

L.L.C.T.
M-260, M-38; 0.2 C, 4 Cr, 0.5 V, 15 W, bal Fe.
For hot work dies and tools, shear blades, crowning tools; tough and heat resistant.

L.M.
M-620; 0.75 Si, 4.75 Cu, 0.75 Mn, bal Al.
58,000-65,000 TS; 20-18 El.
For light alloy parts; age-hardenable.

L.M.-0.
M-302; 4 Si, 1.5 Cu, bal Al
23,000-28,000 TS; 4-3 El.
For light alloys, food handling machinery; age-hardenable.

LM 1.
M-28; 7 Cu, 3 Si, 3 Zn, bal Al.
Sand cast. 19,000 TS; 12,300 YS, 73 Brin
Permanent mold: 24,600 TS; 15,700 YS; 1 El; 80 Brin.
For general purpose castings; Brit. DTD428.

LM 2 TYPE 1.
M-28; 1.1 Cu, 10.3 Si, bal Al.
Sand cast: 21,300 TS; 9,800 YS; 2 El; 70 Brin.
For pressure tight castings; corrosion resistant

LM 2 TYPE 2.
M-28; 2.1 Cu, 10.3 Si, 0.9 Zn, bal Al.
Permanent mold. 25,500 TS, 12,000 YS; 2 El; 78 Brin.
For pressure tight castings, corrosion resistant

LM 4.
M-28; 3 Cu, 5 Si, 0.5 Mn, bal Al.
Sand cast: 22,400 TS; 12,300 YS; 2.5 El; 65 Brin.
Permanent mold: 23,500 TS; 12,300 YS; 2.5 El, 70 Brin.
For pressure tight castings; Brit. DTD424, age hardenable.

LM 6.
M-28; 11.3 Si, bal Al.
Sand cast: 25,700 TS; 9000 YS; 7 El; 55 Brin.
Die cast: 34,000 TS; 10,200 YS; 10 El; 60 Brin.
For pressure tight thin wall castings; Brit. BS3L[illegible], corrosion resistant

LM 20.
M-28; 11.5 Si, bal Al.
Sand cast: 25,200 TS; 8900 YS; 5.0 El; 55 Brin.
Die cast: 31,400 TS; 9500 YS; 7.5 El; 60 Brin.
For pressure tight castings; Brit. LM20M, corrosion resistant.

LM 21.
M-28; 3 Cu, 5 Si, 0.5 Mn, bal Al.
Sand cast: 20,200 TS; 1.5 El.
Permanent mold: 22,400 TS, 1.5 El.
For general engineering castings; Brit. LM21M, corrosion resistant.

LM 24
M-28; 3.5 Cu, 8.5 Si, bal Al
Permanent mold: 25,700 TS, 1.5 El.
For general engineering castings; Brit LM24M, corrosion resistant.

LM 630
M-1031; 6 Al, 3 Zn, 0.2 Mn, bal Mg
Cast: 27,000 TS, 5 El, 50 Brin.
Heat treated. 38,000 TS; 5 El; 73 Brin
For light alloy castings, heat treatable.

LM 920
M-1031, 9 Al, 2 Zn, 0.1 Mn, bal Mg.
Cast: 24,000 TS, 2 El, 65 Brin.
Heat treated 40,000 TS, 2 El, 87 Brin
For light alloy castings, heat treatable

L M S
Eng, Pb-Sn-Sb.
For bearings, anti-friction.

LMW.
M-1, 0.7 C, 3.25-4.25 Cr, 1.25-2 W, 0.75-1.5 V, 7.5-9.5 Mo, (Co), bal Fe
For reamers, lathe tools, drills, broaches, dies, hot work dies, cutting tools, high speed steel

LMW V
M-1, 1.0 C, 3.75 Cr, 2.0 V, 1.75 W, 8.75 Mo, bal Fe
High speed steel for cutting tools, molybdenum type, AISI M7

L-NICKEL
M-68, 99.4 Ni, 0.1 Cu, 0.15 Fe, 0.2 Mn, 0.05 Si, 0.02 max C
Annealed 55,000-75,000 TS, 15,000-25,000 YS, 55-35 El, 75-60 RA, 80-100 Brin
For immersion heaters, corrosion and heat resisting

LOADED IRON
M-494, 3.3 C, 2.2 Si, 1 Cr, 0.4 P, bal Fe
320 Brin
For cylinder liners, cast iron

LO-AIR
M-114, 0.7 C, 2.25 Mn, 1.0 Cr, 1.35 Mo, bal Fe
Ht Tr: 293,000 TS, 264,000 YS, 560 Brin.
For blanking, piercing and embossing dies
Type A6 Air hardening, wear resistant.

LOCKALLOY
M-646; 38 Al, 62 Be
Sheet: 56,000 TS, 44,000 YS, 8 El
At 400°F 44,000 TS, 40,000 YS, 11 El
For nuclear fuel canning, gyro cages, aircraft brakes, computer memory drums and discs, spacecraft parts, missiles, satellite launch vehicles.
High modulus, low density alloy.

LOCKPORT SPECIAL
M-373; 0.7 C, 18 W, 4 Cr, 2 V, bal Fe.
For tools, cutters; high speed steel

LOCOMOTIVE TUBE.
Eng; 97 Cu, 3 Ni
For tubes for locomotives; corrosion resistant

LO CRO 4-6.
M-38; 0.20 C, 4-6 Cr, bal Fe
For corrosion resisting parts; corrosion resistant

LO CRO 4-6 MO
M-38; 0.20 max C, 4-6 Cr, 0.4-0.6 Mo, bal Fe.
For corrosion resisting parts; corrosion resistant.

LO CRO 4-6 W.
M-38, M-260; 0.20 max C, 4-6 Cr, 0.75-1.25 W, bal Fe.
For high temperature studs, bolts; corrosion resistant

LO-CRO TYPE 501.
M-38; 0.10 min C, 4-6 Cr, bal Fe
For oil refineries; corrosion resistant.

LO-CRO TYPE 502
M-38; 0.1 max C, 4-6 Cr, bal Fe
For oil refineries, corrosion resistant

LODED CENTRICAST.
M-494, 3.2 C, 2.8 Si, 0.8 Cr, bal Fe
Cast. 36,000 TS, 240-300 Brin
For cylinder liners, centrifugal

LODEX.
M 60, Fe, Co single domain particle
Permanent magnet material
Anisotropic or isotropic
Pressed or extruded shapes
Uniform magnetic and physical properties

LO-EX
M-299, 0.5-1.3 Cu, 0.8-1.5 Mg, 11-13 Si, 2-3 Ni, bal Al
Sand cast 37,000 TS, 35,900 YS, 0 El, 125 Brin
Permanent mold 44,800 TS, 42,600 YS, 0 El, 130 Brin
For pistons, age hardenable

LO-EX
M-1220, M 541; 0.5-1.0 Cu, 12.8 Si, 0.8 Mg, 2.2 Ni, bal Al
Cast 36,000-47,000 TS, 36,000-46,000 YS; 0.2-0.5 El, 120-135 Brin
For pistons, sleeves, bushings, low thermal expansion

LO-EX ALLOY
M-137, 11-13 Si, 1.0-2.5 Ni, 1.0 Mg, 0.7 Cu, bal Al
Cast 26,000 TS, 23,000 YS, 0.5 El, 75 Brin.
Heat treated 38,000 TS, 33,000 YS, 0.5 El; 140 Brin
For pistons, low thermal expansion

LOFLEX.
M-237; bimetal
For thermostatic bimetal, maximum temperature 800°F.

LO-FLO NO. S-0
M-1243
For silver solder; M P. 1500°F

LO-FLO NO S-1.
M-1243
For silver solder; M P 1300-1400°F

LO-FLO NO. S-4
M-1243
For silver solder, M P. 1150°F.

LOGAN.
M-802; 0.4 C, bal Fe
For castings; water hardening.

LOGAN FORGING BRASS
M-122; 58.5 Cu, 2 Pb, bal Zn.
Extruding: 61,000 TS; 32,000 YS; 40 El; 104 Brin.
For brass forgings, hot pressings.

LOGAN (W2 Grade 4).
M-1705; 1.0 C, 0.25 Mn, 0.25 Si, bal Fe.
Water hardening tool steel; AISI W2.

LOHETE
M-345. For thermostats; heat resistant thermostatic metal.

LOHM.
M-44; 7.0-7.5 Ni, bal Cu.
Wrought. 50,000-100,000 TS
For electrical equipment, radio rheostats.
Low electrical resistance, maximum operating temperature 200°C.

LOHMANIT.
W + Mo carbides (chiefly W_2C.).
For hard cutting tools and dies; cast alloy.

LOHMANN 120
M-1311, 1.2 C, 0.25 max Si, 0.25 max Mn, bal Fe.
Annealed 115,000 TS, 60,000 YS; 18 El; 38 RA; 225 Brin
For springs, taps, drills, cutters, broaches, Type W1, water hardened.

LOHMANN A37
M-1311; 0.85 C, Cr, bal Fe
For tools, sprmgs, bearings, dies; water hardened

LOHMANN BCNi.
M-1311, 0.55 C, 1.05 Cr, 3.25 Ni, bal Fe.
For gears, bolts, fasteners, crankshafts; oil hardened, shock resistant

LOHMANN C112/50
M-1311, 1.05 C, Cr, bal Fe
For bearings, liners, cutters; water hardened, wear resistant.

LOHMANN Co 3
M-1311, 0.86 C, 2.8 Co, 4.3 Cr, 0.85 Mo, 2.1 V, 12 W, bal Fe
For lathe and planer tools, reamers, broaches, high speed steel

LOHMANN Co 5
M 1311, 0.79 C, 4.7 Co, 4.3 Cr, 0.75 Mo, 1.5 V, 18 W, bal Fe
For lathe and planer tools, reamers, broaches, drills, taps; high speed steel.

LOHMANN Co 10
M-1311, 0.76 C, 10 Co, 4.2 Cr, 0.8 Mo, 1.8 V, 18 W, bal Fe
For lathe and planer tools, reamers, drills, cutters; high speed steel.

LOHMANN E75
M-1311, 0.75 C, 0.25 max Si, 0.25 max Mn, bal Fe
Heat treated: 175,000 TS, 130,000 YS; 12 El; 35 RA; 355 Brin.
For springs, rails, punches, tools, water hardened.

LOHMANN E85.
M-1311; 0.85 C, 0.25 max Si, 0.25 max Mn, bal Fe.
Heat treated. 190,000 TS, 145,000 YS; 10 El; 30 RA; 400 Brin
For springs, tools, punches, drills, taps; Type W1, water hardened

LOHMANN E95
M-1311; 0.95 C, 0.25 max Si, 0.25 max Mn, bal Fe.
Heat treated: 195,000 TS; 150,000 YS; 8 El, 28 RA; 420 Brin.
For drills, taps, reamers, broaches; Type W1; water hardened.

LOHMANN E120
M-1311, 1.1 C, 0.25 max Si, 0.25 max Mn, bal Fe.
Annealed: 110,000 TS; 55,000 YS; 20 El; 40 RA; 210 Brin.
For springs, taps, drills, hobs, reamers; Type W1; water hardened.

LOHMANN GP35.
M-111; 1.5 C, Cr, Si, bal Fe.
For engravers' tools, forming and blanking dies; water or oil hardened.

LOHMANN GS125
M-111; 1.2 C, 0.20 Cr, 0.10 V, 1.0 W, bal Fe.
For fast finishing cutters, bushings; water or oil hardened.

LOHMANN GSNi.
M-111, 0.56 C, Ni, Cr, Mo, V, bal Fe.
For gears, bolts, crankshafts, machine tool parts; oil hardened, shock resistant

LOHMANN HCS.
M-1311, 1.25 C, 1.15 Si, 0.7 Mn, 1.2 Cr, bal Fe
For header dies, punches, bushings; water or oil hardened.

LOHMANN HKL.
M-1311, 0.58 C, 0.95 Mn, 1.0 Cr, 0.09 V, bal Fe.
For gears, springs, crankshafts, oil hardened, shock resistant.

LOHMANN HKM.
M-1311, 1.0 C, 0.1 V, 0.25 Mn, bal Fe
For header dies, punches, bearings, Type W2, water or oil hardened

LOHMANN HPW.
M-1311; 0.38 C, Si, Cr, V, bal Fe
For machine tool parts, oil hardened, tough

LOHMANN HPW EXTRA
M-1311, 0.45 C, Si, Cr, V, bal Fe
For springs, gears, crankshafts, oil hardened, tough

LOHMANN HPWH
M-1311, 0.55 C, 0.9 Si, 1.05 Cr, 0.18 V, 1.85 W, bal Fe
For header dies, shears, grippers, oil hardened, tough.

LOHMANN HPWW
M-1311; 0.35 C, 0.9 Si, 1.05 Cr, 0.18 V, 1.85 W, bal Fe
For header dies, shears, grippers, oil hardened, tough

LOHMANN HSL
M-1311, 2.1 C, 11.5 Cr, 0.30 Mn, bal Fe.
For blanking and forming dies, punches; oil hardened, non-deforming

LOHMANN HSL EXTRA
M-1311; 1.65 C, 11.5 Cr, 0.1 V, 0.3 Mn, bal Fe
For blanking and forming dies, punches; air hardened, non-deforming

LOHMANN HSL SPEZIAL
M-1311, 2.1 C, 11.5 Cr, 0.3 Mn, bal Fe.
For blanking and forming dies, punches, oil hardened, non-deforming.

LOHMANN HSO-111
M-1311; 1.45 C, 1.4 Cr, 0.6 Mn, bal Fe.
For bearings, punches, bushings; water hardened, wear resistant.

LOHMANN HSO-121.
M-1311, 1.05 C, 1.0 Cr, 1.15 W, 0.9 Mn, bal Fe
For header dies, cutters, upsetters, oil or water hardened, tough.

LOHMANN HSO EXTRA.
M-1311; 1.15 C, 0.1 V, 0.65 Cr, 0.3 Mn, bal Fe
For dies, cutters, punches, oil hardened, tough.

LOHMANN HSO SPEZIAL.
M-1311; 0.90 C, 1.9 Mn, 0.1 V, bal Fe.
For punches, dies, shears, crimpers; oil hardened, non-deforming.

LOHMANN HWR.
M-1311; 1.42 C, W, V, bal Fe.
For header dies, cutters; oil or water hardened.

LOHMANN HWS.
M-1311; 0.30 C, 1.1 Cr, 0.18 V, 3.75 W, bal Fe.
For extrusion rams and liners, punches, riveters; oil hardened, tough

LOHMANN HWS EXTRA.
M-1311, 0.30 C, 2.35 Cr, 0.6 V, 4.25 W, bal Fe.
For extrusion rams and liners, punches; oil hardened, tough.

LOHMANN HWS SPEZIAL
M-1311; 0.30 C, 2.65 Cr, 0.35 V, 8.5 W, bal Fe
For extrusion rams and liners, punches; oil hardened, tough

LOHMANN K12
M 1311, 2.1 C, 11.5 Cr, 0.30 Mn, bal Fe.
For blanking and forming dies, punches; oil hardened, non-deforming.

LOHMANN K11
M 1311, 1.0 C, 1.55 Cr, 0.35 Mn, 0.35 Si, bal Fe
For bearings, cutters, forming dies; oil or water hardened, wear resistant

LOHMANN KM12
M 1311, 1.65 C, 11.5 Cr, 0.1 V, bal Fe
For blanking and forming dies, punches, air hardened, non-deforming

LOHMANN KS15V
M-1311, 1.45 C, 1.4 Cr, 0.6 Mn, bal Fe
For bearings, liners, bushings, water hardened, wear resistant

LOHMANN KS85
M-1311, 1.15 C, 0.65 Cr, 0.10 V bal Fe
For cutters, header dies, blanking dies; oil hardened, tough

LOHMANN KST
M 1311, 0.58 C, 1.0 Cr, 0.1 V, bal Fe
For springs, gears, forging dies, crankshafts; oil hardened, shock resistant.

LOHMANN KWS45
M-1311, 0.45 C, 1.05 Cr, 0.18 V, 1.85 W, bal Fe
For header dies, upsetters, shears, punches; oil hardened, tough

LOHMANN KWS55
M-1311; 0.55 C, 0.9 Si, 1.05 Cr, 0.18 V, 1.85 W, bal Fe
For header dies, punches, tools, shears; oil hardened, tough

LOHMANN KWS75
M-1311, 0.35 C, 1.05 Cr, 1.85 W, 0.18 V, bal Fe
For heading dies, upsetters, piercers, tools; oil hardened, tough

LOHMANN KZV30
M 1311, 0.80 C, W, Cr, V, bal Fe.
For tools, cutters, oil hardened.

LOHMANN L161.
M-1311, 1.65 C, 11.5 Cr, 0.3 V, bal Fe.
For blanking and forming dies, punches; air hardened, non-deforming.

LOHMANN LC SPEZIAL.
M-1311; 2.1 C, 11.5 Cr, 0.7 W, 0.3 Mn, bal Fe
For blanking and forming dies; oil hardened, non-deforming.

LOHMANN LMS125.
M-1311; 1.2 C, W, bal Fe.
For cutters, forming rolls, header dies; oil hardened.

LOHMANN LMS200.
M-1311; 1.15 C, W, bal Fe.
For header dies, forming rolls, cutters; oil hardened.

LOHMANN MC 100.
M-1311; 1.05 C, Mn, Cr, bal Fe.
For bearings, liners, bushings; water hardened, wear resistant.

LOHMANN MSV4.
M-1311; 0.7 C, 0.25 max Si, 0.25 max Mn, bal Fe.
Heat treated: 175,000 TS; 128,000 YS; 12 El; 37 RA; 355 Brin.
For springs, rails, tools, hammers, axes; Type W1; water hardened.

LOHMANN MSVE.
M-1311; 1.0 C, 0.25 max Si, 0.25 max Mn, bal Fe.
Annealed: 100,000 TS; 53,000 YS; 21 El; 42 RA; 200 Brin.
For springs, tools, cutters, drills, taps, reamers; Type W1; water hardened.

LOHMANN N2.
M-1311; 0.82 C, 4.1 Cr, 0.85 Mo, 1.6 V, 8.7 W, bal Fe.
For lathe and planer tools, drills, hobs, broaches; high speed steel

LOHMANN N3
M-1311, 0.95 C, 4.1 Cr, Mo, W, V, bal Fe.
For lathe and planer tools, reamers, broaches, hobs; high speed steel.

LOHMANN N4
M-1311; 0.85 C, 4.1 Cr, Mo, W, V, bal Fe.
For lathe and planer tools, reamers, high speed steel.

LOHMANN NE
M-1311, 0.74 C, 4.1 Cr, 1.1 V, 18.5 W, bal Fe.
For lathe and planer tools, reamers, drills, taps, hobs, broaches; high speed steel

LOHMANN NR
M-1311, 1.3 C, 4.3 Cr, 0.85 Mo, 3.8 V, 12 W, bal Fe.
For blanking and forming dies, cutters, reamers; high speed steel.

LOHMANN NR5
M-1311; 1.35 C, W, Co, Mo, V, Cr, bal Fe
For engravers tools, blanking and forming dies, high speed steel.

LOHMANN NSP.
M-1311, 0.86 C, 4.1 Cr, 0.85 Mo, 2.5 V, 12 W, bal Fe
For lathe and planer tools, reamers, broaches, taps; high speed steel.

LOHMANN P75.
M-1311, 0.70 Cr, 0.25 max Si, 0.25 Mn, bal Fe.
Heat treated: 174,000 TS, 128,000 YS; 12 El, 37 RA, 355 Brin
For springs, rails, clutch discs; Type W1, water hardened

LOHMANN P85.
M-1311; 0.85 C, 0.25 max Si, 0.25 max Mn, bal Fe.
Heat treated: 190,000 TS, 145,000 YS; 10 El; 30 RA; 400 Brin.
For springs, tools, cutters, drills, taps; Type W1; water hardened.

LOHMANN P95.
M-1311, 1.0 C, 0.25 max Si, 0.25 max Mn, bal Fe.
Annealed. 100,000 TS; 53,000 YS; 21 El; 42 RA; 200 Brin.
For springs, taps, drills, hobs, cutters; Type W1; water hardened.

LOHMANN PM90.
M-1311; 0.90 C, 1.9 Mn, 0.1 V, 0.25 Si, bal Fe.
For punches, dies, crimpers, upsetters, cutters; oil hardened, nondeforming.

LOHMANN PM150.
M-1311, 1.05 C, 1.0 Cr, 1.15 W, 0.90 Mn, bal Fe.
For cutters; water hardened.

LOHMANN PV15.
M-1311; 0.61 C, 1.18 Cr, 0.1 V, 0.75 Mn, 0.85 Si, bal Fe.
For springs, gears, bolts, crimpers, punches; oil hardened, shock resistant.

LOHMANN PZ105.
M-1311; 1.05 C, 1.0 Cr, 0.30 Mn, bal Fe
For bearings, sleeves, liners, bushings; water hardened, wear resistant

LOHMANN RF.
M-1311; 0.40 C, 13 Cr, 0.30 Mn, bal Fe.
Annealed: 100,000 TS; 55,000 YS, 20 El; 50 RA; 200 Brin
For valves, cutlery, surgical and dental instruments; Type 420; stainless.

LOHMANN-RFK.
M-1311, 0.20 C, 13 Cr, 1 Mo, bal Fe.
Annealed: 95,000 TS; 50,000 YS; 25 El; B 92 Rock.
Heat treated 250,000 TS; 215,000 YS; 8 El, C 52 Rock.
For cutlery, surgical instruments, gears, shafts, needle valves, gauges.
Corrosion resistant, hardenable.

LOHMANN RFW.
M-1311, 0.20 C, 13 Cr, 0.3 Mn, bal Fe.
Annealed: 95,000 TS, 50,000 YS; 25 El, 55 RA, 195 Brin
For valves, cutlery, turbine blades, Type 420, stainless

LOHMANN S39
M-1311, 0.85 C, 0.10-0.40 Si, 0.5-0.7 Mn, bal Fe.
Heat treated 190,000 TS, 145,000 YS; 10 El, 30 RA, 400 Brin.
For springs, tools, cutters, drills, taps; Type W1, water hardened.

LOHMANN SCV14.
M-1311, 0.38 C, Cr, V, Si, bal Fe
For gears, bolts, machine tool parts, oil hardened, tough

LOHMANN SM4
M-1311, 0.35 C, 0.25-0.50 Si, 0.3-0.8 Mn, bal Fe.
Hot rolled: 85,000 TS, 54,000 YS, 30 El; 53 RA, 183 Brin
For gears, bolts, machine tool parts; water hardened.

LOHMANN SM4F.
M-1311, 0.45 C, 0.25-0.50 Si, 0.3-0.8 Mn, bal Fe
Hot rolled: 98,000 TS; 59,000 YS; 24 El; 45 RA; 212 Brin
For gears, bolts, machine tool parts, water hardened

LOHMANN SM5.
M-1311, 0.60 C, 0.25-0.50 Si, 0.3-0.8 Mn, bal Fe.
Heat treated: 160,000 TS; 113,000 YS; 12 El; 40 RA, 325 Brin.
For machine tool parts, punches, springs; water hardened.

LOHMANN SM7.
M-1311; 0.75 C, 0.25-0.50 Si, 0.3-0.8 Mn, bal Fe.
Heat treated: 180,000 TS; 130,000 YS, 10 El; 35 RA, 360 Brin.
For springs, rails, punches, hammers; Type W1; water hardened.

LOHMANN SM9.
M-1311; 0.90 C, 0.25-0.50 Si, 0.3-0.8 Mn, bal Fe.
Annealed: 100,000 TS, 53,000 YS; 20 El; 40 RA; 200 Brin.
For springs, dies, tools, cutters, punches; Type W1; water hardened.

LOHMANN SNi.
M-1311; 0.45 C, Cr, Ni, bal Fe.
For gears, bolts, machine tool parts; oil hardened, tough.

LOHMANN SV.
M-1311; 0.80 C, Cr, V, bal Fe.
For bearings, cutters, form dies, punches, oil or water hardened, wear resistant

LOHMANN T130.
M-1311; 1.3 C, 0.25 max Si, 0.25 max Mn, bal Fe.
For engravers tools, cutters, taps, reamers; Type W1; water hardened.

LOHMANN WM4.
M-1311; 0.30 C, 1.0 Si, 1.1 Cr, 0.18 V, 3.75 W, bal Fe.
For header dies, upsetters, crimpers, oil hardened, tough.

LOHMANN WM5.
M-1311; 0.30 C, 2.35 Cr, 0.6 V, 4.25 W, bal Fe.
For extrusion press rams and liners, upsetters, punches; oil hardened, tough

LOHMANN WM10.
M-1311; 0.30 C, 2.65 Cr, 0.35 V, 8.5 W, bal Fe.
For extrusion press rams and liners, punches, shears; hot work steel, oil hardened.

LOHMANN WMCo3.
M-1311; 0.30 C, 2 Co, 2.4 Cr, 0.25 V, 8.5 W, bal Fe.
For extrusion press rams and liners, punches, shears; hot work steel, oil hardened

LOHMANN WORI EXTRA
M-1311, 1.42 C, W, V, bal Fe
For cutters, engravers' tools, water hardened.

LOHMANN WSCr60.
M-1311, 0.45 C, 1.15 Si, 1.2 Cr, 0.1 V, bal Fe
For springs, gears, bolts; oil hardened.

LOHMANN WSP.
M-1311, 1.25 C, 1.15 Si, 1.2 Cr, 0.7 Mn, bal Fe
For liners, bushings, oil hardened.

LOHMANN WWMV.
M-1311; 0.45 C, 1.35 Cr, 0.45 Mo, 0.80 V, 0.45 W, bal Fe.
For punches, crimpers, oil hardened.

LOHMANN Z90.
M-1311, 1.0 C, 0.25 Mn, 0.1 V, bal Fe
For springs, cutters, drills, reamers, taps; Type W2; water hardened.

LOHMANN ZCR.
M-1311; 1.4 C, Cr, V, bal Fe.
For blanking and forming dies, cutters, bearers, oil or water hardened, abrasion resistant.

LOIRE-ALC6.
M-1546, 0.08 max C, 23.0 Cr, 5.2 Al, bal Fe.
For heating elements, industrial furnaces, parabolic radiators.
High heat resistant to 1100°C.

LOIRE-AMCR.
M-1546, 0.30 C, 10.0 Cr, 18.0 Mn, 1.0 Ni, bal Fe
Forged: 106,700 TS; 49,800 YS; 45 El.
Cast: 92,500 TS; 42,700 YS; 28 El.
For marine hardware, diesel engine motor frames.
Nonmagnetic, corrosion resistant steel.

LOIRE-AMCRN.
M-1546; 0.65 C, 8 Ni, 8 Mn, 4 Cr, bal Fe.
Rolled: 154,000 TS; 114,000 YS; 20 El.
For electrical construction.
Non-magnetic, corrosion resistant steel.

LOIRE A.S.
M-1546; 0.50 C, bal Fe.
Ht. Tr.. 120,000 TS; 77,200 YP; 22 El; 245 Brin.
For cutting tools, chisels, hammers, gears, punches, shafts, axles.
Water hardening.

LOIRE CMY6
M-1546; 0.15 C, 0.5 Cr, 0.5 Mo, bal Fe.
Heat treated: 71,000 TS; 42,700 YS; 20 El.
For furnace tubes, oil refineries, boilers.
Resists heat to 600°C.

LOIRE-CMY16.
M-1546; 0.12 C, 5.5 Cr, 0.6 Mo, bal Fe
Heat treated: 78,000-107,000 TS; 35,600-92,500 YS; 14-23 El.
For oil refining and hot hydrogenization equipment
Corrosion resistant to sour crude oils.

LOIRE-CMY17
M-1546, 0.13 C, 2.3 Cr, 1.0 Mo, bal Fe.
Heat treated 71,000-135,000 TS, 34,000-121,000 YS, 15-25 El.
For oil refining equipment, hydrogenization equipment, gas turbine housings.
Max operating temperature 600°C.

LOIRE-CMY18
M-1546, 0.13 C, 1.0 Cr, 0.5 Mo, bal Fe
Heat treated: 85,000-128,000 TS, 57,000-92,500 YS; 12-20 El,
For rotors, blades and arbors in steam and gas turbines.
Resists oxidation to 550°C.

LOIRE CMY22
M-1546, 0.30 C, 3.0 Cr, 0.5 Mo, bal Fe
Heat treated: 135,000 TS, 121,000 YS, 15 El.
For alternator and turbine parts, rotors
Resists oxidation to 600°C

LOIRE-CMYV
M-1546, 0.15 C, 1.0 Cr, 1.0 Mo, 0.2 V, bal Fe
Heat treated: 88,000 TS; 58,000 YS; 16 El.
For steam and gas turbine rotors and blades, superheated steam units.
Resists oxidation to 600°C.

LOIRE-COQ2
M-1546, 1.0 C, bal Fe.
Annealed 100,000 TS, 54,000 YP, 20 El, 190 Brin
Ht Tr: 216,000 TS; 152,000 YP, 11 El; 601 Brin.
For chisels, rivet sets, fixtures, bearings
Water hardening, wear resistant.

LOIRE-HKMV.
M-1546. 0.14 C, 0.55 Cr, 0.55 Mo, 0.12 V, bal Fe
Annealed 78,200 TS; 57,000 YS; 22 El.
For flanges for condensers, steam turbine discs and arbors, superheater tubes.
Free from temper embrittlement.

LOIRE-HR200.
M-1546, 0.38 C, 5.0 Cr, 1.3 Mo, 1.0 Si, 0.5 V, bal Fe
Ht Tr: 300,000 TS; 250,000 YS; 6 El; C 55 Rock.
Annealed. 102,000 TS, 66,000 YS; 28 El; B 94 Rock
For aircraft landing gears, rocket motors, bolts, missile structures, cylinder liners, dies
Martensitic steel. Hardenable.

LOIRE-ICN 001.
M-1546; 0.10 C, 18.0 Cr, 9.0 Ni, bal Fe.
Annealed: 92,500 TS; 31,300 YS; 50 El.
Rolled: 170,000 TS, 149,000 YS; 20 El.
For decorations, trim, cooking utensils, chemical plant and food processing equipment.
Corrosion resistant. Austenitic, nonhardenable by heat treatments.

LOIRE-ICN 162T.
M-1546; 0.08 max C, 17.0 Cr, 11.5 Ni, 2.2 Mo, 0.4 Ti, bal Fe.
Annealed: 85,300 TS; 35,600 YS; 40 El.
For chemical plant equipment, acid mixing tanks, vessels, agitators.
Austenitic, stainless, welding grade.

LOIRE-ICN 164
M-1546; 0.07 max C, 17.0 Cr, 11.5 Ni, 2.2 Mo, bal Fe.
Annealed: 192,500 TS; 35,600 YS, 45 El
For chemical plant equipment, acid mixing tanks, agitators, vessels. Austenitic stainless, Type 316.

LOIRE-ICN 164BC
M-1546; 0.03 max C, 16.5 Cr, 13.5 Ni, 2.2 Mo, bal Fe
Annealed: 85,300 TS; 28,400 YS, 50 El.
For chemical plant equipment, acid mixing tanks, agitators, vessels.
Austenitic, stainless, non heat-treatable.

LOIRE-ICN 164BCN
M-1546; 0.03 max C, 17.5 Cr, 13.5 Ni, 2.8 Mo, bal Fe
Annealed: 78,200 TS, 31,300 YS; 40 El.
For chemical plant equipment, acid mixing tanks, agitators, vessels
Austenitic, stainless, not heat treatable.

LOIRE-ICN 164BCS.
M-1546; 0.03 max C, 18.5 Cr, 14.0 Ni, 3.3 Mo, bal Fe
Annealed 78,200 TS, 32,700 YS, 38 El
For chemical plant equipment, acid mixing tanks, agitators, vessels
Austenitic, stainless, Type 317

LOIRE ICN 164K
M-1546, 0.04 max C, 17.0 Cr, 11.5 Ni, 2.2 Mo, bal Fe
Annealed: 85,300 TS; 31,300 YS, 45 El.
For chemical plant equipment, acid mixing tanks, agitators
Austenitic, stainless, Type 316

LOIRE ICN 164T
M 1546; 0.07 max C, 17.0 Cr, 11.5 Ni, 2.8 Mo, 0.4 Ti, bal Fe
Annealed 85,300 TS; 35,600 YS, 40 El
For chemical plant equipment, acid mixing tanks, vessels, agitators.
Austenitic, stainless, welding grade.

LOIRE-ICN 212
M-1546; 0.10 max C, 12.5 Cr, 12.0 Ni, bal Fe
Rolled 36%: 135,100 TS, 128,000 YS; 15 El.
Annealed: 78,200 TS, 35,600 YS, 50 El.
For trim, watch cases, instrument housings, jewelry, decorations
Corrosion resistant

LOIRE-ICN 472
M-1546, 0.07 max C, 18.0 Cr, 9.5 Ni, bal Fe.
Annealed: 82,500 TS; 35,600 YS; 48 El, B 80 Rock
Cold Drawn: 150,000 TS, 100,000 YS; 25 El; C 25 Rock.
For chemical plant equipment, tanks, vessels, mixers, agitators.
Stainless Type 304 Austenitic.

LOIRE-ICN 472BC.
M-1546; 0.03 max C, 18.5 Cr, 11.5 Ni, bal Fe
Annealed: 78,200 TS; 29,900 YS; 48 El; B 72 Rock.
Cold Drawn: 125,000 TS; 80,000 YS; 30 El; C 20 Rock
For chemical plant equipment, tanks, agitators, mixers, welded structures.
Stainless Type 304L, austenitic.

LOIRE-ICN 472K.
M-1546; 0.04 max C, 18.0 Cr, 10.5 Ni, bal Fe.
Annealed: 78,200 TS; 29,900 YS; 48 El.
Cold Drawn: 130,000 TS; 85,000 YS; 28 El; C 20 Rock.
For chemical plant equipment, tanks, vessels, welded structures.
Stainless, Type 304L. Austenitic

LOIRE-ICN 472NB.
M-1546; 0.06 max C, 17.5 Cr, 12.5 Ni, 1.0 Cb, bal Fe.
Annealed 82,500 TS; 35,600 YS; 48 El; B 80 Rock.
At 1000°F: 55,000 TS, 35,000 YS; 36 El; 68 RA.
For chemical plant equipment, tanks, agitators, mixers, vessels, welded structures.
Type 347 stainless steel Austenitic.
Welding grade. Stabilized

LOIRE-ICN 472T
M-1546; 0.07 max C, 18.0 Cr, 10.5 Ni, 0.4 Ti, bal Fe
Annealed. 78,200 TS; 29,900 YS; 48 El, B 80 Rock.
Cold Drawn: 95,000 TS, 60,000 YS; 40 El; 185 Brin.
For chemical plant equipment, cold headed parts, tanks, vessels, agitators.
Corrosion resistant Welding grade
Type 321 Austenitic

LOIRE-IMC 201
M-1546, 0.10 C, 17.0 Cr, 8.0 Mn, 4.0 Ni, 0.2 N_2, bal Fe
Annealed 102,000 TS, 54,000 YS, 45 El.
For food and chemical processing equipment, trim, decorations.
Stainless, austenitic Low work hardenability

LOIRE-IMC 202.
M-1546, 0.05 C, 18.0 Cr, 9.0 Mn, 5.0 Ni, 0.2 N_2, bal Fe
Annealed 78,200 TS, 45,500 YS, 45 El
Fod food and chemical processing equipment, trim, decorations
Austenitic, stainless Weldable grade

LOIRE-NYS
M-1546, 0.10 max C, 78.0 Ni, 20.0 Cr, 1.0 max Fe.
Annealed 106,000 TS; 50,000 YS
For heating elements, furnace parts, combustion chambers of gas and turbine reactors
High heat resistance to 1200°C

LOIRE-NYSR.
M-1546, 0.1 max C, 45.0 Ni, 23.0 Cr, 1.2 Si, 1.2 Mn, bal Fe
For radiators, industrial furnaces, heating elements.
High heat resistant to 1050°C

LOIRE-RBL
M-1546, 1.4 C, 0.7 Cr, bal Fe
Harden C 62-64 Rock
For files.
Water hardening, wear and abrasion resistant.

LOIRE-RM3
M-1546, 0.20 C, 27.0 Cr, 3.0 Ni, bal Fe
Annealed 85,300 TS, 64,000 YS; 12 El
For furnace parts, heat treat boxes, retorts, salt pots, lead pots, burners.
Cast heat resistant steel.

LOIRE-RM6.
M-1546; 0.32 C, 26.0 Cr, 5.5 Ni, 1.8 Si, bal Fe.
Annealed: 99,600 TS; 78,200 YS; 18 El.
For furnace parts, salt and lead pots, oil burners.
Austenitic-ferritic cast steel.
Corrosion and heat resistant to 1100°C.

LOIRE-RM12.
M-1546; 0.30 C, 25.0 Cr, 12.0 Ni, 1.5 Si, 1.2 Mn, bal Fe.
Ht. Tr.: 110,000 TS; 60,000 YS; 50 El; B 90 Rock.
For furnaces, heat treat boxes, rails, furnace hearths, salt and lead pots.
Austenitic, heat and corrosion resistant.

LOIRE-RM20.
M-1546; 0.30 C, 25.0 Cr, 20.0 Ni, 1.8 Si, 1.3 Mn, bal Fe.
Annealed: 95,000 TS; 45,000 YS; 50 El; B 90 Rock.
For furnace parts, heat treat boxes, salt and lead pots, glass industry molds.
Austenitic, heat and corrosion resistant.

LOIRE-RM35.
M-1546; 0.45 C, 35.0 Ni, 15.0 Cr, 2.2 Si, 1.2 Mn, bal Fe.
Cast: 70,000 TS; 40,000 YS; 10 El; 180 Brin.
At 1600°F: 18,800 TS; 15,000 YS; 26 El.
For furnace parts, salt and lead pots, heat treat boxes, pyrometer tubes, grids, glass making equipment.
Austenitic, corrosion and heat resistant to 1150°C. ACI Type HT.

LOIRE-RM60.
M-1546; 0.45 C, 60.0 Ni, 12.0 Cr, 2.2 Si, 1.2 Mn, bal Fe.
Annealed: 80,000 TS; 35,600 YS; 4 El.
For cyanide and salt baths, furnace parts, heat treat boxes, glass furnace parts.
Corrosion and heat resistant.

LOIRE-SCH4.
M-1546; 0.40 C, 9.5 Cr, 0.8 Mo, 2.4 Si, bal Fe
Heat treated: 114,000-135,000 TS; 71,000-99,600 YS; 16 El.
For inlet and exhaust valves for internal combustion engines
Martensitic, heat resistant to 900°C.

LOIRE S.I.C.
M-1546; 0.98 C, 0.5 Cr, bal Fe.
Ht. Tr.: 200,000 TS, 180,000 YS; 3 El; 390 Brin
For bearings, rollers, bushings, gauges, mandrels.
Cold heading tool steel, oil or water hardening.

LOIRE-SP20.
M-1546, 0.77 C, 19.5 Cr, 1.5 Ni, 2.0 Si, bal Fe.
Heat treated: 121,000-143,000 TS; 71,100-114,000 YS; 12-14 El
For exhaust valves, jet engine components.
Martensitic, corrosion and heat resistant to 1000°C.

LO-LUMINIUM.
Eng.; 55 Sn, 33 Zn, 11 Al, 1 Cu.
For aluminum solder.

LOMINIUM STEEL.
M-210; 0.47 C, 0.6 Mn, 1.75 Cr, 0.2 V, bal Fe.
For die casting die steel; oil hardened.

LOMU.
M-32; 6-10 Ni, 8-12 Mn, 1.0 max Cr, bal Fe.
Rolled: 94,000 TS, 36,000 YS; 58 El; 62 RA.
For springs; non-magnetic.

LOPHOS.
M-289; C, V, bal Fe.
For cold heading dies.

LORRAINE A48S.
M-1495; 0.25 max C, 0.64-1.06 Mn, bal Fe.
Annealed: 54,000 TS; 30,000 YS; 35 El; 163 Brin.
For low temperature tubing; Afnor A48S, minimum operating temperature —45°C.

LORRAINE EM2.
M-1495; 0.17 max C, 2.13-2.67 Ni, 0.13-0.32 Si, bal Fe.
Annealed: 65,000-76,000 TS; 37,000 YS; 25 El.
For low temperature tubing; Afnor 9N10, minimum operating temperature —60°C.

LORRAINE EM5.
M-1495; 0.15 max C, 6-8 Cr, 0.45-0.65 Mo, bal Fe.
Annealed: 60,000 TS; 24,000 YS; 30 El; 179 Brin.
For oil refinery tubes and equipment; ASTM-A-335, Afnor Z8CD7.

LORRAINE EM6
M-1495; 0.15 max C, 1.0-2.0 Si, 4-6 Cr, 0.45-0.65 Mo, bal Fe.
Annealed: 60,000 TS; 24,000 YS; 30 El; 179 Brin.
For oil refinery tubes and equipment; ASTM-A-213.

LORRAINE EM7.
M-1495; 0.15 max C, 4-6 Cr, 0.50 max Mn, 0.45-0.65 Mo, bal Fe.
Annealed. 60,000 TS; 24,000 YS, 30 El; 163 Brin.
For oil refinery tubes; ASTM-A-199.

LORRAINE EM8
M-1495, 0.15 max C, 1.6 max Si, 4-6 Cr, 0.40-0.65 Mo, 1.0 max Al, bal Fe
Annealed 70,000-88,000 TS, 33,000 YS; 18 El; 179 Brin
For oil refinery tubes and equipment, Afnor Z7CSAD5

LORRAINE EM9
M-1495, 0.15-0.20 C, 5-7 Cr, 0.5-0.6 Mo, 0.35-0.45 V, bal Fe.
Rolled 92,000-114,000 TS; 65,000 YS; 18 El.
For oil refinery tubes and equipment; Afnor Z17CDV6

LORRAINE EM10
M-1495, 0.15 max C, 0.25-1.0 Si, 8-10 Cr, 0.8-1.2 Mo, bal Fe.
Annealed 60,000 TS; 30,000 YS; 30 El; 179 Brin.
For oil refinery tubes and equipment; ASTM-A-212; Afnor Z10CD9

LORRAINE EM11
M-1495, 0.15 max C, 1.0-1.5 Cr, 0.44-0.65 Mo, bal Fe
Annealed 60,000 TS, 30,000 YS, 30 El; 163 Brin.
For oil refinery tubes and equipment; ASTM-A-199

LORRAINE EM35
M-1495, 0.19 max C, 3.18-3.82 Ni, bal Fe.
Annealed: 65,000 TS, 35,000 YS; 30 El, 190 Brin.
For low temperature tubing; Afnor 10N14, minimum operating temperature —100°C.

LOSTA
M-1311, 0.90 C, 1.9 Mn, 0.1 V, bal Fe
For punches, dies, upsetters, cutters; oil hardened, non-deforming.

LO-TEMP.
M-1044; 40 Zn, bal Cu.
For repairing castings; brass.

LO-TIN SILVER FUSE
M-1243.
For solder.

LOTMESSING 60.
M-297; 38 Zn, 2 Si, bal Cu.
Soft: 52,000 TS, 48 El; 75 Brin.
½ H-temper: 65,000 TS; 30 El; 105 Brin.
For hardware, bolts, fasteners; corrosion resistant.

LOTUN.
M-357; C, alloy, bal Fe.
For tools, dies; oil hardening.

LOTUNG.
M-289, 0.30 C, 3 Cr, 9 W, 0.45 V, bal Fe.
For Al die casting dies, brass extrusion dies;
hot work steel, oil hardened.

LOTUS.
M-77; 10 Sn, 15 Sb, 75 Pb.
For bearings; Babbitt; medium bearing loads.

LOW BRASS.
M-33, M-8; 80 Cu, 20 Zn.
Annealed: 44,000 TS; 10,000 YS; 60 El
Rolled 65,000 TS; 45,000 YS; 12 El
For formed and drawn parts requiring high finish, high ductility.

LOW BRASS 5
M-141; 80 Cu, 20 Zn.
Hard: 74,000 TS; 59,000 YS, 7 El, 156 Brin.
Soft 44,000 TS, 14,000 YS; 50 El; 56 Brin.
For hardware, diaphragms; corrosion resistant.

LOW BRASS-32
M-8, 80 Cu, 20 Zn.
Soft 43,000 TS, 16,000 YS; 50 El.
Hard 73,000 TS, 60,000 YS; 8 El.
For formed and drawn parts; high ductility

LOW BRASS 240
M-279, 80 Cu, 20 Zn.
Ann 44,000-54,000 TS; 12,000-29,000 YS; 42-58 El.
Cold rolled 48,000-97,000 TS; 18,000-84,000 YS; 1-35 El
Low zinc brass with good corrosion resistance, for bellows, flexible hose, water meters.

LOW CARBON GFS.
M-370; 0.20 C, bal Fe.
Low carbon ground flat stock steel.
For jigs and fixtures

LOW CARBON NICKEL replaced by NICKEL 201.

LOW CARBON ONTARIO
M-1, 0.87 C, 0.5 Mn, 0.5 Si, 12.0 Cr, 0.35 Ni, 0.15 V, 0.8 Mo, bal Fe.
Air or oil hardening cold work tool steel, chromium type, AISI D1

LOW CHROME-NICKEL
M-200, 0.35-0.45 C, 0.25-0.50 Cr, 0.80-1.00 Mn, 0.50-0.75 Ni, 0.30-0.40 Si, bal Fe.
Annealed. 100,000 TS; 60,000 YS, 20 El, 18 RA; 200 Brin.
Heat treated· 120,000-200,00 TS; 100,000-175,000 YS; 35-10 El, 20-5 RA.
For gears, shafts, pinions; tough

LOW LEADED BRASS.
M-33; 66.5 Cu, 33 Zn, 0.5 Pb.
For drain tubes, plumbing goods, pump liners; free-cutting.

LOW LEADED BRASS-226
M-8, 35 Zn, 0.5 Pb, bal Cu.
Soft 45,000 TS, 17,000 YS, 55 El.
Hard· 73,000 TS; 60,000 YS; 9 El.
For hardware; good formability.

LOW LEADED TUBE BRASS.
M-33; 66.5 Cu, 33 Zn, 0.5 Pb.
Annealed: 52,000 TS; 20,000 YS; 50 El
For pump liners, plumbing.

LOW LEADED TUBE BRASS-330.
M-8; 66.5 Cu, 33.0 Zn, 0.5 Pb.
Hard: 73,000 TS; 60,000 YS; 10 El; B 80 Rock.
Soft: 45,000 TS; 17,000 YS; 55 El; B 15 Rock.
For pump and power cylinders and liners, plumbing parts, munitions.
Free-cutting yellow brass.

LOWMOOR IRON.
M-803; 3.2 C, 2.6 Si, bal Fe.
For castings; cast iron

LOW PHOSPHORUS COPPER.
M-33, 99.9 + Cu, 0.007 P.
For electrical conductors, waveguides;
high conductivity, deoxidized copper.

LOWROFF PHOSPHOR BRONZE.
England; 5 16 Pb, 4-13 Sn, 0.5-1.0 P, bal Cu
For bearings, bushings; heavy duty

LOWSCORE
M-472, 0.12 max C, 18-22 Cr, bal Fe.
Annealed. 68,000-80,000 TS, 30 El, 130-153 Brin.
For heat resisting equipment, furnace parts, pots, Type 442, corrosion resistant

LOW TEMPERATURE AIR HARDENING.
M-1424; 0.7 C, 2.1 Mn, 0.3 Si, 1.0 Cr, 1.3 Mo, 0.12 S, bal Fe.
Free machining grade
AISI Type A6 air hardening tool steel.

LOW-TIN COMMERCIAL BRONZE.
M-33, 90 Cu, 9.5 Zn. 0.5 Sn
½ Hard temper 53,000 TS; 46,000 YS; 10 El; 108 Brin
For bearings, bushings, thrust washers, bushing bronze.

LOXLEY
M-618; 0.7-0.8 C, bal Fe
For tools, taps, punches, water hardened.

L.P.D.
M-73, 0.35 C, 5 Cr, 1.5 W, 1.5 Mo, 1 Si, bal Fe.
For hot forging dies, punches, mandrels;
hot work steel.

LS
M-459, C, Mn, bal Fe
For rock press plates

L.S.D STEEL
M-1, 1.0 C, 0.30 Mo, 1.25 Cr, bal Fe.
Oil hardened
For tools, dies, rollers; water hardened.

LT-75HS
M-176, 0.22 max C, 1.1-1.6 Mn, 0.2-0.6 Si, bal Fe.
Plate 75,000 min YS, 95,000-115,000 TS.
For heavy construction equipment, off-shore drilling platforms, rail tankcars, cold storage tanks, bridges
Good low temperature toughness, quenched and tempered steel plate.

LT-75N
M-176, 0.20 max C, 0.70 1.35 Mn, 0.15-0.30 Si, bal Fe
Plate. 65,000-90,000 TS, 46,000-50,000 YS; 23-24 El.
For low temperature applications, cold storage tanks, rail tank cars
Good low temperature notch toughness

LT-75QT
M-176, 0.20 max C, 0.70-1.35 Mn, 0.15-0.30 Si, bal Fe
Plate: 75,000-100,000 TS, 56,000-60,000 YS; 23-24 El.
For low temperature applications, cold storage tanks, rail tank cars
Good low temperature notch toughness.

LTC-65% Gold.
M-1295; 65 Au, bal mostly Ni, Cr.
Wire for potentiometer winding.
High corrosion resistance combined with low temperature coefficient of resistance.

LUBALOY 411.
M-297, 90 Cu, 9.5 Zn, 0.5 Sn.
Ann: 38,000-44,000 TS; 9000-18,000 YS; 40-44 El.
Cold rolled: 42,000-87,000 TS, 17,000-78,000 YS; 1-40 El.
For bushings, washers, clutch plates, fuse clips; wear resistant and good corrosion resistance.

LUBALLOY X ALLOY 80.
M-279; 1.75 Sn, 8.25 Zn, bal Cu.
Hard: 70,000 TS; 4 El.
Soft: 45,000 TS; 50 El.
For contact springs, radio tube sockets, fuse clips; corrosion resistant

LUBALOY X425.
M-279; 88 Cu, 10 Zn, 2 S.
Ann: 40,000-50,000 TS; 12,000-24,000 YS; 44-55 El.
Cold rolled: 45,000-106,000 TS, 20,000-88,000 YS; 1-40 El
For electrical springs, connectors, terminals
High strength, fatigue-corrosion resistant.

LUBRAL
M-1397; 6.5 Sn, 1.07 Cu, 1 Ni, 0.14 Si, 0.19 Fe, bal Al.
Cast: 14,000 TS; 6.8 El; 37 Brin.
For bearings.

LUBRAL SN6.
M-1445; 1 Cu, 1.2 Si, 0.12 Ti, 1 Ni, 6 Sn, bal Al.
Rolled. 21,000-27,000 TS, 9,000-12,000 YS, 12-6 El; 45-55 Brin.
For light alloy parts.

LUBRICO NO. 1.
M-256, 75-70 Cu, 20-22 Pb, 5-10 Sn.
For bearings and bushings; heavy duty.

LUBRICO NO. 2.
M-256; 70-75 Cu, 20-22 Pb, 5-10 Sn, Ni
For bearings and bushings; heavy duty.

LUBRICO NO. 3.
M-256; 70-75 Cu, 20-22 Pb, 5-10 Sn, Ni.
For bearings and bushings; heavy duty

LUBRI-DIE.
M-289; 1.45 C, 0.8 Mn, 1.15 Si, 0.25 Mo, bal Fe.
Annealed: 84,500 TS, 49,500 YS, 25 El; 197 Brin.
Heat treated: 164,000 TS; 136,000 YS, 13 El; 302 Brin.
Heat treated 218,000 TS, 177,000 YS; 8 El, 388 Brin.
For blanking and forming dies, punches, gauges, hobs, cams, taps, pneumatic hammers, piercing dies.
Type 06, oil hardening, cold work tool steel

LUBRONZE 422.
M-279; 87 Cu, 12 Zn, 1 Sn.
Ann: 40,000-50,000 TS, 10,000-20,000 YS; 44-50 El.
Cold rolled: 47,000-94,000 TS; 20,000-83,000 YS; 1-40 El.
For electrical terminals, connectors, clips, chains; strength, stress corrosion resistance.

LUCALOX.
U.S.; Al_2O_3.
For cutting tools; sintered.

LUCAS NIFAL.
25 Ni, 12 Al, 63 Fe.
For permanent magnets.

LUCERNO.
68-65 Ni, 27-30 Cu, 0-2.4 Fe, 2.2-5.0 Mn.
For resistance alloy; heat resistant.

LUCKY 7.
M-1215, C, V, bal Fe. For tools; water hardened.

LUDENSCHEIDT BUTTON METAL.
Germany, 20 Cu, bal Zn.
For ornamental parts; die castings.

LUDITE
M-1; 12 Cr Silcrome backing on steel.
For tools, dies; wear resistant.

LUDLOY.
M-1422, C, alloy bal Fe.
Heat treated 265,000 TS, 13 El; 53 Rock C.
For chisels, sledges, arbors, dies, punches; shock resistant, water hardening

LUDLUM.
13-17 Cr, 1 Si, 1 Mo, 0.4 C, bal Fe.
For corrosion resisting parts, cutlery, corrosion resistant

LUDLUM 602
M-1, 0.50 C, 0.40 Mo, 1.5 Si, 0.12 V, bal Fe.
Hardened 330,000 TS, 270,000 YS, 9 El, 28 RA, 578 Brin.
For chisels, punches, shock resistant

LUDLUM 609
M-1; 0.6 C, 0.85 Mn, 2.0 Si, 0.25 Cr, 0.2 Mo, 0.2 V, bal Fe
For shear blades, punches, pneumatic tools, shock resistant

LUDLUM DBL 2-FZ
M-1, 0.8 C, 4 Cr, 2 V, 6 W, 5 Mo, bal Fe.
For lathe and planer tools, reamers, drills, taps, high speed steel, oil hardened

LUDLUM DBL-3
M-1, C, Cr, V, W, bal Fe.
For lathe and planer tools, reamers, broaches, high speed steel

LUDLUM 1 MW-FZ
M-1, 0.7 C, 3.25-4.25 Cr, 1.2-2.0 W, 0.75-1.0 V, 7.5-9.5 Mo, bal Fe.
For reamers, lathe tools, drills, broaches, high speed steel, oil hardened

LUDLUM VLM-FZ
M-1, 0.85 C, 8 Mo, 4 Cr, 2 V, bal Fe
For reamers, drills, hobs, taps, lathe cutters; high speed steel, oil hardened

LUDLUM XCM
M-1, 1.2 C, 1.4 Cr, 0.45 Mo, bal Fe.
For tools, taps, gauges, lathe centers, oil hardened

LUETECIN
France, 80 Cu, 16-6 Ni, 5 Zn, 5 Fe, 2 Sn, 1 Co
For cheap jewelry, corrosion resistant

LUKENS 2% NICKEL
M-176; 0.20 max C, 2 Ni, bal Fe

LUKENS 101 45
M-176, 0.42-0.50 C, 0.6-0.9 Mn, 0.1-0.3 Si, 0.10 0.35 Pb, bal Fe
Plate 93,000 103,000 TS, 53,000-56,000 YP; 20-23 El, 39-42 RA; 190-216 Brin
For rubber and fiberglass molds, dies, platens, sprockets, gears, cams, wheels
Tough, wear resistant, free cutting

LUKENS 45
M-176, 0.2-0.25 C, 1.2-1.35 Mn, 0.15-0.3 Si, bal Fe.
Plate: 65,000 TS, 45,000 min YS, 24 min El.
For bridges, barges, field-erected tanks, heavy industrial equipment
High strength carbon steel plate

LUKENS 50.
M-176; 0.2-0.25 C, 1.35 Mn, 0.2 Si, bal Fe.
Plate; 70,000 min TS; 50,000 min YS; 24 min El.
For bridges, barges, field-erected tanks, heavy industrial equipment.
High strength carbon steel plate.

LUKENS 55.
M-176; 0.23 C, 0.25 Si, 1.3-1.6 Mn, bal Fe.
Plate: 75,000 min TS; 55,000 min YS; 23 min El.
For bridges, barges, field-erected tanks, heavy industrial equipment.
High strength carbon steel plate.

LUKENS 60.
M-176; 0.23 C, 1.6 Mn, 0.25 Si, bal Fe.
Plate: 80,000 min TS; 60,000 min YS; 23 min El.
For bridges, barges, field erected tanks, heavy industrial equipment.
High strength carbon steel plate.

LUKENS 80.
M-176, 0.20-0.25 C, 1.1-1.6 Mn, 0.2-0.6 Si, bal Fe.
Heat treated: 95,000-120,000 TS, 75,000-80,000 YS; 19 El (min).
For welded structures, heavy industrial equipment, bridges
Good low temperature notch toughness

LUKENS A440
M-176; 0.28 C, 1.1-1.6 Mn, 0.20 min Cu, bal Fe.
Plate: 70,000 TS, 50,000 YS; 18 El.
For derricks, booms, bridges, mine cars, bus and truck bodies.
High strength low alloy steel

LUKENS A441
M-176, 0.22 C, 1.25 Mn, 0.20 min Cu, 0.02 min V, bal Fe
Plate. 70,000 TS; 50,000 YS; 22 El.
For bridges, booms, derricks, mine cars, bus and truck bodies
High strength low alloy steel

LUKENS AAR-M128 Gr A
M-176; 0.25 max C, 1.35-1.50 Mn, 0.04 max P, 0.05 max S, 0.3-0.5 Si, 0.02 max V, bal Fe.
Plate 81,000-101,000 TS; 50,000 YP, 19 El
For rail tank cars, pressure vessels, bridges, mine cars, derricks
High strength low-alloy structural steel.

LUKENS AAR-M128 Gr.B
M-176, 0.25 max C, 1.35-1.5 Mn, 0.04 max P, 0.05 max S, 0.3-0.5 Si, 0.08 max Mo, 0.25 max Cr, 0.25 max Ni, 0.35 max Cu, bal Fe.
Plate 81,000 101,000 TS, 50,000 YP; 19 El.
For rail tank cars, pressure vessels, bridges, mine cars, derricks
High-strength low alloy construction and structural steel.

LUKENS AR-300
M-176, 0.28 C, 1.4 Mn, 0.2-0.5 Si, 0.2 Cu, bal Fe.
Hardened 285-321 Brin; 137,000-158,000 TS; 123,000-148,000 YS, 10-11 El
For materials handling equipment, reactor vessels, floor wear plates
Quenched and tempered carbon steel plate.
Wear and abrasion resistant

LUKENS AR-350.
M-176; 0.3 C, 1.0-1.6 Mn, 0.4 Si, 0.20 Cu, bal Fe
Ht. Tr: 171,000 TS, 165,000 YS; 13 El; 320-380 Brin.
For materials handling equipment, reactor vessels, floor wear plates.
Quenched and tempered carbon steel plate.
Wear and abrasion resistant.

LUKENS CARBON-MOLYBDENUM STEEL.
M-176; 0.25 max C, 0.9 max Mn, 0.25-0.60 Mo, bal Fe.
Rolled: 65,000-87,000 TS; 33,000-41,000 YS.
For shell and vessel work, general fabrication; good creep values at elevated temperature.

LUKENS CHROME-NICKEL STEEL
M-176; 0.35-0.45 C, 0.3-0.6 Mn, 3.25-3.75 Ni, 1.25-1.75 Cr, bal Fe.
Heat treated: 200-300 Brin.
For hot rolled steel plates, wear and abrasion resistant parts; resists abrasion.

LUKENS CROMANSIL (GRADE A).
M-176; 0.17 max C, 1.05-1.40 Mn, 0.3-0.6 Cr, 0.6-0.9 Si, bal Fe.
Rolled: 75,000-90,000 TS, 45,000-54,000 YS.
For high tensile plate work; tough.

LUKENS CROMANSIL STEEL (GRADE B).
M-176; 0.25 max C, 1.05-1.40 Mn, 0.3-0.6 Cr, 0.6-0.9 Si, bal Fe.
Rolled: 85,000-100,000 TS; 47,000-55,000 YS.
For high tensile plate work; tough.

LUKENS HP.
M-176; 0.06 C, 0.35 Mn, 0.05 Si, 0.025 S, 0.025 P, bal Fe.
Plate: 35,000 TS; 25,000 YS; 28 El
For magnet cores in linear accelerators, cyclotrons, synchrotrons, bubble chambers
Soft magnet steel, high permeability, high flux density, low hysteresis loss.

LUKENS INCONEL-CLAD STEEL.
M-176, Inconel bonded to steel base
55,000 TS; 27,000 YS
For corrosion resistant parts; 10% Inconel of total plate thickness.

LUKENS LT-75
M-176; 0.20 max C, 0.70-1.35 Mn, 0.15-0.30 Si, bal Fe
LT-75 N. 65,000-90,000 TS, 46,000-50,000 YS; 23-24 El
LT 75 QT 75,000-100,000 TS, 56,000-60,000 YS; 23 24 El.
For low temperature applications, cold storage tanks, rail tank cars
Supplied in two grades LT-75N and LT-75 QT.
Low temperature steel, good notch toughness

LUKENS LT-75HS
M-176, 0.22 max C, 1.1-1.6 Mn, 0.2-0.6 Si, bal Fe.
Plate: 75,000 min YS; 95,000-115,000 TS
For heavy construction equipment, off shore drilling platforms, rail tank-cars, cold storage tanks, bridges Good notch toughness at −75°F, quenched and tempered steel plate.

LUKENS L-XX.
M-176, 0.20-0.25 C, 1.2-1.6 Mn, 0.15-0.30 Si, bal Fe
Plate: 65,000 min TS, 45,000 min YS; 23 min El.
For bridges, barges, booms derricks, heavy industrial equipment
High strength low alloy steel plate.

LUKENS M7.
M-176, 0.15 C, 0.6 Mn, 0.15 Si, 0.05 max S, 0.20 min Cu, bal Fe.
Plate. 66,000-86,000 TS, 38,000 min YP.
For bridges, buildings, hoppers, shafts, decks and hull plates, hatch covers, crushers
ASTM-A7.

LUKENS M36.
M-176; 0.25 C, 0.8-1.2 Mn, 0.15 Si, bal Fe.
Plate· 60,000-80,000 TS; 42,000 min YP; 23 El.
For bridges, buildings, hoppers, shafts, deck and hull plates, hatch covers, crushers, backing plates. ASTM-A36.

LUKENS M113.
M-176; 0.15 C, 0.60 Mn, 0.20 Si, 0.05 max S, 0.06 max P, 0.20 min Cu, bal Fe.
Gr. A 66,000-86,000 TS; 38,000 min YP.
Gr. B· 55,000-75,000 TS; 31,000 min YP.
Gr C: 53,000-73,000 TS; 30,000 min YP.
For bridges, buildings, hoppers, shafts, deck plates, hatch covers, crushers, locomotives and cars.
ASTM-A113 Gr. A, B, C.; High strength.

LUKENS M-131
M-176, 0.25 max C, 0.56-0.94 Mn, 0.30 max Si, bal Fe
Grades A, B, C: 64,000-84,000 TS; 37,000 min YP
For bridges, buildings, hoppers, shafts, deck and hull plates, crushers, hatch covers
ASTM-A131 Gr. A, B, C.

LUKENS M283
M-176; 0.20 C, 0.8 Mn, 0.2 Si, 0.2 min Cu, bal Fe.
Gr. A 50,000-70,000 TS, 28,000 min YP
Gr B 55,000-75,000 TS, 32,000 min YP.
Gr. C 61,000-81,000 TS, 35,000 min YP
Gr. D: 66,000-86,000 TS; 38,000 min YP.
For bridges, buildings, hoppers, shafts, deck and hull plates, hatch covers, crushers
ASTM-A283 Gr. A, B, C, D.

LUKENS M284.
M-176, 0.42 max C, 0.94 max Mn, 0.10-0.30 Si, bal Fe.
Gr A. 55,000 min TS; 29,000 min YP
Gr B 61,000 min TS; 32,000 min YP
Gr C· 66,000 min TS, 35,000 min YP
Gr. D: 66,000 min TS, 38,000 min YP
For bridges, buildings, hoppers, shafts, ship deck and hull plates, hatch covers, crushers
Good fabricability and weldability.
ASTM-A284 Gr A, B, C, D

LUKENS M573 Gr 65
M-176, 0.24-0.26 C, 0.85-1.2 Mn, 0.04 max P, 0.05 max S, 0.15-0.30 Si, bal Fe
Plate· 65,000 77,000 TS, 35,000 min YP, 20 El (in 8")
For mine cars, derricks, booms, bridges, general structures Improved toughness

LUKENS M573 Gr 70
M-176, 0.27 C, 0.85-1.2 Mn, 0.04 max P, 0.05 max S, 0.15-0.30 Si, bal Fe
Plate 70,000-85,000 TS, 38,000 min YS, 18 El (in 8")
For mine cars, bus bodies, booms, derricks, bridges
Improved toughness

LUKENS MANGANESE-VANADIUM STEEL
M-176, 0.18 max C, 1.0-1.45 Mn, 0.08-0.18 V, bal Fe
Rolled 80,000-95,000 TS; 50,000 YS.
For structural purposes, welds satisfactorily.

LUKENS MP
M-176; 0.10 C, 0.5 Mn, 0.2 Si, 0.03 S, 0.03 P, bal Fe.
Plate: 30,000 YS, 45,000 TS; 28 El.
For magnet cores in linear accelerators, cyclotrons, synchrotrons, bubble chambers
Soft magnet steel, medium permeability, high flux density, low hysteresis loss.

LUKENS NICKEL STEEL.
M-176; 0.22 max C, 0.4-0.8 Mn, 2.0-2.5 Ni, 0.15-0.25 Si, bal Fe
Rolled· 70,000 TS; 35,000 YS.
For vessels, boiler shells, dewaxing equipment, oil refinery; resists low temperature embrittlement.

LUKENS NINE NICKEL
M-176, 0.13 max C, 9 Ni, 0.80 max Mn, bal Fe.
Normalized: 90,000 TS, 60,000 YS; 22 El.
For storage and process vessels for handling liquid N_2 and O_2, for low temperature service.

LUKENS "T-1" Type B.
M-176, 0.12-0.21 C, 0.95-1.3 Mn, 0-0.4 Cu, 0.2-0.3 Mo, 0.4-0.65 Cr, 0.3-0.7 Ni, bal Fe.
Plate. 115,000-135,000 TS; 100,000 min YS; 18 El; 321 min or 360 min Brin
For structures, bridges, earth moving equipment
Good low temperature impact properties, good weldability

LUKENS T-1 A-360
M-176, 0.12-0.21 C, 0.7-1.0 Mn, 0.35 Si, 0.4-0.65 Cr, 0.15-0.25 Mo, 0.0005 B, 0.03 V, bal Fe.
Ht Tr Plate: 180,000 TS, 145,000 YS; 360 Brin.
For deck plates, pressure vessels, derricks, booms, earth moving equipment components
Quenched and tempered steel plates.
Wear resistant

LUMDIE.
M-73, 0.4 C, 1.0 Si, 0.2-0.4 Mn, 4.5 W, 5 Cr, 0.5 Co, bal Fe
For dies for Al die casting, header gripper dies on bolt machines, hot work steel

LUMEN 00-A
M-77, 80 Cu, 20 Sn
Cast 33,000 TS, 21,000 YS, 0.5 El, 0.4 RA, 143 Brin
For bells and bearings, alloy deoxidized with P

LUMEN 00-C
M-77, 84 Cu, 16 Sn
Cast. 32,000 TS, 27,000 YS, 1-1.5 El, 0.8-1.2 RA, 70-80 Brin
For bearing metal, washers, dies, trunnions, alloy deoxidized with P

LUMEN 1
M-77, 88 Cu, 8-10 Sn, 2-4 Zn
Cast 40,000 TS, 20,000 YS, 15-25 El, 14 23 RA; 57-74 Brin
For machine parts, spur and bevel gears, air valves, pumps, alloy deoxidized with Zn

LUMEN 1A
M 77, 88 Cu, 8 Sn, 4 Zn
Cast 40,000 TS, 18,000 YS, 20 El, 18 RA, 57 Brin
For bearings, bushings, liners
Corrosion resistant.

LUMEN 2
M-77, 86 Cu, 9.5 Sn, 2.5 Pb, 2.0 Zn
Cast 40,000 TS, 19,000 YS, 15 25 El, 12-23 RA, 52 65 Brin
For bearing bronze, worm gears, tough

LUMEN 4
M-77, 80 Cu, 10 Sn, 10 Pb.
Cast· 36,000 TS, 20,000 YS; 6-8 El; 5-7.5 RA; 46-70 Brin
For bearings, bushings, feed nuts; for high speeds.

LUMEN 5
M-77, 85 Cu, 5 Sn, 5 Pb, 5 Zn
Cast 37,000 TS; 18,600 YS, 15-20 El, 15-20 RA; 45-50 Brin
For medium and low pressure valve bodies, carburetors, general brass castings; Iz-6-7

LUMEN 6.
M-77; 78 Cu, 8 Sn, 14 Pb.
Chill cast: 32,000 TS; 18,000 YS; 10-15 El; 8-15 RA; 48-65 Brin.
For bushings, pumps, mine and acid machines; high speed heavy duty bushings; Iz-4-5.

LUMEN 9.
M-77; 57.5 Cu, 0.77 Sn, 40 Zn, 1.0 Fe, 1 0 Al, 0.25 Mn.
Cast: 65,000 TS; 25,000 YS; 10-35 El; 9-30 RA; 109-120 Brin.
For propeller blades and hubs, valves, pump bodies; known as Manganese Bronze; Iz-20-40.

LUMEN 11 C.
M-77; 89 Cu, 1 Fe, 10 Al.
Cast 75,000 TS; 30,000 YS; 15-25 El; 15-25 RA; 140-114 Brin
For gears, stripper nuts; shock resisting Al Bronze; Iz-30-36.

LUMEN 14.
M-77; 90 Cu, 6.5 Sn, 2.0 Zn, 1.5 Pb.
Cast: 40,000 TS, 18,000 YS; 15-33 El; 14-33 RA; 44-48 Brin.
For valve bodies, carburetors; oil pump; known as Valve or Steam Bronze; Iz-11-15.

LUMEN 15
M-77; 88 75 Cu, 11 Sn, 0.25 Pb.
Sand cast: 40,000 TS; 23,000 YS, 5-10 El; 5-10 RA, 63 70 Brin.
For worm wheels, heavy duty bearings, spur gears, deoxidized with P.

LUMEN 15A.
M-77; 11 Sn, 1 5 Pb, bal Cu.
Sand cast. 36,000 TS, 20,400 YS, 12 El; 10 RA; 54 Brin.
Permanent mold. 45,000 TS, 23,000 YS, 10 El; 8 RA, 72 Brin
For gears, worms, bearings; P-deoxidizer.

LUMEN 19
M-77, 62 5 Cu, 28 Zn, 2.5 Fe, 3 Mn, 4 Al.
Cast 90,000 TS; 45,000 YS; 18 El, 17 RA; 179 Brin
For propellers, shafts, gears, Mn-bronze.

LUMEN 20
M-77, 63 75 Cu, 23 Zn, 2.75 Fe, 3 75 Mn, 6.75 Al.
Cast 120,000 TS; 75,000 YS, 5-10 El, 4-8 RA; 240-270 Brin
For spur gears, gibs, cams, known as Super Mn Bronze; Iz-7-11.

LUMEN 31
M-77; 70 Cu, 9 Sn, 21 Pb
Cast. 27,000-29,000 TS, 17,000-19,000 YS, 17-14 El, 59-63 Brin
For bearings; heavy duty.

LUMEN 33.
M-77; 70 Cu, 4 Sn, 26 Pb.
Cast. 18,000-23,000 TS; 12,000-16,000 YS; 20-12 El, 41-45 Brin.
For bearings, heavy duty.

LUMEN 43.
M-77, 10 5 Sn, 1.5 Ni, bal Cu.
Cast: 50,000 TS; 27,000 YS; 15 El; 13 RA; 74 Brin.
For bearings, worm gears, nuts; corrosion resistant.

LUMEN 48.
M-77, 84 Cu, 10 Sn, 2.5 Pb, 3.5 Ni
Chill cast: 45,000 TS; 26,000 YS; 7 El, 8 RA; 83 Brin.
For bearings, worms, gears, nuts; deoxidized with P.

LUMEN 54.
M-77; 85 Cu, 10 Sn, 5 Pb.
Sand cast: 34,000 TS; 22,000 YS; 12 El; 10 RA; 50 Brin.
Permanent mold: 40,000 TS; 20,000 YS; 8 El; 7 RA; 70 Brin.
For elevator worm gears, feed nuts, tool bearings; IZ 4-7.

LUMEN 90.
M-77; 81 Cu, 14 Al, 5 Fe.
Cast. 302 Brin.
For die blocks; Al-bronze, wear resistant.

LUMEN 91.
M-77; 80 Cu, 15 Al, 5 Fe.
Cast. 340 Brin
For die blocks, Al-bronze, wear resistant.

LUMEN 96.
M-77; 8 5 Al, 3 5 Fe, bal Cu.
Cast. 73,000 TS; 25,000 YS; 120 Brin.
For gears, bolts, hardware, bearings; Al-bronze, corrosion resistant

LUMEN 97.
M-77, 85 Cu, 11 Al, 4 Fe.
Cast: 80,000 TS, 35,000 YS, 8 El; 6 RA; 163 Brin.
Heat treated: 90,000 TS; 45,000 YS; 3 El; 3 RA; 200 Brin.
For gears, feed nuts, shifter forks, Al-bronze, hardenable.

LUMEN 98
M-77, 84 Cu, 12 Al, 4 Fe
Cast 80,000 TS, 37,000 YS, 2 El, 1 RA; 212 Brin
For feed shoes, gibs, cams, gears, forming dies; Al bronze Wear resistant

LUMEN BRONZE.
M-77; 10 Cu, 86 Zn, 4 Al.
Cast: 36,000 TS; 36,000 YS; 0 El, 0 RA; 119 Brin.
For bearings for electric motors and lathes; will not resist excessive heat or live steam.

LUMINARC 2-S
M-811, 99 min Al.
For Al welding rod

LUNDIE B
M-73, 0.4 C, 1 Si, 5 W, 5 Cr, 0 25 Mn, bal Fe.
For die casting dies; oil hardened, wear resistant.

LUNDENHEIMER A-7-S.
M-264; 0 08 max C, 18-20 Cr, 8-10 Ni, bal Fe
Annealed: 80,000-95,000 TS; 30,000-45,000 YS; 60-55 El; 70-60 RA, 160-180 Brin.
For valves and valve parts, Type 304, stainless, austenitic.

LUNKENHEIMER NO. 25 IRON
M-264, 2 6 C, 1 0-1.5 Ni, bal Fe.
Cast 29,000 TS.
For valves, flanges, pipe fittings, cast iron.

LUNKENHEIMER NO 28 IRON
M-264, 2 6 C, 1 0-1 5 Ni, bal Fe.
Cast 39,000 TS.
For valves, flanges, pipe fittings; cast iron.

LUNKENHEIMER NO. 30 IRON
M-264, 2 6 C, 1.0-1.5 Ni, bal Fe.
Cast: 43,000 TS.
For valves, flanges, pipe fittings; cast iron.

LUNKENHEIMER NO. 50 IRON.
M-264; 2 6 C, 1.5 Ni, 0 3 Cr, 0.7 Mo, bal Fe.
Cast: 56,000 TS.
For valves, flanges, pipe fittings; alloy cast iron.

LUNKENHEIMER H-1.
M-264; Sn, alloy, bal Fe.
For bonnets, bushings, valves; valve bronze.

LUNKENHEIMER HB-1.
M-264; Sn, alloy, bal Fe.
For key cocks, valves; valve bronze.

LUNKENHEIMER ML-3.
M-264, 60 min Ni, 23 min Cu, 3.5 max Fe, 2 max C and Si.
Cast: 65,000-90,000 TS; 32,000-40,000 YS; 45-25 El, 125-150 Brin
For valve parts, discs, stems, seat rings, corrosion resistant.

LUNKENHEIMER ML-5.
M-264, 60 min Ni, 23 min Cu, 3.5 max Fe, 0.5 max Al, 2.0 max C + Si
Cast. 65,000-90,000 TS; 32,000-40,000 YS; 45-25 El
For valve parts, seat rings, disks, stems; corrosion resistant, cast Monel.

LUNKENHEIMER S-1
M-264; 6 Sn, 1.7 Pb, 3.7 Zn, 0.47 Ni, bal Cu.
Cast: 42,500 TS, 18,900 YS; 50 El
For valves; corrosion resistant, free-cutting

LUNKENHEIMER T-1.
M-264, 5 Sn, 4.6 Pb, 4.6 Zn, 0.75 Ni, bal Cu.
Cast 38,200 TS; 18,300 YS, 35 El.
For valves; corrosion resistant, free-cutting.

LUNKENHEIMER WC1
M-264; 0.19 C, 0.47 Si, 0.66 Mn, 0.56 Mo, bal Fe.
At 70°F 77,800 TS; 52,200 YS; 29.9 El; 48.5 RA.
At 950°F 63,000 TS, 37,000 YS; 30 El; 65 RA.
For castings, body bonnets.

LUNKENHEIMER WC4
M-688, 0.15 C, 0.5 Mo, 0.7 Cr, 0.9 Ni, bal Fe
Cast 86,000 TS, 60,000 YS, 29 El, 54 RA.
For valves, castings, resists graphitization

LUNKENHEIM WC 5.
M-264; 0.14 C, 0.93 Mo, 0.79 Cr, 0.88 Ni, bal Fe
Cast 88,000 TS; 61,000 YS; 27 El, 54 RA
For castings, valves, resists graphitization

LUNKENHEIMER WCB.
M-264; 0.27 C, 0.68 Mn, 0.43 Si, bal Fe
At 70°F 75,600 TS, 49,100 YS, 30 El, 47.2 RA
At 750°F. 64,000 TS, 27,000 YS, 35 El; 54 RA.
For castings, good weldability

LUNORIUM.
14.9 Cr, 0.9 Co, 55.6 Ni, 18.5 Mo, 4 W, 5 Fe, 0.2 Mn, 0.4 Si, 0.2 C.
Cast. 69,000 TS; 32,000 YS, 1.4 El.

LUNZ IRON
M-534; 1.5 C, 13 Cr, bal Fe
For glass molds, non-warping

LURGIMETALL.
M-299; 96.5 Pb, 2.8 Ba, 0.4 Ca, 0.3 Na
For bearing metals, anti-friction

LURIUM 107B.
M-1285, 0.5-1.0 Mg, 0.2-1.0 Si, bal Al
Heat treated. 28,500-42,700 TS; 21,400-35,600 YS; 15-5 El, 80-100 Brin.
For jewelry, reflectors, auto trim, lighting fixtures; takes good polishing and bright anodizing.

LURIUM L.
M-1285, 99.99 Al.
O. 6000 TS; 2100 YS; 60 El; 13 Brin.
½ H: 13,000 TS; 10,000 YS, 8 El; 25 Brin.
H: 20,000 TS; 18,500 YS; 4 El; 35 Brin.
For reflectors, domestic appliances; high reflectivity.

LURIUM L5.
M-1285; 0.4-0.6 Mg, bal Al.
Soft: 10,000 TS; 2800 YS, 40 El; 22 Brin.
½ H-temper: 21,400 TS, 20,000 YS; 6 El; 45 Brin.
H-temper: 27,000 TS; 25,800 YS; 2 El; 50 Brin.
For reflectors, ordnance and domestic appliances; high reflectivity.

LURIUM L10.
M-1285, 0.08-1.2 Mg, bal Al
Soft 14,200 TS; 4200 YS; 20 El; 30 Brin.
½ H-temper: 24,200 TS; 21,400 YS; 8 El; 50 Brin.
H-temper. 35,500 TS; 30,000 YS, 2 El, 60 Brin.
For reflectors, ornamental trim, domestic appliances, high reflectivity

LURIUM L20.
M-1285, 1.5-2.5 Mg, bal Al.
Soft: 21,400 TS; 7000 YS, 35 El, 40 Brin.
½ H-temper: 35,000 TS; 32,600 YS; 6 El; 75 Brin.
H-temper 50,000 TS, 45,500 YS; 2 El; 80 Brin.
For reflectors, ornamental trim, domestic appliances, high reflectivity.

LUSCO.
M-1422, C, alloy, bal Fe.
For pneumatic tools, wear and shock resisting tools and dies, oil hardened.

LUSTER
M-812, C, Cr, Ni, bal Fe.
For stainless parts, corrosion resistant

LUSTERITE-440 B
M-73, 0.8 C, 16.5-18 Cr, 0.5 Mo, bal Fe.
For surgical and dental instruments, knives, stainless, capable of extreme hardness

LUSTERITE 440C.
M-73, 1.1 C, 17 Cr, 0.5 Mo, bal Fe
Annealed 110,000 TS, 65,000 YS, 15 El; 30 RA; 210 Brin
Heat treated: 280,000 TS, 270,000 YS, 3 El; 15 RA, 555 Brin
For bearings, knives, cutlery, Type 440C, stainless, hardenable

LUSTRE-DIE.
M-24, M-341; 0.5 C, 1.0 Mn, 0.3 Si, 0.25 Mo, 1.1 Cr, bal Fe
302-352 Brin, for plastic mold dies; good weldability

LUXAL 63/25
M-116, 2-4 Mg, 0.4 max Mn, 0.3 max Cr, bal Al
Soft 28,000 TS, 13,000 YS, 30 El, 47 Brin
Hard. 40,000 TS, 35,000 YS; 10 El; 73 Brin.
For aircraft tanks and fittings, fuel lines, marine parts; resists sea water corrosion

L-VICTRIX
M-96, 0.26 C, 2.3 Cr, 1.3 Ni, 0.15 Mo, 0.1 V, bal Fe
For gears, shafts; case hardening.

L-VICTRIX EXTRA
M-96, 0.26 C, 2.45 Cr, 1.75 Ni, 0.23 Mo, bal Fe.
For gears, shafts, case hardening

L-VICTRIX SPECIAL.
M-96, 0.15 C, 1 Cr, 3.65 Ni, 0.35 Mo, bal Fe.
For gears, shafts, case hardening.

L-VICTRIX SPECIAL 32.
M-96; 0.26 C, 0.75 Cr, 0.65 W, 3.4 Ni, 0.3 Mo, bal Fe.
For gears, shafts; case hardening.

LW 2325.
M-Germany; 0.10 C, 0.42 Si, 0.26 Mn, 15.68 Cr, 5.25 W, 1.38 Mo, 2.14 Al, 1.58 Ti, 1.68 Fe, bal Ni.
For hot extrusion dies.
Good high temperature properties and wear resistance.

LW 2326.
M-Germany; 0.18 C, 0.34 Si, 0.39 Mn, 14.91 Cr, 1.39 W, 4.35 Al, 1.68 Fe, bal Ni.
For hot extrusion dies.
Good high temperature properties and wear resistance.

LXX see ALLEGHENY-LUDLUM LXX.

LXX-5T.
M-1, 0 4 C, 18 W, bal Fe.
For hot work, tools and dies; hot work steel.

LYNCAST
M-523; High C, Mn, Si, bal Fe
For chemical engineering equipment; cast iron.

LYNITE.
M-92; 9-13.5 Cu, bal Al.
For castings, pistons, connecting rods; piston alloy.

LYNITE.
M-92, 2 Cu, 1.5 Mg, 0.8 Fe, 0 02 Si, bal Al.
For pistons; age hardenable.

LYNITE 43
M-4, M-92; 95 Al, 5 Si.
Sand cast: 19,000 TS; 9,000 YS; 4 El, 50 Brin.
For light alloy automotive and airplane bodies, see Alcoa 43

LYNITE 109
M-92; 11 5-13 5 Cu, 1.7 Fe + Mn + Mg + Si, bal Al
19,000-28,500 TS, 15,000 YS; 0 5-1.0 El; 70 Brin.
For pressure castings, pistons, chill castings, pressure castings, registered name

LYNITE 112.
M-4, M-192, 90 Al, 7-8 Cu, 1.5 Zn, 1 3 Fe.
Sand cast· 22,000 TS, 14,000 YS; 2 El, 70 Brin
For crankcase, see Alcoa 112

LYNITE 122
M 92, 9 25-10 75 Cu, 2 Fe + Mn + Mg + Si, bal Al
28,000-40,000 TS; 20,000 YS, 1.5-0 5 El; 115 Brin.
For castings to be used at high temperatures, pistons; registered name

LYNITE NO 145
M-92, 87 7 Al, 3 Cu, 8 Zn, 1 25 Fe.
27,500 TS; 4 5 El; 65 Brin
For light alloy castings; casting, shock resistant.

LYNITE NO 146
M-92, 91-93 Al, 7-8 5 Cu, 1 3 Fe, 0 1-1 7 other elements
26,000 TS; 1 4 El
For light alloy castings; casting.

LYNUX BRONZE.
Eng ; 89 Cu, 7 2 Fe, 3.8 Al.
For corrosion resisting hardware and fittings.

LYONORE.
M-456, 0.2 C, 0.2 Cu, 0.5 Cr, 0 8 Ni, bal Fe.
For structural parts; copper open hearth steel.

LYON'S GOLD.
Eng.; 27 Zn, 72 Cu.
For cartridge cases, condenser tubes, brazing; "Tombac."

M1-CARBIDE.
M-Germany; 84 WC, 10 TiC + TaC, 6 Co.
For hard tools, cutters, dies.
Sintered carbides, wear and abrasion resistant.

M2A.
M-118, Mo alloy.
For spot welding tips.

M-2A STEEL.
M-1191; 0 25-0.30 C, 1.15-1.25 Ni, bal Fe.
Cast: 80,000-95,000 TS; 53,000-58,000 YS; 30-24 El, 50-35 RA; 175-200 Brin.
For sheave wheels, gears; oil hardened, shock resistant

M2-CARBIDE.
M-Germany; 82 WC, 10 5 TiC + TaC, 7.5 Co.
For hard tools, cutters, dies.
Sintered carbides, wear and abrasion resistant.

M-2 DREADNAUGHT
M-362, 0 80 C, 4 Cr, 2 V, 6 W, 5 Mo, bal Fe.
For lathe and planer tools, reamers, broaches; high speed steel; Type M2

M-2 STEEL.
M-1191, 0.30 C, 1 15 Mn, 1.25-1.5 Ni, bal Fe
Cast· 90,000-110,000 TS; 55,000-65,000 YS; 30-20 El, 50-40 RA; 200-250 Brin
For lifting forks for trucks, oil hardening, shock resistant.

M-3 DREADNAUGHT.
M-362, 1 C, 4 Cr, 2 7 V, 6 W, 5 Mo, bal Fe.
For lathe and planer tools, reamers, broaches, taps, Type M3, high speed steel.

M-3 SILECTRON
M-1, 3 Si, bal Fe
Core loss 0 49 watts/lb max
For transformers, laminations.
Electrical steel, high permeability

M-10 AIR HARDENING
M-81, 1 C, 5 Cr, 1 Mo, 0 25 V, bal Fe
For gauges, punches, cold work dies; air hardening AISI A2

M-11
M-1105, 0 7 C, 18 W, 4 Cr, 1 V, 5 Co, bal Fe.
For taps, threading tools; high speed steel.

M22VC.
M-86, 0 08-0 16 C, 5 0-6 5 Cr, 5 9-6 6 Al, 1.5-2 5 Mo, 10 5-11.5 W, 2 6-3 4 Ta, 0.4-0 8 Zr, 1 Q max Fe, bal Ni
Cast 106,700 TS, 99,000 YS, 5 6 El, 14 RA
At 600°C· 117,000 TS, 109,000 YS, 4.5 El, 13.8 RA.
For aircraft gas turbines, spinners for glass fibre production
High temperature vacuum casting alloy, Creep and oxidation resistant.

M115
M-1548; 1.5 Mn, bal Al
Half Hard· 22,000 TS, 16,000 YS; 7-14 El; 40-45 Brin
Hard 35,000 TS, 31,000 YS; 3-6 El, 60 Brin
For roofing, structures, commercial vehicles.
Corrosion resistant, non-hardenable

M-252
M-1, M-114, M-73; 0.15 C, 0 5 Mn, 0 5 Si, 20 Cr, 10 Co, 10 Mo, 2 6 Ti, 1 0 Al, 0 005 B, bal Ni.
Bar 180,000 TS; 122,000 YS; 16 El
At 1400°F: 137,000 TS; 104,000 YS, 10 El.
For high temperature service, bolts, jet engine and gas turbine parts.
Heat and corrosion resistant.

M331.
M-365; 0.32 C, 3.4 Cr, 0.4 V, 2.5 Mo, bal Fe.
Air or oil hardening hot work tool steel.

M333.
M-365; 0.30 C, 3.0 Cr, 0.6 V, 3.0 Mo, 2.25 Co, bal Fe.
Air or oil hardening hot work tool steel.

MA-18NiCoMo.
M-68, C, 18 Ni, Co, Mo, bal Fe.
Heat treated: 220,000-305,000 TS; 215,000-300,000 YS, 64-60 RA.
Ductile and weldable.

MACADAMITE.
M-92; 74 Al, 3 Cu, 23 Zn.
34,500 TS; 1.0 El
For pistons; sand castings.

MACCO 33.
M-80; 0 4 C, 5.5 Cr, 1 4 Mo, 1 V, 1 Si, bal Fe.
For die casting dies; air hardening

MACCO 35.
M-80; C, alloy, bal Fe
For tools, air-hardened.

MACCO 35 AIR HARD.
M-80; 1 C, 0.6 Mn, 5.25 Cr, 1.15 Mo, 0.25 V, bal Fe.
For punch and cold work dies; air hardening.

MACCO 99.
M-80; 0.35 C, 0 8 Mn, 0 85 Cr, 0.35 Mo, 0.6 Si, bal Fe
For die casting dies; water or oil hardening.

MACCO ALLOY RAZOR BLADE.
M-80; 0.7 C, 1 2 Cr, bal Fe.
For razor blades; water hardened.

MACCO B-29.
M-80; 0.98 C, 0.26 Mn, 0.2 V, bal Fe.
For cold heading and forming dies, water hardening.

MACCO BELT KNIFE.
M-80; C, Cr, Ni, V, Si, Mn, bal Fe.
For knives, leather splitting belt knives, oil hardened

MACCO BRAKE DIE.
M-80, 0 50 C, 0.90 Mn, 1.02 Cr, 0.22 Mo, bal Fe.
For brake dies; oil hardened

MACCO BRAND SWEDISH.
M-80; C, bal Fe.
For tools; special grade of tool steel.

MACCO CARBON.
M-80; 1 0 C, 0.20 Mn, 0 16 Si, bal Fe.
Annealed: 100,000 TS; 53,000 YS, 21 El, 42 RA; 200 Brin.
For drills, taps, chasers, lathe and planer tools; Type W1; water hardened.

MACCO CERTIFIED.
M-80; C, bal Fe.
For general purpose tools; water hardening.

MACCO ENORMOUS.
M-80; 0.8 C, 5 Cr, 17 W, 1.5 V, 5 Co, bal Fe.
For taps, dies, twist drills, cutters; high speed steel.

MACCO FOOLPROOF O.H.
M-80; 0.55 C, 1.25 Cr, 2.75 W, 0.2 V, bal Fe.
Heat treated: 244,000-315,000 TS; 209,000-275,000 YS; 9-11 El; 27-42 RA; C 48-56 Rock.
For header and swaging dies, chipping chisels, rivet busters, track tools.
Type S1 shock resisting tool steel, good fatigue resistance.

MACCO HARDTUF.
M-80; 0.6 C, 0.45 Mo, 0.20 V, 1.85 Si, bal Fe.
For plastic mold dies; oil hardened.

MACCO HOBOMOLD A.
M-80; 0.07 C, 4.5 Cr, 0.45 Mo, 0.4 Mn, bal Fe.
For plastic mold dies; Type P4; air hardened, hobbing steel.

MACCO HOBOMOLD B.
M-80; 0.06 C, 0.03 Mn, 1 Cr, 0 20 Si, bal Fe.
For plastic mold dies, Type P5; oil hardened, hobbing steel.

MACCO HOBOMOLD C.
M-80, 0 04 C, 0.2 Mn, 0 16 Si, bal Fe.
For plastic mold dies; case-hardening.

MACCO HOLLOW-DRILL.
M-80; C, bal Fe.
For hollow drills, tools, rock drills; water hardened.

MACCO KROMAX.
M-80, 2 5 C, 0.6 Si, 0 5 Ni, 12-14 Cr, bal Fe.
For dies, tools; does not possess red hardness.

MACCO KROMAX 1
M-80; 1 5 C, 11.9 Cr, 0 7 V, bal Fe
For blanking, forming and punching dies; air hardened, non-deforming.

MACCO KROMAX 2.
M-80; 1.4 C, 12 5 Cr, 0 85 Mo, 3 25 Co, 0.4 Si, bal Fe.
For blanking, punching, forming dies; air hardening, cold forming.

MACCO KROMAX SPECIAL
M-80, 1 6 C, 12 4 Cr, 0 72 Mo, bal Fe
For tools, dies; non-deforming

MACCO LENS MOLD.
M 80, 0.4 C, 5 25 Cr, 4 65 W, 1 Si, bal Fe
For die casting lens mold, oil hardening

MACCOMAX
M-80, 0 7 C, 18 W, 4 Cr, 1 V, bal Fe.
For tools, cutters; high speed steel.

MACCO MI
M-80, 0 35 C, 5 Cr, 1.5 W, 1 65 Mo, 1 Si, bal Fe.
For hot work dies, hot work steels.

MACCO M L V.
M-80, 0 35 C, 1 05 Si, 1.55 W, 1 65 Mo, 5 15 Cr, bal Fe
Hardened. 216,000 TS, 185,000 YS, 14 El, 53 RA.
At 1000°F 144,000 TS; 110,000 YS; 19 El, 64 RA.
For die casting dies, hot shear blades, forging and heading dies, punches
Type H12 hot work tool steel, tough and shock resistant.

MACCO NLS.
M-80, 0 9 C, 0 6 Mn, 5 2 Cr, 1 2 Mo, 0.3 V, bal Fe.
For plastic molding dies; oil hardening

MACCO NON-TEMP.
M-80; 0.35 C, 0 30 Cu, 0 45 Si, 0.70 Mn, 0 80 Cr, 0 30 Mo, bal Fe.
For general purpose tools, dies, punches; oil or water hardened, shock resistant.

MACCO P-125.
M-80; 0.25 C, 4.2 Cr, 14.5 W, 0.5 V, bal Fe.
For hot work dies; hot work steels.

MACCO P-150.
M-80; 0.5 C, 2 9 Cr, 15.3 W, 0.6 V, bal Fe.
For hot work dies; high speed steel.

MACCO P-175.
M-80; 0.3 C, 3.3 Cr, 9.5 W, 0.5 V, 0.4 Si, bal Fe.
For hot work dies; hot work steel.

MACCO RADIO.
M-80; 0.8 C, 4 Cr, 6 W, 5.5 Mo, 1.8 V, bal Fe.
For tools, cutters; high speed steel.

MACCO ROYAL CROWN.
M-80; 1.0 C, 1.0 Cr, 0.5 W, 0.5 Mn, bal Fe.
For dies, punches, taps, drills, reamers, drawing dies; non-deforming steel.

MACCO SILICON MANGANESE.
M-80; 0.63 C, 0.78 Mn, 2 Si, bal Fe.
For punches, chisels, crimpers; Type S4; oil hardened, shock resistant

MACCO SILVER DIE.
M-80, 0.52 C, 1 Mn, 1.1 Cr, 0.25 Mo, bal Fe.
For dies for plastic molds, oil hardened.

MACCO SPECIAL.
M 80, 1 0-1 1 C, bal Fe.
For tools, drips, taps; water hardening.

MACCO SUPERIOR HIGH SPEED.
M-80, 0 72 C, 4 Cr, 1 V, 18 5 W, bal Fe.
For tools, cutters, drills; high speed steel.

MACCO SUPERIOR SWEDISH.
M-80; C, bal Fe
For tools, special punches, dies, oil hardened.

MACCO SUPER MOLY.
M-80; 0 8 C, 3 9 Cr, 1 7 W, 8.8 Mo, 1 1 V, bal Fe
For cutting tools, reamers, high speed steel.

MACCO SWEDISH CHROME TUNGSTEN.
M-80, C, Cr, W, bal Fe
For tools, special taps, dies, water hardened.

MACCO SWEDISH MAGNETIC IRON
M-80, 0 2 C, 0 02 Si, bal Fe.
For magnetic parts for all kinds of electrical instruments, high permeability.

MACCO WJF
M 80, 1 4 C, 4 W, 0 35 V, 0 6 Cr, bal Fe.
For cutters, taps, reamers, water hardened, fast finishing

MAC HEMPITE GRADE A
M-229, 1.5-3 5 Ni, 0 7 4 Mn, 0-1 25 Cr, 0-0 75 Mo, 0 4-3.0 C, bal Fe.
Soft 100,000 TS, 65,000 YS; 25 El, 45 RA.
Hard. 600 Brin.
For jaws, rollers, tires, balls, liners, impellers, heavy crusher grade, resists wear and spalling.

MAC HEMPITE GRADE B
M-229, 1 5 3 5 Ni, 0 7-4 Mn, 0-1 25 Cr, 0-0 75 Mo, 0 4-3 0 C, bal Fe
Soft 90,000 TS, 65,000 YS, 25 El, 45 RA; 200 Brin
For heavy duty gears, pinions, medium hardened grade, shock resistant

MAC HEMPITE GRADE C
M-229; 1 5-3 5 Ni, 0.7-4 Mn, 0-1 25 Cr, 0-0.75 Mo, 0 4-3.0 C, bal Fe.
For gears, pinions, hammers, beaters, conveyor parts, brake-drums; hardened grade.

MACHINE BRONZE.
M-77; 50 Cu, 25 Ni, 25 Sn.
For bearings; wear resisting

MACHINERY #30.
M-435; 0.3 C, 0.8 Mn, 0.2 Si, bal Fe.
For machinery parts; construction steel.

MACHINERY #40.
M-435; 0.4 C, 0.8 Mn, 0.2 Si, bal Fe.
For machinery parts; construction steel.

MACHINERY BRASS.
England; 16 Zn, 1 Sn, bal Cu.
For machinery parts; corrosion resistant.

MACH'S ALLOY
98-90 Al, 2-10 Mg.
For light alloy parts.

MACH'S SPECULUM.
69 Al, 31 Mg.
For light alloy parts.

MACHTS METAL.
57 Cu, 43 Zn.
For brazing metal, hardware

MACHT'S YELLOW METAL.
57 Cu, 43 Zn.
For hardware, bolts, nuts; high strength.

MAC-IT.
M-1081, 0 4 C, 0 8 Cr, 1.5 Ni, bal Fe
For screws, threaded fasteners; oil hardening

MACKENITE METAL
M-177; 0.2 C, 20 Cr, 12 Ni, bal Fe
For annealing pots, furnace pots; heat resistant

MacKENZIE METAL.
70-68 Pb, 17-16 Sb, 13-16 Sn.
For bearings, anti-friction.

MACLOY B.
M 521, 0 27 C, 0.3 Si, 1 25 Mn, 11 Cr, 36 Ni, bal Fe.
Heat treated· 90,000 TS; 64,000 YS; 30 El; 55 RA, 200 Brin.
For corrosion and heat resistant parts; austenitic, stainless

MACLOY G.
M-521, 0 5 C, 1.8 Si, 0.6 Mn, 17 Cr, 37 Ni, bal Fe.
94,000 TS, 54,000 YS, 30 El, 40 RA; 200 Brin
For heat and corrosion resistant parts, austenitic, heat and corrosion resistant

MACOLOY TYPE E.
M-1107, P, bal Cu
For brazing, M P. 1150°F

MACOLOY TYPE F
M-1107; P, bal Cu
For brazing, M P. 1180°F.

MACOLOY TYPE G
M-1107; P, bal Cu
For brazing, M P. 1600-1900°F

MACROMAL
M-625, 0 2 C, 12-13 Mn, bal Fe
Rolled 100,000-135,000 TS, 35,600 YS; 30 El.
For compass housings, deck superstructures, transformer shields, austenitic, nonmagnetic

MACROMAL S.
M-625; 0.2 C, 17-18 Mn, bal Fe
Rolled· 100,000-135,000 TS, 35,600 YS; 30 El.
For compass housings, deck superstructures, transformer shields; austenitic, nonmagnetic.

MACROSIL
M-297, 0.15 max C, 11-13 Cr, 1.5-2.5 Ni, 0.3-0.6 Mo, 17-19 Mn, bal Fe.
For chemical plant equipment; corrosion resistant.

MADISON-KIPP NO. 400.
M-1051; 8 Si, bal Al.
For die castings; corrosion resistant

MAERKER IRRUBIGO 1.
M-1305; 0.10 C, 13.0 Cr, bal Fe.
Air or oil hardenable; corrosion resistant.
Ht. Tr.: 85,000-107,000 TS; 18 min El; 140-210 Brin.
Yield strength at 750°F: 44,100 psi min.
For jet engine parts, steam turbine parts; parts subject to corrosion by water and steam.
DIN X10Cr13; AISI 410; VDEh spec 4006.

MAERKER IRRUBIGO 1 Mo.
M-1305; 0.15 C, 13.0 Cr, 1.15 Mo, bal Fe.
Air or oil hardenable; corrosion resistant.
Ht. Tr.: 107,000-128,000 TS; 14 min El; 220-260 Brin.
Yield strength at 750°F. 51,000 psi.
For fittings, brackets, hardware for increased strength and oxidation resistance at elevated temperatures.
DIN XCrMo13; VDEh Spec 4119

MAERKER IRRUBIGO 1S.
M-1305; 0.13 C, 13.0 Cr, 0.35 Mo, 1.60 Ni, bal Fe
Oil or air hardenable, corrosion resistant
Ht. Tr: 114,000-135,000 TS, 14 min El; 225-275 Brin
For highly stressed machine parts subject to corrosion by water and steam
DIN X13CrNiMo13

MAERKER IRRUBIGO 2.
M-1305; 0.20 C, 13.0 Cr, bal Fe.
Air or oil hardenable.
Ht. Tr: 114,000-135,000 TS; 14 min El; 225-275 Brin.
For higher stressed parts subject to corrosion by water and steam.
DIN X20Cr13; (AISI 420); VDEh Spec 4021.

MAERKER IRRUBIGO 2 Mo.
M-1305; 0.20 C, 13.0 Cr, 1.15 Mo, 1.0 max Ni, bal Fe.
Air or oil hardenable; corrosion resistant.
Ht. Tr.: 107,000-128,000 TS; 14 min El; 220-260 Brin.
Yield strength at 750°F: 51,000 psi.
For fittings, brackets, hardware for increased strength and oxidation resistance at elevated temperature.
DIN X20CrMo13, VDEh Spec 4120.

MAERKER IRRUBIGO 3.
M-1305; 0.45 C, 13.0 Cr, bal Fe.
Air or oil hardenable to about C 54 Rock.
Ann: 92,000-114,000 TS, 180-225 Brin.
For corrosion resistant cutting appliances; parts subject to wear and tear, shears, cutlery.
DIN X40Cr13, VDEh Spec 4034.

MAERKER IRRUBIGO 6M.
M-1305, 0.05 C, 25.0 Cr, 1.55 Mo, 7.0 Ni, Nb = 10 × C, bal Fe
Quenched: 92,000-114,000 TS, 25 min El, 190-230 Brin.
For machine parts highly stressed, but which must resist rust and corrosion
DIN X5CrNiMo257, VDEh Spec 4582.

MAERKER IRRUBIGO 12.
M-1305; 0.05 C, 17.5 Cr, 4.75 Mo, 13.5 Ni, bal Fe.
Quenched: 71,000-107,000 TS; 35,500 YS; 45 min El, 130-190 Brin.
Resistant to corrosion by halogen salt solutions.
Indifferent to localized corrosion.
DIN X5CrNiMo1713; VDEh Spec 4449;
Similar to AISI 317.

MAERKER IRRUBIGO 17h.
M-1305; 0.22 C, 17.0 Cr, 2.0 Ni, bal Fe.
Air or oil hardenable, corrosion resistant.
Ht. Tr: 114,000-135,000 TS; 14 min El; 225-275 Brin
Yield strength at 750° F: 54,000 psi.
For machine parts subject to high mechanical stress with increased resistance to weak acids, salt solutions, resistant to sea water.
DIN X22CrNi17; VDEh Spec 4057.

MAERKER IRRUBIGO 25.
M-1305, 0.05 C, 25.0 Cr, 2.25 Mo, 25.0 Ni, Nb = 8 × %C, bal Fe.
Quenched: 71,000-107,000 TS, 35,500 YS; 35 min El, 130-190 Brin.
Good resistance to non-oxidizing acids, for use in the manufacture of viscose products, coking plants, chemical industry.
DIN X5CrNiMoNb2525; VDEh Spec 4578.

MAERKER IRRUBIGO 42.
M-1305, 0.06 C, 20.0 Cr, 5.0 Mo, 42.0 Ni, 2.25 Cu, Nb = 10 × %C, bal Fe.
Quenched: 78,000-114,000 TS, 28,400 YS; 30 min El, 140-200 Brin
Resistant to sulphuric acid, phosphoric acid, organic acids and their salt solutions
DIN X5CrNiMoCuNb2042

MAERKER IRRUBIGO 188
M-1305, 0.10 C, 18.0 Cr, 9.0 Ni, bal Fe
Quenched 71,000-100,000 TS, 31,300 YS; 50 min El, 130-180 Brin
Basic type of corrosion resistant austenitic stainless steel, general use
DIN X12CrNi188, VDEh Spec 4300; AISI 302

MAERKER IRRUBIGO 188A
M-1305, 0.12 C, 18.0 Cr, 9.0 Ni, 0.15 S, bal Fe
Quenched 71,000-100,000 TS, 31,300 YS; 50 min El; 130-180 Brin.
Good machinability, for stainless parts requiring much machining
DIN X12CrNiS188; VDEh Spec 4305; AISI 303

MAERKER IRRUBIGO 188 El
M-1305, 0.02 C, 18.5 Cr, 11.5 Ni, bal Fe
Quenched 64,000-100,000 TS, 25,600 YS, 50 min El, 130-180 Brin
Welding grade austenitic stainless, not necessary to heat treat after welding
DIN X2CrNi189, VDEh Spec 4306; AISI 304L.

MAERKER IRRUBIGO 188N
M-1305, 0.08 C, 18.0 Cr, 10.50 Ni, Nb = 8 × %C, bal Fe
Quenched 71,000-107,000 TS; 29,800 YS; 40 min El, 130-190 Brin.
Welding grade austenitic stainless, also used for parts operating at elevated temperatures.
DIN X10CrNiNb189; VDEh Spec 4550, AISI 347.

MAERKER IRRUBIGO 188 S.
M-1305; 0.08, 18.0 Cr, 10.5 Ni, Ti = 5 × %C, bal Fe.
Quenched 71,000-107,000 TS; 29,800 YS, 40 min El, 130-190 Brin.
Welding grade austenitic stainless; also used for parts operating at elevated temperatures.
DIN X10CrNiTi189; VDEh Spec 4541; AISI 321.

MAERKER IRRUBIGO 188 SS.
M-1305, 0.05 C, 18.5 Cr, 11.5 Ni, bal Fe.
Quenched: 71,000-100,000 TS, 27,000 YS; 50 min El, 130-180 Brin.
Improved quality austenitic stainless; weldable without following heat treatment.
DIN X5CrNi189; VDEh Spec 4301; AISI 304.

MAERKER IRRUBIGO 199.
M-1305; 0.10 C, 18.0 Cr, 2.25 Mo, 10.0 Ni, bal Fe.
Quenched: 71,000-107,000 TS; 31,300 YS; 40 min El; 130-190 Brin.
Excellent corrosion resistance; resistant to sulphites, phosphoric acid, organic acids, etc.
DIN X12CrNiMo1810.

MAERKER IRRUBIGO 199 EL.
M-1305, 0.02 C, 17.5 Cr, 2.25 Mo, 12.0 Ni, bal Fe.
Quenched: 64,000-100,000 TS, 28,400 YS, 45 min El, 130-180 Brin
Excellent corrosion resistance; resistant to sulphites, phosphoric acid, organic acids, etc.; weldable without subsequent heat treat.
DIN X2CrNiMo1810; VDEh Spec 4404; AISI 316 L

MAERKER IRRUBIGO 199 N.
M-1305, 0.08 C, 17.5 Cr, 2.25 Mo, 12.0 Ni, Nb = 8 × %C, bal Fe.
Quenched. 71,000 107,000 TS, 32,700 YS; 40 min El; 130-190 Brin
Excellent corrosion resistance; resistant to sulphites, phosphoric acid, organic acids, etc.; weldable without subsequent heat treat.
DIN X10CrNiMoNb1810, VDEh Spec 4580.

MAERKER IRRUBIGO 199 S
M-1305, 0.08 C, 17.5 Cr, 2.25 Mo, 12.0 Ni, Ti = 5 × %C, bal Fe.
Quenched 71,000-107,000 TS, 32,700 YS, 40 min El, 130-190 Brin
Excellent corrosion resistance; resistant to sulphites, phosphoric acid, organic acids, etc.; weldable without subsequent heat treat
DIN 10CrNiMoTi1810; VDEh Spec 4571

MAERKER IRRUBIGO 199 SS
M-1305, 0.05 C, 17.6 Cr, 2.25 Mo, 12.0 Ni, bal Fe.
Quenched 71,000 100,000 TS, 29,900 YS; 45 min El, 130-180 Brin
Excellent corrosion resistance; resistant to sulphites, phosphoric acid, organic acids, etc, weldable without subsequent heat treat
DIN 5CrNiMo1810; VDEh Spec 4401, AISI 316

MAERKER IRRUBIGO 200 EL
M-1305, 0.02 C, 17.5 Cr, 2.75 Mo, 13.5 Ni, bal Fe
Quenched: 64,000-100,000 TS, 28,400 YS; 45 min El, 130-180 Brin.
Increased resistance to sulphites and organic acids, weldable without subsequent heat treat.
DIN X2NiCrMo1812, VDEh Spec 4435; AISI 316L

MAERKER IRRUBIGO 200 N.
M-1305, 0.08 C, 17.5 Cr, 2.75 Mo, 13.5 Ni, Nb = 8 × %C, bal Fe
Quenched: 71,000-107,000 TS; 32,700 YS, 40 min El; 140-190 Brin.
Increased resistance to sulphites and organic acids, weldable without subsequent heat treat.
DIN X10CrNiMoNb1812; VDEh Spec 4583; AISI 316 Cb

MAERKER IRRUBIGO 200 SS.
M-1305; 0.05 C, 17.5 Cr, 2.75 Mo, 13.5 Ni, bal Fe
Quenched: 71,000-100,000 TS; 29,800 YS; 45 min El; 140-180 Brin.
Increased resistance to sulphites and organic acids; weldable without subsequent heat treat.
DIN X5CrNiMo1812; VDEh Spec 4436; AISI 316.

MAERKER IRRUBIGO 1818.
M-1305; 0.05 C, 17.5 Cr, 2.25 Mo, 20.0 Ni, 2.0 Cu, Nb = 8 × %C, bal Fe.
Quenched: 71,000-107,000 TS; 31,300 YS; 40 min El; 130-190 Brin.
Resistant to sulphuric acid.
DIN X5CrNiMoCuNb1818; VDEh Spec 4505.

MAERKER IRRUBIGO EXTRA M.
M-1305, 0.38 C, 16.5 Cr, 1.15 Mo, 1.0 max Ni, bal Fe.
Air or oil hardenable; corrosion resistant.
Ht Tr.. 114,000-135,000 TS; 14 min El; 225-275 Brin.
Yield strength at 750°F: 56,000 psi.
For shafts, valves, spindles, fittings resistant to corrosion by sea water, organic acids, halogen salts; good at elevated temperature.
DIN X35CrMo17; VDEh Spec 4122

MAERKER IRRUBIGO MC 18 w.
M-1305; 0.90 C, 18.0 Cr, 1.15 Mo, 0.10 V, bal Fe.
Air or oil hardenable; corrosion resistant.
Ann: 128,000 max TS; 260 max Brin
For cutting appliances and parts with a high resistance to wear and tear.
DIN X90CrMoV18; VDEh Spec 4112;
Similar to AISI 440B.

MAFFRITE 6.
M-1509; 0.1 C, 6 Cr, bal Fe.
Rolled. 200 Brin.
For oil refinery equipment; scale resistant to 750°C.

MAFERITE 14.
M-1509, C, 14 Cr, bal Fe.
200 Brin
For oil refinery equipment; scale resistant to 850°C.

MAFERITE 20.
M-1509, C, 20 Cr, bal Fe
230 Brin
For oil refinery equipment, furnace parts, scale resistant to 1000°C

MAFERITE 25
M-1509, C, 25 Cr, bal Fe
230 Brin
For furnace parts, scale resistant to 1050°C

MAFERITE 28N
M-1509, C, 28 Cr, 4 Ni, bal Fe.
260 Brin
For furnace parts, scale resistant to 1150°C.

MAFERITE 30.
M-1509, C, 30 Cr, bal Fe
250 Brin.
For furnace parts, scale resistant to 1150°C.

MAFERITE 30P
M-1509, C, 30 Cr, Mo, bal Fe.
260 Brin.
For furnace parts, scale resistant to 1150°C.

MAGAI
M-275; 0.38 C, 5 Cr, 1.35 Mo, 0.3 V, bal Fe.
Heat treated 215,000 TS; 184,000 YS; 13 El; 40 RA.
For punch inserts, gripper and header dies, punches; hot work steel; Type H11.

MAGALOY.
M-1241; 3.2 C, 2 Si, 0.5 Mg, 0.7 Mn, bal Fe.
For rolls; ductile cast iron.

MAGALUMA.
M-622, 3.4 Mg, 0.15 Mn, bal Al.
Soft: 29,000-36,000 TS; 10,000-14,500 YS; 20-15 El; 50-60 Brin.
Hard: 42,500-50,000 TS; 36,000-42,500 YS; 6-2 El; 85-100 Brin.
For light alloy parts; heat treatable, corrosion resistant.

MAGAN-NICKEL AlNi.
M-303; 4 Al, 94 min Ni.
For spark plug electrodes; corrosion and heat resistant.

MAGAN-NICKEL NiC 1.5.
M-303, 1.5-2.0 Mn, 97.5 min Ni.
For spark plug electrodes; corrosion and heat resistant

MAGAN-NICKEL NiC 4.
M-303; 4 Mn, 95 min Ni
For spark plug electrodes, corrosion and heat resistant

MAGAN-NICKEL NiC 5
M-303; 5 Mn, 94 min Ni.
For spark plug electrodes, corrosion and heat resistant.

MAGAN-NICKEL ZKNi
M 303; 2 Mn, 2 Cu, 95 min Ni
For spark plug electrodes, corrosion and heat resistant

MAGDAL
M-871; 1 Mg, 1.25 Mn, bal Al.
Soft 21,000 TS, 16 El
Hard rolled· 34,000 TS, 8 El.
For light alloy parts, wrought

MAGEX A.
M-1432, C, alloy, bal Fe
Heat treated· 155,000 TS
For pump shafts, gears, drive shafts, preheat treated.

MAGEX B.
M-1432; C, alloy, bal Fe
For cams, chucks, reamers; oil hardened

MAGIC
M-69, 0.53 C, 0.9 Mn, 2.0 Si, 0.15 V, 1.1 Mo, bal Fe.
Annealed. 207 Brin
For chisels, track tools, punches, cement breakers
Type S5 shock resistant tool steel

MAG METAL.
M-870, Cu, Ni
Rolled 55 Brin
For jewelry, Pt substitute

MAGNADURE
M-1232, BaO + Fe_2O_3
For TV ring magnets; permanent magnets

MAGNADUR-3
M-England, $BaFe_{12}0_{10}$
For permanent magnets in metering devices, magnetic and electrical equipment
Permanent magnet High permeability
Barium and iron oxides

MAGNALITE
M-227, 94.2 Al, 2.5 Cu, 1.5 Ni, 0.5 Zn, 1.3 Mg
26,000 TS; 2.5 El
For airplane construction and engine pistons, casting alloy

MAGNALIUM
Eng.; 0-2.5 Cu, 1-5.5 Mg, 0-1.2 Ni, 85-95 Al, 0-3 Sn, 0.2-0.6 Si, 0-0.9 Fe, 0-0.03 Mn.
41,800 TS; 34 El, 29 RA
14,900 TS; 31 El; 69 RA.
For light castings, ornamental, commercial shapes; very brittle, M P. 1110-1280°F

MAGNALIUM (ORIGINAL).
Eng., 95-70 Al, 5-30 Mg
For light alloy castings

MAGNALIUM (CAST).
Eng.; 85 Al; 15 Mg.
For light alloy castings.

MAGNALIUM (CAST X).
Eng., 95 Al, 1.8 Cu, 1.6 Mg, 1.2 Ni.
For light alloy castings.

MAGNALIUM (CAST Y).
Eng ; 97 Al, 1.8 Cu, 1.5 Mg, Sn + Pb.
For light alloy castings.

MAGNALIUM (CAST Z).
Eng ; 95 Al, 3.2 Sn, 1.6 Mg, 0.2 Cu, 0.7 Pb.
For light alloy castings

MAGNALIUM (SHEET).
Eng ; 95 Al, 5 Mg
For pistons

MAGNALIUM ALLOY NO 1
Eng , 95.5 Al, 1.75 Mg, 1.75 Cu, 1.0 Ni
For light alloy parts, cast alloy

MAGNALIUM ALLOY NO 2
Eng , 95.5 Al, 1.75 Mg, 1.75 Cu, 1.0 Pb.
For light alloy parts, cast alloy

MAGNA METAL.
Mg alloy
For light alloy parts, same as "Electron"

MAGNE 1
M-111, 0.9 C, 3.25 Cr, bal Fe.
For permanent magnets

MAGNE 2
M-111, 0.9 C, 6.25 Cr, bal Fe
For permanent magnets

MAGNEI
M-89, 3 C, 1.5 Si, bal Fe
Annealed 52,000 TS, 33,000 YS; 13 El, 120 Brin
For electrical and electromagnetic instruments, magnet cores, high permeability, low hysteresis loss

MAGNESIUM A10
England, 10 Al 0.10 Mn, bal Mg
Cast 12,000 TS, 12,000 YS, 2 El, 53 Brin
T4-temper 40,000 TS, 13,000 YS, 10 El 52 Brin
T6-temper· 40,000 TS, 19,000 YS, 1 El, 69 Brin
For high strenngth castings, age hardened

MAGNESIUM AM100A
M 43, 8.3-9.7 Al, 0.3 max Zn, 0.10 min Mn, bal Mg
Cast 22,000 TS, 12,000 YS, 2 El
T6-Temper 40,000 TS, 16,000 YS, 4 El, 69 Brin
For bearing housings, cylinder heads, valve and pump bodies, supercharger parts
Heat treatable, casting alloy Good fatigue strength

MAGNESIUM AZ31B
M 43, 2.5-3.5 Al, 0.7-1.3 Zn, 0.2 min Mn, bal Mg
Extruded 38,000 TS, 29,000 YS, 15 El
Sheet O-temper 37,000 TS, 22,000 YS, 21 El.
Sheet H24-temper 42,000 TS, 32,000 YS, 15 El
For sheet and extrusion alloy parts, for temperatures up to 300°F

MAGNESIUM AZ31C
M-43, 9 Al, 1 Zn, bal Mg
Die cast 27,000 TS, 17,000 YS, 4 El, 50 Brin.
Extruded· 37,000 TS, 28,000 YS, 12 El, 49 Brin
O-temper 37,000 TS, 22,000 YS, 21 El; 56 Brin.
For truck bodies, dock boards, aircraft frames; formerly Dowmetal FS; good formability.

MAGNESIUM AZ31X.
M-1239, 2.5-3.5 Al, 0.6-1.4 Zn, 0.20 min Mn, bal Mg.
Rolled. 32,000-40,000 TS, 16,000-29,000 YS; 12-4 El.
For light alloy parts.

MAGNESIUM AZ51.
Eng; 4.8 Al, 0.8 Zn, 0.25 Mn, bal Mg.
Soft: 40,000 TS; 21,000 YS; 19 El; 57 Brin.
Hard: 45,000 TS; 34,000 YS; 10 El; 71 Brin.
For light alloy structures; sheet and plate.

MAGNESIUM AZ53.
M-43; Mg alloy.
For light alloy parts

MAGNESIUM-AZ61A.
M-1130, 6.5 Al, 1.0 Zn, 0.20 Mn, bal Mg.
Tubes: 40,000 TS; 22,000 YS; 15 El; 55 Brin.
Bars. 45,000 TS, 32,000 YS; 15 El; 56 Brin.
For light alloy structures, extrusion and forgings.

MAGNESIUM-AZ63A.
M-1130; 6 Al, 3 Zn, 0.2 Mn, bal Mg
Cast: 29,000 TS; 14,000 YS; 6 El; 50 Brin.
T6-Temper: 40,000 TS; 19,000 YS; 5 El, 73 Brin.
For airplane wheels and brakes, oil pumps, crankcases.
Age hardenable casting alloy.

MAGNESIUM AZ80
England; 8.5 Al, 0.5 Zn, 0.15 Mn, bal Mg
Forged 46,000 TS; 31,000 YS; 8 El, 69 Brin.
Aged: 50,000 TS, 34,000 YS; 6 El; 72 Brin.
For high-strength forgings, aircraft parts, age-hardened.

MAGNESIUM AZ80A
M-43; 8.5 Al, 0.5 Zn, bal Mg
Extruded: 48,000 TS; 32,000 YS; 12 El; 60 Brin.
T5-temper 52,000 TS; 36,000 YS; 5 El; 82 Brin.
For aircraft engine parts, bearing housings, valves, formerly Dowmetal O; age-hardenable.

MAGNESIUM AZ81A
M-43, 7.0-8.1 Al, 0.4-1.0 Zn, 0.13 min Mn, bal Mg
F-temper 28,000 TS, 13,000 YS, 6 El
T4-temper 40,000 TS, 30,000 YS, 12 El; 55 Brin
For aircraft parts, structural members, heat treatable

MAGNESIUM AZ91A
M-43; 9 Al, 0.7 Zn, 0.2 Mn, bal Mg
Die cast 33,000 TS, 22,000 YS, 3 El, 60 Brin
For instrument housings, portable tools; general die castings

MAGNESIUM AZ91A.
M-43, 9 Al, 0.5 Zn, bal Mg
Sand cast 24,000 TS, 14,000 YS, 2 El; 52 Brin
T4-temper 40,000 TS; 14,000 YS, 11 El, 53 Brin
T6-temper 40,000 TS, 19,000 YS; 4 El, 66 Brin.
For portable tools, instrument housings; formerly Dowmetal R; age-hardenable.

MAGNESIUM AZ91C
M-43, 8.7 Cu, 0.7 Zn, 0.15 Mn, bal Mg.
F-temper: 24,000 TS, 14,000 YS, 2 El, 53 Brin
T4 temper: 40,000 TS; 14,000 YS, 11 El; 53 Brin.
T6-temper: 40,000 TS, 19,000 YS; 4 El; 66 Brin.
For aircraft engine parts, brake castings, pressure tight castings, age-hardenable.

MAGNESIUM AZ92.
England; 9 Al, 2 Zn, 0.1 Mn, bal Mg.
Cast. 25,000 TS, 14,000 YS; 2 El; 65 Brin.
T5-temper: 25,000 TS; 17,000 YS; 1 El; 69 Brin.
T4-temper: 40,000 TS; 14,000 YS; 10 El; 63 Brin.
T6-temper. 40,000 TS; 22,000 YS; 3 El, 81 Brin.
For high-strength castings; age-hardened.

MAGNESIUM AZ92A
M-43; 9 Al, 2 Zn, bal Mg.
F-temper. 24,000 TS; 14,000 YS; 2 El; 65 RA.
T4-temper: 40,000 TS; 14,000 YS; 10 El; 63 RA.
T6-temper: 40,000 TS; 23,000 YS; 2 El; 84 RA.
For aircraft engine castings, crankcases, housings; formerly Dowmetal C; age-hardenable.

MAGNESIUM AZ916.
England; Mg alloy.
T6-temper: 19,000 TS.
For aircraft and general purpose castings, age-hardenable

MAGNESIUM EK-30.
M-43; 3 Misch-metal, 0.2 Zn, bal Mg.
At 70°F 22,900 TS; 16,500 YS; 2.4 El.
At 400°F: 20,000 TS, 14,000 YS; 13.1 El.
At 600°F: 11,800 TS; 7800 YS; 69.6 El.
For high temperature applications, aircraft components, heat treatable.

MAGNESIUM EK30A
M-43, 2.5-4.6 rare earths, 0.2 min Zr, 0.3 max Zn, bal Mg
T6-temper: 23,000 TS; 16,000 YS; 3 El.
For aircraft engine components; age hardenable, used up to 500°F.

MAGNESIUM EK31A
M-43; 0.55 Zr, 3.0 mischmetal, bal Mg.
T5-temper: 22,000 TS, 17,000 YS; 2 El.
T6-temper: 25,000 TS; 19,000 YS; 4 El.
For aircraft engine components; age hardenable, high temperature service

MAGNESIUM EK31D.
M-43; 0.55 Zr, 2.0 Di, bal Mg
T6-temper: 38,000 TS; 21,000 YS; 7 El .
For aircraft engine components; age hardenable, high temperature service

MAGNESIUM-EK41A
M-43; 3-5 rare earth metals, 0.4-1.0 Zr, 0.3 max Zn, bal Mg
T5 Temper: 23,000 TS; 16,000 YS, 2 El.
T6 Temper: 25,000 TS; 20,000 YS; 3 El.
For aircraft engine components, missiles, high temperature parts
Age hardenable Useful to 500°F Good creep resistance.

MAGNESIUM EM22.
Germany, 2.6 rare earths, 1.5-2.0 Mn, bal Mg
For aircraft engine components; high temp. use.

MAGNESIUM EM42.
Germany; 2-6 rare earths, 1.5-2.0 Mn, bal Mg.
For aircraft engine components, high temp use.

MAGNESIUM ES33A
M-43, 2.5-4.0 rare earths, 0.5-1.0 Zr, 2.0-3.5 Zn, bal Mg.
T5-temper. 24,000 TS, 16,000 YS; 3 El
For aircraft engine components, age hardenable, used up to 500°F.

MAGNESIUM-EX31A
M-43, 2.5-4.0 Rare earths, 0.4-1.0 Zr, bal Mg.
T6 Temper: 35,000 TS, 22,000 YS, 5 El; 64 Brin.
At 600°F. 15,000 TS, 13,000 YS.
For aircraft and missile components up to 550°F; airframe and engine components for 1000 hours at 450°F.
Sand castings Age hardenable

MAGNESIUM HK31A.
M-43; 0.5-1.0 Zr, 2.5-4.0 Th, bal Mg
T6-temper 37,000 TS; 18,000 YS; 8 El.
For aircraft engine components; age hardenable, used up to 700°F.

MAGNESIUM HM11A.
M-43; 1 Th, 1 Mn, bal Mg
At 70°F: 30,200 TS.
At 400°F. 16,800 TS.
At 800°F: 7800 TS.
For aircraft and missile components; die castings for high temperature use.

MAGNESIUM HM21A.
M-43; 1.5-2.5 Th, 0.35-0.80 Mn, bal Mg.
At 70°F: 34,000 TS, 27,500 YS; 5 El.
At 700°F: 13,000 TS; 12,500 YS; 15 El.
For structural airframes; heat resistant to 700°F, good creep resistance.

MAGNESIUM HM31A.
M-43; 3 Th, 1.2 min Mn, bal Mg
T5-temper: 43,000 TS; 34,000 YS; 13 El.
At 400°F: 24,000 TS; 22,000 YS; 32 El .
For missile and aircraft extrusions, for use up to 800°F.

MAGNESIUM HZ32A.
M-43; 0.5-1.0 Zr, 1.7-2.5 Zn, 3.0 Th, bal Mg
T5-temper: 32,000 TS; 15,000 YS; 10 El.
For aircraft engine components; age hardenable, used up to 700°F.

MAGNESIUM-IA6.
9 Li, 3 Th, 2 Zn, 4 Al, 4 Ag, 1 Mn, bal Mg
Heat treated: 45,000 min TS, 35,000 min YS; 15 min El.
For cryogenic applications.
Good low temperature properties to −423°F

MAGNESIUM-II4
7 Li, 1 Zr, 3 Th, 6 Zn, 5 Cd, 6 Ag, bal Mg
Rolled: 45,000 min TS; 35,000 min YS; 15 min El.
At −452°F: 8 min El.
For cryogenic applications
Good low temperature properties to −423°F.

MAGNESIUM JK31A.
M-43; 0.7 Zr, 3.0 Th, bal Mg.
T6-temper: 29,000 TS, 18,000 YS, 4 El.
For aircraft engine components; age hardenable, high temperature service

MAGNESIUM K1A.
M-43; 0.7 Zr, bal Mg
Cast 26,000 TS; 80,000 YS, 19 El
For light alloy parts, missiles, fine grained

MAGNESIUM KH31
England; 2.5-4.0 Th, 0.5-0.7 Zr, bal Mg
H24-temper: 38,900 TS; 29,800 YS; 6 El
T6-temper: 37,100 TS, 19,900 YS, 17 El
For airframes, rockets, missile components; high creep resistance to 700°F.

MAGNESIUM K1XI.
M-43; 0.4-1.0 Zr, bal Mg
For missile and aircraft components, good damping capacity, weldable

MAGNESIUM LA91
M-1395; 9 Li, 1 Al, bal Mg
Rolled: 22,000 TS, 16,500 YS; 30-35 El, 52 Brin.
For satellite and spacecraft construction; light weight

MAGNESIUM-LA91A.
M-1395; 9 Li, 1 Al, bal Mg
Sheet: 22,000 TS; 16,500 YS, 30-35 El.
Forged. 23,500 TS, 20,800 YS; 39 El, 62 RA.
For space craft construction, pressure vessels
Good formability and weldability.

MAGNESIUM LA141.
M-1395; 14.1 Li, 1.5 Al, bal Mg
Rolled: 21,000 TS; 17,000 YS; 25-30 El; 58 Brin.
For satellite and spacecraft construction, light weight.

MAGNESIUM-LA141A.
M-1395; 13.0-15.0 Li, 0.75-1.25 Al, 0.05 max Mn, 0.003 max Na, 0.005 max Fe, bal Mg.
At R.T.: 21,000 TS; 18,000 YS; 28 El.
Forged: 31,500 TS; 30,000 YS; 12 El; 25 RA.
For space vehicles, satellites, pressure vessels, bulkheads, micrometeorite shielding.
Good formability and weldability.

MAGNESIUM-LA142.
M-1395; 13.0-15.0 Li, 1.0-2.0 Al, 0.08-0.15 Mn, bal Mg.
Rolled Sheet: 28,800 TS; 27,000 YS; 18 El.
At 200°F. 15,300 TS; 13,800 YS; 16 El
For armoured ordnance vehicles.
Good formability and weldability

MAGNESIUM-LAZ933A
M-1395, 9 Li, 3 Al, 3 Zn, bal Mg
Sheet: 30,000 TS, 21,000 YS; 30 El; E 79 Rock.
For aerospace equipment operating at cryogenic temperatures
Good low temperature properties

MAGNESIUM M-1.
England, 1.5 Mn, bal Mg
Soft 33,000 TS; 18,000 YS; 17 El.
Hard. 35,000 TS, 26,000 YS, 7 El
Extruded 38,000 TS, 28,000 YS, 10 El.
For structural members, aircraft parts, corrosion resistant

MAGNESIUM MSR.
2 rare earths, 2.5 Ag, 0.7 Zr, bal Mg
Heat treated 40,000 TS, 30,000 YS, 4 El; 70-85 Brin
For high temperature applications, missile components, good creep strength, heat treatable

MAGNESIUM MSR-A
M-1130, 2.5 Ag, 0.7 Zr, 1.7 rare earths, bal Mg
Heat treated: 78,400 TS, 50,400 YS, 4 El, 70-90 Brin
For high strength castings for high temperature, age-hardenable, cast alloy

MAGNESIUM MSR B
M-1130, 2.5 Ag, 0.7 Zr, 2.5 rare earths, bal Mg
Heat treated 78,400 TS, 54,900 YS, 2 El, 70-90 Brin
For high strength castings for high temperature, age-hardenable, cast alloy

MAGNESIUM MTZ
England, 3 Th, 0.7 Zr, bal Mg
Heat treated 65,000 TS, 24,600 YS, 5 El; 50-60 Brin
For aircraft parts, high creep resistance

MAGNESIUM QE22A
M-43, 0.7 Zr, bal Mg
T6-temper: 40,000 TS, 30,000 YS; 4 El
At 400°F 28,000 TS, 25,000 YS; 22 El
For aircraft, jet engine and missile components; highest cast yield strength, age-hardenable

MAGNESIUM ZE10A
M-43, 1.0-1.5 Zn, 0.2 Ce, bal Mg
H24-temper 38,000 TS, 28,000 YS; 12 El.
For missile shipping and storage containers; requires no stress relief after welding.

MAGNESIUM ZE41A
M-43, 0.75-1.75 rare earths; 3.5-5.0 Zn, 0.4-1.0 Zr, bal Mg.
Heat treated: 30,000-32,500 TS; 20,000-22,000 YS; 5-3 El; 65-75 Brin
For structures up to 400°F service; age-hardenable, pressure tight

MAGNESIUM-ZE63A.
M-1130, 5.5-6.0 Zn, 2.0-3.0 R.E. 0.4 min Zr, bal Mg.
86 Temper: 42,000-45,000 TS; 29,000-32,000 YS; 5-10 El.
At 257°F: 30,000 TS; 19,000 YS; 34 El.

At 347°F: 21,000 TS; 16,000 YS; 32 El .
For helicopter structural and transmission castings, gearboxes, aircraft landing wheels.
Castings, operating up to 300°F. High fatigue strength.

MAGNESIUM-ZE63B.
M-1130; 5.5-6.0 Zn, 2.0-3.0 R.E , 0.75-1.25 Ag, 0.4 min Zr, bal Mg.
T6 Temper: 43,000-46,000 TS, 30,000-34,000 YS; 4-8 El.
For helicopter structural and transmission castings, gearboxes, aircraft landing wheels.
Cast alloy. High fatigue strength.

MAGNESIUM ZH62A.
M-43, 1.4-2 2 Th, 4 8-6 2 Zn, 0.5 min Zr, bal Mg.
Aged: 43,500 TS, 26,500 YS; 4 El, 75 Brin.
At 500°F 14,000 TS; 10,000 YS, 30 El
For airframe castings, gear boxes, engine components; fatigue resistant to 400°F

MAGNESIUM ZK21A.
M-43, 2 3 Zn, 0 62 Zr, bal Mg
Bar 38,000 TS, 28,000 YS, 4 El
Tube. 34,000 TS, 26,000 YS, 4 min El.
For storage hoppers, aircraft hangers, shipping boxes; good weldability, no stress relief required

MAGNESIUM ZK51A
M-43, 3 6 5 5 Zn, 0 55 min Zr, 0 15 max Mn, bal Mg.
Cast: 33,000 TS, 19,000 YS; 11 El, 60 Brin
T5-temper 40,000 TS, 26,000 YS; 8 El, 65 Brin.
For airframe structures, landing wheels, high yield strength casting alloy

MAGNESIUM ZK60
M 43, 6 Zn, 0 6 Zr, bal Mg
Extruded 43,000 45,000 TS, 28,000-30,000 YS; 11-9 El
For aircraft structures, extrusions, tough and strong

MAGNESIUM ZK60A
M-43, M-4, 4 8-6 2 Zn, 0 45 min Zr, bal Mg
F-temper 49,000 TS, 38,000 YS, 12 El
T5-temper. 51,000 TS, 42,000 YS; 10 El
T6-temper· 53,000 TS, 48,000 YS
For brake housings, fuel meter bodies, bulkheads, heat treatable, extrusions, high strength and tough

MAGNESIUM ZK60B
M-43, 4 6-6 8 Zn, 0 45 min Zr, bal Mg
T5-temper 45,000 TS, 35,000 YS; 4 El.
For aircraft loading ramps, heat treatable, extrusions.

MAGNESIUM ZK61.
M-1239, 6 Zn, 0 8 Zr, bal Mg
Cast 21,700 TS; 10,900 YS; 12 El.
Heat treated 228,000 TS, 14,100 YS, 8 El.
Aged· 255,000 TS; 16,400 YS; 10 El
For engine components; age hardenable

MAGNESIUM-ZK61A
M-1130, 6 Zn, 0 6 Zr, bal Mg.
T6 Temper· 45,000 TS, 28,000 YS, 8 El; 75 Brin
T5 Temper. 40,000 TS; 26,000 YS; 8 El; 65 Brin
For ordnance vehicles, missiles, aircraft components Heat treatable castings.

MAGNESIUM ZK62.
England; 6 Zn, 2 Misch Metal, 0.5 Zr, bal Mg.
Extruded· 50,000 TS, 45,000 YS; 12 El.
For aircraft components.

MAGNESIUM-ZLH972
7 Li, 9 Zn, 2 Th, bal Mg
For cryogenic applications.
Good low temperature properties to —423°F.

MAGNESIUM ZM41.
M-43; 4 Zn, Mn, 0.7 rare earths, bal Mg.
For light alloy parts; sheets.

MAGNESIUM-ZTY
M-1130; 0.5 Zn, 0 75 Th, 0.6 Zr, bal Mg.
Forging: 43,000 TS; 26,000 YS, 18 El.
Sheet· 38,000 TS; 24,000 YS; 12 El.
For compressor cases, valve covers, pistons.
Good creep and thermal properties.
Hot formable, weldable.

MAGNET C.
M-96, 0.95 C, 1.35 Si, 4 Cr, bal Fe.
For permanent magnets; high coercive force.

MAGNET C
M-459; 1.0 C, 3 3 Cr, bal Fe.
For magnet steel

MAGNET CM
M-459; 0 95 C, 1.1 Mn, 5 Cr, bal Fe.
For permanent magnets

MAGNETOFLEX
M-1631, 41 Cu, 24 Ni, 35 Co.
For electrical and magnetic equipment
Permanent magnet, age-hardenable
High permeability

MAGNETOFLEX-12
M Germany, 68 Cu, 20 Ni, bal Co.
For permanent magnets in electrical and magnetic equipment
Age hardenable, high permeability

MAGNETOFLEX 20
M 1630; 20 Fe, 20 Ni, 60 Cu.
Wire 100,000-120,000 TS; 200 Brin.
For magnets in electrical and electronic equipment; age-hardenable, permanent magnet, same as Cunife

MAGNET W
M 459, C, W, bal Fe
For magnet steel

MAGNET WH
M-459, C, alloy, bal Fe
For magnets, high permeability.

MAGNEWIN
M-869; Al. bal Mg
For light alloy parts

MAGNEWIN 3515
German, 7 3 Al, 0 75 Zn, 0 12 Mn, bal Mg
For light alloy parts; heat treatable

MAGNICO
U S , 12 Co, 6 Cu, 10 Al, 18 Ni, bal Fe
For permanent magnets

MAGNICO.
Russia, 50 Fe, 24 Co, 14 Ni, 9 Al, 3 Cu
For electrical and magnetic equipment, magnet.

MAGNIKO
M-Russia, 25 3 Co, 14 6 Ni, 2 8 Cu, 8.5 Al, bal Fe.
For electrical and magnetic equipment
Permanent magnet, high magnetic permeability.

MAGNIL
M-1595, 0 10 C, 15 5 Mn, 0 75 max Ni, 18.0 Cr, bal Fe.
Cold Rolled. 219,400 TS; 187,400 YS, 6 El.
Heat treated. 296,000 TS; 268,000 YS.
For electronics, computer, instrument and control industries, high modulus diaphragms, bellows, springs, wear plates. Austenitic, nonmagnetic, stainless.

MAGNO.
M-44; 96 Ni, 4 Mn.
For spark plug electrodes, lamp and electronic leads; heat resistant.

MAGNO.
M-89; 0.05 C, bal Fe.
Annealed: 60,000 TS; 22 El.
For magnet cores; high permeability, low hysteresis loss.

MAGNO (ALALCO).
Eng.; 95 Ni, 5 Mn.
Hard drawn: 140,000 TS.
Soft: 65,000 TS; 22 El.
For electrical resistance wire, electromagnetic uses; resistance alloy.

MAGNOLIA 120 BRONZE.
M-178; 75 Cu, 20 Pb, 5 Sn.
Cast: 25,500-28,000 TS; 12,000-18,000 YS; 10-9 El; 55-67 Brin.
For bearings for light loads; resists many acid solutions.

MAGNOLIA AA BRONZE.
M-178; 88 Cu, 10 Sn, 2 Zn.
Cast: 34,000-40,000 TS; 26,000-30,000 YS; 8 El; 85 Brin.
For bearings for underate loads; resists brine solutions.

MAGNOLIA ANTIFRICTION METAL.
M-178; 10-15 Sb, 2-7 Sn, bal Pb.
Cast: 18,000 TS; 8400 YS; 23 Brin.
For high speed and heavy pressure bearings; antifriction metal; 825-900°F.

MAGNOLIA CADMIUM NICKEL.
M-436; Cd, bal Ni.
For bearings, liners; high loads.

MAGNOLIA CONTINUOUS CAST BRONZE.
M-178; 80 Cu, 6-8 Sn, 11-13 Pb, Zn less than 1.
As cast: 44,000 TS; 26,000 YS; 17 El; 80 Brin.
For bearings, bushings.

MAGNOLIA ISOTROPIC BRONZE.
M-178; 10 Sn, 10 Pb, 80 Cu.
Cast: 31,250 TS; 26,000 YS; 8.5 El; 70 Brin.
For die cast bronze bearings; die cast.

MAGNOLIA METAL.
M-178; 84-78 Pb, 15-16 Sb, 0.03 Fe, 0-7 Sn.
Cast: 15,000 TS; 3400 YS; 21 Brin.
For antifriction bearing metal; for bearings subjected to moderate loads.

MAGNO-NICKEL.
M-68; 2-6 Mn, bal Ni.
50,900-69,600 TS; 28,400-34,100 YS; 50-39 El.
For tools.

MAGNOWIN.
M-869; Mg alloy.
For light alloy parts.

MAGNOX-A12.
M-321; 0.7-0.9 Al, 0.002-0.03 Be, 0.008 max Ca, 0.006 max Fe, bal Mg.
For nuclear reactors; low creep ductility at 200°C.

MAGNOX-C.
M-1130; 0.7-0.9 Al, 0.005 Be, bal Mg.
At 212°F: 12,800 TS; 8 El.
At 575°F: 3000 TS; 53 El.
At 750°F: 1000 TS; 88 El.
For light alloy parts; structural members.

MAGNOX ZA.
M-321; 0.6 Zr, bal Mg.
For light alloy parts; good creep ductility.

MAGNUMINUM 127.
M-426; 9 Al, 1 Zn, 0.2 Mn, bal Mg.
Sand cast: 20,200 TS; 9000 YS; 2 El.
Permanent mold: 26,900 TS; 9000 YS; 4 El.
For aircraft parts, crankcases, pressure tight castings and housings; heat treatable.

MAGNUMINIUM 133.
M-556; 0.2 Al, 0.2 Zn, 2.5 Mn, 0.4 Si, 0.2 Cu, bal Mg.
30,000 TS; 16,000 YS; 10 El; 50 Brin.
For light alloy parts, fuel tanks, structures; weldable

MAGNUMINIUM 155.
M-556; 9 max Al, 1.5 max Zn, 1 max Mn, 0.3 max Cu, bal Mg.
40,000 TS; 20,000 YS; 10 El; 55 Brin.
For light alloy parts; non-hardenable.

MAGNUMINIUM 166.
M-556; 5-11 Al, 1.5 max Zn, 1.0 max Mn, bal Mg.
40,000-45,000 TS; 16,000-28,000 YS; 14-10 El; 50-60 Brin.
For light alloy forgings and stampings; heat treatable.

MAGNUMINIUM 177.
M-556; 8.5 max Al, 3.5 Zn, bal Mg.
Sand cast: 20,000 TS; 9000 YS; 2-8 El; 50 Brin.
For die castings; M.P. 610°C.

MAGNUMINIUM 181.
M-556; 8.5 max Al, 3.5 max Zn, 0 5 max Mn, bal Mg.
Cast: 23,000 TS; 10,000 YS; 8 El; 45 Brin.
Heat treated: 32,000 TS; 10,000 YS; 12 El; 55 Brin.
For light castings; heat treatable.

MAGNUMINIUM 199.
M-556, 8.5 Al, 3.5 Zn, 0.4 Si, 0.4 Mn, bal Mg.
Cast: 25,000-30,000 TS; 8-4 El; 45-55 Brin.
For sand and die light alloy castings; heat treatable.

MAGNUMINIUM 220.
M-556, 9-11 Al, 3 5 max Zn, 0.5 max Mn, 1.5 max impurities, bal Mg.
Sand cast. 24,000 TS; 12,000 YS; 2-4 El; 50-60 Brin.
Die cast: 26,000 TS; 2-5 El; 50-60 Brin.
For sand and die light alloy castings; casting alloy, heat treatable.

MAGNUMINIUM 266
M-556; 11 max Al, 1 5 max Zn, 1 max Mn, bal Mg.
45,000-50,000 TS; 20,000-30,000 YS; 10-14 El; 50-60 Brin
For light alloy extruded bars and shapes; for structures.

MAGNUMINIUM 288 A.
M-556; 11 max Al, 2 max Zn, 1 max Mn, bal Mg.
35,000-48,000 TS; 20,000-33,000 YS; 12-5 El; 80-90 Brin.
For aircraft parts; heat treatable.

MAGNUMINIUM 299.
M-137, M-556; 2.5-6 0 Al, 4.5-7.5 Sn, 0.2-2 Ag, 0.1-0.4 Mn, bal Mg.
Cast: 22,000 TS; 10,000 YS; 5-9 El; 45 Brin.
Aged: 31,400 TS; 10,000 YS; 4-14 El; 50 Brin.
For airplane wheels, motor and instrument housings; pressure tight castings.

MAGNUMINIUM 299.
M-556; 2.0-6.0 Al, 3-10 Sn, 0.25-4.00 Ag, bal Mg.
Cast: 18,000-26,000 TS; 10,000-12,000 YS; 4-5 El; 40-50 Brin.
For light castings, meter parts; heat treatable.

MAGOTTEAUX-UM Co50.
M-1581; 0.05-0.12 C, 0.18 Ti, 0.6 Cb, 26-30 Cr, 47-52 Co, bal Fe.
Cast: 135,000 TS; 48,000 YS; 10 El; 10 RA; 250 Brin.
Wrought 132,000 TS; 61,000 YS; 7 El; 6 RA; 350 Brin.
For furnace baffles, burner tips, sintering grates, quench baskets.
Corrosion, heat, thermal shock resistant.

MAHLE 124.
M-1365; Si, Cu, Ni, bal Al.
For light alloy parts, engine components; good machinability, heat resistant.

MAHLE 136.
M-1365; Si, Cu, Ni, bal Al.
For light alloy parts, engine components, high temperature use

MAHLE 244.
M-1365, Si, Cu, Ni, bal Al.
For light alloy parts, engine components; high temperature use.

MAHLE Y.
M-1365, 3.8-4.2 Cu, 1.7-2.2 Ni, 1.5 Mg, 0.3 Si, 0.7 Fe, bal Al
For pistons, cylinder heads; high temperature use.

MAILLECHORT.
67-65 Cu, 13.5 Zn, 13-19 Ni, 0.5-3.2 Fe, Sn + Pb.
For ornamental white metal parts, nickel silver.

MAILLECHORT, GERMAN
Germany, 65.4 Cu, 13.4 Zn, 16.8 Ni, 3.4 Fe
For hardware, fittings, corrosion resistant.

MAILLECHORT, PARIS
France, 66.24 Cu, 13.42 Zn, 16.42 Ni, 3.2 Fe.
For hardware, fittings, corrosion resistant

MAILLECHORT, VIENNA.
Austria; 66.6 Cu, 13.6 Zn, 19.3 Ni, 0.48 Fe.
For hardware, fittings, corrosion resistant.

MAIN METAL
M 5, 50 Zn, 48 Al, 2 Cu.
Cast 49,000 TS; 38,000 YS.
For bearings; sand and permanent mold castings.

MAINTENAL
M-1432; C, alloy, bal Fe
Heat treated 155,000 TS; 132,000 YS, 17 El, 57 RA, 280 Brin
For wrenches, drills, gears, pump shafts, bolts, preheat treated, fatigue resistant.

MAJOR
M-365, 0.7 C, 21 W, 4 Cr, 1.5 V, 13 Co, 0.5 Mo, bal Fe.
For tools, cutters, high speed steel

MAJOR METAL.
3 Cu, 2 Fe, 0.4 Zn, 0.4 Ni, bal Al.
For light alloy parts; hardenable.

MAL-ARC.
M-265; Cr-Mo-Co.
For hard facing welding rod; abrasion resistant.

MALAX A.
M-750; 0.83 C, 5 Mo, 4 Cr, 1.9 V, 6.4 W, bal Fe.
For drills, taps, lathe and planer tools; oil hardening.

MALAX AA.
M-750; 0.75 C, 4.25 Cr, 19 W, 1 V, bal Fe.
For tools, cutters, reamers; high speed steel.

MALAX AAA.
M-750; 0.75 C, 4.25 Cr, 19 W, 2 V, 5 Co, bal Fe.
For tools, cutters, lathe and planer tools; high speed steel.

MALAX AAAA.
M-750; 0.8 C, 4.2 Cr, 19 W, 2 V, 1 Mo, 7.5 Co, bal Fe.
For cutters, forming tools; high speed steel.

MAL COLLOY.
M-Japan; 15 Al, 19.8 Ni, bal Co.
Coercive force 1500. Residual induction 3200. max energy product 1,450,000.
For electrical and magnet equipment and instruments.
Permanent magnet after heat treatment.

MALCROME.
M-750, C, Cr, Mo, W, bal Fe.
For tools, dies; oil hardened.

MAL-DIE.
M-750; 1 C, 5 Cr, 1.1 Mo, bal Fe.
For blanking and forming dies; air-hardened.

MALGA.
M-750, C, Cr, Mo, W, bal Fe.
For tools, dies; oil hardened.

MALGA ELEKTRO SPECIAL
M-750; C, Cr, W, bal Fe.
For tools, dies, water or oil hardened

MALGALOY.
M-750; Si, Cr, Mo, V, W, C, bal Fe.
For shear blades; shock resistant.

MALGA MRO SPECIAL.
M-750, C, Mo, W, Cr, bal Fe.
For tools, dies; wear and shock resistant.

MALGA SPECIAL NON-TEMPERING.
M 750; C, W, Mo, Cr, bal Fe.
For tools, dies; no tempering after quenching.

MALLEABLE CAST IRON "BLACK HEART."
Eng; 1.5-2.5 Carbon, 0.1-0.35 Mn, 0.1 S, 0.2 P, 0.5-1.2 Si, bal Fe
35,000-45,000 TS, 10-5 El.
For railway and automotive castings; machines easily

MALLEABLE CAST IRON "WHITE HEART."
Eng., < 0.4 combined C, < 0.8 total C, 0.1-0.4 Mn, 0.25 S, 0.1 P, 0.5-1.1 Si, bal Fe.
40,000-55,000 TS, 5-3 El.
For railway and automotive castings; machines easily

MALLEABLE IRON 35018.
M-775, 2.2 T.C., 1.0 Si, 0.4 Mn, bal Fe.
Cast 53,000 TS, 35,000 YS; 18 El; 115-135 Brin.
For hardware, agriculture and auto parts; tough, shock resistant

MALLEABLE IRON 32510
M-775; 2.5 T.C., 1.0 Si, 0.4 Mn, bal Fe.
Cast: 50,000 TS; 32,500 YS; 10 El; 115-135 Brin.
For hardware, agriculture and auto parts; tough, shock resistant.

MALLEABLE IRON GM11M
M-609; 2.55 C, 1.4 Si, 0.45 Mn, 0.12 S, 0.05 P, bal Fe.
Malleable Iron.
50,000 TS; 32,500 YS; 10 El; 156 max Brin.
For lightly stressed parts; e.g. steering gear housings.
SAE & ASTM Grade 32510.

MALLET ALLOY.
75 Zn, 25 Cu.
For bearings.

MALLIX.
M-89; 1.8 C, 1.0 Si, 0.5 Mn, bal Fe.
Cast· 78,000 TS; 55,000 YS; 5 El; 180 Brin.
For grate bars, elevator buckets; pearlitic malleable iron.

MALLORY-3.
M-265; 0.4-1.2 Cr, bal Cu.
Sand Cast: 50,000 TS; 46,000 YS; 20 El; 45 RA; 110 Brin.
Bars: 75,000 TS; 70,000 YS; 15 El; 60 RA; 150 Brin.
For resistance electrodes for welding steel, spot welding tips.
Elect. cond. 85%. Corrosion resistance.

MALLORY 8CC.
M-265; Cu-Co-Cd-Si.
Cast: 50,000 TS; 2 El.
For electrical contacts; 50% cond.

MALLORY 22.
M-265; Cd, Zr, bal Cu.
Wrought: 78,000 TS; 72,000 YS; 10 El; 50 RA; 144 Brin.
For resistance welding electrodes; high conductivity.

MALLORY 28
M-265; Zr, bal Cu.
For resistance welding electrode; high electrical and thermal conductivity with high hardness.

MALLORY 44 STRIP.
M-265; Cu, Cr, Cd.
Rolled: 75,000 TS; 70,000 YS; 5 El; 80 Rock B.
Elec. cond. 80%.
For circuit breaker current carrying structural parts, current carrying spring clips, high strength heat sinks

MALLORY 53B.
M-265; Ni, Be, bal Cu.
Cast: 85,000 TS; 70,000 YS, 10 El, 20 RA; 185 Brin.
Wrought: 100,000 TS, 85,000 YS; 20 El; 20 RA; 200 Brin.
For flash welding dies, bearings; 45% conductivity

MALLORY 53-Z.
M-265; Ni, Zr, Si, bal Cu.
Cast: 60,000 TS; 8 El; 165 Brin
For electrode holders; high conductivity 40%.

MALLORY 73.
M-265; Be, Co, Si, bal Cu.
Wrought. 180,000 TS; 150,000 YS; 4 El; 6 RA; 375 Brin
Cast: 110,000 TS; 100,000 YS; 2 El; 4 RA; 375 Brin.
For inertia member, radioactive shields; 20% electrical conductivity.

MALLORY 100.
M-265; 2.5 Co, 0.5 Be, bal Cu.
Rolled: 110,000 TS; 10 El; 230 Brin.
Cast: 95,000 TS; 6 El; 230 Brin.
For welding electrodes, rods, springs; age-hardenable.

MALLORY 125.
M-265; Co, Ni, Be, bal Cu.
Cold drawn: 110,000 TS; 12 El; 240 Brin.
For spot and seam welding stainless steel; 48% conductivity.

MALLORY 150.
M-265; Co, Ag, Be, bal Cu.
Cold drawn: 110,000 TS; 10 El; 240 Brin.
For spot and seam welding stainless steel; 52% conductivity

MALLORY 333.
M-265; Li, Cr, bal Cu.
Cast: 50,000 TS; 27,000 YS; 20 El; 125 Brin.
Rolled: 75,000 TS; 35,000 YS; 15 El; 150 Brin.
For welding dies, brush holders, terminal studs; high electrical conductivity and strength.

MALLORY 1000.
M-265; 4 Cu, 6 Ni, bal W.
Sintered: 112,000 TS; 75,000 YS; 6 El, 120 Brin, Density 17.
For counter balances; governor weights.

MALLORY 1000 GYROMET.
M-265; Cu, Ni, bal W.
For gyroscopes, counter weights; sintered heavy metal

MALLORY 2000.
M-265; 3.5 Ni, 1.5 Cu, bal W.
Sintered: 110,000 TS, 85,000 YS; 5 El; 270 Brin.
For counterweights, gyros, radiation shielding. High density

MALLORY 2960.
M-265, 96.1 W, 2.8 Ni, 1.1 Cu.
Sintered 110,000 min TS; 29 Rock C
Density: 18.3.
For counterweights, gyroscopic rotors
High density, high strength

MALLORY 2985.
M-265; 98.5 W, 1.12 Ni, 0.38 Cu.
Sintered· 80,000 min TS
Density· 18.9
High density, high strength.

MALLORY 3000
M-265, 7 Ni, 3 Fe, bal W
Sintered: 120,000 TS, 88,000 YS, 15 El, 240 Brin.
Worked 195,000 TS; 190,000 YS;
For counterweights, radiation shielding.
Sintered heavy metal
High density Can be cold worked and formed

MALLORY 3950.
M-265, 95 W, 3.5 Ni, 1.5 Fe
Sintered 130,000 TS; 90,000 YS, 15 El 3.5 V notched Charpy, 40 unnotched Charpy density· 18; hardness 28 Rock C
For governor counterweights, radiation shielding, gyroscope rotors

MALLORY D-50
M-265, Ag-Ni
Sintered 30,000 TS
For electrical contacts, 70% cond.

MALLORY D-50F
M-265, 85 Ag, 15 Ni
Ann: 27,000 TS, 40 Rock F
Cold worked. 93 Rock F
Elec cond: 80%
For electrical contacts

MALLORY D-51
M-265, Ag-Ni.
For electric contacts; sintered, 43% cond

MALLORY D-52.
M-265; Ag-CdO
Sintered: 24,000 TS
For electrical contacts; 90% cond.

MALLORY D-53.
M-265; Ag-CdO
Sintered. 21,000 TS.
For electrical contacts; 85% cond.

MALLORY D53X.
M 265; Ag, CdO.
Annealed· 26,000 TS; 20 El; 30 Brin.
For electrical contacts; 90% electrical conductivity.

MALLORY D-54.
M-265; Ag-CdO.
Sintered: 18,000 TS.
For electrical contacts; 80% cond.

MALLORY D-54F.
M-265; 90 Ag, 10 CdO.
Ann: 39,300 TS; 21,500 YS; 24 El; 70 Rock F.
Cold rolled: 45,800-52,000 TS; 43,600-48,600 YS; 9.3-6.6 El; 88-93 Rock F.
Elec. cond.: 82-86%.
For electrical contacts, industrial contactors.

MALLORY D-54-X.
M-265; Ag-CdO.
Annealed: 24,000 TS.
For electrical contacts; elec. cond. 80%.

MALLORY D-55F.
M-265; 85 Ag, 15 CdO.
Ann: 40,100 TS; 22,200 YS; 19 El; 74 Rock F.
Cold rolled: 47,400-53,800 TS; 44,600-50,700 YS; 6.7-4.6 El; 89-93 Rock F.
Elec. cond.: 72-77%.
For electrical contacts, industrial contactors.

MALLORY D55X.
M-265; Ag-CdO.
Annealed: 30,000 TS; 20 El; 52 Brin.
For electrical contacts; 75% electrical conductivity.

MALLORY D-56.
M-265; Ag-Ni
For electrical contacts; elec. cond. 70%.

MALLORY D-57F.
M-265; 90 Ag, 10 Fe
Ann: 31,000 TS; 48 Rock F.
Cold worked: 39,500 TS; 81 Rock F.
Elec. cond.: 90%.
For electrical contacts

MALLORY D-58
M-265, Ag-graphite.
For electrical contacts; elec. cond. 75%.

MALLORY D-58F.
M-265, 95 Ag, 5.0 C.
Cold worked: 40 Rock F.
Elec. cond.: 75%
For electrical contacts

MALLORY D-59.
M-265, Ag-Ni graphite.
For electrical contacts, elec. cond. 70%.

MALLORY D-63X.
M-265, 99.34 Ag, 0.41 MgO, 0.25 NiO.
Air hardened: 70,000 TS, 97 Rock F.
Elec. cond.: 70%.
For electrical contacts

MALLORY D-64F
M-265, Silver base
Ann: 24,600 TS, 14 Rock F.
Cold worked: 40,500 TS; 82 Rock F
Elec. cond.: 101%
For electrical contacts.

MALLORY D-154X
M-265; 86.7 Ag, 13.3 CdO.
Ann: 29,000 TS; 48 Rock F.
Cold worked: 84 Rock F.
Elec. cond.: 68%.
For electrical contacts.

MALLORY D-157.
M-265, 50.0 Fe, 25.0 Cu, 25.0 Ag.
Ann: 84 Rock F; cold rolled: 94 Rock F.
Elec. cond.: 21%. For electrical contacts.

MALLORY D-158F.
M-265; 99.0 Ag, 1.0 C.
Ann: 23,500 TS; 36 Rock F.
Cold worked: 35,000 TS; 69 Rock F.
Elec. cond.: 99%.
For electrical contacts.

MALLORY D-258F.
M-265; 98.0 Ag, 2.0 C.
Elec. cond.: 77%.
For electrical contacts.

MALLORY D-505F.
M-265; 95 Ag, 5 Ni.
Ann: 24,000 TS; 32 Rock F.
Cold worked: 84 Rock F.
Elec. cond.: 95%.
For electrical contacts.

MALLORY D-510F.
M-265; 90 Ag, 10 Ni.
Ann: 25,000 TS; 35 Rock F.
Cold worked: 89 Rock F.
Elec. cond.: 87%.
For electrical contacts.

MALLORY D-511.
M-265; 40 Ag, 60 Ni.
Ann: 42 Rock F; cold worked: 97 Rock F.
Elec. cond.: 25%.
For electrical contacts.

MALLORY D-558F.
M-265; 98.5 Ag, 1.5 C.
Ann: 22,000 TS; 33 Rock F.
Cold worked: 33,500 TS; 66 Rock F.
Elec. cond.: 97%.
For electrical contacts.

MALLORY D581.
M-265; Ag, graphite.
Sintered: 1 El, 58 Brin.
For electrical contacts; 90% electrical conductivity.

MALLORY D-581F.
M-265; 99.5 Ag, 0.50 C.
Ann: 24,500 TS; 44 Rock F.
Cold worked: 36,500 TS; 72 Rock F.
Elec. cond.: 102%.
For electrical contacts.

MALLORY D582.
M-265; Ag, graphite.
Drawn: 42,000 TS, 1 El.
For electrical contacts; sintered, 98% electrical conductivity.

MALLORY D-582F.
M-265; 99.75 Ag, 0.25 C.
Ann: 25,000 TS; 45 Rock F.
Cold worked: 37,000 TS; 73 Rock F.
Elec. cond.: 103%
For electrical contacts.

MALLORY D-583F.
M-265; 99.25 Ag, 0.75 C.
Ann: 24,000 TS, 39 Rock F.
Cold worked: 35,800 TS; 70 Rock F.
Elec. cond.: 100%.
For electrical contacts.

MALLORY D-1058.
M-265; 90 Ag, 10 C.
Cold worked: 3 Rock F.
Elec. cond. 35%.
For electrical contacts.

MALLORY HA TUNGSTEN.
M-265; W-alloy.
Wrought: 120,000 TS.
For electrical contacts; 32% electrical conductivity.

MALLORY K-TUNGSTEN.
M-265; W.
Wrought: 300,000 TS.
For contacts for ignition system; 32% conductivity.

MALLORY L-2748.
M-1229, 5 Al, 5 Cr, bal Ti.
Rolled: 165,000 TS; 153,000 YS; 10 El;
Rockwell A71.
For high temperature applications, corrosion and heat resistant.

MALLORY L-2749.
M-1229, Al, Cr, bal Ti.
Rolled: 90,000 TS; 75,000 YS; 18 El;
Rockwell A62
For high temperature applications; corrosion and heat resistant.

MALLORY MANGANESE ALUMINUM BRONZE
M-265; 63-68 Cu, 3 Fe, 2.5-5.0 Mn, 3-6 Al, bal Zn.
Rolled. 60,000-125,000 TS; 30,000-70,000 YS, 30-8 El; 120-275 Brin.
For propeller blades, worm gears, valve stems; corrosion resistant

MALLORY MANGANESE BRONZE.
M 265, 57-60 Cu, 1 Sn, 0.5 Mn, bal Zn.
Forged 60,000-125,000 TS; 30,000-70,000 YS, 30-8 El, 120-275 Brin.
For propeller blades, gears, valve stems; corrosion resistant

MALLORY MK-TUNGSTEN.
M-265; W
Wrought. 300,000 TS.
For magneto contacts; 32% conductivity.

M-ALLOY
M-575, C, alloy, bal Fe
For aircraft forgings and parts; corrosion resistant.

M-ALLOY
M-575; Cu alloy
For forged parts in aero engines; corrosion resistant.

M-ALLOY.
M-1258, C, alloy, bal Fe.
For foundry sling liners; wear resistant

M-ALLOY
M-1405, 0.58 C, 0.35 Mn, 0.95 Cr, 0.95 Si, 0.2 Mo, bal Fe
For plastic mold dies, hot and cold punches, form tools; oil hardened, tough

MALLOYDIUM
60 Cu, 23 Ni, 13 Zn, 0.9 Fe
For tableware; acid resisting

MALUMINUM.
German, 87 Al, 6.4 Cu, 4.8 Zn, 1.4 Fe, 0.2 Si, 0.1 Mn, 0.2 Pb
21,000 TS, 1.5 El
For light alloy parts

MAMMUT.
M-1114, 0.7 C, 18 W, 5 Co, 4 Cr, 1.3 V, bal Fe
For lathe and planer tools, drills, taps, reamers, hobs; high speed steel, oil hardened

MAMMUT.
M-1291, 0.74 C, 4.1 Cr, 1.1 V, 18.5 W, bal Fe.
For lathe and planer tools, drills, reamers, hobs, high speed steel

MAMMUT SPECIAL.
M-1291; 0.74 C, 4.1 Cr, 1.2 V, 18.5 W, bal Fe
High speed steel; for lathe and planer tools, drills, reamers, hobs.

MAMMUT SPECIAL KN
M-1291, 0.82 C, 4.1 Cr, 0.85 Mo, 1.6 V, 9.0 W, bal Fe.
For high speed steel, for lathe and planer tools, reamers, drills, taps.

MAMMUT SPEZIAL XX.
M-1291, 0.7 C, 4 Cr, Mo, V, W, bal Fe.
For lathe and planer tools, broaches, reamers; high speed steel.

MAMMUTT SPECIAL.
M-1114; C, 18 W, 4 Cr, 1 V, bal Fe.
For tools, dies, cutters; high speed steel

MAN
M-1291, 0.3 C, 0.25 Si, 1.35 Mn, bal Fe
For gears, shafts, machine tool parts; water hardened

MANAURITE 8S
M-1509, 0.2 C, 8 Ni, 18 Cr, bal Fe
Annealed 72,000 TS; 39,000 YS; 20 El.
For chemical plant equipment; resists scaling to 900°C, stainless, austenitic

MANAURITE 10
M-1509; 0.2 C, 10 Ni, 22 Cr, bal Fe
Annealed 72,000 TS, 37,000 YS, 18 El.
For chemical plant and oil refinery equipment; resists scaling to 1050°C, stainless

MANAURITE 12.
M-884, 0.30 C, 25 Cr, 12 Ni, bal Fe
For furnace parts, heat treat boxes; austenitic, corrosion and heat resistant

MANAURITE 12.
M-1509, C, 12 Ni, 25 Cr, bal Fe
Annealed 77,000 TS; 40,000 YS, 20 El
For furnace parts, heat treating equipment, resists scaling to 1080°C, heat resistant

MANAURITE 20
M 1509, C, 20 Ni, 25 Cr, bal Fe
Annealed 80,000 TS, 36,000 YS, 22 El
For furnace parts, heat treating equipment, resists scaling to 1150°C, heat resistant

MANAURITE 35
M-1509, C, 35 Ni, 15 Cr, bal Fe
Annealed: 72,000 TS, 39,000 YS, 22 El.
For heat treating boxes, salt pots, resists scaling to 1200°C, heat resistant

MANAURITE 50W
M-884, 0.50 C, 50 Ni, 27 Cr, 5 W, bal Fe
Cast 64,500 TS, 3.5 El, 2.7 RA
For gas generator retorts, hearth plates, furnace parts.
High heat resistance to 2200°F

MANAURITE 60
M-1509, C, 60 Ni, 15 Cr, bal Fe
Annealed 64,000 TS, 39,000 YS, 22 El.
For salt pots, heat treating equipment, resists scaling to 1200°C, heat resistant

MANCRO
M-111a, 0.15 C, 0.25 Si, 0.50 Mn, 0.75 Cr, bal Fe
For gears, shafts, case hardening.

MANCRO 4
M-111a, 0.20 C, 1.35 Cr, 1.35 Mn, bal Fe
For gears, shafts, case hardening

MANCRO 8.
M-111, 0.38 C, 0.65 Si, 1.15 Mn, 1.15 Cr, bal Fe
For gears, shafts; tough.

MANCRO 32
M-111a; 0.15 C, 1.2 Mn, 1.0 Cr, bal Fe.
For gears, shafts; case hardening

MANCRO 71.
M-111; 0.34 C, 1.05 Mn, 1.05 Cr, bal Fe.
For gears, shafts; oil hardening.

MANCRO 72.
M-111; 0.40 C, Cr, Mn, Mo, bal Fe.
For gears, shafts, machine tool parts; water hardened.

M AND A NO. 1.
M-1065; 88.5 Cu, 6 Sn, 1.5 Pb, 4 Zn.
Cast: 38,000 TS; 20,000 YS; 40 El; 35 Brin.
For pressure valves, pump housing; pressure-tight.

M AND A NO. 2.
M-1065, 85 Cu, 5 Sn, 5 Pb, 5 Zn.
Cast: 34,000 TS; 19,000 YS; 20 El; 43-50 Brin.
For valves, fittings; "Red Brass."

M AND A NO. 3.
M-1065; 80 Cu, 10 Sn, 10 Pb.
Cast: 28,000 TS; 19,000 YS; 8 El; 40-52 Brin.
For bearings; for poor lubrication.

M AND A NO 4.
M-1065; 88 Cu, 10 Sn, 2 Zn.
Cast: 40,000 TS; 22,000 YS; 20 El; 65-75 Brin.
For pressure castings; "Gun Metal."

M AND A NO. 5.
M-1065; 88 Cu, 8 Sn, 4 Zn.
Cast 40,000 TS; 21,000 YS; 20 El, 55-65 Brin.
For gears, pump impellers, machine parts; resists salt water corrosion.

M AND A NO. 6
M-1065, 87 Cu, 8 Sn, 1 Pb, 4 Zn.
Cast: 40,000 TS; 20,000 YS, 30 El; 50-63 Brin.
For gears, pump impellers, machine parts; resists salt water corrosion.

M AND A NO 7.
M-1065, 83.5 Cu, 8 Sn, 8 Pb, 0.5 P
Cast 25,000 TS, 20,000 YS; 8 El, 50-60 Brin
For bearings, heavy duty.

M AND A NO 8.
M-1065, 78 Cu, 6 Sn, 16 Pb
Cast: 20,000 TS, 15,000 YS, 10 El; 50-60 Brin.
For bearings, heavy duty

M AND A NO. 10.
M-1065; 90 Cu, 10 Sn.
Cast: 40,000 TS, 20,000 YS, 10 El, 86 Brin.
For worm gears, tough.

M AND A NO 11
M-1065, 85 Cu, 15 Zn.
Cast
For castings to be brazed; red brass

M AND A NO. 14
M-1065, 60 Cu, 30 Zn, Mn, Fe, bal Al.
Cast: 110,000 TS, 75,000 YS, 5 El; 220 Brin.
For gears, shafts; wear and corrosion resistant.

M AND A NO 15.
M-1065, 55 Cu, 40 Zn, bal Al, Mn, Fe.
Cast: 95,000 TS; 50,000 YS; 15 El; 160 Brin.
For cams, gears, cylinders; wear and corrosion resistant.

M AND A NO. 16
M-1065; 57 Cu, 1 Al, 1 Fe, 0.5 Mn, 40.5 Zn.
Cast. 65,000 TS; 35,000 YS; 20 El; 110 Brin.
For worms, gears, valve stems, propellers; corrosion and wear resistant.

M AND A NO. 17.
M-1065, 57 Cu, 0.5 Sn, 0.5 Pb, 1 Fe, 0.5 Al, 0.25 Mn, bal Zn.
Cast: 60,000 TS; 30,000 YS; 15 El; 85 Brin.
For valve stems, gears; free machining.

M AND A NO. 18.
M-1065; 62 Cu, 1 Sn, 1 Pb, 0.15 Al, bal Zn.
Cast: 40,000 TS; 14,000 YS; 30 El; 50 Brin.
For fittings, ship trimmings, commercial castings; free-cutting.

M AND A NO. 19.
M-1065; 66 Cu, 1 Sn, 3 Pb, bal Zn.
Cast: 30,000 TS, 10,000 YS; 40 El; 45 Brin.
For fittings, ship trimmings, commercial castings; free-cutting.

M AND A NO. 20.
M-1065; 60-70 Cu, bal Zn.
Cast: 22,000 TS.
For castings; yellow brass.

M AND A NO. 21.
M-1065; 88.5 Cu, 3.5 Fe, 8 Al.
Cast: 75,000 TS; 35,000 YS; 30 El; 110 Brin.
For worm gears, propellers, cams, pump parts; corrosion resistant, tough.

M AND A NO. 22.
M-1065; 89 Cu, 1 Fe, 10 Al.
Cast: 80,000 TS; 30,000 YS; 35 El; 130 Brin.
For worm gears, propellers, cams, pump parts, heat treatable, corrosion resistant.

M AND A NO. 23.
M-1065; 96 Cu, 4 Si, 1 Mn.
Cast: 45,000 TS; 30 El.
For castings; non-sparking, corrosion resistant.

M AND A NO. 25.
M-1065; 50-64 Cu, 2-6 Sn, 4-6 Pb, 20-30 Ni, 6-12 Zn.
Cast: 40,000 TS; 15 El.
For valves, trim; nickel silver.

M AND A NO. 26
M-1065; 50-64 Cu, 2-6 Sn, 4-6 Pb, 20-30 Ni, 6-12 Zn.
Cast. 40,000 TS; 15 El
For valves, trim; nickel silver.

M AND A NO. 28.
M-1065; 23 Cu, 3.5 Fe, 60 Ni, bal C, Si, Mn.
Cast: 65,000 TS; 32,500 YS; 25 El.
For trim, dairy equipment; Monel.

M AND A NO. 32.
M-1065, 5 Si, 1 max Fe, bal Al
Cast: 17,000 TS; 8000 YS; 1-3 El; 40 Brin.
For light alloy castings; corrosion resistant; obsolete.

M AND A NO. 34.
M-1065; 10 Cu, 1.2 Fe, 0.2 Mg, bal Al.
Cast: 23,000 TS; 21,000 YS; 0 El; 80 Brin.
For pistons, cylinder heads, non-hardenable.

M AND A NO. 35.
M-1065, 5 Si, bal Al
Cast 17,000 TS; 9000 YS; 3 El; 40 Brin.
For castings, corrosion resistant.

M AND A NO. 36.
M-1065; 1 Cu, 0.7 Fe, 1 Mn, bal Al.
Cast: 16,000 TS, 9000 YS; 10 El; 35 Brin.
For castings; non-hardenable.

M AND A NO. 37
M-1065; 8 Cu, 1 Fe, 1.2 Si, bal Al.
Cast: 19,000 TS; 14,000 YS; 2 El; 65 Brin.
For castings; non-hardenable.

M & A NO. 38.
M-1065; 4.5 Cu, 0.75 Si, 0.5 Fe, 0.2 Zn, bal Al.
T4-temper: 32,000 TS; 16,500 YS; 8.5 El; 60 Brin.
T6-temper: 36,000 TS, 24,000 YS; 0.5 El; 75 Brin.
For crankcases, general purpose; age-hardened.

M & A NO. 40.
M 1065; 5 Si, 1.3 Cu, 0.5 Mg, bal Al.
T7-temper: 38,000 TS; 36,000 YS; 0.5 El; 85 Brin.
T6-temper: 35,000 TS; 25,000 YS; 2.5 El; 80 Brin.
For liquid cooled engine parts; age-hardened.

M & A NO. 42.
M-1065; 0.2 Cu, 7 Si, 0.3 Mg, bal Al
T7-temper: 34,000 TS; 30,000 YS; 2.0 El; 75 Brin.
T6-temper: 32,000 TS; 24,000 YS; 3.5 El; 70 Brin.
For leak proof castings; age-hardened.

M & A NO. 45.
M-1065; 3.0-4.5 Cu, 5.5-7.0 Si, 0.2 Ti, bal Fe.
F-temper: 27,000 TS; 18,000 YS; 2 El; 70 Brin.
T6-temper: 36,000 TS; 24,000 YS; 2 El; 80 Brin.
For general utility castings; age-hardened.

MANDUR.
M-1548; 3.5-5.5 Cu, 0.3-1.0 Si, 0.5-1.0 Mn, 0.5-1.2 Mg, bal Al.
Heat treated: 78,000-85,000 TS; 64,000-71,000 YS; 10-15 El; 130-150 Brin.
For oil pans, crankcases, housings, engine cylinder heads
Age-hardenable. High strength.

MANELEC.
M-691; 1 Si, bal Fe.
For electrical equipment, motors; high permeability.

MANGABRAZE.
M-1510; 0.35 C, 1.92 Mn, 0.32 Mo, 0.28 Si, 0.42 Cu, bal Fe.
Heat treated: 157,000 TS; 146,000 YS; 16 El; 58 RA, 360-385 Brin
For chutes, hoppers, conveyors, screens, liners, scrapers, buckets; wear and impact resistant, mill heat treated.

MANGA-KOTE.
M-507; 0.80 C, 0.8 Si, 14.0 Mn, 4.7 Cr, 3.24 Mo, 3.5 Ni, 0.10 B, bal Fe.
Coated hardfacing electrode.
For overlay or buildup of bucket teeth, grading buckets, tractor rollers, crusher parts.

MANGAL.
M-116, 1.5 Mn, bal Al.
Annealed: 17,000 TS; 20 El
For light alloy parts; corrosion resistant

MANGAL.
M-1548; 1.5 Mn, bal Al
Soft: 14,000 TS; 20-30 El; 20-25 Brin
Hard: 36,000 TS, 28,000 YS, 2 El, 60 Brin
For commercial vehicles, roofing, structures.
Non-hardening, corrosion resistant.

MANGALOY.
Eng.; Ni, Mn, bal Fe.
For electrical resistor; heat resistant.

MANGALOY.
M-964; C, bal Fe.

MANGALOY
M-1128; C, Mn, Ni, Cr, bal Fe.
For hard surfacing electrodes; for manganese steel.

MANGAN.
M-72; 1.05-1.25 C, 13.5-14.5 Mn, bal Fe.
For hard surfacing electrodes; wear resistant.

MANGANAL.
M-374; 0.60-0.90 C, 11-14 Mn, 2.5-3.5 Ni, bal Fe
155,000-140,000 TS; 60,000-55,000 YS; 55-72 El; 35-54 RA; 180-500 Brin
For welding rod, and for resurfacing broken and worn high Mn steel parts; abrasion resistant.

MANGANEND 1 M.
M-677; C, Mo, bal Fe.
Welded: 90,000-100,000 TS; 70,000-85,000 YS; 30-20 El; 70-40 RA.
For welding electrodes; for steel, low H_2.

MANGANEND 2M.
M-677; 0.10 C, 1.6 Mn, 0.35 Mo, bal Fe.
Welded: 125,000 TS; 105,000 YS, 10 El; 15 RA.
For welding electrodes for steel; low H_2.

MANGANEND 13A.
M-677; 0.85 C, 0.8 Si, 13.5 Mn, 1.0 Mo, bal Fe.
Welded: 16 Rc; work hardened: 48 RC.
For hardfacing electrodes; austenitic 13.5% manganese steel.

MANGANESE ANTIFRICTION.
M-565; Mn, Sb, Sn, Pb.
5,670 TS
For machinery bearings, Babbitt metal; C.S. 19450; self-lubricating.

MANGANESE BRASS 73.
M-141; 70 Cu, 1.25 Mn, bal Zn
Annealed. 50,000 TS, 55 El.
Drawn. 90,000 TS; 6 El
For resistance seam and spot welding.

MANGANESE BRASS 510
M-8; 29 Zn, 1 Mn, bal Cu
Hard. 76,000 TS; 62,000 YS; 10 El; 160 Brin.
Soft 47,000 TS, 16,000 YS, 65 El, 60 Brin.
For strip for resistance spot and seam welded products

MANGANESE BRONZE
86-82 Cu, 6-17 Sn, 0.2-2.7 Mn, 0-5 Zn, 0-3 Pb
For gears, general castings, tough

MANGANESE BRONZE
M-129, 56-60 Cu, 0.4-1.5 Fe, 0.5-1.0 Al, 0.4 max Pb, bal Zn
Cast: 65,000 TS; 30,000 YS, 28 El, 25 RA, 100 Brin
For propellers, hubs, valves, pump bodies; corrosion resistant

MANGANESE BRONZE 19
M 141, 58.5 Cu, 0.3 Mn, 0.7 Sn, 1 Fe, bal Zn.
Hard 83,000 TS, 55,000 YS, 25 El
Soft 72,000 TS; 30,000 YS, 45 El.
For bolts, valve parts, tie rods, corrosion resistant

MANGANESE BRONZE 667
M-279, 70 Cu, 28.8 Zn, 1.2 Mn
Ann 47,000-67,000 TS, 13,000-37,000 YS; 30-60 El
Cold rolled. 51,000-105,000 TS, 2-40 El.
Seam and spot welding brass,
for communication equipment,
welded assemblies

MANGANESE BRONZE 937
M-8; 57-62 Cu, 36-40 Zn, 0.5-1.5 Sn, 0.5-1.0 Fe, 0.5 Mn
Soft 60,000 TS, 30,000 YS; 30 El, 30 RA.
Hard: 80,000 TS, 45,000 YS; 20 El; 15 RA
For valve stem forgings, slotted and perforated screens, high strength and toughness;
resists action of salt water

MANGANESE BRONZE 984
M-8, 38 Zn, 1 Sn, 0.5 Fe, 0.5 Mn, bal Cu.
For welding rod; for steel, cast iron, Cu and Ni alloys, M.P. 1598°F.

MANGANESE BRONZE A 675.
M-8; 58.5 Cu, 39.25 Zn, 1.0 Sn, 0.25 Mn, 1.0 Fe.
Hard Rod: 75,000 TS, 45,000 YS, 20 El; B 85 Rock
Soft Rod: 65,000 TS, 30,000 YS; 30 El; B 65 Rock.
For clutch discs, pump rods, shafts, balls, valve stems and bodies.
Readily machined and welded.

MANGANESE BRONZE (A)
Copper Alloy No. 675.
M-33; 58.5 Cu, 39.25 Zn, 1.0 Sn, 1.0 Fe, 0.25 Mn.
Half hard: 72,000 TS; 40,000 YS; 35 El; 70 Rock B.
For balls, forgings, valve stems, welding rod.
ASTM B124 Alloy 4; CDA 675.

MANGANESE BRONZE, CAST.
Eng., 58 Cu, 2 Mn, 40 Zn.
For marine propellers; corrosion resistant.

MANGANESE BRONZE E-77.
M-1191; 57-60 Cu, 0.5-1.5 Sn, 0.25 max Al, 0.5 max Mn, bal Zn.
Forged: 75,000-85,000 TS; 40,000-45,000 YS; 20-15 El; 120-142 Brin.
For marine parts, hardware, propellers; corrosion resistant, high strength.

MANGANESE BRONZE, ROLLED.
Eng., 59 Cu, 1 Sn, 0.3 Mn, 31 Zn.
For marine parts, nuts, bolts; corrosion resistant.

MANGANESE CASTING BRASS.
M 165; 58.5 Cu, 40 Zn, 0.85 Sn, 0.5 Al, 1.5 max. Pb, 0.15 Mn.
70,000 TS; 20 El.
A substitute for malleable iron, high strength.

MANGANESE COPPER "A."
Eng.; 29.2 Cu, 51.65 Mn, 9.68 Fe, 6.25 Al, 3.23 C.
For resistances, heat and corrosion resistant parts; heat and corrosion resistant.

MANGANESE COPPER "B."
Eng., 56.3 Cu, 40.9 Mn, 1.5 Fe, 1.1 Si
For resistances, heat and corrosion resistant parts; heat and corrosion resistant

MANGANESE COPPER "C."
Eng., 75 Cu, 25 Mn
For resistances, heat and corrosion resistant parts; heat and corrosion resistant.

MANGANESE COPPER "D."
Eng.; 75.3 Cu, 22.4 Mn, 2.15 Fe.
For resistances, heat and corrosion resistant parts; heat and corrosion resistant

MANGANESE COPPER "E."
Eng., 85 Cu, 10.92 Mn, 1.83 Fe, 2.0 Zn
For resistances, heat and corrosion resistant parts, heat and corrosion resistant

MANGANESE COPPER "F."
Eng.; 89.7 Cu, 8.72 Mn, 1.54 Fe
For resistances, heat resisting parts; heat resistant.

MANGANESE COPPER "G."
Eng.; 85.55 Cu, 10.66 Mn, 2.66 Fe, 0.39 Sn, 0.45 Pb
For resistances, heat resistant

MANGANESE COPPER "H."
Eng.; 84.33 Cu, 10.61 Mn, 2.31 Fe, 2.1 Zn, 0.4 Sn, 0.3 Pb
For resistances; heat resistant.

MANGANESE M1.
M-1017; C, Mn, Ni, bal Fe.
Welded: 350 Brin.
For arc welding electrodes, hard facing; forgeable, wear resistant.

MANGANESE MOLYBDENUM STEEL.
M-176; 0.25 max C, 1.65 max Mn, 0.75 max Mo, bal Fe.
Rolled: 95,000 TS; 60,000 YS; 25 El; 200 Brin.
For shaft gears; tough.

MANGANESE NICKEL.
M-68; 98.5-95 Ni, 1.5-5 Mn.
52,100-59,000 TS; 16,500-23,100 YS; 51-36 El.
For fittings; corrosion resistant.

MANGANESE NICKEL.
Eng.; 82-52 Cu, 14-31 Mn, 3-16 Ni.
For heat resistant parts; heat resistant

MANGANESE NICKEL-2%.
M-61; 3 Mn, bal Ni.
Annealed: 75,000 TS, 35,000 YS; 40 El; 140 Brin.
For lead wires for electrical appliances; heat resistant.

MANGANESE NICKEL 5%.
M-61; 5 Mn, 95 Ni.
Annealed: 75,000 TS, 35,000 YS, 40 El; 140 Brin.
For lead wires for electrical appliances; heat resistant.

MANGANESE NICKEL NO. 484 ALLOY.
M-65; 98.5 Ni, 1.5 Mn.
For spark plug electrodes; heat resistant.

MANGANESE NICKEL SILVER.
German, 73-60 Cu, 2.4-20 Mn, 10-17 Ni, 0-10 Sn, 0-8.8 Zn
For white metal parts; corrosion resistant.

MANGANESE RED BRASS 507.
M-8, 14 Zn, 1 Mn, bal Cu.
Hard. 69,000 TS, 55,000 YS; 7 El, 140 Brin.
Soft. 40,000 TS, 15,000 YS; 45 El; 55 Brin
For strip for resistance spot and seam welded products

MANGANESE S3
M-1017, C, Mn, Ni, bal Fe
Welded 180 Brin.
Work hardened 450 Brin.
For hard facing electrodes, wear resistant.

MANGANESE STEEL MEDIUM
M-24, 0.1 C, 1.2 Mn, bal Fe.
Rolled 50,000 TS
For structures, bridges, high tensile steel.

MANGANESE STEEL PEARLITIC.
Eng.; 1.4-3.5 Mn, 0.2-0.3 Si, 0.2-0.6 C, bal Fe.
For gears, shafts; British Patent 131980.

MANGANIN
M-44, 10.5-13.5 Mn, 1-2 Ni, bal Cu
Annealed: 70,000 TS
For instrument resistors and shunts, low thermal EMF.

MANGANIN
M-61; M-897, 4 Ni, 12-14 Mn, bal Cu.
Annealed: 80,000 TS, 45,000 YS, 50 El.
For resistors, thermocouples, low temperature coefficient of resistance.

MANGAN-NEUSILBER.
German; 73-59 Cu, 10-18 Ni, 2.4-20 Mn, 5-20 Zn.
For white metal parts, corrosion resistant.

MANGANNICKEL 1.
M-297; 1.5 Mn, 0.25 C, bal Ni.
Annealed: 74,000 TS, 36 El; 95 Brin.
Drawn: 132,000 TS; 1 El; 250 Brin.
For German silver, candlesticks, water meter parts; corrosion resistant.

MANGANNICKEL 2.
M-297; 1.5 Mn, bal Ni.
Rolled: 135,000 TS; 1 El; 270 Brin.
Annealed: 76,800 TS; 35 El; 100 Brin.
For thermocouples; corrosion resistant.

MANGANNICKEL 4.
M-297; 4 Mn, bal Ni.
Rolled: 142,200 TS; 1 El; 280 Brin.
Annealed: 81,000 TS; 34 El; 110 Brin.
For thermocouples, spark plugs; corrosion resistant.

MANGANNICKEL 5.
M-297; 4.5-5.5 Mn, bal Ni.
For spark plug electrodes; heat resistant.

MANGANO.
M-73; 0.95 C, 1.65 Mn, 0.25 Si, bal Fe.
For dies, gages, tools, blanking dies; non-deforming, oil hardening.

MANGA-TONE.
M-507; 1.7 C, 10 Ni, 30 Mn, 2 V, bal Fe.
Welded: 70,000 TS; 500 Brin.
For hard facing electrode; wear resistant.

MANGA-TONE N.M.
M-507; 2.0 C, 0.8 Si, 26.2 Mn, 8.3 Ni, bal Fe.
Filler rod for repair or buildup of austenitic manganese steel parts as shovel teeth, railroad frogs, crossovers, pump impellers, tractor bottom rollers, crusher plates.

MANGCRAFT A.
M-1201; 0.5-0.8 C, 11-14 Mn, bal Fe.
For welding rod for 14% Mn steel; austenitic, wear resistant.

MANGCRAFT B.
M-1201; 0.5-0.8 C, 11-14 Mn, 4.5-5 5 Ni, bal Fe.
For welding rod for 14% Mn-Ni steel; austenitic, abrasion resistant

MANGDIE.
M-1724; 0.95 C, 1.25 Mn, 0.50 Cr, 0.20 V, 0 50 W, bal Fe.
Oil hardening non-distorting alloy tool steel; for brake-press tools, taps, threading dies, plug gages.

MANGJET.
M-578; 0.65 C, 14.5 Mn, 0.14 Si, 1.15 Mo, bal Fe.
Hardsurfacing arc welding electrodes for resistance to severe impact.

MANGONIC 2.
M-121; 2 Mn, 0.1 Cu, 0.4 Fe, 0.05 C, 0 1 Si, bal Ni.
Annealed: 84,000 TS; 24,000 YS; 56 El; 76 RA; 140 Brin.
For spark plug electrodes, heating element connectors, readily spun, ductile.

MANGONIC 3.
M-121; 3 Mn, bal Ni.
For radio valve and grid supports, lamp wire supports; heat resistant.

MANGONIC 5.
M-121; 5 Mn, bal Ni.
For radio valve and grid supports, lamp wire supports; heat resistant.

MANGO-PLATE.
M-1432; C, alloy, bal Fe.
Heat treated: 153,000 TS; 141,000 YS; 14 El; 54 RA; 390 Brin.
For coal chutes, conveyor lines, scraper blades; work hardens, abrasion resistant.

MANGRID D.
M-61; 4.5 Mn, bal Ni.
Annealed: 75,000 TS; 35,000 YS; 40 El; 140 Brin.
For vacuum tube grid wire; magnetic.

MANGRID E.
M-61; 20 Mn, bal Ni.
Annealed: 79,000 TS.
For furnace lead wire, grid wire; magnetic.

MANG-ROD NO. 250.
M-1096; 0.9-1.05 C, 0.9-1.2 Cr, 0.4 Si, 14 Mn, bal Fe.
Welded: 250 Brin.
For hard facing electrode; for Mn steels.

MANG-TRODE.
M-13; Zn, Mn, bal Cu.
For welding electrode for Mn-bronze; arc welding.

MANHARDT'S ALLOY.
Eng.; 83 Al, 10 Sn, 6.2 Cu, 0.1 Mg, P.
For light alloy parts; non-hardenable.

MANIFLEX.
M-32; 0 20 C, 1.25 Mn, 0 80 Si, 0.02 P, 0.20 S, 21 0 Cr, 11 5 Ni, bal Fe.
At R.T.: 103,000 TS; 58,000 YS; 42 El; 58 RA; 212 Brin
At 1600°F: 22,000 TS, 15,000 YS, 67 El; 72 RA; 60 Brin
For shafts and bushings in manifold exhaust control valves in automotive engines
Free-cutting, corrosion and heat resistant.

MANNESMANNSTAHL-F12.
M-1381; 0 20 C, 12 Cr, 1 Mo, 0.4 Ni, 0.3 V, bal Fe
Annealed· 90,000 TS; 38,000 YS, 26 El; B 92 Rock
Hardened 230,000 TS; 190,000 YS; 11 El; C 46 Rock.
For valves, bearings, cutlery, surgical instruments. Corrosion resistant, hardenable.

MANNHEIM GOLD.
M-314, 83 Cu, 10 Zn, 7 Sn
25,200 TS, 25 El, 69 Brin.
For cheap jewelry, moderately corrosion resistant.

MANNHEIM GOLD
M-314; 89-80 Cu, 7-20 Zn, 0-9 Sn
25,200 TS; 25 El, 69 Brin
For cheap jewelry, moderately corrosion resistant.

MANOFORT 160.
M-1509, 0.30 C, 2 0 Ni, 1 0 Cr, 0.40 Mo, bal Fe.
Heat treated· 212,000-242,000 TS, 163,000-200,000 YS, 9-7 El
For gears, shafts, crankshafts; oil hardened, shock resistant

MANOFORT 180.
M-1509; 0 40 C, 3 5 Ni, 1 4 Cr, 0 4 Mo, bal Fe.
Heat treated. 228,000-275,000 TS; 185,000-214,000 YS; 6-4 El
For gears, shafts, countershafts, oil hardened, shock resistant.

MANOIR ABRADUR 220
M-1509, 0 70 C, 1 0 Mn, bal Fe.
Heat treated: 100,000-115,000 TS; 65,000-78,000 YS; 8-6 El; 220-260 Brin.
For rails, tools, hammers, water or oil hardened.

MANOIR ABRADUR 240.
M-1509; 0.50 C, 1 0 Mn, 1 0 Cr, bal Fe
Heat treated: 100,000-114,000 TS; 65,000-78,000 YS; 8-6 El; 220 260 Brin.
For camshafts, countershafts, gears, shafts; wear resistant, oil hardened.

MANOIR ABRADUR 400.
M-1509; 0.30 C, 1.8 Ni, 1.0 Cr, 0.35 Mo, bal Fe.
Heat treated· 186,000-228,000 TS; 156,000-186,000 YS; 6-4 El; 400-480 Brin.
For gears, shafts, countershafts; oil hardened, tough, shock resistant.

MANOIR ABRADUR 500.
M-1509; 0.40 C, 3.5 Ni, 1.4 Cr, 0.40 Mo, bal Fe.
Heat treated: 144,000-156,000 TS; 92,000-114,000 YS; 12-10 El; 280-320 Brin.
For gears, shafts, countershafts, mining equipment; oil hardened, tough, shock resistant.

MANOIR ABRADUR 600.
M-1509; C, Cr, W, V, bal Fe.
600 Brin.
For abrasion resistant parts, sand blasting nozzles; wear and abrasion resistant.

MANOIR ABRADUR M14.
M-1509; 1.2 C, 13 Mn, bal Fe.
Rolled: 120,000-157,000 TS, 50,000-65,000 YS; 35-30 El.
For shovels, dippers, frogs, cross tracks; wear resistant.

MANOIR ABRADUR M14K.
M-1509, 1.2 C, 13 Mn, Cr, bal Fe
For dippers, shovels, cross tracks; wear and abrasion resistant.

MANOIR APS10
M-1509, 0.12 C, 2 Cr, 0.4-0.9 Al, Mo, bal Fe.
Normalized 69,000-92,000 TS, 42,000-54,000 YS, 16-12 El
For oil refinry equipment; corrosion resistant.

MANOIR APS20
M-1509; 0.12 C, 4 Cr, 0.4-0.9 Al, Mo, bal Fe
Normalized: 69,000-92,000 TS, 42,000-54,000 YS, 16-12 El.
For oil refinery equipment, corrosion resistant.

MANOIR APS25
M-1509, 0.12 C, 4 Cr, 0.9 Al, 0.9 Ni, bal Fe.
Normalized 114,000-135,000 TS, 85,000-107,000 YS, 11-7 El
For oil refinery equipment, corrosion resistant

MANOIR EL38M
M-1509; low C, Mn, bal Fe.
Annealed 55,000 TS, 26,000 YS; 22 El, 120 Brin.
For motors, electrical equipment, high magnetic permeability

MANOIR EL40
M-1509, low C, Mn, bal Fe
Annealed. 58,000 TS, 30,000 YS, 22 El, 120 Brin

MANOIR EL45
M-1509; C, Mn, bal Fe
Annealed 65,000 TS, 32,000 YS, 20 El, 140 Brin

MANOIR EL50
M-1509; C, Mn, bal Fe.
Annealed: 72,000 TS, 36,000 YS, 18 El, 155 Brin

MANOIR EL55
M-1509, C, Mn, bal Fe.
Annealed: 79,000 TS; 40,000 YS; 15 El; 170 Brin.
For bed plates

MANOIR EL65.
M-1509, C, Mn, bal Fe.
Annealed 92,000 TS, 50,000 YS, 10 El; 210 Brin.

MANOIR P17.
M-1509; 0.12 C, Mn, Mo, V, bal Fe.
Rolled: 76,000-92,000 TS; 58,000-65,000 YS; 22-18 El.
For gears, cams, camshafts; case hardened, tough.

MANOIR PF-0.
M-1509; 0.15 max C, 0.50 Mo, bal Fe.
Annealed: 65,000 TS; 37,000 YS; 24 El.
For oil refinery equipment.

MANOIR PF-1.
M-1509; 0.15 max C, 0.50 Cr, 0.50 Mo, bal Fe.
Annealed: 78,000 TS; 40,000 YS; 18 El.
For oil refinery equipment.

MANOIR PF-2.
M-1509; 0.20 max C, 1.0 Cr, 0.50 Mo, 0.15 V, bal Fe.
Annealed: 78,000 TS; 46,000 YS; 16 El.
For oil refinery equipment.

MANOIR PF-5
M-1509, 0.15 max C, 5.0 Cr, 0.50 Mo, bal Fe.
Annealed 78,000 TS; 36,000 YS; 18 El.
For oil refinery equipment, stills; corrosion resistant

MANOIR PF-6.
M-1509, 0.15 max C, 2.2 Cr, 1.0 Mo, bal Fe.
Annealed: 85,000 TS; 36,000 YS; 15 El.
For oil refinery equipment; corrosion resistant.

MANOIR PF-15.
M-1509; 0.20 max C, 0.80 Cr, 0.50 Mo, bal Fe.
Annealed: 92,000 TS, 58,000 YS; 16 El.
For oil refinery equipment

MANOIR PFV-55.
M-1509, 0.15 max C, 2.0 Cr, 0.35 Mo, V, Al, bal Fe
Annealed: 78,000 TS, 36,000 YS; 15 El.
For oil refinery equipment; corrosion resistant.

MANOIR PM35
M-1509, 0.17 C, Mn, Cr, Mo, V, bal Fe.
Normalized 143,000-170,000 TS; 107,000-121,000 YS, 10-7 El.
For gears, cams, camshafts; case hardened, tough

MANOIR RS1
M-1509, 0.45 C, 0.70 Mn, 1.8 Si, bal Fe.
Heat treated 177,000-200,000 TS, 156,000-177,000 YS, 4 El
For punches, air hammers, chisels, shock resistant, oil hardened

MANSIL
M-275, 0.90 C, 1 Mn, 0.5 Cr, 0.5 W, bal Fe.
For punches, cutters, dies, mandrels; Type O1, oil hardened, non-deforming.

MANSIL
M-357, 0.9 C, 1.1 Mn, 0.5 Cr, 0.5 W, bal Fe
Heat treated 661 Brin
For dies, non-deforming.

MANSIL-O1
M-357; 0.90 Cr, 1 Mn, 0.5 Cr, 0.5 W, bal Fe.
For punches, cutters, dies, mandrels, form tools; Type O1; oil hardened, non-deforming.

MANSILOY
M-48, 60-63 Mn, 28-31 Si, 0.07 max C, 0.05 max P.
For production of stainless steels; reduces metal oxides from the slag.

MAN-VAN
U S; 0.95 C, 0.15 Mo, 0.10 V, bal Fe.
For cutting tools, dies, water hardening

MAPLE LEAF.
M-435, 0.8-1.2 C, 0.25 Si, 0.25 Mn, bal Fe.
Water hardened. 165,000-215,000 TS; 110,000-150,000 YS, 11-15 El, 32-37 RA; 330-600 Brin.
For stamps, knurls, drills, taps, mandrels, reamers, cutters.
Type W1, water hardening.

MAPLE LEAF 8
M-435; 0.80 C, bal Fe.
For blacksmith tools; water hardened.

MARADAMIT.
Al alloy.
For light alloy parts.

MARATHON.
M-45; C, alloy, bal Fe.
For machine tool parts; oil hardened.

MARATHON.
M-260, M-38; 2.2 C, 12 Cr, bal Fe.
For dies, swedges, punches, drawing, shearing and riveting dies; resists wear and abrasion.

MARATHON-000 EXTRA.
M-1496; 0.80 C, 4 Cr, 18 W, 2 V, bal Fe.
Hardened: C 64-66 Rock.
For lathe and planer tools, drills, hobs, reamers, chasers, form cutters.
Type T-2 tool steel, high red-hardness.

MARATHON CRM SPEZIAL.
M-1496; 1.0 C, 1 0 Mn, 1 0 Cr, 0.25 Mo, bal Fe.
Ht. Tr.: 288,000 TS; 278,000 YS; 540 Brin.
For precision and plug gauges, bearings, liners, arbors.
High toughness and wear resistance.
Type L-5 tool steel.

MARATHON-CRS.
M-1496; 1.05 C, 1.4 Cr, bal Fe
Ht. Tr.: 200,000 TS; 185,000 YS; 3 El; 390 Brin.
For gauges, bushings, knurls, taps, dies, arbors, rolls, bearings
Oil hardening, tough and wear resistant.
Type L-1 tool steel.

MARATHON-E38 Mo
M-1496; 0 35 C, 1 Si, 5 Cr, 1 V, 1 5 Mo, bal Fe.
Ht. Tr : 290,000 TS, 227,000 YS; 3 El; C 55 Rock.
For forging and drawing dies, die casting dies, hot piercing and forming dies, swaging and gripping dies
Type H13 tool steel, air hardening.
High resistance to heat checking.

MARATHON-E38V.
M-1496; 0.35 C, 5 Cr, 1 V, 1 2 Mo, bal Fe
Ht. Tr.: 290,000 TS; 225,000 YS; 3 El; C 55 Rock.
For die casting dies, swaging and gripping dies, forging and extrusion dies
Type H-13 tool steel, air hardening.
High resistance to heat checking.

MARATHON-E38W
M-1496, 0.36 C, 5 Cr, 1 4 Mo, 1 4 W, 0.5 V, bal Fe.
Ht. Tr. 290,000 TS, 235,000 YS; 8 El, C 54 Rock.
For die casting dies, hot punches and heading dies, shear blades.
Type H12 tool steel, hot work steel, high toughness and wear resistance.

MARATHON E612.
M-1496; 0.40 C, 1 15 Si, 5.25 Cr, 4.25 W, bal Fe.
Hardened: 269,000 TS; 207,000 YS; 5 El, 9 RA.
At 900°F: 217,000 TS; 172,000 YS; 10 El; 31 RA.
For die casting dies, forging and extrusion tools, upsetters, dummy blocks.
Type H14 hot work steel, deep hardening.

MARATHON Mo10.
M-1496; 0.80 C, 4 Cr, 8 Mo, 1.5 W, 1 V, bal Fe.
Hardened: C 64-66 Rock
For lathe and planer tools, hobs, drills, reamers, broaches, form cutters.
Type M1 high speed steel, high red-hardness, wear resistant.

MARATHON Mo19.
M-1496; 1.0 C, 4 Cr, 8.75 Mo, 1.75 W, 2 V, bal Fe.
Hardened: C 64-67 Rock.
For reamers, hobs, chasers, lathe and planer tools.
Type M7 high-speed steel, high red-hardness. Abrasion resistant.

MARATHON Mo20.
M-1496; 0.82 C, 5 Mo, 6.5 W, 4 Cr, 2 V, bal Fe.
Hardened: C 64-66 Rock.
For lathe and planer tools, drills, taps, chasers, drawing dies, punches, hobs, form cutters.
Type M2 high speed steel, high red-hardness, tough.

MARATHON Mo20S.
M-1496; 0 62-0.68 C, 3.8-4.4 Cr, 1.8-2.1 V, 6.5-6 7 W, 4.7-5.2 Mo, bal Fe.
Hardened. C 58-62 Rock.
For hot extrusion dies, punches, shear blades, forging mandrels
Type H42 high speed steel for hot working

MARATHON PW16.
M-1496; 0 50 C, 4 Cr, 18 W, 1 V, bal Fe.
Hardened· C 60-65 Rock
Ht. Tr 130,000 TS; 95,000 YS; 4 El; C 52 Rock.
For punches, hot work tools and dies, extrusion and die casting dies
Type H26 hot work steel, tough, good high temperature strength.

MARATHON-SA
M-1496, 0 55 C, 0 9 Mn, 2 0 Si, 0.3 Cr, 0.2 V, bal Fe
Hardened 338,000 TS, 281,000 YS; 5 El; 600 Brin.
For punches, shear blades, pneumatic tools, rivet busters, knurling tools
Type S-4 tool steel, deep hardening, shock and wear resistant

MARATHON SA200
M-1496, 0 75 C, 4 Cr, 14 W, 2 V, bal Fe
Hardened· C 64-66 Rock
For drills, reamers, taps, punches, lathe and planer tools
Type T7 high speed steel, high red-hardness.

MARATHON SA900
M-1496, 1 5 C, 13 W, 4 5 Cr, 5 V, 5 Co, bal Fe
Hardened C 64-66 Rock.
For cutting tools, broaches, drills, hobs, lathe and planer cutters, reamers.
Type T15 high speed steel, high-red-hardness, abrasion resistant.

MARATHON SS4
M-501, 1 05 1 15 C, bal Fe
For tools, taps, drills, water hardened

MAR-CON 660.
M-1671, 7 Sn, 7 Pb, 3 Zn, bal Cu
Cast 44,000 TS, 27,000 YS, 16 El, 14 RA, 73 Brin.
For bearings, bushings, liners.
Continuous cast bronze

MARINE ALLOY
U. S., 2 Cu, 40 Sn, 48 Pb, 10 Sb.
For bearings; submerged bearings.

MARINE BABBITT.
72 Pb, 21 Sn, 7 Sb
For marine bearings; anti-friction

MARINE BRONZE.
U S.; 57.5 Cu, 0.8 Ni, 0.15 Sn, 0 50 Al, bal Zn, 83,500 TS; 15 El
For marine parts.

MARINE BRONZE NO. 8
M-481, Mn, Zn, Sn, Al, bal Cu.
Cast: 65,000 TS; 20-25 El; 29 RA; 150 Brin.
For marine propellers, ship parts, etc, subjected to salt water corrosions; resists corrosion.

MARINE GLYCO.
M-240; Sn, Sb, bal Pb.
For marine bearings; Babbitt.

MARINE NICKEL.
M-540; Pb, Ni, bal Sn.
For bearings; Babbitt metal.

MARK 12KH14A.
Russia; 0.12 C, 14 Cr, bal Fe
Annealed: 75,000 TS; 40,000 YS; 35 El; 70 RA;
155 Brin.
For valves, cutlery, valve turbines;
Type 410; stainless.

MARK 18KH14A.
Russia; 0.18 C, 14 Cr, bal Fe
Annealed: 95,000 TS; 50,000 YS; 25 El; 55 RA;
195 Brin.
For valves, cutlery, surgical and dental instruments;
Type 420; stainless.

MARK 50
Russia; 0.50 C, bal Fe.
Annealed: 96,000 TS; 52,000 YS; 16 El; 23 RA;
170 Brin
For gears, bolts, fasteners; water hardened.

MARKANA METAL.
M-303; 58-60 Cu, 40-38 Zn, 1.5-2.0 Mn + Fe.
For sheets for spinning, lavatories, wash basins,
sinks; corrosion resistant; M.P. 880°C.

MARK E169
Russia; 14 Cr, 14 Ni, 2 W, bal Fe.
For valves, cutlery; corrosion resistant.

MARKER 2X COLUMBUS.
M-1305, 0.85 C, bal Fe.
Water hardening carbon tool steel;
for hand and pneumatic chisels,
stone splitting hammers and wedges.
Werkstoff Nr. 1.1631.

MARKER 2X COLUMBUS-HART.
M-1305; 1.15 C, bal Fe
Water hardening carbon tool steel;
special tools largely for stone industry.

MARKER 3X ROSE
M-1305, 0.55 C, 0.08 Si, 0.40 Mn, bal Fe
Water hardening carbon tool steel, for pliers,
hatchets, axes, anvils,
wood and stone working tools
Werkstoff Nr. 1.1820.

MARKER 8A
M-1305, 0.15-0.35 C, 1.0-2.5 Si, 1.5 max Mn,
17.0-19.0 Cr, 0.5 max Mo, 8.0-10.0 Ni, bal Fe
Cast, ann: 64,000-92,000 TS; 15 min El;
130-200 Brin
Austenitic stainless casting,
for use in air up to 1550°F.
DIN G-X25CrNiSi189; VDEh 4525.

MARKER 10AX
M-1305; 0.25 C, 20 Cr, 14 Ni, bal Fe.
Cast. 71,000-100,000 TS; 35,000 YS; 15 El,
200 Brin.
Austenitic, corrosion resistant, weldable;
good strength at elevated temperature.
For parts operating at 550-1000°C.
DIN G-X25CrNiSi2014.

MARKER 11AXS
M-1305; 0.20-0.50 C, 1.0-2.5 Si, 1.5 max Mn,
24.0-26.0 Cr, 0.5 max Mo, 11.0-14.0 Ni, bal Fe.
Cast, ann: 64,000-92,000 TS; 10 min El,
130-200 Brin.
For furnace parts; useable in air to 2000°F.
Austenitic stainless.
DIN G-X35CrNiSi2512; VDEh Spec 4837;
ACI HH; AISI 309 cast.

MARKER 11F.
M-1305; 0.40 C, 22 Cr, 1.8 Ni, bal Fe.
Cast: 57,000-85,000 TS; 50,000 YS; 1 El; 280 Brin.
For furnace castings for use at 1650-1920°F.
DIN G-X40CrSi22.

MARKER 12A30.
M-1305; 0.20-0.40 C, 1.0-2.0 Si, 1.5 max Mn,
29.0-31.0 Cr, 0.5 max Mo, 19.0-21.0 Ni, bal Fe.
Cast, ann: 64,000-92,000 TS; 6 min El;
150-220 Brin.
Austenitic stainless casting; useable in air
to 2160°F.
DIN G-X30CrNiSi3020; ACI HL.

MARKER 12 AC 15.
M-1305; 0.10-0.20 C, 1.0-2.0 Si, 1.5 max Mn,
24.0-27.0 Cr, 0.5 max Mo, 19.0-21.0 Ni, bal Fe.
Cast, ann: 64,000-92,000 TS; 25 min El.
130-200 Brin.
Austenitic stainless casting; for parts operating at
temperatures up to 1920°F.
DIN G-X15CrNiSi2520; VDEh Spec 4849;
ACI CK-20; AISI 310 cast.

MARKER 12 AXN.
M-1305; 0.15-0.30 C, 0.5-1.5 Si, 1.5 max Mn,
16-19.0 Cr, 0.5 max Mo, 34.0-36.0 Ni, 1.0-1.5 Nb,
bal Fe.
Cast, ann: 57,000-85,000 TS; 8 min El;
150-220 Brin.
Austenitic stainless steel casting;
good in most atmospheres at
elevated temperatures.
DIN G-X20NiCrNb3515.

MARKER 12 AXS.
M-1305, 0.20-0.40 C, 1.0-2.0 Si, 1.5 max Mn,
13.0-16.0 Cr, 0.5 Mo, 34.0-36.0 Ni, bal Fe.
Cast, ann: 57,000-85,000 TS; 12 min El;
130-200 Brin.
Austenitic stainless steel casting;
for parts in carburizing atmosphere
at temperatures up to 1920°F.
DIN G-X25NiCrSi3515; ACI HT.

MARKER 210 M.
M-1305; 0.35 C, 0.9 Si, 0.3 Mn, 1.05 Cr,
0.2 V, 1.85 W, bal Fe.
Cold work tool and die steel;
oil or water hardenable to 53-56 Rock C
For pneumatic tools, cold shear blades,
header chisels.
Werkstoff Nr. 1.2541.

MARKER 215 M
M-1305; 0.45 C, 0.9 Si, 0.3 Mn, 1.05 Cr,
0.2 V, 1.85 W, bal Fe.
Cold work tool and die steel; oil hardenable to
54-58 Rock C.
For pneumatic hammers, chisels, riveting tools.
Werkstoff Nr. 1.2542.

MARKER 220 M.
M-1305; 0.60 C, 0.9 Si, 0.3 Mn, 1.05 Cr, 0.2 Vi,
1.85 W, bal Fe
Cold work tool and die steel;
oil or water hardenable to 57-61 Rock C.
Punching and trimming dies, shear knives to
9 mm thick, wood working tools.
Werkstoff Nr. 1.2550.

MARKER 465 M.
M-1305; 0.90 C, 1.90 Mn, 0.1 V, bal Fe.
Cold work tool and die steel; oil hardenable
to 63-64 Rock C.
For cutting dies of complicated shapes
for thin metal to 3 mm thick, threading dies.
Werkstoff Nr. 1.2842.

MARKER 476 M.
M-1305; 2.10 C, 1.20 Cr, 0.70 W, bal Fe.
Cold work tool and die steel;
air or oil hardenable to 63-65 Rock C.
For cold forming and stamping dies, especially for precision parts as saws and laminations; for precision parts as gages; some corrosion resistance.
Werkstoff Nr. 1.2436.

MARKER 476 M EXTRA.
M-1305; 1.65 C, 12.0 Cr, 0.6 Mo, 0.1 V, 0.5 W, bal Fe.
Cold work tool and die steel;
air or oil hardenable to 63-65 Rock C.
For cold forming and stamping laminations, saw blades, for precision parts as gages;
some corrosion resistance
Werkstoff Nr. 1.2601.

MARKER 476 M EXTRA B
M-1305, 1.65 C, 12.0 Cr, 0.65 Mo, 0.5 V, 0.5 W, bal Fe.
Cold work tool and die steel; air or oil hardenable to 63-65 Rock C.
For cold forming and stamping dies, shear blades.
Werkstoff Nr. 1.2602.

MARKER 476 M SPEZIAL
M-1305; 2.00 C, 12.0 Cr, 0.5 Mo, 0.5 V, 1.0 W, bal Fe.
Cold work tool and die steel; air or oil hardenable to 63-65 Rock C.
For cold forming and stamping dies, broaches, thread rolling dies, gages.

MARKER 477 M
M-1305, 1.05 C, 0.9 Mn, 1.0 Cr, 1.15 W, bal Fe.
Cold work tool and die steel;
oil hardenable to 63-66 Rock C.
For punching and trimming dies for thin sheet and strip up to 4 mm thick, shears.
Werkstoff Nr. 1.2419.

MARKER AW50.
M-1305; 0.45 C, 1.65 Cr, 0.50 Mo, 0.90 V, 0.60 W, bal Fe.
Hot work tool and die steel,
oil or water hardenable to 250,000-270,000 TS.
Pressing dies for hot forming of screws, hot shears
Werkstoff No 1.2603.

MARKER C 3.
M-1305; 1.40 C, 0.25 Si, 0.30 Mn, 0.30 Cr, 0.10 V, bal Fe.
Water hardening tool steel, high surface hardness possible; for drawing dies and tools
Werkstoff Nr. 1.2206.

MARKER C 73
M-1305; 1.45 C, 0.25 Si, 0.60 Mn, 1.40 Cr, bal Fe.
Oil hardening tool steel; for woodworking tools, files, rubber cutting knives.
Werkstoff Nr. 1.2063.

MARKER CDD.
M-1305; 0.90 C, 0.25 Si, 0.30 Mn, 0.80 Cr, bal Fe.
Water or oil hardening tool steel; for drawing dies, embossing tools, cold forming press and bend rollers.
Werkstoff Nr. 1.2056.

MARKER CVC.
M-1305; 0.90 C, 0.30 Si, 0.30 Mn, 3.25 Cr, 0.25 Mo, 0.15 V, bal Fe.
Oil hardening tool steel;
also used for large roller bearings and races;
hardenable to 64-66 Rock C

MARKER D 606 G.
M-1305; 0.10 max C, 1.0 max Si, 1.5 max Mn, 15.0-17.0 Cr, 12.0-14.0 Ni, Nb = 10 × % C min, bal Fe.
Austenitic stainless casting.
Good elevated temperature strength and creep properties to about 1100°F.
DIN G-X8CrNiNb1613; VDEh Spec 4961.

MARKER D 607 G.
M-1305; 0.10 max C, 1.0 max Si, 1.5 max Mn, 15.5-17.5 Cr, 1.5-2.0 Mo, 15.5-17.5 Ni, Nb = 10 × % C min, bal Fe.
Austenitic stainless casting.
Good elevated temperature strength and creep properties to about 1100°F.
DIN G-8CrNiMoNb1616: VDEh Spec 4981.

MARKER DC 10.
M-1305, 0.23 C, 1.25 Si, 10.0 Cr, 1.2 Mo, 0.75 Ni, 1.0 V, 0.45 W, 0.10 N, bal Fe.
Hot work tool and die steel;
oil or water hardenable to 250,000-265,000 TS.
For hot working of zinc, aluminum and other light metals.

MARKER DCM
M-1305; 0.35 C, 1.0 Si, 5.15 Cr, 1.45 Mo, 0.50 V, bal Fe
Hot work tool and die steel; oil, water or air hardenable to 256,000-274,000 TS
For forging dies, pressure casting molds.
Werkstoff Nr. 1.2343, AISI H 11.

MARKER DCMC
M-1305, 0.36 C, 1.0 Si, 0.4 Mn, 2.0 Co, 5.15 Cr, 1.45 Mo, 0.5 V, bal Fe.
Hot work tool and die steel, oil or air hardenable to 250,000 270,000 TS.
For forging dies, pressure casting molds.

MARKER DCMX.
M-1305; 0.27 C, 1.0 Si, 5.15 Cr, 1.45 Mo, 0.50 V, bal Fe.
Hot work tool and die steel;
air or oil hardenable to 240,000-270,000 TS
For pressure casting molds, forging dies;
better toughness than Marker DCM.

MARKER DCS.
M-1305; 0.40 C, 1.0 Si, 0.4 Mn, 5.15 Cr, 1.2 Mo, 1.05 V, 0.15 S, bal Fe.
Hot work tool and die steel
Free machining grade similar to Marker DCV.

MARKER DCV
M-1305, 0.40 C, 1.0 Si, 5.15 Cr, 1.35 Mo, 1.0 V, bal Fe
Hot work tool and die steel; oil or water hardenable to 256,000-276,000 TS.
For hot pressing dies for light metals, pressure casting molds, forging dies
Werkstoff Nr. 1.2344; AISI H 13.

MARKER DCW.
M-1305; 0.37 C, 1.0 Si, 5.15 Cr, 1.45 Mo, 0.30 V, 1.50 W, bal Fe
Hot work tool and die steel;
oil or water hardenable to 280,000-300,000 TS.
For hot shears, punches, forming tools for screws, rivets, hot tools for welding machines, forging dies.
Werkstoff Nr. 1.2606; AISI H 12.

MARKER ED 5 SG
M-1305, 0.15 max C, 0.8 max Si, 0.4-0.7 Mn, 4.0-6.5 Cr, 0.45-0.65 Mo, bal Fe.
Casting, air or oil hardenable.
Good elevated temperature yield strength and creep strength up to about 932°F.
DIN GS-12CrMo195: VDEh Spec. 7362;
AISI 501 cast.

MARKER-ED12.
M-1335; 0.20 C, 11.5 Cr, 1 Mo, 0.3 V, bal Fe.
Annealed: 90,000 TS; 40,000 YS; 25 El; B 92 Rock.
Hardened: 240,000 TS; 200,000 YS; 10 El; C 50 Rock.
For valves, bearings, cutlery, surgical instruments.
Corrosion resistant, hardenable.

MARKER ED 12 G.
M-1305; 0.15-0.23 C, 1.0 max Si, 0.4-0.8 Mn, 10.0-12.0 Cr, 0.9-1.2 Mo, 0.6-0.9 Ni, 0.25-0.35 V, bal Fe.
Casting, air or oil hardenable.
Good elevated temperature yield strength and creep strength up to about 1022°F.
DIN G-X20CrMoV121; VDEh Spec 4937.

MARKER-ED12G.
M-1335; 0.18 max C, 11 Cr, 1.05 Mo, 0.75 Ni, 0.3 V, bal Fe.
Annealed: 90,000 TS; 38,000 YS; 26 El; B 92 Rock.
Hardened: 235,000 TS; 200,000 YS; 10 El; C 48 Rock.
For valves, bearings, cutlery, surgical instruments.
Corrosion resistant, hardenable.

MARKER-ED12W.
M-1335; 0.20 C, 12 Cr, 1 Mo, 0.3 V, 0.5 W, bal Fe.
Annealed: 90,000 TS; 40,000 YS; 25 El; B 92 Rock.
Hardened: 240,000 TS; 205,000 YS; 9 El; C 50 Rock.
For cutlery, valves, bearings, surgical instruments.
Corrosion resistant, hardenable.

MARKER EUZONIT 60
M-1305, 0.05 max C, 15.5-18.0 Cr, 16.0-19.0 Mo, 1.0 max Fe, bal Ni.
Cast, quenched: 71,000 100,000 TS; 42,600 YS; 6 min El; 170-230 Brin
Yield strength at 752°F: 28,400 psi.
Resistant to chemical attack, good oxidizing resistance at elevated temperature.
DIN G-X3NiMoCr6418, VDEh Spec 4472.

MAERKER EUZONIT 60 S.
M-1305; 0.02 C, 17.5 Cr, 16.0 Mo, 1.0 max Fe, bal Ni
Quenched. 107,000-135,000 TS; 49,800 YS; 35 min El, 170-220 Brin
Resistant to oxidizing corroding media, free chlorine, acid solutions of ferric and copper salts, phosphoric and sulphuric acids.
DIN X2NiCrMo6017.

MARKER EUZONIT 70.
M-1305, 0.05 max C, 26.0-29.0 Mo, 1.0 max Fe, bal Ni.
Cast, quenched: 71,000-100,000 TS; 42,600 YS; 6 min El; 170-230 Brin.
Cast stainless nickel base alloy; resistant to boiling hydrochloric acid, humid hydrochloric gas, sulphuric and phosphoric acids.
DIN G-X3NiMo7028; VDEh Spec 4482.

MAERKER EUZONIT 70 S.
M-1305; 0.03 C, 1.0 max Cr, 28.0 Mo, 1.0 max Fe, bal Ni.
Quenched: 114,000-142,000 TS; 54,000 YS; 35 min El; 180-230 Brin.
Resistant to boiling hydrochloric acid, humid hydrochloric gas, sulphuric acid, increased resistance to boiling, concentrated phosphoric acid (85%).
DIN X3NiMo7028.

MARKER EXTRA-HART.
M-1305; 1.30 C, bal Fe.
Water hardening carbon tool steel; for engraving and watchmaking tools, sculpturing tools.
Werkstoff Nr. 1.1660.

MARKER EXTRA-MITTELHART.
M-1305; 1.15 C, bal Fe.
Water hardening carbon tool steel; for drills, knives, chisels, knife sharpening steels.
Werkstoff Nr. 1.1650.

MARKER EXTRA-SEHR ZAH.
M-1305; 0.70 C, bal Fe.
Water hardening carbon tool steel; for blacksmith tools; very tough.
Werkstoff Nr. 1.1620.

MARKER EXTRA-ZAH.
M-1305; 0.85 C, bal Fe.
Water hardening carbon tool steel; for chisels, punches, forming tools, hammers, anvils, rollers for mechanical handling; tough.
Werkstoff Nr. 1.1630.

MARKER EXTRA-ZAHHART.
M-1305; 1.00 C, bal Fe.
Water hardening carbon tool steel; for scythes, sickles, hand stamping dies.
Werkstoff Nr. 1.1640.

MARKER FS.
M-1305; 0.70 C, 1.65 Si, 0.70 Mn, bal Fe.
Water or oil hardening steel; for wrenches, pliers, screw drivers.
Werkstoff Nr. 1.2823.

MARKER H8A.
M-1305; 0.15 C, 18 Cr, 10 Ni, bal Fe.
Wrought, ann: 78,000-106,000 TS; 52,500 YS; 40 El; 160 Brin.
Austenitic general purpose stainless and heat resisting steel; for parts operating at 550-850°C.

MARKER H18F.
M-1309; 0.10 C, 18 Cr, 2.2 Ni, bal Fe.
Wrought, ann: 78,000-100,000 TS; 50,000 YS; 15 El; 200 Brin.
Ferritic, corrosion resistant, good high temperature properties; for parts operating at 900-1050°C.

MARKER H24 FS.
M-1305; 0.10 C, 24 Cr, 1.5 Ni, bal Fe.
Wrought, ann: 71,000-92,000 TS; 43,000 YS; 10 El; 200 Brin.
Ferritic, corrosion resistant, good high temperature strength, for parts operating at 950-1200°C.

MARKER H40A.
M-1305; 0.12 C, 16 Cr, 36 Ni, bal Fe.
Wrought, ann: 78,000-106,000 TS; 38,000 YS; 60 El; 180 Brin.
Austenitic, for carburizing and annealing boxes, furnace parts operating at 550-1150°C.

MARKER HM 3.
M-1305; 0.31 C, 0.30 Si, 0.60 Mn, 2.50 Cr, 0.20 Mo, 0.15 V, bal Fe.
For case hardening by nitriding.
Case hardness expected: 750 VDH.
Core strength: 128,000-156,000 psi. TS.

MARKER HOV D.
M-1305; 0.35 C, 0.25 Si, 0.60 Mn, 1.60 Cr, 0.20 Mo, 1.0 Ni, 0.90 Al, bal Fe.
For case hardening by nitriding.
Case hardness expected: 900 VDH.
Core strength: 112,000-142,000 psi TS.

MARKERITE.
German; carbide.
For tool tips, cutters; hard metal.

MARKER K 6 R.
M-1305; 0.60 C, 0.85 Si, 0.75 Mn, 1.20 Cr, 0.10 V, bal Fe.
Cold work tool steel; oil hardenable to 59-62 Rock C.
For hole punching tools in heavy metal up to 4 mm thick, wood working tools as planes, saws.
Werkstoff Nr. 1.2243.

MARKER K 8 R.
M-1305; 0.85 C, 1.15 Si, 0.70 Mn, 1.20 Cr, bal Fe.
Cold work tool steel; oil hardenable to 63-65 Rock C.
For punches, chisels, woodworking tools, milling cutters.
Werkstoff Nr. 1.2108.

MARKER K 97.
M-1305; 0.06 C, 0.20 Si, 0.25 Mn, 3.75 Cr, 0.50 Mo, 0.10 V, bal Fe.
Case hardening steel;
Case hardness expected: C 62-65 Rock.
Core strength: 112,000-142,000 psi TS.

MARKER KEW.
M-1305; 0.60 C, 3.75 Cr, 0 85 Mo, 0.70 V, 9.0 W, bal Fe.
Hot work tool steel, oil or air hardenable to 60-62 Rock C.
For hot punching, stamping and cutting, tube pressing mandrels.
Werkstoff Nr. 1 2622

MARKER KL 9.
M-1305; 1.00 C, 0.25 Si, 0 40 Mn, 1.55 Cr, bal Fe
Oil hardening tool steel; used for cutters for meat grinders, for ball and roller bearings and races.
Werkstoff Nr. 1.2067.

MARKER KO 11.
M-1305; 0 78 C, 9.50 Co, 4.15 Cr, 0 65 Mo, 1.55 V; 18 0 W, bal Fe.
High speed steel for turning, planing, and drilling steel and cast iron.
(AISI T5); W. Nr 1.3265.

MARKER KO 12.
M-1305; 1 32 C, 10.50 Co, 4 50 Cr, 4 00 Mo, 3 25 V, 10 0 W, bal Fe
High speed steel for finishing tools, for inserted cutters, for cold flow press tools.
W. Nr. 1.3207.

MARKER KO 13.
M-1305; 1.10 C, 8 0 Co, 3.8 Cr, 9 5 Mo, 1.2 V, 1.5 W, bal Fe
High speed steel for lathe tools, form cutters, planing tools, drills, reamers.
Good high temperature hardness
AISI M42; W. Nr. 1.3247.

MARKER KO 15
M-1305; 1.50 C, 4 75 Co, 4.15 Cr, 3.75 Mo, 5.0 V, 6.60 W, bal Fe.
High speed steel for lathe tools, gear cutters counterbores, drills, taps.
AISI M15.

MARKER KO 55.
M-1305, 1.32 C, 4.75 Co, 4.15 Cr, 0 85 Mo, 3.75 V, 12.0 W, bal Fe.
High speed steel for finishing tools for turning, reaming, form cutting, for inserted cutters.
W. Nr. 1.3202.

MARKER KO 109.
M-1305; 0.80 C, 4.75 Co, 4.15 Cr, 0.65 Mo, 1.55 V, 18.0 W, bal Fe.
High speed steel for turning and punching tools for steel and cast iron; for deep hole drills.
AISI T4; W. Nr. 1.3255.

MARKER KSP.
M-1305; 0.50 C, 0.30 Si, 0.65 Mn, 0.80 Cr, 0 30 Mo, 1.80 Ni, 0 10 V, bal Fe.
Oil hardening steel, to 56-58 Rock C.
For forming tools, can also be nitrided for 600-650 Vickers hardness; smooth finish possible.

MARKER LW 10.
M-1305; 1.20 C, 0.25 Si, 0.30 Mn, 0.20 Cr, 0.10 V, 1.00 W, bal Fe.
Water hardening tool steel, high surface hardness possible; for drills, drawing tools, knives for pipe cutting.
Werkstoff Nr. 1.2516.

MARKER MEW EXTRA
M-1305; 0 30 C, 2.35 Cr, 0.60 V, 4.25 W, bal Fe.
Hot work tool and die steel, air or oil hardenable to 240,000-265,000 TS
For hot forming and thread rolling of screws, nuts, rivets, for hot shears; for pressure casting molds
Werkstoff Nr 1 2567.

MARKER MHM.
M-1305; 0 35 C, 0 30 Si, 0 50 Mn, 0 90 Cr, 1 15 Mo, 3.50 Ni, 0 12 V, bal Fe
Hot work tool steel, oil hardenable to 228,000-242,000 TS;
For deep impression forging dies

MARKER MO 5
M-1305, 0 85 C, 4.15 Cr, 5 10 Mo, 1 85 V, 6 35 W, bal Fe
High speed steel for tools for general purpose cutting, lathe turning, milling, drilling of steel and non ferrous metals, tough
W. Nr 1.3343, AISI M2.

MARKER MO 5 Co
M-1305, 0 85 C, 4 75 Co, 4 15 Cr, 5.10 Mo, 1 85 V, 6 35 W, bal Fe
High speed steel for turning tools, threading tools, deep hole drills, cutting tough iron and steel.
W Nr 1 3243, AISI M35.

MARKER MO 5 Co H
M-1305, 1 10 C, 5 0 Co, 4 25 Cr, 3.75 Mo, 2 0 V, 6 75 W, bal Fe
High speed steel for fast finishing tools for turning, planing, deep hole drilling
W Nr 1 3246; AISI M41.

MARKER MO 5 H
M-1305; 1 00 C, 4 15 Cr, 5.10 Mo, 1.85 V, 6.35 W, bal Fe
High speed steel for finish cutting lathe, milling and drilling tools.
W Nr 1 3342

MARKER MO 9 Co 8
M-1305, 0.94 C, 8 0 Co, 4 0 Cr, 8 5 Mo, 2 0 V, 2 0 W, bal Fe
High speed steel for turning and planing steel and cast iron under difficult conditions.
AISI M34, W Nr. 1.3249

MARKER MO 9 V
M-1305; 1 05 C, 3 80 Cr, 9 0 Mo, 2.0 V, 1 75 W, bal Fe.
High speed steel for turning, milling, drilling steel and non-ferrous metals
W. Nr. 1 3348, AISI M7.

MARKER MOV 4.
M-1305; 1.23 C, 4.15 Cr, 5.10 Mo, 2.90 V, 6.35 W, bal Fe.
High speed steel for turning, reaming, gear cutting of steel and non-ferrous metals; high hardness.
W. Nr. 1.3344; AISI M3(2).

MARKER MSV.
M-1305; 1.00 C, 0.20 Si, 0.25 Mn, 0.15 V, bal Fe.
Water hardening tool steel;
for small cold forming dies for making screws, rivets, coins; for drawing dies.

MARKER MW 3.
M-1305; 1.42 C, 0.25 Si, 0.30 Mn, 0.30 Cr, 0.25 V, 3.25 W, bal Fe.
Water hardening tool steel; for lathe and planer tools, precision tools for watch making, engraving tools.
Werkstoff Nr. 1.2562

MARKER MW 5
M-1305, 1.30 C, 0.25 Si, 0.30 Mn, 0.30 Cr, 4.75 W, bal Fe.
Water hardening tool steel
For drawing dies, mandrels for drawing pipe.
Werkstoff Nr. 1.2453.

MARKER PHM
M-1305, 0.45 C, 1.4 Cr, 0.7 Mo, 0.3 V, bal Fe.
Hot work tool steel, oil or water hardenable to 300,000 TS.
For centrifugal casting molds for zinc alloys, hot forming tools.
Werkstoff Nr. 1.2323

MARKER POLYTEN
M-1305, 1.00 C, 0.30 Si, 0.50 Mn, 5.20 Cr, 1.0 Mo, 0.20 V, bal Fe.
Air or oil hardening tool steel; for cold forming dies, shears, knives, slotting saws,
nail making tools
Werkstoff Nr. 1.2363, AISI A2.

MARKER PSH.
M-1305, 0.50 C, 0.25 Si, 0.50 Mn, 1.05 Cr, 3.50 Ni, bal Fe
Oil hardening tool steel, to 55-58 Rock C
For dies for forming emblems, plaques, buttons, commemorative coins, cutlery
Werkstoff Nr. 1.2721.

MARKER PSHB.
M-1305, 0.45 C, 0.25 Si, 0.50 Mn, 1.25 Cr, 0.20 Mo or 0.50 W, 3.75 Ni, bal Fe.
Oil hardening tool steel, to 53-56 Rock C.
For pressing dies requiring deep impressions, thread rolling dies, embossing tools.
Werkstoff Nr. 1.2767.

MARKER PWC
M-1305, 0.45 C, 4.25 Cr, 0.50 Mo, 2.25 V, 4.25 W, 4.25 Co, bal Fe
Hot work tool steel, air or oil hardenable to 240,000-265,000 TS.
For hot punching and stamping operations
Werkstoff Nr. 1.2678; AISI H 19.

MARKER R 17.
M-1305; 0.38 C, 0.40 Si, 0.80 Mn, 17.0 Cr, 1.25 Mo, 1.0 Ni, bal Fe.
Air or oil hardenable to 50-55 Rc
For surgical and dental tools, cutlery, kitchen tools; corrosion resistant

MARKER R 18
M-1305; 1.10 C, 0.40 Si, 0.50 Mn, 17.5 Cr, 1.0 Mo, 0.10 V, bal Fe.
Air or oil hardenable to 58-60 Rock C.
Corrosion resisting; for discs for meat grinders, surgical and dental tools.

MARKER REM.
M-1305; 0.45 C, 13.5 Cr, 13.0 Ni, 0.50 V, 2.5 W, bal Fe.
Austenitic, hot work tool steel.
For dies and forming tools for working copper-nickel and nickel alloys that are difficult to work.
Werkstoff Nr. 1.2731.

MARKER RH.
M-1305, 0.40 C, 0.40 Si, 0.30 Mn, 13.0 Cr, bal Fe.
Air or oil hardening high chromium steel;
for synthetic resin molds, cold stamping and punching dies, surgical tools, corrosion resistant.
Werkstoff Nr. 1.2083

MARKER S 7 A.
M-1305; 0.20 C, 0.25 Si, 1.25 Mn, 1.15 Cr, bal Fe
Case hardening steel.
Case hardness expected: C 62-64 Rock.
Core strength 142,000-182,000 psi. TS.
Werkstoff Nr. 1.2162.

MARKER S 7 N
M-1305; 0.30 C, 0.30 Si, 0.60 Mn, 1.35 Cr, 0.25 Mo, 0.50 Ni, 0.12 V, bal Fe.
Case hardening steel
Case hardness expected: C-62-64 Rock.
Core strength: 200,000-240,000 psi TS.

MARKER S & C S 14.
M-1305; 0.15-0.25 C, 12.5-14.5 Cr, 0.10 max Ni, bal Fe
Cast, Ht Tr : 85,000-114,000 TS; 56,900 YS; 12 min El, 180-240 Brin
Ductile, weldable, cast corrosion resistant steel; favorable mechanical properties, pumping parts, mechanical engineering
DIN G-X25Cr14, VDEh Spec 4021

MARKER S & C S 14 S
M-1305; 0.08-0.15 C, 12.5-14.0 Cr, 0.50 max Mo, 0.5-1.5 Ni, bal Fe
Cast, Ht Tr : 85,000-114,000 TS; 56,900 YS, 14 min El, 180-240 Brin
Ductile, weldable, cast corrosion resistant steel; turbine and pump construction.
DIN G-X12Cr14, ACI CA-15, VDEh Spec 4006

MARKER S & C S 15
M-1305, 0.40-0.50 C, 14.0-15.5 Cr, bal Fe
Cast, annealed 240 max Brin.
Corrosion resistant, hardenable, good sliding properties, for pump construction
DIN G-X45Cr15, VDEh Spec 4034

MARKER S & C S 17 M
M-1305, 0.33-0.43 C, 15.5-17.5 Cr, 1.0-1.3 Mo, 1.0 max Ni, bal Fe
Cast, Ht Tr : 107,000-135,000 TS, 65,400 YS, 5 min El; 220-300 Brin.
Yield strength at 752°F 49,800 psi
Hardenable, corrosion resistant, good high temperature strength, resistant to organic acids
DIN G-X35CrMo17; VDEh Spec 4122.

MARKER S & C S 18.
M-1305, 0.15-0.25 C, 15.5-17.5 Cr, 1.0-2.0 Ni, bal Fe.
Cast, Ht Tr : 100,000-128,000 TS, 64,000 YS; 6 min El; 220-290 Brin.
Hardenable, increased corrosion resistance, ship building and marine work.
DIN G-X22CrNi17; VDEh Spec. 4059;
Similar to ACI Cb-30 and AISI-431.

MARKER S & C S 30
M-1305; 0.50-0.90 C, 27.0-30.0 Cr, bal Fe.
Cast, annealed. 210-280 Brin.
Good corrosion resistant casting, resistant to oxidizing acids and salts.
DIN G-X70Cr29; VDEh Spec 4085

MARKER S & C S 30 H.
M-1305; 0.90-1.30 C, 27.0-30.0 Cr, bal Fe.
Cast, annealed: 260-330 Brin.
Corrosion resistant casting, good wear and abrasion resistance.
DIN G-X120Cr29; VDEh Spec 4086.

MARKER S & C S 30 M.
M-1305; 0.50-0.90 C, 27.0-30.0 Cr, 2.0-2.5 Mo, bal Fe.
Cast, annealed: 210-280 Brin.
Corrosion resistant casting; for potash mining equipment, and chemical industry.
DIN G-X70CrMo292; VDEh Spec 4136.

MARKER S & C S 30 MH.
M-1305; 0.90-1.30 C, 27.0-30.0 Cr, 2.0-2.5 Ni, bal Fe.
Cast, annealed: 260-330 Brin.
Corrosion resistant casting; good hardness and very good wear resistance.
DIN G-X120CrMo292; VDEh Spec 4138.

MARKER S & C SG 25.
M-1305; 1.50-1.80 C, 24.0-26.0 Cr, bal Fe.
Cast, annealed: 350 max Brin.
Hardenable chromium corrosion resistant casting; good wear resistance.
DIN G-X170Cr25.

MARKER S & C SG 25 M.
M-1305; 1.50-1.80 C, 24.0-26.0 Cr, 2.0-2.5 Mo, bal Fe.
Cast, annealed: 400 max Brin.
Hardenable chromium corrosion resistant steel casting; good resistance to salt solutions, diluted organic acids; wear resistant.
DIN G-X170CrMo252.

MARKER S & G SN 5.
M-1305; 0.30-0.50 C, 26.0-28.0 Cr, 3.5-5.5 Ni, bal Fe.
Cast, ann: 71,000-114,000 TS; 230-280 Brin.
Chromium corrosion resistant casting; good fluidity for intricate castings.
DIN G-X40CrNi274; VDEh Spec 4340; ACI CC-50.

MARKER S & C SN 5 M.
M-1305; 0.30-0.50 C, 26.0-28.0 Cr, 2.0-2.5 Mo, 4.0-6.0 Ni, bal Fe.
Cast, ann: 240-300 Brin
Corrosion resistant steel casting; for intricate casting.
DIN G-X40CrNiMo275; VDEh Spec 4464.

MARKER S & C SN 6 M
M-1305; 0.10 max C, 24.0-28.0 Cr, 1.3-1.8 Mo, 5.0-7.0 Ni, bal Fe.
Cast, ann: 85,000-107,000 TS; 59,700 YS, 15 min El; 170-220 Brin.
Corrosion resistant steel casting; good mechanical properties and good resistance to oxidizing acids and salts.
DIN G-X8CrNiMo275.

MARKER S & C SN 8.
M-1305; 0.12 max C, 17.0-19.0 Cr, 8.0-10.0 Ni, bal Fe.
Cast, quenched: 64,000-92,000 TS; 28,400 YS; 20 min El; 140-190 Brin.
Basic grade of austenitic stainless steel casting; excellent ductility; universal application.
DIN X10CrNi189; VDEh Spec 4312;
Similar to ACI CF-20.

MARKER S & C SN 8 EL.
M-1305; 0.03 max C, 17.0-19.5 Cr, 10.0-12.0 Ni, bal Fe.
Cast, quenched: 64,000-92,000 TS; 24,200 YS; 25 min El, 130-180 Brin.
Lowest carbon grade of basic 18-8 austenitic stainless steel casting, for welding without subsequent heat treat.
DIN G-X2CrNi1811; VDEh Spec 4306; ACI CF-3.

MARKER S & C SN 8 N.
M-1305; 0.08 max C, 17.5-20.0 Cr, 9.0-11.0 Ni, Nb = 8 × % C, bal Fe
Cast, quenched: 64,000-92,000 TS; 28,400 YS; 20 min El; 140-190 Brin.
Niobium stabilized 18-8 casting, weldable without subsequent heat treat; also used at temperatures above 600°F.
DIN G-X8CrNiNb1810; VDEh Spec 4552; ACI CF-8C.

MARKER S & C SN 8 S
M-1305; 0.07 max C, 17.5-20.0 Cr, 9.0-11.0 Ni, bal Fe.
Cast, quenched: 60,000-88,000 TS; 28,400 YS; 20 min El, 140-190 Brin.
Lower carbon grade of basic 18-8 austenitic cast steel, weldable without subsequent heat treat.
DIN G-X6CrNi1810; VDEh Spec 4308; ACI CF-8

MARKER S & C SN 9.
M-1305, 0.12 max C, 17.0-19.0 Cr, 2.0-2.5 Mo, 9.0-11.0 Ni, bal Fe
Cast, quenched: 64,000-92,000 TS; 29,800 YS; 20 min El; 140-190 Brin.
Austenitic stainless casting; better corrosion resistance than ordinary 18-8 type.
DIN G-X10CrNiMo1810, VDEh Spec 4410.

MARKER S & C SN 9 EL
M-1305, 0.03 max C, 16.5-18.5 Cr, 2.0-2.5 Mo, 11.0-13.0 Ni, bal Fe.
Cast, quenched: 60,000-88,000 TS; 24,200 YS; 25 min El; 130-180 Brin.
Low carbon, improved corrosion resistant austenitic stainless casting; weldable without subsequent heat treat.
DIN G-X2CrNiMo1812; VDEh Spec 4404,
ACI CF-3M; AISI 316L (cast).

MARKER S & C SN 9 N.
M-1305; 0.08 max C, 16.5-18.5 Cr, 2.0-2.5 Mo, 10.5-12.0 Ni, Nb = 8 × % C, bal Fe.
Cast, quenched: 64,000-92,000 TS; 29,800 YS; 20 min El; 140-190 Brin
Niobium stabilized austenitic casting; very good corrosion resistance, weldable without subsequent heat treat; usable above 600°F.
DIN G-X7CrNiMoNb1811; VDEh Spec 4581.

MARKER S & C SN 9 S.
M-1305; 0.07 max C, 17.0-19.5 Cr, 2.0-2.5 Mo, 10.0-12.0 Ni, bal Fe
Cast, quenched: 64,000-92,000 TS; 29,800 YS; 20 min El, 140-190 Brin.
Austenitic stainless casting, very good corrosion resistance; weldable without subsequent heat treat
DIN G-X6CrNiMo1811; VDEh Spec 4408;
ACI CF-8M; AISI 316 (cast).

MARKER S & C SN 10.
M-1305; 0.20-0.30 C, 24.0-26.0 Cr, 8.0-10.0 Ni, bal Fe.
Cast, quenched: 71,000-107,000 TS; 89,800 YS; 10 min El; 180-240 Brin.
Corrosion resistant steel casting; good ductility; for pump components.
DIN G-X25CrNi259; Similar to ACI CE-30.

MARKER S & C SN 10 M.
M-1305; 0.20-0.30 C, 23.5-25.0 Cr, 2.0-2.5 Mo, 8.0-10.0 Ni, bal Fe.
Cast, quenched: 78,000-107,000 TS; 89,800 YS; 10 min El; 180-240 Brin.
Corrosion resistant steel casting; improved resistance to sulphites and chlorides.
DIN G-X25CrNiMo259.

MARKER S & C SN 12.
M-1305; 0.08 max C, 16.0-18.0 Cr, 4.0-5.0 Mo, 12.5-14.5 Ni, Nb = 8 × % C, bal Fe.
Cast, quenched: 57,000-92,000 TS; 28,400 YS; 15 min El; 140-190 Brin.
Austenitic corrosion resistant steel casting; weldable, good at elevated temperatures, indifferent to localized corrosion.
DIN G-X5CrNiMoNb1713; VDEh Spec 4579; Similar to ACI CG-8M, AISI 317 (cast).

MARKER S & C SN 18
M-1305; 0.08 max C, 16.5-18.5 Cr, 2.0-2.5 Mo, 19.0-21.0 Ni, 1.8-2.4 Cu, Nb = 8 × % C, bal Fe
Cast, quenched. 64,000-92,000 TS, 25,600 YS; 15 min El, 130-180 Brin.
Austenitic corrosion resistant steel casting, resistant to sulphuric acid, phosphoric acid, strong organic acids
DIN G-X7CrNiMoCu1818; VDEh Spec 4585.

MARKER S & C SN 25
M-1305, 0.08 max C, 19.0-21.0 Cr, 2.5-3.5 Mo, 24.0-26.0 Ni, 1.5-2.0 Cu, Nb = 10 × %C, bal Fe.
Cast, quenched 64,000-92,000 TS; 28,400 YS; 14 min El, 130-180 Brin
Austenitic corrosion resistant steel casting, resistant to sulphuric acid, phosphoric acid, strong organic acids
DIN G-X7NiCrMoCu2520, VDEh Spec 4500; ACI CN 7M

MARKER S & C SN 26 M
M-1305, 0.08 max C, 24.0-26.0 Cr, 2.0-2.5 Mo, 24.0-26.0 Ni, Nb = 8 × %C, bal Fe
Cast, quenched 64,000-92,000 TS, 28,400 YS, 15 min El, 130-180 Brin
Austenitic corrosion resistant steel casting, resistant to sulphuric acid, phosphoric acid, strong organic acids
DIN G-X7CrNiMoNb2525, VDEh Spec 4588

MARKER S & C SN 42
M-1305, 0.08 max C, 20.0-22.0 Cr, 5.0-6.0 Mo, 42.0-44.0 Ni, Nb = 12 × %C, bal Fe.
Cast, quenched. 71,000-100,000 TS, 31,300 YS; 14 min El, 150-200 Brin
Austenitic stainless alloy, resistant to sulphuric acid, phosphoric acid, strong organic acids, many pickling and galvanizing baths
DIN G-X5NiCrMoNb4422; VDEh Spec 4557.

MARKER S & C SN 99 N
M-1309, 0.08 max C, 18.0-20.0 Cr, 2.8-3.5 Mo, 12.0-14.0 Ni, Nb = 8 × %C, bal Fe.
Cast, quenched· 64,000-92,000 TS; 29,800 YS; 20 min El, 140-190 Brin.
Yield strength at 752°F 18,500 psi
Austenitic stainless casting; good corrosion resistance; for welded assemblies above 600°F.
DIN G-X8CrNiMoNb1812; VDEh Spec 4583.

MARKER S.N.18.
M-1335; 0.08 C, 18 Cr, 18 Ni, 2 Mo, 2 Cu, bal Fe.
For chemical plant equipment, pump and valve parts; corrosion resistant, austenitic

MARKER S.N.25.
M-1335; 0.10 C, 18 Cr, 25 Ni, 4 Mo, 2 Cu, bal Fe.
For chemical plant equipment, pump and valve parts; corrosion resistant, austenitic.

MARKER S N.42.
M-1335; 0.1 C, 18 Cr, 42 Ni, 5 Mo, 2 Cu, bal Fe.
For chemical plant equipment, corrosion and heat resistant.

MARKER SPEZIAL M EXTRA
M-1305; 1.00 C, 0.10 V, bal Fe.
Water hardening carbon tool steel; for small cold working dies, as for rivets, screws, coins, medals.

MARKER SPEZIAL M-MITTELHART.
M-1305; 1.10 C, bal Fe.
Water hardening carbon tool steel; for drills, taps, wood working tools, knife sharpening or whetting steel.
Werkstoff Nr. 1.1550

MARKER SPEZIAL M-SEHR ZAH.
M-1305, 0.70 C, bal Fe.
Water hardening carbon tool steel; for shears, woodworking tools, riveting hammers; very tough.
Werkstoff Nr 1.1520.

MARKER SPEZIAL M-ZAH
M-1305, 0.85 C, bal Fe
Water hardening tool steel; for punches and dies, for chisels, shears, cutlery.
Werkstoff Nr. 1.1530

MARKER SPEZIAL M-ZAHHART.
M-1305; 1.00 C, bal Fe
Water hardening carbon tool steel; for work shop tools as drills, chisels, hand lettering and stamping dies.
Werkstoff Nr. 1.1540.

MARKER SPM
M-1305, 0.30 C, 2.35 Cr, 0.25 V, 9.0 W, 2.05 Co, bal Fe.
Hot work tool steel, oil or air hardenable to 240,000-265,000 TS max
For dies for hot forming bronze, brass and other copper alloys
Werkstoff Nr 1.2662

MARKER SRS
M-1305; 0.55 C, 0.70 Cr, 0.30 Mo, 1.65 Ni, 0.10 V, bal Fe
Hot work tool and die steel, oil hardenable to 300,000 TS.
For drop forge dies, jaws for welding machines, shears
Werkstoff Nr. 1.2713

MARKER SRS EXTRA.
M-1305, 0.55 C, 1.1 Cr, 0.5 Mo, 1.65 Ni, 0.10 V, bal Fe.
Hot work tool and die steel, air, oil or water hardenable to 270,000-300,000 TS.
For casting molds for zinc, tin and lead; hot forming tools
Werkstoff Nr. 1.2714.

MARKER SS 11
M-1305, 0.88 C, 4.15 Cr, 0.85 Mo, 2.45 V, 12.00 W, bal Fe.
High speed steel for turning, milling, drilling and gear cutting steel.
W. Nr. 1.3318.

MARKER SS 13.
M-1305; 1.25 C, 4.15 Cr, 0.85 Mo, 3.75 V, 12.0 W, bal Fe
High speed steel, high hardness for finishing tools as reamers, finish turning and precision boring.
W. Nr. 1.3302

MARKER SS 19.
M-1305; 0.74 C, 4.15 Cr, 1.10 V, 18.0 W, bal Fe.
High speed steel for general purpose tools for turning, planing, milling and drilling steel and non-ferrous metals.
W. Nr. 1.3355; AISI T1.

MARKER TAM.
M-1305; 0.85 C, 0.25 Si, 0.25 Mn, 0.15 Mo, 0.20 Ni, 0.30 V, bal Fe.
Water hardening tool steel; for cold forming screws, nuts, bolts, balls; good resistance to cracking under pressure.

MARKER Vg 508
M-1305; 0.20-0.40 C, 1.0-2.0 Si, 1.5 max Mn, 24.0-26.0 Cr, 0.5 Mo, 34.0-36.0 Ni, bal Fe.
Cast, ann: 64,000-92,000 TS; 8 min El; 150-220 Brin.
Austenitic stainless casting; for use in parts operating at temperatures up to 2100°F.
DIN G-X40NiCrSi3525.

MARKER W5/0.
M-1305; 0.30 C, 0.85 Si, 1.05 Cr, 0.20 V, 3.75 W, bal Fe.
Hot work tool and die steel; oil or water hardenable to 210,000-250,000 TS.
For hot forming rivets; thread rolling screws; mandrels, jaws for electric welders.
Werkstoff Nr 1.2564

MARKER W 11.
M-1305; 0.30 C, 2.65 Cr, 0.35 V, 9.0 W, bal Fe.
Hot work tool steel, air or oil hardenable to 240,000-265,000 TS
For hot stamping dies, punches, shears, hot extrusion dies.
Werkstoff Nr. 1.2581.

MARKER W 18 K
M-1305; 0.58 C, 4.15 Cr, 0.3 Mo, 1.0 V, 18.0 W, bal Fe
Cold work tool and die steel; oil or air hardenable to 57-60 Rock C.
For thread rolling dies for screws, bolts.
Werkstoff Nr. 1.2587

MARKER WAGT.
M-1305; 0.40 C, 1.25 Mn, 1.85 Cr, 0.20 Mo, bal Fe.
Hot work tool and die steel; oil hardenable to 270,000 TS.
For drop hammer forging dies, hot punches, frames for casting molds.
Werkstoff Nr. 1.2311

MARKER WAGT EXTRA.
M-1305, 0.43 C, 1.4 Mn, 2.3 Cr, 0.25 Mo, 0.50 Ni, 0.10 V, bal Fe.
Hot work tool and die steel; oil or air hardenable to 234,000-284,000 TS.
For forging hammers.

MARKER WAGT S
M-1305, 0.40 C, 0.3 Si, 1.25 Mn, 1.85 Cr, 0.20 Mo, 0.10 S, bal Fe.
Hot work tool steel; free machining grade of MARKER WAGT.

MARKER WL 4.
M-1305; 1.00 C, 0.50 Si, 1.10 Mn, 1.55 Cr, bal Fe.
Oil hardening tool steel; used for meat grinders and larger ball and roller bearings.

MARKER WM 28.
M-1305; 0.32 C, 3.0 Cr, 2.80 Mo, 0.60 V, bal Fe.
Hot work tool and die steel; oil or water hardenable to 235,000-250,000 TS.
For hot forming heavy and light metals, hot shears, thread rolling, forming railroad spikes, pressure casting molds.
Werkstoff Nr. 1.2365; AISI H 10.

MARKER WMC.
M-1305; 0.33 C, 2.50 Cr, 2.50 Mo, 0.50 V, 2.50 Co, bal Fe.
Hot work tool and die steel; oil or water hardenable to 235,000-250,000 TS.
For threading dies for screws, hot forming rivets, valve cones.

MARKER WP 0
M-1305, 0.14 C, 0.25 Si, 0.40 Mn, 0.75 Cr, 3.50 Ni, bal Fe.
Case hardening steel, for heavy sections.
Case hardness expected: C 60-64 Rock.
Core strength: 112,000-170,000 psi TS.
For large gears and shafts requiring good strength and high surface hardness.
Werkstoff Nr 1.2735

MARKER WP 1.
M-1305, 0.19 C, 0.25 Si, 0.40 Mn, 1.25 Cr, 0.20 Mo or W, 3.75 Ni, bal Fe
Case hardening steel, for heavy sections.
Case hardness expected: C 60-64 Rock.
Core strength 155,000-200,000 psi TS.
For case hardening heavy drive gears, tractor transmission gears, aircraft gears and shafts.
Werkstoff Nr. 1.2764

MARKER ZES
M-1305, 2.10 C, 12.0 Cr, bal Fe.
Cold work tool and die steel, air or oil hardenable to 63-65 Rock C
For stamping and forming tools on thin metal sheet and strip, for rolls and presses for processing rubber, graphite, artificial resins and iron powder
Werkstoff Nr 1.2080

MARKER ZES EXTRA.
M-1305, 1.65 C, 12.0 Cr, 0.1 V, bal Fe.
Cold work tool and die steel; air or oil hardenable to 63-65 Rock C.
For dies and shears for cutting thin sheet and strip up to 5 mm thick, for broaches.
Werkstoff Nr 1.2201

MARKER ZES SPEZIAL.
M-1305; 2.10 C, 12.0 Cr, 0.35 Mo, 0.15 V, 1.60 Co, bal Fe.
Cold work tool and die steel, air or oil hardenable to 63-65 Rock C
Similar to Marker ZES but with improved toughness

MARKET BRASS
U.S., 65 Cu, 35 Zn
For condenser tubes, hardware; corrosion resistant.

MARK EYA-1T.
Russia, 0.12 C, 18 Cr, 8 Ni, Ti = 7 × C, bal Fe.
Annealed: 85,000 TS; 35,000 YS; 55 El; 65 RA; 150 Brin
For welded chemical plant equipment; Type 321; stainless, austenitic.

MARKEY M-1.
M-1671, 83 Cu, 7 Sn, 7 Pb, 3 Zn.
Cast leaded bronze; SAE 660; Copper alloy No 932;
ASTM B144-3B.

MARKEY M-2.
M-1671, 80 Cu, 10 Sn, 10 Pb.
Cast leaded bronze, SAE 64; Copper alloy No. 937;
ASTM B144-3C.

MARKEY M-3.
M-1671; 85 Cu, 5 Sn, 5 Zn, 5 Pb.
Cast leaded red brass; SAE 40; Copper alloy No. 836;
ASTM B145-4A.

MARKEY M-4.
M-1671; 85 Cu, 5 Sn, 9 Pb, 1 Zn.
Cast leaded bronze; SAE 66; Copper alloy No. 935;
ASTM B144-3C.

MARKEY M-6.
M-1671; 88 Cu, 10 Sn, 2 Zn.
Cast bronze; SAE 62; Copper alloy No. 905;
ASTM B143-1A.

MARKEY M-7.
M-1671; 88 Cu, 10 Sn, 2 Pb
Cast low lead bronze; SAE 63; Copper alloy No. 927.

MARKEY M-8.
M-1671; 76 Cu, 6 Sn, 18 Pb Cast bearing bronze; Copper alloy No 941.

MARKEY M-9
M-1691; 9 Sn, 1.2 Pb, 5.2 Ni, bal Cu
Cast nickel bronze.

MARKEY M-11.
M-1671; 83 Cu, 11 Al, 4 Fe.
Cast Aluminum bronze; SAE 68 A-B; Copper alloy No 954.

MARKEY M 12.
M-1671; 77 Cu, 8 Sn, 15 Pb Cast bearing bronze

MARKEY M-13
M-1671; 67 5 Cu, bal Zn Cast yellow brass; SAE 41.

MARKEY M-14
M-1671, 81 Cu, 8 Sn, 11 Pb Cast high leaded bronze

MARKEY M-15.
M-1671, 85 Cu, 14 Sn, 1 Zn.
Cast tin bronze; Copper alloy No. 910

MARKEY M-16.
M 1671, 78 Cu, 6 Sn, 16 Pb
Cast high lead tin bronze, Copper alloy No 939.

MARKEY M 17
M-1671; 87 Cu, 11 Sn, 1 Pb, 1 Ni.
Cast leaded tin bronze; SAE 640; Copper alloy No. 925

MARKEY M-18.
M 1671; 87 Cu, 8 Sn, 1 Pb, 4 Zn
Cast leaded tin bronze; Copper alloy No 923; ASTM B143-2B

MARKEY M-19
M-1671; 70 Cu, 9 Sn, 21 Pb. Cast high leaded tin bronze.

MARKEY M-20
M-1671, 72 Cu, 3 Sn, 25 Pb. Cast high leaded tin bronze.

MARKEY M-21
M-1671; 70 Cu, 5 Sn, 25 Pb.
Cast high leaded tin bronze; Copper alloy No. 943.

MARKEY M-22.
M-1671; Manganese bronze. SAE 43.

MARKEY M-23.
M-1671: 66 Cu. 34 Zn. Cast yellow brass.

MARKEY M-24.
M-1671; 83 Cu, 10 Sn, 5 Pb, 2 Zn. Cast leaded bronze.

MARKEY M-25.
M-1671; 75 Cu, 5 Sn, 20 Pb. Cast high leaded tin bronze.

MARKEY M-29.
M-1671; 81 Cu, 3 Sn, 7 Pb, 9 Zn. Cast leaded semi-red brass; Copper alloy No. 844; ASTM B145-5A.

MARKEY M-31.
M-1671; 73-77 Cu, 4-6 Sn, 18-23 Pb, 3 max Zn.
Cast high leaded tin bronze.

MARKEY M-34.
M-1671; 75 Cu, 5 Sn, 20 Pb, 1 max Ni.
Cast high leaded tin bronze.

MARKEY M-35.
M-1671; 89 Cu, 11 Sn, 0.1-0 3 P.
Cast phosphor gear bronze; SAE 65; Copper alloy No. 907.

MARKEY M-36.
M-1671; 70 Cu, 3.5-5 Sn, 19-23 Pb, 0.50 max P, others 1.0 max. Cast high leaded tin bronze.

MARKEY M-37.
M-1671; 1.5-2.5 Sn, 28-29 Pb, 0.50 max Zn, 0.25-0 75 Ni, bal Cu. Cast copper lead alloy.

MARKEY M-38
M-1671; 82-85 Cu, 7-9 Sn, 0 75 Zn, 1.0 max Ni, 0 50 P, 0.15 max Fe, 0.50 max Sb.
Cast leaded tin bronze.

MARKEY M-40.
M-1671; 72-78 Cu, 4.5-6 Sn, 18-22 Pb, 1 0 max Ni, 0 20 max Fe, 0.05 max P. Cast high leaded bronze.

MARKEY M-41.
M-1671; 68 5-73 5 Cu, 4.5-6 0 Sn, 22-26 Pb.
Cast high leaded bronze; Copper alloy No 943;
ASTM B144-3E

MARKEY M-42
M-1671; 76-78 Cu, 2-4 Sn, 9-11 Pb, 2 0-2 5 Ni, 6-9 Zn. Cast high leaded bronze.

MARKEY M-43.
M-1671, 86-89 Cu, 9-11 Sn, 0.3 max Pb, 1-3 Zn.
Cast tin bronze; SAE 62, Copper alloy No 905.

MARKEY M-44.
M-1671; 84-89 Cu, 9-13 5 Sn, 1.0 max Pb, 1-3 Zn.
Cast tin bronze.

MARKEY M-45
M-1671; 86-89 Cu, 7.5-9 Sn, 0 30 Pb, 3-5 Zn, 1 0 Ni.
Cast tin bronze; Copper alloy No 903; ASTM B143-1B

MARKEY M-46.
M-1671; 86-89 Cu, 5 5-6 5 Sn, 1-2 Pb, 3-5 Zn, 1.0 Ni.
Cast leaded tin bronze, copper alloy No. 922, ASTM B143-2A.

MARKEY M-47.
M-1671; 78-82 Cu, 2-3 Sn, 9-11 Pb, 6 5-8.5 Sn, 1.0 max Ni.
Cast leaded brass

MARKEY M-50.
M-1671; 66 5-73 5 Cu, 8.5-11.5 Sn, 18-22 Pb.
Cast high leaded tin bronze; 48-78 BHN.

MARK I.
M-494; 3.3 C, 1.4 Si, 0.2 P, bal Fe.
Cast: 180-250 Brin.
For medium section castings: cast iron.

MARK III.
M-494; 3.2 C, 1.9 Si, 1.4 Ni, 0.4 Cr, bal Fe.
Cast: 220-280 Brin.
For heat treated castings, gears; cast iron.

MARK VII.
M-494; 3.4 C, 1.4 Si, 0.2 P, bal Fe.
Cast: 170-220 Brin.
For piston rings; cast iron.

MARK U7.
Russia; 0.70 C, 0.25 max Mn, 0.25 max Si, bal Fe.
Heat treated: 174,000 TS; 128,000 YS; 12 El; 37 RA; 352 Brin.
For springs, rails, clutch discs; water hardened.

MARK U8.
Russia; 0.80 C, 0.25 max Si, 0.25 max Mn, bal Fe.
Heat treated: 188,000 TS; 143,000 YS; 12 El; 35 RA; 388 Brin.
For springs, taps, reamers, drills, hobs; water hardened.

MARKUS ALLOY.
Eng.; Cu, Ni, Zn.
For decorative parts; corrosion resistant.

MAR-M ALLOY 200.
M-1536; 0.12-0.17 C, 8-10 Cr, 11.5-13.5 W, 9-11 Co, 0.05 Zr, 0.75-1.25 Co, 4.75-5.25 Al, 1.75-2.25 Ti, 0.015 B, 1.5 max Fe, bal Ni.
As Cast: 135,000 TS; 120,000 YS; 7 El.
At 1400°F: 135,000 TS; 122,500 YS; 3.5 El.
For turbine blades and vanes in aircraft gas turbine engines.
High strength and oxidation resistant to 1900°F.

MAR-M ALLOY 211.
M-1536; 0.15 C, 9 Cr, 10 Co, 2.5 Mo, 5.5 W, 2.7 Cb, 2.0 Ti, 5 Al, 0.015 B, 0.05 Zn, bal Ni.
For integrally cast turbine wheels and blades.
Cast alloy. High stress-rupture strength.
Corrosion and heat resistant.

MAR-M ALLOY 246.
M-1536; 0.15 C, 9 Cr, 10 Co, 10 W, 2.5 Mo, 1.5 Ta, 1.5 Ti, 5.5 Al, 0.015 B, 0.05 Zr, bal Ni.
Cast. 139,000 TS; 122,000 YS; 4.5 El.
At 1600°F: 132,000 TS; 100,000 YS; 4.5 El.
For turbine vanes, nozzles, jet engine components.
Precipitation hardening. For service up to 1900°F. High oxidation resistant.

MAR-M ALLOY 302
M-1536, 0.78-0.93 C, 1.5 max Fe, 0.01 max B, 20-23 Cr, 9-11 W, 8-10 Ta, 0.1-0.3 Zr, bal Co.
Cast: 140,000 TS; 100,000 YS; 2 El, C 40 Rock.
At 1600°F: 56,000-78,000 TS; 40,000-50,000 YS; 7-14 El.
For turbine vanes, nozzle guide vanes and buckets in gas turbines.
High oxidation and thermal shock resistance. For service to 2100°F.

MAR-M ALLOY 322.
M-1536; 0.9-1.1 C, 20-23 Cr, 8-10 W, 4-5 Ta, 2.0-2.5 Zr, 0.65-0.85 Ti, 1.5 max Fe, bal Co.
Cast: 121,000 TS; 91,000 YS; 3 El; 4 RA; C 36 Rock.
At 1500°F: 95,000 TS; 55,000 YS; 10 El; 10 RA.
For turbine vanes and blades, jet engine components.
High temperature strength and ductility. Oxidation resistant to 2000°F.

MAR-M ALLOY 421.
M-1536; 0.15 C, 15.5 Cr, 1.75 Mo, 10 Co, 3.5 W, 1.75 Cb, 1.75 Ti, 4.25 Al, 0.05 Zr, 0.015 B, 1 max Fe, bal Ni.
As Cast: 132,000 TS; 115,000 YS; 6 El; 10 RA.
Heat treated: 150,000 TS; 132,000 YS; 4.4 El; 6.5 RA.
Wrought: 198,000 TS; 136,000 YS; 20 El; 26 RA.
For turbine rotors and discs, jet engine components.
Precipitation hardening, high strength and sulfidation resistant.

MAR-M ALLOY 432.
M-1536; 20 Co, 15.5 Cr, 4.3 Ti, 2.8 Al, 3 W, 2 Ta, 2 Cb, 0.15 B, 0.05 Zr, bal Ni.
Cast: 180,000 TS; 150,000 YS; 5 El; 6.5 RA.
For integrally cast turbine wheels, jet engine components, turbine blades. Sulphidation resistant.
Resists creep rupture and hot corrosion.

MAR-M ALLOY 509.
M-1536; 0.6 C, 21.5 Cr, 10 Ni, 7 W, 3.5 Ta, 0.2 Ti, 0.5 Zr, bal Co.
At 70°F: 113,000 TS; 85,000 YS; 3.5 El; 5.8 RA.
At 1600°F: 68,000 TS; 45,000 YS; 7 El; 13 RA.
For aircraft and industrial turbines.
Cast superalloy, high strength, low creep rate. Resists shock and oxidation.

MAR-M ALLOY 918.
M-1536, 20 Ni, 20 Cr, 7.5 Ta, 0.1 Zr, 0.05 C, bal Co.
Bar: 130,000 TS; 56,000 YS; 48 El.
For burner cans and afterburner liners in gas turbine engines.
High heat, oxidation, and corrosion resistance.

MARQUES AGPV.
M-884; C, S, bal Fe
For screw machine products; free-cutting.

MARQUES D1S.

MARREL 5NS
M-1180; 0.12-0.16 C, 0.2 Cr, 5-5.5 Ni, bal Fe.
Hardened: 170,000-200,000 TS; 108,000 YS; 6 El; 40 RA; 350-420 Brin
For motor valves, boilers, gears; case hardening steel, shock resistant.

MARREL 50SS
M-1180; 0.18-0.25 C, 0.8-1.0 Mn, bal Fe.
Normalized: 74,000-83,000 TS; 53,000 YS; 24 El; 58 RA; 149-166 Brin.
For machinery and welded parts; parts workable at low temperature.

MARREL AMMO.
M-1180; 0.20 max C, 0.9-1.2 Mn, 0.2 Cr, 0.4-0.6 Mo, bal Fe.
Normalized: 84,000-90,000 TS; 50,000 YS; 18 El; 50 RA; 150-180 Brin.
For sheet iron parts for superchargers; for use at temperatures up to 500°C.

MARREL ARM.
M-1180; 1.0-1.15 C, 1.4-1.6 Cr, bal Fe.
Hardened: 630-740 Brin.
For cutlery, stamping dies, cams, tools; oil hardening.

MARREL ASK1.
M-1180; 0.15-0.21 C, 0.6-0.9 Mn, 0.6-1.0 Cr, bal Fe.
Hardened: 135,000-165,000 TS; 86,000 YS; 8 El; 33 RA; 280-340 Brin.
For gears, shafts; case hardening steel.

MARREL ASK2.
M-1180; 0.20-0.25 C, 0.6-0.9 Mn, 0.85-1.00 Cr, bal Fe.
Hardened: 162,000-191,000 TS; 103,000 YS; 5 El; 28 RA.
For gears, shafts; case hardening steel.

MARREL ASK3.
M-1180; 0.30-0.40 C, 0.6-0.9 Mn, 0.85-1.00 Cr, bal Fe.
Hardened: 114,000-128,000 TS; 102,000 YS; 15 El; 62 RA; 230-272 Brin.
For mechanical parts, gears, shafting; oil hardening.

MARREL AKS4.
M-1180; 0.40-0 48 C, 0.6-0.9 Mn, 0.85-1.00 Cr, bal Fe.
Hardened: 128,000-142,000 TS; 115,000 YS; 14 El; 58 RA; 260-310 Brin.
For forged parts, gears; oil hardening.

MARREL ASK5.
M-1180, 0.48-0.58 C, 0.6-0.9 Mn, 0 85-1.15 Cr, bal Fe.
Hardened· 140,000-155,000 TS; 128,000 YS; 13 El; 50 RA; 290-330 Brin
For wear rings, grinding parts; wear resistant.

MARREL ASM3.
M-1180; 0.29-0 36 C, 0 45-0 55 Mn, 0.4-0.6 Cr, 0 4-0.6 Ni, bal Fe.
Hardened: 114,000-128,000 TS, 100,000 YS; 13 El; 60 RA; 235-265 Brin
For connecting rods, center bits, cylinders; oil hardening.

MARREL ASM4.
M-1180; 0.36-0 44 C, 0.5-0.7 Mn, 0.4-0.6 Cr, 0 4-0.6 Ni, bal Fe.
Hardened: 128,000-141,000 TS; 114,000 YS; 12 El; 56 RA; 260-295 Brin.
For mechanical parts, gears, shafts; oil hardening.

MARREL ASM5.
M-1180; 0 44-0 54 C, 0.5-0 7 Mn, 0.4-0.6 Ni, 0 4-0.6 Cr, bal Fe
Hardened: 142,000 TS; 125,000 YS; 11 El; 50 RA; 290-330 Brin.
For gears, shafts; oil hardening.

MARREL ASMY.
M-1180; 0.35-0.40 C, 0.4-0 6 Mn, 0.4-0.6 Cr, 0.4-0.6 Ni, 0.15-0.20 Mo, bal Fe.
Hardened: 121,000-135,000 TS; 114,000 YS; 15 El; 61 RA; 260-298 Brin.
For compressed gas bottles and cylinders; oil hardening.

MARREL AST.
M-1180; 0.32-0.38 C, 0.5-0.7 Mn, 1.6-2.0 Cr, 3.6-4.0 Ni, bal Fe.
Hardened: 240,000-320,000 TS; 158,000 YS; 6 El; 10 RA; 470-560 Brin.
For rollers, gears, connecting rods; oil hardening, tough.

MARREL C2N.
M-1180; 0.045-0.095 C, 0.3-0.5 Mn, 1.7-2.0 Ni, bal Fe.
Rolled: 78,000-95,000 TS; 57,000 YS; 15 El; 62 RA; 150-210 Brin.
For axles, connecting rods; case hardening steel.

MARREL C14A.
M-1180; 0.10-0.15 C, 13 min Cr, bal Fe.
Heat treated: 114,000-128,000 TS; 100,000 YS; 14 El; 50 RA; 230-270 Brin.
For pump shafts, steam turbine parts; corrosion resistant.

MARREL C14B
M-1180; 0.15-0.23 C, 13 min Cr, bal Fe.
Hardened· 136,000-150,000 TS; 121,000 YS; 12 El; 48 RA; 270 320 Brin
For motor valves, steam turbine parts; corrosion resistant.

MARREL C14C.
M-1180; 0.23-0.32 C, 13 min Cr, bal Fe.
Hardened: 140,000-170,000 TS; 128,000 YS; 10 El; 42 RA; 300-360 Brin.
For motor valves, pump parts; corrosion resistant.

MARREL C14M.
M-1180; 0.32-0.40 C, 13 min Cr, bal Fe.
Hardened. 165,000-200,000 TS; 142,000 YS; 8 El; 36 RA; 360-420 Brin.
For cutlery, surgical instruments; corrosion resistant, hardenable.

MARREL CH1.
M-1180; 0 08-0.11 C, 0 6-0.8 Cr, 3.3-3.7 Ni, bal Fe.
Hardened: 135,000-156,000 TS; 108,000 YS; 12 El; 48 RA; 270-340 Brin.
For gears, shafts, pinions; case hardening steel.

MARREL CH2.
M-1180, 0 11-0 15 C, 0 6-0.8 Cr, 3.3-3.7 Ni, bal Fe.
Hardened: 156,000-185,000 TS; 111,000 YS; 9 El; 33 RA, 340-430 Brin
For gears, shafts, pinions, case hardening steel.

MARREL CH2D.
M-1180, 0 15-0 20 C, 0.6-0.8 Cr, 3.3-3.7 Ni, bal Fe.
Hardened. 185,000-210,000 TS, 128,000 YS; 8 El; 30 RA; 390-460 Brin.
For gears, pinions, shafts; case hardening steel.

MARREL CH3
M-1180; 0 21-0 29 C, 0 7-0.9 Cr, 3.3-3.7 Ni, bal Fe.
Hardened: 114,000-129,000 TS; 110,000 YS, 16 El, 60 RA, 230-270 Brin
For spindles, shafts, gears; oil hardening.

MARREL CH4.
M-1180; 0.29-0 38 C, 0.7-0.9 Cr, 3 3-3 7 Ni, bal Fe.
Hardened: 114,000-141,000 TS; 121,000 YS; 15 El; 58 RA; 260-300 Brin.
For spindles, shafts, gears; oil hardening.

MARREL CNCO.
M-1180; 0.06-0.10 C, 0.5-0.6 Cr, 2.6-3.0 Ni, bal Fe.
Hardened: 107,000-135,000 TS; 83,000 YS; 13 El; 50 RA; 210-280 Brin.
For gears, axles, camshafts, connecting rods; *case hardening steel*

MARREL CNC1.
M-1180; 0 10-0 13 C, 0 6-0.8 Cr, 2 6-3 0 Ni, bal Fe.
Hardened· 135,000-165,000 TS; 90,000 YS; 10 El; 45 RA; 270-350 Brin.
For automotive and aircraft parts, gears, shafts; case hardening steel.

MARREL CNC2.
M-1180; 0.13-0.17 C, 0.6-0.8 Cr, 2.6-3.0 Ni, bal Fe.
Hardened: 162,000-185,000 TS; 107,000 YS; 9 El; 33 RA; 340-430 Brin.
For automotive and aircraft parts, gears, shafts; case hardening steel.

MARREL CNC2D
M-1180; 0.17-0.21 C, 0.6-0.8 Cr, 2.6-3.0 Ni, bal Fe.
Hardened: 185,000-210,000 TS; 114,000 YS; 7 El; 30 RA; 390-460 Brin.
For gears, shafts; case hardening steel.

MARREL CNC3.
M-1180, 0.22-0.30 C, 0.6-0.8 Cr, 2.6-3.0 Ni, bal Fe.
Hardened: 114,000-128,000 TS; 109,000 YS; 17 El, 66 RA; 230-270 Brin.
For gears, shafts, axles; oil hardening

MARREL CNC4.
M-1180; 0.30-0.38 C, 0.5-0.7 Cr, 0.5-0.7 Mn, 2.6-3.0 Ni, bal Fe
Hardened: 128,000-141,000 TS, 121,000 YS; 15 El; 60 RA; 260-300 Brin.
For gears, shafts, axles; oil hardening.

MARREL CNC5.
M-1180; 0.38-0.46 C, 0.5-0.7 Mn, 0.5-0.7 Cr, 2.6-3.0 Ni, bal Fe.
Hardened. 142,000-157,000 TS, 128,000 YS; 13 El, 48 RA; 300-350 Brin.
For gears, shafts, axles; oil hardening

MARREL CNPO
M-1180; 0.30-0.35 C, 0.5-0.7 Mn, 0.6-0.8 Cr, 2.5-2.8 Ni, 0.25-0.35 Mo, bal Fe
Hardened· 135,000-150,000 TS; 128,000 YS; 14 El; 60 RA; 270-320 Brin.
For shafts, cranks, gears, tough, oil hardening

MARREL CNY1.
M-1180, 0.13-0.17 C, 0.6-0.9 Mn, 0.5-0.7 Cr, 1.1-1.3 Ni, 0.16-0.20 Cr, bal Fe
Hardened· 135,000-165,000 TS, 92,000 YS; 9 El, 38 RA, 270-340 Brin.
For gears, shafts; case hardening steel.

MARREL CNY2.
M-1180; 0.17-0.20 C, 0.6-0.9 Mn, 1.1-1.3 Ni, 0.5-0.7 Cr, 0.16-0.20 Mo, bal Fe
Hardened. 155,000-185,000 TS, 107,000 YS, 7 El, 30 RA; 340-390 Brin.
For gears, crankshafts, case hardening steel.

MARREL CNY2D.
M-1180; 0.20-0.24 C, 0.6-0.9 Mn, 0.5-0.7 Cr, 1.1-1.3 Ni, 0.16-0.20 Mo, bal Fe.
Hardened· 185,000-225,000 TS; 110,000 YS, 6 El, 28 RA; 390-460 Brin.
For gears, crankshafts; case hardening steel.

MARREL CNY3.
M-1180, 0.22-0.28 C, 0.6-0.9 Mn, 0.5-0.7 Cr, 1.1-1.3 Ni, 0.16-0.20 Mo, bal Fe.
Hardened: 113,000-128,000 TS; 110,000 YS; 16 El; 60 RA; 230-270 Brin.
For center bits, shafts, gears, propellers; oil hardening.

MARREL CNY4.
M-1180; 0.28-0.36 C, 0.6-0.9 Mn, 0.5-0.7 Cr, 1.1-1.3 Ni, 0.16-0.20 Mo, bal Fe.
Hardened: 128,000-142,000 TS, 120,000 YS; 14 El; 63 RA; 260-300 Brin.
For shafts, gears, propellers; oil hardening

MARREL CNY5.
M-1180; 0.36-0.46 C, 0.6-0.9 Mn, 0.5-0.7 Cr, 1.1-1.3 Ni, 0.16-0.20 Mo, bal Fe.
Hardened: 141,000-155,000 TS; 124,000 YS; 13 El; 58 RA; 300-350 Brin.
For shafts, axles, gears; oil hardening.

MARREL CTD.
M-1180; 0.05-0.10 C, 0.4 Mn, bal Fe.
Normalized: 72,000-93,000 TS; 57,000 YS; 28 El; 70 RA; 140-187 Brin.
For gears, cams, crankshafts; case hardening steel.

MARREL M1
M-1180; 0.65-0.75 C, 0.45-0.65 Mn, bal Fe.
Normalized: 104,000 TS; 64,000 YS; 14 El; 29 RA, 207-229 Brin.
For springs, hammers, files, chisels; oil or water hardening.

MARREL M2.
M-1180; 0.55-0.65 C, 0.5-0.7 Mn, bal Fe.
Normalized: 107,000-121,000 TS; 66,000 YS; 14 El, 36 RA, 207-258 Brin.
For hammers, springs, punches; water hardening.

MARREL M3.
M-1180, 0.45-0.55 C, 0.5-0.7 Mn, bal Fe.
Normalized· 93,000 107,000 TS, 60,000 YS; 17 El; 45 RA, 180-224 Brin.
For forgings, axes, shafts; water hardening.

MARREL M3W
M-1180; 0.48-0.55 C, 0.45 Mn, bal Fe.
Normalized 93,000-107,000 TS; 60,000 YS; 17 El; 45 RA, 180 224 Brin
For cutlery, table flatware; water hardening

MARREL M4
M-1180, 0.32-0.38 C, 0.5 0.7 Mn, bal Fe
Normalized· 78,000-93,000 TS, 55,000 YS, 20 El, 51 RA, 156-190 Brin
For gears, pinions, shafts, water hardening.

M-1180, 0.18 0.23 C, 0.5-0.7 Mn, bal Fe.
Normalized 72,000 TS, 48,500 YS; 23 El; 57 RA, 140-160 Brin.
For axles, cotter pins, bolts, forged parts, water hardening.

MARREL M6
M 1180, 0.10-0.175 C, 0.5-0.7 Mn, bal Fe.
Normalized 64,000-72,000 TS, 43,000 YS, 25 El, 65 RA, 120-146 Brin
For gears, pinions, shafts, case hardening steel.

MARREL M7
M-1180, 0.09-0.125 C, 0.5 0.7 Mn, bal Fe
Normalized: 59,000-64,000 TS, 40,000 YS, 27 El, 72 RA; 112-128 Brin.
For bolts, rivets, stampings, water hardening.

MARREL Mo
M-1180, 0.95-1.05 C, 0.3 Mn, bal Fe.
Hardened. 160,000 114,000 TS, 100,000-72,000 YS; 10 El, 25 RA; 290-265 Brin.
For tools, dies, files, punches, hammers, water hardening.

MARREL MSG.
M-1180; 0.45-0.50 C, 0.4-0.8 Mn, 1.8-2.0 Si, bal Fe.
Hardened. 200,000-220,000 TS, 185,000 YS; 6 El; 28 RA; 420-500 Brin
For springs, oil hardening.

MARREL NK1.
M-1180; 0.07-0.11 C, 0.6-0.9 Mn, 0.9-1.25 Cr, 1.2-1.6 Ni, bal Fe
Hardened: 142,000-180,000 TS; 120,000 YS; 8 El; 42 RA; 290-390 Brin.
For gears, pinions, shafts, camshafts; case hardening steel.

MARREL NK2.
M-1180; 0.12-0.18 C, 0.6-0.9 Mn, 0.9-1.25 Cr, 1.2-1.6 Ni, bal Fe.
Hardened: 180,000-210,000 TS; 142,000 YS; 7 El; 40 RA; 370-450 Brin.
For aircraft gears, pinions, shafts; case hardening steel.

MARREL NK2D.
M-1180; 0.16-0.22 C, 0.6-0.9 Mn, 0.9-1.25 Cr, 1.2-1.6 Ni, bal Fe.
Hardened. 185,000-230,000 TS; 155,000 YS; 13 El; 36 RA; 390-500 Brin.
For aircraft gears, pinions, shafts; case hardening steel.

MARREL NK3.
M-1180; 0.22-0.29 C, 0.6-0.9 Mn, 0.75-1.10 Cr, 1.2-1.6 Ni, bal Fe.
Hardened: 195,000-240,000 TS; 170,000 YS, 6 El; 24 RA; 420-540 Brin
For gears, shafts, machinery parts, oil hardening

MARREL NK4
M-1180; 0.3-0.38 C, 0.6-0.9 Mn, 0.75-1.1 Cr, 1.2-1.6 Ni, bal Fe.
Hardened: 225,000-280,000 TS, 200,000 YS; 5 El; 22 RA, 480-630 Brin
For gears, pinions, axles; oil hardening.

MARREL SKM1.
M-1180, 0.11-0.15 C, 0.65-0.80 Mn, 0.85-1.15 Cr, 0.2-0.3 Mo, bal Fe
Hardened 135,000-170,000 TS; 86,000 YS; 10 El; 35 RA, 220-350 Brin.
For gears, pinions, cams, shafts; case hardening steel

MARREL SKM 2
M-1180; 0.15-0.19 C, 0.65-0.80 Mn, 0.85-1.15 Cr, 0.2-0.3 Mo, bal Fe
Hardened 160,000-185,000 TS; 107,000 YS, 7 El, 31 RA, 340-400 Brin.
For bolts, cylinder liners, gears, case hardening steel

MARREL SKM 2 D.
M-1180; 0.19-0.23 C, 0.65-0.80 Mn, 0.85-1.15 Cr, 0.2-0.3 Mo, bal Fe
Hardened: 182,000-210,000 TS; 111,000 YS; 6 El; 28 RA, 390-460 Brin
For gears, shafts, camshafts, bolts, case hardening steel

MARREL SKM 3
M-1180, 0.23-0.29 C, 0.65-0.80 Mn, 0.85-1.15 Cr, 0.2-0.3 Mo, bal Fe
Hardened 114,000-128,000 TS; 100,000 YS; 15 El, 63 RA; 230-270 Brin.
For shafts, axles, gears, oil hardening

MARREL SKM 3 S
M-1180; 0.21-0.28 C, 0.65-0.80 Mn, 0.85-1.15 Cr, 0.2-0.3 Mo, bal Fe.
Hardened. 128,000-156,000 TS; 99,500 YS; 10 El; 50 RA; 260-340 Brin
For gears, aircraft parts; good weldability.

MARREL SKM 4.
M-1180; 0.32-0.38 C, 0.65-0.80 Mn, 0.85-1.15 Cr, 0.2-0.3 Mo, bal Fe.
Hardened: 128,000-141,000 TS; 118,000 YS; 14 El; 60 RA; 260-300 Brin.
For shafts, pneumatic hammer pistons, torsion bars, oil hardening.

MARREL SKM 5.
M-1180; 0.38-0.48 C, 0.65-0.80 Mn, 0.85-1.15 Cr, 0.2-0.3 Mo, bal Fe
Hardened: 141,000-156,000 TS; 131,000 YS; 13 El; 53 RA; 300-340 Brin
For shafts, torsion bars, pneumatic hammer pistons; oil hardening.

MARREL SKM 5 B.
M-1180; 0.40-0.47 C, 0.7-0.8 Mn, 1-1.3 Cr, 0.4-0.5 Mo, bal Fe
Hardened: 141,000-156,000 TS; 132,000 YS; 13 El; 53 RA; 300-340 Brin.
For cutting pliers, tools, dies, oil hardening, tough

MARREL SKMC.
M-1180, 0.10-0.15 C, 0.65-0.90 Mn, 0.6-0.9 Cr, 0.45-0.60 Mo, bal Fe.
Rolled 68,000-83,000 TS; 43,000 YS; 20 El; 70 RA; 130-170 Brin
For tubes for high temperature and steam pipes; good weldability

MARREL SKMO.
M-1180, 0.08-0.11 C, 0.65-0.80 Mn, 0.85-1.15 Cr, 0.2-0.3 Mo, bal Fe
Hardened: 114,000-135,000 TS; 83,000 YS; 10 El, 40 RA; 235-285 Brin
For gears, pinions, cams, shafts, case hardening steel.

MARSHALL L-CRAT.
M-1149; 0.18 C, 0.50 Mn, 0.20 Si, bal Fe
Annealed. 72,000 TS; 40,000 YS; 22 El, 58 RA; 140 Brin
For jigs, fixtures, patterns, machinery parts; Type 1018 steel, killed

MARSH CH5
M-753, 0.34-0.40 C, 0.9 Si, 5 Cr, 1.25-1.5 Mo, 0.5-0.7 V, bal Fe
For hot forging dies, punches; hot work steel, oil hardened

MARSH CMN
M-753, 0.50-0.55 C, 0.15-0.20 Si, 1.5 Cr, bal Fe.
For drop stamping dies; oil hardened

MARSH CTC 1.
M-753, 0.45 C, 1.25 Cr, 2 W, 0.75 Si, bal Fe
For pneumatic chisels, boiler making tools, oil hardened, shock resistant

MARSH CTH
M-753, 0.43 C, 0.25 Cr, 0.50 W, bal Fe
For hot forging dies and punches; hot work steel, oil hardened.

MARSH CTHV.
M-753, 0.30 C, 3.4 Cr, 0.34 V, 8.4 W, bal Fe
For hot forging dies, punches, hot work steel, oil hardened

MARSH CYC
M-753; 0.7 C, 18 W, 4 Cr, 1 V, bal Fe
For tools, cutters, reamers, hobs, drills; high speed steel.

MARSH CYC 5% COBALT.
M-753, 0.70 C, 4.5 Cr, 1 Mo, 1.5 V, 18 W, 5 Co, bal Fe
For lathe and boring tools, drills, shapers, cutters; high speed steel

MARSH CYC275
M-753, 0.8 C, 20 W, 4.5 Cr, 1.25 Mo, 1.2 V, 10 Co, bal Fe
For lathe and planer tools, hobs, reamers, milling cutters.

MARSH CYC EXTRA.
M-753; 0.7 C, 18 W, 4 Cr, 1 V, 5 Co, bal Fe.
For drills, hobs, reamers, broaches, lathe and planer cutters, high speed steel; Type T4.

MARSH CYC SPECIAL 14%.
M-753; 0.7 C, 14 W, 4 Cr, 2 V, bal Fe.
For lathe and planer tools, drills, reamers, taps; high speed steel.

MARSH H.F.C.
M-753; 2.15 C, 12.5 Cr, 0 6 Si, 0.3 Mn, bal Fe.
For forming and drawing dies, punches, shears; oil hardened, non-deforming.

MARSH M.N.
M-753; 0 9 C, 1 7 Mn, 0.2 Si, 0.25 Cr, bal Fe.
For dies, gauges, precision tools, taps, drills; oil hardened, non-deforming.

MARSH N3.
M-753, 0.4 C, 3.0-3.5 Ni, 0.4 Si, 0.6 Mn, bal Fe.
For chisels, gears, punches, crimpers; oil hardened, shock resistant.

MARSH NC.
M-753; 0.45 C, 3 75 Ni, 1.1 Cr, 0.5 Mn, 0.35 Si, bal Fe.
For chisels, snaps, gears, crimpers, punches; oil hardened, shock resistant

MARSH NC1.
M-753; 0.40 C, 1.5 Ni, 1 Cr, bal Fe.
For spring collets; oil hardened, tough

MARSH'S PATENT.
75 Ni, 25 Cr.
For electrical resistances, heating elements; heat resistant.

MARSH SPECIAL.
M-753; 1.2 C, 0 3 Mn, bal Fe.
For wood working tools, drills, water hardened; Type W1.

MARSH WTS (0 70C).
M-753; 0 70-0.80 C, 0 10-0 20 Si, 0.30-0 40 Mn, bal Fe.
Heat treated: 185,000 TS; 140,000 YS; 13 El, 37 RA; 375 Brin.
For lathe centers, vice jaws, press tools, Type W1; water hardened.

MARSH WTS (0.95C).
M-753, 0 95-1 05 C, 0.30-0.40 Mn, 0.1-0.2 Si, bal Fe.
Annealed 100,000 TS; 53,000 YS; 21 El; 42 RA, 200 Brin.
For blanking tools, punches, shears, press tools; Type W1; water hardened

MARS SUPERIEUR
M-1120; 0 7 C, 18 W, 4 Cr, 1 V, bal Fe.
For tools, dies, cutters; high speed steel.

MARTIES ALLOY.
18 Zn, 35 Ni, 10 Fe, 10 Sn, bal Cu.
For resistances, heat and corrosion resistant parts; heat and corrosion resistant.

MARTIES' NON-OXIDIZABLE ALLOY.
35 Ni, 18 Zn, 17 Cu, 10 Fe, 10 Sn.
For heat and corrosion resistant parts; also called "Marlies."

MARTIES' NON-OXIDIZABLE ALLOY.
35 Ni, 10 Fe, 10 Zn, 20 Sn, 25 brass.
For heat and corrosion resistant parts; heat and corrosion resistant.

MARTIN.
M-157; 1.4-1.6 C, 12-14 Cr, 0.6-0.8 Co, 0.8-0.9 Mo, 0.35-0.40 V, bal Fe.
For dies, rotary shears, gages, punches, shear blades, liners for dust mills; castings; cast to shape; air hardening.

MARTINEL.
M-348; C, 0.6-0.9 Mn, 2.75 min, Ni, bal Fe.
85,000 TS; 50,000 YS; 20 El; 40 RA.
For shipbuilding purposes in strength members, flat plate keel, bilge, deck and side plates; special method of rolling.

MARTIN STEEL.
Eng ; 0.73 C, 0.4 Si, bal Fe.
For blacksmith tools, dies, hammers; water hardening.

MARWE 13P.
M-1334; 0.15 C, 0 60 Mn, 0.25 Si, 0.3 Mo, bal Fe.
Annealed· 70,000 TS; 40,000 YS; 25 El; 60 RA; 145 Brin.
For gears, cams, camshafts, fasteners; case hardening steel.

MARWE 14D.
M-1334; 0 14 C, 0.25 Si, 0 60 Mn, 0.3 Mo, bal Fe.
Annealed· 70,000 TS; 40,000 YS; 25 El; 60 RA; 145 Brin
For gears, cams, machine tool parts; case hardening steel.

MARWE 171.
M-1334; 0.13 C, 0 85 Cr, 0 45 Mo, bal Fe.
For gears, cams, camshafts, machine tool parts; case hardening, tough.

MARWE 126E
M-1334; 0 15 C, 0 75 Cr, 0 15 Mo, bal Fe
For gears, cams, machine tool parts; case hardening, tough.

MARWE 127M
M-1334, 0 14 C, 1.0 Mn, 0 3 Si, bal Fe.
For gears, cams, camshafts; case hardening steel.

MARWE 134A
M-1334, C, Si, Mn, bal Fe.
For gears, machine tool parts; case hardening steel

MARWE 176M.
M-1334; 0 36 C, 0 30 Si, 1 0 Mn, bal Fe.
For gears, machine tool parts; water hardened.

MARWE 213ESV.
M-1334; 0 10 C, 1 1 Si, 1 8 Cr, 0 3 Mo, 0 3 V, bal Fe
For dies, cams, crankshafts, case hardening steel.

MARWE 215E
M-1334, 0 10 C, 2 25 Cr, 1 1 Mo, bal Fe
For oil refinery equipment; creep and heat resistant

MARWE 215ESV.
M-1334, 0 08 C, 1.25 Si, 2 1 Cr, 0 45 Mo, bal Fe
For oil refinery equipment, creep and heat resistant.

MARWE 220EV
M-1334, 0 13 C, 1 05 Cr, 0 25 Mo, 0.20 V, bal Fe
For gears, cams, camshafts; case hardening steel.

MARWE 220MH.
M-1334; C, Si, Mn, bal Fe
For machine tool parts, fasteners; case hardening steel.

MARWE 221M
M-1334; 0.16 C, Si, 1 0 Mn, bal Fe.
For machine tool parts; case hardening steel.

MARWE 228E
M-1334; 0.12 C, 5 Cr, 0.55 Mo, bal Fe.
For oil refinery equipment; creep and heat resistant.

MARWE 251CBH.
M-1334; 0.3 C, 0.9 Al, 1.2 Cr, bal Fe.
For oil refinery equipment; creep and heat resistant.

MARWE 251DV.
M-1334; 0.27 C, Cr, V, bal Fe.
For gears, cams, camshafts; case hardening steel.

MARWE 253DV.
M-1334; 0.32 C, Cr, bal Fe
For gears, bolts, crankshafts; oil hardened, shock resistant.

MARWE 262EB.
M-1334; 0.32 C, 1.1 Cr, 1.1 Al, 0.18 Mo, bal Fe.
For oil refinery equipment; creep and heat resistant.

MARWE 291DV.
M-1334, 0.50 C, 0.95 Mn, 1.05 Cr, 0.1 V, bal Fe.
For gears, bolts, springs, shafts; oil hardened, shock resistant.

MARWE 310CW.
M-1334, C, Si, Mn, bal Fe.
For machine tool parts, gears; water hardened.

MARWE 320ES.
M-1334; C, Si, Mn, bal Fe
For machine tool parts; water hardened.

MARWE 321ES.
M 1334; C, Si, Mn, bal Fe.
For machine tool parts, water hardened.

MARWEDUR A61.
M-1334; 0.15 C, 19.5 Cr, 9.5 Ni, bal Fe.
Annealed: 80,000 TS, 35,000 YS, 55 El, 75 RA; 150 Brin.
Cold drawn. 180,000 TS; 150,000 YS; 10 El; 250 Brin
For chemical plant equipment, tanks, mixers, filters; Type 302, stainless, austenitic.

MARWEDUR A63
M 1334, 0.15 C, 24 Cr, 19 Ni, bal Fe
Annealed: 100,000 TS; 45,000 YS, 50 El; 65 RA; 185 Brin
For furnace parts, valves, pumps, retorts; Type 310; stainless

MARWEDUR AN11
M-1334, 0.08 C, 17 Cr, 13 Ni, Cb, bal Fe
Annealed 90,000 TS, 45,000 YS, 50 El, 65 RA; 160 Brin
For welded chemical plant equipment, Type 347; stainless, austenitic

MARWEDUR AN21
M-1334, 0.08 C, 17 Cr, 2 Mo, 13 Ni, bal Fe.
Annealed: 85,000 TS, 35,000 YS, 50 El, 65 RA; 160 Brin
Cold drawn 150,000 TS, 135,000 YS; 6 El; 300 Brin
For acid resistant chemical plant equipment; Type 316, stainless, austenitic

MARWEDUR-F11.
M-1381; 0.16-0.23 C, 12 Cr, 0.5 Ni, 1.0 Mo, 0.5 W, 0.3 V, 0.6 Mn, 0.3 Si, bal Fe
For furnace parts, oil refinery equipment, cutlery.
Corrosion and heat resistant, hardenable.

MARWEDUR-F-12.
M-1381; 0.20 C, 12 Cr, 1 Mo, 0.4 Ni, 0.3 V, bal Fe.
Annealed: 95,000 TS; 40,000 YS; 25 El, B 92 Rock.
Hardened: 240,000 TS; 195,000 YS; 10 El; C 50 Rock.
For valves, cutlery, bearings, surgical instruments.
Corrosion resistant, hardenable

MARWENIT 12M.
M-1334; 0.22 C, 17 Cr, 1.5 Ni, bal Fe.
Annealed: 125,000 TS; 95,000 YS; 20 El; 55 RA; 260 Brin.
Cold drawn: 130,000 TS; 110,000 YS; 15 El, 35 RA, 270 Brin.
For marine hardware, pumps, valves; Type 431; heat resistant.

MARWENIT A10S.
M-1334; 0.12 max C, 18 Cr, 9 Ni, bal Fe
Annealed: 80,000 TS; 35,000 YS; 55 El; 75 RA; 150 Brin
Cold drawn: 180,000 TS; 150,000 YS; 10 El; 250 Brin.
For chemical plant equipment, tanks, mixers, filters; Type 302; stainless, austenitic.

MARWENIT A20S.
M-1334; 0.12 max C, 18 Cr, 9.5 Ni, bal Fe.
Annealed. 80,000 TS; 35,000 YS; 55 El; 75 RA; 150 Brin
Cold drawn: 180,000 TS; 150,000 YS; 10 El; 250 Brin.
For chemical plant equipment, tanks, mixers, filters; Type 302; stainless, austenitic.

MARWENIT AN10.
M-1334; 0.12 max C, 18 Cr, 9.5 Ni, Cb = 8 × C, bal Fe
Annealed 90,000 TS; 45,000 YS; 56 El; 65 RA; 160 Brin.
Cold drawn: 100,000 TS, 65,000 YS; 45 El; 60 RA; 205 Brin
For welded chemical plant equipment, tanks, mixers, Type 347, stainless, austenitic.

MARWENIT AN20
M-1334, 0.12 max C, 18 Cr, 2 Mo, 10.5 Ni, Cb = 8 × C, bal Fe
Annealed 90,000 TS; 40,000 YS; 40 El; 60 RA; 170 Brin
For welded acid resistant chemical plant equipment; Type 316 Cb; stainless, austenitic.

MARWENIT AT10
M-1334, 0.12 max C, 18 Cr, 9.5 Ni, Ti = 4 × C, bal Fe
Annealed 85,000 TS; 35,000 YS; 55 El; 65 RA; 150 Brin
For welded chemical plant equipment, tanks, mixers, Type 321; stainless, austenitic.

MARWENIT AT20
M-1334; 0.12 max C, 18 Cr, 2 Mo, 10.5 Ni, Ti = 4 × C, bal Fe
Annealed 90,000 TS, 40,000 YS, 40 El; 60 RA; 170 Brin
For welded acid resistant equipment; Type 316 Ti; stainless, austenitic

MARWENIT AX10
M-1334, 0.07 max C, 18 Cr, 9.5 Ni, bal Fe.
Annealed 85,000 TS, 35,000 YS; 60 El; 70 RA; 150 Brin
Cold drawn. 180,000 TS; 125,000 YS; 10 El; 330 Brin
For chemical plant equipment, tanks, mixers; Type 304; stainless, austenitic.

MARWENIT AX20.
M-1334, 0.07 max C, 18 Cr, 2 Mo, 10.5 Ni, bal Fe.
Annealed 85,000 TS; 35,000 YS; 50 El; 65 RA; 160 Brin
Cold drawn: 150,000 TS, 135,000 YS, 6 El; 300 Brin
For acid resistant chemical plant equipment; Type 316; stainless, austenitic.

MARWENIT F10
M-1334, 0.12 max C, 13 Cr, 0.4 Si, bal Fe
Annealed: 75,000 TS; 40,000 YS; 35 El; 70 RA; 155 Brin
Cold drawn: 100,000 TS; 85,000 YS; 17 El; 60 RA; 205 Brin.
For turbine blades, cutlery, valves, surgical instruments; Type 410; corrosion resistant.

MARWENIT F15.
M-1334; 0.12 max C, 16.5 Cr, 0.25 Mo, 0.2 S, bal Fe.
Annealed: 80,000 TS; 50,000 YS; 25 El; 50 RA; 160 Brin.
For screw machine products, dairy equipment; Type 430F; corrosion resistant.

MARWENIT F20.
M-1334; 0.10 C, 13 Cr, 1.15 Mo, bal Fe.
Annealed: 75,000 TS; 40,000 YS; 35 El; 70 RA; 155 Brin.
For turbine blades, valves, pumps, corrosion resistant.

MARWENIT FT13
M-1334; 0.1 max C, 17.5 Cr, Ti = 7 × C, bal Fe.
Annealed: 80,000 TS, 50,000 YS, 25 El; 50 RA; 160 Brin
For welded oil refinery equipment, Type 430 Ti; stainless.

MARWENIT FT23
M-1334; 0.1 max C, 17 Cr, 1.8 Mo, Ti = 7 × C, bal Fe.
Annealed: 80,000 TS, 50,000 YS, 25 El, 50 RA; 160 Brin
For welded oil refinery equipment; corrosion resistant.

MARWENIT M10
M-1334, 0.4 C, 13 Cr, 0.4 Si, bal Fe
Annealed: 95,000 TS, 50,000 YS, 25 El, 50 RA, 160 Brin
For cutlery, valves, surgical instruments; Type 420, stainless

MARWENIT M11.
M-1334, 0.2 C, 0.4 Si, 13 Cr, bal Fe
Annealed: 95,000 TS, 50,000 YS, 25 El, 55 RA; 195 Brin
For cutlery, valves, turbine blades, surgical instruments, Type 420; stainless

MARWENIT M12.
M-1334, 0.22 C, 0.4 Si, 17 Cr, 1.5 Ni, bal Fe
Annealed: 125,000 TS, 95,000 YS; 20 El, 55 RA, 260 Brin
Cold drawn: 130,000 TS, 110,000 YS, 15 El, 35 RA, 270 Brin
For marine hardware, pumps, valves, Type 431, corrosion and heat resistant

MARWETHERM A61
M-1334, 0.15 C, 19.5 Cr, 9.5 Ni, bal Fe
Annealed: 80,000 TS, 35,000 YS; 55 El; 75 RA; 150 Brin
For chemical plant equipment, tanks, mixers, filters, Type 302, stainless, austenitic.

MARWETHERM A63
M-1334, 0.15 C, 24 Cr, 19 Ni, bal Fe
Annealed: 100,000 TS, 45,000 YS, 50 El, 65 RA; 185 Brin
For furnace parts, valves, pumps, turbine blades, Type 310; stainless, austenitic

MARWETHERM F90
M-1334, 0.12 max C, 2.3 Si, 6 Cr, bal Fe
Annealed: 70,000 TS, 30,000 YS; 28 El, 65 RA; 160 Brin
For oil refinery equipment, heat exchangers; Type 502; creep and heat resistant

MARWETHERM F95
M-1334, 0.12 max C, 2.2 Si, 13 Cr, bal Fe
Annealed: 75,000 TS, 40,000 YS, 35 El; 70 RA; 155 Brin
For turbine blades, oil refinery equipment; corrosion and heat resistant.

MARWETHERM F105.
M-1334; 0.12 max C, 2 Si, 18 Cr, bal Fe.
Annealed: 80,000 TS; 50,000 YS; 25 El; 50 RA; 150 Brin.
For furnace parts, heat treat boxes; Type 430; corrosion resistant.

MARWETHERM F120.
M-1334, 0.12 max C, 1.5 Al, 24 Cr, bal Fe.
For oil refinery equipment; heat and creep resistant

MARWIN.
M-848, 0.25 C, 0.3 Si, bal Fe
For machinery parts; free machining.

MARWIN SUPASTUFF
M-848; 0.3 C, bal Fe
For machinery parts, bolts, water hardened

MARVEL.
M-115, M-342, 0.33 C, 10 W, 3.5 Cr, 0.45 V, bal Fe
For cutting tools, forming dies, punches, shears; hot die steel

MAS
M-459, 0.55 C, 0.9 Si, 1.2 Mn, bal Fe
For tools, chisels, punches, oil hardening, tough.

MASILOY I TM 669
M-279, 63.5 Cu, 24.5 Zn, 12 Mn
Annealed: 54,000-64,000 TS; 17,000-30,000 YS; 38-46 El
Cold rolled: 58,000-108,000 TS, 27,000-105,000 YS; 1-40 El
Low cost, white colored, brass alloy
For flatware, hollow ware, hardware

MASILOY II TM 672
M-279, 60 Cu, 28 Zn, 7 Mn, 5 Ni
Annealed: 57,000-66,000 TS, 18,000-32,000 YS, 48-56 El
Cold rolled: 65,000-114,000 TS, 30,000-106,000 YS; 1-45 El
A low nickel white brass, for flat ware, hollow ware, hardware

MASSALLOY
M-467, C, Cr, Ni, Mo, bal Fe
Heat treated: 135,000 TS, 110,000 YS, 17 El, 30 RA, 286 Brin
For steel castings, oil hardened

MASSILLON
M-467, C, Mn, bal Fe
Normalized, 100,000 TS, 60,000 YS; 20 El; 35 RA, 207 Brin
For stokerworms, cast steel

MASTALLOY 1011
M-1721, 80 Cu, 5 Sn, 3 Pb, 12 Zn
Cast: 32,000 TS, 16,000 YS; 13 El
Leaded semi red brass
CDA 842

MASTALLOY 1151
M-1721, 85 Cu, 5 Sn, 5 Pb, 5 Zn
Cast: 45,000 TS, 21,400 YS; 28 El; 72 Brin.
Leaded red brass
ASTM B145 (4A), B271 (4A); SAE 40; CDA 836; AMS 4855

MASTALLOY 1152.
M-1721, 85 Cu, 5 Sn, 5 Pb, 5 Zn.
Cast: 55,000 TS; 24,200 YS, 13.2 El

MASTALLOY 1201
M-1721; 82 Cu, 4 Sn, 6 Pb, 7 Zn, 1 Ni
Cast: 33,000 TS; 17,600 YS; 17.6 El.
Leaded red brass
ASTM B145 (4B), B271 (4B), CDA 838.

MASTALLOY 1232.
M-1721; 80 Cu, 3 Sn, 7 Pb, 9 Zn, 1 Ni.
Cast: 34,000 TS; 18,000 YS; 22 El; 62 Brin
Leaded semi-red brass
ASTM B145 (5A), B271 (5A); CDA 844.

MASTALLOY 1941.
M-1721; 81 Cu, 19 Sn.
Cast: 50,600 TS; 46,000 YS; 1.1 El; 160 Brin.
Tin bronze castings
ASTM B22 (A); AMS 7322; CDA 913.

MASTALLOY 1971.
M-1721; 85 Cu, 14 Sn, 1 Zn.
Cast: 35,200 TS; 34,600 YS, 2.0 El
Tin bronze; for bearings, bushings
Fed Std 00153-D2, CDA 910.

MASTALLOY 2001
M-1721, 87 Cu, 11 Sn, 1 Pb, 1 Ni.
Cast· 40,000 TS; 24,000 YS, 10 El; 67 Brin.
Leaded tin bronze casting.
SAE 640, CDA 925

MASTALLOY 2051.
M-1721, 89 Cu, 11 Sn
Cast 51,500 TS; 29,000 YS; 18 El, 95 Brin.
Tin bronze, for bearings, bushings
SAE 65; CDA 907

MASTALLOY 2061
M 1721, 88 Cu, 10 Sn, 2 Pb.
Cast 49,000 TS, 25,000 YS, 18 El; 86 Brin.
Leaded tin bronze casting.
SAE 63, CDA 927

MASTALLOY 2062
M-1721; 84 Cu, 10 Sn, 2 Pb, 4 Ni
Cast 53,000 TS, 31,000 YS; 15 El, 92 Brin
Leaded nickel tin bronze casting

MASTALLOY 2101
M-1721; 88 Cu, 10 Sn, 2 Zn.
Cast 51,500 TS; 29,000 YS, 18 El, 92 Brin
Tin bronze, formerly called gun metal
SAE 62, ASTM B22(D), B143(1A)
AMS 4845, CDA 905

MASTALLOY 2251
M-1721, 88 Cu, 8 Sn, 4 Zn
Cast 49,000 TS, 23,000 YS; 18 El, 77 Brin.
ASTM B143(1B), SAE 620, CDA 903.

MASTALLOY 2351
M 1721, 86 Cu, 8 Sn, 1 Pb, 4 Zn, 1 Ni
Cast 49,000 TS, 23,000 YS, 18 El, 77 Brin
ASTM B143(2B), B271(2B), SAE 621; CDA 923

MASTALLOY 2451
M-1721, 88 Cu, 6 Sn, 1 Pb, 4 Zn, 1 Ni
Cast 45,500 TS, 23,000 YS, 35 El; 76 Brin.
ASTM B143(2A), B271(2A); SAE 622, CDA 922.

MASTALLOY 2961.
M-1721, 71 Cu, 13 Sn, 15 Pb, 1 Ni.
Cast. 26,000 TS, 16,000 YS, 8.5 El, 80 Brin.
High leaded tin bronze.
Fed. Std.00153 E2, CDA 940.
QQ B-1005(13), QQ C-525(13).

MASTALLOY 3051
M-1721; 80 Cu, 10 Sn, 10 Pb
Cast: 41,000 TS; 24,000 YS, 10 El, 80 Brin.
High leaded tin bronze
ASTM B144(3A), B271(3A). SAE 64
AMS 4842; CDA 937.

MASTALLOY 3111.
M-1721; 83 Cu, 8 Sn, 8 Pb, 1 Ni.
Cast. 37,400 TS; 22,000 YS, 19.8 El.
High leaded tin bronze.
Fed. Std. 00153:E8; QQ-B-1005(8); CDA 934.

MASTALLOY 3151.
M-1721, 83 Cu, 7 Sn, 7 Pb, 3 Zn.
Cast: 44,000 TS, 27,000 YS; 16 El; 72 Brin.
ASTM B144(3B); SAE 660; CDA 932.

MASTALLOY 3191.
M-1721; 78 Cu, 6 Sn, 16 Pb.
Cast: 34,200 TS, 23,000 YS; 12 El; 62 Brin.
High leaded tin bronze.
SAE 67; CDA 941(Similar specs).

MASTALLOY 3221.
M-1721, 70 Cu, 5 Sn, 25 Pb
Cast: 23,100 TS; 13,200 YS; 7.7 El.
High leaded tin bronze.
ASTM B144(3E), CDA 943

MASTALLOY 3242.
M-1721; 68 Cu, 2 Sn, 30 Pb
Cast: 19,800 TS, 11,000 YS; 5.5 El

MASTALLOY 3261.
M 1721, 84 Cu, 5 Sn, 9 Pb, 9 Zn.
Cast. 38,000 TS, 21,000 YS; 20 El; 66 Brin

MASTALLOY 3271.
M-1721; 75 Cu, 5 Sn, 19 Pb.
Cast 28,700 TS; 22,800 YS, 8.0 El; 57 Brin.
High leaded tin bronze
SAE 67; CDA 941

MASTALLOY 4151
M-1721, 88 Cu, 3 Fe, 9 Al
Cast 71,500 TS, 27,500 YS; 22 El
Aluminum bronze
ASTM B148(9A), SAE 68A; CDA 952.

MASTALLOY 4152
M-1721; 88 Cu, 1 Fe, 11 Al.
Cast 71,500 TS, 27,500 YS, 22 El
Aluminum bronze
ASTM B148(9B), SAE 68B, CDA 953

MASTALLOY 4153
M 1721, 86 Cu, 4 Fe, 10 Al
Cast 102,700 TS, 45,800 YS, 18.8 El, 190 Brin.
Aluminum bronze
ASTM B148(9C); CDA 954 (Similar)

MASTALLOY 4211
M 1721, 58 Cu, 1 Sn, 38 Zn, 1 Fe, 1 Al, 1 Mn.
Cast 71,500 TS, 27,500 YS, 22 El
ASTM B147(8C), AMS 4860; CDA 865.

MASTALLOY 4231
M-1721, 64 Cu, 26 Zn, 2 Fe, 4 Al, 4 Mn.
Cast· 99,000 TS, 49,500 YS; 22 El
Manganese bronze
ASTM B147(8B), CDA 862.

MASTALLOY 4241
M 1721, 64 Cu, 24 Zn, 2 Fe, 6 Al, 4 Mn.
Cast. 121,000 TS, 66,000 YS; 13.0 El.
Manganese-aluminum bronze
ASTM B147 8 B or 8 C; CDA 862, 863.
AMS 4862

MASTALLOY 4401
M-1721, 88 Cu, 5 Sn, 2 Zn, 5 Ni
Cast. 80,000 TS, 55,000 YS; 10 El.
Nickel tin bronze.
ASTM B292-A; CDA 947

MASTER.
M-358, C, Mn, bal Fe.
For tools and dies; water hardening.

MASTER METAL.
M-565; Sn, Cu, Pb
For machinery bearings; Babbitt.

MATADOR 91.
M-1348; 0.82 C, 4.1 Cr, 0.85 Mo, 1.6 V, 8.7 W, bal Fe.
For lathe and planer tools, reamers, hobs, drills; high speed steel.

MATADOR 122.
M-1348; 0.86 C, 4.1 Cr, 0.85 Mo, 2.5 V, 12 W, bal Fe.
For lathe and planer tools, drills, taps, hobs; high speed steel.

MATADOR 181.
M-1348; 0.74 C, 4.1 Cr, 1.1 V, 18.5 W, bal Fe.
For lathe and planer tools, reamers, drills, broaches, taps; high speed steel

MATADOR 185.
M-1348; 0.79 C, 4.7 Co, 4.3 Cr, 0.75 Mo, 1.5 V, 18 W, bal Fe.
For drills, taps, reamers, hobs, broaches; high speed steel

MATADOR 333.
M-1348; 0.95 C, 4 Cr, V, W, Mo, bal Fe
For cutters, taps, broaches, reamers, drills, high speed steel.

MATHESIUS METAL.
Pb, 3 Ca, 1-2 alkali earth metals.
For bearings; anti-friction.

MATRELOY.
M-1627, 39 Cr, 4 Mo, 2 Ti, 1 Al, bal Ni.
Bar: 375,000 TS; 200,000-275,000 YS, 8 El.
At 1400°F· 120,000 YS
For furnace parts, springs, chemical processing equipment, electronic components.
Corrosion resistant, heat treatable, nonmagnetic.

MATRIX-II.
M-115; 0.50-0.55 C, 12 W-Mo-Cr-V, bal Fe
Annealed 95,000 TS, 48,000 YS, 25 El; 55 RA; B 90 Rock.
Heat treated· 350,000 TS; 290,000 YS, 8 El, 33 RA; C 60 Rock
Heat treated: 404,000 TS; 363,000 YS; 18 RA, 6 El.
Ror rocket motor cases, high speed rotors, gears, pressure vessels, engine mounts, nuclear applications, molds
High temperature strength and heat resistance

MATRIX BRASS.
62 Cu, 37 Zn, 1.5 Pb
For engraving, hardware; free-cutting.

MATRIX M-A.
M-115, 0.53 C, 12 W, Mo, Cr, V, bal Fe.
Hardened: 361,000 TS; 292,000 YS; 20 RA; 6 El; 130,000 fatigue strength.
For airframes, fasteners, pressure vessels, gears, engine mounts.
Tough and fatigue resistant.

MAUSTINOX A.
M-1509; 0.12 max C, 18 Cr, 8 Ni, bal Fe.
Annealed: 70,000-85,000 TS; 30,000-37,000 YS; 30 El; 140-190 Brin.
For chemical and textile plant equipment; stainless, austenitic.

MAUSTINOX B.
M-1509; 0.12 max C, 17 Cr, 9 Ni, 2.5 Mo, bal Fe.
Annealed: 71,000-92,000 TS; 30,000-37,000 YS; 30 El; 150-200 Brin.
For acid resistant and chemical plant equipment; stainless, austenitic.

MAUSTINOX C.
M-1509; 0.12 max C, 20 Cr, 8 Ni, 2.5 Mo, bal Fe.
Annealed· 71,000-85,000 TS; 40,000-50,000 YS; 25 El; 150-200 Brin.
For acid resistant chemical plant equipment; stainless, austenitic.

MAUSTINOX D.
M-1509; 0.20 max C, 25 Cr, 5 Ni, bal Fe.
Annealed: 92,000 TS; 65,000 YS; 16 El; 190-200 Brin.
For chemical plant equipment, furnace parts; corrosion and heat resistant.

MAUSTINOX F.
M-1509; 0.20 max C, 24 Cr, 13 Ni, bal Fe.
Annealed· 78,000-100,000 TS, 30,000-37,000 YS; 30 El; 150-200 Brin.
For furnace parts, salt pots, heat treat boxes; heat and corrosion resistant, austenitic.

MAUSTINOX H
M-1509; 0.20 max C, 25 Cr, 20 Ni, bal Fe
Annealed· 65,000-92,000 TS, 30,000-37,000 YS; 30 El; 140-180 Brin
For oil refinery equipment, furnaces, salt pots, heat treat boxes, austenitic, heat and corrosion resistant

MAUSTINOX SA
M-1509, 0.12 max C, 18 Cr, 8 Ni, Ti, bal Fe.
Annealed: 75,000-85,000 TS, 30,000-37,000 YS; 30 El, 140-190 Brin.
For welded chemical and textile plant equipment, tanks, agitators; stainless, austenitic, stabilized

MAUSTINOX SB.
M-1509, 0.12 max C, 17 Cr, 9 Ni, 2.5 Mo, Ti, bal Fe
Annealed 71,000-92,000 TS, 30,000-37,000 YS; 30 El, 150-200 Brin
For welded acid resistant and chemical plant equipment, stainless, austenitic, stabilized

MAUSTINOX Y
M-1509; 0.12 max C, 20 Cr, 20 Ni, 4.5 Mo, bal Fe.
Annealed. 65,000-78,000 TS, 30,000-40,000 YS; 32 El
For heat and corrosion resistant parts; austenitic.

MAUSTINOX X
M-1509, 0.12 max C, 15 Cr, 30 Ni, 4.5 Mo, bal Fe.
Annealed 65,000-74,000 TS; 29,000-36,000 YS; 35 El.
For heat and corrosion resistant parts; austenitic.

MAX. 4
M-210, 0.15 C, 20 Ni, 25 Cr, 0.6 Mn, 1 Si, bal Fe.
Annealed 95,000 TS; 45,000 YS, 50 El, B 90 Rock.
For furnace and heat treating equipment, furnace linings, heat exchangers, retorts.
Type 310 stainless; austenitic, corrosion and heat resistant

MAXAL CO.
M-Italy; 24 Co, 14 Ni, 8 Al, 3 Cu.
For permanent magnet, magnetic and electrical equipment.
High permeability.

MAXCHIP NO. 1.
M-210; C, Ni, Cr, bal Fe.
For hand tools, chisels, punches; air hardened, tough, shock resistant.

MAXCHIP NO. 2.
M-210; C, Cr, bal Fe.
For chisels, punches; oil hardened, tough, shock resistant

MAXEL 1.
M-38; 0.2 C, 1-1.2 Mn, bal Fe.
Rolled: 75,000-80,000 TS; 45,000-55,000 YS; 30-40 El; 55-65 RA; 156 Brin.
Heat treated: 185,000 TS; 150,000 YS; 7 El; 24 RA; 392 Brin.
For shafts, gears, pinions, bolts, studs; water hardening.

MAX-EL 1-B.
M-38; 0.2 C, 1 Mn, 0.2 Mo, bal Fe.
Rolled: 70,000 TS; 50,000 YS; 30 El; 55 RA; 156 Brin.
Heat treated: 135,300 TS; 114,000 YS, 18 El; 54 RA; 332 Brin.
For shafts, gears, pinions, bolts, studs; case hardening.

MAXEL 2.
M-38; 0.4 C, 1 1.2 Mn, bal Fe.
Rolled: 90,000-110,000 TS; 50,000-65,000 YS, 35-23 El; 60 50 RA.
For shafts, gears; tough

MAX-EL 2-B.
M-38; 0.4 C, 1 Mn, 0.2 Mo, bal Fe
Rolled: 90,000 TS, 55,000 YS, 20 El; 45 RA.
Heat treated: 119,500 TS; 85,000 YS, 20 El; 53 RA; 251 Brin
For shafts, spindles, worms, racks, gears, pinions; oil hardening.

MAXEL 3.
M-38; 0.45 C, 1-1.2 Mn, 0.4-0.6 Cr, bal Fe.
Rolled: 130,000 TS; 100,000 YS; 22 El; 62 RA; 260 Brin.
Heat treated: 280,000 TS; 190,000 YS; 7.5 El; 29 RA; 550 Brin.
For screws, racks, shafts, gears; tough

MAX-EL 3½
M-38; 0.5 C, 1.25 Mn, 0.6 Cr, 0.15 Mo, bal Fe.
Heat treated 230,000 TS; 225,000 YS; 9.5 El; 36 RA; 514 Brin.
For screws, racks, shafts, gears, pinions, spindels; oil hardening

MAXEL NO 4 COLLET.
M-38, 0.75 C, Cr, Mn, bal Fe.
For collets, feed fingers, spindles; oil hardened.

MAXEL 7
M-38, 0.6-0.7 C, 0.75-1.0 Mn, 0.7-0.9 Mo, bal Fe.
For machine tool parts; water hardening

MAX-EL BRAKE DIE.
M-38; 0.5 C, 1.5 Mn, 0.18 Mo, 0.65 Cr, 0.08 S, bal Fe.
For press brake dies, vee dies, bending and flanging dies; free-cutting, wear and impact resistant.

MAXELOY.
M-38; 0.15 max C, 0.9-1.1 Mn, 0.3-0.5 Ni, 0.25 max Cr, 0.20 min Cu, bal Fe.
Rolled: 70,000 TS; 50,000 YS; 22 El; 140 Brin.
For truck frames, mine and railroad cars, pumps, dredges, coal chutes, ships; high strength low alloy steel.

MAXEL SHANK STEEL.
M-38; 0.50 C, Cr, Mn, bal Fe.
For shanks for tipped tools; oil hardened.

MAXHETE NO. 1.
M-210; 0.35 C, 18.5 Cr, 8.5 Ni, 2.5 W, bal Fe.
Cast: 137,000 TS; 35 El.
At 900°C; 38,000 TS; 47 El.
For burner tubes, pipe unions; austenitic, heat resistant to 1000°C.

MAXHETE NO. 1A.
M-210; 0.4 max C, 13.5 Cr, 13.5 Ni, 2.2 W, 1.5 Si, 0.6 Mn, bal Fe.
At 20°C: 106,000 TS; 27 El; 44 RA.
At 900°C; 61,000 TS; 45 El; 54 RA.
For furnace parts, heat treating boxes, nozzles; heat resistant, austenitic

MAXHETE NO. 2.
M-210, 0.25 max C, 25.0 Cr, 12.0 Ni, 0.6 Mn, 0.85 Si, bal Fe
For furnace parts, heat treat equipment, conveyers; resists heat and scaling to 1100°C.

MAXHETE-3
M-617, M-210, C, high Cr, bal Fe.
For rabble arms and blades in roasting furnaces; heat resistant to 1150°C.

MAXHETE NO 4.
M-210; 0.10 max C, 25.0 Cr, 33.5 Ni, 0.4 Mn, 0.75 Si, bal Fe.
For furnace parts, hearth plates, grids, austenitic, high temperature strength.

MAXHETE NO. 5.
M-210, 0.2 max C, 65 Ni, 15 Cr, 0.85 Mn, bal Fe.
For carburizing boxes, retorts, oil burner parts; high corrosion and cyclic heat resistance

MAXHETE-6.
M-617, M 210; C, Ni, Cr, bal Fe
For furnace skids, superheater supports, heat resistant, austenitic.

MAXHETE NO 7
M-210, 0.12 C, 20 Cr, 0.5 Si, bal Fe.
For furnace parts and equipment, heat treating boxes
Heat resistant Maximum operating temperature 1150°C.

MAXHETE NO 8.
M-210; 0.10 max C, 79 Ni, 19.5 Cr, 0.85 Mn, bal Fe
For electric resistances; high heat resistance.

MAXILVRY
M-210, 0.12 C, 18.5 Cr, 8.5 Ni, bal Fe.
Annealed· 83,000 TS; 38,000 YS; 48 El; 60 RA; 143 Brin
Cold drawn. 140,000 TS, 100,000 YS; 21 El; 45 RA; 190 Brin
For fittings, cutlery, valve plates, chemical retorts; Type 302; stainless, austenitic.

MAXILVRY ADS.
M-210, 0.1 C, 12 Cr, 12 Ni, 0.5 Cu, bal Fe.
Annealed: 90,000 TS; 38,000 YS; 40 El; 45 RA; 160 Brin
For deep drawn parts, chemical plant equipment; stainless, austenitic.

MAXILVRY AM.
M-210; 0.07 C, 18 Cr, 13 Ni, 0.2 Cu, 3 Mo, bal Fe.
Annealed· 100,000 TS; 40,000 YS; 40 El; 45 RA; 190 Brin
For chemical equipment to resist H_2SO_4, mixers, tanks; Type 316; stainless, austenitic.

MAXILVRY AT.
M-210; 0.2 C, 18 Cr, 8 Ni, bal Fe.
Annealed: 100,000 TS; 40,000 YS; 40 El; 45 RA; 190 Brin.
For chemical plant equipment; Type 302; stainless, austenitic

MAXILVRY AWP.
M-210; 0.10 max C, 18 Cr, 8.5 Ni, 0.5 Ti, bal Fe.
Annealed: 100,000 TS; 40,000 YS; 40 El; 45 RA; 190 Brin.
For chemical plant equipment; Type 321; stainless, austenitic.

MAXILVRY C.B.
M-210; 0.10 C, 18.5 Cr, 8.5 Ni, 1 Cb, bal Fe.
Annealed: 78,000-100,000 TS; 33,000-40,000 YS; 40-60 El; 45-65 RA; 160-195 Brin.
For impellers, tanks, chemical plant equipment; Type 347; stainless, austenitic.

MAXILVRY M.B T.
M-210; 0.04 C, 17.5 Cr, 12 Ni, 2.75 Mo, 0.75 Cb, bal Fe.
Annealed: 78,000-100,000 TS; 45,000-67,000 YS; 60-40 El; 75-60 RA; 170-200 Brin.
For chemical plant equipment, welded structures; stainless, austenitic.

MAXILVRY ML.
M-210; M-617; C, Ni, Cr, bal Fe.
For cutlery, valves; stainless.

MAXILVRY SPECIAL.
M-210, 0 06 C, 18.5 Cr, 8 5 Ni, bal Fe.
Annealed: 78,000-100,000 TS; 33,000-40,000 YS; 60-40 El; 65-45 RA, 160-190 Brin.
For chemical plant equipment, mixers, agitators, tanks; austenitic, stainless; Type 304.

MAXIMOLD.
M-289; 0 4 C, 5 2 Cr, 1.0 Si, 1.0 V, 1 2 Mo, bal Fe.
For Al and Zn die casting dies, resists heat checks, air hardened.

MAXIMUM
M-1322; 0.74 C, 4 1 Cr, 1 1 V, 18 5 W, bal Fe.
For lathe and planer tools, drills, reamers, taps; high speed steel

MAXIMUM SPEZIAL 30
M-1322, 0 86 C, 2 8 Co, 4.3 Cr, 0 85 Mo, 2 1 V, 12 W, bal Fe.
For lathe and planer tools, drills, reamers, taps; high speed steel

MAXIMUM SPEZIAL 55.
M-1322, 0 76 C, 10 Co, 4.2 Cr, 0.8 Mo, 1.8 V, 18 W, bal Fe
For lathe and planer tools, taps, broaches, drills; high speed steel.

MAXIMUM SPEZIAL 55G
M-1332; 0.80 C, Co, Cr, W, Mo, V, bal Fe.
For lathe and planer tools, reamers, broaches, high speed steel.

MAXIMUM SPEZIAL G
M-1322, 0.82 C, 4.1 Cr, 0.85 Mo, 1 6 V, 8 7 W, bal Fe
For lathe and planer tools, reamers, broaches, taps; high speed steel.

MAXIMUM SPEZIAL G EXTRA.
M-1322, 0.86 C, 4 1 Cr, 0.85 Mo, 2.5 V, 12 W, bal Fe.
For lathe and planer tools, drills, taps, hobs; high speed steel.

MAXIMUM SPEZIAL Mo
M-1322; 0.85 C, Cr, W, Mo, V, bal Fe.
For lathe and planer tools, drills; high speed steel.

MAXINIUM STEEL.
M-210; 0.32 C; 1.2 Si, 5.25 Cr, 5 0 W, 0.5 Mo, bal Fe.
For die casting dies, molds. Oil hardening.

MAXITE.
M-35; 0.8 C, 14 W, 4 Cr, 2 V, 5.2 Co, 0.6 Mo, bal Fe.
Annealed: 228 Brin.
For cutting tools, drills, reamers, boring and shaping tools.
Type T8 high-speed steel. High red hardness.

MAXITE 15.
M-35; 1.57 C, 12 65 W, 0.65 Mo, 4.75 Cr, 5.0 V, 5.0 Co, bal Fe.
For milling cutters, lathe tools, shaper tools, broaches.
Type T15 high speed tool steel.

MAXMITH.
M-210; 0 40 C, 0 60 max Mn, 3.25 Ni, bal Fe.
For chisels, riveting tools, caulking and beading tools; requires no tempering, tough.

MAXNAP.
M-210; 0 30 C, 0.60 Mn, 1.05 Cr, 0.2 V, bal Fe.
For pneumatic hammers, riverters, nut piercers; tough and fatigue resistant.

MAXTACK
M-365; 2 25 C, 10 W, 2 Cr, 2 5 Mn, 1.0 Si, bal Fe
For tools, cutters; oil or air hardened.

MAXTACK
M-210, C, Cr, W, Mn, bal Fe.
For nail and tack dies, wood working tools, air hardened

MAXTENSILE.
M-163, 3 3 C, 2 4 Si, 1 5 Ni, 0 8 Cr, bal Fe
For hydraulic castings, sliding parts, spindles, couplings, sprockets, mill rolls; discontinued; alloy cast iron

MAXTUFF
M-289, 0 50 C, 0 3 Mn, 0 75 Si, 1 15 Cr, 0.2 V, 2 50 W, bal Fe
Type S1 shock resisting tool steel

MAX-WEAR
M-38, 0 8 C, 13 Mn, 0.75 Si, 1.5 Ni, 0 5 Mo, bal Fe
Heat treated 550 Brin.
For dredge buckets, rock crushers, chute liners; work hardens, abrasion resistant

MAYARI A
M-24; C, 1 25 Ni, 0 6 Cr, bal Fe
Rolled 130,000 TS, 110,000 YS, 20 El; 61 RA.
For oil well and refinery equipment, auto parts; ductile, tough

MAYARI B.
M 24, 0 34 C, 0 6 Mn, 0 8 Ni, 0 3 Cr, bal Fe
For bolts and studs for reactor chambers and superheaters; for service up to 800°F.

MAYARI ENGINE BOLT STEEL.
M-24; 0 1 C, 1 5 Ni, 0 2 Cr, bal Fe.
Rolled: 65,000 TS, 40,000 YS; 25 El; 50 RA; 130 Brin.
For engine bolts, structures, tough

MAYARI IRON
M-24; 4.0-4 5 C, 1 Mn, 0 5-3.0 Si, 2 Ni, 2 Cr, bal Fe.
For heat, acid, wear, or hard castings; pig iron

MAYARI PIG IRON
M-24; 4-4.5 C, 2 Ni, 2 Cr, 0.5-3 Si, 1 Mn, 0 15 Ti, 0 2 V, bal Fe.
For heat and wear resistant castings; heat and wear resistant.

MAYARI R.
M-24; 0.12 max C, 0.5-1.0 Mn, 0.5-0.7 Cu, 0.25-0.75 Ni, 0.2-1.0 Cr, 0.08-0.12 P, bal Fe.
Rolled: 70,000 TS; 50,000 YS; 22 El; 150 Brin.
For transportation equipment, structures; good weldability.

MAYARI R-50
M-24; 0.10-0.20 C, 0.75-1.25 Mn, 0.2-0.4 Cu, 0.4-0.7 Cr, 0.25-0.50 Ni, 0.01-0.10 V, bal Fe.
Plate: 50,000 min YS; 70,000 min TS; 21 min El
For structural, architectural, railroad and general manufacturing applications.
Low alloy-high tensile structural steel.

MAYARI R-60
M-24; 0.1-0.2 C, 0.75-1.35 Mn, 0.2-0.4 Cu, 0.4-0.7 Cr, 0.25-0.50 Ni, 0.01-0.10 V, bal Fe.
Plate: 60,000 min YS; 80,000 min TS; 16 min El.
For structural, architectural, railroad and general manufacturing applications.
Low alloy-high strength structural steel

MAYARI STAYBOLT STEEL
M-24; 0.08 C, 1.5 Ni, bal Fe
Rolled 55,000 TS, 35,000 YS, 32 El; 62 RA; 112 Brin.
For staybolts, high fatigue resistant

MAYARI SUPERHEATER BOLT STEEL.
M-24, 0.25-0.35 C, 1.25-1.75 Ni, 0.6-0.9 Cr, bal Fe
Water quenched: 115,000 TS; 100,000 YS, 19 El; 55 RA, 229 Brin
For engine and superheater bolts; heat treated.

MAYOR
M-616, 0.75 C, bal Fe
For tools, drills, punches, springs, water hardened.

MAZAK.
M-351, Al, Cu, bal Zn
For die castings

MAZAK 2
M-414, M-87, M-91, 4.1 Al, 2.7 Cu, 0.03 Mg, bal Zn
Die cast 47,300 TS, 83 Brin.
For die castings, free from hot shortness, Iz-15, C U S 93100

MAZAK 3.
M-137, 3.9-4.3 Al, 0.03-0.06 Mg, bal Zn
Die cast 42,000 TS, 15 El; 80 Brin
For instrument cases, housings, ornamental grills, impact strength and dimensional stability.

MAZAK 3
M-414; 4 Al, 0.04 Mg, bal Zn
Die cast 37,000 TS, 4 El; 60 Brin
For gears, frames, hardware, die castings

MAZAK 5.
M-414; 4 Al, 1 Cu, 0.3 Mg, bal Zn
Die cast 42,000 TS; 3 El, 65 Brin
For gears, die castings.

MAZAK 5.
M-137; 3.9-4.3 Al, 0.75-1.25 Cu, 0.03-0.06 Mg, bal Zn
Die cast 42,000 TS, 3 El, 65 Brin.
For motor frames, gears, instrument cases; corrosion resistant to atmosphere.

MAZAK 6
M-414; 4 Al, 1.25 Cu, bal Zn
Die cast: 42,000 TS, 5 El; 65 Brin
For die castings; maximum fluidity.

MC III V.
M-459; 0.2 C, 2.5-2.7 Cr, 0.4 Mo, 8 V, 0.4 W, bal Fe
For case hardened parts; carburizing steel.

MC 40.
M-459; C, Cr, Mo, bal Fe.
16 El.
For machinery parts, oil hardened.

MC 100.
M-459; C, Cr, Ni, Mo, bal Fe.
16 El.
For machinery parts; oil hardened.

MC-102.
M-86; 0.02-0.06 C, 0.1-0.4 Si, 0.1-0.5 Mn, 4.0 max Fe, 19.0-20.5 Cr, 5.0 max Co, 5.5-6.5 Mo, 6.2-6.7 Cb, 2.0-3.0 W, bal Ni.
Heat treated. 103,000 TS; 85,000 YS; 10 El; 340 DPN
For gas turbine stator blades, diesel hot plugs, turbine rotors.
Good oxidation resistance and strength to 900°C. High temperature casting alloy Age-hardenable.

McADAMITE.
12-18 Zn, 3.1 Cu, 0.2 Mg, bal Al.
For strong light alloy parts; non-hardenable.

McADAMS ALLOY "A."
60 Al, 11-55 Cu, 10-43 Cr, 20 Zn.
For light alloy parts; non-hardenable

McADAMS ALLOY "B."
69 Al, 7.7 Cu, 0.6 Ni, 23 Zn
For light alloy parts; non-hardenable

McADAMS ALLOY "C."
70 Al, 3 Cu, 22 Zn, 5 Sb
For light alloy parts, non-hardenable.

McADAMS ALLOY "D"
80 Al, 8 Cd, 4 Ag, 8 Sn
For light alloy parts, non-hardenable

McADAMS ALLOY "E"
82 Al, 12 Cu, 5 Cd, 1 Ag.
For light alloy parts, non-hardenable

McADAMS ALLOYS
82-60 Al, 0-55 Cu, 0-8 Cd, 0-4 Ag, 0-8 Sn, 0-43 Cr, 0-23 Zn, 0-5 Sb
For light alloy parts.

M C C
English, 10 Cu, 1.3 Mg, 2.0 Ni, 0.5 Fe, 0.5 Si, 2.5 Cr, bal Al
For pistons, self aging

McFARLAND & HARDER ALLOY "A"
10 Cr, 48 Ni, 43 Cu
For heat and corrosion resistant parts, stainless and corrosion resistant

McFARLAND & HARDER ALLOY "B"
16 Cr, 29 Ni, 55 Cu.
For heat and corrosion resistant parts, stainless and corrosion resistant

McFARLAND & HARDER ALLOY "C."
30 Cr, 59 Ni, 11 Cu
For heat and corrosion resistant parts; stainless and corrosion resistant

McFARLAND & HARDER ALLOY "D"
43 Cr, 46 Ni, 11 Cu
For heat and corrosion resistant parts; stainless and corrosion resistant

McFARLAND & HARDER ALLOYS.
59-29 Ni, 11-55 Cu, 10-43 Cr.
For corrosion and heat resistant parts; stainless and corrosion resistant.

MC GILL NO 1.
M-181, 10 Al, 1 Fe, bal Cu.
For pump liners, gears, castings; corrosion resisting.

MC GILL NO. 2.
M-181; Si, bal Fe.
95,000 TS; 160 Brin.
For machinery parts; corrosion and abrasion resistant.

MC GILL NO. 3.
M-181; 10 Sn, 0.5 Zn, 2 Pb, bal Cu.
For hydraulic pressure castings.

McGILL NO. 4.
M-181; 67-62 Cu, 38-41 Zn, 1.5 Pb, 0.8 Sn.
For hardware; free cutting.

MC GILL BRASS PRESSURE CASTING ALLOY.
M-181; 57-62 Cu, 38-41 Zn, 0.5 Sn, 1.5 Pb.
60,000 TS; 30,000 YS; 20 El.
For pressure die castings; structural parts; tough.

MC GILL METAL.
M-181; 89 Cu, 9 Al, 2 Fe.
70,000-80,000 TS; 30,000-40,000 YS; 20-10 El; 180 Brin.
For gears, bushings, bearings; resists corrosion and wear.

M-CHROME.
M-73; 1.0 C, 1.5 Cr, bal Fe.
For tools, dies, gauges; deep hardening.

McINNES FOLDER DIE.
M-81; 0.90-1.05 C, 0.25-0.35 Mn, bal Fe.
Heat treated: 190,000 TS; 120,000 YS; 10 El; 30 RA; 380 Brin.
For brake dies, forming dies; water or oil hardened.

MC INNES HC-HC.
M-81; 2 C, 13 Cr, 1 V, bal Fe
For dies, punches, reamers, gauges; very tough.

McINNES HIGH CARBON HIGH CHROME.
M-81; 2.1 C, 13 Cr, 1 V, 0.5 Ni, bal Fe.
For broaches, drawing dies; oil or air hardening.

McINNES MACHINE.
M-81, 0.35-0.45 C, 0.4 Mn, 0.3 Si, bal Fe.
Hot rolled: 90,000 TS; 58,000 YS; 27 El; 50 RA; 200 Brin.
For spindles, lead screws, piston rods, gears; water hardened.

McINNES RECORD A.
M-81; 0.3-0.5 C, 12-14 W, 2-4 Cr, 1 V, bal Fe.
For piercers, punches, heading and trimming dies; hot work steel, oil hardened

McINNES SPECIAL Cr-Ni STEEL.
M-81; 0.5 Cr, 1.5 Ni, 0.6 Mn, 0.7 C, bal Fe
For hot work tools, bolt heading and forming dies, gripper dies, shear blades, hot punching dies; heat resisting, high strength and toughness.

McINNES SPECIAL TOOL STEEL.
M-81; 0.95-1.10 C, bal Fe
For hard wearing surface and extreme depth hardness; deep hardening

McINNES VANADIUM CRUCIBLE.
M-81; 0.75-1.0 C, 0.3 Mn, 0.2 V, bal Fe.
For cold forming dies, punches, chisels, shear blades, dies, rivet sets; water hardening.

McK-ALLOY.
M-849; 0.20 C, 0.5 Ni, 0.5 Cr, 0.2 Mo, bal Fe.
125,000 TS; 15 El; 260 Brin.
For chains.

McKAY 15-60
M-849; 0.20 C, 1.60 Mn, 0.35 Si, 14.3 Cr, 61.0 Ni, bal Fe.
Bare wire for welding

McKAY 16-8-2.
M-849; 0.06 C, 1.80 Mn, 0.25 Si, 15.8 Cr, 8.2 Ni, 1.6 Mo, bal Fe.
Bare wire for welding.

McKAY 16-8-2.
M-849; Coated stainless steel weld rod.
Typical deposit analysis: 0.08 C, 2.25 Mn, 0.35 Si, 15.3 Cr, 8.2 Ni, 1.5 Mo.
Welded: 94,000 TS; 70,500 YS; 40 El.
For welding Types 316, 317 & 347 stainless steels for high temperature operation.
AWS E 16-8-2; ASTM A298.

McKAY 16-25-6.
M-849; 0.12 max C, 15-17 Cr, 24-27 Ni, 5.5-7.0 Mo, bal Fe.
Welded: 95,000 TS; 65,000 YS; 43 El.
For welding electrodes; shielded arc, high heat resistant.

McKAY 17-4 PH.
M-849; 0.04 C, 0.60 Mn, 0.50 Si, 16.7 Cr, 4.5 Ni, 0.40 Cb, 3.5 Cu, bal Fe.
Bare wire for welding

McKAY 17-4 PH.
M-849; Coated stainless steel weld rod
Typical deposit analysis: 0.035 C, 0.48 Mn, 0.40 Si, 16.35 Cr, 4.9 Ni, 0.24 Cb, 3.6 Cu.
Weld metal strength depends on heat treatment.
AMS 5827.

McKAY 17-7 PH
M-849, 0.07 C, 0.80 Mn, 0.70 Si, 17.0 Cr, 7.2 Ni, 1.0 Al, bal Fe
Bare wire for welding

McKAY 17-14 Cu Mo
M-849; 0.12 C, 1.40 Mn, 0.40 Si, 16.1 Cr, 14.4 Ni, 2.4 Mo, 0.75 Cb, 3.0 Cu, bal Fe
Bare wire for welding.

McKAY 18-8 Mo-ELC.
M-849; 0.038 max C, 17-19 Cr, 12-14 Ni, 2.5 Mo, bal Fe.
Weld· 80,000 TS, 55,000 YS; 40 El.
For welding rod, shielded arc

McKAY 20 (320).
M-849; 0.05 C, 1.25 Mn, 0.35 Si, 20.5 Cr, 33.5 Ni, 2.5 Mo, 0.75 Cb, 3.4 Cu, bal Fe.
Bare wire for welding

McKAY 20-80
M-849, 0.1 max C, 18.0-19.5 Cr, 1.3 max Si, bal Ni.
For welding electrodes; Nichrome V; shielded arc, heat resistant

McKAY 308
M-849; Coated stainless steel weld rod.
Typical deposit analysis. 0.06 C, 1.8 Mn, 0.50 Si, 19.8 Cr, 10.0 Ni.
Welded: 86,000 TS, 62,000 YS; 45 El.
For welding or build-up on austenitic 18-8 stainless steel AWS E308.

McKAY 308 HC.
M-849; Coated stainless steel weld rod.
Typical deposit analysis: 0.09 C, 1.8 Mn, 0.50 Si, 19.5 Cr, 10.2 Ni.
Welded· 93,500 TS; 68,000 YS; 40 El.
For welding or build-up on austenitic 18-8 stainless steel.

McKAY 308 Hi Sil
M-849; 0.04 C, 1.75 Mn, 0.80 Si, 20.8 Cr, 10.0 Ni, bal Fe.
Bare wire for welding

McKAY 308 L.
M-849; 0.02 C, 1.75 Mn, 0.45 Si, 20.8 Cr, 10.0 Ni, bal Fe.
Bare wire for welding.

McKAY 308 L.
M-849; Coated stainless steel weld rod.
Typical deposit analysis: 0.030 C, 1.2 Mn, 0.50 Si, 20.0 Cr, 10.0 Ni.
Welded: 79,000 TS; 59,000 YS; 45 El.
For welding Type 308L stainless. AWS E308L.

McKAY 308 L Hi Sil.
M-849; 0.02 C, 1.75 Mn, 0.80 Si, 20.8 Cr, 10.0 Ni, bal Fe.
Bare wire for welding.

McKAY 309.
M-849; Coated stainless steel weld rod.
Typical deposit analysis: 0.09 C, 1.8 Mn, 0.45 Si, 23.8 Cr, 13.0 Ni.
Welded: 81,000 TS; 65,000 YS; 40 El.
For welding and build-up on Type 309 stainless. AWS E-309

McKAY 309 Cb
M-849; 0.06 C, 1.60 Mn, 0.40 Si, 24.5 Cr, 13.0 Ni, 0.60 Cb, bal Fe
Bare wire for welding

McKAY 309 Cb.
M-849, Coated stainless steel weld rod.
Typical deposit analysis. 0.08 C, 1.80 Mn, 0.40 Si, 23.5 Cr, 13.0 Ni, 0.85 Cb.
Welded 85,000 TS, 65,000 YS; 35 El
For welding and build-up on Type 309 stainless steel AWS E309 Cb.

McKAY 309 L
M-849, 0.021 C, 1.70 Mn, 0.40 Si, 24.0 Cr, 13.0 Ni, bal Fe
Bare wire for welding

McKAY 309 Mo
M-849, Coated stainless steel weld rod
Typical deposit analysis· 0.08 C, 1.8 Mn, 0.45 Si, 23.5 Cr, 13.0 Ni, 2.25 Mo
Welded 93,000 TS, 70,000 YS; 36 El
For improved weld strength when welding Type 309 stainless steel.

McKAY 310
M-849, Coated stainless steel weld rod
Typical deposit analysis. 0.11 C, 2.25 Mn, 0.45 Si, 26.0 Cr, 21.0 Ni.
Welded: 85,000 TS, 60,000 YS, 40 El
For welding and build-up on Type 310 and similar metals. AWS E310

McKAY 310 Cb.
M-849; Coated stainless steel weld rod.
Typical deposit analysis· 0.11 C, 2.25 Mn, 0.45 Si, 26.0 Cr, 21.0 Ni, 0.85 Cb
Welded 90,000 TS; 65,000 YS; 35 El.
Improved quality welds in Type 310 stainless steel. AWS 310 Cb.

McKAY 310 Mo.
M-849; Coated stainless steel weld rod
Typical deposit analysis· 0.11 C, 2.25 Mn, 0.45 Si, 26.0 Cr, 21.0 Ni, 2.25 Mo
Welded. 90,000 TS, 60,000 YS, 40 El.
Improved quality welds in Type 310 stainless steel. AWS E310 Mo

McKAY 312
M-849; 0.10 C, 1.60 Mn, 0.40 Si, 30.0 Cr, 9.0 Ni, bal Fe.
Bare wire for welding. AMS 5784.

McKAY 312.
M-849; Coated stainless steel weld rod.
Typical deposit analysis: 0.12 C, 1.70 Mn, 0.60 Si, 29.0 Cr, 9.0 Ni.
Welded: 112,000 TS; 90,000 YS; 32 El.
For welding Type 312 materials and some dissimilar metal joining AWS E312.

McKAY 312 Mo.
M-849; Coated stainless steel weld rod.
Typical deposit analysis: 0.12 C, 1.7 Mn, 0.60 Si, 29.0 Cr, 9.5 Ni, 2.0 Mo.
Welded: 120,000 TS; 95,000 YS; 29 El.
Improved weld quality on Type 312 stainless steel.

McKAY 316.
M-849; Coated stainless steel weld rod.
Typical deposit analysis: 0.06 C; 2.25 Mn, 0.38 Si, 18.0 Cr, 13.0 Ni, 2.15 Mo.
Welded: 80,000 TS; 68,000 YS; 45 El.
For welding Type 316 stainless steel. AWS 316.

McKAY 316 L.
M-849; Coated stainless steel weld rod
Typical deposit analysis· 0.030 C, 2.1 Mn, 0.38 Si, 18.0 Cr, 13.0 Ni, 2.15 Mo
Welded. 78,000 TS; 60,000 YS; 40 El.
For welding Type 316L stainless steel. AWS E316L.

McKAY 316 L Hi Sil.
M-849; 0.020 C, 1.75 Mn, 0.85 Si, 19.0 Cr, 13.0 Ni, 2.3 Mo, bal Fe
Bare wire for welding

McKAY 317
M-849, Coated stainless steel weld rod.
Typical deposit analysis 0.06 C, 2.0 Mn, 0.40 Si, 18.5 Cr, 13.3 Ni, 3.65 Mo
Welded. 95,000 TS, 70,000 YS, 35 El.
Higher Mo improves weld quality over Type 316. AWS E317

McKAY 317 L.
M-849, 0.020 C, 1.75 Mn, 0.45 Si, 19.3 Cr, 14.0 Ni, 3.6 Mo, bal Fe
Bare wire for welding

McKAY 317 L
M-849, Coated stainless steel weld rod.
Typical deposit analysis: 0.035 C, 2.0 Mn, 0.40 Si, 18.5 Cr, 13.3 Ni, 3.65 Mo.
Welded 95,000 TS, 70,000 YS; 33 El
For welding types 316, 316L, 317, 317L stainless steel

McKAY 318
M-849; Coated stainless steel weld rod
Typical deposit analysis 0.05 C, 1.75 Mn, 0.40 Si 19.5 Cr, 12.5 Ni, 2.3 Mo, 0.55 Cb
Welded 85,000 TS, 65,000 YS; 35 El
Use similar to 316 but Cb addition improves weld quality AWS E318

McKAY 330
M-849, 0.20 C, 1.75 Mn, 0.35 Si, 16.0 Cr, 35.0 Ni, bal Fe
Bare wire for welding

McKAY 330
M-849; Coated stainless steel weld rod
Typical deposit analysis· 0.20 C, 2.25 Mn, 0.50 Si, 14.5 Cr, 34.0 Ni
Welded: 86,000 TS; 58,000 YS, 40 El
For welding Type 330 stainless steel for heat and creep resisting applications. AWS E330.

McKAY 347.
M-849, Coated stainless steel weld rod.
Typical deposit analysis: 0.05 C, 1.8 Mn, 0.50 Si, 19.5 Cr, 10.0 Ni, 0.65 Cb.
Welded: 96,000 TS; 64,000 YS; 36 El.
For welding types 321 and 347 stainless. AWS E347.

McKAY 347 HC.
M-849; Coated stainless steel weld rod.
Typical deposit analysis: 0.09 C, 1.85 Mn, 0.45 Si, 19.5 Cr, 10.2 Ni, 0.95 Cb.
Welded: 90,500 TS; 72,500 YS; 36 El.
For welding types 321 and 347 for elevated temperature operation MIL-E-22200/2.

McKAY 349.
M-849; 0.09 C, 1.50 Mn, 0.35 Si, 20.5 Cr, 8.5 Ni, 0.50 Mo, 1.25 Cb, 1.50 W, 0.20 Ti, bal Fe.
Bare wire for welding; AMS 5782

McKAY 349
M-849; Coated stainless steel weld rod.
Typical deposit analysis: 0.10 C, 1.75 Mn, 0.25 Si, 19.5 Cr, 9.0 Ni, 0.50 Mo, 1.0 Cb, 1.5 W, 0.10 Ti.
Welded. 110,000 TS; 84,000 YS, 30 El
For welds for high temperature applications such as the jet-aircraft industry. AWS E349.

McKAY 350.
M-849; 0.10 C, 0.80 Mn, 0.35 Si, 17.25 Cr, 4.5 Ni, 2.9 Mo, 0.08 N, bal Fe.
Bare wire for welding.

McKAY 360
M-849; Coated stainless alloy weld rod.
Typical deposit analysis: 0.20 C, 1.25 Mn, 0.50 Si, 15.0 Cr, 61.5 Ni
For welding Nichrome type alloys for high temperature service MIL-E-17496.

McKAY 380.
M-849; Coated stainless alloy weld rod.
Typical deposit analysis: 0.12, 0.40 Mn, 0.50 Si, 19.0 Cr, 79.0 Ni
For welding 80 Ni-20 Cr type alloys for high temperature applications (Nichrome V) MIL-E-6844A.

McKAY 410.
M-849; Coated stainless steel weld rod.
Typical deposit analysis: 0.08 C, 0.50 Mn, 0.45 Si, 12.0 Cr.
Welded, stress rel. at 1350°F. 77,000 TS, 58,000 YS; 34 El.
For welding type 410 stainless steel, weld and base metal hardenable. AWS E410

McKAY 430
M-849, Coated stainless steel weld rod.
Typical deposit analysis. 0.08 C, 0.50 Mn, 0.60 Si, 15.5 Cr.
Welded, stress rel 1400°F: 85,000 TS; 60,000 YS; 28 El
For welding Type 430 and other 16% Cr materials

McKAY 442.
M-849, Coated stainless steel weld rod
Typical deposit analysis: 0.08 C, 0.60 Mn, 0.40 Si, 19.50 Cr.
Welded, stress rel 1400°F 79,000 TS, 57,000 YS; 27 El.
For welding 18% chromium materials.

McKAY 446.
M-849; Coated stainless steel weld rod.
Typical deposit analysis: 0.10 C, 0.75 Mn, 0.60 Si, 27.0 Cr.
Welded: 90,000 TS, 65,000 YS, 8 El
For welding 28% chromium materials.

McKAY 502.
M-849; Coated stainless steel weld rod
Typical deposit analysis 0.07 C, 0.55 Mn, 0.38 Si, 5.25 Cr, 0.50 Mo.
Welded, stress rel. 1350°F: 75,000 TS; 50,000 YS; 30 El.
For welded assemblies subject to high temperature conditions, AWS E502.

McKAY 502-18.
M-849; Low carbon chrome alloy, coated weld rod.
Typical deposit analysis: 0.06 C, 0.60 Mn, 0.60 Si, 5.25 Cr, 0.50 Mo.
Welded and stress relieved at 1350°F: 100,000 TS; 88,000 YS; 23 El
For welding Cr-Mo steels for elevated service conditions AWS E502.

McKAY 505-18.
M-849, Low carbon chrome alloy, coated weld rod
Typical deposit analysis 0.06 C, 0.55 Mn, 0.50 Si, 9.25 Cr, 1.05 Mo
Welded and stress relieved at 1575°F 71,000 TS; 47,500 YS, 40 El.
For welding Cr-Mo steels for high temperature service conditions; AWS 505-18

McKAY 6010
M-849, Low C, bal Fe, Weld rod, DC.
Welded. 68,000 TS; 58,000 YS; 26 El.
For mild steel welding AWS E6010

McKAY 6010 IP
M-849, Low C, bal Fe, Iron powder modified E6010 electrode For DC welding.
Welded· 69,000 TS, 58,000 YS, 30 El
For mild steel welding AWS E6010

McKAY 6011
M-849; Low C, bal Fe, weld rod, AC
Welded 67,000 TS, 58,000 YS, 29 El
For welding mild steel AWS E6011

McKAY 6011 IP
M-849, Low C, bal Fe, Iron powder modified E6011 electrode For AC welding
Welded 69,000 TS, 61,000 YS, 30 El
For mild steel welding, AWS E6011

McKAY 6012
M-849, Low C, bal Fe, Weld rod.
Welded 72,000 TS, 60,000 YS, 20 El
For general purpose low carbon steel welding, particularly for DC with poor fit-up
AWS E6012

McKAY 6013
M-849, Low C, bal Fe, weld rod
Welded 82,000 TS; 73,000 YS; 20 El
General purpose welding low carbon steel, AC or DC, AWS E6013

McKAY 6020
M-849, Low C, bal Fe, Weld rod
Welded· 70,000 TS, 62,000 YS; 27 El
AC or DC welding of heavy plate AWS E6020

McKAY 7014
M-849, Low C, bal Fe, weld rod
Welded 71,000 TS, 64,000 YS, 26 El
General purpose iron powder electrode AWS E7014

McKAY 7018
M-849, Mild steel weld rod
Typical deposit analysis· 0.06 C, 1.05 Mn, 0.65 Si
Welded· 78,000 TS, 70,000 YS, 32 El.
For mild steel welding, AC or DC. AWS E7018.

McKAY 7018-Al.
M-849, Mild steel weld rod.
Typical deposit analysis 0.07 C, 0.75 Mn, 0.60 Si, 0.50 Mo.
Welded· 84,000 TS; 69,000 YS; 30 El.
For welding carbon-molybdenum high temperature piping AWS E7018-Al

McKAY 7018-HC.
M-849; Higher carbon mild steel electrode
Typical deposit analysis: 0.21 C; 1.0 Mn, 0.60 Si.
Welded: 88,250 TS; 74,750 YS; 30 El.

McKAY 7024.
M-849; Mild steel weld rod.
Welded: 87,000 TS; 76,500 YS; 18 El
For horizonetal or flat fillet welds. AWS E7024.

McKAY 8016-C3.
M-849; Low carbon, low alloy weld rod
Typical deposit analysis. 0.09 C, 0.85 Mn, 0.40 Si, 0.95 Ni.
Welded· 91,000 TS; 77,000 YS; 27 El.
For welding 1% nickel alloy steels for low temperature service AWS E8016-C3.

McKAY 8018-B2.
M-849, Low C, alloy steel weld rod.
Typical deposit analysis 0.045 C, 0.70 Mn, 0.60 Si, 1.25 Cr, 0.50 Mo
Welded· 99,500 TS, 83,500 YS, 26 El
Primarily for welding chromium molybdenum piping; AWS E8018 B2.

McKAY 8018 C1
M-849, Low C, nickel alloy steel weld rod
Typical deposit analysis 0.05 C, 0.80 Mn, 0.45 Si, 2.50 Ni.
Welded 84,000 TS, 71,000 YS; 32 El
For welding 2½% nickel steels AWS E8018-C1

McKAY 8018-C2
M-849, Low C, nickel alloy steel weld rod
Typical deposit analysis. 0.055 C, 0.80 Mn, 0.45 Si, 3.20 Ni
Welded 91,000 TS, 75,000 YS, 29 El
For welding 3½% nickel steels AWS E8018-C2

McKAY 8018-C3
M-849, Low C, low alloy steel weld rod
Typical deposit analysis 0.55 C, 0.80 Mn, 0.45 Si, 1.0 Ni
Welded 83,000 TS, 70,000 YS, 32 El
For welding low alloy, high strength steels requiring tough welds for sub-zero operation
AWS L8018-C3

McKAY 8018-G.
M-849, Low C, low alloy steel weld rod
Typical deposit analysis. 0.085 C, 1.3 Mn, 0.60 Si
Welded 86,200 TS, 73,250 YS, 32 El
For welding low alloy steels in the 80,000-85,000 tensile range AWS 8018-G

McKAY 9018
M-849, Low carbon alloy steel weld rod
Typical deposit analysis 0.07 C, 1.0 Mn, 0.40 Si, 1.6 Ni, 0.15 Mo
Welded· 94,000 TS, 84,000 YS, 29 El.
For welding low alloy high strength steels in the 90,000 tensile strength range
For MIL 9018 military requirements
AWS E9018-M

McKAY 9018-B3.
M-849; Low carbon alloy steel weld rod
Typical deposit analysis 0.045 C, 0.70 Mn, 0.60 Si, 2.25 Cr, 1.05 Mo
Welded 124,500 TS, 96,000 YS, 22 El.
Use for welding Cr-Mo piping of similar composition.
AWS E9018-B3.

McKAY 10016.
M-849; Low carbon alloy steel weld rod.
Typical deposit analysis: 0.09 C, 0.90 Mn, 0.45 Si, 1.75 Ni, 0.30 Mo, 0.08 V.
Welded: 108,000 TS; 99,000 YS; 23 El.
For welding low alloy, high strength steels in the 100,000 psi tensile strength range.
AWS E10016-G.

McKAY 10018
M-849; Low carbon alloy weld rod.
Typical deposit analysis: 0.06 C, 1.05 Mn, 0.45 Si, 0.12 Cr, 1.55 Ni, 0.25 Mo.
Welded: 104,000 TS; 95,000 YS; 24 El.
For welding low alloy, high strength steels in the 100,000 psi tensile strength range. For MIL 10018 military requirements AWS E10018-M.

McKAY 10018-D2
M-849, Low carbon alloy steel weld rod.
Typical deposit analysis. 0.11 C, 1.85 Mn, 0.45 Si, 0.35 Mo
Welded 110,000 TS, 98,000 YS; 26 El
For welding low alloy, high strength steels in the 100,000 psi tensile strength range
AWS E10018-D2

McKAY 11016
M-849, Low carbon alloy steel weld rod
Typical deposit analysis. 0.08 C, 1.25 Mn, 0.45 Si, 1.20 Cr, 2.0 Ni, 0.30 Mo.
Welded 117,000 TS, 106,000 YS, 23 El.
For welding low alloy, high strength steels in the 110,000 psi tensile strength range
AWS E11016-G.

McKAY 11018
M-849; Low carbon alloy steel weld rod.
Typical deposit analysis 0.05 C, 1.6 Mn, 0.40 Si, 1.6 Ni, 0.4 Mo
Welded 115,000 TS, 104,000 YS, 24 El.
For welding low alloy, high strength steels in the 110,000 psi tensile strength range.
AWS E11018-M

McKAY 12018
M-849, Low carbon alloy steel weld rod
Typical deposit analysis 0.05 C, 1.70 Mn, 0.45 Si, 0.35 Cr, 2.0 Ni, 0.45 Mo.
Welded 130,000 TS, 117,000 YS, 22 El
For welding low alloy high strength steel in the 120,000 psi tensile strength range.
For MIL 12018 military requirements
AWS E12018-M

McKAY 13018
M 849, Low carbon alloy steel weld rod
Typical deposit analysis 0.085 C, 1.63 Mn, 0.42 Si, 0.73 Cr, 1.64 Ni, 0.24 Mo
Welded 134,000 TS, 124,000 YS, 21 El.
For welding high yield strength steels

McKAY 14018
M-849, Low carbon alloy steel weld rod
Typical deposit analysis 0.08 C, 1.0 Mn, 0.40 Si, 0.50 Cr, 3.50 Ni, 0.75 Mo.
Welded 147,000 TS, 141,000 YS, 18 El
For welding high yield strength steels.

McKAY AM 363
M-849, 0.03 C, 0.30 Mn, 0.24 Si, 11.5 Cr, 4.2 Ni, 0.40 Al, 0.05 Co, bal Fe.
Bare wire for welding

McKAY AM 363.
M-849, Coated stainless steel weld rod
Typical deposit analysis· 0.075 C, 0.25 Mn, 0.40 Si, 11.8 Cr, 4.4 Ni, 0.5 Ti
Welded· 135,000 TS; 130,000 YS; 10 El.
For welding AM 363 material and for repair of large type 410 castings.

McKAY ARMORLOY A-8.
M-849; Stainless steel weld rod.
Typical deposit analysis: 0.10 C, 4.3 Mn, 0.45 Si, 19.3 Cr, 9.9 Ni.
Welded: 90,000 TS; 67,000 YS; 44 El.
For welding armor plate, dissimilar metals, and "difficult-to-weld" steel; Weld metal has excellent toughness and crack resistance.
MIL-E-13080; U.S. Army 57-203-3 Grade V.

McKAY ARMORLOY A-9.
M-849; Stainless steel weld rod.
Typical deposit analysis: 0.11 C, 1.9 Mn, 0.60 Si, 18.9 Cr, 9.4 Ni, 2.2 Mo.
Welded: 100,000 TS; 73,000 YS; 37 El.
For welding armor plate, dissimilar metals and "difficult-to-weld" steels; Weld metal has excellent toughness and crack resistance.
U.S. Army 57-203-3 Grade VI.

McKAY BARE STAINLESS STEEL WELD WIRE.
M-849; 12 grades conforming to AISI
Specs: 308, 309, 310, 316, 316L, 321, 347-348, 410, 430, 442, 446 and 502.
(Non-AISI grades have individual listing).

McKAY CHROME MANG
M-849; Hard facing electrode, AC or DC.
For joining or build-up; deposit has strength of about 141,000 psi TS, is work hardenable, and crack resistant. For shovel tracks, jaw crusher plates.

McKAY FROGALLOY M & C.
M-849; Hard facing electrode; DC reverse
For build-up and hard facing; deposit is high carbon, high strength austenitic stainless; for surfacing bucket teeth, railroad frogs and switches

McKAY HARDALLOY 1.
M-849; Non-ferrous Co-Cr-W hard facing electrode.
For deposits to resist heat and corrosion as turbine valves, steam valves.

McKAY HARDALLOY 6.
M-849; Cobalt base hard facing electrode.
For build-up; deposits have high resistance to thermal shock and impact; for gasoline exhaust valves, shear blades, needle valves

McKAY HARDALLOY 32.
M-849; Hard surfacing electrode, AC or DC.
For build up carbon steel and cast iron; hardness 17-30 Rock C; machinable.

McKAY HARDALLOY 40 TiC
M-849; Hard surfacing electrode, AC or DC.
Titanium bearing, for building up hard surface on carbon steels and also austenitic manganese steels for hardness 45-50 Rock C Not machinable;
For dipper teeth, screw conveyors, hammer mill hammers.

McKAY HARDALLOY 44.
M-849; Hard surfacing electrode, coated rod
For overlaying carbon steel and austenite manganese steel for wear resistant surface.
Work hardens to 40-55 Rock C; for crusher screens, dredge pump impellers.

McKAY HARDALLOY 48.
M-849; Hard surfacing electrode.
For overlaying carbon steel with wear resistant surface of 38-40 Rock C; for shafts, dies, friction clutches, sand chutes, conveyor screws.

McKAY HARDALLOY 52.
M-849; Hard surfacing electrode, AC or DC.
For overlaying carbon steel with hard, impact resisting surface up to 57-62 Rock C.
For gear teeth, roll ends, mine car wheels, mine rails, cams.

McKAY HARDALLOY 55, 55G.
M-849; Hard surfacing electrode, AC or DC.
For overlaying carbon steel or austenitic manganese steel with hard surface up to 55 Rock C, resistant to gouging type of wear.
For bucket teeth, pusher shoes, muller tires, mower shoes, plow shares.

McKAY HARDALLOY 55 TiC.
M-849, Hard surfacing electrode
For overlaying carbon steel and austenitic manganese steel with hard surface with extreme resistance to abrasion
For crusher rolls, brick dies, coke pusher shoes, and scraper blades.

McKAY HARDALLOY 58
M-849; Hard surfacing electrode, AC or DC.
For overlaying carbon steel with hard (55-60 Rock C) surface to resist abrasion and impact.
For drag line bucket tips, dipper lips, crane hooks, coupling boxes and spindles

McKAY HARDALLOY 58 TiC
M-849, Hard surfacing electrode.
For over laying carbon steel with hard (59-61 Rock C) surface for resistance to severe abrasion and impact
For cement conveyor screws, augers, scraper blades

McKAY HARDALLOY 61
M-849; Hard surfacing electrode.
For depositing hardenable (up to 61 Rock C) alloy on steel for wear and abrasion resistance up to 1000°F.
For mandrels, shear blades, scraper knives, shaper and planer tools AWS-E Fe5-B

McKAY HARDALLOY 118
M-849; Hard surfacing electrode.
For depositing austenitic manganese steel on carbon and manganese steel
For crusher rolls, dipper teeth, railroad frogs and crossovers, work hardens rapidly

McKAY HARDALLOY 120.
M-849; Welding electrode, AC & DC.
For joining dissimilar metals and hard-to-weld steels; and for build-up Deposits have good corrosion resistance and strength of about 125,000 psi TS

McKAY IN-FLUX STEEL TUBULAR WELDING WIRES
M-849; 7 grades for inert gas welding; MIG. 308 L-G, 309 L-G, 316 L-G, 347-G, 309-G, 310-G, 430-G See similar AISI numbers for compositions
Note: Suffix "S" in place of "G" are designed for submerged arc.

McKAY MON-ALLOY.
M-849; Monel base weld rod.
Typical deposit analysis: 0.12 C, 1.8 Mn, 0.8 Si, 65.0 Ni, 1.8 Fe, bal Cu.
Welded: 96,000 TS, 49,000 YS; 37 El; 150 Brin.
For welding Monel and Ni-Cu alloys to steel, or for surfacing steel. AWS E NiCu-1.

McKAY N-155.
M-849; 0.1-0.2 C, 20-22 Cr, 19-21 Ni, 0.75-1.25 Cb, 2.75-3.75 Mo, 2-3 W, 0.1-0.2 N, 18.5-21.0 Co.
Welded: 106,000 TS; 75,000 YS; 24 El.

For welding electrodes for high temperature service; shielded arc, high heat resistant.

McKAY NICKALLOY.
M-849; Pure nickel weld rod.
Welded: 45,000 TS; 2 El.
For machinable welds on cast iron.
AWS E Ni-C1.

McKAY NICKALLOY 60
M-849; Nickel-Iron weld rod.
Typical deposit analysis: 59 Ni, 41 Fe.
Welded: 77,000 TS; 61,000 YS; 8 El.
For machinable welds on cast iron.
AWS E NiFe-C1.

McKAY NICKEL MANGANESE.
M-849; Hard facing electrode, DC reverse.
For build-up on carbon steels or manganese austenitic steels where severe impact is expected For railroad car castings, crusher screens, railroad frogs and switches.

McKAY PLURALLOY 70 AC.
M-849; Mild steel weld rod.
Typical deposit analysis· 0.08 C, 0 80 Mn, 0.30 Si.
Welded 78,000 TS, 71,000 YS; 32 El.
For welding mild steel and free machining steel.
AWS E7016.

McKAY STAINLESS 20.
M-849, Coated stainless steel weld rod
Typical deposit analysis: 0 06 C, 1 75 Mn, 0 60 Si, 19 5 Cr, 33 0 Ni, 2.2 Mo, 0.65 Cb, 3.3 Cu.
Welded 84,000 TS, 54,000 YS; 39 El.
For fabricating Carpenter 20 stainless steel
AWS E320.

McKAY TOOL-ALLOY "822."
M-849; Coated Ni-C alloy steel electrode, AC or DC
For build-up or repair of forming and drawing dies, large drive gears.

McKAY TOOL-ALLOY "A"
M-849, Air hardening weld rod and wire
Typical weld metal comp (rod), 0 85 C, 1 0 Mn, 0.5 Si, 5 2 Cr, 1 5 Mo, 0.35 V. (deposit from wire is slightly different)
For repair and build-up air hardening tools and dies.

McKAY TOOL-ALLOY "FH-30"
M-849; Coated steel electrodes, AC or DC.
As welded hardness: 34 Rc, flame hardenable to 53 Rc
For repair of plastic molds, SAE 4130, 6145 steel casting and for build-up of soft material

McKAY TOOL-ALLOY "FH-45."
M-849; Coated steel electrodes, AC or DC.
As welded hardness; 44 Rc, flame hardenable to 60 Rc.
For repair of plastic molds, build-up and surface harden of softer material.

McKAY TOOL-ALLOY "GP."
M-849; Coated stainless steel electrode.
As welded: 120,000 TS; 90,000 YS, 27 El.
For welding, build-up or repair of many types of dies or tools.

McKAY TOOL-ALLOY "HS."
M-849; High speed steel rod and wire.
Typical weld metal comp. (rod): 0 65 C, 0.8 Mn, 0 45 Si, 3.95 Cr, 8.75 Mo, 0.9 V, 1.8 W. (deposit from wire is slightly different).
For repair and build-up of parts made of AISI M1 tool steel, or to deposit such material on carbon steel parts.

McKAY TOOL-ALLOY "HW."
M-849; Alloy steel welding rod and wire.
Typical weld metal comp. (rod); 0.30 C, 0.5 Mn, 0.5 Si, 4.75 Cr, 1.75 Mo, 0.25 V, 1.3 W (deposit from wire is slightly different).
For repair and build-up of AISI H-12 and similar hot work tool and die materials.

McKAY TOOL-ALLOY "HW-2."
M-849; Alloy steel coated electrode for DC reverse; and bare wire for TIG and MIG welding.
For repair or build-up of various hot-work tool steel dies or tools.

McKAY TOOL-ALLOY "HW-2FC."
M-849, Flux cored open arc wire.
For repair or build-up of various hot-work tool steel dies or tools.

McKAY TOOL-ALLOY "O."
M-849, Oil hardening weld rod and wire.
Typical weld metal comp (rod)· 0.65 C, 1.12 Mn, 0 4 Si, 1 35 Cr, 1 12 Mo, 0 5 W, 0.35 V (wire is slightly different).
For repair and build-up of oil-hardening tools and dies.

McKAY TOOL-ALLOY "W."
M-849; Water hardening weld rod and wire.
Typical weld metal comp (rod): 0.8 C, 0.6 Mn, 0 45 Si, 0.4 Cr, 0.4 Mo, 0.28 V. (wire is slightly different)
For repair and build-up of water-hardening tools and dies

McKAY TOOL-FAB.
M-849, Low alloy coated electrode.
As welded 96,000 TS; 85,500 YS, 30 El
For repairing broken or cracked tool steel dies and for build-up

McKAY TOOL-FORGE
M-849, Cr-Mo-V steel flux cored wire.
For repairing sow blocks, rams, etc ; as welded hardness 35-45 Rock C

McKAY TOOL-MAR "300"
M-849, Ni-Co-Mo-Fe bare wire for TIG welding or build-up of maraging steel, or of H11, H12, H13 hot work tool steels.

McKAY TUBE-ALLOY 218-O
M-849, low phos austenitic manganese 19.5% alloy steel wire
For work-hardenable build-up and surfacing of shovel teeth, crusher jaws, breaker bars, railroad frogs

McKAY TUBE-ALLOY 218-S.
M-849, Low phos austenitic manganese 19 5% alloy steel wire.
For work-hardenable build-up and surfacing of shovel buckets, crusher rolls, hammer mill hammers, railroad frogs and switches

McKAY TUBE-ALLOY 219-O
M-849, C-Cr austenitic manganese steel; total alloy content over 26%
For welding or hard facing as on drag line teeth or dredge pump shells.

McKAY TUBE-ALLOY 236-S.
M-849; 5 Ni, 5 Mo, hard facing wire.
For build-up and hard facing carbon steels.

McKAY TUBE-ALLOY 240-O.
M-849; High chromium cast iron alloy wire.
For weld or build-up of hammer mill hammers, shovel teeth, grader blades.

McKAY TUBE-ALLOY 240 TiC-O.
M-849; High chromium cast iron alloy wire. Contains TiC; for hard facing hammer mill hammers, crusher rolls.

McKAY TUBE-ALLOY 242-O.
M-849; Low carbon, 5% alloy wire.
For hard surfacing tractor rollers and idlers, mine car wheels, crane wheels

McKAY TUBE-ALLOY 242-S.
M-849; Low carbon, 5% alloy wire.
For hard surfacing crane wheels, mine car wheels, steel shafts.

McKAY TUBE-ALLOY 244-O.
M-849; High carbon, chromium, 10.5% alloy wire; for hard facing and reclamation of dredge pump shell. Will stand moderate to heavy impact

McKAY TUBE-ALLOY 250-S
M-849, 13.5% Cr-C alloy steel wire.
For heat treatable surfacing of crane wheels, coiler rolls, plungers, pinch rolls

McKAY TUBE-ALLOY 252-O.
M-849, 6.5% alloy steel hard-facing wire.
For surfacing tractor track rollers and idlers, shovel rollers, brake drums, ditcher rolls, mine car wheels

McKAY TUBE-ALLOY 252-S
M-849; 6.5% alloy steel hard-facing wire
For surfacing skip and crane wheels, charging car wheels, brake drums, tractor rollers and idlers

McKAY TUBE-ALLOY 255-O.
M-849; High carbon chrome cast iron 34% alloy hard facing wire
For surfacing dredge pump impellers, dredge cutters, bucket teeth and lips, non-machinable

McKAY TUBE-ALLOY 258-O
M-849, Cr-Mo-W heat treatable 11.5% alloy steel wire
For hard surfacing pinch rolls, scrap press plungers, table rolls, cable sheaves

McKAY TUBE-ALLOY 258-S.
M-849, Cr-Mo-W heat treatable 11.5% alloy steel wire.
For hard surfacing dredge ladder rolls, blocker rolls, cable sheaves.

McKAY TUBE-ALLOY 258 TiC-O
M-849, 17% Cr-C alloy with 11% TiC (by volume) wire
For hard surfacing augers, dredge pump parts, bucket teeth and lips, fan blades

McKAY TUBE-ALLOY 828-S
M-849, Medium carbon 3.5% alloy steel wire.
For medium hardness deposits on gears, sheaves, steel shafting, conveyor rolls

McKAY TUBE-ALLOY 829-O.
M-849; 18% Hadfield manganese alloy with 10% TiC (by volume) wire
For non-machinable, work-hardening deposits of high wear resistance, for bucket lips and teeth, breaker bars, shovel pads.

McKAY TUBE-ALLOY AP-O.
M-849; High strength Cr-Mn work-hardenable austenitic stainless steel wire
For surfacing rail frogs and crossovers, shovel buckets, shovel teeth, impeller bars.

McKAY TUBE-ALLOY BU-O.
M-849; Low carbon, 3% alloy steel wire.
For build-up on weldable steels as on tractor rails, rollers and idlers, cable drums, gears, mixer blades, rail ends.

McKAY TUBE-ALLOY BU-S
M-849; Low carbon, 3% alloy steel wire.
For build up on weldable steels, as on cable drums, steel shafts, trunnions, gears, mixer blades, rail ends

McKECHNIE'S BRONZE.
Eng; 57 Cu, 41 Zn, 1 Sn, 0.5 Pb, 1 Fe
For rods, nuts, bolts; high strength

MC KENNA K4
M-793; WC + CO
For tools, cutters; for cutting cast iron, glass, porcelain.

McKINNEY ALLOYS
Eng, 95-97 Al, 2-3 Cu, 1-2 Mn.
For light alloy parts exposed to sea water, resists sea water corrosion

McLOUTH ML-50
M-1592, 0.13 C, 0.48 Mn, 0.01 P, 0.015 S, 0.17 Si, 0.01 Cb, 0.22 Cu, 0.01 Mo, 0.40 Cr, 0.61 Ni, bal Fe
Bars 70,000 min TS, 50,000 min YS; 22 El
For chutes, crane booms, derricks, dump bodies, marine parts, pressure tanks.
Good formability and weldability
Low alloy high-strength steel

McLOUTH ML-60
M-1592, 0.13 C, 0.90 Mn, 0.01 P, 0.016 S, 0.20 Si, 0.29 Cu, 0.01 Mo, 0.51 Cr, 0.68 Ni, 0.014 Cb, bal Fe
Bars. 75,000 min TS, 60,000 min YP, 22 min El
For chutes, crane booms, derricks, dump bodies, marine parts, pressure tanks.
Good formability and weldability
Low alloy high-strength steel

McLOUTH ML-70
M-1592, 0.16 C, 0.95 Mn, 0.01 P, 0.021 S, 0.17 Si, 0.30 Cu, 0.01 Mo, 0.73 Ni, 0.029 Cb, bal Fe
Bar 85,000 min TS, 70,000 min YP, 20 min El
For chutes, pressure tanks, crane booms, derricks, dump bodies, marine parts
Good formability and weldability Low-alloy high strength steel

McLOUTH ML-F
M-1592, 0.22 max C, 1.25 max Mn, 0.2 min Cu, 0.02 min V, 0.012 Cb, bal Fe
Plate 70,000 TS, 50,000 YS, 22 El
For automobile parts, buckets, chutes, dump bodies, truck frames, wheels, transmission towers, derricks
Good formability and weldability
Low alloy-high strength steel

McLOUTH-MLX
M-1592, 0.26 max C, 1.5 max Mn, 0.005 min Cb, 0.02 min V, bal Fe
Gr. 45. 60,000 TS, 45,000 YS, 22 El
Gr 50 65,000 TS, 50,000 YS, 22 El.
Gr 55. 70,000 TS; 55,000 YS, 22 El
Gr 60 75,000 TS, 60,000 YS, 20 El
For derricks, transmission towers, chutes, crane booms, buckets, dump bodies
Good formability and weldability
High strength-low alloy steel

McLURE ALLOY
Eng., 85 Al, 8.2 Cu, 5-6 Sn, 0.9 Fe, 0.3 Si, 0.2 Mn
For light alloy parts; non-hardenable.

M C MOLD AND CAVITY STEEL.
M-115; C, alloy, bal Fe
For dies and molds; deep hardening.

MECO.
50 Cu, 25 Ni, 20 Zn, 5.
For chemical equipment; corrosion resistant.

MEDAL BRONZE-1.
92 Cu, 8 Sn.
For medals, ornaments; corrosion resistant

MEDAL BRONZE-2.
95 Cu, 4 Sn, 1 Zn
For medals, ornaments, corrosion resistant.

MEDAL BRONZE-3
97 Cu, 1 Sn, 2 Zn
For medals, ornaments, corrosion resistant.

MEDAL METAL
84 Cu, 16 Zn
For medals, ornaments, corrosion resistant.

MEDIUM
M-686; 70 Ag, 20 Cu, 10 Zn.
For silversmithing solder for silver, M P. 1335-1390°F

MEDIUM HARD.
M-388; 0.90 C, bal Fe
For tools, dies, fixtures, water hardened

MEDIUM LEADED BRASS
M-33, 65 Cu, 34 Zn, 1 Pb
Annealed 47,000 TS, 15,000 YS, 60 El
Rolled 74,000 TS, 60,000 YS, 7 El
For screws, rivets, nuts, free cutting

MEDIUM LEADED BRASS-229
M 8, 64 Cu, 35 Zn, 1 Pb
Soft 45,000 TS, 17,000 YS, 57 El
Hard 73,000 TS, 60,000 YS, 8 El
For hardware, bolts; moderate cold working, free-cutting

MEDIUM LEADED BRASS-340
M-8, 64.5 Cu, 34.5 Zn, 1.0 Pb
Hard Rod 65,000 TS, 50,000 YS, 15 El; B 75 Rock
Soft Rod 46,000 TS, 17,000 YS, 60 El, B 15 Rock
For plaques hinges, gears, wheels, ratchets, pinions, valve stems, rivets, channel plates
Corrosion resistant Elect cond 26

MEDIUM LEADED BRASS 350.
M-279, 61 Cu, 38 Zn, 1 Pb
Ann 45,000-55,000 TS, 12,000-26,000 YS, 45-60 El
Cold rolled 49,000-99,000 TS, 20,000-79,000 YS; 1-44 El
Good machinability and formability
For hose coupling nuts, sink strainers, bearing cages

MEDIUM LEADED NAVAL BRASS
M-33, 60.5 Cu, 0.75 Sn, 0.7 Pb, bal Zn
Hard temper 75,000 TS, 56,000 YS, 28 El.
For marine hardware, screw machine products; corrosion resistant

MEDIUM SILVER SOLDER
75-70 Ag, 20-23 Cu, 5-7.5 Zn
For silver solder, corrosion resistant

MEDUSA.
M-1431, 0.50 C, 1.5 Cr, 2.5 W, bal Fe
For rivet sets, punches, pneumatic tools, Type S1, shock resistant

MEECHITE
M 1167; 0.2 C, 29 Cr, bal Fe.
For melting pots; nonferrous metals, corrosion resistant

MEEHANITE A.
M-82, M-850, 3.0 C, 1 Si, bal Fe.
Cast. 50,000 TS; 17,000 YS; 196 Brin.
Heat treated: 75,000 TS, 600 Brin.
For castings, gears, shafts; superseded by Meehanite GA

MEEHANITE B
M-82, M-850; 3.0 C, 1 Si, bal Fe
Cast 45,000 TS, 17,000 YS, 196 Brin
Heat treated 60,000 TS; 500 Brin
For castings, gears, shafts; cast iron superseded by Meehanite GB

MEEHANITE C
M 82, M-850, 3.0 C, 1 Si, bal Fe
Cast 40,000 TS, 32,000 YS, 196-450 Brin
For cast iron castings, gears, superseded by Meehanite GC

MEEHANITE CB
M-82, M-850, C, alloy, bal Fe
Cast 45,000 TS, 187 Brin
For acid pans, kettles, pumps, valves, fittings; acid resistant castings.

MEEHANITE CB3
M-82, M-850, C, alloy, bal Fe
Cast 48,000 TS, 187 Brin
For pumps, valves, fittings; acid resistant castings

MEEHANITE CC
M-82, M-850, C, alloy, bal Fe.
Cast 46,000 TS, 187 Brin
For cast iron castings, acid resistant

MEEHANITE D.
M-82, M-850, C, alloy, bal Fe
Cast. 35,000 TS, 175-400 Brin
For cast iron castings, gears, housings, casings, superseded by Meehanite GD

MEEHANITE E
M-82, M 850, 3 C, alloy, bal Fe
Cast 30,000 TS, 27,000 YS; 140-450 Brin
For cast iron castings, gears, shafts, casings; superseded by Meehanite GF

MEEHANITE GA
M-82, M 850, over 3.0 C, over 1.0 Si, bal Fe
Cast 50,000 TS; 36,000 YS, 5 El, 220 Brin
Heat treated 77,000 TS; 380 Brin
For machine tool castings, gears, shafts, housings; close grain iron

MEEHANITE GAH
M-82, M-850, 3 C, alloy, bal Fe
Cast 70,000 TS, 250-600 Brin.
For cast iron castings, gears, strong

MEEHANITE GB
M 82, M-850, over 3.0 C, over 1.0 Si, bal Fe
Cast 45,000 TS, 196 Brin
For machine tool castings, gears, shafts, housings, close grain iron

MEEHANITE GC
M-82, M-850, over 3.0 C, over 1.0 Si, bal Fe.
Cast. 40,000 TS, 192 Brin
For pistons, engine castings, gears, shafts, housings, close grain iron.

MEEHANITE GD
M182, M-850, 3 C, alloy, bal Fe
Cast 33,000-38,000 TS, 193 Brin
For pressure castings, gears; cast iron

MEEHANITE GE
M-82, M-850, over 3.0 C, over 1.0 Si, bal Fe.
Cast 30,000 TS, 27,000 YS; 174 Brin.
For machine tool castings, gears, shafts, housings, lathe beds; close grain iron.

MEEHANITE GM.
M-82, M-850; 3 C, alloy, bal Fe.
Cast: 50,000-60,000 TS; 17,000 YS; 241 Brin.
For castings, gears, shafts; high strength.

MEEHANITE HA.
M-82, M-850; over 3.0 C, over 1.0 Si, alloy, bal Fe.
Cast: 50,000 TS, 220 Brin.
For diesel engine components, valves, liners, superheaters; up to 900°F operating temperature, alloy iron.

MEEHANITE HB.
M-82, M-850; over 3.0 C, over 1.0 Si, Cu, Cr, Mo, bal Fe
Cast: 38,000 TS; 300 Brin
For stoker plates, furnace rolls, skid castings; heat resistant to 1400°F, alloy iron.

MEEHANITE HC
M-82, M-850; C, alloy, bal Fe.
Cast: 38,000 TS, 229 Brin.
For cast iron castings; heat resistant

MEEHANITE HD.
M-82, M-850; C, alloy, bal Fe.
Cast 33,000 TS, 220 Brin min
For heat resisting cast iron castings, ingot molds, sinter grates, slag pots

MEEHANITE-HE.
M-82, M-850, 3.55 max C, 1.9 min Si, Cu, Cr, Mn, bal Fe.
Cast: 30,000 TS; 220 min Brin
For slag pots, furnace castings, ingot molds, sinter grates.
Heat resistant cast iron.

MEEHANITE HR
M-82, M-850, 3.15 min C, 1.0 max Si, Cu, Cr, bal Fe.
Cast 40,000 TS; 300 Brin.
For glass molds, furnace and burner parts, rolls, heat resistant to 1550°F, alloy iron.

MEEHANITE HS.
M-82; 2.8 max C, 5.0 min Si, Mn, others, bal Fe
Cast 60,000 TS, 196 Brin
For oil refinery supports, blast furnace parts, trays, dampers; heat resisting cast iron up to 1700°F.

MEEHANITE HS-100.
M-82; 2.5 C, 5.0 Si, 0.3 Mn, special alloys, bal Fe
Cast. 60,000 TS, 196 Brin
For oil refinery tube supports, hot gas valves, up to 1700°F heat resistant

MEEHANITE KC
M-82, M-850; C, alloy, bal Fe.
Cast.
For pumps, valves, fittings, evaporators; alkali resistant.

MEEHANITE SC
M-82, M-850; 2.5 min C, 4.7 Si, alloy, bal Fe
Cast: 27,000 TS; 300 Brin.
For annealing and carburizing boxes, furnace parts; heat resistant to 1650°F, alloy iron.

MEEHANITE SF-60.
M-82; 3.5 C, 2.7 Si, 0.5 Mn, addition agents, bal Fe.
Cast. 60,000 TS; 161 Brin.
For gears, frames, housings, shafts; cast iron, replacement for malleable iron.

MEEHANITE SH-100.
M-82, 3.5 C, 2.5 Si, 0.5 Mn, addition agents, bal Fe.
Cast: 90,000 TS; 227 Brin.
For heavy duty gears, cams, tires, crankshafts; cast iron.

MEEHANITE SP-80.
M-82; 3.5 min C, 2.5 Si, 0.4 Mn, addition agents, bal Fe.
Cast: 80,000 TS, 207 Brin.
For gears, housings, frames, shafts; cast iron for high pressures

MEEHANITE WA
M-82, M-850, C, alloy, bal Fe.
Cast 50,000 TS, 196-321 Brin
For gears, brake drums, cams, dies, pinions; wear resistant

MEEHANITE WAH.
M-82, M-850; C, alloy, bal Fe
Cast 70,000 TS; 200-600 Brin.
For cast iron castings, wear resistant

MEEHANITE WB
M-82, M-850, C, alloy, bal Fe
Cast. 38,000 TS, 350-550 Brin
For mill liners, crushers, pump impellers; wear resistant.

MEEHANITE WBC
M-82, M-850, C, alloy, bal Fe
Chilled 45,000 TS, 550 Brin
For cement mill gears, rolls, rollers, cams, hard exterior

MEEHANITE WEC
M-82, 3.5 C, 1.0 Si, 0.6 Mn, 0.75 Cr, bal Fe.
Cast 30,000 TS, 444 Brin
For chill cast castings, gears, housing, wear resistant cast iron

MEEHANITE WH
M-82, 3.3 C, 0.75 Si, 0.4 Mn, 0.2-0.3 Cr, bal Fe
Cast 30,000 TS, 575 Brin
For wear resistant castings for mining equipment; wear resistant cast iron

MEGAPERM 4510.
M-296, 45 Ni, 10 Mn, bal Fe
For magnets, high permeability

MEGAPERM 6510
M-296, 65 Ni, 10 Mn,, bal Fe
For magnets, high permeability

MEGAPYR II
German, 30 Cr, 65 Fe, 5 Al
For cast magnets, electrical resistances; heat resistant to 1300°C

MELCHOIR WIRE 1
57.3 Cu, 41.6 Ni, 1.1 Mn
For white metal wire, corrosion resistant.

MELCHOIR WIRE-2
62.7 Cu, 25.9 Zn, 10.8 Ni, 0.6 Mn
For white metal wire; corrosion resistant.

MELCHOR WIRE
57.3 Cu, 41.6 Ni, 1.1 Mn.
For wire, corrosion resistat

MELCLIF A5.
M-1130; 5 Al, 0.5 Zn, 0.4 Mn, bal Mg
Cast: 29,700 TS; 12,000 YS; 11 El; 50 Brin.
For light alloy parts; wrought.

MELKHIOR
Russia; Ni, bal Cu

MELOTTE FUSIBLE ALLOY.
England; 50 Bi, 31 Sn, 19 Pb.
For fire extinguishers; M P. 99.5°C.

MELTRITE.
M-1072, 4 C, bal Fe.
For making steel and cast iron; pig iron.

MEL-TROL HAMDEN.
M-32; 2.1 C, 0.35 Mn, 0.25 Si, 12.5 Cr, 0.5 Ni, bal Fe.
Hardened: C 63-65 Rock.
For spindles, hubs, cold rolls, slitting cutters, master tools, blanking and forming dies, lamination dies.
Type D3 Oil hardening, nondeforming.

MELTRON A8
M-1130; 7.5-9.0 Al, 0.3-1.0 Zn, 0.15-0.40 Mn, bal Mg
Cast 25,000 TS, 13,500 YS, 2 El; 60 Brin
Heat treated. 38,000 TS, 14,000 YS, 6 El, 70 Brin

MELTRON AZ31.
M-1130; 3 Al, 1 Zn, 0.3 Mn, bal Mg
O-temper 37,000 TS, 22,000 YS, 21 El, 56 Brin
H24-temper 42,000 TS, 32,000 YS, 16 El; 73 Brin.
F-temper 37,000 TS, 22,000 YS, 21 El
For truck bodies, aircraft cowling and frames, good formability

MELTRON AZ855
M-1130, 5.5-8.5 Al, 1.5 max Zn, 0.15-0.40 Mn, bal Mg
Forged. 44,800 TS, 29,200 YS; 10 El, 70 Brin
For bearing housings, cylinder heads, control levers, age hardenable, forgings and extrusions.

MELTRON ZIX
M 487, 2.5 Th, 1 Zn, 0.6 Zr, bal Mg
Sheet 16,200 TS, 8000 YS, 18 El
At 300°C 5200 TS, 4200 YS; 43 El
For aircraft and missile components, creep resistant and good properties to 600°F.

MERAL
Swiss, 3.2 Cu, 0.8 Mg, 0.3 Mn, 1 Ni, bal Al
56,000 TS, 36,000 YS, 18 El; 110 Brin
For light alloy parts, age-hardenable

MERCOLOY
M-519, Cu alloy
For valves, corrosion resistant

MERICO-1
M-1436; 0.35 C, 0.77 Cr, 0.5 Co, 0.75 Mo, 0.73 Cu, bal Fe
For blacksmith tools, chisels, punches; water hardened, non-tempering

MERICO 2
M-1436, 0.40 C, 0.77 Cr, 0.75 Mo, 0.75 Cu, 0.6 Si, 0.4 Mn, bal Fe
For shear blades, rivet sets, pneumatic tools, oil hardened, non-tempering.

MERIDIAN AR STEEL
M-1436, 0.60-1.4 C, 0.25 V, bal Fe.
For drills, reamers, lathe and planer tools, hobs, Type W2, water hardened

MERIDIAN CARBIDE HIGH SPEED.
M-1436, 0.65 C, 4.5 Cr, 18 W, 2 V, 0.75 Mo, 12 Co, bal Fe
For cutting tools, drills, reamers, hobs; high speed steel

MERIDIAN DIE STEEL
M-1436; 1 C, 5 Cr, 1 Mo, bal Fe
For dies, rolls, spindles, punches; Type A2; oil hardened, non-deforming.

MERIDIAN DIE "O" STEEL.
M-1436, 0.90 C, 1 Mn, 0.5 W, bal Fe.
For cold work tools, header and blanking dies, Type O1, oil hardened, non-deforming.

MERIDIAN HS STEEL
M-1436, 0.80 C, 4 Cr, 2 V, 18 W, bal Fe.
For drills, taps, hobs, reamers, lathe cutters; Type T2; high speed steel.

MERIT METAL.
M-815; Sb, Sn, bal Pb.
For bearings; Babbitt.

MERTEN
M-1436; C, alloy, bal Fe
For machine tool parts; fatigue and wear resistant

MESMERIC
M-56, 0.2 C, 0.3 Si, 0.4-1.0 Mn, bal Fe
72,000 TS, 39,600 YS, 25 El; 50 RA
For general engineering purposes, case-hardening steel; "Firth Brown F 100," "Atlas C C. H."

MESOLOY.
M-1523, 72 Ni, 23 Cr, 5 Al.
Resistance wire: 825 ohms per cir mil ft.
Low temp coefficient of resistance
Annealed. 100,000 psi, hard drawn: 140,000 psi
For elec resistors

MESSING 63.
M-297, 37 Zn, bal Cu.
Soft 48,000 TS, 55 El, 70 Brin
½H-temper 58,000 TS; 32 El, 100 Brin
Hard 69,000 TS; 20 El, 135 Brin
For hardware, corrosion resistant, brass

MESSING 63Pb
M-297; 37 Zn, 2 Pb, bal Cu.
Soft 48,000 TS, 55 El, 70 Brin.
½Hard 58,000 TS, 32 El, 100 Brin.
Hard. 69,000 TS, 20 El, 136 Brin
For hardware, screw machine products; free-cutting, leaded brass

MESSING 72
M-297, 28 Zn, bal Cu
Soft 47,000 TS, 54 El, 70 Brin.
½H-temper 58,000 TS, 30 El, 100 Brin.
Hard 65,000 TS, 16 El, 130 Brin.
For hardware, corrosion resistant, brass.

MESSING 75
M-297, 25 Zn, bal Cu
Soft 47,000 TS, 54 El, 70 Brin
½H-temper 58,000 TS, 29 El; 100 Brin
Hard 66,000 TS; 15 El; 125 Brin
For hardware, corrosion resistant, brass

MESSING 80
M-297, 20 Zn, bal Cu
Soft 44,000 TS, 63 El, 65 Brin.
½H-temper 52,000 TS; 28 El, 95 Brin
Hard 62,000 TS, 15 El, 120 Brin
For hardware, ornamental parts; corrosion resistant, brass

MESSING 85
M-297, 15 Zn, bal Cu
Soft 42,000 TS, 50 El; 65 Brin
½H-temper 52,000 TS; 26 El, 95 Brin
Hard: 61,000 TS, 12 El; 115 Brin
For ornamental and decorative parts, corrosion resistant, brass

MESSING 90
M-297, 10 Zn, bal Cu
Soft 40,000 TS, 48 El, 60 Brin.
½H-temper 48,000 TS; 24 El, 90 Brin.
Hard 56,000 TS, 10 El, 110 Brin.
For ornamental and decorative parts; corrosion resistant, brass

MESTA SPECIAL.
M-852; 0.4 C, 1.5 Ni, 0.8 Cr, bal Fe.
For rolls; cast steel.

METAL BAND SAW
M-38; 1.35 C, 0.3 Cr, bal Fe
For band saws; oil hardening.

METALINE.
M-990; 10 Sn, bal Cu.
For oil-less bronze bearings; sintered.

METALJOINER.
M-744; Pb-Sn-Cd.
For solder; M.P. 650°F.

METALLIC PACKING.
U.S.; 82.25 Pb, 4.75 Sn, 13 Sb.
For metallic packing

METALLINE.
U.S.; 35 Co, 10 Fe, 30 Cu, 25 Al
For tools; heat and corrosion resistant.

METAMIC 247
M-1519, 75 Ni, 25 mullite.
Sintered: 200-300 Brin
For bearings for 500-900°C operating temperature; cermet

METAMIC LT-1
M-1519; 70 Cr, 30 Al_2O_3
Sintered: 350 Brin.
For gas turbine blades; sintered, refractory.

METCO-15F.
M-853; 17 Cr, 4 Fe, 4 Si, 3.5 B, 1 C, bal Ni
Cast Rockwell C 60.
For hard facing applications.
Self fluxing metal spray.
M.P 1875°F., wear resistant.

METCOLOY No 1
M-853, C, Cr, Ni, bal Fe.
For metal spraying; stainless steel wire

METCOLOY NO. 2
M-853; C, Cr, Ni, bal Fe.
For metal spraying, stainless steel wire.

METCO MONEL METAL.
M-853; 67 Ni, 23 Cu.
For metal spraying, Monel metal wire.

METEOR.
M-57, 1.25 C, 0.25 Cr, 0.15 V, 1.5 W, bal Fe.
For taps, punches, dental burrs; oil hardening

METEOR MAJIC (EO)
M-69; 0.53 C, 0.9 Mn, 2 Si, 1.1 Mo, bal Fe.
For punches, upsetters, rivet sets; shock and impact resistant.

METILLURE
France, 14-15 Si, 0.7 Mn, bal Fe.
For drains, anodes, evaporators, acid resistant, brittle

METORITE
98-94 Al, 1-4 P, 1-2 Zn.
For light alloy parts; non-hardenable.

METROL NO. 610-FM
M-32; 1.5 C, 0.5 Mn, 0.3 Si, 12 Cr, 0.8 Mo, 0.9 V, bal Fe (plus sulphides)
Hardened: C 60-66 Rock.
Ht. Tr.. 278,000 TS, 214,000 YS; 1 El; C 56 Rock
For blanking drawing and forming dies, gages, punches, mandrels, broaches, hobs, shear blades.
Type D2 tool steel. Wear and abrasion resistant. Free-machining.

Mg-9Y-1 Zn-0.5 Zr.
M-43; 9 Y, 1 Zn, 0.5 Zr, bal Mg.
Heat treated: 59,000-61,000 TS; 46,000-52,000 YS; 6-8 El; 48,000-52,000 CYS, 21,000 Fatigue S.
For aircraft and missile components.
Heat treatable. Good elevated temperature properties.

MGN.
M-104; C, Si, Mn, 5 W, bal Fe.
For permanent magnets, electrical equipment; retains magnetization

M.G R
M-73, 0.55 C, 1 Si, 0.3 Mn, 1.25 W, 5 Cr, 1.25 Mo, bal Fe
Air hardening tool steel, tough and wear resistant; for punches, rivet sets, tools and dies.
AISI A8

M.H. ALLOY NO 6
M-212; 77.5 Cu, 7 Sn, 14 Pb, 1.5 Ni
30,000-36,000 TS, 17,000-19,000 YS; 20-28 El; 21-25 RA, 64 Brin
For machinery bearings for high speed and medium pressures, "Bar Alloy No. 6", acid resistant

M H ALLOYS see BARR ALLOYS.

M-H COMPOSITE.
M-229; C, alloy, bal Fe
For heavy duty rollers; in sheet mills

M-H SPECIAL ALLOY STEEL
M-229, C, alloy, bal Fe.
For rolls for slabbing mill; water hardened

MIAMI FAST CUT.
U.S., 1-2-1.3 C, bal Fe.
For cutters, broaches; fast finishing

MIAMI NO CHARGE
U.S.; 0.9 C, 1.2 Mn, bal Fe.
For tools, dies, broaches, punches, shears; non-deforming

MICHALLOY
U.S., C, Ni, Cr, bal Fe
For grinding balls, mill liners, pumps; high abrasion resistance; Ni-Hard

MICHIANA NO 48.
M-184, 28 Cr, 8 Ni, 0.50 max C, bal Fe.
Cast 75,000 TS, 55,000 YS, 1 El, 1 RA, 220 Brin
For resistance to sulfurous gases at elevated temperatures, corrosion and heat resisting

MICHIANA 49
M-184, 18 Cr, 8 Ni, 0.2 C, bal Fe
For chemical engineering equipment; stainless.

MICHIANA NO 49 A
M-184, 0.2 C, 1.5 max Mn, 2.0 max Si, 18-21 Cr, 8-11 Ni, bal Fe
Cast 70,000 TS, 30,000 YS; 30 El
For castings, stainless

MICHIANA NO 49 Cb
M-184, 0.08 C, 1.5 max Mn, 2.0 max Si, 18-21 Cr, 9-12 Ni, C = 8 × Cb, bal Fe
Cast 70,000 TS, 30,000 YS; 35 El.
For welded castings, stainless, stabilized.

MICHIANA NO 49 Mo.
M-184; 0.08 C, 1.5 max Mn, 1.5 max Si, 18-21 Cr, 9-12 Ni, 2-3 Mo, bal Fe.
Cast. 70,000 TS, 30,000 YS, 30 El.
For castings, stainless

MICHIANA 55
M-184, 0.5 C, 30 Cr, 2 Ni, bal Fe.
Cast: 45,000 TS, 30,000 YS; 1 El, 2 RA; 250 Brin.
For parts in contact with brass and copper at rolling temperature, heat and corrosion resistant

MICHIANA NO 63.
M-184; C, 28 Cr, 15 Ni, bal Fe
Cast.
For resistance to sulfurous gases at high temperatures and also molten salts; heat and corrosion resistant.

MICHIANA NO. 100.
M-184; 25 Cr, 12 Ni, 0.50 max C, bal Fe.
Cast. 63,000-65,000 TS; 40,000-45,000 YS;
2.5-3.5 El; 3-5 RA, 210 Brin.
For grids, furnace parts; corrosion and
heat resisting.

MICHIANA NO 100S
M-184; 0.21-0.35 C, 24-30 Cr, 0.25 S, 12-15 Ni,
bal Fe.
For heat and corrosion resistant parts;
heat and corrosion resistant.

MICHIANA 111
M-184, 25 Cr, 12 Ni, 3.5 Mo, 0.2 C, bal Fe.
For chemical engineering equipment; stainless,
heat resistant

MICHIANA NO. 119
M-184, 25 Cr, 20 Ni, 1.25 Si, 1.5 Mn, 0.2 C,
bal Fe.
Cast
For heat and corrosion resisting parts;
heat and corrosion resisting

MICHIANA NO 122.
M-184, 0.2 C, 18 Cr, 8 Ni, 3.5 Mo, bal Fe
For use in sulfite paper industry; corrosion and
heat resistant

MICHIANA NO 147
M-184, 0.15 max C, 1 max Mn, 1.5 max Si,
11-14 Cr, 1 max Ni, bal Fe.
Cast 90,000 TS; 65,000 YS; 18 El
For castings, corrosion resistant.

MICHIANA NO 233
M-184, 20 Ni, 3 Cr, 1.5 Si, 1.5 Mn, 2.2-2.4 C,
bal Fe
For chemical handling equipment,
corrosion resisting

MICHIANA NO 241
M-184, 2.6-2.8 C, 28 Cr, 1.25 Si, 1.0 Mn, bal Fe.
For coal coke handling equipment,
abrasion resisting

MICHIGAN NO 90
M-545, 90 Cu, 10 Al.
Cast 77,000 TS, 30,000 YS, 30 El, 120 Brin.
Heat treated 90,000 TS, 55,000 YS, 5 El,
160 Brin.
For castings, gears, Al bronze.

MICHIGAN NO 90H
M-545, 84.5 Cu, 3.5 Fe, 12 Al.
Cast 85,000 TS, 40,000 YS, 10 El, 160 Brin.
Heat treated· 95,000 TS, 50,000 YS, 5 El, 200 Brin.
For castings, Al bronze.

MICHIGAN NO 90M
M-545, 85.5 Cu, 3.5 Fe, 11 Al
Cast 80,000 TS, 40,000 YS; 10 El, 166 Brin.
Heat treated 90,000 TS, 50,000 YS, 7 El;
200 Brin
For castings, Al bronze

MICHIGAN NO 90S
M-545; 88 Cu, 3.5 Fe, 8.5 Al
Cast 65,000-85,000 TS, 22,000-30,000 YS;
20-30 El, 115-135 Brin.
For castings, gears, Al bronze.

MICHIGAN NO. 90V.
M-545; 79 Cu, 5 Fe, 5 Ni, 11 Al.
Cast 90,000-105,000 TS, 45,000-60,000 YS,
3-7 El; 190-215 Brin.
For castings; Al bronze.

MICHIGAN APEX.
M-545; 86.5 Cu, 3.5 Fe, 10 Al.
Cast: 85,000 TS; 35,000 YS; 20 El; 160 Brin.
For castings, gears; Al bronze.

MICHIGAN GRADE A.
M-545, 56 Cu, 3 hardener, bal Zn.
Cast· 70,000-80,000 TS; 30,000-35,000 YS;
25-40 El, 25-34 RA, 114-140 Brin.
For castings; Mn bronze.

MICHIGAN GRADE AX.
M-545; 57 Cu, 4 hardened, bal Zn
Cast 80,000-90,000 TS; 40,000-46,000 YS;
25-40 El; 20-30 RA, 120-130 Brin.
For castings, Mn bronze.

MICHIGAN GRADE C.
M-545; 56 Cu, 2.5 hardened, bal Zn.
Cast 6,000-70,000 TS; 25,000-40,000 YS;
15-25 El, 30-40 RA, 80-95 Brin.
For castings; Mn bronze.

MICHIGAN GRADE X.
M-545, 56 Cu, 6 hardened, bal Zn
Cast 85,000-95,000 TS; 40,000-45,000 YS;
20-30 El; 20-25 RA, 135-155 Brin.
For castings; Mn bronze

MICHIGAN GRADE XX.
M-545, 57 Cu, 9 hardened, bal Zn.
Cast 95,000-110,000 TS, 45,000-55,000 YS;
20-30 El, 18-25 RA, 150-175 Brin.
For castings, Mn bronze.

MICHIGAN GRADE XXX
M-545, 62 Cu, 13 hardened, bal Zn.
Cast 110,000-125,000 TS; 75,000-90,000 YS;
12-18 El, 12-17 RA, 200-240 Brin.
For castings, Mn bronze

MICRO
M-282, 98 Cu, 2 Ni
Cold worked 37,500 TS; 23,500 YS, 39 El;
80 Brin
Extruded 33,600 TS; 6000 YS, 55 El; 59 Brin.
For locomotive boiler tubes and plates;
corrosion resistant

MICRO-MACH
M-1484, 0.08-0.12 C, 17.3 Cr, 6.2 Ni, bal Fe
Long 200,000 TS, 180,000 YS; 12 El.
Trans 209,000 TS, 175,000 YS; 13 El
For aircraft and missile wing and skin surfaces;
austenitic, stainless

MIDFLEX
M-237, bimetal.
For thermo-metal; bimetal element.

MIDLING HARD 115
M-182, 1.1 C, 0.25 Si, bal Fe
For tools, drill rod

MIDOHM
M-44, 22-23 Ni, bal Cu
Wrought 100,000-50,000 TS
For resistances, rheostats, heat resistant;
max operating temperature 200°C.

MIDVAC-422.
M-85, 0.25 C, 12 Cr, 0.9 Mo, 0.9 Ni, 0.2 V,
0.9 W, bal Fe
Annealed· 85,000 TS, 42,000 YS; 22 El, B 95 Rock.
Hardened· 240,000 TS; 205,000 YS; 9 El;
C 50 Rock
For cutlery, surgical instruments, hardware,
bearings, valves.
Corrosion resistant, hardenable

MIDVALOY NO 11.
M-85, 0.35-0.50 C, 0.6-0.9 Cr, 3.0 Ni, bal Fe.
Heat treated· 275,000-135,000 TS;
245,000-110,000 YS; 10-25 El; 38-58 RA;
500-275 Brin.
For airplane crankshafts, gears, splines, transmission
units; shock resistant; (0.45-0.50 C alloy).

MIDVALOY NO. 11-Mo.
M-85; 0.4 C, 0.6-0.9 Cr, 2.6-3.2 Ni, 0.2-0.3 Mo, bal Fe.
Heat treated: 125,000-160,000 TS; 100,000-140,000 YS; 22-15 El, 55-45 RA; 250-325 Brin.
For shafts, gears; tough

MIDVALOY 20.
M-85; 0.07 max C, 29 Ni, 20 Cr, 2-3 Mo, 4 Cu, bal Fe.
Cast: 65,000-75,000 TS; 28,000-38,000 YS; 50-35 El; 50-40 RA; 120-150 Brin.
For chemical plant equipment, tanks; resists mixed acids, austenitic

MIDVALOY 1300.
M-85, 0.07-0.40 C, 13 Cr, bal Fe.
Wrought: 70,000-200,000 TS; 40,000-165,000 YS; 28-13 El, 70-53 RA; 130-400 Brin.
For corrosion resisting parts; engineering construction; corrosion and abrasion resisting.

MIDVALOY 1808
M-85; 0.07-0.20 C, 18 Cr, 8 Ni, bal Fe.
For stainless parts, chemical plant equipment; stainless, austenitic

MIDVALOY 1808 M
M-85; 0.07 C, 18 Cr, 8 Ni, 2.1-3.5 Mo, bal Fe.
Annealed: 70,000 TS; 35,000 YS; 40 El; 60 RA; 160 Brin.
For corrosion resistant parts, chemical plant equipment; stainless, austenitic.

MIDVALOY 2512-7.
M-85, 0.07 C, 23-26 Cr, 11-13 Ni, bal Fe.
Rolled: 70,000-115,000 TS; 40,000-60,000 YS; 9-45 El; 240-230 Brin.
For heat and corrosion resisting parts, heat and corrosion resistant.

MIDVALOY 2512-10.
M-85; 0.10 C, 12 Ni, 25 Cr, bal Fe.
Forged: 75,000-115,000 TS; 45,000-65,000 YS; 25-45 El; 30-50 RA; 150-240 Brin.
Cast: 65,000-85,000 TS; 40,000-50,000 YS; 30-35 El; 30-40 RA, 130-195 Brin.
Annealed 113,000 TS; 62,700 YS, 43 El, 49 RA; 196 Brin
For apparatus to resist nitric and acetic acids, sulfite liquors and sulfurous acids, corrosion and heat resisting.

MIDVALOY 2512-16
M-85; 0.16 C, 25 Cr, 12 Ni, bal Fe.
For automatic furnaces, skid rails, walking beams; heat resistant to 1850°F.

MIDVALOY 2520.
M-85; 25 Cr, 0.25 max. C, 20 Ni, 0.18 Mo, bal Fe.
Cast: 70,000-80,000 TS; 30,000-36,000 YS; 25-50 El; 20-50 RA; 145 Brin
Wrought: 75,000-165,000 TS; 30,000-120,000 YS; 48-5 El; 55-30 RA; 160 Brin.
For corrosion resisting apparatus; corrosion resisting, austenitic.

MIDVALOY ATV-3.
M-85, 26 Ni, 14.5 Cr, 1.2 Mn, 0.45 C, 4 W, bal Fe.
Cast: 80,000 TS; 43,000 YS; 20 El; 20 RA.
Wrought: 100,000 TS; 50,000 YS; 33 El; 45 RA; 185 Brin.
For exhaust valves, gas turbine rotors; austenitic; heat resisting.

MIGRA IRON NO. 1.
M-383, M-403; 1-3 Si, 0.4-0.9 Mn, 3.8-4.1 C, bal Fe.
Cast.
For pistons and cylinders; cast iron.

MIGRA IRON NO. 2.
M-383, M-403, 1-3 Si, 0.4-0.9 Mn, 3.8-4.1 C, bal Fe.
For pistons and cylinders; cast iron.

MIGRA IRON NO 3.
M-383, M-403; 1-3 Si, 3.8-4.1 C, 1-2 Ni, 0.5-1.0 Cr, 1.0-1.5 Mn, bal Fe.
For pistons and cylinders; cast iron.

MIKADO.
M-1306, 1.45 C, 1.4 Cr, 0.6 Mn, 0.25 Si, bal Fe.
For bearings, bushings, liners, sleeves; water hardened, wear resistant

MIL-48
M-365, 0.55 C, 2.0 Si, 0.25 Cr, 0.25 V, bal Fe.
Water hardening tool steel, shock resisting type; AISI S4.

MILBRITE.
M-365, 0.50 C, 1.0 Mn, 0.3 Si, 1.1 Cr, 0.25 Mo, bal Fe.
Oil hardening steel designed for molds; similar to AISI 4150

MILCO 9
M 365; 0.73 C, 0.28 Mn, 4 Cr, 1.75 V, 18.25 W, 8.5 Co, bal Fe
For tools, cutters, reamers; high speed steel.

MILD SELF HARDENING
M-38, 1.7 C, 3.35 Cr, 5.25 W, bal Fe.
For dies, oil hardening

MILLALOY
M-855, 0.4 C, 4 Ni, 1.5 Cr, bal Fe
Heat treated 312,000 TS, 272,000 YS; 11 El; 35 RA, 532 Brin
For shear blades; oil hardened

MILL BRASS MIX
M-741, Sn, Pb, bal Cu
For bearings, bushings, tough

MILLENITE
M-857, 0.3 C, 1-5 Ni, 0.8 Cr, bal Fe
For high duty castings, oil hardened

MILLER 200-PLUS
M-1144, 4.8-9.8 Sn, 0.15 P, bal Cu
Rolled: 96,000-118,000 TS, 70,000-85,000 YS; 24-20 El, 210-240 Brin
For clips, springs, bellows, diaphragms; phosphor bronze

MILLER 200-PLUS GR.A
M-1144, 4.82 Sn, 0.18 P, 95 Cu
Spring: 96,000 TS, 70,000 YS, 22 El, 210 Brin.
For diaphragms, bellows, springs, clips, fasteners; high ductility, corrosion resistant.

MILLER 200-PLUS GR C.
M-1144, 7.82 Sn, 0.18 P, 92 Cu
Spring: 110,000 TS, 80,000 YS, 24 El, 235 Brin.
For diaphragms, bellows, springs, clips, fasteners; high ductility, corrosion resistant.

MILLER 200-PLUS GR D.
M-1144, 9.85 Sn, 0.15 P, 90 Cu.
Spring: 118,000 TS, 85,000 YS; 20 El; 240 Brin.
For diaphragms, bellows, springs, clips, fasteners; high ductility, corrosion resistant.

MILLING.
Eng.; 54-56 Cu, 27.5-31 Zn, 15-18 Ni, 0.5-1.0 Pb.
For white metal parts; easy to machine.

MILLING SILVER-1.
Eng.; 56 Cu, 31 Zn, 12 Ni, 1 Pb.
For white metal parts; easy to machine.

MILLING SILVER-2.
Eng.; 56 Cu, 27.5 Zn, 16 Ni, 0.50 Pb.
For white metal parts; easy to machine.

MILLS-LM1M.
M-187; 6-8 Cu, 0.15 Mg, 2-4 Si, 2-4 Zn, bal Al.
Cast: 18,000 TS; 11,000 YS; 80 Brin.
For die castings, housings; not subject to shock.

MILLS-LM2M.
M-187; 0.7-2.5 Cu, 9-11.5 Si, 1.2 max Zn, 0.2 Ti, bal Al.
Cast: 18,000 TS.
For permanent mold castings; corrosion resistant.

MILLS-LM4M.
M-187; 2-4 Cu, 4-6 Si, 0.3-0.7 Mn, 0.2 Ti, bal Al.
Cast. 20,000 TS; 9000 YS; 2 El.
For general purpose castings; corrosion resistant.

MILLS-LM7P.
M-187; 0.8-2.0 Cu, 0.05-0.20 Mg, 1.5-2.8 Si, 0.8-1.4 Fe. 0.8-1.7 Ni, 0.2 Ti, bal Al
Cast: 22,400 TS; 15,700 YS; 2 El; 65 Brin.
For general engineering castings; high ductility.

MILLS-LM10W
M-187; 9.5-11 Si, 0.1 Ti, 0.1 max Cu, bal Al.
Cast: 40,500 TS; 23,500 YS; 8 El; 75 Brin.
For high stressed castings; shock and corrosion resistant.

MILLS-LM11W.
M-187; 4-5 Cu, 0.2 Ti, bal Al.
Cast: 31,500 TS, 18,000 YS; 7 El; 65 Brin.
Aged: 40,500 TS; 27,000 YS; 4 El; 100 Brin.
For high stressed castings; age-hardenable.

MILLS-LM20M.
M-187; 0.4 Cu, 10-13 Si, 0.2 Ti, 0.15 max Mg, bal Al.
Cast 23,500 TS; 8000 YS; 3.5 El, 50 Brin.
For intricate design castings, general purpose, corrosion resistant.

MILMOLD.
M-365, 0.30 C, 0.8 Mn, 0.5 Si, 1.7 Cr, 0.4 Mo, bal Fe
Oil hardening tool steel designed for molds, AISI P 20.

MILNAIR
M-365, 0.95 C, 2 Mn, 2 Cr, 1 Mo, bal Fe.
For tools, abrasion resistant.

MILNAIR 4.
M-365, 0.95 C, 2.0 Mn, 0.35 Si, 2.2 Cr, 1.1 Mo, bal Fe
Air or oil hardening cold work tool steel; AISI A4.

MILNAIR 5
M-365, 1.0 C, 5.25 Cr, 0.25 V, 1.1 Mo, bal Fe
For tools, dies; air hardening, nondeforming.

MILNE 3074
M-365; 0.35 C, 4 Cr, 9.25 W, 0.5 V, bal Fe.
For punches, shears, extrusion dies; hot work steel, oil hardened.

MILNE CMV.
M-365; 0.38 C, 5.25 Cr, 1.25 Mo, 1.05 V, bal Fe.
For hot work tools, punches; hot work steel, oil hardened.

MILNE CMW.
M-365; 0.37 C, 5 Cr, 1.5 Mo, 0.3 V, 1.3 W, bal Fe.
For hot work tools, punches; hot work steel, oil hardened.

MILNE DOUBLE SIX.
M-365; 2.25 C, 12 Cr, bal Fe.
For blanking and forming dies; Type D3; oil hardened.

MILNE HOLLOW DIE STEEL.
M-365; 0.8-1.0 C, bal Fe.
For hollow dies; water hardened.

MILNE M-330.
M-365; 0.30 C, 3 Cr, 3 Mo, 0.6 V, bal Fe.
For punches, crimpers, upsetters; hot work steel, resists heat checking.

MILNE M-331.
M-365; 0.40 C, 3.3 Cr, 2.25 Mo, 0.4 V, bal Fe.
For punches, upsetters, dies, shears; hot work steel, resists softening.

MILNE M-333.
M-365; 0.30 C, 3 Cr, 3 Mo, 0.6 V, 2.25 Co, bal Fe.
For heavy duty hot work tools, punches, dies; hot work steel, oil hardened.

MILNE MM6+6.
M-365; 0.85 C, 4.15 Cr, 6.4 W, 5 Mo, 1.9 V, bal Fe.
For tools, cutters, dies; high speed steel.

MILNE MMCO.
M-365; 0.7 C, 5.8 W, 5.2 Mo, 4 Cr, 2 V, 9 Co, bal Fe.
For lathe and planer tools, reamers, hobs, cutters; high speed steel.

MILNE MT-9.
M-365; 1.5 C, 12.5 Cr, bal Fe.
For blanking and drawing dies; oil hardening; non-deforming.

MILNE MX-15.
M-365; 0.50 C, 12 W, 4 Cr, 12 Ni, 1 V, bal Fe.
For extrusion dies and mandrels, punches; hot work steel, oil hardened.

MILNE ORANGE LABEL.
M-365; 1.01-1.05 C, bal Fe.
For tools, drills, taps; water hardening.

MILNE RED LABEL.
M-365; 0.95-1.1 C, 0.3 Mn, 0.25 Si, bal Fe.
For tools, drills, hobs, taps, punches, Type W1; water hardened.

MILNE WHITE LABEL.
M-365, 0.9-1.0 C, bal Fe.
For tools, drills, springs; water hardening.

MILO
M-344; 0.4 C, 1.1 Mn, bal Fe.
For flogging tools, scarifier and fire tools; water hardened.

MILO 35
M-344, 0.7-1.1 C, bal Fe.
For pneumatic tools; water hardening.

MILO 38.
M-344, 0.7-0.9 C, bal Fe.
For pneumatic tools, chisels, punches; water hardened; Type W1.

MILRITE.
M-88, Sn, Sb, Cu, bal Pb.
For bearings; Babbitt

MILTUFF.
M-365; 0.50 C, 0.7 Mn, 0.25 Si, 3.25 Cr, 1.4 Mo. bal Fe.
Air or oil hardening tool steel, shock resisting type; AISI S7.

MILVAN.
M-365; 0.7 C, 19 W, 4.25 Cr, 2.25 V, bal Fe.
For tools, cutters; high speed steel.

MILVAN NO. 1.
M-365; C, 19 W, 4 Cr, 2.25 V, bal Fe.
For tools, cutters; high speed steel.

MILWALOY 1¼ Mn.
M-475; 0.3-0.4 C, 1.1-1.4 Mn, bal Fe.
Cast: 75,000-95,000 TS; 45,000-60,000 YS; 23-30 El; 30-55 RA; 160-196 Brin.
For tractor parts, road machinery, sprockets; water hardened.

MILWALOY 7.
M-475; 0.30-0.40 C, 1.50-1.75 Cr, 0.60-0.70 V, bal Fe.
For nitriding; nitralloy steel.

MILWALOY 13.
M-475; 0.08-0.12 C, 12-14 Cr, bal Fe.
For stainless parts; stainless.

MILWALOY 18.
M-475; 0.30-0.45, 13-15 Ni, 3.9-4.5 Mn, bal Fe.
For circuit breakers, switches; austenitic, non-magnetic.

MILWALOY 18-8.
M-475, 0.08-0.15 C, 8-10 Ni, 17-20 Cr, bal Fe.
Cast: 70,000 TS; 25,000 YS; 40 El; 35 RA; 160 Brin.
Heat treated: 80,000 TS, 40,000 YS; 70 El; 60 RA; 187 Brin
For food machinery, stainless

MILWALOY 26.
M-475; 0.08-0.12 C, 18-20 Cr, 8-10 Ni, bal Fe.
For corrosion resistant parts; A Krupp-Nirosta Steel; 18-8

MILWALOY 29-9.
M-475; 0.10-0.20 C, 8-10 Ni, 27-31 Cr, bal Fe
Cast: 80,000 TS; 40,000 YS; 35 El, 35 RA; 187 Brin
Heat treated: 90,000 TS; 50,000 YS; 50 El, 60 RA; 207 Brin
For paper mill machinery; heat resistant.

MILWALOY 35-15.
M-475; 0.2-0.4 C, 32-38 Ni, 13-17 Cr, bal Fe.
Cast.
For heat resisting castings, heat resistant

MILWALOY 38
M-475, 0.12-0.15 C, 28-30 Cr, 8-10 Ni, bal Fe
For corrosion resistant parts; A Krupp-Nirosta 29-9 steel.

MILWALOY 50
M-475, 0.30-0.40 C, 15-18 Cr, 32-36 Ni, bal Fe.
For furnace parts to resist high temperatures, heat and corrosion resistant.

MILWALOY CC.
M-475; 0.4-0.5 C, 0.5-0.8 Mn, 0.9-1.1 Cr, bal Fe.
Cast. 85,000-100,000 TS, 50,000-70,000 YS; 17-22 El; 25-45 RA; 179-210 Brin.
For crusher machinery, screen plates, wear segments; wear resistant.

MILWALOY COMMERCIAL
M-475; 0.25-0.35 C, 0.5-0.8 Mn, bal Fe
Cast. 65,000-80,000 TS, 38,000-55,000 YS; 25-35 El; 40-55 RA; 140-165 Brin.
For structural and machine castings; water hardened.

MILWALOY Cr Ni.
M-475; 0.35-0.45 C, 0.6-0.9 Mn, 1.25-1.75 Ni, 0.6-0.9 Cr, bal Fe.
Cast: 90,000-110,000 TS; 55,000-75,000 YS; 18-25 El; 30-50 RA; 180-220 Brin.
For gears, cams, rollers; wear resistant.

MILWALOY Cr Ni Mo.
M-475; 0.35-0.45 C, 0.5-0.8 Mn, 1.25-1.75 Ni, 0.6-0.9 Cr, 0.3-0.4 Mo, bal Fe.
Cast: 95,000-155,000 TS; 65,000-135,000 YS; 12-24 El; 25-50 RA; 189-255 Brin.
For castings; wear resistant.

MILWALOY DYNAMO
M-475; 0.05-0.15 C, 0.20 max Mn, bal Fe.
Cast: 50,000-65,000 TS; 25,000-37,000 YS; 30-37 El; 50-70 RA, 130-150 Brin.
For magnet bodies, armature frames, electrical machinery, high magnetic permeability.

MILWALOY HI-CARBON.
M-475; 0.4-0.5 C, 0.5-0.8 Mn, bal Fe.
Cast: 80,000-95,000 TS; 47,000-65,000 YS; 20-30 El; 30-50 RA, 170-196 Brin.
For gears, racks, sprockets, water hardened.

MILWALOY KA2SMO
M-475, 0.4-0.6 C, 8-10 Ni, 18-20 Cr, 2-4 Mo, bal Fe
Cast. 70,000 TS, 30,000 YS; 35 El, 45 RA; 178 Brin
Heat treated 80,000 TS; 40,000 YS; 50 El, 70 RA; 196 Brin.
For corrosion resisting castings, corrosion resistant.

MILWALOY Mn Bo
M-475, 0.3-0.4 C, 1.1-1.4 Mn, 0.003 B, bal Fe.
Cast 80,000-95,000 TS, 50,000-65,000 YS, 20-30 El; 35-55 RA, 174-196 Brin.
For tractors, road machinery, wear resisting

MILWALOY Mn Mo Bo
M-475, 0.3-0.4 C, 1.1-1.4 Mn, 0.15-0.20 Mo, 0.003 B, bal Fe
Cast 90,000-110,000 TS, 70,000-80,000 YS; 20-30 El, 35-55 RA, 179-217 Brin
For tractor parts, road machinery, wear resisting.

MILWALOY NIT
M-475, 0.20-0.30 C, 0.5-0.9 Mn, 2.5-3.0 Cr, 0.35-0.45 Mo, 0.2 V, bal Fe
Cast 80,000-95,000 TS; 70,000-80,000 YS, 20-30 El; 30-55 RA, 170-200 Brin
For pistons, cylinders, valve parts; nitriding alloy

MINARGENT
57-46 Cu, 40-32 Ni, 28-0 W, 0.2-0.5 Al
For silver solder, substitute for silver in silverware

MINEFOR.
M-40; 1.0 C, 5 Cr, 1 Mo, bal Fe
For punches, mandrels, rolls dies, Type A2, air hardened, non-deforming

MINEFOR FM
M-40, 1.0 C, 5 Cr, 1 Mo, 0.2 S, bal Fe
For punches, mandrels, rolls; air hardening, free-cutting

MINERVA CHISEL
M-365, 0.5 C, 1.75 Cr, 1.9-2.0 W, 0.2 V, bal Fe.
For tools, dies; oil hardened.

MINERVA H C
M-210; 0.53 C, 1.8 Cr, 1.9 W, 0.2 V, bal Fe
For chisels, shear blades, extrusion dies; hot work steel, oil hardened.

MINERVA L C.
M-210, 0.43 C, 1.8 Cr, 1.9 W, 0.2 V, bal Fe.
For chisels, bits, screwdrivers, scarfing tools; oil hardened, shock resistant.

MINERVA SPECIAL
M-210; 0.5 C, 1.8 Cr, 2.2 W, 0.25 V, bal Fe.
For pneumatic chisels, cold chisels, rivet busters; shock resistant.

MINE TALABOT SPECIAL.
M-1119; 0.75 C, bal Fe.
For tools, springs, punches; water hardened.

MINIMAX NO. 178.
M-858; Ag-Hg.
For dental amalgams; corrosion resistant.

MINIMUM
M-459; 0.04 C, bal Fe.
For electrical and magnetic equipment; magnetically soft

MINIMUM EXTRA.
M-459; 0.04 C, Al, bal Fe.
For electrical and magnetic equipment; magnetically soft

MINIMUM V SPECIAL.
M-459; 0 04 C, bal Fe.
For vacuum equipment, magnetically soft

MINOFOR.
Eng , 69-66 Sn, 18-20 Sb, 9 10 Zn, 3-4 Cu, 0 1 bal Fe.
For bearings, anti-friction

MINOVAR
M-68, 2.4 max T.C., 1-2 Si, 34-36 Ni, 0.10 max Cr, 0 5 max Mn, bal Fe
Cast: 20,000-25,000 TS; 100-125 Brin.
For electrical equipment, formerly Invar Cast Iron, low coefficient of expansion

MINOX 10
M-1509; 0.10 C, 13 Cr, bal Fe
Annealed. 69,000-85,000 TS; 40,000-48,000 YS; 18 El, 140-160 Brin
For turbine blades, surgical instruments, cutlery; corrosion resistant, hardenable

MINOX 15
M-884, 0 20 C, 13 Cr, 1 Mo, bal Fe
Cast 90,000 TS, 45,000 YS, 15 El; B 95 Rock.
Hardened: 200,000 TS, 180,000 YS; 10 El; C 45 Rock
For valves, cutlery, oil and chemical plant equipment Corrosion resistant castings, hardenable

MINOX 15
M-1509, 0 15 C, 13 Cr, bal Fe
Annealed 74,000-92,000 TS, 42,000-52,000 YS, 14 El, 150 180 Brin
For turbine blades, surgical instruments, cutlery; corrosion resistant, hardenable

MINOX 20
M-1509, 0 20 C, 14 Cr, bal Fe
Annealed: 78,000 107,000 TS, 46,000-54,000 YS; 12 El, 160-200 Brin
For turbine blades, surgical instruments, cutlery corrosion resistant, hardenable

MINOX 30
M-1509, 0 30 C, 14 Cr, bal Fe
Annealed 85,000-114,000 TS; 52,000-68,000 YS; 10 El, 160 200 Brin.
For surgical instruments, cutlery; corrosion resistant, hardenable

MINOX 1820.
M-1509, 0 20 C, 18 Cr, 2 Ni, bal Fe
Annealed 85,000-106,000 TS, 58,000-92,000 YS; 12 El, 200-240 Brin.
For chemical plant equipment; resists nitric acid.

MIN-OX-GRADE 51 C
M-25; 2 5 C, 3 Si, 3 Al, 0 2 V, 2.5 Cr, 0.15 Mn, bal Fe
Natural: 45,000 TS; 320 Brin.
Heat treated. 600 Brin.
For glass molds, dies for tile pressing, oven enameling racks; heat and wear resistant.

MIN-OX-GRADE A.
M-25; 80 Cu, 7 Al, 5 Zn, 3 Fe, 3 Mn.
55,000 TS, 13 El; 12 RA; 96 Brin.
For glass molds, slides, bearings; heat and wear resistant.

MIN-OX-GRADE D-V.
M-25, 62 Cu, 7 Al, 7 Zn, 22 Ni
80,000 TS; 0.5-2 0 El; 0 RA.
For glass molds, cams, machine parts; heat and wear resistant.

MIN-OX GRADE JR3.
M-25; 3 0 C, 3 Si, 3 Al, 2 Ni, 1 Cu, 1 Cr, 0 9 Mn, bal Fe
Natural: 48,000 TS, 200 Brin
Heat treated: 95,000 TS, 450 Brin.
For glass molds, heat and wear resistant.

MINT DIE STEEL.
M-261; M-486; C, bal Fe
For coining, cold-heading and embossing dies; water hardening.

MIRACULOY
M-288, 0.35 C, 1 25 Mn, 0 40 Si, 0.65 Cr, 1.5 Ni, 0 30 Mo, bal Fe.
Normalized: 115,000 TS, 85,000 YS; 18 El; 40 RA; 275 Brin
Heat treated 125,000-245,000 TS; 90,000-190,000 YS; 20-8 El; 50-10 RA; 250-650 Brin
For heavy duty castings; high strength

MIRALITE
M-415; 95 Al 4 1 Ni, 0.32 Si, 0.40 Fe, 0 04 Na, 0 05 Pb
Cast 24,000 TS
Drawn 54,000 TS
For pistons, good machining qualities

MIRA METAL
U S , 75 Cu, 16 3 Pb, 6 8 Sb, 0 24 Ni, 0 43 Fe, 0 62 Zn, 0.91 Sn
For valves, pipes, acid and corrosion resisting

MIRAMINT
W,C+Co
For hard cutting tools and dies, sintered.

MIR-O-COL
M-988, Cr, Mo, W, Co
For hard surfacing welding electrode, wear resistant.

MIR-O-COL NO 1
M-988, 3-4 C, 11-13 Cr, 1 0-1.5 Mn, 2-3 Si, 4-6 Ni, 8 10 Mo, bal Fe
Welded 600-650 Brin
For welding rod for plowshares, shovels, root cutters, austenitic, abrasion resistant

MIR-O-COL NO 3.
M-988, 1 75-2.2 C, 0 5-1.0 Mn, 0.6-0.9 Si, 8-9 Cr, bal Fe
Cast 45,000 TS; 0 El, 480 Brin.
For hard facing welding rod, impact and abrasion resistant, tough, hard.

MIR-O-COL NO 4
M-988, 1 0-1 5 C, 12-14 Mn, 0 8 Si, 0.5-1.0 Mo, bal Fe.
Welded: 60,000 TS; 22 El; 250 Brin.
For hard facing rod; martensitic, impact and abrasion resistant.

MIR-O-COL NO 4T-S.
M-988; Cr, Mo, W, Co.
For hard facing electrode; ductile.

MIR-O-COL NO. 5.
M-988; 0.7-1.0 C, 0.75-1.25 Mn, 3.0-3.5 Ni, 6.5-8.0 Mo, 0.4 Co, 0.8 B, 1.2 Si, 3.5-4.5 Cr, bal Fe.
Welded: 500 Brin.
For welding rod for hot cutting dies, shears and tools; corrosion, heat and abrasion resistant.

MIR-O-COL NO. 6.
M-988; 0.9-1.2 C, 26-30 Cr, 0.5 max Ni, 0.5 max Mo, 3 max Fe, 3.5-5.0 W, bal Co.
Welded: 400-440 Brin.
For welding rod for diesel engine valves; corrosion, abrasion and heat resistant.

MIR-O-COL NO. 11.
M-988; C, Co, Cr, W.
Cast: 500-520 Brin.
For hard facing electrode; corrosion and abrasion resistant.

MIR-O-COL BR.
M-988; C, Cr, Ni, Mo, bal Co.
For hard facing rod; abrasion and impact resistant.

MIRRALOY.
M-15; C, bal Fe.
For journals, shafting; turned, ground and polished

MIRROMOLD see CARPENTER MEL-TROL MIRROMOLD

MIRYCAL.
M-1067; 0.5 C, 0.25 Mn, 0.95 Cr, 1.0 W, 0.2 Mo, bal Fe.
For tools, dies, punches, shear blades, boiler makers' tools; shock resistant.

MIRYCAL CHISEL.
M-434; 0.45 C, 1.0-1.25 W, 0.85-0.95 Cr, 0.15-0.20 Mo, 0.2-0.3 Mn, bal Fe.
For battering tools, chipping chisels, beading tools, rivet busters, cold sets, swages, track chisels, hot dies; tough, shock resistant.

MISCHMETAL.
M-111; 50 Ce, 45 Lathanum + didymium
For pyrophoric alloy in cigarette lighters, removes gas from radio tubes.

MISCO 16.
M-84; 0.2 max C, 16 Cr, bal Fe
For heat and corrosion resistant parts; heat and corrosion resistant.

MISCO 16-8 16C.
M-84; 0.16 max C, 8-10 Ni, 18-20 Cr, 1 max Mn, 2 max Si, bal Fe.
Annealed: 80,000 TS; 40,000 YS; 50 El; 60 RA; 170 Brin.
For stainless castings; corrosion resistant.

MISCO 18-8.
M-84; 0.16 C, 18 Cr, 8 Ni, bal Fe.
85,000 TS; 45,500 YS; 40 El, 50 RA.
For stainless parts, chemical engineering equipment, resists sulfurous acid.

MISCO 18-8.07C.
M-84, 0.07 max C, 8-10 Ni, 18-20 Cr, 1 max Mn, 2 max Si, bal Fe.
Annealed: 75,000 TS; 42,000 YS; 55 El; 65 RA; 156 Brin.
For stainless castings; corrosion resistant.

MISCO 18-8.10C.
M-84; 0.10 max C, 8-10 Ni, 18-20 Cr, 1 max Mn, 2 max Si, bal Fe.
Annealed· 75,000 TS; 42,000 YS; 55 El; 65 RA; 156 Brin.
For stainless castings; corrosion resistant.

MISCO 18-8Cb.
M-84; 0.10 max C, 8-10 Ni, 18-20 Cr, Cb = 8 + C, bal Fe.
Cast: 70,000 TS; 35,000 YS; 40 El; 40 RA; 190 Brin.
Annealed: 82,000 TS; 42,000 YS; 40 El; 40 RA; 179 Brin.
For chemical and plastic plant equipment; Type 347; stainless, austenitic.

MISCO 18-8 MO.
M-84; 0.10 C, 18 Cr, 8 Ni, 3 Mo, bal Fe
Annealed· 85,000 TS; 45,000 YS; 50 El; 60 RA; 179 Brin
For stainless parts; stainless.

MISCO 18-8 Se.
M-84; 0.16 max C, 8-10 Ni, 18-20 Cr, 0.2-0.3 Se, bal Fe
Annealed: 80,000 TS; 40,000 YS; 50 El; 50 RA; 183 Brin.
For corrosion resistant parts, castings; corrosion resistant

MISCO 18-8 Ti
M-84; 0.10 max C, 8-10 Ni, 18-20 Cr, Ti = 4 × C, bal Fe
Annealed 70,000 TS; 35,000 YS, 40 El; 40 RA.
For stainless castings, stainless.

MISCO 20
M-84, 0.07 max C, 27.5-30.5 Ni, 19-22 Cr, 2-3 Mo, 3.5-4.5 Cu, 0.7 Mn, 1.5 max Si, bal Fe.
Annealed 70,000 TS, 34,000 YS; 38 El; 45 RA, 143 Brin
For corrosion resistant castings; resists H_2SO_4.

MISCO 22
M-84, 0.18-0.25 C, 0.6-0.7 Mn, 0.4-0.5 Si, bal Fe
Cast. 60,000 TS, 30,000 YS; 26 El; 38 RA, 120-149 Brin
For gears, pinions, shafts, housings; water hardened

MISCO 25
M-84, 0.22-0.28 C, 0.7 Mn, 0.5 Si, bal Fe.
Cast 70,000 TS, 38,000 YS, 24 El, 36 RA; 143-179 Brin
For gears, shafts, housings, machinery parts, water hardened.

MISCO 25-20
M-84, 0.3-0.4 C, 19-21 Ni, 24-26 Cr, bal Fe.
Cast 229 Brin
For heat resistant castings, corrosion and heat resistant

MISCO 27
M-84; 0.24-0.30 C, 0.8 Mn, 0.5 Si, bal Fe
Cast 75,000 TS, 43,000 YS, 22 El; 30 RA; 149-187 Brin
For machine tool castings, gears, housings, shafts, water hardened.

MISCO 28
M-84; 0.2 max C, 28 Cr, bal Fe
For heat and corrosion resistant parts; heat and corrosion resistant.

MISCO 28-15.
M-84; 0.4 max C, 14.5-16.5 Ni, 27-30 Cr, bal Fe
Cast· 70,000 TS; 40,000 YS; 12 El, 15 RA.
For heat resistant castings; corrosion and heat resistant.

MISCO 28-20.
M-84; 0.4 max C, 19-21 Ni, 27-30 Cr, bal Fe.
Cast
For heat resistant castings; corrosion and heat resistant.

MISCO 30-30.
M-84; C, 30 Cr, 30 Ni, bal Fe.
For chemical engineering equipment; heat and corrosion resistant.

MISCO 430.
M-84; 0.2 C, 17 Cr, bal Fe.
For corrosion resistant castings; corrosion resistant; Type 430.

MISCO "A."
M-81; 1.0 C, bal Fe.
For mining tools, chisels, quarry and track tools; water hardening.

MISCO "A"
M-84, 0.2 max C, 80 Ni, 14 Cr, bal Fe
For exhaust manifolds, springs, heat resistant.

MISCO B
M-81, 0.75 C, 0.30 Si, 0.30 Mn, bal Fe
For mining tools, chisels, hammers, water hardened

MISCO B
M-84; 0.25 C, 25 Cr, 13 Ni, bal Fe
For corrosion and heat resisting parts, chemical engineering equipment, corrosion and heat resistant.

MISCO B-1
M-84, 0.5 C, 25 Cr, 13 Ni, bal Fe
For heat and corrosion resisting parts; heat and corrosion resistant

MISCO "C"
M-84, 0.2-0.3 C, 28-30 Cr, 8-10 Ni, 0.6-0.8 Si, bal Fe
Cast. 90,000-95,000 TS; 60,000-65,000 YS, 28-23 El, 36-30 RA, 197-212 Brin
For use in sulfite industry, castings, valves; corrosion resistant

MISCO C-1
M-84, 0.5 C, 29 Cr, 9 Ni, bal Fe.
For heat and corrosion resisting parts, heat and corrosion resistant.

MISCO C-Mo
M-84, 0.18-0.25 C, 0.7 Mn, 0.5 Si, 0.5 Mo, bal Fe
Cast 70,000 TS; 45,000 YS, 24 El, 35 RA; 143-179 Brin
For machine tool castings, gears, housings, shafts, water hardened

MISCO CROMO
M-84, 0.27-0.33 C, 1.4 Mn, 0.5 Si, 0.9 Cr, 0.3 Mo, bal Fe
Cast: 100,000 TS; 70,000 YS; 18 El, 30 RA; 202-235 Brin
For machinery castings, gears, shafts, housings, oil hardened

MISCO GRADE A
M-84, 0.5-0.7 C, 35-37 Ni, 15-17 Cr, bal Fe.
For furnace parts, retorts, carburizing boxes; resists heat to 1950°F.

MISCO "H.N"
M-84, 0.6-0.7 C, 15-18 Cr, 60-65 Ni, bal Fe.
For heat treating boxes, furnace parts, valves, stills, resists H_2SO_4; heat, wear and corrosion resistant.

MISCO HN-1.
M-84; 0.5-0.8 C, 16-20 Cr, 66-70 Ni, bal Fe.
Cast: 60,000 TS; 36,000 YS; 3 El; 217 Brin.
For stainless steel castings, furnace equipment; acid resistant

MISCO HN-2.
M-84; 0.7 C, 18 Cr, 65 Ni, bal Fe.
For chemical engineering equipment; resists H_2SO_4.

MISCO K.
M-84; 0.2 C, 25 Cr, 20 Ni, bal Fe.
For stainless and heat resistant castings; Type 310 corrosion and heat resistant.

MISCO METAL.
M-84; 0.5 C, 38 Ni, 18 Cr, 1.5 Si, bal Fe.
Cast: 68,000 TS; 40,000 YS; 10 El; 10 RA; 187 Brin.
For furnace parts, annealing boxes, retorts; heat and corrosion resistant.

MISCO MS
M-84; 0.45 C, 18 Cr, 38 Ni, bal Fe.
Cast: 70,000 TS; 45,000 YS; 5 El; 6 RA; 190 Brin.
For castings subject to cyclic heating; resists thermal fatigue.

MISCO N
M-84, 0.4 C, 9 Cr, 21 Ni, bal Fe
75,000 TS, 45,000 YS; 30 El; 40 RA
For chemical engineering equipment; resists sulfuric acid

MISCO N-5.
M-84, 0.4 C, 30 Ni, 4 Si, bal Fe.
For chemical engineering equipment, resists H_2SO_4.

MISCROME 1.
M-84; 0.25-0.35 C, 13-15 Cr, bal Fe.
Cast. 10,000 TS; 72,000 YS; 17 El; 25 RA; 200 Brin.
Heat treated. 123,000 TS; 98,000 YS, 20 El; 44 RA
For chemical engineering equipment; resists HNO_3.

MISCROME 2.
M-84, 0.25 C, 21 Cr, bal Fe.
For chemical engineering equipment; resists HNO_3.

MISCROME 3.
M-84, 0.25 C, 28 Cr, bal Fe
For chemical engineering equipment; resists HNO_3

MISCROME NO 4
M-84, 0.15 C, 13 Cr, bal Fe.
Heat treated 185,000 TS, 138,000 YS, 1 El; 4 RA, 328 Brin
For corrosion resisting parts; corrosion resistant.

MISCROME 5
M-84, 1.4-1.6 C, 12-14 Cr, 0.9-1.1 Mo, 0.5 max Ni, 0.5-0.7 Mn, bal Fe.
Annealed 269 Brin
Heat treated. 131,000 TS; 352 Brin.
For wear and corrosion resistant castings, castings, hard, wear resistant.

MISCROME CR
M-84, 2.5 C, 16 Cr, bal Fe
For heat and corrosion resisting parts, grids; heat and corrosion resistant.

MISCROME KR.
M-84; 1.6 min C, 24-30 Cr, bal Fe.
For heat and corrosion resistant parts; heat and corrosion resistant.

MISHIMA STEEL.
Japan; 10 Al, 25 Ni, bal Fe.
For permanent magnets; high coercive force, sintered.

MITCHALLOY A.
M-536; 2.9-3.1 T.C., 2-2.5 Ni, 0.3-0.6 Cr, bal Fe.
45,000-50,000 TS; 240-280 Brin.
For brake drums; wear resistant.

MITCHALLOY B.
M-536; 2.8-3.5 C, 4-5 Ni, 1.5-2.0 Cr, bal Fe.
Sand cast: 40,000-50,000 TS; 550-650 Brin.
For pulverizers, grinders, mixers, wear and abrasion resistant.

MITCHALLOY C.
M-536; 2.7-3.0 T.C., 12-15 Ni, 5-7 Cu, 1.5-4.0 Cr, bal Fe.
Cast: 20,000-35,000 TS, 140-190 Brin.
For heat and corrosion resistant parts, austenitic

MITCHALLOY D.
M-536; 3.3 C, 2.6 Si, 1.5 Ni, 0.8 Cr, bal Fe.
For gratebars, alloy cast iron

MITIA GR. A.
M-56, WC, Co
For tipped cutters; for cast iron, tough, intermittent cutting.

MITIA GR B
M-56, WC, Co.
For tipped cutters; for general purpose.

MITIA GR C
M-56, WC, Co.
For tipped cutters; hard grade for cutting chilled cast iron.

MITIA GR TA
M-56; WC, Co.
For tipped cutters, general purpose cutting

MITIA GR TA5
M-56, WC, Co
For tipped cutters, for rough cutting steel

MITIA GR. TE
M-56; WC, Co
For tipped cutters; hard and wear resistant grade for finish turning

MITIA GR. TEIO.
M-56, WC, Co
For tipped cutters, for mild and low alloy steels

MITIFINE.
M-123, Babbitt containing no Pb and more Sn
For heaviest marine engine bearings, cross-heads, heavy machine Babbitts, free flowing, great toughness, slight shrinkage

MITIS IRON.
Eng.; 0.06-0.27 Al, C, bal Fe
For pipes, fittings; wrought iron deoxidized with Al.

MITSUBISHI SH-IS-54.
M-1543, 0.12-0.17 C, 0.8-1.1 Mn, 0.35-0.60 Si, 0.40 max Cu, bal Fe.
Rolled 77,000-88,000 TS, 50,000 min YP, 20 min El.
For railroad and mine cars, bridges, agricultural equipment.
High-tensile, low alloy constructional steel

MITSUBISHI SH-IS-60.
M-1543; 0.15-0.21 C, 0.95-1.25 Mn, 0.50-0.80 Si, bal Fe
Rolled: 85,000-100,000 TS; 54,000 min YP; 17 min El.
For railroad and mine cars, bridges, agricultural equipment.
Constructional steel, tough.

MIXEND 60.
M-677; 60 Ni, 40 Fe.
Welded: 262 Brin.
For welding rod; machinable welds on high P-cast iron

MIXEND 99.
M-677; 99 Ni.
Welded 150 Brin.
For welding rod; machinable welds on cast iron.

M-K-9.
M-859, 4 Cu, bal Al.
Rolled: 60,000 TS, 30 El, 70 Brin.
For light alloy parts, age-hardenable.

MK9-AS
M-859, 4 Si, 5 Cu, bal Al
Cast 35,000 TS
Wrought 47,500 TS
For light alloy parts; age-hardenable.

M K STEEL
Japan, 10-40 Ni, 1-20 Al, bal Fe
For magnets, not forged readily

M K STEEL
Japan; 25 Ni, 10 Al, bal Fe
For magnets, must be cast to shape

MI
M-1, 0.8 C, 18 W, 4 Cr, 2 V, 0.75 Mo, bal Fe.
For tools, cutters, high speed steel.

ML-ALLOY
U.S., 4 Cu, 2 Ni, 2 Mg, 0.3 Mn, 0.05 V, 0.1 Ti, bal Al
Cast 33,000 TS
At 600°F 17,000 TS
For aircraft castings, cylinder heads, pistons, age-hardenable, high temperature use

ML-ALUMINUM
U.S., 4 Cu, 2 Ni, 2 Mg, 0.1 Ti, 0.3 Cr, 0.1 V, 0.3 Mn, bal Al.
Cast 36,000 TS, 31,000 YS, 1.2 El.
At 600°F 17,000 TS; 14,500 YS; 9.0 El.
For aircraft parts, cylinder heads, pistons; good high temperature properties

M L STEEL
M-1, 0.8 C, 2 V, 18 W, 0.75 Mo, 4 Cr, bal Fe
Oil hardened
For high speed tools and cutters, high speed steel

M-M-1
M-365, 0.65-0.85 C, 7.5-9.5 Mo, 1.25-2.25 W, 3.5-4.5 Cr, 0.9-1.5 V, bal Fe
For tools, cutters, high speed steel.

MM 6 & 6
M-365, 0.83 C, 4.15 Cr, 1.9 V, 6.35 W, 5.0 Mo, bal Fe.
High speed steel for cutting tools, Mo-W type, AISI M2

M M M
M-230, M-636, 57.5 min, Ni, 26.0 min Cu, 9.25 max Sn, bal Fe, Si, Mn
Cast 70,000 TS; 45,000 YS, 17.5 El
For valves for superheated steam, modified "Monel" Metal

MMV
M-365, 1.15 C, 4.0 Cr, 2.8 V, 6.0 W, 5.25 Mo, bal Fe
High speed steel for cutting tools, molybdenum-tungsten type; AISI M3, Class 2.

"MNS" NICKEL.
M-121; 1.5-2.25 Mn, high C, Si, 96 min Ni.
Rolled: 80,000 TS; 24,000 YS; 56 El; 76 RA; 139 Brin.

For water meter components, small machined parts; corrosion resistant.

Mo-1.
M-Japan; 23 Mo, 2.5 Cr, bal Fe.
For permanent magnets in magnetic and electrical equipment. High permeability.
Precipitation hardening.

Mo10.
M-459; 0.80 C, 9.0 Mo, 3.8 Cr, 1.75 W, 1.2 V, bal Fe.
For lathe and planer tools, reamers, broaches, taps; high speed steel.

Mo-20
M-459; 0.85 C, 4.2 Cr, 5 Mo, 2 V, 6.5 W, bal Fe
For lathe and planer tools, hobs, drills, reamers, high speed steel, oil hardened

Mo-30
M-459, 1.2 C, 4.2 Cr, 5 Mo, 3.2 V, 6.2 W, bal Fe
For lathe and planer tools, milling cutters, hobs; high speed steel

M.O 81 STEEL
M 1116, 0.87 C, 4 Cr, trace W, 8.5 Mo, 2 V, bal Fe
Air or oil harden to 61-65 Rc.
For twist drills, "hand" taps, dies, extra long drills
AFNOR· Z 90 DV 09.02, US-AISI M10

M O. 82 STEEL
M-1116, 0.84 C, 4 Cr, 1.4 W, 8 Mo, 1.5 V, bal Fe
Air or oil harden to 62-66 Rc
For twist drills, end mills, reamers, taps, counter bores, hobbing cutters
AFNOR Z 85 DVW 08.02.01, US-AISI M1,
Germany S 2.9.1 (B Mo 9), W nr 1.3346

M O 83 STEEL
M-1116, 1.0 C, 4 Cr, 1.4 W, 8.5 Mo, 1.9 V, bal Fe
Air or oil harden to 62-66 Rc
For drills (deep hole), taps (blind holes), counter bores, end mills
AFNOR Z 100 DVW 08.02.01,
US-AISI M7,
Germany S 2.9.2 (B Mo 9V), W.nr 1.3348

M O 88 STEEL
M 1116, 1.10 C, 3.8 Cr, 1.5 W, 9.5 Mo, 1.2 V, 8 Co, bal Fe
Air or oil harden to 63-70 Rc
For turning, drilling, milling, planing extra hard or tough materials
AFNOR Z 110 DKWV 10.08.02.01,
US AISI M 42

Mo-325.
M-459, 0.95 C, 4 Cr, 2.5 Mo, 2.5 V, 2.8 W, bal Fe
For milling cutters, hobs, drills, broaches, high speed steel, oil hardened

Mo-325 X.
M-459, 0.9 C, 4 Cr, 2.5 Mo, 2.5-3 V, 2.2 W, 2.5 Co, bal Fe
For tools, dies, cutters, oil hardening

Mo-1225 X
M-459, 0.9 C, 4 Cr, 2.5 Mo, 2.5-3 V, 1.0 W, 1.05 Co, bal Fe.
For tools, dies, cutters; oil hardening

MOCAR
M 959, 10 Sn, 15 Sb, bal Pb
For bearings for connecting rods and camshafts; Babbitt

MOCARB.
M-140; 1.0 C, 5 Mo, 6.5 W, 4.2 Cr, 1.9 V, bal Fe.
Hardened: C 64-67 Rock.
For lathe and planer tools, broaches, rolls, hobs, reamers, end mills, milling cutters.
High-speed steel. High hot-hardness and wear resistance

MOCASCO.
M-601; 3.2 C, 2.5 Si, 1 Cr, bal Fe.
For castings, cast iron.

MOCASCO 30
M-601, 3.25-3.35 T.C , 2.0-2.2 Si, 1.0-1.35 Ni, 0.25-0.30 Cr, bal Fe.
Cast 30,000 TS; 200 Brin
For air compressor cylinders, motor blocks and heads, wear and heat resistant

MOCASCO 40.
M-601, C, 0.35 Mo, bal Fe
40,000 TS, 200 Brin
For cylinder heads and liners, gears, valves.

MOCASCO 50
M-601, C, 1.5 Ni, 0.6 Mo, bal Fe
Cast. 50,000 TS, 241 Brin
For castings, pistons, gears, valves; cast iron.

MOCASCO 60
M-601, C, 1.5 Ni, Cr, 0.90 Mo, bal Fe.
Cast 60,000 TS, 228-260 Brin
For gears, brake drums, pump and hydraulic castings, cast iron

Mo-CHIP
M-57, 0.7 C, 8 Mo, 2.5 Co, 0.5 Cr, 1.0 V, bal Fe
For tools, cutters, lathe and planer tools, high speed steel, oil hardened.

MOCK GOLD-1
Eng , 80-67 Cu, 20-29 Pt, 0-4 Zn
For ornaments, corrosion resistant

MOCK GOLD-2.
Eng , 6 Ni, 1 Pt, 1 Ag, 1 Brass
For ornaments, corrosion resistant.

MOCK SILVER
Eng , 84 Al, 10 Sn, 5.5 Cu, P
For instruments, fittings, ornamental; corrosion resistant

MOCUT
M-140, 0.60 0.85 C, 3.5-4.0 Cr, 0.9-1.3 V, 1.3-1.8 W, 7.75-9.0 Mo, bal Fe
For twist drills, lathe and planer cutters, reamers, hobs, Type M 1, high speed steel.

MODERN.
M-613, 0.7 C, 18 W, 4 Cr, 1 V, bal Fe
For cutters, tools, high speed steel

MODIFIED MONEL
M-230; 60-65 Ni, 24-27 Cu, 9-11 Sn, 1-3 Fe.
Cast. 70,000 TS, 45,000 YS, 17 El.
For valves for super heated steam; corrosion resistant.

MODIFIED MONEL METAL
M-230, 60-65 Ni, 24-27 Cu, 9-11 Sn, 1-3 Fe, Mn, Si
For valves for superheated steam, v.M M M

MODIFIED "OUNCE" METAL.
M-126, 84 Cu, 5 Sn, 5 Pb, 5 Zn, 1 Ni.
For fittings, valves, hardware castings; pressure tight.

MODULVAR.
M-771; 36 Ni, bal Fe.
Annealed: 70,000 TS; 24,000 YS; 36 El; 68 RA; 143 Brin.
Cold drawn: 90,000 TS; 70,000 YS; 20 El; 60 RA; 185 Brin.
For instruments, chronometers; high positive thermoelastic coefficient.

MOGUL.
M-69; 0.78 C, 4 Cr, 1.5 W, 1.15 V, 8.7 Mo, bal Fe.
Annealed: 228-241 Brin.
For reamers, drills, lathe and planer tools, hobs; Type M1; high speed steel.

MOHAWK HOT DIE.
M-1; 0.45 C, 14 W, 3.5 Cr, 0.60 V, bal Fe.
Oil hardened: 310,000-268,000 TS; 1-23 El; 5-79 RA; 600-321 Brin For high speed steel tools, hot punches, extrusion dies, shearing dies; hot work steel; Iz-13.8-67.4.

MOHECO.
M-601; 2.85-3.05 T.C., 1.75-2.10 Si, 0.6-0.8 Mn, 1.75 Ni, 0.90 Cr, bal Fe.
Heat treated: 525 Brin.
Cast: 220 Brin.
For dies, drawing dies; wear resistant.

MOHICAN.
M-435; 0.8 C, 1.5 W, 4 Cr, 1 V, 8.5 Mo, bal Fe
For tools, cutters, broaches, milling cutters; high speed steel.

MOHICAN 6.
M-435; 0.62 C, 1.7 W, 3.75 Cr, 8.7 Mo, 1 V, bal Fe.
At 400°F: 243,000 TS; 3.6 El; 8.1 RA; 477 Brin.
For hot punches, shear blades, forming dies; shock and wear resistant, high red hardness

MOHICAN 8
M-435; 0.80 C, 1.5 W, 4 Cr, 9 Mo, 1.2 V, bal Fe.
For twist drills, hobs, mills, hot punches, tough, high speed steel.

MOIL POINT.
M-38; 0.8 C, 0.5 Mn, 0.35 Si, bal Fe.
For battering tools, moil points; tough, oil hardening.

MOLDALOY
M-1056; Bi, Pb, Sn, Sb.
Cast: 11,500 TS, 22 Brin.
For molds, forming dies, forging dies, chuck jaws; M.P. 430°F; molding alloy.

MOLDIE.
M-336; 0.9 C, 2.25 Mn, 0.1 V, bal Fe.
For Bakelite and rubber molds; steam resistant.

MOLDTEM.
M-64; C, Cr, Mo, V, bal Fe.
Heat treated: 340 Brin
For zinc die casting dies, plastic mold dies; prehardened, hot work steel.

MOLECULOY.
M-1523; 20 Cr, 3 Al, 2 Co, bal Ni.
Resistance wire: 800 ohms per circular mil ft.
Ann: 130,000 psi ave; hard drawn: 250,000 psi.
For winding precision resistors and potentiometers; max. operating temp.: 250°C.

MOLECULOY III.
M-1523; 20 Cr, 4 Al, 5 Mn, 1 Si, bal Ni.
Resistance wire: 835 ohms per cir.mil.ft.
Ann: 130,000 psi; hard drawn: 260,000 psi.
Max. oper. temp.: 250°C.

MOLEGRAIN.
M-1455; 3.3 C, alloy, Si, Mn, bal Fe.
For gears, shafts, housings, cast iron.

MOLEL.
M-432; C, alloy, bal Fe.
For tools, cutters, punches; oil hardened.

MOLEX NO 5.
M-15; C, alloy, bal Fe
For crushers, punches, wrenches, wedges; shock and abrasion resistant.

MOLEX NO. 6.
M-15; C, alloy, bal Fe.
For gages, chuck jaws, knives, reamers; oil hardened, shock and wear resistant.

MOLEX NO 7.
M-15; C, alloy, bal Fe
For bushings, cam rollers, shear blades, forming dies, oil hardened, wear resistant.

MOLEX NO 8.
M-15; 1.1 C, 0.75 Mn, 0.5 Si, 5.5 Cr, 0.3 V, 1.3 Mo, 0.015 P, 0.015 S, bal Fe.
Air hardening tool steel for cold working tools.

MOLEX NO 8 MODIFIED.
M-15; 0.55 C, 0.9 Mn, 0.25 Si, 3.5 Cr, 0.25 Ni, 0.25 V, 1.4 Mo, bal Fe.
Air hardening tool steel

MOLEX-A.
M-15; C, alloy, bal Fe.
For dies, gauges, broaches, shears, reamers; wear resistant, oil hardened.

MOLEX-O
M-15; C, alloy, bal Fe
Annealed: 202 Brin
For blanking and drawing dies, shear blades; oil hardened, non-deforming

MOLIN METAL
M-1399; Al, bal Cu
Cast
For gears, shafts, bearings; aluminum bronze.

MOLIN METAL.
M-1456, Al, bal Cu.
For molds, dies; Al-bronze.

MOLITE
M-35, 0.8 C, 4 Cr, 5 Mo, 6.5 W, 1.9 V, bal Fe.
For tools, cutters, taps, reamers, broaches; high speed steel

MOLITE 2
M-35; 0.86 C, 6.25 W, 5.0 Mo, 4.15 Cr, 1.9 V, bal Fe.
For milling cutters, twist drills, broaches, reamers; AISI M2 high speed steel

MOLITE 2 SMOOTHCUT.
M-35, 0.86 C, 6.25 W, 5.0 Mo, 4.15 Cr, 1.9 V, bal Fe, plus free machining additions
For gear cutters, twist drills, reamers, broaches; AISI M2 high speed tool steel.

MOLITE 3.
M-35; 1.0 C, 4 Cr, 5 Mo, 6 W, 2.7 V, bal Fe
For cutters, drills, hobs, reamers, broaches; high speed steel; Type M3.

MOLITE 3 SMOOTHCUT Type 1.
M-35, 1.03 C, 6.25 W, 6.25 Mo, 4.0 Cr, 2.5 V, sulphides, bal Fe.
Hardened: C 64-66 Rock.
For broaches, taps, dies, reamers; from tools, hobs, slitting saws.
High speed steel; high red-hardness.
Good machinability rating. AISI M3 (class 1).

MOLITE 3 Type 2.
M-35; 1.2 C, 6.25 W, 6.25 Mo, 4.0 Cr, 3 V, bal Fe.
Hardened: C 64-66 Rock.
For broaches, form tools, taps, dies, milling cutters, cut-off tools.
High speed steel; high red-hardness.
AISI Type M3 (Class 2).

MOLITE 4.
M-35; 1.28 C, 5.50 W, 4.5 Mo, 4.5 Cr, 4.0 V, bal Fe.
Hardened: C 64-66 Rock.
For broaches, counterbores, drills, reamers, milling cutters.
High speed steel. High red-hardness.
AISI Type M4.

MOLITE HW60.
M-35, 0.63 C, 8.25 Mo, 4 Cr, 1.9 V, bal Fe.
Ht. Tr. 202,000 TS, 197,000 YS, 2 El; C 56 Rock.
For hot upsetting and forming dies, hot dummy blocks, hot or cold header dies.
Hot work steel Type H43, shock resistant.

MOLITE 5.
M-35, C, alloy, bal Fe.
For tools, dies; oil hardening.

MOLITE 8.
M-35; C, alloy, bal Fe.
For tools, dies, oil hardening.

MOLITE 9.
M-35, C, alloy, bal Fe.
For tools, dies, oil hardening.

MOLITE HW10.
M-35, 0.85 C, 4 Cr, 2 V, 8 Mo, bal Fe.
For tools, cutters, reamers, drills; high speed steel, oil hardened.

MOLITE M-1.
M-35, C, Cr, Mo, V, bal Fe.
For cutting tools, high speed steel.

MOLITE M2.
M-35; 0.7 C, 4 Cr, 5 Mo, 6.5 W, bal Fe.
For lathe and planer tools, drills, reamers, taps, high speed steel.

MOLITE SMOOTHCUT.
M-35, 0.8 C, 4 Cr, 2 V, 6 W, 5 Mo, bal Fe.
For lathe and planer tools, drills, taps, hobs, reamers, Type M2, high speed steel.

MOLMANG.
M-374, C, 11-13.5 Mn, bal Fe.
Welded: 500-600 Brin.
For welding electrodes for build-up work; austenitic, work hardens.

MO-LO.
M-1456, 3 C, Mn, Si, bal Fe.
For piston rings, cylinder liners, bushings; cast iron.

MOLTROP.
M-860; 0.3-0.5 C, bal Fe.
For gears, shafts, water hardened.

MOLVA-T.
M-373, 0.8 C, 4 Cr, 2 V, 5 Mo, 6 W, bal Fe.
For lathe and planer tools, drills, form cutters, hot punches; high speed steel.

MOLY 8.
M-1433; 0.60 C, 3.6 Cr, 1.75 V, 8.5 Mo, bal Fe.
For hot work tools, shears, punches; Type H12; hot work steel.

MOLY ARK.
M-261; 0.7 C, 5.5 W, 4 Mo, 4 Cr, 1.5 V, bal Fe.
For tools, cutters; high speed steel.

MOLY ASCOLOY.
M-1509; 0.08 C, 13 Cr, 2 Mo, bal Fe.
For jet engine parts, afterburners, nozzles, bolts; high strength and high heat resistance.

MOLY B 100.
M-1246, 50 Mo, 50 W.
For high vacuum tubes; sintered alloy.

MOLYBDENITE.
M-451; C, Cr, Mo, bal Fe.
For mill pinions, guides, rolls.

MOLYBDENUM-0.05 Zr.
M-151, 0.05 Zr, bal Mo.
Rolled Rod. 127,700 TS; 108,400 YS; 20 El; 60 RA.
Recrystallized Sheet: 78,800 TS; 63,500 YS; 40 El.
Stress Relieved Sheet: 126,000 TS; 115,800 YS; 13 El.
For high temperature applications, heat engines, nuclear reactors, glass molding dies.
High heat and corrosion resistance.

MOLYBDENUM-50W.
M-151, M-1246, 0.008 C, 49.3 W, bal Mo.
Stress Relieved: 144,000 TS; 133,800 YS; 14 El.
Recrystallized 97,700 TS, 0 El.
For high temperature applications, heat engines.
High heat and corrosion resistant.

MOLYBDENUM CHISEL.
M-365, 0.6 C, 0.5 Mo, bal Fe.
For chisels, tools, oil hardened.

MOLYBDENUM PERMALLOY.
M-1, 79 Ni, 4 Mo, bal Fe.
For audio and instrument transformers and shielding, high permeability.

MOLYBDENUM PERMALLOY 2-81.
M-22, 2 Mo, 81 Ni, 17 Fe.
For cores for loading coils in telephones, high permeability.

MOLYBDENUM PERMALLOY 2-81.
M-205, 2 Mo, 81 Ni, bal Fe.
For inductance and loading coils, low magnetic core loss.

MOLYBDENUM PERMALLOY 2-81.
M-269, 2 Mo, 81 Ni, 17 Fe.
For inductance and loading coils, low magnetic core loss, high permeability.

MOLYBDENUM PERMALLOY, 4-79.
M-22, M-205; 4 Mo, 79 Ni, 17 Fe.
For high frequency and electrical apparatus; high permeability and resistivity.

MOLYBDENUM SILICON.
M-347; C, Mo, Si, bal Fe.
Heat treated: 100,000-110,000 TS, 197-228 Brin.
For pistons, brake drums; wear resistant.

MOLYBDENUM STEEL.
Eng.; 0.15-0.40 Mo, 0.1-0.45 C, 0.6-1.3 Mn, 0.3-0.5 Si, bal Fe.
For machinery parts, gears, shafts; tough.

MOLYBDIE GRADE FM.
M-55; C, Cr, Ni, Mo, bal Fe.
For dies adapted for the limited production of all types of drop forgings; resistant to heat abrasion.

MOLYCUT 562.
M-56 0.82 C, 4.1 Cr, 5 Mo, 1.9 V, 6.4 W, bal Fe.
For lathe and planer tools, drills, broaches, taps; high speed steel.

MOLY HIGH SPEED.
M-81; 0.80 C, 4 Cr, 4.2 Mo, 1.5 V, 5.5 W, bal Fe.
For lathe and planer tools, hobs, broaches; Type M1; high speed steel.

MOLY-IRON.
M-278; C, 1 Mo, 1 Cr, bal Fe.
Cast: 55,000 TS; 240 Brin
For heat and abrasion resistant castings; heat and abrasion resistant.

MOLYITE
M-35; C, 9 Mo, 4 Cr, 2 V, bal Fe
For tools, cutters; high speed steel.

MOLY-MANG.
M-118; C, 11-13 Mn, bal Fe
For welding rod for high Mn steel; austenitic, wear and abrasion resistant.

MOLYMET.
M-61; 45 Ni, 45 Fe, 10 Mo.
For radio grid wire.

MOLYNEAUX FUSIBLE ALLOY.
France; 41.5 Bi, 16.7 Sn, 25 Pb, 16.7 Cd
For fuses, fire extinguishers; M P 60°C

MOLY-NICKEL
M-810; C, Mo, Ni, bal Fe.
For welding rod.

MOLY PERMALLOY.
M-1, 79 Ni, 4 Mo, 17 Fe.
Annealed: 64,000 TS, 18,500 YS; 27 El; 116 Brin.
Rolled. 160,000 TS; 150,000 YS; 1 El, 280 Brin.
For toroid, tape and lamination cores for transformers and relays, magnetically soft, high permeability.

MOLY PERMINVAR-3.
M-22; 33.7 Fe, 34 Ni, 29 Co, 3 Mo, 0.3 Mn
For magnetic amplifiers

MO-MANG.
M-9; 0.7-0.9 C, 12-14 Mn, bal Fe.
For welding rod, for Mn steel

Mo-MANG
M-642, 0.8 C, 14 Mn, 0.2 Mo, bal Fe
Cast· 200 Brin.
For welding electrodes; work hardens to 550 Brinell.

MOMARC.
M-115; 1.0 C, 1.4 Cr, 1.0 Mo, bal Fe
Normalized: 185,000 TS; 139,000 YS; 13 El, 360 Brin.
For ball bearings, special rolls, precision gauges, arbors, dies.
Wear and abrasion resistant, oil or water hardening.

MONACA.
M-755; 0.5 C, bal Fe.
For gears, shafts; water hardening.

MONACA DRILL ROD.
M-370, 1.15-1.30 C, bal Fe.
Ground and polished drill rod
For instrument shafts, twist drills, jewelers tools.
Type W1 water hardening tool steel

MONACA SPECIAL
M-370; 0.7-0.9 C, 0.2 V, bal Fe.
For tools, drills, taps, reamers, hobs, broaches; Type W2; water hardened.

MONAR 816.
M-677, 0.09 C, 0.8 Mn, 0.08 Si, 65.5 Ni, 2.5 Ti, 1.0 Al, bal Cu.
For bare monel welding wires: class ER-NiCu-7.

MONARCH.
M-502; C, alloy, bal Fe.
For tools, dies; oil hardening.

MONARCH NO. 10.
M-863; Pb, bal Cu.
Cast. 30,000 TS, 22,000 YS, 60 Brin.
For bearings for pumps, electric motors and machine tools; for high speed and moderate load.

MONARCH NO. 12
M-863, Pb, bal Cu.
Cast 30,900 TS, 25,100 YS; 70 Brin.
For bearings for large presses, nail and wire machines, high speeds and moderate, heavy loads

MONARCH NO 16
M-863; Pb, bal Cu.
Cast 37,000 TS, 29,800 YS; 75 Brin
For bearings for large presses, cranes; extra heavy duty at low speeds.

MONARCH METAL
M-863, 20 Pb, 5 Sn, bal Cu.
For bearings, leaded.

MONARK
M-435, 0.6 C, 2 Si, 0.3 Cr, 0.2 Mo, bal Fe.
For tools, chisels, shock resisting

MONARK-1
M-435; 0.5 C, 0.4 Mn, 1.2 Si, 0.5 Mo, bal Fe
For chisels, pneumatic tools, water hardened

MONARK-2
M-435; 0.6 C, 0.75 Mn, 2 Si, 0.3 Cr, 0.2 Mo, bal Fe
For chisels, pneumatic tools, water hardened

MOND
M-86, 26 Cu, 70 Ni, 4 Mn
For turbine blades, pump rods, valve stems; corrosion resistant.

MONEL
M-121, 23 min Cu, 60 min Ni, 3.5 max Fe, 3.5 max Mn, 0.3 max C, 0.5 max Al, 0.5 max Si
Cast 65,000 TS; 30,000 YS, 35 El; 35 RA, 105 Brin
Hot rolled 95,000 TS, 65,000 YS, 35 El, 50 RA; 175 Brin
Cold drawn 125,000 TS; 95,000 YS, 15 El, 50 RA, 260 Brin.
For chemical plant, pickling equipment, pump rods, valve stems and seats, staybolts, corrosion resistant

MONEL 40
M-1499, 0.3 max C, 2.0 max Mn, 63-70 Ni, bal Cu
For acetylene welding rod.

MONEL 60
M-1499, 23 min Cu, 60 min Ni, 3.5 max Fe, 3.5 max Mn.
For inert gas metal arc welding Monel

MONEL 130.
M-897; 28-34 Cu, bal Ni.
For corrosion resistant parts; corrosion resistant.

MONEL-140.
M-68; 23 min Cu, 60 min Ni, 3.5 max Fe, 13 max C.
For welding electrodes, Monel overlay; corrosion resistant.

MONEL ALLOY 400
M-1499; 66.5 Ni, 0.15 C, 1.0 Mn, 1.25 Fe, 0.012 S, 0.25 Si, 31.5 Cu.
Annealed: 70,000-90,000 TS; 25,000-50,000 YS; 60-35 El; 110-149 Brin.
Cold drawn, St.Rel: 84,000-120,000 TS; 55,000-100,000 YS, 40-22 El; 160-225 Brin.
For valves and pumps, marine fixtures, tanks, piping, heat exchangers; corrosion resistant

MONEL ALLOY 401.
M 1499, 42.5 Ni, 0.05 C, 1.13 Mn, 0.38 Fe, 0.008 S, 0.13 Si, bal Cu.
For specialized electrical and electronic applications, wire wound resistors, bimetal contacts.

MONEL 402
M-1499; 0.12 C, 0.90 Mn, 1.2 Fe, 39.8 Cu, bal Ni
Hot rolled 90,000 TS, 65,000 YS, 35 El, 175 Brin
Cold drawn 95,000 TS; 85,000 YS, 25 El; 205 Brin
For corrosion resistant parts, chains, hooks, grates for H_2SO_4 pickling, corrosion resistant, resists hydrogen embrittlement.

MONEL 403
M-1499, 55-60 Ni, 2.5 max Fe, 2.2 max Mn, 0.75 max Si, bal Cu
Annealed: 65,000-85,000 TS, 23,000-45,000 YS; 35-50 El; 130-140 Brin
Hot rolled. 70,000-90,000 TS; 35,000-60,000 YS, 20-40 El, 130-170 Brin
For pickling equipment for H_2SO_4, cable sheathing, high corrosion resistance

MONEL ALLOY 404
M-1499, 54.5 Ni, 0.08 C, 0.05 Mn, 0.25 Fe, 0.012 S, 0.05 Si, 44.0 Cu, 0.03 Al.
For wave guides, metal to ceramic seals, transistor capsules, power tubes Low magnetic permeability; excellent brazing characteristics

MONEL ALLOY 474
M-68, 54 Ni, 46 Cu, 0.01 C, 0.01 Fe, 0.001 S.
At R T 60,000 TS, 25,000 YS
At 800°F 35,000 TS, 16,000 YS
For wave guides, transistor capsules, electronic power tubes, metal-to-ceramic seals
Corrosion and heat resistant

MONEL ALLOY 502
M-1499, 66.5 Ni, 0.05 C, 0.75 Mn, 1.0 Fe, 0.005 S, 0.25 Si, 28.0 Cu, 3.0 Al, 0.25 Ti.
Cold drawn 87,000 TS, 55,000 YS, 42 El; 158 Brin
Cold drawn and aged 140,000 TS, 94,000 YS, 25 El, 255 Brin
For fasteners, pump and propeller shafts, valve stems; machinable, age hardenable

MONEL ALLOY K-500
M-1499, 66.5 Ni, 0.13 Cu, 0.75 Mn, 1.0 Fe, 0.005 S, 29.5 Cu, 3.0 Al, 0.63 Ti
Annealed 90,000-110,000 TS; 40,000-60,000 YS, 45-25 El; 140-185 Brin
Annealed and aged 130,000-165,000 TS; 85,000-120,000 YS, 35-20 El, 250-315 Brin
For pump shafts and impellers, oil well drill collars and instruments, electronic components; corrosion resistant

MONEL ALLOY R-405
M-1499; 66.5 Ni, 0.15 C, 1.0 Mn, 1.25 Fe, 0.043 S, 0.25 Si, 31.5 Cu
Annealed: 70,000-85,000 TS; 25,000-40,000 YS; 50-35 El; 110-140 Brin
Cold drawn. 85,000-115,000 TS; 50,000-105,000 YS; 35-15 El; 160-245 Brin.
For water meter parts, screw machine products, valve seat inserts, fasteners for nuclear applications. Corrosion resistant, free machining

MONEL C.
M-121; 0.2 C, 2.5 max Fe, 2 max Mn, 63-70 Ni, bal Cu.
Cold drawn: 100,000 TS; 75,000 YS; 25 El; 60 RA; 200 Brin
For water meter components, machined parts; corrosion resistant

MONEL FILLER METAL 40.
M-1499, 66.0 Ni, 0.10 C, 0.90 Mn, 1.35 Fe, 0.005 S, 0.15 Si, 31.5 Cu
For oxyacetylene welding of Monel alloys 400 and 404.
AWS A 5.14 Class RNiCu-5, ASME SFB 5.14.

MONEL FILLER METAL 60.
M-1499, 65.0 Ni, 0.03 C, 3.5 Mn, 0.20 Fe, 0.005 S, 1.0 Si, 27.0 Cu, 2.2 Ti.
For gas-shielded arc welding of Monel alloys 400 and 404
AWS A 5.14 Class ERNiCu-7, ASME SFB 5.14

MONEL FILLER METAL 64.
M-1499, 65.0 Ni, 0.15 C, 0.60 Mn, 1.0 Fe, 0.005 S, 0.15 Si, 30.0 Cu, 2.8 Al, 0.5 Ti
For oxyacetylene and gas-shielded arc welding of Monel alloy K 500
AWS A 5.14 Class ERNiCu-8; MIL-E-21562.

MONEL FILLER METAL 67.
M-1499, 31.0 Ni, 0.02 C, 0.75 Mn, 0.50 Fe, 0.005 S, 0.10 Si, 67.5 Cu, 0.30 Ti.
For oxyacetylene and gas-shielded arc welding of 70/30, 80/20, 90/10, copper-nickel alloys and clad side of copper-nickel clad steel
AWS A 5.6 Class ECuNi, ASME SFB 5.6

MONEL G
M-121, 0.3 C, 2.5 max Fe, 2 max Mn, 63-70 Ni, bal Cu
Cold drawn: 100,000 TS, 75,000 YS, 25 El, 60 RA; 200 Brin
For water meter components, machined parts; good corrosion resistance

MONEL K
M-897, 30 Cu, 2 Al, bal Ni
For heat resistant parts, corrosion and heat resistant

MONEL K44
M-897, 30 Cu, 1 Mn, 2 Al, 2 Fe, bal Ni.
For corrosion and heat resistant parts; corrosion and heat resistant

MONEL K64
M-897, 30 Cu, 1 Mn, 2 Al, 2 Fe, bal Ni
For corrosion and heat resistant parts, corrosion and heat resistant

MONEL WELDING ELECTRODE 134
M-1499; 64.0 Ni, 0.20 C, 2.50 Mn, 1.0 Fe, 0.005 S, 0.30 Si, 30.0 Cu, 1.8 Al, 0.75 Ti.
Electrode for shielded metal-arc welding of Monel alloy K-500, overlaying on steel
AWS A 5.11 Class ENiCuAl-1, ASME SFB 5.11.

MONEL WELDING ELECTRODE 187
M-1499; 32.0 Ni, 0.02 C, 2.0 Mn, 0.60 Fe, 0.01 S, 0.15 Si, 65.0 Cu.
Electrode for shielded metal-arc welding of 70/30, 80/20, 90/10 copper-nickel alloys and clad side copper-nickel clad steel.
AWS A 5.6 Class E CuNi; MIL-E-22200/4.

MONEL WELDING ELECTRODE 190.
M-1499, 65.0 Ni, 0.01 C, 3.1 Mn, 0.30 Fe, 0.007 S, 0.75 Si, 30.5 Cu, 0.15 Al, 0 55 Ti.
Electrode for shielded metal-arc welding of Monel alloys 400 and 404; overlaying on steel.
AWS A 5.11 Class E NiCu-2; ASME SFB 5.11.

MONEND see MONEND 806.

MONEND 806.
M-677; 0.03 C, 3.7 Mn, 0.8 Si, 64 Ni, 28 Cu, 0.3 Fe, 0.8 Ti, 0.4 Al.
For welding electrodes, monel, meeting classes ENiCu-1 (3N10), ENiCu-2 (4N10), ENiCu-4 (8N10), also 9N10.

MONEVAL 806
M-677; 64-68 Ni, 27-30 Cu, 1.0 max Fe.
Welded: 75,500 TS; 42,500 YS; 42 El, 60 RA.
For welding electrodes for Monel, Monel type

MONIKROM.
M-185; 3.1-3.4 C, 2 0-2.4 Si, 0.7 Mn, 0 8-1.0 Cr, 0.15-0 25 Ni, 0.15-0 25 Mo, bal Fe.
Cast: 43,000 TS; 240-280 Brin
For camshafts, cam sleeves; alloy cast iron; Tr S. 80,000.

MONIMAX.
M-1; 47 Ni, 3 Mo, bal Fe.
Magnetically soft, saturation inductance 14,500
For electrical equipment, special transformers, tape recording heads, vibrator cores, small motors.

MONIX 10.
M-501; 0 36 C, 1 0 Cr, 1 0 Ni, 0 2 Mo, bal Fe
For gears, bolts, crankshafts, axles; oil hardened, shock resistant.

MONIX 15.
M-501; 0 34 C, 1.55 Cr, 1.55 Ni, 0.2 Mo, bal Fe
For gears, bolts, crankshafts, axles; oil hardened, shock resistant.

MONIX 20.
M-501, 0 3 C, 2 Cr, 0.3 Mo, 2 Ni, bal Fe
For gears, bolts, oil refinery equipment, oil hardened, tough

MONO-LOY.
M-507; 1.4 C, 0 9 Si, 31.0 Mn, 0 5 Cr, 0.5 Mo, 5 5 Ni, bal Fe.
Hard facing electrode.
For overlaying or buildup on crusher rolls, dredge buckets, tractor sprockets, hammers.
Good shock resistance

MONOTYPE, STANDARD
Eng., 74 Pb, 18 Sb, 8 Sn.
For type metal, slightly expansive on solidifying.

MONTAN.
M-1331; 0 70 C, 0.25 max Si, 0 35 max Mn, bal Fe
For rails, tools, springs, axes; water hardened.

MONTAN 70.
M-1331; 0 70 C, 0 25 max Si, 0 25 max Mn, bal Fe
Heat treated: 175,000 TS; 130,000 YS; 12 El; 37 RA; 355 Brin.
For rails, punches, springs, axles, crimpers; water hardened.

MONTANIUM.
Eng., 2.5-3.5 Cu, 0.5 Mg, bal Al.
51,000 TS; 16 El; 50 RA.
For light alloy parts; similar to "Duralumin"

MONTEGAL.
M-299; 0.95 Mg, 0.8 Si, 0.2 Ca, bal Al.
50,000 TS; 6 El; 100 Brin.
For light alloy parts; non-hardenable.

MOONESTONE BRONZE.
M-575; Cu alloy.
For instrument terminals, free-cutting.

MOPERMALLOY 4-79.
M-61; 79 Ni, 17 Fe.
Saturation inductance 8700
For laminated cores for communication inductors, transformers, electro-magnetic shields
Soft magnet, high permeability.

MORAINE.
M-839, Sn, bal Cu
For bearings; sintered

Mo RAPID EXTRA 3.
M-27; 0 95 C, 4 Cr, 3 W, 3 Mo, 3 V, bal Fe.
For cutting tools; high speed steel.

MO RAPID EXTRA 3A
M-27, 1.0 C, 1 35 W, 3 8 Cr, 2.35 Mo, 2 35 V, bal Fe
For tools, dies, cutters, high speed steel.

MOREX
M-985; 0 7 C, 0.6 W, Cr, 4-6 Mo, bal Fe.
For tools, cutters; high speed steel.

MOREX.
M-487, C, Mo, W, bal Fe.
For tools, cutters; high speed steel

MORFLEX
M-237, high expanding side 22 Mn, 18 Cu, 10 Ni and low expanding side 36 Ni, bal Fe
For thermostatic bimetal, maximum temperature 500°F.

MORINS CHINESE BRONZE
Eng , 83 Cu, 10 Pb, 5 Sn, 2 Zn.
For ornaments

MOSAIC GOLD
Eng., 63 Cu, 37 Zn.
46,000 TS
For brass ornaments, yellow brass

MOSIL
M-115, 0 57 C, 1 9 Si, 0.8 Mn, 0 25 Cr, 0 33 Mo, bal Fe
For punches, chisels; shock resistant

MOSTAR
M-884, 0 32 C, 5 Cr, 1 15 Mo, 1 0 Si, 0 35 V, bal Fe.
For upsetters, punches, extrusion dies; oil or air hardened, hot work steel

MOTAL
M-302, 5 Si, bal Al.
21,500-27,000 TS, 6-3 El
For light alloys, automobile parts, motor housings; sand cast alloy

Mo TAP.
M-73, 1 2 C, 0 6 Mo, 0 5 Cr, 0 8 Mn, bal Fe
For taps, drills, reamers, water or oil hardening.

MO-TECHNICKILL
M-229, C, Mo, bal Fe.
For heavy duty rollers; wear resistant

MOTELEC
M-691; 2.5 Si, bal Fe.

MOTEMP.
M-140; 0.88 C, 4 Cr, 8 Mo, 2 V, bal Fe.
Hardened: C 64-66 Rock.
For circular saws, taps, drills, broaches, counterbores, milling cutters, hobs, chasers, form tools.
Type M-10 high speed steel, high red-hardness.

MO-TIGER.
M-24; 0.7 C, 9 Mo, 1.5 W, 4 Cr, 1 V, bal Fe.
For tools, cutters, drills; high speed steel.

MOTOR 03A.
M-1410; 1.5 C, 0.5 Cr, 0.35 V, 4.5 W, 0.35 Mo, bal Fe.
For drawing dies, turning tools, water hardened, abrasion resistant.

MOTOR 05S.
M-1410; 1.4 C, 1.5 Mn, 12 Cr, 1 V, bal Fe.
For rim rolling dies, hot shears, punches; oil or water hardened, non-deforming.

MOTOR 06S.
M-1410, 0.95 C, 0.3 Mn, 0.2 V, bal Fe.
For coining, heading and cutlery dies; cold work steel, water hardened.

MOTOR 07S
M-1410, 1.85 C, 11 Cr, 0.10 Ni, 0.25 V, bal Fe
For gages, guide rolls, impact extrusion dies, air or oil hardened, non-deforming

MOTOR 08S.
M-1410, 1.4 C, 14 Cr, 0.3 Ni, 0.65 Mo, 3.2 Co, bal Fe.
For rim rolling dies, shears, extrusion dies; oil or air hardened, non-deforming.

MOTOR 09B
M-1410, 0.90 C, 1 Mn, 0.5 Cr, 1.25 W, bal Fe.
For blanking and drawing dies; oil hardened, non-deforming.

MOTOR 12S.
M-1410; 0.3 C, 4 Cr, 8.5 W, 0.4 Si, 0.3 Mn, bal Fe
For extrusion and forming dies, air or oil hardened, hot work steel.

MOTOR 14S
M-1410; 2.0 C, 14 Cr, 0.9 Ni, 0.35 V, 0.35 Mn, bal Fe.
For impact extrusion dies, gages, lamination dies, oil hardened, non-deforming

MOTOR 21SW.
M-1410, 1.15 C, 1 Mn, 1 Cr, 0.25 V, 1.35 W, bal Fe
For blanking and drawing dies, shears, hobs; oil hardened, non-deforming.

MOTOR 23S.
M-1410, 2.25 C, 12 Cr, 0.35 V, 0.35 Mn, bal Fe
For lamination and blanking dies, gages, punches, oil hardened, non-deforming.

MOTOR 24S
M-1410, 0.27 C, 6 Cr, 2.5 Ni, 8 W, 0.25 Mo, bal Fe
For extrusion dies, die casting dies; oil hardened, hot work steel.

MOTOR 25B.
M-1410, 1.0 C, 3 Mn, 1 Cr, 1 Mo, bal Fe.
For punches, shares, blanking and drawing dies; air hardened, abrasion resistant.

MOTOR 25S
M-1410; 0.27 C, 4.25 Ni, 6.75 W, 0.20 Mo, 0.30 Si, bal Fe
For extrusion mandrels and dies; hot work steel, air or oil hardened.

MOTOR 53S.
M-1410, 0.37 C, 5 Cr, 0.37 V, 1.5 Mo, 1 Si, bal Fe
For Al and Mg die casting dies; resists abrasion and erosion.

MOTOR 58S.
M-1410, 0.32 C, 5 Cr, 0.25 V, 1 W, 2 Mo, 1 Si, bal Fe.
For extrusion and forming dies for nonferrous metal; air hardened, hot work steel.

MOTOR B.C.C.
M-1410; 0.42 C, 1.15 Cr, 2.25 W, 1 Si, 0.25 Mn, bal Fe.
For heading and piercing dies, shear blades; hot work steel, oil hardened.

MOTOR B.C.D.37.
M-1410; 0.37 C, 1.15 Cr, 0.2 V, 2.25 W, bal Fe.
For pneumatic tools, chipping chisels; shock resistant, non-tempering

MOTOR MAGNUS.
M-1410, 0.80 C, 4 Cr, 1.4 V, 6 W, 5.5 Mo, bal Fe.
For drills, reamers, hobs, broaches, shear blades; high speed steel.

MOTOR MAXIMUM.
M-1410, 0.75 C, 4.5 Cr, 1.2 V, 18 W, bal Fe.
For die casting dies, bushings, ejectors; high speed steel.

MOTOR SPECIAL.
M-1410; 0.70 C, 4 Cr, 14 W, bal Fe.
For drills, slitters, shear blades, chisels; high speed steel.

MOTUF.
M-140, 1.0 C, 3.75 Cr, 2.1 V, 1.75 W, 8.75 Mo, bal Fe.
Hardened. C 65-66 Rock.
For broaches, burnishing tools, reamers, milling cutters, counterbores, taps, end mills, roll turning tools.
Type M-7 high-speed steel. High wear resistance and high red-hardness

MO-TUNG.
M-114, M-39; 0.65-0.85 C, 0.2-0.35 Mn, 7.5-8.5 Mo, 1.5 W, 3.75-4.5 Cr, 1.0-1.25 V, bal Fe
For high speed steel cutting tools, reamers, broaches, drills, lathe tools, high speed steel.

MOTUNG 6-6
M-1, 0.7 C, 6 Mo, 6 W, 4 Cr, V, bal Fe.
For lathe and planer tools, drills; high speed steel.

Mo-TUNG 652
M-114, 0.8 C, 4 Cr, 2 V, 5 Mo, 6.5 W, bal Fe.
For lathe and planer tools, drills, form cutters, hot punches; high speed steel.

MOTUNG-CV
M-114; 1.0 C, 8.75 Mo, 1.75 W, 4.0 Cr, 2.0 V, bal Fe
Hardened: C 64-66 Rock.
For cutters, drills, reamers, end mills, slotting saws, routers, wood working tools, milling cutters Good wear resistance.
AISI-M7 High speed steel

MOTUNG P & D.
M-114; 0.74 C, 8.7 Mo, 1.65 W, 1.15 V, 4 Cr, bal Fe.
Annealed: 228 Brin
For trim dies; cavity punches; high speed steel, oil hardened.

MOULIMPHY.
M-104; C, alloy, bal Fe.
For glass rolls and molds.

MOUREY WHITE GOLD.
Eng.; 50 Au, 35 Ag, 15 Pd.
For jewelry; corrosion resistant.

MOUSSETS SILVER.
Eng.; 27.5 Ag, 59.5 Cu, 9.5 Zn, 3.5 Ni.
For instruments and cheap jewelry; corrosion resistant.

MOVA.
M-56; 0.2 C, 0.25 Si, 0.5 Mn, 0.7 Mo, 0.25 V, bal Fe.
For jet engine components, turbine rotor blades; heat resistant.

MO-VAN.
M-38; 0.85 C, 4 Cr, 1.75 V, 7.5 Mo, bal Fe.
For tools, cutters, reamers; high speed steel.

MOW.
M-459; C, Ni, Mo, bal Fe.
Water treated· 101,000-121,000 TS; 85,000-107,000 YS; 20-17 El
For gears, shafts; oil or water hardening.

MP35N.
M-522, M-1439, M-73; 35 Ni, 35 Co, 20 Cr, 10 Mo.
Ht. Tr · 286,300 TS; 225,000 YS; 11 El; 39 RA.
Annealed: 146,000 TS; 61,000 YS, 70 El; B 100 Rock
For high strength fasteners, bolts, aircraft and spacecraft components, steam turbine parts.
Corrosion resistant, high fatigue strength.

M P.M.-3 C-STEEL.
M-38; 0.3-0.4 C, 1.6-1.9 Mn, bal Fe.
Annealed· 100,000 TS; 60,000 YS, 19 El, 50 RA; 250 Brin.
As rolled: 113,000 TS, 77,000 YS, 22 El; 57 RA; 228 Brin.
For gears, wheels, castings, axles, drive shafts, steering arms, tough, pearlitic.

MRL-A8
M-1719; 6-8 Mg, 0.5 max Si, 0.5 max Fe, 0.35 max Mn, 0.25 max Cu, 0.05-0.30 Cr, 0.20 max Zn, 0.001-0.05 B, 0.02 max Be, 0.015 max Ti, bal Al.
O cond 50,000 TS; 22,000 YS, 25 El.
H38· 69,000 TS, 54,000 YS; 10 El.
Good forming prop ; especially good corrosion resistance, including marine atmosphere
AA-X5090.

MRL-A11.
M-1719; 0.6-0.9 Si, 0.7 max Fe, 0.4-0.6 Mg, 0.25 max Zn, 0.2 max Cu, 0.15 max Ti, 0.05-0.15 Mn, 0.05-0.15 Cr, 0.05-0.15 Zr, bal Al
T5 38,000 TS, 35,000 YS, 8 El
Good impact strength 20-60 V-notch Charpy, generally above 30 ft lb
For highway guard rails, semi-hollow type. Hardenable.

MS-6
M-Switzerland; 1.0 C, 9 Cr, 6 Co, 1.5 Mo, bal Fe.
Hardened: C 60-64 Rock.
For permanent magnets, in magnetic and electrical equipment. Hardened High permeability.

MS-15.
M-Switzerland; 1.0 C, 15 Co, 9 Cr, 1.5 Mo, bal Fe.
Hardened: C 60-64 Rock.
For permanent magnets in magnetic and electrical equipment.
Hardened. High permeability.

MS-35.
M-Switzerland; 0.9 C, 35 Co, 6 Cr, 5 W, bal Fe.
For permanent magnets in magnetic and electrical equipment.
Hardened: High permeability.

MS-250.
M-1619; 0.03 max C, 16.0-17.5 Ni, 9.5-11.0 Co, 4.4-4.9 Mo, 0.05-0.15 Al, 0.15-0.45 Ti, 0.03 max Zr, 0.005 max B, bal Fe.
Heat Treated: 275,000 TS; 263,000 YS; 6 El; 16 RA.
For compressor rotors, high impact pressure devices.
High strength and ductility Maraging cast alloy steel.

MSA.
M-459; 0.8 C, 0.3 Mn, 0.6 W, bal Fe.
For dies, drills, taps, water hardening.

MS ALLOY
Japan, 30-60 Ni, 1-18 Cr, bal Fe
For magnetic shunts, magnetically soft

M S BRONZE.
M-1068, 96 Cu, 3.5 Sn, 0.25 P.
For springs, for watches.

MSM 3Al-2½V.
M-1229, 3 Al, 2.5 V, bal Ti
Heat treated· 120,000 TS; 105,000 YS, 15 El; 47 RA, 140 Brin.
Annealed· 56,000 TS; 48,000 YS; 16 El.
For aircraft and missile components; age-hardenable, good weldability

MSM185
M-1229, Ti alloy
Heat treated· 260,000 TS
For aircraft and missile components; age-hardenable, good weldability.

M S M ALLOY
M-365, 0.5 C, 0.7 Mn, 1.8-2.0 Si, 0.25 Mo, bal Fe
For shear blades, chisels, punches; tough

MSO
M-459; 0.9 C, 2 Mn, 0.1 V, bal Fe
For blanking dies, profile rollers; nondeforming, oil hardened.

MSR-A
M-106, 1.2-2.0 Rare Earth, 2.0-3.0 Ag, 0.4-1.0 Zr, bal Mg
Heat treated 34,800-41,500 TS, 22,400-28,000 YS; 4.8 El, 65-80 Brin
High strength magnesium alloy
Aircraft DTD 5025 (England)

MSR-B
M-106, 2.0-3.0 Rare Earth, 2.0-3.0 Ag, 0.4-1.0 Zr, bal Mg
Heat treated 34,800-41,500 TS, 24,700-30,200 YS; 2-4 El, 78-85 Brin
High strength magnesium alloy
AIRCRAFT DTD 5035 (England).

MST alloys see RMI alloys

M/S VENUS
M-1260; 83.5 Sn, 8 Sb, 6.5 Cu, 2 Pb.
Cast 17,100 TS; 31 Brin.
For diesel engine bearings; M P 355-710°F; wear resistant.

MT-6 see DARWIN MT6.

MT-17.
Eng , 0.07 C, 1.5 Mn, 21 Cr, 30 Ni, 21 Co, 3 Mo, 2.2 W, 1.6 Ti, bal Fe.
For high temperature applications; heat resistant.

MTR
M-1180; 0.13 C, 0.65-0.95 Mn, 0.4-0.7 Cr, 0.25 Cu, 0.4-0.6 Mo, 1.1-1.6 Ni, 0.04-0.10 V, bal Fe

Plate: 107,000-135,000 TS; 78,000 min YS; 13 min El.
For pressure vessels, bridges, mine cars, power shovels, cranes, trucks, trailers
Shock and wear resistant.

MTS4-Cr.
M-459, 0.2 C, 12.5 Cr, 1.1 Mo, 0.25 V, 0.5 W, bal Fe
For surgical and dental instruments, corrosion resistant

MT-STEEL.
M-1566, 8 Al, 2 C, 0.20 max Si, 0.6 Co, bal Fe.
Heat treated. Br = 5000 gauss, H_c = 200 Oersted
For electrical and magnetic equipment.
Permanent magnet Quenched and tempered for max magnetic properties

MUELLER 803.
M-266, 2.4-4.0 Si, 1.5-4.0 Fe, 1.5-4.0 Zn, bal Cu.
Annealed: 56,000-68,000 TS; 20,000-32,000 YS; 40-30 El; 89 120 Brin
For jet engine parts, anti-friction roller bearing cages; non-galling, corrosion resistant.

MUELLER 902 see MUELLER 1920.

MUELLER 1020
M-266, 99.95 Cu, 0.04 O_2.
Half Hard: 53,000 TS, 46,000 YS; 5 El; F 90 Rock.
Soft: 32,000 TS; 10,000 YS; 40 El; F 35 Rock.
For high conductivity tubing and forgings.
CDA 102, Formerly Mueller 2140F.
Oxygen Free-High Conductivity Copper.

MUELLER 1100
M-266, 99.9 Cu, 0.04 Oxy.
Hard Rod. 48,000 TS; 44,000 YS, 16 El; F 87 Rock
For trolley wire, cables, conductors; connectors, terminals, fittings, pipes
Tough pitch copper. CDA 110, Formerly Mueller 214 ETP

MUELLER 1220.
M-266; 99.90 Cu, 0.015-0.040 P.
Annealed 32,000 TS, 10,000 YS, 45 El, F 40 Rock.
Hard Drawn 55,000 TS, 50,000 YS, 8 El; B 60 Rock
For air conditioners, refrigerators, kettles, oil coolers, rotating bands.
Phosphorus deoxidized copper.
CDA 122 Formerly Mueller 214 DHP.

MUELLER 1470.
M-266, 0.3 S, bal Cu.
Sulphurized copper.
Half hard 43,000 TS; 40,000 YS; 18 El; 42 Rb.
Hard 48,000 TS; 46,000 YS; 13 El; 50 Rb.
96% conductivity, 85% machinability.
Free machining copper, for screw machined parts requiring properties similar to copper.
CDA No. 147 Was Mueller 771W.

MUELLER 1820
M-266, 1 Cr, 0.02 Si, bal Cu.
Heat treated 78,000 TS; 70,000 YS; 13 El; B 80 Rock.
For resistance welding tips, holders and wheels.
CDA 182 and 184 Formerly Mueller 902.
Heat treatable High strength

MUELLER 2014
M-266; 4.4 Cu, 0.8 Mn, 0.4 Mg, 0.8 Si, bal Al.
Heat treated: 70,000 TS, 60,000 YS; 14 El, 140 Brin
For hardware; forging alloy.

MUELLER 2017
M-266, 4 Cu, 0.5 Mn, 0.5 Mg, 0.75 Si, bal Al.
Heat treated 60,000 TS; 37,500 YS; 22 El; 105 Brin
For hardware; forging alloy.

MUELLER 3406.
M-266, 1 Pb, 65 Cu, bal Zn.
HH Temper: 58,000 TS; 45,000 YS, 30 El; B 70 Rock.
For cold headed fasteners, hardware, marine hardware.
CDA 340. Formerly Mueller 314.
Leaded Brass, good machinability.

MUELLER 3450.
M-266; 2 Pb, 62.5 Cu, bal Zn.
¼ Hard· 53,000 TS; 35,000 YS; 35 El; B 68 Rock.
For thread rolled fasteners, marine hardware.
CDA 345. Formerly Mueller 212.
Leaded Brass, good cold workability.

MUELLER 3470.
M-266; 63 Cu, 1.5 Pb, bal Zn.
Medium leaded brass.
¼ H: 55,000 TS; 35,000 YS; 30 El; 68-70 Rb.
Thread rolling brass; good machining and cold working characteristics. 85% machinability.
CDA No. 347. Formerly Mueller 312.

MUELLER 3500.
M-266; 61.7 Cu, 1.0 Pb, bal Zn
Thread rolling brass.
¼ Hard: 53,000 TS; 35,000 YS; 35 El, 70 Rb.
For roll threaded brass parts.
CDA No. 350. Formerly Mueller 251

MUELLER 3530.
M-266; 36.25 Zn, 2.75 Pb, bal Cu.
Cast.
For screw machine products; commercial brass

MUELLER 3600.
M-266; 3 Pb, 61.5 Cu, bal Zn
HH Temper: 60,000 TS; 45,000 YS; 25 El; B 72 Rock.
Hard Temper: 75,000 TS, 55,000 YS; 10 El; B 78 Rock.
For screw machine products, fasteners, bearings, bushings
CDA 360 Formerly Mueller 201.
Leaded brass, free-cutting

MUELLER 3602.
M-266; 2.75 Pb, 61 5 Cu, bal Zn
¼ Hard: 55,000 TS, 40,000 YS, 25 El; B 68 Rock.
For fasteners, marine hardware.
CDA 360. Formerly Mueller 246
Leaded brass, free-cutting

MUELLER 3770.
M-266, 1.5-2 5 Pb, 58-61 Cu, 0.3 max Fe, bal Zn
Forgings· 50,000-60,000 TS; 20,000-25,000 YS; 40-50 El, B 40-60 Rock.
Extruded: 58,000 TS, 23,000 YS; 42 El, B 48 Rock
For hardware, valve bodies, automobile parts, plumbing fittings.
Brass forging alloy. Formerly Mueller 200

MUELLER 3771
M-266, 2 Pb, 60 Cu, bal Zn.
Forged: 58,000 TS; 23,000 YS, 42 El; B 48 Rock
For forged hardware, shafts, fasteners.
CDA 377 Formerly Mueller 211.
Leaded forging brass

MUELLER 3801
M-266; 2 Pb, 56 Cu, bal Zn.
Forged: 65,000 TS; 30,000 YS; 15 El; B 60 Rock.
For forged hardware, fasteners.
Formerly Mueller 213.
Leaded forging brass

MUELLER 4001.
M-266; 57.5 Cu, 2.4 Sn, 0.2 Si, bal Zn.
Welding rod, low fuming.
Melting point, liquidus: 1635°F.
For welding brass and bronze.
Was Mueller 237.

MUELLER 4620.
M-266; 62-65 Cu, 0.5-1.0 Sn, bal Zn.
HH Temper: 65,000 TS; 45,000 YS; 30 El; B 72 Rock.
For fasteners, bolts, marine hardware, rivets, clamps, connectors.
Corrosion resistant. Naval Brass.
CDA 462. Formerly Mueller 308.

MUELLER 4640.
M-266; 0.75 Sn, 60.5 Cu, bal Zn.
Forged: 64,000 TS; 26,000 YS; 40 El; B 55 Rock.
Hard. 75,000 TS; 60,000 YS; 20 El, B 80 Rock.
For marine products, gears, valve stems, light bearings, screw machine products.
Naval Brass.
CDA 464 Formerly Mueller 203.

MUELLER 4643.
M-266; 60 Cu, 0.3 max Pb, 0.75 Sn, bal Zn.
½ H-temper: 68,000 TS, 45,000 YS; 22 El; 150 Brin.
Soft: 54,000 TS, 22,000 YS; 40 El; 83 Brin.
For propeller shafts, gears, bolts, screw machine products, Tobin Bronze.

MUELLER 4700.
M-266, 58 5 Cu, 0 9 Sn, bal Zn
Naval brass welding rod
Melting point, liquidus: 1640°F.
For welding bronzes, brasses, and for braze welding steel and cast iron
CDA No. 470. Formerly Mueller 228.

MUELLER 4701
M-266, 59 6 Cu, 0 75 Sn, bal Zn
Naval brass welding rod
Melting point, liquidus. 1640°F.
For welding bronzes, brasses and for braze welding steel and cast iron.
CDA No 470 Formerly Mueller 234.

MUELLER 4820
M-266, 0 75 Pb, 0 75 Sn, 60 5 Cu, bal Zn
Forged 60 000 TS, 30,000 YS 40 El, B 55 Rock
Hard· 70,000 TS, 48,000 YS, 30 El, B 78 Rock.
For marine parts, gears, screw machine products.
Leaded Naval Brass, free-turning
CDA 482 Formerly Mueller 245

MUELLER 4850
M-266, 2 Pb, 0 75 Sn, 60 5 Cu, bal Zn
HH Temper 65,000 TS; 48,000 YS, 15 El; B 72 Rock
For marine products, gears, valve stems, light bearings, screw machine products
Leaded Naval Brass
CDA 485 Formerly Mueller 207.

MUELLER 4851
M-266, 2 Pb, 0 75 Sn, 59 5 Cu, bal Zn
Forged 62,000 TS, 24,000 YS, 40 El, B 55 Rock.
For light bearings, forged hardware.
CDA 485 Formerly Mueller 204.
Leaded Naval Brass, free-cutting.

MUELLER 6140.
M-266; 90.5 Cu, 2 Fe, 7.5 Al.
Aluminum bronze.
Drawn. 88,000 TS, 52,000 YS; 35 El, 85 Rb.
High strength, good ductility bronze for shafts, and various load carrying sliding parts.
Non-heat treatable.
CDA No. 614. Formerly Mueller 224-7.

MUELLER 6162
TUF-STUF ALUMINM BRONZE
M-266; 90 Cu, 1 Fe, 9 Al.
½ Hard· 82,000 TS; 50,000 YS; 30 El; 175 Brin (1000 kg)
Forged. 75,000 TS; 36,000 YS; 20 El; 140 Brin (1000 kg).
High strength, heat treatable bronze for shafts and other sliding parts.
CDA No. 617. Formerly Mueller 224 E-30.

MUELLER 6180.
M-266; 10 Al, 1 Fe, 89 Cu.
HH Temper: 100,000 TS; 65,000 YS; 16 El; 208 Brin.
For gears, valve parts, worm wheels, marine hardware.
Aluminum Bronze, corrosion resistant.
CDA 617. Formerly Mueller 224 E-75.

MUELLER 6230.
M-266; 88 Cu, 3 Fe, 9 Al.
HH Temper: 95,000 TS; 62,000 YS; 9 El; 185 Brin.
Forged: 84,000 TS; 40,000 YS; 40 El; 135 Brin.
For gears, worm wheels, marine hardware, shafts.
Aluminum Bronze. Not heat treatable.
CDA 616. Formerly 224C.

MUELLER TUF-STUF 6240.
M-266; 86 Cu, 11 Al, 3 Fe.
Forged· 80,000 TS, 45,000 YS, 10 El; 170 Brin.
Heat treated: 95,000 TS; 70,000 YS; 3 El, 200 Brin.
For valve seat inserts, gears, worm wheels, forging alloy, heat treatable; "Tuf-Stuf H."

MUELLER 6246.
M-266; 85.5 Cu, 3.6 Fe, 10.6 Al.
Aluminum bronze, heat treatable.
Ext: 100,000 TS; 50,000 YS, 7 El; 195 Brin (3000 Kg)
Moderately high strength aluminum bronze, possessing excellent corrosion and high temperature properties.
CDA No 616 Formerly Mueller 224-11.

MUELLER 6250
M-266, 82.8 Cu, 4.3 Fe, 12.9 Al
Aluminum bronze.
Ext 105,000 TS, 65,000 YS, 1 5 El, 285 Brin; (3000 kg)
Heat treatable, good strength, very good wear resistance, for gears, worm wheels, wear plates.
Formerly Mueller 224-13

MUELLER 6300.
M-266, 5 Ni, 1 Mn, 10 Al, 3 Fe, 81 Cu.
Annealed 120,000 TS, 75,000 YS, 15 El, 241 Brin.
Heat treated. 114,000 TS, 66,000 YS, 15 El, 223 Brin
For gears, aviation landing gears, shafts, marine hardware.
Aluminum Bronze, heat treatable.
CDA 628. Formerly Mueller 224K

MUELLER 6390.
M-266; 7 Al, 2 Si, 91 Cu
Hard 98,000 TS; 65,000 YS; 25 El, B 95 Rock.
Forged: 75,000 TS, 35,000 YS; 45 El; B 85 Rock.
For nuts, bolts, pole line hardware.
Aluminum Bronze, corrosion resistant.
CDA 639. Formerly Mueller 802.

MUELLER 6391.
M-266, 91 Cu, 6.7 Al, 1.9 Si.
Aluminum silicon bronze
Hard: 85,000 TS, 45,000 YS, 40 El, 84 Rb.
As forged· 75,000 TS; 35,000 YS; 45 El; 80 Rb.
Machinability 50%.
Free turning, good strength, non-magnetic, corrosion resistant; for shafts, nuts, bolts, pole line hardware.
CDA No. 639. Formerly Mueller 808.

MUELLER 6550
M-266; 2.8-3.8 Si, 0.05 max Pb, 1.5 max Zn,, 0.6 max Ni, 1.5 max Mn, bal Cu.
Bar: 52,000 TS; 20,000 YS, 60 El; B 50 Rock.
For marine hardware, fasteners, screws, bolts, diaphragms.
CDA 655. Formerly Mueller 800.
Silicon Bronze, corrosion resistant.

MUELLER 6680.
M-266; 60.5 Cu, 1 Si, 2.5 Mn, bal Zn.
HH Temper· 70,000-85,000 TS; 40,000-65,000 YS; 15-25 El; 70-87 Rock.
For bearings, gears, connecting rods, marine hardware.
Bearing Bronze Ductile.
Formerly Mueller 601.

MUELLER 6700.
M-266; 3 Fe, 5 Al, 4 Mn, 64 Cu, bal Zn.
Soft· 90,000 TS, 50,000 YS; 20 El, B 84 Rock.
Hard: 124,000 TS; 72,000 YS; 18 El; B 95 Rock.
For rollers, rotors, valve stems
Manganese Bronze, shock resistant.
CDA 670. Formerly Mueller 721B.

MUELLER 6701
M-266; 3 Fe, 5 Al, 4 Mn, 64 Cu, bal Zn.
HH Temper 112,000 TS; 67,000 YS, 13 El; B 94 Rock.
For rollers, rotors, valve stems
Manganese Bronze, shock resistant.
CDA 670. Formerly Mueller 721E.

MUELLER 6702
M-266, 64 Cu, 3 Fe, 5 Al, 4 Mn, bal Zn.
Forged 115,000 TS; 67,000 YS, 18 El; B 95 Rock.
For rotors, rollers, valve stems.
Manganese Bronze, shock resistant.
CDA 670. Formerly Mueller 721X.

MUELLER 6730
M-266, 1 0 Pb, 2 5 Mn, 1.0 Si, 60 5 Cu, bal Zn.
HH-Temper: 70,000-85,000 TS; 40,000-65,000 YS; 15-25 El, B 70-87 Rock
For gears, sleeve and thrust bearings, bushings, cams, marine hardware.
Good bearing characteristics. Formerly Mueller 602.

MUELLER 6731.
M-266, 59 75 Cu, 1 Pb, 1 Si, 2 5 Mn, bal Zn.
Heat treated 75,000 TS; 45,000 YS; 20 El; 82 Rock
For gears, hydraulic pump cylinder liners, bushings, bearings
Bearing Bronze, free-cutting.
CDA 673 Formerly Mueller 603.

MUELLER 6732.
M 266; 61 5 Cu, 2 5 Pb, 1 Si, 2 5 Mn, bal Zn
HH Temper: 65,000-80,000 TS; 40,000-60,000 YS; 10 20 El, 75-86 Rock B.
For bearings used against soft or hard mating surfaces.
Bearing Bronze. Can be soldered.
CDA 673. Formerly Mueller 604.

MUELLER 6733.
M-266, 62 Cu, 0.6 Pb, 1 Si, 2.5 Mn, bal Zn
HH Temper: 70,000-75,000 TS; 45,000-55,000 YS; 18-25 El, 75-82 Rock.
For bearings mating with soft or hard members.
Bearing Bronze, readily cold worked.
CDA 673. Formerly Mueller 605.

MUELLER 6741.
M-266; 58 Cu, 1 Si, 1.5 Al, 2.5 Mn, bal Zn.
HH Temper 68,000-100,000 TS, 34,000-65,000 YS; 12-18 El; B 78-88 Rock.
Forged. 68,000 TS, 34,000 YS; 18 El; B 78 Rock.
For bearings against hardened surfaces, bushings, connecting rods, hardware.
Bearing Bronze, corrosion resistant.
CDA 674. Formerly Mueller 600.

MUELLER 6750.
M-266; 59 Cu, 1 Sn, 1 Fe, 0.25 Mn, bal Zn.
Hard: 83,000 TS; 56,000 YS; 20 El; B 80 Rock.
Forged: 68,000 TS; 35,000 YS, 27 El; B 65 Rock.
For screw machine products, valve stems, airplane parts, balls.
Manganese Bronze, corrosion resistant.
CDA 675. Formerly Mueller 241A.

MUELLER 6780.
M-266; 57 Cu, 1 Fe, 1 Al, 0.25 Mn, bal Zn.
Forged: 80,000 TS; 29,000 YS; 35 El; 130 Brin.
For counterweights for airplane engine crankshafts.
Manganese Bronze. Formerly Mueller 241W.

MUELLER 6800.
M-266; 58.5 Cu, 0.4 Fe, 0.9 Sn, 0.3 Mn, 0.5 Ni, bal Zn.
Welding rod, low fuming
Melting point, liquidus: 1650°F.
For braze welding of steel and cast iron and for surfacing.
CDA No. 680. Formerly Mueller 227.

MUELLER 6801.
M-266; 59.0 Cu, 0.4 Fe, 0.75 Sn, 0.2 Mn, 0.3 Ni, bal Zn.
Welding rod, low fuming.
Melting point, liquidus. 1650°F.
For braze welding of steel and cast iron and for surfacing.
CDA No 680. Formerly Mueller 235.

MUELLER 6810.
M-266, 58.0 Cu, 0.6 Fe, 0.9 Sn, bal Zn.
Welding rod, low fuming
Melting point, liquidus· 1650°F
For welding brass and bronze, braze welding steel and cast iron, and surfacing
CDA No. 681 Formerly Mueller 236

MUELLER 6940.
M-266, 80-83 Cu, 0.3 max Pb, 3.5-4.5 Si, bal Zn.
Rod: 90,000 TS; 57,000 YS; 38 El.
For valve stems.
Silicon Red Brass, corrosion resistant.
CDA 694.

MUELLER 6970
M-266; 77 Cu, 1 Pb, 3 Si, bal Zn
Silicon brass.
¼ hard. 80,000 TS; 46,000 YS; 42 El, 82 Rock B
For shafts, bolts, nuts, cap screws, screw machine parts; good machinability and corrosion resistance, valve stem alloy.
CDA No. 697. Formerly Mueller 804

MUELLER 7986.
M-266; 46 Cu, 10 Ni, 2.5 Pb, 0.25 Mn, bal Zn
Forged: 70,000 TS; 42,000 YS, 30 El; 120 Brin.
For hardware, faucets, fixtures; forging alloy, nickel silver; "Niag 515"

MUELLER 8360.
M-266; 83 Cu, 6 Pb, 4 Sn, 7 Zn.
Cast: 30,000 TS; 15,000 YS; 20 El; 55 Brin
For water pump impellers, fittings for gasoline and oil lines, bushings, miscellaneous castings.
Formerly Mueller 218 cast alloy.

MUELLER 8386.
M-266; 85 Cu, 5 Pb, 5 Zn, 5 Sn.
Cast: 35,000 TS; 15,000 YS; 23 El; 62 Brin.
For water pump impellers, fittings for gasoline and oil lines, bushings, miscellaneous castings
Red Brass, good castability and machinability.

MUELLER 8420.
M-266; Cu alloy, 80 Cu, 10 Zn, 5 Sn, 3 Pb.
For screw pipe fittings, hardware; free-cutting, cast.

MUELLER 8440.
M-266; 80 Cu, 7 Pb, 3 Sn, 0.5 Ni, 9.5 Zn.
Cast· 34,000 TS; 15,000 YS; 24 El; 55 Brin.
For bronze backing of lined bearings, bushings.
Good embeddability, corrosion resistant.
Was Mueller 272.

MUELLER 9030.
M-266; 88 Cu, 4 Zn, 8 Sn
Cast 38,000 TS, 18,000 YS; 15 El; 75 Brin
For bearings, bolts, nuts, gears; modified "G-Metal", wear resistant

MUELLER 9050.
M-266; 88 Cu, 2 Zn, 10 Sn.
Cast· 38,000 TS; 18,000 YS; 15 El; 75 Brin.
For bearings, bolts, nuts, gears, pump pistons; "G Metal" or gun metal, wear resistant.

MUELLER 9220.
M-266, 88.75 Cu, 1.5 Pb, 3.75 Zn, 6 Sn
Cast· 34,000 TS, 18,000 YS; 25 El, 67 Brin.
For steam pressure castings, gears, bushings, oil pumps, "Steam or Valve Bronze," "M"-Bronze

MUELLER 9230
M-266; 8 Sn, 1 Pb, bal Cu.
Cast
For bearings, bushings, bronze, free-cutting.

MUELLER 9340
M-266, 8 Sn, 8 Pb, bal Cu
For bushings, bearings; cast.

MUELLER 9370
M-266, 80 Cu, 10 Pb, 10 Sn
Cast 30,000 TS, 10,000 YS, 10 El, 68 Brin.
For bushings, bearings, castings, acid resistant

MUELLER 9380
M-266, 78 Cu, 15 Pb, 7 Sn.
Soft. 25,000 TS, 17,000 YS, 14 El, 100 Brin
For bearings, mine water pump parts; for moderate pressures, bearing bronze

MUFLEX
M 237, iron-invar
For thermostatic bimetal, high-iron, low-invar

MULTI-ALLOY
Eng., 0.25 C, 46.5 Ni, 20.5 Cr, 2.7 Mo, 3.3 Co, 1.2 Ti, 2.9 Cb, 3.5 W, bal Fe
For gas turbine parts, heat resistant

MULTICUT
M 97, 0.15 max C, 1.20 max Mn, 0.04-0.09 P, 0.24-0.35 C, 0-0.35 Pb, Se, bal Fe
Cold finished bar 78,500 TS, 15 El; 50 RA; 183 Brin
For screw machine products, fasteners, screws, bolts, shafts
Free-machining, tough

MULTIMET
M-167, 0.2 max C, 18-22.5 Cr, 18-22 Ni, 2.75-3.75 Mo, 2-3 W, 18-22 Co, 0.75-1.5 Cb, 0.1-0.2 N, bal Fe
Cast· 83,000 TS, 55,000 YS; 12 El, 14 RA
Forged 110,000-140,000 TS; 30-15 El; 48-45 RA.
For turbine blading, jet and combustion chambers, welding rod, high heat resistant.

MULTIMOLD.
M-24; 0.35 C, 0.70 Mn, 0.80 Cr, 0.30 Mo, bal Fe.
For plastic mold dies, die casting dies; oil hardened.

MULTIPHASE-MP20N
M-1439, 20 Ni, 50 Co, 20 Cr, 10 Mo.
Heat treated: 290,000 TS; 260,000 YS, 10 El, 36 RA.
Annealed 145,000 TS, 60,000 YS; 70 El, B 91-107 Rock.
For high strength bolts and fasteners
High fatigue strength. Corrosion resistant.

MULTIPHASE-MP35N.
M-1439, M-73, M-522, 35 Ni, 35 Co, 20 Cr, 10 Mo.
Ht. Tr : 286,300 TS; 255,000 YS; 11 El; 39 RA.
Annealed: 146,000 TS; 61,000 YS; 70 El; B 91 107 Rock.
For high strength fasteners, bolts
High fatigue strength Corrosion resistant.
Must be work hardened.

MULTOLE
M-336; 0 6 C, 0 7 Mn, 1 9 Si, bal Fe.
For punches, shear blades, knives, keen edge tools.

MU-METAL.
M-108, 76 Ni, 17 Fe, 5 Cu, 2 Cr
Annealed· 87,000 TS, 43,000 YS
For submarine cable, current transformer; magnetic alloy, high permeability.

MU-METAL
M-108, 74 Ni, 20 Fe, 5 3 Cu, 0 7 Mn
87,000 TS, 43,000 YS.
For submarine cable, current transformer; magnetic alloy.

MUNGOOSE.
M-135, Cu, 12-15 Ni, Zn
For domestic utensils, ornaments, nickel silver

MUNTZ METAL
M-33, 61 Cu, 39 Zn
Annealed. 54,000 TS, 21,000 YS, 45 El
Rolled 80,000 TS, 60,000 YS; 5 El
For trim, brazing rod, valve stems, condenser tubes, high strength

MUNTZ METAL
M 188, 60 Cu, 40 Zn
Cast 48,200 TS. 54 El, 52 RA, 93 Brin.
Hard sheet 80,000 TS, 9 5 El.
For bolts, pins, spindles, wire, condenser tubes; high corrosion resistance

MUNTZ METAL NO 3
M-122, 61 Cu, bal Zn
For forgings, 58,000 TS; 25,000 YS, 45 El; Rockwell B55
For forgings, hardware; yellow brass, high strength

MUNTZ METAL-280
M-8, 60 Cu, 40 Zn
Soft 54,000 TS, 20,000 YS, 45 El
For architecture, trim, perforated sheets, high strength.

MUNTZ PATENTS
Eng , 63-56 Cu, 37-42 Zn, 0 4 Pb
For tubes, hardware, free-cutting

MUNZBRONZE
M 297, 4 Sn, 1 Zn, bal Cu.
Soft. 48,000 TS, 44 El, 68 Brin
Hard 82,000 TS, 5 El, 156 Brin
For chemical plant equipment, corrosion resistant

MUSEX 4-6 CHROME
M 529, C, 3.21 Cr, 0.5 Mo, bal Fe
83,000 TS, 62,000 YS; 26 El; 45 RA.
For welding electrodes; corrosion resistant

MUREX ALTERNEX-A.
M-529, 0.1 C, bal Fe.
Welded 76,400 TS, 66,200 YS; 24 El.
For welding electrodes; for mild steel; Type E-6013

MUREX FILLEX.
M-529, 0.2 C, bal Fe.
Welded: 66,000 TS; 53,000 YS, 28 El.
For welding electrodes; for mild steel; Type E-6020.

MUREX GENEX-M.
M-529; 0 2 C, bal Fe.
Welded: 68,000 TS, 54,000 YS; 28 El.
For welding electrodes; Type E-6012.

MUREX HARDEX 20.
M-529; C, Cr, Mn, bal Fe
For hard surfacing electrodes; for moderate abrasion and high impact; obsolete.

MUREX HARDEX 25.
M-529, 0.2 C, 1 2 Mn, 0.7 Cr, 0 9 Si, bal Fe.
For hard facing electrodes, for moderate abrasion and high impact.

MUREX HARDEX 45
M-529, 0 6 C, 1 4 Mn, 2 7 Cr, 0 8 Si, bal Fe.
For hard facing electrodes, for high abrasion and moderate impact

MUREX MOLEX
M-529, 0 15 C, bal Fe
Welded. 75,000 TS, 62,000 YS; 25 El.
For welding electrodes, for C-Mo steel; Type E-7010 Al

MUREX TYPE FHP
M 529, 0 08-0 13 C, 0 2-0 4 Mn, bal Fe.
Welded 67,000 TS, 56,000 YS; 28 El.
For welding, electrodes, shielded arc; Type E-6020.

MURMANS ALLOY-1
Eng , 72 Al, 15 Zn, 14 Mg
For light alloy parts, non-hardenable

MURMANS ALLOY-2.
Eng , 92 Al, 4 4 Zn, 3 6 Mg
For light alloy parts, non-hardenable

"MUSHET" SELF HARDENING STEEL
M-223, 0 05 P, 0 5 Cr, 2 5 C 0.6 Si, 1 7 Mn, 7 W, bal Fe
For tools, dies, self-hardening

MUSHET STEEL
Japan, 1 5 2 0 C, 4-6 W, 0 25-0 30 Cr, 0 3-0 5 Mn, bal Fe
For tools, dies; cannot be cold worked

MUSIC SPRING
M-120; 0 80 C, 0 25 Mn, 0 25 Si, bal Fe
For springs, Swedish steel

MUSTANG-LC
M-69, 0 65 C, 4 0 Cr, 2 0 V, 6 5 W, 5 0 Mo, bal Fe.
As Quenched C 58 59 Rock.
Tempered 1000°F C 60 61 Rock
For hot forming and swaging dies, nut piercers, hot punches, extrusion dies, forging mandrels, chipper dies.
Good resistance to high temperature softening.
High speed steel. Type H-42.

MUSTANG M 2
M-69, 0 84 C, 4 2 Cr, 6 5 W, 2 V, 5 Mo, bal Fe
For cutting tools, broaches, chasers, drills, hobs, reamers, high speed steel

MUSTANG SPECIAL
M-69, 0 8 C, 6 W, 5 Mo, 4 Cr, 1 V, bal Fe.
For cutters, taps, tools, dies, reamers, drills, discontinued, high speed steel

MUTEMP
M-1417; 70 Fe, 30 Ni.
For compensating shunts for electrical equipment; thermo-sensitive, magnetic.

MUVAR
M-1084, 0 3 Mn, 4 Mo, 16.7 Fe, 79 Ni.
For electrical and magnetic equipment, magnetically soft.

M. V. "C" ALLOY.
M-83; 7.5-13 Si, bal Al.
Sand cast: 18,000-27,000 TS; 10,000-11,000 YS; 15-5 El; 50 Brin.
Chill cast. 22,000-30,000 TS; 10 El.
For airplane and automobile parts, marine parts, tubes; great resistance to atmospheric and sea water corrosion; modified Al-Si alloy.

M.W. METAL.
Eng.; 90-95 Mg, 3-7 Al, 2-5 Zn, 0.5 Mn.
36,000-39,000 TS; 33,000 YS; 16-13 El.
For light alloy parts; age-hardenable.

MY NO. 3.
M-27; 0.5 C, 0.7 Mn, 1 8-2.0 Si, 0.2 Mo, bal Fe.
For tools, chisels; tough.

MYA.
M-363; 0.48 C, 0 3 Mn, 1.45 Si, 1 45 Cr, 0 25 V, bal Fe.
Oil hardening tool steel, shock resisting type.

MY-A-CHROME.
M-363; 0.7 C, 1.0 Cr, bal Fe.
For tools, drills, punches; oil or water hardening.

MYSTIC METAL
Eng ; 89 Pb, 11 Sn, 0.1 Bi.
For solder.

N-3 ALLOY.
M-U.S.; 0.4-0.7 C, 2.0 max Si, 1.5 max Mn, 20-26 Cr, bal Fe.
Cast: 60,000 TS; 40,000 YS; 0-El; 200 Brin.
For furnace parts, grids, combustion chambers
High heat and corrosion resistance.

N-3 METAL.
M-264; 32 Ni, 2.75 Pb, 9.5 Si, 0.75 Mn, bal Cu.
For hardware; free-cutting, corrosion resistant.

N10 (New Bide).
M-1203; Sintered carbide tool material.
For heavy roughing cuts on cast iron, non-ferrous metals and non-metallics.

N18K8M3T.
M-Russia, 0.05 C, 18.3 Ni, 8.5 Co, 3 5 Mo, 0.34 Ti, 0.14 Al, bal Fe.
Ht. Tr.: 300,000 TS; 250,000 YP.
For jet engine and spacecraft components, landing gears, missiles, crimping tools
Maraging steel, tough, shock resistant.

N20 (New Bide)
M-1203, Sintered carbide tool material.
For general purpose machining and milling of cast iron and non-ferrous metals.

N22 (New Bide).
M-1203; Sintered carbide tool material.
For machining of high temperature alloys, non-ferrous and non-metallics.

N30 (New Bide).
M-1203; Sintered carbide tool material.
For semi-finishing and finishing of cast iron non-ferrous and non-metallic materials, and high temperature alloys.

N35K6.
M-Russia; 0.01 C, 35 Ni, 5 Co, 2.3 Ti, 0 2 Cu, 0.4 Si, 0 6 Mn, bal Fe.
Hardened: 142,000 TS.
For electrical equipment, instruments, pumps.
Precipitation hardenable.
Low expansion alloy.

N40 (New Bide).
M-1203; Sintered carbide tool material.
For high speed finishing and precision boring of cast iron, non-ferrous metals and non-metallics.

N50 (New Bide).
M-1203; Sintered carbide tool material.
For heavy duty rough machining and milling of carbon and alloy steels.

N60 (New Bide).
M-1203; Sintered carbide tool material.
For general purpose turning, planning and milling of carbon and alloy steel.

N70 (New Bide).
M-1203; Sintered carbide tool material.
For light roughing and finishing cuts on carbon and alloy steel.

N72 (New Bide).
M-1203; Sintered carbide tool material.
For moderate roughing and finishing of carbon and alloy steels.

N80 (New Bide).
M-1203; Sintered carbide tool material.
For fast finishing and precision boring of carbon and alloy steels.

N-80.
M-884, 0 12 C, 1 5 Mn, 0.2 Mo, bal Fe
Tube 100,000 min TS, 80,000 min YS.
For gas well piping and tubing
Resists sulphide stress corrosion.

N93 (New Met).
M-1203; Sintered carbide tool material.
For normal to high velocity machining of carbon and alloy steels where extra toughness is required

N95 (New Met).
M-1203; Sintered carbide tool material
For normal to high velocity machining of carbon and alloy steel to close tolerance finishes.

N-153 ALLOY.
U S.; 0 35-0 45 C, 1.6 Mn, 15-16 Ni, 15-16 Cr, 1.25-1 75 W, 4 Mo, 11-13 Co, 0.8-1.2 Cb, bal Fe.
Rolled· 176,000 TS, 146,000 YS, 15 El; 30 RA.
For jet engine parts, heat resistant

N-155
M-167; 0 1-0 2 C, 18-22 Ni, 18-22 Cr, 2.5-3.5 Mo, 2-3 W, 0 7-1.2 Cb, 0 1-0 2 N_2, 18-22 Co.
Solution treated: 30,000-50,000 TS.
Aged. 52,000 TS
For jet engine parts, gas turbine blades, ship propulsion blades, heat resistant, similar to "Multiwet "

N-238
England; Ni, Cr
For high temperature applications; heat and corrosion resistant.

NA-1
M-189; 0 10-0 50 C, 28 Cr, 10 Ni, bal Fe
Cast· 85,000 TS; 40,000 YS; 9 El; 10 RA; 200 Brin
For heat and corrosion resistant parts, furnace parts; heat and corrosion resistant to S atw

NA-2.
M-189, 0 35-0 70 C, 15 Cr, 35 Ni, bal Fe
Cast: 70,000 TS; 35,000 YS; 10 El, 10 RA; 175 Brin.
For furnace parts; retorts, heat treating boxes; Type HT; corrosion and heat resistant.

NA-2T.
M-189; 0.4-0.6 C, 36-39 Ni, 16-19 Cr, 1.5 Si, 1.2 Mn, bal Fe.
Cast: 68,000 TS; 40,000 YS; 10 El; 10 RA; 187 Brin.
For high temperature chains and conveyors, heat treating boxes; Type HU; good thermal fatigue.

NA3.
M-189, C, alloy, bal Fe.
For high temperature applications; heat resistant to 2000°F, creep resistant.

NA-4.
M-189; 0.10 max C, 18-20 Cr, 8-10 Ni, bal Fe.
Annealed: 75,000 TS, 35,000 YS, 50 El; 50 RA, 150 Brin.
For cast pipe, chemical plant equipment; Type CF; corrosion resistant

N.A -4A.
M-189; 0.20 C, 20 Cr, 10 Ni, bal Fe
For chemical plant equipment, austenitic, stainless.

NA-4CB.
M-189, 0.10 max C, 18-20 Cr, 8-10 Ni, Cb = 10 × C, bal Fe.
Annealed: 80,000 TS; 40,000 YS; 45 El; 45 RA; 15 Brin
For welded structures, chemical plant equipment; Type CF-8C; stainless, austenitic.

NA-4-M.
M-189; 0.10-0.30 C, 18 Cr, 8 Ni, 3 Mo, bal Fe.
For stainless parts, stainless, corrosion resistant.

NA-6.
M-189; 0.25 C, 25-28 Cr, 12-16 Ni, bal Fe
Cast 85,000 TS; 50,000 YS; 15 El; 15 RA; 175 Brin.
For furnace and oil refinery parts; non-magnetic, high creep resisting to 1800°F.

NA-6A
M-189; 0.2 C, 22-26 Cr, 13-16 Ni, bal Fe
Cast 85,000 TS, 50,000 YS, 15 El, 15 RA, 175 Brin
For furnace and oil refinery parts, pipe, non-magnetic, high creep resistant to 1700°F

NA6LC ALLOY
M-189; C, Ni, Cr, bal Fe
For pickling hooks, hangers, frames, corrosion resistant

NA-7.
M-189; 0.3-0.6 C, 24-30 Cr, 18-22 Ni, bal Fe
Cast 75,000 TS, 50,000 YS, 15 El, 15 RA; 175 Brin
For furnace parts, ACI-HK, nonmagnetic, high creep resistant to 2000°F

NA-12
M-189, 0.15-0.40 C, 11.5-14 Cr, 1 max Ni, bal Fe.
Annealed: 95,000 TS, 65,000 YS, 25 El, 190 Brin.
For glass mold dies, steam turbine parts, valves, pumps, Type CA40, corrosion resistant

NA-18.
M-189; 17 Cr, 0.30 max C, bal Fe
Cast 85,000 TS, 65,000 YS, 200 Brin.
For corrosion resisting parts, corrosion resistant.

NA-19
M-189, 26-19 Cr, 0.50-0.70 C, 3 Ni, bal Fe.
Cast. 65,000 TS, 50,000 YS; 2 El; 2 RA; 175 Brin.
For stainless parts, heat resisting parts, Mg pots, pipe; corrosion resistant; heat resistant; ACI-CCHC.

NA-20.
M-189; 0.5 max C, 26-30 Cr, 4-7 Ni, 0.5 max Mo, bal Fe.
Cast: 85,000 TS; 48,000 YS, 16 El; 190 Brin.
For furnace blowers, copper melting equipment; Type HD; resists flue gases.

NA-22H.
M-189; 0.5 C, 28 Cr, 48 Ni, 5 W, 1.3 Mn, 1 Si, bal Fe.
Cast: 64,500 TS; 3.5 El; 2.7 RA.
At 1800°F: 18,000 TS; 32 El; 48 RA.
For furnace parts, retorts, high temperature equipment; heat and creep resistant to 2200°F.

NA22H.
M-1222; 0.44 C, 46 Ni, 26.3 Cr, 5.3 W, 1.4 Mn, 1 Si, bal Fe.
At 70°F: 64,500 TS; 3.5 El, 2.7 RA.
At 1800°F: 18,000 TS; 32.0 El, 48.0 RA.
For radiant tubes for furnaces, gas generator retorts; high heat resistance to 2200°F.

NA-34.
M-189; 0.10 max C, 18-20 Cr, 8-10 Ni, 2-4 Mo, bal Fe.
Heat treated: 75,000 TS; 35,000 YS; 50 El; 50 RA; 200 Brin.
For castings, pipe, paper mill equipment; corrosion resistant.

NA-60.
M-189, 0.20 C, 10-14 Cr, 58-62 Ni, bal Fe
Cast: 68,000 TS, 36,000 YS, 4 El, 179 Brin.
Aged 75,000 TS, 38,000 YS; 4 El; 205 Brin.
For retorts, heat treating fixtures, salt pots; Type HW; heat resistant

NA-65.
M-189; 18-20 Cr, 65-70 Ni, 0.30 max C, bal Fe
Cast: 75,000 TS, 45,000 YS, 15 El; 15 RA; 200 Brin
For high temperature service castings, pipe, retorts; heat resistant to 2100°F, ACI-HX.

NA226
M-137; 4-5 Cu, 0-0.2 Ti, bal Al.
32,000-42,000 TS, 14,000-28,000 YS; 12-5 El, 65-100 Brin.
For light alloy parts; hardenable.

NA350
M-137, 9.5-10.5 Cu, 0.15 max Cu, 0.25 max Si, bal Al
40,000 TS, 21,000 YS; 10 El, 75 Brin
For light alloy parts, hardenable

NACO 1S.
M-1237, M-1238; 99.5 min Al
O-temper. 12,000 TS; 4500 YS, 37 El.
½ Hard 16,000 TS, 14,000 YS; 10 El.
Hard: 20,500 TS; 19,500 YS, 9 El
For light weight structures, corrosion resistant.

NACO 2S
M-1237, M-1238, 1 Fe + Si max, 99.0 min Al
O-temper 13,500 TS, 5500 YS; 35 El, 23 Brin.
Hard temper: 24,000 TS, 23,000 YS; 5 El; 44 Brin.
For light weight structures, tanks, containers; corrosion resistant.

NACO 3S
M-1237, M-1238, 1.2 Mn, bal Al.
O-temper. 17,000 TS, 7500 YS; 30 El, 28 Brin.
Hard temper: 29,000 TS; 27,000 YS; 4 El; 55 Brin.
For structures, tank cars, containers; resists reducing and oxidizing atmospheres

NACO 50S.
M-1237, M-1238; 0.7 Mg, 0.4 Si, bal Al.
O-temper: 16,000 TS; 9000 YS, 26 El.
T-temper: 33,000 TS, 29,000 YS; 18 El.
For architectural shapes, trim, molding; heat treatable, corrosion resistant.

NACO 54S.
M-1237, M-1238; Al alloy.
For light weight parts.

NACO 57S.
M-1237, M-1238; 2.5 Mg, 0.3 Cr, bal Al.
O-temper: 29,000 TS; 14,000 YS; 25 El; 45 Brin.
Hard temper: 43,000 TS; 38,000 YS, 7 El, 85 Brin
For marine construction and hardware;
resists sea water corrosion.

NACO 123.
M-1237, M-1238; 5 Si, 0.2 max Ti, bal Al.
Cast: 19,000-24,000 TS; 9000-19,000 YS; 10-6 El;
40-50 Brin.
For instrument housings, cases; corrosion resistant,
good castability

NACO 160
M-1237, M-1238, 12 Si, bal Al
Die cast: 37,000 TS; 18,000 YS; 2 El.
For instrument housings, cases, corrosion resistant,
for thin wall sections.

NACO 162
M-1237, M-1238; 1 Cu, 1 Mg, 12 Si, bal Al
Cast 36,000 TS; 28,000 YS; 0.5 El, 105 Brin.
For pistons, low coefficient of expansion.

NACO 320.
M-1237, M-1238; 4 Mg, 0.5 Si, 0.2 max Ti, bal Al.
Cast: 25,000 TS; 12,000 YS, 9 El; 50 Brin
For marine parts, architectural trim,
corrosion resistant

NACO 350.
M-1237, M-1238; 10 Mg, bal Al
Heat treated 45,000 TS, 25,000 YS; 14 El, 75 Brin.
For gasoline fuel meters, aircraft and marine
castings; heat treatable, corrosion resisting

NACO STEEL.
M-89; 0.3-0.4 C, 1.5 Mn, bal Fe
110,000 TS; 70,000 YS; 8 El, 15 RA; 250 Brin.
For car coupler knuckles, car wheels, anchor chains,
water hardening.

N.A.D.
M-233; 2.25 C, 13 Cr, bal Fe.
For tools, dies; non-deforming

NADA C.
M-548; 2.2 Si, bal Cu.
Cast: 45,000-55,000 TS; 60-70 El
For bronze castings, corrosion resistant

NADA NT.
M-548; 3.5-3.75 Sn, 0.5-1.0 Pb, 3.5-3.75 Ni,
bal Cu.
Cast: 40,000-45,000 TS; 20,000 YS, 30-40 El;
70-75 Brin
For pressure and structural castings,
corrosion and erosion resisting.

NADA NT-2.
M-548; 4.5-5.0 Sn, 0.5-1.0 Pb, 3.0-3.5 Ni, bal Cu.
Cast: 42,000-48,000 TS; 20,000-22,000 YS;
30-40 El; 72-80 Brin.
For pressure and structural castings,
corrosion and erosion resisting

NADA NT-3.
M-548; 86-88 Cu, 4.5-5.0 Sn, 0.5-1.0 Pb, 2.0-2.5 Ni.
Cast 40,000-43,000 TS; 18,000-20,000 YS; 30-40 El;
70-75 Brin.
For pressure and structural castings;
corrosion and erosion resisting.

NALOY.
M-864, 0.7 C, 18 W, 4 Cr, 1 V, bal Fe.
For broaches, form tools; high speed steel.

NAPAC.
M-776; 0.07 C, 0.32 Mn, 0.003 Cb, 0.07 Al, bal Fe.
Rolled: 52,000-60,000 TS; 38,000-45,000 YS;
35 El; 62 Rock B. (as ordered).
For structural parts such as automobile bumpers.

NAPRALOY.
M-952, 4.5 C, 24 Cr, bal Fe.
Cast: 600 Brin.
For welding rod, hard facing electrodes;
wear resistant

NARITE.
M-1256; Al, bal Cu
For deep drawing dies, press tools; Al-bronze,
wear and corrosion resistant

NARVE.
M-111, 0.65 C, 1 Si, 0.5 Mn, 1.1 Cr, 0.6 Mo,
bal Fe.
For dies, rams, shafts, tools, cold work steel.

NASCO
M-207; 0.5 C, 0.8 Mn, 1 Cr, 0.4 Mo, bal Fe.
Hardened 263,000-274,000 TS, 209,000-220,000 YS;
550-600 Brin
For tools, chisels, punches, wrenches,
non-tempering, shock resistant, tough

NASCOLOY O
M-207, 0.5 C, 0.8 Mn, 1.8 Si, bal Fe
For pneumatic tools, chisels, rivet sets;
wear resistant, tough, oil hardening,
requires tempering

NASCOLOY W
M-207, 0.4 C, 0.7 Mn, 0.2 Si, 0.8 Cr, 0.3 Mo,
0.3 Cu, bal Fe
For pneumatic tools, chisels, rivet sets;
wear resistant, tough, water hardening,
no tempering

NATALLOY NO 2
M-1446; 0.45 C, 0.80 Mn, 0.95 Cr, 0.06 Mo,
0.15 V, bal Fe
Heat treated 108,000 TS, 88,000 YS; 16 El,
34 RA, 225-300 Brin
For plastic and die casting dies; oil hardened,
AISI 6145

NATIONAL
M-432, C, 18 W, Cr, V, bal Fe.
For high speed steel cutters and tools;
high speed steel

NATIONAL NO 1
M-844, 0.06 C, bal Fe
For welding electrodes for low carbon steel,
copper coated

NATIONAL NO 6
M-844; 0.1 C, alloy, bal Fe
For welding electrodes; for high pressure piping.

NATIONAL 217
M-844, C, alloy, bal Fe.
For hard facing electrodes; wear resistant.

NATIONAL 459
M-844, C, alloy, bal Fe
For hard facing electrodes; wear resistant

NATIONAL BEARING SILVER BABBITT NO. 397.
M-539; 1.5-2.6 Ag, 2.5-4.0 Sn, 9-11 Sb, bal Pb.
Cast. 9500-10,000 TS, 5 El, 15.3 Brin.
For bearings; C.S 8000, Babbitt.

NATIONAL ECONOMY.
M-844; C, 10 alloy, bal Fe.
For hard facing electrodes; wear resistant

NATIONAL GRAPHITIC STEEL.
M-89; 0.3 C, 0.5 graphite, bal Fe.
Annealed: 75,000 TS; 200 Brin
For steel castings; abrasion resistant.

NATIONAL HTM.
M-89; 3 C, Mn, Si, bal Fe.
Cast. 70,000-110,000 TS, 48,000-85,000 YS; 12-7 El, 163-302 Brin.
For gears, shafts, housings, staybolts; pearlitic malleable iron.

NATIONALLOY 1.
M-483, 0.4 max C, 18 min Cr, 8 min Ni, bal Fe.
For chemical engineering equipment; stainless.

NATIONALLOY 2
M-483, 0.5 max C, 6 min Cr, 18 min Ni, bal Fe
For chemical engineering equipment, stainless.

NATIONALLOY 3
M-483, 0.2 max C, 12-13.5 Cr, bal Fe
For chemical engineering equipment, stainless.

NATIONAL TOOLFACE
M-844, C, alloy, bal Fe.
For hard facing electrodes; wear resistant.

NATIONAL TUBE 1 Cr-½ Mo
M-90, 0.15 max C, 0.8-1.1 Cr, 0.45-0.65 Mo, bal Fe
Annealed 60,000 TS, 25,000 YS, 30 El, 163 Brin.
For steam pipes, boiler and superheating tubing.

NATIONAL TUBE 1¼ Cr-½ Mo
M-90, 0.15 max C, 1 max Si, 1-1.5 Cr, 0.45-0.65 Mo, bal Fe
Annealed 60,000 TS, 25,000 YS, 30 El, 163 Brin.
For steam pipes, oil refinery still tubing

NATIONAL TUBE 2 Cr-½ Mo
M-90, 0.15 max C, 1.75-2.25 Cr, 0.45-0.65 Mo, bal Fe
Annealed 60,000 TS; 25,000 YS, 30 El; 163 Brin.
For steam pipes, superheater tubing.

NATIONAL TUBE 2¼ Cr-1 Mo
M-90, 0.15 max C, 2-2.5 Cr, 0.9-1.1 Mo, bal Fe
Annealed 60,000 TS, 25,000 YS, 30 El, 163 Brin
For refinery still tubing; corrosion resistant

NATIONAL TUBE 2½ Cr-½ Mo-¾ Si
M-90, 0.15 max C, 1 max Si, 2.25-2.75 Cr, 0.45-0.65 Mo, bal Fe
Annealed 60,000 TS, 25,000 YS, 30 El, 163 Brin.
For refinery still tubing, corrosion resistant

NATIONAL TUBE 2½ NICKEL STEEL
M-90, 0.10-0.20 C, 0.3-0.6 Mn, 0.1-0.2 Si, 2.25-2.75 Ni, bal Fe
Normalized 65,000 TS, 45,000 YS, 30 El
For piping for low temperature service (sub-zero), stationary boiler tubes, high impact value

NATIONAL TUBE 3 Cr-1 Mo
M-90; 0.15 max C, 2.75-3.25 Cr, 0.8-1.0 Mo, bal Fe.
Annealed 60,000 TS; 25,000 YS, 30 El, 163 Brin.
For superheater and refinery still tubing; corrosion resistant.

NATIONAL TUBE 3½ Ni
M-90, 0.2 max C, 2.25-3.75 Ni, bal Fe
Normalized 60,000 TS, 30,000 YS; 25 El; 190 Brin.
For caustic evaporators, low temperature piping; high impact value

NATIONAL TUBE 5 Cr-½ Mo-1½ Si.
M-90, 0.15 max C, 1-2 Si, 4-6 Cr, 0.45-0.65 Mo, bal Fe.
Annealed. 60,000 TS, 25,000 YS, 30 El; 163 Brin.
For heat exchanger tubing; high temperature use.

NATIONAL TUBE 5 Ni.
M-90; 0.17 max C, 4.75-5.25 Ni, bal Fe.
Normalized: 60,000 TS; 30,000 YS; 25 El; 207 Brin.
For caustic evaporators, low temperature piping; high impact value.

NATIONAL TUBE 7 Cr-½ Mo.
M-90; 0.15 max C, 0.5-1.0 Si, 6-8 Cr, 0.45-0.65 Mo, bal Fe
Annealed: 60,000 TS, 25,000 YS; 30 El; 179 Brin.
For heat exchanger tubing; higher temp. use.

NATIONAL TUBE 8 Cr-1 Mo.
M-90, 0.15 max C, 7-9 Cr, 0.9-1.1 Mo, bal Fe.
Annealed 60,000 TS, 25,000 YS; 30 El; 179 Brin.
For heat exchanger tubing, higher heat resistance.

NATIONAL TUBE 9 Cr-1 Mo.
M-90, 0.15 max C, 0.5-1 Si, 8-10 Cr, 0.9-1.1 Mo, bal Fe
Annealed. 60,000 TS, 25,000 YS; 30 El; 179 Brin.
For heat exchanger tubing; oxidation and corrosion resistant.

NATIONAL TUBE 9 Ni
M-90, 0.12 max C, 8-10 Ni, bal Fe
Normalized 80,000 TS, 50,000 YS, 20 El.
For oil well pump tubing, caustic evaporators, low temperature tubing, high impact value.

NATIONAL TUBE DIAMOND METAL.
M-844, WC
For hard facing electrodes, wear resistant

NAUBUC
Eng., 58 Cu, 16.25 Zn, 25 Ni, 0.75 Fe.
For knives, corrosion resistant

NAUTAL
Hungary, 4.5 Mn, 0.4 Mg, bal Al.
For light alloy parts, corrosion resistant.

NAVAL
M-338, 61 Cu, 1.0-1.5 Sn, bal Zn
Drawn: 52,000 TS; 30,000 YS; 35 El; 100 Brin.
For extrusions, corrosion resistant.

NAVAL NO 6
M-122; 60 Cu, 0.75 Sn, bal Zn
Soft 58,000 TS, 28,000 YS, 42 El.
½H-temper 65,000 TS, 38,000 YS, 37 El
H-temper 75,000 TS, 52,000 YS, 25 El
For marine hardware, bolts, rivets, propeller shafts; corrosion resistant.

NAVAL NO 95
M-122, 63 Cu, 0.7 Sn, bal Zn
For marine hardware, bolts, propeller shafts; corrosion resistant.

NAVAL ALUMINUM
U.S., 1.5 Cu, 0.9 Mn, 0.4 Ni, Fe + Si, bal Al.
For instruments and fittings, resists corrosion

NAVAL ALUMINUM BRONZE.
87-85 Cu, 7-9 Al, 2.5-4.5 Fe
For marine parts, propellers, pumps, tough.

NAVAL BRASS
M-33, 60 Cu, 0.75 Sn, bal Zn
Cast 39,000 TS, 19,000 YS, 15 El, 25 RA.
Hot rolled. 55,000 TS; 25,000 YS; 50 El; 30 RA.
Cold rolled: 70,000 TS, 58,000 YS; 17 El; 40 RA.
For condenser tubes, bolts, spindles; resists sea water corrosion

NAVAL BRASS 2
M-141; 60 Cu, 0.75 Sn, bal Zn
Hard 80,000 TS, 52,000 YS, 15 El.
Soft: 55,000 TS; 25,000 YS, 50 El
For hardware, marine parts, valve parts, resists sea water corrosion.

NAVAL BRASS 28
M-141; 60 Cu, 0.6 Pb, 0.75 Sn, bal Zn.
Hard: 75,000 TS; 53,000 YS; 20 El.
Soft: 57,000 TS; 25,000 YS; 47 El.
For hardware; strong.

NAVAL BRASS NO. 63.
M-1191; 57.5-60.5 Cu, 1.25-1.75 Sn, 0.25-0.75 Pb, bal Zn.
Forged: 60,000-65,000 TS; 26,000-30,000 YS; 25-20 El; 95-110 Brin
For hardware, bolts, machinery parts, fasteners; free-cutting, leaded bronze.

NAVAL BRASS, 64%.
M-33; 64 Cu, 0.75 Sn, bal Zn.
½ Hard temper: 60,000 TS; 45,000 YS; 25 El.
For rivets, screws, bolts, nuts; corrosion resistant.

NAVAL BRASS-462.
M-8, 60 Cu, 39.25 Zn, 0.75 Sn.
Soft: 56,000 TS; 22,000 YS.
For condenser plates, marine hardware; corrosion resistant.

NAVAL BRASS-464.
M-8; 60 Cu, 39.25 Zn, 0.75 Sn.
Hard: 63,000 TS; 35,000 YS; 30 El; B 65 Rock
Soft: 56,000 TS; 25,000 YS; 40 El; B 50 Rock.
For nuts, bolts, fasteners, rivets, valve stems, pump shafts, marine hardware.
Corrosion resistant to sea water.

NAVAL BRASS E-24
M-1191; 58.5-60.0 Cu, 0.5-1.0 Sn, bal Zn.
Forged. 60,000-65,000 TS, 25,000-30,000 YS; 45-3 El; 83-94 Brin
For hardware, bolts, machinery parts; corrosion resistant.

NAVAL BRONZE
M-8, M-33; 88 Cu, 8 Sn, bal Zn.
For steam and structural parts, expansion joints, gears, valves; tough bronze.

NAVAL BRONZE NO. 4.
44 Pb, 36 Sn, 16 Sb, 4 Cu.
For bearings; anti-friction.

NAVAL GUN METAL "G"
U.S.; 88 Cu, 10 Sn, 2 Zn.
For gears, pistons, bearings, bushings; high strength.

NAVALIUM.
Eng; 96.6 Al, 0.1 Cu, 0.7 Sn, 0.6 Fe, 2.3 Mn, 0.24 Si.
For light alloy parts.

NAVAL JOURNAL BEARING, SPEC. "H."
U.S.; 83 Cu, 14 Sn, 3.5 Pb
50,000 TS, 9.5 El.
Bearings; heavy duty

NAVAL JOURNAL BEARING, SPEC. "HX."
U.S.; 83 Cu, 14 Sn, 3.5 Pb.
For bearings; heavy duty.

NAVALOY.
Eng; Sn, Sb, bal Pb.
For bearings; Babbitt metal.

NAVAL PHOSPHOR BRONZE (P-C) CAST.
U.S.; 88 Cu, 8 Sn, 4.0 Zn, 0.5 P.
57,000-35,000 TS; 31,000 YS; 18 El.
For bearings, gears, marine parts; resists sea water corrosion; U.S.N.-46 B5f.

NAVAL PHOSPHOR BRONZE (P-R) ROLLED.
U.S.; 94 Cu, 3.5 Sn, 0.5 P.
80,000 TS, 60,000 YS; 12 El.
For pump parts, valve stems, bolts; resists sea water corrosion; U.S.N.-46 B14d.

NAVAL VALVE BRONZE.
U.S.; 88 Cu, 6.5 Sn, 4 Zn, 1.5 Pb.
58,000-32,000 TS; 29,000 YS; 9-17 El; 80 Brin.
For valve stems, valve seats, valve bodies; "Composition M"; U.S.N.-46 B8d.

NAVAN.
M-1405; C, bal Fe.
For gears, shafts, wear resistant parts; case hardened; B.S.I. 5005/101.

NAVY.
M-1260, 74 Sn, 9 Sb, 4 Cu, 13 Pb.
Cast: 14,200 TS; 28 Brin.
For steam turbine bearings; M.P. 355-665°F; wear resistant

NAVY NO 4 ALLOY.
U.S; 96 Al, 4 Cu.
15,000 TS, 5 El.
For light alloy parts, boxes, covers, face plates.

NAVY ALUMINUM ALLOY.
U.S; 1.5 Cu, 0.9 Mn, 0.4 Ni, 0.4 Fe, 0.3 Si, bal Al
For instruments, fittings, light alloy parts; non-hardenable

NAVY ANTIFRICTION METAL GRADE 1.
M-561, 90-93 Sn, 3.5-5 Sb, 0.5 Pb, 3.5-5 Cu
10,770 TS, 18-30 Brin
For antifriction metal, bearings; Babbitt metal, aircraft engine bearings, Babbitt.

NAVY ANTIFRICTION METAL GRADE 2
M-561, 87.5-89.5 Sn, 7-8 Sb, 0.35 Pb, 3.5-4.5 Cu, 0.10 As
For antifriction metal, genuine Babbitt, automotive engine bearings, for moderately severe service.

NAVY ANTIFRICTION METAL GRADE 3
M-561, 83-85 Sn, 7.5-8.5 Sb, 0.35 Pb, 7.5-8.5 Cu, 0.10 As
For hard Babbitt, bearings; for moderately heavy pressures.

NAVY ANTIFRICTION METAL GRADE 4.
M-561; 80.5-82.5 Sn, 12-14 Sb, 0.25 Pb, 5-6 Cu, 0.10 As
For hard bearings, for heavy pressure and high speeds

NAVY ANTIFRICTION METAL GRADE 5.
M-561; 61-63 Sn, 9.5-10.5 Sb, 24-26 Pb, 2.5-3.5 Cu, 0.15 As
For electric motor bearings, for low pressures and high speeds

NAVY ANTIFRICTION METAL GRADE 6.
M-561; 4.5-5.5 Sn, 14-16 Sb, 79-81 Pb, 0.50 Cu, 0.20 As
For cheap Babbitt bearing, for light service.

NAVY ANTIFRICTION METAL GRADE 7.
M-561, 9-10 Sn, 14-16 Sb, 74-76 Pb, 0.50 Cu, 0.20 As
For cheap Babbitt bearing; for light service.

NAVY BEARING.
U.S; 91-80 Sn, 4.5-15 Sb, 3.7-5.0 Cu.
For bearings, bushings; anti-friction.

NAVY BEARING, HARD.
U.S.; 80 Sn, 15 Sb, 5 Cu.
For bearings; anti-friction.

NAVY COMPOSITION "W."
U.S.; 89 Sn, 7.3 Sb, 3.7 Cu.
For bearings; anti-friction.

NAVY GEAR BRONZE.
U.S.; 84-86 Cu, 13-15 Sn, 1.5 Zn, 0.5 P.
30,000 TS; 1-8 El.
For gears and worm wheels; tough.

NAVY "N" ALLOY.
U.S.; 3 Mn, 6 Cu, bal Al.
20,000 TS; 8 El.
For general castings; corrosion resisting.

NAVY TOMBASIL.
M-123, M-346; 5 Si, 6 Zn, bal Cu.
Cast: 60,000 TS; 35,000 YS; 15 El; 110 Brin.
Corrosion resistant; for valve stems.

NAX 9112.
M-766; 0.10-0.15 C, 1.10 max Mn, 0.50-0.90 Si, 0.50-0.80 Cr, 0.05-0.15 Zr, bal Fe.
Water or oil hardenable; for structural parts.

NAX 9115.
M-766; 0.13-0.18 C, 1.10 max Mn, 0.50-0.90 Si, 0.50-0.80 Cr, 0.05-0.15 Zr, bal Fe.
Water or oil hardenable; for structural parts.

NAX 9120.
M-766, 0.18-0.23 C, 1.10 max Mn, 0.50-0.90 Si, 0.50-0.80 Cr, 0.05-0.15 Zr, bal Fe.
Water or oil hardenable; for structural parts.

NAX 9120 MOD.
M-766; 0.15-0.20 C, 1.10 max Mn, 0.50-0.90 Si, 0.50-0.80 Cr, 0.05-0.15 Zr, bal Fe.
Water or oil hardenable; for structural parts.

NAX 9130.
M-766; 0.28-0.33 C, 1.10 max Mn, 0.50-0.90 Si, 0.50-0.80 Cr, 0.05-0.15 Zr, bal Fe.
Water or oil hardenable; for structural parts.

N-A-X AC9111
M-766; 0.10 C, 0.6 Mn, 0.7 Si, 0.6 Cr, 0.1 Zr, bal Fe
Rolled 75,000 TS, 50,000 YS; 40 El, 75 RA.
For structures, bridges; good weldability.

N-A-X AC9115
M-766, 0.10-0.17 C, 0.60 Cr, 0.15 max Mo, 0.05-0.15 Zr, bal Fe
Hot rolled. 76,000 TS, 52,000 YS; 40 El; 74 RA; 150 Brin
For gas turbine structures, good weldability.

NAX FINE GRAIN.
M-766; 0.22 max C, 1.10 Mn, 0.40-0.90 Si, 0.03-0.15 Zr, bal Fe.
Rolled (min) 70,000 TS; 50,000 YS; 22 El; 140-160 Brin.
For structural parts; weldable.

NAX HIGH TENSILE.
M-766, 0.18 max C, 0.50-0.90 Mn, 0.60-0.90 Si, 0.40-0.80 Cr, 0.03-0.12 Zr, bal Fe
Rolled (min). 70,000 TS; 50,000 YS; 22 El; 140-160 Brin.
For structural parts; improved corrosion resistance over most carbon steels, weldable.

N-A-XTRA 55.
M-766, 0.18 C, 0.70 Si, 0.9 Mn, 0.018 P, 0.021 S, 0.89 Cr, 0.32 Mo, 0.09 Zr, bal Fe
Plate: 92,000-114,000 TS, 78,000 min YP; 18 min El.
For bridges, tanks, railroad cars, containers, ships, aircraft.
Good formability and weldability.

N-A-XTRA 60.
M-766; 0.18 C, 0.70 Si, 0.9 Mn, 0.018 P, 0.021 S, 0.9 Cr, 0.3 Mo, 0.09 Zr, bal Fe.
Plate: 100,000-120,000 TS; 86,000 min YP; 18 min El.
For tanks, containers, machine parts, ships, bridges, aircraft, railroad cars.
Good formability and weldability.

N-A-XTRA 65
M-766; 0.18 C, 0.70 Si, 0.9 Mn, 0.018 P, 0.021 S, 0.9 Cr, 0.32 Mo, 0.09 Zr, bal Fe.
Plate· 107,000-127,000 TS; 92,000 min YP; 17 min EL.
For tanks, containers, machine parts, bridges, railroad cars, aircraft.
Good formability and weldability.

N-A-XTRA 70.
M-766; 0.18 C, 0.70 Si, 0.9 Mn, 0.018 P, 0.021 S, 0.9 Cr, 0.3 Mo, 0.09 Zr, bal Fe.
Plate· 114,000-135,000 TS; 100,000 min YP; 16 min El.
For containers, tanks, machine parts, ships, bridges, aircraft, railroad cars.
Good weldability and formability.

N-A-XTRA 80.
M-766; 0.21 max C, 0.60-1.10 Mn, 0.40-0.90 Si, 0.50-0.80 Cr, 0.30 max Mo, 0.05-0.15 Zr, 0.0025 max B, bal Fe
Hardened, min· 95,000 TS, 80,000 YS; 20 El.
For structural parts.

N-A-XTRA 90.
M-766, 0.21 max C, 0.60-1.10 Mn, 0.40-0.90 Si, 0.50-0.80 Cr, 0.30 max Mo, 0.05-0.15 Zr, 0.0025 max B, bal Fe.
Hardened, min: 105,000 TS, 90,000 YS; 18 El.
For structural parts.

N-A-XTRA 100
M-766, 0.21 max C, 0.60-1.10 Mn, 0.40-0.90 Si, 0.50-0.80 Cr, 0.30 max Mo, 0.05-0.15 Zr, 0.0025 max B, bal Fe.
Hardened, min 115,000 TS, 100,000 YS; 18 El.
For structural parts

N-A-XTRA 110
M-766, 0.21 max C, 0.60-1.10 Mn, 0.40-0.90 Si, 0.50-0.80 Cr, 0.30 max Mo, 0.05-0.15 Zr, 0.0025 max B, bal Fe.
Hardened, min. 125,000 TS, 110,000 YS; 18 El.
For structural parts

N-A-XTRA 125
M-766, 0.18-0.22 C, 0.8 Mn, 0.8 Si, 0.6 Cr, 0.16 Mo, 0.12 Zr, bal Fe
Heat treated 139,000 TS; 126,800 YS; 20 El; 55 RA; 293 Brin.
For excavator buckets, mine cars and equipment, road machinery; structural steel, good formability.

N-A-XTRA 150
M-766; 0.26-0.30 C, 0.8 Mn, 0.8 Si, 0.6 Cr, 0.14-0.18 Mo, 0.08-0.15 Zr, bal Fe
Heat treated· 165,000 TS, 158,600 YS, 13 El; 47 RA, 352 Brin.
For excavator buckets, mine cars and equipment, road machinery, structural steel, good formability.

NAX X9115.
M-766, 0.13-0.18 C, 1.10 max Mn, 0.50-0.90 Si, 0.50-0.80 Cr, 0.10-0.20 Mo, 0.05-0.15 Zr, bal Fe.
Water or oil hardenable, for structural parts.

NAX X9120.

Water or oil hardenable; for structural parts.

NB.
M-1577; 0.04 C, 65.32 Ni, 28.20 Mo, 5.18 Fe.
For corrosion and heat resistant parts; chemical plant equipment, pump and valve parts.
Corrosion and heat resistant.

NBD NO. 1 STANDARD BABBITT.
M-539; Sn, Sb, bal Pb.
For bearings; Babbitt metal.

NBD NO 2.
M-539; Sn, Pb, Ni, bal Cu.
Cast: 33,000 TS; 21,000 YS; 7 El; 7 RA; 75 Brin
For bearings, engine and machinery castings; C.Y.P. 14000.

NBD NO. 2 STANDARD BABBITT.
M-539; Pb, Sn, Sb.
For large, slow running bearings, Babbitt metal

NBD NO 3.
M-539; Sn, Pb, bal Cu.
Cast: 32,000 TS; 21,000 YS; 10 El; 10 RA, 74 Brin.
For bushings, gearings; C.Y.P. 14000.

NBD NO. 3 A.
M-539, 80 Cu, 10 Sn, 10 Pb
Cast· 25,000 TS, 12,000 YS, 8 El, 60 Brin.
For bearings,; SAE 64

NBD NO. 3 B.
M-539; 83 Cu, 7 Sn, 7 Pb, 3 Zn
Cast: 30,000 TS, 14,000 YS, 12 El; 60 Brin
For bearings, SAE 660.

NBD NO. 3 D.
M-539, 79.75 Cu, 9 Sn, 10 Pb, 0.75 P, 0.25 Ni
Cast: 25,000 TS, 12,000 YS, 8 El; 60 Brin.
For bearings, heavy duty

NBD NO. 3 STANDARD BABBITT
M-539, Pb, Sn, Sb.
For bearings; Babbitt metal.

NBD NO. 4.
M-539; Sn, Zn, bal Cu.
Cast. 42,000 TS, 23,000 YS; 21 El; 22 RA; 88 Brin
For gears, pinions, worm wheels, nuts; C.Y P 16000.

NBD NO. 4 F.
M-539; 83 Cu, 11 Sn, 3 Pb, 3 Zn.
Cast: 35,000 TS; 16,000 YS; 16 El; 60 Brin.
For bearings; heavy duty.

NBD NO. 4 H.
M-539, 87 Cu, 7 Sn, 3 Pb, 3 Zn
Cast· 30,000 TS, 15,000 YS; 15 El, 60 Brin
For bearings, heavy duty

NBD NO. 4 I.
M-539; 85 Cu, 5 Sn, 5 Pb.
Cast: 30,000 TS, 14,000 YS, 20 El; 60 Brin
For bearings; SAE 40.

NBD NO. 4 J.
M-539; 87 Cu, 9 Sn, 2 Pb, 2 Zn.
Cast. 30,000 TS; 15,000 YS; 15 El; 60 Brin.
For bearings; modified Gun Bronze.

NBD NO. 4 K.
M-539; 88 Cu, 10 Sn, 2 Zn.
Cast: 40,000 TS, 18,000 YS; 20 El; 70 Brin.
For bearings; SAE 62; Gun Bronze.

NBD NO. 4 L.
M-539; 88 Cu, 8 Sn, 4 Zn.
Cast· 40,000 TS; 18,000 YS; 20 El; 70 Brin.
For bearings; SAE 620; Navy "G"

NBD NO 4 STANDARD BABBITT.
M-539; Pb, Sn, Sb.
For severe service bearings; Babbitt metal

NBD NO. 5.
M-539, Sn, bal Cu.
Cast· 37,000 TS; 21,000 YS; 10 El
For gears; acid resistant

NBD NO 6
M-539; Sn, Pb, bal Cu.
Cast 27,500 TS; 17,000 YS; 16 El; 15 RA, 47 Brin.
For gearings with poor lubrication; C Y P. 9700.

NBD NO 6 A
M-539, 77 Cu, 7 Sn, 15 Pb.
Cast 25,000 TS, 14,000 YS; 10 El; 50 Brin.
For bearings; hard bronze.

NBD NO 6 G
M-539, 78 Cu, 6 Sn, 16 Pb.
Cast· 30,000 TS, 16,000 YS; 12 El; 55 Brin
For bearings, heavy duty.

NBD NO. 6-H.
M 539, 74 Cu, 6 Sn, 20 Pb.
Cast 28,000 TS; 14,000 YS; 10 El; 50 Brin
For bearings, bushings, leaded bronze

NBD NO 6 I.
M-539, 78 Cu, 6 Sn, 16 Pb.
Cast 25,000 TS, 14,000 YS, 10 El, 50 Brin
For bearings, heavy duty

NBD NO 6M
M-539, 75 Cu, 7 Sn, 18 Pb
For bearings, bushings, sleeves, heavy duty

NBD NO 6S
M-539, 5 Sn, 24 Pb, bal Cu
Cast. 21,000 TS; 7 El.
For bearings, bushings, liners, heavy duty

NBD NO 7
M-539, Sn, Pb, Ni, bal Cu
Cast 40,000 TS, 27,000 YS, 12 El, 15 RA, 90 Brin
For bearings, for heavy loads

NBD NO 7A
M-539, 10 Sn, 2 Pb, 3 Ni, bal Cu.
Cast 42,000 TS, 18,000 YS; 15 El, 80 Brin
For railway bearings, leaded nickel bronze

NBD NO 9A
M-539, 10 Al, 1 Fe, bal Cu
Cast heat treated 65,000 TS, 25,000 YS, 20 El, 11 RA, 120 Brin
For bearings, wear plates, C Y P 15000; SAE-68B

NBD NO. 9-AF
M-539; 86 Cu, 10.5 Al, 3.5 Fe
Cast 75,000 TS; 30,000 YS, 12 El; 150 Brin.
Heat treated. 90,000 TS, 45,000 YS, 6 El, 190 Brin
For bearing segments, wearing plates, screwdown nuts, Al-bronze, corrosion and wear resistant.

NBD NO. 9B
M-539, Al, Fe, bal Cu.
Cast· 64,000 TS, 28,000 YS, 11 El; 12 RA; 144 Brin.
For acid resisting parts, crates, pickling racks; C Y.P 24000.

NBD NO. 9C.
M-539; Al, Fe, bal Cu.
Cast: 84,000 TS; 33,000 YS, 25 El; 24 RA; 137 Brin.
For bushings, bearings; C.Y.P. 24000

NBD NO. 9D.
M-539; Al, Fe, bal Cu.
Cast: 88,000 TS; 43,000 YS; 13 El; 13 RA; 149 Brin.
For bushings, bearings, C.Y.P. 30000.

NBD NO. 9E.
M-539, Al, Fe, bal Cu.
Cast: 90,000 TS; 43,000 YS; 12 El; 12 RA; 170 Brin
For gears, pinions, worms, worm wheels, C Y P. 35000.

NBD NO. 9F.
M-539, 9 Al, 3 Fe, bal Cu.
Cast heat treated 65,000 TS; 25,000 YS, 20 El, 130 Brin.
For slides, gibs, gears; C Y.P 40000; SAE-68A.

NBD NO 9G
M-539, Al, Fe, bal Cu.
Cast 55,500 TS, 55,500 YS, 0 El, 0 RA, 300 Brin
For forming or drawing dies, C Y P. 61000

NBD NO 9H
M-539, Al, Fe, bal Cu
Cast 120,000 TS, 101,000 YS; 3 El, 5 5 RA; 235 Brin
For propellers, high strength castings, heat treatable

NBD NO 9K
M 539, 10 Al, 4 Fe, 2 Ni, bal Cu
Heat treated 75,000-90,000 TS, 30,000-45,000 YS, 12-6 El, 150 190 Brin
For propellers, bearings, gears, Al-bronze, heat treatable

NBD NO 9L
M 539, 10 Al, 5 Fe, 5 Ni, bal Cu.
Heat treated 90,000 110,000 TS, 40,000-60,000 YS, 6-5 El; 109-200 Brin
For bearings, propellers, gears, Al bronze, heat treatable

NBD NO 10A
M-539, 60 Cu, 1 Al, 3 Mn, 1 Fe, bal Zn
Cast 60,000 TS, 20,000 YS, 15 El, 110 Brin
For high strength castings

NBD NO 10B
M-359, 64 Cu, 6 Al, 4 Mn, 3 Fe, bal Zn
Cast 90,000 TS, 45,000 YS; 20 El, 180 Brin
For high strength castings, C Y P 64000

NBD NO 10C
M-539, 1.2 Al, 1 Mn, 1 2 Fe, 58 Cu, bal Zn
Cast 65,000 TS, 25,000 YS, 20 El, 100 Brin
For bearings, bushings, sleeves; SAE 43; manganese bronze.

NBD NO 10D
M-539; 64 Cu, 6 Al, 3 Mn, 3 Fe, bal Zn
Cast. 110,000 TS, 60,000 YS; 12 El, 200 Brin
For bearings, worm wheels, gears, valves; SAE 430B, manganese bronze

NBD NO 11
M-539, Sn, Pb, bal Cu
Cast: 33,000 TS, 16,000 YS; 12 El, 58 Brin.
For bearings, bushings

NBD NO 11A.
M-539; 88 Cu, 8 Sn, 4 Pb.
Cast: 28,000 TS; 16,000 YS; 12 El, 60 Brin.
For bearings, heavy duty.

NBD NO. 11 C.
M-539; 86 Cu, 8 Sn, 2 Pb, 4 Zn.
Cast: 34,000 TS, 16,000 YS; 20 El; 65 Brin
For bearings; heavy duty.

NBD NO 11D.
M-539; 5 Sn, 4 Zn, 3 Ni, bal Cu.
Cast: 40,000 TS; 17,000 YS; 25 El, 65 Brin.
For bearings, bushings, sleeves; heavy duty nickel bronze

NBD NO 12
M-539; Sn, Pb, bal Cu.
Cast· 40,000 TS; 21,000 YS; 19 El; 18 RA; 81 Brin.
For bearings, bushings; C Y.P. 16600.

NBD NO 13
M-539; Sn, Pb, Zn, bal Cu
Cast, 30,000 TS, 19,000 YS, 13 El, 18 RA; 69 Brin.
For bearings, bushings, for steam and water pressure.

NBD NO 13 A
M 539, 80 Cu, 8 Sn, 12 Pb.
Cast 25,000 TS, 12,000 YS, 8 El, 60 Brin
For bearings, heavy duty

NBD NO 15A
M-539, 5 Sn, 20 Pb, 3 Zn, bal Cu
Cast 21,000 TS, 10,000 YS, 7 El, 45 Brin
For bearings, bushings; sleeves; heavy duty leaded bronze

NBD NO 20 A.
M-539, 97 Cu, 2 Sn, 1 Zn
For bearings, copper, electrodes

NBD NO 20B
M-539, 99 7 Cu.
For bearings, blast furnace copper

NBD NO 20-C
M 539, 99 9 Cu
Cast 25,000 TS, 7000 YS; 45 El, 35 Brin
For electrode holders, water cooled linings, 80% electrical conductivity.

NBD NO 20-H
M-539, 99 3 Cu, 0 7 Cr.
Heat treated 55,000 TS, 35,000 YS, 25 El, 100 Brin
For castings, electrode holders, heat treatable, corrosion resistant

NBD NO 20-K
M-539, 98 2 Cu, 1 5 Ni, 0.3 Be.
Heat treated 75,000 TS; 50,000 YS, 3 El, 200 Brin
For castings, age-hardenable, corrosion resistant

NBD NO 20L
M 539; 99 9 Cu
Cast 25,000 TS, 8500 YS, 45 El, 35 Brin.
For conductors, 90% electrical conductivity

NBD NO 21 A.
M-539, 68 Cu, 2 Pb, 30 Zn
Cast 30,000 TS, 11,000 YS, 20 El, 40 Brin.
For bearings, heavy duty.

NBD NO 21 B
M-539, 63 Cu, 1 Sn, 2 Pb, 34 Zn.
Cast 40,000 TS, 14,000 YS, 15 El, 40 Brin.
For bearings, heavy duty.

NBD NO. 21 C
M-539; 72 Cu, 1 Sn, 2 Pb, 25 Zn.
Cast 35,000 TS, 12,000 YS, 25 El; 40 Brin
For bearings; heavy duty.

NBD NO. 22.
M-539; 88 Cu, 2 Sn.
Cast: 25,000 TS; 7000 YS, 40 El; 45 Brin.
For bells; welding bell copper.

NBD NO. 22A.
M-539; 90 Cu, 10 Sn.
Cast: 35,000 TS; 21,000 YS; 10 El; 90 Brin.
For bearings, gears; SAE 65.

NBD NO. 22 B.
M-539; 93 Cu, 7 Sn
Cast: 35,000 TS; 20,000 YS; 10 El; 85 Brin.
For bearings; heavy duty.

NBD NO. 22-C.
M-539; 91 Cu, 9 Sn.
Cast.
For plumbing, hardware; acid bronze

NBD NO. 22 D
M-539; 84 Cu, 16 Sn.
Cast: 18,000 TS.
For bearings; bridge bronze.

NBD NO. 22 E.
M-539; 80 Cu, 20 Sn.
Cast: 24,000 TS.
For bearings, bridge bronze.

NBD NO 22 F
M-539; 91 Cu, 5.5 Sn, 3.5 Zn
Cast: 37,000 TS; 14,000 YS; 30 El; 40 Brin
For bearings, trolley wheels, heavy duty

NBD NO 46.
M-539, 84 Cu, 8 Sn, 8 Pb.
Cast: 25,000 TS; 12,000 YS; 8 El.
For bearings.

NBD NO 63
M-539, 88 Cu, 10 Sn, 2 Pb
Cast: 35,000 TS; 10 El.
For plumbing, hardware, bearings; SAE63, leaded tin bronze.

NBD NO 64
M-539, 80 Cu, 10 Sn, 10 Pb.
Cast 25,000 TS, 12,000 YS; 8 El; 50 Brin.
For bearings, liners, sleeves, leaded bronze; SAE64

NBD NO 65.
M-539, 88 Cu, 12 Sn
Cast: 35,000 TS; 21,000 YS; 10 El, 90 Brin.
For gears, worm wheels, bearings; SAE65; gear bronze.

NBD NO 65-N.
M-539; 87.5 Cu, 11 Sn, 1.5 Ni.
Cast: 35,000 TS; 21,000 YS; 10 El; 90 Brin.
For gears, nickel gear bronze.

NBD NO. 66
M-539; 85 Cu, 5 Sn, 9 Pb, 1 Zn.
Cast: 25,000 TS; 12,000 YS; 8 El.
For bearings; SAE 66.

NBD NO 197
M-539; 95 Cu, 4 Si, 1 Mn
Cast: 45,000 TS; 18,000 YS; 20 El; 80 Brin
For gears, bolts, shafts, fasteners; silicon bronze.

NBD NO. 198
M-539; 91 Cu, 1 Sn, 5 Zn, 3 Si.
Cast: 45,000 TS; 18,000 YS; 20 El.
For hardware, bolts, shafts; silicon bronze.

NBD NO. 199.
M-539, 82 Cu, 14 Zn, 4 Si
Cast: 60,000 TS; 24,000 YS; 16 El.
For hardware, valves; silicon bronze.

NBD NO. 295.
M-539; 91 Cu, 9 Zn.
Cast.
For ornamental accessories; gilding bronze.

NBD NO. 622.
M-539; 88 Cu, 6 Sn, 1.5 Pb, 4 Zn.
Cast: 34,000 TS; 16,000 YS; 22 El; 50 Brin.
For valves, plumbing; valve bronze; SAE622.

NBD NO. 660.
M-539, 83 Cu, 7 Sn, 7 Pb, 3 Zn
Cast. 30,000 TS; 14,000 YS; 12 El; 50 Brin.
For plumbing, hardware; SAE660, modified red brass

NBD "A" GRADE.
M-539, Pb, Sb, bal Sn.
For low grade bearings; Babbitt metal.

NBD ALUMINUM BABBITT.
M-539, Al, bal Sn
Cast 12,100 TS, 8.8 El, 6.6 RA; 28.6 Brin
For heavy pressure bearings; Babbitt metal; C.S. 23200.

NBD ARCTIC BRONZE
M-539, Sb, Sn, bal Cu
For locomotive bearings

NBD ARMATURE BABBITT
M-539, Sn, Cu, Ni, Sb
Cast 13,600 TS, 6.1 El, 7.0 RA, 33.8 Brin
For armature bearings, marine turbine bearings; Babbitt metal, C.S. 26700

NBD BETA CRUSHER BABBITT
M-539, Sb, Sn, Pb, Cu
Cast 11,300 TS, 4.9 El, 5.3 RA, 27.5 Brin
For bearings for cement mills and mines, Babbitt metal, resists heavy loads

NBD CRESCENT BABBITT
M-539, Cu, Sn, Sb
Cast: 8,500 TS, 1.4 El, 2.1 RA, 25.1 Brin
For heavy duty bearings for rolling mills, paper mills, Babbitt metal; C.S. 18300

NBD ENGINE BABBITT
M-539, 9-11 Sb, 4-6 Cu, bal Sn
Cast 10,000-15,000 TS, 5 El
For bearings, bushings, liners; Babbitt, C.S 10600

NBD EXTRA COPPER-HARDENED BABBITT
M-539, Cu, Sn, Sb
Cast: 8,500 TS, 5.0 El, 5.2 RA; 27.1 Brin
For bearings, Babbitt metal, C.S. 7400

NBD GENUINE BABBITT (ORIGINAL)
M-539; 88.9 Sn, 3.7 Cu, 7.4 Sb.
Cast 13,000 TS; 10 El; 14 RA, 28.7 Brin
For high temperature resistant bearings; Babbitt metal, C.S. 21200

NBD GENUINE BABBITT (SPECIAL).
M-539; Cu, Sb, bal Sn.
Cast: 10,000 TS, 5.0 El; 12.9 RA; 28.9 Brin.
For heavy duty bearings, Babbitt metal; C.S. 22200

NBD HOO-HOO
M-539; Sn, Cu, Ni, Sb.
Cast: 12,800 TS; 11.1 El; 16 RA; 28 Brin.
For bearings, Babbitt metal; C.S. 25600.

NBD IMPROVED BABBITT.
M-539; Cu, Sn, Sb.
Cast: 9,600 TS; 2.2 El, 1.5 RA; 24.1 Brin.
For general utility bearings; Babbitt metal; C.S. 19500

NBD NICKEL BABBITT.
M-539; Sn, Cu, Ni.
Cast: 11,900 TS; 5.0 El; 15.8 RA; 28.9 Brin.
For bearings; high speed and high pressures; C.S. 10600.

NBD PHOSPHOR BRONZE BABBITT.
M-539; P, Cu, bal Sn.
Cast: 11,150 TS; 5.6 El; 7.1 RA; 28.1 Brin.
For marine and stationary engine bearings; Babbitt metal; C.S. 18100.

NBD REGENT BABBITT.
M-539; 14 Sb, 5 Sn, bal Pb.
Cast: 9,000 TS; 2.0 El; 20 Brin
For relining railroad bearings, Babbitt metal.

NBD REX BABBITT.
M-539, 10 Sn, 15 Sb, bal Cu
Cast 10,000 TS, 2 5 El, 1.8 RA; 24.8 Brin.
For medium high speed and heavy pressure bearings, Babbitt metal, C S 10100

NBD SPECIAL MOTOR BABBITT.
M-539, Sb, Sn.
Cast. 9,100 TS; 2 2 El, 3.6 RA; 26.5 Brin.
For motor bearings, Babbitt metal, C S 18000.

NBD SPECIAL NO 1 BABBITT.
M-539; Sn alloy.
Cast 7,500 TS; 1 0 El, 1 7 RA; 24 2 Brin
For bearings for rolling and paper mills, Babbitt metal, C S 14200

NBD TIGER BRONZE
M-539, Pb, Sn, bal Cu
Cast 33,000 TS, 18,000 YS; 19 El; 15 RA; 53 Brin
For engine castings, bearings, shock resistant.

NC
M-1577, 0 05 C, 15 32 Cr, 58 07 Ni, 13 73 Mo, 5 68 Fe, 4 24 W
For chemical plant equipment, pump and valve parts
Corrosion and heat resistant.

NC-4
French, 24 Ni, 3 Cr, bal Fe
For thermostatic bimetal.

N C 82.
M-121, 80 Ni, 20 Cu
For welding wire for high temperature, Ni-Cr and Ni Cr-Fe alloys, heat resistant

N C ALLOY.
M-688, C, alloy, bal Fe
For tools, dies, oil hardening.

N.C A (NON-CORRODIBLE ALUMINUM)
M-411, 2 2 Ni, 3 Cu, 0 2 Mg, 0.2 Mn, bal Al.
Rolled 45,000 TS
Sand cast 24,000-31,000 TS; 12,000-15,000 YS, 7-5 El; 63 Brin
For light alloy parts, resists sea-water corrosion.

N.C C ALLOY.
M 121, 56 min Ni, 23 min Cu, 7 5 min Cr, 1 5 max C, 1.75 max Si.
For production of Ni-resistant castings; M P. 2300°F.

N C.C PIG.
M-68, 56 min Ni, 23 min Cu, 7.5 min Cr, 1 5 max C, 1.75 max Si
For foundry alloy for Ni-Resist Iron, M.P 2300°F.

N.C.M.
M-240; C, Ni, Cr, Mo, bal Fe.
Heat treated: 125,000 TS; 105,000 YS; 16 El; 50 RA, 270-310 Brin.
For gears, shafts, oil hardened, tough.

N.C M
M-499, 0.1-0.2 C, 4.0-4.5 Ni, 1.25-1.5 Cr, 0 15-0 30 Mo, bal Fe
Heat treated: 200,000 TS; 165,000 YS; 15 El, 47 RA, 418 Brin.
For case hardened parts for abrasion resistance; case hardening steel; Iz-26.

NCMV
M-1724, 0.40-0.45 C, 0 6-0 8 Si, 0.3-0 5 Mn, 1 7-2.0 Ni, 1.4-1.6 Cr, 0 9-1.1 Mo, 0.2-0 3 V, bal Fe.
Hardened 210,000-310,000 TS, 194,000-257,000 YS; 12-6 El, 59-45 Rock C.
For high strength parts as airframe, undercarriage components and pressure vessels. Can be nitrided.

NCR-238
M-38; 0 4 C, 1.4 Si, 8 25 Cr, 2.25 Ni, 1 25 Cu, bal Fe.
For stainless parts, pump and furnace parts; stainless

N. D. FORGING STEEL
M-57; 0 3 C, 15 W, 4 Cr, 0.5 V, bal Fe.
For forging dies, extrusion rams and liners; hot work steel, oil hardened

NDHTC-OILITE.
M-211, Fe alloy
Sintered 80,000 TS
For bearings, ferrous, porous

N D S
M-73, 0 75 C, 1 0 Cr, 1 75 Ni, bal Fe
For tools, shear blades, shock resisting

NDZ BRONZE
M-801, 0 25 max Pb, 5 0 max Zn, 5 5 max Ni, 5 5 max Fe, 2 0 max Al, 2 0 max Si, bal Cu
As sand cast: 65,000-69,000 TS, 30,000-35,000 YS, 20-34 El, 123-134 Brin
For valve stems, propeller wheels, gears for marine and outboard industry, marine parts requiring resistance to dezincification and for dealuminization, water works equipment.
Heat treatable to slightly higher properties

NDZ-S BRONZE
M 801, 0.25 max Pb, 2 0 max Zn, 5 5 max Ni, 5 5 max Fe, 2 0 max Al, 2 0 max Si, bal Cu.
As sand cast 69,000-75,000 TS, 40,000-45,000 YS, 13-23 El, 143-149 Brin
For high strength valve stems, propeller wheels, gears, marine hardware requiring resistance to dezincification and/or dealuminization
Heat treatable to slightly higher properties.

NEALLOY.
M 727, 0 6 Cr, 1 0 max Ni, 0 12 max C, 0 6 Si, 0 5 max Cu, bal Fe
For woven wire conveyor belts, wire cloth and slings

NEASCO
M-1265; Si, Fe, bal Cu
For master alloy; for silicon bronzes

NEATRO.
M-115, 1 27 C, 5 5 W, 4 5 Cr, 4 V, 4.5 Mo, bal Fe
For cutting tools, broaches, chasers, hobs; high speed steel

NEATRO FM.
M-115; 1.25 C, 5.5 W, 4 5 Cr, 4 V, 4.5 Mo, bal Fe.
For cutting tools, broaches, chasers, hobs; high speed steel, free-machining.

NEBALOY
M-1720, 62.0-65.0 Cu, 0.07 max Pb, 0.05 max Fe, bal Zn
Elec cond : 26.5% IACS at 68°F.
Good cold working properties
For electrical terminals and connectors, hardware, jewelry, washers, shells, stampings.
Copper alloy No. 272

NECOMICLE.
Japan, C, Ni, Cr, Mo, bal Fe
For turbine blades, chemical apparatus, stainless

NEEDLE METAL.
U.S., 85 Cu, 8 Sn, 5.3 Zn, 1.7 Pb
For needles, valves, fittings, free-cutting

NEEDLE WIRE
M-38, 0.7 C, bal Fe
For spring beard, latch, sewing machine needles, tough.

NEELIUM.
M-1513, Bi, Te, Se, Sb
For thermoelectric cooling, semi conductor

NELOY
M-232, 0.3-0.4 C, 1.0 1.25 Mn, bal Fe
Heat treated. 190,000-220,000 TS, 175,000 195,000 YS, 14.8 El, 45-25 RA, 364-477 Brin
For gears, crankshafts, tough, hard after heat treatment

NELOY NO 1.
M 232, C, alloy, bal Fe
Cast 85,000-95,000 TS, 23 30 El, 50-60 RA, 163-170 Brin
For steel castings, gears, tough

NELOY NO 2.
M 232; 0.4 C, 0.4 Si, 0.75 Mn, bal Fe
Drawn 90,000 93,000 TS, 65,000-75,000 YS, 23-28 El, 55-65 RA, 174-198 Brin
For steel castings, gears, tough

NELOY NO 3
M-232, 0.4 C, 0.4 Si, 0.75 Mn, bal Fe
Heat treated: 100,000 110,000 TS, 80,000-90,000 YS, 20-26 El, 50-60 RA, 202-240 Brin
For steel castings, gears, tough

NELOY NO 4
M-232, 0.4 C, 0.4 Si, 0.75 Mn, bal Fe
Heat treated: 115,000 130,000 TS, 95,000-110,000 YS, 15-20 El, 40-45 RA, 240-268 Brin
For steel castings, gears, tough

NELOY NO 5
M-232, C, alloy, bal Fe
Heat treated 125,000-135,000 TS, 110,000 125,000 YS, 12 20 El, 35 45 RA, 268-288 Brin
For steel castings, gears, tough

NELOY NO 6
M-232, C, alloy, bal Fe
Heat treated: 135,000-150,000 TS, 120,000-135,000 YS, 9-18 El, 30 40 RA, 286-302 Brin
For steel castings, gears, tough

NELOY MOLYBDENUM
M-232, 0.3 C, 0.6 Ni, 0.6 Cr, 0.2 Mo, bal Fe
Annealed 85,000-95,000 TS, 55,000-65,000 YS, 20 25 El, 30-40 RA, 170-197 Brin.
For steel castings, gears, tough

NELOY MOLYBDENUM NO 2A.
M-232, 0.3 C, 0.6 Ni, 0.6 Cr, 0.2 Mo, bal Fe
100,000 115,000 TS, 70,000-90,000 YS, 15-20 El, 35-45 RA, 190-220 Brin
For steel castings, gears; tough

NELOY MOLYBDENUM NO 3A.
M-232, 0.3 C, 0.6 Ni, 0.6 Cr, bal Fe.
Heat treated 125,000-140,000 TS; 115,000-130,000 YS, 12-15 El, 30-40 RA, 250-280 Brin
For steel castings, gears; tough

NELOY MOLYBDENUM NO 5A.
M-232, 0.3 C, 0.6 Ni, 0.6 Cr, bal Fe.
Heat treated 140,000-160,000 TS, 130,000-145,000 YS; 10-13 El, 20-30 RA, 302-331 Brin.
For steel castings, gears, tough.

NELOY MOLYBDENUM NO. 6A.
M-232, 0.3 C, 0.6 Ni, 0.6 Cr, bal Fe
Heat treated 160,000-180,000 TS, 145,000-160,000 YS, 7.5-10 El; 15 25 RA; 341-375 Brin.
For steel castings, gears, tough

NELSON-BOHNALITE
M 196, 10 Cu, 0.2 Si, 0.3 Mg, 0.3 Ni, bal Al
25,500 TS, 23,400 YS, 0.2 El, 110 Brin
For pistons for motor vehicles, coefficient of expansion 0.000024

NELSON BOHNALITE
M-1548, 9.0-11.0 Cu, 0.2 Si, 0.3 Mg, bal Al
For general castings, fittings, hardware
Good machinability, good strength

NEMICLE
Japan, C Ni, Cr, Mo, bal Fe
For turbine blades, chemical apparatus, stainless

NEMICLE C
Japan, C Ni, Cr, Mo, bal Fe
For turbine blades, chemical apparatus, stainless

NEMICLE F
Japan, C, Ni, Cr, Mo, bal Fe
For turbine blades, chemical apparatus, stainless

NEO-BAROS
M-104, 90 Ni 10 Cr
For weights pen points similar to "Baros," non magnetic

NEOCHRAN
M-651 23 30 Cr, 0.5-2.5 Si, 1.0 1.5 C, bal Fe
For stainless castings, corrosion resistant

NEOGEN
U.S., 58 Cu, 27 Zn, 12 Ni, 2 Sn, 0.5 Al, 0.5 Bi
For ornamental and structural parts, corrosion resistant

NEOMAGNAL A
German, Mg, Zn, bal Al
For bearings

NEONALIUM
M 283, 86 94 Al, 6-14 Cu, 0.4-1.0 other elements
Heat treated 22,800 34,000 TS, 11,000-16,000 YS, 1.0 RA, 80 120 Brin
For light alloy parts, good heat resistance

NEONALIUM
M-1548, 6.0-14.0 Cu, bal Al
Sand Cast 26,000 TS, 18,000 YS, 0.8 El, 90 Brin
Chill cast 32,000 TS, 26,000 YS, 0.3 El, 110 Brin
For housings, casings, general castings
Good machinability

NEOR.
M-40, M-289, 2.3 C, 13 Cr, 0.6 Si, 0.6 Ni, 0.4 Mn, bal Fe
For press tools, punches, dies, reamers, broaches, gages, remarkable resistance to abrasion

NEPTUNE
M-1432; 0.30 C, 0.75 Mn, 0.50 Si, 1.7 Cr, 0.4 Mo, bal Fe
Oil hardening steel designed for molds AISI P20

NERGANDIN.
M-188, M-282; 70 Cu, 28 Zn, 2 Pb.
89,000 TS, 10 El; 135 Brin.
For condenser tubes; resistant to sea water corrosion.

NERO 3.
M 1338; 1.05 C, 1.0 Cr, bal Fe.
For bearings, liners, sleeves, punches, cutters; water hardened, wear resistant

NERO EXTRA.
M-1338; 1.0 C, 1.1 Cr, 0.07 Mn, 0.25 Si, bal Fe
For bearings, liners, sleeves, punches, cutters; water hardened, wear resistant

NERO EXTRA SPEZIAL
M-1338, 1.45 C, 1.4 Cr, 0.6 Mn, 0.25 Si, bal Fe
For bearings, liners, dies; water hardened, wear resistant

NERO HBK
M-1338, 1.05 C, 1 Cr, 1.15 W, 0.9 Mn, 0.25 Si, bal Fe
For bearings, forming and blanking dies, oil hardened, abrasion resistant

NERO HFG
M-1338, 1.25 C, 1.15 Si, 0.7 Mn, 1.2 Cr, bal Fe
For bearings, liners, punches, dies, water or oil hardened, wear resistant

NERO HWF1
M-1338, 1.2 C, 0.1 V, 1.0 W, 0.28 Mn, 0.25 Si, bal Fe
For wear plates, punches, tools, dies, oil hardened

NERO KST
M-1338, 0.9 C, 1.9 Mn, 0.25 Si, 0.1 V, bal Fe
For punches, shears, crimpers, dies, upsetters; oil hardened, nondeforming

NERO SPEZIAL
M-1338, 1.05 C, Cr, bal Fe
For bearings, liners, tools, dies, water hardened, wear resistant.

NES 3
M-1651 15 Cr, 17 Mo, 5 Fe, 4 W, bal Ni
For valves, pumps, pharmaceutical and chemical plant equipment Corrosion and heat resistant

N E S 70
M-97 0.18 C, 1.5 Ni, 1.0 Cu, 0.2 Mo, 0.8 Mn, bal Fe
Rolled 110,000 TS, 70,000 YS
For mine cars, cages, skips, coal conveyors, abrasion and corrosion resistant

NESALOY
M-865, Li alloy
To disperse Pb in Cu, alloying

NETIC-S3
M-1567, Ni, bal Fe
Sheet 67,100 TS, 29,500 YP, 7.5 El, B 68-71 Rock
For magnetic shields
Low magnetic retensivity

NETIC S3 5
M-1567, Ni, bal Fe
Sheet 46,100 TS, 28,200 YS, 25 El; B 45 Rock
For magnetic shielding
Low magnetic retentivity.

NETIC S3-6
M-1567, Ni, bal Fe
Sheet 40,000-45,000 TS, 28,000 YP, B 45 Rock
For magnetic shields
Low magnetic retentivity.

NEUF ECLAIRS.
M-1043; 0.85 C, 19 W, 9 Co, 1.8 V, 0.6 Mo, bal Fe.
For cutting tools, lathe and planer cutters; oil hardened.

NEUMAL BD
M-1366, 2.5-5.0 Cu, 0.2-1.8 Mg, 0.3-1.5 Mn, 0.5-2.5 Pb, Sn, Cd, Bi, bal Al
For screw machine products, free-cutting

NEUMAL D3.
M-1366; 2.5 5.0 Cu, 0.2-1.8 Mg, 0.3-1.5 Mn, bal Al.
Annealed. 27,000 TS, 11,000 YS; 22 El, 47 Brin.
Heat treated 72,000 TS, 57,000 YS, 130 Brin
For aircraft structures and fittings, fasteners, age hardenable

NEUMAL-S
M-1366, 0.6-1.4 Mg, 0.6-1.6 Si, 0.6-1.0 Mn, 0.3 max Cr, bal Al
Annealed 21,000 TS, 8000 YS, 24 El.
For window frames, gutters, fan blades, boats
Good forming and welding properties

NEUSILBER 2A
M-303, 25 Ni, 15 Zn, bal Cu
Annealed 65,000 TS, 40,000 YS, 42 El; 130 Brin
For bathroom fixtures, marine hardware; nickel silver, corrosion resistant.

NEUSILBER 3B
M-303, 18 Ni, 65 Cu, bal Zn
For deep drawn parts, wash basins, fittings; nickel silver, corrosion resistant

NEUSILBER 3F
M 303, 17-19 Ni, 54-56 Cu, bal Zn
For hardware, cutlery, nickel silver, corrosion resistant

NEUSILBER 4B
M-303, 14 16 Ni, 62-64 Cu, bal Zn
For hardware, cutlery, nickel silver, corrosion resistant

NEUSILBER 4C
M-303, 12 13 Ni, 62-64 Cu, bal Zn
For hardware, cutlery, nickel silver, corrosion resistant

NEUSILBER 4D
M-303, 13-14 Ni, 63-64 Cu, 1 Pb, bal Zn
For hardware, cutlery, leaded nickel silver, corrosion resistant

NEUSILBER 47-11 Pb
M-297, 47 Cu, 11 Ni, 1.5 Pb, bal Zn
Soft 58,000 TS, 25 El; 100 Brin
Hard 82,000 TS, 0.5 El, 185 Brin
For optical and camera parts, hardware, tableware, leaded nickel silver, corrosion resistant.

NEUSILBER 57-12 Pb
M 297, 57 Cu, 12 Ni, 1.7 Pb, bal Zn
Soft 58,000 TS, 35 El, 80 Brin
Hard 82,000 TS, 8 El, 160 Brin
For optical and camera parts, tableware, leaded nickel silver, corrosion resistant.

NEUSILBER 60-25
M-297, 60 Cu, 25 Ni, bal Zn
Soft 65,000 TS, 30 El, 90 Brin
Hard 90,000 TS, 7 El, 170 Brin
Spring 114,000 TS; 0.5 El, 200 Brin
For optical and camera parts, tableware, jewelry; nickel silver, corrosion resistant.

NEUSILBER 62-18.
M-297; 62 Cu, 18 Ni, bal Zn.
Soft: 61,000 TS; 40 El; 85 Brin.
Hard: 85,000 TS; 7 El; 165 Brin.
Spring: 108,000 TS; 1 El; 195 Brin.
For optical and camera parts, tableware, jewelry, nickel silver, corrosion resistant

NEUSILBER 62-18 Pb.
M-297; 62 Cu, 18 Ni, 2 Pb, bal Zn.
Soft: 58,000 TS; 35 El; 85 Brin.
Hard. 82,000 TS; 8 El, 160 Brin.
For optical and camera parts, hardware, tableware; leaded nickel silver, corrosion resistant.

NEUSILBER 65-12.
M-297; 65 Cu, 12 Ni, bal Zn
Soft: 58,000 TS; 40 El; 85 Brin
Hard: 80,000 TS; 10 El, 160 Brin.
Spring. 103,000 TS, 1.5 El, 190 Brin
For tableware, jewelry, camera parts, nickel silver, corrosion resistant.

NEUSILBER 71-7
M-297, 71 Cu, 8 Ni, bal Zn
Soft. 58,000 TS; 35 El, 80 Brin
Hard· 80,000 TS, 8 El, 150 Brin.
Spring. 103,000 TS, 3 El, 180 Brin.
For tableware, costume jewelry, hardware; nickel silver, corrosion resistant.

NEUSILBER B UND D. I
M-297; 57 Cu, 12 Ni, 2 Pb, bal Zn.
Rolled 65,400 TS; 8 El, 120 Brin
Annealed. 46,800 TS, 35 El, 70 Brin
For instruments, optical frames; corrosion resistant, free-cutting

NEUSILBER B. UND D II
M-297, 54 Cu, 8 Ni, 1 Pb, bal Zn
Rolled 79,500 TS, 4 El; 180 Brin
Annealed: 56,800 TS, 48 El; 85 Brin
For instruments, optical frames, free-cutting, corrosion resistant

NEUSILBER B. UND D III
M-297; 62 Cu, 15 Ni, 1 Pb, bal Zn
Rolled 81,000 TS, 5 El, 170 Brin.
Annealed· 58,300 TS, 37 El, 95 Brin
For instruments, optical frames, free cutting, corrosion resistant

NEUSILBER B UND D IV
M-297, 47 Cu, 11 Ni, 1 Pb, bal Zn
Rolled· 120,800 TS, 2 El, 210 Brin.
Annealed: 85,200 TS, 30 El; 140 Brin.
For instruments, optical frames; free-cutting, corrosion resistant

NEUSILBER, ENAMEL QUALITY.
M-297; 20 Ni, 5 Zn, bal Cu.
For bullet jackets, condenser tubes, German silver

NEUSILBER EXCELSIOR
M-297, 25 Ni, 15 Zn, 60 Cu
Annealed 57,000 TS, 32 El, 85 Brin
For food handling equipment, German silver.

NEUSILBER, NICKELIN.
M-297, 22 Ni, 20 Zn, 56 Cu
For hardware, electrical resistances; German silver.

NEUSILBER PDS
M-303; 13.5 Ni, 55 Cu, 1.5 Pb, bal Zn.
For hardware, cutlery; leaded nickel silver, corrosion resistant.

NEUSILBER, PRIMA
M-297, 12 Ni, 23 Zn, 65 Cu
Annealed: 50,000 TS; 35 El, 75 Brin.
For ornamental parts; German silver.

NEUSILBER, PRIMA-PRIMA.
M-297, 18 Ni, 20 Zn, 62 Cu.
Annealed. 50,000 TS; 35 El; 75 Brin.
For white metal parts; German silver.

NEUSILBER, QUARTA
M-297; 7 Ni, 22 Zn, 71 Cu
Annealed· 51,200 TS; 45 El; 70 Brin.
For ornaments; German silver.

NEUSILBER, SEKUNDA.
M-297, 10 Ni, 24 Zn, 66 Cu
For ornamental parts, German silver.

NEUSILBER, TERTIA
M-297, 9 Ni, 25 Zn, 66 Cu
For ornaments, German silver.

NEUSILBER, TUBES
M-297, 16 Ni, 19.5 Zn
For German silver tubes, German silver

NEUSTADT
German, 71.5 Cu, 28.5 Zn
For condenser tubing, deep drawn

NEU-TEC-TRONIC 157 BN.
M-717,
Neutral flux core modifications of EUTEC Rod 157

NEUTRALEISEN.
Germany, 14-15 Si, 0.7 Mn, bal Fe
For insoluble anodes, crucibles, condensers, evaporators acid resistant, brittle.

NEUTRALLOY
M 866, 75 Ni, 15 Cr, 10 Fe, Si, Ti, Mn
For castings, corrosion and acid resistant

NEUTROLOY
M-1523, 55 Cu, 45 Ni
Resistance wire 300 Ohms per cir mil ft.
Low temp coefficient of resistance
Ann 50,000 psi, hard drawn 140,000 psi
Max oper temp 500°C

NEVADA
M 1704, 1.1 C, 0.75 Mn, 0.5 Si, 5.5 Cr, 0.3 V, 1.3 Mo, 0.015 P, 0.015 S, bal Fe
Air hardening tool steel for cold work tools.

NEVADA MODIFIED
M 1704, 0.55 C, 0.9 Mn, 0.25 Si, 3.5 Cr, 0.25 Ni, 0.25 V, 1.4 Mo, bal Fe
Air hardening tool steel

NEVADA SILVER
U S; Cu-Ni
For ornaments, electrical resistances; nickel silver

NEVASTAIN 25-12
M-1, 0.25 max C, 24 Cr, 12 Ni, bal Fe
For heat and corrosion resistant parts, see Silcrome 25-12

NEVASTAIN "C A"
M-15, M-76, 12.5-13.5 Cr, 0.30-0.35 C, bal Fe
Annealed 90,000-105,000 TS; 20-25 El; 40 50 RA, 195-210 Brin
Heat treated 225,000 145,000 TS; 9-14 El; 25-47 RA, 420-270 Brin
For cutlery, turbine blades; corrosion resistant, see Silcrome I-12

NEVASTAIN "C B"
M-15, M-76, 16.5-17.5 Cr, 0.65-0.70 C, bal Fe.
For cutlery, knives, corrosion resistant; see Silcrome M-17.

NEVASTAIN "D"
M-15, M-76, 0.15 C, 1.0 Si, 20-21 Cr, bal Fe.
At 70°F· 65,000-75,000 TS, 40,000-45,000 YS; 32 El, 63 RA
At 1500°F. 10,000 TS; 8,000 YS; 90 El, 98 RA.

For furnace linings, conveyors, heat treating boxes; heat resistant; see Silcrome 21.

NEVASTAIN "E.Z."
M-15, M-76; 13.5-15 Cr, 0.12 max C, bal Fe.
For corrosion resisting parts; corrosion resisting; see Silcrome 12-EZ.

NEVASTAIN, GRADE A.
M-15, M-76, 0.3-0.35 C, 12.5-13.5 Cr, bal Fe.
Annealed: 90,000-105.000 TS; 40,000-50,000 YS; 20-25 El; 40-50 RA; 195-210 Brin.
Hardened: 225,000 TS; 185,000 YS; 9 El; 25 RA; 420 Brin.
For stainless cutlery, tanks; corrosion resisting; see Silcrome L-12.

NEVASTAIN, GRADE B.
M-15, M-76; 0.65-0.70 C, 16.5-17.5 Cr, bal Fe.
Annealed: 90,000-95,000 TS; 40,000-45,000 YS; 26 El, 50-45 RA; 180-210 Brin
For stainless cutlery; corrosion resisting; see Silcrome M-17

NEVASTAIN, GRADE RA.
M-15, M-76; 0.10 max C, 16 Cr, 1.0 Cu, 1.0 Si, 0.40 Mn, bal Fe.
Annealed 75,000 TS; 40,000 YS; 40 El; 75 RA; 150 Brin
Oil treated. 90,000-103,000 TS; 50,000-98,000 YS; 30-25 El; 60-63 RA; 170-217 Brin
For general fabricated stainless products, stainless; see Silcrome R A.

NEVASTAIN "H"
M-15, M-76, 1.0-1.1 C, 16-18 Cr, <0.60 Si, bal Fe.
Annealed 115,000 TS, 40,000-50,000 YS, 12 El, 17-18 RA, 195-240 Brin.
Air cooled· 140,000-240,000 TS, 140,000-220,000 YS, 0-2.8 El, 0-13.5 RA
For furnace parts, heat treating equipment; see Silcrome H 17

NEVASTAIN "K A 2."
M-15, M-76, 17-18.5 Cr, 8.25-10 Ni, 0.08-0.16 C, bal Fe
Heat treated· 112,000-86,000 TS; 90,000-37,000 YS; 41-75 El, 64-82 RA
For stainless parts, chemical plant equipment, corrosion resisting, see Silcrome KA2

NEVASTAIN "K.A 2 S."
M-15, M-76; 17-18.5 Cr, 8.25-10 Ni, 0.07 max C, bal Fe
Heat treated 132,000 TS; 42,000 YS, 50 El; 76 RA.
At 1600°F· 20,000 TS; 7,000 YS, 28 El; 26 RA.
For stainless parts, chemical plant equipment; corrosion resisting, see Silcrome KA2S

NEVASTAIN "K N.C -3."
M-15, M-76, 24-26 Cr, 19-21 Ni, 0.15 max C, bal Fe.
For furnace parts, heat and corrosion resisting; see Silcrome 25-20.

NEVASTAIN RA (CINCINNATI STEEL CASTING CO).
M-437, 0.10 C, 16 Cr, 1 Cu, 1 Si, bal Fe.
For rustless and stainless parts; stainless.

NEVASTAIN "S"
M-15, M-76; 11.5-13 Cr, 0.12 max C, bal Fe
Rolled: 125,000-150,000 TS; 8-10 El; 25-35 RA; 280-320 Brin.
Heat treated· 130,000 TS; 21 El; 68 RA; 237 Brin.
Annealed: 50,000 TS; 35 El; 60 RA; 140 Brin.
For turbine blading, pump rods, machine parts, valves, spoons, and forks; high resistance to shock and impact; see Silcrome 12.

NEVEROIL-21.
U.S.; 32.5 Ni, 64.5 Cu.
For corrosion resistant parts; corrosion resistant.

NEVYANSKITE.
Russia; 58-44 Ir, 27-49 Os, 0-10 Pt, 0-6 Ru, 1.5-3 Rh, Pd + Fe + Cu.
For fountain pen points, mined by U.S.S.R.

NEW BIDE.
M-73; carbides.
For dies, cutting tools; cemented carbides.

NEW CAPITAL.
M-1114, 0.70 C, 3.75 Cr, 14 W, 0.5 V, bal Fe.
For lathe and planer tools, reamers, drills, hobs; high speed steel.

NEW CAPITAL STEEL.
Eng.; 14 W, 3.7 Cr, 0.1 V, 0.6 C, bal Fe.
For high speed tools, reamers, cutters, punches, gages, high speed steel

NEWCOMER C-2.
M-1203, Carbide
Rockwell A93
For cutting tools for high speeds; sintered, Tr.S. 220,000.

NEWCOMER C-3
M-1203, Carbide.
Rockwell A92
For cutting tools for roughing and finishing; sintered, Tr S 260,000.

NEWCOMER C-4
M-1203, Carbide.
Rockwell A91
For cutting tools for heavy duty, sintered, Tr.S. 300,000

NEWCOMER C-5.
M-1203, Carbide.
Rockwell A89
For cutting tools for heavy duty, sintered, Tr S. 375,000.

NEWCOMER S-2
M-1203, Carbide
Rockwell A92
For cutting tools for light roughing; sintered, Tr S 220,000

NEWCOMER S-4
M-1203, Carbide.
Rockwell A91.
For cutting tools for roughing; sintered, Tr S. 275,000.

NEWCOMER S-6
M-1203, Carbide.
Rockwell A90.
For heavy duty cutting tools; sintered, Tr.S. 340,000

NEW K S
M-38, 27 Co, 18 Ni, 7 Ti, 3.7 Al, bal Fe.
Bar: 7150 Br, 785 H_c, 4300 Bo, 2,030,000 (BH) max.
For electrical and magnetic equipment
Permanent magnet High permeability.

NEWLOY.
M-310, 64 Cu, 35 Ni, 1 Sn.
For base metal for tableware, resistance wire; good corrosion and acid resistance.

NEWMAX.
M-289, 0.45-0.53 C, 0.75-1.00 Mn, 0.8-1.1 Cr, 0.15-0.25 Mo, bal Fe.
Oil hardening steel, designed for molds; Similar to AISI 4150.

NEW MET
M-1203; Mo, Ti, carbides.
For cutters; sintered carbides.

NEW MET N93.
M-1203, 61 TiC, 8 Ni, 31 MoC.
Sintered: 175,000 Tr.S.; Rock. A 93.5.
For tools, bearings and seals.
Resists heat, oxidation and wear.

NEW MET N95.
M-1203; 64 TiC, 2 Ni, 34 MoC.
Sintered: 150,000 Tr.S.; Rock A 95
For tools, bearings and seals
Resists heat, oxidation and wear

NEWPORT ARMATURE.
M-191; Si, bal Fe.
For electric generators; high permeability.

NEWPORT ELECTRICAL "A"
M-191; Si, bal Fe.
For electric generators, high permeability.

NEWPORT ELECTRICAL "B."
M-191; Si, bal Fe.
For motors, armatures, high permeability.

NEWPORT ELECTRICAL "C."
M-191, Si, bal Fe.
For motors, armatures, high permeability.

NEWPORT FIELD.
M-191, Si, bal Fe.
For fields, armatures, electrical equipment; high permeability

NEWPORT TRANSFORMER
M-191; Si, bal Fe
For transformers, high permeability

NEWPORT TRANSFORMER EXTRA SPECIAL
M-191, Si, bal Fe
For transformers, high permeability

NEWPORT TRANSFORMER SPECIAL.
M-191; Si, bal Fe
For transformers, high permeability

NEW PROCESS COLD HEADER
M-69, 1.0 C, bal Fe.
Annealed: 100,000 TS, 53,000 YS, 21 El, 42 RA, 200 Brin
For cutters, drills, taps, reamers, broaches, Type W1, water hardened

NEW PROCESS COLD HEADER DIE STEEL
M-69, 1.0 C, 0.25 Mn, 0.18 Si, bal Fe
For cold header punches and dies, water hardened

NEW RAPID
M-363, C, W, bal Fe
For punches, dies, cutting tools, high speed steel

NEW RYCUT 50
M-240; 0.50 C, 0.25 Pb, 0.8 Mn, 0.9 Cr, 0.2 Mo, bal Fe.
Annealed. 103,000 TS, 69,000 YS, 19 El, 50 RA, 212 Brin
Heat treated 140,000-115,000 TS, 120,000-85,000 YS; 15-16 El, 40-45 RA; 341-235 Brin
For collets, brake dies, gears, boring bars; free-cutting, leaded steel

NEWTON FUSIBLE ALLOY
England; 50 Bi, 18.75 Sn, 31.25 Pb.
For fire and signal alarms, fire extinguisher plugs; M.P. 95°C.

NEW TOOL STEEL CAST.
Eng.; 58 Ni, 20 Zn, 12 Al, 10 Si.
For cutting tools and dies; corrosion resistant.

NEY #90.
M-349, 10 Cu, 90 Ag
130 Brin
For sliding contacts, low resistivity and high corrosion resistance.

NEYDIUM NO 9
M-349, 82 Au-Pt, bal Cu, Ag, Zn, Sn.
148,000-167,000 TS, 115,000-134,500 YS; 9-8 El, 225-260 Brin
For dental applications, M.P. 1975°F.

NEYDIUM NO 90
M-349, 10 Cu, bal Ag
For slip rings, commutator segments, rivet head contacts
Corrosion resistant. High electrical conductivity

NEY-ORO 28
M-349, 25 Ag, 75 Au.
Cold Worked, 60,000 TS, 35,000 P.L., 100 Brin
For contact brushes, used against coin silver slip rings
Low contact resistance

NEY-ORO 28A
M-349, 75 Au, 23.5 Ag, 1.5 Ni
Rolled 90,000 TS, 50,000 YP, 140 Brin
Annealed 51,000 TS; 84 Brin
For sliding contacts, electrical brush contacts
72-75 ohms/cmf elect. resistivity

NEY-ORO 28B
M-349, 75 Au, 22 Ag, 3 Ni
Rolled 75,000 TS, 40,000 YP, 130 Brin
For sliding contacts on Constantan, make and break contacts
71-75 ohms/cmf (circular mil feet) elect. resistivity

NEY-ORO 69
M-349, 69 Au, 25 Ag, 6 Pt
Annealed 40,000 TS, 18,000 YP, 85 Brin
Work Hardened 70,000 TS, 30,000 YP, 120 Brin.
For make and break contacts, telephone relays, slip rings. Corrosion resistant

NEY-ORO "A"
M-349, 93 Au-Pt, bal Ag, Cu
Cast 32,000 TS, 10,000 YS, 45 Brin
For dental inlays. Soft material

NEY-ORO "A-1"
M-349, 80 Au-Pt, bal 20 Cu, Ag, Zn
Cast 55,000 TS, 27,000 YS, 25 El, 95 Brin
For dental inlays. Soft material.

NEY-ORO "B"
M-349, 85 Au-Pt, bal Cu, Ag, Zn
Soft 52,000 TS, 25,000 YS, 20 El, 105 Brin
Heat treated 60,000 TS, 30,500 YS, 12 El, 115 Brin
For dental inlays, hard

NEY-ORO "B-2"
M-349, 78 Au-Pt, bal Cu, Ag, Zn
Cast 65,000 TS, 38,000 YS, 19 El, 120 Brin
For dental inlays and dental bridges, hard

NEY-ORO "B-W"
M-349, 81 Au-Pt, bal Cu, Ag, Zn
Soft. 57,000 TS, 27,000 YS, 17 El, 102 Brin
Heat treated 60,000 TS, 31,000 YS, 15 El, 113 Brin
For dental inlays, hard.

NEY-ORO "E"
M-349, 79 Au-Pt, bal Cu, Ag, Zn.
Soft. 75,000 TS, 45,500 YS; 6 El, 150 Brin
Heat treated. 112,000 TS; 82,500 YS, 1 El; 235 Brin.
For dental inlays, partial dentures; extra hard.

NEY-ORO ELASTIC.
M-349, 79 5 Au-Pt, bal Cu, Ag, Zn.
Age Hardened: 173,000 TS; 131,000 YP; 270 Brin.
For wire clasps, pinlays in dentures.
Corrosion resistant.

NEY-ORO "G."
M-349, 8 5 Pt, 4 5 Ag, 14.5 Cu, 1 Zn, 71.5 Au
Ht Tr.. 185,000 TS; 165,000 YS, 1 El; 280 Brin
For pivots in instruments bearings, slip rings,
commutator bars, make and break contacts.
Age-hardenable, corrosion and wear resistant.

NEY-ORO "G-3"
M 349, 75 Au-Pt, bal Cu, Ag, Zn
Cast 73,500 TS; 39,000 YS, 20 El, 220 Brin
Age hardenable, for dental inlays, partial dentures;
extra hard

NEY ORO "G W"
M-349, 74 Au Pt, bal Cu, Ag, Zn
Soft· 67,500 TS, 41,000 YS; 13 El, 132 Brin.
Heat treated· 117,000 TS, 76,500 YS, 3 El,
228 Brin
For dental inlays, partial dentures, extra hard

N.G F. ALLOY
U S , 1-1.5 Cu, 0 75-2 0 Mn, bal Al.
25,000 TS, 18,000 YS, 4 El
For light alloy castings

NH PIG
M-68, 44-47 Ni, 15 17 Cr, bal Fe
For foundry alloys, M P. 2250°F

NIAG
U S , 46 7 Cu, 40 7 Zn, 9 1 Ni, 2.8 Pb, 0.3 Mn
For white metal parts, corrosion resistant

NIAG
M 266, 46 Cu, 1 Pb, Ni, bal Zn
70,000 TS, 42,000 YS, 30 El, 120 Brin
For hardware, plated parts,
wear and corrosion resistant

NIAGARA
M-38, 0 45 0 55 C, bal Fe
Rolled 80,000 TS, 50,000 YS
For machine tool parts, gears, shafts,
water hardened

NIAGRA
M 373, 0 7 C, 14 W, 4 Cr, 2 V, bal Fe
For tools, cutters, taps, hobs, high speed steel

NIAGRA BRAND FERRO-CHROME
M 626, 66-70 Cr, bal Fe
For metallurgical applications in steel, Cr-additions

NIAGRA BRAND FERRO-SILICON
M-626, 15-90 Si, bal Fe
For metallurgical applications in steel, Si-additions.

NIAGRA BRAND SILICO MANGANESE
M-626, 12-20 Si, 65-70 Mn, bal Fe.
For steel metallurgical applications, Mn-additions

NIAL
M-210, 24 Ni, 13 Al, 4 Cu, bal Fe
For loud speakers, lighting and ignition equipment
Permanent magnet High permeability.

NIALCO
M-1120, 19 Ni, 12 Co, 10 Al, 6 Cu, bal Fe.
For permanent magnets, electrical and
magnetic equipment.
High magnetic permeability.

NIALCO I
M-1120, 12 Ni, 10 Al, 4-20 Co, 2 Cu, bal Fe.
6500 Br, 530 Hc, 1 4 BH max., C 45 Rock.
For magnets in wattmeters.
Permanent magnet. High permeability

NIALCO II.
M-1120; 12 Ni, 10 Al, 4-20 Co, 2 Cu, bal Fe.
6300 Br, 650 Hc, 1.5 BH max., C 45 Rock.
For magnets in electrical relays.
Permanent magnet. High permeability.

NIALCO III
M-1120; 12 Ni, 10 Al, 4-20 Co, 2 Cu, bal Fe.
7000 Br, 690 Hc, 1 7 BH max, C 45 Rock.
For Magnets in magnetos
Permanent magnet, high permeability

NIALCO IV
M-1120, 12 Ni, 10 Al, 4-20 Co, 2 Cu, bal Fe.
5700 Br, 1000 Hc, 1 9 BH max, C 58 Rock.
For magnets in electrical equipment.
Permanent magnet, high permeability.

NiAlCo 200
Austria, 10 Al, 20 Ni, 15 Co, 3 Cu, bal Fe.
For permanent magnets

NiAlCo 400
Austria, 8 Al, 14 Ni, 24 Co, 3 Cu, bal Fe.
For permanent magnets

NIALITE
M-309, 10 Al, 5 Ni, 5 Fe, 1 5 Mn, bal Cu.
Cast 85,700 TS, 39,000 YS, 24 El; 220 Brin.
For pumps, valves, propellers, corrosion and
cavitation resistant

NI-BAR IRON
M-637, 3 3 T C , 0 6 Mn, 1 5 Si, 0.6 Cr, 1 5 Ni,
bal Fe
36,000 TS, 210 Brin
For grate bars, stoker links

Ni-BRAL
M 1228, 5 Ni, 10 Al, 5 Fe, 1.5 Mn, bal Cu
Cast 95,000 TS, 43,000 YS, 18 El, 15 RA;
170 Brin
For pumps, valves, bearings, Al-bronze,
corrosion resistant

NICA-0
M-1449, 0 08 max C, 18 Cr, 8 Ni, bal Fe
Annealed 85,000 TS, 35,000 YS; 60 El, 70 RA;
150 Brin
For chemical plant equipment, tanks, mixers,
Type 304, stainless, austenitic

NICA-00
M-1449, 0 05 max C, 18 Cr, 8 Ni, bal Fe
Annealed 85,000 TS, 35,000 YS; 60 El, 70 RA;
150 Brin
For chemical plant equipment, tanks, mixers,
Type 304, stainless, austenitic.

NICA 1
M 1449, 0 11-0 16 C, 18 Cr, 8 Ni, bal Fe
Annealed 80,000 TS, 35,000 YS, 55 El, 75 RA,
150 Brin
For chemical plant equipment, tanks, mixers, filters;
Type 302, stainless, austenitic

NICA 2
M 1449, 0 17-0 25 C, 18 Cr, 8 Ni, bal Fe
Annealed 85,000 TS, 40,000 YS, 50 El, 70 RA,
160 Brin
For chemical plant equipment, tanks, mixers, filters;
Type 301 and 302, stainless, austenitic

NICALLOY
Eng , 47 Ni, 53 Fe
For electrical equipment, magnetically soft,
high permeability

NICALOI
M-1, 47 Ni, bal Fe
For armature punchings, electrical machinery
and motors, high magnetic permeability.

NICALUN.
M-250; Ni, Cu, alloy base + abrasive grains imbedded.
For elevator door sills, stair treads; castings; wear resitant.

NICAR.
M-677; 3.5-4 C, 1.0 Si, 12-18 Cr, 65-75 Ni, 0.2 Co, 2.5-4.5 B, 4 Fe.
For hardfacing bare rod; class RNiCr-C.

NICAST.
M-1713; 1 Si, 1.96 Fe, bal Ni.
For welding rod; for cast iron.

NI CHILLITE.
M-229; Ni, Cr, Mo, C, bal Fe.
For rolls; chilled iron.

NI CHILLITE NO. 2.
M-229; C, alloy, bal Fe.
For rod mill rolls; heavy duty.

NICHRANEL-C.
M-1687; 60 Ni, 15 Cr, 15 Mo, 5 Fe, 5 W.
For pumps, valves, pharmaceutical and chemical plant equipment.
Heat and corrosion resistant

NICHROFRY 152.
M-1302; 0.25 max C, 24-26 Cr, 19-22 Ni, bal Fe.
Annealed: 95,000 TS; 45,000 YS; 50 El, 65 RA; 180 Brin.
At 1200°F: 57,000 TS; 22,000 YS, 32 El; 45 RA.
For furnace parts, valves, pumps, heat treating boxes; Type 310; austenitic, heat resistant.

NICHROFY 152.
M-1043; 0.25 max C, 25 Cr, 20 Ni, bal Fe
Annealed: 100,000 TS, 45,000 YS; 50 El, 65 RA; 185 Brin.
For furnace parts, heat treating boxes, Type 310; heat resistant

NICHROFY 345.
M-1043, 0.20 max C, 24 Cr, 12 Ni, bal Fe
Annealed: 90,000 TS; 40,000 YS, 50 El; 65 RA; 170 Brin.
For furnace parts, heat treating boxes, Type 309, heat resistant.

NICHROFY 345SP
M-1043; 0.08 max C, 20 Cr, 11 Ni, bal Fe.
For furnace parts, heat treating boxes, Type 308, corrosion and heat resistant

NICHROFY 424
M-1043, 0.13-0.25 C, 26 Cr, 4 Ni, bal Fe
Cast: 90,000 TS; 65,000 YS, 2 El; 212 Brin
For cylinder liners, valve seats and bodies, bushings, Type 327; heat resistant

NICHROLLOY I.
M-1027; 0.3 C, 23 Ni, 20 Cr, 1 Mn, 1 V, 0.5 Al, bal Fe.
Annealed: 60,000 TS.
For heat treating boxes, resistance wire, high heat resistance.

NICHROLOY II
M-1027; 40 Ni, 7 Cr, 3 Mn, bal Fe.
For resistance wire, heat treating boxes, heat and corrosion resistant

NICHROLOY III
M-1027; 75 Ni, 16 Cr, 3 Mn, bal Fe
105,000-112,000 TS; 60,000-80,000 YS; 45-25 El; 65-59 RA; 180-210 Brin.
For resistance wire, heat treating boxes; heat and corrosion resistant.

NICHROLOY 37.
M-1027; 0.2 C, 25 Cr, 12 Ni, bal Fe.
Cast: 70,000 TS; 30,000 YS; 35 El; 60 RA; 150 Brin.
For furnace parts, cast heat treating boxes; heat resistant to 2000°F.

NICHROLOY 45.
M-1027; 0.4 C, 25 Cr, 20 Ni, bal Fe.
Cast: 75,000 TS; 50,000 YS; 17 El; 170 Brin.
For furnace parts, retorts, skills; heat resistant to 2100°F

NICHROLOY 50.
M-1027, 0.4 C, 15 Cr, 35 Ni, bal Fe.
Cast: 70,000 TS; 40,000 YS, 10 El, 12 RA; 170 Brin
For salt pots, furnace parts, heat treating boxes; heat resistant to 2100°F

NICHROLOY 72.
M-1027; 0.4 C, 12 Cr, 60 Ni, bal Fe.
Cast 70,000 TS; 40,000 YS, 6 El.
For lead and cyanide pots, furnace equipment; heat resistant

NICHROLOY A
M-1510, 0.51 C, 1.05 Cr, 0.25 Mo, 0.53 Ni, 0.21 V, 0.97 Mn, bal Fe.
Heat treated: 165,000 TS, 150,000 YS; 20 El; 59 RA, 280-310 Brin.
For arbors, axles, bolts, cams, gears, hubs, die liners, shock and fatigue resistant, preheat treated at mill

NICHROLOY L
M-1510, less than 0.5 C, 1.05 Cr, 0.25 Mo, 0.53 Ni, 0.21 V, 0.97 Mn, bal Fe
For arbors, axles, bolts, cams, gears, hubs, die liners: preheat treated at mill, shock and fatigue resistant

NICHROME III
M-44, 85 Ni, 15 Cr
110,000 TS
For electrical resistance units, annealing pots, heating elements, heat and corrosion resistant; Coefficient of Res 0.000187; Specific Res 89.5.

NICHROME V
M-44, 80 Ni, 20 Cr
95,000 175,000 TS, 50,000 YS, 35 El
For heating elements in electric furnaces, electric ranges; max operating temperature 1150°C, high heat and oxidation resistant

NICHROME 62 16
M-963,
High temperature nickel-chrome-iron alloy wire for metallizing gun

NICHROME, CAST
M-44, 60 Ni, 15 Cr, bal Fe
Cast 60,000-65,000 TS, 35,000 YS, 3 El, 2 RA; 156-187 Brin
For carburizing boxes, retorts, glass rolls, furnace parts, coefficient of expansion (20-500°C) 0.000013

NICHROME, WROUGHT
M-44; 60 Ni, 15 Cr, bal Fe
Wire 100,000 175,000 TS; 60,000 YS, 25 El; 50 RA; 183 Brin
For rheostats, heating units; coefficient of expansion (20-100°C) 0.000017.

NICHROTHERM NCT-1
M-72, 0.15 C, 15 Ni, 20 Cr, bal Fe.
Untreated: 100,000-114,000 TS; 78,000-93,000 YS; 35-25 El; 55-45 Brin.
For furnace parts, crucibles, autoclaves, recuperators; heat and corrosion resistant to 1050°C

NICHROTHERM-NCT-1A.
M-72; 0.15 C, 2.5 Si, 1.5 Mn, 18 Cr, 10 Ni, bal Fe.
Bar: 90,000 TS; 40,000 YS; 50 El; B 85 Rock.
For heat treating fixtures, annealing boxes, tube supports, furnace parts.
Type 302B stainless steel, austenitic

NICHROTHERM NCT-3.
M-72; 0.15 C, 20 Ni, 25 Cr, bal Fe.
Untreated. 100,000-114,000 TS, 65,000-78,000 YS; 35-25 El; 55-45 RA.
For furnace parts, crucibles, autoclaves, recuperators; heat and corrosion resistant to 1200°C

NICHROTHERM NCT-6
M-72, 0.15 C, 60 Ni, 15 Cr, bal Fe
Untreated: 85,000-100,000 TS, 35,000-50,000 YS, 35-25 El, 55-45 RA
For furnace parts, crucibles, autoclaves, recuperators, heat and corrosion resistant to 1150°C.

NICHROTHERM NCT-6A
M-72; Fe, Cr, Ni.
For furnace parts, crucibles, autoclaves, recuperators; heat and corrosion resistant to 1150°C

NICHROTHERM NCT-8.
M-72, 0.15 C, 80 Ni, 17 Cr, bal Fe.
Untreated 85,000-100,000 TS, 35,000-50,000 YS; 25-36 El, 45-55 RA
For furnace parts, crucibles, autoclaves, recuperators, heat and corrosion resistant, austenitic, max temperature 1300°C

NICHROTHERMSTEEL.
M 118, Ni, bal Fe
Low coefficient of expansion

NI-CHRO-ZINK
Germ., Ni, Cr, Zn
For die casting alloy

NICKAHL IRON
M-249, 1.5 C, 0.8 Cr, 2.2 Si, bal Fe
For die to stamp fenders, door panels and seat sides for automobiles, tough and wear resisting cast iron

NICKEL 61
M 1499, Ni
For inert gas metal arc welding rod for nickel

NICKEL-131
M-897, 0.15 max C, bal Ni
For welding rod

NICKEL-141
M-897, 0.15 max C, bal Ni
For welding rod

NICKEL 200
M-1499, 99.5 Ni, 0.08 C, 0.18 Mn, 0.2 Fe, 0.005 S, 0.18 Si, 0.13 Cu
Annealed 55,000-80,000 TS, 15,000-30,000 YS, 55-40 El, 90-120 Brin
Cold drawn 65,000-110,000 TS, 40,000-100,000 YS, 35-10 El; 140-230 Brin
Hot finished 60,000-85,000 TS, 15,000-45,000 YS; 55-35 El, 90-150 Brin
Commercially pure nickel, for chemical handling, food processing, electronic equipment, corrosion resistant

NICKEL 201
M-1499; 99.5 Ni, 0.01 C, 0.18 Mn, 0.2 Fe, 0.005 S, 0.18 Si, 0.13 Cu.
Annealed: 50,000-60,000 TS, 10,000-25,000 YS; 60-40 El: 75-100 Brin
Cold drawn: 60,000-100,000 TS; 39,000-90,000 YS; 35-10 El; 125-200 Brin.
Lower carbon than Nickel 200; for caustic evaporators, plater bars, combustion boats; preferred for application above 600°F.

NICKEL 205.
M-1499; 99.5 Ni, 0.08 C, 0.18 Mn, 0.10 Fe, 0.004 S, 0.08 Si, 0.08 Cu, 0.03 Ti, 0.05 Mg.
Annealed: 50,000 TS; 13,000 YS; 45-40 El; 77 Brin.
Cold rolled 95,000 TS; 90,000 YS; 3 El, 210 Brin.
For electrical and electronic applications.

NICKEL 211.
M-1499, 96.85 Ni, 0.10 C, 4.75 Mn, 0.38 Fe, 0.008 S, 0.08 Si, 0.13 Cu
For electronic applications Formerly "D" Nickel.

NICKEL 212
M-1499, 98.0 Ni, 0.10 C, 2.0 Mn, 0.05 Fe, 0.005 S, 0.05 Si, 0.03 Cu
Electron tube supports, Formerly "E" Nickel.

NICKEL 220
M-1499, 99.5 Ni, 0.04 C, 0.10 Mn, 0.05 Fe, 0.004 S, 0.03 Si, 0.05 Cu, 0.03 Ti, 0.05 Mg
Annealed: 70,000 TS, 20,000 YS; 40 El; 100 Brin.
For electronic receiving tube cathodes

NICKEL 225
M-1499, 99.5 Ni, 0.06 C, 0.13 Mn, 0.05 Fe, 0.005 S, 0.20 Si, 0.03 Cu, 0.02 Ti, 0.04 Mg.
Annealed 70,000 TS, 20,000 YS, 40 El; 100 Brin
Formerly "225" NICKEL

NICKEL 230
M-1499, 99.5 Ni, 0.05 C, 0.08 Mn, 0.05 Fe, 0.004 S, 0.02 Si, 0.05 Cu, 0.003 Ti, 0.06 Mg
Annealed 70,000 TS; 20,000 YS, 40 El, 100 Brin.
Electron tube applications

NICKEL 233
M 1499, 99.5 Ni, 0.09 C, 0.18 Mn, 0.05 Fe, 0.005 S, 0.03 Si, 0.03 Cu, 0.003 Ti, 0.07 Mg

NICKEL 270
M-1499, 99.98 Ni, 0.01 C, 0.003 Mn
High purity nickel: for electronic applications, heat exchangers

NICKEL ALLOY
M-849, 100 Ni
Welded 45,000 TS, 3 El
For welding electrodes, shielded arc

NICKEL ALLOY, GRADE A
M-33; 65 Cu, 17 Zn, 18 Ni
Plates 58,000-95,000 TS, 32-2 El, 77-158 Brin
For silver plated ware, plumbing pipes, resistance wire; high resistance.

NICKEL ALUMINUM BRONZE
U.S., 88 Cu, 10 Ni, 2 Al, Sn
For heat and corrosion resisting parts, high strength.

NICKEL ALUMINUM BRONZE
U.S., 10 Cu, 40 Ni, 30 Al, 20 Sn.
For ornaments, corrosion resistant

NICKEL ALUMINUM BRONZE
M-129, 78 min Cu, 9-11.5 Al, 3.0-5.5 Ni, 3.0-5.0 Fe, 1.5 max Mn
Cast 80,000 TS; 35,000 YS; 15 El, 15 RA, 140 Brin.
For ship propellers, pump and turbine parts; resists cavitation and corrosion, tough.

NICKEL-ARC.
M 1713; high C, Ni, bal Fe.
For welding electrodes for cast iron; machinable cast iron.

NICKEL-AT.
M 897, 0.15 max C, bal Ni.
For welding rod

NICKEL-AT
M-121; 0.25 max Cu, 0.40 max Fe, 0.35 max Mn, 0.15 max Si, 0.15 max C, 0.01 max S, 99.0 min Ni.
For chemical plant and other corrosion resisting applications.
Good welding qualities, corrosion and heat resistant.

NICKEL BEARING.
Eng.; 50 Cu, 25 Ni, 25 Sn.
For bearings; heavy duty.

NICKEL BORON STEEL.
2.8-3.6 Ni, 0.1-0.5 B, 0.15-0.7 C, bal Fe.
For dynamically stressed parts; water or oil hardened

NICKEL BRASS.
U.S.; 50-54 Cu, 35-44 Zn, 1.5 Ni, 0.5 Fe, Al
For condenser tubes, hardware; corrosion resistant

NICKEL BRASS
M-538; Ni coated brass
For fabricated parts; easily stamped, formed, drawn

NICKEL BRONZE
M-126, 82 Cu, 8 Sn, 2 Zn, 8 Ni
For superheated steam parts; corrosion resistant.

NICKEL-BRONZE.
M-309; 85-90 Cu, 3-6 Sn, 3 7 Ni, 1-3 Zn.
Heat treated: 50,000-80,000 TS, 25,000-60,000 YS, 15-25 El, 15-25 RA, 95-170 Brin.
For gears, screw down nuts, castings

NICKEL "C"
M-303, 1.5 Mn, bal Ni
69,000 TS; 45 El
For chemical apparatus, thermocouple element; heat and corrosion resistant to salt solutions and caustics

NICKEL CAST IRON NO 1
M-68, 3.0 Ni, 1.5 Si, 0.8-1.0 Cr, C, bal Fe
50,000 TS, 385 Brin
For cast gears, wear resisting casting

NICKEL CERIUM STEEL.
Eng., 2.2-3.0 Ni, 0.1-0.9 Ce, 0.4-0.75 C, bal Fe.
For machinery parts, oil hardening

NICKEL CHROME ALUMINUM
Eng; 88 Ni, 12 Al, 8 Cr
For corrosion and heat resistant parts, corrosion and heat resistant

NICKEL CHROME CAST IRON
1.5-1.75 Ni, 0.6-0.8 Cr, 3.3.4 C, 0.9-1.75 Si, 0.5-0.7 Mn, bal Fe.
Cast: 35,000-48,000 TS; 0 El, 0 RA, 170-230 Brin
For grids; corrosion and abrasion resistin.

NICKEL-CHROME-COPPER
Eng, 80-85 Ni, 20-25 Cr, 15-20 Cu
For electric irons, percolators

NICKEL CHROMEIGHT
M-118; C, Cr, Ni, bal Fe
For welding electrodes; for 18/8 stainless steel.

NICKEL CHROME PEERLESS.
Eng.; 16.5 Cr, 3.0 Fe, 2.0 Mn, 0.1 C, bal Ni
For heat resisting parts; heat resistant.

NICKEL CHROME PREMIER
Eng.; 25 Fe, 11 Cr, 3.0 Mn, bal Ni
For heat resisting parts; heat resistant

NICKEL CHROME SUPERIOR.
Eng.; 19.5 Cr, 0.5 Fe, 2.0 Mn, 0.2 C, bal Ni
For heat resisting parts; heat resistant.

NICKELCHROMTWELVE.
M-118; C, Ni, Cr, bal Fe.
For welding electrodes, for 25/12 stainless steel.

NICKEL-CLAD STEEL.
M-176; pure nickel on steel base 10% Ni, bal steel.
Plate: 55,000-65,000 TS, 40,000-50,000 YS; 41-29 El, 62-52 RA.
For vessels, tanks, tank cars, digesters, retorts, piping, stills; corrosion resisting

NICKEL COBALT 9-H.
M-580, Ni-Co.
For anodes, electroplating.

NICKEL COINAGE U S A
U S, 75 Cu, 25 Ni
For coinage, corrosion resistant.

NICKEL COPPER.
M-538, Ni coated Cu
For fabricated parts, easily stamped, formed, drawn

NICKEL COPPER STEEL
U S, 1-25 Ni, 0.4-10 Cu, 0.15-0.8 C, bal Fe.
For structures, machinery parts, fences, gates; resists soil corrosion

NICKEL DUR
M 508, 80 Cu, 10 Pb, 5 Ni, 5 Sn
Cast: 19,000 TS; 85 Brin.
For centrifugal cast liner, nickel bronze, corrosion resistant

NICKELEISEN 36K
M-297, 36-38 Ni, bal Fe
For magnetic and electrical equipment, motors; soft magnet, high permeability

NICKELEISEN 36W
M-297, 36 38 Ni, bal Fe
For magnetic and electrical equipment, motors; soft magnet, high permeability

NICKELENE-1
Eng, 5 30 Ni, 52-80 Cu, 10-35 Zn
For electrical instruments, resistance wires, thermocouples, German silver

NICKELENE-2
Eng, 13 Ni, 55 Cu, 21 Zn, 2 Sn, 10 Pb
For resistance wires, heat resistant

NICKEL FILLER METAL 61
M-1499, 96.0 Ni, 0.06 C, 0.30 Mn, 0.10 Fe, 0.005 S, 0.40 Si, 0.02 Cu, 3.0 Ti
For gas shielded arc welding of Nickel 200 and Nickel 201, overlaying on steel
AWS A 5.14 Class ERNi 3, ASME SFB 5.14

NICKEL "GEA"
M-121, Ni alloy
For electronic equipment, corrosion and heat resistant

NICKEL "HPA"
M-121, Ni alloy.
For electronic equipment, corrosion and heat resistant

NICKEL "HPB"
M-121; Ni alloy.
For electronic equipment; corrosion and heat resistant

NICKELIN
M-297, 50-90 Cu, 3-40 Ni, 0-10 Al, 0-40 Zn
For chemical equipment, corrosion resistant.

NICKELIN
M-297; 58 Cu, 22 Ni, 20 Fe
For regulating and checking electrical resistances; German silver.

NICKELIN-40.
M-789; 67 Cu, 30 Ni, 3 Mn.
Hard: 115,000-128,000 TS.
Soft: 50,000-60,000 TS.
Temp. coef. resist per °C: + 0.00014.
For electrical equipment and instruments.
Resistance alloy. Max operating temperature 400°C.

NICKELIN "A."
Eng; 18 Ni, 62 Cu, 20 Zn
For resistance alloy; heat resistant.

NICKELIN "B"
Eng, 32 Ni, 68 Cu
For resistance alloy; heat resistant.

NICKELIN "C."
Eng; 31 5 Ni, 55.3 Cu, 13 1 Zn.
For resistance alloy; heat resistant.

NICKELINE.
55-75 Cu, 18 32 Ni, 0-20 Zn, 0.20-0 45 Fe
For electrical resistance, heat resistant.

NICKELINE.
M-88; Pb, Sb, bal Sn.
24 Brin.
For Babbitt, bearings; Babbitt metal.

NICKELIN I
M-303; 33.3 Ni, bal Cu.
For chemical equipment, fruit presses, boilers, kettles, corrosion resistant.

NICKELIN I
M 297, 54 Cu, 26 Ni, 20 Zn
Hard 121,000 TS, 1 5 El.
Annealed· 85,000 TS, 30 El
For starting rheostats for motors, field regulators, loading resistances, max. operating temperature 500°C

NICKELIN II
M-297, 67 Cu, 30 Ni, 3 Mn.
Hard· 100,000 TS, 2 El, 170 Brin
Annealed 70,000 TS, 44 El, 92 Brin.
For starting rheostats, field regulators, loading resistances, max operating temperature 500°C.

NICKELIN II
M-303, 25 Ni, bal Cu.
For fruit presses, coinage, corrosion resistant.

NICKELIN III
M-303, 20 Ni, bal Cu
For medals, ornaments, corrosion resistant.

NICKELIN III
M-297, 58 Cu, 22 Ni, 20 Zn
Hard 118,700 TS, 1 El
Annealed 72,000 TS, 34 El.
For regulating and control resistances, max operating temperature 500°C

NICKELIN IV
M 303, 85 Cu, 15 Ni.
45,000 TS, 48 El
For projectiles or bullets to be nickel-jacketed; tough

NICKELIN V
M-303, 10 Ni, 90 Cu.
For armature wires, electrical equipment; corrosion resistant

NICKELIN RESISTANCE
M-297; 54 Cu, 20 Zn, 26 Ni.
For motor starters, electrical equipment; nickel silver.

NICKEL LEADED COMMERCIAL BRONZE.
M-33; 90.25 Cu, 6 9 Zn, 1 Ni, 0.1 P, 1.75 Pb.
For bolts, fasteners, pole line hardware; free-cutting.

NICKEL MALLEABLE.
M-68; 99 4 Ni, 0.15 Mn, 0.1 Cu, 0.05 C, 0.15 Fe.
For coinage, constituent of alloys; corrosion resistant.

NICKELMANG.
M-118; C, alloy, bal Fe.
For welding electrodes for Mn steel; bare and coated.

NICKEL-MANGANESE.
M-897; 2-5 Mn, bal Ni.
Annealed: 78,000 TS, 50,000 YS; 30 El
For grid wires, electronic tubes; corrosion and heat resistant.

NICKEL MANGANESE BRONZE
U.S; 53 Cu, 39 Zn, 2.6 Sn, 2 5 In, 1 7 Mn, Al, Pb.
For corrosion resistant strong castings; corrosion resistant

NICKEL MOLYBDENUM STEEL
U.S; 1.5-3.0 Ni, 0.1 0 7 Mo, 0 4 C, Mn, bal Fe.
For gears, shafts; oil hardened

NICKEL N.93
England; 2 W, 1 Al, 0.2 C, bal Ni
For tube cathodes and valve components; corrosion and heat resistant

NICKEL N 100
England; 2 W, 1 Al, 0.2 C, 0.2 Mg, bal Ni.
For tube cathodes and valve components; corrosion and heat resistant

NICKEL-Ni-Tu
M-897, 2.0 W, Tu, bal Ni.
For electron tube elements; heat resistant.

NICKEL "O."
M-121, Ni alloy
For electronic equipment; corrosion and heat resistant

NICKELOID.
M-135, 45-40 Ni, bal Cu.
For non-rusting and corrosion resistant parts; corrosion resistant.

NICKELOID.
M-553; Pb, Sb, Ni, bal Sn.
For bearings, Babbitt metal

NICKELOID
M-538, Ni coated Zn
For construction, corrosion resistant

NICKELOID
M-182; Sn, Cu, bal Ni
Cast, 36,000-50,000 TS; 180-200 Brin.
For valves for severe steam services, valve seats; corrosion resistant

NICKEL OREIDE
M-303, 63-66 Cu, 31-33 Zn; 2-6 Ni
For hardware, ornamental parts, corrosion resistant

NICKEL OREIDE
M 303, 87 Cu, 6.7 Zn, 6 7 Ni
For hardware, ornamental parts, corrosion resistant

NICKELOY.
Eng; 93.8 Al, 4 15 Cu, 1.41 Ni.
20,000 TS; 5 RA
For automotive engine parts; age-hardenable.

NICKELOY-ROD NO. 2512
M-1096; 0 10-0 15 C, 0.35-0 55 Mn, 0.25-0.35 Si, 4 75-5.25 Ni, bal Fe.
Welded: 80,000-90,000 TS; 65,000-75,000 YS; 25-30 El; 50-55 RA.
For all-position welding rod; low temperature toughness.

NICKEL-SILICON.
M-461; Ni, Si.
Cold rolled: 70,000-85,000 TS; 60,000-70,000 YS; 25-15 El; 55-45 RA; 149-170 Brin.
For pistons.

NICKEL SILICON STEEL.
U.S ; 2.8-3.3 Ni, 0.5-2.2 Si, 0.35-0.50 C, bal Fe.
For machinery parts, gears, shafts, axles; oil hardening.

NICKEL SILVER.
M-322; 18 Ni, 65 Cu, 18 Zn.
59,900 TS; 31,800 YS, 34 El; 65 RA.
For silver plated table ware; Rockwell "B"-50.

NICKEL SILVER 10%.
56-65 Cu, 25-34 Zn, 10 Ni
For ornaments, plated ware; corrosion resistant.

NICKEL SILVER 10% 740.
M-279, 71 Cu, 10 Ni, 19 Zn
Ann : 50,000-60,000 TS; 15,000-33,000 YS, 33-43 El.
Cold rolled. 56,000-95,000 TS, 30,000-86,000 YS; 1-34 El.
A high copper nickel silver, good corrosion resistance; for musical instruments, electronic parts.

NICKEL SILVER 10% 745.
M-8, 65 Cu, 24 75 Zn, 10 Ni, 0.25 Mn.
Hard Sheet: 87,000 TS; 70,000 YS, 6 El, B 87 Rock.
Soft Sheet 55,000 TS; 20,000 YS; 42 El, B 30 Rock.
For optical goods, costume jewelry, holloware, radio dials, nameplates, camera parts
Corrosion resistant, high strength.

NICKEL SILVER 12% 738
M-279; 70 Cu, 12 Ni, 18 Zn
Ann: 48,000-58,000 TS; 12,000-30,000 YS; 35-45 El
Silver color; for coinage.

NICKEL SILVER 12% 762.
M-279; 59 Cu, 12 Ni, 29 Zn.
Ann. 57,000-75,000 TS; 21,000-51,000 YS; 35-50 El.
Cold rolled: 65,000-125,000 TS, 36,000-115,000 YS, 1-40 El.
High strength corrosion fatigue resistant, for relay springs, contacts, connectors, clips

NICKEL SILVER 12%-766
M-8, 31 25 Zn, 12 Ni, 0 25 Mn, bal Cu
Hard: 97,000 TS, 65,000 YS; 5 El, 176 Brin
Soft 60,000 TS; 24,000 YS, 40 El, 80 Brin
For springs; corrosion resistant

NICKEL SILVER 13%-776
M-8, 43 25 Cu, 43 6 Zn, 13 Ni, 0 15 Mn
Extruded: 60,000 TS, 20,000 YS, 20 El
For architectural decoration; warm silver color

NICKEL SILVER 14%.
60-56 Cu, 26-28 Zn, 14 Ni
For ornaments, plated ware, corrosion resistant.

NICKEL SILVER 15%
64-57 Cu, 21-28 Zn, 15 Ni
For ornaments, plated ware; corrosion resistant

NICKEL SILVER 15% 767.
M-8; 56.5 Cu, 28 25 Zn, 15 Ni, 0 25 Mn.
Hard Sheet: 100,000 TS; 75,000 YS; 4 El; B 93 Rock
Soft Sheet. 60,000 TS; 24,000 YS; 40 El, B 50 Rock.
For architectural panel and trim, nameplates, dials, musical instruments, watch cases.
Corrosion resistant, high strength.

NICKEL SILVER 18%.
65-55 Cu, 17-27 Zn, 18 Ni.
For ornaments, plated ware; corrosion resistant.

NICKEL SILVER 18%-719.
M-8; 17 Zn, 18 Ni, 0.25 Mn, bal Cu.
Soft: 58,000 TS; 40 El.
Hard. 70,000 TS
For hardware, marine trim; corrosion resistant.

NICKEL SILVER 18% 735.
M-8, M-279, 72 Cu, 18 Ni, 10 Zn.
Ann: 48,000-56,000 TS, 14,000-24,000 YS; 34-44 El.
Cold rolled: 57,000-90,000 TS, 28,000-80,000 YS; 1-25 El.
Good deep drawing white brass; for ferrules, ink cartridges, condenser cans, instruments

NICKEL SILVER 18% 752
M-8, M-279; 65 Cu, 18 Ni, 17 Zn.
Ann: 51,000-61,000 TS, 16,000-29,000 YS; 35-42 El.
Cold rolled 59,000-104,000 TS; 22,000-96,000 YS; 1-35 El
Silver color, good formability.
For flatware, holloware, musical instruments, coins.

NICKEL SILVER 18% 770
M 279, 55 Cu, 18 Ni, 27 Zn
Ann 61,000-75,000 TS, 22,000-40,000 YS; 35-48 El.
Cold rolled 72,000-126,000 TS; 40,000 116,000 YS; 2-35 El.
High strength spring nickel silver.
For relay springs, contact springs, diaphragms

NICKEL SILVER 18%-770
M-8, 27 Zn, 18 Ni, 0 25 Mn, bal Cu
Soft 60,000 TS, 22,000 YS; 45 El
Hard: 80,000 TS, 60,000 YS; 20 El
For springs, hardware, corrosion resistant

NICKEL SILVER 18%-7641
M-8, 20 25 Zn, 18 Ni, 0 25 Mn, bal Cu
Hard 80,000 TS, 65,000 YS, 8 El, 137 Brin.
Soft 60,000 TS, 25,000 YS, 35 El, 83 Brin.
For tubes, corrosion resistant

NICKEL SILVER 18% (A) Copper Alloy No. 752
M-33, 65 Cu, 18 Ni, 17 Zn.
Strip, Ann: 58,000 TS, 25,000 YS, 40 El, 45 Rock B
Strip, Hard 85,000 TS, 74,000 YS, 3 El, 87 Rock B
For tableware, hollow ware, base for silver plated parts, welding rod
ASTM B122 Alloy 2, B151 Alloy A, B206 Alloy A, CDA 752.

NICKEL SILVER 20%
64 53 Cu, 16-27 Zn, 20 Ni
For ornaments, plated ware, corrosion resistant.

NICKEL SILVER 25%
55 Cu, 25 Ni, 20 Zn
For ornaments, plated ware, corrosion resistant.

NICKEL SILVER 30%
65-47 Cu, 30 Ni, 5-23 Zn
For ornaments, plated ware, corrosion resistant

NICKEL SILVER 55-18
M-8, M-33, M-103, M 238; 53 5-56 5 Cu, 27 Zn, 16 5-19 5 Ni.
Soft 60,000 TS, 27,000 YS; 40 El
Hard 100,000 TS, 85,000 YS, 3 El.
For optical goods, springs, resistance wire; corrosion resistant, good workability.

NICKEL SILVER 65-10
M-8, M 33, M-103, M-238, 63.5-68 5 Cu, 25 Zn, 9-11 Ni
¼-H temper 65,000 TS; 45,000 YS; 25 El.
½-H temper: 73,000 TS; 60,000 YS; 12 El.
H temper: 86,000 TS; 75,000 YS; 4 El.
For hardware, optical parts, hollowware; corrosion resistant, good formability.

NICKEL SILVER 65-12.
M-8, M-33, M-103, M-238; 63.5-66.5 Cu, 23 Zn, 11-13 Ni.
¼ H-temper: 65,000 TS; 45,000 YS; 23 El.
½ H-temper: 73,000 TS; 60,000 YS; 11 El.
H-temper: 85,000 TS; 75,000 YS; 4 El.
For fasteners, hardware, optical parts; corrosion resistant, good formability.

NICKEL SILVER 65-15.
M-8, M-33, M-103, M-238; 63.5-66.5 Cu, 14-16 Ni, 20 Zn.
¼ H-temper: 65,000 TS; 49,000 YS; 21 El.
½ H-temper: 74,000 TS; 62,000 YS; 10 El.
H-temper: 85,000 TS; 75,000 YS; 3 El.
For optical goods, jewelry, hardware; corrosion resistant, good workability.

NICKEL SILVER 65-18.
M-8, M-33, M-103, M-238; 63.0-66.5 Cu, 17 Zn, 16.5-19.5 Ni.
Soft: 58,000 TS; 25,000 YS; 40 El.
½ H-temper: 74,000 TS; 62,000 YS; 8 El.
Hard: 85,000 TS; 74,000 YS; 3 El.
For hardware, optical goods, hollowware; corrosion resistant, good workability.

NICKEL SILVER 548.
M-141; 48 Cu, 9.5 Ni, bal Cu.
For braze welding rods; corrosion resistant.

NICKEL SILVER 565-18% (A).
M-141; 65 Cu, 18 Ni, bal Zn.
Annealed. 60,000 TS; 32 El.
Drawn· 85,000 TS; 3 El
For hardware, hollowware, jewelry; corrosion resistant

NICKEL SILVER 567-10%.
M-141; 65 Cu, 10 Ni, bal Zn.
Annealed 50,000 TS, 45 El.
Drawn: 90,000 TS; 3 El.
For hardware, hollowware, jewelry; corrosion resistant.

NICKEL-SILVER 828.
M-8; 40 Zn, 10.2 Ni, 0.15 Si, 0.02 P, bal Cu.
For welding rod; low fuming; nickel silver, M P 1690°F.

NICKEL SILVER CASTING
70-56 Cu, 13-20 Ni, 5.6-24 Zn, 0-4 Sn, 0-3.5 Pb.
For plumbing fixtures, fittings; corrosion resistant.

NICKEL SILVER GRADE A.
M-98; 65 Cu, 18 Ni, 17 Zn.
55,000-110,000 TS, 50-2 El; 50-175 Brin.
For cutlery, cheap jewelry, resistance wire, auto fittings, plumbing, corrosion resisting.

NICKEL SILVER GRADE B.
M-98; 55 Cu, 18 Ni, 27 Zn.
40-1 El; 50-175 Brin.
For cutlery, cheap jewelry, resistance wire, auto fittings, plumbing, corrosion resisting.

NICKEL SILVER, ROLLING.
49 Cu, 39 Zn, 12 Ni.
For ornamental sheets and rolled parts; corrosion resistant.

NICKEL SILVER, TURNING.
66-59 Cu, 22-29 Zn, 12 Ni, 0-5 Pb.
For screws, bolts; machining grade.

NICKEL SPECIAL.
M-789; 99.4 Ni, 0.2-0.6 Fe.
For electrical equipment and instruments.
Resistance alloy. Max working temperature to 150°C.

NICKEL STAYBOLT.
M-435; 0.08 C, 0.25 Mn, 2.25 Ni, bal Fe.
For boiler staybolts; tough.

NICKEL STEEL.
M-538; Ni bonded to steel.
For floor plates, reflectors, hardware, stampings; resists heat to 1050°F; Ni bonded to steel.

NICKEL TIN.
M-538; Ni coated Sn
For fabricated parts; easily stamped, formed, drawn.

NICKEL-TUNGSTEN.
75-50 W, 25-50 Ni.
For chemical apparatus; resistant to acids.

NICKEL URANIUM STEEL
U.S ; 0.3-0.4 Ni, 0.2-0.4 U, 0.2-0.8 C, bal Fe.
183,000-209,000 TS; 159,000-175,000 YS; 8.5-9.0 El; 34-31 RA.
For general engineering applications; corrosion resistant

NICKELVAC 90.
M-1490; 0.05 C, 12.8 Cr, 5.7 Mo, 2.4 Ti, 35.0 Fe, bal Ni
At 70°F 175,000 TS, 115,000 YS.
At 1000°F. 146,000 TS; 102,000 YS.
For aircraft and industrial gas turbine components, rotor and compressor discs, structural parts
High creep and rupture strength to 1400°F.

NICKELVAC-700.
M-1490, 0.12 C, 0.1 Mn, 0.3 Si, 15 Cr, 28.5 Co, 3.75 Mo, 2.2 Ti, 3.0 Al, 0.7 Fe, 0.05 Cu, bal Fe.
Aged· 172,000 TS, 105,000 YS, 25 El, 27 RA.
At 1200°F 146,000 TS; 92,000 YS; 23 El; 27 RA.
For aircraft gas turbine blades, jet engine components.
Age-hardenable High oxidation and corrosion resistance.

NICKELVAC-751.
M-1490; 0.04 C, 0.7 Mn, 0.3 Si, 15 Cr, 1 Cb, 2.5 Ti, 1.2 Al, 6.75 Fe, 0.05 Cu, bal Ni.
Aged 170,000 min TS, 115,000 min YS, 18 min El.
For valves in spark-ignition and diesel engines.
Age-hardenable Good creep and stress-rupture properties Heat and corrosion resistance.

NICKELVAC-901
M-1490, 0.06 C, 12.5 Cr, 6.1 Mo, 43 Ni, 3 Ti, 0.015 B, bal Fe.
At R.T. 175,000 TS, 130,000 YS; 14 El.
At 1400°F 105,000 TS, 92,000 YS; 19 El
For aircraft and gas turbine components, rotors and compressor discs, fasteners, bolts.
High heat and corrosion resistant High creep and rupture strength

NICKELVAC A-286.
M-1490; 0.06 C, 14.75 Cr, 1.25 Mo, 25.5 Ni, 2.1 Ti, 0.2 Al, 1.5 Mn, bal Fe.
At R.T.· 146,000 TS, 105,000 YS, 25 El
At 1400°F· 64,000 TS; 62,000 YS; 19 El.
For jet engine and supercharger parts, turbine wheels and blades, after-burners, bolting.
Austenitic, high heat and corrosion resistant.

NICKELVAC-B.
M-1490; 0.10 C, 0.8 Mn, 0.7 Si, 0.6 Cr, 2.5 Co, 28 Mo, 5 Fe, 0.3 V, bal Ni.
Annealed: 127,000 TS, 56,000 YS, 52 El.
At 1200°F: 75,000 TS; 42,000 YS; 13 El.
For chemical and oil refinery equipment, valves, pumps, bolts, gas turbine components.
Acid resistant, austenitic, tough.
Good creep and high temperature properties.

NICKELVAC-C.
M-1490; 0.07 C, 0.8 Mn, 0.7 Si, 16 Cr, 2.5 Co, 17 Mo, 4 W, 5 Fe, bal Ni.
Annealed: 130,000 TS, 65,000 YS; 37 El; 31 RA.
At 1200°F: 95,000 TS; 46,000 YS; 22 El; 22 RA.
For chemical and oil refinery equipment, combustion chambers, valves, pumps.
Corrosion and heat resistant. Good high temperature properties.

NICKELVAC-F.
M-1490; 0.05 C, 1.5 Mn, 1.0 Si, 22 Cr, 2.5 Co, 6.5 Mo, 1 W, 2 Cb, 45.5 Ni, bal Fe
Annealed: 108,000-116,000 TS; 48,000-53,000 YS; 40-46 El; 47-54 RA, B 89-93 Rock.
At 1000°F: 79,000 TS; 32,000 YS, 50 El.
For paper and pulp digesters, chemical and petroleum processing equipment.
High heat and corrosion resistance. Good high temperature properties

NICKELVAC-INOR-8.
M-1490, 0.06 C, 0.8 Mn, 0.5 Si, 7 Cr, 0.5 Co, 16.5 Mo, 3 Ti, 5 Fe, 0.01 B, bal Ni
At R.T.. 100,000 TS, 45,000 YS, 50 El.
At 1200°F. 70,000 TS, 30,000 YS; 45 El
For high temperature applications, jet engine and gas turbine components.
High heat and corrosion resistance

NICKELVAC L-605
M-1490; 0.05-0.15 C, 1.0-2.0 Mn, 19-21 Cr, 14-16 W, 9-11 Ni, 3.0 max Fe, bal Co
At 70°F: 161,000 TS, 86,000 YS; 47 El; Rock C 24.
At 1500°F: 55,000 TS, 45,000 YS; 16 El.
For afterburners, nozzle diaphragm valves, high temperature valves and springs, buckets.
High strength above 1600°F, oxidation and corrosion resistant.

NICKELVAC-N.
M-1490; 0.04 C, 0.2 Mn, 0.2 Si, 15.8 Cr, 7.2 Fe, 76 Ni
Annealed· 115,000 TS; 46,000 YS: 50 El
For equipment handling hot fluoride salts, high temperature applications
Corrosion resistant. High oxidation resistant

NICKELVAC N-155.
M-1490, 0.15 C, 1.5 Mn, 0.5 Si, 20 Cr, 20 Ni, 20 Co, 3.5 Mo, 2.5 W, 1.0 Cb, 0.15 N, bal Fe
Sheet· 118,000 TS, 58,000 YS, 49 El
At 1000°F: 94,000 TS, 40,000 YS, 50 El.
For aircraft cabin heaters, afterburners, rocket chambers, combustion chambers and manifolds
High heat and corrosion resistance, good high temperature strength.

NICKELVAC SUPER-X
M-1490; 0.045-0.090 C, 15.0-16.0 Cr, 6.25-7.25 Fe, 0.55-0.90 Al, 2.35-2.70 Ti, 0.80-1.1 Cb + Ta, 0.10 max Cu, 0.25 max Mn, 72.0 min Ni + Co
Heat Treated· 188,000 TS; 129,000 YS, 23.6 El, 33.8 RA.
At 600°F: 178,000 TS, 117,000 YS; 21 El, 36.7 RA.
For applications requiring oxidation and corrosion resistance coupled with high strength to 1200-1500°F.

NICKELVAC-W.
M-1490; 0.06 C, 15.5 Cr, 73 Ni, 2.5 Ti, 0.75 Al, 8 Fe.
At R.T.: 170,000 TS, 100,000 YS; 25 El.
At 1000°F· 138,000 TS; 93,000 YS, 29 El.
For gas turbine and heat engine components, springs, fasteners, bolts.
High heat, corrosion and oxidation resistant. Age-hardenable

NICKELVAC-X.
M-1490, 0.04 C, 0.7 Mn, 0.3 Si, 15 Cr, 0.85 Cb, 2.5 Ti, 0.8 Al, 6.75 Fe, 0.05 Cu, bal Ni.
Annealed: 115,000 TS, 50,000 YS, 50 El; 200 Brin.
Age-Hardened· 180,000 TS; 125,000 YS, 20 El; C 37 Rock
For aircraft gas turbines and heat engines, high temperatures bolts, turbine rotors and blades.
Age-hardenable. High heat and corrosion resistant.

NICKELVAC X-750
M-1490; 0.06 C, 15.5 Cr, 75 Ni, 2.55 Ti, 0.75 Al, 6.75 Fe, 1 Cb
At R.T.. 162,000 TS, 92,000 YS, 24 El.
At 1400°F 70,000 TS; 62,000 YS; 9 El.
For gas turbine blades and wheels, springs, turbochargers, afterburners, fasteners
Age hardenable High heat and corrosion resistance

NICKEL VANADIUM STEEL
3-3.3 Ni, 0.1-0.45 V, 0.36 C, 0.2-0.4 Si, bal Fe
For machinery parts, gears, pinions, shafts, crankshafts, tough, shock resistant

NICKEL WELDING ELECTRODE 141
M-1499, 96.0 Ni, 0.03 C, 0.30 Mn, 0.05 Fe, 0.005 S, 0.60 Si, 0.03 Cu, 0.25 Al, 2.5 Ti
Electrode for shielded metal-arc welding of Nickel 200 and Nickel 201, welding clad side of nickel-clad steel, joining nickel to steel, overlaying on steel
AWS A 5.11 Class ENi-1, ASME SFB 5.11

NICKEL-ZIRCONIUM
86 Ni, 6 Si, 1.5 Zr 0.1 C
For chemical apparatus, corrosion resistant

NICKEL ZIRCONIUM STEEL
3 Ni, 0.24 Zr, 0.4 C, 2.4 Si, bal Fe.
For crankshafts, axles, machinery parts, oil hardening

NICKEND 2
M-677, C, 2.25 Ni, bal Fe
Welded 80,000-90,000 TS, 65,000-75,000 YS, 30-20 El, 60-45 RA
For welding electrodes; for steel, low H_2

NICKEND 3
M-677, 0.06 C, 0.8 Mn, 0.3 Si, 3.4 Ni, bal Fe
For welding electrodes, class E8016-C2, for welding 3¼ nickel steel

NICKIMPHY
M-104, 0.02 C, 0.10 Mn, 0.10 Cu, bal Ni
For radio tube anodes, heat and corrosion resist

NICKKAL STEEL
M-69, C, 39 Ni, bal Fe
For valves, thermostats, controlled expansion

NICKOLITE
M 509, 60 Cu, 3 Sn, 6 Pb, 20 Ni, 11 Zn
For typewriter parts, door knobs, nickel silver

NICKROFRY 345
M-1302, 0.2 max C, 22-24 Cr, 12-15 Ni, 2 max Mn, 1 max Si, bal Fe
Annealed. 85,000-95,000 TS; 40,000-50,000 YS; 45-55 El, 150-185 Brin
For heat treating boxes, oil refinery and chemical plant equipment, Type 309; austenitic, heat resistant

NICKROTHERM.
M-72; C, Cr, Ni, Si, bal Fe.
For chemical plant equipment; corrosion and heat resistant.

NICKROTHERM "F.F."
M-72; 0.2 C, 1.5 Si, 18 Cr, bal Fe.
For heating muffles, autoclaves, roasting furnaces, rabbles, boilers, grates, recuperators, dampers; heat and corrosion resistant.

NICKROTHERM "N.C.T."
M-72, 0.2 C, 19 Cr, 9 Ni, bal Fe.
For heating muffles, autoclaves, roasting furnaces, rabbles, boilers, grates, recuperators, dampers, heat and corrosion resistant.

NICLOY 3½.
M-17, 0.20 max C, 3.25-3.75 Ni, 0.4 Mn, 0.3 Si, bal Fe
Rolled 80,000 TS, 60,000 YS, 35 El; 71 RA.
At 1000°F 35,000 TS; 43 El, 82 RA.
For heat exchangers, refrigerators, liquid air equipment, impact resistant and tough at low temperature

NICLOY 5.
M-17, 0.14 max C, 4.75-5.25 Ni, 0.4 Mn, 0.2 Si, bal Fe
Rolled 100,000 TS; 75,000 YS, 30 El, 70 RA.
At 1000°F 36,000 TS, 45 El, 84 RA.
For heat exchangers, refrigerators, liquid air equipment, impact resistant and tough at low temperature

NICLOY 9
M-17, 0.06 C, 8.5-9.5 Ni, 0.5 Mn, 0.1 Cr, 0.3 Cu, 0.05 Mo, bal Fe.
Rolled 98,000-108,000 TS, 74,000-89,000 YS, 26-27 El, 61-70 RA, 210-260 Brin
For petroleum refining and chemical equipment, resists embrittling effect of sub-zero temp

NICLOY-36
M-447, 36 Ni, bal Fe
Annealed 65,000 TS, 40,000 YS, 35 El, B 70 Rock
Cold Worked 105,000 TS, 95,000 YS; 8 El, 217 Brin
For hairsprings, time pieces, precision instruments, bourdon tubes, bimetals
Low coefficient expansion. Constant modulus Corrosion resistant

NIC-MOTAL
M-554, Pb, Sb, Ni, bal Sn.
For bearings, Babbitt metal

NICO
M-542; 0.2 C, 0.5 Cu, 0.8 Ni, bal Fe.
For corrugated culverts, rust resistant.

NICO
M-685, 0.1 C, bal Fe
For cast iron welding electrodes, ductile

NICO NO 1
Eng, up to 23 Sb, 4-5 Sn, 2-3 Ni, bal Pb.
36 Brin
For bearings, White Metal.

NICO NO 2
Eng; 10 Sb, 10 Sn, 1 Ni, bal Pb.
29 Brin
For bearings; White Metal.

NICOL.
M-1392, 10 Al, 5 Ni, 5 Fe, 1.5 Mn, bal Cu
Cast 93,000 TS, 40,000 YS, 20 El; 137 Brin.
For ship propellers, heat treatable, aluminum bronze, tough.

NICOL-ROD NO 44
M-1096; Cu, Ni.
Welded: 221 Brin.
For welding rod; for malleable iron.

NICOL-ROD NO 99.
M-1096; Ni
For welding rod for cast iron, special iron coating

NICORO
M-1493, 35 Au, 62 Cu, 3 Ni.
For brazing Kovar, copper, nickel and steel.
M P. 1832-1886°F. Corrosion resistant.

NICORROS.
M-297, 67 Ni, 32 Cu, 1 Mo
Soft. 63,000 TS; 24,000 YS, 42 El, 100 Brin.
Hard: 101,000 TS, 89,000 YS; 3 El; 190 Brin
For chemical and oil apparatus, ship construction; highly corrosion resistant.

NICOSEAL.
M-32; 29 Ni, 17.5 Co, bal Fe
For glass and ceramic seals with Pyrex glass and ceramics, lead wires and eyelets
Controlled expansion, resists shock, corrosion resistant

NICOSEL
M-56, 0.04 C, 0.15 Si, 0.3 Mn, 29 Ni, 17.1 Co, bal Fe
For instruments, low coef of expansion

NICOVAR
M-32, 29 Ni, 17.5 Co, bal Fe
For glass and ceramic seals.
Controlled expansion

NICRAL "A."
M-93, 0.1 Ni, 0.5 Cr, 0.5 Cu, 0.5 Mg, bal Al.
Annealed 20,000 TS, 10,000 YS; 24 El; 40 Brin
Heat treated 46,000 TS; 41,000 YS, 8 El; 120 Brin
For light Al alloy parts, high strength and workability

NICRAL A
M-104, M-771, varying C, 15 Cr, bal Fe
Rolled 125,000-150,000 TS, 101,000-114,000 YS; 18-22 El
For carburizing boxes, heat treating equipment, furnace parts, oxidation resistant

NICRAL AD.
M-93, Al alloy
For light alloy parts

NICRAL AD018.
M-93, Al alloy
For rivets

NICRAL AD2012
M-93, Al alloy.
For airplane wing ribs, bus body panels; sheets

NICRAL AD-8412
M-93, Al alloy
For light alloy parts

NICRAL AO.
M-93; Al alloy
For rolled trim, shells

NICRAL "B"
M-93, 0.5 Ni, 0.25 Cr, 0.25 Cu, 0.25 Mg, bal Al
Annealed: 17,000 TS, 6,000 YS, 27 El.
Heat treated 38,000 TS, 32,000 YS, 12 El.
For light Al alloy parts; for stamping and forming

NICRAL B
M-104, M-771, 0.35 max C, 20 Cr, bal Fe.
Rolled 128,000 TS, 101,000 YS; 10 El.
For domestic utensils, electric irons, boiler parts; Type 442, corrosion resistant.

NICRAL BO.
M-93; Al alloy.
For bezels, reflectors, switch covers; deep drawing temper.

NICRAL "C."
M-93; 0.5 Ni, 0.5 Cr, 0.7 Cu, 0.2 Mg, bal Al.
For light alloy parts.

NICRAL C.
M-104; 0.45 max C, 18 Cr, 36 Ni, Si, bal Fe.
For furnace and heat resistant equipment; Type 330; stainless, austenitic.

NICRAL D.
M-104, M-771; 0.25 max C, 22 Cr, 18 Ni, bal Fe.
Rolled: 100,000 TS; 58,000 YS; 30 El.
For carburizing boxes, furnace supports, grids; Type 310; stainless, austenitic.

NICRAL DC:.
M-104; 0.15-0.50 C, 23-25 Cr, 18-20 Ni, Si, bal Fe.
Annealed: 100,000 TS; 45,000 YS; 50 El; 65 RA; 185 Brin.
For furnace parts, valves, pumps, turbine parts; Type 310; stainless, austenitic.

NICRAL DS.
M-104; 0.15-0.50 C, 23-25 Cr, 18-20 Ni, Si, bal Fe.
For furnace parts, heat treat boxes; austenitic; Type 310; stainless.

NICRAL E.
M-104, M-771; 0.35 C, 30 Cr, bal Fe.
Rolled: 85,000 TS; 58,000 YS; 20 El.
For carburizing boxes, furnace parts; Type 416; resists S.

NICRAL F.
M-104, M-771; 0.5 max C, 65 Ni, 18 Cr, 1.5 Si, 1 Mn, bal Fe.
Cast: 73,000 TS; 34,000 YS; 6.5 El; 200 Brin.
For furnace parts, gas turbine and gas engine parts; corrosion and oxidation resistant.

NICRAL "FM."
M-93; Mg, Ni, Cr, bal Al.
Extruded: 22,000 TS; 12,000 YS, 22 El.
Heat treated: 41,000 TS; 36,000 YS; 11 El.
For structural and extruded architectural sections; corrosion resistant.

NICRAL FM09.
M-93; Al alloy.
For sash assemblies; extruded.

NICRAL G.
M-104, M-771; 0.3 C, 35 Ni, 30 Cr, bal Fe.
For furnace parts and equipment; heat resistant cast.

NICRAL H.
M-104; C, 12 Ni, 25 Cr, bal Fe.
For heat and corrosion resistant parts, corrosion and heat resistant.

NICRAL H.
M-771; 0.2 max C, 22-24 Cr, 12-15 Ni, 2 max Mn, 1 max Si, bal Fe.
Annealed: 85,000-95,000 TS; 40,000-50,000 YS; 45-55 El; 150-185 Brin.
For heat treating boxes, oil refinery and chemical plant equipment; Type 309; austenitic, heat resistant.

NICRAL H9.
M-104; 0.9 C, 25 Cr, 12 Ni, Si, bal Fe.
For furnace parts, valves; austenitic, corrosion and heat resistant.

NICRALIUM D2018.
M-93; 0.45 Cu, 0.48 Mg, 0.19 Mn, 0.42 Fe, 0.3 Si, 1 Ni, 0.2 Cr, 0.17 Mo, bal Al.
For light alloy parts.

NICRAL J.
M-104; 0.50 max C, 24 Cr, 3 Ni, bal Fe.
For furnace parts and equipment; Type 327; corrosion and heat resistant.

NICRAL K.
M-104; 0.10 max C, 22 Cr, 42 Ni, Si, bal Fe.
For chemical plant equipment; austenitic, corrosion and heat resistant.

NICRAL KM.
M-104, 0.9 C, 20 Cr, 42 Ni, Si, bal Fe.
For heat resistant parts; corrosion and heat resistant.

NICRALLOY-A.
M-1411; 80 Ni, 20 Cr.
Cold drawn. 131,000 TS, 80,000 YS; 35 El; 61 RA.
For electrical resistors, heating elements, operates up to 1150°C, heat resistant.

NICRALLOY-B.
M-1411, 65 Ni, 15 Cr, bal Fe.
Cold drawn 105,000 TS; 59,000 YS; 40 El; 66 RA.
For electrical resistors, heating elements, operates up to 950°C, heat resistant.

NICRAL M
M-104, 0.15 max C, 13 Cr, 2 Si, bal Fe.
For valves, cutlery; corrosion resistant

NICRAL-O.
M-771, 0.20 C, 2.5 Si, 25 Cr, 21 Ni, bal Fe.
Bar: 100,000 TS; 50,000 YS; 45 El; B 89 Rock.
For furnace parts, annealing boxes, heat treating fixtures.
Type 314 Stainless Steel, high heat resistant.

NICRAL P.
M-104, 2.5 C, 26 Cr, bal Fe.
For petroleum and oil refinery equipment; corrosion and heat resistant

NICRAL S
M-104, 0.15 max C, 25 Cr, Si, bal Fe.
Annealed 85,000 TS, 50,000 YS, 30 El; 55 RA; 180 Brin.
For furnace parts and equipment; Type 446; corrosion resistant.

NICRAL S-Cu.
M-104, 0.30 max C, 22 Cr, Cu, bal Fe.
For heat and corrosion resistant parts, heat and corrosion resistant.

NICRAL T
M-104; 0.20 max C, 17 Cr, 13 Ni, W, bal Fe.
For turbo reactor parts, jet engine components; heat resistant, austenitic.

NICRAL V
M-104; 0.55 C, 22 Cr, 36 Ni, Co, Mo, bal Fe.
For furnace parts and equipment; austenitic, corrosion and heat resistant.

NICRAL W
M-104; 0.30 max C, 22 Cr, 12 Ni, W, bal Fe.
For turbo reactors, jet engine components; corrosion and heat resistant.

NICRAL "X."
M-93; 1.0 Ni, 0.5 Cr, 1.0 Cu, 0.5 Mg, bal Al.
Extruded: 35,000 TS; 24,000 YS; 16 El.
Heat treated: 53,000 TS; 43,000 YS; 15.5 El.
For light Al alloy parts, extruded structural shapes; formerly known as Super-Hyblum.

NICRAL X.
M-104; 0.10 max C, 17 Cr, 13 Ni, Mo, bal Fe.
Annealed: 85,000 TS; 35,000 YS; 50 El; 65 RA; 160 Brin.
For acid resistant equipment, Type 316; austenitic, stainless.

NICRAL XD018.
M-93; Al alloy.
For structural shapes.

NICRAL Z.
M-104; 0.15-0.25 C, 14 Cr, 76 Ni, bal Fe.
For thermocouple protection tubes; austenitic, corrosion and heat resistnat.

NICRO 31.
M-111a; 0.15 C, 0.55 Mn, 0.65 Cr, 1.25 Ni, bal Fe.
For gears, crankshafts, camshafts; case hardened.

NICRO 33
M-111a, 0.12 C, 0.55 Mn, 0.75 Cr, 3.0 Ni, bal Fe.
For gears, crankshafts, camshafts; case hardened.

NICRO 34.
M-111a, 0.12 C, 0.55 Mn, 1.25 Cr, 4.5 Ni, bal Fe
For gears, crankshafts, camshafts; case hardened

NICRO 63.
M-111; 0.3 C, 0.6 Mn, 0.75 Cr, 3.5 Ni, bal Fe.
For gears, shafts, bolts, shock resistant.

NICRO 64
M-111, 0.3 C, 0.65 Mn, 1.25 Cr, 4.25 Ni, bal Fe.
For gears, shafts, bolts; shock resistant.

NICRO 71.
M-111; 0.37 C, 0.6 Mn, 0.7 Cr, 1.5 Ni, bal Fe.
For gears, shafts, tough.

NICRO 81
M 111; 0.38 C, 0.8 Mn, 0.8 Cr, 1.25 Ni, bal Fe.
For gears, shafts, tough

NICRO 82
M-111; 0.38 C, 0.55 Mn, 1.15 Cr, 2.6 Ni, bal Fe.
For gears, shafts, oil hardening

NICRO 632.
M-111, 0.3 C, 0.65 Mn, 1 Cr, 3.25 Ni, 0.25 Mo, bal Fe
For gears, shafts, bolts, shock resistant.

NICRO 642
M-111, 0.3 C, 0.5 Mn, 1.25 Cr, 4.25 Ni, 0.25 Mo, bal Fe
For gears, shafts, bolts; shock resistant.

NICROBRAZ 10.
M-963; 0.15 max C, 11 P, bal Ni.
For heat resistant brazing alloy; M.P. 1610°F.

NICROBRAZ 30.
M-963; 0.15 max C, 10 Si, 19 Cr, bal Ni.
For heat resistant brazing alloy; M.P. 1975-2075°F, oxidation resistant to 1800°F

NICROBRAZ 50.
M-963; 13.0 Cr, 10.0 P, bal Ni
Melt: 1630°F, Braze: 1800°-1950°F.
Low melting, free flowing for atmosphere brazing honeycomb structures; used for joining 400 series stainless parts.
Low solubility with base metals; usable with stainless steel cutlery. AWS B Ni-7.

NICROBRAZ-60
M-963; 8 Si, 17 Mn, 0.15 max C, bal Ni.
For heat resistant brazing alloy; M.P. 1850-1890°F.

NICROBRAZ 65.
M-963; 23.0 Mn, 4.5 Cu, 7.0 Si, bal Ni.
Melt: 1800-1850°F; Braze: 1850°-2000°F.
Low melting, free flowing for atmosphere brazing of ferrous, nickel and cobalt alloys.

NICROBRAZ-120.
M-963; 13.5 Cr, 3.5 B, 4.5 Si, 4.5 Fe, 0.8 C, bal Ni.
For heat resistant brazing alloy; M.P. 1760-1875°F.

NICROBRAZ 125
M-963; 0.7 C, 14.0 Cr, 4.5 Si, 4.5 Fe, 3.0 B, bal Ni.
Melt range: 1780°F-1900°F.
Suggested brazing temp.: 2150°F.
For atmosphere brazing stainless steels, nickel and cobalt base high temp. alloys.
Good strength and corrosion resistance.
AMS 4775; AWS B Ni-1.

NICROBRAZ 130.
M-963; 0.06 max C, 3-5 Si, 1.8-3.5 B, bal Ni.
For heat resistant brazing alloy; M.P. 1800-1900°F, free flowing AMS 4778.

NICROBRAZ 135.
M-963, 0.06 max C, 2.0 B, 3.5 Si, bal Ni.
Melt· 1810°-1935°F; Brazing: 1950°-2150°F
For atmosphere brazing stainless and high temperature alloys, wide brazing range, machinable joints, Corrosion resistant.
AMS 4779, AWS B Ni-4

NICROBRAZ 150.
M-963, 0.15 max C, 15 Cr, 3.5 B, bal Ni.
For heat resistant brazing alloy, M P 1930°F, corrosion resistant

NICROBRAZ 160
M-963, 11.0 Cr, 2.25 B, 3.5 Si, 3.5 Fe, 0.5 C, bal Ni
M P 1780-2120°F.
For brazing stainless steels and nickel alloys; bridges wide joints, corrosion and heat resistant.

NICROBRAZ 170.
M-963, 0.55 C, 12 Cr, 2.5 B, 3.5 Si, 3.5 Fe, 16.0 W, bal Ni
High temperature brazing alloy.
Braze temp 2100-2200°F.
For brazing base metals containing cobalt, tungsten and molybdenum for high strength joints at high temperature

NICROBRAZ 171
M 963, 0.40 C, 10.0 Cr, 3.5 Si, 12.0 W, 3.5 Fe, 2.5 B, bal Ni
Melt 1780°-2000°F. Brazing 2100°-2200°F
For atmosphere brazing of high temperature alloys containing cobalt, tungsten and molybdenum
Corrosion resistant, good high temp strength.

NICROBRAZ 180.
M 963; 0.25 C, 5.0 Cr, 3.0 Si, 1.0 Fe, 1.8 B, bal Ni
Melt· 1780°-2160°F, Braze· 2150°-2250°F
For torch brazing wide gap joints in stainless steels and nickel base alloys, Machinable; corrosion and temp. resistant.

NICROBRAZ 200
M-963, 7.0 Cr, 4.5 Si, 6.0 W, 3.0 Fe, 3.2 B, bal Ni.
Melt: 1790°-1900°F; Braze: 1950-2150°F.
For atmosphere brazing on hardenable base metals; high creep and stress rupture strength

NICROBRAZ 210.
M-963; 0.40 C, 19.0 Cr, 17.0 Ni, 8.0 Si, 4.0 W, 0.8 B, bal Co.
Melt: 2025°-2100°F; Braze: 2100°-2250°F.
For atmosphere brazing of cobalt base alloys and similar metals, high temperature strength and low base metal penetration.

NICROBRAZ 220.
M-963; 4.0 Cr, 45.0 Mn, 0.8 B, bal Ni.
Melt. 1852°-1975°F; Braze: 2000°-2150°F.
For atmosphere brazing of high temperature alloys, for rocket thrust chambers and complex heat exchangers. Ductile, usable with any base high melting metal.

NICROBRAZ 230.
M-963; 3.5 Cr, 2.5 Si, 1.0 Fe, 35.0 Mn, 0.9 B, bal Ni
Melt. 1800°-1950°F, Braze: 1950°-2050°F.
For atmosphere brazing high temperature heat exchangers, uses from cryogenic to over 1500°F.

NICROBRAZ 300
M-963, 0.80 C, 21.0 Cr, 3.0 Si, 17.0 Ni, 10.0 W, 3.25 B, bal Ni.
Melt: 1900°-2050°F, Braze 2150°-2250°F.
For atmosphere brazing of T joints or wide gap joints where maximum strength is needed

NICROBRAZ L.C
M-963, 0.15 max C, 13.50 Cr, 5 Si, 3.75 B, 4.5 Fe, bal Ni.
For heat resistant brazing alloy, M P 1780-1970°F, for stainless steels

NICROBRAZ L M
M-963, 0.10 max C, 7.0 Cr, 2.9 B, 4.5 Si, 3.0 Fe, bal Ni
Heat resistant brazing alloy, brazing range 1850-2150°F; corrosion and heat resistant
AMS 4777; BNi-2.

NICROBRAZE STANDARD
M-963; 13.5 Cr, 3.5 B, 4.5 Si, 4.5 Fe, 0.8 C, bal Ni.
For brazing stainless steel and nickel base alloys, melt range 1790-1900°F.

NICROEX
M-35; 0.7 C, 0.8 Cr, 1.25 Ni, 0.35 Mo, bal Fe.
For brake dies; oil hardening

NICROMA 17.
M 1315, 0.22 C, 17 Cr, 1.5 Ni, bal Fe.
Annealed 85,000 TS, 50,000 YS, 30 El, 55 RA, 180 Brin.
For furnace parts, grids, conveyors, corrosion and heat resistant

NICROMA 120
M-1315, 0.10 max C, 12.5 Cr, 12 Ni, bal Fe
For valves, pumps, oil refinery equipment; corrosion and heat resistant

NICROMA 130
M-1315; 0.07 max C, 17 Cr, 4.7 Mo, 13 Ni, bal Fe.
Annealed: 90,000 TS; 40,000 YS; 45 El, 60 RA; 180 Brin.
For acid resistant equipment, Type 317; stainless, austenitic.

NICROMA 150.
M-1315; 0.07 max C, 17.5 Cr, 2 Mo, 17.5 Ni, 2 Cu, Ti = 7 × C, bal Fe.
For valves, pump parts, chemical plant equipment; corrosion and heat resistant.

NICROMAN.
M-275; 1.0 C, 1.25 Cr, bal Fe.
For blanking and forming dies; shock resistant, oil hardened; Type L-6.

NICROMAN.
M-357; 0.7 C, 0.4 Mn, 1.65 Ni, 1.0 Cr, 0.35 Cu, bal Fe
For dies, hobs, taps, shear blades; tough

NICROMAZ-B.
M-104, M-771; C, alloy, bal Fe.
For furnace parts, heat treating boxes; high resistance to carburizing atmosphere.

NICROMAZ C
M-104, 0.08 max C, 20 Cr, 25 Ni, 4 Mo, bal Fe.
For furnace parts and equipment; corrosion and heat resistant

NICROMAZ C
M-771, 0.10 max C, 18-20 Cr, 11-14 Ni, 3-4 Mo, bal Fe
Annealed 85,000-95,000 TS, 35,000-45,000 YS; 60-50 El, 75-60 RA, 150-190 Brin
For acid resistant chemical plant equipment; Type 317; stainless, austenitic

NICROMAZ SPECIAL B.
M-104, M-771, 0.2 max C, 15 Cr, 5 Si, 5 Mo, 1 Mn, bal Fe
For corrosion and heat resistant castings, resists H_2SO_4 and HCl

NICROSIL
Russia, 1.7-2.0 C, 1.8-3.0 Cr, 16-20 Ni, 0.8-1.3 Mn, bal Fe
For furnace equipment; corrosion resistant, cast iron

NICROSIL AL
M 86, 1.8 C, 6.0 Si, 18 Ni, 2 Cr, 1 Mn, bal Fe
36,000 TS 3 El, 110-250 Brin
For furnace grids, generator boxes, annealing pots, heat resistant, does not glow at high temperature; austenitic

NICROSIL AL
M-494, 1.8 C, 5 Si, 18 Ni, 2 Cr, bal Fe
Cast 36,000 TS, 140-200 Brin
For furnace grids, heat treating boxes, corrosion resistant, non-magnetic

NICROSIL AL 5 Cr
England, 2.1 C, 4.9 Si, 0.9 Mn, 22.8 Ni, 4.6 Cr, 0.05 P, bal Fe
For grids, heat resistant, cast iron

NICROTUNG
M 118, 0.08-0.13 C, 0.02-0.08 B, 0.02-0.08 Zr, 11-13 Cr, 9-11 Co, 7.0-8.5 W, 3.75-4.75 Al, 3.75-4.75 Ti, bal Ni
Cast 130,000 TS, 120,000 YS, 5 El; 9 RA, 380 Brin
At 1800°F 67,000 TS, 52,000 YS, 6 El
For missile and rocket engine components, gas turbines, heat resistant to 2000°F

NICUAR 813
M-677, 0.03 C, 0.8 Mn, 0.1 Si, 30.5 Ni, 0.6 Fe. 0.4 Ti, 0.2 Al, bal Cu.
For bare cupro-nickel welding wire, class RCuNi

NICUEND
M-677, 70 Cu, 30 Ni
For welding electrodes, for Cu-Ni alloys.

NICUITE
M-214; 10 Sn, 3.5 Ni, 2.5 Zn, bal Cu.
Cast: 50,000 TS, 25,000 YS, 24 El; 70 Brin.
Heat treated: 95,000 TS; 75,000 YS; 6 El, 160 Brin.
For bearings, worm gears, slippers, slides; heat treatable, heavy loads, slow speeds.

NICULOY.
M-1265, Cu, Ni, Fe.
For master alloy; for making alloys.

NICUSIL-3.
M-1493, 71.15 Ag, 28.10 Cu, 0.75 Ni.
M.P 1436-1463°F.
For brazing
Good wetting and filleting.

NICU STEEL.
Eng; 2.2 Ni, 0.6 Mn, 0.5 Cu, 0.3 C, bal Fe.
For machinery parts, structural work; oil hardening.

Ni-Fe 30
M-210, 30 Ni, bal Fe.
For shunts in electrical equipment
Temperature compensating alloy.
Low coefficient expansion, high permeability.

NIFER
M-926; low C-steel clad on both sides with Ni.
For electron tubes

NIGY.
M-104, 0.10 C, 0.5-1 Mn, 2-3 Si, bal Ni
For spark plugs; heat and corrosion resistant.

NI-HARD
M-460, 4.5 Ni, 1.5 Cr, 1.5 Mn, 2.75-3.75 C, bal Fe
Chilled 600-750 Brin
For abrasion resisting applications, crushers, rolls, feeder vanes; cast iron, abrasion resisting, formerly "Super Manga Iron"

NI-HARD
M-494, 3 C, 3.5-4.5 Ni, 1.5 Cr, bal Fe.
Cast 40,000 TS, 500-650 Brin.
For castings, abrasion resisting

NI-HARD, TYPE 1.
M-176, M-68, 4.2-4.7 Ni, 3.0-3.60 C, 1.4-2.5 Cr, 0.5 Si, 0.3-0.7 Mn, bal Fe.
Cast 40,000-50,000 TS, 550-650 Brin
Chilled 80,000 TS, 700 Brin.
For die casting pots, pump plungers, roller bearing races, chilled rolls and liners, corrosion and wear resistant, tough.

NI-HARD TYPE 2.
M-68, 2.9 max T.C., 0.5-0.8 Si, 0.4-0.6 Mn, 4.25-4.75 Ni, 1.4-2.5 Cr, bal Fe
Cast 45,000-55,000 TS, 525-565 Brin
For ball mill liners, crushers, pump parts; abrasion and corrosion resistant

NI-HARD Type 3
M-68; 1.0-1.6 C, 0.4-0.7 Si, 0.4-0.7 Mn, 4.0-4.75 Ni, 1.4-1.6 Cr, bal Fe
Sand Cast 75,000-125,000 TS; 350-500 Brin.
Chill cast 90,000-140,000 TS, 300-600 Brin
For jaw crushers, grinding balls, mill liners, slurry pumps. Wear resistant, tough.

NI-HARD Type 4.
M-68, 3.0-3.6 T.C., 0.1 max G.C., 1.5-2.0 Si, 0.4-0.7 Mn, 5.5-6.5 Ni, 7.0-10.0 Cr, bal Fe
Sand Cast: 75,000-85,000 TS; 5000-6000 Tr.S., 0.08-0.11 def., 580 min D.P.N.
For jaw crushers, hammer mills, grinding balls, mill liners.
Wear resistant martensitic white iron with improved resistance to fracture under impact.

Ni-HTC.
M-897; 0.04 Fe, 99.9 Ni.
For heating elements; useful operating temperature to 100°C.

NIKA
Japan; Pb, Sn, bal Cu.
For bearings; tough and non-corrosive.

NIKALIUM.
M-179; Al, bal Cu.
Rolled: 94,000 TS; 36,000 YS; 10 El; 180 Brin
For gears, ship propellers; corrosion and wear resistant, tough.

NIKE-3.
M-1449; 0.10 max C, 18 Cr, 8 Ni, bal Fe.
Annealed: 80,000 TS; 35,000 YS; 55 El; 75 RA; 150 Brin.
For chemical plant equipment, tanks, mixers, filters; Type 302; stainless, austenitic.

NIKE-B.
M-1449; 0.08 max C, 18 Cr, 8 Ni, Ti, bal Fe.
Annealed. 85,000 TS; 35,000 YS; 55 El, 65 RA; 150 Brin.
For welded chemical plant equipment, tanks, vessels, Type 321; stainless, austenitic.

NIKE-M.
M-1449; 0.12 max C, 18 Cr, 10 Ni, 2.5 Mo, bal Fe
Annealed 85,000 TS; 35,000 YS; 50 El, 65 RA, 160 Brin.
For acid resistant chemical plant equipment, mixers, tanks; Type 316, stainless, austenitic.

NIKON.
M-1277, 3.3 C, 0.7 Mn, 2.2 Si, bal Fe
For machinery castings; cast iron

NIKRO M.
M-115, 0.55-0.75 C, 1.4 Ni, 0.85 Cr, 0.4 Mo, bal Fe.
Heat treated 290,000 TS.
For collets, races, arbors, gears.

NIKROME M
M-240, 0.38-0.43 C, 0.7-0.9 Cr, 1.65-2.00 Ni, 0.2-0.3 Mo, bal Fe.
Heat treated: 110,000 TS; 90,000 YS; 16 El; 47 RA, 302 Brin
For heavy duty shafts, pins, axles; heat treated bars

NIKROTHAL
M-1150; 20 Cr, 3 Al, 3 Fe, bal Ni
For heating elements, high heat resistance

NIKROTHAL-2.
M-70, M-1150, 20 Ni, 25 Cr, bal Fe
Resistivity 570 ohms/cmf.
For unsupported heating elements
Max operating temperature 1920°F.

NIKROTHAL-4.
M-1150, 35 Ni, 20 Cr, bal Fe.
Elect resistivity 600 ohms/cmf.
For unsupported heating elements, resistors and potentiometers
Max operating temperature 2000°F.

NIKROTHAL-6.
M-70, M-1150; 16 Cr, 60 Ni, bal Fe.
Annealed: 90,000-200,000 TS, 40,000-50,000 YS; 22-33 El.
For resistors, heating elements; high electrical resistance, max operating temperature 1800°F.

NIKROTHAL-8.
M-70, M-1150; 20 Cr, bal Ni.
Annealed: 95,000-200,000 TS; 40,000-50,000 YS; 22-33 El.
For resistors, heating elements; high electrical resistance, max operating temperature 2100°F

NIKROTHAL-L.
M-70, M-1150; 17 Cr, Si, Mn, 75 Ni.
Annealed: 156,000-200,000 TS; 10-28 El.
For resistors, potentiometers; high electrical resistance.

NIKROTHAL-LX.
M-70, M-1150; 20 Cr, 5 additives, 75 Ni
Wire: 155,000-200,000 TS; 5-25 El.
Elect resistivity 800 ohms/cmf.
For rheostats, resistors, potentiometers, electric appliances, precision and vitreous enamel resistors.
High electrical resistivity, low temperature coefficient. Max. operating temperature 572°F.

NILCOR.
M-1470; Ni alloy.
For springs; non-magnetic.

NILGRO 36.
M-487; 36 Ni, bal Fe.
For thermostats; controlled expansion

NILGRO 42
M-487; 42 Ni, bal Fe.
For thermostats; controlled expansion.

NILO 36
M-121; 36 Ni, bal Fe.
Annealed: 70,000 TS, 24,000 YS; 36 El; 68 RA; 143 Brin.
For thermostats, glass-to-metal seals; controlled expansion.

NILO 40.
M-86, M-121, 40 Ni, 60 Fe
For glass to metal seals, thermostats, controlled coefficient of expansion.

NILO 42.
M-121; 42 Ni, bal Fe.
Annealed. 78,000 TS, 41,000 YS, 45 El; 73 RA; 143 Brin.
For thermostats, bimetals; controlled low expansion.

NILO 48.
M-121; 48 Ni, bal Fe
For thermostats, glass to metal seals, instrument components Controlled and low coefficient of expansion.

NILO 50
M-86, M-121; 50 Ni, 50 Fe.
For glass to metal seals, thermostats, controlled coefficient of expansion.

NILO 475.
M-86, M-121; 47 Ni, 5 Cr, bal Fe
For glass to metal seals, thermostats; controlled coefficient of expansion

NILO 501.
M-121, 50 Ni, bal Fe
For glass to metal seals; controlled expansion.

NILO K
M-121; 29 Ni, 17 Co, bal Fe.
Annealed: 77,200 TS; 54,000 YS, 41 El; 72 RA; 170 Brin.
For glass to metal seals, expansion of medium hard glass.

NILOMAG 471.
M-121; 47 Ni, 3 Mo, bal Fe.
For transformers, alternators; soft magnet for low power losses.

NILOMAG 641.
M-121; 64.3 Ni, 34.7 Fe, 1.0 Mo
For magnetic amplifiers, pulse transformers; soft magnet, domain oriented.

NILOMAG 771.
M-121; 77 Ni, 14 Fe, 5 Cu, 4 Mo.
For cores for telephone transformers, magnetic amplifiers; soft magnet, high permeability.

NILOMAG 772.
M-121; 77 Ni, 14 Fe, 5.5 Cu, 3.5 Mo.
For cores for telephone transformers, magnetic amplifiers, soft magnet, high permeability.

NILOMAG 800.
M-121; 80.5 Ni, 15.5 Fe, 4 Mo.
For cores in logical type circuits, fast switching alloy.

NILOMAG 801.
M-121, 80 Ni, 8 Fe, 12 Mo
For computer work for storage applications, fast switching alloy, soft magnet.

NILOY 48
M-121, 48 Ni, bal Fe
Annealed 50,000 TS; 33,000 YS, 46 El; 67 RA; 143 Brin
For thermostats, bimetals, controlled low expansion.

NILSTAIN 302
M-61, 18-20 Cr, 8-10 Ni, 0.20 C, 2 Mn, bal Fe.
Rolled 85,000 TS; 35,000 YS; 5 El; 9 RA; 140 Brin
For stainless parts, springs, corrosion resistant.

NILSTAIN 304
M-61, 8-10 Ni, 18-20 Cr, 0.08 max C, 2.0 max Mn, bal Fe
Rolled 85,000-250,000 TS; 35,000-200,000 YS, 60-5 El, 70-55 RA, 140-455 Brin
For springs, screws, bolts, stainless wire.

NILSTAIN 305
M-61, 0.12 max C, 17-19 Cr, 10-13 Ni, bal Fe
Annealed 85,000 TS, 38,000 YS, 50 El, 150 Brin
For cold headed parts; corrosion resistant, austenitic

NILSTAIN 308
M-61, 10-12 Ni, 19-22 Cr, 0.08 C, bal Fe
Rolled 85,000-350,000 TS, 35,000-300,000 YS; 60-55 El, 70 55 RA, 140-400 Brin
For weaving wire, bolts, nuts, screws, stainless

NILSTAIN 309
M-61, 12-14 Ni, 22 26 Cr, 0.2 max C, bal Fe
Rolled 100,000-225,000 TS, 52,000-150,000 YS; 75-5 El, 60-50 RA, 160-400 Brin
For weaving wire, heat resisting baskets, heat resistant

NILSTAIN 309 Cb
M-61, 13-15 Ni, 23-25 Cr, 1.5-2.0 Mn, 0.07 max C, Cb = 15 × C, bal Fe
For welding wire; stainless.

NILSTAIN 310
M 61, 19-22 Ni, 24 Cr, 0.25 max C, bal Fe
Cold drawn· 105,000 TS; 50,000 YS; 50 El; 55 RA, 165 Brin
For welding wire, furnace parts, heat resistant.

NILSTAIN 314.
M-61; 25 Cr, 20 Ni, 1.5-3.0 Si, bal Fe.
Annealed. 85,000 TS; 40,000 YS, 40 El.
For wire belts, resists carburizing atmosphere.

NILSTAIN 316.
M-61; 14 max Ni, 16-18 Cr, 2-3 Mo, 0.10 max C, bal Fe
Cold drawn· 95,000 TS; 45,000 YS; 55 El; 75 RA; 185 Brin
For welding wire, weaving wire; stainless.

NILSTAIN 317.
M-61; 14 max Ni, 18-20 Cr, 3-4 Mo, 0.10 max C, bal Fe.
Cold drawn: 95,000 TS; 45,000 TS; 55 El; 75 RA; 185-300 Brin.
For weaving wire; heat resistant.

NILSTAIN 321.
M-61; 0.12 max C, 18 Cr, 8 Ni, Ti, bal Fe.
Annealed: 80,000 TS; 30,000 YS; 50 El; 150 Brin.
For chemical plant equipment; stainless, resists intergranular corrosion.

NILSTAIN 325.
M-61; 19-23 Ni, 7-10 Cr, 1.0-1.5 Cu, 0.25 max C, bal Fe.
Cold drawn: 90,000 TS; 50,000 YS; 30-40 El; 45-55 RA; 160-190 Brin.
For corrosion resisting parts; corrosion resistant.

NILSTAIN 330.
M-61; 33-36 Ni, 14-16 Cr, 0.25 max C, bal Fe.
Cold drawn: 75,000 TS; 15-25 El.
For heat resisting parts; heat resistant.

NILSTAIN 347.
M-61; 17-20 Cr, 8-12 Ni, 0.10 max C, Cb = 10 × C, bal Fe.
Cold drawn: 85,000 TS; 35,000 YS; 55-60 El; 65-75 RA; 130-300 Brin.
For welding wire; corrosion resistant.

NILSTAIN 416.
M-61; 23-30 Cr, 0.35 max C, bal Fe.
Cold drawn: 85,000 TS; 60,000 YS; 20-30 El; 40-50 RA; 160-200 Brin.
For glass sealing wire; heat resistant.

NILSTAIN 430.
M-61; 14-18 Cr, 0 12 max C, bal Fe.
Cold drawn: 75,000-100,000 TS; 50,000-90,000 YS; 35-10 El; 75-60 RA; 140-250 Brin.
For instruments, corrosion resistant.

NILSTAIN C-20.
M-61; 0.07 max C, 20 Cr, 29 Ni, 2 Mo, 3 Cu, bal Fe.
Annealed: 85,000 TS; 35,000 YS; 35-50 El; 50-70 RA, 150-180 Brin.
For chemical plant equipment; stainless, resists H_2SO_4.

NILSTAIN X.
M-61; 7-9 Ni, 17-19 Cr, 1.5-3.0 Cu, 4-6 Mn, C, bal Fe.
Rolled: 80,000 TS; 50 El.
For lock washers, cold heading parts; non-magnetic; stainless.

NILVAR
M-44; 36 Ni, bal Fe.
Wrought: 150,000-70,000 TS.
For bimetals, measuring tapes, length standards, thermostats; low expansion alloy; maximum operating temperature 200°C.

NIMAR 110.
M-1724; 0 02 C, 0 10 Si, 0.10 Mn, 17.0-19 0 Ni, 7.0-8.5 Co, 4.6-5.1 Mo, 0.40-0.60 Ti, 0.05-015 Al, bal Fe.
Maraging steel, 1½ in. bar, as hardened: 266,000 TS; 256,000 YS; 6-12 El.
For parts requiring high strength.

NIMAR 125.
M-50, M-1724; 0.02 C, 0.10 Si, 0.10 Mn, *17.0-19.0 Ni, 8.5-9.5 Co, 4.7-5.2 Mo, 0.6-0.8 Ti,* 0.5-0.15 Al, bal Fe.
Maraging steel, 3 in. bar, hardened: 294,000 TS; 282,000 YS; 5-12 El.
For parts requiring very high strength

NIMAR 700.
M-677; 0.02 C, 0.06 Mn, 0.06 Si, 18.2 Ni, 4.8 Mo, 0.6 Ti, 0.1 Al, 9.8 Co, bal Fe.
For bare welding wire; maraging steel grade 250, for gas metal-arc welding.

NIMAR 701.
M-677; 0.02 C, 0.06 Mn, 0.06 Si, 18.2 Ni, 4.8 Mo, 1.0 Ti, 0.1 Al, 9.8 Co, bal Fe.
For bare welding wire; maraging steel grade 250, for submerged arc welding.

NIMARK-I.
M-32; 0.03 C, 18 5 Ni, 7.5 Co, 4.85 Mo, 0.4 Ti, 0.10 Al, 0.003 B, 0.01 Zr, bal Fe.
Solution Annealed: 142,000 TS; 97,000 YS; 18% El; 76% RA; Rock C 29.
Aged: 271,000 TS; 264,000 YS; 8% El; 42% RA; Rock C 49.
For missile and rocket components.
Vacuum melted, weldable, good ductility at high strength levels. Maraging steel.

NIMARK-II.
M-32; 0.03 C, 20.0 Ni, 1.45 Ti, 0.25 Al, 0.003 B, 0.01 Zr, 0.50 Cb, bal Fe.
Solution Annealed: 162,000 TS; 123,000 YS; 16 El; 74 RA; Rock C 31.
Aged: 280,000 TS; 267,000 YS; 13 El; 58 RA; Rock C 52.
For missile and rocket components.
Vacuum melted, maraging steel.
Good ductility at high strength levels.

NIMARK 300.
M-32, 0.3 max C, 18-19 Ni, 4.9 Mo, 8.7 Co, 0.7 Ti, 0.1 Al, Zr, B, bal Fe.
Ht. Tr.: 289,000 TS; 285,000 YS; 11 El; 58 RA; Rock C 52.
At 1000°F: 168,000 TS
For high strength, shock resisting applications, jet engine and missile components.
Vacuum melted maraging steel, notch-tough.

NIMEND.
M-677; 0.1-0.15 C, 14-18 Cr, 4-5 W, 15-18 Mo, 5.3 Fe, bal Ni.
Welded: 20-25 Rc; Aged 50 hrs at 1475°F: 38-40 Rc.
For hardfacing electrodes; similar to Hastelloy C.

NIMO.
M-40; 0.5-0.6 C, 0.3-0.5 Cr, 0.10-0.15 V, 0 4-0.5 Mo, 2 5-2.8 Ni, bal Fe.
For tools dies; oil hardening.

Ni-MoC.
M-1119, 16 Cr, 17 Mo, 7 Fe, 4 W, bal Ni.
For valves, pumps, pharmaceutical and chemical plant equipment.
Heat and corrosion resistant.

NIMOCAST 75.
M-1485, M-121; 0.1 C, 20 Cr, 5 max Fe, 0.4 Ti, 0.2 Al, bal Ni.
Cast: 75,000 TS; 29,400 YS; 34.8 El; 164 Brin.
Heat treated: 81,500 TS; 27,500 YS; 40.5 El; 172 Brin.
For high temperature applications, high oxidation resistance.

NIMOCAST 80.
M-121; 0.05 C, 20 Cr, 5 max Fe, 2.4 Ti, 1.2 Al, bal Ni.
Cast· 72,000 TS; 66,700 YS; 3 El; 253 Brin
Heat treated: 111,600 TS; 78,000 YS; 14 El; 270 Brin.
For high temperature applications; high creep resistance to 750°C.

NIMOCAST 90.
M-1485, M-121; 0.1 C, 16 Co, 5 max Fe, 2.4 Ti, 1.2 Al, 20 Cr, bal Ni.
Cast: 92,800 TS; 72,700 YS; 8.1 El; 280 Brin.
Heat treated: 106,000 TS; 79,600 YS; 12.6 El; 291 Brin.
For high temperature applications; high creep resistance to 870°C.

NIMOCAST 235D.
M-86, M-121; 14-17 Cr, 4.5-6.0 Mo, 3.5-5.0 Fe, 3.25-4.0 Al, 2.0-3.0 Ti, 5.6-6.5 Al + Ti, 0 3 max Si, 0.10-0.20 C, 0.10 max Mn, 0.05-0 10 B, bal Ni.
At 1200°F: 83,400 Fatigue St.
At 1650°F: 65,000 Fatigue St
For jet engine and aerospace equipment and parts.
High heat and corrosion resistance

NIMOCAST 242.
M-121; 0 3 C, 10 Co, 20 Cr, 0.3 max Ti, 0.2 max Al, 10 Mo, bal Ni
Cast: 70,000 TS; 43,000 YS; 8 El; 220 Brin
For high temperature applications; high resistance to thermal shock

NIMOCAST 257
M-1485, M-121; 0.8 C, 16 Co, 20 Cr, 2 max Fe, 1.6 Ti, 0 9 Al, bal Ni.
Cast.
For gas turbine engine rings; good properties to 650°C.

NIMOCAST 258.
M-121, 0.2 C, 10 Cr, 20 Co, 2 max Fe, 3.7 Ti, 4.8 Al, 5 Mo, bal Ni.
Cast: 122,000 TS; 114,000 YS; 3 4 El; 375 Brin.
Heat treated: 117,400 TS, 110,000 YS; 4 5 El; 383 Brin.
High heat and oxidation resistant, creep resistant, for turbine blades, jet engine and missile components.

NIMOCAST 713
M-86, M-121, 14 Cr, 4 5 Mo, 1 Ti, 6 Al, 2 Cb + Ta, 1 5 max Fe, bal Ni
For gas turbine stator and rotor blades,
Creep resistant for service to 1000°C

NIMOCAST 713V.
M-121, M-86, 14 Cr, 6 5 Al, 4 5 Mo, 2 Cb, 1 Ti, 0 12 C, 0 1 Zr, 0 01 B, bal Ni
For aircraft gas turbine rotor blades, jet engine components
High temperature alloy Heat and corrosion resistant

NIMOCAST-C 242.
M-86, M-121, 0 3 C, 0 3 Si, 0 3 Mn, 20 Cr, 10 Co, 1 max Fe, 0 3 max Ti, 0 2 max Al, 10 Mo, bal Ni.
Cast. 69,700 TS; 43,000 YS; 8 El, 220 DPN.
For high temperature cast components, turbine nozzle guide vanes.
High resistance to thermal shock
High corrosion and heat resistant castings.

NIMOCAST-MC 57.
M-86, M-121; 0.08 C, 0 4 Si, 0.3 Mn, 20 Cr, 16 Co, 2 max Fe, 1.6 Ti, 0.9 Al, bal Ni.
Ht. Tr.: 100'000 TS; 65,000 YS; 16 El.
For high temperature cast components, gas turbine engine rings, jet engine parts.
Cast high temperature alloy.
Good combination of yield strength and ductility at 650°C. Heat treatable.

NIMOCAST-MC 58.
M-86, M-121; 0.2 C, 0.4 Mn, 0.4 Si, 10 Cr, 20 Co, 2 max Fe, 3 7 Ti, 4.8 Al, 5 Mo, bal Ni
Ht. Tr.: 117,500 TS, 110,000 YS; 4.5 El; 383 DPN.
Cast: 122,000 TS; 114,000 YS; 3.4 El; 375 DPN.
For high temperature cast components, turbine and jet engine components.
Good creep resistance up to 1000°C.
Casting alloy, good castability Heat treatable.

NIMOCAST-PD 16.
M-121; 11 W, 6 Cr, 6 Al, 2 Mo, 1.5 Cb, 0 12 Zr, 0 12 C, 0 02 B, bal Ni
For investment cast rotors and stators, gas turbine blades
High temperature casting alloy, heat and corrosion resistant

NIMOCAST PE 10
M-121, M-86, 20 Cr, 6 Mo, 2 5 W, 6 5 Cb + Ta, bal Ni.
For turbo-charger rotors, gas turbine components, diesel engine pre-combustion chambers.
Creep resistant for service to 870°C, oxidation and corrosion resistant

NIMOCAST PK 24
M-86, M-121, 0 18 C, 15 Co, 10 Cr, 3 Mo, 5 2 Ti, B, Zr, 5 6 Al, bal Ni
For gas turbines, engines, turbine-stator blades, turbocharger rotors
High temperature characteristics for max service about 1040°C

NIMOCAST PK 36
M-121, 10 Cr, 10 Co, 5 Ti, 5 Al, 4 Mo, 0 12 Zr, 0 1 C, 0 015 B, bal Ni
For jet engine and gas turbine components
Heat and corrosion resistant
High temperature casting alloy

NIMOL
M-68, M-86, 75 cast iron, up to 14 Cr, 14 Ni, 6 Cu
20,000 27,000 TS, 2 5 1 5 El, 120-240 Brin
For retorts for fuel carbonization, pump and engine liners, pans for fusing caustic alkalis; superseded by Ni-Resist

NIMONIC
M-86, 20 Cr, 2 Ti, 2 Al, bal Ni
For high temperature applications, heat resistant

NIMONIC 58
M-86, M-121, 11 Cr, 5 Mo. 20 Co, 5 Al, 2 Ti, bal Ni
Cast 123,000 TS, 114,000 YS, 3 4 El, 375 DPN.
For high temperature castings, jet engine and gas turbine parts
Heat and corrosion resistant
High creep and rupture strength

NIMONIC 75
M-86, M-121, 0 08-0 15 C, 0 2-0 6 Ti, 18-21 Cr, 1 0 max Si, 1 0 max Mn, 0 5 max Cu, 5-11 Fe, bal Ni + Co
Solution treated 103,000-96,000 TS, 60,000 YS; 50 El; 50 RA
For combustion chambers, turbines, age-hardenable, good resistance to creep and oxidation

NIMONIC 75 F
M-86, M-121, 0.08-0 15 C, 0 2-0.6 Ti, 18-21 Cr, 1 0 max Si, 1.0 max Mn, 0 5 max Cu, 5-11 Fe, bal Ni + Co
For turbines, combustion chambers, heat resistant, age-hardenable, creep and oxidation resistant.

NIMONIC 80.
M-86, M-121; 0.04 C, 0.47 Si, 75 Ni, 21 Cr, 0.56 Mn, 2.45 Ti, 0.63 Al.
Heat treated: 147,000 TS; 41 El; 35 RA; 350 Brin.
At 20°C: 132,000 TS; 80,000 YS; 45 El; 36 RA.
At 800°C: 63,000 TS; 53,000 YS, 8 El, 10 RA.
For rotor blades, gas turbine engines; high creep resistance, age-hardenable.

NIMONIC 80A.
M-86, M-121; 0.04 C, 21 Cr, 0.6 Mn, 2.5 Ti, 0.7 Al, bal Ni.
At 20°C: 132,000 TS; 80,000 YS; 45 El; 36 RA.
At 800°C: 62,000 TS; 53,000 YS, 8 El; 10 RA.
For gas turbine blades; high creep resistant.

NIMONIC 90.
M-86, 0.10 C, 1.5 max Si, 1 max Mn, 0.8-1.8 Al, 5 max Fe, 1.8-2.7 Ti, 18-21 Cr, 15-21 Co, bal Ni.
At 20°C. 155,000 TS, 90,000 YS, 39 El; 20 RA.
At 800°C 78,000 TS; 57,000 YS, 7 El, 4 RA
For jet engine parts; high heat resistant, heat treatable.

NIMONIC 90
M-121, 0.1 max C, 0.8-1.8 Al, 1.8-3.0 Ti, 5 max Fe, 15-21 Co, 18-21 Cr, bal Ni
At 20°C: 166,000 TS, 101,000 YS; 39 El; 20 RA.
At 600°C 132,000 TS; 90,000 YS, 26 El; 21 RA.
At 800°C: 85,000 TS; 63,000 YS, 7 El; 4 RA.
For turbine blades, combustion chambers, rotor dies, age hardened, super heat and creep resistance

NIMONIC 93.
M-86, M-121; 0.10 C, 19.5 Cr, 2.75 Ti, 1.5 Al, 18 Co, 0.3 max Mo, 0.08 Zr, 0.008 B, bal Ni
Heat treated 185,000 TS, 120,000 YS; 28 El; 41 RA
At 600°C 160,000 TS; 105,000 YS; 24 El; 23 RA.
For jet engine and gas turbine components
Age hardenable, heat and oxidation resistant

NIMONIC 95
M-121; 18-21 Cr, 15-21 Co, 0.15 max C, 1.4-2.5 Al, 5 Fe, 4 Ti, bal Ni.
At 20°C· 184,000 TS, 25 El, 24 RA, 290 Brin
At 800°C· 89,600 TS; 5 El; 6 RA; 360 Brin.
For gas turbine rotor blades; age hardened, creep resistant

NIMONIC 100
M-86, M-121, 11 Cr, 5 Mo, 20 Co, 1.5 Ti, 5 Al, bal Ni
Heat treated 320-400 Brin
For gas turbine rotor blades; creep resistant to 1000°C.

NIMONIC 105.
M-121; 15 Cr, 20 Co, 5 Mo, 4.5 Al, 1.4 Ti, 0.15 C, bal Ni.
At 20°C: 144,000 TS; 116,000 YS; 7 El; 7 RA.
At 800°C· 107,000 TS; 78,500 YS; 16 El; 17 RA.
For gas turbine components, jet engines, combustion chambers. Corrosion and heat resistance.

NIMONIC 110.
M-121, M-86, 0.15 C, 15 Cr, 20 Co, 1.75 Ti, 5.75 Al, 5.0 Mo, bal Ni.
Hot Rolled: 180,000 TS; 124,000 YS; 18 El; 17 RA.
At 800°F: 113,500 TS, 84,000 YS; 37 El; 35 RA.
For high temperature applications, aircraft gas turbines, high temperature fasteners, gas turbine blades.
Creep and high oxidation resistance.

NIMONIC 115.
M-121; 0.15 C, 15 Cr, 20 Co, 5 Mo, 4 Al, bal Ni.
For gas turbine engine blades; high creep and rupture strength at high temperature.

NIMONIC 118.
M-86, M-121; 0.16 C, 15 Cr, 3.85 Ti, 4.8 Al, 14.9 Co, 3.5 Mo, 0.045 Zr, 0.016 B, 0.7 max Fe, 0.5 max Mn, bal Ni.
Heat treated· 170,000 TS; 125,000 YS, 29 El, 45 RA.
At 600°C: 150,000 TS; 110,000 YS; 25 El; 34 RA.
For gas turbine and jet engine components, missiles, aircraft.
Age-hardenable, heat and oxidation resistant.

NIMONIC B.
M-86, 0.1 max C, 1.8-2.7 Ti, 0.8-1.8 Al, 5 max Fe, 15-21 Co, 18-21 Cr, bal Ni.
Rolled: 160,000 TS; 90,000 YS, 39 El, 20 RA.
At 1500°F: 76,000 TS; 56,000 YS; 7 El, 4 RA.
For turbine gland springs; heat resistant, heat treatable.

NIMONIC C.
M-86, 0.5-1.8 Al, 1.8-2.7 Ti, 18-21 Cr, bal Ni
At 20°C. 134,000 TS; 80,000 YS; 45 El; 36 RA.
At 800°C· 64,000 TS; 54,000 YS, 8 El; 10 RA.
For heat exchangers, valves, valve inserts, gas turbine parts, heat and corrosion resistant.

NIMONIC C75
M-86, M-121; 0.08-0.15 C, 5 max Fe, 0.2-0.6 Ti, 18-21 Cr, 0.5-max Cu, 0.2 Al, bal Ni.
Cast 74,500 TS, 30,000 YS, 35 El; 164 DPN
Ht Tr 82,000 TS; 28,000 YS, 41 El, 172 DPN.
For furnace trays, gas turbine parts, combustion chambers, jet engine components.
Resists scaling and thermal shock.
Heat and corrosion resistant

NIMONIC C242.
M-86, M-121, 0.3 C, 20 Cr, 10 Co, 10 Mo, 1 max Fe, bal Ni.
Cast 70,000 TS, 44,000 YP; 8 El, 220 DPN
For high temperature castings, nozzle guide vanes, jet engine and gas turbine parts
Heat and corrosion resistant
High resistance to creep and thermal shock

NIMONIC ALLOY C263
M-86, M-121, 0.03 C, 20 Cr, 2.15 Ti, 0.45 Al, 20 Co, 5.9 Mo, 0.02 max Zr, 0.001 max B, 0.007 max S, bal Ni.
Heat treated· 146,000 TS, 90,000 YS, 45 El, 42 RA.
At 600°C 120,000 TS; 70,000 YS; 44 El; 50 RA.
For jet engine and gas turbine components, missiles
Age-hardenable, heat and oxidation resistant.

NIMONIC-CB
M-86, 1.8-2.7 Ti, 0.8-1.8 Al, 5 max Fe, 15-21 Co, 18-21 Cr, bal Ni
Ht Tr 106,000 TS, 80,000 YS, 13 El, 290 DPN.
For gas turbine rotor blades
High creep and oxidation resistant Cast alloy.

NIMONIC C.C.
M-86, M-121: 0.10 max C, 0.5-1.8 Al, 5 max Fe, 1.8-2.7 Ti, 18-21 Cr, 2 max Co, bal Ni
Ht. Tr.: 112,000 TS, 80,000 YS, 14 El; 270 DPN.
For gas engine and jet engine and gas turbine components.
High creep resistance to 900°C
Cast alloy, oxidation resistant

NIMONIC CF.
M-86, 0.08-0.15 C, 0.2-0.6 Ti, 5-11 Fe, 8-21 Cr, bal Ni.
For jet engine components; cast alloy.

NIMONIC D.
M-86, M-121; 37 Ni, 18 Cr, 2 Si, bal Fe.
At 70°F: 94,000 TS; 48,000 YS; 38 El; 50 RA.
At 2000°F: 10,000 TS; 124 El; 83 RA.
For gas turbine parts, impulse blades;
heat resistant.

NIMONIC DS.
M-121; 0.15 max C, 17-19 Cr, 2.0-2.5 Si, 1.2 Mn, 36-39 Ni, bal Fe.
At 20°C: 105,300 TS; 38 El; 50 RA.
At 800°C: 23,500 TS; 93 El; 71 RA.
At 1000°C: 12,400 TS; 124 El; 83 RA.
For woven furnace belts, radiant tubes,
heat treat equipment; oxidation resistant to 950°C.

NIMONIC DT.
M-121; Ni alloy.
For high temperature applications;
heat resistant.

NIMONIC F.
M-86; 0.08-0.15 C, 0.2-0.6 Ti, 5-11 Fe, 18-21 Cr, bal Ni.
For gas turbine flame tube;
oxidation and heat resistant.

NIMONIC M4VC.
M-121; nickel alloy.
For high temperature applications;
high temperature resistance.

NIMONIC M6VC.
M-121; nickel alloy.
For high temperature applications;
high temperature resistance.

NIMONIC M14V.
M-121; nickel alloy.
For high temperature applications;
corrosion and heat resistant.

NIMONIC M15V.
M-121; nickel alloy.
For high temperature applications;
corrosion and heat resistant.

NIMONIC M17V.
M-121; nickel alloy.
For high temperature applications;
corrosion and heat resistant.

NIMONIC MC 57.
M-86, M-121; 0.08 C, 16 Co, 20 Cr, 0.9 Al, 1.6 Ti, bal Ni.
Ht. Tr.: 180,000 TS; 65,000 YS; 16 El.
For high temperature castings,
gas turbine components.
Heat and corrosion resistant.
Good properties to 650°C.

NIMONIC PE 7.
M-86, M-121; 0.1 C, 18 Cr, 5 Mo, 37 Ni, 2.0 max Co, 1.2 Ti, 1.2 Al, bal Fe.
For power generating equipment, gas turbines,
steam plants, casings and compressors.
Creep and high temperature resistance.
For service up to 580°C.

NIMONIC PE 11.
M-86, M-121; 18 Cr, 5.2 Mo, 2.3 Ti, 0.8 Al, 38 Ni, bal Fe.
Heat Treated: 160.000 TS; 100,000 YS; 21 El; 35 RA.
At 600°C: 140,000 TS; 100,000 YS; 23 El; 34 RA.
For gas turbine thrust reversers, noise suppressors,
jet pipes.
Creep resistant. Heat and corrosion resistant;
age-hardenable.

NIMONIC PE 13.
M-86, M-121; 0.05-0.15 C, 20.5-23.0 Cr, 17.0-20.0 Fe, 0.5-2.5 Co, 8.0-10.0 Mo, 0.2-1.0 W, bal Ni.
Annealed: 116,500 TS; 51,500 YS; 43 El; 200 VPN.
At 1000°C; 20,200 TS; 13,500 YS; 44 El.
For elevated temperature applications, missile and jet engine components, furnace parts.
High temperature, heat resistant.

NIMONIC PE 16.
M-86, M-121; 16.5 Cr, 2.0 max Co, 3.2 Mo, 1.2 Ti, 1.2 Al, 43.5 Ni, bal Fe.
Heat Treated: 121,000 TS; 65,000 YS; 29 El.
At 600°C· 99,000 TS; 54,000 YS; 30 El.
For gas turbine compressor delivery casings,
turbine casings.
Creep and oxidation resistant for service up to 750°C., age-hardenable.

NIMONIC PK 25.
M-86, M-121; 19 Cr, 18 Co, 4.2 Mo, 3 Ti, 2.7 Al, bal Ni.
Heat Treated: 197,000 TS; 18 El; 22 RA.
At 1400°F: 155,000 TS; 20 El; 28 RA
For gas turbine blades and other components,
bolts, valves, jet engine components.
Creep and heat resistant to 940°C.

NIMONIC PK 31.
M-86, M-121; 14 Co, 0.06 C, 20 Cr, 4 5 Mo, 2 3 Ti, 0 6 Al, 5.0 Cb, bal Ni.
Heat Treated· 190,000 TS, 140,000 YS; 25 El; 34 RA.
At 600°C: 160,000 TS; 120,000 YS, 25 El; 34 RA
For rotor discs in gas turbines,
jet engine and missile components.
High tensile strength and creep resistant
High oxidation and corrosion resistance.

NIMONIC PK 33
M-86, M-121; 14 Co, 0.05 C, 19 Cr, 7 5 Mo, 2 0 Ti, 2 0 Al, bal Ni.
Heat Treated 165,000 TS, 95,000 YS, 33 El; 41 RA.
At 600°C 140,000 TS, 88,000 YS; 32 El, 40 RA
For engine rotor and sheet components gas turbine parts, jet pipes for service up to 950°C.
High oxidation and corrosion resistance
Age-hardenable.

NIMOPLY
M-121, clad Nimonic 75
For gas turbine construction;
copper rolled between sheets of Nimonic 75

NIOLOY
M-95; 3 0 C, Ni, bal Fe
For rolls for steel mills; chilled iron.

NIO-O-NEL ALLOY 825 replace by INCOLOY ALLOY 825

NIORO.
M-1493; 82 Au, 18 Ni
For brazing W. Mo. Cu. Ni, and Kovar.
M P 950°C. Excellent flow and wetting properties.

NIPERM 50.
M-27; 0.1 C, 48 Ni, Cr, bal Fe.
For soft magnet; high permeability.

NIPERMAG.
M-38, M-867; 12 Al, 32 Ni, 0.4 Ti, bal Fe.
Cast: 10,500 TS; 23,000 Tr. S.; C 45 Rock. 5600 Br, 660 Hc, 3400 Bo.
For loud speakers, motors, generators.
Permanent magnet, high permeability.

NIPIGON.
M-435; 0.8 C, 19 W, 2 V, 4 Cr, 1 Mo, 9 Co, bal Fe.
For tools, dies, cutting tools; high speed steel.

NIPPON EVERSHINING STEEL.
M-716; 0.15 C, 18 Cr, 8 Ni, bal Fe.
For stainless parts; stainless.

NIPPON NST-M1.
M-1651; 0 07-0.12 C, 0.3-0.6 Mn, 0.5 max Si, 12.0.-13.5 Cr, 0.4-0.6 Mo, 0.5 max Ni, bal Fe.
Annealed: 75,000 TS; 35,000 YS; 25 El; B 92 Rock.
For table flatware, springs, oil refinery equipment. Corrosion resistant.

NIPPON NST-M2.
M-1651; 0 10-0.20 C, 0.2-0.8 Mn, 0.5 max Si, 11 5-13 0 Cr, 0.60-1.5 Mo, 0.5 max Ni, bal Fe.
Annealed· 75,000 TS, 40,000 YS; 25 El; B 92 Rock.
For springs, table flatware, oil refinery equipment, surgical instruments, valves.
Corrosion resistant, hardenable.

NIPURE
M-61, 0 01 max Si, 0.05 max Fe, 0 02 max Mn, 0 01 max Mg, 0.04 max Cu, 0.02 max C, 0.01 max Al, 0 01 max Ti, 0.05 max Cr, 0.01 max Pb, bal Ni.
For electronic components
Vacuum melted high purity nickel.

NIRANIUM.
28 8 Cr, 64.2 Co, 4 3 Ni, 2 W, 0.1 Si, 0.2 C, 0.7 Al.
At 1000°C: 82,000 TS, 43,000 YS; 0 7 El.
At 700°C· 85,000 TS; 47,000 YS; 1.3 El.

NI RESIST
M-494, 2 8 C, 14 Ni, 7 Cu, 2 Cr, bal Fe
Cast 28,000 TS, 140-200 Brin
For castings, heat and corrosion resisting.

NIRESIST.
Russia, 2 7 C, 3 0-3 4 Cr, 12-15 Ni, 5-8 Cu, 1 5 Si, bal Fe
Cast 20,000-35,000 TS, 125-200 Brin
For heat and corrosion resistant parts; corrosion and heat resistant, cast iron.

Ni-RESIST TYPE 1.
M-763; 2.5-3 5 C, 1-2 Si, 0.75 1 2 Mn, 12-15 Ni, 1-3 Cr, 5-7 Cu, bal Fe
Cast· 25,000-30,000 TS; 130-160 Brin
For corrosion and heat resistant castings, resists corrosion, heat and wear.

NI-RESIST TYPE I.
M-68, M-271; 1.7-2 5 Cr, 1.0-2 5 Si, 1-1 5 Mn, 13-17 Ni, 5-7 Cu, 3 max T.C , bal Fe.
Cast: 25,000-30,000 TS; 2 El; 0 RA; 130-160 Brin
For pipes, valves, pumps, propellers, hydraulic turbines, oil burners, automotive engine pistons and sleeves; corrosion and heat resisting; austenitic cast iron; non-magnetic

Ni-RESIST I.
M-1188, 2-3 C, 14 Ni, 2 Cr, 6 Cu, bal Fe.
Cast: 25,000-30,000 TS; 120-180 Brin.
For corrosion and heat resistant castings; stainless cast iron, austenitic.

Ni-RESIST TYPE 1-B
M-68; 3 max T.C., 1.0-2.8 Si, 1.0-1.5 Mn, 13.5-17.5 Ni, 2.5-4.0 Cr, bal Fe
Cast: 25,000 TS; 1 El; 140-190 Brin.
For pumps, valves, filter presses, impellers, nozzles; non-magnetic, erosion and corrosion resistant cast iron.

NI-RESIST, TYPE 2.
M-68; 18-22 Ni, 2-4 Cr, 2.2-3.0 C, 1-1.5 Mn, 1.0-2.5 Si, bal Fe.
Cast: 25,000-30,000 TS; 2 El; 0 RA; 120-170 Brin.
For heat resistant parts, grids, furnace parts, pumps, pipe; corrosion resisting and heat resisting.

Ni-RESIST TYPE 2
M-763; 3 max C, 1.7-2.5 Cr, 18-22 Ni, 1-2.5 Si, 0.8-1.5 Mn, bal Fe.
Cast: 25,000-30,000 TS; 130-160 Brin.
For corrosion and heat resistant castings; resists heat, corrosion and wear.

Ni RESIST II.
M-1188; 3 C, 20 Ni, 2 Cr, 2 Si, bal Fe.
Cast: 25,000-30,000 TS; 120-180 Brin.
For corrosion and heat resistant castings; stainless cast iron, austenitic.

Ni-RESIST TYPE 2.
M-994, 3 max C, 1.7-2 5 Cr, 18-22 Ni, 1-2.5 Si, 0 8-1 5 Mn, bal Fe
Cast· 25,000-30,000 TS; 130-160 Brin.
For castings; corrosion and heat resistant.

Ni-RESIST TYPE 2A.
M-994, 2 8 max C, 1.7-2 5 Cr, 18-22 Ni, 1.5-2.7 Si, 0.8-1 5 Mn, bal Fe.
Cast 30,000-50,000 TS; 145-190 Brin.
For castings; corrosion and heat resistant.

Ni-RESIST TYPE 2-B
M-68; 3 max T C , 1.0-2.8 Si, 0.8-1.5 Mn, 18-22 Ni, 2.5-4 0 Cr, bal Fe
Cast: 25,000 TS, 1 El; 130-190 Brin
For turbocharger casings, manifolds, steam turbine nozzles; non-magnetic, heat resistant cast iron.

Ni-RESIST TYPE 2B
M-994, 3 max C, 3-6 Cr, 18-22 Ni, 1.2 Si, 0 8-1.5 Mn, bal Fe.
Cast· 25,000-45,000 TS; 170-250 Brin.
For castings, corrosion and heat resistant.

Ni-RESIST TYPE 3.
M-994, M-68; 2.75 max C, 2.5-3.5 Cr, 28-32 Ni, 1-2 Si, 0 4-0 8 Mn, bal Fe.
Cast 25,000-35,000 TS, 120-150 Brin.
For heat and corrosion resistant castings, corrosion and heat resistant

Ni-RESIST III.
M-1188, 2 7 C, 30 Ni, 2 Si, bal Fe.
Cast· 25,000-35,000 TS, 110-170 Brin.
For corrosion and heat resistant castings; stainless cast iron, austenitic.

Ni-RESIST TYPE 3
M-763; 2 75 max C, 2 5-3 5 Cr, 28-32 Ni, 1-2 Si, 0 4-0.8 Mn, bal Fe.
Cast 25,000-35,000 TS, 120-150 Brin.
For corrosion and heat resistant castings; resists heat, corrosion and wear

Ni-RESIST TYPE 4
M-763, 2 6 max C, 4.5-5 5 Cr, 29-32 Ni, 5-6 Si, 0.4-0.8 Mn, bal Fe.
Cast: 25,000-35,000 TS; 150-180 Brin
For corrosion and heat resistant castings; resists heat, corrosion and wear

Ni-RESIST TYPE 4.
M-994, M-68; 2 6 max C, 4.5-5.5 Cr, 29-32 Ni, 5-6 Si, 0 4-0.8 Mn, bal Fe.
Cast: 25,000-35,000 TS; 150-180 Brin.
For heat resistant castings, stove tops, cookware; corrosion and heat resistant.

Ni-RESIST IV.
M-1188; C, 30 Ni, 3 Si, bal Fe.
Cast: 25,000-35,000 TS; 130-200 Brin.
For food industry equipment; stainless cast iron.

Ni-RESIST TYPE 5
M-68; 2.4 max T.C., 1-2 Si, 0.4-0.8 Mn, 34-36 Ni, 0.5 max Cu, 0.1 max Cr, bal Fe.
Cast: 20,000-25,000 TS; 100-125 Brin.
For gages, glass molds, paper dies, chemical equipment; very low thermal expansion

Ni-RESIST V.
M-1188; 2.4 C, 36 Ni, 1-2 Si, bal Fe.
Cast: 20,000-25,000 TS, 110-160 Brain
For heat resistant castings, stainless cast iron, low coefficient of expansion.

Ni-RESIST TYPE 5
M-994, 2.4 max C, 3 max Cr, 34-36 Ni, 1-2 Si, 0.4-0.8 Mn, bal Fe
Cast: 20,000-25,000 TS; 100-140 Brin
For heat resistant castings, corrosion and heat resistant

Ni-RESIST TYPE D-2.
M-68, 3 max T.C., 1.5-3.0 Si, 0.7-1.2 Mn, 18-22 Ni, 1.75-2.75 Cr, bal Fe.
Cast: 60,000 TS, 30,000 YS, 8-20 El, 140-200 Brin
For pumps, valves, pipe fittings, paper rolls; corrosion and heat resistant cast iron

Ni-RESIST TYPE D-2B.
M-68; 3 max T.C., 1.5-3.0 Si, 0.7-1.2 Mn, 18-22 Ni, 2.7-4.0 Cr, bal Fe
Cast 60,000 TS, 30,000 YS, 7-15 El, 150-210 Brin
For impellers, pumps, valves, engine parts; corrosion and heat resistant cast iron.

Ni-RESIST TYPE D-2C
M-68; 2.9 T.C., 1-3 Si, 1.8-2.4 Mn, 28-32 Ni, bal Fe
Cast: 60,000 TS, 30,000 YS, 20-40 El, 120-170 Brin.
For switch gears, pumps, valves, bearings, seals, corrosion and heat resistant cast iron

Ni-RESIST TYPE D-3
M-68, 2.6 T.C., 1.0-2.8 Si, 28-32 Ni, 2.5-3.5 Cr, bal Fe.
Cast: 55,000 TS, 30,000 YS, 6-20 El; 140-200 Brin
For steam turbines, engines, liners, valves, kettles; corrosion and heat resistant cast iron

Ni-RESIST TYPE D-3A
M-68, 2.6 T.C., 1.0-2.8 Si, 28-32 Ni, 1.5 Cr, bal Fe
Cast: 55,000 TS, 30,000 YS; 10-20 El; 130-190 Brin
For liners, bearings, valve guides, corrosion and heat resistant cast iron

Ni-RESIST TYPE D-4
M-68; 2.6 T.C., 5-6 Si, 28-32 Ni, 4.5-5.5 Cr, bal Fe
Cast: 60,000 TS; 200-270 Brin
For cookware, range tops; nonmagnetic, corrosion resistant cast iron

Ni-RESIST TYPED D-5.
M-68; 2.4 max T.C., 1.0-2.8 Si, 34-36 Ni, bal Fe
Cast. 55,000 TS, 30,000 YS, 20-40 El; 130-280 Brin
For dies, glass molds, ingot molds; corrosion and heat resistant cast iron.

Ni-RESIST TYPE D-5B.
M-68, 2.4 max T.C. 1.0-2.8 Si, 34-36 Ni, 2-3 Cr, bal Fe.
Cast: 55,000 TS; 30,000 YS; 6-15 El, 140-190 Brin
For dies, glass molds, ingot molds, corrosion and heat resistant cast iron

Ni-RESIST G.
M-500; 2.7 C, Ni, Cu, Cr, bal Fe.
Annealed 30,000 TS, 150 Brin.
For chemical plant equipment; resists acids, oxidation.

Ni-RESIST N.
M-500, 2.7 C, Ni, Cr, bal Fe.
Annealed 30,000 TS, 150 Brin.
For chemical plant equipment; resists caustic, ammonia.

NIRESULT
M-84; 1.1 min C, 24-30 Cr, 12-15 Ni, 5-7 Cu, bal Fe.
For heat and corrosion resistant parts; heat and corrosion resistant.

NIREX.
M-44, 70 min Ni, 11-15 Cr, 10 max Fe.
For heat resisting parts, stainless, heat resistant.

Ni-ROD
M-68, 92 Ni
For welding rod for cast iron, machinable welds, coated, arc

NI-ROD 55
M-68; 60 Ni, 40 Fe
For welding electrodes for cast iron, machinable.

NI-ROD 55 WELDING ELECTRODE
M-1499, 53 Ni, 1.5 C, 0.3 Mn, 45.0 Fe, 0.005 S, 0.50 Si, 0.10 Cu
Electrode for shielded metal-arc welding of cast and ductile irons, cast irons to wrought alloys
AWS A 5.15 Class F NiFe-CI

NI-ROD WELDING ELECTRODE
M-1499, 95.0 Ni, 1.0 C, 0.2 Mn, 3.0 Fe, 0.005 S, 0.7 Si, 0.10 Cu
Electrode for shielded metal-arc welding of cast iron
AWS A 5.15 Class E Ni-CI

NIROMET 36
M-61, 36 Ni, 64 Fe
Wire (Annealed) 70,000 TS
(Cold worked) 150,000 TS.
For bimetals, precision springs, time devices.
Low expansion

NIROMET 42
M-61, 42 Ni, bal Fe
Bar 70,000-150,000 TS, 50,000 YS, 35 El
For glass-to metal hermetic sealing, leads and terminals for resistors
Matches Corning 1075 glass Controlled expansion.

NIROMET 44
M-61, 44 Ni, 56 Fe
Wire 70,000 TS (Annealed); 150,000 TS (Cold worked)
For special glass sealing and fiber optics.
Controlled expansion

NIROMET 46
M-61, 46 Ni, bal Fe
Bar 70,000-150,000 TS, 50,000 YS; 35 El
For terminal bands in vitreous enameled resistors, cores and armatures for relays, motors, transformers Controlled expansion alloy.

NIROMET 48
M-61, 48 Ni, 52 Fe
Wire 70,000-150,000 TS
For glass-to-metal seals
Controlled expansion.

NIROMET 426
M-61, 42 Ni, 6 Cr, bal Fe.
Wire 80,000-150,000 TS.
For glass to metal seals (Corning #0120 glass).
Controlled expansion

NIRON 46.
M-61, 46 Ni, 54 Fe.
Annealed: 70,000 TS, 50,000 YS; 35 El.
For terminal bands for vitreous enamel resistors; controlled expansion

NIRON 52.
M 61; 51 Ni, 49 Fe.
Annealed: 70,000 TS; 50,000 YS; 35 El.
For glass to metal seals; controlled expansion.

NIRONITE.
M-229, C, alloy, bal Fe
For rolls for strip mills; heavy duty.

NIRONITE B
M-229; 3 2 C, 2 Si, 1 Cr, bal Fe.
For rolling mill casting, special iron alloy.

NIRONITE C
M-229, C, alloy, bal Fe
For rolls for bal and billet mills; heavy duty.

NIRONITE D
M-229, C, alloy, bal Fe
For rolls for strip mills, heavy duty.

NIRONZE 635
M-141, 1 9 Ni, 0 6 Si, bal Cu
Annealed 40,000 TS, 12,000 YS; 50 El, 90 RA; 56 Brin.
Aged 88,000 TS, 70,000 YS; 12 El, 20 RA; 170 Brin
For cold headed bolts, fasteners, switch gear, marine hardware, age-hardenable, corrosion resistant

NIROSTA 18 8
M 184, 0 6-1 25 Si, 8-10 Ni, 16 19 Cr, 0 35 max C, bal Fe
Corrosion resisting articles; now Michiana No. 49

NIROSTA 19-9-4
M 184, 0 6 1 25 Si, 8-12 Ni, 18-20 Cr, 0.35 C, 2-4 Mo, bal Fe
For hot sulfuric acid tanks, corrosion resistant and hot H_2SO_4 resistant, under pressure

NIROSTA 25 20
M-184, 1 5 max Si, 18 22 Ni, 24-27 Cr, 0 35 max C, bal Fe
Applicable to temperature and corrosion work where temperature exceeds 1400°F; heat and corrosion resistant up to 1400°F

NIROSTA KA2
M-15, M 72; 0 16 max C, 0 50 max Mn, 0 50 Si, 17 20 Cr, 7 10 Ni, bal Fe
85,000-95,000 TS, 30,000-40,000 YS, 60 55 El; 75 50 RA, 135-150 Brin
For cutlery, stainless articles, non-magnetic, austenitic, scaling point 1700°F

NIROSTA KA4
M-105, 0 25 C, 0 50 Mn, 0 5-0.75 Si, 17-20 Cr, 8 10 Ni, 2-4 Mo, bal Fe.
At 70°F· 105,000 TS, 49,000 YS, 55 El; 62 RA.
At 1110°F. 70,000 TS, 22,000 YS; 30 El
At 1830°F 9,000 TS, 4,500 YS; 47 El
For pipe fittings, pump casings, impellers, shafts; high corrosion resistance; austenitic, same as "Standard alloy KA4"

NIROSTA VK5M.
M-72, 0 20 C, 13 Cr, 1 2 Mo, bal Fe.
Annealed· 95,000 TS; 40,000 YS; 25 El; 55 RA; B 92 Rock
Cold Drawn· 105,000 TS, 85,000 YS; 17 El; 50 RA; B 95 Rock.
Heat Treated: 250,000 TS; 215,000 YS; 8 El; 25 RA; C 50 Rock.
For cutlery, surgical instruments, oil refinery equipment, valves.
Corrosion resistant, hardenable.

NIROSTA VK7M.
M-72, 0.15 C, 13 Cr, 1.2 Mo, bal Fe.
Annealed: 80,000 TS; 40,000 YS; 25 El; B 93 Rock
Heat Treated: 200,000 TS; 160,000 YS; 12 El; C 45 Rock.
For surgical instruments, cutlery, oil refining equipment, table flatware.
Corrosion resistant, hardenable.

Ni RW 4 Zr
M-Germany; 4 2 W, 0 1 Zr, bal Ni.
For thermionic valves.
Heat and corrosion resistant

NISILOY
M-68; 60 Ni, 30 Si, 10 Fe
For iron inoculant, for gray iron castings; M P. 1800°F.

NISIMAZ
M-104, M-771, C, 21 Ni, 2.5 Cr, 7 Si, bal Fe.
For chemical plant equipment, resists HCl and H_2SO_4

Ni-SPAN C.
M-68, M-237, 41-43 Ni, 2 4 Ti, 5 1-5 7 Cr, 0 6 max C, 0 6 Al, 0.8 Si, bal Fe.
Annealed: 90,000 TS, 35,000 YS, 40 El; 145 Brin.
Aged· 200,000 TS, 180,000 YS; 7 El, 395 Brin.
For instruments springs, diaphragms; age-hardenable, constant modulus.

NI-SPAN-C ALLOY 902
M-1499, 42 25 Ni, 0 03 C, 0 40 Mn, 48 5 Fe, 0 02 S, 0 50 Si, 0 05 Cu, 5 33 Cr, 0 55 Al, 2.58 Ti.
Hot rolled and aged. 175,000 TS, 110,000 YS, 25 El.
For tuning forks and other mechanical resonators, electromechanical filters, watch and clock hairsprings; age hardenable; controllable thermo-elastic coefficient.

NI-SPAN-D
M-121, 42 2 Ni, 6 5 Cr, 2 8 Ti, 0 45 Al, bal Fe.
For diaphragms, capsules, tuning forks, Bourdon tubes, transducer load cells
Max service temperature of 85°C

Ni SPAN HI
M 68, 28-30 Ni, 2.4 Ti, 8-9 Cr, 0 06 max C, 0.5 Si, 0 4 Mn, 0 6 Al, bal Fe
Aged 140,000 TS, 90,000 YS, 20 El.
For thermostats, bimetals, high coefficient of expansion, age hardenable.

Ni-SPAN LO 42
M-68, 40 5 42 5 Ni, 2 2-2 6 Ti, 0.06 max C, 0 4 Mn, 0 5 Si, 0 6 Al, bal Fe.
Annealed 90,000 TS, 40,000 YS, 32 El, 330 Brin.
Hardened 165,000 TS, 120,000 YS, 14 El, 330 Brin
For thermostats, bimetals, age-hardenable, low coefficient of expansion

Ni-SPAN LO 45.
M-68, 44 4-46.5 Ni, 2.4 Ti, 0 06 max C, 0 4 Mn, 0 5 Si, 0 6 Al, bal Fe.
For thermostats, bimetals; low coefficient of expansion, age-hardenable.

Ni-SPAN LO 52
M-68, 51-53 Ni, 2 4 Ti, 0 06 max C, 0 4 Mn, 0 5 Si, 0 6 Al, bal Fe
Annealed. 85,000 TS; 35,000 YS; 27 El; 125 Brin.
Hardened: 120,000 TS; 95,000 YS; 17 El; 305 Brin
For thermostats, bimetals; low coefficient of expansion, age-hardenable.

"NI" STAINLESS STEEL.
M-73; 0.3-0.4 C, 13-15 Cr, 1.5-2.0 Ni, bal Fe.
For pump rods, pistons, valves, cutlery; corrosion resistant; resists heat up to 1000°F.

NITAL.
M-140; 0.27 C, 3 Cr, 0.2 V, 10.5 W, 0.2 Mo, 1.5 Ni, bal Fe.
For brass extrusion dies; hot work steel, oil hardened.

NIT CA1.
M-1315; 0.27 C, 1.1 Al, 1.4 Cr, bal Fe.
For oil refinery equipment; creep resistant.

NIT CA2.
M-1315; 0.34 C, 1.1 Al, 1.4 Cr, bal Fe.
For oil refinery equipment; creep resistant.

NIT CMA.
M-1315, 0.32 C, 1.1 Al, 1.1 Cr, 0.18 Mo, bal Fe.
For oil refinery equipment, creep resistant.

NIT CMA.
M-1315; 0.31 C, 2.35 Cr, 0.18 Mo, 0.13 V, bal Fe.
For gears, shafts, crankshafts, bolts, studs, oil hardened, shock resistant.

NIT CMNA.
M-1315; 0.33 C, 1.1 Al, 1.7 Cr, 1 Ni, bal Fe
For oil refinery equipment; creep resistant.

NITEC 10224.
M-717;
Nickel base alloy powder for cast iron and steel brazing or build-up.

NITECTIC 222
M-717;
Electrode for DC welding of nickel alloys and dissimilar alloys.
Tensile strength 100,000 psi.

NI TENSILIRON.
M-68; 2.5-3.1 C, 0.5-0.9 Mn, 1.2-2.75 Si, 1-4 Ni, 0-1 Mo, 0-0.5 Cr, bal Fe.
Cast. 40,000-100,000 TS; 220-350 Brin.
For gears, turbines, casings and rotors, valves, bushings, "Ni Tensile;" high strength cast iron.

Ni TENSYLE
M-494; 2.8 C, 1.5-2.0 Ni, 1.25-1.75 Si, bal Fe.
Cast: 56,000 TS; 200 Brin
Heat treated: 66,000 TS; 280 Brin.
For flywheels; cast iron.

NITINOL.
M-US, 40-45 Ti, 55-60 Ni.
54-5% Ni: 110,000-124,000 TS; 40,000-55,000 YS; 15.5 El; 16 RA; Rock A 42-52.
For nonmagnetic tools, sensing devices, chemical plant equipment, space components
Nonmagnetic, corrosion resistant, hardenable, alloy with a memory.

NITINOL-55.
M-US; 55 Ni, bal Ti.
Bar. 120,000 TS; 50,000 YS; 15 El; 16 RA; A 50 Rock.
For non-magnetic tools, sensing devices, chemical plant equipment.
Alloy with a memory. Non-magnetic, corrosion resistant.

NITRALLOY Gr. 3.
M-56; 0.38 C, 1.1 Al, 0.2 Mo, 1.5 Cr, bal Fe.
Ht. Tr.: 123,000-145,000 TS.
For nitrided rolls, crankshafts, camshafts, cams, brick press plates, gears.
Nitriding steel, wear resistant.

NITRALLOY Gr. 5.
M-56; 0.26-0.35 C, 1.5 Cr, 0.2 Mo, 1.1 Al, bal Fe.
Ht. Tr.: 90,000-125,000 TS.
For pump rods, camshafts, cams, crankshafts, gears.
Nitriding steel. Wear resistant.

NITRALLOY 125, TYPE H.
M-1; 0.23 C, 4-0.7 Mn, 0.2-0.4 Si, 0.85-1.2 Al, 1.58 Cr, 0.2 Mo, bal Fe.
Heat treated, for nitrided gears, shafts, cams, clutches, rollers; nitriding steel.

NITRALLOY NO. 135 CVM.
M-115, M-386, 0.30-0.40 C, 0.9-1.4 Cr, 0.15-0.25 Mo, 1.0-1.4 Al, bal Fe
Oil quenched and drawn. 225,000-105,000 TS; 180,000-90,000 YS, 10-27 El; 37-62 RA; 440-175 Brin.
For nitrided parts, gears, shafts; Nitralloy G.

NITRALLOY 135 MODIFIED.
M-1, M-24; 0.40 C, 0.5 Mn, 1.0 Al, 1.75 Cr, 0.4 Mo, bal Fe.
Heat treated 158,700 TS, 141,000 YS, 17 El; 56 RA; 320 Brin
For cylinder barrels, nitrided parts; nitriding steel.

NITRALLOY 135, TYPE G.
M-1; 0.36 C, 0.4-0.7 Mn, 0.2-0.4 Si, 0.85-1.2 Al, 1.49 Cr, 0.18 Mo, bal Fe
Heat treated 224,000-104,000 TS, 180,000-85,000 YS, 11-18 El; 36-59 RA; 445-200 Brin.
For nitrided gears, shafts, cams, clutches, rollers, nitriding steel.

NITRALLOY 230.
M-386, 0.25-0.35 C, 0.4-0.6 Mn, 0.2-0.3 Si, 1-1.5 Al, 0.6-1.0 Mo, bal Fe.
For nitrided parts, gears, shafts, pinions; nitriding steel, Nitralloy N.

NITRALLOY 640
M-386, 0.35-0.45 C, 0.4-0.6 Mn, 0.2-0.3 Si, 1.4-1.6 Cr, 0.45 min V, bal Fe
For nitrided parts, gears, shafts, pinions; nitriding steel, hard case.

NITRALLOY ALAMO
M-1, 0.25-0.35 C, 1.0-1.4 Al, 0.6-1.0 Mo, bal Fe.
For gears, shafts, camshafts, connecting rods; nitriding steel.

NITRALLOY CM
M-56; 0.2-0.4 C, 3 Si, 6 Mn, 1 Cr, 0.6 Ni, 1.2 Mo, bal Fe
For gears, shafts, cams, crankshafts; nitriding steel.

NITRALLOY EZ
M-24, M-1, 0.3-0.4 C, 1.25 Cr, 1.1 Al, 0.2 Mo, 0.15-0.25 Se or S, bal Fe.
Heat treated: 155,000-200,000 TS; 135,000-175,000 YS, 18-16 El, 55-50 RA; 300-400 Brin
For nitrided parts, gears, shafts; nitriding steel.

NITRALLOY EZ 505.
M-1; C, Cr, Mo, 0.85-1.2 Al, 0.2-0.4 Si, bal Fe.
For nitrided parts, gears, shafts; nitriding steel, free-cutting.

NITRALLOY G (135)
M-38; 0.3-0.4 C, 0.4-0.7 Mn, 0.9-1.4 Cr, 0.15-0.25 Mo, 0.8-1.2 Al, bal Fe.
Heat treated. 105,000-225,000 TS; 80,000-177,000 YS; 28-11 El; 60-35 RA; 200-445 Brin.
For cylinder liners, gears, cams, camshafts; nitriding steel.

NITRALLOY G GR. 69.
M-1; 0.38-0.45 C, 0.4-0.7 Mn, 1.4-1.8 Cr, 0.3-0.45 Mo, 0.95-1.35 Al, bal Fe.
For nitrided parts, gears, shafts; nitriding steel.

NITRALLOY GK3.
M-56; 0.35 C, 0.5 Mn, 2.0 Cr, 0.25 Mo, 0.15 V, bal Fe.
For gears, shafts; nitriding steel.

NITRALLOY GK5.
M-56; 0.25 C, 0.5 Mn, 2.0 Cr, 0.25 Mo, 0.15 V, bal Fe.
For gears, shafts; nitriding steel

NITRALLOY GK7.
M-56; 0.18 C, 0.5 Mn, 2.0 Cr, 0.25 Mo, 0.15 V, bal Fe.
For gears, shafts; nitriding steel.

NITRALLOY GR.
M-386; 1.25-1.5 C, 0.4-0.6 Mn, 1.25-1.5 Si, 0.2-0.4 Cr, 0.2-0.3 Mo, 1.0-1.5 Al, bal Fe
Rolled 108,500 TS; 84,000 YS; 17.5 El; 19.4 RA; 363 Brin
For seal rings, cylinder liners; self lubricating, free-cutting

NITRALLOY H (125).
M-38; 0.2-0.3 C, 0.9-1.4 Cr, 0.15-0.25 Mo, 0.85-1.2 Al, bal Fe.
Heat treated: 102,000-178,000 TS; 85,000-155,000 YS, 26-12 El; 70-46 RA, 225-400 Brin.
For cylinder liners, bushings, shafts, gears; nitriding steel

NITRALLOY HCM3.
M-56, 0.4 C, 0.5 Mn, 0.3 Ni, 3 Cr, 1 Mo, 0.25 V, bal Fe
For gears, shafts, nitriding steel

NITRALLOY HCM5.
M-56, 0.3 C, 0.45 Mn, 0.5 Ni, 3 Cr, 0.4 Mo, bal Fe
For gears, shafts, nitriding steel.

NITRALLOY HCM7.
M-56, 0.2 C, 0.45 Mn, 0.5 Ni, 3 Cr, 0.4 Mo, bal Fe.
For gears, shafts, nitriding steel.

NITRALLOY LK1
M-56, 0.5 C, 0.65 Mn, 1.6 Cr, 1.1 Al, 0.2 Mo, bal Fe.
For gears, shafts, nitriding steel.

NITRALLOY LK3
M-56, 0.4 C, 0.65 Mn, 1.6 Cr, 0.2 Mo, 1.1 Al, bal Fe
For gears, shafts, nitriding steel.

NITRALLOY LK5
M-56, 0.3 C, 0.65 Mn, 1.6 Cr, 0.2 Mo, 1.1 Al, bal Fe
For gears, shafts; nitriding steel.

NITRALLOY LK7
M-56, 0.2 C, 0.65 Mn, 1.6 Cr, 0.2 Mo, 1.1 Al, bal Fe.
For gears, shafts; nitriding steel

NITRALLOY N
M-1, M-24; 0.20-0.27 C, 0.4-0.7 Mn, 1.0-1.3 Cr, 0.2-0.3 Mo, 3.25-3.75 Ni, 1.1-1.4 Al, bal Fe.
For nitrided parts; nitriding steel.

NITREX-I.
M-32; 0.38-0.45 C, 0.6 Mn, 0.3 Si, 1.4-1.8 Cr, 0.85-1.2 Al, 0.30-0.45 Mo, bal Fe.
Tempered 1100°F; 181,000 TS; 165,000 YS; 15 El; 54 RA; Rock C 41.
Tempered 1000°F: 206,000 TS; 182,000 YS; 13 El.
For cylinder liners, gears, cams, thread guides, camshafts.
Nitriding steel, wear and abrasion resistant case.

NITREX-II.
M-32; 0.20-0.27 C, 0.6 Mn, 0.3 Si, 1.0-1.5 Cr, 0.8-1.2 Al, 0.2-0.3 Mo, 3.25-3.75 Ni, bal Fe
Tempered 1000°F: 198,000 TS; 191,000 YP; 14 El; 45 RA; 38 Rc.
Tempered 1100°F: 145,000 TS; 130,000 YP; 21 El; 58 RA; 30 Rc.
After Nitriding: 190,000 TS; 180,000 YP; 6-15 El; 43 RA; core Rc 41; case 94 R 15N.
For cylinder liners, bushings, shafts, gears, cams, camshafts.
Precipitation hardening nitriding steel.

NITRICASTIRON.
M-386; 2.75 T.C., 1.89 G.C., 0.86 C.C., 2.58 Si, 1.22 Cr, 0.16 V, 0.24 Mo, 1.01 Al, bal Fe.
Annealed. 56,000-67,000 TS; 302 Brin.
For nitrided cast iron, cams, cylinders, valves; wear resistant

NITRIDING G (135).
M-97, 0.3-0.4 C, 0.4-0.7 Mn, 0.9-1.4 Cr, 0.15-0.25 Mo, 0.85-1.2 Al, bal Fe.
Heat treated· 105,000-225,000 TS; 80,000-177,000 YS, 28-11 El, 60-35 RA; 200-445 Brin
For cylinder liners, gears, camshafts, connecting rods, bushings; nitriding steel.

NITRIDING G-MOD
M-97, 0.38-0.43 C, 0.5-0.7 Mn, 1.4-1.8 Cr, 0.95-1.3 Al, 0.3-0.4 Mo, bal Fe
Heat treated 158,000-206,000 TS; 141,000-181,000 YS, 20-13 El; 64-45 RA; 285-415 Brin.
For cylinder liners, gears, bolts, crankshafts; nitriding steel.

NITRIDING H (125).
M-97; 0.2-0.3 C, 0.9-1.4 Cr, 0.15-0.25 Mo, 0.85-1.2 Al, bal Fe
Heat treated: 102,000-178,000 TS, 85,000-155,000 YS, 26-12 El; 70-46 RA; 225-400 Brin
For cylinder liners, bushings, shafts, gears, rolls; nitriding steel

NITRIDING N
M-97, 0.20-0.27 C, 0.4-0.7 Mn, 1.0-1.3 Cr, 0.85-1.2 Al, 0.2-0.3 Mo, 3.25-3.75 Ni, bal Fe.
Heat treated· 198,000 TS; 191,000 YS; 14 El; 45 RA; 390 Brin
For gears, cams, crankshafts, camshafts; age-hardenable.

NITRIDING STEEL 125 TYPE H
M-38, 0.25 C, 1.15 Cr, 0.2 Mo, 1.15 Al, bal Fe.
Heat treated. 122,000 TS, 103,000 YS; 61 El; 67 RA; 255 Brin.
For nitrided parts, gears, shafts, Nitralloy H.

NITRIDING STEEL 135 MODIFIED.
M-38; 0.4 C. 0.5 Mn, 1 Al, 1.75 Cr, 0.4 Mo, bal Fe.
Heat treated: 158,700 TS; 141,000 YS, 17 El; 56 RA, 320 Brin.
For cylinder barrels, nitrided parts; nitriding steel

NITRIDING STEEL 135 TYPE 6.
M-38; 0.35 C, 1.15 Cr, 0.2 Mo, 1.15 Al, bal Fe.
Heat treated· 138,000 TS; 120,000 YS; 20 El; 58 RA; 280 Brin.
For nitrided parts, gears, shafts; Nitralloy C.

NITRIDING STEEL 230
M-38; 0.25-0.35 C, 0.4-0.6 Mn, 0.2-0.3 Si, 1-1.5 Al, 0.6-1 Mo, bal Fe.
For nitrided parts; nitriding steel.

NITRIDING STEEL BM.
M-38; 0,3 C, 1 Cr, 0.4 Mo, 0.8 Al, bal Fe.
For gears, shafts, pinions, cams, camshafts; nitriding steel.

NITRIDING STEEL N.
M-38; 0.20-0.27 C, 0.4-0.7 Mn, 1.0-1.3 Cr, 0.2-0.3 Mo, 3.5 Ni, 1.1-1.4 Al, bal Fe.
Heat treated: 198,000 TS; 191,000 YS; 14 El; 45 RA; 390 Brin.
For nitrided parts, gears, crankshafts; nitriding steel.

NITRIX 65.
M-501, M-912; 0 27 C, 1.1 Al, 1.4 Cr, bal Fe.
For oil refinery equipment, creep and heat resistant.

NITRIX 65A.
M-501, M-912, 0.30 C, 0.9 Al, 1 2 Cr, bal Fe.
For oil refinery equipment, bolts; creep and heat resistant.

NITRIX 71.
M-501, M-912; 0.32 C, 1 1 Al, 1.1 Cr, 0.18 Mo, bal Fe.
For oil refinery equipment, bolts, fasteners; creep and heat resistant.

NITRIX 72.
M-501, M-912; 0.34 C, 1 1 Al, 1.4 Cr, bal Fe.
For oil refinery equipment, heat and creep resistant.

NITRIX 73.
M-501, M-912; 0.31 C, 2.35 Cr, 0.18 Mo, 0 13 V, bal Fe
For gears, shafts, crankshafts, bolts, studs, oil hardened, shock resistant.

NITRIX 80.
M-501, M-912; 0.32 C, 1.1 Al, 0 18 Mo, 1 1 Cr, bal Fe
For oil refinery equipment; heat and creep resistant

NITRIX 1470.
M-501, M-912; 0 31 C, 2 35 Cr, 0.18 Mo, 0 13 V, bal Fe.
For gears, shafts, crankshafts, bolts, fasteners; oil hardened, shock resistant.

NITRIX 1471.
M-501, M-912; 0 32 C, 1.1 Al, 1 1 Cr, 0 18 Mo, bal Fe.
For oil refinery equipment; creep and heat resistant.

NITRIX 1472.
M-501, M-912, 0.34 C, 1.1 Al, 1.1 Cr, bal Fe.
For oil refinery equipment; creep and heat resistant.

NITRIX 1473.
M-501, M-912; 0.30 C, Cr, V, 0.6 Mn, bal Fe.
For gears, shafts, bolts, fasteners; oil hardened, shock resistant.

NITRO.
M-32; 1 0 C, 0.35 Mn, 0.25 Si, 0 2 V, bal Fe.
For drills, taps, springs, cutters; Type W2

NITRODUR 65.
M-459; 0 27 C, 1.4 Cr, 1.1 Al, bal Fe
For gears, shafts, machine tool parts, nitriding steel.

NITRODUR 65A.
M-459; 0.3 C, 1.2 Cr, 0 9 Al, 0.09 P, 0 09 S, bal Fe.
For gears, shafts, machine tool parts; nitriding steel, free-cutting.

NITRODUR 80.
M-459; 0.32 C 1.1 Cr, 0.2 Mo, 1 1 Al, bal Fe.
For gears, shafts, machine tool parts; nitriding steel.

NITRODUR 81.
M-459; 0.34 C, 1.4 Cr, 1.1 Al, bal Fe.
For gears, shafts, machine tool parts; nitriding steel.

NITRODUR 85.
M-459; 0.33 C, 1.7 Cr, 1 Ni, 1.1 Al, bal Fe.
For gears, shafts, machine tool parts; nitriding steel.

NITRODUR 90
M-459, 0 3 C, 2.3 Cr, 0 15 Mo, 0 1 V, bal Fe.
For gears, shafts, machine tool parts; nitriding steel.

NITRODUR 91
M-459, 0 30 C, Cr, V, bal Fe.
For gears, shafts, bolts, pinions, fasteners; oil hardened, shock resistant.

NITROFIL
M-282, 0 2 Al, 0 2 Ti, bal Cu.
For filler rod and wire for nitrogen-arc and inert gas shielded metal arc welding of copper.

NITROSA STEEL.
M-57, 18 Cr, 8 Ni, 0.35 Mn, 0 35 C, bal Fe.
Cold worked 200,000 TS; 100,000 YS; 13 El.
For stainless parts, chemical apparatus; resists corrosion of acids and gases; resists high temperature to 1650°F

NITTANY (FREE CUTTING) NO 1
M-122, 61 Cu, 3 Pb, bal Zn
Cold drawn. 66,000 TS, 50,000 YS, 29 El, 46 RA; 126 Brin
For screw machine parts, bolts, screws; free-turning yellow brass

NITTANY NO 2.
M 122, 61 5-62 Cu, 2 2-2 5 Pb, bal Zn
51 000-68,000 TS, 23,000-37,000 YS, 29-54 El, 46-50 RA; 58 110 Brin
For screw machine parts, free cutting

NITTANY NO 4
M-122, 62-62 5 Cu, 3 0 3 25 Pb, bal Zn.
50,000 65,000 TS, 27,000-37,000 YS, 29-54 El, 46-51 RA; 63-110 Brin
For screw machine parts, free cutting

NITTANY NO 7
M 122, 62-62 5 Cu, 1 25-1 5 Pb, bal Zn
48,000-60,000 TS, 19,000-36,000 YS, 26 44 El, 62 75 RA, 63-90 Brin
For screw machine parts, free cutting

NITTANY NO 30
M-122, 62-63 Cu, 1.25 Pb, bal Zn
Rolled. 67-79 Brin.
For screw machine products, hardware; free cutting.

NITTANY NO 31
M-122, 62-63 Cu, 1 7 Pb, bal Zn
Rolled 67-79 Brin
For screw machine products, hardware; free cutting

NITTANY NO 35
M-122, 64 Cu, 0 85 Pb, bal Zn
Rolled 100-107 Brin
For hardware, screw machine products; for spinning and swaging parts.

NITTANY NO 38
M 122, 62 Cu, 2 3 Pb, bal Zn
Rolled. 107-125 Brin.
For hardware, screw machine products; free cutting.

NITTANY NO. 49.
M-122, 61 Cu, 3 Pb, bal Zn.
Soft 50,000 TS, 22,000 YS; 32 El; 83 Brin.
½ H-temper: 60,000 TS, 42,000 YS, 22 El; 125 Brin.
H-temper 85,000 TS; 56,000 YS; 7 El; 160 Brin.
For screw machine products, screws, bolts; free-cutting.

NITTANY NO. 77.
M-122; 62.5 Cu, 3 Pb, bal Zn.
For screw machine products, hardware, bolts; free-cutting

NITUF
M-140; 0.5 C, 0.4 Mn, 1.0 Si, 5.25 Cr, 1.5 Ni, 1.0 V, 1.35 Mo, bal Fe.
Air hardening tool and die steel, AISI A9.

NITUNG.
M-1433; 0.30 C, 2.75 Cr, 0.30 Mo, 9.5 W, 1.6 Ni, bal Fe.
For extrusion rams and liners, hot work tools; hot work steel, oil hardened.

NITUTEC 10020.
M 717,
Nickel-copper base powder for thin overlays on other metals

NIVAC
M-1214, M-38, 99.92 Ni
For equipment handling fluorine at high temperatures of 500-600°C.
Corrosion and heat resistant

NIVAC 50 Ni
M-38, 50 Ni, bal Fe
Annealed 58,000 TS; 19,000 YP, 27 El.
Coercive force 0.06 for 10,000 gauss
For magnetic temperature compensator, speedometers, tachometers, voltage regulators, watt-hour meters
High permeability, magnetically soft.

NIVAC-77 Ni
M 38, 77 Ni, bal Fe
For telephone loading coils, magnetic shielding, sensitive relays, pulse transformers.
High permeability, soft magnet.

NIVAC 78 Ni
M 38, 78 Ni, bal Fe
For telephone loading coils, magnetic shielding, sensitive relays, pulse transformers
High permeability, soft magnet

NIVAC 79 Ni
M-38, 79 Ni, bal Fe
For telephone loading coils, magnetic shielding sensitive relays, pulse transformers.
High permeability

NIVAC 80 Ni
M-38, 80 Ni, bal Fe.
For telephone loading coils, magnetic shielding, sensitive relays, pulse transformers
High permeability

NIVAC P
M-1214, 0.007 C, 0.005 O_2, 0.005 Si, 0.002 P, 0.13 Co, 0.005 Cu, 0.010 Fe, bal Ni.
For vacuum tubes, diaphragms, resistance wire; high purity nickel

NIVAFLEX.
M-1631; 0.03 C, 18 Cr, 21 Ni, 45 Co, 4 W, 4 Mo, 1 Ti, 0.3 Be, bal Fe
For high temperature springs
Corrosion and heat resistant.

NIVAN
M-357, C, 1.4 Ni, 0.35 Cr, 0.2 V, bal Fe.
For cutlery, tough.

NIVAROX.
M-296, 28 Ni, 0.5 Be, 8 W, Mo, bal Fe.
For instrument springs, diaphragms.
Constant modulus. Beryllium Invar.

NIVAROX CT.
M-296, 0.1 max C, 37 Ni, 8 Cr, 54 Fe, 0.8 Mn, 0.9 Be, 1.0 Ti, 0.2 Si.
For watch springs; corrosion resistant.

NIVAROX M.
M-296, 0.1 max C, 31.5 Ni, 60 Fe, 0.7 Mn, 0.9 Be, 6.5 Mo, 0.1 Si
For watch springs; corrosion resistant.

NIVAROX N
M-296; 0.1 max C, 36 Ni, 60 Fe, 0.8 Mn, 0.9 Be, 0.1 Si, 2.0 Ti.
For watch springs, corrosion resistant.

NIVAROX W.
M-296, 0.1 max C, 30 Ni, 61 Fe, 0.7 Mn, 0.9 Be, 7.5 W, 0.1 Si, 0.1 Ti
For watch springs; corrosion resistant.

NIVCO
M-118, 0.02 C, 0.35 Mn, 0.15 Si, 22.5 Ni, 1.1 Zr, 1.8 Ti, 0.22 Al, 1.0 Fe, bal Co
At R T · 165,000 TS, 110,000 YS; 25 El.
At 1200°F · 105,000 TS; 75,000 YS, 20 El
For steam turbine blading; high heat strength to 1200°F

NIVCO-10
M-118, 0.02 C, 1.1 Zr, 1.8 Ti, 22.5 Ni, bal Co.
At 70°F: 165,000 TS, 110,000 YS; 25 El
At 1200°F 105,000 TS; 75,000 YS, 20 El
At 1300°F. 85,000 TS; 65,000 YS; 26 El.
For steam turbine blades, used where vibratory stresses are critical

Ni-VEE
M-1007, 5 Ni, 5 Sn, 2 Zn, bal Cu.
Aged. 80,000 TS; 50,000 YS, 10 El; 150 Brin.
For gears, valves, construction castings; age-hardenable, corrosion resistant

Ni-VEE 1
M-214; 88 Cu, 5 Ni, 5 Sn, 2 Zn
Cast · 50,000 TS, 22,000 YS, 40 El, 85 Brin.
Heat treated 65,000-85,000 TS, 40,000-55,000 YS; 10-8 El, 130 180 Brin
For gears, cams, valves, fine grain, heat treatable.

Ni-VEE 2
M-214, 80 Cu, 5 Ni, 5 Sn, 5 Pb, 5 Zn
Cast 40,000 TS, 20,000 YS, 20 El, 80 Brin
Heat treated 50,000 TS, 30,000 YS, 5 El; 130 Brin
For pressure castings, valves, fittings, plumbing parts, fine grain, pressure tight.

Ni-VEE 3
M-214, 80 Cu, 5 Ni, 5 Sn, 10 Pb
Cast 35,000 TS, 20,000 YS; 10 El, 80 Brin
Heat treated: 40,000 TS, 25,000 YS, 5 El, 110 Brin
For bearings, bushings, acid resistant castings; pressure tight, fine grain.

Ni-VEE 4
M-214, 70 Cu, 5 Ni, 5 Sn, 20 Pb
Cast. 25,000 TS, 18,000 YS, 10 El; 70 Brin.
Heat treated 30,000 TS, 22,000 YS, 5 El; 80 Brin.
For bearings, bushings, acid resistant castings; pressure tight, fine grain.

Ni-Vee TYPE A.
M-68, 88 Cu, 5 Ni, 5 Sn, 2 Zn.
Cast · 50,000 TS, 22,000 YS, 40 El; 50 RA; 85 Brin.
Tempered: 65,000 TS, 40,000 YS; 10 El; 130 Brin.
Heat treated · 85,000 TS, 55,000 YS; 10 El; 26 RA; 180 Brin.
For machine tools, cams, rollers, guides, gears; age-hardenable, corrosion resistant

Ni-VEE TYPE B.
M-68; 87 Cu, 5 Ni, 5 Sn, 1 Pb, 2 Zn.
Cast: 45,000 TS; 20,000 YS; 30 El; 80 Brin.
Tempered: 60,000 TS; 30,000 YS; 8 El; 120 Brin.
For machine tools, cylinders, cams, gears, rollers; age-hardenable, corrosion resistant.

Ni-VEE TYPE C.
M-68; 80 Cu, 5 Ni, 5 Pb, 5 Zn, 5 Sn.
Cast: 40,000 TS; 20,000 YS; 15 El; 15 RA; 80 Brin.
Tempered: 50,000 TS; 30,000 YS; 5 El; 2.5 RA; 130 Brin.
For pressure castings, pumps, valves, fittings; age-hardenable, corrosion resistant.

Ni-VEE TYPE D.
M-68; 80 Cu, 5 Ni, 5 Sn, 10 Pb
Cast: 35,000 TS; 20,000 YS, 10 El; 10 RA; 80 Brin
Tempered: 40,000 TS; 25,000 YS, 2 El, 3 RA, 110 Brin.
For bearings, bushings, liners; age-hardenable, corrosion resistant.

Ni-VEE TYPE E.
M-68; 70 Cu, 5 Ni, 5 Sn, 20 Pb
Cast: 25,000 TS, 18,000 YS; 5 El, 5 RA, 70 Brin
Tempered: 30,000 TS; 22,000 YS, 2 El, 2 RA; 80 Brin.
For bearings, bushings, liners, age-hardenable, corrosion resistant.

NI-VEE L2.
M-1007; 5 Ni, 5 Sn, 2.5 Pb, 0.5 max Zn, bal Cu.
Cast. 44,000 TS; 23,000 YS; 30 El, 92 Brin
Heat treated: 55,000 TS, 40,000 YS; 10 El, 135 Brin.
For gears, bushings, bearings, construction castings, fine grain, heat treatable, good castability

NI-VEE L2-Z2.
M-1007; 5 Ni, 5 Sn, 2.5 Pb, 2 max Zn, bal Cu
Cast: 42,000 TS; 24,000 YS; 25 El; 90 Brin
Heat treated: 49,000 TS, 35,000 YS, 8 El; 120 Brin.
For gears, bearings, bushings, construction castings; fine grain, heat treatable, good castability.

Ni-VEE L5
M-1007; 5 Ni, 5 Sn, 5 Pb, 0.5 max Zn, bal Cu.
Cast: 41,000 TS; 20,000 YS; 22 El, 92 Brin
Heat treated: 47,000 TS, 35,000 YS, 7 El, 130 Brin
For bearings, bushings, acid resistant castings; fine grain, heat treatable, good castability.

NI-VEE L5-Z5
M-1007; 5 Ni, 55 Sn, 5 Pb, 5 Zn, 0.05 P, bal Cu.
Cast: 40,000 TS, 20,000 YS, 20 El, 80 Brin
Heat treated: 50,000 TS, 30,000 YS; 5 El, 120 Brin.
For pumps, valves, fittings; corrosion resistant.

Ni-VEE-L10.
M-1007; 80 Cu, 5 Sn, 10 Pb, 5 Ni.
Cast: 35,000 TS, 10 El; 80 Brin
Heat treated: 40,000 TS; 5 El, 110 Brin
For valves, fittings; pressure tight.

Ni-VEE L15.
M-1007; 5 Ni, 5 Sn, 15 Pb, 0.5 max Zn, bal Cu.
Cast: 30,000 TS; 21,000 YS, 12 El; 78 Brin.
Heat treated: 35,000 TS; 24,000 YS; 5 El; 88 Brin.
For bearings, bushings, acid resistant castings; fine grain, heat treatable, good castability.

Ni-VEE-L20.
M-1007, 70 Cu, 5 Ni, 5 Sn, 20 Pb.
Cast. 25,000 TS, 10 El; 70 Brin.
Heat treated 30,000 TS, 5 El, 80 Brin
For pressure castings, bearings, free-cutting

Ni-WELD
M-38, 100 Ni
For welding rod for cast iron; machinable welds

NK-HITEN 60.
M-1542, M-1564, 0.16 max C, 1.35 max Mn, 0.60 max Ni, 0.30 max Mo, 0.15 max V, bal Fe.
Normalized: 85,000 min TS, 65,000 min YP, 16 min El.
Heat Treated 114,000 TS; 100,000 YS; 18-20 El
For agricultural equipment, mine and railroad cars.
High strength low-alloy constructional steel
Tough, shock resistant

NK-HITEN 60
M-1612; 0.15 C, 0.24 Si, 1.37 Mn, 0.015 P, 0.005 S, 0.004 V, bal Fe.
35 mm thick plate. 93,100 TS; 78,300 YS, 47 El
High strength low alloy steel for structural purposes

NK-HITEN 70B
M-1612, 0.010 C, 0.26 Si, 0.90 Mn, 0.008 P, 0.005 S, 0.050 Ni, 0.40 Cr, 0.21 Mo, 0.04 V, 0.001 B, bal Fe
25 mm thick plate: 109,000 TS, 98,600 YS; 43.6 El
High strength low alloy steel structural purposes

HK-HITEN 80
M-1564, 0.18 C, 1.0 Mn, 0.15-0.35 Si, 0.006 B, 0.8 Cr, 0.15-0.50 Cu, 0.6 Mo, 1.0 Ni, 0.1 V, bal Fe
Plate 114,000 min TS, 100,000 min YS, 18 min El
For mine cars, bus bodies, trailers, pressure vessels, cranes, bridges
Wear and shock resistant

NK-HITEN 80A
M-1612, 0.15 C, 0.31 Si, 0.78 Mn, 0.011 P, 0.006 S, 0.92 Cr, 0.26 Mo 0.04 V, 0.22 Cu, 0.0020 B, 0.05 Zr, bal Fe
25 mm thick plate 124,000 TS, 117,000 YS, 20 El
High strength low alloy steel structural purposes

NK HITEN 80B
M 1612, 0.11 C, 0.26 Si, 0.90 Mn, 0.008 P, 0.006 S, 0.21 Cu, 1.06 Ni, 0.45 Cr, 0.31 Mo, 0.04 V, 0.001 B, bal Fe
50 mm thick plate: 124,000 TS, 117,000 YS, 40 El
High strength low alloy steel structural purposes.

NK-HITEN 100
M-1612, 0.13 C, 0.34 Si, 0.97 Mn, 0.011 P, 0.007 S, 0.30 Cu, 0.73 Ni, 0.57 Cr, 0.49 Mo, 0.10 V, 0.0030 B, 0.05 Zr, bal Fe
25 mm thick plate 156,000 TS, 146,000 YS; 19 El.
High strength low alloy steel structural purposes.

N K I METAL
M-417
For superheated steam

NKS
M-Japan, 3.7 Al, 17.7 Ni, 27.2 Co, 6.7 Ti, bal Fe
For permanent magnets, electrical and magnetic equipment High permeability.

NKS-1
M-Japan, 8 Al, 15 Ni, 3 Cu, 1.25 Ti, 24 Co, bal Fe
Cast: 20,000 TS;
For electrical and magnetic equipment.
Similar to Alnico VI, permanent magnet

NKS MAGNET.
Japan; 8 Al, 14 Ni, 24 Co, 3 Cu.
For permanent magnets; high coercive force

NM-100.
M-1665, M-1629, M-1165; 1.25 C, 17.5 Cr, 10.5 W, 9.5 Co, 0.75 V, bal Fe.
Hardened: Room temp, 290,000 TS; 245,000 YS; 1000°F 240,000 TS; 175,000 YS.
For aircraft bearings and other bearings and parts subject to dry friction at elevated temperatures; resistant to galling, corrosion and high temperature softening and oxidation.

N.M.C.
English, 12 Ni, 5 Mn, 3.5 Cr, 0.5 C, 0.5 Si, bal Fe
For valve inserts; heat resistant

NMHG.
M-104; C, 29 Ni, 3 Cr, bal Fe.
For thermal compensation of permanent magnets, electric meters, corrosion resistant.

"NM" STEEL
M-151, M-117; 3-5 Ni, 0.3-0.7 Mo, 0.2-0.4 C, 0.3-0.5 Mn, bal Fe
250,000 TS, 210,000 YS; 8 El, 25 RA; 51 Brin.
For aircraft and automobile parts.

NOBELOY.
Au alloy
For jewelry; corrosion resistant

NOBILIUM
U.S., 65 Co, 28 Cr, 0.1 Ni, 5 Mo, 0.4 C, 1 V, 0.5 Fe, 0.1 Mn, 0.05 Si.
Cast. 168,000 TS, 88,000 YS, 4 El.
For dentures, corrosion resistant.

NO-CHAT.
M-265, 90 W, 6 Ni, 4 Cu.
Sintered. 112,000 TS; 6 El, 250 Brin
Density 16.96
Modulus of rigidity 19.2 × 10^6 psi
For boring bars, grinding quills or arbors, cut-off tools

NODULITE 60-40-18
M-850, 3.3 C, 2.5 Si, 0.7 Mn, 0.05 Mg, bal Fe.
Cast: 60,000-80,000 TS, 40,000-60,000 YS, 18-25 El, 137-192 Brin
For gears, pinions, cams, dies, idlers, track rollers, pumps
Resists thermal shock, tough, ductile iron

NODULITE 65-45-12
M-850, 3.3 C, 2.5 Si, 0.7 Mn, 0.05 Mg, bal Fe
Cast 65,000-85,000 TS, 45,000-60,000 YS, 12-20 El, 143-207 Brin
For pressure castings, pipe fittings, valves, cylinders, pump bodies
Ductile iron, tough, high strength.

NODULITE 80-55-06
M-850, 3.3 C, 2.5 Si, 0.7 Mn, 0.05 Mg, bal Fe
Cast: 80,000-100,000 TS; 55,000-75,000 YS; 6-12 El, 179-269 Brin.
For gears, cams, bearings, pistons, crankshafts, sheaves, sprockets.
Ductile iron, high strength, wear resistant, tough.

NODULITE 100-70-03.
M-850; 3.3 C, 2.5 Si, 0.7 Mn, 0.05 Mg, bal Fe
Cast: 100,000-120,000 TS, 70,000-90,000 YS, 3-10 El; 241-302 Brin.
For gears, crankshafts, pistons, camshafts, track shoes, brake drums.
Ductile iron, high strength and wear resistant, tough.

NODULITE 120-90-02
M-850; 3.3 C, 2.5 Si, 0.7 Mn, 0.05 Mg, bal Fe.
Cast: 120,000-175,000 TS; 90,000-150,000 YS; 2-7 El, 269-388 Brin.
For pinions, gears, cams, machine guides, dies, pumps. Wear resistant ductile iron.

NODULOY Type 7 C.
M-394; 8.0-9.5 Mg, 43-47 Si, 0.5-0.6 Ce, 4.5-6.5 Fe
For inoculating cast iron to nodularize the graphite making ductile iron.
Cast iron inoculant.

NODULOY Type 8 C.
M-394, 8.0-9.5 Mg, 44-48 Si, 0.5 min Ce, 1.0-3.0 Ca, bal Fe.
For inoculating cast iron to nodularize the graphite making ductile iron.
Cast iron inoculant

NODULOY Type 18 C.
M-394; 16.0-20.0 Mg, 60-65 Si, 0.5 min Ce, 1.0-3.0 Ca, bal Fe
For inoculating cast iron to nodularize the graphite making ductile iron
Cast iron inoculant.

NO-DU-MAG
M-54, 3.3 C, 10-11 Ni, 5.6 Mn, 0.17 Mg, 2.5 Si, bal Fe
Cast 53,700-62,700 TS, 40,300-49,300 YS, 8-12 El, 13-18 RA, 260 Brin
For switch gears, resistance grids, magnetic chucks
Austenitic, ductile cast iron

NOGROTH.
M-630, 1.85 T.C., 1.05 Si, 0.16 P, 1.5 Ni, 0.33 Cr, 0.35 Mn, bal Fe.
Annealed 102,000 TS, 85,000 YS, 9.5 El, 250 Brin
For pump liner, piston, valves, cast iron.

N.O.H.
M-499, C, 3 Ni, bal Fe
Annealed 90,000 TS, 60,000 YS, 20 El, 50 RA.
Heat treated 110,000 TS, 90,000 YS, 27 El, 55 RA.
For gears, shafts, tough.

NOHEET
M-581, 98 Pb, 1.4 Na, 0.11 Sb, 0.1 Sn
For bearings, metal or die cast, anti-friction metal

NOH
M-134, 20 Sn, 80 Cu
158 Brin
For piston rings

NOMAG
M-54, M-86, 3 C, 6 Mn 2.3 Si, 10 Ni, bal Fe.
Cast 22,000-26,000 TS, 158-160 Brin
For switch covers, resistance grids, austenitic, cast iron, non-magnetic

NO MR-100 BRONZE
M-1174, Cu composite
For bearings, sintered, 25-30% porosity

NON-CORRODITE NO 25
M-186; 22.2 Cr, 0.4 Ni, 1.57 Si, 1 Mn, 0.15 Cu, 0.34 C, bal Fe
For castings, corrosion resisting parts; non-corrosive, stainless

NONERODE
M-1437, 0.35 C, 5 Cr, 0.4 V, 1.5 Mo, bal Fe.
For die casting dies, punches; Type H11; oil hardened, hot work steel.

NONGRAM.
87 Cu, 11 Sn, 2-3 Zn.
35,000 TS, 16 El; 62 Brin.
For bushings, bearings, valves.

NON-GRAN BRONZE.
M-1153; Sn, bal Cu.
Sintered: 40,000 TS; 22,000 YS; 15 El; 11 RA; 80 Brin.
For bolt headers, pulleys, machinery; nongranular structure.

NON-HARDENING (VULCAN).
M-275; C, alloy, bal Fe.
For tools, drawing dies; tough

NON MAGNETIC.
M-69; 0.35 C, 12.4 Mn, 3.25 Ni, 4.15 Cr, 0.48 Mo, bal Fe
For wear resistant parts; work hardened.

NON-OXIDIZABLE.
62 Fe, 25 Cr, 10 Mn, 1.1 C, 0.95 Si.
For corrosion and heat resisting parts, abrasion resistant parts, U S P. 1,333,151, corrosion, heat and abrasion resistant

NON-PAREIL.
M-562, 78 Pb, 17 Sb, 5 Sn
24 Brin
For bearings, solders, antifriction metal; M P. 300°C.

NON-SCALING-1.
30-40 Ni, 15-20 Cr, 3.5 Si, 1.25 Cu, bal Fe
For furnace parts, heat resisting.

NON-SCALING-2
24 Ni, 24 Cr, 3 Si, bal Fe
For furnace parts; heat resisting.

NON-SCUFF.
M-1437, 0.6 C, 3.7 Cr, 1.8 V, 8.5 Mo, bal Fe
Heat treated: 290,000 TS, 238,000 YS, 0.5 El, 3 RA.
At 1000°F: 216,000 TS, 150,000 YS; 3 El; 7 RA
For hot punches, rivet sets, spike cutters, hot shear blades, headers
Type H43 hot work tool steel, tough, high wear resistance.

NONSHOCK TUNGSTEN
M-1437, 0.55 C, 1.25 Cr, 2.75 W, 0.2 V, bal Fe
Heat treated 231,000-315,000 TS, 209,000-275,000 YS; C 48-56 Rock, 9 11 El, 27-42 RA
For header and swaging dies, chipping chisels, rivet busters, track tools
Type S1 shock resisting tool steel
Good fatigue resistance

NON-SHRINK
M-233, 0.95 C, 1.25 Mn, 0.5 Cr, 0.5 W, bal Fe
For tools, dies, non-deforming

NON-SHRINK
M-334; 1.5 C, 13 Cr, 1.5 W, bal Fe.
For dies and tools, production dies, non-shrinking, oil-hardening

NON-SHRINKABLE
M-115; 0.9 C, 1.2 Mn, 0.5 Cr, 0.5 W, bal Fe
For general tools, broaches; non-deforming

NON-SHRINKABLE.
M-275; 0.9 C, 1.2 Mn, 0.5 Cr, bal Fe.
For general tools, dies; non-deforming.

NON-SHRINKABLE DRILL ROD.
M-342, M-115; 0.95 C, 1.2 Mn, 0.5 Cr, 0.5 W, 0.2 V, bal Fe
For tools, punches; non-deforming.

NON-SHRINKING PATENT.
87 Pb, 6 Sb, 6 Sn, 1.3 Cd
For impressions, type.

NONSULITE.
M-184; 0.36-0.50 C, 28 Cr, 8 Ni, bal Fe.
For heat and corrosion resistant parts; now Michiana No. 48.

NON-TARNISHABLE.
63.6 Cu, 31 Zn, 3.25 Sn, 2 Pb.
For corrosion and tarnish resisting parts; corrosion resisting

NON-TEMPERING
M 750; 0.35 C, 0.75 Mn, 0.45 Si, 0.8 Cr, 0.25 W, 0.5 Mo, bal Fe.
Water or oil hardening shock resisting tool steel.

NON-TEMPERING TOOL.
M-24, 0.35 C, 0.7 Mn, 0.8 Cr, 0.3 Mo, 0.3 Cu, bal Fe.
For chisels, punches, blacksmith tools, shock resisting

NONVAR
M-56, 0.92 C, 1.75 Mn, 0.3 Si, bal Fe
For tools, dies; oil hardening, non-deforming.

NON-WAIR
M-1724, 2.20 C, 13.0 Cr, bal Fe
Air or oil hardening non-distorting alloy tool steel, for brick molds, tire molds, thread rolling dies, hobs, gauges.

NO-OX
M-1678, C, 6 Al, Si, Mn, bal Fe
Bar Annealed B78.8 Rock, 68,000 TS; 50,000 YS, 30 El
For pack carburizing containers, baffles and flame deflectors, burners, furnace parts, retorts, muffles
High temperature alloy Aluminized Oxidation resistant to 2200°F

NO PS-10 SINTERED IRON
M-1174, Fe
For pole pieces, stators and rotors in motors, for electromagnetic uses, sintered

NO R-35 SINTERED IRON
M 1174, Fe
For bearings, sintered, 18% porosity

NORAL
M-643, 2-4 Cu, 4-6 Si, 0.3-0.7 Mn, 0.35 Ni, 0.3 Zn, 0.2 Ti, bal Al
Sand cast 23,500 TS, 11,200 YS, 3.5 El, 75 Brin.
Permanent mold 26,900 TS, 14,500 YS, 5.0 El, 85 Brin
For general purpose castings, good castability, age-hardenable

NORAL 1S
M-643, 99.5 Al
For impact extruded containers, food and chemical equipment, high corrosion resistance and high ductility

NORAL 1SC
M 643, 99.5 Al
For electrical conductors, busbars, overhead lines, high electrical conductivity

NORAL 2S
M-643, 0.1 Cu, 0.5 Si, 0.7 Fe, bal Al
Soft 11,000 TS, 7000 YS, 35 El, 20 Brin.
Hard 23,000 TS, 14,500 YS, 4 El, 44 Brin.
For chemical and brewing equipment, tanks, paneling, ductile and corrosion resistant

NORAL 3 S
M-643, 1.0-1.5 Mn, 0.15 Cu, 0.6 Si, bal Al
Soft 16,000 TS; 7000 YS, 39 El, 29 Brin.
Hard 29,000 TS, 25,000 YS; 4 El; 30 Brin
For panels, tanks, architecture, trim, food containers; wrought.

NORAL 4 S.
M-643; 1.25 Mn, 1 Mg, bal Al.
Rolled 21,000-22,000 TS; 18-27 El; 37-42 Brin.
For architectural panels, roofing, floors; wrought.

NORAL 10 S.
M-643; 0.5 Mn, 0.5 Mg, bal Al
Rolled. 12,000-13,000 TS; 25-33 El, 25-28 Brin.
For light alloy parts; extruded.

NORAL 11 S
M-643; 5.5 Cu, 0.5 Pb, 0.5 Bi, bal Al
Rolled. 24,000-26,000 TS, 23-27 El; 45-55 Brin.
For light alloy parts, screws, free machining

NORAL 13 S
M-643; 12 Si, bal Al.
Cast: 36,000 38,000 TS; 25-29 El; 70-75 Brin
For light alloy parts, die casting.

NORAL 15 S
M-643, 12.5 Zn, 1.5 Cu, bal Al.
Heat treated 44,000-46,000 TS, 30-31 El, 90-93 Brin
For architectural and marine parts, heat treatable.

NORAL 16S
M-643, 2.5 Cu, 0.3 Mg, bal Al
T6-temper 40,000 TS, 20,000 YS, 20 El, 70 Brin.
For rivets, light alloy parts, age-hardenable

NORAL 17 S
M-643, 3.5-5.0 Cu, 0.4 1.2 Mg, 0.6 Mn, bal Al.
Heat treated 50,000-54,000 TS, 42,600 YS; 15-18 El; 95-104 Brin
For structured and aircraft parts, levers, brackets; wrought, heat treatable

NORAL 19S
M 643, 4 Cu, 1.25 Mg, 2 Ni, bal Fe
Heat treated 58,200 TS, 39,200 YS, 10 El, 130 Brin
For pistons, cylinder heads, age-hardenable, high temperature application

NORAL 22 S
M 643, Cu-Mg-Mn-Si, bal Al
Heat treated 56,000-62,000 TS, 8-13 El, 120-128 Brin
For aircraft parts, wrought, heat treatable

NORAL 24 S
M 643, 4.5 Cu, 1.6 Mg, 0.6 Mn, bal Al
Heat treated 56,000-58,000 TS; 10-17 El; 100-110 Brin
For aircraft parts; wrought, heat treatable

NORAL 25 S
M-643, 0.8 Mn, 4.5 Cu, bal Al
Heat treated 58,000-28,000 TS, 37,000 YS, 19 El, 110 Brin
For aircraft parts, propellers, wrought, heat treatable

NORAL 26 S
M-643; 3.0-4.5 Cu, 1.0 max Si, 1.2 max Mn, 1.0 max Mg, bal Al.
O temper. 60,000 TS, 12,000 YS; 20 El, 80 Brin.
W-temper: 63,000 TS, 38,000 YS; 18 El; 115 Brin
T-temper: 69,500 TS, 58,000 YS, 9 El, 135 Brin.
For aircraft parts, structures, gears, levers, brackets, heat treatable, high strength.

NORAL 28S
M-643, Al alloy
Rolled: 49,300 TS, 14 El.
For machinery parts; free-cutting.

NORAL 31 S
M-643, 9-14 Si, bal Al.
20,000 TS; 30 El; 38 Brin.
For marine parts, panelling; extruded.

NORAL 33S.
M-643; 5 Si, bal Al
M-temper: 19,000 TS; 10,000 YS; 20 El; 33 Brin.
For architectural trim, welding wire; corrosion resistant.

NORAL 38 S.
M-643, 11.5 Si, 1 Cu, 1 Mg, 1 Ni, bal Al.
T6-temper: 54,000 TS, 42,000 YS; 4 El; 100 Brin
For light alloy parts, pistons, heat treatable.

NORAL 42S
M-643; 2.2 Cu, 0.85 Si, 1.2 Ni, 1.5 Mg, 1.0 Fe, 0.2 Ti, bal Al.
Heat treated 58,000 TS, 38,100 YS; 6 El; 125 Brin
For aircraft and general engineering structural parts, age hardenable, extrusions.

NORAL 50 S.
M-643; 0.6 Mg, 0.5 Si, bal Al.
Extruded 22,000 TS; 16,000 YS, 20 El; 40 Brin.
T-temper 36,000 TS, 27,000 YS; 25 El; 45 Brin.
For light alloy parts, auto bodies, panels, trim; heat treatable

NORAL 51 S
M-643, 0.6 Mg, 1 Si, 0.15 Cu, 0.6 Fe, 1.0 Mn, bal Al
Heat treated 44,000 TS, 40,000 YS, 13 El; 90 Brin
For structural, architectural and marine parts; heat treatable

NORAL 54S
M-643, 3-4 Mg, 0.15 Cu, 0.75 Fe, 0.5 Cr, 1 Mn, 0.2 Ti, bal Al
O-temper 33,500 TS, 14,500 YS, 24 El; 55 Brin.
¼H-temper 48,600 TS, 34,200 YS; 9 El; 75 Brin.
For marine parts, car bodies, shipbuilding, sea water corrosion resistant

NORAL 55 S
M-643, Cu, bal Al
Heat treated 33,000 TS, 26 El, 76 Brin
For architectural and marine parts; age-hardenable.

NORAL 57 S
M-643, 0.2 Mg, 0.25 Mn, bal Al
Extruded 24,000 TS, 11,000 YS, 30 El; 45 Brin.
For architectural and marine parts, work hardens

NORAL 58S.
M-643, 6.5-7.5 Mg, 1 Mn, 0.2 Ti, 0.15 Cu, 0.6 Si, bal Al
O-temper 44,800 TS. 20,200 YS, 18 El, 50 Brin
¼H-temper 51,500 TS, 36,000 YS
½H-temper 56,000 TS, 5 El, 70 Brin
Extruded 49,300 TS, 35 El; 85 Brin
For light weight structures, marine parts; good formability and corrosion resistance.

NORAL 62S
M-643, 1.5 Cu, 1 Mg, 0.75 Mn, 1 Si, bal Al.
S-W Temper: 53,700 TS; 33,600 YS; 17 El; 90 Brin
S-T Temper: 62,700 TS, 58,200 YS; 12 El; 120 Brin
For aircraft structures, tubular furniture; heat treatable, wrought.

NORAL 65S
M-643; 0.25 Cu, 1 Mg, 0.50 Si, 0.25 Cr, bal Al.
S-O Temper 19,000 TS; 7840 YS; 24 El;
S-W Temper. 32,500 TS; 19,000 YS; 20 El; 60 Brin
S-T Temper: 43,700 TS; 38,000 YS; 12 El; 90 Brin.
For body panels; wrought, heat treatable.

NORAL 80 S.
M-643; Al alloy.
38,000 TS; 24 El; 77 Brin.
For light alloy parts; free machining.

NORAL 100.
M-643; 99.5 min Al.
Cast· 10,000 TS; 3000 YS; 24 Brin.
For cables; commercially pure aluminum.

NORAL 111
M-643; Si, bal Al
For light alloy castings; high fluidity.

NORAL 115
M-643; Si, bal Al
For light alloy castings; high fluidity.

NORAL 123.
M-643; 5 Si, bal Al
Cast. 22,000 TS; 10,000 YS; 6 El; 50 Brin.
For light alloy castings; corrosion resistant.

NORAL 124
M-643, Si, bal Al.
For light alloy castings; high fluidity.

NORAL 125
M-643, 1.0-1.5 Cu, 0.5 Mg, 5.0 Si, 0.2 max Ti, bal Al
Cast: 30,000 TS; 20,000 YS; 3 El; 80 Brin.
Aged: 42,000 TS, 35,000 YS, 2 El; 110 Brin
For cylinder heads, valve bodies, hose couplings; age-hardenable

NORAL 126.
M-643; Si, bal Al.
For light alloy castings; corrosion resistant.

NORAL 127.
M-643; Si, bal Al
For light alloy castings; corrosion resistant

NORAL 135
M-643; Si, bal Al.
For light alloy castings; corrosion resistant.

NORAL 140
M-643; Si, bal Al.
For light alloy castings, corrosion resistant.

NORAL 150.
M-643, 10 Si, bal Al.
For light alloy castings, high fluidity.

NORAL 155
M-643, Si, bal Al
For light alloy castings.

NORAL 156
M-643, Si, bal Al
For light alloy castings.

NORAL 158
M-643, 11 Si, 3 Ni, bal Al
Sand cast 26,900 TS; 10,100 YS; 2 El
Permanent mold· 35,900 TS, 13,500 YS; 3 El.
For aircraft castings, corrosion resistant.

NORAL 160
M-643; 12 Si, 0.5 Mn, 0.6 Fe, bal Al.
Cast· 31,000 TS; 11,000 YS; 10 El, 10 RA; 60 Brin.
For general marine castings; high strength.

NORAL 161.
M-643; 0.5 Mg, 0.5 Mn, 12.5 Si, bal Al.
Aged· 27,000 TS, 16,000 YS, 1.5 El; 75 Brin.
T-Temper: 45,000 TS; 35,000 YS; 1 El; 115 Brin.
For light castings; heat treatable.

NORAL 162.
M-643; 12 Si, 1 Mg, 1 Cu, 2.5 Ni, bal Al.
Aged: 46,000 TS; 38,000 YS; 5 El; 125 Brin.
For pistons, cylinder heads; age-hardenable, high temperature use.

NORAL 165.
M-643; Si, bal Al.
For light alloy castings.

NORAL 172.
M-643; 8 Cu, 2.5 Si, bal Al.
Cast: 22,000 TS; 15,000 YS; 1 El; 65 Brin.
For light alloy castings.

NORAL 211.
M-643; Cu, bal Al.
For light alloy castings; good machinability.

NORAL 218.
M-643, 4 Cu, 1.5 Mg, 2.5 Ni, bal Al.
Aged: 45,000 TS; 35,000 YS; 1 El; 110 Brin.
For pistons, cylinder heads; age-hardenable, high temperature use.

NORAL 222.
M-643; 4.0-4.6 Cu, 0.9 max Si, 0.7 max Fe, 0.25 max Ti, bal Al.
36,000 TS
For light alloy castings; age hardened.

NORAL 224
M-643, Cu, bal Al
For castings; light alloy.

NORAL 225
M-643; Cu, bal Al.
For castings; light alloy

NORAL 226
M-643; 0.9 max Si, 0.7 max Fe, 0.25 max Ti, 4.0-4.6 Cu, bal Al
W. 34,000 TS, 18,000 YS, 10 El; 90 Brin.
T 61,000 TS, 54,000 YS, 5 El, 130 Brin
For castings, aircraft parts, gear boxes, levers age hardened, high strength

NORAL 232
M-643, Cu, bal Al
For castings, light alloy.

NORAL 234
M-643, Cu, bal Al.
For castings; light alloy.

NORAL 235
M-643, Cu, bal Al
For castings, light alloy

NORAL 236
M-643, Cu, bal Al
For castings, light alloy

NORAL 238
M-643, Cu, bal Al.
For castings, light alloy

NORAL 240.
M-643, Cu, bal Al
For castings; light alloy.

NORAL 242
M-643, Cu, bal Al.
For castings, light alloy

NORAL 244.
M-643; Cu, bal Al
For castings; light alloy.

NORAL 250.
M-643, Cu, bal Al
For castings; light alloy.

NORAL 252.
M-643; 10 Cu, 0.75 Fe, 0.25 Mg, bal Al.
T-Temper: 31,400-44,000 TS; 28,000-36,000 YS; 1 El, 125-130 Brin.
For pistons, castings; heat treatable.

NORAL 260.
M-643; 12 Cu, bal Al.
For castings; light alloy.

NORAL 305.
M-643; 1.5 Mg, 1 Si, bal Al.
T: 34,000 TS; 22,000 YS; 3 El; 85 Brin.
For castings; light alloy, age-hardenable.

NORAL 307.
M-643; Mg, bal Al.
For castings; light alloy.

NORAL 320.
M-643; 0.1 Cu, 3-6 Mg, 0.4 Mn, bal Al.
Cast: 20,200 TS; 3 El.
For gasoline flow meters; corrosion resistant.

NORAL 322
M-643; 3.7 Mg, 2 Zn, bal Al.
Cast: 26,000 TS; 17,000 YS; 5 El; 65 Brin.
For castings; corrosion resistant.

NORAL 330.
M-643; Mg, bal Al.
For castings; light alloy.

NORAL 350
M-643; 9.5-10.5 Mg, 0.35 Si, 0.25 Ti, 0.35 Fe, bal Al.
Sand cast: 40,000 TS; 25,000 YS; 13 El; 95 Brin.
Permanent mold: 47,000 TS, 29,000 YS, 18 El; 105 Brin.
For levers, brackets, marine and bus parts, hardware; age-hardenable, corrosion and shock resistant.

NORAL 450
M-643; Zn, bal Al.
For castings; light alloy.

NORAL 465.
M-643, Zn, Cu, bal Al.
For castings, light alloy

NORAL 510
M-643, Mn, bal Al.
For castings, light alloy.

NORAL 8000 S
M-643; Al alloy.
For conductors in overhead transmission lines; high electrical conductivity.

NORAL A56S.
M-643, 5 Mg, 1 Mn, 0.15 Cu, 0.6 Si, 0.75 Fe, 0.5 Cr, 0.2 Ti, bal Al.
O-temper: 40,100 TS; 18,000 YS; 28 El; 70 Brin.
¼H temper 52,600 TS; 31,400 YS, 8-11 El; 100 Brin.
For marine parts, shipbuilding, rivets; sea water corrosion resistant.

NORAL B26S.
M-643; 3.5-4.8 Cu, 0.8 Mg, 0.9 Si, 1 Fe, 1.2 Mn, 0.3 Ti, bal Al.
W-temper: 53,800 TS, 31,400 YS, 15 El; 115 Brin
For aircraft parts; high strength, fair ductility.

NORAL B51S
M-643; 1 Si, 0.6 Mg, 0.5 Mn, bal Al.
O-temper: 20,200 TS; 10,000 YS; 26 El.
W-temper: 33,600 TS; 24,600 YS; 20 El; 60 Brin.
WP-temper: 49,300 TS; 41,500 YS; 13 El; 95 Brin
For road and rail transport vehicles, bridges, cranes; heat treatable, corrosion resistant.

NORAL B54S.
M-643; 4.25 Mg, 0.75 Mn, bal Al.
Hot rolled: 43,500 TS, 29,000 YS; 20 El; 70 Brin.
O-temper: 40,400 TS; 18,000 YS; 26 El; 65 Brin.
For ship building, marine parts; good formability, corrosion resistant.

NORAL B75S.
M-643; 6 Zn, 2.5 Mg, 0.6 Cu, 0.25 Mn, 0.2 Cr, bal Al.
WP-temper: 90,000 TS; 85,000 YS; 9.5 El; 170 Brin.
For aircraft and engineering structures; heat treatable, high strength.

NORAL B116.
M-643; 0.1 Cu, 0.5 Mg, 3.5-5.5 Si, 0.5 Fe, 0.5 Mn, 0.2 Ti, bal Al.
Sand cast: 22,200 TS; 12,300 YS, 3.0 El; 65 Brin.
Permanent mold: 25,800 TS; 14,500 YS; 5.5 El; 70 Brin.
For aircraft and auto parts; age-hardened, good castability.

NORAL B320.
M-643; 5 Mg, 0.5 Mn, bal Al.
Sand cast: 22,400 TS, 13,500 YS; 4 El; 70 Brin.
Permanent mold: 31,400 TS; 13.500 YS; 12 El; 70 Brin
For architectural and ornamental hardware; corrosion resistant.

NORAL D50S.
M-643; 0.5 Mg, 0.5 Si, bal Al.
WP-temper. 29,200 TS; 23,500 YS; 12 El
For busbars; good strength and conductivity.

NORAL D57S
M-643; 1.3 Mg, bal Al
¼-H temper: 19,100 TS; 14,600 YS; 22 El; 40 Brin
½-H temper: 28,000 TS; 24,600 YS; 10 El; 63 Brin.
H-temper 37,000 TS; 31,400 YS; 5 El; 70 Brin.
For auto trim, domestic appliances; high reflectivity.

NORAL H10.
M-643, 0.4-1.5 Mg, 0.75-1.3 Si, bal Al.
W-temper: 33,600 TS; 20,200 YS; 20 El; 60 Brin.
WP-temper. 44,800 TS; 40,400 YS, 13 El; 90 Brin.
For aircraft structural members; age-hardened

NORAL M57S
M-643; 2 Mg, 0.15 Cu, 0.6 Si, 0.75 Fe, 0.5 Mn, 0.2 Ti, 0.5 Cr, bal Al
O-temper: 24,600 TS; 11,200 YS; 24 El; 48 Brin.
¼H-temper. 31,000 TS; 25,000 YS; 10 El; 63 Brin.
½H-temper: 35,000 TS, 30,900 YS; 7 El, 70 Brin.
For shipbuilding, motor car bodies, marine parts; corrosion resistant, work hardens readily.

NORAL M75 S
M-643, 1.33 Cu, 2.5 Mg, 0.25 Mn, 5.75 Zn, 0.12 Cr, bal Al
S-O Temper 28,000 TS; 12,300 YS; 20 El
S-T Temper: 76,000 TS; 65,999 YS; 12 El.
For aircraft structures; heat treatable; wrought.

NORAL C77 S
M-643; 1.75 Cu, 2 Mg, 7 Zn, 0.13 Cr, bal Al
S-T Temper. 94,000 TS, 85,100 YS; 11 El, 175 Brin.
For aircraft structures, spar booms; heat treatable.

NORAL NA17S ALCLAD
M-643; 3.5-4.5 Cu, 0.5 Mg, 0.7 Mn, bal Al.
For structures, aircraft; heat treatable.

NORAL NA22S ALCLAD.
M-643; Cu, Mg, Si, Mn, bal Al.
For structures, aircraft; heat treatable.

NORAL NA24S ALCLAD.
M-643; 4.4 Cu, 1.7 Mn, 1.5 Mg, bal Al.
For structures, aircraft; heat treatable.

NORAL NA26ST ALCLAD.
M-643; 4.2 Cu, 1.5 Mg, 0.7 Mn, bal Al.
Rolled: 50,000 TS; 8 El.
For structures, aircraft; clad.

NORANDA-1.
M-1560; 34 Zn, 66 Cu.
Hard: 74,000 TS; 60,000 YS; 8 El; B 80 Rock.
Soft: 47,000 TS; 15,000 YS; 62 El; F 64 Rock.
For grill work, radiator cores and tanks, lamp fixtures, reflectors, hardware, plumbing accessories.
Yellow brass, corrosion resistant.

NORANDA-3.
M-1560; 0.60 Pb, 33.9 Zn, 65.5 Cu
Hard: 74,000 TS; 60,000 YS; 8 El, B 80 Rock.
Soft: 49,000 TS, 17,000 YS, 57 El; F 68 Rock.
For pumps, power cylinders, liners, primers, plumbing accessories
Low-leaded brass, good machinability.

NORANDA-5.
M-1560; 20 Zn, 80 Cu.
Hard. 74,000 TS; 59,000 YS, 7 El; B 82 Rock
Soft: 44,000 TS; 14,000 YS; 50 El; F 61 Rock.
For ornamental metal work, spandrels, medallions, bellows, pump liners.
Low brass, corrosion resistant

NORANDA-6.
M-1560; 3.40 Pb, 35.35 Zn, bal Cu
Hard. 58,000 TS; 45,000 YS, 25 El, B 78 Rock
Soft: 49,000 TS; 20,000 YS, 40 El, F 68 Rock.
For hardware, gears, pinions, fasteners, screw machine products.
Free-cutting brass, corrosion resistant.

NORANDA-18.
M-1560; 0.50 Pb, 32.5 Zn, 67.0 Cu.
Hard: 75,000 TS, 60,000 YS; 7 El, B 80 Rock
Soft: 52,000 TS; 20,000 YS; 50 El, F 70 Rock
For pumps, power cylinders, liners, primers, plumbing accessories.
Low-leaded brass, good machinability

NORANDA-19
M-1560; 0.3 Mn, 1.0 Fe, 39.45 Zn, bal Cu.
Hard 83,000 TS; 55,000 YS; 25 El, B 85 Rock
Soft: 72,000 TS, 30,000 YS, 45 El, B 55 Rock
For automotive clutch discs, pump rods, shafting, valve parts, hardware
Corrosion resistant Manganese Bronze. High strength

NORANDA-20
M-1560, 1.0 Sn, 28.0 Zn, 71.0 Cu.
Soft: 53,000 TS; 22,000 YS; 65 El; F 75 Rock
For condensers, evaporators and heat exchangers, ferrules, distiller tubes.
Admiralty metal, corrosion resistant

NORANDA-24.
M-1560; 0.65 Sn, 0.12 Pb, 39.23 Zn, bal Cu.
Hard 75,000 TS; 53,000 YS; 20 El; B 82 Rock.
Soft: 57,000 TS, 25,000 YS; 47 El; B 55 Rock.
For hardware, bolts, marine parts, propeller shafts, valve stems.
Naval Brass. Corrosion resistant.

NORANDA-25.
M-1560; 10 Zn, 90 Cu.
Hard: 61,000 TS; 54,000 YS; 5 El; B 70 Rock
Soft: 38,000 TS; 12,000 YS; 45 El; F 57 Rock.
For screen cloth, weatherstripping, compacts, primer caps, costume jewelry, ornamental trim.
Commercial bronze. Corrosion resistant.

NORANDA-26.
M-1560; 5 Zn, 95 Cu.
Hard: 56,000 TS; 50,000 YS; 5 El; B 64 Rock.
Soft: 35,000 TS; 11,000 YS; 45 El, F 52 Rock.
For coins, medals, tokens, bullet jackets, jewelry, plaques, hardware.
Gilding brass Corrosion resistant

NORANDA-28
M-1560, 0.65 Sn, 0.6 Pb, 38.75 Zn, bal Cu
Hard. 75,000 TS, 53,000 YS; 20 El; B 82 Rock.
Soft: 57,000 TS; 25,000 YS; 47 El; B 55 Rock.
For marine hardware, screw machine products, valve stems.
Corrosion resistant Good machinability. Leaded Naval Brass.

NORANDA-29
M-1560, 0.65 Sn, 1.75 Pb, 37.6 Zn, bal Cu.
Hard 75,000 TS; 53,000 YS; 15 El, B 82 Rock.
Soft 57,000 TS; 25,000 YS; 40 El, B 55 Rock.
For marine hardware, screw machine products, valve stems.
Corrosion resistant Free-cutting Leaded Naval Brass.

NORANDA-30
M-1560, 1.05 Sn, 0.3 As, 27.92 Zn, bal Cu
Soft 53,000 TS, 22,000 YS, 65 El, F 75 Rock.
For condensers, evaporators, and heat exchangers, distiller tubes, ferrules
Arsenical Admiralty Metal. Corrosion resistant.

NORANDA-32
M-1560, 1.25 Sn, 0.05 P, bal Cu
Hard 65,000 TS, 50,000 YS; 8 El, B 75 Rock.
Soft 40,000 TS, 14,000 YS, 48 El; F 60 Rock
For electrical contacts, flexible hose, pole-line hardware
Corrosion resistant. Phosphor bronze Gr F.

NORANDA-35
M-1560, 8.0 Sn, 0.1 P, bal Cu
Hard 93,000 TS, 72,000 YS, 10 El, B 93 Rock
Soft 60,000 TS, 24,000 YS; 63 El, F 82 Rock
For bridge bearing plates, bellows, Bourdon tubing, clutch discs springs, sleeve bushings
Corrosion resistant, high strength Phosphor bronze Gr C

NORANDA-46
M-1560, 0.65 Sn, 35.1 Zn, bal Cu
Hard 60,000 TS, 27,000 YS; 22 El
Soft 48,000 TS, 18,000 YS, 40 El
For hardware, fixtures, pump parts
Naval Brass, cold heading, corrosion resistant.

NORANDA 53
M-1560, 0.25 As, 5.5 Al, bal Cu
Soft. 60,000 TS, 22,000 YS; 60 El, F 78 Rock
For fasteners structural components, mixing troughs, condensers
Aluminum bronze, corrosion resistant.

NORANDA-54
M-1560, 0.03 As, 2.1 Al, 20.87 Zn, bal Cu
Soft 60,000 TS, 27,000 YS. 55 El, F 77 Rock.
Hard: 85,000 TS; 60,000 YS, 15 El, B 88 Rock.
For ferrules, condenser tubes, heat exchangers and distillers
Aluminum Brass, high corrosion and erosion resistance.

NORANDA-62
M-1560; 2.0 Pb, 35.75 Zn, 62.25 Cu.
Hard: 74,000 TS; 60,000 YS; 7 El; B 80 Rock.
Soft. 49,000 TS; 17,000 YS; 52 El, F 68 Rock.
For hardware, fasteners, gears, channel plates, clock and watch cases.
High leaded brass, free cutting.

NORANDA-63.
M-1560; 1.10 Pb, 33.4 Zn, 65.5 Cu.
Hard: 74,000 TS; 60,000 YS, 7 El; B 80 Rock
Soft: 49,000 TS; 17,000 YS; 54 El; F 68 Rock.
For hardware, clock plates, fasteners, gears, channel plates.
Medium leaded brass, free cutting.

NORANDA-64
M-1560, 1.75 Pb, 31.25 Zn, 67.0 Cu.
Hard 75,000 TS; 60,000 YS; 7 El; B 80 Rock.
Soft. 52,000 TS; 20,000 YS, 50 El, F 75 Rock.
High leaded brass.

NORANDA-69.
M-1560; 30.5 Zn, 69.5 Cu
Hard. 76,000 TS, 63,000 YS, 8 El; B 82 Rock.
Soft: 47,000 TS; 15,000 YS; 62 El; F 64 Rock.
For grillwork, radiator cores and tanks, lamp fixtures, ammunition cases
High strength and ductility Cartridge brass.

NORANDA-73.
M-1560, 1.25 Mn, 28.75 Zn, bal Cu
Hard 78,000 TS, 63,000 YS, 7 El, B 87 Rock
Soft 47,000 TS, 15,000 YS; 52 El, F 75 Rock
For clutch discs, pump rods, shafting, valve stems, and bodies
Manganese Brass, corrosion resistant.

NORANDA-85
M-1560, 15 Zn, 85 Cu
Hard 70,000 TS, 57,000 YS, 5 El, B 77 Rock
Soft: 40,000 TS, 12,000 YS, 47 El, F 60 Rock.
For trim, weatherstripping, conduit, pump lines, radiator cores
Red brass, corrosion resistant

NORANDA 89
M 1560, 2.0 Pb, 8.5 Zn, bal Cu.
Hard 52,000 TS, 45,000 YS; 18 El, B 58 Rock
Soft 37,000 TS, 12,000 YS 45 El, F 55 Rock
For screws, screw machine parts, pickling crates
Free-cutting, corrosion resistant
Leaded commercial bronze.

NORANDA-92
M-1560, 1.9 Sn, 9.1 Zn, bal Cu
Hard 90,000 TS; 72,000 YS, 3 El, B 90 Rock
For heat exchangers, ferrules.
Corrosion resistant

NORANDA-102
M-1560, 99.92 min Cu
Hard 50,000 TS, 45,000 YS, 4 El; B 50 Rock.
Soft 34,000 TS, 11,000 YS, 45 El, F 45 Rock
For bus bars, conductors, wave guides, copper to brass seals
Electrolytic tough pitch copper, corrosion resistant

NORANDA-106.
M-1560, 99.9 min Cu
Hard Tube 55,000 TS, 50,000 YS; 8 El, B 60 Rock
Soft Tube 32,000 TS, 10,000 YS, 45 El; F 40 Rock
For radiators, gaskets, windings, switches, commutators, radio parts
Deoxidized copper

NORANDA-110
M-1560, 0.02 P, 99.94 min Cu
Hard Tube 55,000 TS, 50,000 YS, 8 El, B 60 Rock.
Soft Tube: 32,000 TS; 10,000 YS; 45 El, F 40 Rock.
For air conditioners, gas lines, oil burner tubes, hydraulic and oil lines.
D.H.P. copper, phosphorus deoxidized.

NORANDA-113.
M-1560, 0.02 P, 0.3 As, 99.4 min Cu.
Hard: 40,000 TS; 32,000 YS; 25 El; F 77 Rock.
For gas and oil lines, air conditioning
Arsenical copper Deoxidized.

NORANDA-136.
M-1570, M-1560; 1.75 Pb, 0.20 Sn, 39.05 Zn, bal Cu
Hard. 72,000 TS, 50,000 YS; 15 El, B 78 Rock.
Soft. 52,000 TS, 20,000 YS, 45 El; F 78 Rock.
For marine hardware, faucet handles, plumbing, bolts, fasteners.
Forging brass, free cutting, corrosion resistant

NORANDA-520
M-1560; 0.75 Mn, 0.40 Fe, 20.0 Ni, bal Cu
Soft 49,000 TS, 14,000 YS, 40 El; F 70 Rock.
For fasteners, condenser plates, pumps, valves, refrigerators, evaporators.
Cupro Nickel Corrosion resistance.

NORANDA-531
M-1560, 0.75 Mn, 0.40 Fe, 30.0 Ni, bal Cu
Soft 60,000 TS, 25,000 YS, 45 El; F 80 Rock
For fasteners, valves, pumps, refrigerators, tanks, vats
Cupro Nickel Corrosion resistant

NORANDA-555
M-1560, 18.0 Ni, 0.15 Mn, 26.85 Zn, bal Cu.
Hard 115,000 TS, 90,000 YS, 2.5 El, B 99 Rock.
For hardware, fixtures, springs, tableware, jewelry, optical goods.
Nickel Silver, 18% (B) Corrosion resistant

NORANDA 565
M-1560, 18.0 Ni, 0.15 Mn, 16.85 Zn, bal Cu
Hard 85,000 TS, 75,000 YS, 3 El, B 87 Rock.
Soft 60,000 TS, 30,000 YS; 35 El; F 90 Rock.
For optical goods, diaphragms, springs, slide fasteners, jewelry
Nickel Silver, 18% (A), Corrosion resistant

NORANDA-567.
M 1560, 9.75 Ni, 0.15 Mn, 24.85 Zn, bal Cu
Hard 86,000 TS, 75,000 YS, 4 El; B 89 Rock.
Soft 60,000 TS, 28,000 YS, 36 El; F 85 Rock.
For costume jewelry, tableware, camera parts, etching stock
Nickel Silver, 10% Corrosion resistant

NORANDA-580
M-1560, 1.5 Pb, 25.1 Zn, 12.25 Ni, 0.15 Mn, bal Cu
Hard 78,000 TS, 75,000 YS, 7 El, B 80 Rock.
Soft 55,000 TS, 18,000 YS, B 50 Rock
For costume jewelry, etching stock, camera parts, tableware
Leaded Nickel Silver, free-cutting Corrosion resistant

NORANDA-609
M-1560, 1.9 Si, bal Cu
Hard 78,000 TS; 50,000 YS, 5 El, B 80 Rock
Soft 45,000 TS, 15,000 YS; 45 El, F 70 Rock
For hydraulic pressure lines, anchor screws, bolts, pole line hardware
Low silicon bronze, corrosion and wear resistant.

NORANDA-707
M-1560, 2.0 Si, 7.15 Al, bal Cu
Soft 90,000 TS, 50,000 YS, 30 El, B 85 Rock
For marine hardware, fittings, fasteners, bushings.
Aluminum silicon bronze, high strength, corrosion resistant.

NORANDA-820.
M-1560; 5.5 Sn, 0.15 P, bal Cu.
Hard: 81,000 TS; 75,000 YS; 10 El; B 87 Rock.
Soft: 50,000 TS; 21,000 YS; 52 El; F 77 Rock.
For bridge bearing plates, bellows, Bourdon tubing, clutch discs, sleeve bushings, springs.
Tough, high strength, corrosion resistant. Phosphor bronze Gr.A.

NORANDA-1502.
M-1560; 6.25 Sn, 0.24 P, bal Cu.
Hard: 110,000 TS.
Soft: 56,000 TS;
For bridge bearing plates, bellows, springs, clutch discs.
Phosphor bronze, high strength.

NORANDA-1532.
M-1560; 7.5 Sn, 0.30 P, bal Cu.
Hard: 130,000 TS.
Soft: 60,000 TS; 24,000 YS; 65 El.
For bridge bearing plates, springs, switch parts, wire brushes.
High strength, corrosion resistant Phosphor bronze, Gr. C.

NORANDA-3111.
M-1560; 0.05 Ag, 99.9 min Cu.
Hard: 65,000 TS; 45,000 YS; 6 El; B 50 Rock.
Soft: 35,000 TS; 11,000 YS; 45 El; F 45 Rock.
For gaskets, bus bars, radio parts, windings, switches, terminals
High elect. cond. corrosion resistant. Silver bearing copper.

NORANDA-3770
M-1560; 58-61 Cu, 1.5-2.5 Pb, 0.15-0.25 Sn, bal Zn
Hard Drawn: 72,000 TS; 50,000 YS; 15 El, B 78 Rock.
Soft: 52,000 TS; 20,000 YS; 45 El; F 78 Rock
For forged marine hardware, valve stems, bolts, fasteners, plumbing. Forging brass.

NORBIDE.
M-532; 78 B, 0.14 Fe, 21 C, (B_4C).
For wire drawing dies, drilling W C die nibs, nozzles for abrasive blasting; cemented boron-carbide.

NORELCO CONTACT 15.
M-1139, 0.05-0.10 C, 0.5-1.0 Mn, 0.1-0.3 Si, bal Fe.
Welded. 75,000 TS, 65,000 YS; 35 El.
For welding electrodes; lime coated.

NORELCO CONTACT 18
M-1139; 0.08-0.15 C, 0.5-0.7 Mn, 0.1-0.2 Si, bal Fe.
For contact welding electrodes, arc welding, organic coating.

NORELCO CONTACT 20.
M-1139, 0.08-0.15 C, 0.5-0.7 Mn, 0.1-0.2 Si, bal Fe.
Welded: 67,000 TS; 53,000 YS; 25 El.
For welding electrodes; iron oxide coating.

NORIS CME.
M-1338; 0.20 C, 1.25 Mn, 1.15 Cr, bal Fe
For gears, cams, camshafts, mandrels; case hardening steel.

NORMALLOY.
M-394; 0.4 C, 0.8 Mn, 1.5 Cr, 0.2 V, bal Fe.
For crankshafts; "Vancoram" normalized alloy steel.

NORMALLOY.
M-604; 0.40-0.50 C, 0.9-1.3 Mn, 0.3-0.6 Cr, 0.05 min V, bal Fe.
Normalized: 110,000 TS; 70,000 YS; 15 El; 40 RA.
For sprockets, gear hubs; for heavy duty automotive machinery.

NORMANNA.
M-333; C, alloy, bal Fe.
For tools; oil hardening.

NORMAR.
M-289; 0.9 C, 0.5 Cr, 1.5 Mn, 0.25 Mo, bal Fe.
For dies, punches, crimpers; non-deforming, shock resistant.

NORO 30.
M-1338; 0.95 C, W, Co, Cr, V, bal Fe.
For lathe and planer tools, reamers, broaches; high speed steel.

NORO 40.
M-1338; 0.82 C, 4 Cr, 0.85 Mo, 1.6 V, 8.7 W, bal Fe.
For lathe and planer tools, hobs, reamers, taps; high speed steel.

NORO 50.
M-1338, 0.85 C, Cr, V, W, Mo, bal Fe
For lathe and planer tools, drills, hobs, taps; high speed steel

NORO 60.
M-1338, 0.86 C, 4.1 Cr, 2.5 V, 0.85 Mo, 12 W, bal Fe
For lathe and planer tools, hobs, broaches; high speed steel.

NORO 60 EXTRA.
M-1338, 1.3 C, 4.3 Cr, 0.85 Mo, 3.8 V, 12 W, bal Fe
For engraving tools, form dies, taps; high speed steel

NORO 60 SPEZIAL.
M-1338; 0.74 C, 4.1 Cr, 1.1 V, 18.5 W, bal Fe
For lathe and planer tools, reamers, hobs, taps, drills, high speed steel.

NORO EXTRA D.
M-1338; 0.35 C, 1.05 Cr, 0.18 V, 1.85 W, 0.9 Si, bal Fe
For cold work tools, upsetters, headers, dies, oil hardened, tough

NORO EXTRA L.
M-1338, 0.55 C, 1.05 Cr, 0.18 V, 1.8 W, 0.9 Si, bal Fe
For cold work tools, upsetters, headers, dies; oil hardened, tough.

NORO MKW.
M-1338, 0.38 C, Si, Cr, V, bal Fe.
For gears, pinions, shafts, bolts, crankshafts; oil hardened, shock resistant.

NORO MRO
M-1338; 0.45 C, Si, Cr, V, bal Fe.
For gears, springs, shafts, arbors, crankshafts, oil hardened, shock resistant

NORO REKORD 30
M-1338, 0.86 C, 2.8 Co, 4.3 Cr, 0.85 Mo, 2.1 V, 12 W, bal Fe.
For lathe and planer tools, reamers, hobs, taps; high speed steel

NORO REKORD 50
M-1338; 0.80 C, Co, Cr, V, Mo, W, bal Fe
For lathe and planer tools, drills, taps, reamers; high speed steel.

NORO REKORD 53.
M-1338, 0.79 C, 4.75 Co, 4.3 Cr, 0.75 Mo, 1.5 V, 18 W, bal Fe.
For lathe and planer tools, hobs, reamers, high speed steel.

NORO REKORD 53V.
M-1338; 1.3 C, W, Co, V, Cr, Mo, bal Fe.
For engraving tools, forming dies, reamers; high speed steel.

NORO REKORD 110.
M-1338; 0.76 C, 10 Co, 4.2 Cr, 0.8 Mo, 1.8 V, 18 W, bal Fe
For lathe and planer tools, cutters, reamers, hobs; high speed steel.

NORTH STAR.
M-333; C, W, bal Fe.
For dies, non-deforming.

NORTON 90-10.
M-532; 90 Ta, 10 W
High temp strength and corrosion resistance
For missile components, electronics, high temperature devices

NORTON BORON MASTER ALLOY.
M-532, 8.5 B, 2.7-3.3 Si, 81-84 Fe, 1-1.7 C, bal Ti, Al.
For steel inoculant, increase depth of hardening of steel

NORTON T-111
M-532, 90 Ta, 8 W, 2 Hf
Weldable, ductile; very high strength to weight ratio at high temperatures
For missile hardware, supersonic air and spacecraft, liquid reactors

NO-TIN SILVER FUSE.
M 1243
For solder

NOVALITE
English, 12.5 Cu, 0.3 Mg, 1.4 Ni, 0.5 Fe, 0.5 Si, bal Al
For pistons, cast.

NOVANTIOX
M-1117, 0.06 C, 19 Cr, 10 Ni, bal Fe
Annealed 85,000 TS; 35,000 YS, 60 El; 150 Brin.
For architectural molding and trim, kitchen equipment, chemical plant apparatus and processing equipment
Type 304 stainless steel, austenitic

NOVAR B.
M-1307, 0.1 max C, 17 Cr, 1.8 Mo, Ti = 7 × C, bal Fe
For welded chemical plant and oil refinery equipment, stainless, stabilized

NOVO 2
M-345, 0.55 C, 18 W, 4 Cr, 2 V, bal Fe.
For lathe and planer tools, reamers, broaches; Type T2; high speed steel.

NOVO HIGH SPEED
M-345, 0.50 C, 2.7 Cr, 15 W, 0.6 V, bal Fe
For tools, cutters, punches, dies; high speed steel, oil hardened

NOVOKONSTANT
M-297; 82.5 Cu, 3 Al, 13.5 Mn, 1 Fe
Rolled 142,200 TS, 0.5 El.
Annealed· 78,200 TS, 25 El.
For electrical resistances, heat resistant

NOVONOX-A17.
M-1307; 0.10 C, 17 Cr, 7 Ni, bal Fe
Annealed· 110,000 TS, 40,000 YS; 60 El, B 85 Rock.
Hard: 185,000 TS, 140,000 YS; 8 El; C 41 Rock.
For aircraft structural members, diaphragms, household utensils.
Type 301 stainless steel, good ductility.
Work hardens

NOVONOX-A18.
M-1307; 0.12 C, 18 Cr, 9 Ni, bal Fe.
Annealed, 90,000 TS; 40,000 YS; 50 El; B 85 Rock.
For chemical and textile plant equipment, food processing apparatus, tanks, vessels, agitators.
Type 302 Stainless steel, austenitic

NOVONOX-A18Z.
M-1307, 0.06 C, 18 Cr, 11 Ni, 0.4 Cb, bal Fe.
Annealed: 85,000 TS, 30,000 YS; 55 El; B 80 Rock.
For welded structures, chemical and pharmaceutical plant equipment.
Type 321 stainless steel, stabilized, austenitic.

NOVONOX-A18ZN
M-1307; 0.06 C, 12 Ni, 18 Cr, 0.5 Cb, bal Fe.
Annealed. 85,000 TS; 35,000 YS; 60 El; B 80 Rock.
For welded structures, chemical and pharmaceutical plant equipment.
Type 347 stainless steel, stabilized, austenitic.

NOVONOX-ALC 18
M-1307, 0.03 max C, 19 Cr, 10 Ni, bal Fe.
Annealed 77,000 TS, 30,000 YS, 60 El; 140 Brin.
For architectural trim, chemical plant equipment, food processing equipment
Type 304L stainless steel, austenitic, non-hardenable

NOVONOX-AS18
M-1307; 0.08 max C, 19 Cr, 10 Ni, bal Fe.
Annealed 85,000 TS, 35,000 YS; 60 El; 150 Brin.
For architectural trim, chemical plant equipment, tanks, food processing equipment
Type 304 stainless steel, austenitic.
Non-hardenable

NOVONOX-AS 182
M-1307, 0.05 C, 17 Cr, 11 Ni, 3 Mo, bal Fe.
Annealed. 85,000 TS, 35,000 YS, 50 El; B 80 Rock
For chemical plant equipment, kettles, agitators, evaporators, tanks, valve trim
Type 316 stainless steel, austenitic, acid resistant.

NOVONOX-AS 183.
M-1307; 0.06 C, 17 Cr, 12 Ni, 2.5 Mo, bal Fe
Annealed 80,000-90,000 TS, 30,000-40,000 YS, 40-60 El, 70-80 RA; B 78-85 Rock
For chemical plant equipment, agitators, evaporators tanks, valve trim
Type 316-319 stainless steels, austenitic, acid resistant.

NOVONOX F 13 Al
M-1307, 0.06 C, 13 Cr, 0.2 Al, bal Fe
Annealed· 70,000 TS, 40,000 YS; 30 El, 160 Brin
For annealing boxes, oil refining equipment, quenching racks
Type 405 stainless steel, ferritic

NOVONOX-F17.
M-1307: 0.10 C, 16 Cr, bal Fe
Annealed 70,000 TS, 40,000 YS; 30 El, 140 Brin.
For automotive trim, hardware, oil burners, fasteners
Type 430 stainless steel, high heat and corrosion resistance.

NOVONOX-FA26
M-1307, 0.12 C, 28 Cr, 5 Ni, 1 Mo, bal Fe.
Annealed 105,000 TS; 80,000 YS, 25 El; 230 Brin.
Ht Tr. C 45-50 Rock.
For valves, valve fittings, pumps
Type 329 stainless steel, precipitation hardening, corrosion and heat resistant

NOVONOX-T13.
M-1307; 0.20 C, 13 Cr, bal Fe.
Annealed: 95,000 TS; 50,000 YS; 25 El; B 92 Rock.
Cold Drawn: 105,000 TS; 85,000 YS; 17 El;
B 95 Rock.
For cutlery, surgical and dental equipment,
gears, shafts.
Type 420 stainless steel, hardenable.

NOVONOX-T131.
M-1307; 0.20 C, 13 Cr, 1.2 Mo, bal Fe.
Annealed: 95,000 TS; 40,000 YS; 25 El, 55 RA;
B 92 Rock.
Heat Treated: 250,000 TS; 215,000 YS; 8 El;
25 RA; C 50 Rock
For cutlery, surgical instruments, ball bearings,
valves, hardware.
Corrosion resistant, hardenable.

NOVONOX-TT131.
M-1307; 0.15 C, 13 Cr, 1.2 Mo, bal Fe.
Annealed. 80,000 TS; 40,000 YS; 25 El; B 93 Rock
Heat Treated 200,000 TS, 160,000 YS,
12 El; C 45 Rock.
For surgical instruments, cutlery, table flatware,
oil refinery equipment.
Corrosion resistant, hardenable.

NOVO SPECIAL.
M-345; 0.7 C, 3-4 Cr, 18 W, 0.9 V, bal Fe.
For lathe tools; high speed steel.

NOVOSTON.
M-452, 1 5-5.0 Ni, 7-9 Al, 11-13 Mn, 2-4 Fe, bal Cu.
Cast.
For ship propellers; Al bronze, corrosion resistant.

NOVO SUPERIOR
M-345; 0 80 C, 0.17 Mn, 2 60 Cr, 18 63 W,
1.01 V, bal Fe
For tools, lathe and cutting tools, taps,
drills, reamers; high speed steel.

NOVO SUPERIOR VANADIUM.
M-345; 1 05 C, 4 Cr, 3 V, 18 W, bal Fe
For reamers, taps, broaches, drills; Type 23;
high speed steel.

NOVOTHERM 8A.
M-1332, 0.12 max C, 0.6 Si, 18 Cr, 10 Ni, Ti,
bal Fe.
Annealed 78,000-108,000 TS, 38,000 YS; 40 El;
140-190 Brin.
For welded chemical plant equipment;
austenitic, resists scaling to 800°C.

NOVOTHERM 8F
M-1332; 0 10 max C, 0.8 Si, 0 8 Al, 6 5 Cr, bal Fe
Annealed: 64,000-85,000 TS, 36,000 YS; 20 El;
140-185 Brin
For oil refinery equipment, AISI 501 and 502;
resists scaling to 800°C.

NOVOTHERM 9F
M-1332; 0 10 max C, 1 2 Si, 1 0 Al, 13 Cr, bal Fe
Annealed· 72,000-92,000 TS, 43,000 YS;
15 El; 160-205 Brin.
For oil refinery equipment, resists scaling to 950°C

NOVOTHERM 10A.
M-1332; 0 15 max C, 2 Si, 20 Cr, 12 Ni, bal Fe
Annealed· 85,000-108,000 TS, 43,000 YS;
40 El; 145-190 Brin
For heat treating boxes, furnace parts; AISI 309,
austenitic, resists scaling to 1050°C.

NOVOTHERM 10F.
M-1332; 0.10 max C, 1.0 Si, 1 0 Al, 18 Cr, bal Fe
Annealed: 72,000-92,000 TS; 43,000 YS, 12 El;
165-210 Brin.
For oil refinery equipment; AISI 405;
resists scaling to 1050°C.

NOVOTHERM 11FA.
M-1332; 0.20 max C, 1.0 Si, 25 Cr, 4.0 Ni, bal Fe.
Annealed. 85,000-107,000 TS; 58,000 YS;
25 El; 175-200 Brin
For heat treating boxes, furnace parts,
oil refinery equipment; AISI 446;
resists scaling to 1100°C.

NOVOTHERM 12A
M-1332, 0 15 max C, 2 Si, 25 Cr, 20 Ni, bal Fe.
Annealed· 85,000-108,000 TS; 43,000 YS; 40 El;
175-190 Brin.
For furnace parts and equipment; AISI 310;
austenitic, resists scaling to 1200°C.

NOVOTHERM 12F.
M-1332; 0 10 max C, 1 5 Si, 1 5 Al, 24 Cr, bal Fe.
Annealed 72,000-92,000 TS; 50,000 YS; 10 El;
170-215 Brin
For oil refinery equipment, resists scaling to 1200°C.

NOVOTHERM 70
M-1307, 0 12 max C, 0.8 Al, 6.5 Cr, bal Fe.
For oil refinery equipment;
heat and creep resistant

NOVOTHERM 85
M-1307, 0.12 max C, 1 2 Si, 1 Al, 13 Cr, bal Fe.
Annealed. 75,000 TS; 40,000 YS; 35 El;
70 RA; 155 Brin.
For oil refinery equipment,
heat and creep resistant.

NOVOTHERM 100
M-1307; 0 12 max C, 1 Si, 1 Al, 18 Cr, bal Fe.
Annealed 80,000 TS, 50,000 YS, 25 El, 50 RA,
150 Brin.
For oil refinery equipment, heat and creep resistant

NOVOTHERM 105
M-1307, 0 15 C, 2 Si, 19 5 Cr, 9 5 Ni, bal Fe
Annealed· 80,000 TS, 35,000 YS; 55 El; 75 RA;
150 Brin.
For chemical plant equipment, tanks, mixers, filters;
Type 302, stainless, austenitic.

NOVOTHERM 110
M-1307, 0 12 max C, 1 5 Si, 1.5 Al, 24 Cr, bal Fe.
For furnace parts, oil refinery equipment;
heat and creep resistant

NOVOTHERM 130
M-1307, 0 15 C, 2 Si, 24 Cr, 19 Ni, bal Fe
Annealed 100,000 TS, 45,000 YS; 50 El, 65 RA;
185 Brin
For furnace parts, valves, pumps, turbine parts;
Type 310, stainless, austenitic

NOVOTHERM NC36
M-1332, 0 12 max C, 1 8 Si, 16 Cr, 36 Ni, bal Fe.
Annealed 78,000 108,000 TS, 38,000 YS;
40 El, 140-185 Brin.
For furnace parts and equipment,
austenitic, resists scaling to 1100°C.

NO. X-10 COMPOSITE METAL.
M-1174, Fe composite
For machine parts, sintered

NO X-20 COMPOSITE METAL.
M-1174, Fe composite.
Hardened 500 Brin.
For machine parts; sintered, hardenable.

NOXIDA-C
M-72, 63 Ni, 16 Cr, 16 Mo, 6 max Fe.
For pharmaceutical and chemical plant equipment,
valves, pumps.
Heat and corrosion resistant.

NOXIS.
M-1115; 0.3-0.4 C, 13-15 Ni, 13-15 Cr, 2-3 W, bal Fe.
Heat treated: 107,000 TS; 50,000 YS; 40 El.
For valves; austenitic, corrosion and heat resistant.

NOXIS 4.
French; C, alloy, bal Fe.
For gas turbines;
heat, creep and oxidation resistant.

N.P.L "Y" ALLOY.
M-311, M-338; 93 Al, 2 Ni, 1.5 Mg, 4 Cu.
Chill cast. 29,000-TS; 25,000 YS; 1 El; 80 Brin.
Heat treated 43,000 TS; 34,000 YS; 3 El, 105 Brin.
For airplane castings, pistons, crankcases,
cylinder heads; corrosion resistant.

NS-1¼ Cr-½ Mo GMA
M-1507; 0.08-0.13 C, 0.55-0.80 Mn, 0.45-0.70 Si, 1.2-1.35 Cr, 0.50-0.70 Mo, bal Fe.
Welding wire for gas metal arc welding of
low alloy steels; desiged for assemblies
to be be annealed or heat treated later.

NS-1¼ Cr-½ Mo SA
M-1507, 0.08-0.13 C, 0.55-0.80 Mn, 0.25 max Si, 1.3-1.65 Cr, 0.50-0.70 Mo, bal Fe
Welding wire for submerged arc welding of
low alloy steels, designed for assemblies
to be annealed or heat treated later.

NS 2¼ Cr-1 Mo GMA.
M 1507, 0.08-0.13 C, 0.55-0.80 Mn, 0.45-0.70 Si, 2.2-2.75 Cr, 1.0-1.2 Mo, bal Fe.
Welding wire for gas metal arc welding of
low alloy steels; designed for assemblies
to be annealed or heat treated later.

NS-2¼ Cr-1 Mo SA
M 1507, 0.08-0.13 C, 0.55-0.80 Mn, 0.25 max Si, 2.40-2.75 Cr, 1.0-1.2 Mo, bal Fe.
Welding wire for submerged arc welding
of low alloy steels, designed for assemblies
to be annealed or heat treated later.

NS-2¼ Nickel
M 1507, 0.03 max C, 0.3-0.6 Mn, 2.0-2.9 Ni, bal Fe.
Welding wire for submerged arc and TIG welding
of 3½% nickel fabricated pipe for
cryogenic applications
25 ft, lbs U notch impact at −150°F.

NS-3½ Nickel
M-1507, 0.03 max C, 0.3-0.6 Mn, 2.9-3.55 Ni, bal Fe
Welding wire for submerged arc and TIG
welding of 3½% nickel fabricated pipe for
cryogenic applications
25 Ft lbs. U-notch impact at −150°F

NS-5
M-264, 50 Ni, 46 Cu, 2.2 Si, 1.9 Mn
100,00 TS; 82,500 YS; 2 El; 300 Brin
For valve seats and disks, wear,
abrasion and corrosion resistant

NS-18 2
M-1507, 0.10 C, 12 Mn, 0.50 Si, 18.0 Cr, 1.6 Ni, 0.34 N, bal Fe.
Low nickel austenitic stainless steel wire
Drawn (0.018" dia). 320,000 TS, 3.2 El
Non magnetic after severe cold work.
Hardens by cold work
For non-magnetic stainless steel springs

N-S 25.
M-189; 0.05-0.15 C, 19-21 Cr, 9-11 Ni, 14-16 W, 46-53 Co, 3 max Fe, 1.4 Mn
Cold drawn wire: 178,500-207,000 TS;
45,000-50,000 YS, 24-7 El.
For springs; high temperature applications

NS-25.
M-1507; 0.05-0.15 C, 1-2 Mn, 19-21 Cr, 9-11 Ni, 14-16 W, 3 max Fe, bal Co.
Drawn: 178,000 TS.
Heat treated: 191,000 TS.
For springs; L605 alloy,
high temperature applications.

NS-60M.
M-1507; 0.15 max C, 4 max Mn, 2.5 max Fe, 1.25 max Si, 62-69 Ni-Co, 1.25 max Al, 1.5-3.0 Ti, bal Cu.
Welding wire; as welded: 76,600 TS; 37.5 El.
For welding Monel pipe.
AWS 5.14 ASTM B304 C1. ER NiCu-7.

NS-61N.
M-1507; 0.15 max C, 1 max Mn, 1 max Fe, 0.75 max Si, 0.25 max Cu, 93 min Ni-Co, 1.5 max Al, 2.0-3.5 Ti.
Welding wire; as welded: 73,700 TS; 32.5 El.
For welding nickel, overlaying steel,
welding cast iron.
AWS 5.14 ASTM B304 C1. ER Ni-3.

NS-62I
M-1507, 0.08 max C, 1 max Mn, 6-8 Fe, 0.35 max Si, 0.50 max Cu, 70 min Ni-Co, 14-17 Cr, 1.5-3.0 Cb-Ta
Welding wire, as welded 87,900 TS; 45 El
For welding Inconel
AWS 5.14 ASTM B304 C1. ER NiCr Fe5

NS-67C.
M-1507, 0.04 max C, 1 max Mn, 0.4-0.7 Fe, 0.15 max Si, 29-32 Ni-Co, 0.2-0.5 Ti, bal Cu.
Welding wire; as welded: 54,200 TS; 37.5 El.
For welding 70/30, 80/20, 90/10 copper-nickel.
AWS A5.5 ASTM B225 C1. E CuNi

NS-82I
M-1507; 0.08 max C, 2.5-3.5 Mn, 1 max Fe, 0.5 max Si, 0.5 max Cu, 67 min Ni-Co, 0.75 max Ti, 18-22 Cr, 2-3 Cb-Ta
Welding wire, as welded: 97,100 TS; 50.5 El
For welding Inconel, 9% Ni steel,
and for overlaying steel
AWS 5.14 ASTM B304 C1 ER NiCr-3.

NS-92I
M-1507, 0.08 max C, 2.0-2.75 Mn, 8 max Fe, 0.35 max Si, 0.5 max Cu, 67 min Ni-Co, 2.5-3.5 Ti, 14-17 Cr
Welding wire, for welding dissimilar metals;
for welding 9% nickel steel
AWS 5.14 ASTM B 304 C1. ER NiCr Fe-6, AMS 5675

NS 101
M-1507; 0.10 C, 1.0 Mn, 0.55 Si, bal Fe
Welding wire: as welded 76,000 TS, 60,000 YS; 28 El, 130 Brin
For inert gas welding mild steel

NS-102
M-1507, 0.08 C, 1.95 Mn, 0.60 Si, 0.50 Mo, bal Fe.
Welding wire, as welded 102,000 TS, 84,000 YS; 21 El, 163 Brin
For inert gas welding 4130 and
some high strength steels.

NS-103
M 1507; 0.05 C, 1.25 Mn, 0.50 Si, 0.10 Al, 0.09 Zr, 0.10 Ti, bal Fe
Welding wire; as welded: 83,000 TS, 71,000 YS; 27.5 El; 140 Brin.
For improved quality welds in inert gas welding
mild steel.

NS-107.
M-1507; 0.15 C, 1.2 Mn, 0.55 Si, 0.65 Al, bal Fe.
Welding wire; as welded: 80,000 TS; 64,000 YS; 25 El; 130 Brin.
For inert gas welding oily and rusty mild steel without porosity.

NS-115.
M-1507; 0.10 C, 1.70 Mn, 1.0 Si, bal Fe.
Welding wire; as welded: 90,000 TS; 68,000 YS; 28 El; 160 Brin.
For producing neat appearing welds when inert gas welding mild steel.

NS-116.
M-1507; 0.10 C, 1.95 Cr, 0.55 Mn, bal Fe.
Welding wire; as welded: 87,000 TS; 71,000 YS; 26 El; 42 ft. lbs. Charpy V notch.
For inert gas welding of mild steel.

NS 190.
French; C, alloy, bal Fe. For heat, creep and oxidation resistant.

NS-355.
M-1507; 15.65 Cr, 4.38 Ni, 2.68 Mo, 1 Mn, 0.14 C, 0.03 P, 0 01 S, 0.32 Si, 0.12 Cu, 0.12 N, bal Fe.
Spring: 290,000-500,000 TS.
For springs; high ultimate strength, corrosion resistant.

NS-750X.
M-1507; 1 max Co, 14-17 Cr, 69 min Ni, 5-9 Fe, 0.08 max C, 0.4-1.0 Al, 2 0-2.5 Ti
Drawn (15% red.) and heat treated wire has: 190,000-205,000 TS.
Corrosion resistant
For springs operating at 550-1100°F.

N-S 1000.
M-189, 0.37-0 43 C, 4.75-5.25 Cr, 1.2-1.4 Mo, bal Fe.
Drawn: 200,000 TS; 1-2 El.
For dies, tools; oil or air hardened.

NS-A286.
M-1507; 13.5-16 Cr, 24-27 Ni, 1.0-1.75 Mo, 0.35 max Al, 1.75-2.25 Ti, 0 10-0 50 V, bal Fe.
Drawn (68% red.) and heat treated wire has· 210,000-236,000 TS.
Austenitic, corrosion resistant.
For springs operating at 600-1000°F.

NSCD.
French: 0 03 C, 18 Cr, 16 Ni, 3 Cu, 6 Mo, bal Fe
For chemical plant equipment; corrosion resistant.

NS-L605.
M-1507; 50 Co, 19-21 Cr, 9-11 Ni, 3 max Fe, 0 05-0.15 C, 14-16 W
Drawn (28% red.) and heat treated wire has: 205,000-225,000 TS.
Corrosion resistant.
For springs operating at 1100-1500°F range; for wire holding parts together for dip brazing at 1400°F.

N-S STAINLESS STEEL WELDING WIRE.
M-1507;
Welding wire of 22 stainless compositions for arc welding stainless steels, bare wire

NTK-M7.
M-1577; 9-11 Cr, 16-18 Ni, 6-8 Mo, 0.06 max C, 1 0 max Si, 2.0 max Mn, 0.03 max S & P, bal Fe.
Rolled: 106,000 TS; 86,000 YS; 34 El; 43 RA.
Annealed: 79,000 TS; 35,000 YS, 60 El; 62 RA.
For chemical and food processing equipment, pumps, impellers.
Stainless. Resists organic chlorination media.
Resists moderate concentrations of hot HCl.

NTK-T1.
M-1577; 1-3 Mo, bal TiC.
Sintered: 120,000-140,000 Tr. S; Rock A 93-94.
For tools, bearings, seals.
Resists heat and wear.

NTK-T3.
M-1577; 13-16 Mo, bal TiC.
Sintered: 155,000-185,000 TS; Rock A 92-93.
For tools, bearings, seals.
Resists heat and wear.

NUALL.
M-1409; C, alloy, bal Fe.
For chuck jaws, reamers, drills; oil hardened.

NU-BRAZE III.
M-1002; Ag, P, Cu.
For brazing of non-ferrous metals, B.P. 1300°F.

NU-BRAZE VI.
M-1002; Ag, Cu, Zn, Cd.
For brazing of non-ferrous metals; M P. 1170°F.

NU-BRAZE SUPER FLO.
M-1002; Ag, bal Cu.
For silver brazing; M.P. 1076°F.

NU-BRONZE.
Eng ; 95.4 Cu, 3.25 Ni, 0.25 Mn, 0.73 Si.
For corrosion resistant parts; corrosion resistant

NUCAST.
M-1075; 99 + Ni.
For nickel anodes.

NUCUT
M-1221; C, alloy, bal Fe.
For dies; oil hardened.

NU-DIE.
M-38; 0.4 C, 1 2 Si, 5 2 Cr, 1.5 Mo, bal Fe.
For die casting dies, plastic mold dies; oil hardening.

NU-DIE
M-1409; 0.4 C, 1.2 Si, 5.2 Cr, 1 5 Mo, bal Fe.
For plastic molds, die casting dies.
Oil or air hardening.

NU-DIE CASTING
M-362, 0 35 C, 5 Cr, 0 4 V, 1.5 Mo, bal Fe.
For die casting dies, punches; Type H11; hot work steel.

NU-DIE DENSIFIED HOT WORK STEEL.
M-38, 0 40 C, 0 4 Mn, 1 0 Si, 5.0 Cr, 0.55 V, 1 35 Mo, bal Fe.
Air hardened. 40-55 Rock C.
Designed for extrusion dies for aluminum and magnesium
AISI H11 Hot work tool steel.

NU-DIE V.
M-38; 0 3-0.4 C, 5 Cr, 1.4 Mo, 1.1 V, 1 Si, bal Fe.
For die casting dies for Al-base alloys; air hardening.

NUERAL.
M-555, Si, Cu, Ni, bal Al.
For cylinder heads; heat resistant.

NUERAL 132
M-555; 0.8-1.0 Cu, 13-14 Si, 1.9-2.4 Ni, bal Al.
Sand cast· 32,000 TS; 0.3 El.
For cylinder heads; heat treatable.

NUERENBERGER GOLD.
German, 2-7.5 Al, 0.2-2.5 Au, bal Cu.
For gold substitute; corrosion resistant.

NU-GILD (SCOVILL ALLOY 226).
M-102; 87.5 Cu, bal Zn.
Annealed: 40,000 TS; 44 El.
Hard: 65,000 TS; 5 El.
For fasteners, jewelry; deep drawing.

NUGILD.
M-103; 13 Zn, bal Cu.
Soft: 43,000 TS; 56 Brin.
½ Hard: 54,000 TS; 116 Brin.

NU-GOLD.
Eng; 87.73 Cu, 12.22 Zn.
For jewelry, ornaments; red brass.

NULOY.
M-288; 0.3 C, 1.5 Ni, 0.8 Cr, bal Fe.
For steel castings; tough.

NUMETAL.
M-1; 77 Ni, 4.5 Cu, 1.5 Cr, bal Fe.
For audio transformers, sensitive relays; high permeability.

NU-MOL.
M-1062; 0.9 C, alloy, bal Fe.
For hacksaws; tough.

NU-PYR-LOY.
M-1432; C, alloy, bal Fe.
Heat treated: 309,000-342,000 TS; 264,000-282,000 YS; 570-600 Brin.
For pneumatic and shock tools, chisels, shear blades; tough and shock resistant, oil hardened.

NURAL.
M-1548; 0.2-1.0 Si, 0.2-0.5 Mn, 3.0-12.0 Mg, bal Al.
Chill Cast: 32,000-37,000 TS; 5-10 El; 78-80 Brin.
For aircraft fittings, car frames, marine parts, lever brackets, hardware, general housings.
Permanent mold and die cast, corrosion resistant.

NURAL 25
M-555; 1-2 Mg, 5-6 Si, 0.1-0.4 Mn, 0.7 Fe, 0.5 Cu, 0.2 Ti, 0.2 Zn, bal Al.
Sand. 19,000 TS; 14,000 YS; 3 El.
Cast: 26,000 TS, 19,000 YS; 1 El
Hardened: 40,000 TS; 36,000 YS; 1 El.
For sand and permanent mold castings; hardenable

NURAL 30.
M-555; 6-7.5 Cu, 0.5-2.0 Si, bal Al
Sand cast: 18,000-28,000 TS, 2.0-0.8 El.
For light alloy parts; non-hardenable

NURAL 43
M-555; 4.5-6 Si, bal Al.
Sand cast 18,000-24,000 TS; 5-2 El.
For light alloy parts; corrosion resistant

NURAL 43.
M-1548, 4.5-6.0 Si, 1.2 Fe, bal Al.
Sand Cast: 17,000-24,000 TS; 2-5 El; 42-50 Brin.
Die Cast: 20,000-28,000 TS; 3-5 El; 50-60 Brin.
For marine castings, manifolds, meter housings, carburetors, food handling equipment.
Sand, permanent mold and die cast.

NURAL 77
M-555, 4-7 Cu, 4-6 Zn, 1-3 Si, 1.5 max Fe, bal Al.
Sand cast: 18,000-25,000 TS; 2-0.5 El.
For light alloy parts; heat treatable.

NURAL 85
M-555; 2-4 Cu, 5-7 Si, 0.4-0.6 Mn, bal Al.
Chill cast: 28,000-35,000 TS; 4.5-1.0 El.
For light alloy parts; heat treatable

NURAL 85 S.
M-555; 2-3 Cu, 4-6 Si, 2.0 max Fe, 0.5 max Mn, bal Al.
Sand cast: 20,000-27,000 TS; 4-1 El.
For light alloy parts; heat treatable.

NURAL 93.
M-555, 4-4.5 Cu, 1.5-2.5 Si, 3-4.5 Ni, bal Al.
Sand cast: 20,000-26,000 TS; 1.2-0.5 El.
For light alloy parts; heat treatable.

NURAL 122.
M-555; 9.5-10.2 Cu, 0.15-0.35 Mg, 0.8-1.5 Fe, bal Al.
Sand cast: 22,000-30,000 TS; 1.5-0.3 El.
For light alloy parts; non-hardenable.

NURAL 122.
M-1548; 9.5-10.2 Cu, 0.15-0.35 Mg, 0.8-1.5 Fe, bal Al.
Chill Cast: 26,000-37,000 TS; 1 El; 70-90 Brin.
For sole plates for electric hand irons, general castings.
Permanent mold cast, good machinability.

NURAL 132
M-1548; 0.8-2.0 Cu, 12.5-14.2 Si, 0.8-1.0 Mg, 0.5 Fe, 0.8-2.4 Ni, bal Al.
Chill Cast: 28,000-37,000 TS; 0.5-1.2 El.
For meter cases, switch boxes, manifolds, fittings, aircraft parts.
Permanent mold cast, good castability and corrosion resistant.

NURAL 132 A.
M-555; 0.8-1.0 Cu, 12.2-12.8 Si, 0.8-1.0 Mg, 0.5 Fe, 1.9-2.4 Ni, bal Al.
Chill cast: 29,000-37,000 TS; 1.2-0.5 El.
For light alloy parts; corrosion resistant.

NURAL 132 B.
M-555; 2 Cu, 12.5 Si, 0.8-1.0 Mg, 0.5 Fe, 0.8-1.0 Ni, bal Al.
Chill cast: 29,000-37,000 TS; 1.2-0.5 El.
For light alloy parts; corrosion ressitant.

NURAL 142.
M-555; 4-4.5 Cu, 1.3-1.8 Mg, 1.8-2.2 Ni, bal Al.
Sand cast: 21,000-28,000 TS; 4-1 El.
For light alloy parts; age-hardenable.

NURAL 142
M-1548; 4.0-4.5 Cu, 1.3-1.8 Mg, 1.8-2.2 Ni, bal Al.
Chill Cast: 23,000-32,000 TS; 1-5 El; 70-85 Brin.
Heat Treated: 26,000-35,000 TS; 1-6 El; 80-110 Brin.
For cylinder heads, pistons, generator housings, fittings.
Permanent mold castings, heat treatable, for high temperature service.

NURAL 195.
M-555, 4-5.5 Cu, 0.5-1.5 Si, 0.4-1.0 Fe, bal Al
Sand cast: 23,000-36,000 TS; 8-2 El
For light alloy parts; age-hardenable.

NURAL 200.
M-555; 14-16.8 Cu, 0.5-1.0 Fe, 0.15-0.35 Mg, bal Al
Sand cast: 20,000-28,000 TS; 0.5-0.3 El
For light alloy parts; heat treatable

NURAL 511.
M-555; 4.5-5.5 Mg, 0.1-0.5 Mn, 0.6-1.5 Si, 0.2 Ti, bal Al
Sand cast 26,000 TS; 14,000 YS, 3 El, 65 Brin.
For light alloy castings; corrosion resistant.

NURAL 1761.
M-555; 0.8-1.2 Cu, 16.4-17.5 Si, 3.2-3.6 Ni, 0.5 Mn, 0.7-1.2 Mg, 0.5 Cr, bal Al
Heat treated: 28,000-36,000 TS, 0.3-0.5 El.
For auto engine pistons, permanent mold castings; low density.

NURAL 1761P.
M-555; 0.8-1.2 Cu, 16.4-17.5 Si, 3.2-3.6 Ni, 0.4-0.6 Mn, 0.7-1.2 Mg, 0.5 Cr, bal Al.
Permanent mold: 29,000-33,000 TS; 28,000-30,000 YS; 0.8-0.3 El; 90-140 Brin.
For pistons; low density.

NURAL 2361.
M-555; 0.8-1.2 Cu, 22-25 Si, 0.8-1.0 Ni, 0.7-1.2 Mg, 0.5 Cr, bal Al.
Permanent mold: 29,000-33,000 TS; 28,000-30,000 YS; 0.3-0.1 El; 90-125 Brin.
For pistons; low density.

NURAL 3210.
M-555; 0.8-1.5 Cu, 11-13 Si, 0.8-1.3 Ni, 0.8-1.3 Mg, bal Al.
Permanent mold: 31,000-35,000 TS; 26,000-30,000 YS; 1-0.3 El; 90-125 Brin.
For light alloy parts; corrosion resistant.

NURAL Al-Mg-Mn.
M-555; 0.2-1.3 Si, 0.6-1.5 Mn, 1.5-3.0 Mg, bal Al.
Chill cast: 32,000-36,000 TS; 10-5 El.
For light alloy parts; age-hardenable.

NURAL DZnAl4Cul.
M-555; 0.6-1.0 Cu, 3.7-4.3 Al, 0.02-0.05 Mg, bal Zn.
Die cast: 36,000-47,000 TS; 5-2 El; 80-100 Brin.
For housings, cases, machinery castings; Zamak 5.

NURAL GAlCu6Si3.
M-555; 4-7 Cu, 2-4 Si, 2.5 Zn, 1.1 Fe, bal Al.
Sand cast: 29,000 TS, 23,000 YS; 0.5 El; 100 Brin.
Permanent mold: 32,000 TS; 28,000 YS; 0.2 El; 110 Brin.
For light alloy castings; age hardenable.

NURAL GAlSi12.
M-555; 11-13.5 Si, 0.3-0.5 Mn, bal Al.
Sand cast: 31,000 TS; 13,000 YS; 4 El; 60 Brin.
For light alloy castings; corrosion resistant.

NUREMBERG GOLD.
90 Cu, 7.5 Al, 2.5 Au
For cheap jewelry; gold color.

NUREX.
M-89; C, Cr, Mn, bal Fe
For mill balls, linings; corrosion and abrasion resisting.

NUROX.
M-89, 3.3 C, Si, Mn, bal Fe.
For gears, shafts, housings; cast iron.

NUSHANK.
M-435, 0.45 C, 0.6 Mn, 0.4 Cr, 3.0 Ni, 0.25 Mo, bal Fe.
For tools shanks; wear resistant.

NUSITE.
M-1454; 0.9 C, 13 Co, bal Fe.
For permanent magnets, heat treated.

NUTHERM.
M-435; 0.70 C, 2 Mn, 1 Cr, 1.35 Mo, 0.30 Si, bal Fe.
For cold work tools and dies; low temperature air hardening.

NW 1.
M-459; C, Ni, bal Fe.
Water treated: 78,000-100,800 TS; 50,000-72,000 YS; 29-22 El.
For gears, shafts; water hardening.

NW 3.
M-459; C, Ni, bal Fe.
Oil treated: 85,000-114,000 TS; 65,000-85,000 YS; 24-18 El.
For gears, shafts; oil hardening, tough.

NW 5.
M-459; C, Ni, bal Fe.
Oil treated: 101,000-127,000 TS; 72,000-101,000 YS; 26-20 El.
For gears, shafts; oil hardening, tough.

N.W.S.
M-487, M-352; 0.9 C, 1.2 Mn, bal Fe.
For tools, dies; non-shrinkable.

NY.
French; 0.07-0.20 C, 0.35 Mn, 4-7 Ni, bal Fe.
Heat treated: 78,000-190,000 TS; 58,000-156,000 YS; 25-8 El.
For construction work, mine car wheels; compare with alloy Serial No. 6788.

NYBY 12-12.
M-1448; 0.08 C, 12 Cr, 12 Ni, bal Fe.
Annealed. 110,000 TS, 44,000 YS; 62 El; 65 RA; 140 Brin.
For valves.
Austenitic stainless steel, heat and corrosion resistant.

NYBY 12-12 FL.
M-1448, 0.05 max C, 12 Cr, 13 Ni, bal Fe.
Annealed 72,000 TS, 29,000 YS; 55 El; 50 RA; 160 Brin.
For pump and valve bodies.
Austenitic, corrosion resistant.

NYBY 14-12.
M-1448; 0.08-0.16 C, 12 Cr, 12 Ni, bal Fe.
For valves; corrosion resistant.

NYBY 16-13 LNb.
M-1448; 0.08 max C, 16 Cr, 13 Ni, Cb = 10 × C, bal Fe.
Annealed: 78,000 TS, 32,000 YS; 35 El; 50 RA; 190 Brin.
For welded chemical plant equipment, tanks, vessels, mixers
Austenitic stainless steel.

NYBY 16-14 LMoNbV
M-1448; 0.08 max C, 16 Cr, 14 Ni, 1.3 Mo, 0.7 V, Cb = 10 × C, 0.15 N, bal Fe.
Annealed: 78,000 TS; 39,000 YS, 30 El; 50 RA; 190 Brin.
For chemical plant equipment, acid mixers, agitators, retorts
Austenitic stainless steel

NYBY 16-16 LMoNb
M-1448; 0.08 max C, 16 Cr, 16 Ni, 1.8 Mo, Cb = 10 × C, bal Fe.
Annealed: 78,000 TS; 36,000 YS; 35 El, 50 RA; 190 Brin.
For welded structures, chemical plant equipment, tanks, acid containers.
Austenitic stainless steel.

NYBY 17-7.
M-1448, 0.12 max C, 17 Cr, 7 Ni, bal Fe.
Annealed 78,000 TS, 34,000 YS; 50 El; 55 RA; 180 Brin
For trailer and truck bodies, household utensils, diaphragms
Austenitic stainless steel type 301.

NYBY 17-12 UL.
M-1448; 0.03 max C, 17 Cr, 12 Ni, bal Fe.
Annealed: 70,000 TS; 28,000 YS; 40 El; 50 RA; 160 Brin.
For chemical plant equipment, stills, mixers, agitators, tanks
Austenitic stainless steel. Not hardenable.

NYBY 18-5-9.
M-1448; 0.10 max C, 18 Cr, 5 Ni, 9 Mn, 0.15 N, bal Fe.
Annealed: 85,000 TS; 47,000 YS; 45 El; 40 RA; 230 Brin.
For chemical plant equipment, auto and truck bodies, bus bodies.
Austenitic stainless steel Type 204. Not hardenable.

NYBY 18-8.
M-1448; 0.10 C, 18 Cr, 8 Ni, bal Fe.
Annealed: 80,000 TS; 35,000 YS; 55 El; 75 RA; 150 Brin.
For chemical plant and dairy equipment, tanks; Type 302; stainless, austenitic.

NYBY 18-8EL.
M-1448, 0.05 max C, 18 Cr, 8 Ni, bal Fe.
Annealed: 85,000 TS; 35,000 YS; 60 El, 70 RA; 150 Brin
For chemical plant equipment, tanks, mixers; Type 304; stainless, austenitic

NYBY 18-8EMo.
M-1448; 0.12 max C, 18 Cr, 10 Ni, 2.5 Mo, bal Fe.
Annealed: 85,000 TS; 35,000 YS, 50 El; 65 RA, 160 Brin.
For acid resistant chemical plant equipment; Type 316; stainless, austenitic.

NYBY 18-8H
M-1448, 0.11-0.16 C, 18 Cr, 8 Ni, bal Fe.
Annealed· 80,000 TS; 35,000 YS; 55 El; 75 RA; 150 Brin
For chemical plant and dairy equipment, tanks; Type 302; stainless, austenitic.

NYBY 18-8L
M-1448, 0.06-0.08 C, 18 Cr, 8 Ni, bal Fe.
Annealed 85,000 TS, 35,000 YS; 60 El, 70 RA; 150 Brin.
For chemical plant equipment, tanks, mixers; Type 304, stainless, austenitic

NYBY 18-8L Mo
M-1448, 0.07-0.12 C, 18 Cr, 9.5 Ni, 1.5 Mo, bal Fe
Annealed 85,000 TS; 35,000 YS; 50 El; 65 RA; 160 Brin
For acid resistant chemical plant equipment; Type 316, stainless, austenitic

NYBY 18-8LMoNb
M-1448, 0.08 max C, 17 Cr, 10 Ni, 1.6 Mo, Ti = 5 × C, bal Fe.
Annealed: 78,000 TS, 32,000 YS; 40 El; 50 RA, 190 Brin
For welded chemical plant equipment, tanks, vessels, agitators
Austenitic stainless steel, stabilized, welding grade

NYBY 18-8-LNb
M-1448, 0.08 max C, 18 Cr, 10 Ni, Cb = 10 × C, bal Fe
Annealed 78,000 TS, 31,000 YS; 40 El, 50 RA; 190 Brin.
For welded chemical plant equipment, tanks, mixers, agitators, stills.
Austenitic Type 347 stainless steel, stabilized, welding grade

NYBY 18-8 LT.
M-1448, 0.08 max C, 18 Cr, 10 Ni, Ti = 5 × C, bal Fe.
Annealed: 78,000 TS, 31,000 YS, 40 El, 50 RA; 190 Brin
For welded chemical plant equipment, tanks, vessels, agitators, mixers.
Austenitic stainless steel Type 321, stabilized, welding grade.

NYBY 18-8T.
M-1448; 0.08 max C, 18 Cr, 8 Ni, Ti, bal Fe.
Annealed: 85,000 TS; 35,000 YS; 55 El; 65 RA; 150 Brin
For welded chemical plant equipment; Type 321; stainless, austenitic.

NYBY 18-8 UL.
M-1448; 0.03 max C, 19 Cr, 11 Ni, bal Fe.
Annealed: 78,000 TS; 29,000 YS; 50 El; 55 RA, 180 Brin.
For chemical plant equipment, tanks, vessels, mixers, filters, agitators.
Austenitic stainless steel. Type 304 L, welding grade.

NYBY 18-8 UMo.
M-1448, 0.03 max C, 17 Cr, 11 Ni, 1.6 Mo, bal Fe.
Annealed· 78,000 TS; 29,000 YS; 50 El; 55 RA; 180 Brin
For chemical plant and pickeling equipment, agitators, mixers, retorts
Austenitic stainless steel, acid resistant.

NYBY 18-10 E Mo.
M-1448, 0.06 max C, 17 Cr, 11 Ni, 2.3 Mo, bal Fe.
Annealed 78,000 TS; 29,000 YS; 50 El, 55 RA, 180 Brin.
For chemical plant equipment, vats, filters, agitators, digestors, tanks.
Austenitic stainless steel, acid resistant, not hardenable

NYBY 18-10L MoNb.
M-1448, 0.08 C, 17 Cr, 12 Ni, 2.3 Mo, Cb = 10 × C, bal Fe
Annealed· 78,000 TS, 34,000 YS, 40 El; 50 RA; 190 Brin.
For welded chemical plant equipment, mixers, tanks, vessels, retorts
Type 318 stainless steel, austenitic, stabilized, acid resistant

NYBY 18-10 LMoT.
M-1448; 0.08 C, 17 Cr, 12 Ni, 2.3 Mo, Ti = 5 × C, bal Fe
Annealed. 78,000 TS, 32,000 YS, 40 El, 50 RA, 190 Brin
For welded chemical plant equipment, tanks, mixers, agitators, vessels
Austenitic stainless steel, stabilized, welding grade, not hardenable

NYBY 18-12 EMo
M-1448, 0.06 C, 17 Cr, 12 Ni, 2.8 Mo, bal Fe
Annealed· 78,000 TS, 30,000 YS, 50 El; 55 RA, 180 Brin
For acid resistant chemical plant equipment, tanks, mixers, vats
Type 316 stainless steel, austenitic, acid resistant.

NYBY 18-12 LMo
M-1448; 0.08 max C, 17 Cr, 11 Ni, 2.8 Mo, bal Fe.
Annealed 78,000 TS, 30,000 YS, 50 El, 55 RA, 180 Brin.
For acid resistant chemical plant equipment, tanks, mixers, retorts.
Type 316 and Type 319 stainless steel Austenitic, acid resistant

NYBY 18-12 LMoNb
M-1448, 0.08 max C, 17 Cr, 13 Ni, 2.8 Mo, Cb = 10 × C, bal Fe
Annealed. 78,000 TS; 30,000 YS, 40 El, 50 RA; 190 Brin
For welded chemical plant equipment, tanks, vessels, mixers, agitators
Type 318 stainless steel, austenitic, stabilized, acid resistant.

NYBY 18-12 LMoT
M-1448; 0.08 max C, 17 Cr, 13 Ni, 2.8 Mo, Ti = 5 × C, bal Fe.
Annealed· 78,000 TS; 30,000 YS, 50 RA; 190 Brin.
For welded chemical plant equipment, tanks, vessels, agitators.
Austenitic stainless steel, stabilized, welding grade.

NYBY 18-12Mo.
M-1448; 0.10 max C, 19 Cr, 12 Ni, 3.5 Mo, bal Fe.
Annealed: 90,000 TS; 40,000 YS; 45 El; 60 RA; 180 Brin.
For acid resistant chemical plant equipment; Type 317; austenitic, stainless.

NYBY 18-12 UMo.
M-1448; 0.03 max C, 17 Cr, 12 Ni, 2.8 Mo, bal Fe.
Annealed: 78,000 TS; 30,000 YS; 50 El; 55 RA; 180 Brin.
For acid resistant chemical plant equipment, tanks, mixers, vats.
Type 316 L, stainless steel, austenitic, acid resistant.

NYBY 18-14 EMo.
M-1448; 0.06 max C, 19.0 Cr, 14.0 Ni, 3.5 Mo, bal Fe.
Annealed: 78,000 TS; 29,000 YS; 45 El; 45 RA; 190 Brin.
For chemical plant equipment, vats, tanks,
Austenitic, stainless steel, acid resistant.
Type 317 stainless steel, acid resistant

NYBY 18-14 LMo.
M-1448; 0.08 C, 18.5 Cr, 13 5 Ni, 3.5 Mo, bal Fe
Annealed: 128,000 TS; 44,000 YS; 62 El; 65 RA; 160 Brin.
For acid resistant chemical plant equipment, mixers, tanks, retorts.
Austenitic stainless steel, Type 317, not hardenable.

NYBY 18-15 EMo.
M-1448; 0 06 C, 17 Cr, 15 Ni, 4 5 Mo, bal Fe.
Annealed: 78,000 TS; 29,000 YS; 45 El; 45 RA; 190 Brin.
For chemical plant equipment, vats, tanks.
Austenitic, stainless, acid resistant.
Type 317 stainless steel, not hardenable.

NYBY 20-12 L.
M-1448; 0.08 C, 20 Cr, 11 Ni, bal Fe.
Annealed: 78,000 TS; 32,000 YS; 50 El; 55 RA; 180 Brin.
For heat treating furnaces, salt pots.
Heat and corrosion resistant. Austenitic, Type 308 stainless steel.

NYBY 20-12 Si.
M-1448; 0.20 max C, 20 Cr, 12 Ni, 2 Si, bal Fe.
Annealed: 85,000 TS; 36,000 YS; 45 El; 45 RA; 190 Brin.
For heat treating furnaces and boxes, retorts, salt pots.
Austenitic. Heat and corrosion resistant Type 309B stainless steel.

NYBY 20-20
M-1448; 0.12 max C, 20 Cr, 20 Ni, bal Fe.
For valves, furnace parts and equipment; corrosion and heat resistant.

NYBY 23-14.
M-1448; 0.15 C, 23 Cr, 14 Ni, bal Fe.
Annealed: 121,000 TS; 48,500 YS; 50 El; 55 RA; 170 Brin.
For furnace parts, salt pots, oil refinery equipment.
Austenitic stainless steel. Type 309. Heat resistant.

NYBY 23-14L.
M-1448; 0.08 max C, 23 Cr, 13 Ni, bal Fe.
Annealed: 78,000 TS; 31,000 YS; 35 El; 50 RA; 190 Brin.
For heat treating boxes, furnace parts and equipment, retorts, valves.
Type 309S stainless steel. Austenitic, heat resistant.

NYBY 23-14 L Nb.
M-1448; 0 08 max C, 23 Cr, 14 Ni, Cb = 10 × C, bal Fe.
Annealed: 78,000 TS; 31,000 YS; 35 El; 50 RA; 200 Brin.
For furnace parts and equipment, welded structures and heat treating boxes, retorts.
Type 309 Cb stainless steel. Austenitic.
Weldable grade, heat resistant.

NYBY 25-21.
M-1448; 0.15 C, 25 Cr, 20 Ni, bal Fe.
Annealed· 132,000 TS, 52,500 YS, 45 El; 55 RA; 170 Brin.
For furnace parts, salt pots, heat treating boxes.
Austenitic stainless steel Type 310, heat resistant

NYBY 25-21 L
M-1448; 0.08 max C, 25 Cr, 20 Ni, bal Fe
Annealed: 78,000 TS; 31,000 YS; 45 El; 45 RA; 190 Brin.
For furnace parts and equipment, valves, pumps, gas turbine components, retorts
Type 310 S stainless steel, austenitic. Resists corrosion and oxidation.

NYBY 25-21 Si.
M-1448; 0 20 C, 25 Cr, 21 Ni, 2 Si, bal Fe.
Annealed 85,000 TS, 36,000 YS, 30 El, 35 RA; 200 Brin.
For furnace parts, heat treating boxes, retorts
Type 314 stainless steel, austenitic
Resists oxidation and carburization.

NYBY 25-24
M-1448; 0 25 max C, 25 Cr, 20 Ni, 1 5-3 0 Si, bal Fe.
For furnace parts and equipment, salt pots; Type 314; corrosion and heat resistant.

NYBY 25-24 EMo
M-1448, 0 06 C, 25 Cr, 25 Ni, 2 3 Mo, bal Fe.
Annealed 78,000 TS; 36,000 YS; 35 El; 45 RA; 180 Brin.
For furnaces, retorts, heat treating equipment.
Austenitic stainless steel Heat and acid resistant

NYBY 27-4
M-1448, 0.12 max C, 26 Cr, 4 Ni, bal Fe.
Cast· 90,000 TS; 65,000 YS; 2 El; 212 Brin
For cylinder liners, bushings, valve seats and bodies; Type CC50, heat resistant.

NYBY 27-5 Mo
M-1448, 0 10 C, 27 Cr, 5 Ni, 1.5 Mo, bal Fe.
Annealed: 138,000 TS, 101,000 YS; 29 El; 45 RA; 240 Brin
For furnace parts, retorts, heat treating boxes
Ferritic-austenitic stainless steel, heat resistant.

NYBY 0908 Mo
M-1448, 0 08 max C, 9 Cr, 1 Mo, bal Fe.
Annealed: 64,000 TS; 36,000 YS; 20 El; 50 RA; 190 Brinell.
For oil refinery equipment, heat exchangers.
Good oxidation resistance to 1400°F.
Resists sulphide corrosion.

NYBY-1408.
M-1448; 0.15 max C, 11.5-13 Cr, bal Fe.
Annealed: 75,000 TS; 40,000 YS; 35 El; 70 RA; 155 Brin
For turbine blades, dental and surgical instruments, valves; Type 410; corrosion resistant.

NYBY 1408 Al.
M-1448; 0.08 max C, 13 Cr, 0.2 Al, bal Fe.
Annealed: 58,000 TS; 31,000 YS; 20 El; 55 RA; 190 Brin.
For oil refinery equipment, stills.
Corrosion resistant. Type 405 stainless steel.

NYBY-1410.
M-1448; 0.15 max C, 11.5-13.5 Cr, 1.0 max Si, bal Fe.
Annealed: 75,000 TS; 40,000 YS; 35 El; 70 RA; 155 Brin.
For turbine blades, dental and surgical instruments, valves; Type 410; corrosion resistant.

NYBY-1410Mo.
M-1448; 0 08 C, 13 Cr, 1 Mo, bal Fe.
Annealed· 75,000 TS; 40,000 YS; 35 El; 70 RA; 155 Brin.
For oil refinery and chemical plant equipment; corrosion resistant.

NYBY-1415.
M-1448, 0 13-0 18 C, 13 Cr, bal Fe
Annealed: 80,000 TS, 42,000 YS; 33 El; 68 RA; 170 Brin
For turbine blades, valves, cutlery, surgical instruments; Type 420; corrosion resistant.

NYBY-1415
M-1448; 0.13-0.18 C, 13 Cr, bal Fe.
Annealed: 80,000 TS; 42,000 YS; 33 El; 68 RA, 170 Brin.
For turbine blades, valves, cutlery, surgical instruments, Type 420; corrosion resistant.

NYBY-1415Mo
M-1448; 0 14 C, 13 Cr, 1 Mo, bal Fe.
Annealed· 75,000 TS, 40,000 YS; 35 El; 70 RA; 155 Brin
For oil refinery and chemical plant equipment; corrosion resistant.

NYBY 1420
M-1448; 0.20 C, 14 Cr, bal Fe
Annealed. 145,000 TS, 97,000 YS; 27 El; 60 RA; 225 Brin
Heat Treated. 220,000 TS, 8 El, 510 Brin.
For turbine blades, knives, surgical instruments, cutlery
Martensitic stainless steel, Type 420

NYBY-1425
M-1448; 0 19-0.25 C, 13 Cr, bal Fe.
Annealed 95,000 TS; 50,000 YS; 25 El; 55 RA; 195 Brin
For valves, cutlery, surgical instruments, knives; Type 420, corrosion resistant.

NYBY-1435.
M-1448; 0 27-0 35 C, 13 Cr, bal Fe
Annealed: 95,000 TS, 50,000 YS, 25 El; 55 RA; 195 Brin.
For valves, cutlery, surgical instruments, knives; Type 420, corrosion resistant.

NYBY 1706
M-1448, 0 06 max C, 17 Cr, bal Fe
Annealed· 63,000 TS; 40,000 YS; 20 El; 50 RA; 180 Brinell
For chemical plant and oil refinery equipment.
Corrosion resistant. Type 430 stainless steel Ferritic

NYBY 1708.
M-1448, 0.08 max C, 17 Cr, bal Fe
Annealed· 63,000 TS; 43,000 YS; 20 El, 50 RA; 200 Brin.
For furnace parts, chemical plant equipment.
Corrosion resistant.
Type 430 stainless steel. Ferritic.

NYBY 1708 Mo.
M-1448; 0 08 max C, 17 Cr, 1 0 Mo, bal Fe.
Annealed: 65,000 TS; 36,000 YS; 20 El; 50 RA; 200 Brin.
For chemical plant and oil refinery equipment.
Ferritic, corrosion resistant, not hardenable.

NYBY 1708 Mo Nb.
M-1448; 0.08 max C, 17 Cr, 1 0 Mo, Cb = 12 × C, bal Fe.
Annealed. 65,000 TS; 36,000 YS; 20 El; 50 RA; 200 Brin.
For welded furnace parts and heat treating boxes.
Ferritic, corrosion resistant, stabilized, welding grade.

NYBY 1708 MoT.
M-1448; 0 08 max C, 17 Cr, 1.0 Mo, Ti = 7 × C, bal Fe.
Annealed: 65,000 TS; 36,000 YS; 20 El; 50 RA; 200 Brin.
For welded furnace parts, heat treatment boxes.
Ferritic, corrosion resistant, weldable.

NYBY 1708 Nb
M-1448; 0.08 max C, 17 Cr, Cb = 12 × C, bal Fe.
Annealed: 63,000 TS; 36,000 YS; 20 El; 50 RA; 180 Brin.
For welded oil refinery equipment.
Corrosion resistant. Type 430 Cb stainless steel.
Ferritic Welding grade. Stabilized.

NYBY 1708 T.
M-1448; 0.08 max C, 17 Cr, bal Fe.
Annealed 64,000 TS; 36,000 YS; 20 El; 50 RA; 180 Brinell.
For auto trim, kitchen sinks, septic tanks, builder's hardware.
Ferritic stainless steel. Not hardenable by heat treatment.

NYBY-1710.
M-1448, 0 07-0.12 C, 17 Cr, bal Fe
Annealed· 80,000 TS; 50,000 YS; 25 El; 50 RA; 150 Brin
For oil refinery equipment, oil burners and heaters; Type 430; corrosion resistant

NYBY 1710 Si.
M-1448; 0 12 max C, 17 Cr, 2 2 Si, bal Fe.
Annealed 79,000 TS; 50,000 YS; 15 El; 230 Brin.
For retorts, salt pots, furnace parts.
Ferritic, corrosion resistant Type 442.
Not hardenable

NYBY 2520
M-1448, 0 20 max C, 25 Cr, 0.15 N, bal Fe.
Annealed: 78,000 TS; 44,000 YS, 15 El; 50 RA; 230 Brin
For furnace parts, heat treating boxes.
Ferritic Type 446 stainless steel, heat resistant

NYLOID-1
M-667, Core wire of Ni and a covering containing 13 Cr, 10 Fe, Mn, Cb, Mo, bal Ni.
Weld. 96,000-101,000 TS.
For welding 9% nickel steel
Low hydrogen welding electrode.

O-6 GRAPHITIC.
M-24, 1.45 C, 0 8 Mn, 1.05 Si, 0.25 Mo, bal Fe.
For cold working, forming, shaping and drawing dies
AISI Type O6 oil hardening tool steel.

OAKES TRODALOY 1.
M-1094; 0.4 Be, 2 6 Co, bal Cu.
Cast· 90,000 TS; 50,000 YS; 10-15 El.
Wire 125,000 TS; 60,000 YS, 8-15 El.
For springs, age hardenable.

O.B. ALLOY NO. 1 A
M-94, 88 Cu, 8 Sn, 4 Zn.
Cast. 41,400 TS; 20,300 YS; 28 El; 70 Brin.
Used in conjunction with non-ferrous catenary materials; electric motor bearings; Iz-14.2.

O.B. ALLOY NO. 11.
M-94; 94 Cu, 2 Sn, 3 Pb, 4 Zn.
Cast: 31,000 TS; 11,000 YS; 35 El; 49 Brin.
For electric apparatus; free-cutting.

O.B. ALLOY NO. 16.
M-94; 95.75 Cu, 5 Sn, 0.22 Pb.
Cast: 36,300 TS; 16,400 YS; 26 El; 64 Brin.
For trolley wheels; Iz-20.

O.B. ALLOY NO 25.
M-94; 90 Cu, 7 Al, 3 Si.
Cast. 74,500 TS, 54,600 YS; 68 El; 163 Brin.
Used in conjunction with catenary construction; Iz-9 7.

O.B. ALLOY NO. 26.
M-94, 89 Cu, 6 Sn, 1.5 Pb, 3.5 Zn.
Cast: 38,000 TS; 17,000 YS; 30 El; 65 Brin.
For valves; Navy M.

OB ALLOY NO. 27.
M-94; 81 5 Cu, 14.5 Zn, 4 Si.
Cast: 65,000 TS, 34,000 YS; 26 El; 160 Brin.
For trolley shoes, valve parts; Tombasil.

OB ALLOY NO 29.
M-94; 57.5 Cu, 0 5 Sn, 0.25 Pb, 39 25 Zn, 1 Al, 1 Fe.
Cast: 77,000 TS, 31,500 YS; 26 El; 120 Brin.
For splicers, fair electrical conductivity.

O.B. ALLOY U-5
M-94; 85 Cu, 5 Sn, 5 Pb, 5 Zn.
34,750 TS; 14,800 YS, 25 El, 59 Brin.
For valves, electrical appliances; Ounce Metal.

OCTANIUM.
M-1160, 40 Co, 15 5 Ni, 20 Cr, 7 Mo, 2 Mn, 15 Fe, 0.03 Be, 0 15 C
Heat treated 368,000 TS
For fountain pen nibs; noncorrosive, non-magnetic.

ODESSA.
33.25 Ag, 42 5 Cu, 15.75 Zn, 8 5 Ni.
For silver solder; corrosion resistant.

OERDERLIN FMB.
F-1420; 0.1 C, 18 Cr, 8 Ni, 2 5-3 0 Mo, bal Fe.
Rolled 58,000-78,000 TS, 29,000-32,000 YS, 12-18 El; 170-200 Brin.
For chemical plant equipment; stainless, acid resistant, austenitic

OERDERLIN FST.
M-1420, 0 1 C, 18 Cr, 8 Ni, Si, Mn, W, bal Fe
Annealed: 65,000-85,000 TS, 36,000-40,000 YS; 15-20 El; 160-200 Brin
For chemical plant equipment, stainless, austenitic

OERSTIT 30.
M-459, 1 C, 3 Cr, bal Fe
For magnets, hardened for max permeability

OERSTIT 35
M-459, M-1496; 1 C, 4 5 Cr, 1 Mn, bal Fe.
For permanent magnets, workable, max service temperature 175°F

OERSTIT 40
M-459; 1 C, 4 Cr, 0 5 W, 2 Co, bal Fe.
For magnets; hardened for max permeability.

OERSTIT 50.
M-459; 1 C, 8 Cr, 1.2 Mo, 6 Co, bal Fe.
For magnets; hardened for max permeability.

OERSTIT 60.
M-459; 1 C, 8.5 Cr, 1.5 Mo, 10.5 Co, bal Fe.
For magnets; hardened for max permeability.

OERSTIT 70.
M-459; 1 C, 8.5 Cr, 1.5 Mo, 15.5 Co, bal Fe.
For magnets; hardened for max permeability.

OERSTIT 90G.
M-459, M-1496; 0 04 C, 22 Ni, 2 Cu, 11.5 Al, 0.5 Ti, bal Fe.
For permanent magnets; cast.

OERSTIT 90W
M-459; 0.9 C, 4.5 Cr, 0.3 Mo, 4.5 W, 30 Co, bal Fe.
For magnets.

OERSTIT 120.
M-459; 0.04 C, 27 Ni, 2 Cu, 13 Al, 0.5 Ti, bal Fe.
For permanent magnets; cast.

OERSTIT 120 Cu.
M-459; 0 04 C, 25 Ni, 13 Al, 4 Cu, bal Fe.
For magnets; cast.

OERSTIT 120 K.
M-459, 13 Al, 26 Ni, 4 Co, 3 Cu, 1 Ti, bal Fe.
For electrical and magnetic equipment.
Permanent magnet. Isotropic.

OERSTIT 130.
M-459, 0.04 C, 26 Ni, 4 5 Co, 12 Al, 4 5 Cu, bal Fe.
For magnets; cast

OERSTIT 160
M-459; 0 04 C, 24 Ni, 9.5 Co, 11 Al, 4 Cu, bal Fe
For magnets, cast.

OERSTIT 160K
M-459, M-1496, 22 Ni, 17 Co, 10 Al, 3 Cu, 1 Ti, bal Fe
For permanent magnets.

OERSTIT 160R
M-459, M-1496, 22 Ni, 14 Co, 10 Al, 3 Cu, 1 Ti, bal Fe
For permanent magnets

OERSTIT 190
M-459, M-1496, 20 Ni, 16 Co, 9 Al, 3 Cu, 1 Ti, bal Fe
For permanent magnets

OERSTIT 190 K
M-459, 10 Al, 21 Ni, 17 Co, 3 Cu, 1 Ti, bal Fe
For electrical and magnetic equipment.
Permanent magnet Anisotropic

OERSTIT 250
M-459, 0 04 C, 1 Si, 18 Ni, 25 Co, 7 Al, 3 Cu, 5.5 Ti, bal Fe
For permanent magnets; cast.

OERSTIT 260.
M-459, 7 Al, 15 Ni, 28 Co, 5 Cu, 8 Ti, bal Fe.
For electrical and magnetic equipment.
Permanent magnet Isotropic

OERSTIT 300
M 459, M-1496, 17 Ni, 24 Co, 7 5 Al, 3 Cu, 2.5 Ti, bal Fe
For permanent magnets.

OERSTIT 350.
M-459, M-1496; 15 Ni, 30 Co, 7.5 Al, 4 Cu, 5 Ti, bal Fe.
For permanent magnets.

OERSTIT 360.
M-459, 0.04 C, 15 Ni, 23.5 Co, 8 Al, 3 Cu, 1 Ti, bal Fe
For magnets; cast.

OERSTIT 400
M-459, 0 04 C, 15 Ni, 22 Co, 8 Al, 4 Cu, bal Fe.
For magnets; cast.

OERSTIT 400K
M-459, M-1496, 14 Ni, 24 Co, 8 Al, 3 Cu, 0.5 Ti, bal Fe.
For permanent magnets.

OERSTIT 400R.
M 459, M-1496; 14 Ni, 24 Co, 8 Al, 3 Cu, 0.5 Ti, bal Fe
For permanent magnets

OERSTIT 450
M-459; 7 Al, 15 Ni, 30 Co, 4 Cu, 5 Ti, bal Fe
For electrical and magnetic equipment.
Permanent magnet Anisotropic

OERSTIT 450 K
M-459, 7 Al, 14 Ni, 42 Co, 4 Cu, 8 Ti, bal Fe.
For electrical and magnetic equipment.
Permanent magnet. Anisotropic.

OERSTIT 500.
M-459, M-1496, 14 Ni, 24 Co, 8 Al, 3 Cu, 0.5 Ti, bal Fe.
For permanent magnets; high permeability.

OERSTIT 600
M-459, M-1496; 14 Ni, 24 Co, 8 Al, 3 Cu, 0.5 Ti, bal Fe
For magnets, maximum service temperature 660°F, cast and sintered alloy.

OERSTIT 700.
M-459; 21 Ni, 12 Co, 10 Al, 6 Cu, bal Fe.
For permanent magnets, high permeability

OERSTIT 800
M-459, 18 Ni, 19 Co, 9 Al, 4 Cu, 4 Ti, bal Fe.
For permanent magnets; high permeability.

OERSTIT 900 CP
M-459, 78 Pt, bal Co
For electrical and magnetic equipment
Permanent magnet Isotropic

OERSTIT 1000
M 459, 19 or 35 Co, 17.5 Ni, 6-7.5 Al, 3 Cu, 7-8 Ti, bal Fe
For magnetic and electrical equipmen:
Permanent magnet

OERSTIT SPEZIAL
M-459, C, Co, Al, Cu
For permanent magnets, high permeability

OFHC COPPER
M 558, 99.98 Cu
For electrical equipment; oxygen free, high conductivity

OFHC COPPER 101.
M-8, 99.9 + Cu
Hard 48,000 TS, 40,000 YS, 15 El, 83 Brin
Soft 32,000 TS; 10,000 YS; 50 El, 42 Brin.
For electrical apparatus, high conductivity, oxygen free

OFHC COPPER 102
M 8; 99.95 min Cu.
Hard 55,000 TS, 50,000 YS; 10 El; B 60 Rock.
Soft 32,000 TS, 10,000 YS, 55 El; F 40 Rock.
For radar and electronic components, waveguide tubes, Dumet wire, connectors.
Elect. cond 101. Corrosion resistant

OFHC SULFUR COPPER
M-8; 0.20-0.60 S, 99.90 min Cu + S.
½H-temper: 42,000 TS; 36,000 YS; 25 El, 73 Brin.
Hard. 48,000 TS; 42,000 YS, 15 El; 83 Brin.
For contact pins and inserts, screw machine products; high termal and electrical conductivity, free-cutting, corrosion resistant.

O H 38
M-841; 15 Zn, 2-3 Cu, 2 Si, bal Al.
Cast: 30,000 TS; 17,500 YS; 2.5 El; 65 Brin.
For light alloy parts, gear guards.

OHIO DIE FM.
M-115; 1.55 C, 12 Cr, 0.8 V, 0.4 Co, 0.8 Mo, bal Fe
Annealed: 105,000 TS; 60,000 YS; 13 El, 18 RA, 212 Brin
For roll threading dies, punches, gages, shears; air hardening, free-cutting.

OHIO DIE STEEL.
M-34, M-115; 1.55 C, 12 Cr, 0.85 V, 0.8 Mo, bal Fe.
105,000 TS; 60,000 YS; 13 El; 18 RA; 212 Brin
For dies, roller threading dies, punches, gages, shear blades; non-warping, wear resisting.

OHIOLOY 1045.
M 95, 0.40-0.50 C, 0.60-0.90 Mn, 0.60 max Si, bal Fe
Carbon steel casting, 3 strength ranges; 80,000 to 100,000 min TS, 40,000-70,000 min YS; 18-10 El, 163-269 Brin
Weldable; for industrial machinery and tools as pinions, sheaves, sprockets, rollers, gears.
AISI 1045; SAE 0050 A and 0050 B
Formerly Ohio 0-1-50.

OHIOLOY 1670
M-95, 0.60-0.75 C, 0.75-1.0 Mn, 0.3-0.7 Si, 1.3-1.7 Cr, 0.35-0.65 Mo, bal Fe.
Alloy steel casting, hardened to 375 min Brin
For abrasive service in cement mills and similar operations Formerly Ohio 0-16.

OHIOLOY 2300
M-95, 0.50 C, 45 Ni, 25 Cr, 1.5 Si, 1.5 Mn, W, Co, bal Fe
High temperature alloy, non-magnetic.
Cast, room temp 60,875 TS, 60,875 YS; 2 El; 220 Brin At 1800°F· 23,500 TS; 18,000 YS; 27 El.
Weldable (certain conditions), for high temperature applications, resistant to scaling and to creep; for heat treat equipment.

OHIOLOY 4130
M-95; 0.20-0.30 C, 0.75-1.0 Mn, 0.30-0.60 Si, 0.8-1.0 Cr, 0.20-0.40 Mo, bal Fe.
Low alloy steel casting, 80,000 min TS, 50,000 min YS, 22 min El; 183-224 Brin
Weldable, hardenable; for industrial machinery, ordnance, mining equipment as gears, knuckles.
ASTM A148-60 80-50, AISI 4130; SAE 080.
Formerly OHIO 0-41-30.

OHIOLOY 4140
M-95; 0.35-0.45 C, 0.75-1.0 Mn, 0.30-0.60 Si, 0.8-1.1 Cr, 0.20-0.40 Mo, bal Fe
Low alloy steel casting· 105,000 min TS; 85,000 min YS, 17 min El; 229-269 Brin.
Weldable with care, hardenable, for strong parts in industrial as gears, spindles, housings, in construction, road building, ordnance.
ASTM A148-60 105-85; AISI 4140, SAE 0105.
Formerly OHIO 0-41 40

OHIOLOY 4330
M-95, 0.26-0.32 C, 0.65-0.85 Mn, 0.6 max Si, 1.65-2.0 Ni, 0.7-0.9 Cr, 0.2-0.3 Mo, bal Fe.
Alloy steel casting, 100,000 min TS; 65,000 min YS; 17 min El; 202-248 Brin
Weldable, hardenable; for high quality castings for industrial equipment. AISI 4330

OHIOLOY 4330 E Modified OHIOLOY 4330; variations in composition, heat treatment and properties to meet certain specifications.

OHIOLOY 4330 A. Modified OHIOLOY 4330; variations in composition, heat treatment and properties to meet certain specifications.

OHIOLOY 4330 B. Modified OHIOLOY 4330; variations in composition, heat treatment and properties to meet certain specifications.

OHIOLOY 4330 C. Modified OHIOLOY 4330; variations in composition, heat treatment and properties to meet certain specifications.

OHIOLOY 8035.
M-95; 0.30-0.40 C, 1.2-1.4 Mn, 0.6 max Si, 0.2-0.3 Mo, bal Fe.
Low alloy steel casting; 90,000 min TS; 60,000 min YS; 18 min El; 192-241 Brin.
Weldable, hardenable; small casting to be hardened, or large castings not hardened, for construction equipment
Formerly OHIO 0-34A.

OHIOLOY 8035 H Same composition as OHIOLOY 8035, but with modified heat treatments and properties to meet varying industrial or government specifications.

OHIOLOY 8035 E. Same composition as OHIOLOY 8035, but with modified heat treatments and properties to meet varying industrial or government specifications.

OHIOLOY 8035 F. Same composition as OHIOLOY 8035, but with modified heat treatments and properties to meet varying industrial or government specifications.

OHIOLOY 8730.
M-95; 0.25-0.35 C, 0.75-1.0 Mn, 0.30-0.60 Si, 0.4-0.7 Ni, 0.4-0.6 Cr, 0.2-0.3 Mo, bal Fe
Low alloy steel casting: 80,000 min TS, 50,000 min YS; 22 min El, 183-229 Brin
Weldable, hardenable; for small to medium size castings to be hardened for industrial machinery, construction equipment, ordnance.
QQ-S-681d 80-50; AISI 8730; SAE 080
Formerly OHIO 0-15

OHIOLOY 8730 B. Same composition as OHIOLOY 8730 but with modified heat treatment and properties to meet varying industrial or government specifications.

OHIOLOY 8730 H. Same composition as OHIOLOY 8730 but with modified heat treatment and properties to meet varying industrial or government specifications.

OHIOLOY 8730 K Same composition as OHIOLOY 8730 but with modified heat treatment and properties to meet varying industrial or government specifications

OHIOLOY 8730 M Same composition as OHIOLOY 8730 but with modified heat treatment and properties to meet varying industrial or government specifications.

OHIOLOY 8740.
M-95; 0.35-0.45 C, 0.75-1.0 Mn, 0.3-0.6 Si, 0.4-0.7 Ni, 0.4-0.6 Cr, 0.2-0.3 Mo, bal Fe
Low alloy steel casting: 100,000 min TS; 65,000 min YS; 17 min El; 202-248 Brin
Weldable with care, hardenable; for medium size casting, usually to be hardened, for ordnance, construction equipment, mining, railroad.
AISI 8740; Formerly OHIO 0-15-45-C.

OHIOLOY 8740-O. Same composition as OHIOLOY 8740 but with modified heat treatment and properties to meet varying industrial or government specifications.

OHIOLOY 8740-S. Same composition as OHIOLOY 8740 but with modified heat treatment and properties to meet varying industrial or government specifications.

OHIOLOY A-6.
M-95; 1.0-1.2 C, 1.0 max Mn, 1.5 max Si, 25-31 Cr, 1.5 max Mo, 3-6W, 7.5 max Fe, bal Co.
Abrasion and wear resistant.
For worms, sleeves, spacers.
Reference: Stellite 6; Formerly FAHRITE C-6

OHIOLOY A-28.
M-95; 3.0 max C, 1.25 Mn, 2.0 Si, 26-30 Cr, 4.0 max Ni, bal Fe.
Abrasion resistant and corrosion resistant casting, for catalyst plates, cement mill, refinery service.
Formerly FAHRITE HC 28

OHIOLOY B.
M-95; 0.12 C, 1.0 Mn, 1.0 max Si, 1.0 max Cr, 26-30 Mo, 4.0-6.0 Fe, 0.2-0.6 V, 2.5 max Co, bal Ni.
Heat and corrosion resistant casting.
Cast 72,000 TS; 46,000 YS, 6 El.
For turbine blades, bolting material, impellers, shafting; resistant to hot hydrochloric acid.
ASTM B332-58T, Reference: Hastelloy B.
Formerly FAHRITE C-708.

OHIOLOY C.
M-95, 0.12 C, 1.0 Mn, 1.0 max Si, 15.5-17.5 Cr, 16-18 Mo, 2.5 max Co, 3.75-5.25 W, 4.5-7.5 Fe, 0.2-0.6 V, bal Ni
Heat and corrosion resistant casting.
Cast: 72,000 TS, 46,000 YS; 4 El
High temperature trays, shafts, conveyor chains, equipment for chemical plants.
ASTM B332-58T; Reference: Hastelloy C
Formerly FAHRITE C-70C

OHIOLOY C5
M-95, 0.20 max C, 0.40-0.70 Mn, 0.75 max Si, 4.0-6.5 Cr, 0.45-0.65 Mo, bal Fe.
Cr-Mo alloy steel casting, 90,000 min TS; 60,000 min YS; 18 min El; 192-241 Brin.
Weldable, hardenable, for industrial castings of larger size, pressure castings for service temperatures below 1200°F
ASTM A217-60T C5, AISI 501
Formerly OHIO 0-4-20

OHIOLOY C12
M-95, 0.20 max C, 0.35-0.65 Mn, 1.0 max Si, 8.0-10.0 Cr, 0.9-1.1 Mo, bal Fe
Cr-Mo alloy steel casting, 90,000 min TS; 60,000 min YS, 18 min El; 192-241 Brin.
Weldable, hardenable; for industrial castings, of larger size and better corrosion resistance; for use to 1200°F
ASTM A217-60T C12, Formerly OHIO 0-11-20.

OHIOLOY C-16
M-95; 0.30-0.35 C, 0.75-1.25 Mn, 0.8-1.2 Si, 16-18 Cr, 1.2-1.7 Ni, bal Fe
Annealed: 125,000 TS; 95,000 YS; 20 El; C 24 Rock
Hardenable to 180,000-200,000 TS.
For cutter bars, hammers, impellers, pump shafts, marine hardware. Abrasion and corrosion resistance.
AISI 431; Formerly FAHRITE C-16.

OHIOLOY C-355.
M-95; 0.08-0.12 C, 0.75-1.1 Mn, 0.45-0.75 Si, 14.5-15.5 Cr, 4.0-4.5 Ni, 2.0-2.6 Mo, 0.07-0.11 N, bal Fe
Age hardenable, stainless.
Cast: 150,000 TS; 95,000 YS; 10 El.
For compressor blades, aircraft castings.
Reference AM-355; Formerly C-355.

OHIOLOY C-411.
M-95; 0.30 C, 1.5 Mn, 1.0-2.0 Si, 62-66 Ni, 1.0-3.0 Cb, 26-33 Cu.
Corrosion resistant casting.
Cast: 65,000 TS; 32,500 YS; 25 El.
For marine hardware, pulp and paper equipment, valves, fasteners.
QQ-N-288 E; Reference: Monel.
Formerly FAHRITE C-95E.

OHIOLOY CA-15.
M-95; 0.15 max C, 1.0 Mn, 1.5 Si, 11.5-14.0 Cr, 1.0 max Ni, 0.5 max Mo, bal Fe.
Corrosion resistant casting, weldable.
Annealed: 90,000 TS; 65,000 YS; 18 El.
Hardenable to 189-400 Brin.
For pump casings, liners, valve trim, fittings. burner tips, skimmer ladles.
ACI CA-15; AISI 410; SAE 60410.
Formerly FAHRITE C-12.

OHIOLOY CA-40.
M-95; 0.20-0.40 C, 1.0 Mn, 1.5 Si, 11.5-14.0 Cr, 1.0 max Ni, 0.5 max Mo, bal Fe.
Corrosion resistant casting.
Annealed: 90,000 TS; 65,000 YS; 18 El.
Hardenable up to 500 Brin.
For choppers, cutting blades, cylinder liners, pump parts, molds, dies, valve trim.
ACI CA-40; AISI 420; SAE 60420.
Formerly FAHRITE C-12-40.

OHIOLOY CB-7CU.
M-95; 0.06 max C, 0.70 max Mn, 0.5-1.0 Si, 15.7-16.7 Cr, 3.5-4.75 Ni, 0.10-0.35 Cb, 2.5-3.5 Cu, bal Fe.
Corrosion resistant, age hardenable.
Cast. 170,000 TS; 155,000 YS; 10 El.
For valves, shafts, fuel controls, compressor parts, pulp and paper equipment.
ACI CB-7Cu, SAE 60432; Reference 17-4PH.
Formerly FAHRITE C-17-4C.

OHIOLOY CB-30
M-95; 0.30 C, 1.0 Mn, 1.5 Si, 18-21 Cr, 2.0 max Ni, bal Fe.
Corrosion resistant casting, weldable.
Annealed: 65,000 TS; 30,000 YS.
Hardenable up to 500 Brin.
For furnace brackets, hangers, pump parts, valve parts.
ACI CB-30; AISI 431; SAE 60442.
Formerly FAHRITE C-18.

OHIOLOY CC-50.
M-95; 0.50 C, 1.0 Mn, 1.5 Si, 26-30 Cr, 4.0 max Ni, bal Fe
Corrosion resistant casting.
Annealed: 55,000 TS.
For bushings, cylinder liners, pump casings, impellers; good corrosion resistance.
ACI CC-50; AISI 446; SAE 60446.
Formerly FAHRITE C-28.

OHIOLOY CD-4MCU.
M-95; 0.04 max C, 1 max Mn, 1 max Si, 25-27 Cr, 4.75-6.0 Ni, 1.75-2.25 Mo, 2.75-3.25 Cu, bal Fe.
Corrosion and heat resistant, age hardenable.
Cast: 110,000 TS; 95,000 YS; 10 El.
For valve trim, pumps, gears, high pressure parts, pulp and paper equipment.
ACI CD-4MCu; SAE 60328; Formerly FAHRITE C-4.

OHIOLOY CE-30.
M-95; 0.30 C, 1.5 Mn, 2.0 Si, 26-30 Cr, 8-11 Ni, bal Fe.
Corrosion resistant casting.
Annealed: 80,000 TS; 40,000 YS; 10 El.
For digestor fittings, fractionating towers, pump bodies and casings, valve bodies.
ACI CE-30; AISI 312; SAE 60312.
Formerly FAHRITE C-73.

OHIOLOY CF-3.
M-95; 0.03 max C, 1.5 Mn, 2.0 Si, 17-21 Cr, 8-12 Ni, bal Fe.
Corrosion resistant casting, weldable.
Cast: 65,000 TS; 28,000 YS; 35 El.
For autoclaves, pump parts, spray nozzles, heating coils, welded assemblies.
ACI CF-3; AISI 304L; formerly FAHRITE C-8-3.

OHIOLOY CF-3M.
M-95; 0.03 max C, 1.5 max Mn, 1.5 max Si, 17-21 Cr, 9-13 Ni, 2-3 Mo, bal Fe.
Austenitic, stainless, heat resistant.
Cast: (min.) 70,000 TS; 30,000 YS; 30 El.
For centrifuges, fittings, pump parts.
ACI CF-3M; AISI 316L; formerly FAHRITE C-8-3M.

OHIOLOY CF-8.
M-95; 0.08 C, 1.5 Mn, 2.0 Si, 18-21 Cr, 8-11 Ni, bal Fe.
Austenitic corrosion resistant casting.
Cast: 70,000 TS; 30,000 YS; 35 El.
For pump parts, valve parts, spray nozzles, filter press plates, autoclaves.
ACI CF-8; AISI 304; SAE 60304.
Formerly FAHRITE C-8-7.

OHIOLOY CF-8C.
M-95, 0.08 C, 1.5 Mn, 2.0 Si, 18-21 Cr, 9-12 Ni, Cb = 8 × %C min, bal Fe.
Stabilized austenitic stainless steel casting.
Cast. 70,000 TS; 30,000 YS; 30 El.
For pump parts, valves, stainless welded assemblies, chemical plant equipment.
ACI CF-8C, AISI 347; SAE 60347.
Formerly FAHRITE C-8Cb.

OHIOLOY CF-8M
M-95; 0.08 C, 1.5 Mn, 1.5 Si, 18-21 Cr, 9-12 Ni, 2-3 Mo, bal Fe.
Austenitic, stainless, heat resistant.
Cast: 70,000 TS, 30,000 YS; 30 El.
For agitators, spray nozzles, valve bodies, for food and chemical plants; elevated temperature equipment.
ACI CF-8M, AISI 316, SAE 60316.
Formerly FAHRITE C-8-7M.

OHIOLOY CF-16F.
M-95; 0.16 max C, 1.5 max Mn, 2 max Si, 0.17 max P, 0.04 max S, 18-21 Cr, 9-12 Ni, 1.5 max Mo, 0.20-0.35 Se, bal Fe.
Austenitic, stainless, free-machining.
Cast: (min) 70,000 TS, 30,000 YS; 25 El
For bearings, bushings, hardware, pump and machinery parts, valves.
ACI-CF; AISI 303; SAE 60303; Formerly FAHRITE C-8-16F.

OHIOLOY CF-16FA.
M-95; 0.15 max C, 1.5 max Mn, 2 max Si, 0.04 max P, 0.2-0.4 S, 18-21 Cr, 9-12 Ni, 0.4-0.8 Mo, bal Fe.
Free-machining, stainless, austenitic.
Cast: (min.) 70,000 TS; 30,000 YS; 25 El.
For bushings, bearings, hardware, pump and machinery parts, valves.
ACI-CF-16FA; AISI 303; SAE 60303a; Formerly FAHRITE CF-16 Fa.

OHIOLOY CF-20.
M-95; 0.20 C, 1.5 Mn, 2.0 Si, 18-21 Cr, 8-11 Ni, bal Fe.
Austenitic corrosion resistant casting.
Cast: 70,000 TS; 30,000 YS; 30 El.
For cylinder liners, pumps, valve parts, street markers, pulp and paper equipment.
ACI CF-20; AISI 302; SAE 60302.
Formerly FAHRITE C-8 20.

OHIOLOY CG-12.
M-95, 0.12 C, 1.5 Mn, 2.0 Si, 20-23 C, 10-13 Ni, bal Fe.
Austenitic, stainless, heat resisting.
Cast: 70,000 TS; 28,000 YS; 35 El
For pump parts, valve parts, furnace and heat treat equipment.
ACI CG-12, AISI 306; Formerly FAHRITE C-10

OHIOLOY CH-20
M-95, 0.20 C, 1.5 Mn, 2.0 Si, 22-26 Cr, 12-15 Ni, bal Fe
Austenitic, stainless, heat resisting
Cast: 70,000 TS; 30,000 YS, 30 El.
For digester fittings, valves, chemical processing equipment, furnace and heat treat parts
ACI CH-20; AISI 309, SAE 60309,
Formerly FAHRITE C-3.

OHIOLOY CK-20
M-95, 0.20 C, 2.0 Mn, 2.0 Si, 23-27 Cr, 19-22 Ni, bal Fe
Austenitic, stainless, heat resisting
Cast: 65,000 TS; 28,000 YS; 30 El
For filter press parts, chemical and food equipment, furnace and heat treat parts
ACI CK-20; AISI 310, SAE 60310,
Formerly FAHRITE C-63.

OHIOLOY CN-7M
M-95, 0.07 C, 1.5 Mn, 1.5 Si, 19-22 Cr, 28-30 Ni, 2-2.75 Mo, 3.0-3.5 Cu, bal Fe.
Austenitic, very good stainless properties.
Cast 62,500 TS, 25,000 YS; 30 El.
For pickling rolls, equipment for food processing, pulp and paper, plastics, paint industries
ACI CN-7M; SAE 60332;
Formerly FAHRITE C-20

OHIOLOY H-611.
M-95; 0.20-0.50 C, 2.0 max Mn, 2.0 Si, 14-16 Cr, 70-72 Ni, bal Fe
High temperature corrosion resistant casting
For muffle tubes, heat exchangers, oxygen nozzles in glass making, furnace parts
Reference-Inconel; Formerly FAHRITE N-88

OHIOLOY H-810
M-95; 0.45 max C, 2.0 max Mn, 2.0 Si, 19-21 Cr, 31-33 Ni, bal Fe.
High temperature corrosion resistant casting.
For parts used at high temperature, heat treat parts, furnace parts
Reference-Incoloy; Formerly FAHRITE N-53

OHIOLOY HC
M-95; 0.50 max C, 1.0 Mn, 2.0 Si, 26-30 Cr, 4 max Ni, 0.50 max Mo, bal Fe
Ferritic, corrosion resistant, heat resistant.
Cast: 55,000 min TS
For salt pots, electrodes, tuyers, parts for elevated temperature operation.
ACI HC, AISI 446; SAE 70446
Formerly FAHRITE C-28.

OHIOLOY HD.
M-95, 0.50 max C, 1.5 Mn, 2.0 Si, 26-30 Cr, 4-7 Ni, 0.50 max Mo, bal Fe.
High temperature, corrosion resistant casting.
Cast: 75,000 TS; 35,000 YS; 8 El.
For furnace parts, salt pots; resists sulphur atmospheres; light loads to 1900°F.
ACI HD, AISI 327; SAE 70327.
Formerly FAHRITE N-83

OHIOLOY HE
M-95, 0.20-0.50 C, 2.0 Mn, 2.0 Si, 26-30 Cr, 8-11 Ni, 0.50 max Mo, bal Fe.
High temperature, corrosion resistant casting.
Cast 85,000 TS; 40,000 YS; 9 El.
For furnace parts, smelting, and elevated temperature operation; resists sulphur atmosphere and scaling; usable to 2000°F
ACI HE, AISI 312, SAE 70312.
Formerly FAHRITE N-73

OHIOLOY HF
M-95; 0.20-0.40 C, 2.0 Mn, 2.0 Si, 18-23 Cr, 8-12 Ni, 0.5 max Mo, bal Fe
High temperature, corrosion resistant casting.
Cast 70,000 TS, 35,000 YS, 25 El.
For tube supports, beams, brackets in cement mills, furnaces, glass equipment, refineries.
Usable to 1600°F
ACI HF, AISI 302B, SAE 70308. Formerly FAHRITE N 8

OHIOLOY HH
M-95, 0.20-0.50 C, 2.0 Mn, 2.0 Si, 24-28 Cr, 11-14 Ni, 0.5 max Mo, bal Fe
High temperature, corrosion resistant casting
Cast 75,000 TS, 35,000 YS, 10 El
Usable to 2000°F
For tube supports and beams in oil refineries, heat treat plants, ore roasting equipment
ACI HH, AISI 309; SAE 70309
Formerly FAHRITE N-3

OHIOLOY HH 45
M-95 0.35-0.45 C, 2.0 Mn, 1.75 Si, 23-28 Cr, 10-14 Ni, bal Fe
High temperature, corrosion resistant casting
Aged 24 hours, 1400°F 80,000 TS, 4 El
Usable to 2000°F
For equipment operating at high temperature in glass factories, furnaces, petroleum plants
ACI HH, AISI 309, SAE 70309
Formerly FAHRITE N 3-45

OHIOLOY HI
M-95, 0.20-0.50 C, 2.0 Mn, 2.0 Si 26-30 Cr, 14-18 Ni 0.5 max Mo, bal Fe
High temperature, corrosion resistant casting
Cast 70,000 TS, 35,000 YS, 10 El
For cast retorts for cyaniding, heat treating, brazing fixtures melting magnesium; weldable, usable to 2150°F
ACI HI, Formerly FAHRITE N-4.

OHIOLOY HK
M-95, 0.20-0.60 C, 2.0 Mn, 2.0 Si, 24-28 Cr, 18-22 Ni, 0.5 max Mo, bal Fe.
High temperature, corrosion resistant casting
Cast 65,000 TS, 35,000 YS, 10 El
For tube supports, beams, fittings, tubing in chemical and oil refineries, furnaces, weldable, usable to 2100°F
ACI HK, AISI 310, SAE 70310.
Formerly FAHRITE N-63

OHIOLOY HL
M-95, 0.20-0.60 C, 2.0 Mn, 2.0 Si, 28-32 Cr, 18-22 Ni, 0.5 max Mo, bal Fe
High temperature corrosion resistant casting.
Cast: 65,000 TS; 35,000 YS; 10 El
For gas dissociation equipment, furnace equipment, chemical and petroleum plants; weldable, usable to 2100°F.
ACI HI ; SAE 70310A; Formerly FAHRITE N 43.

OHIOLOY HN.
M-95; 0.20-0.50 C, 2.0 Mn, 2.0 Si, 19-23 Cr, 23-27 Ni, 0.5 max Mo, bal Fe.
High temperature corrosion resistant casting.
Cast: 63,000 TS, 8 El.
For brazing fixtures, trays, furnace parts, chains, beams, radiant tubes; usable to 2150°F.
ACI HN; Formerly FAHRITE N-41.

OHIOLOY HT.
M-95; 0.35-0.75 C, 2.0 Mn, 2.5 Si, 13-17 Cr, 33-37 Ni, 0.5 max Mo, bal Fe.
High temperature corrosion resistant casting.
Cast: 65,000 TS; 4 El.
For heat treat and carburizing boxes, fixtures, fan blades, furnace parts. Usable to 2000°F reducing; 2100°F oxidizing
ACI HT, AISI 330; SAE 70330
Formerly FAHRITE N-1.

OHIOLOY HU.
M-95, 0.35-0.75 C, 2.0 Mn, 2.5 Si, 17-21 Cr, 37-41 Ni, 0.5 max Mo, bal Fe.
High temperature corrosion resistant casting
Cast: 65,000 TS; 4 El
For parts requiring high strength and corrosion resistance at high temperatures. Usable to 2000°F reducing 2100°F oxidizing.
ACI HU, ASTM A297-60T HU, SAE 70331.
Formerly FAHRITE N-51.

OHIOLOY HW
M-95, 0.35-0.75 C,, 2.0 Mn, 2.5 Si, 10-14 Cr, 58-62 Ni, 0.5 max Mo, bal Fe
High temperature corrosion resistant casting.
Cast 60,000 TS.
For furnace muffles, hearths, retorts, trays, enameling boxes, quenching fixtures, usable to 1900°F in non-sulphur reducing, 2100°F oxidizing
ACI HW, ASTM A297-60T HW; SAE 70334
Formerly FAHRITE N-61

OHIOLOY HX
M-95, 0.35-0.75 C, 2.0 Mn, 2.5 Si, 15-19 Cr, 64-68 Ni, 0.5 max Mo, bal Fe
High temperature corrosion resistant casting
Cast. 60,000 TS
For high temperature applications as cyanide pots, salt pots, muffles, annealing trays, usable to 1900°F in non-sulphur reducing; 2100°F in oxidizing
ACI HX; ASTM A297-60T HX, SAE 70335.
Formerly FAHRITE N-71

OHIOLOY LC1 see OHIOLOY WC1.

OHIOLOY LC3
M-95; 0.15 max C, 0.50-0.80 Mn, 0.60 max Si, 3.0-4.0 Ni, bal Fe
Nickel alloy steel casting: 65,000 min TS, 40,000 min YS, 24 min El; 137-187 Brin.
Weldable; for pressure castings for sub-zero service to −150°F
ASTM A352-60T LC3, Formerly OHIO 0-25

OHIOLOY Ni
M 95; 0.5 max C, 1.75 max Mn, 1.5 max Si, 2.0 max Fe, 0.8 max Cu, bal Ni.
Corrosion resistant nickel casting.
Cast: 50,000 TS; 25,000 YS; 10 El.
For equipment in chemical industry to avoid metal contamination.
Formerly FAHRITE Ni.

OHIOLOY WC1 (or LC1).
M-95; 0.25 max C, 0.50-0.80 Mn, 0.60 max Si, 0.45-0.65 Mo, bal Fe.
Carbon-Moly steel casting: 65,000 min TS; 35,000 min YS; 24 min El; 137-187 Brin.
Weldable; for pressure castings, service to 1100°F.
ASTM A217-60T WC1; ASTM A352-60T LC1.
Formerly OHIO 0-2-25.

OHIOLOY WC6.
M-95, 0.20 max C, 0.50-0.80 Mn, 0.60 max Si, 1.0-1.5 Cr, 0.45-0.65 Mo, bal Fe.
Cr-Mo low alloy steel casting; 70,000 min TS; 40,000 min YS; 20 min El; 137-187 Brin.
Weldable; for yokes, valves, fittings, flanges, bonnets; for service up to 1200°F.
ASTM A217-60T WC6; Formerly OHIO 0-23-20.

OHIOLOY WC9.
M-95; 0.18 max C, 0.40-0.70 Mn, 0.60 max Si, 2.0-2.75 Cr, 0.9-1.2 Mo, bal Fe.
Cr-Mo alloy steel casting: 70,000 min TS; 40,000 min YS; 20 min El; 143-187 Brin.
Weldable, for pressure castings with service temperatures not exceeding 1200°F.
ASTM A217-60T WC9; Formerly OHIO 0-5M-20.

OHIOLOY WCA.
M-95; 0.25 max C, 0.70 max Mn, 0.60 max Si, bal Fe.
Carbon steel casting: 60,000 min TS; 30,000 min YS; 25 El; 137-187 Brin.
Weldable; for light loaded parts and assemblies operating below 1000°F.
ASTM A27-60 60-30, AISI 1020, SAE 0022.
Formerly OHIO O-1-25.

OHIOLOY WCB.
M-95; 0.30 max C, 0.70 max Mn, 0.60 max Si, bal Fe.
Carbon steel casting: 65,000 min TS; 35,000 min YS, 22 min El; 137-217 Brin
Weldable, for light loaded parts and assemblies operating below 1000°F
AISI 1030, SAE 0030; Formerly OHIO 0-1

OHMAL.
87.5 Cu, 9 Mn, 3.5 Ni
For electrical resistors; heat resistant.

OHMALLOY.
M-897, 15 Cr, 5 Al, 80 Fe.
Annealed 100,000 TS; 70 000 YS; 25 El.
For cathodes and filaments in electronic tubes; heat resistant

OHMALON
M-61; 12 Cr, 14 Al, bal Fe.
For heat resistant parts; heat resistant.

OHMALOY.
M-1; 12-14 Cr, 0.5 max Ni, 0.15 max C, 3-4.5 Al, bal Fe.
Annealed. 80,000 TS; 50,000 YS, 20 El, 60 RA; 240 Brin
For chemical engineering equipment; furnace resistors, corrosion resistant; Type 406.

OHMALOY.
M-61, 13 Cr, 0.6 C, 4 Al, bal Fe.
Cold rolled: 128,000 TS; 103,800 YS; 5 El.
Annealed: 85,700 TS; 67,640 YS; 33 El.
For resistance wire, rheostats, resistors; brittle above 1600°F; superseded by "Fecraloy."

OHMSNIT 110.
M-27; 0.1 C, 20 Cr, 80 Ni.
For heating elements; heat resistant.

OILCRAT.
M-1149; 0.95 C, 1.25 Mn, 0.15 V, 0.5 Cr, 0.5 W, bal Fe.
For taps, punches, spindles, crimpers; oil hardened, non-deforming.

OIL CUPS.
88 Cu, 5 Sn, 7 Zn.
For oil cups, fittings.

OIL DIE SMOOTHCUT (Was Oil Die).
M-35; 1.0 C, 1.5 Cr, 0.45 W, 0.8 Mn, 0.15 S, bal Fe.
Annealed: 190 Brin.
For blanking and piercing dies, shaving and trimming dies.
Oil harden, non-deforming, free-cutting, cold work tool steel.

OILGRAPH.
M-1; 1.45 C, 0.8 Mn, 1.15 Si, 0.2 Cr, 0.25 Mo, bal Fe.
Annealed: 85,000 TS; 50,000 YS; 25 El; 40 RA; 197 Brin.
Heat treated: 164,000-218,000 TS; 136,000-177,000 YS; 13-8.5 El; 23-14 RA; 302-388 Brin.
For blanking and forming dies, punches, gages; nondeforming, oil hardened.

OILGRAPH EZ.
M-1; 1.45 C, 1.15 Si, 0.20 Cr, 0.25 Mo, 0.10 S, 0.2-0.4 graphite, bal Fe.
For tools, dies; free-cutting, non-galling graphitic steel.

OIL HARD.
M-1482; 0.90 C, 1.25 Mn, 0.5 Cr, 0.3 Mo, 0.25 V, bal Fe.
For forming and blanking dies, punches, headers; oil hardened, non-deforming.

OIL HARDENING.
M-1424; 0.90 C, 1.2 Mn, 0.3 Si, 0.5 Cr, 0.2 V, 0.5 W, bal Fe.
Oil hardening tool steel; AISI 01.

OILITE 993.
M-211; 1.0-3.0 Cu, 0.25-0.60 C, 3.0-5.0 Ni, bal Fe.
Sintered and heat treated: 120,000 TS; 6.8 min density; 40,000 fatigue.

OILITE ALUMINUM.
M-211; 4.0-5.0 Cu, 3.0-4.0 Pb, 3.0-4.0 Sn, 85-87 Al, 3.0 max other.
Sintered: 15,000 TS; 2.2-2.4 density.
Oilite bearing material.

OILITE BRASS.
M-211; 77.0-80.0 Cu, 0.25 max Fe, 1.0-2.0 Pb, 0.10 max Sn, bal Zn.
Sintered: 20,000 TS; 9 El; 7.2-7.7 density 25,000 shear; 8500 fatigue.
ASTM B282-60 Class A; SAE 890; PMPMA BZ-0218-T.

OILITE BRONZE (Was Oilite).
M-211; 87.5-90.5 Cu, 1.0 max Fe, 1.75 max C, 9.5-10.5 Sn.
Sintered: 14,000 TS; 11,000 YS; 6.4-6.8 Density.
Oilite bearing material.
ASTM B438-67 Gr 1 Type II; SAE 841.
PMPMA BT-0010-R.

OILITE COPPER.
M-211; 98.0 min Cu, 0.10 max Fe.
Sintered: 20,000 TS; 8 El; 8.0 min density.
MIL-B-20296.

OILITE LEAD BRONZE.
M-211; 76-78.5 Cu, 1.0 max Fe, 14-16 Pb, 1.0 max C, 6.5-8.5 Sn.
Sintered: 8000 TS; 6.8-7.2 density.
Oilite bearing material.

OILITE NICKEL SILVER.
M-211; 63.0-66.5 Cu, 16.5-19.5 Ni, 16.5-19.5 Zn.
Sintered: 30,000-37,500 TS; 10-15 El; 7.5-8.0 density.
ASTM B458-67 Gr 1, Type 1;
PMPMA BZN-1818-U.

OILITE STAINLESS STEEL.
M-211; 0.08-0.20 C, 17-19 Cr, 8-9 Ni, 70.5-73.0 Fe.
Sintered: 35,000 TS; 6.0-6.4 density. 20,000 shear, 26,000 fatigue.
PMPMA SS-304-L-P.

OILITE STRESSITE BRONZE.
M-211; 93.0-96.0 Cu, 4.0-6.0 Sn, 2.5 max others.
Sintered: 20,000 TS; 10 El; 7.2-7.8 density. 10,000 fatigue strength.

OIL PUMP.
Eng ; 85 Cu, 3 Sn, 9 Zn, 3 P.
For oil pump parts.

OILWAY.
M-345; 0.94 C, 0.44 Cr, 0.5 W, 1.2 Mn, bal Fe.
For tools, dies; oil hardening.

OJIBWAY.
M-435; 0.95 C, 0.3 Mn, 0.3 Si, bal Fe.
For open headed dies; water hardened.

OKADUR 6.
M-462; 2.5-5.0 Cu, 0.2-1.8 Mg, 0.3-1.5 Mn, bal Al.
For light alloy structural parts; age hardenable.

OKADUR 10.
M-462; 2.5-5.0 Cu, 0.2-1.8 Mg, 0.3-1.5 Mn, bal Al.
For light alloy structural parts; age hardenable.

OKADUR 58.
M-462; 2.5-5.0 Cu, 0.2-1.8 Mg, 0.3-1.5 Mn, 0.5-2.5 Pb, Sn, Cd, Bi, bal Al.
For screw machine products; free-cutting.

OKADURPLAT.
M-462; 2.5-5.0 Cu, 0.2-1.8 Mg, 0.3-1.5 Mn, bal Al
For aircraft structures; clad, age hardenable.

OKER-1.
Eng , 69 Cu, 30 Zn, 0.97 Pb
Rolled· 40,000 TS; 35 El; 37 Brin.
For tubes, sheets.

OKER-2.
Eng , 55 Cu, 45 Zn, 0.5 Sn
Rolled· 50,000 TS.
For sheets, architectural purposes; corrosion resistant

OKER BRASS
Germ.; 64.25 Cu, 35.25 Zn, 0.39 Sn, 0.12 Pb.
For hardware, bolts, fittings; high strength.

OKER BRASS.
England; 44.5 Zn, 0.5 Sn, bal Cu.
For architectural structures and trim; high strength, corrosion resistant.

OKER-CAST.
Eng.; 72 Cu, 24 Zn, 1.1 Pb, 2.3 Fe.
Cast: 60,000 TS; 33 El; 30.6 RA; 86 Brin.
For turbine parts; free-cutting.

OKER I BRASS.
England; 30 Zn, 1 Pb, bal Cu.
For fittings, hardware; good workability, free-cutting.

OLD GENUINE BABBITT.
M-77; 89 Sn, 7.5 Sb, 3.5 Cu.
For bearings; heavy duty.

OLD HYCC.
M-38; 1.5 C, 12 Cr, bal Fe.
For dies; oil hardening, non-deforming.

OLDS BEARING BRONZE.
M-1007; 60-65 Cu, 17-19 Pb, 9-11 Zn, 4.5-6.0 Ni, 4.5-6 5 Sn.
Cast: 22,000 TS; 16,000 YS; 3 El; 56 Brin.
For formed parts, bearings, bushings; corrosion resistant.

OLDS HI TENSIL BRONZE NO. 7025.
M-1007; Cu alloy.
Rolled. 75,000 TS; 32,000 YS; 31.5 El; 140 Brin.
For hardware, gears, tough

OLDS HI TENSIL BRONZE NO 9025.
M-1007; Cu alloy
Rolled: 92,000 TS, 42,000 YS; 28 El; 180 Brin.
For hardware, gears, tough

OLDS HI TENSIL BRONZE NO. 11515.
M-1007; Cu alloy.
Rolled· 118,000 TS; 80,000 YS; 15 El; 215 Brin.
For hardware, gears; tough.

OLDS LEADED BRONZE, OA-10.
M-1007, 70 Cu, 10 Sn, 20 Pb.
As cast 54-58 Brin (500 kg).
For bearings
QQ-B-691 Comp 7; SAE 794.

OLDSMOLOY.
M-1007, 15 Ni, 35 Zn, Cr, Mn, Sn, 45 Cu.
Rolled· 70,000-76,000 TS, 15-20 El, 21 RA; 150-160 Brin
For bearings, gears, hardware, food machinery; resists salt water and food acids.

OLIN NO 605
M-279; 2 3 Fe, 0 03 P, bal Cu.
Annealed 48,000 TS, 20,000 YS, 28 El; 95 DPH
½ Hard 61,000 TS; 56,000 YS, 6 5 El; 131 DPH.
Spring. 75,000 TS, 69,000 YS, 1 5 El; 149 DPH
For springs, diaphragms, hollow ware, gaskets, clips, terminals, contacts
65% electrical conductivity, corrosion resistant.

OLIN 0629
M-279, 9-10 Al, 3 5-4 5 Fe, 0 8 max Zn, bal Cu
Annealed 85,000-100,000 TS; 45,000-65,000 YS, 30-35 El, B 70 Rock
Hard 112,000-130,000 TS; 90,000-110,000 YS; 10 El, B 96-101 Rock
For fuses, clips, springs, fasteners.
Aluminum bronze, corrosion resistant.

OLIN-0629M
M-279, 9 4-10 0 Al, 3 5-4 5 Fe, 0.8 max Zn, bal Cu.
Annealed. 85,000-100,000 TS, 45,000-65,000 YS; 30-35 El, B 80-90 Rock
Heat treated. 150,000-170,000 TS; 100,000-120,000 YS; 3 El.
For bushings, worm gears, bearings, shafts.
Aluminum bronze, heat treatable.

OLIN ALLOY 638.
M-279; 2 8 Al, 1 8 Si, 0.4 Co, bal Cu
Annealed· 82,000 TS; 54,000 YS; 36 El.
Spring Temper· 125,000 TS; 111,000 YS, 4 El.
At 400°C, Spring Temper: 25,000 TS; 18,000 YS; 100 El.
For heat exchangers, glass to metal seals, springs, electrical terminals.
Aluminum bronze, high strength, corrosion resistant, oxidation resistant.

OLIN ALLOY 688.
M-279; 22.7 Zn, 3.4 Al, 0.40 Co, bal Cu.
Spring Temper: 120,000 TS; 108,000 YS; 1.5 El.
Annealed: 78,000-82,000 TS; 47,000-55,000 YS; 36-39 El.
½ Hard: 90,000 TS; 81,000 YS; 18 El.
For springs, diaphragms, connectors.
Readily deep drawn, good corrosion and stress corrosion resistance.

OLIN KO-1.
M-1642, M-279; 4 8 Cu, 0.23 Mg, 0.27 Ti, 0 64 Ag, bal Al.
Sand Cast: 68,000 TS; 60,000 YS; 6 El.
Permanent mold: 67,000 TS; 55,000 YS; 10 El.
For landing gear struts, gear box housings, aircraft and auto truck components, aerospace equipment.
High strength casting alloy.

OLYMPIC.
M-73; 1.5 C, 12 Cr, 1 V, 0.7 Mo, bal Fe.
For dies, tools, lamination dies, punches, forming dies; air hardening, abrasion resistant, non-deforming.

OLYMPIC.
M-484; 0 7 C, 18 W, 4 Cr, 1 V, bal Fe.
For high speed tools and cutters, high speed steel.

OLYMPIC BRONZE TYPE A.
M-33, 96 0 Cu, 1.0 Zn, 3.0 Si.
Annealed: 60,000 TS; 25,000 YS; 60 El; 60 RA; 50 Brin.
Hard rolled. 94,000 TS; 58,000 YS; 8 El; 14 RA; 140 Brin.
For sheet, rod, wire, tubes, bolts, nuts, hardware, cable, welding rod, corrosion resisting.

OLYMPIC BRONZE TYPE B.
M-33; 97.5 Cu, 1.0 Zn, 1 5 Si
Annealed 52,000 TS, 25,000 YS.
Hard· 90,000 TS, 67,000 YS, 12 El
For screw machine work, bolts, nuts, screws, welding rods, cable, hardware; resists "season cracking"

OLYMPIC FM
M-73; 1 5 C, 12 Cr, 1 V, 0.7 Mo, bal Fe.
For lamination and blanking dies, punches; air hardening, free-cutting, non-deforming.

OMAN
M-842, Pb-Cu.
For bearings; self-lubricating.

OMANITBRONZE
M-330, 81 Cu, 10 Al, bal Ni, Fe.
10 El.
For valve gauge fittings; corrosion resistant.

OMAN METAL
M-714, 25 Pb, bal Cu.
For bearings; heavy duty.

OMC-3 Al-2 5 V.
M-1532; 3 Al, 2 5 V, bal Ti.
Wrought, min· 125,000 TS; 105,000 YS; 10 El.
Weldable; suitable for fabricating into welded titanium tubing, or seamless tubing.

OMC-5 Al-2.5 Sn.
M-1532; 5 Al, 2.5 Sn, bal Ti.
Wrought, Ann, min: 120,000 TS; 115,000 YS; 10 El.
For aircraft tailcones, compressor cases, housings, stiffeners, cryogenic tankage.
Weldable, forgeable; good creep resistance to 900°F.
AMS 4910, 4926, 4953, 4966.

OMC-6 Al-2 Sn-4 Zr-2 Mo.
M-1532; 6 Al, 2 Sn, 4 Zr, 2 Mo, bal Ti.
Wrought, min: 135,000 TS; 120,000 YS; 10 El; 25 RA.
Compressor blades and wheels; good strength and toughness to 800-900°F.

OMC-6 Al-4V.
M-1532; 6 Al, 4 V, bal Ti (0.10 max C).
Wrought, min: 130,000 TS; 120,000 YS; 10 El.
For aircraft and engine forgings, compressor wheels and blades, spacers, cryogenic and marine equipment.
Some response to heat treatment.
AMS 4928, 4911, 4935.

OMC-6 Al-6V-2 Sn.
M-1532; 6 Al, 6 V, 2 Sn, bal Ti.
Wrought, min: 150,000 TS; 140,000 YS; 10 El.
For pressure vessels, rocket motor cases, airframes, ordnance equipment.
MIL-T-46035.

OMC-7 Al-4 Mo.
M-1532; 7 Al, 4 Mo, bal Ti.
Wrought, HT, min: 145,000 TS; 135,000 YS; 10 El.
Heat treatable forging alloy;
For aircraft turbines, compressor wheels, and blades, spacer rings, airframes.

OMC-8 Al-1 Mo-1 V.
M-1532; 8 Al, 1 Mo, 1 V, bal Ti.
Wrought, min: 130,000 TS; 120,000 YS; 10 El.
High temp. jet engine forging alloy;
For airframes, turbine parts.
MIL-T-9046 Type II Comp. F.

OMC-40.
M-1532; Ti, unalloyed.
Wrought, min: 40,000 TS; 30,000 YS; 25 El; 35 RA.
For valves, heat exchangers, aircraft ducting, good corrosion resistance.
MIL-T-12117 Class 40.

OMC-55.
M-1532; Ti, unalloyed.
Ann, min: 65,000 TS; 35,000 YS; 20 El.
For heat exchangers, valve trim, welding rods, anodizing racks, chemical plant equipment.
AMS 4900.

OMC-70.
M-1532; Ti, unalloyed.
Ann, min: 80,000 TS; 70,000 YS; 15 El.
For airframe equipment, ammunition boxes, anodizing racks, shroud spacers.
AMS 4901, 4921.

OMC-103 (cast).
M-1532; 0.20 Pd, bal Ti.
Cast, min: 50,000 TS; 40,000 YS; 22 El.
For chemical process equipment for oxidizing and mildly reducing environments.

OMC-105 (cast).
M-1532; Ti, unalloyed.
Cast, min: 80,000 TS; 70,000 YS; 15 El.
For aircraft equipment, marine equipment, brackets, housings, anodizing racks.

OMC-164 B (cast).
M-1532; 6 Al, 4 V, bal Ti.
Cast, min: 130,000 TS; 120,000 YS; 10 El.
Compressor wheels, and blades, rocket cases cyrogenic equipment, marine equipment.

OMC-166 A (cast).
M-1532; 5 Al, 2.5 Sn, bal Ti.
Cast, min: 120,000 TS; 115,000 YS; 10 El.
For aircraft tailcones, compressor case housings, stiffeners, cryogenic tankage.
Weldable, forgeable; good creep resistance to 900°F.

OMC-Pd.
M-1532; 0.20 Pd, bal Ti.
Wrought, min: 50,000 TS; 40,000 YS; 22 El.
For chemical process equipment for oxidizing and mildly reducing environments.

OMEGA.
M-24; 0.6 C, 0.7 Mn, 1.85 Si, 0.25 V, 0.5 Mo, bal Fe.
Heat treated: 340,000-320,000 TS; 310,000-280,000 YS; 5-6 El; 11-21 RA.
For pneumatic chisels, rivet sets, punches, blacksmith tools; Iz-7-15; resists shock and fatigue.

OMEGA BRAND PHOSPHOR BRONZE NO. 47.
M-98; 91.6 Cu, 8.0 Sn, 0.15 P.
Sheet: 51,000-130,000 TS; 75-1.0 El.
For paper mill equipment; El-Res. 14.8.

OMEGA BRAND PHOSPHOR BRONZE NO. 209.
M-98; 90 Cu, 10 Sn, trace P.
Sheet. 55,000-130,000 TS; 80-1.0 El.
For sulfide solutions in paper mill machinery; El-Res. 16.1.

OMEGA EXTRA
M-1339, 0.55 C, 0.7 Cr, 0.18 Mo, 1.65 Ni, 0.1 V, bal Fe.
For gears, machine tool parts, crankshafts; oil hardened, shock resistant.

OMEGA EXTRA V.
M-1339; 0.56 C, 0.7 Cr, 0.18 Mo, 1.65 Ni, 0.1 V, bal Fe.
For gears, machine tool parts, crankshafts; oil hardened, shock resistant.

OMMET A.
M-1246; 50 Ni, 20 Mo, 22 Fe.
For amplifiers and transmitter tubes; corrosion and heat resistant

OMMET "A" ALLOY.
M-837; Mo-Ni-Fe.
280 Brin.
For machinery parts; sintered alloy, heat resistant

OMMET-B
M-1246, Ni-Mo-Fe
For amplifiers and transmitter tubes, chemical plant equipment; sintered, corrosion resistant.

OMMET-Fe.
M-1246; Fe.
For structural parts for amplifiers, transmitter tubes, rectifiers, valves, sintered, highest purity.

OMMET IRON.
M-837; 0.001 C, 0.01 Si, 0.01 P, 0.01 Mn, 99.98 Fe.
For vacuum tubes; sintered iron.

OMMET-SIVAR 48.
M-837; Fe-Co-Ni.
For glass to metal seals, vacuum tubes; sintered alloy.

OMMET-SIVAR 60.
M-837; Fe-Co-Ni.
For glass to metal seals, vacuum tubes; sintered alloy.

OMMET-SIVAR 90.
M-837; Fe-Co-Ni.
For glass to metal seals; sintered alloy.

ON.
M-366; 0.7 C, 18 W, 4 Cr, 1 V, bal Fe.
For tools, high speed cutters; high speed steel.

ONEIDA.
M-15; 0.90 C, 1.2 Mn, 0.5 Cr, 0.2 V, 0.5 W, bal Fe.
Oil hardening tool steel; AISI 01.

ONERAL.
M-England; 0.9 C, 10 Mo, 0.03 Ti, 6 Ni, 0.03 Zr, 4 Fe, 28 Cr, bal Co.
For cast turbine blades, high temperature components.
High heat resistance.

ONE TON BRASS.
Eng.; 61 Cu, 38 Zn, 1 Sn.
For marine parts, condenser tubes; corrosion resistant.

O-NICKEL.
England; 99.5 min Ni + Co, controlled Mg.
For valve components, tube cathodes; corrosion and heat resistant.

ONION FUSIBLE ALLOY.
England; 50 Bi, 20 Sn, 30 Pb.
For fuses, safety plugs; M.P. 92°C.

ONPLUS.
M-366, 0.7 C, 18 W, 4 Cr, 2 V, bal Fe.
For cutting tools; high speed steel.

ONTARIO.
M-1, 1 5 C, 12 Cr, 0.9 V, 1.0 Mo, bal Fe.
Annealed: 102,000 TS; 85,000 YS; 29 El; 217 Brin.
Hardened· 171,000-227,000 TS; 1.5 El; 600 Brin.
For dies, shears, punches, blanking and stamping dies, forming tools
Type D2 air hardening, non-deforming, wear resistant.

ONTARIO-EZ
M-1, 1 5 C, 12 Cr, 0.9 V, 1.0 Mo, 0.15 S, bal Fe
Annealed: 103,000 TS; 18 El; 30 RA; 217 Brin
Hardened· 225,000 TS; 1.5 El; 600 Brin.
For punches, shear blades, blanking and forming tools and dies
Type D2 air hardening, non-deforming, free-cutting.

ONTOP.
M-366, 0 7 C, 18 W, 4 Cr, 1 V, 5 Co, bal Fe
For tools, high speed cutters; high speed steel.

ONYX
M-38; 0.7 C, bal Fe.
For springs; water hardening.

O.P.
Japan.
For permanent magnets; high coercive force.

OPTAL 3.
M-764; 2.8 Mg, 0-0 4 Mn, 0-0.3 Cr, bal Al.
Extruded· 29,000 TS; 20,000 YS; 15 El; 55 Brin.
Cold drawn: 40,000 TS; 31,000 YS, 4 El; 80 Brin.
For ship building, car bodies, window frames; corrosion resistant.

OPTAL 5.
M-764; 4.8 Mg, 0.15 Mn, 0.3 Cr, bal Al.
Extruded· 36,000 TS; 17,000 YS; 15 El; 60 Brin.
½ H-temper: 40,000 TS; 26,000 YS; 9 El; 75 Brin.
For automobile bodies, ship building; corrosion resistant.

OPTAL 7.
M-764; 6.8 Mg, 0.15 Mn, 0.3 Cr, bal Al.
½ H-temper: 50,000 TS; 31,000 YS; 9 El; 90 Brin.
For fuel gages, cooking utensils, machine tool parts; corrosion resistant, shock resistant.

OPTICAL WIRE ALLOY.
U.S.; 54 Cu, 28 Zn, 18 Ni.
Annealed: 33,000 TS; 20,000 YS; 33 El; 38 RA; 50 Brin.
For optical instruments; German Silver.

OPTIMUM.
M-1340; 2.1 C, 11.5 Cr, bal Fe.
For forming and blanking dies, punches; oil or air hardened, nondeforming.

OPTIMUM Co20.
M-1340; 1.65 C, 12 Cr, Co, bal Fe.
For forming and blanking dies, punches; air hardened, nondeforming.

OPTIMUM W.
M-1340; 1.65 C, 11.5 Cr, 0.1 V, bal Fe.
For forming and blanking dies, punches; air hardened, nondeforming.

OPTIMUM Z.
M-1340; 2.1 C, 11.5 Cr, 0.7 W, bal Fe.
For forming and blanking dies, punches; oil or air hardened, nondeforming.

ORALLOY.
M-838; Au alloy.
For dentures.

ORANGE LABEL.
M-343; 0.45-0.55 C, 1.25-1.75 Cr, 2-3 W, 0.2-0.3 V, bal Fe.
For chisels, punches, rivet sets; "Special Alloy Tool."

ORANGE LABEL.
M-365; 1.0-1.05 C, bal Fe.
For tools; precision cast.

ORANGE LABEL SPECIAL ALLOY TOOL STEEL.
M-343; C, alloy, bal Fe.
For chisels, punches, heading tools, rivet sets; fatigue resistant.

ORANIUM BRONZE.
M-141; 90 Cu, 10 Al.
Cast: 65,000 TS, 20 El. Rolled: 80,000 TS.
For castings, gears; Al-Bronze.

ORANIUM BRONZE, "H.H."
89 Cu, 11 Al.
For gears, propellers; Al-bronze, tough.

ORANIUM BRONZE, "H.X."
88.5 Cu, 11.5 Al.
For gears, bearings; Al-bronze, tough.

ORANIUM BRONZE "M.H."
M-8, 92 Cu, 8 Al.
130,000 TS; 4 El.
For hardware; medium hard-soft.

ORANIUM BRONZE "S."
M-8; 97 Cu, 3 Al.
30,000 TS; 60 El.
For hardware; soft-soft.

ORBIS.
M-111; 0.95 C, 1.5 Si, 0.75 Mn, 1 Cr, 0.1 V, bal Fe.
For dies; for cold work.

ORBIT.
M-38; 0.7 C, 2 Mn, 0.15 S, 1.0 Cr, 1.35 Mo, bal Fe.
For dies for blanking and forming, rim rolls, master hubs; tough, air hardened, free-machining.

ORDIX.
M-912; 0.6-0.7 C, 1.2-1.5 Si, 0.35-0.50 Mn, bal Fe.
For tools, dies, chisels, punches; tough, shock resistant.

ORDIX EXTRA.
M-501, M-912; 0.67 C, 1.3 Si, 0.5 Mn, 0.5 Cr, bal Fe.
For springs, punches; oil hardened, shock resistant.

ORDIX SPECIAL.
M-912; 0.55-0.62 C, 0.8-1.1 Mn, 0.9-1.2 Cr, 0.07-0.12 V, bal Fe.
For tools, dies, crimpers, punches; oil hardening, tough.

OREIDE .5%.
M-102; 89-92 Cu, 0.3-0.7 Sn, 0.1 max Pb, bal Zn.
Annealed: 42,000 TS; 12,000 YS; 43 El; F 60 Rock.
Hard: 68,000 TS; 57,000 YS; 4 El; B 76 Rock.
For jewelry and weather stripping.
Good formability, weldability and corrosion resistance.

OREIDE "A."
Eng.; 68 Cu, 32 Zn, 0.5 Sn.
60,000 TS; 30 El.
For hardware; Tobin Bronze.

OREIDE "B."
Eng.; 90-81 Cu, 10-15 Zn, 0-4 Sn.
French gold, carriage and harness hardware, ornamental work.

OREIDE, BRUNSWICK.
Eng.; 68 Cu, 32 Zn, 0.5 Sn.
For condenser tubing; corrosion resistant.

OREIDE, FRENCH GOLD.
90-81 Cu, 10-15 Zn, 0-9 Sn, 1-2 Pb.
For plumbing, hardware; free-cutting.

OREIDE SCOVILL ALLOY 321.
M-102; 88-91 Cu, 0.35-0.65 Sn, bal Zn.
Annealed: 40,000 TS; 40 El.
Hard: 75,000 TS; 4 El.
For bearings, jewelry; corrosion resistant.

ORELLOY 242.
M-1603; 0.10 C, 0.50 Mn, 0.09 P, 0.03 S, 0.48 Si, 0.86 Cr, 0.43 Cu, bal Fe.
Rolled: 70,000 TS; 50,000 YS; 22 El.
For structural members, bridges, booms, derricks, tanks.
High strength low-alloy steel.

ORIEDE B.
90-81 Cu, 10-15 Zn, 0-4.9 Sn.
For hardware, ornamental work; French gold.

ORIENTED M-6W.
M-10; Si, bal Fe.
For transformers; formerly Tran-Cor 4W-O; grain oriented.

ORIENTED M-7X
M-10; Si, bal Fe.
For transformers; formerly Tran-Cor 3X-O; grain oriented.

ORIENTED M-7W.
M-10; Si, bal Fe.
For transformers; formerly Tran-Cor 3W-O; grain oriented.

ORIENTED M-8X.
M-10; Si, bal Fe.
For transformers; formerly Tran-Cor 2X-0; grain oriented.

ORIENTED T.
M-10; Si, bal Fe.
For armatures, electric generators; high permeability; formerly Tran-Cor T-O.

ORIENTED T-S.
M-10; Si, bal Fe.
For wound type transformers and reactors; high permeability; formerly Tran-Cor T-O-S.

ORIGINAL MONEL METAL.
M-557; 23 Cu, 2.5 Si, bal Ni.
Sand cast: 56,000-72,000 TS; 28,000-43,000 YS; 30-20 El; 120-140 Brin.
For pump parts, chemical industries; corrosion resistant.

ORION.
M-414; 0.5 C, 1.0 Cr, 0.2 V, bal Fe.
Heat treated: 240,000-115,000 TS; 195,000-80,000 YS; 5-23 El; 15-65 RA; 440-262 Brin.
For machine parts, tools, automobile springs and gears, forging dies, shear blades; resists heavy vibrations.

ORION-100 CAST.
M-1546; 0.35 C, 27 Cr, 1.2 Si, bal Fe.
Cast: 95,000 TS, 65,000 YS; 2 El, 212 Brin.
For furnace parts, heat treating boxes, salt pots, oil burners, exhaust manifolds.
Ferritic stainless steel, heat and oxidation resistant.

ORION-100 FORGE.
M-1546; 0.15 C, 27 Cr, bal Fe.
Annealed: 92,500 TS; 57,000 YS; 25 El.
For furnace parts, heat treating boxes, salt pots.
Ferritic stainless steel. Heat and oxidation resistant.

ORION-120
M-1546; 0.02 max C, 27 Cr, bal Fe.
Annealed· 80,000 TS; 50,000 YS; 25 El; B 82 Rock.
For furnace parts, salt pots, heat treating boxes, oil burners.
Ferritic stainless steel Heat resistant to 1150°C in oxidizing atmosphere.

ORLEANS
M-373, 0 55 C, 0 80 Mn, 2 Si, 0 25 Cr, 0.2 V, 0 35 Mo, bal Fe.
For pneumatic chisels, punches, concrete breakers, cutters; Type S5; oil hardened, shock resistant.

ORTHONIK
M-10, M-1084; 50 Ni, 50 Fe.
For magnetic and electrical equipment, magnetic tape and foil
Magnetically soft, high permeability.

ORTHONOL.
U.S ; 50 Fe, 50 Ni
For magnets, soft.

ORTHOSIL
M-1192, Si, bal Fe.
For laminations for transformers, chokes, filters, reactors; high magnetic saturation.

ORVAR 1.
M-111, M-111a; 0 3 C, 0.9 Si, 0.5 Mn, 5.25 Cr, 1.4 Mo, 0.1 V, bal Fe.
For punches, crimpers, upsetters, riveters; hot work steel, oil hardened. AISI H13.

OSBORN-EWC.
M-233; 0.03 C, 18 25 Cr, 13.5 Ni, 3.75 Mo, bal Fe.
Annealed: 108,000 TS; 45,000 YP; 47 El; 57 RA.
For scrubber liners, chemical plant equipment, digesters.
Acid resistant; Type 317, austenitic.

OSCILLUMIN.
Germany; 0.8 Cu, 0.4-0.6 Fe, 12.6-13.2 Si, bal Al.
28,000 TS; 4 El; 65 Brin.
For light alloy castings; high fluidity.

OSEMUND.
M-1337; 1.4 C, 0.30 Cr, 0.10 V, bal Fe.
For cutters, bearings, liners; oil hardened, wear resistant.

OSMAGAL.
M-462; 1.8 Mn, bal Al.
For sheets; rolled.

OSMAGAL.
M-1548; 1.8 Mn, bal Al.
Soft: 15,000 TS; 6400 YS; 30 El; 25 Brin.
Hard: 35,000 TS; 28,000 YS; 2 El; 60 Brin.
For heat exchangers, truck panels, fixtures, duct work.
Non-heat treatable.

OSMAGAL S.
M-462; 1.5-3.0 Mg, 0.5-1.5 Mn, 0.3 max Cr, bal Al.
For aircraft and structural parts; resists sea water corrosion.

OSMIRIDIUM (NATURAL) NEVYANSKITE.
58-44 Ir, 27-49 Os, 0-10 Pt, 0-6 Ru, 1.5-3.0 Rh.
For pen points; corrosion resistant.

OSMIRIDIUM (NATURAL) SISERSKITE.
57 Os, 34 Rh + Ir, 8 Ru.
For pen points; corrosion resistant.

OSMIRIDIUM SISEROKITE.
57 Os, 34 Rh + Ir, 8 Ru.
For pen points.

OSNALIUM 3.
M-462; 2-4 Mg, 0.4 max Mn, 0.3 max Cr, bal Al.
Soft: 28,000 TS; 13,000 YS, 30 El; 47 Brin.
Hard: 42,000 TS; 37,000 YS; 8 El; 77 Brin.
For light alloy parts, marine hardware; resists sea water corrosion.

OSNALIUM 5.
M-462; 4.0-5.5 Mg, 0.8 max Mn, 0.3 max Cr, bal Al.
Soft. 42,000 TS; 22,000 YS; 35 El; 65 Brin.
Hard: 60,000 TS; 50,000 YS; 15 El; 100 Brin.
For aircraft structures, light alloy parts; corrosion resistant.

OSNALIUM 7.
M-462; 5.5-7.5 Mg, 0.8 max Mn, 0.3 max Cr, bal Al.
For light alloy parts; corrosion resistant.

OSTERMANN CAST BRONZE NO. 10.
M-330, 90 Cu, 10 Sn.
29,000 TS; 15 El.
For general construction of machinery fittings, apparatus; corrosion resistant.

OSTERMANN CAST BRONZE NO. 14.
M-330; 86 Cu, 14 Sn, 29,000 TS; 3 El.
For bearings, gears, high pressure hydraulic apparatus; wear resistant.

OSTERMANN CAST BRONZE NO. 20.
M-330; 80 Cu, 20 Sn.
21,000 TS.
For step-bearings, slide valves, wearing plates, bells; for parts with high friction loading.

OSTERMANN LEAD BRONZE NO. 10.
M-330, 86 Cu, 10 Sn, 4 Pb.
28,000 TS; 15 El.
For bearings for hot rolling works and electrical machinery; heavy duty.

OSTERMANN LEAD TIN BRONZE NO. 8
M-330; 80 Cu, 8 Sn, 12 Pb.
23,000 TS; 8 El.
For bearings with high compressive loading and cold rolling mills; heavy duty.

OSTERMANN RED BRASS NO. 4.
M-330; 93 Cu, 4 Sn, 2 Zn, 1 Pb.
29,100 TS; 25 El.
For pipe flanges; known as "Flange Bronze."

OSTERMANN RED BRASS NO. 5.
M-330; 85 Cu, 5 Sn, 7 Zn, 3 Pb.
21,000 TS; 10 El.
For railroad machinery fittings to be bright finished or polished; free-cutting.

OSTERMANN RED BRASS NO. 8.
M-330; 82 Cu, 8 Sn, 7 Zn, 3 Pb.
21,000 TS; 6 El.
For machine fittings to be bright finished or polished; free-cutting.

OSTERMANN RED BRASS NO. 9.
M-330; 85 Cu, 9 Sn, 6 Zn.
29,000 TS; 12 El.
For railroad bearings, fittings; heavy duty.

OSTERMANN RED BRASS NO. 10.
M-330, 86 Cu, 10 Sn, 4 Zn.
29,000 TS; 10 El.
For pipe lines and fittings, general machinery construction; also called "Machine Bronze."

OSTERMANN WROUGHT BRONZE NO. 6.
M-330; 94 Cu, 6 Sn.
For wire, sheet strip; tin bronze.

OTISCOLOY.
M-840; 0.08-0.12 C, 0.90-1.25 Mn, 0.35 Cu, 0.10 Ni, 0.05 Cr, bal Fe.
Drawn: 70,000 TS; 50,000 YS; 25 El; 55 Brin.
For deep drawn parts.

OTISEL NO. 1.
M-331; 18 Cr, 8 Ni, C, bal Fe.
For heat and corrosion resisting parts; heat and corrosion resisting alloy.

OTISEL NO. 2.
M-331; 0.10-0.15 C, 12-16 Cr, bal Fe.
For corrosion resistant parts; corrosion resistant.

OTISEL NO. 3.
M-331, 0.10-0.15 C, 15-18 Cr, bal Fe.
For corrosion resistant parts; corrosion resistant.

OTISEL NO. 4.
M-331; 0.20 max C, 20-30 Cr, 12-20 Ni, bal Fe.
For heat and corrosion resistant parts; heat and corrosion resistant.

OTISEL NO. 5.
M-331; 0.25 max C, 26-30 Cr, bal Fe.
For heat and corrosion resistant parts; heat and corrosion resistant.

OTISEL K-4 MOLYBDENUM.
M-331; 0.13-0.35 C, 5-7 Cr, bal Fe, Mo.
For corrosion resistant parts; corrosion resistant.

OTISEL K-5 TUNGSTEN.
M-331; 0.13-0.35 C, 5-7 Cr, W, bal Fe.
For corrosion resistant parts; corrosion resistant.

OTISEL O-12.
M-331; 0.12-0.35 C, 11-14 Cr, bal Fe.
Cast: 75,000-130,000 TS; 39,000-90,000 YS; 10-25 El; 140-150 Brin.
For acid resistant castings, corrosion resistant.

OTISEL O-16.
M-331; 0.12 C, 14-18 Cr, bal Fe.
Cast: 70,000-80,000 TS; 39,000-43,000 YS; 20-15 El; 140-175 Brin.
For acid resistant castings; corrosion resistant.

OTISEL O-18.
M-331; 0.08-0.20 C, 18-20 Cr, 8-10 Ni, bal Fe.
Cast: 78,000-85,000 TS; 39,000-42,000 YS; 60-65 El; 135-160 Brin.
For acid resistant castings; stainless.

OTISEL O-24.
M-331; 0.20 max C, 22-25 Cr, 10-13 Ni, bal Fe.
Cast: 80,000-85,000 TS; 40,000-43,000 YS; 45-50 El; 140-150 Brin.
For heat resistant castings; heat resistant.

OTISEL O-30.
M-331; 0.25 max C, 25-30 Cr, 1.0 max, Mn, bal Fe.
Cast: 45,000-99,000 TS; 35,000-60,000 YS; 2-3 El; 170-190 Brin.
For heat resistant castings; resists heat to 2150°F.

OTISEL O-S.
M-331; C, alloy, bal Fe.
For castings.

OTOTANI-ALLOY Grade 2.
M-1718; 35-50 Si, 20-30 Ca, 5-15 Mn, 10-20 Fe, 1.5 max Al, 0.08 max P, 0.05 max S.
For melting or ladle additions to produce cast steel with nodular graphite to increase the wear resistance, as on steel rolls for rolling mills.

OTOTANI-ALLOY Grade 3.
M-1718; 35-50 Si, 20-25 Ca, 10-25 Fe, 5-15 Mn, 4-10 Al, 0.3 max C, 0.08 max P, 0.05 max S.
For melting or ladle additions to produce fine grain steel.

OTTAWA.
M-435, 0.8 C, 0.25 Mn, 0.15 Si, bal Fe.
For mining drills and rods; hollow drill steel.

OTTAWA 60.
M-1, 3.25 C, 1 Cr, 1 Mo, 12 V, bal Fe.
For drawing rings for stainless steel; heat treatable, galling resistant.

OTTO'S SPECULUM.
Eng.; 69 Cu, 31 Sn
40,000 TS; 10,000 YS; 38 El.
For telescope reflectors, mirrors.

OUNCE METAL.
M-126; 85 Cu, 5 Sn, 5 Zn, 5 Pb.
27,000-33,000 TS; 20-15 El, 20-15 RA; 50-59 Brin.
For bearing metal, casting valves, carburetor and pump parts; Composition Brass, also called "Std. Red Composition."

OXALLOY-28.
M-856; 99.92 min Cu.
Annealed: 50,000 TS; 35,000 YS; 10-30 El;
For high temperature wire.
Heat resistant to 400°F.

OXWELD NO. 1 HT.
M-843; C, alloy, bal Fe.
Welded: 70,000 TS.
For welding rod for alloy steel.

OXWELD NO. 7.
M-843; C, bal Fe.
Welded: 45,000 TS.
For welding rod for steel; copper coated.

OXWELD NO. 9.
M-843; 3.2 C, 2.2 Si, bal Fe
For cast iron welding rod; for gray cast iron.

OXWELD NO. 19 CUPRO.
M-843; Cu alloy.
Welded: 35,000 TS.
For bronze welding rod; phosphor bronze.

OXWELD NO. 23.
M-843; 5 Si, bal Al.
For Al welding rod.

OXWELD NO. 25 M.
M-843; Sn, Zn, bal Cu.
Welded: 50,000 TS; 96 Brin.
For bronze welding rod.

OXWELD NO. 26.
M-843; Si-Cu alloy, 2.5 Si, bal Cu.
For bronze welding rod.

OXWELD NO. 28.
M-843; 0.08 C, 18 Cr, 8 Ni, Cb, bal Fe.
For stainless steel welding rod.

OXWELD NO. 31 T.
M-843, Sn, Zn, bal Cu.
For bronze welding rod.

OXWELD NO. 32 CMS.
M-843; C, bal Fe.
Welded: 95,000 TS.
For welding rod.

OXWELD NO. 38.
M-843; Cu alloy.
For Cu welding rod.

OXYGEN FREE COPPER.
M-33; 99.98 Cu.
Annealed: 32,000 TS; 10,000 YS; 45 El.
Rolled: 50,000 TS; 45,000 YS; 6 El.
For electrical conductors; high conductivity.

P2.
M-1114, 0.8-1.0 C, bal Fe.
For tools, dies, fixtures, water hardened.

P2 ALLOY.
M-137; 3.0-4.5 Cu, 4-5 Si, 2-4 Fe, 1.75-2.5 Ni, bal Al
Cast: 25,000 TS; 23,000 YS; 2 El; 101 Brin
For carburetors, brake shoes, cameras, electric meters; pressure die casting.

P3.
M-1114, 1.05-1.15 C, bal Fe
For tools, drills, taps; water hardened.

P4.
M-1114, 0.9-1.0 C, bal Fe
For tools, taps, reamers; water hardened.

P5
M-1114; 0.7-0.8 C, bal Fe
For tools; water hardened.

P6.
M-1114; 0.7-0.8 C, bal Fe.
For tools; water hardened

P-50 NICKEL.
M-68; 0.04 max Cu, 0.02 max Mn, 0.05 max Fe, 0.05 max C, 0.01 max Mg, 0.02 max Si, bal Ni + Co
For cathodes in electron tubes, high purity nickel.

PA 22 NICKEL.
M-121, 99.5 min Ni, 0.06-0.09 Mg.
For sleeves of indirectly heated, oxide coated cathodes in radio valves
Cathode nickel.

PA 23 NICKEL.
M-121; 99.5 min Ni, 0.035-0.065 Mg
For sleeves of indirectly-heated, oxide-coated cathodes in radio valves.
Cathode nickel.

PACKING
82 Pb, 4.8 Sn, 13 Sb.
20 Brin
For metallic packing; pouring temperature 324°C.

PACKING METAL.
51.8 Cu, 14.3 Zn, 15 Ni, 17 Pb, 1.8 Sn.
For metallic packing.

PACKING, PISTON.
M-258; 73-76 Pb, 12-14 Sn, 10-15 Sb.
11,000 TS; 26 Brin.
For metallic packing.

PACKING RINGS, FRENCH.
French; 51.8 Cu, 14.3 Zn, 15 Ni, 17 Pb, 1.8 Sn.
For packing rings.

PACKING, RUSSIAN.
Russian; 99 Zn, 0.9 Sn, 0 3 Pb, 0.2 Fe.
For packing metal.

PACKING (VALVE).
71 Sn, 24 Sb, 5 Cu
For valve packing, anti-friction.

PAGE 3½ Ni.
M-872; C, 3 5 Ni, bal Fe.
For gas welding rod; corrosion resistant.

PAGE-ALLEGHENY 4-6 CHROMIUM MOLY.
M-872, 0.10 max C, 4 Cr, Mo, bal Fe.
Annealed· 70,000 TS; 30,000 YS; 37 El, B70 Rock.
For welding electrodes, corrosion resistant.

PAGE-ALLEGHENY 8-10 Cr-Mo.
M-872, 0.08 max C, 8.5-10.5 Cr, 1.25-1 75 Mo,
bal Fe.
For welding electrodes; martensitic stainless steel.

PAGE-ALLEGHENY 12-14 Cr.
M-872, 0 12 min C, 12-15 Cr, bal Fe.
Annealed. 85,000 TS, 40,000 YS; 30 El; B95 Rock.
For combustion and steam engine parts, fans;
heat resistant to 1500°F.

PAGE-ALLEGHENY 12% Cr
M-872, 12 Cr, 0 12 max C, bal Fe.
Annealed· 70,000 TS; 35,000 YS; 25 El; B80 Rock.
For welding electrodes; corrosion resistant.

PAGE-ALLEGHENY 14-18 Cr.
M-872, 0 08 max C, 15-18 Cr, 0.5 max Ni, bal Fe.
Annealed· 65,000 TS; 35,000 YS, 35 El, 180 Brin.
Drawn 120,000 TS; 0 5 El; 230 Brin.
For welding electrodes, corrosion resistant, magnetic.

PAGE-ALLEGHENY 15-35
M 872, 0 25 max C, 15 Cr, 35 Ni, bal Fe
For welding electrodes for stainless steel,
coated, stainless

PAGE-ALLEGHENY 16% Cr
M-872, 0 12 max C, 16 min Cr, bal Fe.
For welding electrodes, corrosion resistant

PAGE-ALLEGHENY 17-7.
M-872, 0 10-0 20 C, 16-18 Cr, 7-8 5 Ni, bal Fe.
Annealed. 110,000 TS; 40,000 YS; 35 El;
B88 Rockwell
Drawn 270,000 TS, 240,000 YS; 1 El, C47 Brin
For trim, household articles,
Type 301X, stainless, austenitic

PAGE-ALLEGHENY 18-8
M-872, 18 Cr, 8 Ni, 0.07 C, 1.3 Cb, bal Fe.
Annealed. 90,000 TS; 35,000 YS; 55 El;
B80 Rockwell
Drawn· 350,000 TS, 175,000 YS; C45 Brin
For welding electrodes, strand springs, rope;
stainless steel

PAGE-ALLEGHENY 18-8 EZ.
M-872; 0 15 max C, 17-19 Cr, 8-10 Ni,
0.7 min P or S or Se, bal Fe
Annealed: 90,000-120,000 TS; 35,000 YS; 50-35 El;
130-150 Brin
For screw machine products, hardware;
stainless, austenitic, Type 303; free-cutting.

PAGE-ALLEGHENY 18-8 Mo.
M-872; 0 07 max C, 18-20 Cr, 12-15 Ni, 2.0-2.5 Mo,
bal Fe.
Annealed: 90,000 TS; 30,000 YS; 50 El
Drawn: 210,000 TS; 190,000 YS; 0.5 El.
For welding electrodes; austenitic, stainless.

PAGE ALLEGHENY 18-8S.
M-872; 0.03 C, 19-22 Cr, 10-12 Ni, bal Fe.
For welding electrodes; Type 304; stainless.

PAGE-ALLEGHENY 18-8 TYPE 307.
M-872; 0.07-0 15 C, 4 Mn, 0.5 Si, 19.5-22 Cr,
9-10.5 Ni, bal Fe.
Annealed: 80,000 TS; 30,000 YS; 50 El; 60 RA;
180 Brin
For stainless parts; Type 307; stainless, austenitic.

PAGE-ALLEGHENY 18-8S.
M-872; 0 03 C, 19-22 Cr, 10-12 Ni, bal Fe.
For welding electrodes, stainless steel.

PAGE-ALLEGHENY 18% Cr.
M-872; 0.35 max C, 18 min Cr, bal Fe.
For welding electrodes, corrosion resistant

PAGE-ALLEGHENY 19-9
M-872; 19 Cr, 9 Ni, 0.07 C, bal Fe.
Annealed: 80,000 TS; 30,000 YS, 50 El;
B80 Rockwell.
For welding electrodes; stainless steel.

PAGE-ALLEGHENY 23% Cr.
M-872; 0 16 max C, 23 Cr, bal Fe.
Annealed 85,000 TS; 25 El; B84 Rock.
For welding electrodes; corrosion resistant

PAGE-ALLEGHENY 25-20.
M-872, 0 25 max C, 27 Cr, 21 Ni, bal Fe
Annealed 90,000 TS, 40,000 YS; 50 El;
B80 Rockwell
Drawn: 200,000 TS; 150,000 YS; C36 Brin.
For welding electrodes, stainless steel.

PAGE-ALLEGHENY 25-20 Cb.
M-872, 0.06-0 10 C, 27 5 min Cr, 20-22 Ni,
1 2-1 4 Cb, bal Fe
Annealed: 75,000 TS, 30,000 YS; 40 El; 50 RA;
180 Brin.
For welding electrodes; stainless,
austenitic, stabilized.

PAGE-ALLEGHENY 25-20 Mo
M-872; 0 06-0 10 C, 1 5-2.0 Mn, 27 5 min Cr,
20-22 Ni, 2 Mo, bal Fe
For welding electrodes,
heat and corrosion resistant

PAGE-ALLEGHENY 33 GRADE C1
M-872, 0 12 max C, 12-14 Cr, bal Fe.
For fans, blowers, condensers, engine parts,
heat resistant to 1500°F

PAGE-ALLEGHENY 33 N.H.
M-872, 0.08 max C, 11.5-13.5 Cr, 0.10-0.20 Al,
bal Fe
For welding electrodes, stainless.

PAGE-ALLEGHENY 33 TQ
M-872; 0 12 max C, 11.5-13 Cr, bal Fe.
For welding electrodes; stainless.

PAGE-ALLEGHENY 34
M-872, 0 12 max C, 14-16 Cr, bal Fe.
For fans, blowers; corrosion resistant.

PAGE-ALLEGHENY 44
M-872; 0.20 max C, 22-26 Cr, 11-13 Ni, bal Fe.
For furnace parts, boiler baffles, pumps;
heat resistant to 2100°F.

PAGE-ALLEGHENY 46.
M-872; 0 10 min C, 4-6 Cr, bal Fe
For welding electrodes; for 4-6 Cr steel.

PAGE-ALLEGHENY 55.
M-872; 0.35 max C, 23-30 Cr, bal Fe.
For furnace parts, boiler baffles;
heat resistant to 2100°F.

PAGE-ALLEGHENY 66 GRADE B.
M-872; 0.12 min C, 15-18 Cr, bal Fe.
For fans, blowers, condensers, evaporators; heat resistant to 1600°F.

PAGE-ALLEGHENY 66 GRADE C2.
M-872; 0.12 max C, 16-18 Cr, bal Fe.
For corrosion resisting parts; corrosion resistant.

PAGE-ALLEGHENY 66W.
M-872; 0.12 max C, 16-18 Cr, 2.5-3.5 W, bal Fe.
For welding electrodes; corrosion resistant.

PAGE-ALLEGHENY 67.
M-872; 0.35 max C, 18-23 Cr, bal Fe.
For welding electrodes; corrosion resistant.

PAGE-ALLEGHENY 430F.
M-872; 0.12 max C, 14-18 Cr, 0.7 min P, S, Se, or 0.6 max Mo, Zn, bal Fe.
For welding rod; free-cutting, stainless.

PAGE-ALLEGHENY ALLOY 22 Cr.
M-872; 0.08-0.20 C, 19-22 Cr, 9-12 Ni, bal Fe.
For digesters, pipes, tanks, agitators, strainers; corrosion resistant.

PAGE-ALLEGHENY AMO.
M-872; 0.10 max C, 16-19 Cr, 14 max Ni, 2-4 Mo, bal Fe.
For welding electrodes; stainless.

PAGE-ALLEGHENY A-Ti
M-872; 0.10 max C, 17-20 Cr, 7-10 Ni, Ti = 6 × C, bal Fe.
For welding electrodes; stainless.

PAGE-ALLEGHENY "B" SP.
M-872; 0.11 max C, 18-20 Cr, 8-10 Ni, bal Fe.
For welding electrodes; stainless.

PAGE-ALLEGHENY METAL A.
M-872; 0.11 max C, 17-19 Cr, 7-9 Ni, bal Fe.
For welding electrodes; stainless.

PAGE-ALLEGHENY METAL B.
M-872; 0.08-0.20 C, 18-20 Cr, 8-10 Ni, bal Fe.
For welding electrodes; stainless

PAGE-ALLEGHENY METAL C.
M-872; 0.08-0.20 C, 17-19 Cr, 7-9 Ni, bal Fe
For stainless parts; Type 302.

PAGE-ALLEGHENY METAL Cb.
M-872; 0.10 max C, 17-20 Cr, 8-12 Ni, Cb = 10 × C, bal Fe.
For welding electrodes; stainless.

PAGE-ALLEGHENY METAL FM.
M-872; 0.20 max C, 17-19 Cr, 7-9.5 Ni, S or Se or Mo, bal Fe.
For welding electrodes; stainless.

PAGE-ALLEGHENY OHMALOY.
M-872; 0.12 max C, 12-14 Cr, 4-4.5 Al, bal Fe.
For welding electrodes; stainless.

PAGE-ARMCO
M-872; 0.03 max C, bal Fe.
Welded: 55,000 TS; 8 El.
For welding electrodes; bare and coated.

PAGE A-S-3½N.
M-872; 0.15-0.20 C, 0.3-0.6 Mn, 0.15-0.75 Si, 3.25-3.75 Ni, bal Fe.
For welding wire for Ni and alloy steels; bare.

PAGE A-S-6.
M-872; C, bal Fe.
For welding wire for submerged arc welding; bare.

PAGE A-S-10.
M-872; C, bal Fe.
For welding wire for submerged arc welding; bare.

M-872; C, bal Fe.
For welding wire for submerged arc welding; bare.

PAGE A-S-15-Mo.
M-872; C, alloy, bal Fe.
For welding wire for submerged arc welding; bare.

PAGE A-S-20.
M-872; C, bal Fe.
For welding wire; bare.

PAGE A-S-65.
M-872; C, bal Fe
For welding wire; bare.

PAGE A-S-110.
M-872; C, bal Fe.
For welding wire; bare.

PAGE-AUTO.
M-872; 0.06 C, bal Fe.
For welding electrodes.

PAGE B
M-872; 0.13-0.18 C, bal Fe.
Welded: 55,000 TS; 7 El.
For welding electrodes, rust and lime coated.

PAGE C.
M-872; 0.06 max C, 0.15 max Mn, bal Fe.
Welded 52,000-60,000 TS, 27-23 El
For gas welding rod, radio tube leads; AWS-GA-50, gas welding.

PAGE CE
M-872, 0.06 C, bal Fe
Welded: 50,000 TS, 8 El.
For welding electrodes, rust and lime coated.

PAGE DENTAL ALLOY.
93 Al, 2.25 Cu, 4.75 Au.
For dental applications

PAGE E.
M-872, 0.13-0.18 C, bal Fe.
Welded. 55,000 TS; 5 El.
For welding electrodes; rust and lime coated.

PAGE HARD FACING.
M-872, 0.6 C, 12-14 Mn, 2 Ni, bal Fe.
For hard facing electrodes; high manganese steel.

PAGE HC
M-872; 0.9 C, 1.4 Mn, bal Fe.
For welding electrodes; abrasion resistant.

PAGE HIGH CARBON.
M-872; 0.9-1.1 C, 0.6 Mn, bal Fe.
For hard facing electrodes; wear resistant.

PAGE HI-TENSILE C.
M-872; 0.07 C, bal Fe.
Welded: 75,000 TS; 20 El.
For welding electrodes; shielded arc.

PAGE HI-TENSILE F.
M-872, 0.06 C, bal Fe.
Welded: 80,000 TS; 17 El.
For welding electrodes; shielded arc.

PAGE HI-TENSILE G.
M-872; 0.11 C, bal Fe.
Welded: 85,000 TS; 17 El.
For welding electrodes; shielded arc.

PAGE HI-TENSILE M.
M-872; 0.06-0.08 C, 0.32-0.42 Mn, bal Fe.
Welded: 70,000-85,000 TS; 55,000 YS; 32-25 El.
For welding electrodes for low alloy steels; E-6015.

PAGE HI-TENSILE SHIELDED ARC.
M-872; 0.07 C, bal Fe.
Welded: 80,000 TS; 25 El.
For welding electrodes; shielded arc.

PAGE HT.
M-872; 0.2 C, bal Fe.
For welding electrodes.

PAGE MANGANESE BRONZE.
M-872; 0.3 Mn, 40 Zn, 0.75-0.85 P, bal Cu.
Welded: 60,000-65,000 TS; 25-20 El.
For gas welding wire; for cast iron welding

PAGE MANGANESE NICKEL.
M-872; 0.8-1.0 C, 12-14 Mn, 3.0-3.5 Ni, 0.2 Mo, 0.8-1.1 Si, bal Fe
Welded: 150 Brin.
For welding electrode, hard facing electrode; shielded arc, austenitic.

PAGE MC.
M-872, 0.36 C, 1 Mn, 1.2 Si, bal Fe.
For welding electrodes; mild, wear resistant.

PAGE MEDIUM CARBON
M-872; 0.32-0.45 C, 0.9-1.1 Mn, bal Fe.
For hard facing electrodes; tough

PAGE NAVAL BRONZE.
M-872; 59-61 Cu, 0.5-1.0 P, bal Zn
Welded. 49,000-55,000 TS; 35-25 El.
For gas welding wire, for cast iron welding.

PAITUNG WHITE COPPER.
26-40 Cu, 41-32 Zn, 16-37 Ni, 0-2.6 Fe.
For ornamental white metal parts; corrosion resistant

PAKTONG, COOKSON.
40.9 Cu, 45 Zn, 11.1 Ni, 2.5 Fe, 0.16 Co.
For domestic utensils, corrosion resistant

PAKTONG, FYFE
40.4 Cu, 25.4 Zn, 31.6 Ni, 2.6 Fe
For tableware, domestic utensils, corrosion resistant

PAKTONG, KEFERSTEIN.
26.3 Cu, 36.8 Zn, 36.8 Ni.
For tableware, corrosion resistant.

PAKTONG (Packfong)
Eng., 32-41 Ni, 26-40 Cu, 16-37 Zn, 0-2.6 Fe.
130,000 TS, 2 El
For tableware and ornamental uses, Nickel Silver.

PAKTONG, PEAT
57.9 Cu, 32.2 Zn, 7.7 Ni, 2.5 Fe
For ornamental ware, domestic utensils; corrosion resistant

PAKTONG, THURSTON
43.8 Cu, 40.6 Zn, 15.6 Ni.
For tableware, corrosion resistant

PAKTONG, TUTENAG
44-45.7 Cu, 16-39.6 Zn, 17.4 40 Ni
For domestic ware, ornamental parts; corrosion resistant.

PALAU-A
Eng., 60 Ni, 20 Pt, 10 Pd, 10 V.
For jewelry, chemical apparatus; Pt substitute, white gold.

PALAU-B
Eng., 20 Pd, 80 Au
For jewelry, chemical apparatus; Pt substitute, white gold

PALCO.
M-1493; 65 Pd, 35 Co.
For brazing molybdenum and tungsten. For cathode structures.
M.P. 2244-2250°F.

PALCRONIRD.
M-1493; 41 Au, 27 Pd, 22 Ni, 10 Cr.
M.P. 2150-2200°F.
For high temperature brazing.
Good flowability and wettability.

PALCUSIL-5.
M-1493; 68 Ag, 27 Cu, 5 Pd.
M.P. 1485-1490°F.
For brazing Kovar to ceramic seals.
Good wettability.

PALCUSIL-10
M-1493; 58 Ag, 32 Cu, 10 Pd.
M.P. 1515-1566°F.
For high temperature brazing of Kovar to ceramic seals
Good wettability.

PALCUSIL-15
M-1493; 65 Ag, 20 Cu, 15 Pd.
M.P. 1562-1652°F
For high temperature brazing for Kovar and ceramic seals
Good flowability and wettability

PALCUSIL-25.
M-1493; 54 Ag, 21 Cu, 25 Pd.
M.P. 1652-1742°F.
For high temperature brazing for Kovar.
High vapor pressure. Does not embrittle Kovar.

PALE YELLOW GOLD.
92 Au, 0.8-3 Ag, 0-8.3 Fe.
For jewelry; corrosion resistant.

PALID.
German; 11 Sb, 7 As, bal Pb.
For bearings; anti-friction.

PALINEY NO. 6
M-349, 44 Pd, 38 Ag, 1 Pt, 16 Cu, 1 Zn
Ht. Tr.: 165,000 TS, 110,000 YS; 15 El; 260 Brin.
Annealed: 110,000 TS, 63,000 YS; 24 El; 150 Brin.
For pivots, springs, bearings, electrical contacts.
Heat treatable, nonmagnetic, corrosion resistant.

PALINEY NO. 7.
M-349, 35 Pd, 10 Pt, 30 Ag, 14 Cu, 10 Au, 1 Zn.
Ht. Tr.: 185,000 TS, 150,000 YS; 10 El; 280 Brin
Annealed: 120,000 TS; 89,000 YS; 24 El; 180 Brin.
For springs, pivots, bearings, contacts, potentiometers
Non-magnetic, corrosion and wear resistant

PALINEY NO. 8.
M-349, 45 Pt, 38 Ag, bal Pd
Wire Annealed: 95,000-125,000 TS; 14 min El
Sheet Heat Treated: 160,000-200,000 TS; 0.5 min El; 110,000 PL; 390 Knoop.
For sliding contact in potentiometer windings of Nichrome.
Corrosion and wear resistant

PALINEY M
M-349; Pt, Au, Ag, bal Pd.
Wire: 60,000 TS; 24,000 YS; 23 El; 95 Brin.
For sliding contacts in potentiometers; corrosion and tarnish resistant, resistance wire.

PALIUM A
French; 1 Sn, 4 Pb, 4 Cu, 0.8 Mg, 0.3 Mn, 22 Zn, bal Al.
For bearings; antifriction

PALIUM Z
French; 2.6 Sn, 4 Pb, 4.5 Cu, 0.6 Mg, 0.3 Mn, 0.3 Zn, bal Al.
For bearings; antifriction.

PALLABRAZE-810.
M-200; 5 Pd, bal Ag + Cu
For brazing thermionic valves, magnetrons, klystrons.
M.P. 807-810°C.
High temperature brazing alloy

PALLABRAZE-840.
M-200; 10 Pd, Ag, bal Cu.
For brazing thermionic valves, magnetrons, klystrons.
M.P. 830-840°C.
High temperature brazing alloy.

PALLABRAZE-850.
M-200; 10 Pd, Cu, bal Ag.
For brazing thermionic valves, magnetrons, klystrons.
M.P. 824-850°C.
High temperature brazing alloy.

PALLABRAZE-880.
M-200; 15 Pd, Cu, bal Ag.
For brazing thermionic valves, magnetrons, klystrons.
M P. 856-880°C
High temperature brazing alloy.

PALLABRAZE-900.
M-200; 20 Pd, Cu, bal Ag.
For brazing thermionic valves, magnetrons, klystrons.
M.P. 876-900°C.
High temperature brazing alloy

PALLABRAZE-950.
M-200; 25 Pd, Cu, bal Ag
For brazing thermionic valves, magnetrons, klystrons.
M.P. 901-950°C.
High temperature brazing alloy.

PALLABRAZE-1010.
M-200, 5 Pd, bal Ag.
For brazing thermionic valves, magnetrons, klystrons.
M.P. 970-1010°C.
High temperature brazing alloy

PALLABRAZE-1090.
M-200; 18 Pd, bal Cu
For brazing thermionic valves, magnetrons, klystrons
M.P. 1080-1090°C.
High temperature brazing alloy.

PALLABRAZE-1225.
M-200; 30 Pd, bal Ag.
For brazing thermionic valves, magnetrons, klystrons.
M.P. 1150-1225°C.
High temperature brazing alloy.

PALLABRAZE-1237.
M-200; 60 Pd, bal Ni.
For brazing thermionic valves, magnetrons, klystrons
M.P. 1237°C.
High temperature brazing alloy.

PALLADENT.
40 Pd, bal Ag.

PALLADIUM ALLOY-1.
10 Rh, 90 Pb.
For jewelry; corrosion resistant.

PALLADIUM ALLOY-2.
67 Pd, 33 Ag.
For jewelry, corrosion resistant.

PALLADIUM GOLD-1.
90 Au, 10 Pd.
For jewelry; white gold, Pt substitute.

PALLADIUM GOLD-2.
40 Cu, 31 Au, 10 Ag, 10 Pd.
For jewelry; white gold, Pt substitute.

PALLAS.
M-1306; 1.05 C, Cr, bal Fe.
For bearings, cutters, liners, sleeves; water hardened, wear resistant.

"P" ALLOY.
Eng; 0.11 Fe, 0.11 Si, bal Al.
8,000 TS; 34 El.
For light alloy parts.

PALMANSIL-5.
M-1493; 75 Ag, 20 Pd, 5 Mn.
M.P 1846-1962°F.
For high temperature brazing
Good flowability and weldability

PALNI.
M-1493; 60 Pd, 40 Ni.
M.P 2260°F.
For high temperature brazing.
Good flowability and wettability.

PALNIRO-1.
M-1493, 50 Au, 25 Pd, 25 Ni.
M P. 2016-2050°F
For high temperature brazing
Wets and flows well on Mo-W and stainless steel.

PALNIRO-4
M-1493; 30 Au, 34 Pd, 36 Ni
M.P 2075-2136°F.
For high temperature brazing.
Wets and flows well on Mo-W and stainless steel.

PALNIRO-7
M-1493, 70 Au, 8 Pd, 22 Ni.
M P 1841-1899°F.
For high temperature brazing.
Wets W-Mo and stainless steel

PALORO.
M-1493, 92 Au, 8 Pd.
For brazing on molybdenum and tungsten.
M.P. 2192-2264°F

PALSIL-10
M-1493; 90 Ag, 10 Pd
M P. 1835-1950°F
For high temperature brazing
Good wettability and flowability.

PAN-7.
M-1218, M-1218a; 81.9 Cu, 10 Sn, 1 Ni, 7 Pb, 0.1 P
Cast 22,500-29,000 TS; 13,500-20,000 YS; 11-5 El; 65-75 Brin.
For connecting rod bearings, liners, sleeves; leaded bronze, anti friction

PAN-444.
M-1218, M-1218a; 83.75 Cu, 4 Sn, 4 Ni, 4 Pb, 0.25 P.
Cast: 27,000-36,000 TS; 16,000-20,000 YS; 18-8 El; 65-80 Brin.
For rocker bracket bushings in aircraft engines; leaded bronze, high ductility.

PAN-B
M-1218, M-1218a; 72.45 Cu, 9.5 Sn, 3 Ni, 15 Pb, 0.05 P.
Cast: 22,500-38,000 TS; 13,500-22,500 YS; 15-6 El; 60-75 Brin
For bearings, bushings, liners, sleeves; leaded phosphor bronze, corrosion resistant.

PAN-BS.
M-1218, M-1218a; 37 Pb, 0.5 Sn, 0.05 P, 0.5 Ni, bal Cu
Cast.
For main bearings, locomotive slippers; leaded bronze.

PANDALOY.
M-1256, M-1; C, Cr, Ni, bal Fe.
For paper making equipment, feed screws; stainless.

PANDEX.
M-73; 0.08 max C, 13-16 Cr, 24-28 Ni, 1-1.5 Mo, 1.75-2.25 Ti, 0 10-0.50 V, bal Fe.
Rolled: 135,000-160,000 TS; 85,000-115,000 YS; 30-20 El; 55-30 RA.
At 1400°F: 64,000 TS; 18.5 El; 23.5 RA.
For jet engine parts, superchargers, turbine wheels and blades; austenitic, heat resistant, age-hardenable.

PAN-H
M-1218, M-1218a; 66.85 Cu, 10 Sn, 3 Ni, 20 Pb, 0 15 P.
Cast. 20,000-27,000 TS, 11,500-18,000 YS; 13-6 El; 60-70 Brin.
For rotors, sleeves, bearings, bushings; leaded bronze, corrosion resistant.

PANSERI.
English; 1 Cu, 0.4 Mg, 4.5 Ni, 0.5 Fe, 11.5 Si, bal Al.
For pistons; high temperature resistance.

PANTAL
M-116, 0 5-1 0 Mg, 0.4-1 4 Mn, 0.8-2.0 Si, 0.3 Ti, bal Al.
Annealed· 16,000 TS, 14,000 YS; 25 El; 50 Brin.
Aged 60,000 TS, 50,000 YS; 10 El; 100 Brin.
For sheathing, body construction, architectural use; corrosion resistant, age-hardenable.

PANTAL.
M-935, 0.7 Si, 1 4 Mg, 0 9 Mn, 0-0 2 Ti, bal Al.
Heat treated· 43,000-50,000 TS; 26,000-36,000 YS; 12-15 El, 70-95 Brin.
For light alloy parts

PANTAL
M-1548, 0 5-1 0 Si, 0.4-1.4 Mn, 0 8-2 0 Mg, bal Al.
Half Hard 22,000 TS; 17,000 YS; 8 El; 45 Brin
Hard· 36,000 TS, 28,000 YS, 4 El, 60 Brin
For general structures, scaffolds, booms, transmission towers.
Corrosion resistant.

PANTAL 5
M-299, 9-13 Si, 0.25-0.40 Mg, 0.3-0.5 Mn, bal Al.
For light alloy parts; high corrosion resistance.

PANTAL-5
M-1548, 5 0 Si, 0.7 Mn, 0 7 Mg, bal Al.
Hard 26,000-37,000 TS, 21,000-33,000 YS; 4-8 El, 55-70 Brin
For general purposes, welding rods.
Corrosion resistant.

PANTANAX.
M-459; 1.2 C, 0.4 Si, 12 5 Mn, bal Fe.
For earth moving equipment, crushers, wear plates; wear and abrasion resistant.

PANTHER 5.
M-1; 1 5 C, 4 7 Cr, 12.5 W, 5 V, 5 Co, bal Fe.
Annealed. 241 Brin.
Heat treated: 660 Brin.
For lathe and planer tools, reamers; high speed steel, oil hardened. AISI T15.

PANTHER 5N.
M-1291, M-1114; 0 80 C, Co, 4.3 Cr, 0 85 Mo, 2 1 V, W, bal Fe.
For lathe and planer tools, broaches, reamers, taps; high speed steel.

PANTHER 750 SPECIAL.
M-1114, M-1291; 1.3 C, 4.3 Cr, 0.85 Mo, 4.5 V, 12 W, 5 Co, bal Fe.
For blanking and forming dies, chasers, broaches, taps, reamers, form cutters.
High speed steel. Excellent red-hardness.

PANTHER EXTRA.
M-1; 0.80 C, 14 W, 4 Cr, 2 V, 0.68 Mo, 5 Co, bal Fe.
For tools, cutters; high speed steel.

PANTHER EXTRA 655.
M-1291; 0.80 C, 6.5 W, 4 Cr, 5 Mo, 2 V, 5 Co, bal Fe.
Hardened: C 64-66 Rock.
For lathe and planer tools, form cutters, drills, chasers, reamers, broaches.
High speed steel, high red-hardness.

PANTHER EXTRA SPEZIAL.
M-1291, M-1114; 0.79 C, 4.75 Co, 4.3 Cr, 0.75 Mo, 1.5 V, 18 W, bal Fe.
For lathe and planer tools, reamers, drills, taps; high speed steel.

PANTHER N.
M-1291, M-1114; 0.86 C, 3.0 Co, 4.3 Cr, 0.85 Mo, 3.0 V, 12 W, bal Fe.
For lathe and planer tools, reamers, drills, taps, chasers, broaches; high speed steel.

PANTHER SPECIAL.
M-1; 0.75 C, 19 W, 4 Cr, 1 V, 5 Co, bal Fe.
For lathe and planer tools, reamers, hobs, drills; high speed steel, heavy duty; Type T4.

PANTHER SPECIAL.
M-1114; 0 7 C, 18 W, 9 Co, 1 Mo, 4 Cr, 2 V, bal Fe.
For lathe and planer tools, milling cutters, hobs, taps; Type T4; high speed steel.

PANTHER ULTRA.
M-1291, M-1114; 0.76 C, 12 Co, 4 2 Cr, 0.8 Mo, 1 5 V, 18 W, bal Fe.
High speed steel; for lathe and planer tools, drills, reamers, taps.

PANZER
M-615; 0 7 C, 19 W, 4 Cr, 2 V, bal Fe.
For cutters, tools; high speed steel.

PAR 1.
M-153; Cr-W-Co, Fe
For heat and wear resting parts; resists wear at high temperature to 2000°F

PAR 2.
M-153; 0.3 C, 1.5 Cr, 2 5 Ni, 0.3 Mo, bal Fe.
For gears, pinions, shafts; wear and shock resistant.

PAR 2C.
M-153; C, Cr, Ni, bal Fe
For heat and corrosion resisting castings; heat, wear and corrosion resistant

PAR 3.
M-153; 0 35 C, 3 Cr, bal Fe.
For machinery parts, wear and abrasion resistant.

PAR 4.
M-153; 0.4 C, 25 Cr, 2 Ni, bal Fe
For heat and corrosion resting parts; heat and acid resistant.

PAR 5.
M-153; 0.3 C, 18 Cr, 8 Ni, bal Fe.
For heat and corrosion resisting parts; heat and acid resistant.

PAR 6
M-153; 0.4 C, 28 Cr, 10 Ni, bal Fe.
For heat and corrosion resisting parts; heat and acid resistant.

PAR 7.
M-153; 0.4 C, 16 Cr, 35 Ni, bal Fe.
For heat and corrosion resisting parts; heat and acid resistant.

PAR 8.
M-153; 0.25 C, 18 Cr, 65 Ni, bal Fe.
For heat and corrosion resisting parts; heat and acid resistant.

PAR 9.
M-153; 0.40 C, 30 Cr, bal Fe.
For heat and corrosion resisting parts; heat and acid resistant.

PAR 9A
M-153; C, Ni, Cr, bal Fe.
For heat and corrosion resisting castings; heat, wear and corrosion resistant.

PAR 10.
M-153, 0.8 C, 15 Cr, 0.45 Mo, 0.50 W, 0.04 Al, bal Fe.
For guides for hot work; corrosion and heat resistant.

PAR 10A.
M-163; C, Ni, Cr, bal Fe.
For heat and corrosion resisting castings; heat, wear and corrosion resistant.

PAR 11.
M-153; 0.55 C, 0.75 Cr, 1.5 0.3 Mo, bal Fe.
For forging dies; oil hardened.

PAR 11A
M-153, C, Ni, Cr, bal Fe
For heat and corrosion resisting castings; heat, wear and corrosion resistant.

PARA.
M-114, 1.25 C, 0.4 Cr, 1.6 W, 0.2 V, bal Fe.
For cutters, dies, taps, drills, shear blades, punches; dense deep hardening steel.

PARAGON A
M-38; 0.98 C, 1.68 Mn, 0.26 V, 0.11 Cu, 0.63 Cr bal Fe
For tools, dies; non-deforming.

PARAGON OIL HARDENING
M-38; C, alloy, bal Fe
For dies, rollers, punches; air hardened, non-deforming

PARALLOY
M-873; 3 C, 1 Mn, 2.5-3 Ni, 0.5-0.75 Cr, 2 Si, 0.2-0.25 Mo, bal Fe.
Cast 50,000 TS; 250 Brin.
For castings, cylinders, dies; cast iron.

PARALOY NO. 2.
M-873; 3 C, 1.5 Si, 2-4 Ni, 0.75-1.0 Cr, bal Fe.
Cast: 40,000-50,000 TS; 250-300 Brin.
For cast dies for sheet metal stamping and drawing; cast iron.

PARASTEEL
M-367; 0.5 C, 3 Ni, 1 Cr, bal Fe.
For gears, shafts; tough

PAR-EXC.
M-115; 0.50 C, 2 W, 1.65 Cr, 0.25 V, bal Fe.
Annealed: 70,000 TS; 30 El; 64 RA; 165 Brin.
Heat treated: 245,000 TS; 5 El; 18 RA; 525 Brin.
For punches, dies, chisels, shear blades, cutters, pneumatic tools, hot working dies; extremely tough.

PARISION ALLOY.
Eng.; 69 Cu, 19.5 Ni, 6.5 Zn, 5 Cd.
For cheap jewelry; gilt finish.

PARK A HOLLO DRILL.
M-38; 0.3 C, 0.95 Mn, 2.25 Ni, 0.7 Cr, 0.3 Mo, bal Fe.
For hollow drill rod for detachable bits; oil hardening.

PARK ALLOY CLIPPER BLADE.
M-38; 1.1 C, 0.35 Ni, 0.4 Cr, 0.3 V, bal Fe.
For hair clippers; oil hardening.

PARKALOY.
M-874; 0.3 C, 1.2 Ni, 7 Cr, bal Fe.
For screws, bolts; cold forging alloy.

PARKERS CHROME ALLOY.
60 Cu, 20 Zn, 10 Ni, 10 Cr.
For fountain pen points; corrosion resistant.

PARK GATE.
M-488, 0.7 C, 18 W, 4 Cr, 1 V, bal Fe.
For high speed tools and cutters; high speed steel.

PARK ORTHOPEDIC STEEL.
M-38, C, alloy, bal Fe.
For orthopedic braces.

PARK SILVER.
M-38; 0.7 1.2 C, bal Fe.
For cutters, drills, broaches, dies; water hardening.

PARK SPECIAL
M-38; C, alloy, bal Fe
For tools.

PARR
Eng ; 80 Ni, 15 Cr, 5 Cu
73,000 TS; 15 RA; 137 Brin
For chemical machinery parts; stainless.

PARR
Eng ; 66.6 Ni, 18 Cr, 8.5 Cu, 3.3 W, 2 Al, 1 Mn, 0.2 Ti, 0.2 B
For chemical machinery parts, corrosion resistant.

PARSONS 2 S.A.
M-179, Sn base alloy
Cast
For bearings for internal combustion engines and steam turbines; antifriction white metal.

PARSON'S ALLOY
M-129; 56 Cu, 41.5 Zn, 1.2 Fe, 0.7 Sn, 0.1 Mn, 0.46 Al
70,000 TS; 25 El; 119 Brin.
For propeller blades, valve stems, engine frames, machine parts; tough.

PARSON'S MANGANESE BRONZE.
M-179, 55-60 Cu, 3.5 max Mn, Sn, Al, bal Zn.
Forged: 64,000 TS; 28,000 YS, 35 El, 120 Brin
Rolled 70,000 TS; 32,000 YS, 34 El; 130 Brin.
Extruded: 70,000 TS; 38,000 YS; 28 El.
For pump and sluice valve spindles, propellers, marine engine parts, condenser tubes, valves; non-corrosive, resists mild acids.

PARSONS STAR.
M-179, Sn base alloy
Cast
For marine main bearings, thrust blocks, steam pumps, and reciprocating engines; antifriction white metal.

PARSON'S WHITE BRASS.
M-179; 62 Sn, 35 Zn, 3 Cu.
Cast: 12,250 TS.
For marine and automobile bearings; hard, tough alloy.

PARSON'S WHITE BRASS.
M-309; 74 Sn, 5 Cu, 7 Sb, 14 Pb.
Cast: 12,250 TS; 10,700 YS; 3 El.
For marine and automobile bearings; Babbitt.

PARSON'S WHITE BRASS.
M-179; 65-70 Sn, 30-25 Zn, 5 Cu.
For marine and automobile bearings; tough.

PARSONS WHITE BRASS DA.
M-309; 3.7 Cu, 7.5 Sb, bal Sn.
Cast: 10,500 TS; 9400 YS; 3.5 El; 3.9 RA; 29 Brin.
For bearings for diesel turbine and gasoline engines; Babbitt.

PAR-TEN.
M-604; 0.12 C, 0.75 Mn, 0.10 Si, 0.04 V, bal Fe.
Rolled: 62,000 TS; 45,000 YS; 28 El.
For railroad and agriculture equipment, mine cars, auto bodies; high strength, low alloy construction steel.

PARTINIUM-1.
Eng.; 89 Al, 7.4 Cu, 1.7 Zn, 1.3 Fe, 1.1 Si.
19,000 TS; 12,000 YS; 2.5 El; 50 Brin.
For light aircraft and automobile parts; similar to Alcoa No. 113.

PARTINIUM-2.
Eng.; 96 Al, 2.4 Sb, 0.8 W, 0.6 Cu, 0.2 Sn.
65 Brin.
For light aircraft and automobile parts.

PATENT COBALT-CHROME STEEL
M-40; 1.27-1.43 C, 11.75-13.75 Cr, 2.7-3.3 Co, 0.60 max Ni, 0.55-0.85 Mo, 0.35 Mn, 0.6 max Si.
For air cooled aeronautic engine valves, blanking, trimming, forming and shearing tools; air hardening, non-deforming; resists wear.

PATINA STEEL.
M-383; C, 0.2-0.3 Cu, bal Fe.
Rolled: 52,000 64,000 TS; 35,000-50,000 YS; 725 El; 750 RA; 100 Brin.
For sheet metal structures, roofing, fences, pipes, bridges, nails; rust resisting.

PATINA STEEL BEIZEREI.
M-383; 0 4 Cu, Mn, Si, P, bal Fe.
Rolled: 52,000-64,000 TS; 35,000-50,000 YS; > 25 El; > 50 RA; > 100 Brin
For pickling installations and structures; high acid resistance

PATINA STEEL RAUCHGAS.
M-383, 0.4 Cu, Mn, Si, P, bal Fe.
Rolled: 52,000-64,000 TS; 35,000-50,000 YS; > 25 El; > 50 RA; > 100 Brin.
For structures exposed to smoke and acid fumes; high smoke resistance.

PATRIUS CNM
M-1388; 0.56 C, 0.8 Cr, 0.2 Mo, 1.75 Ni, 0.1 V, bal Fe.
For forging and heading dies; oil hardened, tough.

PATRIUS V.
M-1388; 0 55 C, 0.70 Cr, 0.18 Mo, 1.65 Ni, 0.1 V, bal Fe.
For forging and heading dies; oil hardened, tough.

PATTERN ALLOY-1.
Eng ; 90 Al, 8 Cu, 2 Sn.
20,000-29,000 TS; 6-4 El.
For pistons; similar to Alcoa No. 12.

PATTERN ALLOY-2.
Eng.; 87 Pb, 13 Sb.
18,000 TS; 11 El; 10 RA.
For bearings; hard.

PATTERN METAL.
30-40 Zn, 15-40 Sn, 20-42 Pb, 0-3 Cu.
For bearings; anti-friction.

PAULITE.
M-875; 3.2 C, 2.5 Si, 1.5 Ni, 0.8 Cr, bal Fe.
For crushers; cast iron abrasion resistant.

PAX NON BREAK.
M-618; 0.5 C, 1.5 Cr, 2.25 W, 0.25 V, bal Fe.
For hot work dies; hot work steel.

P.B.
M-368; 0.7-0.9 C, bal Fe.
For tools; water hardening.

P.C. NO, 110-9A.
M-1599; 2.9-3.5 TC, 1.8-2.5 Si, 0.5-0.8 Mn, 0.2-0.8 Cr, 0.25-1.0 Cu, 0.25-1.0 Ni, bal Fe
Cast: 30,000 min TS; 212-293 Brin.
For machine dliners, machinery parts, housings, gears.
Wear resistant cast iron.

P.C. NO. 110-28.
M-1599; 2.8-3.3 TC, 1.8-2.5 Si, 0.5-0.8 Mn, 0.2-0.8 Cr, 0.25-1.5 Cu, 0.25-1.5 Ni, 0.5 Mo, bal Fe.
Cast: 40,000 min TS; 241-293 Brin.
For machined liners, gears, housings.
Wear resistant cast iron.

P.C. NO. 110-38.
M-1599; 3.0 max TC, 2.5-3.0 Si, 1.0-1.5 Mn, 1.75-2.5 Cr, 5.5-7.5 Cu, 13.5-17.5 Ni, bal Fe.
Cast: 25,000 min TS; 174 max Brin.
For stainless cast liners.
Stainless, austenitic cast iron.

P.C NO. 110-50.
M-1599; 2 9 max C, 2.0-3.2 Si, 0.8-1.5 Mn, 1.75-2.4 Cr, 18.0-22.0 Ni, bal Fe.
Cast: 55,000 min TS; 32,000 min YS; 8 El.
For cast liners.
Corrosion resistant, ductile cast iron.

P.C. NO. 110-63.
M-1599; 3 35-3.65 TC, 2.3-2.55 Si, 0.5-0.7 Mn, 0.2-0.4 Cr, 0 6-0.9 Cu, 0.3-0.5 Ni, bal Fe.
Cast: 30,000 min TS; 195-267 Brin.
For thin walled liners.
Wear resistant cast iron.

PDCP
M-319, Cu.
For electric generators and motors; electrolytic pure copper.

PDRL 162.
M-1491; 0 12 C, 10 Cr, 4 Mo, 2 W, 1 Cb, 1 Ti, 6.5 Al, 0.02 B, 0 10 Zr, 2.0 Ta, bal Ni.
Cast: 146,000 TS; 118,000 YS; 7 El.
At 1400°F: 146,000 TS; 123,000 YS; 5.5 El.
For high temperature service, jet engine and turbine components.
Heat and corrosion resistant. Casting alloy.

PDRL 163.
M-1491; 16.7 Cr, 6.3 Al, 0.1 Ti, 1.6 Mo, 2 W, 1 Cb, 0.05 C, 2 Ta, 0.02 B, 0.10 Zr, 0.30 max Fe, bal Ni.
For jet engine and gas turbine components, high temperature parts.
High heat and oxidation resistance. Cast alloy.

P-D TUNGSTEN.
M-432; C, 9.5 W, alloy, bal Fe.
For hot work and punch dies; high speed steel for maximum red-hardness.

PE 8
Russia; 92 WC, 8 Co.
For cutting tools; cemented.

Pe 50.
M-Italy; 5 Mg, bal Al.
Annealed: 42,000 TS; 22,000 YS; 35 El; 65 Brin.
For rivets.
Non-heat treatable.

PECHKO WHITE GOLD.
60 Au, 30 Pd, 10 Pt, 0.1-2.0 Ir.
For jewelry, ornaments; corrosion resistant.

PECKRITE.
M-876; 2.8-3.0 T.C., 1.6-1.8 Si, 0.75 Mn, 1.2-1.5 Ni, bal Fe.
Cast: 50,000 TS.
Heat treated: 70,000 TS; 450 Brin.
For bushings, gears, piston rings, cams; cast iron.

PECO.
M-1291; 0.63 C, 0.8 Cr, 1.5 Si, bal Fe.
For shears, knives, cold work tools, punches.
Tough, shock resistant, oil harden.

PEERLESS.
16.5 Cr, 3 Fe, 2 Mn, bal Ni.
For heating elements; resistance alloy.

PEERLESS 56.
M-38; 0.40 C, 3.25 Cr, 0.33 V, 2.5 Mo, bal Fe.
Heat treated: 307,000 TS; 243,000 YS; 8 El; 36 RA; 600 Brin
For extrusion mandrels; hot work steel, oil hardened.

PEERLESS "A."
M-38; 0.3 C, 9 W, 3.25 Cr, 0.25 V, bal Fe
For hot-heading and forging dies, gripping dies, swedges, hot work steel.

PEERLESS COLD HEADER.
M-38; 0.95 C, bal Fe.
Water hardened.
For tools, cold heading dies; cold work steel.

PEERLESS EXTRA.
M-38, 0.7-1.2 C, bal Fe.
For tools and punches, cutters; water hardening.

PEERLESS J.
M-38, 0.53 C, 0.11 Ni, 1.37 Cr, 1.3 V, 2.8 W, 1.5 Mo, bal Fe.
Annealed 88,000 TS; 60,000 YS; 29 El; 56 RA.
Heat treated: 256,000-209,000 TS; 232,000-188,000 YS; 8-7 El, 25-27 RA.
For hot work dies, aircraft structural members, hot work steel, oil hardened.

PEERLESS LCT-2
M-38; 0.4 C, 0.3 Mn, 2 Cr, 0.35 V, 11.5 W, bal Fe.
Ht Tr: 190,000 TS, 160,000 YS; 9 El; C 42 Rock
For dummy blocks, die holders, brass extrusion and forging dies, punches, die casting dies.
Abrasion and heat resistant.
Type H22 hot work steel.

PEERLESS SPECIAL.
M-343; C, Co, bal Fe.
For tools, dies; oil hardened.

PEERLESS W Co.
M-38; 0.30 C, 2.5 Cr, 12 W, 3.5 Co, bal Fe.
For extrusion dies and tools, hot work steel.

PELCOLOY.
M-1523; 70 Ni, 30 Fe.
Resistance wire. 120 ohms per cir.mil.ft
Ann: 70,000 psi; Hard drawn: 150,000 psi.
High temp coefficient of resistance: 4500 ppm between 0° and 100°C
Max. op temp: 590°C.

PENAIR 5.
M-341; 1.0 C, 0.6 Mn, 5.25 Cr, 1.1 Mo, 0.25 V, bal Fe.
For dies, rollers, punches; air hardened, non-deforming. AISI A2.

PENCO.
M-39; 0.95-1.05 C, bal Fe.
For tools, drills, taps; water hardened.

PENCO 70.
M-341, 0.70 C, 0.7 Mn, 0.25 Si, 0.7 Cr, 1.5 Ni, 0.3 Mo, bal Fe
Oil hardening, for forming rolls, punches, dies, clutch parts, knuckle pins, spindles.
Reference AISI-SAE 4370.

PENCO ACS.
M-341, 0.07 max C, 0.4 Mn, 0.25 Si, 4.5 Cr, bal Fe.
For hubbed cavity plastic mold; oil hardening.

PENCO BRAKE DIE
M-341; 0.51 C, 0.95 Cr, 0.87 Mn, 0.2 Mo, bal Fe.
Hardened: 140,000 TS; 293 Brin
For press brake dies, oil hardening

PENCO Cr-Mo-W.
M-341, 0.33 C, 1.05 Si, 1.55 W, 1.65 Mo, 5 Cr, bal Fe
For hot work dies; air hardening.

PENCO HI-VAN.
M-341, 0.4 C, 5.25 Cr, 1.2 Mo, 0.9 V, 1.1 Si, bal Fe
For hot work dies, oil or air hardening.

PENCO-OCS
M-341, 0.06 C, 0.30 Mn, 1.0 Cr, 0.25 Mo, B, bal Fe
For hobbed cavity molds, case hardened

PENCO WH
M-341, 0.95-1.1 C, bal Fe
For tools, dies, water hardening

PENCOYD.
M-877, 0.3 C, 1 Ni, bal Fe.
For bridge construction.

PEN-HOB.
M-341; 0.10 max C, 0.60 Cr, 1.25 Ni, bal Fe.
For hobbed cavity molds; case hardened.

PEN METAL-1.
Eng, 67 Au, 25 Cu, 8 Ag
145,000 TS
For pen points, corrosion resistant.

PEN METAL-2
Eng, 85 Cu, 13 Zn, 2 Sn
For pen points; corrosion resistant

PENN-AIR
M-1433, 1.0 C, 2 Mn, 1 Cr, 1 Mo, bal Fe
For punches, dies, blanking and forming tools; Type A2, air hardened

PENNALOY "A"
M-466, 0.4 C, 1.5 Ni, 0.8 Cr, 0.2 Mo, bal Fe.
Medium: 225-250 Brin.
For castings for abrasion resistance, bucket lips and teeth; abrasion resistant

PENNALOY "B"
M-466, C, alloy, bal Fe
Hardened. 500-600 Brin.
For crusher jaws, cement mills, sand pumps; wear resistant

PENNALOY "C"
M-466; C, alloy, bal Fe.
Hardened 500-600 Brin.
For sand and sludge pumps; resists mine waters.

PENNALOY "D."
M-466; C, alloy, bal Fe.
Medium: 225-240 Brin.
For sand and sludge pumps, pump sleeves; resists mine waters.

PENNALOY HEAT RESISTANT.
M-466; 0.13-0.20 C, 5-7 Cr, bal Fe.
For oil refineries; corrosion resistant.

PENNALOY HEAT RESISTANT.
M-466; 0.21-0.25 C, 7-11 Cr, bal Fe.
For oil refineries; corrosion resistant.

PENNANT
M-432; 0.90 C, 1.6 Mn, 0.20 V, bal Fe.
For tools, blanking and forming dies, broaches, taps, reamers; non-shrinkable.

PENN-CUT.
M-1433, 0.70 C, 4 Cr, 1 V, 18 W, bal Fe.
For taps, hobs, reamers, lathe cutters; Type T1; high speed steel.

PENN-CUT 5.
M-1433; 0.80 C, 4 Cr, 1 V, 18 W, 5 Co, bal Fe
For lathe and planer tools, form cutters, hobs, Type T5; high speed steel

PENN-CUT MOLY.
M-1433; 0.80 C, 4 Cr, 2 V, 6.4 W, 5 Mo, bal Fe.
For lathe and planer tools, form cutters, hobs; Type M2, high speed steel.

PENN-FLEX
M-1433, 0.33 C, 0.72 Mn, 0.25 Si, 0.85 Cr, 0.42 W, 0.45 Mo, bal Fe.
Oil or water hardening tool steel, designed for plastic molds

PENNROLD-10
M-1252, 0.40-0.60 Be, 2.35-2.60 Co or Ni, bal Cu
Annealed. 40,000 TS; 25,000 YS, 30 El, 40 RA.
Heat treated 150,000 TS; 140,000 YS, 1 El
For current carrying springs, switch parts, circuit breaker parts; age-hardenable, fatigue and corrosion resistant

PENNROLD-25
M-1252, 1.8-2.05 Be, 0.20 min Co or Ni, 0.60 max Co plus Ni, bal Cu.
Annealed 60,000 TS, 28,000 YS, 60 El
Hard 120,000 TS, 112,000 YS, 2 El.
Heat treated 215,000 TS, 205,000 YS, 1 El.
For current carrying springs, diaphragms, switch blades, contacts, bellows; age-hardenable, fatigue and corrosion resistant.

PENNROLD-165
M-1252; 1.6-1.8 Be, 0.20 min Co or Ni, 0.60 max Co plus Ni, bal Cu
Annealed 60,000 TS, 25,000 YS, 60 El.
Hard· 120,000 TS, 110,000 YS; 2 El
Heat treated· 200,000 TS, 180,000 YS; 1 El.
For current carrying and mechanical springs, age-hardenable, fatigue and corrosion resistant.

PENNSYLVANIA L C D
M-1433, 0.40 C, 4.5 Cr, 1 Mo, 0.8 W, 0.4 Mn, bal Fe.
For shears, punches, blanking and trimming dies; oil hardened, non-deforming.

PENNSYLVANIA L T.A.
M-1433, 1 C, 2 Mn, 0.9 Cr, 0.9 Mo, bal Fe.
For chisels, punches, dies, mandrels, crimpers; air hardened, non-deforming.

PENNSYLVANIA P.B DRILL ROD
M-368; 1.0-1.2 C, bal Fe.
Annealed· 100,000 TS, 53,000 YS; 21 El; 42 RA; 200 Brin.
For drills, taps, reamers; Type W1; water hardened

PENNSYLVANIA P.H.-9.
M-1433; 0.35 C, 2.75 Cr, 0.30 V, 9 W, bal Fe.
For extrusion rams, liners, die casting dies; hot work steel, oil hardened.

PENNSYLVANIA P.H. 14.
M-1433; 0.42 C, 3.5 Cr, 0.3 V, 14 W, bal Fe.
For extrusion dies, liners and rams, hot punches; hot work steel, oil hardened.

PENNSYLVANIA P.H VAN.
M-1433; 0.40 C, 1.1 Si, 5.25 Cr, 0.9 V, 1.2 Mo, bal Fe.
For hot work tools and dies; hot work steel, oil hardened.

PENNSYLVANIA P.H.W.
M-1433; 0.35 C, 1.5 Mn, 5 Cr, 1 Si, 1.25 W, 1.25 Mo, 0.2 V, bal Fe.
For hot work tools and dies; hot work steel, oil hardened

PENNTEMP 165.
M-1252, 1.6-1.8 Be, 0.20-0.35 Co, bal Cu.
AM-temper. 100,000-110,000 TS; 75,000-90,000 YS; 18-22 El
XHM-temper: 160,000-175,000 TS, 135,000-150,000 YS, 3-7 El.
For contacts, switch members, clips, springs; age hardenable.

PEN-O-FOUR
M-341; 0.75 C, 0.7 Mn, 0.9 Cr, 1.75 Ni, 0.35 Mo, bal Fe.
For tools, dies, oil hardening

PENSTOCK-B
0.25 max C, 0.90-1.35 Mn, 0.15-0.30 Si, bal Fe.
Normalized. 70,000 min TS, 42,000 min YS; 23 min El.
For welded structures, hydroelectric penstocks. Shock resistant

PENTANAX S
M-459, 0.85 C, 1 Si, 17.5 Mn, bal Fe.
For wear and abrasion resistant parts; wear and abrasion resistant

PEN-VAN NO 12
M-341, 0.55 C, 1 Cr, 0.15 V, bal Fe.
For tools, chisels, punches; oil hardening.

PER 2.
French, 0.25 C, 22 Cr, 2 Ti, 2 Al, bal Ni.
For gas turbine components; heat and oxidation resistant

PERALUMAN 1
M-249, M-624, 0.5-1.5 Mg, 0.5-1.5 Mn, bal Al.
Soft 25,000 TS, 10,000 YS, 20 El, 45 Brin.
Hard 41,000 TS; 38,000 YS; 8 El; 75 Brin.
Extruded: 26,000 TS; 14,000 YS; 20 El; 45 Brin.
For paneling, roofing, containers; corrosion resistant, non-hardenable

PERALUMAN 2.
M-249, M-624, 2.15 Mg, 1.4 Mn, bal Al.
Soft. 31,000-36,000 TS, 15,000-21,000 YS; 20-16 El.
Hard 50,000-65,000 TS, 45,000-58,000 YS; 5-2 El
For panelling in architecture, ship building, automotive parts; corrosion resistant.

PERALUMAN 2.
M-1548, 1.3-1.5 Mn, 2.0-2.3 Mg, bal Al.
Soft· 31,000 TS; 14,000 YS; 20 El; 50 Brin.
Hard: 60,000 TS; 57,000 YS; 2 El; 105 Brin.
For vessels, storage tanks, welded structures. Non-hardenable, corrosion resistant.

PERALUMAN 3.
M-541, M-1220; 3.0-3.3 Mg, 0.30 Mn, bal Al.
Cast: 21,400-28,500 TS; 9000-12,000 YS; 6-10 El; 45-50 Brin
For light alloy castings; corrosion resistant.

PERALUMAN 3.
M-1420; 2-3 Mg, 0-0.4 Mn, bal Al.
Sand cast: 22,800 TS; 11,400 YS; 5 El; 50 Brin.
Permanent mold: 29,000 TS; 11,400 YS; 10 El; 55 Brin.
For aircraft and marine equipment; corrosion resistant to sea water.

PERALUMAN 3.
M-249, M-493; 2-3 Mg, 0-0.4 Mn, bal Al.
Soft: 32,000 TS; 16,000 YS; 25 El; 60 Brin.
Hard: 45,000 TS; 40,000 YS; 7 El; 90 Brin.
For architectural trim, containers, ship building corrosion resistant.

PERALUMAN 3.
M-1176; 3 Mg, 0.3 Mn, bal Al.
Cast: 21,000-29,000 TS; 8,000-12,000 YS; 10-6 El; 45-55 Brin.
For light alloy parts; corrosion resistant.

PERALUMAN 3G.
M-1605; 0.2-0.4 Si, 0.25-0.35 Mn, 3.0-3.3 Mg, 0.08-0.15 Ti, bal Al.
As Cast: 27,000 TS; 14,000 YS; 3-8 El; 45-60 Brin.
Heat Treated: 33,000 TS; 20,000 YS; 2-8 El; 50-70 Brin.
For sand and die castings, marine hardware, crankcases, oil pans, housings.
Fair castability, high corrosion resistant. Resists sea water. Heat treatable.

PERALUMAN 5.
M-249, M-1220, M-493; 5 Mg, 0.5 Mn, bal Al.
Soft: 41,000 TS; 21,000 YS; 24 El; 70 RA; 160 Brin.
For architectural trim; corrosion resistant.

PERALUMAN 5.
M-1176; 5 Mg, 0.4 Mn, bal Al.
Heat treated: 28,000-33,000 TS; 13,000-17,000 YS; 12-8 El; 60-80 Brin.
For light alloy parts; corrosion resistant.

PERALUMAN 5G.
M-1605; 0.8-1.0 Si, 0.25-0.35 Mn, 5.0-5.5 Mg, 0.08-0.15 Ti, bal Al.
Sand cast: 28,500 TS; 15,500 YS; 2-5 El; 55-70 Brin.
Die cast: 36,000 TS; 16,000 YS; 3-8 El; 60-80 Brin.
For marine hardware, crankcases, instrument cases, fuel gages.
Fair castability, high strength and corrosion resistant to sea water.

PERALUMAN 7.
M-624, M-249; 7 Mg, 0.5 Mn, bal Al.
Half hard: 60,000 TS; 43,000 YS; 15-20 El; 90-95 Brin.
Annealed: 43,000 TS; 29,000 YS; 26-30 El; 80-90 Brin.
For light alloy parts, aircraft parts; corrosion resistant.

PERALUMAN 7.
M-1176; 7 Mg, 0.4 Mn, bal Al.
Heat treated: 37,000-43,000 TS; 19,000-22,000 YS; 11-5 El; 70-80 Brin.
For marine hardware; resists sea water corrosion, age-hardenable.

PERALUMAN 7.
M-1548; 0.3-0.5 Mn, 7.0 Mg, bal Al.
Soft: 42,000 TS; 21,000 YS; 24 El; 75 Brin.
Hard: 64,000 TS; 51,000 YS; 4 El; 130 Brin.
For rivets.
Non-heat treatable.

PERALUMAN 9.
M-541, M-1220; 8-10 Mg, 0.3 Mn, bal Al.
Cast: 35,600-40,000 TS; 21,400-27,000 YS; 6-13 El; 75-80 Brin.
For fuel meters; corrosion resistant.

PERALUMAN 9.
M-1176; 9.3 Mg, 0.3 Mn, 0.02 Be, bal Al.
Heat treated: 28,000-35,000 TS, 14,000-19,000 YS; 2.5-1.5 El; 70-80 Brin.
For marine hardware; resists sea water corrosion, age-hardenable.

PERALUMAN 9G.
M-1605; 0.25-0.35 Mn, 9.0-9.5 Mg, 0.03 Be, bal Al.
Die cast: 38,000 TS; 23,000 YS; 1-3 El; 60-80 Brin.
For general die castings, marine hardware.
Fair castability, good strength, high corrosion resistance. Heat treatable

PERALUMAN 10.
M-1176; 10 Mg, 0.4 Mn, bal Al.
Heat treated: 50,000-56,000 TS; 21,000-26,000 YS; 13-6 El; 75-85 Brin.
For marine and aircraft parts; heat treatable, resists sea water corrosion.

PERALUMAN 15
M-249, M-541; 0-0.3 Mn, 1.3-1.8 Mg, bal Al.
Soft: 21,000 TS; 8,000 YS; 28 El; 40 Brin.
Hard: 32,000 TS, 30,000 YS; 6 El; 65 Brin.
For panels, containers.
Corrosion resistant.

PERALUMAN 25.
M-624, M-541; 2.2-2.8 Mg, 0.15-0.45 Mn + Cr, 0.4 max Fe, 0.3 max Si, bal Al
Annealed: 22,000-31,300 TS; 11,400-17,000 YS; 22-30 El, 45-55 Brin
Hard: 37,000-41,200 TS, 34,000-40,000 YS; 5-9 El; 70-85 Brin
For boat hulls, guided missile containers.
Corrosion resistant.

PERALUMAN-30.
M-249; 0.4 max Mn, 3-4 Mg, bal Al.
½H-temper: 39,750 TS; 35,500 YS; 8 El; 80 Brin.
H-temper: 49,500 TS.
For chemical and food processing equipment, ship building; resists sea water corrosion.

PERALUMAN 30G.
M-249, M-1634, 2-4 Mg, 0.25-0.35 Mn, bal Al.
Annealed: 21,400-28,500 TS, 9,000-12,000 YS; 20-6 El; 45-50 Brin.
For architecture, shipbuilding; corrosion resistant.

PERALUMAN 35.
M-624, M-541; 3.2-3.8 Mg, 0.2-0.4 Mn, 0.1 max Ti, 0.4 max Fe, 0.05 max Cu, bal Al.
Annealed: 30,000-37,000 TS; 12,800-20,000 YS; 20-30 El; 55-70 Brin.
Hard: 41,200-47,000 TS; 35,600-44,100 YS; 4-9 El; 85-100 Brin.
For boat hulls, guided missile containers.
Corrosion resistant.

PERALUMAN 50.
M-249, M-541; 0.2-0.4 Mn, 4.5-5.6 Mg, bal Al.
½ H-temper: 45,500 TS; 25,000 YS; 30 El; 80 Brin.
H-25 temper: 57,000 TS; 48,000 YS; 8-13 El; 110-95 Brin.
For chemical and food processing equipment; resists sea water corrosion.

PERALUMAN 50G.
M-249, M-1634; 4-6 Mg, 0.3 Mn, 0.7-1.0 Si, bal Al.
Annealed: 41,000 TS; 21,000 YS; 24 El; 70 Brin.
For architectural trim, corrosion resistant.

PERAX.
M-753; C, alloy, bal Fe.
For punches, dies, tools; oil hardened, tough.

PERCEIT.
Eng ; 55-80 Co, 20-35 Cr, 0-10 W.
40,000-130,000 TS; 570 Brin.
For high speed tools and dies; high speed steel.

PERCIT.
Cr-Co-W-Ni.
For tools; similar to Stellite.

PERCIT EXTRA.
M-72; 1.1 C, 2.5 Si, 0.4 Mn, 27 Cr, 60 Co, 4.3 W, bal Fe.
For hard facing electrodes; heat resistant.

PERCIT SPECIAL.
M-72; 1.5 C, 1.45 Si, 0.4 Mn, 27.5 Cr, 32.5 Co, 4.25 W, bal Fe.
For hard facing electrodes; heat resistant

PERCY ALUMINUM.
Eng ; 90-86 Cu, 7.5-13 Al, 0-2 Pb, 0-1.5 Mn.
Rolled· 53,000 TS; 9 El.
Cast. 12,000 TS, 30 El, 30 RA.
For bearings, stripper nuts, heavy duty.

PERDONAL.
M-764; 1.5-3.0 Mg, 0.5-1.5 Mn, 0.3 max Cr, bal Al.
Soft· 26,000 TS; 10,000 YS; 20 El; 45 Brin.
Hard 41,000 TS, 36,000 YS; 5 El; 77 Brin
For roofing, hydraulic tubing, architectural trim; good forming and welding properties

PERDURO
M-170; 1 6-1.8 T C , 0 4-0 6 C C., 0 5-0 7 Mn, 1 5 Si, 0 9-1.1 Cu, bal Fe
Heat treated 80,000-90,000 TS; 60,000-70,000 YS, 8-6 El, 179-207 Brin
For cast chains, sprockets, chain links; resists heat to 1100°F, malleable iron.

PEREKS CC
M-40; 0 66-0 80 C, 49-57 Ni, 24-30 Cr, Si, Mn, bal Fe
For heat and corrosion resistant parts, heat and corrosion resistant

PERFECTION ANTIFRICTION.
M-88, Pb, Sn, Sb.
For bearings; Babbitt.

PERFORCE SPEZIAL 3.
M-1308; 0 40 C, 13 Cr, 0 30 Mn, 0 40 Si, bal Fe.
Annealed· 100,000 TS, 55,000 YS; 20 El, 50 RA; 200 Brin.
For valves, gages, cutlery, surgical instruments, Type 420; stainless

PERKING BRASS.
Eng ; 76.2-80 Cu, 23.8-19.8 Sn, 0-0.14 Zn.
For ornamental parts, reflectors.

PERLIT NICKEL CAST IRON.
1.7-3 0 C, < 1 Si, Ni, Mn, bal Fe.
For castings, frames, housings; U.S.P. 1564284, sufficient Ni to ppt. graphite

PERLIT (PERLITGUSS).
M-160, M-527; 2 4-3 5 C, 0.5-1.5 Si, 0.2-0.6 P, 0 6-1 0 Mn, Ni, Cr, bal Fe.
30,000 TS; 200 Brin.
For automotive engine blocks, brake drums; nickel cast iron; wear resistant, tough.

PERMADUR-ADS.
M-1309; 1.05 C, 0.5 Si, 0.5 Mn, 5.25 Cr, 1.15 Mo, 0.30 V, bal Fe.
Ht. Tr.· 215,000 TS; 195,000 YS; 5 El; C 50 Rock.
For forming and blanking dies, shear blades, master hubs, punches.
Wear resistant, Type A2, air hardening.

PERMADUR-ADWS.
M-1309; 1 65 C, 0.32 Si, 0.3 Mn, 11.5 Cr, 0.6 Mo, 0.5 W, 0.09 V, bal Fe.
Ht. Tr.. 278,000 TS; 214,000 YS; 1 El; C 56 Rock.
For blanking and drawing dies, punches, thread rolling dies.
Type D2 air hardening.
Wear resistant, nondeforming.

PERMADUR H.
M-1340, 0.55 C, 1 05 Cr, 0.18 V, 1.85 W, bal Fe.
For cold work tools, upsetters, crimpers, punches; oil hardened, tough.

PERMADUR W.
M-1340; 0 35 C, 1 05 Cr, 0.18 V, 1.85 W, bal Fe.
For cold work tools, upsetters, punches, dies; oil hardened, tough.

PERMAFLY
M-1043, 80 Ni, 20 Fe.
For magnets for electrical equipment; magnetically soft

PERMAL.
M-878; 5 Si, bal Al.
For die castings, good fluidity.

PERMALLOY
M-205, 39-81 Ni, 61-19 Fe.
For loading material for signaling conductors, audio frequency transformers, greater magnetic qualities than iron.

PERMALLOY 3 8-78.5 Cr.
U.S , 3 8 Cr, 0 6 Mn, 17.1 Fe, bal Ni.
For soft magnets, high permeability.

PERMALLOY 4-79 Mo.
M-205, 0 3 Mn, 4 Mo, 16 7 Fe, bal Ni.
85,000 TS; 24,000 YS
For laminated cores, inductors, transformers, magnetic field detectors.

PERMALLOY 12 5-80 Mo.
M-205, 12 5 Mo, 7 5 Fe, 80 Ni.
For magnets; soft

PERMALLOY 45
M-22, M-205, 45 Ni, 0 3 Mn, bal Fe.
Sheet: 65,800 TS, 21,000 YS, 30 El; 108 Brin.
Initial permeability 2500, max permeability 25,000.
Eor audio frequency apparatus and output transformers, high permeability.

PERMALLOY 45.
M-61, 45 Ni, 55 Fe
Saturation inductance 16,000.
For cores and armatures in relays, motors, inductors, transformers, electromagnetic shields. Soft magnet

PERMALLOY 49.
M-61, 49-51 Ni, bal Fe
Saturation inductance 16,000
For leads and armatures for glass shielded switches, laminated cores for magnetic amplifiers, motors. Soft magnet.

PERMALLOY-68.
M-22, 68 Ni, bal Fe.
For magnetic apparatus, high permeability.

PERMALLOY 70.
M-61, 70 Ni, 30 Fe.
Saturation inductance 12,500.
For square loop laminated cores for magnetic amplifiers. Soft magnet.

PERMALLOY 78.
M-22, M-205; 78.5 Ni, 21.1 Fe, 0.3 Mn.
Sheet: 75,000 TS; 15,000 YS; 35 El, 115 Brin.
Initial permeability 8000; max permeability 100,000; Hc = 0.05.
For sensitive D.C. apparatus, relays; high permeability.

PERMALLOY-78.5.
M-61, 78.5 Ni, 21 5 Fe.
Saturation inductance 10,700.
For reeds in mercury wetted switches, relay armatures. Soft magnet.

PERMALLOY B.
M-269; 46 Ni, 54 Fe.
For telecommunications; low coefficient of expansion.

PERMALLOY D
M-269, 36 Ni, 64 Fe
For magnetic equipment, low coefficient of expansion.

PERMALLOY F.
M-269; 65 Ni, 35 Fe.
Domain oriented alloy for electrical equipment; high magnetic permeability.

PERMALLOY 'G.'
M-269, 46 Ni, 54 Fe.
Grain oriented alloy for electrical equipment; high magnetic permeability

PERMALLOY STANDARD.
M-22, 78 5 Ni, 21 5 Fe, 0 04 C, 0 37 Co, 0 022 Mn.
For loading submarine cables; high elec. resisting.

PERMALLOY 'SUPER C'
M-269, 77 4 Ni, 13 3 Fe, 3 7 Mo, 5 Cu
For transformers, chokes, magnetic shielding μ (.001) > 50,000
Soft magnet; high permeability

PERMAN.
M-1331; 1 05 C, 1 0 Cr, 1 15 W, bal Fe.
For bearings, cutters, liners, sheaves; water hardened, wear resistant.

PERMANENT 10.
M-1309, 0 80 C, W, Co, Cr, V, Mo, bal Fe
For lathe and planer tools, reamers, taps, hobs; high speed steel.

PERMANENT 17.
M-1309; 0 85 C, 3.0 Co, 4 5 Cr, 1.0 Mo, 2.0 V, 12 W, bal Fe
For lathe and planer tools, reamers, broaches, high speed steel.

PERMANENT 35
M-1309; 0 80 C, 5 0 Co, 4.5 Cr, 0.8 Mo, 1.7 V, 18 W, bal Fe
High speed steel, for lathe and planer tools, reamers, drills, hobs.

PERMANENT 40.
M-1309; 0.90 C, 4 5 Cr, 1.0 Mo, 2.6 V, 12 5 W, bal Fe
High speed steel, for lathe and planer tools.

PERMANENT 50
M-1309; 1.3 C, 4 5 Cr, 1.0 Mo, 4.0 V, 12.5 W, bal Fe.
High speed steel; for engravers tools, forming and drawing dies.

PERMANENT 70.
M-1309; 1.40 C, 4.5 Cr, 6.0 Co, 4.0 V, 12.5 W, bal Fe.
High speed steel; for lathe and planer tool, reamers, hobs, taps.

PERMANENT 80.
M-1309; 0.80 C, 10 Co, 4.5 Cr, 0.8 Mo, 1.7 V, 18.5 W, bal Fe.
High speed steel; for lathe and planer tools, form cutters.

PERMANENTE.
M-1025; 2.89 Zn, 6 Al, 0.25 Mn, bal Mg.
Cast. 28,300 TS, 7 El, 52 Brin
For light alloy castings, heat treatable.

PERMANICKEL renamed PERMANICKEL ALLOY 300

PERMANICKEL ALLOY 300.
M 1499, 98 5 Ni, 0 20 C, 0 25 Mn, 0.30 Fe, 0 005 S 0 18 Si, 0 13 Cu, 0 40 Ti, 0 35 Mg.
Hot-finished: 90,000-120,000 TS; 35,000-65,000 YS, 45-20 El, 140-230 Brin.
Hot-finished and aged: 160,000-200,000 TS; 120,000-150,000 YS; 20-10 El; 285-360 Brin.
For grid lateral winding wires, magnetostriction devices, thermostat contact arms, solid-state capacitors, grid slide rods, diaphragms, springs, clips, fuel cells

PERMANIT 30
M-27, 1 C, 4 Cr, 0.15 W, bal Fe.
For permanent magnets, 9500 gausses residual.

PERMANIT 35.
M-27; 1 C, 4 Cr, 0 25 W, 1 Si, bal Fe.
For permanent magnets, 10,000 gausses residual.

PERMANIT 38
M-27; 1 C, 1 Mn, 5 Cr, bal Fe
For magnets, permanent.

PERMANIT 40
M 27, 1 C, 3 7 Cr, 0 5 W, 2 3 Co, bal Fe
For magnets, permanent.

PERMANIT 50
M-27, 1 C, 8 Cr, 1-2 Mo, 6 5 Co, bal Fe
For permanent magnets, high permeability

PERMANIT 70
M-27, 0 95 C, 8 5 Cr, 1 Mo, 15 5 Co, bal Fe
For permanent magnet; 9000 gausses residual

PERMANIT 95
M-27, 1 C, 4 5 Cr, 4.5 W, 0 5 Mo, 30 Co, bal Fe.
For permanent magnet, 9500 gausses, residual.

PERMANIT 110
M-27, 0 05 C, 21 Ni, 12 Al, bal Fe
For cast permanent magnets, high permeability.

PERMANIT 120
M-27, 0 05 C, 26 Ni, 14 Al, bal Fe
For cast magnet, permanent magnet.

PERMANIT 140
M-27, 0 05 C, 26 Ni, 8 Co, 11 Al. bal Fe.
For cast magnets, permanent magnet

PERMANIT 160
M-27, 0 5 C, 15 Co, 20 Ni, 9.5 Al, 3 5 Cu, bal Fe.
For cast magnets; permanent magnet

PERMANIT 180K.
M-27; 0 04 C, 20 Ni, 20 Co, 7 Al, 7 Cu, 6 Ti, bal Fe
For magnets; permanent.

PERMANIT 200
M-27; 0.05 C, 20 Ni, 15 Co, 9 5 Al, 3 5 Cu, bal Fe.
For cast magnets; permanent magnet.

PERMANIT 250
M-27; 0.04 C, 20 Ni, 24 Co, 8 Al, 4 Cu, 5 Ti, bal Fe.
For magnets; permanent.

PERMANIT 400.
M-27; 0.05 max C, 21 Ni, 25 Co, 8 Al, 3 Cu, bal Fe.
For cast magnets, electrical equipment; high coercive force.

PERMANIT 400K.
M-27; 0.01 C, 14 Ni, 24 Co, 8 Al, 3 Cu, Ti, bal Al.
For magnets; permanent.

PERMANIT 500.
M-27; 0.05 C, 14 Ni, 24 Co, 8 Al, 3 Cu, Ti, bal Fe.
For magnets, permanent.

PERMANIT 600.
M-27; 0 05 C, 14 Ni, 24 Co, 8 Al, 3 Cu, bal Fe.
For magnets; permanent.

PERMANITE.
U S ; Co, Cr, W, bal Fe.
For permanent magnet steel; high coercive force.

PERMAN N
M-1331, 1 0 C, Mn, W, Cr, V, bal Fe.
For bearings, cutters, sleeves, liners; water hardened, wear resistant

PERMANT
M 56, 0 08 C, 0 2 Mn, 0 05 Si, 36 Ni, bal Fe.
For scales, clocks, watches, instruments; low coefficient of expansion.

PERMAS
M-378; 0.25 max C, 24-26 Cr, 19-22 Ni, bal Fe.
Rolled. 95,000 TS, 45,000 YS, 50 El, 65 RA; 185 Brin
For balance weights, Type 311; corrosion resistant.

PERMAT
45 Cu, 30 Co, 25 Ni
For magnets for electrical equipment; magnetically soft

PERMAX
M-104, Fe, alloys, bal Ni
For electrical equipment, high permeability, constant magnetic properties

PERMAX
M-775, C, alloy, bal Fe
Cast 60,000 TS, 38,000 YS, 10 El, 150 Brin
For bell yokes, direct current magnets.

PERMENDUR
M-108, 49 7 Fe, 0 30 Mn, bal Co.
For rotor and stator laminations, servo motors; soft magnet, high permeability

PERMENDUR
M-205, 50 Co, 50 Fe

PERMENDUR 2-V.
M-22, M-205, 48 8 Co, 48 8 Fe, 0 4 Mn, 1.7 V.
Sheet· 87,000 TS; 60,000 YS
For receiver diaphragms

PERMENDUR 50-50
M-205, M-22; 0 4 Mn, 49 8 Fe, 49 8 Co
For electrical equipment; high flux density.

PERMENDUR-50 KF.
M-Russia; 49 95 Co, 1 4 V, 0 04 Si, 0 22 Mn, 0 02 C, 0 007 S, 0 006 P, bal Fe.
For magnetic and electrical equipment.
Soft magnetic alloy. High permeability High magnetostriction saturation.

PERMENOR-4801.
M-296; 48 Ni, bal Fe
Cold Rolled and annealed: 58,000 TS; 19,000 YS; 27 El
For high temperature low expansion applications, audio transformers, motor rotors.
High permeability, controlled expansion.

PERMENORM see PERMENOR —4801.

PERMENORM 5000 Z.
M-296; 50 Ni, 50 Fe.
For soft magnets, magnetic amplifiers, electrical equipment; high permeability.

PERMET.
U.S.; 25 Ni, 30 Co, 45 Cu.
For permanent magnets; from powder metallurgy. Precipitation hardened.

PERMET PF-1.
M-38; 100 Fe.
For magnets; 1,100,000 BH max; Br 5700; 3650 Bo; Hc 470.

PERMET PF-2.
M-38; 30 Co, 70 Fe.
For magnets; 1,520,000 BH max.
Br 6000, 3830 Bo, Hc 625.

PERMINVAR 7-70
M-70; 7 Co, 23 Fe, 70 Ni.
Permeability 850-4000, coercive force 0.6, saturation induction 12,500.
For magnets for electrical and magnetic instruments.
Curie temperature 650°C.
Soft magnetic alloy.

PERMINVAR 7 5-45-25 Mo.
M-205, 0 6 Mn, 7.5 Mo, 45 Ni, 25 Co, 21.9 Fe.
Initial permeability 850,
Max permeability 4000, Hc = 0 6
Soft magnetic material.

PERMINVAR 7 5-70
M-22, M-205; 7 5 Co, 70 Ni, 22 7 Fe, 0.3 Mn.
For communication equipment for modulus cores; high initial permeability.

PERMINVAR 25-45.
M-22, M-269, 45 Ni, 25 Co, 30 Fe.
1.2 Hc, 400 initial permeability,
2000 max permeability, B = 10,000
For electrical communication, circuits, magnetic circuits
High permeability, soft magnet.

PERMINVAR 43-23
M-205, 0.3 Mn, 43 Ni, 23 Co, 33.7 Fe.
For magnetic coils, transformers; soft.

PERMITE
M-6; 0 5 Si, 10 Cu, 1 Fe, 0 4 Mg, bal Al.
40,000 TS, 38,000 YS, 0.5 El; 120 Brin
For internal combustion engine pistons; coef exp 0 0000127.

PERMITE.
M-240, Sn, bal Cu.
For machinery parts, bronze.

PERMITE 1002 (2002).
M-6, 9-11 Cu, 0 4-0 6 Si, 0.25-0.40 Mg, 1.0-1.5 Fe, bal Al.
Cast· 26,000-45,000 TS; 21,000-35,000 YS; 1.0 El; 60-150 Brin
For light alloy parts, pistons, permanent mold castings, non-hardenable.

PERMITE NO. 1003 (LOW EXPANSION ALLOY).
M-6, 1 0 Cu, 1.0 Fe, 13.5 Si, 0.25 Zn, 1.0 Mg, 0 10 Mn, 2 5 Ni, bal Al
Heat treated: 28,000-35,000 TS; 0 5-1.0 El; 100-90 Brin.
Cast. 25,000 TS, 1.0 El; 85 Brin.
For low expansion alloy; coefficient of expansion 0.0000110.

PERMITE NO. 1004 (2004).
M-6; 6-8 Cu, 1.5 Fe, 2.0 Si, 2.5 Zn, 0.2 Mg, 0.2 Mn, bal Al.
Chill cast: 23,000 TS; 1.0 El; 80 Brin.
Sand cast: 20,000-16,000 TS; 1.0-2.5 El; 60 Brin.
For general castings; coefficient of expansion 0.000013.

PERMITE 1005.
M-6; 7 Cu, 1.2 Fe, 1.7 Si, bal Al.
For permanent mold castings; similar to Alcoa 12.

PERMITE NO. 1006 (2006).
M-6; 11.0-13.5 Cu, 0.75 Fe, 0.5 Si, 0.25 Zn, bal Al.
Chill cast: 25,000 TS; 1.0 El; 100 Brin.
Sand cast: 23,000 TS; 1.0 El; 90 Brin.
For leak proof castings; high fluidity.

PERMITE NO. 1007 (2007).
M-6; 6-8 Cu, 1.0 Fe, 1-2 Si, 0.25 Zn, 0.20 Mg, 0.20 Mn, bal Al.
Chill cast: 26,000 TS; 2.5 El; 75 Brin.
Sand cast: 24,000 TS; 2.0 El; 70 Brin.
For general castings; good machinability.

PERMITE NO. 1008 (2008).
M-6; 4-5 Cu, 1.2 Fe, 2-3 Si, 0.25 Zn, bal Al.
Chill cast: 25,000 TS; 2.0 El; 70 Brin.
Heat treated: 35,000-38,000 TS; 4.0-1.0 El; 70-100 Brin.
For general castings; age-hardened.

PERMITE NO. 1009 (2009).
M-6; 4-5 Cu, 0.5 Fe, 0.5 Si, bal Al.
Sand cast: 25,000 TS; 2 El.
Heat treated: 28,000-36,000 TS; 6.0-1.0 El; 60-75 Brin.
For general castings; age-hardened.

PERMITE NO. 1010.
M-6; 4 Cu, 1 Si, bal Al.
For machine parts; age-hardenable.

PERMITE 1011 (2011).
M-6; 0.75 Fe, 4-5 Si, 0.5 Zn, 0.1 Mg, bal Al.
Chill cast: 21,000 TS; 2.5 El; 50 Brin.
Sand cast: 17,000 TS; 3.0 El; 45 Brin.
For general castings; corrosion resistant.

PERMITE NO. 1014 (2014) (Y-ALLOY).
M-6; 4.0 Cu, 0.75 Fe, 0.75 Si, 0.2 Zn, 1.0-1.5 Mg, 2.0 Ni, bal Al.
Sand cast: 23,000 TS; 0.5 El; 90 Brin.
Heat treated 30,000 TS; 0 El; 110 Brin.
For general castings; coefficient of expansion 0.0000136.

PERMITE NO. 1015 (2015).
M-6; 2.5 Cu, 0.75 Fe, 1.0 Si, 30-31 Zn, bal Al.
Sand cast. 25,000 TS; 3 El; 70 Brin.
Chill cast: 30,000 TS, 3 El; 70 Brin.
For general castings; non-hardenable.

PERMITE NO. 1016.
M-6; 10 Cu, 1.0 Fe, 3-4 Si, 0.25 Zn, 0.20 Mg, bal Al.
Chill cast: 22,000 TS; 1.0 El; 85 Brin.
For general castings; non-hardenable.

PERMITE 1018.
M-6; 1.0-1.5 Cu, 0.5 max Si, 0.6 max Fe, 0.7-1.2 Mn, bal Al.
23,000-30,000 TS, 3,500-10,000 YS; 12-8 El; 45-70 Brin.
For light alloy parts; non-hardenable.

PERMITE NO. 1019 (2019).
M-6; 1.25 Cu, 1.0 Fe, 4.5-5.5 Si, 0.25 Zn, 0.5 Mg, bal Al.
Heat treated: 27,000-35,000 TS; 4.5-1.0 El; 60-90 Brin.
For general castings; age-hardened.

PERMITE 1020.
M-6; 7 Si, 0.3 Mg, bal Al.
Heat treated and T-6 temper: 38,000 TS; 5 El; 90 Brin.
For permanent mold castings; similar to Alcoa 356.

PERMITE 1021.
M-6; 1.8 Zn, 3.8 Mg, bal Al.
Cast: 25,000 TS; 8 El; 60 Brin.
For permanent mold castings; similar to Alcoa A 214.

PERMITE 1024.
M-6; 7 Cu, 5.5 Si, 0.3 Mg, bal Al.
T-551 Temper: 31,000 TS; 1 El; 110 Brin.
For permanent mold castings; similar to Alcoa 152.

PERMITE 1027.
M-6; 4.5 Cu, 5.5 Si, bal Al.
Cast: 28,000 TS; 4 El; 70 Brin.
For permanent mold castings; similar to Alcoa A 108.

PERMITE 1029.
M-6; 3.5 Cu, 6.0 Si, bal Al.
T-6 Temper: 38,000 TS; 4 El; 95 Brin.
For permanent mold castings; similar to Alcoa 319.

PERMITE 1031.
M-6; 1.0 Cu, 1.0 Ni, 6.5 Sn, bal Al.
T-533 Temper: 20,000 TS; 10 El; 100 Brin.
For permanent mold castings; similar to Alcoa 750.

PERMITE 1034.
M-6, 3.0 Cu, 9.5 Si, 1 Mg, 1 Ni, bal Al.
Heat treated: 34,000 TS; 10 El; 105 Brin.
For permanent mold castings; similar to Alcoa D 132.

PERMITE 2003
M-6; 0.8 Cu, 0.8 Fe, 12 Si, 1 Mg, 2.5 Ni, bal Al.
For sand castings; similar to Alcoa A 132 alloy.

PERMITE 2004.
M-6; 7 Cu, 1.2 Fe, 1.7 Zn, bal Al.
Cast: 23,000 TS, 3 El; 70 Brin.
For sand castings; similar to Alcoa 112.

PERMITE NO. 2005.
M-6; 6.0-8.5 Cu, 0.75 Fe, 0.50 Si, 0.25 Zn, bal Al.
Sand cast 20,000 TS; 2.0 El; 65 Brin.
For general castings, non-hardenable.

PERMITE 2010.
M-6, 4-5 Cu, 1.0 Fe, 1.0 Si, 0.25 Zn, 0.20 Mg, bal Al
Sand cast: 27,000 TS; 2.0 El; 50 Brin.
Heat treated: 28,000-38,000 TS; 5.0-1.0 El; 100-60 Brin
For general castings; age-hardened.

PERMITE NO. 2012 .
M-6; 0.75 Fe, 9-11 Si, 0.5 Zn, 0.1 Mg, bal Al.
Sand cast. 23,000 TS, 5.0 El; 50 Brin.
For general castings; corrosion resistant.

PERMITE NO. 2013.
M-6; 0.75 Fe, 13 Si, 0.5 Zn, 0.1 Mg, bal Al.
Sand cast. 28,000 TS; 8.0 El; 50 Brin.
For general castings; corrosion resistant.

PERMITE NO. 2017 (PATTERN ALLOY).
M-6; 6-8 Cu, 1.0 Fe, 1.0 Si, 2.5 Zn, 1.0 Sn, bal Al.
Sand cast: 18,000 TS; 2.0 El; 70 Brin.
For general castings; good machinability.

PERMITE NO. 2018.
M-6; 2.5 Cu, 0.5-2.0 Mn, bal Al.
Sand cast: 20,000 TS; 8 El.
Heat treated: 28,000-30,000 TS; 6-4 El.
For general castings; high ductility.

PERMITE NO. 2020.
M-6; 1.0 Fe, 6.5-7.5 Si, 0.25 Zn, 0.35 Mg, bal Al.
Heat treated: 26,000-30,000 TS; 5-3 El; 55-70 Brin.
For general castings; age-hardened.

PERMITE NO. 2021.
M-6; 0.1 Cu, 0.5 Fe, 0.5 Si, 3-4 Mg, bal Al.
Sand cast: 22,000 TS; 6 El; 50 Brin.
For general castings; corrosion resistant.

PERMITE NO. 2022.
M-6, 0.1 Cu, 0.5 Fe, 0.5 Si, 5-6 Mg, bal Al.
Sand cast: 25,000 TS; 4 El; 60 Brin.
For general castings; corrosion resistant.

PERMITE NO 2023.
M-6; 0.1 Cu, 0.5 Fe, 0.5 Si, 9-10 Mg, bal Al.
Sand cast: 27,000 TS; 3 El, 60 Brin.
Heat treated. 38,000 TS; 11 El; 75 Brin.
For general castings; corrosion resistant.

PERMITE 2025.
M-6; 4.0 Cu, 3.0 Si, bal Al.
Cast: 21,000 TS; 2.5 El; 55 Brin.
For sand castings; similar to Alcoa 108.

PERMITE 3011.
M-6, 5 Si, bal Al.
Cast: 30,000 TS; 14,000 YS; 7 El.
For die castings; similar to Alcoa 43.

PERMITE 3012
M-6, 12 Si, bal Al.
Cast: 37,000 TS, 18,000 YS; 1.8 El.
For die castings; similar to Alcoa 13.

PERMITE 3027.
M-6; 4 Cu, 5 Si, bal Al.
Cast: 40,000 TS; 22,000 YS; 3.5 El.
For die castings, similar to Alcoa 85.

PERMITE 3032
M-6, 8 Mg, bal Al.
Cast. 42,000 TS; 23,000 YS; 7 El.
For die castings; similar to Alcoa 218.

PERMITE 3033.
M-6, 9.5 Si, 0.5 Mg, bal Al
Cast. 42,000 TS; 23,000 YS; 1.8 El.
For die castings; similar to Alcoa 360.

PERMITE 3034.
M-6; 3.5 Cu, 8.5 Si, bal Al.
Cast: 45,000 TS; 25,000 YS; 2.0 El.
For die castings; similar to Alcoa 380.

PERMITE A-2023 SPECIAL.
M-6; 0.20 max Si, 9.5-10.5 Mg, max Fe, 0.4-0.6 Zn, bal Al.
27,000 TS; 18,000 YS; 4 El; 60-70 Brin.
For light alloy parts, pistons, permanent mold castings, pumps; heat treatable.

PERMIUM NO. 205.
M-879; Os, Ru, Rh, Co, Ni.
For jewelry, instrument jewels; sintered.

PERMO.
M-880, Os, Rh, Ru.
For instrument bearings, fountain pen tips; corrosion and wear resistant.

PERMOLD.
M-881; Cu, Si, bal Al.
For washing machine and typewriter parts; permanent mold.

PERMOLD 3-5.
M-881; 3.75 Cu, 6.25 Si, 0.1 Mg, bal Al.
Sand cast-T6: 31,000 TS; 24,000 YS; 1.5 El; 80 Brin.
Permanent mold-T6: 38,000 TS; 26,000 YS; 1.5 El; 90 Brin.
For aircraft castings; Type 319; age-hardenable.

PERMOLD 7.3.
M-881; 7 Si, 0.3 Mg, bal Al.
Heat treated and aged: 33,000 TS; 3 El; 70 Brin.
For castings; heat treatable, permanent mold cast.

PERMOLD 15.3.
M-881; 1.3 Cu, 5 Si, 0.3 Mn, 0.3 Mg, bal Al.
Heat treated: 32,000 TS; 2 El; 75 Brin.
For aircraft castings; heat treatable, permanent mold cast.

PERMOLD 15.5.
M-881; 1.5 Cu, 5 Si, 0.4 Mn, 0.4 Mg, bal Al.
Heat treated and aged: 37,000 TS; 1.5 El; 75 Brin.
For castings; heat treatable.

PERMOLD 18.3.
M-881; 1.3 Cu, 8 Si, 0.3 Mn, 0.3 Mg, bal Al.
Heat treated: 34,000 TS; 1 El; 80 Brin.
For aircraft castings; heat treatable, permanent mold cast.

PERMOLD 40.
M-881; 4.5 Cu, bal Al.
Heat treated: 32,000 TS; 3 El; 65 Brin.
For castings; heat treatable, permanent mold cast.

PERMOLD 40E.
M-881; 0.6 Mg, 5.5 Zn, 0.5 Cr, 0.15 Ti, bal Al.
T5-temper: 32,000 TS; 25,000 YS; 3 El; 75 Brin.
For high strength castings; self-aging.

PERMOLD 42N.
M-881; 4 Cu, 1.1 Fe, 2 Si, bal Al.
Heat treated and aged: 40,000 TS, 2 El; 75 Brin
For aircraft parts; heat treatable.

PERMOLD 45.
M-881; 4 Cu, 5 Si, bal Al.
Cast permanent mold. 23,000 TS; 1 El; 60 Brin.
For light alloy castings; not heat treatable.

PERMOLD 75.3.
M-881, 7 Cu, 5 Si, 0.3 Mg, bal Al.
Stabilized. 35,000 TS; 0 El; 100 Brin.
For pistons; heat treatable

PERMOLD 90-10.
M-881; 10 Cu, 4 Si, 0.3 Mg, bal Al.
Permanent mold 30,000 TS; 24,000 YS; 1.5 El, 100 Brin
For sole plates for electric irons; Type 138.

PERMOLD 90-10S.
M-881; 10 Cu, 1.2 Fe, 4 Si, 0.5 Mg, bal Al.
Cast: 26,000 TS; 0 El; 90 Brin
For sole plates for electric irons; heat treatable, permanent mold cast.

PERMOLD 95.5.
M-881; 5.25 Si, bal Al.
Sand cast: 19,000 TS; 9000 YS; 6 El; 40 Brin.
Permanent mold: 21,000 TS, 10,000 YS; 5 El; 50 Brin.
For cooking utensils, architectural castings; corrosion resistant; Type 43.

PERMOLD 103.7N.
M-881; 3 Cu, 10 Si, 0.7 Mg, 0.8 Ni, bal Al.
Sand cast-T65: 30,000 TS; 25,000 YS; 0.5 El; 100 Brin.
Permanent mold-T5: 36,000 TS; 28,000 YS; 1.0 El; 105 Brin.
For automotive pistons; Type D132; age-hardenable.

PERMOLD 110.5.
M-881; 1.5 Cu, 10 Si, 0.7 Mn, 0.5 Mg, bal Al.
Stabilized: 34,000 TS; 0 El; 90 Brin.
For pistons; heat treatable.

PERMOLD 113.5.
M-881; 1.5 Cu, 13 Si, 0.7 Mn, 0.5 Mg, bal Al.
Stabilized: 34,000 TS; 0 El; 90 Brin.
For automotive pistons; heat treatable.

PERMOLD 120.5.
M-881; 1.5 Cu, 20 Si, 0.7 Mn, 15 Mg, bal Al.
Stabilized: 28,000 TS; 0 El; 90 Brin
For pistons; heat treatable.

PERMOLD 135W.
M-881; 3.75 Cu, 6.25 Si, 0.1 Mg, 0.8 max Fe, bal Al.
Sand cast-T6: 36,000 TS; 24,000 YS; 2.0 El; 80 Brin.
Permanent mold-T6: 40,000 TS; 27,000 YS; 3.0 El; 95 Brin.
For general purpose castings; age-hardenable.

PERMOLD H.P.7.3
M-881; 0.2 max Fe, 0.7 Si, 0.3 Mg, bal Al.
Permanent mold-T61: 38,000 TS, 28,000 YS; 5 El; 85 Brin.
For high strength castings; good strength and ductility, age-hardenable.

PERMOLD H.P.15.5.
M-881, 1.3 Cu, 5 Si, 0.5 Mg, bal Al.
T61-temper: 41,000 TS; 31,000 YS; 3 El; 85 Brin.
For aircraft castings; Type C355; age-hardenable.

PERMOLD H.P 40.
M-881, 4.5 Cu, 1 max Fe, bal Al.
T6-temper: 40,000 TS; 30,000 YS, 2 El; 95 Brin
For machinery and aircraft castings; age-hardenable, Type 195.

PERMOLD H P 42
M-881; 4.5 Cu, 1 max Fe, 2.5 Si, bal Al.
T6-temper. 40,000 TS; 26,000 YS; 5 El; 90 Brin
For machinery and aircraft castings; age-hardenable; Type B195.

PERMOLD X-12.
M-881; 7.5 Cu, 1.0 Fe, 2 Zn, bal Al
Cast permanent mold: 26,000 TS; 1 El; 90 Brin.
For washing machine and home appliance parts, not heat treatable

PERMOLD Y.
M-881; 4 Cu, 1.5 Mg, 2 Ni, bal Al.
Heat treated: 32,000 TS, 0 El, 90 Brin
For cylinder heads, pistons; heat treatable, permanent mold cast.

PERMOMETOL NO. 11.
M-880; Os, Ru, Ir
For instrument pivots; wear and corrosion resistant.

PERMOMETAL NO. 81.
M-880; Os-Ru.
For instrument pivots, fountain pens, needles; corrosion resistant.

PERMOMETAL NO. 115.
M-880; Os, Ru, Ir.
For instrument pivots; corrosion resistant.

PERPLEX.
M-1331; 1.05 C, 1 Cr, 1.15 W, 0.9 Mn, bal Fe.
For bearings, cutters, liners, sleeves; water hardened, wear resistant.

PERUNAL.
M-249, M-493, M-1634; 6 Zn, 2 Mg, 1.5 Cu, bal Al
74,000-83,000 TS; 64,000-72,000 YS; 10-5 El; 155 Brin
For light alloy parts

PETERSON 52100
M-1053; 0.95-1.1 C, 0.25-0.45 Mn, 1.3-1.6 Cr, bal Fe.
Annealed: 90,000 TS; 51,000 YS; 31 El; 61 RA; 180 Brin
Hardened: 300,000 TS; 650 Brin.
For tools, dies, bearings, bushings; oil hardening.

PETITE IRON
M-153; Cr, Ni, V, bal Fe
For cams, forming and spinning rolls, machine slides, forming dies, wear resisting.

PEWTER.
U S.; 85-90 Sn, bal Pb
For household utensils, dishes, ornamental articles; soft, ductile, easily worked.

PFIZER INC DUCTILE COBALT
M-1623; 95 Co, 5 Fe
High cobalt content with excellent ductility
80,000 TS, 50 El
Sheath for cobalt base composite welding rods.

PFIZER INC HP COBALT
M-1623; 99.9 Co + Ni
High purity cobalt in strip form
110,000 TS; 20 El
For electroplating anodes, high temperature magnetic applications, cobalt 60 gamma radiation sources, sheath for cobalt base composite welding rods, x-ray tube targets

PFIZER INC HP NICKEL.
M-1623, 99.9 min Ni (6 grades of hardness)
Soft 45,000-50,000 TS
Half hard: 65,000-75,000 TS
Full hard: 85,000-100,000 TS
High purity, ductile, corrosion resistant, gas free.
For electronic tube components, deep drawing and stamping small parts, magnetostrictive transducers, heat exchange fins.

PFIZER INC NICKEL CLAD STEEL
M-1623. Nickel on one or both sides of carbon steel base (as per customer requirements)

PFIZER INC PM 42 ALLOY
M-1623, 42 Ni, bal Fe
80,000 TS; 34,000 YS
Controlled expansion
For glass to metal sealing on hard or soft glass.

PFIZER INC. PM 46 Alloy.
M-1623; 46 Ni, bal Fe.
82,000 TS, 34,000 YS.
Controlled expansion
For glass to metal seals, especially terminal caps and bonds on vitreous enameled resistors

PFIZER INC. PM NICKEL-COPPER ALLOY.
M-1623, 65 Ni, 1 Fe, bal Cu.
Corrosion resistant, especially in marine environments
For tubing, banding, small parts.

PFIZER INC. SEAL VAR TM
M-1623, 30 Ni, 15 Co, bal Fe.
Controlled thermal expansivity to match hard glasses.
For hermetic glass to metal seals (hard glass) and ceramic to metal seals.
ASTM F-15.

PFIZER INC. STAINLESS STEEL CLAD ALUMINUM.
M-1623; Al or Al alloys clad on one or both sides with a stainless steel (as per customer requirements).

PFIZER INC. STAINLESS CLAD CARBON STEEL.
M-1623; Stainless steel on one or both sides of carbon steel base.
(as per customer requirements).

PH NO. 2.
M-38, C, alloy, bal Fe
387 Brin
For dies for Zn die castings; age-hardenable, die steel

P & H NO. 21
M-1713, 0.14-0.20 C, 1.0-1.3 Cr, 1.75 Ni, 0.75-1.00 Mn, 0.8 Mo, 0.2 V, bal Fe.
Welded. 125,000-143,000 TS, 80,000-125,000 YS, 22-17 El; 29 RA.
For welding rods for aircraft steels, for heat treating applications.

P & H 70 LA-2
M-1713, 0.12 max C, 0.85-1.20 Mn, bal Fe
Welded 79,000 TS, 69,000 YS, 31 El; 65 RA
For welding rods for high C and alloy steel; low H_2 type

P & H 75 LP.
M-1713; 0.12 max C, 2.5 Ni, bal Fe
Welded. 85,000 TS, 75,000 YS; 26 El; 43 RA.
For welding rods for low temperature applications, high impact at low temperature.

P & H 80 LE
M-1713, 0.10 max C, 0.8-1.1 Cr, 0.4-0.6 Mo, bal Fe
Relieved 80,000 TS, 67,000 YS; 27 El.
Welded: 86,000 TS, 77,000 YS; 24 El, 41 RA.
For welding rods for Cr-Mo steel; high temperature-pressure power piping

P & H AW-2B
M-1713, 0.4 C, bal Fe.
Welded: 90,000 100,000 TS, 22-28 El, 220-270 Brin
For welding electrodes

PHENIX.
M-68, 75 Fe, 25 Ni.
Rolled 104,000 TS, 56,000 YS, 45 El, 68 RA
For resistance alloy, Sc-21

PHENIX-HD32
M-616, 0.20 C, 0.3 Mn, 0.4 Si, 12.75 Cr, 1.15 Mo, 0.4 Ni, bal Fe.
Annealed 95,000 TS, 50,000 YS, 25 El, 55 RA
Heat treated 250,000 TS, 215,000 YS, 8 El, C 52 Rock
For cutlery, oil refinery and chemical plant equipment, surgical instruments
Corrosion resistant, hardenable

PHENIX-HD40
M-1308, 0.20 C, 12 Cr, 1.15 Mo, 0.5 Ni, 0.3 V, bal Fe
Annealed 90,000 TS, 38,000 YS; 26 El; B 93 Rock
Hardened: 235,000 TS; 195,000 YS; 10 El; C 48 Rock.
For bearings, hardware, cutlery, valves, surgical instruments
Corrosion resistant, hardenable.

PHENIX-HD50.
M-616; 0.20 C, 0.3 Mn, 0.4 Si, 12.0 Cr, 1.15 Mo, 0.65 Ni, 0.3 V, 0.5 W, bal Fe.
Annealed. 95,000 TS; 40,000 YS; 25 El; B 92 Rock.
Hardened: 240,000 TS; 210,000 YS; 10 El; C 50 Rock.
For cutlery, bearings, valves, surgical instruments.
Corrosion resistant, hardenable

PHENIX-HD301
M-616, 0.15 C, 12.75 Cr, 1.15 Mo, 0.5 Ni, bal Fe.
Annealed: 75,000 TS; 40,000 YS; 35 El; 70 RA; 155 Brin.
Cold Drawn: 100,000 TS; 85,000 YS; 17 El; 60 RA; 205 Brin
For oil refinery and chemical plant equipment, table flatware, knives, cutlery
Corrosion resistant.

PHILADELPHIA BRONZE 40
M-1228, 8 Al, bal Cu
Cast: 70,000 TS, 28,000 YS, 25 El; 110 Brin
For gun mountings, worm wheels, gears, valve seats, Al-bronze, corrosion resistant

PHILADELPHIA BRONZE 41
M-1228, 9 Al, bal Cu
Rolled 75,000 TS; 35,000 YS, 20 El
For valve stems, propeller blades, bolts, pumps, corrosion resistant, Al-bronze.

PHILADELPHIA BRONZE 77.
M-1228; Cu alloy
Cast 70,000-85,000 TS; 35,000-70,000 YS, 12-1 El, 200-350 Brin
For bushings, bearings, drawing dies; wear and erosion resistant

PHILADELPHIA BRONZE 85.
M-1228, 12 Ni, 1.5 Al, bal Cu
Cast 85,000-95,000 TS, 60,000-70,000 YS; 11-7 El, 200-220 Brin
For marine hardware, fittings, valves, pumps; resists sea water corrosion

PHILADELPHIA BRONZE 137.
M-1228, M-265, 5 Ni, 2 Zn, 5 Sn, bal Cu
Cast 45,000 TS, 22,000 YS; 25 El, 85 Brin
For valves, pump fittings, gears, cams, corrosion resistant

PHILADELPHIA BRONZE 137 T
M-1228, 5 Ni, 2 Zn, 5 Sn, bal Cu.
Heat treated 70,000-90,000 TS, 50,000-75,000 YS; 20-10 El, 140-200 Brin.
For bearings, pole line hardware, ratchets; shock resistant, high fatigue resistant

PHILADELPHIA BRONZE 404
M-1228, 10 Al, 5 Ni, 5 Fe, bal Cu.
Cast: 90,000 TS; 45,000 YS, 15 El, 180 Brin
For impeller blades, valve seats, worm gears, Al bronze; heat treatable

PHILADELPHIA BRONZE 4010.
M-1228, Cu alloy.
Cast 70,000 TS, 32,000 YS, 10 El; 170 Brin
For dies for flash welding, gears, valve components; corrosion resistant

PHILADELPHIA BRONZE 4040.
M-1228, 10 Al, 5 Ni, 5 Fe, bal Cu
Cast 90,000 TS, 45,000 YS, 15 El; 180 Brin
For valve seats, discs, bearings, gears, bushings; Al-bronze, heat treatable

PHILO BRAND FERROCHROME
M-398; 65-70 Cr, 4-6 C, under 2 Si, bal Fe.
For metallurgical applications; Cr-additions.

PHILO BRAND FERROMANGANESE.
M-398; < 7 C, < 1 Si, < 0.30 P, 78-82 Mn, bal Fe.
For metallurgical applications; Mn-additions.

PHILO BRAND FERROSILICON 50% GRADE.
M-398; 50 Si, 48.5 Fe, 1.5 others.
For metallurgical applications; Si-additions.

PHILO BRAND FERROSILICON 75% GRADE.
M-398; 75 Si, 22.5 Fe, 2.5 others.
For metallurgical applications; Si-additions.

PHILO BRAND FERROSILICON 85% GRADE.
M-398; 85 Si, 12.5 Fe, 2.5 others.
For metallurgical applications; Si-additions.

PHILO BRAND FERROSILICON 90% GRADE.
M-398; 91 Si, 6.5 Fe, 2.5 others.
For metallurgical applications; Si-additions.

PHOENIX.
M-35; 0.95 C, 3.95 Cr, bal Fe.
Annealed: 190 Brin.
For hot grip dies; resists shock, abrasion and heat.

PHOENIX.
M-88; Sn, Sb, bal Cu.
Cast: 24 Brin.
For bearings for crossheads; heavy loads and high speeds.

PHOENIX.
M-1308; C, alloy, bal Fe.
For machine tool parts; oil hardened.

PHOENIX 430A.
M-1594; 0.08 C, 0.45 Mn, 0.017 P, 0.010 S, 0.38 Si, 15.68 Cr, bal Fe
Plate· 73,200 TS, 48,600 YS; 31 El; 57 RA; 143 Brin.
For chemical plant industries, agitators, furnace parts.
Resists nitric acid and sulphur bearing gases to 1500°F. Tough and weldable.

PHOENIX 430B.
M-1594; 0.08 C, 0.42 Mn, 0.017 P, 0.013 S, 0.38 Si, 16.88 Cr, bal Fe.
Plate: 76,000 TS; 52,000 YS, 30 El, 56 RA; 143 Brin.
For chemical plant industries, furnace parts, acid containers.
Resists nitric acid and sulphur bearing gases to 1500°F. Tough and weldable.

PHOENIX A.
M-369; C, alloy, bal Fe.
For steel castings.

PHOENIX-A387 Gr D.
M-1594; 0.10 C, 2.25 Cr, 1.0 Mo, bal Fe.
Normalized. 60,000-85,000 TS.
For structures operating up to 800°F. heat exchangers, high pressure boilers.
High strength, high temperature steel.

PHOENIX A SPECIAL.
M-369, C, alloy, bal Fe.
For steel castings.

PHOENIX CM-70.
M-448; 0.16-0.21 C, 1.1-1.4 Mn, 0.15-0.35 Si, bal Fe.
Heat treated: 156,000 TS.
For general purpose structural components.
Suitable for carburizing and cold extrusion.

PHOENIX CM-70 (SPT 539).
M-1724; 0.16-0.21 C, 1.1-1.4 Mn, 0.15-0.35 Si, bal Fe.
Hardened: 157,000 TS; 116,000 YS; 32 Izod.
For case hardened gears, cams, sprockets, spline shafts.

PHOENIX CM-70F (SPT 565).
M-1724; 0.14-0.19 C, 1.1-1.4 Mn, 0.15-0.35 Si, 0.004 max B, bal Fe.
Hardened: 157,000 TS; 112,000 YS; 10 El.
For case hardened gears, cams, sprockets, spline shafts.

PHOENIX CM-80F (SPT 566).
M-1724; 0.17-0.23 C, 1.2-1.5 Mn, 0.15-0.35 Si, 0.004 max B, bal Fe.
Hardened: 179,000 TS, 134,000 YS; 10 El.
For case hardened gears, cams, sprockets, spline shafts.

PHOENIX CM-90F (SPT 567).
M-1724, 0.20-0.25 C, 1.3-1.6 Mn, 0.15-0.35 Si, 0.004 max B, bal Fe
Hardened· 200,000 TS; 134,000 YS; 10 El.
For case hardened gears, cams, sprockets, spline shafts.

PHOENIX HANSA.
M-616; 0.7 C, 18 W, 4 Cr, 1 V, bal Fe.
For cutters, tools, high speed steel.

PHOENIXITE.
German, For cutting tools; hard metal.

PHOENIX K.
M-369, 3.2 C, 1.8 Si, 1 Cr, bal Fe.
For castings; cast iron.

PHOENIXLOY.
M-68, M-369; 5 Ni + Cr, bal Fe
For mill rolls for heavy duty; super hard alloy cast iron, Sc 80-90.

PHOENIX METAL.
M-88, Pb alloy.
For bearings; solidification temperature 234°C.

PHOENIX METAL.
M-369; 3.2 C, 1.5 Ni, 1 Cr, 1.7 Si, bal Fe.
Cast.
For rolls; hard cast iron

PHOENIX MOLYBDENUM CHILL
M-369, 3.2 C, 1.8 Si, 0.5 Mo, bal Fe
For castings, cast iron.

PHOENIX NICKEL CHILL
M-369; 3.2 C, 1.8 Si, 1.5 Ni, bal Fe.
For castings, wear plates, cast iron

PHOENIX PIROCO.
M-369; C, alloy, bal Fe
For steel castings

PHOENIX RAPID MACHINING STEEL
M-448; 0.15 C, 0.3 S, bal Fe
63,500 TS, 44,000 YS; 48 El, 61 RA.
For screws, bolts, nuts, free cutting

PHONO BRONZE.
M-141; 98.74 Cu, 1.25 Sn, 0.008 Fe.
Hard: 90,000 TS; 65,000 YS; 4 El, 70 RA.
For trolley wire, hardware; resists air corrosion.

PHONO CADMIUM 955
M-141; 0.85 Cd, 0.55 Sn, bal Cu.
Annealed· 40,000 TS; 50 El.
Drawn· 85,000 TS; 10 El.
For trolley wire, cable; 55% conductivity.

PHONO ELECTRIC 865.
M-141; 0.4 Sn, bal Cu.
Annealed: 35,000 TS; 50 El.
Drawn. 63,000 TS, 10 El.
For trolley wire, marine hardware; 65% conductivity.

PHONO ELECTRIC BRONZE 840.
M-141; 1.4 Sn, bal Cu.
Annealed· 40,000 TS; 50 El.
Drawn: 85,000 TS; 10 El.
For trolley wire, hardware; 40% min conductivity.

PHONO ELECTRIC WIRE.
98.55 Cu, 1.40 Sn, 0.05 Si.
For trolley wire, electrical conductors; high electrical conductivity.

PHONO HI CONDUCTIVITY.
M-141; 0.9 Cd, bal Cu.
Annealed: 37,000 TS; 50 El.
Drawn: 65,000 TS; 6 El.
For trolley wire, hardware; 80% min conductivity.

PHONO HI-CONDUCTIVITY 985.
M-141; 0.9 Cd, bal Cu.
Annealed: 37,000 TS; 50 El.
Drawn: 80,000 TS; 6 El.
For cable, trolley wire; 85% conductivity.

PHONO-HI-STRENGTH
M-141; 97 Cu, 2 Sn, 1 Si.

PHONO HI-STRENGTH 715.
M-141; 2.7 Al, 0.35 Si, bal Cu
Annealed: 50,000 TS; 50 El.
Drawn: 125,000 TS; 5 El.
For cable, hardware, bolts; 15% conductivity.

PHONO TELEPHONE 830.
M-141, 1.7 Sn, bal Cu.
Annealed: 40,000 TS; 50 El.
Drawn: 90,000 TS, 10 El
For cable, drop wire, 30% conductivity.

PHOSCO.
M-1013, 7.5 P, 92.5 Cu.
For brazing non-ferrous metals; M.P. 1320-1450°F; self-fluxing.

PHOS-COPPER.
M-118, 8 P, bal Cu.
Welded. 85,000 TS, 17 El
For brazing alloy for Cu and brass parts, M.P. 1305-1460°F

PHOS-COPPER-5
M-118, 4.8-5.2 P, bal Cu.
For filler metal for electrical connections, brazing, M.P. 1640-1310°F, AWS C1 BCuP-1.

PHOSNIC BRONZE.
M-33, 0.85-1.35 Ni, 0.18-0.30 P, bal Cu
Soft 38,000 TS, 10,000 YS, 40 El.
Age-hardened 85,000 TS; 68,000 YS, 15 El
Spring: 110,000 TS, 100,000 YS; 4 El.
For marine hardware, spring clips, electrical conductors; corrosion resistant, age-hardenable

PHOSON 6
M-1013; 7 P, 6 Ag, bal Cu
Cast: 95,000 TS.
For silver brazing alloy; M.P. 1190-1380°F; self-fluxing.

PHOSON-15
M-1013, 15 Ag, 5 P, 85 Cu.
Cast: 86,000 TS
For brazing alloy for copper and Cu alloys; M.P. 1185-1500°F; self fluxing

PHOSON-0.
M-1013; 7-12 P, bal Cu.
Cast: 93,000 TS
For brazing alloy for copper and brass parts for close joint tolerance
M.P. 1305-1485°F.

PHOSPHOR BRONZE.
80 Cu, 8 Sn, 10 Pb, 2 P-Sn.
For railroad bearings; heavy duty.

PHOSPHOR BRONZE NO. 1.
M-1518; 90 Cu, 10 min Sn, 0.50 min P.
Cast: 27,000 TS; 1.5 El; 65-90 Brin.
For bearings with hardened shafts, heavy loads and high speeds.

PHOSPHOR BRONZE 1.25% E, 505.
M-279; 98.7 Cu, 1.25 Sn, 0.04 P.
Ann. 37,000-42,000 TS; 8000-17,000 YS; 40-47 El.
Cold rolled: 41,000-84,000 TS; 16,000-77,000 YS; 1-45 El.
For flexible metal hose, pole line hardware.
Corrosion resistant and corrosion fatigue resistant.

PHOSPHOR BRONZE NO. 2
M-1518; 88.0 Cu, 12 Sn, 0.15 P.
Cast: 31,500 TS; 7 El; 69 Brin
For gears, bushings, bearings with hardened shafts; heavy loads and high speeds.

PHOSPHOR BRONZE NO. 3.
M-1518; 9-11 Sn, 0.03-0.25 P, bal Cu.
Cast: 36,000 TS; 10 El.
For pressure tight castings; corrosion resistant.

PHOSPHOR BRONZE NO. 4.
M-1518, 7.5 Sn, 0.3 P, 2-5 Pb, bal Cu.
Cast: 27,000 TS, 3 El; 60-80 Brin.
For medium duty castings; good bearing qualities.

PHOSPHOR BRONZE 4%, 511.
M-279; 96 Cu, 4 Sn, 0.05 P.
Ann 40,000-52,000 TS; 12,000-24,000 YS; 45-58 El.
Cold rolled 45,000-109,000 TS; 18,000-96,000 YS; 1-44 El
High conductivity spring phosphor bronze.
For electric terminals, clips, connectors.

PHOSPHOR BRONZE 5% A, 510.
M-279, 94.8 Cu, 5 Sn, 0.2 P
Ann 46,000-56,000 TS; 19,000-29,000 YS; 48-62 El.
Cold rolled: 49,000-122,000 TS, 21,000-110,000 YS; 1-50 El.
High strength, fatigue and corrosion resistant.
For bellows, electric spring contacts, connectors, terminals

PHOSPHOR BRONZE 8% C, 521.
M-279; 91.8 Cu, 8 Sn, 0.2 P.
Ann 56,000-65,000 TS; 23,000-34,000 YS, 60-67 El.
Cold rolled 63,000-134,000 TS; 33,000-122,000 YS; 1-60 El.
Very high strength spring bronze
For diaphragms, springs, bellows, pen clips.

PHOSPHOR BRONZE, 10% GR. D.
M-33, 90 Cu, 9.85 Sn, 0.15 P
Annealed 66,000 TS, 28,000 YS, 68 El.
Hard rolled 100,000 TS, 13 El.
For springs, bridge bearing plates; tough.

PHOSPHOR BRONZE NO. 30
M-98, 94.8 Cu, 5 Sn, 0.2 P
Wire: 105,000-135,000 TS.
For hardware, springs, wire rope; corrosion resistant.

PHOSPHOR BRONZE 301
M-8, 3 Sn, 0.25 P, bal Cu.
Hard 90,000 TS, 70,000 YS, 4 El.
For Fourdrinier wire.

PHOSPHOR BRONZE-314.
M-8; 4 Sn, 0.25 Mn, 0.8 P, bal Cu.
Soft 48,000 TS, 20,000 YS; 50 El
Hard 65,000 TS, 55,000 YS; 30 El.
For hot work parts, strong.

PHOSPHOR BRONZE 320.
M-8, 6.5 Sn, 0.30 P, bal Cu.
Hard: 120,000 TS; 2 El
Soft: 57,000 TS; 40 El.
For Fourdrinier wire.

PHOSPHOR BRONZE-356.
M-8; 1.25 Sn, 0.05 P, bal Cu.
Soft: 40,000 TS; 14,000 YS; 48 El.
Hard: 65,000 TS; 50,000 YS; 6 El.
For electrical conductors, metal hose; corrosion resistant.

PHOSPHOR BRONZE-507.
M-8; 1.75 Sn, 0.01 P, bal Cu.
Soft: 45,000 TS.
Hard· 105,000 TS.
For trolley and line wires; strong.

PHOSPHOR BRONZE (A)-305.
M-8; 5 Sn, 0.05 P, bal Cu.
Hard. 65,000 TS; 57,000 YS, 20 El; 150 Brin.
Soft: 48,000 TS; 20,000 YS; 50 El, 67 Brin.
For strips and tubes; corrosion resistant.

PHOSPHOR BRONZE (A) 351.
M-8; 5 Sn, 0 25 P, bal Cu
Hard drawn. 130,000 TS.
Soft: 45,000 TS; 50 El.
For tubes, sheets, wire, general parts; resists fatigue and corrosion and abrasion

PHOSPHOR BRONZE A510
M-8, 94 8 Cu, 5 0 Sn, 0 20 P.
Hard Sheet: 80,000 TS, 65,000 YS; 10 El; B 86 Rock
Soft Sheet. 48,000 TS, 20,000 YS, 50 El, B 28 Rock.
For chemical hardware, springs, bridge bearing plates, Bourdon tubes
Good resilience and fatigue resistance Corrosion resistance

PHOSPHOR BRONZE (A) 5090
M-8, 4 0 Sn, 0.05 P, bal Cu
Sheet, hard: 80,000 TS, 65,000 YS; 8 El; 86 Rb
Soft· 48,000 TS; 20,000 YS, 48 El, 28 Rb.
For drawing into containers as kettles, electrical terminals; weldable and solderable

PHOSPHOR BRONZE, AMERICAN NO 1.
M-98, 70 Cu, 13 Sn, 16 Pb, 1 P.
For fittings, exposed to sea water gun fittings, small springs, high resistance to corrosion and fatigue.

PHOSPHOR BRONZE, AMERICAN NO. 2
M-98, 95 Cu, 4 9 Sn, 0 1 P.
For screw propellers, airplane parts, worm wheels, bearings, fuse clips, high resistance to corrosion and fatigue.

PHOSPHOR BRONZE BEARINGS-1
83 Cu, 14 Sn, 1 P, 2 Zn
For bearings, bushings, heavy duty.

PHOSPHOR BRONZE BEARINGS-2.
88 1 Cu, 8 Sn, 0 15 P, 4 7 Pb.
For bearings, bushings, heavy duty

PHOSPHOR BRONZE BRIDGE-1.
80 Cu, 20 Sn, 1 0-0 2 P
For bearings, bushings, high strength.

PHOSPHOR BRONZE BRIDGE-2.
85 Cu, 15 Sn, 1 P.
For bearings, bushings; high strength.

PHOSPHOR BRONZE (C) 353.
M-8, 8 Sn, 0 25 P, bal Cu.
Hard drawn 130,000 TS.
Hard sheet 110,000 TS; 3 El.
For tubes, sheets, wire general parts; resists fatigue and corrosion.

PHOSPHOR BRONZE (D) 354.
M-8; 10 Sn, 0.25 P, bal Cu.
Hard· 130,000 TS; 5 El.
Soft: 60,000 TS; 65 El.
For tubes, sheets, wire, general parts; resists fatigue and corrosion.

PHOSPHOR BRONZE-D524.
M-8; 89 75 Cu, 10.0 Sn, 0.25 P.
Hard Sheet: 102,000 TS; 70,000 YS; 12 El; B 97 Rock.
Soft Sheet· 66,000 TS; 28,000 YS; 65 El; B 55 Rock.
For clips, beater bars, chemical hardware, springs, condenser tubes.
High strength, resilience and resistance to fatigue. Corrosion resistant

PHOSPHOR BRONZE ENGLISH.
79 2 Cu, 10 2 Sn, 9 6 Pb, 0 97 P
For tubes, hardware, free-cutting

PHOSPHOR BRONZE, ENGLISH NO. 1.
M-98, 79.5 Cu, 10 2 Sn, 9 6 Pb, 0.7 P
For fittings exposed to sea water, gun fittings, small springs, bearings, high resistance to corrosion and fatigue

PHOSPHOR BRONZE, ENGLISH NO. 2.
M-98, 76 8 Cu, 8 Sn, 15 Pb, 0 2 P.
For screw propellers, airplane parts, worm wheels, fuse clips, high resistance to corrosion and fatigue

PHOSPHOR BRONZE GEAR-1
88 Cu, 10 Sn, 2 Pb, 0.1 P.
For gears, tough

PHOSPHOR BRONZE GEAR-2
85 Cu, 13 Sn, 2 Zn, 0 1 P
For gears, tough

PHOSPHOR BRONZE GRADE A
M-33, 95 Cu, 4 75 Sn, 0 25 P.
Annealed 49,000 TS, 20,000 YS, 58 El
Rolled 81,000 TS, 75,000 YS, 10 El
For springs, diaphragms, wire rope, corrosion resisting

PHOSPHOR BRONZE GRADE A
M-102, 4-6 Sn, 0.35 max P, bal Cu
Annealed· 50,000 TS, 50 El.
Hard 95,000 TS, 2 El
For springs, diaphragms; P-Bronze

PHOSPHOR BRONZE GRADE C.
M-33, 92 Cu, 7 75 Sn, 0 25 P
Annealed 60,000 TS, 24,000 YS, 65 El.
Rolled 93,000 TS, 72,000 YS, 10 El
For springs, welding rod, corrosion resisting.

PHOSPHOR BRONZE GRADE C
M-102; 7 9 Sn, 0 35 max P, 0 20 max Zn, bal Cu
Annealed 55,000 TS, 60 El .
Hard· 110,000 TS, 2 El
For springs, bearings, P-Bronze.

PHOSPHOR BRONZE HAIRSPRINGS.
93 Cu, 6 6 Sn, 0 12-0 2 P
For hairsprings, high strength

PHOSPHOR BRONZE, LOCOMOTIVE BEARING
M-98, 90 34-94 7 Cu, 8.9-4 4 Sn, 0 76-0 35 P.
For screw propellers, fittings exposed to sea water, worm wheels, bearings; high resistance to corrosion and fatigue

PHOSPHOR BRONZE PRR-B.
76.8 Cu, 8 Sn, 15 Pb, 0 2 P.
For railroad bearings; heavy duty

PHOSPHOR BRONZE PRR-P.
86 5 Cu, 9 85 Sn, 3.77 Zn, 0.05 P.
For railroad bearings; heavy duty.

PHOSPHOR BRONZE, RUSSIAN.
M-98; 93.7 Cu, 5.8 Sn, 0.16 P, 0.34 Zn.
For screw propellers, fittings exposed to sea water, bearings, worm wheels; high resistance to corrosion and fatigue.

PHOSPHORBRONZE Sn BZ 4.
M-297; 4 Sn, 0.3 P, bal Cu.
Rolled: 82,000 TS, 5 El; 156 Brin.
Annealed. 48,300 TS; 44 El; 70 Brin.
For springs; tough.

PHOSPHORBRONZE Sn BZ 6.
M-297; 6.5 Sn, 0.3 P, bal Cu.
Rolled: 113,800 TS, 2 El; 210 Brin.
Annealed: 59,700 TS, 70 El; 75 Brin.
For springs, contacts; tough.

PHOSPHORBRONZE Sn BZ 8.
M-297; 8 Sn, 0.3 P, bal Cu.
Rolled: 156,200 TS; 1 El.
Annealed: 71,100 TS, 55 El.
For springs, contacts, tough

PHOSPHOR BRONZE "S" PA.
U.S., 79.7 Cu, 10 Sn, 9.5 Pb, 0.8 P.
For heavy duty bearings, high strength.

PHOSPHOR COPPER GRADE A.
M-165, 0.14 min P, 0.15 max Fe, 99.75 min P + Cu.
25,000 TS, 8 El
For bearings and machine castings; corrosion resistant

PHOSPHOR COPPER GRADE B
M-165; 0.10 min P, 0.15 max Fe, 99.75 min P + Cu
For bearings and machine castings; corrosion resistant

PHOSPHORIZED ARSENICAL COPPER-142
M-8, 99.68 Cu, 0.02 P, 0.30 As
Hard Tube: 45,000 TS, 40,000 YS, 10 El, B 50 Rock
Soft Tube 33,000 TS, 10,000 YS, 45 El, F 45 Rock
For condensers and heat exchangers.
Elect cond 45 Pitting and corrosion resistant.

PHOSOPHORIZED COPPER-122
M 8, 99.9 Cu, 0.02 P
Hard Sheet 48,000 TS, 40,000 YS, 6 El, B 50 Rock
Soft Sheet 33,000 TS, 10,000 YS; 45 El, F 45 Rock
For refrigeration and air conditioning units, plumbing and heating units, oil carriers, hydraulic and gas lines.
Elect. cond 85. No hydrogen embrittlement

PHOS SIL-0
M-1483, 92.8 Cu, 7.2 P
Cast 93,000 TS
For brazing alloy for copper to copper
B CuP-2 Spec, M.P. 1305°F.
Corrosion resistant.

PHOS SIL-2
M-1483; 91 Cu, 2 Ag, 7 P
Cast. 93,000 TS.
For brazing alloy for copper to copper
B CuP Spec; M.P 1190°F
Corrosion resistant.

PHOS SIL-6
M-1483, 87.75 Cu, 6 Ag, 6.25 P.
Cast: 92,000 TS.
For brazing alloy for joints with poor fit-up.
B CuP-3 Spec.; M.P. 1185°F.
Very ductile.

PHOS SIL-6F.
M-1483; 6 Ag, 86.75 Cu, 7.25 P.
Cast: 90,000 TS.
For brazing alloy for critical joints.
B CuP-4 Spec.; M.P. 1190°F.
Good penetration.

PHOS SIL-15.
M-1483; 15 Ag, 80 Cu, 5 P.
Cast. 86,000 TS.
For brazing alloy for non-ferrous metals.
B CuP-5 Spec; M P. 1185°F.
Rapid penetration.

PHOS-SILVER.
M-118; 6 Ag, 7.8 P, bal Cu.
Cast: 85,000 TS
For brazing for copper alloys; self-fluxing, M.P. 1185-1230°F.

PHOS-SILVER-2
M-118; 6.9-7.1 P, 1.8-2.2 Ag, bal Cu.
For brazing alloy, M P 1190-1455°F.

PHOS-SILVER-6.
M-118, 7.20-7.35 P, 5.8-6.2 Ag, bal Cu.
For brazing alloy, M.P 1190-1330°F; for close fit-up work; AWS Cl-BCuP-4.

PHOS-SILVER-6M
M-118, 6.05-6.20 P, 5.8-6.2 Ag, bal Cu.
For brazing alloy, M.P. 1190-1465°F; very ductile, AWS Cl.BCuP-3.

PHOS-SILVER-15
M-118, 4.9-5.1 P, 14.8-15.2 Ag, bal Cu.
For brazing alloy, M.P. 1190-1485°F; AWS Cl BCuP-5

PHOS-SILVER 18
M-118; 17.5-18.5 Ag, 7.0-7.5 P, bal Cu
For brazing copper, brass and bronze.
Lowest melting point 1190°F
Brazing temperature 1200-1250°F

PHOS-SILVER-65.
M-118, 4.9-5.1 P, 5.8-6.2 Ag, bal Cu
For brazing alloy for lap joints; M.P. 1190-1595°F.

PHOS-TRODE.
M-13; 7-9 Sn, 0.35 P, 0.5 max others, bal Cu.
Cast: 55,000 TS; 29,000 YS, 35 El; 33 RA; 89 Brin
For shielded arc welding rod.
Grade C. Phosphor Bronze.

P H S.
M-210, 0.10 C, 0.10 Si, 0.40 Mn, bal Fe.
For plastic mold dies, hobbing steel.

P.H VAN.
M-1433; 0.35 C, 1.0 Si, 5 Cr, 1 V, 1.5 Mo, bal Fe.
Annealed: 98,000 TS; 74,000 YS, 28 El, 210 Brin.
Hardened 135,000-290,000 TS, 100,000-228,000 YS, 3-16 El, 7-48 RA; C 27-55 Rock.
For forging and heading dies, compression tools, die casting dies, hot piercing and forming punches, bolt dies, swaging dies
Type H13 hot work steel, red-tough, shock and impact resistant.

PHV DIE.
M-38, 0.27 C, 2.8 Ni, 1.15 Cr, 0.40 V, 0.25 Mo, 1.15 Al, bal Fe.
Heat treated: 170,500 TS; 159,000 YS; 16 El; 42 RA, Rockwell C54-C62
For dies for plastic and injection molding inserts; age-hardenable.

P.H.W.
M-1433; 0.35 C, 1.05 Si, 1.55 W, 1.65 Mo, 5.15 Cr, bal Fe.
Hardened: 216,000 TS; 185,000 YS; 14 El; 53 RA.
At 1000°F: 144,000 TS; 110,000 YS; 19 El; 64 RA.
For die casting dies, hot shear blades, forging and heading dies, punches.
Type H12 hot work tool steel, tough and shock resistant.

PIERROT METAL, BEUGNOT
83 Zn, 8.3 Cu, 7.6 Sn, 3.5 Sb, 3 Pb.
For bearings; anti-friction.

PIERROTS B.M.
England; 83.3 Zn, 7.6 Sn, 2.3 Cu, 3.8 Sb, 3.0 Pb.
For bearings; will not resist heat or live steam.

PINCHBECK.
88-94 Cu, 6-12 Zn.
For cheap jewelry; red brass.

PINKUS BRASS.
Eng; 88.1 Cu, 6.9 Zn, 2.5 Sn, 1.8 Pb, 0.3 Ni, 0.32 Sb.
For hardware, fittings; free-cutting

PINKUS BRONZE.
England; 14.7 Sn, 1.5 Zn, 8.8 Pb, 2.5 Sb, bal Cu.
For bearings, bushings; heavy duty.

PINSBAC.
M-882; 0.3-0.5 C, bal Fe.
For machinery parts, gears; water hardening.

PIONEER.
M-1705; 0.55 C, 0.3 Mn, 0.9 Si, 5.1 Cr, 1.25 W, 1.45 Mo, bal Fe.
Air hardening tool steel, AISI A8.

PIONEER 921-T.
M-1403; 2 Si, 3.5 Cu, 0.5 max Fe, 0.08 Ti, bal Al.
Cast: 20,000 TS; 18,000 YS, 1.0 El; 70 Brin.
T6-temper: 45,000 TS; 22,000 YS; 0.5 El; 104 Brin
For tooling plates; heat treatable, dimensionally stable.

PIONEER HEAT RESISTING METAL.
M-326, C, 20 Cr, 20 Ni, 1 Mo, bal Fe.
For heat treating equipment between 1700-2000°F; resists heat up to 2000°F.

PIONEER METAL.
M-326; 65 Ni, Cr-Mo, bal Fe.
Cast: 74,000 TS, 36,500 YS; 42 El; 150 Brin
For castings, fittings, pumps, valve parts; acid resistant.

PIONEER METAL (PIONEER "A" ACID RESISTING).
M-326; 35 Ni, 25 Cr, <5 Mo, 0.2-0.5 C, bal Fe.
Cast: 74,000 TS; 36,500 YS; 42 El; 150 Brin
Heat treated: 65,000 TS; 45,000 YS; 20 El.
For valves, fittings, pump parts, castings; corrosion and acid resistant

PIREKS 12/25.
M-487, C, 12 Ni, 25 Cr, bal Fe
For furnace parts and equipment; heat resistant to 1100°C.

PIREKS 12/25.
M-1725;
Heat resisting alloy; good against sulphurous atmospheres

PIREKS 20/25.
M-487; C, 20 Ni, 25 Cr, bal Fe.
For furnace parts and equipment; creep and heat resistant to 950°C.

PIREKS 20/25.
M-1725;
Heat resisting alloy; good creep resistance up to 1050°C.

PIREKS 25/20.
M-487; C, 25 Ni, 20 Cr, bal Fe.
For furnace parts and equipment; heat resistant to 950°C.

PIREKS 25/20.
M-1725,
Heat resisting alloy; for continuous service to 1050°C.

PIREKS 35/15.
M-487, C, 35 Ni, 15 Cr, bal Fe.
For furnace parts and equipment; heat resistant to 950°C.

PIREKS 35/15.
M-1725;
Nickel-chromium heat resisting alloy for cycling use in carburizing atmospheres.

PIREKS 37/18/2.
M-1725;
Heat resisting nickel-chromium-niobium alloy for cycling use in carburizing atmospheres, as carburizing boxes.

PIREKS 60.
M-487, C, alloy, bal Fe.
For quenching jigs and fixtures; heat resistant to 1050°C

PIREKS 60
M-1725;
Heat resisting alloy; for continuous use up to 1050°C

PIREKS 60/13.
M-487; C, alloy, bal Fe.
For furnace trays, containers, electrical resistors, high heat resistance

PIREKS 60/13.
M-1725;
Heat resisting alloy, for cycle heating and cooling to about 1050°C.

PIREKS 228
M-487; C, alloy, bal Fe
For damper plates, pyrometer tubes; heat resistant to S atmosphere.

PIREKS 529.
M-1725;
Heat resisting alloy, ferritic type, good resistance to attack from high sulphur.

PIREKS METAL.
M-418, 0.25 C, 18 Cr, 8 Ni, bal Fe
At 20°C. 80,500 TS; 250 Brin
At 1000°C: 34,000 TS.
For annealing and carburizing boxes, heat treating appliances; cast alloy, resists heat up to 1000°C

PIREKS RCC
M-40, 0.21-0.35 C, 49-57 Ni, 24-30 Cr, Si, Mn, bal Fe
For heat and corrosion resistant parts; heat and corrosion resistant.

PIREKS-REACTAL.
M-40; 0.6 C, 20 Cr, 65 Ni, 2 Si, bal Fe.
For furnace parts, carburizing and annealing boxes; heat resistant.

PIRSCH'S GERMAN SILVER.
80-71 Cu, 16-17 Ni, 1-7.5 Zn, 1-2.8 Sb, 1-2 Co, 1-1.5 Fe, 0-0.5 Al.
For ornaments, tableware; corrosion resistant.

PISTONS-1.
83 Cu, 16 Zn, 1 Sn.
For pistons; corrosion resistant.

PISTONS-2.
93.5 Al, 2.45-3.4 Cu, 1.39 Mg, 0.4 Si, 0-0.28 Zn, 0-1.47 Ni.
For pistons, cylinder heads; age-hardenable.

PITALOY NO. 90.
M-236; 0.3 C, 0.1 V, 0.9 Mn, 0.35 Si, 1.6 Ni, bal Fe.
Cast: 90,000 TS; 60,000 YS; 25 El; 50 RA.
For general castings, locomotive frames, roll mill machinery, cross-heads; tough.

PITALOY NO. 100.
M-236; 0.35-0.40 C, 1.0 V, 0.9 Mn, 0.35 Mo, 0.35 Si, bal Fe.
Cast: 100,000 TS; 70,000 YS; 22 El; 40 RA.
For general castings, locomotive frames; tough.

PITHO.
M-618; 0.95 C, 1.2 Mn, 0.5 Cr, 0.5 W, bal Fe.
For reamers, taps, broaches, gauges; non-shrinking.

PITTSBURG.
M-370; 1.0 C, 5.25 Cr, 0.5 Mn, 1.1 Mo, 0.25 V, bal Fe
Air hardenable to 64 Rc.
For tools, dies, jigs, precision parts.
Type A2 air hardening tool steel.

PITTSBURGH.
M-883; 0.1 C, bal Fe.
For welding rod.

PITT-TEN NO 1.
M-883; 0.12 max C, 0.10 max Si, 0.7 Mn, 0.8 Cu, 0.7 Ni, 0.07 max P, 0.05 max S, bal Fe.
For truck and bus bodies, mine cars; high strength structural steel.

PITT-TEN NO. 2.
M-883, 0.15 max C, 0.75 max Mn, 0.10 max Si, 0.07 max P, 0.05 max S, 0.05 Cr, bal Fe.
For trucks and bus bodies, mine cars; high strength structural steel.

PITT-TEN "X."
M-883; 0.10-0.20 C, 0.50-1.0 Mn, 0.01 min Cb, bal Fe.
Rolled: 60,000-75,000 TS; 45,000-60,000 YS; 18-24 El
For agricultural equipment, bus and truck bodies.
High strength structural steel

PIVOT DRILL ROD.
M-38; 1.25 C, bal Fe.
For drills, pivots; water hardening.

PLACET.
Eng ; 60 Ni, 20 Fe, 15 Cr, 5 Mn.
Cast: 50,000 TS; 1 El; 179 Brin.
For resistance alloy; heat resistant.

PLACOVAR.
M-1084; 50 atomic % Co, 50 atomic % Pt.
Permanent magnet alloy, ductile.
Coercive force: 4300 Oersteds.
Residual induction: 6450 Gausses.
Energy product: 9.5 × 10^6 Gauss-Oersteds.
For use in instruments.

PLANCHER.
M-289; 0.55-0.65 C, 0.5 Mo, 0.8 Mn, 2.0 Si, bal Fe.
For chisels, punches, shear blades, plastic master hobs, oil hardened, shock resistant.

PLANET CHOICE.
M-372; 0.7-1.2 C, bal Fe.
For tools, drills, taps; water hardened.

PLANET COLD ROLLED.
M-372; 0.7-0.9 C, bal Fe.
For tools; water hardening.

PLANET DRILL ROD.
M-372; 1.2 C, bal Fe.
For drill rods, drills, tools; cold drawn.

PLANET EXTRA.
M-372; 0.9-1.2 C, bal Fe.
For tools, drills, taps; water hardened.

PLANET HIGH SPEED.
M-372; 0.7 C, 18 W, 4 Cr, 1 V, bal Fe.
For cutting tools, taps; high speed steel.

PLANET REGULAR.
M-372; 0.8-1.2 C, bal Fe.
For tools, drills, taps; water hardened.

PLANET SHEFFOIL.
M-372; 0.7 C, 18 W, 4 Cr, 1 V, bal Fe.
For high speed tools, cutters; high speed steel.

PLANET SPECIAL.
M-372; 0.7-1.0 C, 0.2 V, bal Fe.
For dies and tools; water hardening.

PLANSEE WZ 12D.
M-1246; 35 TiC, 39 Ni, 13 Co, 13 Cr.
For jet engine components; high heat resistance.

PLASDIE.
M-35, 0.30 C, 0.75 Cr, 0.25 Mo, bal Fe.
For Zn die casting dies, Type H13; oil hardened.

PLASMEX 1000.
M-207; 0.30 C, 0.75 Mn, 0.50 Si, 1.7 Cr, 0.40 Mo, bal Fe.
Oil hardening tool and die steel, for molds.

PLASMOLD.
M-56; 0.35 C, 0.25 Si, 0.50 Mn, 4.3 Ni, 1.3 Cr, 0.3 Mo, bal Fe.
For gears, bolts, crankshafts, forging dies, oil hardened, shock resistant.

PLASTALLOY.
M-357; 0.08 C, 0.43 Mn, 1.3 Ni, 0.56 Cr, bal Fe.
For dies, plastic molds; water hardened.

PLASTIC BRONZE.
M-126, 66 Cu, 5 Sn, 28 Pb, 1 Ni.
For bearings; heavy duty.

PLASTIC CSM NO. 2.
M-38; 0.30-0.35 C, 0.7 Mn, 0.5 Si, 0.8 Cr, 0.25 Mo, bal Fe.
For plastic mold dies, zinc die-casting dies; water hardening.

PLASTIC HOBBING STEEL.
M-210; C, bal Fe.
110 Brin.
For plastic mold dies; hobbed dies

PLASTIC METAL.
Eng., 81 Sn, 9.5 Cu, 8.6 Sb, 1.4 Fe
21-24 Brin.
For bearings, bushings; Babbitt.

PLASTIFORM.
M-1724; 0.30 C, 4.0 Ni, 1.3 Cr, 0.25 Mo, bal Fe.
Air or oil hardening alloy toolsteel; for stamping dies, plastic molds, drop stamping dies.

PLASTIRON.
M-357; 0.12 max C, bal Fe.
For plastic molds; carburized grade.

PLAST-IRON.
M-1090; 0.008 C, 0.001 Mn, 0.005 Si, 99.98 Fe.
For magnets, radio cores; powdered metal.

PLASTO C.
M-1331; 0.15 C, Cr, bal Fe.
For gears, cams, camshafts, fasteners; case hardening steel.

PLASTO CC.
M-1331; C, Cr, bal Fe.
For gears, cams, camshafts, fasteners; case hardening steel.

PLASTO MC.
M-1331; 0.2 C, 1.25 Mn, 1.15 Cr, bal Fe.
For gears, cams, camshafts, fasteners; case hardening steel.

PLASTO MCW.
M-1331; 0.15 C, 1.0 Cr, 1.25 Mn, 0.25 Si, bal Fe.
For gears, cams, camshafts, fasteners; case hardening steel.

PLASTO Ni.
M-1331; 0.19 C, 1.75 Cr, 0.2 Mo, 3.75 Ni, bal Fe.
For gears, cams, camshafts, fasteners; case hardening steel, shock resistant.

PLASTO RR.
M-1331; 0.4 C, 13 Cr, 0.3 Mn, 0.4 Si, bal Fe.
Annealed: 100,000 TS; 55,000 YS; 22 El; 52 RA; 200 Brin.
For cutlery, valves, oil refinery equipment; Type 420; stainless.

PLASTO U.
M-1331; 0.15 C, 0.15-0.35 Si, 0.25-0.50 Mn, bal Fe.
Annealed: 70,000 TS; 40,000 YS; 25 El; 60 RA; 145 Brin.
For gears, cams, fasteners, bolts; case hardening steel.

PLASTO V.
M-1331; 0.5 C, Ni, Cr, V, bal Fe.
For gears, bolts, crankshafts; oil hardened, shock resistant.

PLATALARGAN.
Pt, Al, Ag.
For pen points; corrosion resistant.

PLATA METAL NO. 5.
M-567; Sb, Sn, Pb.
For bearings; Babbitt metal.

PLATE AJ 30/4.
M-1337; 0.45 C, 1.50 Si, 0.60 Mn, 1.40 Cr, 0.10 V, bal Fe.
Oil hardening tool steel.
For cold punches, mandrels, embossing tools, lettering and numbering dies
DIN 45SiCrV6; Werkstoff 1.2249.

PLATE AJ 30/H.
M-1337; 0.61 C, 0.90 Si, 0.80 Mn, 1.20 Cr, 0.10 V, bal Fe.
Oil hardening tool steel.
For cold punches for heavy sheet, large embossing tools, staking tools.
DIN 61CrSiV5; Werkstoff Nr. 1.2243.

PLATE AJ30N.
M-1337; 0.61 C, 1.18 Cr, 0.1 V, bal Fe.
For springs, upsetters; oil hardened, shock resistant.

PLATE AK14
M-1337; 0.7 C, 0.25 Si, 0.25 Mn, bal Fe.
Heat treated: 175,000 TS; 130,000 YS; 12 El; 36 RA; 355 Brin.
For rails, springs, hammers, axes; water hardened.

PLATE AK20.
M-1337; 1.0 C, 0.2 Si, 0.2 Mn, bal Fe.
Annealed: 100,000 TS; 53,000 YS; 21 El; 42 RA; 200 Brin.
For drills, hobs, reamers, taps; Type W1; water hardened.

PLATE AR 40/1.
M-1337; 0.45 C, 1.0 Si, 0.35 Mn, 1.1 Cr, 0.20 V, 2.0 W, bal Fe.
Oil hardening tool steel.
For pneumatic tools, chisels, staking tools, riveting hammers.
DIN 45WCrV7; Werkstoff Nr. 1.2542.

PLATE AR 40/2.
M-1337; 0.35 C, 1.0 Si, 0.35 Mn, 1.1 Cr, 0.20 V, 2.0 W, bal Fe
Oil hardening tool steel.
For cold shear blades, header chisels, cold heading dies.
DIN 35WCrV7; Werkstoff Nr. 1.2541.

PLATE AR404.
M-1337; 0.55 C, 0.9 Si, 0.3 Mn, 1.05 Cr, 0.2 V, 1.85 W, bal Fe
For upsetters, punches, shears, cold work tools; oil hardened, tough

PLATE BM 260.
M-1337; 0.40 C, 0.40 Si, 0.30 Mn, 13.5 Cr, bal Fe
Air or oil hardening tool steel.
For plastic molds for corrosive plastics
DIN X40Cr13; Werkstoff Nr. 1.2083

PLATE BP 16 E.
M-1337, 0.15 C, 0.25 Si, 0.50 Mn, 0.65 Cr, bal Fe.
For case hardening parts for roller bearings, measuring instruments, piston pins.
DIN 15Cr3

PLATE BP 18 E
M-1337; 0.16 C, 0.25 Si, 1.2 Mn, 1.0 Cr, bal Fe.
For case hardening small cog wheels, shafts, control levers.
DIN 16MnCr5.

PLATE BP 20 E
M-1337, 0.21 C, 0.30 Si, 1.2 Mn, 1.2 Cr, bal Fe.
For case hardening gears, spline shafts, pinions, crank shafts for small engines.
DIN 21MnCr5

PLATE BS 30 E.
M-1337; 0.15 C, 0.25 Si, 0.50 Mn, 1.55 Cr, 1.55 Ni, bal Fe.
For case hardening cog wheels, chain drives, splined shafts, gears
DIN 15CrNi6.

PLATE BS 70 E.
M 1337, 0.14 C, 0.30 Si, 0.40 Mn, 0.75 Cr, 3.50 Ni, bal Fe.
For case hardening parts such as gears, cam shafts, splined couplings of middle stress.
DIN 14NiCr14; W Nr. 1.5752.

PLATE BS 90 E.
M-1337; 0.14 C, 0.30 Si, 0.40 Mn, 1.10 Cr, 4.50 Ni, bal Fe.
For case hardening parts as crankshafts, highly stressed gears and shafts of large section as for trucks and ordnance.
DIN 14NiCr18; W Nr. 1.5860.

PLATE BS 90 E Mo.
M-1337, 0.19 C, 0.20 Si, 0.40 Mn, 1.25 Cr, 0.25 Mo, 4.0 Ni, bal Fe.
For case hardening parts such as truck and tractor gears and splined shafts, for case hardened ordnance parts.
DIN 19NiCrMo15; W. Nr. 1.6587.

PLATE BV36.
M-1337; 0.5 C, 0.25 Si, 1.05 Cr, 3.25 Ni, bal Fe.
For gears, pinions, crankshafts, bolts, studs; oil hardened, shock resistant.

PLATE CLIMAX TZM.
M-1337; 99.3 Mo, 0.5 Ti, 0.1 Zr.
For hot extrusion dies, mandrels, turbine components, casting dies and molds.

PLATE E 5 S.
M-1337; 0.06 max C, 0.20 max Si, 0.20 Mn, 4.50 Cr, 0.50 Mo, bal Fe.
For case hardening heavy gears, axles, shafts, tractor, railroad and ordnance equipment.
DIN X6CrMo5.

PLATE EXTRA EXTRA P10.
M-1337, 0.45 C, Ni, Cr, bal Fe.
For gears, bolts, machine tool parts; oil hardened, tough.

PLATE EXTRA SPEZIAL MH.
M-1337; 1.1 C, 0.25 max Si, 0.25 max Mn, bal Fe.
Annealed: 110,000 TS; 58,000 YS; 20 El; 40 RA; 210 Brin.
For springs, drills, hobs, reamers; Type W1; water hardened.

PLATE EXTRA SPEZIAL ZAH.
M-1337, 0.85 C, 0.25 max Si, 0.25 max Mn, bal Fe.
Heat treated: 190,000 TS; 145,000 YS; 10 El; 30 RA; 400 Brin.
For springs, taps, reamers, Type W1; water hardened

PLATE EXTRA SPEZIAL ZH
M-1337, 1 0 C, 0 25 max Si, 0 25 max Mn, bal Fe.
Annealed 100,000 TS; 53,000 YS, 21 El, 42 RA; 200 Brin.
For springs, taps, reamers, broaches, Type W1; water hardened.

PLATE K 14.
M-1337, 0.70 C, 0 30 max Si, 0.35 max Mn, bal Fe.
Water hardening tool steel; for stone tools for soft stones, chisels, snap head dies
DIN C70W2; Werkstoff Nr 1.1620.

PLATE K18.
M-1337, 0.85 C, 0 30 max Si, 0.35 max Mn, bal Fe.
Water hardening tool steel, for stone tools for middle hard stones, hammers, leather and spoon dies.
DIN C85W2, Werkstoff Nr 1.1630

PLATE K 20.
M-1337; 1 00 C, 0 30 max Si, 0.35 max Mn, bal Fe
Water hardening tool steel; for stone tools, for hard stone, embassing tools, scythes.
DIN C100 W2; Werkstoff 1 1640.

PLATE KM 20 V.
M-1337, 1 0 C, 0.20 Si, 0.25 Mn, 0 10 V, bal Fe.
Water hardening tool steel.
For piercing dies, upsetting dies, small shear blades, shovels, hand tools.
DIN 100V1; Werkstoff Nr. 1.2833

PLATE KP260W.
M-1337, 1.65 C, 11.5 Cr, 0 10 V, bal Fe.
For blanking and forming dies, punches; air hardened, non-deforming.

PLATE KS 7.
M-1337; 0.70 C, 0.25 max Si, 0.25 max Mn, bal Fe.
Water hardening carbon tool steel; for cold trimming dies, trimming punches, centering drifts, little drop hammer dies.
DIN C70W1; Werkstoff Nr. 1.1520.

PLATE KS 9.
M-1337; 0.85 C, 0.25 max Si, 0.25 max Mn, bal Fe.
Water hardening tool steel; for cold impact tools, cold cutting and punching dies, strainers, snap dies.
DIN C85W1; Werkstoff Nr. 1.1530.

PLATE KS 10.
M-1337; 1.00 C, 0.25 max Si, 0.25 max Mn, bal Fe.
Water hardening tool steel; for cutting and punching dies, shear blades, hollow and massive embossing dies.
DIN C100W1; Werkstoff Nr 1.1540.

PLATE KS 12.
M-1337; 1.10 C, 0 25 max Si, 0 25 max Mn, bal Fe.
Water hardening tool steel, for small cutting and punching dies, milling cutters, scrapers, cutting tools, twist drills.
DIN C110W1; Werkstoff Nr. 1.1550.

PLATE KS 66.
M-1337; 0 50 C, 0.30 Si, 0.50 Mn, 1.1 Cr, 0.20 Mo, 3 25 Ni, bal Fe.
Oil hardening tool steel.
For cutlery dies, artificial resin molding dies, dies for tableware.
DIN (Similar to) 50NiCr13 and Werkstoff 1 2721.

PLATE KW 83.
M-1337, 0.45 C, 0 30 Si, 0 65 Mn, 1.4 Cr, 0.50 Mo, 4 0 Ni, 0 15 V, 0 50 W, bal Fe.
Oil or air hardening tool steel.
For large, tough embossing tools, cold upsetting tools, air hardening dies.
DIN (Similar to) X45NiCrMo4 and Werkstoff Nr. 1.2767.

PLATE LM22.
M-1337; 0 90 C, 0 80 Cr, 0.30 Mn, bal Fe
For bearings, liners, punches, bushings; water hardened, wear resistant

PLATE-LOY.
Pb.
For hot lead plating.

PLATE MS4.
M-1337; 0 45 C, 0 10-0.40 Si, 0.5-0 7 Mn, bal Fe.
Hot rolled· 98,000 TS; 60,000 YS; 24 El, 45 RA; 212 Brin
For axles, gears, bolts, crankshafts; water hardened.

PLATE MS7
M-1337, 0 60 C, 0.25-0 50 Si, 0 30-0 80 Mn, bal Fe.
Hot treated 160,000-115,000 TS, 113,000-77,000 YS, 12-23 El, 40-54 RA; 320-230 Brin.
For wheels, die blocks, girders, rails; water hardened.

PLATE MS8.
M-1337; 0 75 C, 0 25-0.50 Si, 0 30-0 80 Mn, bal Fe
Heat treated. 174,000-122,000 TS; 128,000-82,000 YS; 12-22 El; 37-52 RA; 350-240 Brin.
For springs, clutch discs, punches, die blocks; water hardened; Type W1.

PLATE MSS.
M-1337; 0.53 C, 0.90 Si, 0.90 Mn, bal Fe.
Oil hardenable to 54-60 Rock C.
For axles, pins, staking tools, cold chisels.
DIN 53MnSi4; Werkstoff Nr. 1.2825.

PLATE NM 30.
M-1337, 1.05 C, 0.30 Si, 0.20 Mn, 1.40 Cr, bal Fe.
Water or oil hardening tool steel for small dies, punches, gages.
DIN 105Cr5; Werkstoff Nr. 1.2060.

PLATE NM 110 Mo.
M-1337; 1.00 C, 0.30 Si, 0.50 Mn, 5.20 Cr, 1.15 Mo, 0.30 V, bal Fe.
Air hardening tool steel.
For thread rolling dies, trimming dies, shear punches.
DIN X100CrMoV51; Werkstoff Nr. 1.2363.

PLATE NM 240.
M-1337; 2.10 C, 0.30 Si, 0.30 Mn, 12.0 Cr, bal Fe.
Oil or air hardening tool steel.
For heavy duty stamping dies, broaches, cold shears, wood milling cutters.
DIN X210Cr12; Werkstoff Nr. 1.2080

PLATE NM 240 Co.
M-1337; 2.10 C, 0.30 Si, 0.40 Mn, 12.0 Cr, 0.40 Mo, 0.15 V, 0.70 W, 1.0 Co, bal Fe.
Air or oil hardening.
For thread rolling dies, punching and forming dies, broaches.
DIN X210CrCoW12; Werkstoff Nr. 1.2884.

PLATE NM 240 V.
M-1337; 2.10 C, 0.30 Si, 0.30 Mn, 12.0 Cr, 0.80 W, bal Fe.
Oil or air hardening tool steel.
For heavy duty stamping dies, punches, broaches, die rings, plastic molds.
DIN X210CrW12; Werkstoff Nr. 1.2436.

PLATE NM 240 W.
M-1337; 1.65 C, 0.30 Si, 0.30 Mn, 12.0 Cr, 0.10 V, bal Fe.
Air or oil hardening tool steel.
For heavy duty and long wearing stamping and punching dies, broaches
DIN X165CrV12; Werkstoff 1.2201.

PLATE NM 240 WMo.
M-1337; 1.65 C, 0.30 Si, 0.35 Mn, 12.0 Cr, 0.70 Mo, 0.35 V, 0.50 W, bal Fe.
Air or oil hardening.
For heavy duty punching and stamping dies and die blocks, broaches, plastic molds for corrosive plastics.
DIN X165CrMoV12; Werkstoff Nr 1.2601.

PLATE NN 20.
M-1337; 1.05 C, 0.25 Si, 1.10 Mn, 0.90 Cr, bal Fe.
Oil hardening tool steel.
For threading tools, cutting and punching dies for medium duty.
DIN 105MnCr4; Werkstoff Nr. 1.2127.

PLATE NN26M.
M-1337, 1.25 C, 1.15 Si, 0.7 Mn, 1.2 Cr, bal Fe.
For blanking and forming dies, bushings, liners; oil hardened, wear resistant.

PLATE NN 40
M-1337; 0.90 C, 0.20 Si, 2.0 Mn, 0.10 V, bal Fe.
Oil hardening tool steel.
For difficult cutting dies and punches for sheets up to 3 mm thick.
DIN 90MnV8; Werkstoff Nr. 1.2842.

PLATE NR 40/D.
M-1337; 0.45 C, 1.0 Si, 0.35 Mn, 1.65 Cr, 0.20 V, 2.0 W, bal Fe.
Oil hardening tool steel.
For cold shear blades, pneumatic tools, chisels, cold upset dies.
DIN 45WCrV77; Werkstoff Nr. 1.2547.

PLATE NR 40/H.
M-1337; 0.60 C, 0.60 Si, 0.30 Mn, 1.10 Cr, 0.20 V, 2.0 W, bal Fe.
Oil hardening tool steel.
For highly stressed perforating dies, trimming dies, lower dies.
DIN 60WCrV7; Werkstoff Nr. 1.2550.

PLATE ON 22.
M-1337; 1.15 C, 0.20 Si, 0.35 Mn, 0.70 Cr, 0.10 V, bal Fe.
Water or oil hardening tool steel.
For twist drills, reamers, punches, taps.
DIN 115CrV3; Werkstoff Nr. 1.2210.

PLATE ON28
M-1337, 1.45 C, 1.4 Cr, 0.6 Mn, bal Fe.
For bearings, liners, blanking dies, cutters; water or oil hardened, wear resistant.

PLATE OW20V.
M-1337; 1.2 C, 0.10 V, 1.0 W, 0.28 Mn, bal Fe.
For cutters, bearings, liners, water hardened.

PLATE OR 33 M
M-1337; 1.05 C, 0.25 Si, 1.0 Mn, 1.0 Cr, 1.2 W, bal Fe.
Oil hardening tool steel.
For cutting and stamping dies for sheet steel up to 5 mm thick
DIN 105WCr6; Werkstoff Nr. 1.2419.

PLATE OW 90.
M-1337, 1.42 C, 0.20 Si, 0.30 Mn, 0.35 Cr, 0.25 V, 3.25 W, bal Fe
Water or oil hardening tool steel.
For lathe and planing tools, engraving needles, scrapers, serrating steels.
DIN 142WV13, Werkstoff Nr. 1.2562.

PLATE PA 188
M-1337; 0.12 max C, 18.0 Cr, 9.0 Ni, bal Fe
Ann. 71,000-100,000 TS, 31,000 min YS; 50 min El; 130-180 Brin.
Austenitic, stainless, hardenable only by cold work.
For stainless equipment in food, beverage, dairy, paper, chemical industries.
DIN X12CrNi188; Werkstoff Nr. 1.4300.

PLATE PA 188 S
M-1337, 0.15 max C, 18.0 Cr, 9.0 Ni, S, bal Fe.
Ann 71,000-100,000 TS; 31,000 min YS; 50 min El; 130-180 Brin
Austenitic, stainless, free machining
For machined shafts, bolts, screws and similar parts in food and beverage plants.
DIN X12CrNiS188; Werkstoff Nr. 1.4305.

PLATE PA 188 Ti
M-1337, 0.10 max C, 18.0 Cr, 11.0 Ni, Ti, bal Fe.
Ann 71,000-106,000 TS, 35,000 min YS; 40 min El; 130-190 Brin.
Austenitic, stainless, weldable.
For parts and welded assemblies for use in food, beverage, dairy and chemical industries.
DIN X10CrNiTi1810, Werkstoff Nr 1.4541.

PLATE PA 188 W.
M-1337; 0.07 C, 18.0 Cr, 10.0 Ni, bal Fe.
Ann: 71,000-100,000 TS, 31,000 min YS; 50 min El, 130-180 Brin.

Austenitic, stainless, weldable.
For parts and welded assemblies in food, dairy, beverage, and chemical industries.
DIN X5CrNi189; Werkstoff Nr. 1.4301.

PLATE PAO 188/2 Ti.
M-1337; 0.10 max C, 18.0 Cr, 11.0 Ni, 2.3 Mo, Ti, bal Fe.
Ann: 71,000-106,000 TS; 35,000 min YS; 40 min El; 130-190 Brin.
Austenitic, weldable, very good stainless properties.
For parts and welded assemblies in paper, textile and chemical industries.
DIN X10CrNiMoTi1810; Werkstoff Nr. 1.4571.

PLATE PAO 188/2 W.
M-1337; 0.07 max C, 18.0 Cr, 11.0 Ni, 2.3 Mo, bal Fe.
Ann. 71,000-100,000 TS; 28,000 min YS; 45 min El; 130-180 Brin.
Austenitic, very good stainless properties.
For parts and assemblies in paper, textile, and chemical industries.
DIN X5CrNiMo1810, Werkstoff Nr. 1.4401.

PLATE PCL.
M-1337, 1.05 C, Cr, bal Fe.
For bearings, cutters, liners; water hardened.

PLATE PFC 141
M-1337; 0.08 max C, 14.0 Cr, bal Fe
Ann. 71,000-92,000 TS, 43,000 YS; 20 min El, 140-180 Brin
Corrosion resistant steel, not hardenable by heat treatment, ferritic.
For structural parts, building fittings.
DIN X7Cr14, Werkstoff Nr. 1.4001

PLATE PFC 171
M-1337; 0.10 max C, 17.0 Cr, bal Fe
Ferritic corrosion resistant steel; not hardenable by heat treating
Ann 64,000-85,000 TS, 42,000 min YS; 20 min El, 130-170 Brin
For building fittings, corrosion resistant hardware, spoons
DIN X8Cr17, Werkstoff Nr 1.4016.

PLATE PFC 171 S
M-1337, 0.12 C, 17.0 Cr, 0.25 Mo, S, bal Fe.
Oil quenched 100,000-120,000 TS, 64,000 min YS, 12 min El, 190-235 Brin.
Ferritic, corrosion resistant steel, free machining grade
For machined parts as corrosion resistant screws, bolts, studs, nuts
DIN X12CrMoS17, Werkstoff Nr 1.4104.

PLATE PFMC 14
M-1337, 0.20 C, 13.0 Cr, bal Fe
Heat treated. 113,000-135,000 TS; 78,000 min YS, 5 min El, 225-275 Brin.
Martensitic corrosion resistant steel, oil hardenable to 40-48 Rock C.
High strength structural parts for pumps, impellers, turbine wheels.
DIN X20Cr13, Werkstoff Nr. 1.4021.

PLATE PGS 1.
M-1337; 0.15 C, 0.25 Si, 0.35 Mn, bal Fe.
For case hardening small parts of machines as levers, links, bolts, pins.
DIN C15W3.

PLATE PGS 4
M-1337; 0.45 C, 0.35 Si, 0.70 Mn, bal Fe.
Water hardening tool steel; for hammers, forks, axes, knives, shears, screw drivers.
DIN C45W3; Werkstoff Nr 1.1730.

PLATE PGS 6.
M-1337; 0.60 C, 0.35 Si, 0.70 Mn, bal Fe.
Water or oil hardening tool steel;
for shanks for tools, bars, needle beds, stone breakers hammers
DIN C60W3; Werkstoff Nr. 1.1740.

PLATE PLATIT 40.
M-1337; 1.0 C, 31.0 Cr, 14 W, 53 Co.
For parts for high temperature operation.

PLATE PLATIT EXTRA.
M-1337; 2.50 C, 33.0 Cr, 14.5 W, 48.0 Co.
For parts for high temperature operation.

PLATE PLATIT HH.
M-1337, 0.25 C, 27.0 Cr, 6.0 Mo, 55 Co, bal Fe.
For high temperature operations.

PLATE PM 512
M-1337; 0.37 C, 1.0 Si, 0.5 Mn, 5.3 Cr, 1.5 Mo, 0.2 V, 1.3 W, bal Fe
Hot work tool steel, air or oil hardening.
For forging and pressing dies,
ferrous and non-ferrous
DIN X37CrMoW51; Werkstoff Nr. 1.2606

PLATE PM 512 Co.
M-1337; 0.35 C, 0.7 Si, 0.4 Mn, 5.0 Cr, 1.6 Mo, 0.5 V, 2.0 W, bal Fe
Hot work tool steel, air or oil hardening

PLATE PM 524.
M-1337; 0.38 C, 1.0 Si, 0.4 Mn, 5.3 Cr, 1.4 Mo, 0.6 V, bal Fe.
Hot work tool steel, air or oil hardening
For pressure casting molds for light alloys.
DIN X38CrMoV51, Werkstoff Nr 1.2343.

PLATE PM 524 V.
M-1337, 0.40 C, 1.0 Si, 0.4 Mn, 5.3 Cr, 1.4 Mo, 1.2 V, bal Fe.
Hot work tool steel, air or oil hardening
Pressure casting molds for light alloys.
DIN X40CrMoV51; Werkstoff Nr. 1.2344

PLATE PM 1291.
M-1337, 0.30 C, 0.5 Si, 0.3 Mn, 12.0 Cr, 1.0 Mo, 0.5 V, 10.0 W, 1.5 Co, bal Fe.
Hot work tool steel, air or oil hardening.
For extrusion dies, die cast dies
Werkstoff Nr 1.2871

PLATE PMC 145.
M-1337, 0.40 C, 13.0 Cr, bal Fe.
Martensitic corrosion resistant steel
Air or oil hardenable to 45-55 Rc.
For shafts, spline shafts, impellers, turbine wheels, pump parts, cutlery.
DIN X40Cr13; Werkstoff Nr. 1.4034

PLATE PMC Ni 162.
M-1337; 0.22 C, 17.0 Cr, 2.0 Ni, bal Fe
Heat treated. 115,000-135,000 TS, 85,000 min YS; 4 min El, 225-275 Brin.
Corrosion resistant.
For structural parts requiring good strength and non-rusting properties
DIN X22CrNi17; Werkstoff Nr 1.4057.

PLATE PMCO 174.
M-1337; 0.38 C, 17.0 Cr, 1.20 Mo, 0.50 Ni, bal Fe.
Ht Tr. R.T.: 115,000-135,000 TS, 85,000 min YS; 14 min El; 225-275 Brin.
At 400°C: 71,000 min YS
Corrosion resistant, good temperature resistance.
For arbors, shafts, spindels,
bolts operating up to 400°C
DIN X35CrMo17; Werkstoff Nr. 1.4122.

PLATE PMCO 189.
M-1337; 0.90 C, 18.0 Cr, 1.20 Mo, V, bal Fe.
Martensitic, corrosion resistant, air or oil hardenable to 50-60 Rock C.
For valves, knives, cutlery, ball bearings and races, shafts, couplings, surgical instruments, dental tools.
DIN X90CrMoV18; Werkstoff Nr. 1.4112.

PLATE PMCO 1310.
M-1337; 1.05 C, 13.0 Cr, 0.50 Mo, bal Fe.
Martensitic, corrosion resistant steel.
Air or oil hardenable to 52-60 Rock C
For stainless ball bearings, valves, balls for ball point pens, cutlery, knife blades.
DIN X105CrMo13; Werkstoff Nr. 1.4108.

PLATE PN 24.
M-1337; 0.50 C, 0.25 Si, 0.90 Mn, 1.0 Cr, 0.10 V, bal Fe.
Oil hardening tool steel.
For cold punches.
DIN 50CrV4; Werkstoff Nr 1.2241

PLATE PP 32.
M-1337; 0.40 C, 0.3 Si, 1.5 Mn, 2.0 Cr, 0.2 Mo, bal Fe.
Hot work tool steel; air or oil hardening.
For drop forge hammer dies, can forming tools.
DIN 40CrMnMo7, Werkstoff Nr. 1.2311.

PLATE PP 36
M-1337; 0.48 C, 0.3 Si, 0.7 Mn, 1.5 Cr, 0.7 Mo, 0.3 V, bal Fe.
Hot work tool steel; oil hardening.
For punches, centrifugal casting molds.
DIN 48CrMoV67; Werkstoff Nr. 1.2323.

PLATE PP36J
M-1337; 0.45 C, 1.4 Cr, 0.7 Mo, 0.3 V, bal Fe
For gears, bolts, crankshafts, axles; oil hardened, tough.

PLATE PR97K
M-1337, 0.30 C, 1.1 Cr, 0.18 V, 3.75 W, 1 Si, bal Fe.
For upsetters, riveters, punches, crimpers, oil hardened, tough

PLATE PS 300.
M-1337, 0.50 C, 1.3 Si, 0.7 Mn, 14.0 Cr, 13.0 Ni, 1.2 V, 1.3 W, bal Fe.
Hot work tool steel, not heat treatable
For pressing dies of simple profile, Austenitic.
DIN X50NiCrWV1313, Werkstoff Nr. 1.2731

PLATE PU 27.
M-1337; 0.56 C, 0.30 Si, 0.70 Mn, 1.0 Cr, 0.50 Mo, 1.70 Ni, 0.10 V, bal Fe.
Oil hardening tool steel
For coining and stamping dies, large mandrels, cold headers, embossing tools
DIN 56NiCrMoV7, Werkstoff 1.2714.

PLATE PU 37.
M-1337, 0.55 C, 0.3 Si, 0.7 Mn, 1.0 Cr, 0.5 Mo, 1.7 Ni, 0.1 V, bal Fe
Hot work tool steel, oil or air hardening.
For drop forge hammer dies.
DIN 56NiCrMoV7; Werkstoff Nr. 1.2714.

PLATE PU 83
M-1337; 0.45 C, 0.2 Si, 0.5 Mn, 1.3 Cr, 0.5 Mo, 4.5 Ni, 0.2 V, 0.5 W, bal Fe.
Hot work tool steel; air or oil hardening.
For hot pressing tools with difficult gravures.
DIN X45NiCrMo4; Werkstoff Nr. 1.2767.

PLATE PV30.
M-1337; 0.56 C, 0.70 Cr, 0.18 Mo, 1.65 Ni, 0.1 V, bal Fe.
For gears, bolts, crankshafts; oil hardened, shock resistant.

PLATE PV36.
M-1337; 0.45 C, 0.70 Cr, 1.65 Ni, bal Fe.
For gears, bolts, crankshafts; oil hardened, shock resistant.

PLATE PVX 1212.
M-1337; 0.45 C, 0.6 Si, 0.6 Mn, 4.5 Cr, 0.8 Mo, 12.0 Ni, 1.2 V, 12.0 W, 0.5 Co, bal Fe.
Hot work tool steel, not heat treatable.
For high temperature pressing using light loads.

PLATE PW32
M-1337, 0.40 C, Cr, Mn, Mo, bal Fe.
For gears, bolts, machine tool parts; oil hardened, tough

PLATE PW 78
M-1337; 0.45 C, 0.6 Si, 0.7 Mn, 1.7 Cr, 0.6 Mo, 0.8 V, 0.8 W, bal Fe
Hot work tool steel; oil hardening.
Shear blades, pressing dies and punches
DIN 45CrVMoW58; Werkstoff Nr. 1.2603

PLATE PW83.
M-1337, 0.40 C, Ni, Cr, Mo, bal Fe.
For gears, bolts, machine tool parts; oil hardened, tough

PLATE PW 97
M-1337; 0.30 C, 1.0 Si, 0.4 Mn, 1.0 Cr, 0.2 V, 4.0 W, bal Fe
Hot work tool steel, oil or water hardening
Forming dies for non-ferrous production, cold headers for non-ferrous parts
DIN X30WCrV41, Werkstoff Nr. 1.2564

PLATE PW 100
M-1337, 0.30 C, 0.2 Si, 0.3 Mn, 2.4 Cr, 0.6 V, 4.3 W, bal Fe
Hot work tool steel, oil hardening
For pressure casting molds and dies for non-ferrous processing
DIN X30WCrV53, Werkstoff Nr 1.2567.

PLATE PW100 EXTRA
M-1337; 0.30 C, 2.65 Cr, 0.35 V, 8.5 W, bal Fe
For extrusion press rams and liners, punches; hot work steel, oil hardened.

PLATE PW 134
M-1337; 0.60 C, 0.3 Si, 0.3 Mn, 4.0 Cr, 0.9 Mo, 0.7 V, 9.0 W, bal Fe
Hot work tool steel, air or oil hardening
Tube pressing mandrels, hot work forming tools.
DIN X60WCrMoV94, Werkstoff Nr 1.2622.

PLATE PW 190
M-1337, 0.30 C, 0.2 Si, 0.3 Mn, 2.6 Cr, 0.4 V, 8.5 W, bal Fe.
Hot work tool steel; oil or air hardening.
Hot extrusion dies, pressure casting molds and dies for non-ferrous.
DIN X30WCrV93, Werkstoff Nr. 1.2581.

PLATE PZ 190
M-1337, 0.30 C, 0.2 Si, 0.3 Mn, 2.4 Cr, 0.3 V, 8.5 W, 2.0 Co, bal Fe
Hot work tool steel: oil or air hardening
Pressure casting molds for heavy metal
DIN Z30WCrCoV93; Werkstoff Nr. 1.2662.

PLATE PZ 194
M-1337, 0.32 C, 0.6 Si, 0.5 Mn, 2.3 Cr, 3.2 Mo, 0.5 V, 6.5 W, 4.5 Co, bal Fe.
Hot work tool steel; air or oil hardening.
Pressure casting molds, extrusion dies.
Werkstoff Nr. 1.2676.

PLATE SVX 33.
M-1337; 0.95 C, 4.0 Cr, 2.7 Mo, 2.4 V, 3.0 W, bal Fe.
For twist drills, milling cutters, broaches, band saws, hack saw blades.
High speed steel.
Werkstoff Nr 1.3333; DIN S3-3-2.

PLATE SVX 34.
M-1337; 0.85 C, 4.0 Cr, 0.9 Mo, 1.6 V, 9.0 W, bal Fe.
Milling cutters, twist drills and taps for working on soft materials.
High speed steel
Werkstoff Nr. 1.3316; DIN S9-1-2.

PLATE SVX 54.
M-1337; 0.85 C, 4.0 Cr, 0.9 Mo, 2.5 V, 12.0 W, bal Fe.
For lathe tools, milling knives, relieved cutters for working on hard materials.
High speed steel.
Werkstoff Nr. 1.3318; DIN S12-1-2.

PLATE SVX 90.
M-1337; 1.25 C, 4.2 Cr, 0.9 Mo, 3.8 V, 12.0 W, bal Fe
For finishing and milling tools, pinion type cutters, steel shapes, broaches.
High speed steel
Werkstoff Nr 1.3302, DIN S12-1-4.

PLATE SVX 360
M-1337, 0.75 C, 4.0 Cr, 0.5 Mo, 1.1 V, 18.0 W, bal Fe
For twist drills, threading tools, milling cutters, gear shapers
High speed steel
Werkstoff Nr. 1.3355, DIN S18-0-1.

PLATE SVX 526
M-1337, 0.85 C, 4.2 Cr, 5.0 Mo, 2.0 V, 6.3 W, bal Fe
For twist drills, broaches, milling cutters, segments for circular saws, lathe tools for roughing cuts.
High speed steel
Werkstoff Nr. 1.3343, DIN S6-5-2

PLATE SVX 536
M-1337, 1.20 C, 4.2 Cr, 5.0 Mo, 3.3 V, 6.3 W, bal Fe
For heavy duty milling cutters, highly stressed broaches, reamers
High speed steel
Werkstoff Nr. 1.3344, DIN S6-5-3.

PLATE SVX 811.
M-1337, 0.82 C, 3.8 Cr, 8.6 Mo, 1.2 V, 1.8 W, bal Fe
For twist drills, reamers, milling cutters, threading tools and taps
High speed steel
Werkstoff Nr 1.3346; DIN S2-9-1.

PLATE SVZ 203
M-1337, 0.83 C, 4.2 Cr, 0.9 Mo, 1.9 V, 12.0 W, 2.8 Co, bal Fe.
For lathe tools and milling cutters, good retention of hardness
High speed steel
Werkstoff Nr. 1.3211; DIN S12-1-2-3.

PLATE SVZ 210.
M-1337; 1.25 C, 4.2 Cr, 3.8 Mo, 3.3 V, 10.5 W, 10.5 Co, bal Fe.
For lathe tools, form tools at high speeds or on tough austenitic steels.
High speed steel, good red hardness
Werkstoff Nr. 1.3207, DIN S10-4-3-10.

PLATE SVZ 245.
M-1337; 1.30 C, 4.2 Cr, 0.9 Mo, 3.8 V, 12.0 W, 4.8 Co, bal Fe.
For finishing and roughing cutting tools for best wear characteristics. High speed steel.
Werkstoff Nr. 1.3202; DIN S12-1-4-5.

PLATE SVZ 365.
M-1337; 0.80 C, 4.2 Cr, 0.7 Mo, 1.6 V, 18.0 W, 4.8 Co, bal Fe.
Lathe and planing tools with eminent cutting strength and toughness.
High speed steel
Werkstoff Nr. 1.3255; DIN S18-1-2-5.

PLATE SVZ 410.
M-1337; 0.76 C, 4.2 Cr, 0.7 Mo, 1.6 V, 18.0 W, 9.5 Co, bal Fe.
Lathe and planing tools for heavy work requiring good red hardness, and for machining austenitic steels.
High speed steel.
Werkstoff Nr. 1.3265; DIN S18-1-2-10.

PLATE SVZ 526 Co
M-1337; 0.82 C, 4.2 Cr, 5.0 Mo, 2.0 V, 6.3 W, 4.8 Co, bal Fe
For lathe tools, drills, milling cutters for tough austenitic steels.
High speed steel, good red hardness.
Werkstoff Nr 1.3243; DIN S6-5-2-5

PLATE TV27.
M-1337; 0.31 C, 2.35 Cr, 0.18 Mo, 0.13 V, bal Fe.
For die casting and plastic mold dies; oil hardened, tough

PLATE UP24
M-1337, 0.45 C, Si, Cr, V, bal Fe.
For springs, gears, bolts, punches, crankshafts; oil hardened, shock resistant.

PLATE US Mo
M-1337, 0.30 C, 0.3 Si, 0.3 Mn, 3.0 Cr, 2.8 Mo, 0.5 V, bal Fe.
Hot work tool steel, oil hardening
Pressure casting molds for heavy metal alloy, pressing dies
DIN X32CrMoV33, Werkstoff Nr. 1.2365

PLATE US Mo Co.
M-1337; 0.30 C, 0.3 Si, 0.4 Mn, 2.8 Cr, 2.7 Mo, 0.5 V, 3.0 Co, bal Fe.
Hot work tool steel, air or oil hardening

PLATE US Mo K.
M-1337, 0.30 C, 0.2 Si, 0.4 Mn, 2.8 Cr, 2.8 Mo, 0.5 V, bal Fe
Hot work tool steel, oil or air hardening
For pressure casting molds, pressing dies.
DIN X32CrMoV33, Werkstoff Nr. 1.2365.

PLATE UW280
M-1337, 0.20 C, 13 Cr, 0.30 Mn, bal Fe.
Annealed 95,000 TS, 50,000 YS, 25 El; 55 RA; 196 Brin
For turbine blades, valves, cutlery, surgical instruments, Type 420, stainless.

PLATE WCN.
M-1337, 0.50 C, Ni, Cr, bal Fe
For gears, bolts, machine tool parts, shafts; oil hardened, shock resistant.

PLATE WKL.
M-1337; 0.56 C, Ni, Cr, Mo, V, bal Fe.
For forging and heading dies, punches; oil hardened, shock resistant.

PLATE WL30.
M-1337, 0.53 C, 0.90 Si, 0.90 Mn, bal Fe.
For chisels, pneumatic tools, punches; oil hardened, tough.

PLATE WP32.
M-1337; 0.40 C, Cr, Mn, Mo, bal Fe.
For gears, bolts, machine tool parts; oil hardened, tough.

PLATE WV 27.
M-1337; 0.55 C, 0.30 Si, 0.60 Mn, 0.70 Cr, 0.30 Mo, 1 70 Ni, 0 10 V, bal Fe.
Oil hardening tool steel, for hot work.
For coining dies, embossing tools, counterbores, large mandrels.
DIN 55NiCrMoV6; Werkstoff Nr. 1.2713.

PLATE WV30.
M-1337, 0.55 C, 0.70 Cr, 0.18 Mo, 1.65 Ni, 0.10 V, bal Fe.
For die casting and plastic mold dies; oil hardened, tough.

PLATE ZM13.
M-1337; 0.90 C, 0.80 Cr, 0.30 Mn, 0.25 Si, bal Fe.
For bearings, cutters, sleeves, liners; water hardened, wear resistant.

PLATE ZM 14.
M-1337; 1 40 C, 0 30 Si, 0.30 Mn, 0 35 Cr, 0 10 V, bal Fe.
Water hardening tool steel .
For punches, cold drawing dies, cutting tools that operate cold, bearings
DIN 140CrV1; Werkstoff Nr. 1.2206.

PLATE ZW 100.
M-1337; 1.30 C, 0.25 Si, 0 30 Mn, 0.30 Cr, 5.0 W, bal Fe.
Water or oil hardening tool steel.
For drawing dies, highly stressed cold forming dies.
DIN X130W5; Werkstoff Nr. 1.2453.

PLATIKUT
M-357; 0.20 C, 0 8 Mn, 0.55 Ni, 0.50 Cr, 0 20 Mo, bal Fe
150 Brin
For molds, dies; for plastic industry.

PLATINA, BIRMINGHAM.
Eng.; 46.6 Cu, 53 15 Zn, 0.25 Fe.
For hardware, ornaments; corrosion resistant

PLATINA, BIRMINGHAM.
Eng ; 20.25 Cu, 79 4 Zn, 0.33 Fe.
For hardware, ornaments.

PLATINA, PLATING.
Eng ; 46 5 Cu, 53 5 Sn.
For hardware, ornaments

PLATINAX-II
M-200, 23.3 Co, bal Pt.
6400 Br, 9 2 BH max
For permanent magnets, metering devices.
Can be machined, rolled and drawn.
Outstanding magnetic properties obtained by a 2 stage heat treatment.
Corrosion resistant to H_2SO_4 and HNO_3.

PLATINE.
Eng , 57 Zn, 43 Cu.
For ornaments, weak and brittle.

PLATINE-AU-TITRE (PROPLATINUM).
French; 83-65 Ag, 17-35 Pt.
For substitute for platinum; corrosion resistant.

PLATINEL 1503.
M-686; 65 Au, 35 Pd.
For high temperature thermocouples.
Negative leg.

PLATINEL 1786.
M-686; 3 Au, 83 Pd, bal Pt.
For high temperature thermocouples.
Positive leg.

PLATINEL 1813.
M-687; 55 Pd, 31 Pt, 14 Au.
For high temperature thermocouples.

PLATINIRIDIUM
French, 55 Pt, 28 Ir, 7 Rh, 3 Cu, 4 Fe, traces Pd + As.
For pen nibs, ornamental parts; mined in Russia.

PLATINIT.
Eng.; 46 Ni, bal Fe.
For chemical apparatus, corrosion resistant.

PLATINITE.
M-104; 0.15 C, 49 Ni, bal Fe.
Annealed. 78,000-90,000 TS; 48,000-60,000 YS; 45-30 El.
To replace Pt in electric light bulbs; heat resistant; coef. exp of glass.

PLATINITE + Cr.
M-771; 0.15 C, 49 Ni, Cr, bal Fe.
For glass-to-metal seals
Stepped expansion.

PLATINOID.
50-90 Cu, 3-40 Ni, 0-10 Al, 0-40 Zn.
For chemical equipment and construction; corrosion resistant

PLATINOID A.
Eng., 60 Cu, 24 Zn, 14 Ni, 2 W.
57,000 TS; 33 El
High resistance alloy, heating elements, thermocouples; Tungsten, German Silver

PLATINOID B
Eng , 54 Cu, 20 Zn, 25 Ni, W, 0 5 Fe, 0.2 Mn
72,000 TS; 30 El; 89 Brin.
For high resistance alloys, heating elements, thermocouples; Tungsten, German Silver.

PLATINOR.
45 Cu, 18 Pt, 18 brass, 9 Ag, 9 Ni.
For cheap jewelry, ornaments, corrosion resistant.

PLATINUM ALLOY
2-5 parts Ag, 1 part Pt, 0-1 part Cu
For ornaments, jewelry, corrosion resistant

PLATINUM ALLOY NO 479.
M-1295, 92 Pt, 8 W.
Cold drawn 300,000 TS
For potentiometers, variable resistors, high electrical and heat resistance.

PLATINUM ALLOY NO 851
M-1295, 79 Pt, 15 Rh, 5 Ru.
Cold drawn 300,000 TS.
For potentiometers, variable resistors, high electrical and heat resistance.

PLATINUM GOLD-1
70 Au, 30 Pt.
For ornaments, jewelry; white, corrosion resistant

PLATINUM GOLD-2.
58 Pt, 25 Ag, 17 Au
For jewelry; corrosion resistant.

PLATINUM GOLD-3.
60 Au, 40 Pt.
For jewelry; corrosion resistant.

PLATINUM IRIDIUM-1.
5.0 Ir, 95 Pt
170 Brin.
For Jewelry, corrosion resistant.

PLATINUM IRIDIUM-2
30 Ir, 70 Pt.
400 Brin.
For surgical instruments; corrosion resistant.

PLATINUM LEAD (BIRMINGHAM PLATINUM).
79-53 Zn, 20-47 Cu, 0.3 Fe.
For ornamental parts; castings.

PLATINUM RHODIUM.
100-80 Pt, 0-20 Rh.
For thermocouples; heat resistant.

PLATINUM SILVER.
66.7 Ag, 33.3 Pt.
For ornaments, jewelry; corrosion resistant.

PLATINUM SOLDER.
73 Ag, 27 Pt.
For solder for platinum alloys, corrosion resistant.

PLATINUM SUBSTITUTE.
23.6-24.0 Al, 3.7 Bi, 0.7 Au, 72 Ni.
For ornamental white metal parts; corrosion resistant.

PLATINUM SUBSTITUTE COOPERS-1
70 Ag, 25 Pd, 5 Co.
For jewelry; corrosion resistant.

PLATINUM SUBSTITUTE COOPERS-2.
70 Ag, 25 Pt, 5 Ni.
For jewelry, corrosion resistant.

PLATINUM SUBSTITUTE ELECTRICAL-1.
70 Au, 25 Ag, 5 Ni or Pt
For electrical contacts; heat resistant.

PLATINUM SUBSTITUTE ELECTRICAL-2.
68 Au, 25 Ag, 7.5 Pt.
For electrical contacts; heat resistant.

PLATNAM
M-995; 54 Ni, 33 Cu, 13 Sn, 0.5 Fe, 0.3 Al.
For steam valves up to 600°C, valve disks and seats, heat resisting, abrasion and erosion resistant.

PLATNIK.
Pt-Ni
For ornaments, jewelry, corrosion resistant.

PLETTENBERG CMV
M-1344, 0.45 C, Ni, Cr, W, bal Fe
For forging dies, upsetters, header dies, oil hardened, tough.

PLETTENBERG EXTRA MH.
M-1344; 1.1 C, 0.25 max Si, 0.25 max Mn, bal Fe.
Annealed: 110,000 TS; 58,000 YS; 18 El; 38 RA; 210 Brin.
For springs, tools, drills, taps, reamers; Type W1; water hardened

PLETTENBERG EXTRA WEICH.
M-1344; 0.70 C, 0.25 max Si, 0.25 max Mn, bal Fe.
Heat treated: 175,000 TS; 128,000 YS; 12 El; 37 RA; 355 Brin
For springs, rails, punches, axes, tools, Type W1; water hardened.

PLETTENBERG EXTRA ZAH.
M-1344; 0.85 C, 0.25 max Si, 0.25 max Mn, bal Fe.
Heat treated: 190,000 TS; 145,000 YS; 10 El; 30 RA; 400 Brin.
For springs, tools, cutters, taps, drills; Type W1; water hardened.

PLETTENBERG EXTRA ZH.
M-1344; 1.0 C, 0.25 max Si, 0.25 max Mn, bal Fe
Annealed: 100,000 TS; 53,000 YS, 21 El; 42 RA; 200 Brin.
For springs, drills, taps, hobs, reamers; Type W1; water hardened.

PLETTENBERG GC.
M-1344; 0.40 C, Cr, Mn, Mo, bal Fe.
For gears, bolts, machine tool parts; oil hardened, shock resistant.

PLETTENBERG GCN1.
M-1344; 0.55 C, 0.7 Cr, 0.18 Mo, 1.65 Ni, 0.1 V, bal Fe.
For springs, gears, crankshafts, bolts, studs; oil hardened, shock resistant.

PLETTENBERG GCN2.
M-1344; 0.56 C, Ni, Cr, Mo, V, bal Fe.
For gears, bolts, crankshafts; oil hardened, shock resistant.

PLETTENBERG GMS.
M-1344; 0.53 C, 0.90 Si, 0.90 Mn, bal Fe.
For upsetters, punches, crimpers, water hardened.

PLETTENBERG HW.
M-1344; 0.67 C, 1.3 Si, 0.5 Mn, 0.5 Cr, bal Fe
For upsetters, punches, die blocks; oil hardened, tough.

PLETTENBERG KCr2
M-1344; 0.20 C, 1.25 Mn, 1.15 Cr, bal Fe.
For cams, bolts, camshafts; case hardened.

PLETTENBERG KCr13
M-1344; 0.40 C, 13 Cr, 0.3 Mn, bal Fe.
Annealed: 100,000 TS; 55,000 YS, 20 El; 50 RA; 200 Brin
For valves, cutlery, surgical and dental instruments; Type 420, stainless

PLETTENBERG KL.
M-1344, 0.55 C, 0.9 Si, 1.05 Cr, 0.18 V, 1.85 W, bal Fe.
For header dies, forging dies; oil hardened, tough.

PLETTENBERG KLV.
M-1344, 0.61 C, 0.85 Si, 0.75 Mn, 1.18 Cr, 0.1 V, bal Fe
For crankshafts, header dies, punches; oil hardened

PLETTENBERG KS
M-1344, 0.45 C, W, Cr, V, bal Fe
For forging and header dies, upsetters, oil hardened, tough

PLETTENBERG LC13.
M-1344, 2.1 C, 11.5 Cr, 0.30 Mn, bal Fe.
For blanking and forming dies, punches; oil hardened, nondeforming.

PLETTENBERG LC13S.
M-1344, 1.65 C, 11.5 Cr, 0.1 V, 0.30 Mn, bal Fe.
For blanking and forming dies, punches; air hardened, nondeforming

PLETTENBERG LC13SK
M-1344; 1.65 C, 11.5 Cr, Co, 0.30 Mn, bal Fe.
For blanking and forming dies, punches; air hardened, nondeforming

PLETTENBERG LC13W.
M-1344; 2.1 C, 11.5 Cr, 0.70 W, 0.30 Mn, bal Fe.
For blanking and piercing dies, punches; oil hardened, nondeforming

PLETTENBERG Mo6.
M-1344, 0.85 C, W, Mo, bal Fe
For cutters, tools, dies, oil hardened.

PLETTENBERG Mo10.
M-1344, 0.80 C, Cr, Mo, W, V, bal Fe.
For cutters, tools, dies, oil hardened.

PLETTENBERG PCr1.
M-1344; 0.45 C, 0.7 Mo, 0.3 V, 1.4 Cr, bal Fe.
For forging dies, headers, upsetters; oil hardened, tough.

PLETTENBERG PCr2.
M 1344; 0.90 C, 0.8 Cr, 0.30 Mn, bal Fe.
For bearings, cutters, bushings, liners, races; water or oil hardened.

PLETTENBERG PD.
M-1344; 0.35 C, 0.9 Si, 1.05 Cr, 0.18 V, 1.85 W, bal Fe.
For heading and forging dies, punches, upsetters; oil hardened, tough.

PLETTENBERG PF.
M-1344; 0.70 C, 1.7 Si, 0.70 Mn, bal Fe.
For springs, punches; oil hardened, tough

PLETTENBERG PG.
M-1344; 0.15 C, 0.35 Si, 0.35 Mn, bal Fe.
Annealed: 70,000 TS; 55,000 YS; 25 El; 60 RA; 145 Brin
For screws, bolts, gears, machine tool parts; case hardened.

PLETTENBERG PG65
M-1344; 0.45 C, 0.25-0.50 Si, 0.30-0.80 Mn, bal Fe
Hot rolled: 98,000 TS, 59,000 YS; 24 El, 45 RA; 212 Brin
For axles, gears, bolts, tie rods, crankshafts; water hardened.

PLETTENBERG PG85.
M-1344; 0.60 C, 0.25-0.50 Si 0.30-0.80 Mn, bal Fe.
Heat treated. 160,000-115,000 TS, 113,000-77,000 YS; 12-23 El; 40-54 RA, 320-230 Brin
For wheels, die blocks, girders, tie rods, springs; water hardened.

PLETTENBERG PG90.
M-1344; 0.67 C, 0.25-0.50 Si, 0.30-0.80 Mn, bal Fe
Heat treated: 174,000-122,000 TS, 128,000-82,000 YS, 12-22 El, 37-52 RA, 352-240 Brin.
For springs, clutch discs, die blocks, girders, rails; water hardened

PLETTENBERG PG95
M-1344, 0.75 C, 0.25-0.50 Si, 0.30-0.80 Mn, bal Fe
Heat treated: 180,000-125,000 TS, 130,000-85,000 YS; 10-20 El, 35-50 RA; 360-245 Brin
For springs, clutch discs, die blocks, rails, water hardened.

PLETTENBERG PG100
M-1344, 0.90 C, 0.25-0.50 Si, 0.30-0.80 Mn, bal Fe
Heat treated 180,000-130,000 TS, 120,000-80,000 YS, 10-20 El, 30-47 RA, 375-270 Brin.
For drills, hobs, taps, springs, reamers, water hardened, Type W1.

PLETTENBERG PN.
M-1344; 0.50 C, 1.05 Cr, 3.25 Ni, 0.50 Mn, bal Fe.
For gears, bolts, crankshafts, oil hardened, shock resistant

PLETTENBERG PRIMA-MH
M-1346, 1.15 C, 0.25 max Si, 0.25 max Mn, bal Fe.
Annealed: 110,000 TS, 58,000 YS; 18 El; 38 RA; 210 Brin.
For springs, taps, reamers, drills, hobs; Type W1; water hardened.

PLETTENBERG PRIMA WEICH
M-1344; 0.70 C, 0.25 max Si, 0.25 max Mn, bal Fe
Heat treated: 174,000-122,000 TS; 128,000-82,000 YS; 12-22 El; 37-52 RA, 350-240 Brin
For wheels, die blocks, girders, springers, Type W1; water hardened.

PLETTENBERG PRIMA ZAH
M-1344; 0.85 C, 0.25 max Si, 0.25 max Mn, bal Fe.
Heat treated: 188,000-129,000 TS; 143,000-87,000 YS; 12-21 El; 35-50 RA; 388-235 Brin.
For springs, taps, reamers, drills, cutters; Type W1; water hardened.

PLETTENBERG PRIMA-ZH.
M-1346; 1.0 C, 0.25 max Si, 0.25 max Mn, bal Fe.
Heat treated: 200,000 TS, 150,000 YS; 8 El; 28 RA; 410 Brin.
For springs, taps, reamers, drills, hobs; Type W1; water hardened.

PLETTENBERG RAPID EXTRA III
M-1344; 0.95 C, W, Mo, bal Fe.
For cutters, dies, tools; oil hardened.

PLETTENBERG S111.
M-1344; 1.05 C, 1.0 Cr, 1.15 W, 0.90 Mn, bal Fe.
For heading dies, drawing and forming dies; oil hardened, tough

PLETTENBERG S113.
M-1344; 1.45 C, 1.4 Cr, 0.60 Mn, bal Fe
For blanking and forming dies, bearings, oil hardened, abrasion and wear resistant

PLETTENBERG SK
M-1344; 1.0 C, 0.1 V, 0.30 Mn, bal Fe.
For blanking and forming dies, reamers; Type W2; water hardened

PLETTENBERG SP.
M-1344; 0.45 C, Si, Cr, V, bal Fe
For gears, bolts, crankshafts, oil hardened, shock resistant

PLETTENBERG SP35
M-1344, 0.38 C, Si, Cr, V, bal Fe
For gears, bolts, crankshafts, oil hardened, shock resistant

PLETTENBERG SVM2
M-1344, 0.90 C, 1.9 Mn, 0.10 V, bal Fe
For punches, shears, blanking and forming dies, oil hardened, non-deforming

PLETTENBERG WCR13
M-1344, 0.20 C, 13 Cr, 0.30 Mn, bal Fe
Annealed 95,000 TS, 50,000 YS, 25 El, 55 RA, 195 Brin
For valves, cutlery, surgical and dental instruments, Type 420; stainless

PLETTENBERG WP5
M-1344, 0.30 C, 2.35 Cr, 0.6 V, 4.25 W, bal Fe
For shear blades, upsetters, forging dies, hot work steel, oil hardened.

PLETTENBERG WP9
M-1344, 0.30 C, 2.65 Cr, 0.35 V, 8.5 W, bal Fe
For extrusion rams and liners, shears, punches; hot work steel, oil hardened

PLETTENBERG WPK
M-1344, 0.30 C, 2 Co, 2.4 Cr, 0.25 V, 8.5 W, bal Fe
For extrusion rams and liners, punches, hot work steel, oil hardened

PLETTENBERG WP SPEZIAL EXTRA.
M-1344, 0.30 C, 1.1 Cr, 0.18 V, 3.75 W, bal Fe.
For forging and heading dies, upsetters, shears, hot work steel, oil hardened

PLETTENBERG WPV.
M-1344, 0.65 C, 3.75 Cr, 0.85 Mo, 0.70 V, 8.5 W, bal Fe
For shear blades, cutters, upsetters; oil hardened, hot work steel.

PLOWFACE.
M-712; 4.5 C, 6.5 Mn, 2 Si, 30 Cr, bal Fe. 550 Brin.,
For hard surfacing electrodes; abrasion and impact resistant.

PLOW STEEL.
0.6-0.9 C, bal Fe.
For plow shares, blacksmith tools;
water hardening.

PLUMBERS SOLDER
67 Pb, 33 Sn.
For solder, soft solder.

PLUMBERS WHITE NO 1
54 Cu, 27 Zn, 17 Ni, 2 Pb.
For plumbing fixtures; free-cutting.

PLUMBERS WHITE NO. 2.
54 Cu, 25 Zn, 13 Ni, 7 Pb, 1 Sn.
For faucets, cocks; free-cutting.

PLUMBERS WHITE NO 3.
58 Cu, 25 Zn, 15 Ni, 1 Pb, 1 Fe, 0.3 Mn.
For faucets, cocks, corrosion resistant

PLUMBIC BRONZE.
England, 26 Pb, 1.7 Mn, 1.5 Sn, 1.2 Fe, bal Cu
For bearings, bushings, heavy duty.

PLUMBITE
M-123, Pb, Sn, Sb.
Used in slow running and light weight machines;
free flowing, durable plastic.

PLUMBSOL
M-200; Ag, Sn
Cast 3350 TS, 60 El.
For soft solder for plumbing installations,
M P 221-225°C.

PLUMRITE NO 67
M-141; 67 Cu, 32.5 Zn, 0.5 Pb
For water pipes, plumbing, free-cutting

PLUMRITE 85
M 141, 85 Cu, 15 Zn
Annealed 45,000 TS, 45 El
For water pipes, plumbing; red brass

PLUMRITE COPPER
M-141, 99.9 Cu
Annealed 30,000 TS, 40 El
Drawn 48,000 TS; 4 El
For piping, water tube, corrosion resistant

PLUMRITE STANDARD 85
M-141; 85 Cu, 15 Zn
Hard 70,000 TS, 57,000 YS; 5 El
Soft 40,000 TS, 12,000 YS, 47 El
For flexible hose, deep drawn parts,
corrosion resistant

PLURALLOY 70.
M-849, 0.06-0.10 C, 0.6-0.8 Mn, bal Fe
Welded 75,000 TS, 64,000 YS, 31 El, 137 Brin.
For welding electrodes, AWS-F6015,
shielded arc, low hydrogen

PLURALLOY 100.
M-849, 0.06-0.10 C, 0.6-0.8 Mn, 0.7-0.9 Mo, bal Fe.
Welded· 95,000 TS, 83,000 YS, 27 El; 197 Brin.
For welding electrodes, AWS-E9015, shielded arc.

PLURALLOY 120.
M-849; 0.06-0.10 C, 0.6-0.8 Mn, 0.2-0.4 Mo,
1.75-2.25 Ni, 0.1-0.2 V, bal Fe.
Welded. 110,000 TS, 106,000 YS, 22 El; 220 Brin.
For welding electrodes; shielded arc.

PLUTAIR-675.
M-1410; 0.50 C, 7.5 Cr, 0.5 Mo, 1.3 Si, 0.45 Mn,
bal Fe.
For hot shears, die holders, hot dies;
air hardened.

PLUTEOUS 1000.
M-1410; 0.1 C, Cr, bal Fe.
Heat treated· 78,500-101,000 TS, 67,000-89,600 YS;
25 El; 65 RA.
For aircraft parts, fittings, pump rods,
plastic mold dies; martensitic,
corrosion and heat resistant.

PLUTEOUS 1001.
M-1410; med C, Cr, bal Fe.
Heat treated: 103,000-116,500 TS;
78,500-101,000 YS; 20 El; 55 RA.
For ball and roller bearings, needles, springs, valves;
martensitic, stainless.

PLUTEOUS 1001/31 C
M-1410; medium C, Cr, S, bal Fe.
For oil pump and valve parts,
free-cutting, stainless, martensitic

PLUTEOUS 1003
M-1410, C, 18 Cr, 8 Ni, bal Fe.
Annealed. 78,400-94,000 TS, 30-50 El, 60 RA.
For chemical and textile equipment, marine parts;
stainless, austenitic.

PLUTEOUS 1009
M-1410; C, 16 Cr, 2 Ni, bal Fe.
Heat treated· 123,000 TS, 96,300-114,200 YS,
20 El, 40-60 RA
For aircraft parts, fittings, pump shafts, valves;
martensitic, stainless.

PLUTO
M-616; 0.7 C, 19 W, 4 Cr, 2 V, bal Fe
For cutters, tools, high speed steel.

PLUTOCRAT
M-1410; 0.8 C, 4.5 Cr, 1 V, 22 W, bal Fe.
For milling cutters, drills, reamers, boring tools;
high speed steel.

PLUTO G
M-616, 0.7 C, 18 W, 4 Cr, 1 V, bal Fe
For lathe cutters, drills, hobs, reamers,
Type T1, high speed steel

PLUTO G
M-1308, 0.74 C, 4.1 Cr, 1.1 V, 18.5 W, bal Fe.
For lathe and planer tools, reamers, broaches, taps,
high speed steel

PLUTOIL 704
M-1410, 0.90 C, 1.5 Mn, 0.5 Cr, bal Fe
For shearing and trimming dies, gages,
oil hardened, non deforming

PLUTOIL 708
M-1410, 0.90 C, 1.5 Mn, 0.5 Cr, bal Fe
For forming, punching, and trimming dies,
thread gages, oil hardened, non-deforming

PLUTOIL 720
M-1410, 1.0 C, 0.5 Mn, 1.5 Cr, bal Fe
For collets, taps, drills, broaches, chasers;
oil hardened, abrasion resistant.

PLUTOIL 723.
M 1410, 1.0 C, 0.5 Mn, 1.5 Cr, bal Fe
For collets, taps, drills, cams, broaches;
oil hardened, abrasion resistant

PLUTONIC-12S
M-1410; 0.30 C, 8.5 W, 4 Cr, 0.30 Mn, bal Fe.
For Al die casting dies, resists heat checking.

PLUTONIC-151.
M-1410; 0.15 C, 0.60 Mn, bal Fe
For hobbed plastic molds, case hardened.

PLUTONIC-153
M-1410, 0.12 C, 0.45 Mn, 3 Ni, bal Fe.
For collets, gears, fasteners;
case hardened, shock resistant.

PLUTONIC-155.
M-1410; 0.15 C, 0.45 Mn, 1 Cr, 3 Ni, bal Fe.
For gears, pinions, camshafts, cams; case hardened, shock resistant.

PLUTONIC-157.
M-1410; 0.15 C, 1.2 Cr, 4.25 Ni, bal Fe.
For gears, pinions, camshafts, cams; case hardened, shock resistant.

PLUTONIC-163.
M-1410; 0.15 C, 0.80 Ni, 0.10 Mo, 0.60 Cr, 0.80 Mn, bal Fe.
For gears, pinions, camshafts, cams, case hardened, shock resistant.

PLUTONIC-164.
M-1410; 0.20 C, 0 80 Cr, 1 Ni, 0 10 Mo, bal Fe.
For gears, pinions, camshafts, cams, bolts; case hardened, shock resistant.

PLUTONIC-165.
M-1410; 0.20 C, 1.25 Ni, 0.12 Mo, 0.75 Mn, bal Fe.
For gears, pinions, camshafts, cams; case hardened, shock resistant.

PLUTONIC-167.
M-1410; 0.20 C, 1.6 Cr, 2 Ni, 0.20 Mo, 0 55 Mn, bal Fe.
For gears, pinions, camshafts, cams; case hardened, shock resistant.

PLUTONIC-280.
M-1410; 0 60 C, 0.60 Mn, 0 60 Cr, bal Fe
For hot punches and forging dies, caulking tools; oil hardened, tough.

PLUTONIC-451.
M-1410; 0.30 C, 0.25 Cr, 3 Ni, 0.55 Mn, bal Fe.
For die casting dies; oil hardened.

PLUTONIC 552
M-1410; 0.28 C, 1.75 Cr, 4.25 Ni, 0.30 Mo, 0.3 Si, bal Fe.
For cam blocks, bolsters, punches, shear blades; oil hardened, hot work steel.

PLUTONIC-553
M-1410; 0.40 C, 0.60 Mn, 1.1 Cr, 1.5 Ni, 0.3 Mo, bal Fe.
For mandrels, gears, bolts, crankshafts; oil hardened, shock resistant.

PLUTONIC-558.
M-1410; 0.30 C, 0.60 Mn, 0.60 Cr, 2.5 Ni, 0 60 Mo, bal Fe.
For mandrel bars; oil hardened, tough.

PLUTONIC-564.
M-1410; 0.30 C, 0.6 Mn, 0.75 Cr, 3 Ni, bal Fe.
For punches, dies, collets, plastic molds; oil hardened, shock resistant.

PLUTONIC-601.
M-1410; 0.4 C, 0.65 Mn, 1.25 Cr, 0.15 V, bal Fe.
For die casting and permanent mold dies; oil hardened.

PLUTONIC-602.
M-1410; 0.4 C, 1 Cr, 0.20 Mo, 0.65 Mn, bal Fe.
For die casting and permanent mold dies; oil hardened.

PLUTONIC-606.
M-1410; 1.25 C, 0.5 Cr, 1.5 W, bal Fe.
For draw bench dies, taps; water hardened, tough.

PLUTONIC-609.
M-1410; 0.40 C, 0.8 Mn, 1 Cr, bal Fe.
For hot and cold tube mandrels; oil hardened.

PLUTONIC-1000.
M-1410; 0 12 C, 1 Mn, 13 Cr, 1 Ni, 1 Si, bal Fe.
For plastic mold dies; corrosion resistant.

PLUTONIC-1001.
M-1410; 0.21 C, 1 Mn, 13 Cr, 1 Ni, 1 Si, bal Fe.
For plastic mold dies; corrosion resistant.

PLUTONON 272
M-1410; 0.37 C, 0.80 Cr, 0 75 Mo, 0.25 Si, bal Fe.
For chipping chisels, drills, plow teeth; water hardened, non-tempering.

PLUTO PARAMOUNT.
M-1410, 0.80 C, 5 Cr, 1.5 V, 21 W, 0.65 Mo, 10-12 Co, bal Fe.
For cutting tools for fine finishing; high speed steel.

PLUTO PERFECTUM
M-1410; 0.85 C, 5 Cr, 18 W, 5-6 Co, bal Fe.
For milling cutters, lathe and planer tools; high speed steel.

PLYKROME
M-72; M-318; composite steel plus welded stainless surface high Cr, high Ni ferrous alloy.
For stainless steel parts, tanks, vessels; stainless steel sheet welded onto steel surface.

PLYMITE
M-193; W alloy.
For wear resistant parts.

PM-20.
M-884, 0 05 C, 0.9 Mn, 3 Ni, 0.7 Cu, 0 18 Mo, bal Fe
Rolled: 85,000-95,000 TS; 57,000-68,000 YS; 18 El
For automotive and railway bodies; good workability.

P M G NO 1.
M-319, 1-3 Si, bal Cu
Cast· 53,000 TS; 18,000 YS; 15 El; 115 Brin
For tanks, pressure vessels, fire extinguishers, corrosion resistant

PMG NO 3
M-319, 98 2 Cu, 1 2 Si, 0 6 Fe.
For screws, rivets, bolts, nails; corrosion resistant.

P M.G. NO 4
M-319, 1-3 Si, bal Cu
Cast 50,000 TS; 16,000 YS, 30 El; 90 Brin.
For marine hardware, tanks, pressure vessels; corrosion resistant.

P.M.G NO 6
M-319, 1-3 Si, bal Cu
Cast 40,000 TS; 13,000 YS; 50 El; 80 Brin.
For fire extinguishers, marine hardware; corrosion resistant

PMG NO. 10.
M-319; 95.6 Cu, 3.2 Si, 1 2 Fe
For tanks, vats, pump rods, pistons; corrosion resistant.

P.M.G NO. 13.
M-319; 1-3 Si, bal Cu
Cast: 50,000 TS; 23,000 YS; 10 El; 116 Brin.
For pressure vessels, tanks, marine construction; corrosion resistant.

P.M.G. NO. 14.
M-319; 1-3 Si, bal Cu.
Cast: 45,000 TS; 40,000 YS; 1 El; 150 Brin.
For marine hardware, pressure vessels, fasteners; corrosion resistant.

PMG NO. 95.
M-319; 96.6 Cu, 0.4 Pb, 2.5 Si, 0.5 Fe.
For screw machine products; tough, corrosion resistant.

P.M.G. ALLOY.
M-117, M-319; 95.5 Cu, 3 Si, 1.5 Fe.
Sand cast: 53,000 TS; 22,000 YS; 30 El; 100 Brin.
Chill cast: 53,000 TS; 22,000 YS; 30 El; 150 Brin.
For pump parts, gears, shafts, trolley wheels, marine fittings; substitute for Admiralty Gun Metal.

P.M.G. ALLOY
M-319; 91.5 Cu, 3.5 Si, 1.5 Fe, 4 Zn.
Forged. 70,000 TS; 28,000 YS; 35 El; 140 Brin
For spindles, stems, gears, shafts; wear resistant

P.M.G. ALLOY
M-319; 95.5 Cu, 3 Si, 1.5-1.8 Fe, bal Zn.
Cold drawn 95,000 TS, 45,000 YS; 30 El; 150 Brin.
For nuts, bolts, screws, valve stems, pump spindles, shafting; corrosion resistant.

PMM NO. 96
M-319, 97 Cu, 2.5 Si, 0.5 Fe.
For bolts, nuts, tubing, cold heading

PMP-Z-10
M-1018, C, bal Fe
For cams, keys, bushings, powdered metals, cemented

PMP-Z-70.
M-1098, Cu alloy
For cams, latches, keys, bushings; powder metals, sintered.

P.N. BRONZE.
M-1169, 3.0-4.0 Ni, 0.05-0.30 P, 11.5-13.0 Sn, bal Cu
Cast 31,000-45,000 TS, 5-20 El, 70-100 Brin
For pump and valve components
Good for high pressure work.

PNEU-DIE
M-357, 0.48 C, 2.15 Cr, 0.3 Mo, bal Fe
For chisels, punches, tough

PNEUMO.
M-1405, 0.45 C, 1.25 Cr, 0.2 W, 0.35 Mn, 0.75 Si, bal Fe
For upsetters, rivet sets, oil hardened, tough

PNEUTOUGH
M-1724, 0.50 C, 0.70 Si, 1.5 Cr, 0.25 V, 2.25 W, bal Fe
Oil hardening shock resisting special alloy tool steel; for pneumatic chisels, coal picks, diecasting dies (zinc), pneumatic tools, guillotine blades

PNUSNAP OH
M-56, 0.43 C, 1 Si, 0.5 Mn, 1 Cr, 1.8 W, bal Fe.
For tools, dies, hot work steel.

PNUSNAP WH.
M-56, 0.35 C, 0.6 Si, 0.3 Mn, 1.1 Cr, 1.9 W, bal Fe.
For tools, dies, hot work steel

POBEDIT.
Russian; 90 WC, 10 Co
For cutting tools; cemented.

POBEDIT-ALPHA.
Russian; TiC, Co.
For cutting tools; cemented.

POFORS SR1855.
M-1184, 1 C, 1.5 Si, 1 Cr, bal Fe.
For cutting and threading tools; oil hardened.

POLAR.
M-1490; 0.20 C, bal Fe.
Annealed: 73,000 TS; 41,000 YS; 22 El; 58 RA; 140 Brin.
For pole pieces for magnetos; high permeability.

POLARIS.
M-357; 0.6 C, 0.7 Ni, 0.15 Cr, 0.15 Mo, bal Fe.
For lawn mower blades, dies; tough, wear resistant.

POLARIS 2.
M-1705, 0.06 C, 0.3 Mn, 0.15 Si, 0.95 Cr, 0.25 Mo, (boron added), bal Fe.
Steel for plastic molds. AISI P2.

POLARIS 20
M-1705; 0.37 C, 1.0 Mn, 0.3 Si, 1.25 Cr, 0.15 V, 0.35 Mo, bal Fe
Steel for plastic molds. AISI P 20.

POLDI
M-96, 1.47 C, 0.23 Mn, 4.11 W, bal Fe
For cutting tools, oil hardening.

POLDI 2.
M-96, 1.2-1.35 C, 0.3 Mn, 0.2 Si, bal Fe.
For tools, files, drills; water hardening.

POLDI 3.
M-96, 1.05-1.2 C, 0.3 Mn, 0.2 Si, bal Fe.
For tools, files, drills; water hardening

POLDI 3 C.
M-96, 1.15 C, 0.15 Cr, bal Fe.
For tools, drills, taps, water hardening.

POLDI 4
M-96, 0.90-1.05 C, 0.3 Mn, 0.2 Si, bal Fe.
For tools, drills, files, water hardening

POLDI 5.
M-96, 0.75-0.90 C, 0.32 Mn, 0.20 Si, bal Fe.
For tools, files, drills; water hardening

POLDI 6
M-96, 0.65-0.75 C, 0.35 Mn, 0.20 Si, bal Fe.
For tools, files, drills, water hardening

POLDI NO 25 BEST.
M-96; 0.85 C, bal Fe.
For tools, drills, springs; water hardened.

POLDI NO 212
M-96; 0.3 C, 9.5 W, 2.5 Cr, 0.1 V, bal Fe
For hot work tools; hot work steel.

POLDI 212 D2.
M-96, 0.3 C, 2.75 Cr, 4.35 W, 0.55 V, bal Fe
For tools, dies, hot work steel.

POLDI 425
M-96, 0.3 C, 1.1 Si, 1.45 Cr, 3.75 W, bal Fe.
For tools, dies; hot work steel

POLDI 702D
M-96, 0.45 C, 0.4 Mn, 3.1 Si, 0.85 Cr, bal Fe.
For gears, shafts, oil hardening.

POLDI 1555.
M-96; 0.12 C, 0.45 Mn, 5 Cr, 0.43 Mo, bal Fe
For corrosion resistant parts, corrosion resistant.

POLDI 1888.
M-96; 0.70 C, 0.55 Mn, 0.05 V, bal Fe.
For tools, springs, punches, water hardening

POLDI NO 2002
M-96; 2 C, 12 Cr, bal Fe.
Annealed: 102,000 TS, 205 Brin.
For cutting dies, punches, milling cutters, reamers, broaches; for highly stressed parts.

POLDI 2002 E.S.
M-96; 1.5 C, 13 Cr, bal Fe.
For highly stressed tools subject to severe abrasive wear; oil or air hardening.

POLDI 2002 SPECIAL.
M-96; 2.2 C, 13 Cr, bal Fe.
For tools, dies; non-deforming.

POLDI 2514.
M-96; 0.28-0.35 C, 1.2-1.5 Mn, bal Fe.
For shafts, dies; water hardening.

POLDI 2518.
M-96, 0.33-0 40 C, 1.1-1.4 Mn, 1.1-1.4 Si, bal Fe.
For dies, chisels, punches; shock resistant.

POLDI 2526
M-96; 0.36 C, 1.7 Mn, 0.3 Cr, bal Fe.
For dies, punches; oil hardening, non-deforming.

POLDI 2526N.
M-96; 0.33-0 40 C, 1.6-1 9 Mn, bal Fe.
For dies, punches, non-deforming.

POLDI AK-1.
M-96, 0.10 C, 13 Cr, bal Fe.
For corrosion resistant parts; corrosion resistant.

POLDI AK1B.
M-96; 0.10 C, 16 Cr, 0.3 Ni, 0 2 Mo, 1 8 Cu, bal Fe
Annealed 75,000-85,000 TS, 40,000-55,000 YS; 30-25 El; Rockwell B75-80.
For chemical plant equipment, trim, stainless.

POLDI AK1B EXTRA.
M-96, 0 09 C, 17.5 Cr, 0 5 Ti, bal Fe
Annealed· 75,000-85,000 TS; 40,000-55,000 YS; 30-25 El; Rockwell B75-80
For chemical plant equipment; Type 430; corrosion resistant.

POLDI AK1V.
M-96; 0 12 max C, 14-18 Cr, 0.07 min S or Se, bal Fe.
Annealed. 75,000-85,000 TS, 40,000-55,000 YS, 30-25 El; Rockwell B75-80.
For chemical plant equipment, screw machine products; Type 430 F, free-cutting, stainless.

POLDI AK1W.
M-96, 0.07 C, 0.5 Mn, 13 Cr, bal Fe.
For corrosion resistant parts, corrosion resistant.

POLDI-AK2.
M-96; 0.20 C, 16 Cr, bal Fe.
Annealed· 75,000 TS; 45,000 YS, 28 El; 145 Brin.
Cold Rolled: 120,000 TS, 90,000 YS, 10 El, 195 Brin.
For automotive trim, oil burner parts, septic tanks, hardware. Corrosion resistant.

POLDI-AK2MV
M-96; 0 20 C, 0.9 Mn, 0.1 Si, 11.2 Cr, 2.4 Mo, 0.1 Ni, 0.25 V, bal Fe
Annealed 100,000 TS, 45,000 YS, 20 El, 50 RA; B 95 Rock
Heat Treated. 250,000 TS; 215,000 YS, 8 El; 25 RA; C 52 Rock.
For surgical instruments, cutlery, gears, shafts
Corrosion resistant, hardenable.

POLDI AK2S.
M-96, 0 22 C, 0 5 Mn, 13 Cr, bal Fe
For corrosion resistant parts, corrosion resistant.

POLDI AK 2 SPECIAL.
M-96, 0 22 C, 0.5 Mn, 15 2 Cr, bal Fe.
For corrosion resistant parts, corrosion resistant.

POLDI AK3S
M-96; 0.33 C, 13 Cr, 0.5 Mn, bal Fe.
Annealed: [illegible]8,000 TS, 40,000 YS; 32 El; 68 RA; 170 Brin.
Heat treated· 256,000 TS, 190,000 YS, 6 El; 10 RA; 540 Brin.
For valve trim, surgical instruments, cutlery, Type 420; hardenable, corrosion resistant.

POLDI AK-5.
M-96; 0.50 C, 15.5 Cr, 0.40 Mo, bal Fe.
For corrosion resistant parts; corrosion resistant.

POLDI AKC.
M-96, 0 20 C, 24 Cr, 19.5 Ni, bal Fe.
Annealed: 95,000 TS, 45,000 YS; 50 El; 65 RA; 180 Brin
At 1200°F: 57,000 TS, 22,000 YS; 32 El; 45 RA
For furnace parts and equipment, heat treating boxes; Type 310; austenitic, heat resistant.

POLDI AKCF.
M-96; 0 10 C, 21 Cr, 10 Ni, bal Fe
Annealed· 85,000 TS, 35,000 YS, 55 El; 65 RA; 150 Brin
For valve trim, oil refinery and chemical plant equipment; Type 308; austenitic, corrosion resistant.

POLDI AKCM
M-96, 0 45 C, 18 Cr, 19 5 Ni, 3 25 Mo, bal Fe.
For corrosion and heat resistant parts; corrosion and heat resistant.

POLDI AKCR
M-96; 0.15 C, 25 Cr, 14 5 Ni, bal Fe.
Annealed 85,000-95,000 TS, 40,000-50,000 YS; 45-55 RA, 150-185 Brin.
For refinery and chemical plant equipment; Type 309, austenitic, heat resistant

POLDI AK-H
M-96, 1 0 C, 16 Cr, 1 Mo, 1.3 Co, bal Fe.
For corrosion resistant parts, corrosion resistant

POLDI AKI 1
M-96, 0 15 C, 0 6 Mn, 12 3 Cr, 10.5 Ni, bal Fe
For stainless parts; corrosion resistant

POLDI AKM
M-96, 0 07 C, 18 Mn, 0 8 Si, 10 Cr, 1 Ni, 1 Mo, bal Fe
For wear and corrosion resistant parts, corrosion resistant

POLDI AKR
M-96, 0 45 C, 1 5 Si, 12 5 Cr, 2 2 W, 12 5 Ni, bal Fe
For stainless parts; corrosion resistant

POLDI AKS
M-96, 0 35 C, 0 5 Mn, 4 5 Cr, 22 Ni, bal Fe
For stainless parts, corrosion resistant

POLDI AKS 2
M-96, 0 10 C, 4 8 Cr, 2 W, 25 Ni, 3 5 Mo, 2 5 Cu, bal Fe
For acid resistant equipment, corrosion resistant

POLDI AKV
M-96, 0 15 C, 18 5 Cr, 9 Ni, bal Fe
Annealed. 85,000 TS, 35,000 YS; 60 El; 70 RA, 150 Brin
Cold drawn· 125,000 TS, 95,000 YS; 25 El; 55 RA, 277 Brin.
For chemical and plastic plant equipment, Type 302, stainless, austenitic.

POLDI AKV EXTRA.
M-96; 0 07 C, 18 5 Cr, 9 Ni, 1.65 Mo, bal Fe
Annealed 95,000 TS; 45,000 YS; 50 El; 60 RA; 195 Brin.
For chemical and plastic plant equipment; Type 316, austenitic, stainless.

POLDI AKV EXTRA S.
M-96, 0.10 max C, 16-18 Cr, 10-14 Ni, 1.7-2 7 Mo, Cb = 10 × C, bal Fe.

Annealed: 85,000-95,000 TS; 35,000-45,000 YS. 60-50 El; 75-60 RA; 150-190 Brin.
For acid resistant chemical plant equipment; Type 316 Cb, stainless, austenitic.

POLDI AKVH.
M-96, 0.08 max C, 18-20 Cr, 8-11 Ni, 2 max Mn, bal Fe.
Annealed: 90,000 TS, 45,000 YS; 60 El; 135 Brin.
Cold drawn. 180,000 TS; 150,000 YS; 10 El; 330 Brin.
For chemical plant equipment, welded structures; Type 304; stainless, austenitic.

POLDI AKVM.
M-96; 0.10 C, 18 Cr, 9 Ni, bal Fe.
Annealed. 90,000 TS, 35,000 YS; 60 El, 150 Brin.
For chemical plant equipment, tanks, digesters, agitators, molding and trim
Type 302 stainless steel Austenitic

POLDI AKVN
M-96; 0.10 C, 18.5 Cr, 9 Ni, bal Fe
Annealed 85,000 TS; 35,000 YS; 60 El; 70 RA; 150 Brin
Cold drawn. 125,000 TS, 95,000 YS, 25 El, 55 RA; 260 Brin
For chemical plant equipment, oil refinery tanks; Type 302; austenitic, stainless

POLDI AKVS
M-96, 0.10 C, 18.5 Cr, 8.5 Ni, 0.6 Ti, bal Fe.
Annealed. 85,000 TS; 35,000 YS; 60 El; 70 RA; 150 Brin
For welded structures, chemical plant equipment; Type 321, austenitic, stainless

POLDI AKVU
M-96, 0.15 C, 18.5 Cr, 9 Ni, bal Fe
Annealed. 85,000 TS; 35,000 YS; 50 El; 65 RA, 150 Brin
For chemical plant equipment, Type 302, austenitic, stainless

POLDI AKX
M-96, 0.10 C, 0.5 Mn, 25 Cr, bal Fe
For heat resistant parts, heat resistant

POLDI AL 14
M-96, 0.44 C, 1.5 Cr, 0.23 Mo, 0.95 Al, bal Fe.
For gears, cams, shafts, nitriding steel

POLDI AL 16
M-96, 0.35 C, 0.75 Mn, 1.65 Cr, 1.1 Al, bal Fe.
For gears, cams, shafts, nitriding steel

POLDI AM.
M-96, 0.7 C, 8.9 Mn, 3.15 Cr, 7.7 Ni, bal Fe
For corrosion resistant parts, corrosion resistant

POLDI AMK
M-96, 0.4 C, 18 Mn, 3.3 Cr, bal Fe
For wear and heat resistant parts, wear and heat resistant.

POLDI AMS
M-96, 0.55 C, 5.25 Mn, 3.55 Cr, 12.15 Ni, bal Fe.
For heat and corrosion resistant parts, heat and corrosion resistant.

POLDI AUTOR.
M-96; 0.40-0.50 C, 1.4-1.7 Cr, 0.6 Mn, 0.4 max Si, bal Fe
For bolts, gears, crankshafts; oil hardened, tough.

POLDI B 200.
M-96; 0.38 C, 1.9 Mn, 3.75 Cr, 0.18 V, bal Fe.
For dies, punches; oil hardening

POLDI BO-4.
M-96; 0.35 C, 0.6 Cr, 1.45 Ni, bal Fe.
For gears, shafts, shock resistant.

POLDI BOZ.
M-96; 0.39 C, 0.6 Mn, 1.1 Cr, 2 Ni, 0.15 Mo, bal Fe.
For gears, shafts; oil hardening.

POLDI BRAND NO. 4
M-96; 1.0 C, bal Fe.
For general tools, cold work dies, stamps, punches; water hardening

POLDI CE
M-96; 0.10 C, 0.55 Mn, 0.75 Cr, bal Fe.
For gears, shafts; case hardening.

POLDI CM 2.
M-96; 0.20 C, 1.05 Mn, 1.2 Cr, 0.23 Mo, bal Fe.
For gears, shafts; tough.

POLDI CM 3.
M-96; 0.22-0.30 C, 0.9-1.2 Cr, 0.15-0.25 Mo, bal Fe.
For gears, shafts; tough.

POLDI CNB
M-96; 0.38 C, 1.5 Cr, 0.6 W, 4.25 Ni, 0.3 Mo, bal Fe.
For tools, gears, shafts; tough, oil hardening.

POLDI CNBD.
M-96, 0.38 C, 1.5 Cr, 3.5 Ni, bal Fe.
For tools, gears, shafts, tough, shock resistant.

POLDI CNF.
M-96, 0.35 C, 0.9 Cr, 4.85 Ni, bal Fe
For tools, gears, shafts; tough, oil hardening.

POLDI CNH SPECIAL
M-96; 0.55 C, 0.5 Mn, 0.75 Cr, 2.6 Ni, bal Fe.
For tools, gears, shafts; tough, shock resistant.

POLDI CNL
M-96; 0.3 C, 0.85 Cr, 4.85 Ni, bal Fe.
For gears, shafts, oil hardening.

POLDI CNLW.
M-96, 0.27 C, 0.4 Mn, 0.85 Cr, 4.5 Ni, bal Fe
For gears, shafts, oil hardening.

POLDI CNS.
M-96, 0.33 C, 0.8 Cr, 3.35 Ni, bal Fe.
For gears, shafts, oil hardening, tough

POLDI CNSW.
M-96, 0.25 C, 0.8 Cr, 3.35 Ni, bal Fe.
For gears, shafts, tough, shock resistant.

POLDI "C.R."
M-96, 0.9 C, 0.75 Cr, 0.1 V, bal Fe.
For dies, punches, cold rolls, deep hardening, water quenched.

POLDI CR 1.
M-96, 0.90 C, 0.35 Mn, 1.0 Cr, 1 V, bal Fe.
For tools, bearings, dies, wear resistant.

POLDI CR 2.
M-96, 0.8 C, 0.35 Mn, 1.7 Cr, bal Fe
For tools, dies, cutters; oil hardening.

POLDI CR2W.
M-96, 0.7 C, 0.35 Mn, 1.7 Cr, bal Fe
For tools, dies, oil hardening

POLDI CV.
M-96, 0.6 C, 1.0 Cr, 0.2 V, 0.5 Mn, bal Fe.
For tools, punches; oil hardened

POLDI CX
M-96, 0.3 C, 0.9 Si, 2.45 Cr, 0.35 V, bal Fe.
For tools, punches, dies, tough, oil hardening.

POLDI D.
M-96, 1.05-1.2 C, 0.3 Mn, bal Fe.
For tools, files, drills; water hardening.

POLDI DIAMANTHART.
M-96; 1.35 C, 0.55 Cr, 4.9 W, 0.35 V, bal Fe.
For tools, dies.

POLDI DS SPECIAL.
M-96; 1.15 C, 1.0 Cr, 0.18 V, bal Fe.
For tools, cutters, bearings; oil hardening.

POLDI DUPLEX EXTRA.
M-96; 1.05 C, 0.25 Cr, 1.15 W, 0.2 V, bal Fe.
For tools, dies.

POLDI E.
M-96; 0.90-1.05 C, 0.3 Mn, bal Fe.
For tools, files, drills; water hardening.

POLDI EPAZ.
M-96; 1.25 C, 0.12 Cr, 0.15 V, bal Fe.
For tools, cutters, bearings; water hardening.

POLDI ESH.
M-96; 0.6 C, 0.9 Mn, 1.9 Si, bal Fe.
For punches, dies, chisels; tough.

POLDI ESH 1.
M-96; 0.65 C, 0.75 Mn, 1.75 Si, bal Fe
For punches, dies, chisels; tough.

POLDI EXTRA F-GuB
M-96; 1.7 C, 0.4 Si, 18 Cr, 1.25 W, 1.4 Ni, bal Fe.
For chemical plant equipment, corrosion resistant.

POLDI E.Z H.
M-96, M-36; 0.95-1.05 C, bal Fe.
Annealed: 91,000 TS; 180 Brin.
For cold dies, punches, tools, short shear blades; tool steel.

POLDI EZH SPECIAL.
M-96; 1.0 C, 0.35 Mn, 0.15 V, bal Fe
For tools, drills, taps; water hardening.

POLDI GFE.
M-96, 0.6 C, 25 Cr, bal Fe.
For heat and corrosion resistant parts; heat resistant.

POLDI GS3.
M-96; 0.38 C, 1.4 Mn, 2.5 Cr, 0.28 Mo, bal Fe.
For gears, dies, shafts; oil hardening.

POLDI HP51.
M-96, 0.5 C, 2 W, 0.8 Cr, 0.2 V, bal Fe
For hot work tools and dies; hot work steel.

POLDI "H P S"
M-96; 0.5 C, 3 W, bal Fe.
For tools for hot work; hot work steel.

POLDI HPS 2.
M-96; 0.25 C, 2.25 Cr, 9.5 W, 1.5 Ni, 0.1 V, bal Fe.
For tools, dies; hot work steel.

POLDI HS.
M-96, 1.3 C, 13.75 Mn, 0.25 Si, bal Fe.
For wear resistant parts; austenitic, wear resistant.

POLDI K 1.
M-96, 1.2-1.35 C, 0.25 Mn, 0.12 Si, bal Fe.
For tools, drills, files; water hardening.

POLDI K 2.
M-96; 1.0-1.2 C, 0.25 Mn, 0.12 Si, bal Fe.
For tools, files, drills; water hardening.

POLDI KAPTOR.
M-96; 0.35 C, 1.5 Si, 12.5 Cr, 2.6 W, 12.5 Ni, 1.25 V, bal Fe.
For stainless parts; corrosion resistant.

POLDI KO.
M-96; 1.35-1.50 C, 0.2 Mn, 0.12 Si, bal Fe.
For tools, drills, files; water hardening.

POLDI L-AK2.
M-96; 0.20 C, 0.5 Mn, 15.2 Cr, bal Fe.
For corrosion resistant parts; corrosion resistant.

POLDI L-AKMF 3.
M-96; 0.09 C, 17.5 Mn, 1.5 Si, 11.5 Cr, 0.5 Ti, bal Fe.
For corrosion and wear resistant parts; corrosion resistant.

POLDI L-AKR.
M-96; 0.45 C, 1.5 Si, 12.5 Cr, 2.2 W, 12.5 Ni, bal Fe
For stainless parts, corrosion resistant.

POLDI L-AKRD.
M-96, 0.45 C, 0.75 Mn, 1.5 Si, 15 Cr, 2.3 W, 13 Ni, bal Fe
For stainless parts, corrosion resistant.

POLDI L-AL 12.
M-96; 0.33 C, 0.45 Mn, 1.8 Cr, 0.18 Mo, 1 Ni, 1.1 Al, bal Fe
For machinery parts, gears, shafts, nitriding steel.

POLDI L-AL 14.
M-96, 0.44 C, 0.55 Mn, 1.5 Cr, 0.23 Mo, 0.95 Al, bal Fe
For machinery parts, gears, shafts, nitriding steel

POLDI L-AL 16
M-96, 0.35 C, 0.75 Mn, 1.65 Cr, 1.1 Al, bal Fe
For machinery parts, gears, shafts, nitriding steel.

POLDI L-AL 30
M-96; 0.32 C, 0.70 Mn, 1.1 Cr, 0.18 Mo, 1.15 Mo, bal Fe
For machinery parts, gears, shafts, nitriding steel

POLDI L-CNL
M-96, 0.3 C, 0.85 Cr, 4.85 Ni, bal Fe
For gears, shafts, oil hardening

POLDI L-CNS
M-96, 0.27 C, 0.55 Cr, 3.25 Ni, bal Fe.
For gears, shafts, tough, shock resistant

POLDI L-CVMW.
M-96, 0.27-0.34 C, 1.9-2.7 Cr, 0.25 Mo, 0.1-0.3 V, bal Fe
For gears, shafts, oil hardening, tough

POLDI LDH
M-96, 0.30 C, 0.7 Cr, 4.25 Ni, 1.5 Mo, bal Fe
For tools, gears, shafts, oil hardening, tough

POLDI LDH 3 SPECIAL
M-96, 0.3 C, 0.7 Cr, 2.4 Ni, 0.75 Mo, 0.3 V, bal Fe
For tools, gears, shafts, tough, oil hardening.

POLDI LDH 4 SPECIAL.
M-96, 0.3 C, 0.7 Cr, 1.4 Ni, 0.45 Mo, 0.22 V, bal Fe.
For tools, gears, shafts, oil hardening, tough.

POLDI LDS
M-96; 0.45 C, 0.5 Mn, 1.45 Si, 0.6 Cr, bal Fe.
For tools, dies, shears; tough, oil hardening.

POLDI L-MS
M-96; 0.29 C, 18 Mn, 0.5 Si, 1.3 Cr, bal Fe
For wear resistant parts, corrosion resistant, austenitic.

POLDI L-MV 4.
M-96, 0.38-0.42 C, 1.5-2 Mn, 0.4 Si, 0.10-0.20 V, bal Fe
For dies, punches; non-deforming.

POLDI L-NIT 2.
M-96, 0.30 C, 0.6 Mn, 2.5 Cr, 0.25 Mo, 0.25 V, bal Fe.
For machinery parts, gears, shafts; nitriding steel.

POLDI L-NIT 4.
M-96; 0.27 C, 0.6 Mn, 2.5 Cr, 0.30 V, bal Fe.
For machinery parts, gears, shafts; nitriding steel.

POLDI MAXIMUM SPECIAL.
M-96; 0.7 C, 19 W, 4 Cr, 1.2 V, bal Fe.
For turning, planing tools, twist drills, milling cutters, boring and milling tools, screwing dies; high speed steel.

POLDI MAXIMUM SPECIAL NO. 30.
M-96; 0.7 C, 17.5 W, 4.2 Cr, 0.6 Mo, 1.4 V, 2.7 Co, bal Fe.
For turning, planing and slotting tools, twist drills, milling cutters, boring and milling tools; high speed steel.

POLDI MAXIMUM SPECIAL NO. 55.
M-36, M-96; 0.7 C, 17.5 W, 4 Cr, 0.6 Mo, 1.4 V, 5 Co, bal Fe.
For turning, planing and slotting tools, flat drills, twist drills, milling cutters, boring and milling tools; high speed steel.

POLDI MAXIMUM SPECIAL G.
M-96; 0.8 C, 4 Cr, 38 W, 2 V, bal Fe.
For tools, cutters; high speed steel.

POLDI MAXIMUM SPECIAL G EXTRA.
M-96; 0.85 C, 4.2 Cr, 9.75 W, 2.4 V, bal Fe.
For tools, cutters, high speed steel.

POLDI MAXIMUM SPECIAL H
M-96; 0 8 C, 4.2 Cr, 17.5 W, 0.6 Mo, 1.35 V, bal Fe.
For tools, cutters; high speed steel

POLDI MAXIMUM SPECIAL MO
M-96, 1 0 C, 5.2 Cr, 1.7 W, 2 4 Mo, 2.85 V, bal Fe.
For tools, cutters, high speed steel

POLDI M.K
M-36, M-96; 0.65 C, 18 W, 5 Co, 4 Cr, 1.3 V, 0.7 Mo, bal Fe.
For turning, planing, drilling and milling tools, flat drills, twist drills, boring and milling cutters; high speed steel.

POLDI MO
M-96, 0.3-0 4 C, 0 5 Mn, 0 2 Si, bal Fe.
For welding rod.

POLDI ORI.
M-96; 1 25 C, 0 7 Mn, 1.15 Si, 1.2 Cr, bal Fe.
For tools, chisels; shock resistant.

POLDI RADECO D.
M-96, 0.85 C, 4.2 Cr, 12 5 W, 0 6 Mo, 2 V, 5 Co, bal Fe.
For tools, cutters, hobs, abrasion resistant.

POLDI RCR-1.
M-96; 1.5 C, 0.25 Mn, 0.75 Cr, bal Fe.
For tools, cutters; wear resistant.

POLDI REDI.
M-96; 0.45 C, 0 5 Mn, 1.45 Si, 0.6 Cr, bal Fe.
For tools, dies, shears; tough, oil hardening.

POLDI S.
M-96; 0.70-0.80 C, 0.3 Mn, bal Fe.
For tools, files, drills; water hardening.

POLDI S 4.
M-96; 0.9-1.05 C, 0.05 Si, bal Fe.
For welding rod.

POLDI S 6.
M-96; 0.65-0.75 C, 0.05 Si, bal Fe.
For welding rod.

POLDI SC.
M-96; 0.6 C, 0.7 Mn, 1.55 Si, 0.8 Cr, bal Fe.
For tools, dies, shears; tough, oil hardening

POLDI SCH.
M-96; 0.55 C, 0.7 Mn, 1.45 Si, 0.6 Cr, bal Fe.
For punches, dies, chisels; oil hardening.

POLDI SCM.
M-96; 0.4-0.55 C, 1.5-2.0 Mn, bal Fe.
For shafts, dies; oil hardening.

POLDI SP.
M-96; 1.2 C, 0.7 W, bal Fe.
For tools, dies.

POLDI SPS
M-96; 1.2 C, 0.4 Cr, 1.15 W, bal Fe.
For tools, dies.

POLDI SR 4.
M-96; 0 90-1.05 C, 0.2 Si, bal Fe.
For welding rod.

POLDI S SPECIAL.
M-96, 0.75 C, 0.3 Mn, 0.15 V, bal Fe.
For tools, punches, springs; water hardening.

POLDI "S S T."
M-96; 1 C, 1.2 W, bal Fe.
For taps, dies, punches, shop tools; water hardening.

POLDI T3
M-96, M-1322, M-1323, 1.1 C, 0.25 max Mn, 0 25 max Si, bal Fe.
Heat treated 125,000-220,000 TS; 88,000-155,000 YS; 18-10 El; 45-30 RA, 240-555 Brin.
For drills, taps, reamers, broaches; Type W1; water hardened.

POLDI T4.
M-96, M-1322, M-1323; 1.0 C, 0 25 max Si, 0.25 max Mn, bal Fe.
Heat treated 121,000-213,000 TS; 84,000-150,000 YS; 20-11 El; 47-33 RA; 235-534 Brin.
For drills, taps, reamers, broaches, Type W1, water hardened.

POLDI T5.
M-96, M-1322, M-1323; 0.85 C, 0.25 max Mn, 0.25 max Si, bal Fe.
Heat treated: 188,000-130,000 TS; 143,000-87,000 YS; 12-21 El; 35-50 RA; 388-255 Brin.
For tools, cutters, springs; Type W1; water hardened

POLDI T5 HART.
M-1322, M-96; 0.61 C, 0.65 Mn, 0.25 Si, bal Fe.
Hot rolled: 118,000 TS, 70,000 YS; 16 El; 35 RA; 229 Brin
For punches, crimpers, axles, water hardened.

POLDI T5W
M-96, M-1322; 0.60 C, 0 5 Si, 0 6 Mn, bal Fe.
Hot rolled: 118,000 TS; 70,000 YS; 16 El; 35 RA; 229 Brin.
For punches, crimpers, axles; water hardened.

POLDI T5W EXTRA.
M-96; 0.52-0.60 C, 0.25 Si, bal Fe
For welding rod.

POLDI T6
M-96, M-1322; 0.7 C, 0 25 max Si, 0.25 max Mn, bal Fe.
Heat treated: 122,000-174,000 TS; 82,000-128,000 YS; 22-12 El; 52-37 RA; 241-352 Brin.
For punches, crimpers, axles; water hardened.

POLDI T6H.
M-96, M-1322; 0.45 C, 0.25 Si, 0.65 Mn, bal Fe.
Hot rolled: 94,000 TS; 60,000 YS; 26 El; 50 RA; 200 Brin.
For gears, pinions, shafts, crankshafts; water hardened

POLDI T6HB.
M-96; 0.48-0.54 C, 0.5 Mn, 0.2 Si, bal Fe.
For welding rod.

POLDI T6H EXTRA.
M-96; 0.42-0.50 C, 0.75 Mn, 0.25 Si, bal Fe.
For welding rod.

POLDI T6W.
M-96, M-1322; 0.35 C, 0.25 Si, 0.55 Mn, bal Fe.
Hot rolled: 85,000 TS; 54,000 YS; 30 El; 53 RA; 183 Brin.
For gears, shafts, crankshafts; water hardened.

POLDI T6W EXTRA.
M-96, M-1322; 0.35 C, 0.25-0.60 Si, 0.3-0.8 Mn, bal Fe.
Hot rolled: 85,000 TS; 54,000 YS; 30 El; 53 RA; 183 Brin.
For gears, shafts, crankshafts, bolts; water hardened, SAE 1035.

POLDI T7.
M-96, M-1322; 0.22 C, 0.25 Si, 0.45 Mn, bal Fe.
Heat treated: 71,000-80,000 TS; 36,000-50,000 YS; 30-20 El; 69-60 RA; 143-163 Brin.
For gears, bolts, shafts, camshafts; case hardening steel.

POLDI T8.
M-96, M-1322; 0.15 C, 0.25 Si, 0.45 Mn, bal Fe.
Hot rolled: 61,000 TS; 46,000 YS; 39 El; 61 RA; 126 Brin.
For gears, pinions, camshafts, cams; case hardening steel.

POLDI TBOS.
M-96; 0.05 C, 0.8 Cr, 1.45 Ni, bal Fe.
For gears, shafts; oil hardening.

POLDI TO EXTRA SIMPLEX.
M-96; 0.8 C, 1 Mn, 0.6 Si, 0.4 Cr, bal Fe.
For tools, dies, cutters; water hardening.

POLDI W8.
M-96; 0.06-0.13 C, 0.5 max Mn, 0.35 max Si, bal Fe.
Annealed: 58,000 TS; 45,000 YS; 30 El; 66 RA; 125 Brin
For nails, rivets, screws, bolts; water and case hardened.

POLDI WP.
M-96, 0.4 C, 0.65 Mn, 2.5 Cr, 0.6 Mo, 0.4 V, bal Fe.
For axes, shafts; oil hardened.

POLISH 2H18N9.
M-Poland; 0.2 C, 0.7 Mn, 18 Cr, 8.3 Ni, 0.9 Mo, bal Fe.
Annealed: 90,000 TS; 40,000 YS; 55 El, 155 Brin.
For chemical plant equipment, agitators, digesters, tanks.
Stainless, austenitic, nonmagnetic.

POLITAL.
M-457; 0.5-2.0 Mg, 0.3-1.5 Si, 0-1.5 Mn, bal Al.
For light alloy parts, corrosion resistant, hardenable.

POLITAL.
M-1548; 0.5-1.5 Si, 0.4-1.0 Mn, 0.4-1.0 Mg, bal Al.
Hardened: 40,000-50,000 TS; 26,000-36,000 YS; 10-20 El; 70-100 Brin
For general structures, scaffolds, booms, transmission towers.
Heat treatable, high strength.

POLITAL 38.
M-457; 2.5-4.0 Mg, bal Al.
Soft: 26,500 TS; 12,000 YS; 26 El; 60 Brin.
Hard: 43,000 TS; 37,000 YS; 4 El; 85 Brin.
For light alloy parts; corrosion resistant.

POLITIT.
M-1338; 0.40 C, 13 Cr, 0.3 Mn, 0.4 Si, bal Fe.
Annealed: 95,000 TS; 50,000 YS; 25 El; 55 RA; 196 Brin.
For turbine blades, cutlery, valves, knives, fasteners; Type 420; stainless, hardenable.

POLITIT 13/1.
M-1338, 0.12 max C, 13 Cr, 0.4 Si, bal Fe.
Annealed: 75,000 TS; 40,000 YS; 35 El; 70 RA; 155 Brin.
Cold drawn: 100,000 TS; 85,000 YS; 17 El; 60 RA; 205 Brin.
For turbine blades, valve trim; Type 410; stainless.

POLITIT 13/2
M-1338; 0.2 C, 0.4 Si, 13 Cr, bal Fe.
Annealed: 95,000 TS; 50,000 YS, 25 El; 55 RA; 195 Brin
Cold drawn: 105,000 TS; 85,000 YS, 17 El; 50 RA; 215 Brin
For turbine blades, valve trim, cutlery, surgical instruments; Type 420, stainless, hardenable.

POLITIT 13/4.
M-1338; 0.4 C, 13 Cr, 0.4 Si, bal Fe
Annealed: 95,000 TS; 50,000 YS; 25 El; 55 RA; 195 Brin.
For cutlery, knives, surgical instruments; Type 420, stainless, hardenable

POLITIT 13M
M-1338; 0.2 C, 13 Cr, 1.15 Mo, bal Fe.
Annealed 95,000 TS, 50,000 YS, 25 El, 55 RA; 200 Brin.
For acid resistant and oil refinery equipment; corrosion resistant

POLITIT 17M.
M-1338, 0.35 C, 16.5 Cr, 1.15 Mo, bal Fe
For chemical plant and oil refinery equipment; corrosion resistant

POLITIT 17N.
M-1338, 0.22 C, 17 Cr, 1.5 Ni, bal Fe.
Annealed 125,000 TS; 95,000 YS; 20 El; 55 RA; 240 Brin
For furnace parts and accessories, corrosion resistant, hardenable

POLITIT 18/8
M-1338, 0.15 max C, 18 Cr, 8.5 Ni, bal Fe.
Annealed 80,000 TS; 35,000 YS; 55 El; 75 RA; 150 Brin
For chemical plant equipment, tanks, dryers, mixers, Type 302, stainless, austenitic

POLITIT 18/8T.
M-1338, 0.12 max C, 18 Cr, 9.5 Ni, Ti = 4 × C, bal Fe.
Annealed 85,000 TS; 35,000 YS, 55 El; 65 RA; 150 Brin
For welded chemical plant equipment, tanks, mixers; Type 321; stainless, austenitic.

POLITIT 18/9
M-1338, 0.07 C, 18 Cr, 9.5 Ni, bal Fe.
Annealed 85,000 TS, 35,000 YS; 60 El; 70 RA; 150 Brin.
Cold drawn: 180,000 TS, 125,000 YS; 10 El; 330 Brin.
For welded chemical plant equipment; Type 304; stainless, austenitic.

POLITIT 18/10M.
M-1338; 0.07 max C, 18 Cr, 2 Mo, 10.5 Ni, bal Fe.
Annealed: 85,000 TS; 35,000 YS; 50 El; 65 RA; 160 Brin.
Cold drawn. 150,000 TS; 135,000 YS; 6 El; 300 Brin.
For acid resistant chemical plant equipment; Type 316; stainless, austenitic.

POLITIT 18/10MT.
M-1338; 0.12 max C, 18 Cr, 2 Mo, 10.5 Ni, Ti = 4 × C, bal Fe.
Annealed: 90,000 TS; 40,000 YS; 45 El; 60 RA; 180 Brin.
For welded chemical plant equipment; Type 316 Ti, stainless, austenitic.

POLITIT 18CM.
M-1338; 0.90 C, 18 Cr, 1 V, 1.15 Mo, bal Fe.
Annealed. 108,000 TS; 62,000 YS; 18 El; 35 RA; 220 Brin.
Heat treated. 280,000 TS; 270,000 YS; 3 El; 15 RA; 555 Brin.
For bearings, valves, gauges, sleeves, stainless, wear resistant.

POLIVIT.
German, 97 4 Al, 0.6 Cu, 1 8 Mn, 0.2 Ag.
For light alloy parts.

POLYMET A-G.
M-1567, Ag + plastic lubricant.
For instrument bearings, valve seats, rings and brushes.
Low friction. Withstands temperatures to 700°F.

POMET 111.
M-885; 5-10 Sn, bal Cu.
For mechanical and electrical parts, powder metals.

POMET 117B
M-885; 94-96 Cu, 4-6 Sn.
Sintered· 18 El
For precision parts, sintered.

POMET 117C.
M-885, 89-92 Cu, 8-11 Sn
Sintered 39,000 TS
For instrument parts, sintered, good wear resistance.

POMET 141
M-885, 0 2 C, 18 Cr, 8 Ni, bal Fe
For mechanical parts, sintered, stainless.

POMET 300
M-885; Fe
For magnetic cores, pole shoes; powder metallurgy.

POMET 309
M-885, 0 2-0 3 C, bal Fe
Sintered 38,000 TS
For machine and instrument parts; sintered alloy

POMET 309H.
M-885, 0.3 C, bal Fe
Sintered and heat treated 400 Brin
For clutch parts, cams, gears, sintered

POMET 389.
M-885; 0 10 C, bal Fe
For general parts; powdered metals.

POMET 560.
M-885, 5 Cu, bal Al
For light alloy parts; powder metals.

POMOLOY C-2.
M-886; 3.2 C, 2 2 Si, bal Fe
Cast· 40,000 TS; 215 Brin.
For pump casings; gray cast iron.

POMOLOY C-3.
M-886, 3.2 C, 2.0 Si, bal Fe
Cast: 40,000 TS, 210 Brin
For pump casings; gray cast iron

POMPEY 8CN2
M-884; 0.08 C, 0.40 Mn, 0 20 Si, 2.0 Ni, bal Fe.
Heat treated· 85,000-121,000 TS; 64,000 YS; 12 El.
For gears, cams, camshafts, fasteners; case hardening, shock resistant, Afnor 10N8h.

POMPEY 8NK.
M-884; 0.8 C, 1.5 Ni, Cr, bal Fe.
For wood saws, circular saws; water hardened.

POMPEY 8SRX.
M-884; 0.8 C, Ni, Cr, V, bal Fe.
For band saws, water or oil hardened.

POMPEY 9KX.
M-884; 0.9 C, 0.8 Cr, V, bal Fe.
For bearings, stamps, coining dies; water hardened.

POMPEY 10 CNK1.
M-884; 0.09 C, 0.75 Mn, 0.25 Si, 1.4 Ni, 1.1 Cr, bal Fe.
Heat treated: 144,000-186,000 TS; 121,000 YS.
For gears, bolts, cams, camshafts; Afnor 10NC6, case hardening steel, tough.

POMPEY 10 CNK3.
M-884; 0.10 C, 3 Ni, 0.75 Cr, bal Fe
For gears, cams, machine tool parts; Afnor 10NC12, case hardening steel, tough.

POMPEY 10K2.
M-884; 1.0 C, 1.5 Cr, bal Fe.
Annealed: 95,000 TS; 62,000 YS; 27 El; 62 RA; 179 Brin.
Heat treated 200,000 TS; 185,000 YS; 3 El; 30 RA; 390 Brin.
For punches, bearings, bushings, water hardened, wear resistant.

POMPEY 10WK2.
M-884; 1 0 C, 2 W, Cr, bal Fe
For metal saws, water hardened

POMPEY 11.
M-884, 1.1 C, bal Fe.
For files, water hardened.

POMPEY 11WK1
M-884; 1 1 C, 1.0 W, Cr, bal Fe
For metal saws, water hardened.

POMPEY 12 CNK3
M-884, 0 14 C, 3 Ni, 0 75 Cr, bal Fe.
For gears, cams, camshafts, machine tool parts, Afnor 14NC12, case hardening steel, tough.

POMPEY 12KV
M-884, 1 2 C, 1 Cr, V, bal Fe
For milling cutters, reamers, taps, threading dies, water or oil hardened

POMPEY 12W1.
M-884, 1 1 C, 1 W, V, bal Fe
For drills, taps, cutters, reamers, water hardened

POMPEY 14CNK3
M-884, 0 14 C, 0 40 Mn, 0 20 Si, 3 5 Ni, 0 75 Cr, bal Fe
Heat treated 178,000 TS; 135,000 YS; 10 El, 55 RA
For gears, bolts, camshafts, cams,
DIN 14NiCr14, case hardened

POMPEY 15N3
M-884, 0.15 C, 0 50 Mn, 0 35 Si, 3 Ni, bal Fe.
Heat treated. 127,000-163,000 TS, 100,000 YS; 10 El
For gears, cams, machine tool parts, fasteners, case hardening, shock resistant.

POMPEY 16 CNK1.
M-884, 0.15 C, 0.75 Mn, 0 25 Si, 1.4 Ni, 1.1 Cr, bal Fe
For gears, bolts, cams, machine tool parts; Afnor 16NC6, case hardening steel, tough.

POMPEY 20N2.
M-884; 0.22 C, 0.45 Mn, 0.20 Si, 2 Ni, bal Fe.
Heat treated: 143,000-177,000 TS; 121,000 YS; 7 El.
For gears, cams, camshafts, fasteners; Afnor 20N8, case hardened, shock resistant.

POMPEY 20ND2.
M-884; 0.20 C, 1.8 Ni, 0.25 Mo, bal Fe
Heat treated: 143,000-177,000 TS; 121,000 YS; 7 El.
For gears, machine tool parts, fasteners; Afnor 20ND8, case hardened, shock resistant.

POMPEY 20 NK1.
M-884; 0.20 C, 1.4 Ni, 1.1 Cr, bal Fe.
For gears, bolts, cams, machine tool parts; Afnor 20NC6, case hardening steel, tough.

POMPEY 20 NK3.
M-884; 0.22 C, 0.50 Mn, 2.8 Ni, 0.75 Cr, bal Fe.
Heat treated: 128,000-157,000 TS; 114,000 YS.
For gears, cams, camshafts, machine tool parts; Afnor 20NC11, case hardening steel.

POMPEY 20NKD.
M-884; 0.20 C, 0.6 Ni, 0.5 Cr, 0.2 Mo, bal Fe.
Hot rolled: 93,000 TS; 65,000 YS; 25 El; 63 RA; 162 Brin.
For gears, bolts, machine tool parts; case hardening, shock resistant, Afnor 20NCD2

POMPEY 30NK3.
M-884; 0.29 C, 2.8 Ni, 0.75 Cr, bal Fe
Heat treated: 143,000-175,000 TS; 128,000 YS.
For gears, bolts, crankshafts, fasteners, Afnor 30NC11, oil hardened, shock resistant

POMPEY 30NKD2.
M-884; 0.30 C, 2 Ni, 2 Cr, 0.35 Mo, bal Fe.
Heat treated: 170,000-200,000 TS, 143,000 YS; 8 El.
For bolts, gears, machine tool parts; oil hardened, shock resistant.

POMPEY 30NKD3.
M-884; 0.30 C, 3 Ni, 0.9 Cr, 0.35 Mo, bal Fe.
Heat treated: 135,000-185,000 TS, 128,000 YS, 12 El.
Fro bolts, gears, crankshafts, fasteners, oil hardened, shock resistant.

POMPEY 32NK3.
M-884; 0.32 C, 3.45 Ni, 0.70 Cr, bal Fe
Heat treated: 143,000-175,000 TS, 128,000 YS
For gears, bolts, crankshafts, fasteners, DIN-VCN35, oil hardened, shock resistant

POMPEY 35CP.
M-884; 0.35 C, 0.95 Cr, 0.25 Mo, bal Fe.
For cutters, dies, oil hardened.

POMPEY 35 NK1.
M-884; 0.34 C, 1.45 Ni, 1.0 Cr, bal Fe
For gears, bolts, crankshafts, axles, studs; Afnor 35NC6, oil hardened, shock resistant

POMPEY 35NKD1.
M-884; 0.35 C, 1.2 Ni, 0.6 Cr, 0.15 Mo, bal Fe.
Heat treated: 150,000-177,000 TS, 143,000 YS, 10 El.
For gears, bolts, fasteners, crankshafts; Afnor 35NCDM.

POMPEY 40NKD
M-884; 0.40 C, 0.6 Ni, 0.5 Cr, 0.2 Mo, bal Fe.
Annealed: 107,000 TS; 90.000 YS; 14 El, 45 RA; 217 Brin.
For bolts, gears, crankshafts, fasteners; oil hardened, shock resistant.

POMPEY 45CP
M-884; 0.45 C, 0.95 Cr, 0.25 Mo, bal Fe.
For cutters, dies, gears, shafts, oil hardened, shock resistant.

POMPEY ABRADUR M14.
M-884; 1.2 C, 13 Mn, bal Fe
For pulverizers, crushers, rock breakers; high wear and abrasion resistance

POMPEY ANTICHOC-1.
M-884, 0.6 C, 1.8 Si, 0.9 Mn, 0.4 Cr, bal Fe.
For punches, pneumatic tools, rivet sets; oil hardened, shock resistant

POMPEY ANTICHOC-2
M-884, 0.5 C, Si, + Cr, bal Fe.
For punches, chisels, pneumatic tools, oil hardened, shock resistant.

POMPFY ANTICHOC-H
M-884, 0.45 C, 1-1 Cr, 2 W, 0.2 V, bal Fe.
For pneumatic chisels, crimpers, punches, shock resistant, hot work steel

POMPEY ANTICHOC-HD.
M-884, 0.55 C, 1.1 Cr, 2 W, 0.2 V, bal Fe.
For punches, crimpers, pneumatic tools; impact resistant, hot work steel.

POMPEY APS5.
M-884, 0.07 C, 0.40 Mn, 0.40-0.55 Cu, W, Mo, bal Fe
Annealed 50,000-56,000 TS, 36,000 YS; 30 El.
For siphons, oil industry parts, heat exchangers, corrosion resistant.

POMPEY APS6
M 884, 0.08 C, 0.40-0.55 Mn, 0.40-0.55 Cu, Mo, bal Fe
Annealed 60,000 TS, 40,000 YS, 26 El
For siphons, oil industry parts, heat exchangers, corrosion resistant.

POMPEY APS10
M-884, 0.12 C, 2.0-2.5 Cr, 0.35-0.90 Al, 0.35 max Mo, bal Fe
Normalized 92,000 TS; 52,000 YS, 20 El
For evaporators, transportation tanks; corrosion resistant

POMPEY-APS10A
M-884, 0.12 C, 2 Cr, 0.9 Al, bal Fe.
Normalized: 69,000-85,000 TS, 44,000 YS
For evaporators, dryers, graters, nitrate plants, chemical plant equipment
Corrosion resistant

POMPEY APS10C
M 884, 0.12 C, 2.5 Cr, 0.4 Al, 0.2 Cu, bal Fe
Normalized: 76,000 92,000 TS, 52,000 YS
For marine equipment, vats, hardware.
Resists marine corrosion

POMPEY-APS10M
M 884, 0.12 C, 2.0 Cr, 0.9 Al, 0.12 Mo, bal Fe.
Normalized 72,000-88,000 TS, 46,000 YS
For evaporators, dryers, graters, nitrate plants, chemical equipment
Corrosion resistant to stress cracking due to nitrate

POMPEY-APS10M4.
M-884, 0.12 C, 2.0 Cr, 0.35 Al, 0.35 Mo, bal Fe
Normalized 87,000 TS, 42,000 YS
For marine equipment, vats, hardware
Corrosion resistant to marine atmospheres

POMPEY APS20
M-884, 0.12 C, 4 Cr, 0.9 Al, 0.2 max Cu, 0.12 max Mo, bal Fe
Normalized 92,000-70,000 TS, 52,000-43,000 YS, 20-22 El
For chemical plant equipment, resists salt water and marine corrosion

POMPEY-APS20A.
M-884; 0.12 C, 4.0 Cr, 0.9 Al, bal Fe.
Normalized: 69,000-85,000 TS; 43,000 YS.
For oil refinery and coking equipment.
Corrosion resistant to industrial and marine atmospheres.

POMPEY-APS20C.
M-884; 0.12 C, 4.0 Cr, 0.4 Al, 0.2 Cu, bal Fe.
Normalized: 76,000-92,000 TS; 52,000 YS.
For oil refinery equipment, furnace parts.
Corrosion resistant to marine and industrial atmospheres

POMPEY-APS20M.
M-884, 0.12 C, 4.0 Cr, 0.9 Al, 0.12 Mo, bal Fe.
Normalized: 72,000-90,000 TS; 47,000 YS.
For evaporators, dryers, graters, nitrate plants, oil refinery equipment.
Corrosion resistant to marine and industrial atmospheres.

POMPEY APS25.
M-884, 0.12 C, 4 Cr, 0.9 Al, 0.9 Ni, 0.2 Cu, 0.12 Mo, bal Fe.
Normalized. 121,000-157,000 TS; 85,000 YS, 14 El.
For automobile bodies, railroad cars, diesel motor parts, resists marine and industrial atmospheres.

POMPEY APS1001.
M-884, C, 2 Cr, 0.9 Al, bal Fe.
For agricultural equipment.

POMPEY AUSTINOX
M-884, 0.08 C, 18 Cr, 9 Ni, bal Fe
Annealed 80,000 TS, 30,000 YS, 60 El; 70 RA; 150 Brin
Cold drawn 180,000 TS; 125,000 YS, 10 El, 330 Brin
For chemical plant equipment, tanks, vessels; AISI304, austenitic, stainless

POMPEY AUSTINOX SB
M-884; 0.08 max C, 18 Cr, 12 Ni, 2 Mo, 0.2 Ti, bal Fe
Annealed 80,000 TS; 30,000 YS, 40 El; 70 RA; 140 Brin
Cold drawn 150,000 TS, 135,000 YS; 6 El, 300 Brin.
For chemical plant equipment, mixers, agitators, Type 316, austenitic, stainless.

POMPEY C1K.
M-884, 0.12 C, 0.75 Mn, 0.8 Cr, bal Fe.
Heat treated 107,000-128,000 TS, 72,000 YS, 15 El, 40 RA.
For gears, bolts, machine tool parts, Afnor 12C3h, case hardening steel

POMPEY C1MK
M-884, 0.15 C, 1.2 Mn, 1 Cr, bal Fe.
Heat treated. 144,000-200,000 TS, 107,000 YS; 8 El, 35 RA.
For gears, cams, camshafts, fasteners; Afnor 16MC5, case hardening steel.

POMPEY C2K.
M-884, 0.18 C. 0.75 Mn, 0.8 Cr, bal Fe.
Heat treated· 135,000-172,000 TS; 120,000 YS; 8 El; 30 RA
For gears, bolts, machine tool parts; Afnor 18C3h, case hardening steel.

POMPEY C2MK.
M-884; 0.20 C, 1.4 Mn, 1.35 Cr, bal Fe.
Heat treated· 163,000-220,000 TS, 127,000 YS; 7 El; 30 RA.
For gears, cams, camshafts; Afnor 20MC5, case hardening steel.

POMPEY CKD1.
M-884; 0.12 C, 1 Cr, 0.25 Mo, bal Fe.
Heat treated· 150,000-186,000 TS; 121,000 YS.
For gears, cams, camshafts, machine tool parts; AISI 4110, case hardening steel, tough.

POMPEY CKD2.
M-884; 0.18 C, 1.0 Cr, 0.25 Mo, bal Fe.
Heat treated: 157,000-193,000 TS; 130,000 YS.
For gears, bolts, machine tool parts; AISI 4120, case hardening steel, tough.

POMPEY CNKD.
M-884; 0.10 C, 1.2 Ni, 0.6 Cr, 0.15 Mo, bal Fe.
Heat treated. 135,000-164,000 TS; 114,000 YS; 11 El.
For gears, fasteners, cams, machine tool parts; Afnor 10NCD4, case hardening, shock resistant.

POMPEY CNKD1.
M-884; 0.15 C, 1.2 Ni, 0.5 Cr, 0.15 Mo, bal Fe.
Heat treated· 143,000-185,000 TS, 114,000 YS; 8 El
For gears, fasteners, cams, machine tool parts; Afnor 16NCD4, case hardening, shock resistant.

POMPEY CNKD2
M-884, 0.17 C, 1.4 Ni, 1.0 Cr, 0.20 Mo, bal Fe.
Heat treated: 170,000-206,000 TS; 143,000 YS; 9 El
For gears, cams, camshafts, fasteners; Afnor 18NCD6, case hardening, shock resistant.

POMPEY CNKD3
M-884, 0.17 C, 3.2 Ni, 1.0 Cr, 0.25 Mo, bal Fe.
Heat treated. 186,000-221,000 TS, 143,000 YS; 8 El.
For gears, cams, camshafts, fasteners; Afnor 16NCD13, case hardening, shock resistant.

POMPEY CROSTAR
M-884, 2.0 Cr, 13 Cr, V, bal Fe
For forming and blanking dies, cutters; oil hardened, non-deforming

POMPEY D3
M-884, 0.32 C, 0.70 Mn, 0.30 Si, bal Fe.
Normalized· 85,000 TS; 58,000 YS; 25 El
For gears, fasteners, shafts, bolts, water hardened

POMPEY D3SS
M-884; 0.35 C, 1.15 Mn, 0.25 Si, 0.15 S, bal Fe
Normalized. 85,000 TS 58,000 YS, 24 El.
For screw machine products, bolts, fasteners; free cutting

POMPEY D48
M-884, 0.48 C, 0.60 Mn, 0.30 Si, bal Fe.
Normalized. 103,000 TS, 61,000 YS; 19 El
For gears, fasteners, axles, shafts, bolts, water hardened.

POMPEY DC1.
M-884, 0.11 C, 0.45 Mn, 0.20 Si, 0.03 max P, 0.025 max S, bal Fe
Normalized· 60,000 TS, 40,000 YS, 35 El.
For gears, shafts, cams, fasteners; case hardening.

POMPEY DK3
M-884, 0.32 C, 0.75 Mn, 1 Cr, bal Fe.
Heat treated. 143,000-163,000 TS; 127,000 YS; 10 El; 40 RA.
For gears, bolts, machine tool parts; Afnor 32C4, oil hardened.

POMPEY DK4.
M-884, 0.40 C, 0.75 Mn, 1 Cr, bal Fe.
Heat treated: 150,000-175,000 TS; 128,000 YS; 9 El; 35 RA.
For gears, bolts, machine tool parts; Afnor 38C4, oil hardened.

POMPEY E7.
M-884; 0.7 C, 0.04 max S and P, bal Fe.
Heat treated: 174,000 TS; 128,000 YS; 12 El; 37 RA; 352 Brin.
For cams, forging tools, nippers, lifters; water hardened

POMPEY E7FX.
M-884; 0.75 C, 0.015 S, 0.025 P, bal Fe.
Heat treated: 180,000 TS; 140,000 YS; 14 El; 38 RA; 370 Brin.
For crimpers, punches, tools; water hardened.

POMPEY E8FX.
M-884; 0.8 C, 0.015 S, 0.025 P, bal Fe.
Heat treated: 188,000 TS; 143,000 YS, 12 El; 35 RA; 390 Brin.
For tools, dies, drills, taps; water hardened.

POMPEY EF10
M-884, 1.0 C, 0.025 max S and P, bal Fe.
Annealed. 100,000 TS; 53,000 YS, 21 El; 42 RA; 200 Brin
For cams, knives, cutters, drills, gages; water hardened, Type W1.

POMPEY EF10X
M-884; 1.0 C, 0.025 max S and P, bal Fe
For cutters, reamers, drills, punches; water hardened, tool steel

POMPEY EF12.
M-884; 1.2 C, 0.025 max P and S, bal Fe.
For cutters, reamers, drills, broaches, water hardened, tool steel.

POMPEY EGALIT
M-884; 0.85 C, 2.0 Mn, 0.2 V, bal Fe.
For drills, taps, cutting tools, stamps, water hardened

POMPEY ETAN
M-884, 0.38 C, 4.3 Ni, 1.75 Cr, bal Fe.
Heat treated 260,000 TS; 200,000 YS, 5 El, 40 RA
For gears, pinions, crankshafts, Afnor 40NC17, oil hardened, shock resistant.

POMPEY ETANO
M-884, 0.35 C, 3.75 Ni, 1.7 Cr, bal Fe
Heat treated: 250,000 TS, 192,000 YS, 6 El, 40 RA
For gears, pinions, crankshafts, Afnor 35NC15, oil hardened, shock resistant.

POMPEY ETH.
M-884, 0.30 C, 3.75 Cr, 0.25 Mo, 1.0 Ni, bal Fe.
Heat treated 235,000-300,000 TS; 192,000-213,000 YS, 6 El, 40 RA
For gears, pinions, shafts; air or oil hardened, shock resistant.

POMPEY ETH
M-884; 0.40 C, 1.0 Cr, 0.25 Mo, bal Fe.
Heat treated: 270,000 310,000 TS, 235,000-270,000 YS, 5 El, 40 RA
For gears, pinions, crankshafts, Afnor 42CD4, oil hardened, shock resistant

POMPEY F8.
M-884, 0.8 C, 0.035 max S and P, bal Fe
For cutting tools, springs, drills, hammers; water hardened

POMPEY GK.
M-884, 1.4 C, 0.15 V, 1.5 Cr, bal Fe
For bearings, taps, cutters; water hardened.

POMPEY HARDINOX 3.
M-884; 0.35 C, 13.5 Cr, bal Fe.
Annealed: 100,000 TS; 60,000 YS; 22 El, 52 RA; 200 Brin.
For cutlery, surgical and dental instruments; AISI420, corrosion resistant

POMPEY INOX 1.
M-884; 0.15 max C, 13 Cr, 0.5 max Ni, bal Fe.
Annealed: 75,000 TS, 40,000 YS; 35 El; 70 RA; 155 Brin.
Cold drawn. 100,000 TS; 85,000 YS, 17 El; 60 RA; 205 Brin.
For springs, hardware, tableware, turbine blades; AISI410, corrosion resistant.

POMPEY INOX 2.
M-884, 0.20 C, 13.5 Cr, 0.5 Ni, bal Fe.
Annealed: 95,000 TS; 50,000 YS, 25 El, 55 RA; 196 Brin
Cold drawn. 105,000 TS, 85,000 YS; 17 El, 50 RA; 215 Brin.
For cutlery, surgical and dental instruments, AISI420, corrosion resistant.

POMPEY INOX 3.
M-884; 0.30 C, 13.5 Cr, 0.5 Ni, bal Fe.
Annealed: 105,000 TS, 60,000 YS; 20 El; 50 RA; 210 Brin
For cutlery, surgical and dental instruments; AISI 420, corrosion resistant.

POMPEY INOX 431.
M-884, 0.20 max C, 17 Cr, 2 Ni, bal Fe
Annealed 120,000 TS, 90,000 YS; 15 El; 20 RA, 260 Brin
Heat treated 180,000 TS, 130,000 YS, 10 El; 15 RA, 420 Brin
For pump shafts, marine hardware, valve trim, martensitic, ferritic, corrosion resistant

POMPEY K74
M-884, 0.75 C, 0.5 Cr, bal Fe
For wood saws, water hardened

POMPEY KD2
M-884, 0.26 C, 1 Cr, 0.25 Mo, bal Fe
Heat treated 143,000 170,000 TS; 130,000 YS
For gears, bolts, machine tool parts, Type 4125, oil or water hardened, tough

POMPEY KD2S
M-884, 0.23 C, 1 Cr, 0.25 Mo, bal Fe
Heat treated 134,000 164,000 TS, 121,000 YS
For gears, bolts, machine tool parts, Type 4125, case hardening steel, tough

POMPEY KD3
M-884, 0.35 C, 1.0 Cr, 0.25 Mo, bal Fe
Heat treated 156,000 186,000 TS, 142,000 YS
For gears, bolts, crankshafts, machine tool parts, Type 4135, oil hardened, tough

POMPEY KD4
M-884 0.42 C, 1.0 Cr, 0.25 Mo, bal Fe.
Heat treated 170,000-199,000 TS, 157,000 YS
For gears, bolts, crankshafts, machine tool parts, Type 4140, oil hardened, tough

POMPEY KR6
M-884, 1.0 C, 1.4 Cr, bal Fe.
Heat treated 120,000 237,000 TS, 95,000-226,000 YS, 14-3 El, 47-30 RA, 227-444 Brin.
For bearings, sleeves, liners, SAE52100, Afnor 100C6, wear resistant

POMPEY L7
M-884, 0.7 C, bal Fe.
Heat treated 174,000 TS, 128,000 YS, 12 El, 37 RA, 352 Brin
For files, water hardened.

POMPEY L12
M-884, 1.2 C, bal Fe
For files; water hardened.

POMPEY L13
M-884, 1.3 C, bal Fe.
For files; water hardened

POMPEY LCKD.
M-884; 0.60 C, 0.90 Mn, 1.75 Si, 0.4 Cr, 0.25 Mo, bal Fe.
For wire cutters, punches, crimpers, upsetters; oil hardened, non-deforming.

POMPEY LK.
M-884; 1.4 C, Cr, bal Fe.
For files; water hardened.

POMPEY LRT.
M-884; 0.5 C, bal Fe.
Annealed: 96,000 TS; 52,000 YS; 16 El; 23 RA; 170 Brin.
For files; water hardened.

POMPEY MANGANESE-CHROME.
M-884, 0.12-0.20 C, 1.2-1.3 Mn, 0.25-0.40 Cr, 0.25-0.40 Cu, bal Fe.
Rolled. 85,000 TS, 50,000 YS; 20 El.
For bridges, auto and railroad bodies; high tensile construction steel.

POMPEY MAS
M-884; 0.55 C, 2.0 Ni, 1.1 Cr, 0.35 Mo, 0.1 V, bal Fe
For punches, shears, upsetters, forging dies; oil hardened, hot work steel.

POMPEY MC7
M-884; 0.75 C, bal Fe.
Heat treated: 185,000 TS, 140,000 YS; 13 El; 36 RA, 375 Brin
For rock crushers, water hardened.

POMPEY MC8
M-884, 0.8 C, bal Fe
For grate bars; water hardened

POMPEY MC12.
M-884; 1.2 C, bal Fe
For ore and rock crushers, water hardened.

POMPEY MKND
M-884, 0.4 C, 4 Cr, 1 N + Mo, bal Fe.
For hot work tools, shears, oil hardened

POMPEY MKND-1
M-884, 0.1 C, 4 Cr, 1 Ni, Mo, bal Fe
For hot work tools, oil hardened.

POMPEY MODAL-1
M-884, 0.08 C, bal Fe.
For molds and dies for plastics; case hardened

POMPEY MODAL-2
M-884, 0.1 C, 2 Ni, bal Fe
For molds and dies for plastics, case hardened

POMPEY MODAL-3
M-884, 0.1 C, 1.5 Ni, Cr, bal Fe.
For molds and dies for plastics, case hardened.

POMPEY MODAL-4
M-884, 0.1 C, 4.5 Ni, Cr, bal Fe
For molds and dies for plastics, case hardened.

POMPEY MSV.
M-884, 0.06-0.11 C, 0.30-0.50 Mn, 0.10 Si, bal Fe
Annealed. 65,000 TS. 40,000 YS; 28 El; 65 RA; 130 Brin
For nails, rivets, screws, bolts, bushings, Type 1008; case hardened.

POMPEY MSV3
M-884; 0.26-0.35 C, 0.40-0.90 Mn, 0.12 Si, bal Fe.
Hot rolled: 80,000 TS; 50,000 YS; 30 El; 56 RA; 165 Brin
For gears, bolts, armature shafts, keys, brackets, Type 1030; water hardened.

POMPEY MSVD.
M-884; 0.15-0.23 C, 0.40-0.60 Mn, 0.12 Si, bal Fe.
Annealed: 73,000 TS; 42,000 YS; 22 El; 58 RA; 140 Brin.
For screws, bolts, gears, cams; Type 1020; case hardened.

POMPEY NITRAL 3.
M-884; 0.40 C, 1.7 Cr, 0.2 Mo, 1.0 Al, bal Fe.
Heat treated: 144,000 TS; 121,000 YS; 12 El; 50 RA.
For engine cylinders, pistons, pumps, arbors; heat and creep resistant.

POMPEY PEGASE-S.
M-884; 0.5 C, bal Fe.
Annealed: 96,000 TS; 52,000 YS; 16 El; 23 RA; 170 Brin.
For hammers, gears, axles; water hardened.

POMPEY PF1
M-884; 0.15 C, 0.55 Cr, 0.55 Mo, bal Fe.
Normalized. 72,000 TS; 25,000 YS; 18 El
For oil refinery equipment; Afnor 13CD2; creep resistant.

POMPEY PF2
M-884; 0.12 C, 1.0 Cr, 0.55 Mo, bal Fe.
Normalized: 85,000 TS; 50,000 YS; 20 El.
For oil refinery equipment; creep resistant; Afnor 10CD5

POMPEY PF5
M-884, 0.13 C, 5 Cr, 0.55 Mo, bal Fe
Normalized. 85,000 TS, 25,000 YS; 25 El.
For oil refinery equipment, creep and heat resistant.

POMPEY PF6.
M-884; 0.13 C, 2.2 Cr, 1 Mo, bal Fe.
Normalized 82,000 TS, 30,000 YS; 21 El
For oil refinery equipment, Afnor 10CD9, creep resistant

POMPEY PFV55.
M-884, 0.12 C, 2 Cr, 0.30 V + Al, bal Fe.
Normalized. 85,000 TS, 32,000 YS; 20 El.
For oil refinery equipment, creep resistant.

POMPEY PM17
M-884, 0.12 C, 1.5 Mn, bal Fe.
Rolled 77,000-92,000 TS, 58,000 YS, 20 El.
For agricultural and tractor parts, automobiles, scrapers, bulldozers

POMPEY PM18
M-884, 0.2 C, 1.7 Mn, 0.2 Mo, bal Fe
Rolled 72,000-117,000 TS; 50,000-65,000 YS, 15 El
For machine tool parts, case hardened

POMPEY PM20.
M-884, 0.10 C, 0.6-1.0 Mn, 2.3-3.2 Ni, 0.15-0.25 Mo, 0.4-0.6 Cu, bal Fe.
Rolled 82,000-97,000 TS; 58,000 YS, 20 El
For automobile parts, gears, fasteners; case hardened.

POMPEY PM35
M-884; 0.18 C, 1.5 Mn, 1.5 Cr, 0.12 Mo, bal Fe.
Heat treated: 143,000-186,000 TS; 103,000 YS; 11 El; 45 RA
For agricultural and mining equipment.

POMPEY PP.
M-884; 0.30 C, 0.25 Mo, 2.4 Cr, 0.25 V, bal Fe.
For gears, shafts, crankshafts, bolts, studs; oil hardened, tough, high temperature use.

POMPEY PSK
M-884, C, Si, Cr, bal Fe
For vises, ejectors, molds, mandrels, punches; oil hardened.

POMPEY RKV.
M-884; 0.50 C, 0.80 Mn, 1 Cr, 0.15 V, bal Fe.
Heat treated: 170,000-206,000 TS; 156,000 YS; 8 El; 35 RA.
For gears, bolts, springs, crankshafts; Afnor 50CV4, oil hardened, shock resistant.

POMPEY RMK.
M-884; 0.48 C, 0.80 Mn, 0.30 Si, 1.0 Cr, bal Fe.
Heat treated: 193,000-221,000 TS; 171,000 YS; 5 El; 30 RA.
For springs, torsion bars, Afnor 48C4, oil hardened.

POMPEY RMKR.
M-884; 0.80 C, 0.95 Mn, 0.60 Si, 0.40 Cr, bal Fe.
Heat treated: 150,000-177,000 TS; 107,000 YS; 8 El; 40 RA.
For springs, oil hardened.

POMPEY RP.
M-884; C, Ni, Cr, V, bal Fe.
For cams, guides, rollers, machine tool parts; oil hardened.

POMPEY RS.
M-884, 0.45 C, 0.65 Mn, 1.8 Si, bal Fe.
Heat treated: 200,000-235,000 TS; 170,000 YS; 6 El; 30 RA.
For springs; Afnor 45S7, water hardened.

POMPEY RS3.
M-884; 0 55 C, 0.75 Mn, 1 7 Si, bal Fe
Heat treated: 200,000-235,000 TS; 177,000 YS; 5 El; 25 RA.
For springs; Afnor 55S7, oil hardened.

POMPEY RS3K
M-884; 0.60 C, 0.85 Mn, 1 8 Si, 0.40 Cr, bal Fe.
Heat treated· 213,000-242,000 TS; 185,000 YS; 5 El, 25 RA
For springs, coils; oil hardened.

POMPEY RS4E
M-884; 0.60 C, 0.85 Mn, 1.9 Si, bal Fe.
Heat treated 213,000-242,000 TS; 185,000 YS; 4 El, 25 RA.
For springs; Afnor 55S7, Afnor 65S7, oil hardened.

POMPEY RSKD
M-884; 0.45 C, 0.40 Mn, 1.6 Si, 0.8 Cr, 0.25 Mo, bal Fe.
Heat treated· 228,000-260,000 TS, 200,000 YS; 5 El; 30 RA.
For springs, torsion bars; Afnor 45SCD6, oil hardened

POMPEY S3
M-884; 0 35 C, bal Fe.
Hot rolled. 85,000 TS; 54,000 YS, 30 El, 53 RA; 185 Brin.
For gears, shafts, housings; water hardened.

POMPEY S3F.
M-884, 0.35 C, bal Fe.
Hot rolled. 85,000 TS, 54,000 YS; 30 El; 53 RA; 185 Brin
For gears, shafts, axles, mowers, water hardened.

POMPEY S4
M-884; 0.45 C, bal Fe.
Hot rolled: 98,000 TS, 59,000 YS, 24 El; 45 RA; 212 Brin.
For machine tool parts, gears, shafts; water hardened.

POMPEY S4F.
M-884; 0 40 C, bal Fe.
Hot rolled: 91,000 TS, 58,000 YS; 27 El; 50 RA; 200 Brin.
For gears, shafts, axles, mowers, water hardened.

POMPEY S4M.
M-884; 0 9 C, bal Fe.
Heat treated: 190,000 TS; 145,000 YS; 10 El; 30 RA; 400 Brin.
For cutters, dies; water hardened.

POMPEY S4S
M-884; 0.4 C, 0.035 S, 0.035 P, bal Fe.
Hot rolled: 91,000 TS, 58,000 YS, 27 El; 50 RA; 200 Brin.
For agricultural equipment, plows; water hardened.

POMPEY S5M.
M-884; 1 1 C, bal Fe.
Annealed: 110,000 TS; 56,000 YS; 20 El; 40 RA; 210 Brin.
For cutters, dies; water hardened

POMPEY S6F
M-884, 0 62 C, bal Fe
Heat treated· 160,000 TS; 113,000 YS, 12 El; 40 RA, 325 Brin.
For agricultural equipment, mowers; water hardened.

POMPEY S7F
M-884, 0 68 C, bal Fe
Heat treated 174,000 TS; 128,000 YS, 12 El; 37 RA, 355 Brin
For agricultural equipment, mowers; water hardened.

POMPEY S7 TRIPLEX
M-884, 0 7 C, bal Fe
Heat treated 174,000 TS, 128,000 YS, 12 El, 37 RA, 352 Brin.
For agricultural equipment, plows, water hardened

POMPEY S8.
M 884, 0 8 C, bal Fe
Heat treated 188,000 TS, 143,000 YS, 12 El, 35 RA, 385 Brin
For tools, dies, mandrels, water hardened

POMPEY S8R
M-884, 0 8 C, 0 035 S, 0 035 P, bal Fe
Heat treated 188,000 TS, 143,000 YS, 12 El, 35 RA, 390 Brin
For agricultural equipment, rakes; water hardened.

POMPEY S65.
M-884; 0.65 C, bal Fe.
Heat treated· 170,000 TS, 116,000 YS, 10 El; 38 RA, 340 Brin
For shafts, mandrels, dies, tools; water hardened

POMPEY S75
M-884, 0.75 C, bal Fe
Heat treated 180,000 TS, 140,000 YS; 13 El, 36 RA; 370 Brin
For crimpers, punches, dies, tools, water hardened.

POMPEY S90
M-884, 0 9 C, 0 035 S, 0.035 P, bal Fe
Heat treated 190,000 TS, 145,000 YS, 10 El; 30 RA, 400 Brin.
For agricultural equipment, mowing machines, water hardened.

POMPEY SH4
M-884, 0.48 C, bal Fe.
Annealed: 96,000 TS; 52,000 YS; 16 El, 23 RA; 170 Brin.
For machine tool parts, gears, shafts; water hardened.

POMPEY SH5.
M-884; 0.54 C, bal Fe.
Annealed. 100,000 TS, 55,000 YS; 15 El; 22 RA; 180 Brin.
For shafts, axles, tools; water hardened.

POMPEY TR4.
M-884; 0.45 C, 0.15 Cr, 0.7 Mn, 0.25 Si, bal Fe.
Heat treated: 127,000-157,000 TS; 114,000 YS; 10 El; 40 RA; 590 Brin.
For machine tool parts, shafts, gears; induction or flame hardened parts.

POMPEY TR4M.
M-884; 0.45 C, 0.15 Cr, 0.9 Mn, 0.25 Si, bal Fe.
Heat treated: 127,000-157,000 TS; 114,000 YS; 10 El; 40 RA; 590 Brin.
For machine tool parts, shafts, gears; induction or flame hardened parts.

POMPEY TR5.
M-884; 0.52 C, 0.7 Mn, 0.25 Si, 0.15 Cr, bal Fe.
Heat treated 121,000-150,000 TS, 92,000 YS; 10 El; 40 RA; 620 Brin.
For machine tool parts, shafts, gears; induction or flame hardened parts.

POMPEY TR5M.
M-884; 0.52 C, 0.8 Mn, 0.25 Si, 0.15 Cr, bal Fe.
Heat treated· 121,000-150,000 TS; 92,000 YS; 10 El; 40 RA; 620 Brin.
For machine tool parts, shafts, gears; induction or flame hardened parts.

POMPEY TRK.
M-884, 0.50 C, 0.9 Mn, 0.3 Si, 1.0 Cr, bal Fe.
Heat treated· 163,000-193,000 TS; 150,000 YS; 8 El; 30 RA; 610 Brin.
For machine tool parts, shafts, gears; induction or flame hardened parts.

POMPEY TRKD
M-884; 0.42 C, 0.7 Mn, 0.3 Si, 1 Cr, 0.25 Mo, bal Fe.
Heat treated 170,000-200,000 TS, 157,000 YS; 8 El, 40 RA, 590 Brin
For machine tool parts, shafts, gears; induction or flame hardened parts.

POMPEY TRNKD.
M-884, 0.40 C, 0.9 Mn, 0.3 Si, 0.5 Ni, 0.5 Cr, 0.2 Mo, bal Fe.
Heat treated 157,000-186,000 TS, 150,000 YS, 10 El, 40 RA, 590 Brin.
For machine tool parts, shafts, gears; induction or flame hardened parts.

POMPEY TUREX 4
M-884; 0.4 C, 4 W, 1.4 Cr, 0.2 V, bal Fe.
For hot work tools; oil hardened.

POMPEY TUREX 9.
M-884; 0.30 C, 2.8 Cr, 10 W, 0.3 V, bal Fe.
For extrusion press rams and liners, punches, shears, hot work steel, oil hardened.

POMPTON
M-1, 0.7-1.4 C, 0.25 Mn, 0.25 Si, bal Fe.
Heat treated. 228-715 Brin.
For threading dies, shear knives, chisels, drills, punches, Type W1; water hardened.

POMPTON D R.
M-1; 1.2 C, bal Fe.
For drills, taps, drill rod, water hardening.

POMPTON EXTRA.
M-1; 0.7-1.0 C, alloy, bal Fe.
For tools, drills, taps; water hardening

POMPTON SPECIAL
M-1; 0.7-1.4 C, 0.015 max. P, 0.015 max. S, 0.25 Mn, 0.20 Si, bal Fe.
Water hardened: 228-715 Brin.
For lathe, planer and finishing tools, reamers, taps, gages, dies; made in all tempers; Iz-7-50.

PONSARD'S HIGH MANGANESE BRASS.
Eng.; 75-50 Cu, 20-25 Mn, 2-15 Zn, 0-16 Fe.
For corrosion resisting and marine parts; corrosion resistant.

POPES ISLAND METAL.
French; 70 Cu, 15 Zn, 14 Ni, 1 ?
For tableware, base for plated ware; generic name of a series of French alloys.

POREX.
M-839; 5-11 Sn, bal Cu.
For filters, porous membranes, diffusers; powdered metals.

PORO BRONZE.
M-525; 13 Sb, 7 Cu, bal Sn.
For bearings, bushings; Babbitt.

POSITIVE-ROD NO. 105.
M-1096; 0.08-0.12 C, 0.45-0.65 Mn, 0.15-0.25 Si, 0.03 S, 0.03 P, bal Fe.
Welded: 62,000-70,000 TS; 50,000-55,000 YS; 25-35 El; 40-45 RA.
For all-position general purpose welding rod; AWS-E6010.

POTASSIUM AMALGAM.
Hg24K.
For organic reductions.

POTERIE D'ETAIN.
90 Sn, 9 Sb, 1 Cu.
For tableware, bearings, anti-friction.

POTINGRIS.
Potinjaune plus Pb + Sn
For hardware.

POTINJAUNE.
72 Cu, 25 Zn, 2 Pb, 1.2 Sn.
For hardware, French yellow brass.

POT METAL
80-67 Cu, 20-33 Pb
For bearings, heavy duty

POTOMAC
M-1, 0.35 C, 0.85 Si, 1.25 W; 5 Cr, 0.2 V, 1.5 Mo, bal Fe
Air hardening tool and die steel; for forging dies, hot nut tools, hot die steel. Resists shock and heat checking. AISI H12.

POTOMAC 2V.
M-1, 0.60 C, 0.65 Mn, 1.0 Si, 6.5 Cr, 2.15 V, 1.4 Mo, bal Fe
Air hardening hot work tool and die steel.

POTOMAC 4V
M-1, 1.15 C, 0.35 Mn, 1.0 Si, 5.25 Cr, 4.0 V, 1.3 Mo, bal Fe.
Air hardening hot work tool and die steel.

POTOMAC-A.
M-1; 0.40 C, 0.30 Mn, 0.90 Si, 5.0 Cr, 1.3 Mo, 0.5 V, bal Fe
Heat treated: 290,000 TS, 234,000 YS; 16 El; 41 RA; 55 Brin.
At 1000°F. 207,000 TS, 157,000 YS; 15 El; 35 RA; 54 Brin
For fasteners, gears, rocket cases, aircraft and missile structures; maintains strength to 1000°F.

POTOMAC M.
M-1, 0.40 C, 1.0 Si, 5.25 Cr, 1.0 V, 1.0 Mo, bal Fe.
For hot die steel, brass forging and pressing dies; resists shock and heat checking; AISI H13.

POTOSI SILVER.
Ni-Cu.
For ornamental and corrosion resistant parts; nickel silver.

POWDER BRAZE.
M-799; Zn, bal Cu.
For brazing; powdered metals.

POWDIRON 56-L.
M-632; 2.5 Graphite, bal Fe.
Sintered: 5,000 TS; 5.6 Density; 28% oil by volume.
For bearings for low cost,
light duty motor applications.

POWDIRON 59-FM.
M-632; 99.5 Fe, 0.5 other.
Sintered: 17,000 TS; 5.9 Density;
25% oil by volume.
For low and medium load bearings
requiring machining, staking or spinning;
good ductility.
ASTM B310-67 Type 1, Class A; SAE 850;
PMPMA F-0000-N.

POWDIRON 59-I.
M-632; 100 Fe.
Sintered: 12,000 TS; 5.9 Density;
25% oil by volume.
For low cost bearings for wheels, toys,
and general bearing applications.
ASTM B439-67; Gr 1; SAE 850;
PMPMA F-0000-N.

POWDIRON 59-PC.
M-632; 4 Cu, 0.8 C (comb.), bal Fe.
Sintered 34,000 TS; 5.9 Density;
20% oil by volume
For structural parts requiring ductility
and shock resistance.
ASTM B426-65 Type 1, Grade 2, SAE 865 A

POWDIRON 59-T.
M-632, 0.8 C (comb.), bal Fe.
Sintered· 24,000 TS; 5.9 Density;
20% oil by volume.
For structural parts requiring good hardness
and wear resistance.
ASTM B310-67 Type 1, Class C, SAE 852.

POWDIRON 61-P.
M-632; 10 Cu, bal Fe.
Sintered; 30,000 TS; 6.1 Density;
25% oil by volume
High strength, general purpose bearing
for automotive, farm equipment, wheel bearings,
and machine tool applications
ASTM B439-67, Grade 3; SAE 862;
PMPMA FC-1000-N.

POWDIRON TCU.
M-632, 20 Cu, 0.8 C (comb.), bal Fe
Sintered: 85,000 TS, 7.3 Density
For structural parts, particularly gears.
ASTM B303-67 Class C;
SAE 872, PMPMA FX-2010-T.

POWER 52.
4-5 Si, bal Fe.
For laminations for power units,
high permeability

POWER 58.
4.25-4.75 Si, bal Fe.
For laminations for power units; high permeability

POWER 65.
4.24-4.75 Si, bal Fe.
For laminations for power units, high permeability.

POWER 72
3.75-4.25 Si, bal Fe.
For laminations for power units; high permeability

POWER 82.
3.0-3.5 Si, bal Fe.
For laminations for power units,
high permeability.

POWER 101.
2.25-2.75 Si, bal Fe.
For laminations for power units; high permeability.

POWER 117.
1.0-1.5 Si, bal Fe.
For laminations for power units;
high permeability.

POWER 130.
0.5-0.75 Si, bal Fe.
For laminations for power units; high permeability.

POWER 145
0.25-0.5 Si, bal Fe.
For laminations for power units,
high permeability

POWER 165
Under 0.25 Si, bal Fe
For laminations for power units, high permeability.

POWER NICKEL GENUINE BABBITT
M-178; 83-85 Sn, bal Sb and Cu
Cast 17,500 TS; 10,500 YS, 27 Brin
For bearings, for high pressures and temperatures.

POWERSTEEL.
M-1052, 0.9 C, 4 Co, bal Fe
For tools, cutters; cast.

POWHATAN
M-435, 0.83 C, 18 W, 4 Cr, 1.7 V, 10.5 Co,
1 Mo, bal Fe
For cutting tools, lathe and planer tools,
high speed steel

PRECEDENT 71 GRADE A
M-1103; 6.5-7.5 Zn, 0.65-0.85 Mg, 0.06-0.15 Cr,
0.10-0.25 Ti, 0.15 max Si, 0.15 max Fe,
0.1 max Cu, 0.1 max Mn, bal Al
Aged 43,000 TS, 33,000 YS, 3 El, 96 Brin.
T6-temper· 50,000 TS, 46,000 YS; 4 El, 100 Brin.
For aircraft and missile guidance systems,
computing devices, age hardens at
room temperature, shock and fatigue resistant

PRECEDENT 71 GRADE B
M-1103, 6.0-7.0 Zn, 0.55-0.75 Mg, 0.06-0.15 Cr,
0.10-0.25 Ti, 0.15 max Si, 0.15 max Fe,
0.1 max Mn, 0.1 max Cu, bal Al
Aged 40,000 TS, 32,000 YS, 7 El, 88 Brin
Stress relieved 40,000 TS, 31,000 YS, 6 El,
90 Brin
For aircraft and missile guidance systems,
computing devices, age hardens at
room temperature, shock and fatigue resistant

PRECEDENT NO 356
M-1103, 6.5-7.5 Si, 0.20-0.40 Mg, bal Al
For light alloy parts,
sand and permanent mold castings.

PRECEDENT NO 356A
M-1103, 7 Si, 0.3 Mg, bal Al
For light alloy parts;
sand and permanent mold castings

PRECISION
M-740; 0.3 C, bal Fe
For structural parts

PRECISION A-12
M-887; 11-13 Si, 0.6 max Cu, 2 max Fe,
0.5 max Ni, bal Al.
Cast. 33,000 TS, 1.5 El; 80 Brin
For light alloy die castings;
corrosion resistant

PRECISION A-50
M-887; 4.5-6.0 Si, 0.6 max Cu, 2 max Fe, bal Al.
Cast 29,000 TS; 4 El; 70 Brin.
For die castings; high impact strength.

PRECISION A-54.
M-887; 4.5-5.5 Si, 3.4-4.5 Cu, 2 max Fe, bal Al.
Cast: 32,000 TS; 2 El; 75 Brin.
For die castings; high strength.

PRECISION A-94.
M-887; 3.5-4.5 Si, 3.0-4.0 Cu, 1.3 max Fe, 0.6 max Zn, bal Al.
Die cast: 38,000 TS; 2 El; 77 Brin.
For die castings; high strength.

PRECISION A-218
M-887; 8 Mg, 1.8 max Fe, 0.2 max Cu, 0.3 max Mn, 0.1 max Ni, bal Al.
For die castings; corrosion resistant.

PRECISION A-360
M-887; 8-10 Si, 0.5 Mg, 2 max Fe, bal Al.
Die cast. 42,000 TS, 23,000 YS; 1.8 El.
For die castings, corrosion resistant.

PRECISION BR-1
M-887, 63-67 Cu, 32-36 Zn, 0.7-1.3 Si
Die cast: 70,000 TS, 35,000 YS, 25 El; 120 Brin.
For die castings; high strength

PRECISION BR-2.
M-887, 81.5 Cu, 14.5 Zn, 4 Si.
Die cast 85,000 TS; 50,000 YS, 8 El; 170 Brin.
For die castings; high strength

PRECISION BR-3
M-887; 83 Cu, 10 Zn,, 5 Si, 1 Mn, 1 Al.
Die cast 105,000 TS; 60,000 YS; 5 El; 190 Brin.
For die castings, high strength

PRECISION M-13
M-887, 8.3-9.7 Al 0.4-1.0 Zn, bal Mg
Die cast 29,000-34,000 TS; 20,000 YS; 2-5 El, 66 Brin.
For die castings

PRECISION ZN-5
M-887, 3.5-4.3 Al, 0.75-1.25 Cu, bal Zn.
Cast 42,000 TS, 4 El; 75 Brin.
For die castings.

PRECISION ZN-6
M-887, 3.5-4.3 Al, 0.10 max Cu, bal Zn.
Cast 36,000 TS, 5 El, 65 Brin.
For die castings.

PRECISION ZN-7
M-887; 3.5-4.3 Al, 2.5-3.5 Cu, bal Zn
Cast 45,000 TS, 5 El; 80 Brin
For die castings

PREMABRAZE 130
M-63, 82 Au, 18 Ni
M P & Flow P. 1742°F.
For brazing stainless steel, Inconel X, other nickel base alloys, good oxidation resistance to 1500°F
AWS BAu-4.

PREMABRAZE 615.
M-63, 61.5 Ag, 24 Cu, 14.5 In
M P 1155-1305°F; for ferrous and non-ferrous and in vacuum tube brazing.

PREMAG.
M-526; 0.8 Ag, bal Cu.
For welding rod; copper welds

PREMALOY 301.
M-63; Pt, Au, Ag, Cu, bal Pd
For resistors, high electrical resistance.

PREMET.
M-1; 30 Co, 19 W, 0.12 C, 2 V, 5 Mo, 0.2-0.5 Mn, bal Fe.
For cutting tools; cast alloy.

PREMIER.
M-248; 15 Cr, 62 Ni, bal Fe.
Annealed: 95,000 TS, 35,000 YS; 40 El; 60 RA.
For resistances; heat resistant; now Alray C.

PREMIER NO. 1.
0.10-0.20 C, 0.65-0.85 Cr, 0.10 max V, bal Fe.
For case hardened parts, carburizing steel.

PREMIER 3½ Ni WELD
M-12; 0.15-0.25 C, 0.4-0.6 Mn, 3.2-3.7 Ni, bal Fe.
For welding wire

PREMIER NO 6
Eng; 0.6-0.7 C, 0.7-0.9 Cr, 0.10 max V, bal Fe.
For hammers, dies, blacksmith tools; water hardened

PREMIER AW WELD.
M-12; 0.14-0.20 C, 0.9-1.2 Mn, bal Fe.
For welding wire; acetylene.

PREMIER "C"
M-248, 24 Fe, 60 Ni, 16 Cr.
For rheostat and resistance units, used up to 1700°F.

PREMIER EA WELD
M-12; 0.06 max C, 0.17 max Mn, bal Fe.
For welding wire, electric.

PREMIER EB WELD
M-12, 0.13-0.18 C, 0.4-0.6 Mn, bal Fe
For welding wire, electric.

PREMIER EP WELD
M-12, 0.13-0.18 C, 0.4-0.6 Mn, bal Fe.
For welding wire; electric

PREMIER GA WELD
M-12, 0.06 max C, 0.17 max Mn, bal Fe.
For welding wire; acetylene

PREMIER GS WELD.
M-12, 0.10 max C, 0.4-0.6 Mn, bal Fe.
For welding wire; acetylene.

PREMIER HC WELD
M-12, 0.95-1.1 C, 0.4-0.6 Mn, bal Fe.
For welding wire, electric or gas.

PREMIER H S WELD
M-12, 0.13-0.18 C, 0.4-0.6 Mn, 1.1-1.4 Ni, 0.55-0.75 Cr, bal Fe.
For welding wire, acetylene welding.

PREMIER MB SPRING
M-12; 0.45-0.70 C, 0.6-1.2 Mn, bal Fe.
For springs, oil hardening.

PREMIER NICKEL CHROME.
M-248, 60-62 Ni, 25 Fe, 14-16 Cr, 0.10 C
Wire 100,000 TS, 60,000 YS, 25 El; 50 RA; 182 Brin
For rheostats, dipping baskets, heating units, wire cloth, corrosion resisting

PREMIER NICKEL CHROME.
M-248, 25 Fe, 11 Cr, 3 Mn, bal Ni
Rod. 100,000 TS, 25 El, 182 Brin
For rheostats, dipping baskets, heating units, wire cloth, corrosion resisting.

PREMIER SPRING.
M-12; 0.45-0.70 C, 0.6-1.2 Mn, bal Fe
Drawn: 145,000-260,000 TS.
For springs, oil hardening

PRESCOLOY.
M-583; 0.2 C, 0.9 Ni, bal Fe.
90,000 TS; 60,000 YS; 25 El; 40 RA.
For truck side frames, bolsters, freight car castings; high strength.

PRESNEAL.
M-64; 0.3 C, Ni, Mo, bal Fe.
Annealed.
For dies, punches; hot work, press and upsetter.

PRESSANT.
M-1340; 0.15 C, 0.2 Si, 0.4 Mn, bal Fe.
Annealed: 70,000 TS; 40,000 YS; 25 El; 60 RA; 145 Brin.
For gears, pinions, cams, camshafts; case hardening steel.

PRESSANT ECR80.
M-1340; 0.15 C, 0.25 Si, 0.5 Mn, 0.65 Cr, bal Fe.
Annealed: 70,000 TS; 40,000 YS; 25 El; 60 RA; 145 Brin.
For gears, pinions, cams, camshafts; case hardening steel

PRESSANT EM212.
M-1340; 0.20 C, 1.25 Mn, 1.15 Cr, bal Fe
For gears, cams, camshafts, case hardening steel.

PRESSCO NO. 1.
M-1168, 85-88 Cu, 1-1.5 Fe, 10-11 Al.
Die cast. 75,000-85,000 TS; 36,000 YS, 26-17 El, 140-180 Brin
For marine hardware, propellers; heat treatable; Al-bronze

PRESSCO NO. 2
M-1168, 80-83 Cu, 13-16 Zn, 3.5-4.5 Si
Die cast: 75,000-85,000 TS; 40,000 YS; 160-200 Brin
For gears, shafts, pump parts; silicon bronze.

PRESSCO NO 3.
M-1168; 55-59 Cu, 1 Mn, 0.2 max Fe, 1 max Sn, 0.5 max Pb, bal Zn
Cast: 76,000 TS; 33,000 YS; 15 El; 102 Brin.
For fittings, spiders, brackets; SAE 43, manganese bronze

PRESSCO NO 4
M-1168; 58-62 Cu, 36-41 Zn, 1 max Pb, 1 max Sn
Die cast: 50,000-60,000 TS, 35,000 YS; 12-10 El
For die castings, corrosion resistant

PRESSCO NO. 5.
M-1168, 3.5-5.5 Ni, 3-5 Fe, 10-11 Al, 3.5 max Mn, bal Cu.
Cast. 90,000 TS, 40,000 YS; 10 El; 157 Brin.
For pump parts, bushings, bearings, Al bronze, heat treatable.

PRESSCO NO 6
M-1168; 59 min Cu, 0.5 max Al, bal Zn
Cast: 40,000 TS, 11,000 YS, 25 El, 79 Brin
For hardware, die castings; yellow brass

PRESSCO NO 7
M-1168; 61.5-63.5 Cu, 35-38 Zn, 0.75-1.25 Pb, 0.9-1.2 Al, 0.5 max Sn, 0.5 Fe
Cast: 63,000 TS, 35,000 YS, 30 El; 102 Brin
For hardware, die castings; free-cutting

PRESSCO NO. 8.
M-1168; 4.5-6.5 Fe, 6.5-7.5 Ni, 11.5-12.5 Al, bal Cu.
Cast: 115,000 TS; 82,000 YS; 3 El, 220 Brin.
For hardware, die castings, Al-bronze.

PRESSCO NO. 9.
M-1168; 58 min Cu, 1.3 max Pb, bal Zn.
Cast: 49,000 TS; 12,000 YS; 5 El; 70 Brin
For hardware, die castings; SAE 41, leaded brass.

PRESSCO NO. 10.
M-1168; 60 max Cu, 1 min Si, bal Zn.
Cast: 74,000 TS; 38,000 YS; 19 El; 130 Brin.
For hardware, die castings; high strength.

PRESSOFOND S5C.
M-1445; 4 Cu, 5.5 Si, bal Al.
Cast: 28,000-32,000 TS; 20,000-23,000 YS; 4-1.5 El; 55-75 Brin
For light alloy parts; heat treatable.

PRESSOFOND S9CF
M-1445; 3.5 Cu, 0.9 Fe, 8.5 Si, bal Al.
Cast: 41,000-47,000 TS; 24,000-29,000 YS; 5.0-2.5 El, 80-100 Brin
For light alloy parts; corrosion resistant

PRESSURDIE NO 1
M-140; 0.3-0.4 C, 0.8-1.0 Si, 4.75-5.25 Cr, 2 V, 5 W, 6 Co, 0.25 Mo, bal Fe
For extrusion dies, dummy blocks, punches, hot work steel, oil hardened.

PRESSURDIE NO 2
M-140, 0.35 C, 1.5 Mo, 1.25 W, 5 Cr, 0.15 V, bal Fe
For extrusion and forging dies, punches, Type H12; hot work steel

PRESSURDIE NO 3
M 140; 0.3-0.4 C, 0.85-1.0 Si, 4.9-5.25 Cr, 0.10-0.15 V, 0.45-0.60 Mo, bal Fe
For tools, aluminum die casting dies, oil hardening

PRESSURDIE NO 3-I
M-140, 0.37 C, 0.35 Mn, 1.0 Si, 5.5 Cr, 0.45 V, 1.15 Mo, bal Fe
For dies, oil hardening

PRESSURDIE 5
M-140, 0.38 C, 1.0 Si, 3.5 Cr, 1.0 V, 1.25 W, 1.0 Mo, 0.60 Mn, bal Fe
Heat treated 268,500 TS, 243,000 YS, 8.5 El, 28 RA, 520 Brin
At 900°F 191,400 TS, 172,000 YS, 14 El, 41 RA, 420 Brin
For aluminum extrusion dies and mandrels, upset punches, hot work steel, tough

PRESSURDIE 6
M-140; 0.40 C, 0.50 Mn, 1.0 C, 3.2 Cr, 0.30 V, 2.5 Mo, bal Fe
For aluminum extrusion dies and mandrels, hot shears, hot work steel, tough

PRESSURDIE NO 7
M-140, 0.50 C, 1.0 Si, 5.0 Cr, 2.0 V, 1.3 Mo, bal Fe
Air or oil hardening hot work tool and die steel

PRESSURDIE NO 16
M-140, 0.55 C, 0.90 Si, 1.25 W, 5 Cr, 1.25 Mo, bal Fe
For trimming and forming dies, forging die inserts, hot work steel, oil hardened

PRESSURDIE C
M-140, 0.38-0.43 C, 4.0-4.5 Cr, 4.0-4.5 W, 4.0-4.5 Co, 1.9-2.2 V, 0.4-0.7 Mo, bal Fe
For dies, dummy blocks, valve dies, extrusion mandrels; hot work steel, air hardened

PRESSURE DIE CASTING
M-122; 62 Cu, 0.75 Pb, 0.50 Sn, bal Zn
Die cast: 58,000 TS, 36,000 YS, 6 El, 7 RA; 124 Brin
For plumbing fixtures, hardware, pressure die casting.

PRESSURE TITE IRON
M-508, 2.85 T.C., 0.65 C.C., 1.25 Ni, 0.8 Mn, 0.4 Cr, 1.6 Si, bal Fe
Cast: 55,000 TS; 285 Brin
For liners, engine sleeves, oil pumps; centrifugal cast

PRESTEM.
M-64; 0.3 C, Ni, Mo, bal Fe.
Hardened: 341-429 Brin.
For dies, punches; hot work, press and upsetter, prehardened.

PRESTO
M-1339, 1.35 C, 4.3 Cr, Co, V, W, bal Fe.
For engraving tools, form cutters, forming dies, high speed steel.

PRESTO 2 KRONEN
M-1339; 0.74 C, 4.1 Cr, 1.1 V, 18.5 W, bal Fe.
For lathe and planer tools, reamers, broaches, taps; high speed steel.

PRESTO B
M-1339; 0.82 C, 4.1 Cr, 0.85 Mo, 8.7 W, 1.6 V, bal Fe
For lathe and planer tools, reamers, drills, taps, high speed steel

PRESTO C3
M-1339, 0.95 C, 4 Cr, Mo, V, W, bal Fe
For lathe and planer tools, reamers, broaches, high speed steel.

PRESTO CHROME BEARING STEEL
M-32, 1.0 C, 0.3 Mn, 0.25 Si, 1.4 Cr, bal Fe.
Oil or water hardenable to 60-66 Rock C.
For ball and roller bearings and races.

PRESTO ENORM.
M-1339, 0.82 C, 4.1 Cr, 0.85 Mo, 1.6 V, 8.7 W, bal Fe
For lathe and planer tools, drills, taps, hobs; high speed steel

PRESTO Mo PLUS
M-1339, 0.85 C, 4 Cr, V, W, Mo, bal Fe
For lathe and planer tools, taps, drills, reamers; high speed steel

PRESTO Mo SUPERIOR
M-1339, 0.80 C, 4 Cr, V, W, Mo, bal Fe
For lathe and planer tools, broaches, reamers, hobs, high speed steel

PRESTO STEEL NO. 9-266
M-32, 1.05 C, 1.4 Cr, bal Fe
Hardened
For ball races, see "Presto Tool."

PRESTO UNIKUM
M-1339, 0.79 C, 4.7 Co, 4.3 Cr, 0.75 Mo, 1.5 V, 18 W, bal Fe
For lathe and planer tools, reamers, broaches, taps, high speed steel.

PRESTO UNIKUM 3
M-1339; 0.86 C, 2.8 Co, 4.3 Cr, 0.85 Mo, 2.1 V, 12 W, bal Fe
For lathe and planer tools, reamers, broaches, hobs; high speed steel

PRESTO UNIKUM 5.
M-1339; 0.79 C, 4.7 Co, 4.3 Cr, 0.75 Mo, 1.5 V, 18 W, bal Fe
For lathe and planer tools, reamers, broaches, drills, high speed steel

PRESTO UNIKUM 125
M-1339, 0.80 C, 4.3 Cr, Co, W, V, Mo, bal Fe.
For lathe and planer tools, reamers, broaches, hobs; high speed steel.

PRESTO UNIKUM SUPERB
M-1339; 0.76 C, 10 Co, 4.2 Cr, 0.8 Mo, 1.8 V, 18 W, bal Fe.
For lathe and planer tools, form cutters; high speed steel.

PRESTO V22.
M-1339; 0.86 C, 4.1 Cr, 0.8 Mo, 2.5 V, 12 W, bal Fe.
For lathe and planer tools, reamers, broaches, hobs; high speed steel.

PRESTO V205
M-1339, 1.3 C, 4.3 Cr, 0.85 Mo, 3.8 V, 12 W, bal Fe.
For engraving tools, form cutters, forming dies; high speed steel.

PREUSS ALLOY
30 Co, 0.2-1.5 Si, 0.04-0.06 C, bal Fe.
For magnetic circuits, high permeabiltiy.

PREWESTA 1.
M-1294, 0.55 C, 1 Ni, 0.18 V, 1.8 W, bal Fe.
For upsetters, crimpers, cold punches, oil hardened, tough.

PREWESTA 2
M-1294; 0.45 C, 1 Ni, 0.18 V, 1.85 W, bal Fe.
For upsetters, crimpers, cold punches; oil hardened, tough

PREWESTA 3.
M-1294; 0.35 C, 1.05 Cr, 0.18 V, 1.85 W, bal Fe.
For upsetters, crimpers, cold punches; oil hardened, tough

PRG 35
M-1340; 0.5 C, 1.05 Cr, 3.25 Ni, bal Fe.
For gears, bolts, springs, crankshafts, oil hardened, shock resistant

PRIMA 2H
M-1337, 1.3 C, 0.25 max Mn, 0.25 max Si, bal Fe.
For engravers tools, form cutters, water hardened, Type W1.

PRIMA 3MH
M-1337, 1.15 C, 0.25 max Si, 0.35 max Mn, bal Fe
For drills, taps, hobs, cutters, lathe tools, Type W1, water hardened.

PRIMA 4ZH
M-1322, M-1337, 1.1 C, 0.25 max Si, 0.25 max Mn, bal Fe.
For drills, taps, hobs, cutters, lathe tools; Type W1, water hardened.

PRIMA 5ZAH
M-1337, M-1322, 0.85 C, 0.25 max Si, 0.25 max Mn, bal Fe
Heat treated 190,000 TS, 145,000 YS; 10 El, 30 RA, 400 Brin.
For springs, tools, punches, drills, Type W1, water hardened

PRIMA 6 SEHR ZAH.
M-1337, 0.70 C, 0.25 max Si, 0.25 max Mn, bal Fe
Heat treated: 175,000 TS; 128,000 YS, 12 El, 37 RA, 355 Brin.
For springs, axes, rails, tools, punches; Type W1, water hardened

PRIMA 45
M-1340; 0.45 C, 0.5 Si, 0.6 Mn, bal Fe.
Hot rolled. 98,000 TS; 59,000 YS; 24 El, 45 RA; 212 Brin
For gears, bolts, shafts; water hardened.

PRIMA 55.
M-1340; 0.55 C, 0.2 Si, 0.6 Mn, bal Fe.
Heat treated: 150,000 TS; 110,000 YS; 14 El; 45 RA; 320 Brin.
For gears, springs, crimpers, axles, shafts; water hardened.

PRIMA 60
M-1340; 0.60 C, 0.5 Si, 0.6 Mn, bal Fe.
Heat treated: 160,000 TS; 113,000 YS, 12 El;
40 RA; 325 Brin.
For springs, punches, crimpers, axes,, hammers;
water hardened

PRIMA 65.
M-1319, 0.45 C, 0.50 Si, 0.60 Mn, bal Fe.
Hot rolled· 98,000 TS; 60,000 YS; 24 El;
45 RA; 215 Brin
For gears, bolts, machine tool parts, shafts,
water hardened.

PRIMA 75.
M-1340; 0.75 C, 0.4 Si, 0.6 Mn, bal Fe
Heat treated 180,000 TS, 140,000 YS, 14 El,
36 RA, 375 Brin
For crimpers, punches, springs, rails,
water hardened.

PRIMA 85.
M-1319; 0.60 C, 0.4 Si, 0.6 Mn, bal Fe
Heat treated. 160,000 TS, 115,000 YS, 12 El,
40 RA; 325 Brin.
For gears, bolts, hammers, axles, shafts;
water hardened.

PRIMA 90.
M-1319; 0.67 C, 0.25-0.50 Si, 0.3-0.8 Mn, bal Fe
Heat treated· 175,000 TS, 128,000 YS, 12 El,
37 RA, 355 Brin
For rails, springs, hammers, axes; water hardened

PRIMA 90
M-1340, 0.9 C, 0.4 Si, 0.6 Mn, bal Fe
Heat treated 190,000 TS, 145,000 YS, 10 El,
30 RA; 400 Brin
For tools, cutters, springs, drills,
water hardened, Type W1.

PRIMA 95.
M-1319; 0.75 C, 0.25-0.50 Si, 0.3-0.8 Mn, bal Fe
Heat treated. 185,000 TS; 140,000 YS; 15 El,
40 RA, 395 Brin
For springs, rails, punches, tools, crimpers,
water hardened

PRIMA 100
M-1319; 0.90 C, 0.25-0.50 Si, 0.3-0.8 Mn, bal Fe
Annealed. 95,000 TS, 50,000 YS, 25 El, 45 RA,
190 Brin
For springs, tools, cutters, punches, drills, taps;
Type W1, water hardened

PRIMA H
M-27, M-1314, M-1344, 1.3 C, 0.25 max Si,
0.25 max Mn, bal Fe
For engravers tools, drills, reamers, form cutters,
Type W1; water hardened.

PRIMA H
M-1309, 0.90 C, 0.25-0.50 Si, 0.3 0.8 Mn, bal Fe
Heat treated· 190,000 TS; 145,000 YS, 10 El,
30 RA, 400 Brin
For springs, tools, cutters, punches, drills, taps,
Type W1; water hardened

PRIMA HARTE 3.
M-1346; 0.9 C, 0.4 Si, 0.6 Mn, bal Fe.
Heat treated. 190,000 TS, 145,000 YS; 10 El,
30 RA, 400 Brin.
For springs, tools, cutters, dies,
Type W1; water hardened

PRIMA HARTE ¾
M-1346; 0.75 C, 0.4 Si, 0.6 Mn, bal Fe
Heat treated: 175,000 TS; 126,000 YS, 10 El,
35 RA; 375 Brin.
For springs, tools, hammers, rails, axes,
Type W1; water hardened

PRIMA HARTE 4.
M-1346; 0.60 C, 0.4 Si, 0.6 Mn, bal Fe.
Heat treated: 160,000 TS; 113,000 YS, 12 El;
40 RA; 325 Brin.
For crankshafts, axes, axles, crimpers,
punches, gears, water hardened

PRIMA HARTE 5
M-1346, 0.45 C, 0.4 Si, 0.6 Mn, bal Fe.
Hot rolled 98,000 TS, 59,000 YS, 24 El, 45 RA;
215 Brin
For gears, pinions, bolts, studs, crankshafts,
water hardened

PRIMA HARTE 6
M-1346; 0.35 C, 0.3-0.5 Si, 0.3 0.8 Mn, bal Fe
Hot rolled 85,000 TS, 54,000 YS; 30 El, 53 RA;
185 Brin
For gears, bolts, fasteners, crankshafts,
water hardened

PRIMA MH
M-501, M-1314, M-1344, 1.15 C, 0.25 max Si,
0.25 max Mn, bal Fe
Annealed 100,000 TS, 56,000 YS, 20 El, 40 RA;
210 Brin
For drills, taps, reamers, hobs, cutters,
Type W1, water hardened

PRIMA MH
M 1309, 0.75 C, 0.25-0.50 Si, 0.3-0.8 Mn, bal Fe.
Heat treated 175,000 TS, 130,000 YS, 10 El,
35 RA, 380 Brin
For springs, rails, hammers, tools, punches,
Type W1, water hardened

PRIMA MH
M-1352, M-1338, 0.90 C, 0.25-0.50 Si, 0.3 0.8 Mn,
bal Fe
Heat treated 190,000 TS, 145,000 YS, 10 El,
30 RA, 400 Brin
For springs, tools, drills taps, reamers,
hobs, Type W1; water hardened.

PRIMA MH 100
M-27, 1.0 C, 0.25 max Si, 0.25 Mn, bal Fe
Annealed 100,000 TS, 53,000 YS, 21 El, 42 RA;
200 Brin
For springs, tools, cutters, reamers,
Type W1, water hardened

PRIMA MH 115
M-27, 1.15 C, 0.25 max Si, 0.25 max Mn, bal Fe.
Annealed 110,000 TS, 56,000 YS, 18 El, 40 RA;
210 Brin
For drills, taps, reamers, broaches,
Type W1, water hardened

PRIMA ZAHWEICH
M-1314, 0.45 C, 0.25 max Si, 0.25 max Mn,
bal Fe
Hot rolled 98,000 TS, 59,000 YS, 24 El,
54 RA, 212 Brin
For gears, bolts, fasteners, shafts,
water hardened

PRIMA ZH I
M-1314, 1 C, 0.25 max Si, 0.25 max Mn, bal Fe.
Annealed. 100,000 TS; 53,000 YS, 21 El, 42 RA,
200 Brin.
For cutters, drills, punches, springs, reamers, taps,
Type W1, water hardened

PRIMA ZH II.
M-1314, 0.9 C, 0.25 max Si, 0.25 max Mn,
bal Fe
Heat treated· 190,000 TS, 145,000 YS, 10 El;
30 RA, 400 Brin.
For cutters, taps, springs, drills, hobs,
Type W1; water hardened.

PRIMA ZH III.
M-1314; 0.85 C, 0.25 max Si, 0.25 max Mn, bal Fe.
Heat treated: 188,000 TS; 143,000 YS; 12 El; 35 RA; 320 Brin.
For drills, punches, taps, springs, cutters; Type W1, water hardened.

PRIMER GILDING.
97 Cu, 3 Zn, traces Pb, Fe.
For primers, base for fire-enameled parts.

PRINCE.
M-365, 1 C, 1 Cr, bal Fe.
For ballbearing; water hardening.

PRINCES METAL NO. 1.
83-61 Cu, 17-39 Zn.
For hardware, brass.

PRINCES METAL NO 2
85 Cu, 15 Zn
For flexible hose; good workability.

PRIZE RIBBON.
M-959; Cu, Sb, bal Sn.
Cast 15,200 TS, 34.4 Brin.
For bearings, Babbitt.

PRK-33.
M-40, M-157, 3.7 Co, 13.6 Cr, 79.5 Fe, 0.84 Mo, 1.5 C, 0.60 Si, 0.25 V, 0.30 Mn, 0.50 Ni.
Air hardened 602-654 Brin.
For milling cutters, twist drills, press tools; non-scaling steel, non-deforming.

PRK 33 COBALTCROM.
M-289, 1.4 C, 13 Cr, 3.3 Co, 0.5 Ni, 0.6 Mo, bal Fe
For blanking and forming dies, trimmers, punches, air hardened, non-deforming, wear resistant.

PRK-SH
M-40, C, Cr, W, bal Fe.
For self hardening welding electrodes; for hardened tool and die steels.

PROBEDIT
Russian, WC
For cutting tools and dies; sintered

PRODUCTION-ROD NO. 140.
M-1096, 0.06-0.10 C, 0.55 Mn. 0.03 S, 0.01 P, 0.10-0.25 Si, bal Fe
Welded. 68,000-75,000 TS, 55,000-65,000 YS; 23-27 El, 50-55 RA
For all purpose welding rod; AWS-E6013

PROFERALI
M-347, 2.2-2.35 Si, 0.5-0.6 Mn, 0.55-1.0 combined C, 3.15 total C, 0.8-1.0 Cr, 0.4-0.5 Mo, 0.4-0.5 Ni, bal Fe
60,000-75,000 TS, 250-300 Brin
For diesel engine parts, crankshafts, cylinders, pistons, refrigeration parts, high test cast iron; wear resistant

PROFERALI. A.
M-347; 3.3 C, 1.5 Ni, 0.9 Cr, 0.2 Mo, 2 Si, bal Fe.
Cast: 35,000 TS, 207-241 Brin
For oil pump gears; cast iron.

PROGEN.
M-969, 0.33-0.40 C, 0.5-0.7 Mo, 0.55-0.75 Cr, 0.45-0.65 Cu, 0.5-0.7 Si, 0.15 Ti, bal Fe
Annealed: 97,000 TS; 57,000 YS; 22 El; 42 RA; 197 Brin.
Hardened. 285,000 TS; 245,000 YS, 11 El; 40 RA, 555 Brin.
For tools, chisels, picks, dies for die casting; tough, shock resistant, self-tempering tool steel.

PROJECT-70.
M-32, 0.15 max C, 12-14 Cr, bal Fe, 0.15 S.
Annealed: 103,000 TS; 75,000 YS; 22 El; 216 Brin.
For fittings, gears, housings, valve stems, valve trim.
Corrosion resistant, free-cutting.

PROJECTILE STEEL.
U.S.; 2.4 Cr, 0.8 C, 0.4 Mn, 0.2 Si, bal Fe.
110,000 TS; 80,000 YS; 18 El.
For projectiles; oil hardening.

PROLYT.
M-1088; Pb-Sn.
For Al solder; soft.

PROMAL
M-89; 1.8 T.C., 0.4 C.C., 1.0 Si, bal Fe.
Cast. 65,000-70,000 TS, 45,000-50,000 YS; 14-10 El, 170-190 Brin
For sprockets, gears, chains, brake drums, malleable iron.

PROMAL.
M-228; 1.8 total C, 0.4 combined C, 1.0 Si, 0.3 Mn, bal Fe.
Cast: 65,000-70,000 TS; 45,000-50,000 YS; 14-10 El; 170-190 Brin.
For cast chains, sprockets, parts, valve parts, wrench gears, brake drums; malleable cast iron.

PROMET NO 1
M-956, 66-71 Cu, 2-4 Sn, 24.5-29.5 Pb, 0.5-1.0 Ni.
Cast 18,000 TS, 11,000 YS; 10 El; 30 Brin.
For bearings, wear parts, castings; sand and centrifugally cast

PROMET 2S
M-956, 70-75 Cu, 4.0-5.5 Sn, 19.0-23.0 Pb, 0.2-0.8 Ni.
Sand Cast: 27,000 TS, 15,000 YS; 16 El; 45-55 Brin.
For bearings, bushings, sleeves.
AMS 4840, ASTM B144-3E.

PROMET NO 3.
M-956, 85-89 Cu, 7.5-9.0 Sn, 0.5-1.5 Pb, 0.5-1.0 Ni, 2.5-5.0 Zn.
Bearing and gear bronze.
Sand Cast: 40,000 TS; 20,000 YS, 28 El; 70 Brin.
For high duty bearings, gears, pump impellers, piston rings, steam fittings

PROMET NO. 6
M-956; 76-79 Cu, 4.5-6.5 Sn, 12.5-15.5 Pb, 1.0-1.7 Ni
Cast. 30,000 TS, 20,000 YS; 16 El, 64 Brin.
For bearings, bushings, castings; heavy duty.

PROMET 6CR
M-956, 76-80 Cu, 7-9 Sn, 11-14 Pb, 0.25-1.0 Ni.
Cast 37,000 TS, 20,000 YS; 20 El, 65 Brin
For bearings, wear parts.
Corrosion resistant, good embeddability.

PROMET 6SK
M-956, 75-79 Cu, 6.5-8.0 Sn, 12.5-15.5 Pb, 1.25-1.75 Ni
Sand Cast. 36,000 TS, 19,000 YS, 18 El, 60 Brin.
For bearings, bushings, liners, sleeves, pump bodies; free-cutting.

PROMET 22.
M-956; 86.0 Cu, 10 Sn, 2 Pb, 2 Zn.
Sand Cast: 43,000 TS; 19,000 YS; 18-40 El; 68 Brin
For heavy duty bearings, nuts, gears, worm wheels.

PROMET 80A.
M-956, 78-82 Cu, 9-11 Sn, 8-11 Pb, 0.75 max Zn, 0.75 max Ni.
Sand cast. 39,000 TS; 18,000 YS; 30 El; 67 Brin.
High leaded tin bronze for bearing applications.

PROMET 83A.
M-956; 81-85 Cu, 6.25-7.5 Sn, 6.0-8.0 Pb, 2.0-4.0 Zn, 0.50 max Ni.
Sand cast. 34,000 TS; 18,000 YS; 15 El; 65 Brin.
Leaded, general utility bearing bronze for bearings, bushings.
SAE 660. ASTM B144-3B.

PROMET 85A.
M-956; 84-86 Cu, 4.0-6.0 Sn, 4.0-6.0 Pb, 4.0-6.0 Zn, 0.8 max Ni.
Sand Cast: 35,000 TS; 15,000 YS, 32 El, 54-67 Brin.
For bearings, bushings.
SAE 40; ASTM B145-4A.

PROMET 86P
M-956, 78.0-82.0 Cu, 2.25-3.5 Sn, 6.0-8.0 Pb, 7.0-10.0 Zn, 1.0 max Ni
Sand cast: 34,000 TS; 15,000 YS, 24 El, 55 Brin
Leaded semi-red brass
For general hardware fittings, pump bodies, low pressure valves and fittings

PROMET 89-S.
M-956, 86-89 Cu, 7.0-9.0 Sn, 2.0-4.0 Pb, 0.25-0.75 Ni.
Cent chill cast 40,000 TS, 20,000 YS, 30 El
For heavy duty bearings, gears, worm wheels

PROMET 91-CK
M-956; 83 min Cu, 9.0-10.5 Sn, 1.3-3.0 Pb, 0.75-1.5 Ni, 1.5 max Zn
Cent. chill cast 50,000 TS, 22,000 YS, 15 El.
For heavy duty bearings, gears, worm wheels.

PROMET 91-SK replaced by **PROMET 91-CK**

PROMET 93 AB
M-956; 8.5-9.5 Al, 2.5-4.0 Fe, 86.0 min Cu
Sand cast. 79,000 TS, 28,000 YS, 30 El, 130 Brin
Alpha phase aluminum bronze
For worm wheels, bearings and bushings, slides, pump parts, utility machine parts

PROMET 100
M-956, 55-60 Cu, 0.5-2.0 Fe, 0.5-2.0 Al, 0.25-1.5 Mn, 1.0 max Sn, bal Zn
Cast: 65,000-80,000 TS; 28,000-40,000 YS, 20-40 El, 115-150 Brin
For valves, engine framing, valve stems, lever arms, gears, liners, bearings, marine hardwear
Alpha-beta manganese bronze SAE 43

PROMET NO 101-AB
M-956, 86-90 Cu, 0.75-1.5 Fe, 9-11 Al, 0.50 max Mn, 0.5 max Ni
Cast 85,000 TS, 45,000 YS, 25 El
For gears, propellers, shafts, Al-bronze, corrosion resistant

PROMET 104 AB
M-956, 10-11 Al, 3-5 Fe, 1.0 max Ni, 0.5 max Mn, 83.0 min Cu
Sand Cast (min): 80,000 TS, 30,000 YS; 12 El, 145 Brin.
Centrifugal (min): 90,000 TS, 32,000 YS; 12 El, 150 Brin.
For gears, worm wheels, rolling mill bearings, and slippers, bearing races.
Aluminum bronze, wear and fatigue and corrosion resistant.

PROMET 115-N.
M-956; 78 min Cu, 3.0-5.0 Fe, 3.0-5.5 Ni, 10.0-11.5 Al, 3.5 max Mn.
Cast: 100,000 TS; 45,000 YS; 8 El; 195 Brin.
Heat Treated 118,000 TS; 80,000 YS; 7 El; 240 Brin.
For bearings, gears, cams, valve and pump parts, castings.
Corrosion resistant, heat treatable. ASM 4880.

PROMET 150.
M-956; 60-68 Cu, 0.2 max Sn, 0.2 max Pb, 2.0-4.0 Fe, 3.5-5.0 Al, 2.5-5.0 Mn, bal Zn.
Cast (min): 90,000 TS; 45,000 YS; 18 El.
For gears, cams, hydraulic cylinder parts, bearings

PROMET 200.
M-956; 60-68 Cu, 3.5-7.0 Al, 2.0-4.0 Fe, 2.5-5.0 Mn, 0.2 max Sn, 0.2 max Pb, bal Zn.
Sand cast: 110,000-119,000 TS; 60,000-80,000 YS; 12-14 El, 200-225 Brin.
For valve stems, gears, cams, bridge parts, heavy load bearings, hydraulic cylinder parts.
SAE 430B ASTM B147-8C.

PROMET 406
M-956, 62 Cu, 1.0 Sn, 1.0 Pb, 36 Zn (nominal).
Cast: 40,000 TS; 14,000 YS, 15 El .
For bushings, hardware fittings, ornaments.
QQ-B-621 Class A

PROMET 712
M-956, 67-72 Cu, 8.5-11.0 Sn, 18-22 Pb, 0.25-1.0 Ni
Sand cast 33,000 TS, 17,000 YS, 18 El, 53-63 Brin
For bearings, especially under boundary or mixed film lubricants

PROMET 782
M-956, 65-72 Cu, 7.0-9.0 Sn, 20-24 Pb, 0.25-1.0 Ni
Sand cast 30,000 TS, 17,000 YS, 15 El, 45-60 Brin
High lead tin bronze; for bearings, especially under boundary or mixed film lubricants, Can deform to correct bad fit.

PROMETAL
M-700, C, Cr, Ni, bal Fe
For stainless parts, heat and corrosion resistant

PROMETAL CHROME INOXYDABLE R F
M-700, C, Cr, Ni, bal Fe
For stainless parts; heat and corrosion resistant

PROMETAL INOXYDABLE R F -3.
M-700, C, Cr, Ni, bal Fe
For stainless parts; heat and corrosion resistant

PROMET BRONZE 53
M-956, 11.5-12.5 Sn, 0.02 max P, (others 0.5 max), bal Cu
Cent. Cast 50,000 TS, 25,000 YS, 12 El; 95 Brin.
For worm gears and wheels

PROMET BRONZE 53L
M-956, 9.75-11.5 Sn, 0.3 max P, 0.25 Pb, (others 0.5) 1.25-1.75 Ni, 85-89 Cu
Cent Cast. 35,000 TS; 12 El, 85 Brin.
For worm gears and wheels.

PROMET BRONZE 53N
M-956, 11.0-12.0 Sn, 0.25 max P, (others 0.5 max), 1.25-1.75 Ni, bal Cu
Cent. Cast 50,000 TS, 28,000 YS; 12 El, 100 Brin
For worm gears and wheels.

PROMETHIUM.
67 Cu, 30 Zn, 3 Al
For condenser tubes, high ductility

PROMET M-640
M-956; 84-88 Cu, 10-12 Sn, 0.5-1.25 Pb, 1.25-1.75 Ni, 0.10-0.30 P.
Centrifugal Chill Cast. 55,000 TS; 27,000 YS; 12 El.
For heavy duty bearings, gears, worm wheels.

PRONET P-48N.
M-956; 9.25-10.75 Sn, 2.0-3.5 Pb; 3.0-4.0 Ni, (others 1.25), bal Cu.
Leaded nickel tin bronze.
Sand Cast: 50,000 TS; 28,000 YS; 18 El; 85 Brin.
For heavy duty bearings, nuts, gears, worm wheels. ASTM B427; Alloy D.

PROMET X.
M-956; 75 Sb, 3.5 Cu, bal Sn.
Cast: 10,900 TS; 8 El.
For bearings, bushings; Babbitt; C.S. 13625.

PROMET XX.
M-956; 7.5 Pb, 15 Sb, 10 Sn.
Cast: 10,500 TS; 4 El.
For bearings, bushings; Babbitt; C.S. 17150.

PROMET XXX
M-956; 17.5 Sb, 1.4 Sn, 1.5 As, 0.5 Cu, bal Pb.
Cast: 10,350 TS; 2 El.
For bearings, bushings; Babbitt; C.S. 14200.

PROPELLER BUSHING.
69 Zn, 19 Sn, 7 Sb, 5 Cu
For propeller bushings.

PROPLATINUM.
72 Ni, 23.6 Ag, 3.7 Bi, 0.7 Au.
For corrosion resistant parts; platinum substitute.

PROTECTIVE DECK PLATE.
3.5 Ni, 1.5 Cr, 0.2-0.3 C, bal Fe.
For armor plate, case-hardened.

PROTECTIVE NETTING.
27.8 Ni, 0.4 C, bal Fe.
For armor steel for torpedo defense, netting; corrosion resistant

PROTOCHROME.
M-1201, 2.0-2.5 C, 24-27 Cr, bal Fe.
Welded 600 Brin
For hard surfacing electrode; heat and abrasion resistant

PROTOLOY
M-1523, 80 Ni, 20 Cr
Resistance Wire: 650 ohms per cir mil. ft.
Ann: 100,000 psi, hard drawn· 225,000 psi
For resistors and heating elements.
Max. oper. temp.: 1100°C.

PROTOLOY B
M-1523, 80 Ni, 20 Cr.
Resistance wire· 680 ohms per cir, mil ft
Ann: 100,000 psi, hard drawn 225,000 psi
For resistors.
Max oper temp.: 1100°C

PSI NO. 1.
M-1053, 0.92-1.02 C, 0.95-1.2 Mn, 0.5-0.7 Si, 0.9-1.15 Cr, bal Fe.
For master tools, gauges, ceramic molds; non-deforming, wear resistant.

PSI NO 2.
M-1053; 0.87-0.97 C, 1.4-1.7 Mn, 0.6-0.8 Si, 1.4-1.7 Cr, bal Fe.
For master tools and gauges, clutch liners, pump sleeves; non-deforming, wear resistant.

PSP.
M-459; 0.5 C, 0.25 Si, 0.50 Mn, 1 Cr, 3.25 Ni, bal Fe.
For coining dies, gears, shafts; oil hardened, tough.

PSU.
M-459; 0.08 C, 0.4 Mn, 0.05 Si, bal Fe.
Welded: 68,000 TS; 45,000 YS; 30 El; 60 RA.
For welding rod.

P-TIN ALLOY.
M-1557; 55.5 Sn, 41.1 Pb, 3.4 Sb.
For soldering.
Soft solder.

PULSUS.
M-912; 0.35-0.42 C, 4.7-5.0 Cr, 1.5 Ni, 0.5 Mo, 0.2 V, bal Fe.
For tools, dies; hot work steel.

PUMP COCKS.
72 Zn, 7 Cu, 21 Sn.
For pump cocks; castings.

PURALLOY.
M-1466: 3 C, Si, Mn, bal Fe.
For rolls for paper and allied industries; cast iron.

PURCO CHISEL.
M-372, 0.7 C, 2 Si, 0.9 Mn, bal Fe.
For chisels, punches; tough.

PURE ORE AIRCHROME see AIR CHROME.

PURE ORE CLIPPER see CLIPPER.

PURE ORE D-C-33.
M-335; 0.33 C, 5 Cr, 1.4 W, 1.6 Mo, 0.9 Si, 0.3 Mn, bal Fe.
For hammer dies, press tools, punches, hot shears; hot work steel, oil hardened.

PURE ORE EXTRA.
M-335, C as specified, bal Fe.
For tools, dies; water hardening; AISI W1.

PURE ORE HI-RUN see HI-RUN.

PURE-ORE KLS-44.
M-335, 0.57 C, 0.5 Mn, 1 Cr, 0.9 Mo, 1.4 Ni, bal Fe.
For hot work dies; hot work steel.

PURE ORE SPECIAL.
M-335, C as specified, bal Fe
Water hardening tool steel; for dies and special tools, AISI W1.

PURE ORE STANDARD.
M-335; C as specified; bal Fe.
Water hardening tool steel; for tools, dies, AISI W2.

PURE ORE SUPERALLOY see SUPERALLOY.

PURE SILVER SOLDER.
72 Ag, 28 Cu.
For silver solder, corrosion resistant.

PURETUNG.
M-725, 99.9 W.
For welding electrodes

PURO 18/8.
M-1339, 0.15 max C, 18 Cr, 8.5 Ni, bal Fe.
Annealed: 80,000 TS; 35,000 YS; 55 El; 75 RA; 150 Brin.
For chemical plant equipment, tanks; Type 302; stainless, austenitic.

PURO H.
M-1339; 0.4 C, 13 Cr, 0.4 Si, bal Fe.
Annealed: 100,000 TS; 55,000 YS; 25 El; 55 RA; 200 Brin.
For valve trim, gauges, valves, turbine blades; Type 420; corrosion resistant.

PURO M.
M-1339; 0.2 C, 0.4 Si, 13 Cr, bal Fe.
Annealed: 95,000 TS; 50,000 YS; 28 El; 58 RA; 195 Brin.
For valve trim, gauges, cutlery, turbine blades; Type 420: stainless, hardenable.

PURO-MMo
M-1652; 0.20 C, 13 Cr, 1 Mo, bal Fe.
Annealed: 95,000 TS; 50,000 YS; 25 El; B 92 Rock.
Ht. Tr.: 250,000 TS; 215,000 YS; 8 El; C 52 Rock.
For cutlery, surgical instruments, gears, shafts, needle valves, gages.
Corrosion resistant, hardenable.

PURO-MMo 2.
M-1652; 0.15 C, 13 Cr, 1 Mo, bal Fe.
Annealed: 70,000 TS; 35,000 YS; 30 El; B 80 Rock.
Cold Drawn: 95,000 TS; 80,000 YS: 15 El; B 92 Rock.
For chemical plant and oil refinery equipment.
Corrosion resistant.

PURON.
M-118; 99.95 Fe
For spectroscopic and magnetic standards; high purity iron.

PURO W.
M-1339; 0.10 C, 0.4 Si, 13 Cr, bal Fe
Annealed: 75,000 TS; 40,000 YS, 35 El; 70 RA; 155 Brin.
Cold drawn· 100,000 TS; 85,000 YS; 17 El; 60 RA; 200 Brin.
For valve trim, cutlery, surgical instruments, Type 410; stainless.

PURPLE CUT STEEL.
M-1; 1.2 C, 1.2 Cr, 1 2 Mo, 0 25 V, 1 2 Si, 0 40 W, 0.3 Mn, bal Fe.
For taps, threading dies, broaches, milling cutters, drills, and tools, punches, retains cutting edge at purple heat

PURPLE LABEL.
M-69; 0 74 C, 5 Co, 18.5 W, 4.3 Cr, 1 5 V, bal Fe.
For high speed cutting tools, lathe and planer tools; high speed steel.

PURPLE LABEL.
M-69; 1.1 C, 0 20 Mn, bal Fe, Co
For tools, turning tools; high speed steel

PURPLE LABEL
M-343; 0 5-1 1 C, 0.2-0 9 Mn, bal Fe.
Water hardened
For tools.

PURPLE LABEL EXTRA
M-69; 0 78 C, 0 8 Mo, 18 5 W, 8 Co, 2 V, 4 Cr, bal Fe.
Annealed 228-241 Brin
For heavy roughing cutters, lathe and planer tools; Type T5; high speed steel.

PURPLE LABEL SPECIAL.
M-69; 0.79 C, 4 Cr, 2 V, 0.75 Mo, 14 W, 5 Co, bal Fe.
For lathe and planer tools, drills, broaches; high speed steel

PW2.
M-459; 0 55 C, 1.25 Cr, 2 75 W, 0.2 V, bal Fe.
Heat Treated: 231,000-315,000 TS; 209,000-275,000 YS, 9-11 El; 27-42 RA; C 48-56 Rock.
For headers and swaging dies, chipping chisels, rivet busters, track tools.
Type S1 shock resisting tool steel, good fatigue resistance.

PW 190R.
M-1321; 0.35 C, 2.8 Cr, 9 W, 0.3 V, bal Fe.
For extrusion rams and liners; hot work steel, oil hardened.

PWA-649.
M-1491; 0 03-0.10 C, 0.35 max Mn, 50.0-55.0 Ni, 17.0-21 0 Cr, 2.8-3.0 Mo, bal Fe.
At R T. 200,000 TS; 170,000 YS; 20 El; 25 RA; C 42 Rock
At 1200°F: 165,000 TS; 140,000 YS; 20 El; 25 RA.
For aircraft and jet engine components, high temperature bolting.
Similar to alloy 718C, Corrosion and oxidation resistance.

PWA651A
M-1278; 23 5-26 5 Cr, 2-4 Mo, 5 max Fe, 10-15 Co, 6-8 W, bal Ni.
For jet engine components; heat and corrosion resistant.

PWA 652
M-1491, 0 10 max C, 0 50 max Mn, 0 75 max Si, 18-21 Cr, 3 5-5 0 Mo, bal Ni
Heat Treated: 188,000 TS; 115,000 YS; 28 El, 25 RA
For jet engine and gas turbine buckets and discs, high temperature bolts
Creep and heat resistant Similar to Waspaloy

PWA 653
M-1491, 0.4-0 5 C, 10-12 W, 20-22 Cr, 1 max Ni, 0 6 max Fe, 1.5-2 0 Cb + Ta, bal Co
Cast 120,000 TS; 90,000 YS; C 38 Rock.
At 1800°F 37,000 TS, 27,000 YS; 24 El.
For gas turbine engine components, turbine nozzle vanes.
High heat and oxidation resistant in the 1000-2000°F range

PWA 656B
M-1491; 0 05-0 09 C, 0 15 max Mn, 0 20 max Si, 14 0-15 5 Cr, 3 90 4.90 Mo, bal Ni
Rolled 205,000 TS, 140,000 YS, 17 El, 20 RA
For turbine and jet engine components, combustion chambers
Creep and oxidation resistant Similar to U-700.

PWA 663.
M 1491; 0 1 C, 8 Cr, 10 Co, 6 Mo, 4 25 Ta, 6 Al, 1 Ti, Zr, B, bal Co.
At R T · 141,000 TS; 120,000 YS, 8 El
At 1400°F· 138,000 TS, 117,000 YS, 4 El
For high temperature applications, turbines, jet engines
Heat resistant Similar to B1900.

PWA 664
M-1491, 0 12-0 17 C, 8 10 Cr, 11 5-13 5 W, 9-11 Co, 0 75-1 25 Cb, 4 7-5 2 Al, 2 Ti, 0 05 Zr, 0 01-0 02 B, bal Ni
As Cast 135,000 TS, 120,000 YS, 7 El
At 1400°F: 135,000 TS, 122,000 YS, 3 5 El.
For cast turbine blades and vanes in aircraft gas turbines
Precipitation hardening, high temperature strength.

PWA 786A.
M-1278; 0 25 max C, 15 5-17 5 Cr, 3 5-5.0 Ni, 3 5-4 5 Cu, 0 2 Ti, bal Fe.
For chemical plant equipment; heat and corrosion resistant

PWA 1030
M-1491, 0 06 C, 0.08 Mn, 0 01 S, 0 004 P, 0 1 Si, 20 5 Cr, 14 2 Co, 4.2 Mo, 3 Ti, 1.5 Al, 0.03 Zr, 0 003 B, 0 05 Cu, bal Ni
Aged 186 000 TS; 138,000 YS; 26 El; C 39 Rock
For jet engine turbine buckets and discs, high temperature bolts, missile systems
Precipitation hardened. Waspalloy. High temperature strength.

P.X.D.
M-73; C, W, Ni, Mo, bal Fe.
For piercing points, hot forging dies; for hot working.

PYR-AIR-DIE
M-1432; C, alloy, bal Fe.
For blanking and forming dies, cutter blades; air hardened, non-deforming.

PYR-AIR-DIE MODIFIED.
M-1432; 0.55 C, 0.9 Mn, 0.25 Si, 3.5 Cr, 0.25 Ni, 0.25 V, 1.4 Mo, bal Fe
Air or oil hardening tool steel.

PYRAL.
M-104; 0.12 max C, 6 Cr, Mo, Al, bal Fe
Annealed: 70,000 TS, 30,000 YS, 28 El, 65 RA, 160 Brin.
For oil refinery equipment; Type 501; corrosion and creep resistant.

PYRALLOY
M-472; 0.3 C, 12-16 Cr, bal Fe.
69,000 TS
For furnace parts, valves for internal combustion engines, heat and corrosion resistant to 800°C

PYRAMID BABBITT
M-178; Sn, Sb, bal Pb.
Cast 17,800 TS; 8,870 Brin
For bearings, Babbitts; pouring temperature 875-1000°F

PYRAMID SPECIAL
M-433, 0.9-1.2 C, bal Fe
For tools, dies, drills, water hardening.

PYRASTEEL NO 14
M-146, 0.2 C, 18 Cr, 0.5 Mo, bal Fe
At 70°F 110,000 TS, 75,000 YS; 18 El, 32 RA, 215 Brin
At 1000°F 70,000 TS; 49,000 YS, 24 El, 64 RA
For corrosion and heat resistant parts, oil refineries, corrosion and heat resistant

PYRASTEEL NO 18
M-146, 25-28 Ni, 16-18 Cr, 2.5 Si, bal Fe
For chain conveyors, lead pots, resistant to 1800°F

PYRASTEEL NO 20
M-146, 0.2 C, 17-18 Cr, 35-38 Ni, 2.5 Si, bal Fe
For heat resistant parts, furnace parts; corrosion and heat resistant

PYRASTEEL NO 2000
M-146, 25-27 Cr, 12-14 Ni, 1.5 Si, C, bal Fe
For castings, kilns, clinker coolers, heat and corrosion resistant to 2000°F

PYRASTEEL-A.
M-146, 0.3 C, 4-8 Ni, 8 Cr, bal Fe
For carburizing boxes, furnace parts and grids, heat resistant parts; heat resistant

PYRASTEEL-B
M-146; 0.3 C, 15 Ni, 14 Cr, bal Fe.
For carburizing boxes, furnace parts; heat resistant

PYRASTEEL-C.
M-146, 0.3 C, 25 Ni, 20 Cr, bal Fe.
Cast 68,000 TS; 38,000 YS, 17 El, 160 Brin
For furnace parts, torch nozzles, trays; heat resistant

PYRASTEEL-D.
M-146; 0.3 C, 35 Ni, 25 Cr, bal Fe
Cast: 70,000 TS; 40,000 YS; 10 El; 12 RA; 170 Brin.
For carburizing boxes, pots; heat resistant.

PYRASTEEL SPECIAL.
M-146, 14 Ni, 25-28 Cr, 2.5 Si, bal Fe.
For salt pots; resistant to 2000°F.

PYROCAST.
M-192; 1.75-2.0 C, 24-28 Cr, bal Fe.
Cast: 70,000 TS; 70,000 YS; 0 El; 0 RA; 300 Brin.
For heat treating and carburizing boxes, furnace parts; high heat resistance

PYROCHROM 20
M-1342, 0.05 max C, 25 Cr, 20 Ni, bal Fe.
Quenched 83,500-106,700 TS; 42,700 min YS, 30 min El
For heat conducting material for electric heating; working temp. max. 1920°F.

PYROCHROM 30.
M-1342; 0.05 max C, 20 Cr, 33 Ni, bal Fe.
Quenched. 85,300-106,700 TS; 42,700 min YS; 30 min El
For heat conducting material for electrical heating; working temp max. 2060°F.

PYROCHROM 60
M-1342, 0.05 max C, 15 Cr, 64 Ni, bal Fe
Quenched 85,300-106,700 TS, 42,700 min YS; 30 min El.
Heat conducting material for electric heating; working temp max 2010°F

PYROCHROM 80
M-1342; 0.05 C, 20 Cr, 80 Ni.
Quenched: 85,300-106,700 TS, 42,700 min YS; 30 min El
For electrical heating elements, working temp. max 2190°F

PYRO DIE
M-38, 0.4 C, 1.0 Cr, 0.25 V, bal Fe
For hot work tools, header dies, chipping chisels; hot work steel.

PYRODIE
M 1724, 0.40 C, 1.0 Si, 5.0 Cr, 1.3 Mo, 1.0 V, bal Fe
Air or oil hardening hot die steel.
For drawing dies, hot gripper dies, heading dies, drawing dies, extrusion dies

PYRODUR 7
M-1290, 0.3 C, 2.2 Si, 6 Cr, bal Fe
For heat resistant parts, corrosion and heat resistant

PYRODUR 8
M 1290, 0.60 C, 13 Cr, 1.5 Si, bal Fe
For corrosion resistant parts; GX60CrSi13; stainless

PYRODUR 9
M-1290, 0.50 C, 17 Cr, 1.5 Si, bal Fe
For corrosion resistant parts, GX50CrSi17; stainless

PYRODUR 10
M-1290; 0.60 C, 1.5 Si, 22 Cr, bal Fe.
For heat treating boxes, furnace parts, GX60CrSi22; heat resistant

PYRODUR 12
M-1290, 0.6 C, 1.5 Si, 29 Cr, bal Fe
For heat treating boxes, furnace parts; GX60CrSi29; heat resistant

PYRODUR 12R.
M 1290; 1.3 C, 1.5 Si, 29 Cr bal Fe
For furnace parts; GX130CrSi29; heat resistant.

PYRODUR CN5.
M-1290, 0.4 C, 1.3 Si, 27 Cr, 4 Ni, bal Fe.
For furnace parts, heat treating boxes; GX40CrNiSi274; heat resistant.

PYRODUR CN10.
M-1290; 0.4 C, 2 Si, 22 Cr, 9.5 Ni, bal Fe.
For refinery and chemical plant equipment; GX40CrNiSi229; corrosion and heat resistant, austenitic.

PYRODUR CN15.
M-1290; 0.4 C, 2 Si, 26 Cr, 14 Ni, bal Fe.
For furnace parts, heat treating boxes; GX40CrNiSi2614; corrosion and heat resistant.

PYRODUR CN20
M-1290; 0.4 C, 2 Si, 25 Cr, 19 Ni, bal Fe.
For heat treating boxes, furnace parts; GXCrNiSi2519, heat resistant.

PYRODUR CN38.
M-1290; 0.4 C, 2 Si, 18 Cr, 38 Ni, bal Fe.
For heat treating boxes, furnace parts; GXCrNi1838; heat resistant.

PYRODUR P7.
M-1290, 0.30 C, 6 0 Cr, 2.25 Si, bal Fe
Cast, annealed: 71,000-100,000 TS; 6 min El.
Elevated temperature applications; resistant to scaling to about 700°C
Werkstoff Nr 1.4710; DIN G-X30CrSi6.

PYRODUR P8.
M-1290; 0.60 C, 13 0 Cr, 1 25 Si, bal Fe
Cast, annealed: 71,000-100,000 TS, 4 min El.
Elevated temperature applications; resistant to scaling to about 800°C.
Werkstoff Nr. 1.4729; DIN G-X45CrSi13.

PYRODUR P9.
M-1290; 0.50 C, 17 0 Cr, 1 25 Si, bal Fe
Cast, annealed· 71,000-100,000 TS, 2 min El.
Elevated temperature applications; resistant to scaling to about 900°C
Werkstoff Nr. 1.4740, DIN G-X40CrSi17

PYRODUR P9R.
M-1290; 1 5 C, 19.0 Cr, 1 25 Si, bal Fe
Cast, annealed 250-350 Brin.
Elevated temperature applications; resistant to scaling to about 900°C.
Werkstoff Nr. 1 4743, DIN G-X160CrSi18.

PYRODUR P10
M-1290, 0.60 C, 22 5 Cr, 1.6 Si, bal Fe
As cast: 200-280 Brin.
Elevated temperature applications; resistant to scaling to about 1050°C
Werkstoff Nr 1 4745, DIN G-X40CrSi23

PYRODUR P12
M-1290; 0.60 C, 29 0 Cr, 1.6 Si, bal Fe.
As cast· 220-300 Brin
Elevated temperature applications, resistant to scaling to about 1180°C
Werkstoff Nr. 1.4776; DIN G-X40CrSi29

PYRODUR P12R.
M-1290; 1 40 C, 29.0 Cr, 1.60 Si, bal Fe.
Cast, annealed: 250-350 Brin
Elevated temperature applications, resistant to scaling to about 1150°C.
Werkstoff Nr 1.4777; DIN G-X130CrSi29.

PYRODUR P-CN 5
M-1290; 0.35 C, 27 0 Cr, 4.0 Ni, 1 25 Si, bal Fe
As cast: 64,000-85,000 TS; 42,500 min YS; 4 min El.
Elevated temperature applications; resistant to scaling to about 1150°F.
Werkstoff 1.4823; DIN G-X40CrNiSi27 4
ASTM A297 Gr.HC.

PYRODUR P-CN 10.
M-1290; 0.30 C, 22.0 Cr, 10.0 Ni, 1.25 Si, bal Fe.
As cast: 71,000-91,000 TS, 12 min El.
Elevated temperature operation: resistant to scaling to about 1050°C.
Werkstoff Nr. 1 4826; ASTM A297 Gr.HF.
DIN G-X40CrNiSi229.

PYRODUR P-CN 13
M-1290; 0.30 C, 25 0 Cr, 12.5 Ni, 1.25 Si, bal Fe.
As cast· 71,000-92,000 TS; 10 min El
Elevated temperature operations, resistant to scaling to about 1150°C.
Werkstoff Nr 1 4837, DIN G-X35CrNiSi2512, ASTM A297; Gr HH

PYRODUR P CN 13H
M-1290, 0 70 C, 25 0 Cr, 12.5 Ni, 1.25 Si, bal Fe.
As cast 71,000-92,000 TS, 3 min El
Elevated temperature operations· resistant to scaling to about 1100°C
DIN G-X70CrNiSi2512

PYRODUR P-CN 13S
M-1290, 0 08 C, 25 0 Cr, 12 5 Ni, 1 25 Si, bal Fe
Sol. ann & age 64,000 85,000 TS; 28,000 min YS; 20 min El
Elevated temperature operations; resistant to scaling to about 1100°C
DIN G-X8CrNiSi2512, ASTM A351 Gr CH 20

PYRODUR P-CN 13 W
M-1290, 0.12 C, 23 0 Cr, 12 5 Ni, 1 25 Si, bal Fe
Sol ann & age 64,000-85,000 TS, 28,000 min YS, 20 min El
Elevated temperature operation, resistant to scaling to about 1080°C
DIN G X12CrNiSi2312, ASTM A351, Gr CH 10.

PYRODUR P CN 15
M-1290, 0 30 C, 27 0 Cr, 15 5 Ni, 1 25 Si, bal Fe
As cast 71,000 92,000 TS, 8 min El
Elevated temperature operations, resistant to scaling to about 1150°C
Werkstoff Nr 1 4846, DIN G-X40CrNiSi2614, ASTM A297, Gr HI

PYRODUR P-CN 15H
M-1290, 0 70 C, 27 0 Cr, 15 5 Ni, 1 25 Si, bal Fe
As cast· 71,000-92,000 TS, 3 min El
Elevated temperature operations, resistant to scaling to about 1150°C.
DIN G-X70CrNiSi2715

PYRODUR P-CN 15T
M-1290, 0 30 C, 19 5 Cr, 15 0 Ni, 1 25 Si, bal Fe
As cast 71,000 92,000 TS, 12 min El
Elevated temperature operations, resistant to scaling to about 1050°C
DIN G-X25CrNiSi2014, Werkstoff Nr. 1 4832

PYRODUR P-CN 15TW
M-1290, 0 12 C, 19 5 Cr, 15 0 Ni, 1 0 Si, bal Fe
Sol ann & age 64,000 85,000 TS, 28,000 min YS, 20 min El
Elevated temperature operations, resistant to scaling to about 1050°C
DIN G-X15CrNiSi2015

PYRODUR P-CN 15W
M-1290; 0 12 C, 27 0 Cr, 15 5 Ni, 1 25 Si, bal Fe
Sol ann. & age· 64,000-85,000 TS, 28,000 min YS, 20 min El
Elevated temperature operations, resistant to scaling to about 1150°C
DIN G X12CrNiSi2715.

PYRODUR P-CN 20
M-1290, 0 30 C, 25 0 Cr, 20 0 Ni, 1.25 Si, bal Fe.
As cast· 64,000-85,000 TS, 28,000 min YS; 8 min El
Elevated temperature operations; resistant to scaling to about 1150°F.
Werkstoff Nr 1 4848, DIN G-X40CrNiSi2520; ASTM A297, Gr.HK.

PYRODUR P-CN 20H.
M-1290; 0.70 C, 25.0 Cr, 20.0 Ni, 1.75 Si, bal Fe.
As cast: 71,000-92,000 TS; 3 min El
Elevated temperature operations; resistant to scaling to about 1150°C.
DIN G-X70CrNiSi2520.

PYRODUR P-CN 20W
M-1290, 0.15 C, 25.0 Cr, 21.0 Ni, 0.75 Si, bal Fe.
Sol ann. and age: 64,000-85,000 TS; 28,000 min YS, 20 min El.
Elevated temperature operations; resistant to scaling to about 1150°C
Werkstoff Nr 1.4849; DIN G X15CrNiSi2520.
ASTM A351; Gr CK20.

PYRODUR P-CN 35.
M-1290, 0.30 C, 35.0 Ni, 20.5 Cr, 1.75 Si, bal Fe
As cast: 64,000 85,000 TS; 10 min El
Elevated temperature operations; resistant to scaling to about 1150°C
DIN G-X30NiCrSi3520

PYRODUR P-CN 35 W
M-1290, 0.10 C, 35.0 Ni, 20.5 Cr, 1.75 Si, bal Fe
Sol ann & age 64,000-85,000 TS, 28,000 min YS; 20 min El
Elevated temperature operations, resistant to scaling to about 1150°C.
DIN G X10NiCrSi3520

PYRODUR P-CN 38
M-1290, 0.25 C, 37.0 Ni, 17.5 Cr, 1.25 Si, bal Fe
As cast 64,000 85,000 TS; 8 min El
Elevated temperature operations, resistant to scaling to about 1120°C.
Werkstoff Nr 1.4865, DIN G X40NiCrSi3616
ASTM A297, Gr HU

PYRODUR P CN 60
M 1290 0.35 C, 53.0 Ni 21.0 Cr, bal Fe
As cast 57,000 78,000 TS, 4 min El
Elevated temperature operations; resistant to scaling to about 1050°C
DIN G-X35NiCr5422

PYRODUR P CN 80
M 1290, 0.15 C, 78.0 Ni 14.0 Cr, bal Fe
Sol ann & age 64,000 85,000 TS, 31,000 min YS 12 min El
Elevated temperature operations, resistant to scaling to about 1020°C.
DIN G-X15NiCr7814

PYROFERAL
Czech , C, Cr, bal Fe
For furnace parts and equipment, heat resistant

PYR OIL DIE
M-1432, C, alloy, bal Fe
For dies, punches, crimpers, knives, oil hardened, non deforming

PYROMET see CARPENTER PYROMET

PYROMIC
M 108, 80 Ni, 20 Cr
121,000 TS
For electrical resistance, formerly "Pyromic No 2"

PYRON 6
M-1331, C 2-3 Si, 6 Cr, bal Fe
For oil refinery equipment, creep and heat resistant

PYRON 7
M 1331, C, 2-3 Si, 6 Cr, bal Fe
For oil refinery equipment, creep and heat resistant.

PYRON 8
M-1331, 0.12 max C, 2-3 Si, 6 Cr, bal Fe
For oil refinery equipment; heat and creep resistant

PYRON 8A1
M-1331; 0.12 max C, 0.8 Si, 0.8 Al, 6.5 Cr, bal Fe.
For oil refinery equipment; heat and creep resistant.

PYRON 9
M-1331, 0.12 max C, 2.2 Si, 13 Cr, bal Fe.
Annealed. 80,000 TS, 40,000 YS; 35 El; 65 RA; 160 Brin
For valves, pumps, oil refinery equipment; heat and corrosion resistant

PYRON 9A1
M-1331, 0.12 max C, 1.2 Si, 1.0 Al, 13 Cr, bal Fe.
Annealed: 80,000 TS; 40,000 YS; 35 El; 65 RA; 160 Brin.
For valves, pumps, oil refinery equipment; heat and corrosion resistant.

PYRON 10.
M-1331; 0.12 max C, 2 Si, 18 Cr, bal Fe.
Annealed 85,000 TS, 45,000 YS; 25 El, 50 RA; 160 Brin
For furnace parts and equipment, heat and corrosion resistant

PYRON 10A1
M-1331, 0.12 max C, 1 Si, 1 Al, 18 Cr, bal Fe.
Annealed 85,000 TS, 45,000 YS; 25 El, 50 RA, 160 Brin
For oil refinery equipment, heat and corrosion resistant.

PYRON 12A1
M-1331, 0.12 max C, 1.5 Si, 1.5 Al, 24 Cr, bal Fe.
Annealed 85,000 TS, 50,000 YS, 30 El, 55 RA; 180 Brin
For oil refinery and furnace equipment, heat resistant

PYRON 16 36
M-1331, 0.12 C, 16 Cr, 25 Ni, bal Fe
For furnace parts, chemical plant equipment; corrosion and heat resistant

PYRON 20 13
M-1331, 0.12 C, 20 Cr, 13 Ni, bal Fe
Annealed 80,000 TS, 35,000 YS, 50 El, 65 RA, 160 Brin
For chemical plant equipment, stainless, austenitic.

PYRON 25 04 SPEZIAL
M-1331, 0.12 C, 25 Cr, 4 Ni, bal Fe
For furnace parts, valves, heat treating boxes; heat resistant

PYRON 2010
M-1331, 0.15 C, 19.5 Cr, 9.5 Ni, bal Fe
Annealed 80,000 TS. 35,000 YS, 55 El, 75 RA, 150 Brin
For chemical plant equipment, tanks, mixers; Type 302, stainless, austenitic

PYRON 2419
M-1331, 0.15 C, 2 Si, 24 Cr, 19 Ni, bal Fe
Annealed 100,000 TS, 45,000 YS, 50 El, 65 RA, 185 Brin
For furnace parts, valves, pumps, turbine parts; Type 310, stainless, austenitic

PYRON 2504.
M-1331, 0.2 C, 1.2 Si, 25 Cr, 4 Ni, bal Fe.
For furnace parts, valves, heat treating boxes; heat resistant

PYRONEAL
M-64, 0.55 C, 0.9 Cr, 0.7 Mo, 0.6 Si, 2.2 Ni, bal Fe
For hot work dies, punches; oil or air hardened, hot work, press and upsetter dies.

PYRON G27.04.
M-1331; 0.4 C, 1.3 Si, 27 Cr, 4 Ni, bal Fe.
Cast· 90,000 TS; 65,000 YS, 2 El; 212 Brin.
For furnace and turbine parts; heat resistant

PYRON G55.24Ni.
M-1331; 0.55 C, 1 3 Si, 55 Cr, 24 Ni, bal Fe.
For furnace parts; heat and oxidation resistant.

PYRON G85.
M-1331; 0.3 C, 2.2 Si, 6 Cr, bal Fe.
For oil refinery equipment; heat and creep resistant.

PYRON G95.
M-1331; 0 5 C, 1 5 Si, 17 Cr, bal Fe.
For furnace parts, chemical plant equipment; heat and corrosion resistant

PYRON G105.
M-1331; 0 6 C, 1.5 Si, 22 Cr, bal Fe.
For furnace parts, heat treating boxes, heat resistant

PYRON G115
M-1331, 0.6 C, 1 5 Si, 29 Cr, bal Fe
For furnace parts, heat treating boxes, heat resistant.

PYRON G2210.
M-1331; 0.4 C, 2 Si, 22 Cr, 9 5 Ni, bal Fe
Cast 85,000 TS; 45,000 YS, 35 El, 165 Brin
For furnace parts, heat treating boxes, valves, corrosion and heat resistant

PYRON G2519.
M-1331, 0 4 C, 2 Si, 25 Cr, 19 Ni, bal Fe.
Cast· 75,000 TS; 50,000 YS, 17 El; 170 Brin
For pumps, valves, furnace parts, heat treating boxes, corrosion and heat resistant.

PYROPHORIC ALLOY.
U S; 10 Mn, 10 Sb, 20 Cr, 15 Ti, bal Fe
For lighters for gas stoves, cigarette lighters, produces violent sparks when abrased

PYROS.
M-104, 82 Ni, 7 Cr, 3 Fe, 5 W, 3 Mn
For dilatometric temperature indicating or control devices, heat resisting alloy

PYROTEM.
M-64; 0 55 C, 2.1 Ni, 0.87 Cr, 0 73 Mo, bal Fe
Annealed: 250 Brin.
Heat treated 570 Brin
For hot work dies, cold shear knives, oil hardened, shock resistant.

PYROTHERM 5 Mo
M-1342, 0.15 max C, 5 Cr, 0 5 Mo, bal Fe
Tempered· 64,000-92,000 TS, 35,600 min YS, 23 min El.
Heat resistant chromium steel, for furnace parts and equipment.

PYROTHERM 6
M-1342; 0 12 max C, 2 3 Si, 6 Cr, bal Fe
For oil refinery equipment, heat and creep resistant

PYROTHERM 14.
M-1342; 0.12 max C, 2 2 Si, 13 Cr, bal Fe.
Annealed 75,000 TS; 40,000 YS, 35 El; 70 RA; 155 Brin
For oil refinery equipment; creep and heat resistant.

PYROTHERM 18
M-1342; 0.12 max C, 2 Si, 18 Cr, bal Fe
Annealed 80,000 TS; 50,000 YS, 25 El; 50 RA; 150 Brin.
For oil refinery equipment, corrosion and heat resistant.

PYROTHERM 18/8.
M-1342; 0 12 max C, 18 Cr, 9 Ni, bal Fe.
Quenched 71,000-99,500 TS; 31,300 min YS; 40 min El
Bearing parts in industrial furnaces for mechanical loads

PYROTHERM 18/36.
M-1342, 0 15 max C, 18 Cr, 36 Ni, bal Fe.
Quenched. 78,200-106,700 TS, 38,400 min YS; 40 min El
Heat resistant austenitic Cr-Ni steel.
For parts, containers and equipment in carburizing atmosphere

PYROTHERM 20/15M
M-1342, 0 15 max C, 20 Cr, 14.5 Ni, 0 9 Mo, 1.2 Cb, bal Fe
For acid resistant, chemical plant equipment; stainless, austenitic, stabilized

PYROTHERM 20/15 MoNb.
M-1342, 0 13 max C, 20 Cr, 15 Ni, 1 3 Mo, 1.2 Nb, bal Fe
Quenched 85,300-106,700 TS, 42,700 min YS; 40 min El
Bearing bars in annealing furnaces.
Austenitic, heat resisting

PYROTHERM 20/33
M-1342, 0 15 max C, 20 Cr, 33 Ni, 0 4 Al, 0 4 Ti, bal Fe
Quenched 78,200-106,700 TS, 35,600 min YS; 40 min El
Austenitic heat resisting steel, for parts in petrochemical industry

PYROTHERM 22/10
M 1342, 0 15 C, 2 Si, 19 5 Cr, 9 5 Ni, bal Fe
Annealed 80,000 TS, 35,000 YS, 55 El; 75 RA, 150 Brin
For chemical plant equipment, tanks, mixers, Type 302, stainless, austenitic

PYROTHERM 25
M 1342, 0 12 max C, 1 5 Si, 24 Cr, 1 5 Al, bal Fe
For oil refinery equipment, heat and corrosion resistant.

PYROTHERM 25/4
M 1342, 0 2 C, 1 2 Si, 25 Cr, 4 Ni, bal Fe
Annealed 90,000 TS, 65,000 YS, 2 El, 212 Brin.
For furnace parts, oil refinery equipment, corrosion and heat resistant

PYROTHERM 25/12
M-1342, 0.20 max C, 25 Cr, 12 Ni, bal Fe
Quenched 85,300 106,700 TS, 42,700 min YS; 40 min El
Bearing parts in industrial furnaces for mechanical loads

PYROTHERM 25/20
M-1342 0 15 C, 2 Si, 24 Cr, 19 Ni, bal Fe.
Annealed 100,000 TS, 45,000 YS, 50 El, 65 RA; 185 Brin
For valves, pumps, furnace parts, Type 310, stainless

PYROTHERM 25/20 Nb
M-1342; 0 40 max C, 25 Cr, 20 Ni, 1 2 Nb, bal Fe.
As cast 71,100 99,600 TS, 35,600 min YS, 10 min El
Austenitic stainless, for heat exchanger tubes, annealing furnace grates, and castings for petroleum industry

PYROTHERM 28/48/5W
M-1342; 0 15 max C, 28 Cr, 48 Ni, 5 W, bal Fe.
Quenched: 78,200-113,800 TS, 38,400 min YS, 30 min El

Heat resistant austenitic steel.
For load carrying members at elevated temperatures.

PYROTHERM G 5 Mo.
M-1342, 0.12 max C, 5 Cr, 0.5 Mo, bal Fe.
Tempered 64,000-92,500 TS, 35,600 min YS; 23 min El.
Heat resistant chromium steel, for supports for furnace parts and other equipment at elevated temperature

PYROTHERM G6.
M-1342: 0.3 C, 2.2 Si, 6 Cr, bal Fe
For oil refinery equipment, heat and creep resistant.

PYROTHERM G14
M-1342; 0.5 C, 2.2 Si, 14 Cr, bal Fe
For valves, cutlery, turbine blades, knives; Type 420, stainless, hardenable

PYROTHERM G17.
M-1342; 0.5 C, 1.5 Si, 17 Cr, bal Fe
Annealed 80,000 TS, 50,000 YS, 25 El, 50 RA, 150 Brin.
Cold drawn 130,000 TS; 120,000 YS; 2 El; 185 Brin
For chemical plant equipment, furnace parts; corrosion resistant; Type CB50.

PYROTHERM G 18
M-1342, 0.40 max C, 18 Cr, bal Fe.
Annealed 78,000-113,800 TS, 49,800 min YS, 2 min El
Heat resistant chromium steel, for industrial furnace parts

PYROTHERM G18/8
M 1342, 0.15 C, 1.5 Si, 18 Cr, 8.5 Ni, bal Fe.
Annealed 80,000 TS, 35,000 YS, 55 El; 75 RA, 150 Brin
Cold drawn 150,000 TS, 100,000 YS, 15 El, 250 Brin
For chemical plant equipment, tanks, fixtures, mixers, Type 302, stainless, ferritic

PYROTHERM G 18/36H.
M-1342, 0.40 max C, 18 Cr, 36 Ni, bal Fe
As cast 56,900 85,300 TS, 29,900 min YS, 8 min El
Austenitic stainless, for grates, carburizing boxes in annealing and carburizing furnaces
ACI Type HU

PYROTHERM G 20/33
M-1342, 0.15 max C, 20 Cr, 33 Ni, bal Fe
As cast 56,900 85,300 TS, 25,600 min YS, 12 min El.
Austenitic stainless, for cracking tubes, heat exchanger tubes, similar high temperature equipment

PYROTHERM G 20/33H
M 1342, 0.40 max C, 20 Cr, 33 Ni, bal Fe
As cast 56,900 85,300 TS, 29,900 min YS; 8 min El
Austenitic stainless, for cracking tubes, heat exchanger tubes, similar high temperature equipment

PYROTHERM G 20/33Nb
M-1342, 0.10 max C, 20 Cr, 33 Ni, 1.5 Nb, bal Fe
As cast, 56,900 85,300 TS; 28,500 min YS, 8 min El
Austenitic stainless; for heat exchanger tubes, cracking equipment in petroleum industry, and similar parts for elevated temperature operation.

PYROTHERM G22/10.
M-1342; 0.4 C, 2 Si, 22 Cr, 9.5 Ni, bal Fe.
Cast: 85,000 TS; 45,000 YS; 35 El; 165 Brin
For conveyor belts, furnace parts, heat treat boxes, fixtures, corrosion and heat resistant Type HF.

PYROTHERM G 22/14
M-1342; 0.15 max C, 22 Cr, 14 Ni, bal Fe.
As cast 56,900-85,300 TS, 31,300 min YS; 14 min El
Austenitic stainless, for lightly loaded parts for furnaces and in petrochemical industry. ACI Type CH-20.

PYROTHERM G 24/24Nb.
M 1342, 0.30 max C, 24 Cr, 24 Ni, 1.5 Nb, bal Fe.
As cast 71,100-99,600 TS, 35,600 min YS; 10 min El.
Austenitic stainless; for heat exchanger tubes, annealing furnace grates, and castings for petroleum industry

PYROTHERM G25
M-1342, 0.40 max C, 25 Cr, bal Fe.
As cast 200-300 Brin
Heat resistant chromium steel, for furnace parts

PYROTHERM G25/4
M-1342, 0.4 C, 1.3 Si, 27 Cr, 4 Ni, bal Fe.
Cast 70,000 TS, 65,000 YS; 2 El, 190 Brin.
Aged 115,000 TS, 80,000 YS; 15 El.
For furnace parts, grate bars, salt pots, baffles, soot blowers, Type HC, corrosion and heat resistant

PYROTHERM G25/12.
M-1342, 0.35 max C, 25 Cr, 12 Ni, bal Fe
As cast 64,000-92,500 TS, 34,100 min YS; 10 min El
Austenitic stainless, for lightly loaded parts for furnace and in petrochemical industry
ACI Type HE

PYROTHERM G25/20
M-1342, 0.4 C, 2 Si, 25 Cr, 19 Ni, bal Fe.
Cast 75,000 TS, 50,000 YS, 17 El, 170 Brin
Aged 85,000 TS; 50,000 YS, 10 El, 190 Brin
For furnace parts, retorts, skid rails, rabble arms, Type HK, corrosion and heat resistant

PYROTHERM G 25/20H
M-1342, 0.40 max C, 25 Cr, 20 Ni, bal Fe.
As cast 64,000 92,500 TS; 35,600 min YS, 10 min El
Austenitic stainless, for parts at elevated temperatures in furnaces and in petroleum industry
ACI*Type HK, ASTM A351 HK 40

PYROTHERM G25/35
M-1342, 0.5 C, 1.8 Si, 25 Cr, 30 Ni, bal Fe
For furnace parts, fixtures, conveyors, heat treat boxes, corrosion and heat resistant

PYROTHERM G 25/35H
M-1342, 0.35 max C, 25 Cr, 35 Ni, bal Fe
As cast 64,000-92,500 TS, 35,600 min YS, 8 min El
Austenitic stainless, for ethylene-tubes, collectors, heat exchanger equipment, cracking tubes

PYROTHERM G25H
M-1342, 0.6 C, 1.5 Si, 22 Cr, bal Fe
Cast 70,000 TS, 65,000 YS, 2 El, 190 Brin.
For furnace parts, heat treat boxes, skids, housings; heat resistant

PYROTHERM G26/14.
M-1342, 0.4 C, 2 Si, 26 Cr, 14 Ni, bal Fe.
Cast. 75,000 TS, 47,000 YS, 17 El, 25 RA; 200 Brin
For furnace parts, salt pots, stack dampers, grate bars, Type HH, corrosion and heat resistant.

PYROTHERM G28.
M-1342; 0.6 C, 1.5 Si, 29 Cr, bal Fe.
Cast: 70,000 TS; 65,000 YS; 2 El; 212 Brin
Heat treated: 97,000 TS; 65,000 YS; 18 El; 210 Brin.
For cylinder liners, bushings, valve seats and bodies; Type CC60.

PYROTHERM G28/5.
M-1342; 0.4 C, 1.3 Si, 27 Cr, 4 Ni, bal Fe.
Cast: 70,000 TS; 65,000 YS; 2 El, 190 Brin
Aged: 115,000 TS; 80,000 YS, 15 El
For furnace parts, salt pots, fixtures, grates; Type HC; heat resistant.

PYROTHERM G 28/48/5W
M-1342, 0.45 C, 28 Cr, 48 Ni, 5 W, bal Fe
As cast: 56,900-85,300 TS, 42,700 min YS; 3 min El.
Good high temperature properties, for use in furnace equipment, tube supports, brackets and hangers for use at elevated temperature

PYROTHERM G28H
M-1342, 1.3 C, 1.5 Si, 29 Cr, bal Fe
For heat and abrasion resistant parts, heat and abrasion resistant

PYROTHERM G 50/50
M-1342, 0.04 max C, 50 Cr, 50 Ni
As cast 79,600 min TS, 49,800 min YS; 5 min El.
Good high temperature properties; for tube supports, brackets, hangers for furnaces, resistant to oil ash corrosion ASTM A560

PYROTHERM G 60/40
M-1342; 0.04 max C, 60 Cr, 40 Ni
As cast: 111,000 min TS
Good high temperature properties, for tube supports, brackets, hangers for furnaces; resistant to oil-ash corrosion.
ASTM A560.

PYROTHERM G UMCo 50
M-1342; 0.20 max C, 28 Cr, 50 Co, bal Fe.
As cast: 71,000-99,500 TS; 34,100 min YS, 8 min El
For parts and equipment in furnaces and other high temperature areas; working temperature to 2336°F

PYROTHERM G UMCo 51
M-1342; 0.30 max C, 28 Cr, 49 Co, 2 Nb, bal Fe
As cast 71,000-99,500 TS, 34,100 min YS, 4 min El
For parts and equipment in furnaces and other high temperature areas; working temperature to 2282°F

PYROTHERM UMCo 50.
M-1342; 0.10 max C 28 Cr, 50 Co, bal Fe
Quenched 99,500-128,000 TS, 49,800 min YS, 10 min El.
Cobalt base alloy for load carrying parts at elevated temperatures

PYROTHERM UMCo 51
M-1342, 0.10 max C, 28 Cr, 49 Co, 2 Nb, bal Fe.
Quenched: 113,800-142,000 TS, 56,900 min YS, 6 min El
Cobalt base alloy for load carrying parts at elevated temperatures

PYROTOOL A see CARPENTER PYROTOOL A.

PYROTOUGH
M-1724, 0.35 C, 2.75 Cr, 0.25 V, 9.5 W, bal Fe.
Air or oil hardening high tungsten tool steel for hot work; for tube mandrels, hot punches, hot heading dies, brass stamping dies, plastic mould cores

PYROVAN
M-73, 0.75 C, 1.0 Si, 5.25 Cr, 2.5 V, 1.1 Mo, bal Fe
Hardened. C 55-63 Rock.
Hot work die steel with extra high carbon for higher hardness and wear resistance.
For forging dies, hot press and forming dies.
Air hardenable, good temperature resistance.

PYTHON
M-1, 0.8-1.2 C, 0.2 V, 0.25 Mn, 0.25 Si, bal Fe.
Annealed: 88,000 TS; 54,000 YS; 20 El; 190 Brin
Ht Tr 215,000 TS; 188,000 YS; 9 El; 400 Brin.
For pneumatic tools, chisels, dies, shear blades.
Type W2 water hardening.

Q-ALLOY A
M 59, 0.35-0.75 C, 15-19 Cr, 64-68 Ni, bal Fe.
Cast. 65,000 TS, 36,000 YS; 9 El; 176 Brin
For lead pots, carburizing boxes, furnace fixtures, cyanide pots
Heat and corrosion resistant.

Q ALLOY B
M 59, 0.35-0.75 C, 58-62 Ni, 10-14 Cr, bal Fe
Cast 68,000 TS, 36,000 YS, 4 El; 185 Brin.
For furnace parts, carburizing and heat treating boxes, gas retorts, muffles
Heat resistant. Max operating temperature is 2000°F

Q ALLOY B-Si
M-59, 0.36-0.50 C, Si, 58-66 Ni, 16-23 Cr, bal Fe
For heat and corrosion resistant parts, heat and corrosion resistant

Q-ALLOY "C-1."
M-59, 26-30 Cr, bal Fe
Cast 80,000 TS, 40 000 YS, 3 El, 4 RA, 180 Brin
Heat treated 40,000-55,000 TS, 30.000-45,000 YS; 0-1 El, 0-2 RA, 160-550 Brin
Suited for acid mine water, nitric acid and bad sulfuric acid furnace conditions, heat treating boxes, corrosion and heat resisting

Q-ALLOY C-1SC
M-59, 0.25 max C, 28 Cr, 3 max Ni, bal Fe.
For salt pots, furnace equipment, high corrosion resistance, brittle.

Q-ALLOY "C-2."
M 59, 16-18 Cr, 0.4 C, bal Fe
Cast 60,000 TS, 55,000 YS; 12 El, 17 RA; 205 Brin
Heat treated 80,000 TS, 60,000 YS, 20 El, 35 RA
Suited for acid mine water and nitric acid corrosion resisting parts, heat treating boxes, corrosion resisting, heat resisting

Q-ALLOY "C-3."
M-59, 28-30 Cr, high C, 3 max Ni, bal Fe.
Cast 30,000-45,000 TS, 0 El, 0 RA, 300-600 Brin
For rolling mill guides, wear plates for crusher parts, chute plates, heat and wear resisting

Q-ALLOY CHROME C-1
M-59, 25-30 Cr, 3 max Ni, 0.2 C, bal Fe
For corrosion resistant castings; resists mine water corrosion

Q-ALLOY CHROME C-1A
M-59, 0.21-0.35 C, 24-30 Cr, bal Fe
For heat and corrosion resistant parts; heat and corrosion resistant

Q ALLOY CHROME C-2.
M-59, C, Cr, bal Fe.
For chemical equipment, resists nitric acid corrosion

Q-ALLOY CHROME C-2A.
M-59; 0.13-0.20 C, 12-15 Cr, bal Fe.
For corrosion resistant parts; corrosion resistant.

Q-ALLOY CHROME C-2B.
M-59; 0.21-0.35 C, 12-15 Cr, bal Fe
For corrosion resistant parts; corrosion resistant.

Q-ALLOY CHROME C-2C.
M-59, 0.12 max C, 16-23 Cr, bal Fe.
For corrosion resistant parts; heat and corrosion resistant

Q-ALLOY CHROME C-2D.
M-59; 0.13-0.20 C, 16-23 Cr, bal Fe.
For corrosion resistant parts; heat and corrosion resistant

Q-ALLOY CHROME C-2E
M-59, 0.21-0.35 C, 16-23 Cr, bal Fe.
For corrosion resistant parts; heat and corrosion resistant.

Q-ALLOY CHROME C-3.
M-59, C, alloy, bal Fe
500 Brin
For mill guides, heat resisting to 2000°F.

Q-ALLOY CHROME C-3A.
M-59, 0.81-1.10 C, 16-23 Cr, bal Fe.
For heat and corrosion resistant parts, heat and corrosion resistant

Q-ALLOY CHROME CN1 A.
M-59; 0.21-0.35 C, 24-30 Cr, 7-11 Ni, bal Fe
For heat and corrosion resistant parts, heat and corrosion resistant

Q-ALLOY CHROME CN1-B
M-59; 0.13-0.20 C, 24-30 Cr, 12-15 Ni, bal Fe
For heat and corrosion resistant parts; heat and corrosion resistant

Q-ALLOY CHROME CN1-S
M-59, 0.36-0.50 C, 24-30 Cr, 7-11 Ni, bal Fe.
For heat and corrosion resistant parts; heat and corrosion resistant

Q-ALLOY CHROME CN2-A
M-59, 0.21-0.35 C, W, 16-23 Cr, 7-11 Ni, bal Fe.
For heat and corrosion resistant parts; heat and corrosion resistant

Q-ALLOY CHROME J
M-59, 0.12 max C, 12-15 Cr, bal Fe
For corrosion resistant parts, corrosion resistant.

Q-ALLOY CHROME K 1
M-59; Ni, Cr, bal Fe
For furnace parts not subject to high sulfur fumes; high heat resistance to 2200°F

Q-ALLOY CHROME KA-2
M-59; 0.13-0.20 C, 16-23 Cr, 7-11 Ni, bal Fe
For heat and corrosion resistant parts, stainless.

Q-ALLOY CHROME KA 2H.
M-59; 0.21-0.35 C, 16-23 Cr, 7-11 Ni, bal Fe.
For heat and corrosion resistant parts; stainless.

Q-ALLOY CHROME KA-2Mo
M-59, 0.13-0.20 C, Mo, 16-23 Cr, 7-11 Ni, bal Fe.
For heat and corrosion resistant parts;
heat and corrosion resistant

Q-ALLOY CHROME KA-2S.
M-59; 0.12 max C, 16-23 Cr, 7-11 Ni, bal Fe.
For stainless parts, stainless

Q-ALLOY CHROME KA-4.
M-59; 0.21-0.35 C, Mo, 16-23 Cr, 7-11 Ni, bal Fe.
For heat and corrosion resistant parts;
heat and corrosion resistant.

Q-ALLOY KNC-3.
M-59; 0.13-0.20 C, Si, 24-30 Cr, 16-23 Ni, bal Fe.
For heat and corrosion resistant parts;
heat and corrosion resistant.

Q-ALLOY "C.N.1."
M-59, 24-26 Cr, 11-13 Ni, bal Fe.
Cast 65,000-85,000 TS, 40,000 YS; 10-27 El; 15-45 RA; 180-220 Brin
Heat treated 50,000-65,000 TS; 35,000-50,000 YS; 0-11 El; 0-12 RA;
For furnace parts where temperature is not excessive, heat treating boxes;
heat and corrosion resistant;
max operating temperature 2100°F

Q-ALLOY CN1-H
M-59; 0.13-0.20 C, 24-30 Cr, 7-11 Ni, bal Fe.
For furnace chains, muffles, retorts;
heat and corrosion resistant.

Q-ALLOY CN-1H-Mo
M-59, 0.13-0.20 C, Mo, 24-30 Cr, 7-11 Ni, bal Fe
For heat and corrosion resistant parts;
heat and corrosion resistant.

Q-ALLOY CN-1 Mo
M-59; 24-26 Cr, 11-13 Ni, 1.5-3.0 Mo, bal Fe
For pulp industry exposed to hot sulfite liquors and bleaches, corrosion and heat resistant.

Q-ALLOY "C.N.-2."
M-59, 18-20 Cr, 8-10 Ni, bal Fe
Cast 60,000-80,000 TS, 35,000-40,000 YS, 10-50 El, 10-40 RA, 160-210 Brin.
Heat treated 80,000-100,000 TS, 35,000-50,000 YS, 5-15 El, 10-20 RA
For heat treating boxes, furnace parts;
corrosion and heat resisting,
max operating temperature 2000°F.

Q-ALLOY CN2-MO
M-59, 17-21 Cr, 7-9 Ni, 1-4 Mo, 0.2 C, bal Fe.
For chemical equipment, stainless, austenitic.

Q-ALLOY, GRADE A-4
M-59, 66-68 Ni, 19-21 Cr, bal Fe.
Cast. 80,000-90,000 TS, 50,000-45,000 YS,
For carburizing boxes, retorts, solution pots, furnace parts, heat resistant to 2220°F

Q-ALLOY X-2
M-59, C, 30 Ni, 30 Cr, bal Fe
For high temperature applications,
corrosion and heat resistant

Q-ALLOY X-3.
M-59; C, 20 Ni, 30 Cr, bal Fe.
For high temperature applications;
corrosion and heat resistant

Q-ALLOY X-4.
M-59, C, 20 Ni, 25 Cr, bal Fe
For high temperature applications,
corrosion and heat resistant

Q-ALLOY X-5.
M-59, C, 5 Ni, 28 Cr, bal Fe.
For high temperature applications;
corrosion and heat resistant.

Q-ALLOY X-6
M-59, C, 16 Ni, 28 Cr, bal Fe.
For high temperature applications;
corrosion and heat resistant.

Q-ALLOY X-7.
M-59; 0.2 C, 25 Cr, 12 Ni, bal Fe.
For furnace rails and rollers, oil still tube supports;
austenitic, resists thermal shock and high stresses.

Q-ALLOY X-8.
M-59, C, 10 Ni, 20 Cr, bal Fe.
For high temperature applications; corrosion and heat resistant

Q-TEMP 10B18Q.
M-604; 0.15-0.20 C, 0.80-1.10 Mn, 0.20-0.35 Si, 0.0005 min B, bal Fe.
Rolled: 70,400 TS; 38,700 YP, 25 El; 63 RA; B 72 Rock.
For fasteners, bolts, screws, clips. Tough, water hardening.

Q-TEMP 10B21Q.
M-604; 0.18-0.23 C, 0.80-1.10 Mn, 0.20-0.35 Si, 0.00005 min B, bal Fe.
Rolled: 72,000 TS; 39,000 YS; 24 El; 62 RA, B 73 Rock.
For fasteners, bolts, screws, clips.
Tough, water hardening

Q-TEMP 10B22Q.
M-604, 0.17-0.23 C, 1.0-1.3 Mn, 0.20-0.35 Si, 0.0005 min B, bal Fe.
Rolled: 75,000 TS, 40,000 YS, 22 El; 60 RA, B 76 Rock.
For fasteners, screws, bolts, nuts.
Tough, water hardening

Q-TEMP 10B23Q.
M-604; 0.17-0.23 C, 1.1-1.4 Mn, 0.20-0.35 Si, 0.0005 min B, bal Fe
Rolled: 80,000 TS; 44,000 YS; 20 El; 56 RA; B 78 Rock
For fasteners, screws, bolts, nuts
Tough, water hardening.

QUAKER
M-1431, 0.4 C, 0.4 Mn, 4.5 Cr, 1 Mo, 0.8 W, bal Fe
For tools, dies, air or oil hardened

QUALITAT-55
M-1548; 3.0-5.0 Cu, 0.3-0.7 Si, 0.3-0.8 Mn, bal Al.
Heat Treated. 50,000-60,000 TS; 18-23 El; 100-110 Brin.
For rivets, hydraulic fittings, aircraft engine components.
Heat treatable, high fatigue strength

QUALITAT-M.
M-1548; 0.85 Si, 0.6-0.9 Mn, 0.5-1.0 Mg, bal Al
Heat Treated. 50,000-60,000 TS; 3-8 El; 95-100 Brin
For general light structures, booms, scaffolds, transmission tires
Good strength and fabricability Heat treatable

QUALITY CARBON DRILL ROD
M-1702; 1.10-1.25 C, 0.15-0.40 Mn, 0.10-0.40 Si, 0.03 P, 0.03 S, bal Fe
Water hardening tool steel; AISI W1
Type W1 water hardening tool steel

QUALITY STEEL.
M-237; 1.2-1.5 Cr, 4.5-5.0 Ni, 0.3-0.5 Mn, 0.3-0.35 C, bal Fe
226,000 TS; 15 El, 45 RA.
For gears; air hardening

QUARZAL.
German; 15 Cu, 10 max Si, Fe, Ni, Cr, Mo, bal Al
For bearings, wear resisting.

QUARZAL Q2.
German; 2 Cu, 1.0 max Fe, 0.5 hardening agent, bal Al.
For bearings.

QUARZAL Q5
German; 5-15 Cu, 1.0 max Fe, 0.5 hardening agent, bal Al.
125 Brin.
For bearings.

QUARZEL Q8
German, 5-15 Cu, 1.0 max Fe, 0.5 hardening agent, bal Al
For bearings.

QUARZAL Q12
German, 5-15 Cu, 1.0 max Fe, 0.5 hardening agent, bal Al.
125 Brin
For bearings.

QUARZAL Q15.
German, 5-15 Cu, 1.0 max Fe, 0.5 hardening agent, bal Al.
125 Brin
For bearings

QUATRE ECLAIRS
M-1043, 0.85 C, 18 W, 1.6 V, 0.6 Mo, bal Fe.
For lathe and planer tools, saws, oil hardened

QUATRE ECLAIR SPECIAL
M-1043, 0.85 C, 19 W, 3 Co, 1.5 V, 1 Mo, bal Fe.
For lathe and planer tools, oil hardened

QUEEN'S METAL.
Eng; 88.5 Sn, 7.0 Sb, 3.5 Cu, 1.0 Zn.
For utensils, resists tarnishing.

QUEEN'S METAL "B"
Eng., 50.5 Sn, 16.5 Sb, 16.5 Pb, 16.5 Zn
For type metal.

QUEEN'S METAL "C"
Eng., 87 Sn, 8.5 Sb, 3.5 Cu, 1 Zn
For type metal

QUEEN'S METAL "D"
Eng., 73.36 Sn, 8.88 Sb 8.88 Pb, 8.88 Zn.
For type metal

QUEEN'S METAL "E."
Eng., 88.5 Sn, 7 Sb, 3.5 Cu, 1 Bi
For type metal

QUICKSILVER SOLDER
63-57 Ag, 21-25 Cu, 3.8-6.2 Sn, 10-12 Zn
For silver solder, corrosion resistant

QUINZE ECLAIRS
M-1043, 0.98 C, 20 W, 15 Co, 1.1 V, 1 Mo, bal Fe.
For cutting and boring tools, oil hardened

R6F2K8M5
M-Russia, 0.8 C, 5 Mo, 4 Cr, 2 V, 6 W, 8 Co, bal Fe
Hardened C 64-67 Rock
For drills, reamers, broaches, lathe and planer tools
High-speed steel, high red-hardness.

R6F2K14M5
M-Russia, 0.8 C, 4 Cr, 2 V, 6 W, 5 Mo, 14 Co, bal Fe
Hardened C 64-66 Rock
For lathe and planer tools, form cutters, reamers, drills, broaches
High-speed steel, high red-hardness

R6K8F2M5
M-Russia, 0.8 C, 6 W, 4 Cr, 2 V, 5 Mo, 8 Co, bal Fe.
Hardened C 64-66 Rock.
For lathe and planer tools, form cutters, reamers, broaches, drills
High-speed steel, high red-hardness.

R6K14F2M5
M-Russia, 0.8 C, 6 W, 4 Cr, 2 V, 5 Mo, 14 Co, bal Fe
Hardened: C 64-67 Rock
For form cutters, drills, reamers, broaches, lathe and planer tools
High-speed steel, high red-hardness.

R9.
M-Russia; 0.9 C, 8.5 W, 4 Cr, 2.1 V, bal Fe.
Hardened. C 64-66 Rock.
For lathe and planer tools, drills, reamers, broaches, form cutters.
High-speed steel, high red-hardness

R9K5 (EI 705).
M-Russia, 0.8-0.9 C, 3.8-4.4 Cr, 5.0-6.0 Co, 9.0-10.5 W, 1.6-2.0 V, bal Fe
Hardened· C 64-67 Rock
For machining heat resistant steels, tools, cutters, plane and lathe tools, broaches, reamers, form tools
High speed steel, high red-hardness.

R9K8F4M
M-Russia; 1.3 C, 8.8 W, 4.2 Cr, 3.6 V, 1 Mo, 8.1 Co, bal Fe
Hardened C 65-67 Rock
For precision tools and cutters, reamers, broaches, drills.
High-speed steel, high red-hardness.

R9K10
M-Russia, 0.95 C, 9.5 W, 4 Cr, 2.4 V, 10 Co, bal Fe
Hardened C 65-67 Rock
For reamers, broaches, cut-off tools, form cutters, drills
High-speed steel, high red-hardness

R9K30
M-Russia, 0.90 C, 4.0 Cr, 10.2 W, 1.6 V, 29.4 Co, bal Fe
Hardened C 64-68 Rock
For heavy duty cutters drills, reamers, broaches, lathe tools
High speed steel, high red hardness

R10F5K5
M-Russia, 1.5 C, 10 W, 4 Cr, 4.5 V, 6 Co, bal Fe
Hardened C 66-68 Rock
For cutters, reamers, broaches, drills, textile needles, form tools
High speed steel, high red-hardness

R15K5
M-Russia; 0.8 C, 15 W, 3 Cr, 1.5 V, 5 Co, bal Fe
Hardened C 64-66 Rock
For lathe and planer tools, form cutters, drills, reamers, broaches
High-speed steel, high red hardness

R15K12
M Russia, 0.8 C, 15 W, 3 Cr, 1.5 V, 12 Co, bal Fe
Hardened C 64-67 Rock
For lathe and planer tools, drills, reamers, broaches, form tools, hobs, taps
High speed steel, high red-hardness

R18
M Russia, 0.7 C, 18 W, 4 Cr, 1 V, bal Fe
Hardened C 64-66 Rock
For cutters, reamers, hobs, lathe and planer tools, form and milling cutters
High red-hardness
Type T1 high speed steel

R18F4K8M.
M-Russia, 1.25-1.4 C, 4.4-5.0 Cr, 15.5-17 W, 3.2-3.8 V, 7.5-8.5 Co, 1.2-1.5 Mo, bal Fe
Hardened. C 64-67 Rock
For cutters, reamers, broaches, taps, hobs, textile needles
High red-hardness.
High speed steel, abrasion resistant

R18K8F4M.
M-Russia; 1.3 C, 17 W, 4 Cr, 4 V, 1.4 Mo, 8 Co, bal Fe.
Hardened· C 64-67 Rock
For reamers, broaches, drills, hobs, taps, form cutters.
High-speed steel, high red-hardness.

R18K10.
M-Russia, 0.88 C, 4.0 Cr, 1.3 V, 18.3 W, 9.6 Co, bal Fe.
Hardened C 64-67 Rock
For cutters, reamers, broaches, drills, taps, hobs.
High-speed steel, high red-hardness

R43 see HEPPENSTALL R43.

R 448
Eng., C, 10-12 Cr, bal Fe
For gas turbine parts, corrosion and heat resistant

R2799
M 108, 70 Fe, 30 Ni
For compensating shunts for electrical equipment, temperature-sensitive, magnetic

RA 309
M-1209, 0.20 max C, 22-24 Cr, 12-15 Ni, bal Fe.
Annealed 85,000-95,000 TS, 40,000-50,000 YS, 55-45 El, 150-185 Brin
For furnace parts and equipment, refinery equipment, corrosion and heat resistant, austenitic

RA 310
M-1209, 0.25 max C, 24-26 Cr, 19-22 Ni, bal Fe
Annealed 95,000 TS, 45,000 YS, 50 El, 185 Brin
For furnace parts and equipment, gas turbine and jet engine components, corrosion and heat resistant, austenitic

RA 330
M-1209, 0.05 C, 1.5 Mn, 1.25 Si 19 Cr, 35 Ni, 43 Fe
Room temp 85,000 TS, 42,000 YS, 45 El
1400°F 34,000 TS, 18,800 YS, 64.8 El
Austenitic, non hardenable, heat and corrosion resistant alloy, weldable and machinable
For high temp applications, turbine parts heat exchangers, heat treating equipment radiant tubes, muffles
AMS 5592, AMS 5716

RA 333
M-1209, 0.05 C, 1.5 Mn, 1.25 Si, 25 Cr, 45 Ni, 3.0 Mo, 3.0 Co, 3.0 W, 18 Fe
Room temp 100,000 TS, 50,000 YS, 50 El
1400 F 57,200 TS 28,300 YS, 44.8 El
Austenitic, non-hardenable, heat and corrosion resistant alloy, weldable and machinable
For high temp application, turbine parts, radiant tubes, heat treating fixtures chemical plant equipment
ASM 5593, ASM-5517.

RA 430
M 1209; 0.12 max C, 14-18 Cr, bal Fe
Annealed 70,000-90,000 TS, 40,000-55,000 YS; 30-20 El, 55-40 RA, 140-160 Brin.
Cold rolled 90,000-130,000 TS, 65,000-120,000 YS, 20-2 El, 185-220 Brin
For oil burners, septic tanks, furnace parts, corrosion and heat resistant, ferritic

RA 446
M-1209; 0.20 max C, 23-27 Cr, 0.25 max Ni, bal Fe.
Annealed 80,000-90,000 TS; 50,000-60,000 YS, 25-20 El; 150-190 Brin.
For furnace parts, heat treat boxes, conveyor chains; heat resistant, ferritic

RA 600.
M-1209; 15 Cr, 8 Fe, 0.7 Mn, 0.05 C, bal Ni.
Hot Rolled. 110,000 TS; 45,000 YS; 40 El; 175 Brin.
Heat Treated: 112,000 TS; 49,500 YS, 41 El, 175 Brin.
For furnace parts, grids, gas turbine components, retorts.
Resists oxidizing and carburizing atmospheres, corrosion resistant.

RACO 5.
M-986, 0 10 C, 0.35 Mn, bal Fe.
For welding electrodes; for mild steel, AWS-E6030.

RACO 7
M 986, 0.07 C, 0.35 Mn, 0.10 Si, 0 03 S, 0 03 P, bal Fe.
For welding electrodes for mild steel, E-6010

RACO NO 8
M-986; 0 07 C, bal Fe
For welding electrodes, for mild steel

RACO NO. 11.
M-986, C, bal Fe
For A C. welding electrodes; for mild steel

RACO 13
M-986; 0 07 C, 0.30 Mn, 0.10 Si, 0.03 S, 0 03 P, bal Fe
For mild steel welding electrodes, F 6013.

RACO 20
M-986; 0.08 C, 0 35 Mn, 0.10 Si, 0 03 S, 0 03 P, bal Fe
For welding electrodes for mild steel; F-6020

RACO 25
M-986, 0 15 C, 1 0 Cr, 0 5 Mn, bal Fe
Welded. 200 Brin
For welding electrodes for mild steel, machinable

RACO 45.
M-986; 0 25 C, 2 5 Cr, 1.0 Mn, bal Fe
Welded: 450 Brin
For hard surfacing electrodes, wear resistant.

RACO 55
M-986; 0 4 C, 3 0 Cr, 1.5 Mn, bal Fe.
Welded: 550 Brin
For hard surfacing electrodes, wear resistant

RACO HD 64.
M-986; 0 08 C, 0 5 Mo, bal Fe
For welding electrodes, for high tensile steel

RACOLLOY MANGANESE
M-986; C, 14 Mn, 3 5 Ni, bal Fe.
For hard facing electrodes, for Mn steel, coated, austenitic

RACO RED LABEL
M-986; 0.1 C, 0 4 Mn, bal Fe.
For welding rods; gas welding

RACO TYPE D.
M-986, 0 10 C, bal Fe
For welding electrodes, E 4520 cored rod

RACO TYPE M.
M-986, 0.10 C. 0 40 Mn, 0.01 Si, 0 03 S, 0 03 P, bal Fe
For welding electrodes, copper coated

RADAX SPEZIAL.
M-1340; 1 45 C, 1 40 Cr, 0.60 Mn, bal Fe.
For bearings, bushings, cutters; oil or water hardened, wear resistant

RADAX W10
M-1340; 1.2 C, 1.0 W, 0.1 V, 0 2 Cr, bal Fe.
For cutters, dies; water hardened, wear resistant.

RADECO.
M-1322; 1.3 C, 4.3 Cr, 0.85 Mo, 3.8 V, 12 W, bal Fe
For forming and blanking dies, punches; high speed steel

RADIAMETAL
M-1, 47 Ni, bal Fe
For electrical equipment

RADIANITE
M-73, 0.7-0 8 C, 16 5-18 0 Cr, bal Fe
For cutlery, stainless articles, keen cutting edge

RADIKAL EXTRA.
M-1309, 0.82 C, 4.1 Cr, 0.85 Mo, 1.6 V, 8 7 W, bal Fe
For lathe and planer tools, drills, taps, reamers, high speed steel

RADIKAL EXTRA M
M-1309, 0 95 C, 4 Cr, 2 8 Mo, 3 0 W, 2 5 V, bal Fe
For lathe and planer tools hobs, broaches, form tools, drills
High-speed steel, high-red hardness

RADIKAL Mo 5
M 1309, 0 85 C, 6 7 W, 4 5 Cr, 2 0 V, 5 3 Mo, bal Fe
Hardened C 64 67 Rock
For lathe and planer tools, hobs, taps, drills, reamers, broaches
High speed steel, high red hardness

RADIKAL Mo6
M 1309, 0 85 C, 4 Cr, Mo, W, V bal Fe
For milling cutters, broaches, reamers taps, high speed steel

RADIKAL Mo 9
M-1309, 0 85 C, 4 Cr, 9 2 Mo, 2 W, 1 3 V, bal Fe.
Hardened C 64 68 Rock
For milling cutters, lathe and planer tools, broaches, reamers, hobs, taps
High speed steel, high red-hardness

RADIKAL Mo 55
M-1309, 0 85 C, 6 7 W, 4 5 Cr, 5 5 Co, 2 0 V, 5 3 Mo, bal Fe
Hardened C 64 66 Rock
For lathe and planer tools, hobs, taps, reamers, drills, broaches
High-speed steel high red hardness

RADIKAL Mo 60
M 1309, 1 25 C, 6 7 W, 4 5 Cr, 3 7 V, 5 3 Mo, bal Fe
Hardened C 64-66 Rock
For lathe and planer tools, reamers, broaches, hobs, taps, form cutters
High-speed steel, high red-hardness

RADIKAL Mo 92
M 1309, 1 1 C, 2 0 W, 4 2 Cr, 2 1 V, 9 2 Mo, bal Fe
Hardened C 64 67 Rock
For reamers, broaches, taps, hobs, form cutters.
High-speed steel, high red-hardness

RADIKAL Mo 95
M-1309; 0.85 C, 2 2 W, 4 2 Cr, 5.0 Co, 1 3 V, 8 8 Mo, bal Fe
Hardened C 64-66 Rock
For reamers, broaches, hobs, taps, lathe and planer tools
High-speed steel, high red-hardness

RADIKAL Mo 98
M-1309; 0 95 C, 2.2 W, 4.2 Cr, 8.0 Co, 2.2 V, 8.8 Mo, bal Fe
Hardened: C 64-67 Rock.

For reamers, drills, hobs, taps, broaches, lathe and planer tools
High speed steel, high red-hardness

RADIO ALLOY NO 30.
M-61; 98 Cu, 2 Ni
For electrical instruments, rheostats, voltage control relays; working temperature 350°C (max).

RADIO ALLOY NO 60
M-61, 95 Cu, 5 Ni
For electrical instruments, resistors, working temperature 350°C (max)

RADIO ALLOY NO 90.
M-61, 88 Cu, 12 Ni
For electrical instruments, resistors, working temperature 400°C (max)

RADIO ALLOY NO 180.
M-61, 95 Ni, 2.5 Si, 2.5 Mn.
For electrical instruments, resistors, working temperature 400°C (max)

RADIOHM
M-44, 10-17 Cr, 5 Al, bal Fe
Rolled 128,000-85,000 TS, 5-33 El
For radio tube parts, resistors, heat resistant to 1000°C, obsolete

RADIO METAL "A"
M-108, 50 Fe, 45 Ni, 5 Cu
For magnetic alloy for the cores of small transformers, high permeability

RADIUM A
M-959, 4.5 Sb, 4.5 Cu, bal Sn
Cast 12,850 TS, 28 Brin
For heavy duty bearings, bushings, Babbitt, M.P. 437-699°F

RAE 40 C
M-England 0.55 Mg, 2.0 Cu, 2.5 Mn, 4.4 Ni, 0.27 Be, bal Al
Wrought (at R.T.) 36,000 TS, 1.0 El
Wrought (at 752°F) 4120 TS, 59.5 El
For aircraft and jet engine parts
Good resistance to loads at moderately elevated temperatures

RAE 55
M-England, 0.71 Mg, 1.84 Cu, 2.02 Mn, 2.34 Ni, 0.2 Be, bal Al
Wrought (at R.T.) 39,700 TS, 9.5 El
Wrought (at 752°F) 4520 TS, 79.0 El
For aircraft and jet engine parts
Good resistance to loads at moderately elevated temperatures

RAFFINAL
M-249, M-493, M-541, 99.99 + Al
Soft 7000 TS, 3000 YS, 60 El, 14 Brin
Hard 16,000 TS, 15,000 YS, 6 El, 30 Brin
For window frames, door handles, chemical plant equipment, corrosion resistant

RAFFINAL
M-764, 99.9 Al
Annealed 6800 TS, 2800 YS, 35% El
For electrical conductors
High electrical conductivity.

RAILENDER
M-712; 0.35 C, 1.8 Cr, 0.12 V, bal Fe
320-336 Brin
For hard facing electrodes, for battered rail ends

RAILITE
M-211; 75 Fe, 25 Cu.
For bearing, oil-cushion bearings; sintered, self lubricating

RAILROAD "A" BRONZE
England; 0-20 Sn, 0-22 Zn, 0-20 Pb, 0-0.5 P, bal Cu.
For axle bearings, gears, piston rods, side valves, heavy duty

RAILROAD BRONZE DURABLE "K."
73.5 Cu, 9.5 Sn, 9.5 Zn, 7.5 Pb
For locomotive bearings, heavy duty

RAILROAD BRONZE DUTCH "F."
85.25 Cu, 12.75 Sn, 2.0 Zn
For eccentric straps for railroad, high strength

RAILROAD BRONZE FRENCH "B"
French, 82 Cu, 10 Sn, 8 Zn
For axle bearings; high strength

RAILROAD BRONZE FRENCH COMMON "C."
French, 78 Cu, 20 Sn, 2 Zn
For axle bearings, high strength

RAILROAD BRONZE GEARING "H"
88.8 Cu, 8.5 Sn, 2.7 Zn
For railroad gearing, tough

RAILROAD BRONZE GERMAN "J"
81 Cu, 15 Zn, 4 Pb
For locomotive bearings, heavy duty

RAILROAD BRONZE HARD "E"
87.05 Cu, 7.88 Sn, 5.07 Zn
For hard axle bearings, high strength

RAILROAD BRONZE "I"
89 Cu, 2.4 Sn, 7.8 Zn
For locomotive bearings, heavy duty.

RAILROAD BRONZE "L"
74.1 Cu, 3.7 Sn, 22.2 Zn
For locomotive pistons and piston rods, high strength

RAILROAD BRONZE LAFOND "D"
80 Cu, 18 Sn, 2 Zn
For axle bearings, high strength

RAILROAD BRONZE LAFOND "G"
84 Cu, 14 Sn, 2 Zn
For eccentric straps for railroads, high strength

RAILROAD BRONZE "M"
84.5 Cu, 10 Sn, 5 Pb, 0.5 P
For locomotive side valves, high strength.

RAILROAD BRONZE "N"
84 Cu, 8.5 Sn, 5 Zn, 2.5 Pb
For locomotive injectors, free-cutting

RAILROAD BRONZE "O"
88.5 Cu, 10 Sn, 0.5 P
For bronze parts, high strength

RAILROAD BRONZE "P."
80 Cu, 5 Sn, 15 Pb
For locomotive axle box bearings, heavy duty

RAILROAD BRONZE "Q"
75 Cu, 5 Sn, 20 Pb
For bearings, Babbitts, anti-friction.

RAIL STEEL
Eng., 0.50-0.89 C, 0.60-0.90 Mn, 0.04 max. P, 0.15 min Si, bal Fe
For steel rails, wear resistant

RAILWAY AXLE BOX
M-657, 83 Cu, 7 Sn, 6 Zn, 4 Pb.
Cast 30,000 TS, 12,000 YS, 18 El.
For castings, bearings, tough

RAILWEAR.
M-844, 0.7 C, 13 Mn, bal Fe.
Cast: 350-380 Brin
For hard surfacing electrodes, coated, for rail joints.

RAISED-LAY.
M-1066; precious metal tip on base metal blade.
For electrical bar contacts, laminated, composite

RAKEL'S METAL.
88 Cu, 10 Ni, 1 Mn, 1 Zn.
For corrosion resistant parts, corrosion resistant

RAMET 1
M-329; Submicron dispersion-strengthened carbide.
Hardness 91.5 Rock A,
Transverse rupture strength 400,000 psi;
Compraessive strength 525,000 psi,
Young's modulus 80×10^6 psi,
For machining high strength alloys and most "difficult-to-machine" alloys.

RAMSOS 1
M-1288, 0.30 C, 2.6 Cr, 0.3 V, 8.5 W, bal Fe
For punches, shears, extrusion rams, hot work steel, 30WCrV3411

RAMSOS 1C.
M-1288, 0.35 C, W, Cr, V, bal Fe
For punches, shears, crimpers, upsetters, hot work steel, 35WCrV4012

RAMSOS 1Mo.
M-1288, 0.35 C, 5 Mo, 2.5 Cr V, bal Fe
For punches, shears, crimpers, upsetters shears, hot work steel, 35MoCrV179.

RAMSOS 1N
M-1288, 0.25 C, W, Cr, Ni, V, bal Fe
For punches, shears, crimpers, hot work steel, 25WCrNiV3610

RAMSOS 2A
M-1288, 0.60 C, Mo, Cr, W, V, bal Fe
For punches, shears, crimpers, hot work steel, 60MoCrWV9515

RAMSOS 2B
M-1288, 0.60 C, W, Mo, Cr, V, bal Fe
For punches, shears, crimpers, hot work steel; 60WMoCrV2726

RAMSOS 3
M-1288, 0.35 C, Cr, W, Mo, Si, V, bal Fe
For extrusion rams, liners, punches, hot work steel, 35CrWMoSiV226

RAMSOS 5A
M-1288; 0.45 C, Cr, Ni, W, Si, Mn, bal Fe
For hot work tools, punches, crimpers, hot work steel, 45CrNiWSiMn5252

RAMSOS 6Mo
M-1288, 0.30 C, Cr, Mo, V, bal Fe
For hot work tools, hot work steel, 30CrMoV1328

RAMSOS 6(S6)
M-1288, 0.30 C, 1.1 Cr, 0.18 V, 3.75 W, bal Fe
For hot work tools, punches, crimpers, hot work steel, 30WCrV15

RAMSOS 7
M-1288, 0.45 C, 1.3 Cr 0.45 Mo, 0.8 V, 0.45 W, bal Fe
For hot work tools, hot work steel, 45CrVMoW58

RAMSOS 7Mo
M-1288. 0.30 C Cr, Mo, Mn, V, bal Fe
For hot work tools; 30CrMoMnV710, hot work steel

RAMSOS 8.
M-1288, 0.40 C, 2 Cr, 1 Mn, 0.25 Mo, bal Fe
For header tools, container jackets, 40CrMnMo7; hot work steel

RAMSOS 9
M-1288, 0.30 C, 2.5 Cr, 0.20 Mo, 0.15 V, bal Fe.
For extrusion press parts, mandrels, liners, 30CrMoV9; hot work steel

RAMSOS 55
M-1288, 0.55 C, 0.10-0.40 Si, 0.5-0.7 Mn, bal Fe.
For gears, shafts, axles, tools, DIN-C55WS, water hardened

RAMSOS 80
M-1288, 0.80 C, 0.10-0.40 Si, 0.5-0.7 Mn, bal Fe.
For tools, springs, cutters, drills, water hardened; Type W1

RAMSOS G1
M-1288, 0.55 C, 0.7 Cr, 0.18 Mo, 1.65 Ni, 0.2 V, bal Fe
For hot work tools, punches, upsetters, 55NiCrMoV6, hot work steel

RAMSOS G1M
M-1288, 0.50 C, 0.8-1.1 Mn, 0.25-0.50 Si, bal Fe
Heat treated, 115,000-135,000 TS
For gears, shafts, punches, crimpers, 50Mn4, oil hardened

RAMSOS G1 SPECIAL
M-1288, 0.50-0.60 C, 1.2 Cr, 0.35 Mo, 1.6 Ni, 0.2 V, bal Fe
For hot work tools, punches, crimpers, 56NiCrMoV7, hot work steel

RAMSOS G3
M-1288, 0.45 C, 0.25-0.50 Si, 0.3-0.8 Mn, bal Fe
For gears, pinions, shafts, axles, water hardened, C45W3

RAMSOS G4
M-1288, 0.60 C, 0.25-0.50 Si, 0.3-0.8 Mn, bal Fe
For crimpers, punches, tools, dies, C60W3, water hardened

RAMSOS G5
M-1288, 0.75 C, 0.25-0.50 Si, 0.3-0.8 Mn, bal Fe
For crimpers, tools, springs, punches, C75W3, water hardened

RAMSOS GF4
M-1288, 1.0 C, 0.25-0.50 Si, 0.3-0.8 Mn, bal Fe
For drills, taps, punches, tools, Type W1, water hardened, C100W?

RAMSOS KSZ
M-1288, 0.3 C, 0.5 Mn, 0.25 Si, 2.5 Cr, 0.15 V, bal Fe
For extrusion press parts, mandrels, liners, 30CrMoV9, hot work steel

RAMSOS MUK
M-1288, 0.45 C, 0.9 Si, 0.3 Mn, 1 Cr, 0.2 V, 1.8 W, bal Fe
For hot working tools, crimpers, upsetters, 45WCrV7, oil hardened

RAMSOS O
M-1288, 0.82 C, 4.1 Cr, 0.85 Mo, 1.6 V, 8.7 W, bal Fe
For lathe and planer tools, reamers, broaches, hobs, high speed steel, 82WV3419

RAMSOS O 2
M-1288; 0.65 C, 3.75 Cr, 0.85 Mo, 0.7 V, 8.5 W, bal Fe
For lathe and planer tools, drills, hobs, reamers, high speed steel, 65WMo348

RAMSOS OK
M-1288, 0.65 C, 3.75 Cr, 0.85 Mo, 8.5 W, 0.7 V, bal Fe
For lathe and planer tools, hobs, broaches, high speed steel, 65WMo348.

RAMSOS OO
M-1288; 0.95 C, 4 Cr, 1 V, Mo, W, bal Fe.
For cutters, drills, hobs, reamers; high speed steel; 95WMo1126

RAMSOS S4
M-1288; 0.30 C, 0.3 Mn, 2.35 Cr, 0.6 V, 4.25 W, bal Fe
Heat treated 198,000-242,000 TS
For extrusion dies, rams and liners, hot work steel, 30WCrV179

RAMSOS SGK.
M-1288, 0.30 C, Cr, Mo, Si, V, bal Fe
For punches, upsetters, crimpers, 30CrMoSiV-2011; hot work steel

RAMSOS SUPER A.
M-1288, 0.40 C, W, Mo, Cr, V, bal Fe
For tools, dies, upsetters, punches, 40WMoCrV-1838, hot work steel

RAMSOS SUPER K
M-1288, 0.30 C, W, Co, Cr, Mo, V, bal Fe.
For crimpers, dies, punches, shears, 30WCoCrMoV2424, hot work steel.

RAMSOS SUPER WN
M-1288, 0.55 C, Ni, W, Cr, Co, Si, V, bal Fe
For hot work tools, dies, 55NiWCrCoSiV484416, oil hardened

RAMSOS VC
M-1288, 0.40 C, Ni, Cr, Mo, bal Fe
For gears, axles, crankshafts, 40NiCrMo176, oil hardened, shock resistant

RAN
M-501, M-912, 0.45 C, 0.5 Cr, 1.5 Ni, bal Fe
For gears, shafts, crankshafts, bolts, studs, oil hardened, shock resistant

RAN 1 W H
M-501, M-912, 0.28-0.35 C, 0.5 Cr, 1.5 Ni, bal Fe
For gears, shafts, crankshafts, bolts, studs, oil hardened, shock resistant

RAN 2 W/H
M-501, M-912, 0.28-0.35 C, 0.7 Cr, 2.5 Ni, bal Fe
For gears, shafts, crankshafts, bolts, studs, oil hardened, shock resistant

RAN 3 W/H
M-501, M-912, 0.22-0.30 C, 0.7 Cr, 3.5 Ni, bal Fe
For gears, shafts, crankshafts, bolts, studs, oil hardened, shock resistant

RAN 6
M-501, M-912, 0.35 C, 1.3 Cr, 4.5 Ni, bal Fe
For gears, shafts, crankshafts, bolts, studs, oil hardened, shock resistant

RANALLOY TYPE A
M-1128, C, Mo, Ni, Cr, bal Fe
500 Brin
For hard surfacing electrodes, wear resistant

RANALLOY TYPE A
M-964, C, alloy, bal Fe
For hard surfacing electrodes, wear resistant

RANALLOY TYPE B
M-964, C, alloy, bal Fe
For hard surfacing electrodes; wear resistant

RANALLOY TYPE B
M-1128, C, Mo, Ni, Cr, bal Fe
530 Brin
For hard surfacing electrodes, wear resistant

RANALLOY TYPE C
M-964; C, alloy, bal Fe
For hard surfacing electrodes; wear resistant

RANALLOY TYPE C.
M-1128; C, Mo, Ni, Cr, bal Fe.
480 Brin.
For hard surfacing electrodes; wear resistant.

RANDALL.
M-1155, Cu-graphite.
For bearings; sintered

RANDOLF METAL.
For dental alloy; corrosion resistant

RAN FH
M-912, M-501, 0.23-0.30 C, 0.7 Cr, 3.5 Ni, bal Fe.
For gears, shafts, crankshafts, bolts, studs; oil hardened, shock resistant

RANGER D.R
M-69, 1.2 C, bal Fe
For drills, taps, cutters, drill rod, water hardening.

RANITE TYPE NO 4
M-1100, C, Si, Cr, Mo, Ti, B, bal Fe
Welded 520 Brin.
For hard facing electrodes, wear and shock resistant.

RANITE TYPE A
M-1100, 0.15 C, 0-15 Si, 0-15 Ti, 0-15 Cr, 0.15 Mo, B, bal Fe
Cast 300 Brin
For hard facing electrodes, high impact, moderate abrasion

RANITE TYPE B
M-1100, C, Si, Ti, Cr, Mo, B, bal Fe
Cast 444 Brin
For hard facing electrodes, wear and impact resistant

RANITE TYPE B-X
M-1100, C, Si, Ti, Cr, Mo, B, bal Fe
Cast 440 Brin
For hard facing electrodes, abrasion resistant

RANITE TYPE C
M-1100, C, Si, Ti, Cr, Mo, B, bal Fe.
Cast 600 Brin
For hard facing electrodes, for high abrasion

RANITE C X
M-1100, C, Cr, Fe
For hard surfacing electrode, abrasion resistant

RANITE TYPE D
M-1100, C, Si, Ti, Cr, Mo, B, bal Fe
Welded 630 Brin
For hard facing electrodes; wear and shock resistant

RANSCO ALLOY
M-1164, 2.5-3.25 C, 1.2 Si, 12-15 Ni, 5-7 Cu, bal Fe
Cast 20,000-35,000 TS, 125-200 Brin For diesel engine cylinder liner; centrifugally cast

RAN TUNG
M-1100, 60 WC in 40 tube binder
For hard facing electrodes, sintered

RAONEL 600
M-1209, 0.15 max C, 14-17 Cr, 6-10 Fe, 1 max Mn, 72 min Ni
Annealed 90,000 TS, 40,000 YS, 45 El, 65 RA
Cold Drawn 105,000-150,000 TS, 80,000-125,000 YS, 10-30 El, 30-60 RA
For regenerators, coolers, high temperature components and equipment
Good hot and cold workability

RAPIDE EXTRA B
M-1115, 0.65-0.80 C, 1 Co, 4.5 Cr, 17-19 W, 1.15 V, bal Fe
For cutters, taps, reamers, hobs, broaches, high speed steel, oil hardened

RAPIDE EXTRA-C
M-1115; 0.75-0.90 C, 4-5 Cr, 17-19 W, 1.0-1.5 V, 0.5-1.0 Co, bal Fe
For lathe and planer tools, milling cutters, taps, high speed steel, oil hardened.

RAPIDE EXTRA J.
M-1115; 0.7-0.9 C, 4-5 Cr, 17 14 W, 9-11 Co, 2 V, bal Fe
For lathe and planer tools, reamers, hobs, taps, broaches; high speed steel, oil hardened

RAPIDE L.
M 1115, 0.7 C, 19 W, 4 Cr, 2.2 V, bal Fe
For cutters, taps, reamers, hobs, broaches, drills, high speed steel, oil hardened

RAPID EXTRA
M-1114, C, 19 W, 4 Cr, 2.25 V, bal Fe
For tools, dies, cutters; high speed steel

RAPID EXTRA Mo
M-27, 0.8 C, 4 Cr, 6.5 W, 5 Mo, 2 V, bal Fe
For cutting tools, high speed steel.

RAPID FINISH.
M-69, 1.3 C, 0.75 Cr, 3.75 W, bal Fe
For plug gages, forming dies, punches, water hardening

RAPID FINISHING
M-261, C, alloy, bal Fe
For fast finishing tools, water hardened

RAPIDIT M
M-459, 1.1 C, 4.3 Si, 2.4 W, 2.4 Mo, 2.8 V, bal Fe
For welding rod, to repair high speed tools

RAPIDIT MA
M-459, 1.45 C, 4.3 Si, 2.4 W, 2.4 Mo, 2.8 V, bal Fe
For welding rod, to repair high speed tools

RAPIDIT W
M-459, 1.2 C, 0.35 Mn, 4.3 Cr, 10.5 W 4.3 V, bal Fe
For welding rod; to repair high speed steel

RAPIDIT WA
M-459, 1.6 C, 0.3 Mn, 4.3 Cr, 10.5 W, 4.3 V, bal Fe.
For welding electrode for repairing high speed tools

RAPID PANTHER
M-1114, 0.7 C, 19 W, 4 Cr, 2.25 V, bal Fe
For broaches, taps, reamers, hobs, lathe cutters, high speed steel, oil hardened

RAPID SPECIAL BNX
M-459, 0.8 C, 4 Cr, 0.3 Mo, 1.6 V, 8 W, 10 Co, bal Fe
For tools dies, cutters, high speed steel

RAPID SPEZIAL.
M-459, 0.7 C, 19 W, 4 Cr, 2.2 V, bal Fe.
For high speed cutters; high speed steel

RAPID SPEZIAL
M-1345, 0.95 C, W, Mo, bal Fe
For tools, dies, oil hardening

RAPID SPEZIAL BN
M-459, 0.82 C, 4.1 Cr, 0.85 Mo, 1.6 V, 8.7 W, bal Fe
For drills, taps, reamers, hobs, high speed steel

RAUCHBERG
Germ., 66-75 %Cu, 15-19 Pb, 10-5 Sn, 1-5 Sb.
For bearings, corrosion resistant

RAUENLOY
M-1138, C, Cr, Mo, V, bal Fe.
For leaf springs; tough, oil hardened

RAVEN MST.
M-1182; 0.90 C, 1.6 Mn, bal Fe.
For punches, dies, crimpers, chisels, cutters; Type O2, non-deforming, oil hardened.

RAVEN NBS
M-1182, 0.70 C, 0.75 Cr, 1.5 Ni, 0.25 Mo, bal Fe.
For punches, dies, rollers, mandrels; Type L6; oil hardened.

RAXA 129
M-1353, C, 3 Cr, bal Fe
For oil refinery equipment; creep and heat resistant.

RAXA ATV
M-1353, 1.45 C, 1.4 Cr, 0.6 Mn, 0.4 Si, bal Fe.
For bearings, liners, sleeves, dies, water hardened, wear resistant

RAXA BKI
M 1353, 2.1 C, 11.5 Cr, 0.7 W, bal Fe
For blanking and forming dies, punches, oil or air hardened, non deforming

RAXA BKR
M-1353, C, Cr, bal Fe
For blanking and forming dies, punches; non-deforming, oil or air hardened

RAXA BKS
M-1353, 2.1 C 11.5 Cr, 0.3 Mn, 0.35 Si, bal Fe
For blanking and forming dies, punches, oil or air hardened, non-deforming

RAXA BKV
M 1353, 1.65 C, 11.5 Cr, 0.1 V, bal Fe
For blanking and forming dies, air hardened, non deforming

RAXA C10
M 1353, 0.76 C, 10 Co, 4.2 Cr, 0.8 Mo, 1.8 V, 18 W, bal Fe
For lathe and planer tools, drills, reamers, taps, high speed steel

RAXA CMFR
M 1353, 0.20 C, 1.25 Mn, 1.15 Cr, bal Fe
For gears, cams, camshafts, fasteners, case hardening steel

RAXA CNV3
M-1353, C, alloy, bal Fe
For gears, cams, machine tool parts, case hardening steel

RAXA CNV5
M 1353, C, alloy, bal Fe
For gears, bolts, machine tool parts, case hardening steel

RAXA CNZ3
M-1353, C, alloy, bal Fe
For gears, bolts, machine tool parts, case hardening steel

RAXA CNZ5
M-1353, 0.19 C, 0.2 Mo, 1.25 Cr, 3.75 Ni, bal Fe
For gears, bolts, cams, camshafts, case hardening steel, shock resistant

RAXA CRO
M-1353, 0.30 C, 1 Si, 1.1 Cr, 0.18 V, 3.75 W, bal Fe.
For cold work tools, upsetters, header dies; oil hardened, tough

RAXA CRW
M-1353, 0.30 C, 1.1 Cr, 0.18 V, 3.75 W, bal Fe
For cold work tools, upsetters, header dies; oil hardened, tough

RAXA CWV5/W.
M 1353; C, alloy, bal Fe
For gears, shafts, crankshafts; oil hardened.

RAXA DBV.
M-1353; 0.45 C, Cr, V, Si, bal Fe.
For gears, bolts, crankshafts, springs; oil hardened, shock resistant.

RAXA DBV/K.
M-1353; 0.61 C, 1.18 Cr, 0.1 V, bal Fe.
For gears, springs, crankshafts; oil hardened, shock resistant.

RAXA DBV/W.
M-1353; 0.38 C, Cr, V, Si, bal Fe.
For gears, bolts, crankshafts; oil hardened, shock resistant

RAXA EXTRA 1
M-1353; 1.3 C, 0.25 max Si, 0.25 max Mn, bal Fe
For engravers' tools, taps, reamers; Type W1, water hardened.

RAXA EXTRA 2
M-1353; 1.15 C, 0.25 max Si, 0.25 max Mn, bal Fe
For drills, taps, reamers, broaches; Type W1, water hardened

RAXA EXTRA 3
M-1353, 1.0 C, 0.25 max Si, 0.25 max Mn, bal Fe.
For drills, taps, reamers, cutters; Type W1; water hardened

RAXA EXTRA 4
M-1353, 0.85 C, 0.25 max Si, 0.25 max Mn, bal Fe
For drills, taps, reamers, broaches; Type W1, water hardened.

RAXA EXTRA 5
M-1353; 0.75 C, 0.25 max Si, 0.25 max Mn, bal Fe
For springs, tools, punches, dies, crimpers, drills, rails, hammers, tools, springs

RAXA EXTRA-EXTRA 1
M-1353, 1.3 C, 0.25 max Si, 0.25 max Mn, bal Fe
For engravers' tools, taps, reamers; Type W1; water hardened

RAXA EXTRA EXTRA 2
M-1353, 1.1 C, 0.25 max Si, 0.25 max Mn, bal Fe
Annealed 110,000 TS, 58,000 YS, 18 El, 38 RA, 210 Brin
For drills, taps, springs, tools, reamers, Type W1, water hardened

RAXA EXTRA-EXTRA 3
M-1353; 1.0 C, 0.25 max Mn, 0.25 max Si, bal Fe
Annealed 100,000 TS, 53,000 YS, 21 El; 42 RA, 200 Brin.
For drills, taps, cutters, broaches, hobs, Type W1, water hardened

RAXA EXTRA-EXTRA 4.
M-1353, 0.85 C, 0.25 max Si, 0.25 max Mn, bal Fe
Heat treated. 190,000 TS, 145,000 YS, 10 El, 30 RA, 400 Brin
For drills, springs, punches, tools, Type W1; water hardened.

RAXA EXTRA-EXTRA 5
M-1353, 0.70 C, 0.25 max Si, 0.2 max Mn, bal Fe
Heat treated: 175,000 TS; 128,000 YS; 12 El; 37 RA, 355 Brin
For springs, rails, tools, hammers, axes, cutters, Type W1, water hardened

RAXA EXTRA-EXTRA 6
M-1353, 0.61 C, 0.25 Si, 0.65 Mn, bal Fe
Heat treated 160,000 TS; 114,000 YS; 12 El; 40 RA; 325 Brin
For rails, tools, springs, hammers, axes; water hardened

RAXA G15K.
M-1353; 0.25 C, 14.5 Cr, 0.7 Si, bal Fe.
Annealed: 95,000 TS; 50,000 YS; 25 El; 55 RA; 200 Brin.
For turbine blades, valves, pumps, surgical instruments, Type 420; stainless.

RAXA G17K
M-1353; 0.25 C, 17 Cr, 1.8 max Ni, bal Fe.
Annealed. 125,000 TS; 95,000 YS; 20 El, 55 RA; 260 Brin
For pumps, valves, marine hardware; Type 431; corrosion and heat resistant

RAXA G28NK
M-1353; 0.4 C, 1.3 Si, 27 Cr, 4 Ni, bal Fe.
Cast 90,000 TS; 65,000 YS; 2 El; 212 Brin
Aged: 97,000 TS; 65,000 YS, 18 El; 210 Brin
For cylinder liners, bushings, valve seats and bodies, heat resistant, Type CC50

RAXA G30K
M-1353, 1.2 C, 1.3 Si, 29 Cr, bal Fe.
For rollers, crushers, rabble arms; heat and abrasion resistant

RAXA G30MK
M-1353, 1.2 C, 1.3 Si, 29 Cr, 2 Mo, bal Fe
For rollers, crushers, rabble arms, grate bars, heat and abrasion resistant

RAXA G188K
M-1353, 0.15 C, 1.5 Si, 18 Cr, 8.5 Ni, bal Fe.
Annealed 80,000 TS, 35,000 YS; 55 El; 75 RA; 150 Brin
Cold drawn. 180,000 TS, 15,000 YS; 10 El, 250 Brin
For chemical plant equipment, tanks, mixers; Type 302, stainless, austenitic.

RAXA G188SK
M-1353, 0.15 C, 18 Cr, 8.5 Ni, 0.2 S, bal Fe.
Annealed 80,000 TS, 40,000 YS; 50 El, 70 RA; 150 Brin
For screw machine products, shafts, fasteners, Type 303, stainless, free-cutting

RAXA G199K
M-1353, 0.15 C, 18 Cr, 9.5 Ni, 2 Mo, bal Fe
Annealed 85,000 TS, 35,000 YS, 50 El, 65 RA; 160 Brin.
For acid resistant chemical plant equipment, tanks, Type 316, stainless, austenitic.

RAXA G199SK
M-1353, 0.15 C, 18 Cr, 9.5 Ni, 2 Mo, 0.2 S, bal Fe
Annealed 85,000 TS, 35,000 YS, 50 El, 65 RA, 160 Brin
For screw machine products, fasteners; stainless, austenitic, free-cutting

RAXA GARANT 10
M-1353, 0.85 C, 4.1 Cr, 0.85 Mo, 2.5 V, 12 W, bal Fe
For lathe and planer tools, reamers, taps, hobs; high speed steel

RAXA GARANT 18
M-1353; 0.74 C, 4.1 Cr, 1.1 V, 18.5 W, bal Fe
For drills, hobs, reamers, taps, broaches, high speed steel

RAXA GARANT 33
M-1353, 0.85 C, 2.8 Co, 4.3 Cr, 0.85 Mo, 2.1 V, 12 W, bal Fe
For drills, hobs, reamers, taps, broaches; high speed steel

RAXA GARANT 50
M-1353, 0.79 C, 4.3 Co, 4.3 Cr, 0.75 Mo, 1.5 V, 18 W, bal Fe.
For lathe and planer tools, hobs, reamers, taps; high speed steel.

RAXA GARANT 55.
M-1353; 0.79 C, 18 W, 4.7 Co, 1.5 V, 4.3 Cr, bal Fe.
For reamers, broaches, taps, form cutters; high speed steel.

RAXA GARANT 70.
M-1353; 1.3 C, 4.3 Cr, 0.85 Mo, 3.8 V, 12 W, bal Fe.
For engravers' tools, form cutters, high speed steel.

RAXA GARANT 100.
M-1353; 1.35 C, 4.3 Cr, Co, W, V, bal Fe.
For engravers' tools, form cutters, reamers; high speed steel.

RAXA GARANT 200.
M-1353; 0.76 C, 10 Co, 4.2 Cr, 0.8 Mo, 1.8 V, 18 W, bal Fe.
For lathe and planer tools, reamers, broaches; high speed steel.

RAXA GARANT 300.
M-1353; 0.7 C, Co, V, Cr, W, bal Fe.
For lathe and planer tools, drills, taps, hobs, high speed steel.

RAXA GARANT II.
M-1353; 0.82 C, 4.1 Cr, 0.85 Mo, 1.6 V, 8.7 W, bal Fe.
For lathe and planer tools, reamers, broaches, hobs; high speed steel.

RAXA GARANT III.
M-1353; 0.95 C, 4.3 Cr, W, V, bal Fe.
For lathe and planer tools, reamers, broaches; high speed steel.

RAXA GBS.
M-1353; 1.25 C, 1.15 Si, 0.70 Mn, 1.2 Cr, bal Fe.
For bearings, sleeves, liners, water hardened, wear resistant.

RAXA GC8.
M-1353, 0.3 C, 2.2 Si, 6 Cr, bal Fe
For oil refinery equipment; heat and creep resistant.

RAXA GC9
M-1353; 0.5 C, 1.5 Si, 17 Cr, bal Fe.
For oil refinery equipment; heat resistant

RAXA GC10.
M 1353; 0.6 C, 1.5 Si, 22 Cr, bal Fe
For oil refinery equipment; heat resistant.

RAXA GC11
M-1353, 0.6 C, 1.5 Si, 29 Cr, bal Fe.
For oil refinery equipment, rabble arms, heat resistant

RAXA GCN10.
M-1353, 0.4 C, 2 Si, 22 Cr, 9.5 Ni, bal Fe.
Cast: 85,000 TS; 45,000 YS, 35 El, 165 Brin.
For furnace parts, salt pots, retorts, heat treat boxes; Type HF; corrosion and heat resistant.

RAXA GCN12
M-1353; 0.4 C, 27 Cr, 4 Ni, 1.3 Si, bal Fe.
Cast: 90,000 TS; 65.000 YS; 2 El, 212 Brin
Heat treated: 97,000 TS; 65,000 YS, 18 El, 210 Brin.
For cylinder liners, bushings, valve seats, Type CC50; corrosion and heat resistant

RAXA GCN12X
M-1353, 0.4 C, 2 Si, 25 Cr, 19 Ni, bal Fe.
Cast: 75,000 TS; 50,000 YS; 17 El; 170 Brin
Aged: 85,000 TS; 50,000 YS; 10 El; 190 Brin.
For furnace parts, retorts, rabble arms, pots; Type HK; corrosion and heat resistant

RAXA GCV9.
M-1353; 0.5 C, 1.5 Si, 17 Cr, bal Fe.
For oil refinery equipment; heat resistant.

RAXA GCV11.
M-1353; 1.3 C, 1.5 Si, 29 Cr, bal Fe.
For rollers, crushers, grate bars; heat and wear resistant.

RAXA GL1
M-1353; 0.53 C, 0.9 Si, 0.9 Mn, bal Fe.
For gears, bolts, machine tool parts; water hardened.

RAXA GL2.
M-1353, 0.40 C, Cr, Mn, Mo, bal Fe.
For gears, bolts, machine tool parts; oil hardened, tough

RAXA GL3
M-1353; 0.55 C, 0.7 Cr, 1.65 Ni, 0.1 V, 0.18 Mo, bal Fe
For gears, bolts, fasteners, crankshafts; oil hardened, shock resistant.

RAXA GL4.
M-1353, 0.56 C, Cr, Ni, Mo, V, bal Fe.
For gears, bolts, crankshafts, fasteners; oil hardened, shock resistant

RAXA HDS
M-1353; 0.35 C, 1.05 Cr, 0.18 V, 1.85 W, bal Fe.
For cold work tools, headers, upsetters; oil hardened, tough

RAXA HDS/H
M-1353, 0.45 C, 1 Cr, 0.2 V, 1.85 W, bal Fe.
For cold work tools, headers, upsetters, oil hardened, tough

RAXA HM
M 1353; 0.45 C, Ni, Cr, W, bal Fe
For cold work tools, upsetters, punches, shears; oil hardened, tough

RAXA HSS
M-1353, 1.05 C, 1 Cr, 1.15 W, bal Fe
For bearings, cutters, liners, water hardened, wear resistant

RAXA HWA
M-1353, 0.30 C, 2.65 Cr, 0.35 V, 8.5 W, bal Fe.
For extrusion rams and liners, mandrels, oil hardened, hot work steel

RAXA HWA SPEZIAL
M-1353, 0.30 C, 2 Co, 2.4 Cr, 0.25 V, 8.5 W, bal Fe
For extrusion rams and liners, mandrels; oil hardened, hot work steel.

RAXA KEV
M 1353, C, alloy, bal Fe
For machine tool parts, oil hardened

RAXA KLW
M 1353, C, alloy, bal Fe.
For machine tool parts, oil hardened.

RAXA KSM
M-1353, 1.0 C, 0.2 Si, 0.25 Mn, 0.1 V, bal Fe
Annealed. 100,000 TS; 53,000 YS; 21 El; 42 RA, 200 Brin
For springs, cutters, drills, taps, reamers, Type W2, water hardened.

RAXA MKS
M-1353, 1.0 C, 0.25 Si, 0.07 Mn, 1.1 Cr, bal Fe.
For bearings, liners, sleeves; water hardened, wear resistant.

RAXA MN12.
M-1353, 0.2 C, 13 Mn, bal Fe.
Annealed: 95,000 TS; 50,000 YS; 25 El; 55 RA; 195 Brin.

Cold drawn: 105,000 TS; 85,000 YS; 17 El; 50 RA; 215 Brin.
For turbine blades, valves, cutlery, surgical instruments; Type 420; stainless.

RAXA MSA.
M-1353; 0.9 C, 1.9 Mn, 0.1 V, bal Fe.
For punches, dies, crimpers, upsetters; oil hardened, nondeforming.

RAXA MWA.
M-1353; 0.3 C, 2.35 Cr, 0.6 V, 4.25 W, bal Fe.
For extrusion dies and rams, upsetters, headers; oil hardened, tough.

RAXA MWH.
M-1353, C, alloy, bal Fe.
For gears, shafts, axles, bolts; oil hardened, tough.

RAXA MWV.
M-1353; 0.45 C, Ni, Cr, bal Fe.
For crankshafts, gears, bolts; oil hardened, shock resistant.

RAXA NWP
M-1353, 0.50 C, 1.05 Cr, 3.25 Ni, bal Fe.
For gears, bolts, fasteners, crankshafts; oil hardened, shock resistant.

RAXA PCO
M-1353, 0.40 C, 13 Cr, bal Fe
Annealed: 95,000 TS, 50,000 YS; 25 El, 55 RA, 196 Brin.
For valves, cutlery, surgical and dental instruments, Type 420; stainless

RAXA R10
M-1353, C, alloy, bal Fe
For machine tool parts

RAXA R15
M-1353, C, alloy, bal Fe
For machine tool parts

RAXA R60
M-1353, C, alloy, bal Fe
For machine tool parts

RAXA R70
M-1353, C, alloy, bal Fe
For machine tool parts

RAXA REC60
M-1353, C, Cr, bal Fe.
For machine tool parts.

RAXA RWS5
M-1353, C, W, bal Fe
For machine tool parts

RAXA RZM
M-1353, 1.4 C, 0.1 V, 0.3 Mn, 0.25 Si, bal Fe
For engravers tools, form cutters, taps, drills; water hardened, Type W2.

RAXA SPEZIAL 1
M-1353, 0.9 C, 0.25-0.50 Si, 0.3-0.8 Mn, bal Fe.
Heat treated 190,000 TS; 145,000 YS; 10 El; 30 RA, 400 Brin.
For springs, tools, dies, drills, taps, Type W1, water hardened

RAXA SPEZIAL 2.
M-1353; 0.75 C, 0.25-0.50 Si, 0.3-0.8 Mn, bal Fe.
Heat treated 185,000 TS, 140,000 YS; 15 El; 38 RA; 400 Brin
For springs, rails, hammers, dies, crimpers; Type W1, water hardened.

RAXA SPEZIAL 3.
M-1353; 0.67 C, 0.25-0.50 Si, 0.3-0.8 Mn, bal Fe
Heat treated: 172,000 TS; 125,000 YS; 14 El; 40 RA; 350 Brin
For springs, rails, hammers, axes, punches; water hardened.

RAXA SPEZIAL 4.
M-1353; 0.60 C, 0.25-0.50 Si, 0.3-0.8 Mn, bal Fe.
Heat treated: 160,000 TS; 113,000 YS; 12 El; 40 RA; 325 Brin.
For springs, bolts, hammers, axes, punches; water hardened.

RAXA SPEZIAL 5.
M-1353; 0.45 C, 0.25-0.50 Si, 0.3-0.8 Mn, bal Fe.
Hot rolled: 98,000 TS; 59,000 YS; 24 El; 45 RA; 212 Brin.
For gears, bolts, fasteners, crankshafts; water hardened.

RAXA SPEZIAL 6
M-1353; 0.35 C, 0.25-0.50 Si, 0.3-0.8 Mn, bal Fe.
Hot rolled: 85,000 TS; 54,000 YS; 30 El; 53 RA; 185 Brin.
For gears, bolts, fasteners, machine tool parts; water hardened

RAXA SPS
M-1353, 0.67 C, 1.3 Si, 0.5 Cr, bal Fe.
Heat treated: 170,000 TS; 125,000 YS; 15 El; 40 RA; 350 Brin
For punches, crimpers, riveters, water hardened, tough

RAXA SSWR
M-1353; 0.90 C, 0.25 Si, 0.8 Cr, bal Fe.
Heat treated: 190,000 TS; 145,000 YS; 10 El; 30 RA, 400 Brin.
For springs, tools, cutters, drills, taps; Type W1; water hardened

RAXA UW10.
M-1353, C, alloy, bal Fe.
For machine tool parts

RAXA UW13
M-1353, C, alloy, bal Fe
For machine tool parts.

RAXA VS6
M-1353, C, alloy, bal Fe
For machine tool parts

RAXA WCH
M-1353, 0.45 C, W, Cr, V, bal Fe
For dies, tools, oil hardened

RAXA WCNU
M-1353; C, alloy, bal Fe
For machine tool parts.

RAXA WHW
M-1353, 0.55 C, 0.9 Si, 1.05 Cr, 0.18 V, 1.8 W, bal Fe
For cold work tools, heading dies, upsetters, oil hardened, tough.

RAXA WP6
M-1353, C, alloy, bal Fe
For machine tool parts, oil hardened

RAXA WS1.
M-1353, 1.2 C, 0.20 Cr, 0.1 V, 1.0 W, bal Fe
For cutters, bearings, forming dies, oil or water hardened.

RAXA WSM
M-1353, C, alloy, bal Fe.
For machine tool parts; oil hardened.

RAXA WZR
M-1353, C, Cr, W, bal Fe.
For forging and heading dies; oil hardened.

RAXA ZHW
M-1353; C, alloy, bal Fe.
For machine tool parts.

RAXA ZVW.
M-1353, 1.42 C, W, V, bal Fe.
For bearings, engraving tools, cutters; oil hardened.

RAYMUR.
Cu-Ni.
For ornamental and corrosion resistant parts; corrosion resistant.

RAYO.
85 Ni, 15 Cr.
For resistance alloy; heat resistant.

R BRAND COPPER.
M-558; Fire refined copper ingot.
For remelting copper for copper alloy.s

RCA NO. 91.
M-1465; Ni-Co.
For electronic equipment; heat resistant.

RCA NO. 97.
M-1465; Ni-Co.
For electronic equipment; heat resistant.

RCA-N9.
M-1465; 0.10 C, 0.20 Mn, 0.16 Si, 0.05 Mg, bal Ni.
For filaments.

RCA-N91.
M-1465; 0.04 min C, 0.10 Si, 0.10 Mn, 20 Co, bal Ni.
For rectifier filaments.

RCA-N97.
M-1465; 40 Co, 0.16 Si, 0.10 Mn, 0.04 min C, bal Ni.
For rectifier filaments.

RCA-N100.
M-1465; 0.10 C, 2 W, 1 Al, 0.05 Mg, bal Ni.
For filaments.

R.C.C.B.
M-1118; 2.25 C, 13 Cr, bal Fe.
For tools, dies, non-deforming.

R CUPRO-NICKEL (70/30).
M-121; 30 Ni, 70 Cu.
For heavy current resistances; low specific resistance.

R CUPRO-NICKEL (80/20).
M-121; 20 Ni, 80 Cu.
For heavy current resistances; low specific resistance.

R CUPRO-NICKEL (90/10).
M-121; 10 Ni, 90 Cu.
For heavy current resistances; low specific resistance.

R.C.W. 2.
M-1118; 0.28 C, 9 5 W, 2.5 Cr, 0.1 V, bal Fe.
For hot work dies and tools; hot work steels.

R.C.W. 2VA.
M-1118; 0.6 C, 9 5 W, 2.5 Cr, 0.1 V, bal Fe.
For hot work dies and tools; hot work steels.

R.C.W.M.
M-1118; 0.5 C, 9.5 W, 2.5 Cr, 0 1 V, bal Fe.
For hot work dies and tools; hot work steels.

RD ALLOY.
U.S.; Cu alloy.
For brazing of tools; age-hardenable.

R.D.S. see CARPENTER R.D.S.

R.D.X.
M-240; 0.7-0.8 C, 0.2-0.3 Mo, bal Fe.
For tools, chisels, header dies; water hardening.

REACTAL.
M-419; 3.2 C, 2.2 Si, 1.5 Ni, 0.8 Cr, bal Fe.
Cast: 42,000-55,000 TS; 187 Brin.
For corrosion and heat resisting parts; corrosion and heat resistant castings.

READILY FUSIBLE ALLOY.
67 Zn, 33 Cu.
For brazing; high strength.

READY-MARK.
M-1172; 0.90 C, 1.2 Mn, 0.5 Cr, 0.2 V, 0.5 W, bal Fe.
AISI Type 01 oil hardening tool steel.

RECIDAL.
Italy; Al alloy.
For screw machine products, fasteners; free-cutting.

RECIDAL 55.
M-Italy; 5.3-5.7 Cu, 0.2-0.3 Pb, 0 2-0.3 Cd, 0 4-0.6 Zn, 0.30 Fe, 0.25 Si, bal Al
For screw machine products, fasteners
Free-cutting, corrosion resistant.

RECKHAMMER SSW.
Germany; 0.90 C, 0 80 Cr, 0.30 Mn, bal Fe.
For bearings, liners, cutters, sleeves; water hardened, wear resistant.

RECO 1.
M-1188; 24 Ni, 13 Al, 4 Cu, bal Fe.
For permanent magnets, electrical and magnetic equipment.
High permeability.

RECO 2A.
Holland; 7 Al, 20 Ni, 20 Co, 7 Cu, 6.5 Ti, bal Fe.
For permanent magnets.

RECO II A
M-1188, C, alloy, bal Fe.
For permanent magnets; high permeability.

RECO 3A.
M-1188, 19 Ni, 12 Co, 10 Al, 6 Cu.
For permanent magnets, electrical and magnetic equipment.
High permeability

RECORD
M-815; Sb, Sn, bal Pb
For bearings; Babbitt.

RECORD 66
M-336; 0.7 C, 5 W, 6 75 Mo, 4.25 Cr, 1.75 V, bal Fe.
For gear cutters, form cutters, cold or hot work dies; high speed steel.

RECORD-EMINENT.
M-336; 0 85 C, 18.5 W, 4.25 Cr, 2.5 V, 10 5 Co, bal Fe.
For tools, dies, cutters; high speed steel.

RECORD EXTRA.
M-336, 0 8 C, 18 W, 3 75 Cr, 1.25 V, 2.25 Co, bal Fe
260 Brin
For dies, tools for high speed production for turning and heavy cutting, sealing material; high speed steel.

RECORD STAR.
M-336; 0 7 C, 4 Cr, 14 W, 2 V, bal Fe.
For tools, cutters; high speed steel.

RECORD SUPERIOR.
M-336; 0.8 C, 18 W, 4 Cr, 1 V, bal Fe.
For tools, dies for boring, planing and slotting, taps, reamers, punches; high speed steel.

REDALOY.
M-216; 55 Cu, 1 max Pb, 2.25 Al, bal Zn.
Extruded: 85,000 TS, 25,000 YS; 20 El; B 80 Rock.
Drawn: 90,000 TS; 35,000 YS; 15 El, B 85 Rock.
For hardware, plumbing, fixtures.
Corrosion resistance.

REDALOY NO. 1.
M-122; 53.75-54.25 Cu, 3.3-3.5 Pb, bal Zn.
77,000-88,000 TS; 24,000-64,000 YS; 7-17 El; 11-22 RA; 70-100 Brin
For screw machine parts; free cutting.

REDALOY NO. 2.
M-122; 57.5-58 Cu, 3.3-3.5 Pb, bal Zn.
63,000-70,000 TS; 23,000-56,000 YS; 13-32 El; 16-29 RA; 65-100 Brin.
For screw machine parts; free cutting.

REDALOY NO. 3
M-122, 52-53.7 Cu, 0.4-0.6 Pb, bal Zn
For pressure die castings, high strength.

REDALOY NO. 8
M-122, 54 Cu, 3.4 Pb, bal Zn
Forgings. 77,000 TS; 18 El, Rockwell B64.
For forgings, hardware, free-cutting

RED ANCHOR
M-342, 0.95-1.1 C, bal Fe
For general tools, chasers, water hardened

RED ANCHOR DRILL ROD
M-342, M-115, 0.95-1.10 C, bal Fe
80,000 TS; 60,000 YS; 25 El; 50 RA
For anvils, dental tools, spindles, precision shafts for motors, water hardened

RED ARROW
M-73, Co-Cr-W-C
For cutting tools, bits; cast-to-shape

RED ARROW 48 S
M-73; 25-35 Cr, 10-25 W, 40-60 Co.
For roughing and finishing cutting tools; heat resistant, cast alloy

RED ARROW 101
M-73, C, alloy, bal Fe
For cutting tools, oil hardening

RED ARROW 202
M-73, 25-35 Cr, 10-25 W, 40-60 Co.
For roughing and finishing tools, cutters; cast alloy

RED ARROW 222
M-73, 25-35 Cr, 10-25 W, 40-60 Co
For roughing and finishing cutting tools, cast alloy.

RED ARROW 303
M-73, 25-35 Cr, 10-25 W, 40-60 Co
For roughing and finishing cutting tools, cast alloy

RED ARROW 333
M-73, 25-35 Cr, 10-25 W, 40-60 Co
For cutting tools, cast alloy

RED ARROW WELDING ROD
M-73, W-Cr-Co-C
For hard surfacing welding rod, cast alloy

RED BRASS
M-8, 85 Cu, 15 Zn
Tubes and sheets: 42,000-50,000 TS, 20,000-40,000 YS, 43-4 El, 68 RA
For salt water pipes, plumbing, hardware, corrosion resistant

RED BRASS
M-33, 80 Cu, 20 Zn
Plates and sheets, 43,000-85,000 TS; 18,000-60,000 YS, 50-4 El; 53-150 Brin
For pipes, hardware, corrosion resistant

RED BRASS.
M-33; 85 Cu, 15 Zn.
Annealed: 42,000 TS; 14,000 YS, 45 El.
Rolled: 70,000 TS; 58,000 YS; 5 El.
For plumbing, pipe, tubes, hardware; corrosion resisting.

RED BRASS 24.
M-8; 85 Cu, 15 Zn.
Soft: 40,000 TS; 15,000 YS; 50 El.
Hard: 69,000 TS; 55,000 YS; 10 El.
For plumbing pipe, condenser tubes, radiator cores, red brass.

RED BRASS 230.
M-8, M-279, 85 Cu, 15 Zn
Ann: 39,000-47,000 TS; 8000-19,000 YS; 43-48 El.
Cold rolled: 44,000-90,000 TS; 23,000-80,000 YS; 2-39 El
Golden color, stress-corrosion resistant brass.
For jewelry, pen caps, pencil ferrules, steam iron tubes

RED CASTING BRASS
M-165; 85 Cu, 5 Sn, 5 Pb, 5 Zn
Cast: 27,000 TS; 18 El
For castings, hardware, GM No. 4041 M.

RED CIRCLE
M-905, 3.2 C, 1.5 Si, bal Fe
For cast iron rolls; chilled.

RED CIRCLE
M-750, C, alloy, bal Fe
For maintenance and repair operations; oil hardening

RED CUT COBALT
M-115, M-34, 0.72 C, 17.25 W, 4 Cr, 4.5 Co, 1.0 V, 0.5 Mo, bal Fe
For cutting and forming tools, lathe tools, planer tools, reamers, taps, applicable for deep cutting, scaly material.

RED CUT COBALT B
M-115, M-34, 0.78 C, 18 W, 4 Cr, 8.75 Co, 1.85 V, 0.75 Mo, bal Fe.
For cutting and forming tools, reamers, taps; high speed steel.

RED CUT SUPERIOR
M-115, M-34, 0.5-0.8 C, 0.25-0.40 Si, 17.5-18.5 W, 3.75-4.25 Cr, 0.95-1.15 V, bal Fe
Annealed: 105,000 TS, 75,000 YS, 14 El, 17 RA, 255 Brin
For tools, blanking dies, chasers, forming tools and dies, lathe and planer tools, taps; high speed steel, wear and abrasion resistant

RED CUT SUPERIOR FM
M-115, 0.5-0.8 C, 17.5-18.5 W, 3.75-4.25 Cr, 0.95-1.15 V, bal Fe
Annealed: 105,000 TS, 75,000 YS, 14 El; 17 RA; 235 Brin
For blanking and forming dies, lathe tools, high speed steel, free-cutting

RED CUT SUPERIOR TEMPER "J"
M-115, 0.50-0.55 C, 17.5-18.5 W, 3.75-4.25 Cr, 0.95-1.15 V, bal Fe
For high speed cutting tools, blanking dies, forming tools, taps, wear and abrasion resistant.

RED CUT SUPERIOR TEMPER "M"
M-115, 0.61-0.65 C, 17.5-18.5 W, 3.75-4.25 Cr, 0.95-1.15 V, bal Fe
For high speed cutting tools, blanking dies, forming tools, taps, wear and abrasion resistant.

RED CUT SUPERIOR TEMPER "O"
M-115, 0.66-0.70 C, 17.5-18.5 W, 3.75-4.25 Cr, 0.95-1.15 V, bal Fe.
For high speed cutting tools, blanking dies, forming tools, taps, wear and abrasion resistant.

RED CUT SUPERIOR TEMPER "P."
M-115, 0.71-0.75 C, 17.5-18.5 W, 3.75-4.25 Cr, 0.95-1.15 V, bal Fe
For high speed cutting tools, blanking dies, forming tools, taps; wear and abrasion resistant.

RED DEVIL.
M-712; 0.07 C, bal Fe.
Welded: 68,000 TS; 56,000 YS; 30 El; 50 RA.
For welding rods; flux coated.

RED DEVIL 75.
M-712; 0.1 C, 0.6 Mo, bal Fe.
Welded: 74,000 TS; 62,000 YS; 32 El; 65 RA.
For welding rods; flux coated.

RED DEVIL 85.
M-712; C, 0.9 Mo, bal Fe.
Welded: 80,000 TS; 72,000 YS; 24 El; 47 RA.
For welding rods; flux coated.

RED (EINHEITS) BRASS.
Germ.; 89-83 Cu, 5-12 Zn, 3-10 Pb, 2-5 Sn.
Hard: 80,000 TS; 71,000 YS; 4 El; 135 Brin.
Soft: 41,000 TS; 18,000 YS; 47 El; 52 Brin.
For tubing, hardware; Tombac, free-cutting.

RED FOX 30.
M-430; 0.45 C, Si, W, 20 Cr, 8 Ni.
Normalized: 115,000 TS; 32 El; 42 RA.
For exhaust valves; max working temp. 1050°C.

RED FOX-309.
M-430, M-1724; 0.2 C, 23 Cr, 14 Ni, bal Fe.
Annealed: 75,000 TS; 30,000 YS; 40 El; 220 Brin.
For high temperature service, kilns, combustion chambers, salt pots, brazing fixtures.
AISI Type 309, austenitic. Heat and corrosion resistant.

RED FOX-310.
M-430, M-1724; 0.2 C, 25 Cr, 21 Ni, bal Fe.
Annealed: 87,000 TS; 36,000 YS; 54 El; B 85 Rock.
For high temperature service, furnace equipment, carburizing boxes, valves, pumps.
Heat and corrosion resistant.
AISI Type 310, austenitic.

RED GOLD.
75 Au, 15 Cu.
For jewelry, ornaments; corrosion resistant.

REDHARD HS.
M-1082; 0.7 C, 18 W, 4 Cr, 2 V, bal Fe.
For cutting tools; high speed steel.

REDHARD NF.
M-1082; 45 Co, 32 Cr, 18 W, 2.5 C, 2.1 other elements.
Cast: 73,000 TS; 650 Brin.
For cutting tools, form tools; nonferrous, heat and abrasion resistant.

REDI H.
M-1322; 0.45 C, Si, Cr, V, bal Fe.
For gears, bolts, springs, crankshafts; oil hardened, shock resistant.

RED INDIAN.
M-435; 0.35 C, 5 Cr, 4.5 W, 0.3 Mo, 0.3 V, 0.5 Co, 1 Si, bal Fe.
For die casting dies, extrusion dies and mandrels; hot work steel.

REDI SPEZIAL.
M-1322; 0.61 C, 1.18 Cr, 0.1 V, 0.75 Mn, bal Fe.
For springs, dies, tools; oil hardened, tough.

RED LABEL EXTRA.
M-373; C as desired, 0.25 Mn, 0.25 Si, V optional, 0.015 max P, 0.015 max S, bal Fe.
AISI Type W2 water hardening tool steel.

RED LABEL PEERLESS.
M-343; 0.6-0.7 C, 3-4 Cr, 18-20 W, 1.2-1.5 V, bal Fe.
For cutting tools for heaviest cuts at highest speeds; high speed steel.

RED METAL.
70 Cu, 20 Zn, 6 Pb, 4 Sn.
For hardware; free-cutting.

RED RAY.
85 Ni, 15 Cr.
For heating elements; heat resistant.

RED SABRE.
M-24; 1.5 C, 12 W, 5 V, 4.75 Cr, 5 Co, bal Fe.
For tool bits, cutters, dies; Type T15; high speed steel.

RED SHADOW.
M-783; 0.40 C, 3.1 Cr, 0.25 Mn, 0.25 V, 10 W, bal Fe.
For tools, dies; hot work steel.

RED SHADOW.
M-289; 0.8 C, 4 Cr, 5 Mo, 6.5 W, 2 V, bal Fe.
For milling cutters, reamers, broaches, hobs, drills; high speed steel, oil hardened.

RED STAR TAP.
M-34; 1.1 C, bal Fe.
For taps, drills, cutters; highest quality carbon tool steel.

RED STAR TOOL.
M-34, M-115; 0.6-1.2 C, bal Fe.
For tools, drills, punches; standard carbon tool steel.

RED STAR TUNGSTEN 10 TEMPER
M-115, M-34; 0.90-1.0 C, 0.35-0.50 Cr, 1.5-1.7 W, 0.06-0.10 V, bal Fe.
Annealed: 90,000 TS; 65,000 YS, 22 El; 42 RA; 190 Brin.
For taps, reamers, punches, dies, finished tools, gages; water hardening.

RED STAR TUNGSTEN 12 TEMPER
M-115, M-34, 1.25-1.15 C, 0.60-0.80 Cr, 1.5-1.7 W, 0.10-0.25 V, 0.25 Mo, bal Fe
Heat treated: 180,000-145,000 TS; 154,000-210,000 YS; 1-13 El; 5-36 RA; 420-302 Brin
For taps, reamers, punches, dies, finished tools, gages, water or oil hardening

RED STAR TUNGSTEN DRILL ROD.
M-342, M-115; 1.2 C, 1.6 W, 0.7 Cr, 0.25 Mo, 0.2 V, bal Fe.
For drill rod, water hardening
